French ACD

Intensive Beginning French: Parisian Identity through Visual Media (124332)

Nicole Mills

2015 Fall (8 Credits) Schedule: TR 1100 AM - 1159 AM
                                         MTWRF 1000 AM - 1059 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

This intensive Beginning French course provides an accelerated introduction to Beginning French with intensive work on interpersonal communication and interpreting and producing language in written and oral forms. Students explore diverse facets of Parisian identity through the interpretation of various forms of visual media. Students learn to speak and write in the past, present, and future, make descriptions, ask questions, make comparisons, accept and refuse invitations, give advice, and express hypothetical situations, emotions, and opinions.

Course Notes: May not be used to fulfill the language requirement and may not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the French Acd course head and receive permission to enroll in the course.

This course is taught by members of the Department.

Class Notes: The on-line request form is available on the French Acd iSite and must be submitted by August 28, 2015 (Fall Term) and January 15, 2016 (Spring Term).

Recommended Prep: An advanced knowledge of at least one foreign language but no previous study of French.

French AX

Reading Modern French (111933)

Stacey Bourns

2015 Fall (4 Credits) Schedule: TR 0830 AM - 0959 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

An introduction to reading and translating modern French texts for students who require only a basic knowledge of French for research purposes. French Ax presents the principle structures of French grammar in a systematic and coherent manner and, at the same time, makes reading and translation assignments as discipline-specific as possible for each student's needs. An introduction to reading and translating modern French texts for students who require only a basic knowledge of French for research purposes. French Ax presents the principle structures of French grammar in a systematic and coherent manner and, at the same time, makes reading and translation assignments as discipline-specific as possible for each student's needs.

Course Notes: Conducted in English. Not open to students with a score of 500 or above on the Harvard Placement Test or the SAT II French test, to those with more than one year of undergraduate French, or to auditors. May not be used to fulfill the language requirement and may not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details and section on-line on the French Ax website.
Intermediate French: The Culture of Food and Friendship in Francophone Countries (126938)

Aurelie Chevant

2015 Fall (4 Credits)

**Schedule:** MTWR 0900 AM - 0959 AM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

In this intermediate level language course, students will study and discuss issues faced in contemporary France and other francophone countries. Students will interpret French and francophone culture, in particular the different customs surrounding food and friendship, through a variety of texts, films, and multimedia resources, while participating in a range of oral and written communicative activities. Students will also review and refine their knowledge of various grammatical structures.

**Course Notes:** Conducted in French. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the French C website.

**Recommended Prep:** A score no lower than 451 and no higher than 600 on the SAT II test or the Harvard Placement Test; 3 years of French in high school; French A, Ab, Acd, or Bab; or permission of course head.

French 50

Upper-Level French II: Recounting the Francophone Experience: Love, Loss, and Rebellion (126998)

Aurélie Chevant

2015 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course builds on the interpersonal, interpretive, and presentational skills acquired in French 40, with a particular emphasis on honing students' writing proficiency. Students will read a broad range of stories, poems and essays, as well as view films and videos that explore timeless, ever-resonant themes: love and loss, culture and identity, and tradition and rebellion in the Francophone world. Using these texts, students will study and reproduce various genres of written and spoken French (description, portrait, film critique, etc.)

Course Notes: Conducted in French. Students may take no more than two courses numbered in the 50s. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the French 50 website.

Recommended Prep: French 40; a score of 721-750 on the SAT II test or the Harvard Placement test; or permission of course head.

### French 61B

From Comic Books to Graphic Novels: Representations of Francophone Identities (160596)

_Aurelie Chevant_
A French language, culture, and literature course designed to introduce students to the format of bande dessinée and roman graphique in the Francophone world. Using contemporary Francophone comics, graphic novels, and blogs bandes dessinées, students will explore the history of the genre, from the 1960s to the present, and study its social and cultural functions as representations of national identity, social satires, and new expressions of post-colonial and feminist discourses. Students will participate in a range of written and oral activities, culminating in a presentation of their own graphic story, which they will have drafted throughout the course of the semester.

Course Notes:  
Note: Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than two courses at the 60 level.  
Prerequisite: French 50 or another French course at the 50 level; 751-780 on the SAT II or the Harvard placement test; or permission of course head.

French  61C

The New Wave: Reinventing French Cinema (109320)

Ericka Knudson

In this introductory course about the Nouvelle Vague, students gain a unique perspective on French society, culture, and film in the 1950s and 1960s by studying the works of Jean-Luc Godard, François Truffaut, Éric Rohmer, Jacques Rivette, and Claude Chabrol (among others). Students develop their writing and reading skills through film analysis and hone their speaking ability and listening comprehension through film screenings, examination of dialogue, and class discussions.

Course Notes:  
Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than two courses at the 60-level.

Recommended Prep:  
French 50 or another French course at the 50-level; 751-780 on the SAT II or the Harvard placement test; or permission of the course head.

Modern Stories about Paris (116673)
Ericka Knudson
2016 Spring (4 Credits) Schedule: TR 1130 AM - 1259 PM
Instructor Permissions: None Enrollment Cap: n/a

This course examines contemporary narratives set in Paris. Students explore writers' and filmmakers' perceptions of Paris and analyze the different ways in which the Parisian experience is presented. By reading and viewing stories about Paris, students gain insights into methods of narration and integrate various techniques into their own writing and speaking. They also develop a sophisticated understanding of how the French language is evolving, especially in its spoken form.

Course Notes: Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than two courses at the 60 level. Not open to students who have already taken French 51.

Business French: Cultural and Communicative Foundations (148202)

Aurelie Chevant

2016 Spring (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

This course focuses on the cultural knowledge, vocabulary, and linguistic skills and tools that are needed to work and succeed in an international French-speaking setting. It provides an overview of the organization and culture of French companies, highlighting important aspects of conducting business in France, such as attitudes, customs, written and unwritten laws, as well as economic and geographical factors. Moreover, students learn specialized French business terminology and acquire the language skills needed to understand and discuss, in speaking and writing, topics within a professional environment.

Course Notes: Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details and section on-line on the French 61N website.

Class Notes: Students who have taken French 55 should not take this course.

Recommended Prep: A score of 721-750 on the SAT II test or the Harvard Placement test; French 40 or 50; or permission of course head.

Introduction to French Literature II: 19th and 20th Centuries: Tales of Identity (119121)

*Janet Beizer*

2015 Fall (4 Credits)  
**Schedule:** TR 1100 AM - 1159 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

How do we know ourselves? Traditional definitions of the self have been founded on family, gender, race, religion, nationality. We'll read a number of texts from the 19th-21st centuries that pose questions and complicate answers to questions of identity. Readings include works by Claire de Duras, Balzac, George Sand, Merimee, Colette, Nothomb, and LeClezio.

**Course Notes:** Conducted in French; third hour devoted to discussion of texts studied.

**Recommended Prep:** A 50- or 60-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.

French 112

Lyric Poetry in Medieval and Renaissance France (12th to 16th century) (119220)

Virginie Greene

2016 Spring (4 Credits) Schedule: MW 1000 AM - 1129 AM
Instructor Permissions: None Enrollment Cap: n/a

Medieval and Renaissance poets created both new poetic forms and new figures of poets. Singers, writers, composers, lovers, dreamers, rhetoricians, moralists, and preachers: poets could be all of those. This course studies how their poetry grew from and elaborated upon the impulse "I have to sing" (chanter m’estuet) to become a highly self-conscious art of writing.

Course Notes: Conducted in French.

French 127
Talking About Food (109753)

Janet Beizer

2016 Spring (4 Credits) Schedule: R 0300 PM - 0459 PM

Instructor Permissions: None Enrollment Cap: n/a

In the 19th century food became an object of aesthetic discourse, a focus of gustatory enjoyment and verbal pleasure. Readings include 19th-century food writers and novelists, and contemporary historians, commentators, and theorists.

Course Notes: Excellent reading knowledge of French required; class discussions in English or French, to be decided.

Class Notes: This course will meet Th, 3-5, plus an additional hour to be arranged.

The 18th Century: Ethical Dilemmas (111339)

Christie Mcdonald

2016 Spring (4 Credits) Schedule: W 0100 PM - 0259 PM

Instructor Permissions: None Enrollment Cap: n/a

What does it mean to write about fanaticism, cultural differences, inequality, slavery, or seduction? How do Enlightenment writers present ethical problems of their time that resonate with our own? What is the relationship to authority in theological, philosophical, political and social models? We will explore the ethical dilemmas posed through connecting sensibility and the rational in literary, artistic, philosophical and political discourses between 1715-1789.

Course Notes: Course eligible for Gen Ed credit in Moral Reasoning, for concentration credit and a French secondary (if work done in French).

French 140
Gods and Giants in the French Renaissance (160567)

Phillip Usher
2015 Fall (4 Credits)  
**Schedule:**  
F 0100 PM - 0259 PM  

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a  

In this course we will study the "supersized agency" of gods and giants in 16th-century French literature. Keeping an eye on the relevance of such agencies in the age of the Anthropocene (where "we" are "giants"), we will trace the fuzzy boundaries between gods, giants, and humans. The first half of the course will focus on two "good" giants (Gargantua, Pantagruel) and one "bad" one (Goliath). The second half will focus on the post-classical survival of several Pagan gods (Jupiter, Juno, Neptune, etc.). Readings: Cicero, Des Masures, Du Bellay, Rabelais, Ronsard, etc. as well as contemporary theory.

**Course Notes:**  
Taught in French.

Vision and Violence in 17th Century France (127874)

* Sylvaine Guyot

2015 Fall (4 Credits)  
**Schedule:**  
T 0100 PM - 0259 PM  

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a  

Explores early modern ways of depicting and showing violence (physical, political, domestic, supernatural). The spectacle of violence represents a site of cultural conflict during the 17th century, since it implies both the pleasure taken by the viewer and the risk of imitation. Readings include plays, tragic histories, utopian and travel literature, historical and theoretical texts (Foucault, Rancière, Marin, Elias, Lyotard), and the analysis of images (paintings, frontispieces).

**Course Notes:**  
Conducted entirely in French.

Parisian Cityscapes: 1960-Present (109827)

* Verena Conley

2016 Spring (4 Credits)  
**Schedule:**  
M 0100 PM - 0259 PM  

**Instructor Permissions:** None  
**Enrollment Cap:** n/a  

Focuses on the transformations of Paris and the very concept of city under the impact of globalization and decolonization. By way of film, fiction, music, architecture and critical texts studies the effects of modernization and architectural reconstruction on the city's inhabitants. Also explores tensions between traditional and urban cultures, between the inner city and the banlieue.
Course Notes:
Conducted in French.

French 176
World Literature, Postcolonial Studies, Francophonie and Creolization: Reading in Context (160718)
Francoise Lionnet
2015 Fall (4 Credits) Schedule: M 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course provides an overview of major trends in Francophone and postcolonial studies that correlate with the field of world literature/littérature-monde.

Course Notes:
This course is taught in English, but students specializing in French will have a session in French and write their papers in French.

Class Notes:
This course complements the jointly listed Wellesley Coll./Harvard University course (French 182) taught at the Wellesley Newhouse Humanities Center on Tuesday evening 6-8 pm. But participation in the joint Wellesley/Harvard course, although recommended, is NOT a requirement for enrollment in this course.

French 182
French, Francophone, and Postcolonial Studies (160604)
Francoise Lionnet
2015 Fall (4 Credits) Schedule: T 0600 PM - 0829 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course examines texts that foreground pressing concerns of the postcolonial world: in Africa, the Creole islands of the Caribbean and Indian Ocean, Europe and South Asia. Close attention will be paid to the relationship of a colonial culture to that of the metropolis, the functioning of minority and majority languages, and the narrative techniques that make these differences manifest in fictional and theoretical writing. The course includes discussion of postcolonial theory and its many debates.

Class Notes:
This course is jointly offered with Wellesley College and will take place on the Wellesley campus. Please contact the department with questions regarding transportation.
French 189

"Re: History" Memory and Imagination from Camus to Annie Ernaux (156647)

Emmanuel Bouju

2015 Fall (4 Credits) Schedule: R 0100 PM - 0259 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

We will consider the specific link between memory and imagination in the French novel dealing with History during the second half of the 20th century til today. Readings include major authors (Camus, Antelme, Duras, Perec, Simon, Semprun, Modiano, Ernaux) as well as historical and theoretical texts (Ginzburg, Sontag, Certeau, Rothberg, Agamben...). We'll thus explore the way of "transcribing History, by recording it (Rec:), rewinding it (Rew:), reviewing it and replying to it (Re: History).

Transnationalism and the Francophone World: Race, Gender, Sexuality (161257)

Francoise Lionnet

2016 Spring (4 Credits) Schedule: T 0100 PM - 0259 PM

Instructor Permissions: None Enrollment Cap: n/a

This graduate course links different regions of the Francophone world and provides an introduction to the major debates about gender issues in postcolonial Francophone studies. We focus on the aesthetics and politics of writers who challenge the notion of a stable identity, be it national, racial or sexual. The course draws on the historico-cultural issues pertinent to each region (Africa, the Atlantic, Pacific, and Indian Ocean). Writers include Mariama Bà (Senegal), Maryse Condé (Guadeloupe/France/USA), Ananda Devi (Mauritius and France), Fatou Diome (Senegal and France), Assia Djebar (Algeria/France/USA), Marie Chauvet (Haiti), Shenaz Patel (Mauritius), and Linda Lê (Vietnam and France).

Class Notes: Readings will include:

• Mariama Bà, Une si longue lettre• Marie Chauvet, Amour, Colère, Folie• Maryse Condé, Traversée de la mangrove• Ananda Devi, Indian Tango• Fatou Diome, Le ventre de l'Atlantique• Assia Djebar, L'amour, la fantasía•
Recommended Prep: Advanced reading knowledge of French required.

Lives: Users' Manuals. The Documentary Literature in France Today (160602)

*Emmanuel Bouju*

2015 Fall (4 Credits)  
**Schedule:** T 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

What can French Literature be/do/hope for today? Can it reinvent the kind of "Vie mode d'emploi" Georges Perec once wrote? We will consider the possible answers to these questions by discussing the possibility of documentary narratives of the contemporary times. Readings include a series of very recent fiction and non-fiction novels, as well as theoretical texts (Barthes, Deleuze, Calvino, Agamben, Svetlana Boym, Hartmut Rosa...).

Subject: Italian

Italian AA

Beginning Italian I: Pathways to Italy (113814)

Elvira G. DiFabio
2015 Fall (4 Credits)  Schedule: MTWR 0900 AM - 0959 AM
Instructor Permissions: Instructor  Enrollment Cap: n/a

For students with little or no knowledge of Italian. Aims at achieving basic communication skills and vocabulary. Emphasis on oral expression and listening comprehension. The cultural component examines everyday life through a comparative perspective: families, shopping, food culture. This course will give you the language you need to communicate effectively in Italy, and is the best way to prepare for a summer study in Italy. Course materials include workbook, audio-lab, and video.

Course Notes: Conducted in Italian. Students whose placement score does not entitle them to enter a more advanced course are assigned to Italian Aa. Students who have studied Italian for two years or more in secondary school must begin at Italian Ab or higher. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Section on-line. Not open to auditors.

This course is taught by members of the Department.

Italian AB
Beginning Italian II: The Art and Craft of Italy (125061)

Elvira G. DiFabio

2015 Fall (4 Credits)  
Schedule: MTWR 1200 PM - 1259 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a

Continuation of Italian Aa, second semester beginning level. Increasing emphasis on reading and writing. The cultural component includes units on fashion, music, literature and film, as well as capsules on the history of modern Italy, through select readings and a feature-length film. Course materials include workbook, audio-lab and video.

Course Notes:  
May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Section on-line. Not open to auditors.

This course is taught by members of the Department.

Recommended Prep: Italian Aa, or a score of 450 or less on the SAT II test or the Harvard Placement test, or a score of 3 or less on the AP Italian exam, or two years of high school Italian, or permission of course head.

Intensive Beginning Italian: Special Course: Gateway to Italy (112340)

Elvira G. DiFabio

2016 Spring (8 Credits) Schedule: TR 1000 AM - 1129 AM
MWF 1000 AM - 1059 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

A complete first-year course in one term for students with no knowledge of Italian, focused on developing all four communicative skills. Students are introduced to contemporary Italian culture through a variety of topics from everyday life (family, shopping, food, fashion) to the arts (music, literature, cinema). Materials include films and cultural readings that present capsules on the history of modern Italy. Excellent choice for students planning to study in Italy.

Course Notes: May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Students who have not placed out of the language requirement must take one full year of a language. Italian Acd taken alone may not be used to fulfill the language requirement. However, there are ways to combine Italian Acd with another course in order to fulfill the language requirement. Consult Dr. Elvira DiFabio or the Undergraduate Adviser in Italian for details. Conducted in Italian. Not open to auditors.

Recommended Prep: An advanced knowledge of at least one foreign language, preferably a modern Romance language, but no previous study of Italian.

Advanced Oral Expression and Performance (116233)

Elvira G. DiFabio

2015 Fall (4 Credits) Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Ciak, si parla! Students develop oral expression and communication skills through the close reading of texts that are meant for performance, such as plays, film scripts, poetry, and music. Variation in diction and presentation techniques culminates in the adaptation and production of one or more of these texts for a public performance at the end of the term. Consult course website for current semester topics.

Course Notes: Conducted in Italian. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Appropriate for concentrators electing the Italian Studies or Romance Studies track. Not open to auditors.

This course is taught by members of the Department.

Recommended Prep: A score of 681-720 on the SAT II or the Harvard Placement Test; Italian 30, 35 or 36; equivalent preparation; or permission of course head.

Italian and the Community: Italy. Academic Internships in Italian Language and Culture: Special Crse (124993)

*Elvira G. DiFabio*

2015 Fall (4 Credits)  
**Schedule:** TBD  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

An opportunity to engage in the practical applications of Italian language and culture in an immersion environment.
Internships may include placement in a variety of sectors, including public education, the media and the arts.

**Course Notes:** Though academic internships may be arranged in the Greater Boston area, this course can be proposed as integral to a study abroad program in Italy, the details of which are to be coordinated in consultation with the course head and the Office of International Education. Students are expected to produce substantial research papers based on relevant class work and field placements. The student, under the guidance of faculty and study abroad advisers, is responsible for arranging the terms of the internship.

This course is taught by members of the Department.

**Class Notes:** Students must submit a written proposal to Dr. DiFabio by August 31, 2015 for Fall term enrollment and by January 23, 2016 for Spring term enrollment.

**Requirements:** Prerequisite: Italian 50

Gender and Italian Cinema (161242)

*Adam Muri-Rosenthal*

2016 Spring (4 Credits)  
**Schedule:** M 1100 AM - 1259 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

From challenging conventional male-female gender dynamics through radical feminist approaches, to juxtaposing narratives of homosexuality and the Holocaust, to toeing the line between fiction and documentary in the representation of transgender romance, Italian cinema has long struggled with contradictions between deeply entrenched gender norms and the populations that they marginalize. This course will explore Italian films that
undertake to disrupt traditional notions of gender in Italy.

**Course Notes:** Offered in English.

**Italy 2.0: Culture as a Source of Social and Economic Value (161265)**

*Pierluigi Sacco*

2016 Spring (4 Credits) **Schedule:** TR 1130 AM - 1259 PM  

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

The aim of the course is to use Italy as a case study to explore the manifold relationships between cultural and creative production and the socio-economic background. In an epoch in which the human kind has at its disposal the highest amount of resources, time, ability, and technology ever to produce innovative contents, are we witnessing the dawn of a ‘new Renaissance’ for culture, and in what sense?

**Class Notes:** Taught in English. Pier Luigi Sacco will be the instructor of this course.

**Situated Minds: Total Toxicity and Other Modernist Embodiment (160673)**

*Federica Pedriali*

2015 Fall (4 Credits) **Schedule:** W 1200 PM - 0159 PM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a

The course uses Davide Manuli's experimental film 'La leggenda di Kaspar Hauser' (2012) and two premises provocatively worked out from Cognitive Science and Deconstruction (the universe stinks, and the subject is totally toxic) to establish five units of work (Imposturing, Unreason, Potency, Hunger, and First-Last Subjects) based on five Italian master fictions (Verga's 'Mastro-Don Gesualdo', 1889; Pirandello's 'Uno nessuno centomila', 1926; Svevo's 'La coscienza di Zeno', 1923; Gadda's 'La cognizione del dolore', 1963-1970; Tommasi di Lampedusa's 'Il Gattopardo', 1958). Alchemy, biochemistry and the new media technology –radio and cinema primarily –will aid the provocation by taking it literally, i.e., organ by organ, to the heart of the Modernist challenge to this Cosmos. Classes will be conducted mostly in English, and will consist of a mix of lectures, close reading labs, and seminar presentations.

Renaissance Epic: War, Identity, Desire (108771)

Francesco Erspamer

2016 Spring (4 Credits)  
Schedule: W 0300 PM - 0529 PM

Instructor Permissions: None  
Enrollment Cap: n/a

We analyze the driving forces behind epic in the classic and medieval world, war, identity, and desire, and their transformation at the dawn of modernity. In order to prepare for the close reading of Torquato Tasso’s Jerusalem Delivered, we will study and discuss selected cantos from the Iliad, the Odyssey, the Aeneid, the Chanson de Roland, Dante’s Divine Comedy, Boiardo’s Orlando Innamorato and Ariosto’s Orlando Furioso.

Course Notes: Conducted in Italian.

Italian 172
Made In Italy: Italian Fashion Through the Ages (160682)

Maria Grazia Lolla

2016 Spring (4 Credits)  
Schedule: W 0100 PM - 0259 PM

Instructor Permissions: None  
Enrollment Cap: n/a
For over half a century, fashion has defined the image of Italy and Italians abroad. Both a business and an art, key to self-expression and subject to the regulation of church and state, profoundly personal and constitutive to national and international politics, fashion has drawn conspicuous resources, generated artifacts and attracted considerable intellectual attention. The course will reflect on how fashion was represented in Italian literature, the visual and performing arts and in legal and scholarly discourse from the Renaissance to the present. Topics will include the birth of "made in Italy" after World War II; fashion under fascism; the phenomenon of castrati and cicisbei; Renaissance self-fashioning and the relationship between fashion and modernity.

Course Notes: Reading in Italian and English. Discussion in Italian or English depending on enrollment.

Storytelling and The City: The Narrative Foundations of the Creative Economy (161258)

Pierluigi Sacco

2016 Spring (4 Credits) Schedule: T 0300 PM - 0459 PM

Instructor Permissions: None Enrollment Cap: n/a

This course investigates the impact that culture has on urban development, quality of living, and inclusiveness. We take an innovative narrative-based approach that builds upon Italo Calvino's Invisible Cities, Marco Polo's Travels, and recent literature on the bio-cultural approach to fiction. On this basis, we will be able to evaluate how culture-driven policies make the difference for cities, and under what conditions.

Class Notes: Pier Luigi Sacco will be the instructor of this course.

Italian Studies Colloquium (123829)

Francesco Erspamer

2016 Spring (4 Credits) Schedule: M 0500 PM - 0659 PM

Instructor Permissions: None Enrollment Cap: n/a

Current scholars in the field of Italian Studies present their most recent works on literature, art and architecture, history, and the social sciences. Students also learn how to conduct video interviews and write book reviews.

Course Notes: Conducted in Italian and English.

Class Notes: M., 5-7pm
Italian 244
The World’s Laboratory: Italian Biopolitics from Giordano Bruno to Roberto Esposito (160689)
Federica Pedriali
2015 Fall (4 Credits) Schedule: T 1100 AM - 1259 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
Course presents Italian Biopolitics (Agamben, Cavarero, Esposito, Negri-Hardt, Virno) kick-starting work from broad premises in Critical Theory (French, Other than French, After “Theory”) and on Italy as World’s Laboratory (early modern to present, with particular focus on 20thC). Verification material generates three further units of study (Hand Graffiti, Truth-Shouting, Legends Do Not Rest) putting theory to the practical test through select approaches to a canon of high-profile dissidents (Bruno, Gadda, Gramsci, Leopardi, Machiavelli and Pasolini). Body Theory, Cognitive Science and Political Theory further supplement core methods and claims.
Course Notes: Delivery formats: lectures, close reading labs, seminar presentations; mostly in English.

Italian 262
About Time: Nostalgia, Apocalypse, and Change in Italian Culture (108772)
Francesco Erspamer
2015 Fall (4 Credits) Schedule: F 0100 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
Studies the development of the concept of time in modern thought, with examples drawn mostly from Italian literature. Readings include Galileo, Vico, Leopardi, Verga, Pirandello, Tomasi di Lampedusa, Buzzati.
Course Notes: Conducted in Italian.

Subject: Latin American Studies

Latin American Studies  70
Modernity, Culture and Politics in Latin America (116263)

Mariano Siskind
2016 Spring (4 Credits)  Schedule:  T 0100 PM - 0259 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

Introduces students to central debates and problems that have shaped Latin American culture. We address questions of cultural identity, gender, race, politics, economics and aesthetics by looking at historical and literary texts, films, visual arts and urban development from an interdisciplinary perspective. We analyze colonial encounters; revolutions; US-Latin American relations; popular cultures from tango and samba to football and carnaval; Latin American cities and slums; and memory, trauma and traces of the region's dictatorships.

Course Notes:  Conducted in Spanish. Readings in Spanish and English.

**Subject: Portuguese**

**Portuguese Aa Section: 002**

Beginning Portuguese I (120398)

*Viviane Gontijo*

2015 Fall (4 Credits)  

**Schedule:** MTWR 1200 PM - 1259 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a

An introductory course designed to introduce the student with little or no knowledge of the language to the Portuguese-speaking world. Focuses on fundamental communication skills -- listening, speaking, reading, and writing -- and, at the same time, provides exposure to Portuguese-speaking cultures through media broadcasts, literature, films, music, and videos.

**Course Notes:** Conducted in Portuguese. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the Portuguese Aa website. Students who have studied Portuguese for two years or more in secondary school must begin at Portuguese Ab or higher. Students with an advanced knowledge of Spanish should enroll in Portuguese Ac instead of Portuguese Aa.

This course is taught by members of the Department.

Portuguese AC

Beginning Portuguese for Spanish Speakers I (113806)

Viviane Gontijo

2015 Fall (4 Credits)

Schedule: MTWR 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

An introductory language course designed for Spanish-speakers. Along with the fundamental communication skills understanding, speaking, reading and writing, the course will focus on those features of Portuguese which are most difficult for Spanish speakers: pronunciation, idioms and grammatical structures particular to Portuguese. Students will be introduced to the cultures of the Portuguese-speaking world through readings and authentic materials, including films, music, and videotapes.

Course Notes: Conducted in Portuguese. Requires a solid knowledge of but not necessarily native proficiency in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the Portuguese Ac website.

This course is taught by members of the Department.

Recommended Prep: 750 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; or a 40s level Spanish course.

Additional Course Attributes:

Portuguese ACD

Intensive Beginning Portuguese (156944)

Viviane Gontijo

2016 Spring (8 Credits) Schedule: TR 0900 AM - 1129 AM MWF 0900 AM - 0959 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

This intensive Beginning Portuguese course provides an accelerated introduction to Portuguese with emphasis on interpersonal communication and interpreting and producing language in written and oral forms. Goals include building students' vocabulary, fluency, proficiency, and confidence. Students are exposed to Brazilian Portuguese and culture through music, cinema, and various media sources. The course covers the equivalent of a full first-year of Portuguese language study.

Course Notes: May not be used to fulfill the language requirement and may not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the Portuguese Acd course head and receive permission to enroll in the course.

Class Notes: The on-line request form is available on the Portuguese Acd iSite and must be submitted by January 22, 2016.

Recommended Prep: An advanced knowledge of at least one other foreign language but no knowledge of Portuguese.

Brasil hoje: Contemporary Brazilian Culture through Media (114944)

Viviane Gontijo

2016 Spring (4 Credits) Schedule: TR 0100 PM - 0229 PM
Engages in systematic grammar review, along with practice in writing and vocabulary enrichment, while examining contemporary Brazil as presented in Portuguese-language press, television, literature, and film. Analyzes the ways Brazilians and non-Brazilians construct different and conflicting images of Brazil and "Brazilianness." Issues of race relations, national identity, ethnicity, and gender addressed. Discussions based on historical and literary texts, advertisements, films, videotapes of Brazilian television, and current issues of newspapers and magazines.

Course Notes: Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

This course is taught by members of the Department.

Requirements: Prerequisite: Portuguese CREQ; PORTUG 30

Portuguese and the Community (118080)

Everton Vargas da Costa

2016 Spring (4 Credits)  
**Schedule:** MW 0400 PM - 0529 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This is an advanced language course examining the Luso-African-Brazilian experience in the United States. This course promotes community engagement as a vehicle for greater linguistic fluency and cultural understanding. Students are placed with community organizations within the Boston area and volunteer for four hours a week. Class work will focus on expanding students' oral and written proficiency through discussing and analyzing readings, arts, and films by and about Luso-African-Brazilians in the US.

**Course Notes:** Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

**Class Notes:** For questions about enrollment, please contact Everton Vargas da Costa

Portuguese   61B
Communication and Culture within the Contemporary Brazilian Business World (160618)

2015 Fall (4 Credits)  
**Schedule:**

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course focuses on linguistic and cultural components of the contemporary Brazilian Business world. Students will experience the current Brazilian business world by using multi-media resources, focusing on practices, customs, and the linguistic intricacies involved when conducting business in Brazil. Immersed in a simulated professional environment, students will develop essential communicative skills in Brazilian Portuguese, engaging in interactive oral and written activities.

**Course Notes:** Students will have the option of taking the CELPE-BRAS exam for an official assessment of proficiency in Portuguese. This intensive course provides valuable preparation for those who intend to travel, study or work in Brazil.

**Recommended Prep:** Prerequisites: Portuguese 30, 40 or 59; or permission of course head.

Rhyme, Rhythm, and Verse in Brazil (161294)

Dylon Robbins
2016 Spring (4 Credits)

Schedule: F 1000 AM - 1159 AM

Instructor Permissions: None
Enrollment Cap: n/a

This course will explore a series of themes through the lenses of Brazilian and Lusophone poetry and song. We will develop close readings of works by Gregório de Mattos, Sousândrade, Cruz e Sousa, Mário de Andrade, Oswald de Andrade, Henriqueira Lisboa, Murilo Mendes, João Cabral de Melo Neto, Noel Rosa, Waly Salamão, Caetano Veloso, Torquato Neto, Augusto de Campos, and Ana Cristina César, among others. Through our readings, we will explore problems related to politics, power, and subversion; forms, objects, and materials; and loves and lovers, lost and found.

Class Notes: All course readings will be in Portuguese.

Portuguese 145
Transatlantic Africa and Brazil (128254)

Josiah Blackmore
2015 Fall (4 Credits)

Schedule: M 0200 PM - 0359 PM

Instructor Permissions: Instructor
Enrollment Cap: n/a

A study of the transatlantic enterprise between Portugal, Brazil, and Africa. We will scrutinize the historical and imaginative encounters with Africa and Brazil from the Middle Ages to Brazilian Romanticism. Topics include oceanic empire, monsters, shipwreck, cannibalism, the Atlantic slave trade, and debates on the African and Brazilian/New World indigene. Authors include Aristotle, Pliny, Zurara, Álvaro Velho, Caminha, Las Casas, Camões, and Castro Alves, as well as contemporary critics.

Course Notes: Conducted in Portuguese or English, to be determined by class composition. A reading knowledge of Portuguese or Spanish helpful but not required.

Dylon Robbins

2016 Spring (4 Credits)

**Schedule:** R 0530 PM - 0729 PM

**Instructor Permissions:** None

**Enrollment Cap:** n/a
In this course, we will discuss the different approaches to thinking and talking about music and sound from the vantage point of some of the key paradigms of Latin American cultural and intellectual history. How does music relate to space, the social, nationalism, race, ethnicity, and embodiment? How have these relationships been described and depicted in writing? We will discuss and explore, furthermore, different approaches to music and signification through readings in media theory and sound studies, in addition to texts by Machado de Assis, Raimundo Nina Rodrigues, João do Rio, Orestes Barbosa, Noel Rosa, Mário de Andrade, Oswald de Andrade, Manuel Bandeira, Fernando Ortiz, Luis Palés Matos, Nicolás Guillén, Alejo Carpentier, and José Miguel Wisnik, among others.

**Class Notes:** Several course readings are in Portuguese and Spanish. Dylon Robbing will be the instructor of this course.

Romance Studies  99A
Tutorial - Senior Year (108907)

Elvira G. DiFabio

2015 Fall (4 Credits)  
Instructor Permissions:  Instructor  
Enrollment Cap:  n/a  
Schedule:  TBD

Weekly individual instruction for students writing a senior thesis in Romance Studies. Part one of a two part series.

Course Notes:  For honors seniors writing a thesis. Successful completion of two terms of Romance Studies 99 is required of all thesis-track honors concentrators. Students who do not complete a thesis are required to submit a substantial paper in order to receive either half course or full course credit.

This course is taught by members of the Department.

Recommended Prep:  Satisfactory completion of a junior tutorial and prior faculty approval of proposed thesis topic.

Requirements:  Prerequisite: French 98 OR Italian 98 OR Portuguese 98 OR Spanish 98 OR Romance Studies 98 OR Latin American Studies 98

Romance Studies  101

Romance Translation: Theory and Practice (108727)

Elvira G. DiFabio

2015 Fall (4 Credits)  

**Schedule:**
- W 1200 PM - 0159 PM
- M 0100 PM - 0159 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Translating for art's sake, or to form a national literature? Better yet, to foster ideological debate. And what about all those bad translations? Do you even need to know the original language? Come explore the theory and practice of translation in and from the Romance languages. Includes workshops on a variety of styles, literary devices, pragmatics, semantic and cultural distinctions.

**Course Notes:** Conducted in English.

**Recommended Prep:** An intermediate to advanced knowledge of at least one Romance language.

**Additional Course Attributes:**

Haiti, Cuba, Martinique: Cultures of Resistance (161274)

Kathy Richman

2016 Spring (4 Credits)  

**Schedule:**
- TR 0100 PM - 0229 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

What makes a novel moving, a film disturbing? How does humor work, even in the grimmest context? "Haiti, Cuba, Martinique" explores these aesthetic questions in works that engage slavery and its legacies, resistance and revolution, and paths to "development." We will consider historical context and discuss categories like "genre" fiction, didactic writing, realism, romanticism, and la littérature engagée, or "committed" literature. Includes works by Alejo Carpentier, Césaire, Chamoiseau, Condé, Cortàzar, Gutiérrez Alea, and Lahens.

**Course Notes:** Taught in English. For concentration and secondary credit in Romance Languages and Literatures, readings and written work must be done in French or Spanish.

Romance Studies  201

Questions of Theory (118221)

Verena Conley
The seminar is built around a sequence of fundamental questions regarding the literary disciplines, their history and epistemology. Discussions are instigated by readings in philology, stylistics, the history of ideas, semiotics, structuralism, psychoanalysis, post-structuralism, film theory, genetic criticism, literary sociology, cultural studies, and digital humanities.

Course Notes: Conducted in English. Required of all graduate students in Romance Languages and Literatures.

Subject: Spanish

Spanish AA

Beginning Spanish I (124982)

Maria Celeste Moreno Palmero

2016 Spring (4 Credits) Schedule: MTWR 0900 AM - 0959 AM

Instructor Permissions: None Enrollment Cap: n/a

A basic beginning semester course for students with no previous study of Spanish. Emphasis on speaking, writing, reading, and listening, as the basis for the development of all three Communication Modes (Interpersonal, Interpretive, and Presentational). Hispanic cultures will be introduced through a variety of texts, including readings, music, art, and film.

Course Notes: Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the Spanish Aa website. Students who have studied Spanish for two years or more in secondary school must begin at Spanish Ab or higher.

This course is taught by members of the Department.

Class Notes: Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. Beginning Spanish II (125058)

*Maria Parra-Velasco*

2016 Spring (4 Credits)  

**Schedule:** MTWR 0900 AM - 0959 AM  

**InstructorPermissions:** None  

**Enrollment Cap:** n/a
For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish Aa and Ab, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

**Course Notes:**
Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the Spanish Ab website. Students who have studied Spanish for two years or more in secondary school must begin at Spanish Ab or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.

This course is taught by members of the Department.

Emphasis on strengthening students’ interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish Aa and Ab, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the Spanish Ab website. Students who have studied Spanish for two years or more in secondary school must begin at Spanish Ab or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.

This course is taught by members of the Department.

Recommended Prep: A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa, or permission of course head.

Spanish  49H
Spanish for Latino Students (109820)

Maria Parra-Velasco

2015 Fall (4 Credits)  Schedule:  MTWR 0100 PM - 0159 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

Designed for Latino students, this course builds on students' previous knowledge of Spanish to expand and strengthen their oral and written interpersonal, interpretative and presentational communicative skills. Spanish grammar is reviewed using a functional approach to highlight differences found in informal and academic contexts. Students explore the topics of language, cultures and identity in the U.S and in the Spanish-speaking world, using a variety of texts and genres, music, videos, films and visual arts.

Course Notes:  Spanish 49h was formerly Spanish 35; therefore, students cannot take 49h if they've already taken 35. Spanish 49h should be a prerequisite for 59h (or permission of the instructor).

Spanish  50
Writing and Performance (115920)

Adriana Gutierrez

2015 Fall (4 Credits)  Schedule:  TR 1000 AM - 1129 AM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

An advanced language course designed to strengthen and develop competence in written expression. Close reading of texts in literary and non-literary genres will help students refine personal style. The performance of short excerpts of plays, combined with advanced work on oral expression and phonetics, will help students increase their fluency and ease of expression.

Course Notes:  Conducted in Spanish. Recommended for concentrators. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the Spanish 50 website.

This course is taught by members of the Department.

Recommended Prep:  A score between 721-750 on the SAT II test or on the Harvard Placement Test, Spanish 40, or permission of course head.

Spanish and the Community (115919)

*Maria Parra-Velasco*

2016 Spring (4 Credits)  

**Schedule:** TR 1000 AM - 1129 AM

**Instructor Permissions:**  

**Enrollment Cap:** n/a

An advanced language course that examines the richness and complexity of the Latino experience in the US while promoting community engagement as a vehicle for greater linguistic fluency and cultural understanding. Students are placed with community organizations within the Boston area and volunteer for four hours a week. Class work focuses on expanding students' oral and written proficiency in Spanish through discussing and analyzing readings, arts, and films by and about Latinos in the US.

Spanish for Latino Students II: Connecting with Communities (159938)

Maria Parra-Velasco
2016 Spring (4 Credits) Schedule: TR 0100 PM - 0229 PM
Instructor Permissions: None Enrollment Cap: n/a

An advanced language course for Spanish heritage learners that aims to: strengthen students' oral and written linguistic range, with emphasis on Spanish use for academic contexts; and to further develop students' critical language and social awareness around important issues for Latinos in our globalized era: Spanish as global language, identity, language rights, global migration and labor, U.S.-Latino America relations, food and environment, the 'war on drugs'. Students explore these topics through various genres (newspapers and academic articles, debates, literary essays, short novels, poetry, visual art, film and music) and through 4 hours a week of community service.

Advanced Spanish Language and Culture: The Ethics of Business (127573)

Adriana Gutierrez

2016 Spring (4 Credits)  Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None  Enrollment Cap: n/a

An advanced language and culture class that examines literature and films portraying the political, sociological, financial and environmental impact of multinational companies doing business in Latin America. Students' linguistic competency is developed through discussion of the ethics of business, grammar reviews, and weekly writing assignments. Students will also choose a specific project for a business in Latin America and research its possible outcome and social, political, and environmental consequences.

Course Notes: Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Class Notes: Interested students must apply in writing to Dr. Gutiérrez no later than August 21, 2015 (Fall Term) or January 15, 2016 (Spring Term). Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Adriana Gutierrez and members of the Department

Recommended Prep: A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

Tales of Two Spains: A Survey of Spanish Modern Literature and Culture (18th to 21st centuries) (119441)

Daniel Aguirre-Oteiza

2015 Fall (4 Credits) Schedule: TR 0200 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course presents a diverse set of literary and cultural materials that will help understand Spain's frequently contested Modernity. The guiding topic of discussion will be the conflicting definitions of Spanish national identity from the 18th to the 21st centuries. Materials include short stories, philosophical and political essays, travelers' letters, memoirs, journals, travelogues, films and poems.

Course Notes: Conducted in Spanish.

Recommended Prep: Prerequisite: A score above 780 on the SAT II or the Harvard Placement test; a 50- or 60-level course in Spanish; or permission of course head.

Introduction to Modern Latin American Literature (126853)
Sergio Delgado
2016 Spring (4 Credits)
Schedule: WF 1000 AM - 1059 AM
Instructor Permissions: None
Enrollment Cap: n/a
This course is a survey of Latin American Literature from the last decades of the 19th century to the present. It offers an overview of the most salient moments in modern Latin American cultural history, placing emphasis on the ways in which specific literary works relate to the social and political developments that have shaped the region since the late 19th century. Readings by Machado de Assis, Rulfo, Borges, Gioconda Belli, Bellatin, Pizarnik, and others.

Course Notes: Conducted in Spanish.
Recommended Prep: A score above 780 on the SAT II or on the Harvard Placement test; a 50-, or 60-level course in Spanish; or permission of course head.

In every language the linguistic order known as grammar uses its forms and means of linkage to identify speakers and listeners, situate them in the world of things and time, signal agency and passivity, legislate relationships of power and subjugation. Through close readings, translation, imitation and recitation of masterpieces of classic and contemporary Spanish and Latin American poetry, we examine how poets use and abuse grammatical rules, stretching the capacity of their language to express desire, nostalgia, regret or dread, utter and question truths; speak for themselves and their communities. The course features detailed grammar study, theoretical readings, intensive writing practice and opportunities for creative work.

Course Notes: Conducted in Spanish.

Words of Which History is Made: Translation Workshop on 20th-Century Spain (126860)

Daniel Aguirre-Oteiza

Through close readings and translations centering on 20th-century Spanish history and society, students hone their linguistic, grammatical, and stylistic skills, and acquire the interpretive skills required to comprehend and analyze increasingly complex literary and cultural texts. Course materials include short stories, poems, newspaper articles, memoirs, travel journals and historical essays.

Course Notes: Conducted in Spanish. Recommended for concentrators.

Recommended Prep: A score of 800 on the SAT II test or on the Harvard Placement test, a previous course in Spanish at the 70-level, or permission of course head.

Border Flux and Border Subjects: Cultural Practices of the US-Mexico Border (126952)

**Sergio Delgado**

2015 Fall (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course is structured around a set of art and literary works that engage the US-Mexico border. It seeks to understand the fluid nature of the border region along with its recurring themes and dynamics, focusing on the complex links between literary texts, artistic practices, and the increasingly pressing social and political issues of the region. Materials include works by Monsivais, Bolano, Anzaldua, Daniel Sada, Gomez-Pena, Amy Sara Carroll, Ricardo Dominguez.

Course Notes: Conducted in Spanish.

Recommended Prep: A score above 780 on the SAT II or on the Harvard Placement test; a 40-, 50-, or 60-level course in Spanish; or permission of course head.

Pre-Textos: Las artes interpretan (127882)

**Doris Sommer**

**Adriana Gutierrez**

2016 Spring (4 Credits)

Instructor Permissions: None

Enrollment Cap: n/a
Texts become prompts for art-making in this class. By inspiring painting, dance, play, music, sculpture, costumes, texts lead to deep and daring interpretations. Latin American classics that might otherwise seem difficult become raw material for creativity as students stretch their command of Spanish. They learn that arts interpret and explore meanings and that theory is a user-friendly afterthought. This training prepares facilitation of Pre-Texts workshops in Boston and abroad.

Course Notes: Conducted in Spanish. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

The objective of this course is to understand the history of poetry as the history of adversity. That is, we will consider poetry as the history of the distance mediated between the work of art and the utopian concept that grounds artistic creation, namely, to make of life itself the greatest work of art. With this dual condition in mind, we will begin by considering emblematic works of Latin American poetry, including Trilce by César Vallejo, Altazor by Vicente Huidobro, Poema conjectural by Jorge Luis Borges, Alturas de Macchu Picchu by Pablo Neruda, and then move to more performative works, such as Nicanor Parra’s antipoetry, Alfredo Jaar’s installations and the art actions of CADA. If the history of poetry and art in general is the history of adversity, the history of adversity is also the history of our dreams.

Class Notes: Conducted in Spanish.

The Colonial City as Palimpsest (161247)

Nicole Legnani

2016 Spring (4 Credits) Schedule: R 0100 PM - 0259 PM

Instructor Permissions: None Enrollment Cap: n/a

Through our readings of diaries, satiric and epic poetry, laws and narratives of conquest of the 16th and 17th centuries, we contrast the strategies and tactics for organizing life in the Spanish colonies and the actual practice of living and resisting in three cities of the Viceroyalties of New Spain and Peru: Mexico, Lima and Cuzco. Primary authors include Cortés, Balbuena, Chimalpahin, Sigüenza y Góngora, Caviedes, Guaman Poma, Titu Cusi Yupanqui and Inca Garcilaso de la Vega.

Course Notes: Conducted in Spanish; an advanced reading knowledge of Spanish is essential.

Recommended Prep: Prerequisite: Coursework in Spanish at the 70-, 90-, or 100-level, or permission of the instructor

The Borges Machine (108752)

*Mariano Siskind*

2016 Spring (4 Credits)  
Schedule: M 0300 PM - 0459 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

We study Jorge Luis Borges's poetry, short stories, and essays; from *Fervor de Buenos Aires* to *El Aleph*; from his scripts and the films based on them to the cultural constellations that rose around him, as well as those his work created. We will think of Borges as a writer, but also as literary machine, an artifice that produces meaning in the works of other writers and in cultural formations beyond Argentina and Latin America.

**Course Notes:** Conducted in Spanish.

Artes en Movimiento (160620)

*Doris Sommer*

2015 Fall (4 Credits)  
Schedule: T 0100 PM - 0259 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Vanguards in Latin America, and elsewhere, are obviously artistic movements; they are also political and pedagogical movements since they strive to change society. "Artes en movimiento" will explore Vanguards as constellations of actors and activities that change paradigms by teaching new perceptions and practices.

The Warning in its Music: Politics of the Poem in 20th Century Spain (161249)

Daniel Aguirre-Oteiza

2016 Spring (4 Credits)  Schedule:  W 0300 PM - 0459 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

An exploration of the fraught connection between political engagement and textual innovation in poetry written in and about 20th Century Spain. Discussion of key texts by Aub, Cernuda, Darío, Gamoneda, Lorca, Machado, Neruda, Segovia, Vallejo, among others. Focus on topics such as violence, testimony, memory, exile. Theoretical and critical readings include essays by Adorno, Celan, Guillén, Paz, Said.

Course Notes: Conducted in Spanish.

Spanish 264

New Approaches to Latin American Literature, Criticism and Theory (160621)

Mariano Siskind

2015 Fall (4 Credits)  Schedule:  R 0200 PM - 0459 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

In this graduate-level seminar we map some of the most recent critical and theoretical attempts to reconfigure and re-politicize the field of Latin American Literary and Cultural Studies. We will read texts by Gabriel Giorgi on biopolitics; Alberto Moreiras on the infrapolitical; Alejandra Laera on the economies of fiction; Bruno Bosteels on new theories of communism; Jens Andermann on visual culture; Doris Sommer on civic and engaged humanities; and Jeffrey Schnapp on digital humanities. All of these authors will visit our seminar to discuss their texts with us.

Course Notes: Readings and discussions will be in Spanish and English

Graduate Seminar: Don Quixote’s Library (161245)

*Mary Gaylord*

2016 Spring (4 Credits)  
Schedule: R 0300 PM - 0459 PM  
Instructor Permissions: None  
Enrollment Cap: n/a  
A study of works destroyed, banished or celebrated in the book-burning episode, alongside others alluded to in the novel. Using the Knight's readings as mirror of his madness, as key to his author's parodic and satiric agendas, and as window onto early modern literary and cultural horizons, the course considers chivalric, pastoral, Moorish romance; ballads, courtly verse; Old and New World epic; wonder books, poetics and histories in relation to Don Quijote.

Subject: Czech

Czech AA

Elementary Czech I (111301)

Veronika Tuckerova
Part one of a two part introductory course in modern Czech language and culture, designed for students without previous knowledge who would like to speak Czech or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Czech culture through work with film and literature and gain some familiarity with the major differences between literary and spoken Czech as they learn to use the language both as a means of communication and as a tool for reading and research. Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

Please note that this course will also meet for an additional hour of speaking practice to be arranged the first week of classes. See language course notes on our website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing.

**Czech AB**

Elementary Czech II (159660)

*Veronika Tuckerova*

Part two of a two part introductory course in modern Czech language and culture, designed for students without previous knowledge who would like to speak Czech or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Czech culture through work with film and literature and gain some familiarity with the major differences between literary and spoken Czech as they learn to use the language both as a means of communication and as a tool for reading and research. Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

Please note that this course will also meet for an additional hour of speaking practice to be arranged the first week of classes. See language course notes on our website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing.

**Course Notes:**

Note on Auditing, Pass/Fail and Satisfactory/Unsatisfactory (Sat/Unsat): As a general rule, no auditors are permitted in language courses. If fellowship terms or other circumstances prohibit registration, students must speak with the Director of the Language Program to request permission to audit. Undergraduate students are generally discouraged from taking language courses Pass/Fail and may do so only after consultation with and permission from the Director of the Language Program and the course instructor. Graduate students may register on a Pass/Fail basis (as Sat/Unsat) with...
permission of the Director of the Language Program and the course instructor.

### Czech BA

**Intermediate Czech I (121469)**

*Veronika Tuckerova*

2015 Fall (4 Credits)  

**Schedule:** MWF 1100 AM - 1159 AM  

Instructor Permissions: Instructor  
Enrollment Cap: n/a

Part one of a two part intermediate course in modern Czech language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Czech grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms. The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Please note that this course will also meet for an additional hour of speaking practice to be arranged the first week of classes. See [language course notes on our website](#) for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing.

**Recommended Prep:** Completed Czech AB, or placement at the B-level. Familiarity with fundamentals of Czech grammar, particularly case endings and elementary competence in spoken Czech.

### Russian AB

Elementary Russian II (159620)

_Steven Clancy_  
_Natalia Chirkov_

2016 Spring (4 Credits)  

**Schedule:** MWF 0900 AM - 0959 AM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Part two of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening, comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Russian Aa: Elementary Russian I together with Russian Ab: Elementary Russian II or Russian Atb: Elementary Russian through Authentic Texts II satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A, Aab, and At) prepare students for continued study of Russian in intermediate (B-level) courses (B, Bab, or Bt) and for study or travel abroad in Russian-speaking countries.
Please note that this course will also meet for two additional hours of speaking practice to be arranged the first week of classes. See language course notes on our website for information about sectioning, pass/fail, satisfactory/unsatisfactory, auditing, and language track information.

**Russian ATA**

Elementary Russian through Authentic Texts (Russian through Pushkin I) (109273)

Oksana Willis

2015 Fall (4 Credits)

**Schedule:** MWF 1100 AM - 1159 AM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

Part one of a two part introductory course to Russian language and culture through a selection from the verse and prose works of Russia’s greatest poet, Alexander Pushkin (including The Bronze Horseman, excerpts from Eugene Onegin, shorter poems, and prose in The Queen of Spades). This literary and linguistic approach to Elementary Russian has a strong emphasis on reading authentic Russian, but all four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Covers all of the basics of Russian grammar, including all
six cases, verbal conjugation, and verbs of motion.

Russian At: Elementary Russian through Authentic Texts (Russian through Pushkin I) together with or Russian Atb: Elementary Russian through Authentic Texts II or Russian Ab: Elementary Russian II satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A, Aab, and At) prepare students for continued study of Russian in intermediate (B-level) courses (B, Bab, or Bt) and for study or travel abroad in Russian-speaking countries.

Please note that this course will also meet for two additional hours of speaking practice to be arranged the first week of classes. See language course notes on our website for information about sectioning, pass/fail, satisfactory/unsatisfactory, auditing, and language track information.

Course Notes: Assumes no previous knowledge of Russian.

**Russian BA**

Intermediate Russian I (112823)
Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family, education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social situations (sociolinguistic competence). Computer exercises on selected topics. Any full course in Russian at the B-level (Russian Ba-Bb, Russian Bta-Btb, or Intensive Russian Bab) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Please note that this course will also meet for two additional hours of speaking practice to be arranged the first week of classes. See language course notes on our website for information about sectioning, pass/fail, satisfactory/unsatisfactory, auditing, and language track information.

Recommended Prep: Russian Aa-Ab, Aab, Ata-Atb, Ah, or placement at the B-level. Familiarity with fundamentals of Russian grammar, particularly case endings, verb conjugation, and elementary competence in spoken Russian.

Advanced Russian: Russian Cultural Self-Images and National "Mentality" (122814)

*Natalia Pokrovsky*

2016 Spring (4 Credits)  
**Schedule:** MWF 1100 AM - 1159 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Through readings and film, we explore Russian cultural attitudes and self-images as socio-cultural context. Topics include cultural perceptions of self as nation and as cultural "mentality," the collective vs. the individual, attitudes toward friendship, the family and women, law, crime, prestige and success, and ethnic difference. Concentrates on vocabulary and phrasing, and includes extensive writing practice.

**Recommended Prep:** Russian 103, 113, or permission of the instructor.

Tutorial - Sophomore Year (121681)

Oleh Kotsyuba

2016 Spring (4 Credits)  Schedule:  R 0330 PM - 0529 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

An interdisciplinary introduction to major authors and themes of Slavic history and literature, focusing on relationships between literature, power, history, and myth. Theories of literary interpretation (including Russian Formalism and semiotics) as well as different approaches to placing literature in its social and political contexts. Readings introduce students to major figures in the Slavic literary traditions, including Pushkin, Dostoevsky, Tolstoy, Chekhov, Platonov, Kundera, Hrabal, and others.

Course Notes: For concentrators in Slavic Literatures and Cultures. Open to non-concentrators provided they contact the instructor before the beginning of the semester.
Part one of a two part series. Fall term offers an opportunity to read Nikolai Gogol's short fiction in the original while also reflecting on challenges for translation into English that Gogol's language and style pose. We will explore contextual issues and productive critical approaches and pay close attention to Gogol's narrative strategies, structural solutions, and the form and function of Gogolian humor. Weekly readings of short fiction will be placed in the context of larger theoretical issues (language, interpretation, narrative, translation, etc.). Students will prepare two short translations of their own and discuss functions of different text elements in short position papers and interpretive essays. We will also consider some film adaptations of Gogol's works and discuss their success or failure in rendering the texts' important features.

Course Notes: Required of junior concentrators in Slavic Literatures and Cultures. Other students may enroll (see Slavic 158). Reading knowledge of Russian is required. Students who wish to concentrate on a different Slavic language may arrange a separate tutorial.

Russian and Soviet Avant-Garde Theater (159558)

Daria Khitrova

2016 Spring (4 Credits)

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

Explores the wave of radical reforms and revolutions in drama, staging and acting methods and systems, from Anton Chekhov and Konstantin Stanislavsky to Vladimir Mayakovsky and Vsevolod Meyerhold. Examines plays and productions against the broader Russian and early Soviet cultural, political and social background. Key notions include: emotional memory, biomechanics, Constructivism, theatricalization of life. Follows the effects innovative theories and practices in Russian and Soviet theater had on the style of film and stage productions as well as theater and drama studies across Europe and in the United States, including Brecht's Verfremdung, Method acting, and performance theory.

Conflict and Culture: The Case of Yugoslavia (160501)

*Tomislav Longinovic*

2016 Spring (4 Credits)  
**Schedule:** TR 1100 AM - 1159 AM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course focuses on the cultural history of the common state of the South Slavs from its founding in 1919 until its bloody dissolution in 1991. Students will be asked to engage with verbal and visual texts produced during this period in order to gain a better understanding of how the national imaginary is created, sustained, and destroyed. Some of the writers featured are Andrić, Krleža, and Selimović; some of the filmmakers are Makavejev, Kusturica, and Manchevski. Readings will be available both in the original Bosnian/Croatian/Serbian and in the English translation. The focus of the course is on the interaction between politics and culture in representing conflict.

**Class Notes:** Taught by Visiting Professor, Tomislav Z. Longinović.

Slavic 162
Slavic Myth and Fantastic Literature (160502)

*Tomislav Longinovic*

2016 Spring (4 Credits)  
**Schedule:** TR 0100 PM - 0159 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course examines the fantastic, marvelous, and uncanny literary works from a comparative perspective, especially by connecting them to Slavic mythological and religious beliefs. Students will read texts from Russian (Gogol, Bulgakov, Zamyatin), Polish (Potocki, Schultz, Lem), Czech (Chapec) and South Slavic literatures (Pavić, Kiš, Živković). Theoretical readings will include works naturalized Bulgarian theoretician of the fantastic, Tzvetan Todorov, as well as his critics. We will discuss the development of the fantastic genre through the epochs of Romanticism, Modernism and Postmodernism, placing emphasis on the close reading of literary texts and their relationship to the broader cultural heritage of diverse Slavic cultures.

**Class Notes:** Taught by Visiting Professor, Tomislav Z. Longinović.

Russian-Ukrainian Literary Relations in the 19th Century: Conference Course (133069)

*George Grabowicz*

2016 Spring (4 Credits)  
**Schedule:** R 0200 PM - 0359 PM

HARVARD UNIVERSITY  
Page 3240 of 3541  
4/20/2017 15:26 PM
Examines Russian-Ukrainian literary relations from 1798 to 1905, with special focus on canon formation, ethnic, national and imperial identity, and the interrelation of literature, society, and ideology. Topics include Decembrist historicism, Romantic poetics and folklore, Slavophilism and populism, literature as subversion (kotljarevshchyna), the uses of translation, the reception of major writers (Gogol, Shevchenko, and others), and the imperial attempt to suppress "Ukrainophilism."

Recommended Prep: Reading knowledge of Russian or Ukrainian.

In this course we will read some of the most interesting and influential literary works in prose and poetry written in Russian during the last thirty years. The period since the collapse of the Soviet Union has been marked by rampant experimentation, as the literary production was freed completely from censorship for the first time in over 200 years. We will discuss artistic and institutional motivations that underpin each work and place them within theoretical and historic frameworks. We will explore works by authors from other countries (Ukraine, Belarus, Kyrgyzstan, Uzbekistan, Israel, United States, etc.) that were originally written in the Russian language. Our goal will be to get a good sense of the entire spectrum of the contemporary Russian-language literary scene, to discuss questions of identity-formation, experimentation vs. traditionalism, gender dynamics, and genre. We will try to understand what makes a literature "national" and what the global aspects of literature are today. We will also consider thematic focus vs. stylistic preferences as elements of an author's literary identity and self-positioning. Readings will include prose, drama, and poetry by Venedikt Erofeev, Vladimir Sorokin, Sasha Sokolov, Ludmila Pertrushevskaia, Tatiana Tolstaia, Elena Shvarts, Viktor Pelevin, Zakhar Prilepin, Eduard Limonov, Chingiz Aitmatov, Ludmila Ulitskaya, Dmitri Bykov, Olena Stiazhkina, Linor Goralik, Andrei Kurkov, Svetlana Alexievich, Hamid Izmailov, Shamshad Abdullaev, Polina Barskova, and others. To round off our discussion of literary works we will also consider two innovative contemporary Russian-language films – Myroslav Slaboshpytskyy’s The Tribe (Ukraine, 2014) and Andrei Zviagintsev’s Leviathan (Russia, 2014).

Course Notes:
All readings will be in English translation. Films will be subtitled (if applicable).

Russian Futurism and Formalism (159557)

Daria Khitrova

2015 Fall (4 Credits)  Schedule:  R 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Follows the development of two major movements in Russian literature –Futurism and Formalism - in close conjunction with each other and in the context of Russian Modernism at large. Examines poems, manifestos, theoretical writings, visual arts, theater productions, films. Key questions include: how could Futurism, with its scandalous manifestos and "transrational" poems, evolve into the Formalist theory with its cult of science and rigorous methodology? How to make sense of the transrational? What made Futurists paint their faces? Works by Bely, Khlebnikov, Mayakovsky, Kruchyonych, Shklovsky, Tynianov, Jacobson, Larionov, Malevich, Zdanevich, Rodchenko, Vertov.

Elementary Ukrainian (116414)

Volodymyr Dibrova

2015 Fall (4 Credits)     Schedule:       MWF 0900 AM - 0959 AM
Instructor Permissions:  Instructor       Enrollment Cap:    n/a

An introductory course in modern Ukrainian language and culture, designed for students without previous
knowledge who would like to speak Ukrainian or use the language for reading and research. All four major
communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to
Ukrainian culture through work with prose and poetry as they learn to use the language both as a means of
communication and as a tool for reading and research. This year-long full course satisfies the foreign language
requirement and prepares students for continued study of Ukrainian in intermediate-level courses and for study or travel abroad in Ukraine. Part one of a two part series.

Please see language course notes on our website for information about sectioning, pass/fail, satisfactory/unsatisfactory, auditing, and language track information.

Social Studies  10A
Introduction to Social Studies (115470)

James Kloppenberg

2015 Fall (4 Credits)                     Schedule:    T 0200 PM - 0359 PM
Instructor Permissions:  Instructor     Enrollment Cap:  n/a

This course offers an introduction to the classic texts of social theory of the eighteenth and nineteenth centuries. Our focus will be on the rise of democratic, capitalist societies and the concomitant development of modern moral, political, and economic ideas. Authors we will examine include Jean-Jacques Rousseau, Adam Smith, Alexis de Tocqueville, John Stuart Mill, and Karl Marx.

Course Notes:  This course is limited to sophomores and Social Studies concentrators. This course is a prerequisite for sophomores applying to Social Studies. Students planning to take this class must attend the first lecture to be admitted.

Social Studies  68AB

Practicing Democracy (159822)

_Marshall Ganz_

2015 Fall (4 Credits)  

**Schedule:** T 0700 PM - 0859 PM  

_Instructor Permissions:_ Instructor  

Enrollment Cap: 12  

Making democracy work requires an "organized" citizenry with power to assert its interests effectively. Yet US political participation declines, growing more unequal, as new democracies struggle to make citizen participation possible. Students learn to address public problems by organizing: developing leadership, building community, and mobilizing power. Our pedagogy links sociological, political science, and social psychology theory with democratic practice.

The Chinese Immigrant Experience in America (159824)

_Nicole Newendorp_

2016 Spring (4 Credits)  

**Schedule:** W 1230 PM - 0229 PM  

_Instructor Permissions:_ Instructor  

Enrollment Cap: 12  

Uses the history of Boston's Chinatown as a case study to examine the experiences of Chinese immigrants in the U.S. from the 1880s until the present. Employs historical, anthropological, and sociological perspectives to examine major themes related to the social and economic development of U.S. Chinatowns and Chinese immigrant communities throughout the 20th and 21st centuries. This course is an activity-based learning course, limited to students who are concurrently participating in a Harvard-affiliated service program in or around Boston's Chinatown. Class discussions and assignments will make active links with students' service work. Open to students in all
concentrations.

Education and Community in America (159823)

*Ariane Mary Liazos*

2015 Fall (4 Credits)  
Schedule: M 0100 PM - 0259 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

Explores efforts to realize the civic purpose of American universities, particularly in terms of attempts to engage local communities through educational outreach programs. Examines major periods of experimentation and innovation in the 20th and 21st centuries, from the settlement house movement of the early 1900s to recent efforts to revive the public mission of universities through service-learning and other forms of civic education. This course is an activity-based learning course, limited to students who are concurrently participating in one of PBHA's education-related service programs. Class discussions and assignments will make active links with students' service work.

Science and Democracy in Modern America (156243)
Andrew Jewett
2016 Spring (4 Credits) Schedule: R 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 10

Science, in its many guises, is a crucial force in the modern world. How has its growing authority reshaped American democracy since the late nineteenth century? Our readings will address that question in theoretical and practical terms by exploring science's changing roles in academia, political ideology, social thought, popular culture, public education, state administration, and law, as well as its complex ties to religion, secularism, and technological innovation.

Course Notes: This course will be lotteried.

Culture and Society (116288)

Kiku Adatto

2015 Fall (4 Credits)  

**Schedule:**  
T 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 10

The tutorial will explore various approaches to the study of culture, drawing on studies in history, philosophy, art, literature, sociology, and photography. Among the questions we will address are: In what ways does rhetoric shape politics, and what role does it play in national narratives? How is historical memory constructed, and what are the competing forces that shape it? What is the significance of public apologies, and does solidarity create moral responsibilities for historical injustices? How is cultural domination exerted, and how is it resisted? Is the censorship of art sometimes justified? Why does the contest to control images loom so large in contemporary politics?

**Course Notes:**  
This course will be lotteried.

**Class Notes:**  
This course will be lotteried.

Social Studies 98JL

Global Social Movements (123874)

Alison Jones

2015 Fall (4 Credits)  

**Schedule:**  
R 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 10

Social movements are often considered a driving force behind political, social, and cultural change. This course explores the major theoretical and empirical approaches used in the social sciences to understand social movements. The course will examine a range of case studies including movements dealing with environmental justice, health, citizenship, and racial inclusion taken from a range of national contexts. Particular attention will be paid to transnational human rights and other activism.

**Course Notes:**  
This course will be lotteried.

Globalization and the Nation State (125982)

Nicolas Prevelakis

2015 Fall (4 Credits)  Schedule:  W 0400 PM - 0559 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

Despite globalization, the nation is still a major actor in today's world. This course tries to understand why this is so by examining the role that nationalism plays in peoples’ identities and the effects of globalization on nations and nationalism. Examples from the United States, Western Europe, Latin America, India, and the Middle East.

Course Notes:  This course will be lotteried.

Education and American Society (125984)

Andrew Jewett

2015 Fall (4 Credits)  Schedule:  W 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

Explores how education has been and continues to be a central institution of American society, reflecting social ideals and ideologies while also directly shaping the contours and structures of society in both productive and detrimental ways. Examines different philosophical foundations of formal learning and how those theories have become manifested across time in various educational practices. Investigates how schools currently operate, specific issues the American educational system faces, and the implications of various schooling practices for structuring American society.

Migration in Theory and Practice (127021)

Nicole Newendorp

2015 Fall (4 Credits)  Schedule:  T 0100 PM - 0259 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10
In this course, we will examine how and why people migrate from one location to another, focusing both on the theoretical paradigms scholars use to explain migration processes as well as on the individual experiences of migrants. Topics include transnationalism, diaspora, identity formation, integration and assimilation, citizenship claims, and the feminization of migration. Ethnographic readings focus primarily on migration to the US, but also include cases from other world areas, most notably Asia.

The American Ghetto (156333)

Matthew Desmond

2015 Fall (4 Credits) Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor Enrollment Cap: 10

The ghetto is among the most complex and troubling of all American institutions. This course analyzes the American ghetto in historical and contemporary perspective, exploring topics such as racial segregation, urban poverty, inner-city schools, the underground economy, and the prison boom. Along with engaging with several classic and contemporary texts, we will carry out ethnographic fieldwork in some of Boston's low-income neighborhoods.

What constitutes the political and how does it relate to the religious? This course explores the relationship between recent religious resurgences and secular politics while paying particular attention to the mutually constitutive categories of the "secular" and the "religious." We start by exploring the classic secularization thesis and continue to examine its recent revisions. We will move beyond the assumption that secularism should be conceived in the
singular to reflect on its global varieties, considering not only the Euro-American formations, but also debates around the place of religion in public life in China, India, Russia, Turkey and others.

Social Studies 98OK

The Politics of the Environment in Asia (159815)

Kevin Caffrey

2015 Fall (4 Credits) Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor Enrollment Cap: 10

Scholars have noted the connection between environment and specific forms of Asian politics and society. Today China reengineers the flow of its rivers to address social demands for water. South & Southeast Asian polities realize how politics beyond their borders can determine the flow of the region's rivers—and thus the health of their societies. The dangers of poor air quality, polluted land, and contaminated food energize social movements and unrest. Asian development models have resulted in extreme pollution, and with resulting public health problems, governmental attention to the environment has increased. In this research seminar students will explore “politics and environment” in Asia, with some attention being given to the future.

Course Notes: This course will be lotteried.

Social Studies 98OQ

Political Rhetoric and American Democracy (159816)

Adam Sandel

2015 Fall (4 Credits) Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: 10

In this course, we will investigate a question at the heart of democratic politics: in what sense, if any, is rhetoric a part of reasoned political argument? Is rhetoric a regrettable feature of democracy, or a practice worth cultivating? We often denigrate rhetoric as pandering or manipulation. We often assume that stories, images, and metaphors intended to persuade a particular audience are, at best, adornments to the “real argument.” At worst, they are means of trickery, ways of moving people to a decision that their better reason would reject.

But examples of great rhetoric force us to question this assumption. The speeches of political figures such as John F. Kennedy, Lyndon Johnson, and Martin Luther King arguably derive their moral force not simply from the principles they invoke, but from the way in which they appeal to the life circumstances of their listeners.

We will examine the case for and against rhetoric by turning to classical texts (Aristotle, Plato, Hobbes, Kant), contemporary political theory (Garsten, Beiner, Chambers), and great political speeches (Douglass, Lincoln, Johnson, and others.)
This course asks how development has shaped decolonization on the African continent. We interrogate antinomies of African "tradition" and "modernity" that inform development processes and interventions, notably through legacies of liberal state-making, divisions of labor and economic value, and the management of impoverished populations. Rather than approaching these worlds as without history or innovation, the course tracks their complex interactions with new technologies and infrastructures of belonging, work, and identity. Through social theory and ethnography, we attend to the impact of post-colonial development in the making of the current world order.

The idea that transparency, or truth in politics, is both an unequivocally good objective, and an attainable one, is now commonplace. The modern period of political thought, by contrast, presents startlingly different evaluations of, and approaches to, transparency. Drawing on the work of Machiavelli, Hobbes, and Rousseau, this course explores the politics of verity and falsity as each relates to questions of 1) epistemology 2) methodology and 3) rhetoric. In so doing, the
course offers a historical lens through which to reconsider, and potentially critique, contemporary notions of political transparency.

Poverty and Development in Latin America (159819)

Kristin Skrabut

2015 Fall (4 Credits)  Schedule:  T 0400 PM - 0559 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10

This course explores how development theories and practices have shaped history, politics, and the dynamics of everyday life in Latin America. We consider Latin America’s colonial legacy, the effects of modernization and dependency theories, and ideals of democratic development. Coupling in-depth ethnographies with readings from development theorists, topics we cover include: systemic inequality, citizenship, indigenous rights, environmentalism, healthcare, microcredit, state violence and insecurity.

Riots and Uprisings (159820)

Kerry Chance

2016 Spring (4 Credits)  Schedule:  M 0130 PM - 0329 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10

This course examines the role of riots and uprisings in social, economic, and political change. Twenty-first century governance has been characterized by a fracturing of state sovereignty and economic crisis in many parts of the globe, which have given rise to new forms of collective action, configurations of labor, and understandings of the material world. We ask how activist networks, crowds, and insurgencies are reshaping long-standing distinctions between law and illegality, privacy and publicity, formal and informal markets, state and non-state spaces, especially under conditions of stark inequality. Through contemporary theory, ethnography, and digital media methods, we focus on unrest over health, safety, and the environment.
Social Studies  98PB

Global Slums (159821)

Kristin Skrabut

2016 Spring (4 Credits)

Schedule: T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This course investigates "the slum" as a social product, an icon of disorder, and a setting for diverse cultures and modes of sociality. By comparing ethnographic case studies of slums from around the world, we explore how slums emerge at the intersection of global inequalities, state planning, and the insurgent practices of the poor. Topics we cover include: rural-urban migration, spatial segregation, housing and infrastructure, informal markets, sustainability, and urban social movements.

Course Notes: This course will be lotteried.

Social Studies  98PC

Comparing India and China (159903)

Nara Dillon

2016 Spring (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

In the late 1940s, India witnessed a peaceful transition to democracy, while China experienced a Communist revolution. After this divergence, both countries began pursuing market reforms in the effort to accelerate economic growth in the 1980s and 1990s. We will explore the ways in which power has been consolidated and distributed under these very different regimes and the implications this has had for a range of socio-political and economic outcomes, including famine, economic development, and urbanization. Throughout the course we will place India and China in the context of comparative debates about other parts of the developing world.

Course Notes: This course will be lotteried.
Social Studies  98PD
Capitalism and Its Critics in Twentieth-Century America (160158)
Ryan Acton

2016 Spring (4 Credits)  Schedule:  W 0400 PM - 0559 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

We will study how twentieth-century American intellectuals justified and criticized capitalism and its effects on the nation. We will read philosophers, social and cultural theorists, economists, and historians. When are market-made inequalities of wealth and power just? How does capitalism shape morality and desire? What is the relationship between capitalism and other forms of power (e.g. gender, democracy)?

Rethinking Transnational Feminism (160159)
Angela Maione

2016 Spring (4 Credits)  Schedule:  W 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

Can we speak of a global or transnational feminism? Attending to questions prompted by both globalization and cosmopolitanism, this course explores themes, issues, and problems raised by global feminist aspirations in political thought. We will develop a genealogy of feminist attempts to think in a cosmopolitan, international, and transnational vein from the 18th through 20th centuries. While resisting the lure of relativism, we will appraise 21st century articulations of global feminism by taking centrally human plurality, solidarity, and contingent democratic practices rooted in particular local contexts within a global frame.

The Public and Its Problems: Democratic Theory in Practice (160337)
Ian N. Storey

2016 Spring (4 Credits)  Schedule:  W 0400 PM - 0559 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

This course provides an in-depth introduction to contemporary democratic theory through both the lenses of its proponents (in their many forms) and its most trenchant critics. The course will be organized historically, tracing
forms and schools of democratic and anti-democratic theory through the 20th Century, with a constant eye towards historical precedents by focusing each week around particularly intransigent problems for democratic governance (e.g. labor disputes, penal organization). Ultimately, the course aims to provide the student with both a detailed sense of the map of the contemporary terrain of democratic theory, and also a sense of why certain schools of proponents and critics coalesced around the public problems that they did.

Course Notes: This course will be lottered.

Empire and Colonialism in the Modern World (160338)

Daragh Grant

2016 Spring (4 Credits) Schedule: T 0400 PM - 0559 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This class investigates the question of how empire and colonialism shaped the modern world. Drawing on global histories of empire as well as studies of the Americas, Africa, Asia, and the Middle East, the tutorial examines how law, culture, economy, and space became vehicles for imperial expansion and colonial control. Methodologically, the tutorial will take a broadly historical approach, attending to how both the concepts and practices of empire were transformed over time. Throughout, we will highlight the forms of resistance that developed in response to empire. We will also consider how resistance was conditioned by colonialism's regimes of racial and cultural classification and analyze the enduring effects of this conditioning in the present.

Course Notes: This course will be lottered.

The Critical Theory of the Frankfurt School (156263)

Peter Verovsek

2016 Spring (4 Credits) Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor Enrollment Cap: 10

This tutorial examines the major thinkers and themes associated with the Frankfurt School of critical theory. From its origins in the interwar crisis, critical theory has sought to diagnose the pathologies of the present in order to chart paths for social and political emancipation in the future. The readings trace the development of the Frankfurt School its various generations, engaging with many of the most important themes of twentieth century continental philosophy, including fascism, democracy, capitalism, bureaucracy, globalization and inequality, to name just a few. The goal of the tutorial is not only to gain a deeper understanding of the Frankfurt School, but also to assess the continued relevance of this distinctive approach to the critical theory of society.

Course Notes: This course will be lottered.

Enrollment Cap: n/a

Writing of senior honors essay.

Course Notes: Required for concentrators.
Politics is about power and authority. But the production, conservation and distribution of power and authority occur far beyond Capitol Hill: in family dynamics, neighborhood residential patterns, racial discrimination, welfare policies, social movements, nation-states and the globalized economy. So how is power exerted? Where is it, and how is it gained and lost? How do power centers get challenged? In this course, we examine such questions using the conceptual framework and analytic tools of political sociology. Major themes will include the nation-state and its challengers, capitalism, democracy, and globalization. Abstract, theoretical works are explored with practical applications and illustrations in specific national/historical contexts. Students will also become aware of criticisms and debates in political sociology—as well as its limitations.

Class Notes: May be counted for introductory concentration requirement, if letter graded.

At its core, the study of social inequality seeks to answer two simple questions: who gets what, and why? This course will begin with a descriptive assessment of how socioeconomic resources are distributed by social class, race, and gender. We will then explore the social processes, structures, and institutions that influence the distribution of these resources. Course materials will combine cutting edge data with a selection of books that have defined contemporary research on social inequality.

Course Notes: May be counted for introductory concentration requirement, if letter-graded.

Introduction to the Sociology of Organizations (113256)

Frank Dobbin

2015 Fall (4 Credits) Schedule: MW 0100 PM - 0159 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course examines the evolution of the modern organization, focusing on changing approaches to corporate strategy and to managing employees. We read both social scientific analyses and Harvard Business School cases to trace the history of management, from the harsh principles of the "drive system" to the latest theories of how "work teams" improve productivity and how focusing on a firm's "core competence" improves the bottom line. The course covers research examining the efficiency and the equity of current corporate practice.

Course Notes: May be counted for introductory concentration requirement, if letter-graded.

Introduction to Social Movements (109656)

Jocelyn Viterna

2016 Spring (4 Credits) Schedule: MW 0100 PM - 0159 PM

Instructor Permissions: None Enrollment Cap: n/a

Social movements and revolution have long been driving forces behind political, social, and cultural change. From the Civil Rights movement of the 60s to the recent and unpredicted "Arab Spring," the extraordinary mobilization of ordinary people is routinely credited with fundamentally re-shaping societal institutions--the polity, the economy, religion, gender, race, and even the environment. But can we really define and study something as ephemeral as social mobilization? Do we know how social movements begin? Why might they become revolutionary? Can they make a difference in the societies they target? This course examines these questions within the sociological literature on collective action. Theories of social movements and revolutions are then applied to a series of case studies around the globe. Case studies may include the US, Iran, China, El Salvador, Chile, India, Poland, Argentina, Egypt, and Nigeria, among others. Students will also be required to apply course readings to the collective action case of their choosing throughout the semester.

Course Notes: formerly Sociology 132: Mobilizing for Change. This course, when taken for a letter grade, meets the General Education requirement for United States in the World.

Sociology  98M
Social Class in the United States: Identity, Culture, and Consciousness (126248)

Rachel Meyer
2016 Spring (4 Credits)  Schedule:  R 1100 AM - 1259 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

This course will review a variety of empirical and theoretical perspectives on social class in the United States with a focus on class-based identities and class consciousness.

Course Notes:  Required of and limited to Sociology concentrators. Spring Junior Tutorials are by assignment only.

Requirements:  Prerequisite: Sociology 97 AND Sociology Concentrators.

Sociology  98MC
Protest and the State (159924)

Danilo Mandic
2016 Spring (4 Credits)  Schedule:  M 0400 PM - 0559 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

Social movement protests challenging state policy, legitimacy and leadership have become a central feature of American political life. This tutorial explores major protest episodes in the United States, emphasizing historical trajectories and movement precedents. Four major trajectories will be considered: (1) the Civil Rights Movements of the 1950s and 1960s, and Black Lives Matter activism; (2) 1960s student movements and 2000s antiwar activism;
(3) early 20th century US labor movements, and anti-globalization and Occupy Wall Street activism; and (4)
suffragist and early feminist movements, and the women’s movement of the 1960s and 1970s and contemporary
LGBTQ activism. Students will conduct an independent research project on a movement of their choosing (not
necessarily one covered in the syllabus) using the conceptual and methodological tools of sociology – archival
research, content analysis, interviews, and/or ethnography. In addition to learning about issues of protest and the
state, the tutorial will be dedicated to exploring issues in research design and methods. Several weeks will be
devoted to student presentations and workshopping, as students develop an independent research project with
original data collection.

**Sociology 98SD**

Urban Inequality in the 21st Century (160222)

*Jessica Simes*

2016 Spring (4 Credits)

**Schedule:** W 1000 AM - 1159 AM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 10

Neighborhoods and metropolitan cities have experienced dramatic social transformation since the publication of *The Truly Disadvantaged*, and this course seeks to examine in historical and comparative perspective the changing and durable nature of urban inequality. This course will apply sociological theories of urbanism to the study of the contemporary city and consider shifts in population, capital, and governance that affect U.S. and global urban configurations. Topics to be considered include: gentrification, housing and economic development, policing and crime control, technology, new urbanism and smart growth, suburban poverty, and the "great inversion"—among others. This course will pay particular attention to regional and cross-national variation in urban change and inequality.

**Class Notes:** Instructor: Jessica Simes

**Requirements:** Prerequisite: Sociology 97

**Sociology 98TA**

"Studying Up": Privilege, Elite Education, and Inequality (160224)

*Tiffanie Ting*

2015 Fall (4 Credits)

**Schedule:** R 0200 PM - 0359 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 10

Privilege is an understudied but important topic in educational and social science research. Recent scholarship increasingly attends to the role that elite educational institutions play in producing and maintaining social and economic inequalities. In this course, we will investigate the connections between class, privilege, and educational
advantage. By employing the lens of cultural sociology, we will explore various contexts for elite education, the cultural practices around which they are organized, and the ways in which individuals negotiate a sense of legitimacy and identity within these spaces.

Race, Poverty, and Justice (126244)

Kaia Stern

2015 Fall (4 Credits)  
**Schedule:**  W 1200 PM - 0159 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 10

Race, Poverty and Justice surveys some of the key topics in urban sociology, focusing on major social problems in American cities. With particular attention to factors associated with crime, such as poverty, race, education, gender and unemployment, the course draws from different academic, media and narrative sources. Our focus on urban communities of concentrated poverty is intended to challenge students to think about policy solutions to complex problems. How do we respond to under-resourced schools, violence, joblessness, drug addiction and incarceration? Our methodological focus will be on qualitative data collection that includes ethnography and interviews. The last three weeks of the semester will be reserved for students to present original research projects designed to address the problems discussed in class. Questions for consideration: In what ways do various political, economic and religious ideologies shape our understandings of race? What kinds of practices lead us out of poverty? How do we understand justice? An optional visit to at least one Massachusetts state jail/prison will be incorporated into the curriculum.

**Requirements:**  
Prerequisite: Sociology 97 AND Sociology Concentrators.

### Sociology 111

Creativity and Innovation (159928)

Larissa Buchholz

2016 Spring (4 Credits)  
**Schedule:** R 0300 PM - 0459 PM  
**Enrollment Cap:** 12

This course explores an intriguing problem in sociological analysis: the production of new ideas and practices as well as the reputations of their creators: How do social contexts affect creative output and inventions? How do professional communities determine when ideas are original, instead of misguided and infeasible? How does this compare across the arts, the economy, or the sciences? Specifically, the goals of the course are threefold: First, to acquaint students with key approaches on the subject in cultural sociology, economic & organizational sociology, and the sociology of knowledge. Second, to discuss and deepen our understanding of what is specific about a sociological approach in comparison to other disciplines (e.g., psychology or economics), and thus to train the "sociological imagination." Third, to equip students with broader skills for their own future academic and professional work. The course will involve brief lectures, student presentations, discussions, and a field trip. In addition, occasional guest presentations by Harvard scholars working in this field will enliven our discussion with interdisciplinary case studies.
Sociology 112

Men, Women, and Work (141657)

Mary Brinton

2016 Spring (4 Credits)    Schedule: TR 1000 AM - 1129 AM
Instructor Permissions: Instructor    Enrollment Cap: 30

Why do men and women tend to cluster into different occupations? Why do they earn different wages? Is there a certain path that all countries follow as they become more economically prosperous, or do issues concerning men's and women's work differ dramatically across countries because of cultural reasons? This course provides an overview of key issues and perspectives in the study of men, women, and work in contemporary society. May be counted for introductory concentration requirement, if letter-graded.

Media and Popular Culture (109705)

Matthew Kaliner

2015 Fall (4 Credits)    Schedule: TR 1100 AM - 1159 AM
Instructor Permissions: Instructor    Enrollment Cap: n/a

Explores American society and culture through the lens of its various media, including television, literature, music, movies, and the internet. Topics include class and cultural consumption, the business dynamics of the art world, the power of advertising and mass media, children's media and the online worlds of adolescents, and the rise of urban creative economy. Throughout, students will have opportunities to explore and evaluate ideas from class via independent social and media research. Appropriate for sociology concentrators and non-concentrators alike.

Development is a complex term. Although we measure it with some proxies of prosperity it does not only refer to the economy of a country or a society. One definition might be that development is a cumulative historical process, in which the economy grows with increased productivity and individuals live under better conditions with equal social rights and opportunities. This course opens up the complex puzzle of socio-economic development, and analyzes the problem from a global, historical, and comparative perspective. The course starts with discussions around the term “development” and then continues with canonical theoretical contributions from different disciplines. The last part of the course explores the policy aspect of development with examples and case studies from around the world.

What is community? Where does it come from, and what does it accomplish? To engage these questions, we will explore community from three distinct but complimentary perspectives: ethnography, intention, and policy. We begin with classic accounts of urban and suburban communities, and more recent work on communities struggling through changes like gentrification or environmental disasters. From there we turn to communities formed through intention: cults, communes, workplace cultures, social movements, and virtual networks. Finally, we consider how community enters the policy and planning domain, through community policing and new urbanist planning principles. Students will have opportunities to reflect on their own ideas about community via analytical response papers and an original piece of research exploring a community of their own choosing.

This course introduces students to core methodological concepts and strategies used in social science research including: question formulation, hypothesis generation, the logic of hypothesis testing, sampling and measurement, experiments, survey analysis, content analysis, ethnography, and in-depth interviewing. In the course we will discuss and develop the analytic skills necessary to interrogate epistemological assumptions in published research specifically and truth-claims generally. In addition to critically evaluating previous research, students will collect and analyze their own data based on the different methods discussed in the class. By the end of the course, students should have acquired valuable research tools widely applicable in academic and professional settings.

War, Revolution, and Organized Crime: In Theory, in Film, and in Reality (159926)

*Danilo Mandic*

2015 Fall (4 Credits)  
**Schedule:** MW 1200 PM - 1259 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:** 30

This course explores war, revolution and organized crime as interrelated social phenomena. Students will read sociologists, historians, political scientists and philosophers addressing the nature, causes and consequences of these phenomena in different national and historical contexts. The course will combine influential theoretical frameworks (by Karl Marx, Max Weber, Sigmund Freud, Hannah Arendt), middle-range social scientific approaches (by Anthony Giddens, Charles Tilly, Michael Mann, Theda Skocpol), and empirical and historical analyses (by Eric Hobsbawm, Benedict Anderson, James C. Scott, Eugen Weber). The three phenomena will further be scrutinized through their (mis)representation in movies by Mike Nichols, Milos Forman, Bernardo Bertolucci and others.

Education and Culture (156083)

*Tiffanie Ting*

2016 Spring (4 Credits)  
**Schedule:** R 0200 PM - 0359 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:** 18

In this course, we will use culture as an analytic lens for investigating the institution and experience of school. We will examine 1) relationships and borders between schooling and broader educational contexts including families and communities; 2) schools as dynamic social and cultural systems, and 3) classrooms as sites of conflict, collaboration, and innovation in teaching and learning. Throughout, we will consider how individuals in a variety of roles—teachers, students, administrators, parents, researchers—interpret, negotiate, and respond to the practices and arrangements of schooling. We will examine the complex role of cultural factors in producing, maintaining, and potentially reducing inequalities in educational access, opportunity, and outcomes.
Sociology 137
Money, Work, and Social Life (124455)
Filiz Garip
2016 Spring (4 Credits)  Schedule:  MW 1200 PM - 1259 PM
Instructor Permissions:  None  Enrollment Cap:  n/a
Examining different sectors of the economy from corporations and finance to households, immigrants, welfare, and illegal markets, we explore how in all areas of economic life people are creating, maintaining, symbolizing, and transforming meaningful social relations. Economic life, from this perspective, is as social as religion, family, or education.

Sociology 139
Economic Sociology: Global Perspectives (156140)
Burak Eskici
2015 Fall (4 Credits)  Schedule:  TR 0100 PM - 0159 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a
Sociology offers a unique perspective on economic behavior and institutions. Exploring the foundational concepts of economic sociology with examples from all over the world, this course treats the following questions, among others: How do sociological perspectives on organizations, networks, power and inequality challenge widely held assumptions about economic behavior? How can seemingly disparate cases from around the globe enrich our conceptual understanding of economy and society? Has the economy become more global over time and, if so, how? What role does finance capital play in the current dynamics and future direction of the global economy? Starting with the evolution of economic organizations, the course covers topics such as social embeddedness, markets and networks, power, labor market, globalization, economic development, and financial markets.

Sociology 140
Identity, Inequality and Social Media (161284)
Keridwen Luis
This course asks how gender, sexuality, race, dis/ability, class, and other intersections of identity impact how we use and appear on social media. Early internet theorists imagined the World Wide Web as a “free” society, where “bodily” issues such as race, gender, and disability would somehow disappear. However, these identities have not vanished; in fact, we might argue that they remain even more potent in today’s age of constant media connection. We will explore sociological and feminist theories of media, gender, sexuality, and race, as well as applying these theories to current events online. Students will explore the boundaries of digital activism, question the ways we continue to be embodied online, and consider power relations, discipline, and surveillance.

*Jason Beckfield*

*Benjamin Sosnaud*

2015 Fall (4 Credits) **Schedule:** TR 1200 PM - 1259 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** 100

In this course, we will study health differences between social groups. We will begin by examining the extent to which health is unevenly distributed across groups defined by nationality, neighborhood, race, gender, and class. We will then seek to pinpoint the reasons for these disparities with a detailed analysis of the pathways through which these factors are linked to health status. Finally, we will discuss new research on the sociology of population health that shows how health disparities depend on meso- and macro-scale causes like neighborhoods, social policy arrangements, global organizations, and climate change.
Sociology 156 Section: LEC

Quantitative Methods in Sociology (145331)

Alexandra Killewald

2016 Spring (4 Credits) Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

Introduces quantitative analysis in social research, including principles of research design and the use of empirical evidence, particularly from social surveys. Descriptive and inferential statistics, contingency table analysis, and regression analysis. Emphasis on analysis of data and presentation of results in research reports.

Course Notes: Required of and limited to Sociology concentrators, ordinarily sophomores. This course, when taken for a letter grade, meets the General Education requirement in Empirical and Mathematical Reasoning.

Sociology 161

Big Data: What is it? (156351)

Burak Eskici

2016 Spring (4 Credits) Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None Enrollment Cap: n/a

A tremendous amount of data is now being collected through websites, mobile phone applications, credit cards, and many more everyday tools we use extensively. What is currently done and what can we do with this precious resource? This big data course looks under the hood. It explores the logic behind the complex methods used in the field (not the methods itself). We then explore how big data research is designed with real life examples of cutting-edge research and guest lecturers from Facebook, Twitter and Google. By the end of the class students will be competent in the field and be able to conduct a research design using big data.
Sociology 165
Inequalities in Health Care (122318)

Mary Ruggie

2015 Fall (4 Credits) Schedule: MW 1100 AM - 1159 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

Asks why certain social groups are at greater risk for more severe health problems (e.g., infant mortality, HIV/AIDS, cancer) and yet receive unequal health care in the US. Examines what best practices foster adequate delivery of healthcare services, mutual respect between patient and provider, and healthy living. Considers the role of government, the private sector, family and community.

Culture and Networks (108274)

Bart Bonikowski

2015 Fall (4 Credits) Schedule: TR 1100 AM - 1159 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course will serve as an overview of the growing field of network research with a particular focus on how patterns of social interaction shape and are themselves shaped by cultural preferences and meaning-making processes. We will discuss a variety of substantive topics, including musical tastes, romantic relationships, organizational collaboration and competition, and social movement mobilization, while paying particular attention to the increasingly important role of social media in establishing and maintaining social ties.
Sociology 175

Sociology of Immigration (126223)

Catherine Bueker

2016 Spring (4 Credits)  
Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: None  
Enrollment Cap: n/a

Immigration is one of the most powerful forces in influencing the structure of societies, altering everything from educational and economic institutions to politics. Understanding the immigration process from a sociological perspective provides insight into why individuals and groups move, how they are received and incorporated into the host society, and the implications for the native-born and for those who stay behind. These theoretical issues will be explored through an examination of actual migration flows over time and around the world. Although the focus of the course will be on U.S. immigration, we will also spend some time on non-U.S. flows, including the current refugee crisis in Europe.

Sociology 177

Poverty in America (156139)

Matthew Desmond

2015 Fall (4 Credits)  
Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Instructor  
Enrollment Cap: n/a

Fifty Years after President Lyndon B. Johnson launched the War on Poverty, America is still home to both abundant wealth and extreme deprivation. This course investigates poverty in America in historical and contemporary perspective. We will explore topics such as urban and rural poverty, the underground economy, and survival strategies of poor families. We will also study several large-scale anti-poverty programs with an eye toward what worked and what didn’t, and we will review moral-political debates about the right to housing, living wages, welfare, social suffering, and other matters pertaining to American life below the poverty line.
Paul Chang

2016 Spring (4 Credits)  Schedule: TR 1000 AM - 1129 AM
Instructor Permissions: None  Enrollment Cap: n/a

This course explores the incredible transformation of Korean society in the modern period. We begin with the demise of the Choson Dynasty at the end of the 19th century before covering the Japanese colonial period (1910-1945), the emergence of two Korean nation-states (1945-1948), the Korean War (1950-53), and the contemporary period (1960-present). The course is divided into two distinct parts. In the first part of the course we discuss Korea's political and economic transformation and in the second, we cover social and cultural change. Upon completion of the course, students should have a thorough grasp of the vast social changes Korea underwent in the 20th century.

Democracy and Social Movements in East Asia (109681)

Paul Chang

2016 Spring (4 Credits)  Schedule: TR 0100 PM - 0229 PM
Instructor Permissions: None  Enrollment Cap: n/a

Social movements are an important part of both democratic and non-democratic societies. This course assesses the state of civil society in East Asia by surveying contemporary social movements in China, Taiwan, Hong Kong, Japan, and South Korea. We start the course by discussing the main concepts and analytic approaches in social movement theory. We then apply these theoretical frameworks to specific mobilization efforts in East Asia, keeping in mind each country's unique historical context. With the theoretical and empirical tools gleaned from the lectures and readings, students will pursue a case analysis of an East Asian social movement of their choosing.

Sociology 202

Intermediate Quantitative Research Methods (119985)

Jason Beckfield

2015 Fall (4 Credits)  Schedule: TR 1000 AM - 1129 AM
Instructor Permissions: Instructor  Enrollment Cap: n/a

Descriptive and inferential techniques used in quantitative sociological research. Emphasis is on the fundamentals of the linear regression model for continuous response variables, focusing on assumptions and interpretation. Motivation, application, and presentation are stressed; topics include categorical covariates, interactions, and diagnostics. Because the linear regression model is the foundation for more specialized models that are often applied in sociological research, the aim of this course is to develop the skills necessary to (a) understand
quantitative sociological research, (b) produce convincing analysis, (c) evaluate quantitative analysis, and (d) learn more specialized techniques as needed.

**Course Notes:** Required of, and limited to, first-year graduate students in Sociology

**Recommended Prep:** Familiarity with basic statistics.

**Sociology 204**

Classical Social Theory (117877)

*Matthew Desmond*

2015 Fall (4 Credits)  
**Schedule:** W 0300 PM - 0459 PM  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Introduction to the formative ideas and socio-intellectual contexts of 19th and early 20th century sociological theory. Course will explore social thought from the perspective provided by the problem of social order - and the roles different thinkers attributed to such factors as solidarity, power, and meaning as solutions to this problem. Consideration of the continuing significance of these ideas for contemporary social thought.

**Course Notes:** Required of and limited to first-year graduate students in Sociology.

Sociology 205

Sociological Research Design (125089)

Jocelyn Viterna

2016 Spring (4 Credits) Schedule: T 1000 AM - 1159 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

This course covers the fundamentals of sociological research design. Emphasis is placed on principles that are applicable in all kinds of sociological research, including surveys, participant observation, comparative historical study, interviews, and quantitative analysis of existing data. The course also delves into current methodological controversies in several arenas.

Course Notes: Required of, and ordinarily limited to, first-year graduate students in Sociology.

Sociology 208

Contemporary Theory and Research (117760)

Robert Sampson

2015 Fall (4 Credits) Schedule: M 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

Covers the development of sociology as a discipline in the US and the rise of distinct schools of sociological theory. Assesses the role of mechanisms in sociological theory and explores the use of theory in empirical research.

Course Notes: Required of and limited to second-year graduate students in Sociology.

Qualitative Social Analysis: Seminar (110551)

Mario Small

2016 Spring (4 Credits) Schedule: W 1200 PM - 0159 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

Examines approaches to non-numerical data used by social scientists to obtain valid, reliable, and meaningful insight into the social world through the analysis of ethnographic field notes, interview transcripts, and archival and other interpretative data.
Course Notes: Required of and limited to first-year graduate students in Sociology.

Sociology 211
Analysis of Longitudinal Data: Seminar (131333)

Alexandra Killewald

2016 Spring (4 Credits) Schedule: F 1000 AM - 1159 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course takes an applied approach to the analysis of longitudinal data. Lectures will provide an overview of a variety of techniques, including fixed effects models, multilevel models, and duration models. Students will develop their own empirical projects and receive support as they begin to work with longitudinal datasets.

Course Notes: Primarily for graduate students in sociology. Previously offered as 203b.

Sociology 218
Methods for Quantitative Data Analysis (159676)

Bruce Western

2016 Spring (4 Credits) Schedule: M 0500 PM - 0659 PM

Instructor Permissions: Instructor Enrollment Cap: 30

This course reviews several of the core methods for analyzing data: data visualization and statistical graphics, simple programming with data, studying data dispersion, statistical inference under model uncertainty and related topics. The lectures will examine the real-world challenges of data analysis and explore how statistical methods can be used to learn from data, and draw valid statistical inferences. The approach will be heavily applied involving data analysis with Stata and R. Students will develop their own empirical projects applying the methods from the course.

Cultural Processes in the Production of Inequality (121062)

*Michele Lamont*

2016 Spring (4 Credits)  
Schedule: R 0900 AM - 1059 AM  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

This advanced course will consider recent developments at the intersection of cultural sociology and the sociology of inequality, mobility and poverty. Topics will include: the coproduction of social and symbolic boundaries; moral schemas and inequality; cultural scripts in the construction of racism and anti-racism; new developments in the study of identity, ethno-racial and class cultures; cognition, cultural repertoires and networks; evaluation and other cultural and social processes; and the conceptualization of context and explanations in cultural sociology.

Economic Sociology (118601)

*Filiz Garip*

2015 Fall (4 Credits)  
Schedule: M 0200 PM - 0359 PM  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Introduction to economic sociology at the graduate level. Surveys economic inequality and the ways that economic behavior and outcomes are shaped by social institutions such as markets, networks, organizations, family, and culture.

Despite the ubiquity of sexual imagery in contemporary Western popular culture, most people regard sexuality to be an intimate topic that concerns the drives, experiences and pleasures of individuals. In this course, we will examine the social and pluralistic character of sexual desires, meanings, practices and politics. We will begin with some of conceptual foundations that ground contemporary sociological studies of sexuality (Freud, Foucault, Kinsey, Lauman, Plummer, Rubin), as well as some thorny methodological debates. (Is there a history of sexuality? How do we measure sexuality?) We will then examine some of the key fields in the sociology of sexualities, including work on sexual identities and social movements, the relationship between institutional contexts and sexual behavior, and intersections with the sociology of race, gender, risk, health and regulation. In each of these discussions, students will explore the varied methodological approaches to these topics within sociology, as well as some of the disciplinary and cultural challenges to making sexuality a central object of intellectual inquiry.

Course Notes: Five undergraduates may be admitted to this course with instructor's permission.

This course examines the dimensions and magnitude of inequality in industrial societies, with a heavy emphasis on the United States since the mid-20th century. The readings and class discussion are designed to expose students to a broad range of influential pieces in the social stratification literature. In particular, we will study inequality through: pay for work, race, neighborhoods, gender, family, mobility, education, social capital, and rising income inequality since 1980.

Class Notes:

In particular, we will study inequality through: pay for work, race, neighborhoods, gender, family, mobility, education, social capital, and rising income inequality since 1980.

Class Notes:

Additional Course Attributes:
The seminar explores the emergence, dynamics and interaction of cultural, structural and institutional processes in the development, and underdevelopment, of capitalism in selected western and non-western societies. Among the topics explored, through close study of selected texts, are: merchant capital, network channeling and cultural change in renaissance Italy; institutional, cultural and imperial factors in the rise and divergence of West European capitalism; networks and informal institutions in the rise of capitalism in China; cultural and institutional change in Tokugawa Japan; and the institutional and cultural origins of development and underdevelopment in Latin America and the Caribbean. Our readings and discussions will be guided by the recurring theoretical problems of causality, origins, continuity and change in institutional and cultural processes and the fundamental problem of how the past influences later periods and present outcomes.

Teaching Practicum (111781)

Jocelyn Viterna

2015 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Schedule: F 1000 AM - 1159 AM

This course is intended to enhance the teaching skills of graduate students in the Sociology Department. Through a combination of classroom discussions and teaching simulations, the seminar challenges students to discover and hone their teaching styles, to develop a personal philosophy about teaching and learning, to develop self-confidence leading and facilitating small and large group discussions, to learn about the teaching resources that are available to them throughout the university, to experiment with designing engaging courses of study, and to discover that teaching can be a rewarding and stimulating element of an academic career.

Course Notes: Required of and limited to graduate students in Sociology. Attendance at first meeting is required. Not repeatable for credit.

### Sociology 314

Workshop on Urban Social Processes (126400)

_Robert Sampson_  

_Mario Small_

2016 Spring (4 Credits)  

**Schedule:** R 0400 PM - 0559 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a

Cities are back, urbanization is rapidly expanding around the world, and new forms of data are presenting unique opportunities for research. SOC314 is a forum to explore the social mechanisms, processes, and structures that occur in urban settings and the diverse behaviors that are shaped by spatial inequality. The workshop highlights the presentation of graduate student research but also includes discussion sessions on selected readings and work-in-progress by faculty at Harvard and around the country.

Sociology 318

Quantitative Methods in Sociology (109750)

Alexandra Killewald

2016 Spring (4 Credits)

**Schedule:** R 1200 PM - 0159 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

This workshop provides a forum in which graduate students and faculty can present in-progress work to a substantively diverse group that shares an interest in quantitative methods. The practice of quantitative social science requires training not only in formal statistical methods but also in research design, model specification, management of complex survey data, and the interpretation of results. While Sociology graduate students receive training in statistical methods, many of the other tools of quantitative research are best taught through example and
hands-on experience. This workshop fills a gap in the curriculum, providing an opportunity for students to receive methods-directed feedback on their research projects. Cultivating a sense of the types of concerns that get raised with quantitative social science and good practices for addressing those concerns, this workshop will contribute to building an informal community of quantitative students and faculty who can serve as resources to one another. Although intended primarily for graduate students and faculty in the Harvard Department of Sociology, the workshop is open to faculty, researchers, and students from other disciplines at Harvard and other schools throughout the Boston area.

**Course Notes:** First meeting Thursday, January 28th.

2015 Fall (4 Credits)  

**Schedule:**  
F 1200 PM - 0159 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
n/a
Course Notes: The graduate workshop on mixed methods is a forum for graduate students and faculty to present their empirical work-qualitative, quantitative, or mixed-methods and get feedback on the empirical veracity of their claims. Individuals of all methodological persuasions are welcome. We are particularly interested in exploring synergies that can occur across methodological boundaries, either in the context of mixed-methods projects or in the context of collaboration between qualitative and quantitative researchers.

Class Notes: First meetings Friday, September 4, 2015.

Bollywood and Beyond: Commercial Cinema, Language and Culture in South Asia (123790)

*Richard Delacy*

2016 Spring (4 Credits)  
**Schedule:** T 0300 PM - 0559 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 20

This course examines concepts of personhood, community and culture in South Asia as expressed in contemporary film and literature. Works in Hindi-Urdu and in translation will be examined with emphasis on language as an index of cultural difference and of broad social shifts, notably the transformation of audiences from citizens to culture-consumers. Knowledge of Hindi-Urdu is not required. However, there will be a section for students with intermediate proficiency utilizing language materials.

**Course Notes:** Students who enroll in the language section of this course may count it towards a citation in Urdu-Hindi.

Subject: Nepali

Nepali 101A
Introductory Nepali (118665)
Michael Witzel
Bhai Rana
2015 Fall (4 Credits)
Instructor Permissions: Instructor
Schedule: TBD
Enrollment Cap: n/a

This course introduces the basic grammatical structures of modern Nepali, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Nepali is taught with a concern for the cultural context in which this language is spoken and written.

Course Notes: Not open to auditors.

Please contact the Department of South Asian Studies (southasianstudies@fas.harvard.edu) before the start of classes if you are
interested in enrolling in a Nepali language course. Students will be required to submit a statement demonstrating an academic need to enroll.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

2015 Fall (4 Credits)  
**Schedule:** MWF 1200 PM - 1259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Introduction to Classical Sanskrit, the translocal language of intellectual life in South Asia for much of the last two millennia. This course provides the essential grammar and reading proficiency necessary to take up the language's many rich literary traditions: scripture (*Upaniṣad*), epic (*Rāmāyaṇa* and *Mahābhārata*), poetry, Hindu and Buddhist philosophy, etc. After completing the textbook, we will read a narrative (*Hitopadeśa*) drawn from one of the most popular literary works in the pre-modern world.

**Schedule:** MWF 0100 PM - 0159 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a  
A reading course designed to give students the tools necessary for advanced study in Classical Sanskrit. Readings in epic (*itiḥāsa*) or narrative (*kathā*), poetry (*kāvya*) or systematic thought (*śāstra*) will introduce students to a variety of important genres and their distinctive conventions. A focus upon the Sanskrit tradition's categories of analysis - grammatical, commentarial and prosodic - will enable students to begin to make sense of original Sanskrit texts as generations of the tradition's own readers have.

Economic History of India (160720)

Sunil Amrith

2015 Fall (4 Credits)

**Schedule:**

M 0300 PM - 0459 PM

**Instructor Permissions:**

Instructor

**Enrollment Cap:**

n/a

The economic transformation of India over the past two decades has been dramatic. The contradictions of this transformation—the juxtaposition of new wealth and enduring poverty—are rooted in the region's economic history. This research seminar explores many dimensions of economic life in colonial and post-colonial India. Topics include: the history of markets and commodities, property and labor; the history of economic ideas in India; the changing nature of economic and social inequality; and the close relationship between economic and cultural change. Students will write a substantial research paper using primary sources.

South Asia: A Global History (160721)

Sunil Amrith

2016 Spring (4 Credits)

**Schedule:**

MW 1100 AM - 1159 AM

**Instructor Permissions:**

None

**Enrollment Cap:**

n/a

This course provides a global perspective on modern South Asia, from the early twentieth century to the present
day. It examines how South Asia has shaped the world, and how the world has shaped South Asia. Topics covered will include: the Indian freedom movement in global perspective; the migration and settlement of South Asian communities overseas; conflict and cooperation between South Asia's states— India, Pakistan, Bangladesh and Sri Lanka—and relations between South Asia, China and the United States. We will also examine the centrality of South Asia to the successes and failures of schemes of international health and development, and to global environmental politics in the twenty first century.

### South Asian Studies 178

**Literature as History in South Asia (161264)**

*Catherine Warner*

2016 Spring (4 Credits)  
**Schedule:** W 0200 PM - 0359 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

What can we learn about the history of modern South Asia from its literature? How have scholars read fiction and autobiography as an archive of the nation, gender, and colonialism? This seminar will explore several iconic as well as lesser known regional texts from the nineteenth and twentieth centuries. We will read these in conjunction with a body of historiography that methodologically and theoretically engages with literature as an important source for understanding the making of modern South Asia. Finally, we will consider how history-writing also developed as a contested genre of literature in the colonial and post-colonial periods. Students will be expected to conduct independent research and write seminar papers on a relevant topic.

### South Asian Studies 179

**South Asia: Connected Histories, Interdisciplinary Frames (160761)**

*Catherine Warner*

2015 Fall (4 Credits)  
**Schedule:** TR 1000 AM - 1129 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course will proceed chronologically beginning with the period before colonial rule in order to trace linkages and ruptures in ideas about South Asia over time. We will focus on notions of place and identity—and their contestations—as the subcontinent experienced the shift from early modern forms of empire to colonial rule to anti-colonial and nationalist movements, and, more recently, new geopolitical configurations characterized by financial globalization, the "rise of Asia" and increased levels of migration. Readings will draw from anthropology, history, literary studies, political science, religious studies, and excerpts from primary sources.

South Asian Studies 193
Class and the City in Indian Cinema (156558)

Shankar Ramaswami
2015 Fall (4 Credits)  Schedule:  M 0100 PM - 0259 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

This course will examine imaginaries and understandings of class and cities in Indian cinema. How are struggles for earnings and mobility in the city - of migrants, workers, and middle classes - represented in Indian cinema? In what ways is the city viewed as a space of ethical deviations and compromises? How does class shape experiences of friendship, family, and erotic love? What visions of politics, justice, and hope arise in Indian cinema? The course will explore these questions in commercial, art, and documentary films (in Bengali, Hindi, and Marathi, with English subtitles), along with readings in history, anthropology, and cinema studies. Screenings will include films by Satyajit Ray, Guru Dutt, Raj Kapoor, Yash Chopra, Muzaffar Ali, and Anand Patwardhan.

South Asian Studies 230
Environmental History of South Asia (160722)

Sunil Amrith
2015 Fall (4 Credits)  Schedule:  W 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

This seminar explores approaches to the environmental history of modern South Asia. It is designed for graduate students preparing examination fields in Modern and Contemporary South Asian Studies and in South Asian History; it might also be of interest as a comparative perspective for those specializing in the environmental history of other parts of the world. Topics and readings will be tailored to students' individual interests, but are likely to include: changing human interactions with the natural environment; the role of colonial and post-colonial states in
environmental transformation; and the development of Indian environmental law and regulation.

Subject: Tamil

Tamil 101A

Elementary Tamil (127491)

Jonathan Ripley

2015 Fall (4 Credits)  Schedule: MWF 0900 AM - 0959 AM
Instructor Permissions: Instructor  Enrollment Cap: n/a

An introduction to the oldest of the Dravidian languages of South India, Tamil holds official language status in Tamil Nadu, Singapore, and Sri Lanka. Tamil has one of the oldest uninterrupted literary traditions in the world, ranging from classical love poetry, devotional compositions and epics to the modern novel and short story. Students will be introduced to the Tamil script and to reading, writing, and speaking. Materials from popular culture will supplement modern teaching materials.

**Subject: Thai**

**Thai 101A**  
Introductory Thai I (107892)  
Parimal G. Patil  
Wipa Khampook  

2015 Fall (4 Credits)  
Schedule:  
M 0500 PM - 0859 PM  
Instructor Permissions: Instructor  
Enrollment Cap: n/a  
This course introduces the basic grammatical structures of modern Thai, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Thai is taught with a concern for the cultural context in which this language is spoken and written.  

Course Notes:  
Not open to auditors.
Please contact the Department of South Asian Studies (southasianstudies@fas.harvard.edu) before the start of classes if you are interested in enrolling in a Thai language course. Students will be required to submit a statement demonstrating an academic need to enroll.

First Meeting times will be posted on the Department of South Asian Studies’ website in shortly before the term begins: sas.fas.harvard.edu

Introduction to Quantitative Methods for the Social Sciences and Humanities (113431)

*Kerrie Nelson*

2015 Fall (4 Credits)  
**Schedule:** MW 0100 PM - 0229 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

"Introduction to key ideas underlying statistical and quantitative reasoning. Topics covered: methods for organizing, summarizing and displaying data; elements of sample surveys, experimental design and observational studies; methods of parameter estimation and hypothesis testing in one- and two-sample problems; regression with one or more predictors; correlation; and analysis of variance. Explores applications in a wide range of fields, including the social and political sciences, medical research, and business and economics."

**Course Notes:** Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. Expected to be omitted spring term.

Statistics 102

Introduction to Statistics for Life Sciences (110094)

*David P. Harrington*

2016 Spring (4 Credits)  
**Schedule:** MWF 1100 AM - 1159 AM

**Instructor Permissions:** None

**Enrollment Cap:** n/a

Introduces the basic concepts of probability, statistics and statistical computing used in medical and biological research. The emphasis is on data analysis and visualization instead of theory. Designed for students who intend to concentrate in a discipline from the life sciences.

**Course Notes:** Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

**Class Notes:** M., W., F., at 11, and weekly sections to be arranged.

David P. Harrington (FAS/Public Health)
Statistics 104

Introduction to Quantitative Methods for Economics (114027)

Michael Parzen

2016 Spring (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

A rigorous introduction to statistics for students intending to study economics. Examples drawn from finance, decision analysis and economic decision-making. In addition to descriptive statistics, probability, inference and regression modeling, also covers portfolio optimization, decision analysis, and time series analysis. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques.

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

### Statistics 107

**Introduction to Business and Financial Statistics (127043)**

*Michael Parzen*

2015 Fall (4 Credits)  
**Schedule:** TR 1000 AM - 1129 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Introduces the technical skills required for data-driven analysis of business and financial data. Emphasis on applying statistical methods to summarize and make inferences from complex data and to develop quantitative models to assist business decision making. Topics include: how to collect and summarize financial data, understanding the concept of risk, portfolio construction and analysis, testing trading systems, and simulation techniques.

**Course Notes:** The software packages Excel and R will be used to obtain quantitative solutions to financial problems.

**Recommended Prep:** Statistics 100, 101, 104 or equivalent.

Statistics 115
Introduction to Computational Biology and Bioinformatics (122304)
Xiaole (Shirley) Liu
2016 Spring (4 Credits) Schedule: TR 1130 AM - 1259 PM
Instructor Permissions: None Enrollment Cap: n/a

The course will cover basic technology platforms, data analysis problems and algorithms in computational biology. Topics include sequence alignment and search, high throughput experiments for gene expression, transcription factor binding and epigenetic profiling, motif finding, RNA/protein structure prediction, proteomics and genome-wide association studies. Computational algorithms covered include hidden Markov model, Gibbs sampler, clustering and classification methods.

Recommended Prep: Good quantitative skills, strong interest in biology, willingness and diligence to learn programming.

Data Science (110095)
Joseph Blitzstein
Verena Kaynig-Fittkau
Hanspeter Pfister
2015 Fall (4 Credits) Schedule: TR 0230 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
Learning from data in order to gain useful predictions and insights. This course introduces methods for five key facets of an investigation: data wrangling, cleaning, and sampling to get a suitable data set; data management to be able to access big data quickly and reliably; exploratory data analysis to generate hypotheses and intuition; prediction based on statistical methods such as regression and classification; and communication of results through visualization, stories, and interpretable summaries. Built around three modules: prediction and elections, recommendation and business analytics, and clustering and text analysis.

Course Notes: Only one of CS 109, AC 209, or Stat 121 can be taken for credit.

Class Notes: Tu., Th., 2:30–4

Recommended Prep: Programming knowledge at the level of CS 50 or above, and statistics knowledge at the level of Stat 100 or above (Stat 110 recommended).

Additional Course Attributes:

<table>
<thead>
<tr>

Statistics 123

Applied Quantitative Finance (126048)

David Moore

2016 Spring (4 Credits) Schedule: MW 0100 PM - 0229 PM

Instructor Permissions: None Enrollment Cap: n/a

Introduction to financial derivatives and the probabilistic techniques used to analyze them. Topics include: forwards, swaps and options; replication, no-arbitrage and risk-neutrality; martingales, numeraires and the fundamental theorem of asset pricing; and an introduction to interest-rate derivatives and their valuation. Provides a rigorous but accessible treatment of the elegant theory underpinning quantitative finance, motivated by real problems from the financial industry.

Course Notes: Designed for those seeking an understanding of the quantitative challenges on Wall Street and the probabilistic tool-kit developed to address them.

Recommended Prep: Statistics 110 or equivalent.

Additional Course Attributes:

Statistics 139

Statistical Sleuthing Through Linear Models (110751)

Michael Parzen

2016 Spring (4 Credits) Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None Enrollment Cap: n/a

A serious introduction to statistical inference with linear models and related methods. Topics include t-tools and permutation-based alternatives, multiple-group comparisons, analysis of variance, linear regression, model checking and refinement, and causation versus correlation. Emphasis on thinking statistically, evaluating assumptions, and developing tools for real-life applications.

Class Notes: Fall: M., W., 9:30-11, and a weekly section to be arranged; Spring: To be arranged, and with a weekly section also to be arranged.

Recommended Prep: Statistics 100 or equivalent and Mathematics 19a and 19b or equivalent.
Statistics 139
Statistical Sleuthing Through Linear Models (110751)

Kevin A. Rader

2015 Fall (4 Credits)  Schedule:  MW 0930 AM - 1059 AM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

A serious introduction to statistical inference with linear models and related methods. Topics include t-tools and permutation-based alternatives, multiple-group comparisons, analysis of variance, linear regression, model checking and refinement, and causation versus correlation. Emphasis on thinking statistically, evaluating assumptions, and developing tools for real-life applications.

Class Notes:  Fall: M., W., 9:30-11, and a weekly section to be arranged; Spring: To be arranged, and with a weekly section also to be arranged.

Recommended Prep:  Statistics 100 or equivalent and Mathematics 19a and 19b or equivalent.

Statistics 149
Statistical Sleuthing through Generalized Linear Models (118974)

Mark Glickman

2016 Spring (4 Credits)  Schedule:  MW 0100 PM - 0229 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

Sequel to Statistics 139, emphasizing common methods for analyzing continuous non-normal and categorical data. Topics include logistic regression, log-linear models, multinomial logit models, proportional odds models for ordinal data, Gamma and inverse-Gaussian models, over-dispersion, analysis of deviance, model selection and criticism, model diagnostics, and an introduction to non-parametric regression methods.

Course Notes:  Examples will be drawn from several fields, particularly from biology and social sciences.

Recommended Prep:  Statistics 139 or with permission of instructor.
(New Course) Data often have structure that needs to be modeled explicitly. For example, when investigating students' outcomes we need to account for the fact that students are nested inside classes that are in turn nested inside schools. If we are watching students develop over time, we need to account for the dependence of measurements across time. If we do not, our inferences will tend to be overly optimistic and wrong. The course provides an overall framework, the multilevel and generalized multilevel (hierarchical) model, for thinking about and analyzing these forms of data. We will focus on specific versions of these tools for the most common forms of longitudinal and clustered data. This course will focus on applied work, using real data sets and the statistical software R. R will be specifically taught and supported. While the primary focus will be on the linear model with continuous outcomes (i.e., the classic regression framework) we will also discuss binary, categorical, and ordinal outcomes. We will emphasize how to think about the applicability of these methods, how they might fail, and what one might do to protect oneself in such circumstances. Applications of hierarchical (multi-level) models will include the canonical specific cases of random-slope, random-intercept, mixed effect, crossed effect, marginal, and growth-curve models.

**Recommended Prep:** Permission of instructor required. Prerequisite: S-052, Stat 139, or an equivalent. Jointly-offered in the Graduate School of Education.

**Statistics 160**

Design and Analysis of Sample Surveys (112121)

*Alan Zaslavsky*

2015 Fall (4 Credits)  
**Schedule:** MW 0230 PM - 0459 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Methods for design and analysis of sample surveys. The toolkit of sample design features and their use in optimal design strategies. Sampling weights and variance estimation methods, including resampling methods. Brief overview of nonstatistical aspects of survey methodology such as survey administration and questionnaire design and validation (quantitative and qualitative). Additional topics: calibration estimators, variance estimation for complex surveys and estimators, nonresponse, missing data, hierarchical models, and small-area estimation.

**Course Notes:**  
The regular classroom hours of Stat 160 are 2:30 - 4:00. The extra hour is for extra discussion for 260.

**Recommended Prep:** Statistics 111 or 139 or with permission of instructor.

Statistics 186

Statistical Methods for Evaluating Causal Effects (110022)

Donald Rubin

2016 Spring (4 Credits) Schedule: MW 1000 AM - 1129 AM

Instructor Permissions: None Enrollment Cap: n/a

Statistical methods for inferring causal effects from data from randomized experiments or observational studies. Students will develop expertise to assess the credibility of causal claims and the ability to apply the relevant statistical methods for causal analyses. Examples from many disciplines: economics, education, other social sciences, epidemiology, and biomedical science. Evaluations of job training programs, educational voucher schemes, changes in laws such as minimum wage laws, medical treatments, smoking, military service.

Recommended Prep: Statistics 100; Mathematics 21a, b or permission of instructor.

Statistical Inference II (159802)

Pierre Jacob

2015 Fall (4 Credits) Schedule: TR 0230 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Stat 213 will build upon Stat 211 and give some tools to study and validate statistical methods (asymptotic statistics, well-specified and mis-specified models, model comparison, cross-validation, bootstrap). These concepts will be discussed in the context of advanced statistical models: non-parametric regression, regularized regression, latent variable and hidden Markov models. Numerical methods required to put such models into practice will be discussed.

Course Notes: Formerly Stat 211b

Recommended Prep: Stat 210, 211, 212 (stat 210b)

Additional Course Attributes:

<table>

Statistics 215

Introduction to Computational Biology and Bioinformatics (126060)

Xiaole (Shirley) Liu

2016 Spring (4 Credits) Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None Enrollment Cap: n/a

Meets with Statistics 115, but graduate students are required to do more coding, complete a research project and submit a written report during reading period in addition to completing all work assigned for Statistics 115.

Recommended Prep: Good quantitative skills, strong interest in biology, good programming skills in C/C++, Java, Perl or Python.

Additional Course Attributes:

Statistics 220
Bayesian Data Analysis (118016)

Jun Liu

2015 Fall (4 Credits)  Schedule:  R 1130 AM - 1229 PM
                                 T 0830 AM - 0959 AM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Basic Bayesian models, followed by more complicated hierarchical and mixture models with nonstandard solutions. Includes methods for monitoring adequacy of models and examining sensitivity of models.

Course Notes:  Emphasis throughout term on drawing inferences via computer simulation rather than mathematical analysis.

Recommended Prep:  Statistics 110 and 111.

Additional Course Attributes:

Statistics 240
Matched Sampling and Study Design (123714)

Tirthankar Dasgupta
Donald Rubin

2015 Fall (4 Credits)  Schedule:  W 0900 AM - 1129 AM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

This course provides an accessible introduction to the study of matched sampling and other design techniques in any field (e.g., economics, education, epidemiology, medicine, political science, etc.) conducting empirical research
to evaluate the causal effects of interventions.

**Recommended Prep:** Statistics 110, Statistics 111, and Statistics 139.

**Additional Course Attributes:**

**Statistics 260**

Design and Analysis of Sample Surveys (126393)

*Alan Zaslavsky*

2015 Fall (4 Credits)  

**Schedule:** MW 0230 PM - 0459 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a

Meets with Statistics 160, but graduate students will have an extended class period and complete additional assignments for a more theoretical, in-depth treatment of topics.

**Course Notes:** The regular classroom hours of Stat 160 are 2:30 - 4:00. The extra hour is for extra discussion for 260.

**Recommended Prep:** Statistics 110, 111, and 139 or with permission of instructor.

**Additional Course Attributes:**

Statistics 317
Particle Methods in Statistics (111463)
Pierre Jacob
Natesh Pillai
2016 Spring (4 Credits)  Schedule:  W 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  20
Particle filters initially appeared as computational tools to perform online state estimation (i.e. "filtering") in non-linear, non-gaussian state space models, with many applications in target tracking, signal processing and time series in general. They have been generalized to other settings, and now constitute generic competitors to Markov chain Monte Carlo methods, under the name of "Sequential Monte Carlo". These algorithms provide advantages in terms of parallelization on modern hardware and are rapidly increasing in popularity. In this reading group, we will start with seminal papers on particle methods, before turning to some generalizations, some theoretical aspects and finally some recent methodological developments.

Course Notes:  The meeting of this class will be Feb. 3rd.
Statistics 321

Stochastic Modeling and Bayesian Inference (117134)

S. C. Samuel Kou

2016 Spring (4 Credits)

Schedule: W 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Stochastic processes and their applications in biological, chemical and financial modeling. Bayesian inference about stochastic models based on the Monte Carlo sampling approach.

2015 Fall (2 Credits)  Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

Students will make at least one presentation on current research in applied or theoretical statistics. All registered students are expected to participate by offering commentary/suggestions during presentations. This is a requirement to obtain credit. Students must complete both parts of this course (parts A and B) within the same academic year in order to receive credit.

Human Developmental and Regenerative Biology (125800)

*Kevin Eggan*
*William J. Anderson*

2015 Fall (4 Credits)  

**Schedule:** MWF 0100 PM - 0159 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Fundamental concepts in developmental biology will be presented within the framework of the developing and regenerating mammal. Where possible, lectures will focus on humans.

**Course Notes:** This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems.

**Class Notes:** M., W., F., at 1, and a weekly section to be arranged

**Recommended Prep:** Concurrent enrollment in Life and Physical Sciences A or Life Sciences 1a.

Molecular Genetics and Genomics in Development and Disease (156398)

*John Rinn*
*Alexander Meissner*

2016 Spring (4 Credits)  

**Schedule:** TR 0100 PM - 0229 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

The sequencing of the human genome has ushered in a new era of scientific investigation. In parallel, advances in molecular biology have made it possible to explore the processes underlying normal development and disease pathogenesis. We will apply principles and techniques of molecular biology - ranging from DNA structure to the Central Dogma, from PCR to cutting-edge genome-editing technology - to understand how genetics and genomics inform gene regulation and cell identity and, ultimately, the human condition.

**Recommended Prep:** Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b (or equivalent) or permission of the instructor.

Stem Cell & Regenerative Biol  91R
Introduction to Research (125804)

William J. Anderson

2016 Spring (4 Credits)  Schedule:  TBD

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Laboratory research in topics related to the Human Developmental and Regenerative Biology Concentration under the direction of, or approved by, members of the Department of Stem Cell and Regenerative Biology, Principal Faculty of the Harvard Stem Cell Institute, or others with permission. A paper must be submitted to the laboratory sponsor and to the HDRB Concentration Office for review by the Course Director and Head Tutors.

Course Notes:  Limited to Human Developmental and Regenerative Biology Concentrators; written permission of the laboratory sponsor must be submitted to the HDRB Concentration Office prior to enrolling in the course. This introductory research course is intended to prepare students for SCRB 99 and may ordinarily be repeated no more than once. Ordinarily may not be taken as a fifth course. Laboratory safety session required.

Class Notes:  William J. Anderson and members of the Department

Stem Cell & Regenerative Biol 110
Classic Experiments in Developmental Biology (127065)

Douglas Melton

2016 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 20

This course will introduce students to classic experiments in developmental biology. We will explore the historical background, experimental design, and results of a handful of experiments that have defined the field of developmental biology and changed our understanding of the discipline. Students will read primary literature and, in turn, present the conclusions in written and oral formats.

Recommended Prep: SCRB 10 or permission of the instructor.

Biomedical Entrepreneuring: Turning Ideas into Medicine (128040)

Derrick Rossi

2015 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Medicines and other therapeutics have revolutionized the treatment of many diseases. Few of us pause to consider how these products are developed from an initial discovery in the lab to the treatment of patients. This course will consider this journey by incorporating scientific, biotechnology, intellectual property, venture capital, and business perspectives. In addition to lectures, students will work on group projects to chart a strategy toward bringing a novel biomedical idea to the clinic.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 52, or permission of the instructor.

Stem Cell & Regenerative Biol 140
Developmental and Molecular Basis of Growth and Regeneration (126744)

Fernando Camargo

2016 Spring (4 Credits)  
Instructor Permissions: None  
Enrollment Cap: n/a

This course will focus on the biology of organ growth and regeneration from a developmental perspective. How is the size and symmetry of our organs set? How does a regenerating animal sense that something is missing and
eventually stop the regenerative process when tissues reform? We will learn about conserved developmental pathways that are necessary for adult regeneration and discuss how the aberrant activation of these pathways can lead to overgrowth disorders such as cancer.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54, or permission of the instructor.

From Cells to Tissues, in Sickness and in Health (161207)
Ya-chieh Hsu

2016 Spring (4 Credits)  Schedule: MW 0100 PM - 0229 PM
Instructor Permissions: None  Enrollment Cap: n/a

Every cell is a part of a larger "community", working together to enable tissue function. This course will explore the principles of building complex tissues from cells. How do cells know what tissues to make and when to make them? How do cells communicate with one another? What diseases can arise when these principles go awry? How can we build tissues in the lab? In addition to lectures, students will engage deeply in primary literature.

Stem Cell & Regenerative Biol 152

Asking Cells Who They Are: Computational Transcriptomics Using RNA-Seq (156937)
Douglas Melton

2015 Fall (4 Credits)  Schedule: TR 1130 AM - 1259 PM
Instructor Permissions: Instructor  Enrollment Cap: 16

This course is a hands-on introduction to computational analysis of RNA sequencing data as a measure of genome-wide transcription. We will cover methods spanning the spectrum of RNA-Seq analysis: starting from raw sequencing reads, obtaining gene expression measures, and interpreting biological significance by differential expression analyses, clustering, and visualization. Coursework will consist of programming assignments in Pythonexploring real datasets. The course will emphasize skills applicable to independent biological research.

Recommended Prep: Life Sciences 1a or Life and Physical Sciences A or permission of the instructor; Mathematics at the level of Math 19a or statistics at the level of Stat 102 or above. CS 50 or some previous exposure to programming is preferred but not required.
Stem Cell & Regenerative Biol 162

Experimental Regenerative Biology (126746)

2016 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

This laboratory course will allow advanced undergraduate students to explore classical and modern experimental models of regeneration, and through experimentation, understand the important concepts and key challenges of the regenerative biology field. We will focus in particular on the regeneration of complex tissues and entire organ systems using both invertebrate and vertebrate models, including the planarian worm, the salamander, and the mouse.

Recommended Prep:  Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54, or permission of the instructor.

Stem Cell & Regenerative Biol 165

Directed Differentiation of Stem Cells (125191)

Chad Cowan

2016 Spring (4 Credits)  Schedule:  T 0230 PM - 0359 PM  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  12

This practical laboratory course will investigate the biology of human pluripotent stem cells and their remarkable capacity to differentiate into all cell types of the body. Furthermore, key developmental pathways that guide stem cell development into these differentiated cell types will be explored and current paradigms for directing the differentiation of pluripotent stem cells will be discussed and studied experimentally. Finally, the utility of human pluripotent stem cells to understand and treat disease will be investigated.

Recommended Prep:  Life and Physical Sciences A or Life Sciences 1a, or permission of instructor.

Stem Cell & Regenerative Biol 167

Stem Cells and Regeneration in the Pathobiology and Treatment of Human Disease (125200)
Stem cells are the basis for tissue maintenance and repair, thus, are essential elements of normal organ and tissue physiology. Stem cells are also targets for disease processes and through transplantation are important therapeutic agents. This course will allow advanced undergraduates to explore how stem cells and tissue regeneration impact human disease pathogenesis and how stem cells might be exploited to advance new therapies for disease.

Class Notes: George Daley and members of the Department

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10; MCB 52 or MCB 54.

Glucose: From Molecule to Society (128041)

Richard Lee

We will explore the biochemistry, cell biology, and physiology that make glucose our main source of energy. How did humans depend on and crave this molecule? What consequences does it hold for normal metabolism and disease? Students will integrate evolution, endocrinology, biostatistics, bioengineering, and regenerative biology approaches in considering sugar and all its consequences. Finally, we will evaluate legal and business issues.
necesario mover innovaciones científicas y tecnológicas desde el laboratorio al paciente.

Class Notes:

Immunology: New Tracks and Greatest Hits (111316)

Jonathan Hoggatt

2016 Spring (4 Credits)

Schedule: MW 0400 PM - 0529 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course will explore cutting edge immunology topics with student presentations of recently published papers discussing topics ranging from hematopoietic stem cells, HIV, gluten, cancer and others. The class will also discuss the classic immunology papers that have shaped the field today, with discussions on the next steps for the future. Course work: Reading of papers, seminar presentations, and class participation.

Recommended Prep: MCB 169 or permission of instructor recommended, but not required.

Stem Cell & Regenerative Biol 180

Regeneration and Repair in the Mammalian Brain (125803)

Jeffrey Macklis

2015 Fall (4 Credits)

Schedule: TR 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Regenerative biology of the mammalian central nervous system (CNS), motivated by a focused and related set of human CNS disorders: This course will discuss molecular and cellular mechanisms of regeneration and repair in the mammalian central nervous system (CNS), motivated by prototypical examples in the motor control systems and circuitry of the cerebral cortex and spinal cord centrally relevant to spinal cord injury, ALS / Lou Gehrig's disease ("amyotrophic lateral sclerosis", and related disorders), and spinal muscular atrophy (SMA). We will take an approach integrating development and regenerative biology: we will compare and contrast aspects of embryonic neural development (molecular and cellular) with adult neural plasticity; discuss limitations to neuronal and axonal regeneration in the mature mammalian CNS following degeneration or injury; examine CNS regeneration approaches directed at overcoming intrinsic limitations; explore developmental controls, gene manipulation, and cellular reprogramming to promote neurogenesis, axonal regeneration, and directed differentiation in diseased adult mammalian brain; and consider technology such as "brain-computer interfaces".
Class Notes: Tu., Th., 2:30-4, and a weekly section to be arranged.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; MCB 80 or permission of the instructor.

Got (New) Brain? The Evolution of Brain Regeneration (159693)

Paola Arlotta

2015 Fall (4 Credits) Schedule: MW 0230 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course will cover concepts and theories on evolutionary changes in nervous system regenerative capacity of different organisms. Material will be taught in a dynamic setting combining lectures and brainstorming of the literature with hands-on experience in the laboratory. Students will become familiar with classic, paradigm-changing experiments that have shaped how we think about brain regeneration and repair and also consider the newest theories on cellular reprogramming as a way to regenerate the nervous system.

Brains, Identity, and Moral Agency (109360)

Steven Hyman

2016 Spring (4 Credits) Schedule: W 0100 PM - 0229 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Human beings experience a sense of self that provides a stable foundation from which to understand personal experience, consciously formulate goals, and initiate actions. The view that people act in accordance with freely formed intensions underlies important concepts of moral agency and culpability, yet evidence from neuroscience questions this assumption. This course will examine competing views of human agency grounded in concrete scientific examples to encourage reflection on the implications for identity and moral agency.

Course Notes: For students who have taken MCB 80, it is contemplated that there will be a section that incorporates more advanced concepts from neurobiology. This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Recommended Prep: LPS A or LS 1a (or equivalent - permission of instructor required).

Principles of Drug Discovery and Development (109112)

Gregory Verdine

2015 Fall (4 Credits)  
Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor  
Enrollment Cap: 40

This interdisciplinary course will examine the process of drug discovery and development through disease-driven examples. Topics include: the efficacy/toxicity balance, the differences between drugs and inhibitors, and the translation of cellular biochemistry to useful medicine.

Course Notes: May not be taken concurrently with Chemistry 192. May not be taken for credit if Chemistry 192 or MCB 192 have already been taken.

Recommended Prep: Chemistry 20/30 or 17/27, Life Sciences 52 or their equivalents, MCB 52, and one year of organic chemistry. MCB 54 is recommended.

Stem Cell & Regenerative Biol 220
Biochemistry and Molecular Genetics in Modern Medicine (114092)
Kiran Musunuru
2015 Fall (4 Credits)          Schedule:  T 0200 PM - 0459 PM
                                         M 0830 AM - 1159 AM
Instructor Permissions: Instructor  Enrollment Cap: n/a
Foundation for understanding the relationship between biochemistry, molecular biology, genetics, and medicine.
Intensive treatment of human biochemistry and physiological chemistry that focuses on intermediary metabolism
and structures of key intermediates and enzymes important in human disease. Principles of human genetics
reviewed. Translation of clinical understanding into analysis at the level of the gene, chromosome, and molecule;
the concepts and techniques of molecular biology and genomics; and the strategies and methods of genetic
analysis. The clinical relevance of these areas is underscored with patient presentations.

Course Notes: Offered jointly with the Medical School as HT 160.
Classes held at MIT. Location: MIT E25-117. First meeting is September 14.
Enrollment requires instructor's permission.

Principles and Practice of Drug Development (156679)
Lee Rubin
Stan Finkelstein
2015 Fall (4 Credits)          Schedule:  TBD
Instructor Permissions: Instructor  Enrollment Cap: n/a
Critical assessment of the major issues and stages of developing a pharmaceutical or biopharmaceutical. Drug
discovery, preclinical development, clinical investigation, manufacturing and regulatory issues considered for small
and large molecules. Economic considerations of the drug development process.

Course Notes: Classes held at MIT. SCRB 230 is also offered as BCMP 230. Students may
not take both for credit.

Class Notes: The course will take place at MIT, Building 56, Room 114.

Systems Biology
Subject: Systems Biology

Systems Biology  200
Dynamic & Stochastic Processes in Cells (116238)
Jeremy Gunawardena
Johan Paulsson
2015 Fall (4 Credits) Schedule: TR 1000 AM - 1129 AM
Instructor Permissions: Instructor Enrollment Cap: 9998
Rigorous introduction to (i) dynamical systems theory as a tool to understand molecular and cellular biology (ii) stochastic processes in single cells, using tools from statistical physics and information theory.

Course Notes: Students planning to take both quarter courses (SB303 and 304) must enroll in this as a half course on their study card as SysBio200 for now and in the future. Students who take one half of this quarter can NOT ever take the other half for credit.

Class Notes: Students planning to take both quarter courses (SB303 and 304) must enroll in this as a half course on their study card as SysBio200 for now and in the future. Students who take one half of this quarter can NOT ever take the other half for credit.
Tu., Th., 10-11:30, and a weekly section to be arranged.

Recommended Prep: College-level calculus. Familiarity with mathematics at the level of 19/20 is strongly recommended.

Drama, Theater, Theory (160648)

Martin Puchner

2016 Spring (4 Credits) Schedule: M 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

This sophomore tutorial of the concentration in Theater, Dance, and Media, explores the theater as a medium that brings together all the other arts, from architecture and design to literature and music, through readings, discussions, and exercises. We also consider the intellectual traditions connected to theater, including philosophy, politics, and sociology. Key texts include Plato, Euripides, Brecht, and Churchill; sessions at the Harvard Theater Collection.
Theater, Dance & Media   98

Junior Tutorial (160647)

Deborah Foster

2015 Fall (4 Credits)  

Schedule: TBD

Instructor Permissions: Instructor  

Enrollment Cap: n/a

The junior tutorial is a unique opportunity for small groups of concentrators and a tutor to explore a creative or critical project. The junior tutorial typically culminates in a longer project, which can be performance-based or critical/historical.

Recommended Prep: Required of all, and limited to concentrators.

Introduction to Dramaturgy (Adaptation and A.R.T. 2015-16 Season) (118876)

Ryan McKittrick
Diane Paulus

2015 Fall (4 Credits) Schedule: W 1200 PM - 0159 PM

Instructor Permissions: Instructor Enrollment Cap: 12

In this course, students will learn about the roles and responsibilities of a dramaturg in the rehearsal room and in a theater company, with a particular focus on the ways dramaturgs and playwrights adapt novels, screenplays, and personal memoirs for the stage. Focusing on productions in the American Repertory Theater's 2015-16 season and on work originally developed at the A.R.T. and subsequently staged in New York City, students will engage with artists and writers in discussions about adaptation, and write their own dramatic adaptation. In addition, students will explore performance histories, translations, and dramatic structures of plays and musicals, and learn about the steps a dramaturg takes to prepare for a production. Students will also read and evaluate new scripts submitted to the A.R.T. and the A.R.T. Institute for Advanced Theater Training. Students will use the Harvard Theater Collection to research a play, opera, or musical of his or her choice and write an essay analyzing the production history.

Theater, Dance & Media  110

Beginning Acting (112880)

Thomas Derrah

2016 Spring (4 Credits) Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None Enrollment Cap: n/a

An exploration of the basic techniques of acting, beginning with exercises that flex the imagination and heighten observation; the course will then move towards work on rhythm, an actor's instincts, focus, concentration, and character with an ongoing emphasis in improvisation. The texts of Anton Chekhov will be used as a point of reference for the work. The latter part of the course will concentrate on selected scene study from Chekhov's major plays.

Course Notes: Enrollment determined by audition. Students will audition for the course with a short improvisation described by the professor at the first class meeting.

Additional Course Attributes:
Theater, Dance & Media  112R

Advanced Acting: Contemporary Texts (122906)

Marcus Stern

2016 Spring (4 Credits) Schedule: T 0100 PM - 0259 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

For actors interested in working in television, film and theater, this is a course of advanced acting techniques using contemporary dramatic texts for scene work. The emphasis is on action based acting and the creation of an acting process that is specifically tailored to the individual actor. Includes character work -- making physical and vocal changes. Emphasis also on learning how to audition better, includes helping actors assemble a group of working monologues to use in auditions.

Course Notes: Enrollment determined by audition on the first day of class. Please bring in a memorized and rehearsed contemporary monologue no longer than 2 minutes to audition with on the first day.

Practical Aesthetics (123901)

Scott Zigler

2015 Fall (4 Credits) Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Practical Aesthetics Acting Technique was developed by playwright David Mamet and actor William H. Macy, based on the work of the American acting teacher Sanford Meisner and the Russian acting teacher Konstantin Stanislavski. In this course, students will focus on rigorous text analysis combined with emphasis on enhancing the actor's spontaneity through training in Meisner's "Repetition Exercise." Students will do scene work drawn from a wide selection of plays.

Course Notes: Enrollment will be determined by lottery at the first class meeting.

Recommended Prep: Dramatic Arts course in Acting, previous study in Practical Aesthetics, or extensive undergraduate performance experience.

Theater, Dance & Media  115

Acting Shakespeare (119020)

Remo Airaldi

2015 Fall (4 Credits) Schedule: T 0400 PM - 0559 PM
This course is an intensive study of Shakespeare's dramatic works from the point of view of the actor. It is important to remember that Shakespeare's verse dramas were written to be performed and that only when they are approached this way - as playable, theatrical texts - that they have their maximum impact. Through text analysis, scene study, vocal work, and acting exercises we attempt to find, not only the meaning, but the music and theatrical power of Shakespeare's words.

**Course Notes:**
Enrollment will be determined by an audition during the first class meeting.

### Theater, Dance & Media  116

**Acting Workshop: Comedy** (117460)

*Scott Zigler*

2015 Fall (4 Credits)

**Schedule:** TR 1000 AM - 1129 AM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 16

A course developing the actor's approach to and playing of comedy and humor. The class will focus on marrying comedy's need for technical precision with a truthful and spontaneous approach to acting based on the methodology of Konstantin Stanislavski. Specific comic skills studied will include timing, focus, choreography, and the mechanics of how a joke builds from set up to punchline. Acting skills will focus on moment to moment pursuit of objective and creation of character. Styles of comedy will include farce, drawing room/comedy of manners and contemporary comic playwriting such as David Lindsay-Abaire, Nicky Silver, Christopher Durang and Sarah Ruhl.

**Course Notes:**
Enrollment determined by audition on the first day of class. Students are asked to prepare a 30 second comic monologue, classical or contemporary, for the audition.

### Theater, Dance & Media  119

**Vocal Production for the Stage** (118497)

*Erika Bailey*

2015 Fall (4 Credits)

**Schedule:** R 0100 PM - 0259 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 18

Whether one is performing in a play, speaking professionally, teaching a class or leading a group, the ability to use one's voice effectively is a primary element of the success of the presentation. Using several major techniques of speaking training, students learn not only how to use the voice, but how these various approaches to voice training correspond to specific performance challenges.

**Course Notes:**
Enrollment determined by short interviews to be conducted on the first day
Theater, Dance & Media 120

What's so Funny?: Introduction to Improvisational Comedy (160654)

Remo Airaldi

2016 Spring (4 Credits)  
Schedule: M 0300 PM - 0459 PM
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Comedy has often been thought of as the poor relation to Drama but, as Lenny Bruce said, "the only honest art form is comedy because you can't fake it." We will attempt to take comedy seriously by studying its component parts and engaging in committed, creative and collaborative "play" that will tap into each student's personal, individual sense of humor. The class will focus on the basics of improvisation: group games, narrative skills, patterns, offers, spontaneity, agreement, using the space around you, building on-stage relationships and, eventually, scene work.

Class Notes: Enrollment will be determined by an interview/audition on the first day of class. (The former Dramatic Arts 120. Introduction to Choreography, is now TDM 140.)

Theater, Dance & Media 129DA

Analysis Through Action: A Methodology for Actors, Directors, Writers, and Dramaturgs (160649)

William Chambers

2015 Fall (4 Credits)  
Schedule: M 0100 PM - 0359 PM
Instructor Permissions: Instructor  
Enrollment Cap: 16

Analysis Through Action is a Russian method of converting the written word (e.g. a playtext or other source) into onstage action (live performance). Rooted in the last experiments of Konstantin Stanislavski, Analysis Through Action has evolved through generations of theatre practitioners and remains very much alive today in the Russian avant-garde theatre. With Anton Chekhov's The Cherry Orchard as our master text, this laboratory will examine and deploy the two interdependent components of this process: in-depth text analysis and focused physical/vocal improvisations, called études. The course will consist of 40% lecture/seminar study and 60% improvisatory scene work. Weekly outside assignments will range from contextual readings to rigorous text analysis to preparing études for classroom rehearsals.

Course Notes: The instructor for this course will be Visiting Professor David Chambers. In case of over-subscription a brief personal statement may be requested.

Theater, Dance & Media 129DB

Physical Acting: Movement and Its Motivation (159989)

Jeanne Slater

2015 Fall (4 Credits)  Schedule: R 0300 PM - 0459 PM
Instructor Permissions: Instructor  Enrollment Cap: 14

(Taught by Visiting Lecturer Jeanne Slater.) This course is designed to allow the actor to explore physicality and physical storytelling in a wide variety of ways. The ultimate goal is for the actor to be able to utilize his/her body in the most expressive, specific, communicative and imaginative way possible. The class will work through a series of projects, each one building on the ideas and discoveries of the one before it. The first of these projects will work with the most basic ideas of physical expression. Each successive project will ask the actor to incorporate a new element (i.e. music, scene partner, dialogue, etc.) into their storytelling. The class is lab-based and interactive; students are asked to work together on projects in pairs or groups, regularly observe each others work and actively participate in discussions of the ideas, issues, solutions and discoveries that are explored throughout the semester.

Course Notes: Taught by Visiting Lecturer Jeanne Slater. For the initial class the students should come prepared to present a monologue. The monologue can represent any period and should be between 1 to 2 minutes in length. *In the event that the class is over maximum capacity the monologue will serve as an audition for enrollment.

Theater, Dance & Media 130R

Directing (123080)

Marcus Stern

2015 Fall (4 Credits)  Schedule: T 0100 PM - 0259 PM
Instructor Permissions: Instructor  Enrollment Cap: 9

A directing class for directors interested in theater, television and film, as well as for actors, dramaturgs, and designers investigating all aspects of theater. The class accommodates beginning to advanced levels of work. Students may bring in video or film scenes as part of the class work, and live video camera work for the stage will also be part of the course. Through constant scene work the course examines the directorial tools of text analysis, staging, design, and working with actors. The focus is on how to tell a story clearly and effectively.

Course Notes: Enrollment determined by short interviews to be conducted on the first day of class.

Directing Lab (126812)

Shira Milikowsky

2016 Spring (4 Credits) Schedule: T 1200 PM - 0259 PM

Instructor Permissions: None Enrollment Cap: n/a

This class is designed for students interested in expanding their understanding of directing for theater. The course will focus on the work of American experimental theater artists from the 1960's to the present, examining the various ways avant-garde directors and ensembles have experimented with form to seek out radical new modes of storytelling. Students will create work inspired by the artists and productions studied, applying theory to practice in rehearsals and presentations.

Course Notes: Enrollment determined by short interview to be conducted on the first day of class.

Movement Lab (161233)

Jill Johnson

2016 Spring (4 Credits) Schedule: W 0200 PM - 0459 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course explores the practice of choreography in a dynamic research environment. Students will learn interdisciplinary tools for devising, modifying, and editing motion for the stage, screen or site-specific work. Compositional discernment and keen visual evaluation skills will be developed through: extensive studio practice creating and interpreting movement phrases and gestures; discussion and feedback of individual movement composition assignments; viewing and analyzing the structure, dramaturgy, music, set and lighting design in seminal dance and theater pieces from around the world (e.g. Fabre, Naharin, Jones, Graham, Bausch, Goebbels, Petipa, Pite, Kahn); and examining how new media can be utilized for appraising, capturing and documenting motion in the 21st century. Classes will be held in the seminar room and studio.

Class size: 20. No prior dance experience required. Enrollment determined by short interview during the first week of class (shopping week).

Argentine Tango: Culture, Music, and the Dance (160652)

Deborah Foster

2016 Spring (4 Credits) Schedule: R 0130 PM - 0429 PM
A thorough introduction to, and immersion in, the culture and history, music and dance, of one of Latin America’s richest art forms, tango argentino. This course, taught by Thomas Wisniewski, a professionally trained musician and dancer, will combine academic work with studio training and offer an interdisciplinary and comparative study of both theory and practice. Throughout the semester, we will analyze tango music, films, and literature from the early twentieth century to the present day. Weekly lessons will provide a progressive introduction to the dance. Students will learn tango by studying it and by doing it, as they engage regularly in critical and creative work drawing on both mind and body.

Course Notes: This course will be taught by Thomas Wisniewski.

The Art of Scenography: 20th and 21st Century Directorial Concepts and Set Design (110319)

*Julia Smeliansky*

2015 Fall (4 Credits)  
**Schedule:** T 0300 PM - 0459 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a

In this course, students will study the work of the great 20th and 21st century auteur directors and set designers. Students will explore a range of artistic movements including Constructivism, Futurism and Dada, and discuss how the theater became a place to experiment with the concepts and discoveries of these movements. Examining primary source materials in the Harvard Theatre Collection, students will research the work of artists including Gordon Craig, Richard Wagner, Leon Bakst, Pablo Picasso, Konstantin Stanislavsky and Vsevolod Meyerhold. The course will also focus on the work of such contemporary directors and designers as Robert Wilson, George Tsypin, and Robert Lepage.

Scenography Studio (109545)

*Sara Brown*

2016 Spring (4 Credits)  
**Schedule:** T 0300 PM - 0459 PM

Instructor Permissions: None  
Enrollment Cap: n/a

Theater designers use figures, space, objects, time and light to create environments that are integral to performance events. The potential for action and the integration with the performance as a whole is key to the design process. Like any artist, the designer needs to create visual studies to explore possibilities and communicate ideas. In Scenography Studio students will respond to architecture, photography, fiction, painting, sculpture, etc., to develop a series of performance design projects. In the course of developing these projects, students will gain skills in a variety of digital and manual media as well as study significant 20th and 21st century artists and theorists. Artists studied include but are not limited to - Robert Rauschenberg - John Cage - Sol LeWitt - Adolph Appia -

Multimedia Experimental Theatre and Performance (160650)

Magda Romanska

2015 Fall (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

(Taught by Visiting Associate Professor Magda Romanska.) With Netflix, YouTube and other Internet services providing any type of entertainment on demand, in the privacy of one's own home, the ritual of going to see a live performance is becoming increasingly endangered. At the same time as our social and cultural habits are changing, the digital, new-media revolution is also changing the theatre-making process, accelerating the transformation towards non-linear, non-narrative, immersive theatrical experience that is increasingly reflective of a fragmented global cultural landscape and its audiences. As Robert Lepage put it: "We are confronted with audiences whose narrative vocabulary has evolved. . . They can read stories backwards now, and jump cut, and can flash forward."

The Multimedia Experimental Theatre workshop-style course will focus on multimedia theatre as symptomatic of postmodern "disintegration of meaning" of words, and concepts. The students will explore new ways of analyzing and developing multimedia narratives that move across different genres, incorporating both film, video and live performance. They will also map their own non-linear narratives based on found multimedia, classic texts and their own writing.

Course Notes: Taught by Visiting Associate Professor Magda Romanska.

Live Art in the Theater Environment (160651)

2016 Spring (4 Credits)

Schedule: W 1200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

(Taught by Visiting Lecturer Dean Moss.) A fast-paced intensive introduction to multidisciplinary performance art practice. Open to a mix of students with dance, visual, video, and/or theatrical backgrounds, the course will focus on practical strategies employed in the blending of movement, sound, image, and presence in contemporary performance works. Students will use themselves, each other, the immediate environment, and an assortment of media production tools, to embody alternative, non-traditional theater processes and create multidisciplinary performance art projects. Discussion, screenings and reading assignments will provide conceptual and historical context for the course.
Course Notes: This course will be taught by Visiting Lecturer Dean Moss. The course is both physical and technical, performance and audio/visual production skills are suggested, but not required.

Performance Elective: Acting and Authenticity (156461)

David Levine

2016 Spring (4 Credits) Schedule: W 1200 PM - 0159 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This is a text- and studio-based seminar that explores the realist idea of 'acting' alongside philosophical, psychological, and scientific notions of authenticity and falsehood, presence, mimesis, identity, and empathy. What does it mean to turn into someone else? How total is the transformation? What are the implications for our understanding of the individual? Various texts, from the acting primers of Stanislavski and Strasberg to works of literary criticism, natural science, cognitive psychology, and philosophy of mind will be considered, alongside acting exercises and projects that attempt to examine what "realism" means in the 21st century. The seminar will culminate in a final project in which participants turn into each other.

Drawing Room: Space as Framework (159761)

Katarina Burin

2015 Fall (4 Credits)  Schedule: TR 1000 AM - 1259 PM
Instructor Permissions: Instructor  Enrollment Cap: 12

This studio course aims to further basic drawing skills with intention and purpose while expanding how we see the world around us. Using conventional drawing methods as a starting point, we will explore the potential of depicting space, both literally and metaphorically. Examining landscape, objects, buildings and interiors, students are encouraged to consider their relationship to the physical, conceptual and emotional spaces they inhabit. Finding inspiration from both contemporary art practices and architecture itself, assignments will delve into abstract and conceptual principles, and introduce specialized systems of rendering and notation.

Course Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Paper Always Talks a Lot : Drawing as Object: (160236)

Katarina Burin

2016 Spring (4 Credits)  Schedule: TR 1000 AM - 1259 PM
Instructor Permissions: Instructor  Enrollment Cap: 12

This drawing based studio course will foreground the surface and structure on which drawing can be made. Playing within conventions and expected boundaries, drawing becomes a noun, an object, a finished artwork. Focus is on gaining visual understanding and intentional skill in order to have control over the merging of form and content in ones work. Students will create a portfolio investigating personal interests based on concepts covered in class following each topic and assignment. We will draw a lot!

                                  T 0100 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  20

Titled after Phillip Guston, this course has two agendas: technical assignments that improve your ability to move
paint around, and laying conceptual groundwork for personal projects. One task of an artist is to have a relationship
with a world. From the vantage of individual studios, we will discuss the boundaries between interior and exterior
discourse, as well as the social role of artists and the artist's voice through self-expression as well as abnegation—
auteurs, flaneurs, and ventriloquists.

Course Notes:  Interested students must attend first meeting of class during shopping week
to speak with teaching staff about course enrollment procedure.

Visual & Environmental Studies  53AR

Fundamentals of Animation (110676)

Andrew London

2016 Spring (4 Credits)  
Instructor Permissions: Instructor  
Schedule: R 0100 PM - 0459 PM  
Enrollment Cap: 10

An introduction to the possibilities of animation. Using a mixture of traditional and 2D digital tools, students will complete practical exercises which will familiarize them with basic skills and techniques. Screenings and discussions will help develop the specialized thinking needed to understand the discipline.

Course Notes:  
Drawing skills are optional, though helpful.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

This course has an additional weekly film screening, Fridays, 1-3 pm.

Fiction in the Flesh: Studio Course (127469)

Guy Maddin

2015 Fall (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: 10

Schedule: MW 0100 PM - 0359 PM

In this introduction to fiction filmmaking, we will explore the technical, structural, sensorial, and ontological language of cinema in all its idiomatic, hybrid expressions, from associative assemblages to naturalism. Emphasis will be given to the synesthetic processes of meaning construction, from the seed of an idea to its screen embodiments shot by shot, as well as the relation between sound and image. Projects will be collaborative as well as individual. Occasional in-class workshops by film professionals and artists.

Course Notes: No prior filmmaking experience necessary. Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

In and Out of Actions: An Introduction to Performance Art (160214)

Marie Glynn

2016 Spring (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: 12

Schedule: TR 0100 PM - 0359 PM

This course introduces students to the history and practice of performance art, social practice and event-based art making. Starting with our own bodies, and working outward through texts, sites, histories, and fictions, we will
complete short gestural exercises, write and interpret scores, and develop situation-specific projects. This course will introduce movements and artists including the Futurists, Black Mountain College, Allan Kaprow, the Gutai Group, Womanhouse, and many more. Experimentation, collaboration, and participation will be encouraged.

**Course Notes:**
Open to students of all levels.
Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Persuasive Projections: Film, Video, and Moving-Image Installation (159777)

*Jennifer Bornstein*

*Thomas Brandon Evans*

2015 Fall (4 Credits)  

**Schedule:**  
MW 1000 AM - 1259 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
12

An introductory course in video and film art including forms of installation that incorporate the moving image. All types of media will be part of the class’s expanding brainstorm: daytime television and YouTube videos will be considered, as well as screenings of filmmakers and artists such as Michael Snow, Mike Kelley and Joan Jonas. In addition to individual projects, students will produce, write, direct, and/or perform in a collaborative video work, practicing techniques of lighting, camera, editing, and sound.

**Course Notes:**
No previous studio experience necessary. Useful for beginning students in visual art and film/video as well as more advanced practitioners.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

**Class Notes:**
Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

The Art of Film (115688)

Laura Frahm

2016 Spring (4 Credits)  Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None  Enrollment Cap: n/a

An introductory course that focuses on the language of film and moving image media. It will provide the students with the analytical tools to respond both critically and creatively to moving image media, with an emphasis on close formal analysis. In the interest of exploring the vast possibilities of the moving image, we will watch a broad selection of narrative and non-narrative works from around the globe alongside canonical feature films.

Course Notes: No background in film history or theory necessary. Required for all students concentrating in Film Studies. This course has an additional weekly film screening on Tuesdays at 7pm to 10pm. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Class Notes: Tu., Thu. at 10, a weekly screening Tu. 7-10, and a weekly section to be arranged.

FIRST MEETING NOTE: First class on Tuesday, January 26; introductory lecture will be repeated on Thursday, January 28

Sound Cinema (118669)

Adam Hart

2015 Fall (4 Credits)  Schedule: TR 1000 AM - 1059 AM
Instructor Permissions: Instructor  Enrollment Cap: n/a

This course will provide a historical survey of global film in the postwar era, focusing on "new cinemas" and "new waves" of the 1960s. This course will cover a wide range of national movements, from Italian Neorealism and the French Nouvelle Vague to stylistically (and often politically) radical cinemas in Latin America, Japan, and Africa, as well as the United States. This course includes a mandatory weekly film screening.

Course Notes: No background in film history or theory necessary. Required for all students concentrating in Film Studies. This course has mandatory weekly film screening Wednesday, 7-10PM.

Class Notes: There is a weekly, mandatory film screening for this course on Wednesday evenings from 7pm to 10pm and a weekly section to be arranged.

Exploring Culture Through Film (117631)

*Lucien Castaing-Taylor*

2015 Fall (4 Credits)  

**Schedule:**  T 0630 PM - 0929 PM

**Instructor Permissions:** Instructor  Enrollment Cap: n/a

Introduction to the history and theory of documentary and ethnographic film. A wide variety of works from 1895 to today will be screened and discussed. Different cinematic styles which have been used to depict human existence and the relationships between individuals and the wider cultural and political contexts of their lives will be compared.

Class Notes: Formerly VES 189. No previous film studies experience required. Freshmen and sophomores are strongly encouraged to enroll.

**NOTE:** This course has a weekly discussion section to be arranged.

The Devil, Probably x 8 + 1: A Studio-based Seminar (108844)

Stephen Prina

2016 Spring (4 Credits)  Schedule: TR 0100 PM - 0359 PM

Instructor Permissions: Instructor  Enrollment Cap: 12

Part 1 is a weekly studio session during which participants will create 3 projects in any medium or discipline during the term. Part 2 is a screening of the film "The Devil, Probably," 1977 by Robert Bresson for 10 consecutive weeks, interrupted by the 3 project class presentations. Different readings will accompany each screening. The final screening—+1—is "The Third Generation," 1979 by Rainer Werner Fassbinder.

Course Notes: The studio projects do not need to pertain to the Bresson/Fassbinder screenings. Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Recommended Prep: There are no prerequisites for the class. First year participants are encouraged to apply.

Directed Research: Studio Course (119636)

Stephen Prina

2015 Fall (4 Credits)

Schedule: W 0600 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This course is intended for students who have developed the beginnings of a practice they are prepared to pursue. The motive is to assemble a group of disparate artists who come together to exchange thoughts across disciplines: painting next to photography next to writing next to filmmaking, and so on.
Course Notes: Recommended for concentrators in Visual and Environmental Studies in their junior and senior year but also open to others with permission of the instructor. Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: SPECIAL FIRST MEETING NOTE: The first meeting of course will take place on WEDNESDAY, September 2 at 6pm.

Visual & Environmental Studies  105

Falling from the Grip of Grace: A Critical Reading of Contemporary Art and Exhibitions (160218)

James Voorhies

2016 Spring (4 Credits)  

Schedule: R 0530 PM - 0829 PM

Instructor Permissions: Instructor  

Enrollment Cap: 15

This course studies the intersection of artists, institutions, and audiences in making, exhibiting, and experiencing contemporary art. It combines readings, discussions, and practice to look at curatorial and artistic production with attention to changing roles of spectators. Organized in conjunction with the CCVA program Phil Collins: A Learning Site, the course merges the public sphere of an exhibition with the critical reflection of a seminar to focus--as a community--on the impact of Collins’s art in the context of contemporary art.

Class Notes: Interested students must attend first meeting of class during shopping week to speak with instructor about enrollment procedure.

Stranger than Fiction (108657)

*Carrie Lambert-Beatty*

2015 Fall (4 Credits)  
**Schedule:** R 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 35

Much recent art stages slippages between the fictive and factual. False personas, invented histories, and museums of unnatural history are some such creative deceptions —so are *Punk’d, Borat*, and more than a few reality TV programs. With a focus on installation art, photography, video, and performance but an eye to popular culture and political scandal as well, this critical studies seminar will trace precedents for treating our sense of reality as a plastic material, and explore the ethical, political, and aesthetic implications. (Note: this is not an art production class).

**Course Notes:** Interested students must attend first meeting of class during shopping week to speak with instructor about course enrollment procedure.

**Material Histories: Advanced Sculpture (160212)**

*Marie Glynn*

2016 Spring (4 Credits)  

**Schedule:**  
TR 0900 AM - 1159 AM

**Instructor Permissions:**  
Instructor  

**Enrollment Cap:**  
12

The history of sculpture is a story of constant recycling: forms are discarded, lost techniques rediscovered, and old materials are revived. This course will investigate the production of meaning through sculptural materials, their historic usage, and shifting cultural contexts. Through hands-on experimentation, readings, projects, and lectures, we will explore a range of materials - from clay to plastics - and related methods. Students will pursue their interests through research and development of individual projects.

**Course Notes:**  
This is an intermediate to advanced-level course. At least one VES studio course required or the permission of the instructor. Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

New Waves (159778)

Jennifer Bornstein

2016 Spring (4 Credits) Schedule: MW 0300 PM - 0559 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This studio course invites students to create projects using new genres media such as film, video, installation, performance, actions, time, protest, and other nontraditional processes. Projects using materials such as printmaking and sculpture are also encouraged. We will develop individual projects through discussions, arguments, visiting artists, and field trips. A history of conceptual and performance art from 1950-present will be traced. The goal is to emphasize the development of artistic ideas by broadening and challenging students' investigations.

Course Notes: No previous studio experience necessary. Useful for beginning students in visual art and film/video as well as more advanced practitioners.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Conceptual Strategies in Photography (118579)

Mike Mandel

2016 Spring (4 Credits) Schedule: TR 0900 AM - 1159 AM

Instructor Permissions: Instructor Enrollment Cap: 10

There has been a shift from the traditional notion of art work to the idea of art project. The art project could be understood as a concept structured in a constellation of different but independent elements, which the author is able to master not only the implicit creative aspects but also a certain social dimension. We will deal with the sequential steps of a photography project: creative conception, documentation, practical realization, and critical evaluation.

Course Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Recommended Prep: At least one half-course in photography or permission of the instructor.

Narrative Tactilities: Studio Course (114116)

Guy Maddin

2015 Fall (4 Credits)  Schedule: TR 0100 PM - 0359 PM
Instructor Permissions: Instructor  Enrollment Cap: 10

In this intermediate production course, we will explore systems, syntaxes, and voices of cinematic fictions across national cinemas in the 20th and 21st century. We will investigate all aspects of the mise-en-scène through exercises in screenwriting, directing professional and amateur actors, storyboarding, lighting, sound design, art direction, and digital editing. Students will also research and develop short scripts to be produced during the spring term. Occasional in-class workshops by film professionals and artists.

Course Notes: Interview with instructor required for admission.

Class Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Recommended Prep: VES 50 or two other courses in video production such as VES 51a, VES 52r, VES 59, VES 60x or VES 151b.

Kinochemical Reactions: Studio Course (113516)

Guy Maddin

2016 Spring (4 Credits)  Schedule: TR 0100 PM - 0359 PM
Instructor Permissions: Instructor  Enrollment Cap: 10

This course is essentially the continuation of 150ar. Students will re-write, produce, and direct the scripts that were developed during the fall term. Emphasis will be given to directing actors, spatial reconnaissance of shooting locations, production design, sound design, and re-making/re-mapping through editing. Completed films (edited, mixed, color graded) are required by the end of the term. Collaboration between students, and crew rotation is a must. Occasional in-class workshops by film professionals and artists.

Course Notes: Students seeking to enroll should come to the first class meeting with a developed short narrative screenplay.

Class Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Recommended Prep: VES 150ar or two courses in video production, one of which must be VES 60x or VES 59.

Nonfiction Video Projects (113447)

Alfred Guzzetti

2015 Fall (4 Credits)  Schedule:  MW 0100 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

Working from a proposal approved in advance by the instructor, each student plans, shoots, and edits a documentary video of his or her design. Shooting should take place over the summer and editing during the fall term. Readings and screenings augment individual work.

Course Notes:  Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes:  In exceptional cases, a student will be permitted to take the course without having filmed over the summer, but the student must have a specific proposal for a documentary that can be both shot and edited during the term. An interview with the instructor is required for admission.

FIRST MEETING NOTE: Wednesday, Sept. 2 from 1pm-2pm in Sever B10.

Recommended Prep:  At least one VES course in live-action film or video.

Intermediate Video Workshop: Studio Course (117216)

Alfred Guzzetti

2016 Spring (4 Credits)  Schedule:  MW 0100 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  10

A workshop for students with experience in video to explore further the capabilities of the medium by working in the nonfiction genres of the documentary, the experimental, and the experimental documentary. Students may work singly or together to make either an extended project or a series of shorts.

Course Notes:  Students seeking to enroll should come to the first class meeting with a proposal for a video project to be completed in the course.

Class Notes:  Students seeking to enroll are encouraged to bring to the first class meeting a paragraph describing a proposed project, whether extended or short.
Recommended Prep: One VES half-course in video production.

North American Seacoasts and Landscapes, Discovery to Present: Seminar (117143)

John Stilgoe

2015 Fall (4 Credits)  Schedule:  T 0100 PM - 0259 PM

Instructor Permissions:  Instructor  Enrollment Cap:  18

Selected topics in the history of the North American coastal zone, including the seashore as wilderness, as industrial site, as area of recreation, and as artistic subject; the shape of coastal landscape for conflicting uses over time; and the perception of the seashore as marginal zone in literature, photography, film, television, and advertising.

Course Notes:  Offered jointly with the Graduate School of Design as 4304. Interested students must attend first meeting of class during shopping week to speak with the instructor about course enrollment procedure.

Recommended Prep:  VES 107 and VES 160, or permission of the instructor.

Visual & Environmental Studies 167

Adventure and Fantasy Simulation, 1871-2036: Seminar (142149)

John Stilgoe

2016 Spring (4 Credits)  Schedule:  T 0100 PM - 0259 PM

Instructor Permissions:  Instructor  Enrollment Cap:  30

Visual constituents of high adventure since the late Victorian era, emphasizing wandering woods, rogues, tomboys, women adventurers, faerie antecedents, halflings, crypto-cartography, Third-Path turning, martial arts, and post-1937 fantasy writing as integrated into contemporary photography, advertising, video, computer-generated simulation, and designed life forms.

Course Notes:  Offered jointly with the Graduate School of Design as 4305.

Class Notes:  Interested students must attend first meeting of class during shopping week to speak with the instructor about course enrollment procedure.

Recommended Prep:  VES 107, VES 160, and VES 166, or permission of the instructor.

Enchanted Cinema (160217)
Guy Maddin
2016 Spring (4 Credits)  Schedule:  W 0300 PM - 0459 PM
Instructor Permissions:  Instructor  Enrollment Cap:  20
We will study films that concern themselves with the enchanted state of early childhood; and with the myths children create to make sense of the world. We'll also look at films made with the same sense of wonder and uninhibited daring children experience when making art. We'll study canonical masterpieces, disguised fairy tales, outsider filmmakers, Poverty Row gems, startling experiments and films repurposed by a second director to make new fiction from an intervention. Students will respond with scripts, essays and/or visual essays.

Course Notes:  This course has a mandatory film screening on Tuesdays 4:30-6:30.
Class Notes:  Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Visual Music (110045)
Laura Frahm
2016 Spring (4 Credits)  Schedule:  W 1000 AM - 1159 AM
Instructor Permissions:  Instructor  Enrollment Cap:  20
A course that explores the history of visual music throughout the 20th century and across different media. Our topics will range from early avant-garde films and Disney animations to post-war art scenes and pioneers of electronic music to a survey of jukebox films and music videos. By bridging the gap between experimental and popular approaches to visual music, this course will provide a multi-layered history of the inter-relations between film, video, animation, and music.

Course Notes:  This course has a mandatory weekly film screening Tuesday, 2-4.

Film Theory, Visual Thinking (114647)
Giuliana Bruno  
2016 Spring (4 Credits)  
Schedule: R 1130 AM - 1259 PM  
Instructor Permissions: None  
Enrollment Cap: n/a

How do moving images transform the way we think? Introduction to film theory aimed at interpreting the visual world, and developing skills to analyze films and media images. Survey of classical and contemporary film theory goes from turn-of-the-century scientific motion studies to the virtual movements of today. Considers theories of space, time, and motion, including Eisenstein's theory of montage and architecture. Treats visual technology and sensate space, the cultural history of the cinematic apparatus, the body and physical existence, affect and gender, and screen theory. Different theoretical positions guide us in understanding and reading films.

Course Notes: Offered jointly with the Graduate School of Design as 4132. This course has an additional weekly film screening, Wednesday, 7 pm-9pm.

The Horror Film and Beyond: The Possibilities of Horror (156509)  
Adam Hart

2016 Spring (4 Credits)  
Schedule: R 0100 PM - 0259 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 30

This course will approach the horror genre through its margins: cross-generic hybrids, slapstick comedies, surreal fantasies, art-house fare, etc. We will explore not simply the nature of horror and the horrific, but what filmmakers gain by engaging with the genre, and by tapping into its visceral appeal. How, and why, do filmmakers use (and perhaps abuse) the horror genre? This course includes a mandatory weekly film screening.

Course Notes: This course has a mandatory weekly film screening on Wednesdays from 12pm to 3pm.

Class Notes: This course has a mandatory weekly film screening on Wednesdays from 12pm to 3pm in the Carpenter Center Lecture Hall.

Recommended Prep: No background in film theory or history necessary.

The Documentary in Latin America (160233)

*Richard Pena*

*Zachary Furste*

2016 Spring (4 Credits)  

**Schedule:** TR 1100 AM - 1159 AM

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

Documentary film production has been part of Latin American cinema since its origins. Non-fiction filmmaking was an essential component for two of the region's most important film movements, Brazil's Cinema Novo and the New Cuban Cinema. Currently, the Latin American documentary is enjoying a period of extraordinary vitality and international acclaim. This course traces the development of the form from the 1960s onwards, paying special attention to the interaction of the documentary with shifting notions of politics.

**Course Notes:** This course has a mandatory weekly film screening on Wednesdays from 4pm to 6pm.

A History of Latin American Cinema (160232)

*Richard Pena*

2015 Fall (4 Credits)  

**Schedule:** TR 1200 PM - 1259 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 15
An overview of the history and development of cinema throughout Latin America, beginning with the impact of the neo-realist movement in the 1950s, moving to the modernist experimentation of the 1960s and 1970s, and concluding with examples of recent directions in film and media. We will investigate the frequent interaction between the realms of "fiction" and "documentary" that has characterized so much of the best Latin American cinema. Filmmakers to be discussed include Buñuel, Rocha, Gutiérrez Alea and Martel.

Course Notes: This course has required weekly film screenings on Wednesdays from 4pm to 6pm.

American Film Noir (156522)

Haden Guest

2015 Fall (4 Credits) Schedule: W 1000 AM - 1159 AM

Instructor Permissions: Instructor Enrollment Cap: 15

This lecture offers a critical survey of American film noir, the cycle of dark, fatalistic crime films that flourished in Hollywood during the period between 1940 and 1960 and remains deeply influential today. Focusing on the close study of key films, the course will explore the dominant iconography, tropes and patterns within them in the specific socio-cultural contexts of post-war America and deeper changes at work within the Hollywood studio system and American popular culture.

Course Notes: This course has mandatory weekly film screenings on Mondays from 1pm to 3:30pm.

Class Notes: The first meeting of this class will be on Wednesday, September 2 at 1pm in the Carpenter Center Lecture Hall.

New Media Theory (110046)

*Laura Frahm*

2015 Fall (4 Credits)  
**Schedule:** W 1200 PM - 0159 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

A graduate course that surveys new developments in media theory and provides an overview of advanced approaches to the study of media. We will look at different schools and streams of thought that productively expand and transform the established corpus of media theory, ranging from cultural technologies, media archaeology, and object studies to non-representational theory, actor network theory, and process philosophy. Two research projects will further advance our critical survey of new media theory.

**Course Notes:** This course has an additional weekly film screening, Tuesdays, 1pm-3pm.

**Visual & Environmental Studies 270**

Screens: Media Archaeology and Visual Arts Seminar (108653)

Giuliana Bruno

2016 Spring (4 Credits)  Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor  Enrollment Cap: 15

How do screens function as interface between us and the world? What is the role of the screen in contemporary visual arts and media culture? The art of projection has traveled from film exhibition to art installation. With the interdisciplinary approach of visual studies, we examine the history and archaeology of screen media, their cultural and aesthetic dimensions, from pre-cinematic exhibition to the post-medium condition. Considering the art of
screening in the deep time of media, we explore the changing architecture of screen space, at the crossroads of science and art, museum and moving images.

Course Notes: Offered jointly with the Graduate School of Design as 4356. This course has weekly film screenings on Tuesdays from 7pm to 9pm.

### Women, Gender & Sexuality 91R

**Title:** Body Capital: Sex Work and the Global Economy  
(117918)

**Semester:** 2015 Fall (4 Credits)  
**Credit:** 4

**Schedule:**  
T 0400 PM - 0559 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 10

This seminar explores research and debates around sex work in the global economy. Topical intersections include technology; travel; urbanization and displacement; representation and testimony; ethics and the law; and the economization of intimacy, race, gender, class, and more. Seminar readings and discussions, guided by students' interests, will culminate in the crafting, work-shopping, and presentation of research papers.

**Class Notes:** Fall 2015 Instructor is David Francis. Interested students should contact him before the start of the semester. dfrancis@fas.harvard.edu.

Tutorial - Junior Year: Research and Methods (122980)

*Afsaneh Najmabadi*

2016 Spring (4 Credits)  
**Schedule:** M 0100 PM - 0259 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a  

This course supports the writing of the junior paper through seminar discussions and one-on-one tutoring. In the seminar portion of the course, students discuss feminist methodologies across the humanities, social sciences, and life sciences through engagement with diverse readings from these fields. In the practicum, students work with an individual tutor on a semester-long research project in his or her area of interest.

**Course Notes:** Required of all Honors concentrators in their junior year.

Beyond the Sound Bite: Women, Gender, and Sexuality in The Daily News (108619)

Alice Jardine

2016 Spring (4 Credits)  Schedule:  R 0300 PM - 0459 PM
Instructor Permissions:  Instructor  Enrollment Cap:  35

We are bombarded by sound bites from all over the globe, moving at disorienting speeds, reorganizing our relationship to time and space with increasingly dystopic results. This course will focus on selected televisual and digital events in "real time" from February-May 2016. We will analyze the embedded bits of gender and sexuality always at work in the representations of those events. Topics include: politics, the environment, military adventures, and popular revolt in dialogue with important texts in WGS Studies.

Women, Gender & Sexuality 1200SH

Michael Bronski

2015 Fall (4 Credits)  Schedule:  M 0100 PM - 0259 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

An introduction to the radical American social change movements of the 1960s and 70s. We will examine the specific historical conditions that allowed each of these movements to develop, the interconnections and contradictions among them, and why they ultimately lost political power. Along with historical analysis, we will examine primary source materials, manifestos, autobiographies, and media coverage from the period, as well as relevant films, music, and fiction. The class will be a mixture of lecture and discussion.

Class Notes:  This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief.
Women, Gender & Sexuality 1210FT

Postcolonial Feminist Theory (142819)

*Katherine Stanton*

2016 Spring (4 Credits)  
**Schedule:** R 0100 PM - 0259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

What is the relationship between feminist and postcolonial studies, and what do they have to teach each other? What intellectual legacies are produced by the historical experience and aftermath of colonialism? How do scholars like Gayatri Chakravorty Spivak, Sara Suleri, and Jenny Sharpe change our understanding of feminism, colonialism and imperialism, “postcolonialism,” and the relationship between aesthetics and politics? Through close reading and frequent writing, students will examine how scholarship at the intersection of postcolonial and feminist studies demonstrates what “theory” is or can be.

Women, Gender & Sexuality 1218

Women in American Medicine (159884)

*Jenna Tonn*

2015 Fall (4 Credits)  
**Schedule:** T 0300 PM - 0459 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course explores the history of women in American medicine from the colonial period to the present. We will consider both the changing place of women within the medical profession and the development of medical knowledge about women's health and disease. How have women practiced medicine as traditional healers, midwives, nurses, physicians, and caregivers? What is the historical relationship between female medical practitioners and the production of medical knowledge about the female body? We will pay particular attention to structural inequalities within the American medical profession and the important role that practitioners, patients, and feminists have played in challenging gender-based discrimination in medicine as well as sexist assumptions about the female body.

Women, Gender & Sexuality 1225

Leaning In, Hooking Up: Visions of Feminism and Femininity in the 21st Century (159887)
What does it mean to "do" feminism, or to "be" a feminist in the 21st-century United States? What can we make of the dominant social expectations for a woman's life? This course explores contemporary ideals of feminine success, including their physical, familial, professional, and political manifestations. We will engage with highly-contested topics—including sexual violence and Title 9; work-life balance; the imperatives of self-care and presentation; and new models for sexuality, reproduction, family, motherhood, and domestic life—using the tools of theory and cultural studies to interrogate their framing within popular discourse. Throughout, we will critique ideological formations of gender, particularly as bounded by race, class, and sexuality.

Women, Gender & Sexuality 1237

LGBT Literature (109800)

Linda Schlossberg

This course examines a range of works from the British and American LGBT (lesbian, gay, bisexual, and transgender) canon. Our starting premise will be that LGBT themes have been central, rather than peripheral, to the Western literary tradition. We'll pay close attention to how sexual identity, gender identity, sex, and desire are understood and represented in different social and historical circumstances, as well as the aesthetic traditions and personal experiences shaping these individual works. Authors include James Baldwin, E.M. Forster, Nella Larsen, and Audre Lorde.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Women, Gender & Sexuality 1253

Sexual Health and Reproductive Justice (156157)

Madina Agenor

This intermediate-level seminar investigates the connections between sexuality, reproduction, public health, and social justice. We will examine how inequities related to gender, race/ethnicity, socioeconomic position, and sexual
orientation influence the sexual and reproductive health and rights of socially and economically marginalized groups of women in the contemporary United States, especially women of color and poor and low-income women but also lesbian, bisexual, and transgender women. Using public health and social justice lenses, we will focus on the following topics: pregnancy, birth, abortion, contraception, forced sterilization, sexual violence, cervical cancer, and HIV/AIDS.

Gender, Biology, and the Body (159885)

*Jenna Tonn*

2016 Spring (4 Credits)  
**Schedule:** T 0300 PM - 0459 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course will examine how naturalists, biologists, social scientists, sexologists, and journalists have understood questions of sex, gender and sexuality since the Enlightenment. We will become familiar with a variety of theoretical interventions in the field of feminist science studies and deploy them to understand both the scientific construction of sex and gender and the gendered culture of science. Topics will include: changing biological definitions of sex; evolutionary theories of sex and gender; cultural and scientific discourses about genes, gender, and race; and the politics and practice of feminist biology.

Friends with Benefits? (127756)

*Afsaneh Najmabadi*

2015 Fall (4 Credits)  
**Schedule:** MW 1100 AM - 1159 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

How many people would you count as your friends? Facebook friends? Facebook Close Friends? Google+ friends? Other network friends? Friends with Benefits? Does sex get in the way of friendship? Are your friends mostly of the same sex/gender/sexuality? Is it harder to make friends with persons of different sex/gender/sexuality? How have friendships changed as people have become more embedded in online communities? The course will begin with a consideration of current conversations about friendship, including popular TV serials in which friendships are lived and variously configured through sexual relationships. What could we make about meanings of friendship and sex, and their inter-relationship, in contemporary American culture? We will read various texts that form historical threads that inform our contemporary concepts and practices of friendship and romance. Readings will include Winthrop, Plato, Cicero, Biblical sources, St. Augustine, St. Aquinas, Montaigne, Bray, Marcus, Sedgwick, and Foucault. Finally, we will return to contemporary America, asking what gay marriage, Facebook, and changing conceptions of masculinity/femininity are doing to/for friendship.

Course Notes: This course, when taken for a letter grade, meets the General Education
requirement for Culture and Belief.

### Women, Gender & Sexuality 1271

Women and War: Gender, Race, and the Politics of Militarism (156221)

_Elizabeth Mesok_

2015 Fall (4 Credits)  

**Schedule:**  
F 0100 PM - 0259 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course examines scholarship on gender, sexuality, and race within a multitude of feminist disciplines in order to suggest productive interventions in analyses of women and warfare. Refuting essentialized notions of womanhood as passive, peaceful, and submissive, this class encourages students to move beyond thinking about what men and women do in war, and instead consider how gendered constructs are necessary for war. Memoirs, documentaries, military policy, and legal cases will serve as case studies to analyze contemporary and historical issues of gender and militarism.

### Women, Gender & Sexuality 1272

Global Reproductive Health (156222)

_Madina Agenor_

2016 Spring (4 Credits)  

**Schedule:**  
W 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 20

This interdisciplinary seminar examines how gender, poverty, development and global health policies, legacies of colonialism, and social institutions influence sexual and reproductive health outcomes (pregnancy, maternal health, HIV/AIDS, cervical cancer, sexual violence) and access to sexual and reproductive health services (family planning, abortion, HIV testing and counseling, cervical cancer screening) among women in low-income countries. We will address how social and economic context affect women's sexual and reproductive health across countries in the Global South and examine how inequities based on socioeconomic position, ethnicity, nationality, religion, gender, and sexuality shape women's sexual and reproductive health inequities within these countries. Further, we will discuss how community-based health interventions that target the social determinants of health at multiple levels can help promote the sexual and reproductive health and rights of women in low-income countries.

**Class Notes:**  
Madina Agenor
Women, Gender & Sexuality 1424

American Fetish: Consumer Culture Encounters the Other (108549)

Caroline Light

2015 Fall (4 Credits)  
Schedule:  
T 0100 PM - 0259 PM

Instructor Permissions:  
Instructor

Enrollment Cap: 12

How are notions of human difference, including ethnicity, race, gender, and sexuality, used to sell products in an increasingly global market? We will start in the nineteenth century with the rise of consumer culture, examining how cultures and people considered “primitive” achieved value as objects for exchange and entertainment, and then investigate how this idea takes shape in our contemporary moment. Topics include: sex tourism; commodification of “queer” and multiracial aesthetics; “compassionate” consumption.

Course Notes:  
This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief.

</table>
How do individuals negotiate the pleasures and perils of intimate life? How are the individual decisions we make in our most personal relationships affected by the world around us? To what extent is our ability to feel and express affection, trust other people, and to maintain curiosity about and empathy for the experiences of those who differ from us impacted by structural inequalities and the constraints of culture? In this class we will examine the relationships between ideas of risk and vulnerability and the ways individual people come to know, understand, depend on, cooperate with, protect, love, engage in sexual relations with, grieve and mourn other people. We will begin by examining these questions from a macro-structural level, with readings by Elizabeth Povinelli, Michael Warner, Judith Butler and Samuel Delaney on the relationship of governance to love and empathy, and Avery Gordon, Saidiya Hartman and Alice Goffman on the impacts of institutional violence on intimate relationships. We will then look at the ways different contemporary sexual communities manage emotional and bodily risk, with readings on BDSM by Leopold von Sacher-Masoc, Stacy Newmahr and Margot Weiss and readings on HIV/AIDS and gay male sexual subjectivity by David Halperin, Leo Bersani, Tim Dean and Michael Bronski. We will read texts on queer forms of intimacy like friendship, chosen families and nonmonogamous erotic attachments by Michel Foucault, Jamie Heckert and Dossie Easton. Finally, we will read a collection of first-person fiction and nonfiction accounts of navigating vulnerability and interpersonal intimacy in the digital age. Students will write a series of short reflection and reading response papers over the course of the semester and engage in a collaborative process of working to form an intellectually and interpersonally intimate learning environment with their peers.

Women, Gender & Sexuality 2000

A multidisciplinary introduction to graduate studies in Women, Gender, and Sexuality Studies. Students build detailed maps of the intersections between their (inter)disciplines and WGS Studies. The course prepares students to understand that terrain and to traverse it as professionals. Students produce documents of direct practical value, including a syllabus and a comprehensive exam list.

Course Notes: Will count as the Graduate Proseminar for the PhD secondary field requirement in WGS.
Women, Gender & Sexuality 2040

The Secret Sex Life of Anthropological Objects (159960)

Caroline Light

2016 Spring (4 Credits)  
**Schedule:** R 0400 PM - 0659 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

Objects in museum collections lead secret lives. Enmeshed in webs of sexed and gendered significance, they speak to hidden relations of desire and the erotics of power. There is a given-ness to museum display - to the selection of objects, the breadth of their claims for representativeness, the manner of their acquisition - that this course challenges using an interdisciplinary feminist lens. What does it mean to collect human cultural and biological history? What are the roles of gender, sex, and race in shaping the politics of anthropological collection and study? How are human differences measured, and what do these systems of measurement say about the process of scientific knowledge production?

Convened at Harvard’s Peabody Museum of Archeology and Ethnology, this course invites students interested in gender, race, power, anthropology, history, biology, evolution, development, and public health, among other areas, to explore the ways in which notions of human difference influence and are shaped by the practices of anthropological study. We will examine how historical relations of gender, sex, sexuality, and imperial/racialized power continue to be narrativized, hidden, and excavated in historical and contemporary anthropological projects, exploring sex and sexuality as constitutive of other questions of inequality and violence that comprise feminist investigative enterprises.

We will ground our investigation in the objects of anthropological analysis, the artifacts whose "face values" as things of interest to the scientific community conceal a history of struggle that includes eroticization of and violence against indigenous and colonized peoples. Chief among our goals is to work together to lay that complex, multilayered history bare. Our critique will extend to anthropology’s deployment in contemporary contexts of international development, where the legacy of largely unidirectional scrutiny and classifications of bodies and peoples continues to haunt our present.

**Course Notes:** This is a GCWS course. Interested GSAS students must first apply through the GCWS website (http://web.mit.edu/Gcws/courses/how-to-apply.html) BEFORE January 4, 2016.
