2016 Spring (4 Credits)  Schedule: T 0100 PM - 0359 PM

Instructor Permissions: Instructor  Enrollment Cap: 12

In this workshop we will focus on the devotional poetry of John Donne, George Herbert, Henry Vaughan, and GM Hopkins, looking first into certain texts of the Old Testament—Psalms, Song of Solomon, Book of Job—from which so much of devotional poetry extends. In conversation with these four poets, students can expect to build and execute their own plaintive lyric "I," design new ecstatic/meditative soundscape, and plan and deliver the imagistic configurations that will best give them direct-line access to the God (or gods) of their own choice or invention. As this a poetry workshop, all assignments will be creative.

Fiction Writing: Workshop (160952)

Claire Messud

2016 Spring (4 Credits)     Instructor Permissions:      Instructor
Schedule:     Enrollment Cap:    12

An introductory fiction workshop, in which students will explore elements of craft such as character, point of view, setting, detail, style, etc. The first weeks will be devoted to fiction readings (TBA) and creative exercises; most of the semester will be spent workshopping student fiction. The final project involves significant revision of a story.

Course Notes:     Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Advanced Poetry: Workshop (130000)

Joshua Bell

2015 Fall (4 Credits)     Instructor Permissions:      Instructor
Schedule:     Enrollment Cap:    12

By guided reading, classroom discussion, one on one conference, and formal and structural experimentation, members of the Advanced Poetry Workshop will look to hone, deepen, and challenge the development of their
poetic inquiry and aesthetic. Students will be required to write and submit one new poem each week and to perform in-depth, weekly critiques of their colleagues' work.

**Course Notes:** Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Introduction to Journalism (156630)

*Jill Abramson*

2015 Fall (4 Credits)

**Schedule:** M 0400 PM - 0659 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 12

An intense seminar for those interested in understanding the changing role of journalism and in learning the art of reporting and writing narrative stories. The course is intended for those contemplating careers as journalists or because they want a better sense of how journalism really works. Coursework will include two narrative articles that are ready for publication. Readings will include some of the best examples of modern journalism, from magazine features by authors including Gay Talese to multimedia narratives such as The New York Times' "Snow Fall."

**Course Notes:** Admission based on submitted samples of writing. Class will not meet during shopping week.

Introduction to Playwriting: Workshop (116875)

Sam Marks

2016 Spring (4 Credits) Schedule: M 0400 PM - 0659 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Kenneth Lonergan, Martin McDonagh, Suzan Lori-Parks, and Sarah Ruhl as well established work from Anton Chekhov, Sarah Kane, and Harold Pinter.

Course Notes: Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Dramatic Screenwriting I: Workshop (116874)

Mark Poirier

2016 Spring (4 Credits) Schedule: M 0400 PM - 0659 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This class introduces the screenplay, from the Hollywood blockbuster to the indie sleeper. Students will learn the basics of screenwriting by reading scripts and viewing the resulting films, focusing on dramatic structure, character development, tone, dialogue, and the other aspects of film determined by the writer. Students will develop their own feature-length screenplays—which we'll workshop from the earliest stages—and finish the semester with a first act and the tools, knowledge, and skills necessary to continue screenwriting.

Course Notes: Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Class Notes: Fall: M., 4–7 p.m.; Spring: Section I: M., 4–7 p.m.; Section II: Tu., 3–6 p.m.

Fiction Writing: Workshop (115777)

Bret Johnston

2016 Spring (4 Credits)  Schedule:  W 0400 PM - 0659 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

An introduction to fundamental aspects (technical and conceptual) of writing fiction, beginning with short exercises and moving toward the completion and revision of original work. Readings include Munro, Welty, Díaz, Lahiri, and others, and explore how practicing writers negotiate character, narrative structure, setting, voice, etc. Individual reading assignments are also devised on a per project basis. As the term continues, increasing amounts of time are devoted to the discussion of student work.

The Short Screenplay: Workshop (160960)

Mark Poirier
2015 Fall (4 Credits) Schedule: T 0100 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This class introduces the short screenplay - anywhere from one to thirty formatted pages. Students will learn the basics of this challenging form by viewing short films and reading short screenplays, short stories, and short creative essays.

We'll focus on character and plot in the scripts we develop because many short films - even highly lauded ones - are lacking in these areas. The goal of the course is to write scripts that can actually be produced, so we'll also consider budgetary matters when we're writing.

Prior screenwriting experience is required.

Course Notes: Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Across the period 700-1700 the shapes of British culture were absorbed from different centers of Western Europe. When these cultural forms arrive in Britain, they meet and mix with established cultures. This course will delineate the principal cultural forces (e.g. religious, political, social) that shaped England in particular. We will look to the ways in which those vibrant yet opposed forces find expression in the shape, or form, of literary works.

An introduction to reading poetry, by means of the wide variety of verse written in Britain during the long eighteenth century. We will begin with Milton's Paradise Lost, then turn to lofty hymns, vicious satires, and lyrics of startling beauty. In addition to familiarizing students with the forms, techniques, and themes of poetry in English, this course will involve substantial use of the treasures in Houghton Library, and it will emphasize the communal aspect of reading poems: students will gather in small groups each week to read aloud to each other. Poets include Dryden, Pope, Barbauld, Blake, Wordsworth, and Keats.

This course, when taken for a letter grade, meets the Core area requirement for Literature and Arts A.

This course will treat America as it was imagined and re-imagined between the 16th-21st centuries by successive waves of Europeans, Africans and their descendants. The course explores how evolving fictions of America's
purpose, changing notions of America's geography and conflicting ideas of American character inform an emerging literary tradition. Readings list likely to include non-fiction by Harriot, Rowlandson, Mather, Franklin, Jacobs; shorter fiction by Irving, Hawthorne, Melville and Stein; novels by Cather, Norris and Morrison.

The Literature of Empire (159672)

*Marina Bilbija*

2016 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 1259 PM

**Instructor Permissions:** Instructor  
Enrollment Cap: 27

This course investigates how writers in the English-speaking world represented race, nation, and empire at a time when these categories were being renegotiated. We will read a wide range of authors from Britain, the US, the Caribbean, India, and Sub-Saharan Africa, including Kipling, Forster, Twain, Du Bois, Plaatje, Kincaid, and Ishiguro. We will ask: how do national and imperial imaginaries differ? How did minority writers manipulate narratives of empire to gain recognition as citizens?

Migrations: Narrative Setting (130636)

*David Alworth*

2016 Spring (4 Credits)  
**Schedule:** TR 1200 PM - 0129 PM

**Instructor Permissions:** Instructor  
Enrollment Cap: 27

This course is designed for the "Literary Migrations" portion of the Common Ground curriculum. Although plot, character, and theme are the elements of narrative fiction that typically receive the most attention from readers, this course invites students to examine setting. It is likely to feature works by Defoe, Flaubert, Dickens, Melville, Poe, Fitzgerald, Faulkner, Cather, and Pynchon. In addition, some relevant secondary material will be assigned, such as portions of Watt's *Rise of the Novel*, Auerbach's *Mimesis*, and recent works of environmental criticism.

Anthropocene Literature (161293)
In 2000, geologists proposed that we live in a new geological era defined and shaped by human activity: the Anthropocene. In this course, we will consider how living in the Anthropocene demands that we think about ourselves not just as individuals and citizens of a nation, but also as members of a species that exercises geological forces upon the physical conditions of our planet. Readings will span from the eighteenth century to the present. We will consider questions such as: What kinds of narrative and aesthetic forms can represent environmental changes that take place on vast geographic and temporal scales? What sort of ethics does living in the Anthropocene warrant and inspire? How can we talk about the relationship of ethics and aesthetics to the economic and political challenges of the Anthropocene? We will explore these questions while attending to the conceptual and rhetorical strategies through which nature and the environment have been portrayed in works by Montesquieu, Wordsworth, John Clare, Mary Shelley, John Stuart Mill, Thoreau, Darwin, John Muir, Rachel Carson, Cormac McCarthy, Ursula Le Guin, and Karen Russell.

### English 90AU

**Australian Indigenous Literature: Seminar (159615)**

**Philip Mead**

2015 Fall (4 Credits) **Schedule:** M 0300 PM - 0459 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** 15

This course is an introduction to the diversity and difference of Aboriginal forms of writing across the cultural spectrum, including oral and traditional forms, non-fiction, life narrative, visual narrative, fiction, poetry and contemporary media. Concepts of ‘country,’ first contact, exoticism, protest, *terra nullius*, testimony, assimilation, and sovereignty are explored. The course also introduces modes of reading, theories of racial literacy, first-nation critical contexts, cultural syncretism, and vocabularies of interpretation appropriate to an understanding of the texts and forms studied.

### English 90CL

**Comic Literature through the Middle Ages: Seminar (123564)**

**Daniel Donoghue**

2015 Fall (4 Credits) **Schedule:** R 0200 PM - 0359 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** 15

An introduction to various kinds of literature broadly construed as comic, including drama, fabliaux, Latin lyrics, Chaucer, Middle Scots poetry and other genres up to Rabelais and Shakespeare. Non-English works read in a
facing-page translation. With the help of Huizinga, Bakhtin, and later critics, students develop an understanding of what constitutes humor from this period, as well as the serious "institutions" that invite a comic reflex.

The Rhetoric of Frederick Douglass and Abraham Lincoln: Seminar (130670)

*John Stauffer*

2016 Spring (4 Credits) **Schedule:** T 0200 PM - 0359 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

A critical examination of Douglass' and Lincoln's speeches and other exemplary writings from Lincoln's 1838 Lyceum Address to Douglass's 1894 "Lessons of the Hour." We explore Douglass' and Lincoln's respective rhetorical practices in relation to their politics.

When Harlem Was in Vogue: Seminar (156343)

*Marina Bilbija*

2015 Fall (4 Credits) **Schedule:** W 0200 PM - 0359 PM
This course will examine the aesthetics and politics of the first Modern African American cultural movement, known today as the Harlem Renaissance. In our readings of key literary texts by authors such as Alain Locke, Jessie Fauset, Zora Neale Hurston, Eric Walrond, Langston Hughes, Claude McKay, Nella Larsen, and Jean Toomer, we will discuss both the national and global contexts of so-called "New Negro Writing" and focus on debates surrounding representation, "respectability" and racial authenticity.

Shakespeare's Rome: Seminar (160004)

Leah Whittington

2015 Fall (4 Credits)  
**Schedule:** T 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course investigates Shakespeare's lifelong engagement with the literature, politics, and culture of ancient Rome. It will give careful attention to the three "Roman Plays" - *Julius Caesar, Antony and Cleopatra,* and *Coriolanus* - but will also consider the larger role of classical antiquity in Shakespeare's development and achievement as a dramatist.

Nineteenth-Century Women Writers (160948)

Danielle Coriale
This seminar explores nineteenth-century writing by British, Caribbean, and South African women who explored a variety of contemporary problems including the woman question, courtship and marriage practices, sexuality and reproduction, racial politics, the institution of slavery, and colonial occupation. We will read novels by Mary Shelley, Jane Austen, Charlotte Brontë, Elizabeth Gaskell, M.E. Braddon, and Olive Schreiner, and shorter works by Mary Prince, George Eliot, Mary Seacole, Florence Nightingale, Christina Rossetti, and others. We will also read contemporary feminist theories that contest the concept of woman and will discuss ways of conceptualizing women's writing without resorting to gender essentialism.

Introduction to Old English: Reading Anglo-Saxon Landscapes (156063)

Joey McMullen

2015 Fall (4 Credits) **Schedule:** TR 1200 PM - 1259 PM

---
Instructor Permissions: Instructor
Enrollment Cap: n/a

A basic introduction to Old English, with special attention to literary landscapes and seascapes. After an overview of Old English grammar, we will translate excerpts that describe the lushness of paradise, the terrors of hell, the desolateness of Roman ruins, and the icy loneliness of the sea. We will also consider what these representations of the landscape can teach us about how the Anglo-Saxons connected with the natural world.

Course Notes: Students who complete both English 102 and 103 with honors grades will fulfill the College language requirement and the English Department's Foreign Literature requirement.

Old English: Beowulf and its Contexts (130249)

Joey McMullen

2016 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None
Enrollment Cap: n/a

We will translate some of the most fascinating sections of Beowulf—from monster-slaying and heroic feats to pagan burials and betrayals—in order to learn what makes it an exceptional poem. We will also combine language study with literary criticism to consider different aspects of Beowulf each week: the artistry of poetic language, the use of Germanic legend, or the sophistication of the meter, for example.

Course Notes: Fulfills the College language requirement and the English Department's Foreign Literature requirement.

Recommended Prep: Honors grade in English 102g or the equivalent.

Shakespeare After Hamlet (146556)

Gordon Teskey

2016 Spring (4 Credits)

Schedule: MW 0100 PM - 0159 PM

Instructor Permissions: None
Enrollment Cap: n/a

Written at the midpoint of Shakespeare's career (1600-01), Hamlet marks the culmination of an experiment in representing the inner life with remarkable human sympathy. Hamlet also marks the beginning, in the comedies as much as in the famous tragedies, Othello, King Lear, and Macbeth, of a new and disturbing interest in the human mysteries of sadism, power, eroticism and loss.

Course Notes: This course, when taken for letter grade, meets the Department of English
Shakespeare's Common Ground requirement. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Ethical Problems in 18th-Century Literature (159662)

*Stephen Osadetz*

2015 Fall (4 Credits)  

**Schedule:**  

TR 1000 AM - 1059 AM

**Instructor Permissions:**  

Instructor  

**Enrollment Cap:** n/a

How does what we read change us? Can literature help readers to confront their prejudices and improve their knowledge? Can it assist in recognizing and responding to the suffering of others? The eighteenth century took seriously the idea that literature and the arts could encourage wisdom and shape better citizens. Over the period, numerous intellectuals, from British poets to French philosophes, waged and increasingly vigorous debate over the pedagogic and didactic functions of literature. We will pay special attention to the conceptual and rhetorical tools by which authors sought to inculcate certain values in their readers. Authors may include Bunyan, Dryden, Richardson, Johnson, Rousseau, Wollstonecraft, and Edgeworth.

Jane Austen's Fiction and Fans (146676)

Deidre Lynch

2015 Fall (4 Credits)  Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: Instructor  Enrollment Cap: n/a

In this class we'll read at least five of Jane Austen's novels and study the contribution they made to the early-nineteenth-century remaking of the novel as a form. Our chief concern will be Austen's intervention into her own era's discussions of what fiction could and should do, but we'll also acknowledge the ardent feelings her books continue to arouse today. As part of that acknowledgment, we'll conclude the course by investigating the wild world of contemporary Austen fandom and the Austenian tourism, shopping, adaptations, and sequels that nurture it.

Gothic Fiction (161292)

Hannah Hudson

2016 Spring (4 Credits)  Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None  Enrollment Cap: n/a

This course will explore the origins and development of the gothic novel over the long eighteenth century. One of the period's most widely read-and most controversial-genres, gothic fiction seized the public imagination with "tales of terror" featuring supernatural apparitions, unsolved murders, and hapless heroines. Reading novels by authors including Horace Walpole, Ann Radcliffe, M.G. Lewis, James Hogg, and Jane Austen alongside critical responses from their contemporaries, we will track key gothic themes, explore the reception and historical context of gothic texts, and consider the genre's enduring popularity.

Faulkner, Morrison, and the Representation of Race (160542)

Philip Weinstein

2016 Spring (4 Credits)  Schedule: W 0200 PM - 0359 PM

Instructor Permissions: None  Enrollment Cap: n/a

This course has two abiding aims. One is to explore in depth—and back to back—the fiction of (arguably) the two major 20th-century novelists concerned with race in America. The other is to work toward evaluative criteria that might be genuinely attentive to both the intricacies of race and the achievements of form. A particular challenge will be the following: how to focus on race (and secondarily gender) yet keep the two writers' distinctive voices from disappearing into "white/male" and "black/female." Faulkner readings will include some short stories as well as Light
in August, Absalom, Absalom!, and Go Down, Moses. Morrison readings will include Playing in the Dark as well as Sula, Song of Solomon, Beloved, A Mercy, and Home.

James Joyce and the Modern Novel (160543)

Kevin Birmingham

2016 Spring (4 Credits)  Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: None  Enrollment Cap: n/a

This course examines several major novels from the late 19th and early 20th centuries with special attention to the way fiction captures both psychological depth and social breadth. We read Feodor Dostoevsky's Crime and Punishment, George Eliot's Middlemarch, Henry James's The Portrait of a Lady, Marcel Proust's Swann's Way and James Joyce's Ulysses. The survey combines a detailed discussion of the masterpieces themselves with the historical and cultural contexts that shaped them.

Consciousness in Fiction (formerly English 90lw) (146540)

James Wood

2015 Fall (4 Credits)  Schedule: MW 1200 PM - 1259 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

A look at the complex ways in which writers represent their characters' thought in texts by Austen, Flaubert, James, Tolstoy, Chekhov, Giovanni Verga, and Woolf. More broadly, traces the development of stream-of-consciousness, from Austen's incipient mastery of free indirect style, through Flaubert's more sophisticated use of it, to Woolf's full-blown inner monologues, seeing this development as not merely a fact of English and American literature, but as a phenomenon of world literature and an element of our modernity.

Art Novels (159665)  
*David Alworth*

2015 Fall (4 Credits)  
**Schedule:** TR 1200 PM - 1259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

An exploration of the dynamic relationship between the American novel and the visual arts, from the late nineteenth century to the present day. What happens when novelists engage with painting, sculpture, photography, film and video, performance art, and other artistic practices? How do we understand the relations among verbal, visual, tactile, digital, and ambient media? The course begins with Henry James and ends with a contemporary art novel to be determined by the class. Other likely authors include: Gertrude Stein, Jean Toomer, James Baldwin, Vladimir Nabokov, John Updike, and Don DeLillo.

English 181A
Asian American Literature (156061)
Ju Yon Kim
2016 Spring (4 Credits)  Schedule: MW 1200 PM - 1259 PM
Instructor Permissions: None  Enrollment Cap: n/a
This course is both a survey of Asian American literature and an introduction to ongoing debates about what constitutes Asian American literature. How do we determine that a literary work is "Asian American" when the term has been continuously revised and expanded since it came into common usage in the late 1960s? How important are considerations of a work's thematic concerns, its relationship to specific cultural forms and traditions, or its author's biography?

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

English 183ED
Poetry, Exile and Displacement (161291)
Peter Sacks
2016 Spring (4 Credits)  Schedule: W 0100 PM - 0259 PM
Instructor Permissions: None  Enrollment Cap: n/a
This course studies lyric poetry and its thematic as well as formal expressions of exile, the loss of home, the experience of estrangement or dispossession. Such displacements may be from the self, or from assigned "identity" ("why should I be my aunt,/or me, or anyone?"), as much as from other persons, conditions, regimes. Selected poems will certainly coincide with the urgent unease regarding questions of the body, of the passions, of gender, of background, of national or global citizenship. With some prior examples from the ancient world to the Renaissance and Romantic periods (from Sappho and Ovid, to the anonymous author of "Tom o' Bedlam," and from Wordsworth and Coleridge to Tennyson, Hemans and Dickinson), the course will focus primarily on Twentieth Century works by Marianne Moore, Elizabeth Bishop, James Wright, Anthony Hecht, James Merrill, Derek Walcott, Seamus Heaney, Yusef Komunyakaa, and several others.

Contagion Narratives: Plagues, Fevers, and Outbreaks in Fiction from Defoe to Camus (160947)

*Danielle Coriale*

2015 Fall (4 Credits)  
**Schedule:** MW 0200 PM - 0259 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course examines narratives about contagious diseases that have threatened global health from the seventeenth century to the present—plague, smallpox, yellow fever, tuberculosis, influenza, and others. We will read novels and short stories by Defoe, Hawthorne, Maupassant, Gaskell, James, Chekhov, Stoker, Katherine Anne Porter, Camus and other writers who explored the physical, social, and psychological effects of contagion in their fiction. Along the way, we will chart the history of epidemiology and germ theory, considering how the expansion of biomedical knowledge gave rise to innovations in narrative form.

"Rotten English" Literature: Writing in English from Across the Globe (159670)

*Marina Bilbija*

2016 Spring (4 Credits)  
**Schedule:** TR 0100 PM - 0159 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

In this course we will read an eclectic range of twentieth-century literature written in "non-standard English" dialects, slangs, creoles, and pidgins, including Their Eyes Were Watching God; A Clockwork Orange; Lonely Londoners; Trainspotting; and Sozaboy: A Novel in Rotten English. We will focus on the relationship between language, power, and identity, paying special attention to questions of class, geography, race, and imperialism.

The Graphic Novel (161199)

Hillary Chute

2016 Spring (4 Credits)  Schedule: TR 1100 AM - 1159 AM
Instructor Permissions: None  Enrollment Cap: n/a

The word-and-image medium of comics as a narrative form. How to read comics—and what they teach us about reading—in addition to the creative practices that go into making them. We will examine antecedents including "engraved novels," newspaper comic strips, "wordless novels," underground comic books, and punk zines to understand the graphic novel's rise in the 1970s in addition to exploring current directions. Authors include Art Spiegelman, Alison Bechdel, Chris Ware, Joe Sacco, Lynda Barry, Gary Panter, Phoebe Gloeckner, Keiji Nakazawa, and Marjane Satrapi, among others. Will include visits from artists to discuss the craft of this verbal-visual form.

Early Middle English Identities: Graduate Seminar (146583)

Daniel Donoghue

2015 Fall (4 Credits)  Schedule: M 0100 PM - 0259 PM
Instructor Permissions: Instructor  Enrollment Cap: n/a

Post-Conquest literature in England witnessed the formation of new linguistic and national identities. At times retrospective and nostalgic, at times innovative, it was a period of ambivalence on many levels. We will read
through a variety of genres, with facing page translations for the more difficult texts, but always with attention to the language. Texts include Lawman's Brut, The Owl and the Nightingale, various lyrics, the South English Legendary, Sir Orfeo, Dame Sirith, and others.

*John Stauffer*  
*Dan McKanan*

2015 Fall (4 Credits)  
**Schedule:** R 0100 PM - 0259 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

This interdisciplinary and transnational course examines the rich tradition of utopian and dystopian societies and literature from the Bible and classical antiquity to the present, with a particular focus on the United States. We explore a wide variety of utopian societies, especially those inspired by religious belief, from communal and aesthetic experiments to conceptions of America as a utopia. Readings range from scripture and fiction to philosophy, history, sociology, political documents, letters, autobiography, and film.

Course Notes: This course meets in conjunction with American Studies 201. Students may not enroll in Am Studies 201 for credit.

Modern and Contemporary Poets: Graduate Seminar (130676)

Stephen Louis Burt

2016 Spring (4 Credits)  

Schedule:  

T 1000 AM - 1159 AM

Instructor Permissions:  Instructor  

Enrollment Cap:  n/a

Major poets and poems from T.S. Eliot and Robert Frost almost to the present day: we may also read, among others, William Carlos Williams, Wallace Stevens, Elizabeth Bishop, Robert Lowell, Lorine Niedecker, Gwendolyn Brooks, James Merrill and John Ashbery. Appropriate both for students who know some of these poets well, and for those relatively new to the study of poems.

Conrad, Naipaul, Coetzee: Genealogies of the Global Imagination: Graduate Seminar (130706)

Homi Bhabha

2016 Spring (4 Credits)  

Schedule:  

R 0300 PM - 0459 PM

Instructor Permissions:  None  

Enrollment Cap:  n/a

The novels of Conrad, Naipaul, and Coetzee have a particular value to contemporary discourses on global culture. For these writers, the experience of Empire was as much an ethical and aesthetic project as it was an economic or political venture. Our study will focus on their reflections on the problematic project of joining diverse cultures and distant territories in a global network and on the role of figurative language and fictional forms in imagining community and communication on a global scale.

Poetry in the Digital Environment: Seminar (160010)

*Elisa New*

2016 Spring (4 Credits)  

**Schedule:** M 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 30

This course allows graduate students preparing themselves for careers in secondary and college teaching and associated fields to explore, and to make their own contributions to, the emerging digital pedagogy in American poetry. Study of such canonical American poets as Wheatley, Whitman, Dickinson, Frost, Hughes, Brooks, Williams, O'Hara, Rich, and Howe as well as of the folk and popular poetries of particular historical moments (from Yankee Doodle to Tin Pan Alley and hip hop) will be complemented by practical training in lesson planning and content development, classroom and on-camera presentation. Other topics include platform design and video editing, live and remote discussion and annotation, blended learning and the importance of libraries. Some attention will be given to the theory, economics and politics of classic liberal education in the age of the internet.

Literature and the Circulation of Knowledge: The 18th Century (160007)

*Stephen Osadetz*

2015 Fall (4 Credits)  

**Schedule:** R 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a

A course about how literature participates in the dissemination of new knowledge. We will be concerned centrally with two broad issues: the cultural foundations upon which the Enlightenment instituted a public sphere, and the methods of literary encapsulation and remediation authors used to make their ideas have broad cultural impact. The aim is to explore the invention and naturalization of some of the most fundamental institutions of the Enlightenment: the public, the private, the market, and public opinion. Authors will include Addison, Richardson, Diderot, Sterne, Smith, Wollstonecraft, Blake. Substantial theoretical readings in intellectual history, book history, and media studies.

Methods of Literary Study: Seminar (160012)
What constitutes method in literary studies? Over the past decade, this question has attained new urgency, with scholars of literature debating fundamental assumptions about what, how, and even whether to read. This seminar will engage such debates by surveying recent monographs, edited collections, and journal articles that address topics such as historicism and periodization, textual materialism and book history, "new sociologies of literature,” "surface reading,” digital humanities and "distant reading,” and so on. Seminar participants will think broadly about method as they pursue more limited research topics. Assignments will include a conference abstract, a book review, and an article-length seminar paper.

Environmental Sci & Public Pol  11
Sustainable Development (109934)

William Clark

2016 Spring (4 Credits)  Schedule:  MW 0230 PM - 0359 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

Explores contemporary understandings and practical implications of the idea of sustainable development. Investigates the meanings and measures that different groups have given to "sustainable development;" scientific understanding of the complex social-environmental systems we seek to develop sustainably; and lessons on how societies have avoided the "tragedy of the commons" while instituting practical action that advances sustainable development effectively and equitably. Employs case studies in development to meet needs for energy, food, water and health.

Course Notes:  This course, when taken for a letter grade, meets the General Education requirement for Societies of the World.

Class Notes:  Weekly mandatory section meetings.

Technology, Environment, and Society (109882)

Sheila Jasanoff

2015 Fall (4 Credits)  Schedule:  MW 1000 AM - 1059 AM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Our interactions with the natural world are increasingly mediated through changes in technology. Technologies create risks, generate solutions, reshape the environment, and alter our perception of the boundaries between nature and artifice. This course draws on major theories of technology and society to inform and deepen our understanding of environmental problems and policy options.

Course Notes:  Offered in alternate years. This course, when taken for a letter grade, meets the General Education requirement for United States in the World.

Class Notes:  Weekly section to be arranged.

Conservation Biology (119814)

**Francesca Cagnacci**

**2016 Spring (4 Credits)**

**Schedule:** R 0230 PM - 0459 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

Conservation biology strives to describe, understand, and forecast biodiversity dynamics by applying ecological and evolutionary theory within the contexts of resource management, economics, sociology and political science. This course will explore the motivations for preserving biodiversity and the consequences of decision-making under conflicting interests. Major contemporary issues, and state-of-the-art tools and methodologies in conservation biology will be presented, with a focus on terrestrial ecosystems and mammal species. Case studies will include endangered species protection and reintroduction, habitat fragmentation, exotic species invasions, over-harvesting and sustainable development, apparent competition and predator-prey management. Local field trip within New England to be arranged.

**Course Notes:** Local field trips within New England to be arranged.

**Class Notes:** Instructor Francesca Cagnacci

Environmental Crises, Climate Change, and Population Flight (122678)

**Jennifer Leaning**  
**James McCarthy**

**2015 Fall (4 Credits)**

**Schedule:** M 0200 PM - 0429 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

War, disaster, drought, or famine force people to flee their land. Climate change is contributing to many of these factors. The humanitarian consequences of population flight, including loss of place and livelihood, are filled with complexity, relating to the extent and permanence of environmental destruction wrought by these crises, people's attachment to their homes and ecosystems, the circumstances of departure, the destinations of refuge, and the possibilities for return. These issues will be examined through case studies and review of literature on forced migration and calamity.

China's Energy Economy: Perspectives from the Past: Challenges for the Future (123858)

Michael McElroy

Xi Lu

2015 Fall (4 Credits)  Schedule: W 0230 PM - 0459 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

The seminar will provide a historical perspective on the development of the Chinese economy with emphasis on the energy sector, including analysis of related environmental problems. Energy options available for China's future will be discussed, including opportunities for clean-coal technology, nuclear, wind, hydro, and biofuels. The seminar will discuss tradeoffs implicit in these choices with respect to reconciling competing goals for environmental protection and economic development.

Biotechnology, Sustainability and Public Policy (126892)

Calestous Juma

2015 Fall (4 Credits)  Schedule: T 0230 PM - 0459 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

This seminar examines the implications of biotechnology for sustainability. Using case studies, it focuses on policy approaches for maximizing the benefits of biotechnology and minimizing their risks. It addresses the following themes: (1) scientific and technological advances in biotechnology and sustainability; (2) social responses to the use of biotechnology; (3) application of biotechnology specific sectors such as agriculture; industry; energy; bioremediation and species conservation; (4) socio-economic impacts; and (5) policy and institutional considerations.

Environmental Health: Your World and Your Life at Risk (128099)

Douglas Dockery

Steve Curwood

2016 Spring (4 Credits)  Schedule: M 0230 PM - 0459 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

Through the seminar course students will be introduced to ongoing environmental health research. They will read published articles and interview faculty. Studies will include birth outcomes and heavy metals; neurological and
cognitive development in children exposed to lead; dietary interventions and pesticide exposure; asthma and public housing; air pollution and cardiovascular health; exposures and effects of plasticizers, flame retardants, polychlorinated biphenyls (PCBs), bisphenol A (BPA) and other synthetic organic compounds; cell phone use and brain cancer; respiratory effects of biomass cooking and heat fuels on children and women; heat waves and heat stress mortality; and land-use factors and obesity.

**Class Notes:**

M., 2:30-5 with local field trips to be arranged.

Current Issues in U.S. Environmental Law (156676)

*Shaun Goho*

2015 Fall (4 Credits)  **Schedule:** T 0600 PM - 0829 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** n/a

This course examines some of the main U.S. environmental laws, the methods of regulation and enforcement represented by those laws, and current controversies regarding their implementation and development. Each week's class will be divided between a discussion of key cases and regulations implementing a particular law and an in-depth examination of a case study involving the law under examination.

**Environmental Sci & Public Pol  90Y**

World Food Systems and the Environment (159984)

*Noel Holbrook*  
*Robert Paarlberg*  
*Forest Reinhardt*

2016 Spring (4 Credits)  **Schedule:** T 0230 PM - 0459 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** n/a

This seminar examines the world's systems for the production and distribution of food as they relate to the earth's physical, chemical, and biological systems. Using scientific readings, papers about economics and politics, and cases about firms, we consider agriculture and food from scientific, public policy, and business strategy perspectives and in relation to environmental issues such as greenhouse gas emissions, carbon and nitrogen cycles, water and soil conservation (including erosion, pollution, and salinization), and the use of genetically modified organisms. Geographic and topical coverage will be broad: the Americas, Europe, Asia, and Africa; as well as water, seeds, fertilizers, animal protein, trade and development. We expect to have numerous guests from the scientific community, government, and business. Some background in biology, government or economics is useful, but not required.
Supervised Reading and Research (110943)

Paul Moorcroft

2016 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Supervised reading and research on topics not covered by regular courses of instruction. Students must complete a registration form, including permission from their faculty sponsor, with the concentration office before course enrollment. A final paper describing the research/reading completed during the term is due in duplicate to the Head Tutor on the first day of reading period.

Course Notes:  Intended for junior and senior concentrators in Environmental Science and Public Policy; open to sophomore concentrators only under exceptional circumstances. Permission of the Head Tutor is required for enrollment. May be counted for concentration only with the special permission of the Head Tutor.

Class Notes:  Paul Moorcroft and Members of the Committee. Hours to be arranged.

The EMR of Food: How Ethnicity, Migration, and Rights Are Parts of the Food We Eat (161289)

Tessa Lowinske Desmond

2016 Spring (4 Credits)  Schedule: R 0100 PM - 0259 PM
Instructor Permissions: Instructor  Enrollment Cap: 15

Everybody eats yet food varies widely across cultures and the implications of our food choices have rippling—and often disparate—affects across people groups. This course will examine how ethnicity, migration, and human rights are bound up in the American food system. Topics will include food as a carrier of culture, the relationship between agricultural practices and migrant labor, health and nutritional inequalities, and environmental impact.

Native Americans in the 21st Century: Nation Building II (160752)

*Dennis Norman*

*Tessa Lowinske Desmond*

2016 Spring (4 Credits)  

**Schedule:**  
T 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This field-based research course focuses on some of the major issues Native American Indian tribes and nations face as the 21st century begins. It provides in-depth, hands-on exposure to native development issues, including: sovereignty, economic development, constitutional reform, leadership, health and social welfare, land and water rights, culture and language, religious freedom, and education. In particular, the course emphasizes problem definition, client relationships, and designing and completing a research project. The course is devoted primarily to preparation and presentation of a comprehensive research paper based on a field investigation. In addition to interdisciplinary faculty presentations on topics such as field research methods and problem definition, students will make presentations on their work in progress and findings. Recommended course: PED-501M. Enrollment limited to 24 students. Permission of instructor required. Must contact instructor prior to enrolling by email, dennis_norman@harvard.edu. Jointly offered at Harvard Kennedy School as PED-502 and Harvard Graduate School of Education as A-102.

**Course Notes:** The course requires instructor consent.

**Class Notes:** Contact dennis_norman@harvard.edu by email with information about the current program that you are enrolled in, year of expected graduation, and why you are interested in this course. Professor Norman grants final approval for enrollment.

2015 Fall (4 Credits)  

Schedule: MW 1145 AM - 1259 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a

The Child Protection sector now consists of a multitude of organizations that have an ever-increasing need to coordinate. The number of development and humanitarian Child Protection actors now spans United Nations agencies, human rights bodies, local, national and international nongovernmental organizations (NGOs), national and local governments, intergovernmental organizations (IGOs), bilateral governmental development and humanitarian agencies, small civil society organizations (CSOs), international financial institutions (IFIs), other multilateral institutions, advocacy groups, private foundations, and the private sector. The early parts of this course will focus on understanding the background, structure, roles and mandates of each type of organization. Later, students will have opportunities to engage with practicing professionals and their in-class colleagues in order to conceptualize and design new programs and policies. Students will work with and across departments, sectors and geographic regions on a range of contemporary global issues relevant to Child Protection. The art of communicating across and within organizations for the development and advancement of innovative, evidence-based programs and policies will be the capstone experience of the course. Jointly offered at Harvard Kennedy School as IGA-343M, Chan Harvard School of Public Health as GHP 508, and Harvard Law School as 2533.

Course Notes: This course is open to seniors with instructor consent.

This course will meet at HKS in room L382. The first class meeting is on
September 2nd. The course will also meet for one Friday, on September 4th.

Students also meet frequently in individual conferences with instructors to discuss their work. Assignments are based on sources from a range of disciplines and genres.

Course Notes: After taking Expository Writing 10, a student must pass Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In order to enroll in Expository Writing 10, you must have had an Expos 10 advising session at the Writing Program.
Expository Writing  10 Section: 114

Introduction to Expository Writing (118262)

Jane Rosenzweig

2015 Fall (4 Credits)   Schedule:   MW 1100 AM - 1159 AM

Instructor Permissions:   Department   Enrollment Cap: 10

A rigorous, intensive elective that helps students prepare for the demands of college writing. In small classes, students work closely with instructors on developing and organizing ideas, analyzing sources, and writing clear, engaging essays. Students also meet frequently in individual conferences with instructors to discuss their work. Assignments are based on sources from a range of disciplines and genres.

Course Notes:   After taking Expository Writing 10, a student must pass Expository Writing 20 to meet the College's Expository Writing requirement.

Expository Writing  20 Section: 201

Expository Writing 20 (116353)

Jerusha Achterberg
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Paradox in Public Health

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** What happens when public health efforts to improve the wellbeing of a population undermine the wellbeing of individuals in that population? Can this outcome be avoided? Public health is characterized by the implications of this fundamental paradox: the health needs of a population are often at odds with the health needs of the very individuals who comprise that population. How does this larger paradox play out across various public health campaigns? In this class, we will use scientific articles to consider potential paradoxes in public health, both historical and contemporary. In Unit 1, we will wrestle with issues of current vaccination requirements, and consider the intersection of personal choice versus societal responsibility using current MMR (measles, mumps and rubella) vaccines. In Unit 2, students will debate the nature of public health motivation and practice—who decides what existing public health needs are? Two case studies will guide this discussion: goiter—a successfully eliminated (but now reemerging!) disease of micronutrient deficiency—and ongoing tobacco-control efforts. In Unit 3, students will conduct their own research on a controversial modern public health issue of their choice, and consider how the larger tension between the individual and the population is manifested in the student's particular selected public health controversy.

Topic: Wizards and Wild Things

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Once upon a time, there was no Harry Potter. Once upon a time, there was no such thing as children's literature. When and if children learned to read, they read what grown-ups read. How then did writing for children as we now know it come of age? Why does the genre have such an enduring hold on our cultural imagination, even as it continues to provoke sharp debate over its greater purpose and value? Are classic children's books like The Wizard of Oz, The Wind in the Willows, and The Cat in the Hat instructive or subversive, didactic or liberating? In this course we'll examine selections from three centuries of popular prose and verse written expressly for and about children as we investigate how this eclectic canon reflects evolving ideas about childhood, changing views about educating and enchanting young readers, and persistent disputes over what and how children should learn from books. In Unit 1 we'll survey landmark works in English for children from the Puritan through the Victorian eras, including the New England Primer, Grimms' Tales, and Alice in Wonderland, as we consider what these texts tell us about the origin and evolution of the genre. In Unit 2 we'll examine works by touchstone authors for younger readers including Mark Twain, Louisa May Alcott, Rudyard Kipling, E. B. White, C. S. Lewis, Maurice Sendak, and others, drawing on the critical perspectives of thinkers such as John Locke, Bruno Bettelheim, Alison Lurie, and Marina Warner to assess arguments about the essential function of imaginative literature from infancy through adolescence. In the final unit, students will conduct their own research to place a major children's author of their choice in a relevant cultural and historical context.

Expository Writing  20 Section: 204

Expository Writing 20 (116353)

Christina Becker
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Woolf and Hemingway

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Ernest Hemingway and Virginia Woolf—few authors of the twentieth century have been as celebrated and as influential as these two great literary stylists. Yet it's also hard to imagine two authors more unlike. For many readers, Hemingway epitomizes the writer-as-sportsman or adventurer, and his stripped-down writing seems to advocate a masculine ethic of tight-lipped toughness and restraint. By contrast, Woolf is often regarded today as the century's great female writer and forerunner of contemporary feminism; her writing—ethereal, abstract, impressionistic—seems to embody a distinctively female aesthetic. In this course, we will read Woolf and Hemingway together, side by side; and in the essays we write, we will investigate what really distinguishes them—in terms of gender and art (among other things)—and consider how modernist literature may be configured between the opposing values these two icons have come to represent. Primary texts will include short stories by Hemingway, critical essays and short fiction by Woolf, Hemingway's novel *A Farewell to Arms*, and Woolf's novel *Mrs. Dalloway*.

### Expository Writing 20 Section: 206

Expository Writing 20 (116353)
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Slave Narratives

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Written from the late eighteenth to the late nineteenth century in the United States, slave narratives represented the story from slavery to freedom, the escape from the South to the North, and the intellectual journey towards literacy and public speaking. This course examines some famous representatives of the genre and the complex questions it provoked as well as post-Civil Rights modifications of such narratives. In the first weeks, we will investigate the popular Narrative of the Life of Frederick Douglass (1845) as well as the sensational and widely read account of William and Ellen Craft's flight to Boston, Running a Thousand Miles for Freedom (1860). We will analyze what roles literacy and rhetoric played in these texts, and hone in on the relationship between the black American writers of slave narratives and their white editors, who oversaw what was published, edited the narratives, vouched for their truth-value, and appended them with documents. In our second unit, we will focus on Toni Morrison's Beloved (1987) to look at how modern writers modified and updated the genre after the 1960s. How did African American authors rewrite the slave narratives and their conventions? How do their portrayals of the slave community and the language of slavery differ from their predecessors? Finally, we will examine how the genre of the slave narrative changes in the hands of a white director. How does Quentin Tarantino's Django Unchained (2012), Oscar-nominated yet also denounced as incendiary, modify the genre and the interaction between white editors and black American slaves? Our primary readings will be accompanied by seminal essays on the slave narratives, their literary development, and their high current cultural stakes.

**Class Notes:** Written from the late eighteenth to the late nineteenth century in the United States, slave narratives represented the story from slavery to freedom, the escape from the South to the North, and the intellectual journey towards literacy and public speaking. This course examines some famous
representatives of the genre and the complex questions it provoked as well as post-Civil Rights modifications of such narratives. In the first weeks, we will investigate the popular Narrative of the Life of Frederick Douglass (1845) as well as the sensational and widely read account of William and Ellen Craft's flight to Boston, Running a Thousand Miles for Freedom (1860). We will analyze what roles literacy and rhetoric played in these texts, and hone in on the relationship between the black American writers of slave narratives and their white editors, who oversaw what was published, edited the narratives, vouched for their truth-value, and appended them with documents. In our second unit, we will focus on Toni Morrison's Beloved (1987) to look at how modern writers modified and updated the genre after the 1960s. How did African American authors rewrite the slave narratives and their conventions? How do their portrayals of the slave community and the language of slavery differ from their predecessors? Finally, we will examine how the genre of the slave narrative changes in the hands of a white director. How does Quentin Tarantino's Django Unchained (2012), Oscar-nominated yet also denounced as incendiary, modify the genre and the interaction between white editors and black American slaves? Our primary readings will be accompanied by seminal essays on the slave narratives, their literary development, and their high current cultural stakes.

Expository Writing  20 Section: 208

Expository Writing 20 (116353)

Jacob Betz

2015 Fall (4 Credits)  Schedule:  MW 0100 PM - 0159 PM

Instructor Permissions:  Department  Enrollment Cap:  14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  To Have Faith in America

Course Notes:  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:  The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and behavior, and the First Amendment declares all are free to practice their faith. How do Americans—even the nonreligious—experience this religious panoply? Moving beyond abstract theology, this course explores the broad concept of lived religion. Across the United States, levels of religiosity remain high and recent controversies over a proposed Islamic community center in Lower Manhattan, Supreme Court rulings on female employees' access to contraception, and this summer's religious resistance to same-sex marriage all testify to the persistence of devout religious belief. How might we balance
the tension between an essentially secular national constitution and a Bill of Rights that guarantees the free exercise of religion? Are there common religious tenets that all Americans must share? Or should the public square be kept "naked" of religious adornment so as to welcome all? Through readings in fiction, law, history and sociology, we'll tackle these fundamental questions. In Unit One, we'll read *Disgraced*, Ayad Akhtar's 2013 Pulitzer Prize-winning play, in order to explore how religion affects intimate relationships among friends and co-workers. In the following unit, we'll dissect two leading legal scholars' arguments over the place of religion in the public sphere, such as the inclusion of intelligent design in biology curricula and the placing of a crèche and menorah in front of city halls. In the final unit, we'll explore the limits of religious freedom through a series of short case studies involving snake handling, home schooling, and kirpan wearing. In this final unit, students will write a research paper on a religious freedom topic of their choosing.

Topic: Imagining the Wild West

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: From a whistle-stop town with a gun-slinging sheriff to a desperate landscape filled with danger, where the American Dream appeared to come true, the West has occupied a central place in the American imagination for three centuries. But the West is a place whose imagined reality has often been at odds with its written history—a place where an ideal of rugged individualism coexists with massive federal management, where white men have been remembered and diverse populations forgotten, and where new opportunities have collided with bloody conflict. In this course, we will examine how Americans have remembered the West—how they have decided which stories to tell and which to bury. To answer these questions, we will examine the peculiar histories of Western myths, focusing on the invention and reinvention of the Wild West in American pop culture. For our first unit, we will develop our close reading skills as we investigate memoirs detailing the "real" lives of Westerners—a Dakota woman stripped of her identity, a homesteader on the brink of starvation, cowboys both white and black, and immigrants dying for their rights. In unit two, we will turn to Buffalo Bill, the quintessential Wild West hero who brought in crowds of thousands across the country and reenacted Custer's Last Stand for the Queen of England. Students will consider Buffalo Bill in the context of Victorian ideas about men, women, and race as we attempt to explain why this story, which was essentially a Victorian fantasy, so powerfully captured the American imagination. What does Buffalo Bill's fame tell us about who Americans thought they were, or thought they could be? Finally, in unit three, we will examine how the myths of the Wild West have survived into modern pop culture through movies, television, and fashion. Whether it's George W. Bush posing as a cowboy president or bearded hipsters working at MacBooks while dressed as lumberjacks, these myths continue to animate our culture. For their final paper, students will choose a representation of the West in popular culture to research with the goal of understanding why these myths remain powerful and what assumptions underpin them. What does Toy Story have to do with Victorian office workers, or modern libertarians?
with last century's paperbacks? Is HBOS's *Deadwood* a show about the 1880s, or a comment on modern capitalism? What do the Coen Brothers have in common with John Wayne? And when we tell stories about the Wild West, when we choose what to forget and what to immortalize, what are we saying about ourselves?

Expository Writing 20 Section: 212

Expository Writing 20 (116353)

Margaret Doherty

2015 Fall (4 Credits)  Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: Department  Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: War Stories

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: How should we represent the horrors of war, and how should we remember it? These are questions that have fascinated writers since the time of Homer, but the answers to these questions changed in the modern era, when war started to seem less noble and heroic and more totalizing and destructive. This course looks at artistic representations of modern warfare and asks what effects war has on those who survive it. What happens when the body is whole, but the mind is broken? How does war live on the
memories of those who fought, or in the collective memory of a nation? Can—or should—art be made out of these painful, violent experiences? We'll start off with Tim O'Brien's *The Things they Carried*, a powerful collection of stories based on O'Brien's experiences as a soldier in Vietnam. The stories encourage us to ask how truthfully we remember and what moral judgments we make when we choose which stories to tell. From there, we'll pursue questions about memory and morality further by studying literature about the Great War, including Ernest Hemingway’s *A Farewell to Arms*. We'll ask how national politics form in and around these wars and their legacies. Our last unit brings all of these topics together as we move from literature to the movies. We'll watch Francis Ford Coppola's *Apocalypse Now*, a movie that quickly became a classic of New Hollywood, and *Zero Dark Thirty*, Kathryn Bigelow's recent depiction of the War on Terror. Throughout the course, we'll debate whether the experience of war can ever be adequately communicated to those who weren't there, and whether these attempts can prevent future generations from repeating the mistakes of the past.

**Expository Writing  20 Section: 212**

Expository Writing 20 (116353)

*Vernon Davies*

2016 Spring (4 Credits)  

**Schedule:**  

TR 1200 PM - 1259 PM

**Instructor Permissions:**  

Department  

**Enrollment Cap:**  

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  

Representations of American De

**Course Notes:**  

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  

Beyond the abstraction of American democracy as government of, by and for the people, what does democracy look like in its physical manifestations? What can we glean about our definitions of and faith in American democratic governance from historical and artistic representations of it? This course will examine what U.S. democracy looks like—its electoral mechanics, its collective bodies, its buildings, and its personality—when brought to life in campaign commercials, architecture, and films. We will ask what these representations of government suggest about the political ideals they ostensibly embody. How do the depictions of government in these works shape our understanding of the possibilities and constraints of democratic action? In what ways can citizens participate (or not) in these figurations of government? Our first unit will explore presidential television advertisements from the 1952 to the recent salvos of the 2008 campaign. With an eye to
uncovering how their narratives, imagery, rhetoric, and stagecraft imply particular assumptions about democratic governance, we will examine how such commercials ask us to consent to a particular version of "government by the people." In our second unit we will study the architecture of the Massachusetts State House (which we will examine in person) and a few of Washington, D.C.'s federal buildings—the Capitol, the White House, the Supreme Court Building, and the Pentagon. Analyzing architectural drawings, photos, paintings, and online tours of these buildings, we hope to uncover not just the symbolism of their styles but the effect that their shape and allocation of space have on individual and collective behavior. We will compare, in our final unit, conceptions of government in several conspiracy-theory films: *The Manchurian Candidate*, *All the President's Men*, *JFK*, *Wag the Dog*, and *State of Play*. We will consider how each film reflects fears commonly held at the time of its creation—fears of communist infiltrations, presidential abuses of power, or corporate manipulations of government officials, among others. How do the respective fears depicted in these films challenge our definitions of democracy? How do such narratives reinforce our relationship with government?

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Sports and the Law

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** The world of sports is one of the most dynamic and complete microcosms of American life. Since the advent of big-money professional and "amateur" athletics at the dawn of the 20th century, sports has had to confront a range of important issues: race, gender, labor versus ownership, drugs, money, violence, and economic freedom. Sports has also, at its best, represented an egalitarian ideal: the only barrier to excellence is one's own talent and commitment. At moments when sports has advanced this ideal (Jackie Robinson, Title IX) it can push society forward. When, however, people or communities lose perspective on the place and meaning of sports, the results can be disastrous or even tragic (Jerry Sandusky, performance enhancing drug scandals). We will address these issues through a series of extracts from court cases, articles, and documentary films that will provide
us with a nuanced view of sports. Using these sources, students will craft essays that present powerful arguments about the role and place of sports within American life.

**Expository Writing 20 Section: 213**

Expository Writing 20 (116353)

*Vernon Davies*

2016 Spring (4 Credits)  
**Schedule:** TR 0100 PM - 0159 PM

**Instructor Permissions:** Department  
**Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Representations of American De

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Beyond the abstraction of American democracy as government of, by and for the people, what does democracy look like in its physical manifestations? What can we glean about our definitions of and faith in American democratic governance from historical and artistic representations of it? This course will examine what U.S. democracy looks like—its electoral mechanics, its collective bodies, its buildings, and its personality—when brought to life in campaign commercials, architecture, and films. We will ask what these representations of government suggest about the political ideals they ostensibly embody. How do the depictions of government in these works shape our understanding of the possibilities and constraints of democratic action? In what ways can citizens participate (or not) in these figurations of government? Our first unit will explore presidential television advertisements from the 1952 to the recent salvos of the 2008 campaign. With an eye to uncovering how their narratives, imagery, rhetoric, and stagecraft imply particular assumptions about democratic governance, we will examine how such commercials ask us to consent to a particular version of "government by the people." In our second unit we will study the architecture of the Massachusetts State House (which we will examine in person) and a few of Washington, D.C.'s federal buildings—the Capitol, the White House, the Supreme Court Building, and the Pentagon. Analyzing architectural drawings, photos, paintings, and online tours of these buildings, we hope to uncover not just the symbolism of their styles but the effect that their shape and allocation of space have on individual and collective behavior. We will compare, in our final unit, conceptions of government in several conspiracy-theory films: *The Manchurian Candidate*, *All the President's Men*, *JFK*, *Wag the Dog*, and *State of Play*. We will consider how each film reflects fears commonly held at the time of its creation—fears of communist infiltrations,
presidential abuses of power, or corporate manipulations of government officials, among others. How do the respective fears depicted in these films challenge our definitions of democracy? How do such narratives reinforce our relationship with government?

**Topic:** War Stories

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** How should we represent the horrors of war, and how should we remember it? These are questions that have fascinated writers since the time of Homer, but the answers to these questions changed in the modern era, when war started to seem less noble and heroic and more totalizing and destructive. This course looks at artistic representations of modern warfare and asks what effects war has on those who survive it. What happens when the body is whole, but the mind is broken? How does war live on the memories of those who fought, or in the collective memory of a nation? Can—or should—art be made out of these painful, violent experiences? We'll start off with Tim O'Brien's *The Things they Carried*, a powerful collection of stories based on O'Brien's experiences as a soldier in Vietnam. The stories encourage us to ask how truthfully we remember and what moral judgments we make when we choose which stories to tell. From there, we'll pursue questions about memory and morality further by studying literature about the Great War, including Ernest Hemingway’s *A Farewell to Arms*. We'll ask how national politics form in and around these wars and their legacies. Our last unit brings all of these topics together as we move from literature to the movies. We'll watch Francis Ford Coppola's *Apocalypse Now*, a movie that quickly became a classic of New Hollywood, and *Zero Dark Thirty*, Kathryn Bigelow's recent depiction of the War on Terror. Throughout the course, we'll debate whether the experience of war can ever be adequately communicated to those who weren't there, and whether these attempts can prevent future generations from repeating the mistakes of the past.

**Expository Writing 20 Section: 215**

Expository Writing 20 (116353)

**Janling Fu**

2015 Fall (4 Credits) **Schedule:** TR 1100 AM - 1159 AM

**Instructor Permissions:** Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the
medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Who Owns the Past?

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Our culture's most iconic archaeologist is the glamorous Indiana Jones—a steely-eyed swashbuckler who cracks his leather bullwhip and fearlessly (with the exception of snakes) raids tombs for priceless relics. But who really are archaeologists and what do they actually do as discoverers and curators of the past? In our first unit, we will consider the rights and problems revolving around the passage of NAGPRA (The Native American Graves Protection and Repatriation Act) and in particular its relation to Harvard's famous Peabody Museum. How is this significant piece of legislation, which argues for the return of objects to tribes in the United States, viewed by those Native American tribes, museums, and archaeologists themselves? In our second unit, we grapple with the very mission of archaeology. How do archaeologists think about the process of collecting data—often apparently scant, fragile, and historically distant—and then its interpretation? How much can archaeologists claim to know about the human past? To help us frame this question we will replicate an experiment done by archaeologists in studying designs on tombstones in Harvard's own backyard. In our final unit, students will probe the ways in which political regimes use archaeology to legitimize a version of the past they favor. We will touch upon contradictory and competing narratives of the past between Israel and Palestine, Nazi Germany's use of archaeology to justify the values of the Third Reich, and Saddam Hussein's appeals to history to glorify his reign.

All sections emphasize revision.

**Topic:** Social Worlds of Friendship at

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.
Class Notes: Social science research has traditionally suggested that we tend to seek out friends who are similar to ourselves. But is this always true? What factors inspire people to venture outside of their comfort zones through friendship? And what seems to be happening specifically at Harvard? This course explores friendships on our campus, with an emphasis on understanding how social differences influence friend-making and community building. Our goal will be to have a better, more complex understanding of how various kinds of social boundaries and identities are reproduced or challenged through the experience of friendship. The theory of social capital will help us to understand the delicate interplay between "bridging" and "bonding" processes, and how meanings of identity and belonging play out differently across unique contexts of the College. Our discussions of friendship will be wide-ranging, but the class emphasizes our own empirical research. In Unit 1, we will explore the sociology and philosophy of friendship, beginning with Emerson's renowned essay on "Friendship" (1841) written while at Harvard. In Unit 2, students will begin to develop individual research projects and write a literature review paper and brief paper proposal. The third unit of the course will be devoted to the research process, where students will work in small research "pods" organized by topic. Throughout the research process, students will document their research experiences through reflective response papers and short presentations. This course is heavily collaborative, modeling that which it studies—namely, a spirit of openness, inclusion, and community.

**Topic:**  

The Psychology of Success and

**Course Notes:**  

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  

Who gets ahead in America? Why do some succeed while others fail? How do we account for the influence of various complex factors—societal, community, family, and individual psychology, to name just a few? How do adolescents today handle the pressure to achieve what seems to go hand-in-hand with being an American teenager? In this course, we will examine questions of success, failure, achievement, and identity viewed through the lens of current theories in psychology. We will begin with a longitudinal, ethnographic study of four American children. Through case material that details their daily lives, we will explore how factors like race, gender, and the wealth of their families affected these children's lived experiences of childhood and, when they were older, their chances of successfully getting into college. Next, we will examine two popular narratives of success and failure—the documentary film Hoop Dreams, which tells the story of two teenagers from Chicago who aimed to be good enough at basketball to play for the NBA, and The Overachievers, a best-selling journalistic account of the pressure for academic achievement felt by students at an elite public high school on the East Coast. We'll read sources that explore how passion, motivation, and a quest for competence all contribute to an individual's drive to succeed. In the final unit of the course, we will explore the consequences of achievement pressure on students' mental health during the college years, examining research on topics such as sleep deprivation, perfectionism, depression, and suicide. Throughout the course, we will use psychological theory to motivate questions and answers about human
behavior in a society where the demand for success can be tantalizingly high and the fear of failure devastatingly relentless.

**Topic:** Humans, Nature, and the Enviro

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley
powerfully described 200 years ago as an essentially human and creative impulse: "to imagine that which we know." How, then, have creative minds imagined—in essays, books, and movies—the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists—Rachel Carson's *Silent Spring* (1962), and James Lovelock's *The Revenge of Gaia* (2006). And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals—Werner Herzog's *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

**Topic:**  

Eating Culture

**Course Notes:**  

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  

"Food . . . is not art . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresciewicz, in an opinion piece for the *New York Times*, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresciewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and
commentators call “foodways”—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, “food is good to think,” as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food “disgusting” or “natural.” How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, Top Chef, Iron Chef, and the Great British Bakeoff. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

Expository Writing 20 Section: 220

Expository Writing 20 (116353)

Martin Greenup

2015 Fall (4 Credits) Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial
society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: "to imagine that which we know." How, then, have creative minds imagined—in essays, books, and movies—the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists—Rachel Carson's *Silent Spring* (1962), and James Lovelock's *The Revenge of Gaia* (2006). And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals—Werner Herzog's *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

**Expository Writing 20** Section: 220

Expository Writing 20 (116353)

*Janling Fu*

2016 Spring (4 Credits) **Schedule:** TR 1000 AM - 1059 AM

**Instructor Permissions:** Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Who Owns the Past?

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Our culture's most iconic archaeologist is the glamorous Indiana Jones—a steely-eyed swashbuckler who cracks his leather bullwhip and fearlessly (with the exception of snakes) raids tombs for priceless relics. But who really are archaeologists and what do they actually do as discoverers and curators of the past? In our first unit, we will consider the rights and problems revolving around the passage of NAGPRA (The Native American Graves Protection and Repatriation Act) and in particular its relation to Harvard's famous Peabody Museum. How is this significant piece of legislation, which argues for the return of objects to tribes in the United States, viewed by
those Native American tribes, museums, and archaeologists themselves? In our second unit, we grapple with the very mission of archaeology. How do archaeologists think about the process of collecting data--often apparently scant, fragile, and historically distant--and then its interpretation? How much can archaeologists claim to know about the human past? To help us frame this question we will replicate an experiment done by archaeologists in studying designs on tombstones in Harvard's own backyard. In our final unit, students will probe the ways in which political regimes use archaeology to legitimate a version of the past they favor. We will touch upon contradictory and competing narratives of the past between Israel and Palestine, Nazi Germany's use of archaeology to justify the values of the Third Reich, and Saddam Hussein's appeals to history to glorify his reign.

**Expository Writing 20 Section: 221**

Expository Writing 20 (116353)

*Elissa Krakauer*

2015 Fall (4 Credits)  

**Schedule:** MW 1000 AM - 1059 AM  

**Instructor Permissions:** Department  

**Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Darwinian Dating

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Among animals, individuals choose mates based on biologically informative features such as long colorful tail feathers or a red posterior. We typically assume that human attraction (and love) is more nuanced and complex, but is it? Many features that humans find attractive, such as small waists, curvy hips, nurturing behavior, and dominance, can be tied to biological explanations. In this course we will explore biological explanations for these, and many other, aspects of human attraction. Using an evolutionary perspective, we will examine global patterns of attraction and challenge stereotypes of beauty. Are the Barbie-like women of Hollywood really most attractive to men? Do nice guys truly finish last? Do traditionally attractive features in western cultures—such as large breasts—actually provide an evolutionary benefit, or might some be false signals? In addition to exploring the biological roots of attraction, we will examine how principles of attraction are expressed in popular culture, as well as how they play out right here on a college campus. In the first unit, we will attempt to define the ongoing fundamental debate between those who explain human behavior like attraction as the result of evolution and those who see such behavior as determined by culture. We turn next to a comparison of the divergent
explanations that have emerged in the body of research on female attraction. How do we reconcile some studies’ findings that women want strong, aggressive men with high testosterone and large incomes with the findings of other studies showing that women prefer nurturing and intelligent men with slightly "feminine" qualities and facial features? Having wrestled with the question of what women want, our course concludes with the analogous question of what men want. Students will have an opportunity to undertake independent research as they explore the nature of male attraction in an era of complex messages about female beauty.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Class, Race, and Space in Bost

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** This course explores the interplay between the physical spaces of American cities and the class and racial identities of urban residents. Focusing on Boston's and Cambridge's history from the 1960s to the present, we ask how spaces (from sidewalks to university campuses) shape residents' images of themselves and their neighbors. Course readings and assignments emphasize the contested nature of decision making processes, focusing on debates among politicians, courts, university officials, and neighborhood groups to determine residential and educational policies. We begin by examining a pioneering work in the field of urban studies: Jane Jacobs's *The Death and Life of Great American Cities* (1961). Jacobs vehemently critiqued programs for urban renewal and instead celebrated the vitality of social spaces found in older urban neighborhoods such as Boston's North End and New York's Greenwich Village. We then turn to one of the most tumultuous times in Boston's history as we investigate the protests surrounding the implementation of forced busing to integrate the Boston Public Schools in the 1970s. This period continues to be the subject of considerable debate, with scholars offering conflicting accounts of the role of racial, ethnic, class, and gender-based identities among opponents of busing. We build on the skills developed in the first two assignments in a final research paper that considers Harvard's own history of class, race, and space. Students first explore scholarship regarding "town gown" relations more generally and then conduct original research regarding a key episode in Harvard's interactions with neighboring residents in Boston or Cambridge.

Topic:  
Society and the Witch

Course Notes:  
Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:  
Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch’s very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we analyze the film Harry Potter and the Chamber of Secrets and the television sitcom Bewitched, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on Purity and Danger and Pierre Bourdieu's critique of Masculine Domination. These theories help us examine, for example, how fictional representations of witches speak to political struggles over class and gender. For the research paper, each student chooses an example of witchcraft on which to conduct independent research. Sample topics include fairy tales, the Salem witch trials, neo-paganism, and the Broadway musical Wicked. What will unite our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

**Topic:** Class and Culture

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** It is commonplace to note that in the United States a large portion of the population self-identifies as "middle class" even though our society is marked by deep, persistent, and increasing class inequality. This incongruity between identity and social structure betrays the complex and often contradictory ways in which we experience social class in our everyday lives. This course explores the subjective experience of social class in the U.S. from an ethnographic perspective, focusing on the everyday lives and cultures of ordinary Americans. We will consider questions such as the following. What is it like to be a working class person in a society heavily invested in ideals of individual achievement and meritocracy? How do educational institutions such as high schools and colleges underwrite class mobility for some and reproduce disadvantage for others? What kinds of class cultures are cultivated in elite colleges such as Harvard? The first unit considers the identities of working class people before and after the Great Recession, examining how blue color workers imagine their place in an increasingly unequal world. In the second unit we will focus on how attending an elite public university shapes the class trajectories of working class and upper middle class female students. For the third unit students will develop their own original research project concerning the role played by class divisions on elite college campuses. The course readings are drawn mainly from the social sciences, especially anthropology and sociology.

**Topic:**  
Tragedy and Everyday Life

**Course Notes:**  
Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:**  
The image of Oedipus blinding himself at the end of Sophocles’ *Oedipus Tyrannus* is among the most violent in Western drama. Realizing that he has killed his father, married his mother, and brought a plague upon his people,
Oedipus represents a human scenario too horrible to imagine. And yet Western culture does imagine it—it can't seem to stop imagining it—and the most horrible thing about the tragic fate of Oedipus is the suggestion that tragedy lurks within each of us as a fundamental risk of human existence. In this course we will examine tragedies both ancient and modern, asking why certain human scenarios are supposed to be tragic and whether those scenarios represent states of exception within the ordinary range of human experience—or exceptions that prove an unsettling rule. In Unit 1 we will read Sophocles' *Antigone* (442 BCE), examining the structure of tragic conflict and considering the manner in which this particular structure reflects the form of critical debate more generally. In Unit 2, we will compare Sophocles' *Oedipus Tyrannus* (429 BCE) and Shakespeare's *King Lear* (1606), asking whether the criteria of self-knowledge that plague Oedipus remain stable after two millennia or present themselves in a new "modern" fashion. In Unit 3 we will view a selection of films, including *Vertigo* (1958), *Persona* (1966), *Memento* (2000), and *Black Swan* (2010), asking whether the tragedy of contemporary culture can be understood as an everyday and insoluble conflict between individuals, themselves, and the societies in which they live.

**Expository Writing 20 Section: 226**

Expository Writing 20 (116353)

*Lindsay Mitchell*

2015 Fall (4 Credits) 

**Schedule:** TR 1200 PM - 1259 PM

**Instructor Permissions:** Department

**Enrollment Cap:** 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** American Criminals

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** The United States is a country fascinated with crime stories. But why do crime novels attract us? What do they reveal about where we come from, what we believe in, and who we are? This course will explore these and other related questions by studying fictional and nonfictional accounts of crimes committed in the United States by its citizens. In our first unit, we'll consider how our notions about who criminals are change over time by examining the historical case of Lizzie Borden. The case, narrated by early crime writer Edmund Pearson, represents an infamous instance of miscarriage of justice in American history. In the following unit, we'll explore how our ideas about criminality can change even within a single narrative. We'll do so by looking at how two different media—fiction and film—portray
the same crime story. Using both Dashiell Hammett's novel *The Maltese Falcon* and the film version directed by John Huston and starring Humphrey Bogart, we'll discuss how criminal identities shift in surprising ways in this story set in early twentieth century San Francisco. Finally, in our third unit, students will research a crime that occurred in their hometown, and think about how that crime might have been shaped by the town's specific culture. Here students will draw on theoretical discussions about culture and criminality and uncover materials from the public record.

**Expository Writing  20** Section: 226

Expository Writing 20 (116353)

*Jonah Johnson*

2016 Spring (4 Credits) **Schedule:** MW 0100 PM - 0159 PM

**Instructor Permissions:** Department

**Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Tragedy and Everyday Life

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** The image of Oedipus blinding himself at the end of Sophocles' *Oedipus Tyrannus* is among the most violent in Western drama. Realizing that he has killed his father, married his mother, and brought a plague upon his people, Oedipus represents a human scenario too horrible to imagine. And yet Western culture does imagine it—it can't seem to stop imagining it—and the most horrible thing about the tragic fate of Oedipus is the suggestion that tragedy lurks within each of us as a fundamental risk of human existence. In this course we will examine tragedies both ancient and modern, asking why certain human scenarios are supposed to be tragic and whether those scenarios represent states of exception within the ordinary range of human experience—or exceptions that prove an unsettling rule. In Unit 1 we will read Sophocles' *Antigone* (442 BCE), examining the structure of tragic conflict and considering the manner in which this particular structure reflects the form of critical debate more generally. In Unit 2, we will compare Sophocles' *Oedipus Tyrannus* (429 BCE) and Shakespeare's *King Lear* (1606), asking whether the criteria of self-knowledge that plague Oedipus remain stable after two millennia or present themselves in a new "modern" fashion. In Unit 3 we will view a selection of films, including *Vertigo* (1958), *Persona* (1966), *Memento* (2000), and *Black Swan* (2010), asking whether the tragedy of contemporary culture can be understood as an everyday and insoluble conflict between individuals, themselves, and the societies in which they live.

**Expository Writing  20 Section: 227**

Expository Writing 20 (116353)

*Lindsay Mitchell*

2015 Fall (4 Credits)  

**Schedule:** TR 0100 PM - 0159 PM

**Instructor Permissions:** Department  

**Enrollment Cap:** 16

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** American Criminals

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** The United States is a country fascinated with crime stories. But why do crime novels attract us? What do they reveal about where we come from, what we believe in, and who we are? This course will explore these and other related questions by studying fictional and nonfictional accounts of crimes committed in the United States by its citizens. In our first unit, we'll consider how our notions about who criminals are change over time by examining the historical case of Lizzie Borden. The case, narrated by early crime writer Edmund Pearson, represents an infamous instance of miscarriage of justice in American history. In the following unit, we'll explore how our ideas about criminality can change even within a single narrative. We'll do so by looking at how two different media—fiction and film—portray the same crime story. Using both Dashiell Hammett's novel *The Maltese Falcon* and the film version directed by John Huston and starring Humphrey Bogart, we'll discuss how criminal identities shift in surprising ways in this story set in early twentieth century San Francisco. Finally, in our third unit, students will research a crime that occurred in their hometown, and think about how that crime might have been shaped by the town's specific culture. Here students will draw on theoretical discussions about culture and criminality and uncover materials from the public record.

**Topic:** Darwinian Dating

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Among animals, individuals choose mates based on biologically informative features such as long colorful tail feathers or a red posterior. We typically assume that human attraction (and love) is more nuanced and complex, but is it? Many features that humans find attractive, such as small waists, curvy hips, nurturing behavior, and dominance, can be tied to biological explanations. In this course we will explore biological explanations for these, and many other, aspects of human attraction. Using an evolutionary perspective, we will examine global patterns of attraction and challenge stereotypes of beauty. Are the Barbie-like women of Hollywood really most attractive to men? Do nice guys truly finish last? Do traditionally attractive features in western cultures—such as large breasts—actually provide an evolutionary benefit, or might some be false signals? In addition to exploring the biological roots of attraction, we will examine how principles of attraction are expressed in popular culture, as well as how they play out right here on a college campus. In the first unit, we will attempt to define the ongoing fundamental debate between those who explain human behavior like attraction as the result of evolution and those who see such behavior as determined by culture. We turn next to a comparison of the divergent explanations that have emerged in the body of research on female attraction. How do we reconcile some studies' findings that women want strong, aggressive men with high testosterone and large incomes with the findings of other studies showing that women prefer nurturing and intelligent men with slightly "feminine" qualities and facial features? Having wrestled with the question of what women want, our course concludes with the analogous question of what men want. Students will have an opportunity to undertake independent research as they explore the nature of male attraction in an era of complex messages about female beauty.

**Topic:** Democracy in the Digital Age

**Course Notes:**
Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:**
Information technology has transformed politics with breathtaking speed. Today, citizens promote their favorite causes on Facebook, politicians announce they are running for office on YouTube, and journalists discuss the latest gaffe on Twitter—all platforms that did not even exist a decade ago. The internet has also affected autocratic regimes. From Egypt to Turkey, activists have used social networks to organize protests. But have these changes been as important, and as positive, as is widely claimed? We start by gaining a better understanding of the nature and history of democracy. Are competitive elections the cornerstone of democratic government, as we tend to assume, or are they actually the hallmark of an aristocratic system, as the Ancients believe? Is it democratically justified for nine Supreme Court justices to decide which laws remain on the books? And did the Founding Fathers actually set out to institute a democratic form of government? Next, we look at technology’s impact on contemporary democracies, both in the United States and around the world. Did social networks lead to the Arab Spring—or could protesters have ousted Mubarak and Gaddafi by relying on leaflets and landlines? And has the internet deepened democracy by making it easier for ordinary citizens to organize—or has the rise of partisan “echo chambers” eroded the quality of public discourse? Finally, we assess whether new technologies call for new political institutions. It used to be impossible for geographically dispersed citizens to deliberate about politics with each other on a regular basis. Today, everyone can come together online to debate pressing issues. So should we adopt more direct forms of democracy? To answer these questions, we consult studies by social scientists, read the Twitter feed of the Syrian opposition, watch a documentary about the protestors in Tahrir Square, analyze the rise of the Tea Party and Occupy Wall Street and study a short story by Isaac Asimov.

Democracy in the Digital Age

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Information technology has transformed politics with breathtaking speed. Today, citizens promote their favorite causes on Facebook, politicians announce they are running for office on YouTube, and journalists discuss the latest gaffe on Twitter—all platforms that did not even exist a decade ago. The internet has also affected autocratic regimes. From Egypt to Turkey, activists have used social networks to organize protests. But have these changes been as important, and as positive, as is widely claimed? We start by gaining a better understanding of the nature and history of democracy. Are competitive elections the cornerstone of democratic government, as we tend to assume, or are they actually the hallmark of an aristocratic system, as the Ancients believe? Is it democratically justified for nine Supreme Court justices to decide which laws remain on the books? And did the Founding Fathers actually set out to institute a democratic form of government? Next, we look at technology's impact on contemporary democracies, both in the United States and around the world. Did social networks lead to the Arab Spring—or could protestors have ousted Mubarak and Gaddafi by relying on leaflets and landlines? And has the internet deepened democracy by making it easier for ordinary citizens to organize—or has the rise of partisan "echo chambers" eroded the quality of public discourse? Finally, we assess whether new technologies call for new political institutions. It used to be impossible for geographically dispersed citizens to deliberate about politics with each other on a regular basis. Today, everyone can come together online to debate pressing issues. So should we adopt more direct forms of democracy? To answer these questions, we consult studies by social scientists, read the Twitter feed of the Syrian opposition, watch a documentary about the protestors in Tahrir Square, analyze the rise of the Tea Party and Occupy Wall Street and study a short story by Isaac Asimov.

Expository Writing 20 Section: 229

Expository Writing 20 (116353)

Ariane Mary Liazos

2016 Spring (4 Credits) Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: Department Enrollment Cap: 16

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Class, Race, and Space in Bost

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's
Expository Writing requirement.

Class Notes:
This course explores the interplay between the physical spaces of American cities and the class and racial identities of urban residents. Focusing on Boston's and Cambridge's history from the 1960s to the present, we ask how spaces (from sidewalks to university campuses) shape residents' images of themselves and their neighbors. Course readings and assignments emphasize the contested nature of decision making processes, focusing on debates among politicians, courts, university officials, and neighborhood groups to determine residential and educational policies. We begin by examining a pioneering work in the field of urban studies: Jane Jacobs's *The Death and Life of Great American Cities* (1961). Jacobs vehemently critiqued programs for urban renewal and instead celebrated the vitality of social spaces found in older urban neighborhoods such as Boston's North End and New York's Greenwich Village. We then turn to one of the most tumultuous times in Boston's history as we investigate the protests surrounding the implementation of forced busing to integrate the Boston Public Schools in the 1970s. This period continues to be the subject of considerable debate, with scholars offering conflicting accounts of the role of racial, ethnic, class, and gender-based identities among opponents of busing. We build on the skills developed in the first two assignments in a final research paper that considers Harvard's own history of class, race, and space. Students first explore scholarship regarding "town gown" relations more generally and then conduct original research regarding a key episode in Harvard's interactions with neighboring residents in Boston or Cambridge.

Topic:  
Colonialism and Resistance

Course Notes:  
Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:  
In Shakespeare's seemingly fairy-tale-like play, *The Tempest*, a god-like European magician tames an ugly monster on an island far removed from Europe. In *Heat and Dust*, a cross-cultural novel written centuries later by European author, Ruth Prawer Jhabvala, heroic British rulers save powerless widows in India from the monstrosity of being forced to burn themselves on their husbands' funeral pyres. Yet European power over non-
Eurocentric cultures does not go unchallenged: so, we find Shakespeare's monster begin to plot revenge against the powerful European magician. And even more strikingly, in the hugely popular contemporary British movie, *Bend It Like Beckham*, a non-western teenaged girl—instead of being saved by English heroes—now starts dreaming of bending the soccer ball herself like the heroic David Beckham! In this course, we'll explore some of the myriad ways in which creative voices from different times capture the phenomenon of colonialism, the process by which European nations systematically gained power over much of the non-European world, producing effects that reverberate globally to this day. At the same time, we'll analyze how such narratives depict the equally significant ways in which non-European peoples resisted colonial power and continue to resist its ongoing legacy. We'll begin by reading *The Tempest*, a fascinating tale of magicians and monsters, princesses and sprites, shipwrecks and islands that raises profound questions about the forcible manner in which Europeans established colonies in the New World, as well as the violent ways in which natives resisted them. Does this English play represent the forceful strategies of the Europeans and the violence of the natives in a manner that justifies the early colonial project as necessary for improving “lesser” peoples or that critiques it as unjustified in ousting locals? Our second course unit transitions to modern colonialism, the more full-fledged political, economic, and cultural domination of non-European nations. With the help of leading postcolonial theorist Edward Said, we'll examine *Heat and Dust* as a window to understanding a complex form that colonial power and acts of resistance to it can take: what happens, in other words, when those in power and those opposing it don't use sheer force but rather ideas and language as their tools for empowerment? We'll conclude the course by comparatively considering the movie, *Bend It Like Beckham*, alongside three short stories by Albert Camus, Salman Rushdie, and Sherman Alexie, respectively, to evaluate avenues as varied as sports, religion, standardized tests, and even recreational drugs through which today's post-colonial populations across the globe engage in dismantling the colonial legacy. As we do so, we'll also ask what kinds of role, if any, formerly colonizing European powers should play in such endeavors.

Expository Writing 20 Section: 232

Expository Writing 20 (116353)

Margaret Rennix

2015 Fall (4 Credits)  

Schedule: MW 1000 AM - 1059 AM

Instructor Permissions:  

Department:  
Enrollment Cap: 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.
Everyone lives by rules, no matter how free they may feel. Some of these rules are written; others are unspoken. While we typically associate political rights with what it means to be “free,” the seemingly small social conventions of everyday life can limit our real or perceived liberties in powerful ways, too. The codes of conduct we follow when, for example, we use social media, when we go on dates, or when we work for a company all have the capacity to rein us in, and if we knowingly or unknowingly violate those norms, our freedom may be at the price of our membership in a community. This course will use literature and film to interrogate the relationship between social rules and individual freedom while considering the following questions: What does it really mean to be “free”? How does social obligation impact our access to personal freedom? Are we even aware of the ways that society controls our behavior, or are rules of social conduct largely invisible? As we seek the answers to these questions, we'll start Unit 1 by performing close analysis of several short stories from both American and international authors—including Willa Cather, Flannery O’Connor and National Book Award winner Ha Jin—and discuss how they negotiate the relationship between individual desire and social expectation. In Unit 2, we'll turn to films like *Mean Girls*, *The Social Network*, and *The Graduate* as we read theories of individual and collective freedom, questioning how the socially constrained environments of high school and college impact individuals' behavior and choices. Finally, we will conclude with a culminating research paper in which students will choose from novels, movies, or television series like *Mad Men* and *Downton Abbey*, in order to deconstruct the social pressures that impinge on us today.

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  
The femme fatale—the attractive, seductive woman who brings about the downfall of any man she encounters—has fascinated us through the ages, from Biblical figures like Eve, Delilah, and Salome and Ancient Egypt's Cleopatra to Catwoman, or even Nicki Minaj's media persona. In most stories, the femme fatale's dangerous actions empower her, but she ultimately must also submit to the idea that her empowerment renders her a
villain. How does this contradiction in the femme fatale’s character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real gender problems that modern women and men face? This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we’ll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain’s noir novella *Double Indemnity*. In our second unit, we’ll move to a fictional account of femme fatales-as-machines published during the height of the 1960s feminist movement, and examine Philip K. Dick’s novel *Do Androids Dream of Electric Sheep?* alongside the updated film adaptation, Ridley Scott’s cult classic *Blade Runner*. Finally, in our third unit, students will research a modern day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of what makes some modern women seem so dangerous.

### Expository Writing 20 Section: 234

Expository Writing 20 (116353)

*Kip Richardson*

2015 Fall (4 Credits) **Schedule:** MW 0100 PM - 0159 PM

*Instructor Permissions:* Department **Enrollment Cap:** 14

An intensive seminar that aims to improve each student’s ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** God and Government

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College’s Expository Writing requirement.

**Class Notes:** The separation of church and state is often considered to be a cornerstone of modern democracy, but this idea has nevertheless been a difficult concept to put into practice. Must the state completely avoid any entanglement with religious groups, or merely act in a non-preferential manner toward them? How does a state determine whether a given belief or practice is religious (and thus deserving of legal protection) or simply ethical or cultural in nature? Is the ideal of a neutral political secularism even possible or desirable? And what should we think of the many global actors, from Latin America to the Middle East to Sub-Saharan Africa, who reject this ideal entirely? This course will consider the many questions and challenges raised by religious diversity for the modern state. We begin in the first unit by considering two influential early accounts of the proper relationship of
governments to religiously diverse populations, James Madison's "Memorial and Remonstrance" and Jean-Jacques Rousseau's "On Civil Religion." In the second unit, we will consider several judicial decisions from the U.S. Supreme Court and the European Court of Human Rights, which highlight the contentious legal landscape over the concept of "religious freedom." Our final unit turns to the international stage to examine several case studies from Brazil, Palestine, Nigeria, and India, to see how religious diversity is shaping contemporary global conflict.

All sections emphasize revision.

Topic: Democracy in the Digital Age

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Information technology has transformed politics with breathtaking speed. Today, citizens promote their favorite causes on Facebook, politicians announce they are running for office on YouTube, and journalists discuss the latest gaffe on Twitter—all platforms that did not even exist a decade ago. The internet has also affected autocratic regimes. From Egypt to Turkey, activists have used social networks to organize protests. But have these changes been as important, and as positive, as is widely claimed? We start by gaining a better understanding of the nature and history of democracy. Are competitive elections the cornerstone of democratic government, as we tend to assume, or are they actually the hallmark of an aristocratic system, as the Ancients believe? Is it democratically justified for nine Supreme Court justices to decide which laws remain on the books? And did the Founding Fathers actually set out to institute a democratic form of government? Next, we look at technology's impact on contemporary democracies, both in the United States and around the world. Did social networks lead to the Arab Spring—or could protestors have ousted Mubarak and Gaddafi by relying on leaflets and landlines? And has the internet deepened democracy by making it easier for ordinary citizens to organize—or has the rise of partisan "echo chambers" eroded the quality of public discourse? Finally, we assess whether new technologies call for new political institutions. It used to be impossible for geographically dispersed citizens to deliberate about politics with each other on a regular basis. Today, everyone can come together online to debate pressing issues. So should we adopt more direct forms of democracy? To answer these questions, we consult studies by social scientists, read the Twitter feed of the Syrian opposition, watch a documentary about the protestors in Tahrir Square, analyze the rise of the Tea Party and Occupy Wall Street and study a short story by Isaac Asimov.

Topic: The Narrative Self

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Life must be understood backwards, but lived forwards" the philosopher Kierkegaard wrote. Sartre, in one of his novels, develops the thought: "You have to choose: live or tell." Both suggest that living one's life and telling the story of it are mutually exclusive. Over the past few decades, many philosophers have disagreed, developing the view that understanding one's life as a story is not only something that most of us do, but allows us to become full persons and to live well. We will begin the course by considering some of these recent views. Are we right to speak of chapters of our lives and authoring our selves? To explain someone's behavior by referring to her character, or alternatively her role? To use literary genres such as tragedy to describe events in real life? What is entailed by such metaphors? Do they withstand careful scrutiny? Do our lives enact typical narrative arcs? Should they? Or do such claims confuse fiction and reality? In the middle part of the course, we will look at two fictional works that investigate similar issues. In Julian Barnes's The Sense of an Ending, the narrator's understanding of his life is upset by revelations concerning his past; the novel explores the fallibility of memory and its relation to material evidence. In the recent Swedish film Force Majeure, a wealthy family's ski vacation is upset when the husband reacts to an avalanche in an apparently cowardly manner, raising questions about character and situation, and what it means to be brave. At the end of the course, we will consider some critics of narrative self-understanding, as well as more specific applications of it. Do empirical studies challenge the idea that we have stable character? Does understanding one's life as a story preclude living in the moment? If lives are like stories, do they have a genre? Students could begin from these or other questions as they develop their own final research topics.

**Expository Writing  20** Section: 237

Expository Writing 20 (116353)

* Sri Mukherjee 

2016 Spring (4 Credits) Schedule: MW 1200 PM - 1259 PM

**Instructor Permissions:** Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively
essays. All sections emphasize revision.

**Topic:** Colonialism and Resistance

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**

In Shakespeare's seemingly fairy-tale-like play, *The Tempest*, a god-like European magician tames an ugly monster on an island far removed from Europe. In *Heat and Dust*, a cross-cultural novel written centuries later by European author, Ruth Prawer Jhabvala, heroic British rulers save powerless widows in India from the monstrosity of being forced to burn themselves on their husbands' funeral pyres. Yet European power over non-Eurocentric cultures does not go unchallenged: so, we find Shakespeare's monster begin to plot revenge against the powerful European magician. And even more strikingly, in the hugely popular contemporary British movie, *Bend It Like Beckham*, a non-western teenaged girl—instead of being saved by English heroes—now starts dreaming of bending the soccer ball herself like the heroic David Beckham! In this course, we'll explore some of the myriad ways in which creative voices from different times capture the phenomenon of colonialism, the process by which European nations systematically gained power over much of the non-European world, producing effects that reverberate globally to this day. At the same time, we'll analyze how such narratives depict the equally significant ways in which non-European peoples resisted colonial power and continue to resist its ongoing legacy. We'll begin by reading *The Tempest*, a fascinating tale of magicians and monsters, princesses and sprites, shipwrecks and islands that raises profound questions about the forcible manner in which Europeans established colonies in the New World, as well as the violent ways in which natives resisted them. Does this English play represent the forceful strategies of the Europeans and the violence of the natives in a manner that justifies the early colonial project as necessary for improving "lesser" peoples or that critiques it as unjustified in ousting locals? Our second course unit transitions to modern colonialism, the more full-fledged political, economic, and cultural domination of non-European nations. With the help of leading postcolonial theorist Edward Said, we'll examine *Heat and Dust* as a window to understanding a complex form that colonial power and acts of resistance to it can take: what happens, in other words, when those in power and those opposing it don't use sheer force but rather ideas and language as their tools for empowerment? We'll conclude the course by comparatively considering the movie, *Bend It Like Beckham*, alongside three short stories by Albert Camus, Salman Rushdie, and Sherman Alexie, respectively, to evaluate avenues as varied as sports, religion, standardized tests, and even recreational drugs through which today's post-colonial populations across the globe engage in dismantling the colonial legacy. As we do so, we'll also ask what kinds of role, if any, formerly colonizing European powers should play in such endeavors.

**Expository Writing 20 Section: 238**

Expository Writing 20 (116353)
An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** The Knife's Edge

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** For most of human history, surgery has been a brutal, terrifying affair. Operations were carried out as quickly as possible to the sound of blood-curdling screams, and often ended in the patient's death. Historian of medicine Martin Pernick observed of surgeons before the advent of anesthesia that "the emotional ability to inflict vast suffering was perhaps the most basic of all professional prerequisites." To say the state of the art has advanced since then is an understatement—incredibly, it is now even possible for complex surgeries to be carried out by robot, directed remotely by surgeons hundreds of miles away. Yet whether the scalpel is wielded by robotic arms or flesh-and-blood hands, it remains the case that operations are performed by human beings who are fallible, on bodies that are mortal, and there is still no way to wholly eliminate risk. As the surgeon and writer Atul Gawande has put it, when you are sick, "it's not science you call upon but a doctor." It is this fundamentally human endeavor of surgery, always rooted in specific social and historical contexts, that is the subject of this course. We kick off the semester with a pilgrimage to the Ether Dome of Massachusetts General Hospital, where the first successful surgery under anesthesia was performed in 1846. By comparing historical and present-day accounts of surgical success and failure, we explore what surgery has demanded from practitioners and patients over time. We next examine one of the fields of surgery that has generated the most controversy and soul-searching throughout its history in societies around the world: organ transplantation. Focusing on the world's first attempts at the transplantation of still-beating hearts, we ask how medical advances and surgical achievement have challenged our very concepts of life and death. Lastly we consider an array of very different types of surgery that can significantly affect one's identity, self-presentation, and social position, such as cosmetic, bariatric, gender reassignment, and cochlear implant surgeries. Through independent research projects on related surgical phenomena of their choice, students will explore how the advent and availability of certain types of surgery in particular contexts has shaped social norms, concepts of the normal and the pathological, prevailing principles of medical ethics, and individual experience and self-understanding. What constitutes necessity, medical or otherwise? What should we be empowered to choose—and how far should we be allowed to go? And what are the implications when the way we respond to social problems is with a surgeon's knife?

**Expository Writing   20**  Section: 239

**Joaquin Terrones**

2015 Fall (4 Credits)  Schedule:  TR 1000 AM - 1059 AM

**Instructor Permissions:**  Department  Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](http://www.exposwebsite.com). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  HIV/AIDS in Culture

**Course Notes:**  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  Perhaps more than any other event in the last quarter of the twentieth century, the AIDS crisis condensed or crystallized cultural anxieties about the body, identity, and difference. From the early reports of a 'gay cancer' in the New York Times to contemporary fundraising campaigns like Project RED, public discourse surrounding the virus has often been more concerned with who contracts it and how rather than with its biological causes or medical treatment. In this course, we will examine the cultural response to HIV/AIDS in the Americas through fiction, poetry, and visual art from the pandemic's first fifteen years. We will begin by looking at the different metaphors and allegories deployed in the early eighties to conceptualize the disease through short fiction from the U.S. and Brazil. How was AIDS figured when it first burst into public consciousness? How did activists, writers, and artists feed into these notions or push against them? In our second unit, we will consider the relationship between the visual arts, poetry and activism in the second half of that decade. How did activist groups such as ACT UP and Yeguas del Apocalipsis mobilize art to try to effect change in public consciousness and policy? How was art across the hemisphere shaped by the intense public debates surrounding it? The course will conclude by focusing on two longer works from the early nineties: Tony Kushner's *Angels in America* and Mario Bellatín’s *Salón de belleza*. How do these two texts construct or demolish overarching narratives about the epidemic? What role does each see for art in combating the disease? Throughout the semester, we will make use of the insights provided by theorists and activists of the period—such as Susan Sontag, Douglas Crimp, Pedro Lemebel and Simon Watney—along with perspectives from a variety of disciplines including political science, epidemiology, and history of science. No knowledge of Spanish or Portuguese is necessary: all materials
will be available in English.

**Expository Writing 20** Section: 239

Expository Writing 20 (116353)

*Donna Mumme*

2016 Spring (4 Credits)  
**Schedule:** MW 1000 AM - 1059 AM

**Instructor Permissions:** Department

**Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** The Ethics of Human Experiment

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** In order to learn about human biology and behavior, researchers often have to study people directly by having them participate in their studies as research subjects. On the one hand, scientific research on humans has produced many social benefits – finding cures for life-threatening illnesses, improving human decision-making, identifying effective treatments for mental illness. On the other hand, there is the risk that the experimental procedures leading to these discoveries might somehow harm the study participants. In this course, we will learn about psychological and biomedical studies that have pushed ethical boundaries, consider their costs and benefits, and analyze why they were done in the first place and whether they could be done differently to minimize the risks to the human participants. We will begin with an analysis of Milgram's classic social psychological study of obedience and consider its ethical challenges and its contributions to the study of human behavior. We will next turn to a historical account of a study that was clearly unethical (The Tuskegee Syphilis Study) and apply a social psychological analysis as a way of understanding why this study took place and why it persisted for so many years. In the final unit of the course, you will have an opportunity to explore and evaluate research at Harvard by participating in or investigating psychology studies currently taking place on campus.

All sections emphasize revision.

**Topic:** The Science of Emotion

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Reason has been routinely championed as the epitome of human achievement and framed as profoundly at odds with emotion. For much of the 20th century, scientists had even characterized emotion as unimportant. However, after the past 30 years of research, we now understand emotion to be a crucial factor in human behavior, including reasoning. This class will focus on the science of emotion. In Unit 1, we'll explore what emotion is as we read several scientists' divergent theories, including Joseph LeDoux and Antonio Damasio, who disagree on whether love is an emotion. To help us evaluate their conclusions, we will consider a crucial theory offered by Paul Ekman, whose research on facial expressions of emotion was largely responsible for the modern field of emotion science. In Unit 2, we'll explore the conundrum that emotions are at the heart of individual—and thus seemingly subjective—experience and yet have so many elements that seem to be universal among humans of all cultures. We'll read sources that outline the "laws of emotion" that differentiate between emotion and feelings, and that present interesting data on emotion in children living in poverty. Our final unit will take up the matter of how cognition and emotion interact and give students an opportunity to research one of many perplexing questions in this subfield of emotion science: What, for example, is the role of emotion in decision-making? How does emotion interact with learning or moral judgments? How does emotion operate in adolescence or in various pathologies?

Expository Writing  20 Section: 241

Expository Writing 20 (116353)

Margaret Rennix

2016 Spring (4 Credits) Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Breaking the Rules

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Everyone lives by rules, no matter how free they may feel. Some of these rules are written; others are unspoken. While we typically associate political rights with what it means to be "free," the seemingly small social conventions of everyday life can limit our real or perceived liberties in powerful ways, too. The codes of conduct we follow when, for example, we use social media, when we go on dates, or when we work for a company all have the capacity to rein us in, and if we knowingly or unknowingly violate those norms, our freedom may be at the price of our membership in a
This course will use literature and film to interrogate the relationship between social rules and individual freedom while considering the following questions: What does it really mean to be "free"? How does social obligation impact our access to personal freedom? Are we even aware of the ways that society controls our behavior, or are rules of social conduct largely invisible? As we seek the answers to these questions, we'll start Unit 1 by performing close analysis of several short stories from both American and international authors—including Willa Cather, Flannery O'Connor and National Book Award winner Ha Jin—and discuss how they negotiate the relationship between individual desire and social expectation. In Unit 2, we'll turn to films like Mean Girls, The Social Network, and The Graduate as we read theories of individual and collective freedom, questioning how the socially constrained environments of high school and college impact individuals' behavior and choices. Finally, we will conclude with a culminating research paper in which students will choose from novels, movies, or television series like Mad Men and Downton Abbey, in order to deconstruct the social pressures that impinge on us today.

Expository Writing  20 Section: 242

Expository Writing 20 (116353)  
Jane Unrue  
2015 Fall (4 Credits)  
Schedule:  
MW 1100 AM - 1159 AM  
Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Voice of Authority

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In our daily lives we negotiate our relation to the authority of government, religion, school, parents, and peers. But what is authority? How does an entity gain authority in the first place? What happens when authority is abused? What does it mean to challenge authority? And what does authority have to do with human rights? We'll begin by reading the many-times-banned One Flew Over the Cuckoo’s Nest, and we'll investigate that explosive novel’s complex and nuanced treatment of, and reaction to, authority. Next, we'll read work by one or more international authors. These formerly or currently "at-risk" writers will visit our class, and we will analyze their work and what it reveals about authority and what happens when a writer who challenges governmental and cultural authority speaks openly about, and through, her/his work. This ongoing inquiry into the nature of authority will shape our research topics in the third unit, when we will
investigate and theorize answers to questions arising out of our explorations of such topics as authority and: education, language and rhetorical strategy, politics, human rights, and art.

Expository Writing 20 (116353)

Kip Richardson

2016 Spring (4 Credits)  Schedule:  MW 1000 AM - 1059 AM

Instructor Permissions:  Department  Enrollment Cap:  14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  God and Government

Course Notes:  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:  The separation of church and state is often considered to be a cornerstone of modern democracy, but this idea has nevertheless been a difficult concept to put into practice. Must the state completely avoid any
entanglement with religious groups, or merely act in a non-preferential manner toward them? How does a state determine whether a given belief or practice is religious (and thus deserving of legal protection) or simply ethical or cultural in nature? Is the ideal of a neutral political secularism even possible or desirable? And what should we think of the many global actors, from Latin America to the Middle East to Sub-Saharan Africa, who reject this ideal entirely? This course will consider the many questions and challenges raised by religious diversity for the modern state. We begin in the first unit by considering two influential early accounts of the proper relationship of governments to religiously diverse populations, James Madison's "Memorial and Remonstrance" and Jean-Jacques Rousseau's "On Civil Religion." In the second unit, we will consider several judicial decisions from the U.S. Supreme Court and the European Court of Human Rights, which highlight the contentious legal landscape over the concept of "religious freedom." Our final unit turns to the international stage to examine several case studies from Brazil, Palestine, Nigeria, and India, to see how religious diversity is shaping contemporary global conflict.

All sections emphasize revision.

**Topic:** Why Shakespeare?
Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Does Shakespeare deserve all this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his method of artistic creation and the values of the modern world. We'll begin with a reading of the most famous artwork of the past millennium, *Hamlet*, a play about a bad philosopher trying to avenge his father's murder. We'll proceed with a study of *Macbeth*, where a celebrated war hero goes mad murdering his way into political power. Here we'll start to see the ways Shakespeare and modern thought speak to each other (and don't) by looking at two recent productions of *Macbeth* influenced by the twentieth-century invention of psychology—Alan Cummings's 2013 one-man show on Broadway in which "it's all in his head," and Michael Fassbender's 2015 film in which the hero returns from war with post-traumatic stress disorder (PTSD). We'll also run *Macbeth* through some theories of criminology, a field that claims to offer scientific explanations for why crime happens. Finally, we'll take a step back and ask, "Why Shakespeare?" and entertain answers ranging from the cynical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Jewish Identity in American Cu

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** What does it mean to be Jewish in America in 2016? At a time when a majority of American Jews do not belong to a synagogue and an estimated one-third of married American Jews are married to non-Jews, is there such a thing as a shared identity among American Jews? This course will examine
representations of Jews in American culture in an attempt to understand how Jewish-American culture has evolved since World War II, as well as how shifts in the cultural conversation about minorities in America have affected our conception of Jewish identity. As we consider recent works of literature, art, film, and television, we will question how they challenge and reinforce Jewish stereotypes, and how they continue to shape our ideas about assimilation, the Holocaust, ethnicity, and religious practice in America. We will begin by examining stories of assimilation by authors including Grace Paley, Allegra Goodman, Philip Roth, Nathan Englander, and others. We will then consider representations of the Holocaust, including Art Spiegelman’s *Maus*, Judy Chicago’s *Holocaust Project*, and Larry David’s *Curb Your Enthusiasm* “survivor episode.” In the final unit of the course, students will choose their own sources as they research and develop their ideas about Jewish identity in American culture.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  
The Narrative Self

**Course Notes:**  
Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  
"Life must be understood backwards, but lived forwards" the philosopher Kierkegaard wrote. Sartre, in one of his novels, develops the thought: "You have to choose: live or tell." Both suggest that living one's life and telling the story of it are mutually exclusive. Over the past few decades, many philosophers have disagreed, developing the view that understanding one's life as a story is not only something that most of us do, but allows us to become full persons and to live well. We will begin the course by considering some of these recent views. Are we right to speak of chapters of our lives and authoring our selves? To explain someone's behavior by referring to her character, or alternatively her role? To use literary genres such as tragedy to describe events in real life? What is entailed by such metaphors? Do they withstand careful scrutiny? Do our lives enact typical narrative arcs? Should they? Or do such claims confuse fiction and reality? In the middle part of the course, we will look at two fictional works that investigate similar issues. In Julian Barnes's *The Sense of an Ending*, the narrator's understanding of his life is upset by revelations concerning his past; the novel explores the fallibility of memory and its relation to material evidence. In the recent Swedish film *Force Majeure*, a wealthy family's ski vacation is upset when the husband reacts to an avalanche in an apparently cowardly manner, raising questions about character and situation, and what it means to be brave. At the end of the course, we will consider some critics of narrative self-understanding, as well as more specific applications of it. Do empirical
studies challenge the idea that we have stable character? Does understanding one's life as a story preclude living in the moment? If lives are like stories, do they have a genre? Students could begin from these or other questions as they develop their own final research topics.

Expository Writing 20 Section: 247

Expository Writing 20 (116353)

Jessica Ziparo

2015 Fall (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Dangerous Speech

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: On the playground, the teacher tells the teased child that "sticks and stones can break your bones, but names can never hurt you." But we know that speech can hurt; a cross burning on your lawn can damage you far more profoundly than a slap across the face. In this course, we'll examine the extent to which the First Amendment protects "dangerous speech"—a category that includes calls to violent action, racist abuse, and the communication of "subversive" political ideas. Our first unit will focus on a close reading of a recent Supreme Court case: Brown v. Entertainment Merchants Association, a decision striking down California's ban on the sale of violent video games to minors. We'll ask: how do Supreme Court Justices argue about dangerous speech? Next, we'll broaden our scope to speech that incites violence. We'll look to decisions applying free speech principles to communist agitators, cross burners, and racist protestors, and examine the theory behind the First Amendment. When does speech go too far? Our third unit will focus on hate speech—speech that vilifies a group based on, for example, its race, ethnicity, religion or sexual orientation. America is exceptional in its protection of hate speech; no other country affords so much protection for, in Justice Holmes's words, the "thought that we hate." Students will have the opportunity to choose a hate speech case or topic, either in the United States or abroad, to research in depth, using primary sources to ground the case in its contemporary context.

Expository Writing 20 Section: 248

Expository Writing 20 (116353)

Gillian Sinnott

2016 Spring (4 Credits) Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively
essays. All sections emphasize revision.

**Topic:** Privacy and Surveillance

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to some of our communications in the name of national security. It is easy to decry this state of affairs as Orwellian, or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice. In the first unit, we will explore the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? In the second unit, we will consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Do these non-citizens have any privacy rights vis-à-vis the U.S. government? Are there adequate legal protections for American citizens whose communications—both dangerous and innocent—are swept up in surveillance that is targeted at foreigners? In the final unit we will turn to the issue of privacy rights against corporations. Do we have a right to be forgotten online, or should truthful information about private citizens be available via internet search engines indefinitely? Can internet users be regarded as having given meaningful consent to privacy agreements that they have not read and would in any case likely not fully understand? For this unit, students will write a research paper about the appropriate limits on the power that private entities have over our online lives.

Expository Writing 20 Section: 249

*Patricia Bellanca*

2015 Fall (4 Credits)  
**Schedule:** MW 1100 AM - 1159 AM  
**Instructor Permissions:**  
Department Enrollment Cap: 15  

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Gothic Fiction
Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Horror, madness, monstrosity, death, disease, terror, evil, and weird sexuality: these preoccupations, according to a recent critic, have animated Gothic fiction ever since it emerged in the mid-1700s. We will contemplate these preoccupations as we examine a range of Gothic texts from eighteenth-century Gothic fragments to stories by Edgar Allan Poe and Isabel Allende. And we will ask these questions about those texts: What makes Gothic fiction "Gothic"? How do we account for its immense popularity? Why have high-minded readers and writers always tended to scorn it? (What are they so worried about?) And what have modern Gothic writers and readers made of the genre they've inherited? We'll develop a working definition of the Gothic in our first segment, which will take a group of short stories—of various centuries and nations—as its primary texts. Next, we'll read Jane Austen's Gothic spoof, Northanger Abbey, in the context of both the popular fiction Austen parodies and the heated eighteenth-century debates about what young women should read. Our third segment will focus on Edgar Allan Poe and his tales of paranoia, insanity, and incest. This segment will extend the course's focus from the Gothic mansion (and the Gothic monster) to the Gothic mind.

Expository Writing 20  
Section: 250

Expository Writing 20 (116353)  
Rebecca Summerhays

2015 Fall (4 Credits)  
Instructor Permissions: Department  
Enrollment Cap: 14

Schedule: TR 1200 PM - 1259 PM

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Reading the Body

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What does it mean—and what has it meant—to have a body? Is a body a physical boundary separating a self from the rest of the world? If so, how do we account for cases like contagion or reproduction, where bodies implicate one another? How does the way we think about our bodies depend upon both the technologies we use to manage, diagnose, and measure them and the artistic forms we use to represent them? We'll begin to explore these questions by visiting the Warren Anatomical Museum and the Putnam Gallery to examine Harvard's morbidly fascinating collections of medical curiosities and instruments—which include phrenological models of the brain, fetal skeletons, medical diagrams and prints, early X-ray machines, Civil War surgical instruments, and even Phineas Gage's skull. In our second unit, we will read across the boundaries of theology, literature, and science—genres we usually imagine as distinct—to understand how writers
from a range of perspectives have grasped and represented the origin, construction, and development of the human body. We will examine the works of Jean Baptiste de Lamarck, William Paley, and Charles Darwin and analyze A. S. Byatt's treatment of their debate in her novella, "Morpho Eugenia." This interest in how the body has been understood in the past will inform your final research paper, where you will analyze representations of the body in the contemporary texts or contexts of your choice. Possibilities include (but are not limited to) disease films, modern dance, nude portraiture, college athletics, fitness magazines, and advertising. Throughout the semester, we will ask how and why the body has been theorized in such conflicting ways, calling into question any singular understanding of what constitutes a human body.

Expository Writing  20 Section: 250

Expository Writing 20 (116353)  

Maria Stalford

2016 Spring (4 Credits)  Schedule:  TR 0100 PM - 0159 PM

Instructor Permissions:  Department  Enrollment Cap:  15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:  The Knife's Edge

Course Notes:  Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:  For most of human history, surgery has been a brutal, terrifying affair. Operations were carried out as quickly as possible to the sound of blood-curdling screams, and often ended in the patient's death. Historian of medicine Martin Pernick observed of surgeons before the advent of anesthesia that "the emotional ability to inflict vast suffering was perhaps the most basic of all professional prerequisites." To say the state of the art has advanced since then is an understatement—incredibly, it is now even possible for complex surgeries to be carried out by robot, directed remotely by surgeons hundreds of miles away. Yet whether the scalpel is wielded by robotic arms or flesh-and-blood hands, it remains the case that operations are performed by human beings who are fallible, on bodies that are mortal, and there is still no way to wholly eliminate risk. As the surgeon and writer Atul Gawande has put it, when you are sick, "it's not science you call upon but a doctor." It is this fundamentally human endeavor of surgery, always rooted in specific social and historical contexts, that is the subject of this course.

We begin the semester with historical and present-day accounts of surgical success and failure to explore what surgery has demanded from
practitioners and patients over time. We next examine one of the fields of surgery that has generated the most controversy and soul-searching throughout its history in societies around the world: organ transplantation. Focusing on the world's first attempts at the transplantation of still-beating hearts, we ask how medical advances and surgical achievement have challenged our very concepts of life and death. Lastly we consider an array of very different types of surgery that can significantly affect one's identity, self-presentation, and social position, such as cosmetic, bariatric, gender reassignment, and cochlear implant surgeries. Through independent research projects on related surgical phenomena of their choice, students will explore how the advent and availability of certain types of surgery in particular contexts has shaped social norms, concepts of the normal and the pathological, prevailing principles of medical ethics, and individual experience and self-understanding. What constitutes necessity, medical or otherwise? What should we be empowered to choose—and how far should we be allowed to go? What are the implications of responding to social problems not with social action, but with a surgeon's knife?

Topic: HIV/AIDS in Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Perhaps more than any other event in the last quarter of the twentieth century, the AIDS crisis condensed or crystallized cultural anxieties about the body, identity, and difference. From the early reports of a 'gay cancer' in the New York Times to contemporary fundraising campaigns like Project RED, public discourse surrounding the virus has often been more concerned with who contracts it and how rather than with its biological causes or medical treatment. In this course, we will examine the cultural response to HIV/AIDS in the Americas through fiction, poetry, and visual art from the pandemic's first fifteen years. We will begin by looking at the different metaphors and allegories deployed in the early eighties to conceptualize the disease through short fiction from the U.S. and Brazil. How was AIDS figured when it first burst into public consciousness? How did activists, writers, and artists feed into these notions or push against them? In our second unit, we will consider the relationship between the visual arts, poetry and activism in the second half of that decade. How did activist groups such as ACT UP and Yeguas del Apocalipsis mobilize art to try to effect change in public consciousness and policy? How was art across the hemisphere shaped by the intense public debates surrounding it? The course will
conclude by focusing on two longer works from the early nineties: Tony Kushner's *Angels in America* and Mario Bellatin's *Salón de belleza*. How do these two texts construct or demolish overarching narratives about the epidemic? What role does each see for art in combating the disease? Throughout the semester, we will make use of the insights provided by theorists and activists of the period—such as Susan Sontag, Douglas Crimp, Pedro Lemebel and Simon Watney—along with perspectives from a variety of disciplines including political science, epidemiology, and history of science. No knowledge of Spanish or Portuguese is necessary: all materials will be available in English.

### Expository Writing  20 Section: 255

**Joaquin Terrones**

**2016 Spring (4 Credits)**

**Schedule:** TR 1100 AM - 1159 AM

**Instructor Permissions:** Department Enrollment Cap: 16

An intensive seminar that aims to improve each student’s ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** HIV/AIDS in Culture

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

### Expository Writing 20 Section: 256

Expository Writing 20 (116353)

**Adrienne Tierney**

2016 Spring (4 Credits)  
**Schedule:** TR 1100 AM - 1159 AM

**Instructor Permissions:**  
Department:  
**Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** The Science of Emotion

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Reason has been routinely championed as the epitome of human achievement and framed as profoundly at odds with emotion. For much of the 20th century, scientists had even characterized emotion as unimportant. However, after the past 30 years of research, we now understand emotion to be a crucial factor in human behavior, including reasoning. This class will focus on the science of emotion. In Unit 1, we'll explore what emotion is as we read several scientists' divergent theories, including Joseph LeDoux and Antonio Damasio, who disagree on whether love is an emotion. To help us evaluate their conclusions, we will consider a crucial theory offered by Paul Ekman, whose research on facial expressions of emotion was largely responsible for the modern field of emotion science. In Unit 2, we'll explore the conundrum that emotions are at the heart of individual—and thus seemingly subjective—experience and yet have so many elements that seem to be universal among humans of all cultures. We'll read sources that outline the "laws of emotion" that differentiate between emotion and feelings, and that present interesting data on emotion in children living in poverty. Our final unit will take up the matter of how cognition and emotion interact and give students an opportunity to research one of many perplexing questions in this subfield of emotion science: What, for example, is the role of emotion in decision-making? How does emotion interact with learning or moral judgments? How does emotion operate in adolescence or in various pathologies?
Expository Writing  20  Section: 257
Expository Writing 20 (116353)

Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** The Voice of Authority

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** In our daily lives we negotiate our relation to the authority of government, religion, school, parents, and peers. But what is authority? How does an entity gain authority in the first place? What happens when authority is abused? What does it mean to challenge authority? And what does authority have to do with human rights? We'll begin by reading the many-times-banned *One Flew Over the Cuckoo's Nest,* and we'll investigate that explosive novel's complex and nuanced treatment of, and reaction to, authority. Next, we'll read work by one or more international authors. These formerly or currently "at-risk" writers will visit our class, and we will analyze their work and what it reveals about authority and what happens when a writer who challenges governmental and cultural authority speaks openly about, and through, her/his work. This ongoing inquiry into the nature of authority will shape our research topics in the third unit, when we will investigate and theorize answers to questions arising out of our explorations of such topics as authority and: education, language and rhetorical strategy, politics, human rights, and art.

Think of Harvard in ruins, its halls picked clean by marauders (like those in Mad Max) or by hungry undead (think World War Z). But what would it really be like to experience society's collapse? In some artistic visions, Apocalypse offers not just devastation, but a clean slate—room to start over. How bad would the "end of civilization" really be? Ten years ago, Jared Diamond's book Collapse described ancient and modern "ecocides"—social collapses after unsustainable environmental abuse. Diamond warned that "within the lifetimes of the children and young adults alive today," our environmental problems, if not corrected, would similarly provoke "warfare…disease epidemics, and collapses of societies." But many historians and archaeologists have vigorously challenged Diamond's account of the past, fueling an ongoing debate about collapse. What collapse is, what causes it, and whether its consequences might be catastrophic or quite livable for some remain contentious. Whether in our best research or in the latest film, collapse is hard to pin down. Together, we'll chase collapse through the ruins. We'll read short fiction by George R. R. Martin and Elizabeth Bear, asking how post-apocalyptic visions balance annihilation and resilience. We'll then compare prominent scholarly models for actual social collapse. How do such models illuminate the past—and the present? Finally, we'll study the evidence for alleged social collapses around the world, from the Late Bronze Age Aegean to the barren slopes of Rapa Nui/Easter Island. The journey may be sobering—but perhaps the "end of civilization" isn't the end of the world, after all.

**Expository Writing 20 Section: 261**

Expository Writing 20 (116353)

*Jeffrey Wilson*

2016 Spring (4 Credits)  
**Schedule:** TR 1000 AM - 1059 AM

**Instructor Permissions:** Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:** Why Shakespeare?

**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:** Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Does Shakespeare deserve all this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his method of artistic creation and the values of the modern world. We'll begin with a reading of the most famous artwork of the
past millennium, *Hamlet*, a play about a bad philosopher trying to avenge his father's murder. We'll proceed with a study of *Macbeth*, where a celebrated war hero goes mad murdering his way into political power. Here we'll start to see the ways Shakespeare and modern thought speak to each other (and don't) by looking at two recent productions of *Macbeth* influenced by the twentieth-century invention of psychology—Alan Cummings's 2013 one-man show on Broadway in which "it's all in his head," and Michael Fassbender's 2015 film in which the hero returns from war with post-traumatic stress disorder (PTSD). We'll also run *Macbeth* through some theories of criminology, a field that claims to offer scientific explanations for why crime happens. Finally, we'll take a step back and ask, "Why Shakespeare?" and entertain answers ranging from the cynical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

**Topic:**  
Gothic Fiction

**Course Notes:**  
Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

**Class Notes:**  
Horror, madness, monstrosity, death, disease, terror, evil, and weird sexuality; these preoccupations, according to a recent critic, have animated Gothic fiction ever since it emerged in the mid-1700s. We will contemplate these preoccupations as we examine a range of Gothic texts from eighteenth-century Gothic fragments to stories by Edgar Allan Poe and Isabel Allende. And we will ask these questions about those texts: What makes Gothic fiction "Gothic"? How do we account for its immense popularity? Why have high-minded readers and writers always tended to scorn it? (What are they so worried about?) And what have modern Gothic writers and readers made of the genre they've inherited? We'll develop a working definition of the Gothic in our first segment, which will take a group of short stories—of various centuries and nations—as its primary texts. Next, we'll read Jane Austen's Gothic spoof, Northanger Abbey, in the context of both the popular fiction Austen parodies and the heated eighteenth-century debates about what young women should read. Our third segment will focus on Edgar Allan Poe and his tales of paranoia, insanity, and incest. This segment will extend the course's focus from the Gothic mansion (and the Gothic monster) to the Gothic mind.
Expository Writing 20 Section: 264

Expository Writing 20 (116353)

Spencer Strub

2016 Spring (4 Credits)

Schedule: MW 1000 AM - 1059 AM

Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Sin and Virtue

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Being good isn't always easy, no matter how hard we try—or so writers, philosophers, artists, and theologians have told us for the past few thousand years. So we've made categories for the bad things we do with our minds and our bodies, to ourselves and to others: pride, gluttony, lechery, greed, envy, anger, and sloth, to name just the Seven Deadlies. But how do we really know what's good and what's bad? Who gets to judge? And what do such judgments overlook or obscure? This course examines how a long tradition of literature has asked and answered questions like these. We begin Biblical: our first unit will focus on a set of surprisingly ambivalent stories of human frailty and divine judgment from Genesis, Job, and elsewhere. We will approach these selections as literature, close reading them for sense and style. For our second unit, we move to the Renaissance stage, a venue that could be sternly moralizing and shockingly sinful (sometimes in the same show). We will compare Marlowe's Dr. Faustus and Shakespeare's Hamlet—two plays that revel in scandal and provocation, but also share a deep concern with knowledge and the grounds for ethical action. We end with Toni Morrison's A Mercy, a twenty-first-century reconstruction of early America and the Middle Passage; this exploration of virtue in extremis will be the anchor of a final research paper. Throughout the course, we will also consider smaller pieces of context, criticism, and theory that will help us frame our conversations about doing good and being bad.

Expository Writing 40
Public Speaking Practicum (125227)

Marjorie Zohn

2015 Fall (4 Credits)

Schedule: MW 0300 PM - 0459 PM

Instructor Permissions: Instructor
Enrollment Cap: 30

This course develops and strengthens the skills necessary for successful public speaking. Students learn strategies for preparing and delivering presentations, formulating and organizing persuasive arguments, impromptu speaking, cultivating critical thinking, engaging with an audience, using the voice and body, and building confidence in oral expression. Students who successfully complete this course are eligible to apply to work as Peer Speaking Tutors.

Course Notes: See the <a href="http://writingprogram.fas.harvard.edu">Writing Program</a> for admission information.

Class Notes: Expos 40 is an elective within the Writing Program, and focuses on developing and strengthening the skills necessary for successful public speaking. Students learn strategies for impromptu speaking, preparing and delivering presentations, formulating and organizing persuasive arguments, cultivating critical thinking, engaging with an audience, using the voice and body, and building confidence in oral expression. Admission is by application. Limited to 30 students.

For all questions related to Expos 40, please contact Margie Zohn at margie@zohncoaching.com.

Folklore & Mythology  97

Fieldwork and Ethnography in Folklore (134893)

Leah Lowthorp

2016 Spring (4 Credits)  Schedule:  R 0400 PM - 0559 PM

Instructor Permissions:  Instructor  Enrollment Cap:  5

Introduces concentrators to the study of traditions - their performance, collection, representation and interpretation. Both ethnographic and theoretical readings serve as the material for class discussion and the foundation for experimental fieldwork projects.

Course Notes:  Required of all, and limited to, concentrators.

Additional Course Attributes:

Folklore & Mythology  98A

History and Theory of Folklore and Mythology (115032)

Stephen Mitchell

2015 Fall (4 Credits)  Schedule:  TBD

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Examines the development of folklore and mythology as fields of study, with particular attention to the methodological approaches suited to their areas of enquiry. Considers the study of folklore and mythology in the 19th and early 20th centuries, but focuses especially on theoretical contributions to the study of folklore, mythology, and oral literature in recent decades.

Course Notes:  Required of all, and limited to, concentrators.

Folklore & Mythology 128
Fairy Tale, Myth, and Fantasy Literature (122553)

Maria Tatar
2015 Fall (4 Credits)  
**Schedule:** T 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

Traces the migration of traditional tales from communal storytelling circles into the literary culture of childhood and into new media. How are powerful cultural myths about innocence and seduction, monstrosity and compassion, or hospitality and hostility recycled in fairy-tale fashion? How do fantasy worlds - both utopian and dystopic - provide children with portals for exploring counterfactuals and worst-case scenarios? Authors include the Brothers Grimm, Andersen, Lewis Carroll, J.M. Barrie, and J.K. Rowling.

**Course Notes:** This course, when taken for a letter grade, meets the General Education requirement for either Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Folklore & Mythology 153
South Asian Folklore (156464)

Leah Lowthorp
2015 Fall (4 Credits)  
**Schedule:** T 0400 PM - 0559 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This course exposes students to key issues and theoretical concerns in the study of South Asian folklore, both of the subcontinent and the South Asian diaspora. We will examine multiple genres of South Asian folklore through a variety of themes and modes of expression. The course will be divided into seven modules: an introduction to folklore and folklore studies; folklore and nationalism; oral epics; folktales; narrative and gender; folk songs and ballads; belief; and folk drama, dance and puppetry. By exploring this diverse array of South Asian expressive traditions, students will gain a greater understanding of both the fields of Folklore and South Asian Studies.

Folklore, Social Justice and Community Advocacy (159987)

Leah Lowthorp
This course will explore the relationships between folklore, resistance, and social justice in contemporary and historical perspective. It will examine the ways in which folklore gives voice to marginalized communities, how communities mobilize folklore as a tool of resistance against injustice in both visible and invisible ways, and the role folklorists can and do play in community advocacy.

Quilts and Quiltmaking (127859)

*Felicity Lufkin*

2016 Spring (4 Credits)  
**Schedule:**  
W 0200 PM - 0359 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

Are quilts the great American (folk) art? From intricately stitched whole-cloth quilts, to the improvisational patchworks of Gee's Bend; from the graphic simplicity of Amish quilts to the cozy pastels of depression-era quilts; from the Aids Quilt to art quilts; quilts have taken on extraordinary significance in American culture. This class surveys the evolution of quilt-making as a social practice, considering the role of quilts in articulations of gender, ethnic, class and religious identities, and their positions within discourses of domesticity, technology, consumerism, and cultural hierarchy.

Tattooing has been practiced in many different social and cultural settings, in many different time periods, to different ends. In the United States, tattooing was long associated with marginalized and stigmatized groups, but since the 1970s, has become increasingly popular and even mainstream. This seminar style class will explore distinct regional histories of tattoo, the development of tattooing in the US, and the different ways that contemporary tattoo practitioners situate themselves historically and negotiate boundaries of race, class and gender. We will also consider tattoo as an art form that both invites and resists aesthetic judgments.

Freshman Seminar   21D
Food, Climate, and Data (159728)

Peter Huybers

2015 Fall (4 Credits)  Schedule: M 0100 PM - 0359 PM
Instructor Permissions: Instructor  Enrollment Cap: 12

We will explore the implications of interacting trends in population, diet, and climate for food security. The course begins with some background literature on food security, initially juxtaposing Malthus and Boserup, and then moving to Sen. The primary focus, however, is a data-driven exploration of food security through analysis of weather, climate, demographics, and yield. Specific questions that we will empirically address are how temperature and precipitation influence yield outcomes? Can agriculture be adapted to a changed climate? How will demographics and diet shift in the coming decades? Will the green revolution continue to yield steady increases? And can we predict famine?

How Did the First Stars and Galaxies Form? (108389)

Abraham Loeb

2016 Spring (4 Credits)  Schedule: M 0130 PM - 0329 PM
Instructor Permissions: Instructor  Enrollment Cap: n/a

Since the Universe is expanding, it must have been denser in the past. Therefore, there must have been an early time when stars like our Sun or galaxies like the Milky Way did not exist because the Universe was denser than they are. We therefore face the important question about our origins: how and when did the first stars and galaxies form? Primitive versions of this question were considered in religious and philosophical texts for thousands of years. The Seminar will summarize the fundamental principles and scientific ideas that are being used to address this question in modern cosmological studies.

Heart diseases have plagued humans since ancient times, but only in the past century has heart disease become epidemic throughout the world. The rise of heart disease has been strongly influenced by modernization of civilization. Conversely, breakthroughs in heart disease research have strongly influenced society and our personal behavior. In this seminar, we will examine some of the major intersection events between heart disease and modern society over the past century. In addition, we will visit a high technology modern cardiology facility and watch some technology in action.

This seminar addresses fundamental evolutionary concepts while exploring the dynamic relationship between plants and their pollinators. We will use plant-pollinator interactions to understand the science of mutualism, co-evolution, speciation, convergence, animal behavior, and conservation biology. Discussions and readings on these topics will be highlighted by trips to the Arnold Arboretum, the Harvard Museum of Natural History, the Wellesley College greenhouses, and a local beekeeper. We will utilize living plants to explore diversity in plant morphology and reproductive strategies.

Course Notes: The seminar will include required field trips, dates TBD. Transportation and entrance fees are provided free of charge.

The transition of dinosaurs to modern birds is one of the most rapidly advancing and increasingly complete records of evolutionary change in the vertebrate fossil record. Additionally it is an excellent model for how science builds on incremental discoveries and undergoes paradigm shifts as new data are collected. We will explore the dinosaurian origins of modern birds through exploration of Harvard's excellent collections of dinosaur fossils, skeletons and specimens of extant birds, and focused readings and discussions. The goal will be to gain a greater appreciation of dinosaur diversity and to better understand the deep origins of modern bird adaptations.

Freshman Seminar  21W
Research at the Harvard Forest: Global Change Ecology-Forests, Ecosystem Function, the Future (112349)

David Foster

2016 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

This course explores state-of-the-art research, tools and measurements used to investigate and predict climate change through ongoing studies at the Harvard Forest's 3,500 acre outdoor laboratory in Petersham, MA. The seminar consists of four weekend-long field trips (Friday evening-Sunday) to the Harvard Forest and a final on-campus meeting. Students develop skills for evaluating, discussing, and presenting the ecological evidence for climate change, including feedbacks between forests and the atmosphere and long-term impacts on forest
Course Notes: Four weekends at the Harvard Forest in Petersham, MA (Fri, 3pm-Sun, late afternoon) dates TBA. Transportation, accommodations, and meals at the Harvard Forest will be provided.

Class Notes: Open to Freshmen only. Four weekends at the Harvard Forest in Petersham, MA (Fri, 3pm-Sun, late afternoon) dates TBA. Transportation, accommodations, and meals at the Harvard Forest will be provided.

Freshman Seminar  21Z

Chance and the Pleasures of Probability (159833)

Lakshminarayanan Mahadevan

2015 Fall (4 Credits)  Schedule: M 0600 PM - 0759 PM

Instructor Permissions: Instructor  Enrollment Cap: 12

Probability is a subject that grew up in gambling dens, and yet is most likely (!) the most important aspect of mathematics that will touch your life repeatedly - especially when you least expect it (!).

Probabilistic thinking is qualitatively different from the determinism that is typically taught early on in the sciences and elsewhere and yet is much more natural in most situations associated with mundane activities in life. It is also often counter-intuitive - all this means is that we are innately not very good probabilistic thinkers, but clearly can train ourselves to do so.

Psychoactive Molecules from Babylon to Breaking Bad (159838)

Jon Clardy

2016 Spring (4 Credits)  Schedule: R 0300 PM - 0459 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

Psychoactive molecules are commonplace in today's world. Examples range from the widely used and familiar - caffeine and sugar - to the illegal - heroin and MDMA/Ecstasy/Molly, and several of the illegal ones have legitimate uses as treatments for pain (heroin) or possibly post-traumatic stress disorder (MDMA). The seminar focuses on
neurotransmitters, the molecules that allow individual neurons in our brains to communicate with each other and form the networks that define who we are and how we interact with the world around us. We will explore how psychoactive molecules alter neuronal communication for better or worse.

Time for Sleep: Impact of sleep deficiency and circadian disruption in our 24/7 Culture (159839)

*Charles Czeisler*

2016 Spring (4 Credits)  
**Schedule:**  
W 0300 PM - 0529 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:** n/a

What is sleep? Why do we sleep? Why don't we sleep? How much sleep do you need? What are circadian rhythms? How do technology and culture impact sleep? Evaluates the role of sleep and circadian timing in maintaining health, improving performance and enhancing safety. Explores causes and consequences of the epidemic of sleep disorders and deficiency in our society, with particular attention to impacts on brain (learning and memory, mood and cognition) and body (appetite and metabolism, hormones and heart) functions. Personal and public policy approaches to issues such as drowsy students, drowsy drivers and drowsy doctors will be addressed.

My Genes and Cancer (159990)

*Giovanni Parmigiani*

2016 Spring (4 Credits)  
**Schedule:**  
R 0300 PM - 0459 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:** n/a

The role of a person's genetic background in determining whether he or she will develop cancer, and when, is the subject of constant debate and investigation. This seminar will explore the biological and statistical bases of the connection between genetic background and cancer. In the process, students will become familiar with basic concepts of genetic inheritance in humans; with cancer evolutionary theories; with how to design population studies to investigate gene-disease associations; with the use of statistical methods to determine risk; and with the use of risk in complex decision making in health. There are no prerequisites.

Requirements: Course open to Freshman Students Only
Freshman Seminar  22M

The Human Brain (123659)

John Dowling

2015 Fall (4 Credits)  

Schedule: W 0300 PM - 0529 PM

Instructor Permissions: Instructor  
Enrollment Cap: 15

Investigates human brain function through famous neurological cases and what we have learned from them: Broca's patient "Tan" whose case led to the identification of one of the brain's language areas; Phineas Gage, whose injury to a specific brain region changed his personality dramatically; and patient HM who, after brain surgery, no longer could remember things for more than a few minutes. Readings will be from my book Creating Mind.

Course Notes: Open to Freshmen only. This seminar is designed for non-science concentrators.

Recommended Prep: High school science.

Requirements: Course open to Freshman Students Only

Freshman Seminar  22R

Introduction to Technology and Society (160118)

Venkatesh Narayanamurti

2015 Fall (4 Credits)  

Schedule: T 0300 PM - 0459 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12

From the digital revolution to social media, from global warming to sustainability, and from national security to renewable energy, technology plays a critical role in shaping our lives. This course explores concepts in physical sciences that span disciplines and examines broadly how technology shapes society and vice versa. Through case studies, students will be exposed to the importance of a conceptual understanding of science (including social science) underpinning technology and the tradeoffs necessary in tackling the great challenges facing a global society. The course has a foundation of both physical and social science concepts, sparking interest and encouraging future investigation into how technology and society are interwoven and mutually dependent. Each class will start with a discussion of blog posts of current news related to technology followed by selected areas of deeper engagement and discussion. Students will be involved through individual reflection and small team assignments to address specific problems in, for example, the case of "wiki leaks" and its implications for issues of privacy and diplomacy and open government. The course is designed for physical science students to appreciate not only 'how things work' but 'how the world works' and for social science, arts and humanities students on not thinking of technology as a 'black box'.

Course Notes: Open to Freshmen only. There are no prerequisites but interview maybe required to have a balanced distribution of students spanning interests in the natural sciences, arts and humanities and social sciences.

Requirements: Course open to Freshman Students Only

Quantum Mechanics Face to Face (160193)

Melissa Franklin

2016 Spring (4 Credits)  

Schedule: T 0230 PM - 0429 PM

Instructor Permissions: Instructor  

Enrollment Cap: n/a

The seminar will introduce the student to both the ideas of the quantum theory of physics and the physical phenomena resulting from it. The seminar will be taught in studio/lab, through discussion and demonstration. The students will work with the instructor to use apparatus to demonstrate various aspects of wave and particle behaviour and to synthesize the ideas of quantum mechanics with the macroscopic physical reality. That is, we will demonstrate some features of quantum mechanics to ourselves.

Course Notes: Open to Freshmen only.

Freshman Seminar 22V

Physics and Big Questions (160194)

Gerald Gabrielse

2015 Fall (4 Credits)  Schedule:  T 0100 PM - 0259 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

The big questions considered are those that must be posed to do physics, and those that reflect on the broader context of physics. What are the limits and domain of applicability of the classical physics studied in high school? How do these relate to special relativity, quantum mechanics and quantum field theory? What is the "standard model" of particle physics and how is it tested? How does physics inform some challenges to our society, such as the options for powering our homes and cars. An additional set of big questions are about the compatibility or incompatibility of physics and religious faith.

Course Notes:  Open to Freshmen only.

Freshman Seminar 23C

Exploring the Infinite (160198)

Peter Koellner  W. Hugh Woodin

2016 Spring (4 Credits)  Schedule:  M 0300 PM - 0459 PM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Infinity captivates the imagination. A child stands between two mirrors and sees herself reflected over and over again, trailing off to infinity. Does it go on forever? Does anything go on forever? Does time go on forever? Does the universe go on forever? In this seminar we will explore the mathematics of the infinite. We will see that there are higher and higher levels of infinity, and through this exploration we will see that the infinite is even more magnificent than one might ever have imagined.

Ireneo Funes, the protagonist of the fantasy story "Funes the Memorious", had an absolutely amazing memory. Funes was capable of memorizing the tiniest detail of every single day, yet he was incapable of making sense of it. The statistician and historian Stephen Stigler called Funes "Big Data without Statistics". Using Stigler's "Seven Pillars of Statistical Wisdom" (2015, Harvard University Press) as the primary reading, we will explore seven statistical principles and insights that are crucial in preventing ourselves from becoming the Funes of the 21st century. This seminar is particularly suited for those whose happiness lies in understanding the philosophical underpinnings of quantitative thinking under uncertainty.

Course Notes: Open to Freshmen only.

This course is designed to provide a working knowledge of the scientific method, thereby fostering development of fundamental skills in logic and experimental design. The various forms of reasoning (inductive, abductive, deductive) will be discussed in context of the practice of science. Through critical analysis of historical and contemporary scientific reports, students will gain an understanding of creating appropriate hypotheses, of controlled experimentation, and of the breadth and limits of conclusions drawn from experimental data.

Anatomy and Ethical Transgressions in National Socialism (160215)

Sabine Hildebrandt
This course introduces students to the history and ethics of anatomy and their relevance for current medical ethics. The general history of anatomical dissection serves as a background to ethical transgressions committed by anatomists during National Socialism (NS, Nazi Germany). Body procurement changed by including increasing numbers of bodies of NS victims, and anatomists became complicit in the complete destruction of so-called "enemies" of the regime. A few anatomists left the traditional paradigm of anatomy- i.e. gain of anatomical knowledge through work with the dead- and started work with the "future dead" in experiments on prisoners who were subsequently murdered.

Freshman Seminar 23I

GeoSciFi Movies: Real vs. Fiction (160219)

Miaki Ishii

Natural disasters such as earthquakes, tsunamis, hurricanes, and volcanic eruptions have major impact on society and cause great tragedies. Dramatization of these phenomena resulted in a number of motion pictures, and while most movies have some scientific foundation in their depiction of the natural events, they inevitably exaggerate or introduce fiction. Through examination and discussion of real and fictitious effects, this seminar aims to develop appreciation for and interests in the underlying science behind natural phenomena.

A physician occupies a unique perch, regularly witnessing life's great mysteries; it is no wonder that narratives of illness have been of interest to both physician and non-physician writers. Examines and interrogates both literary and journalistic dimensions of medical writing from Tolstoy to Oliver Sacks as well as newspapers and periodicals. Studies not only mainstream medical journalists, but so-called alternative medical writers such as Andrew Weil also. Work with different forms of medical writing.

Freshman Seminar   23L

Medicine, Law, and Ethics: An Introduction (125133)

Shahram Khoshbin

2016 Spring (4 Credits)  
**Schedule:** MR 0700 PM - 0859 PM

Instructor Permissions: Instructor  
**Enrollment Cap:** n/a

Explores medical, legal, and ethical aspects of medical care, with particular attention to medical decision-making at the beginning and end of life, participants in research on human subjects, human reproductive technologies, mental illness, and experimentation on animals. Historical background of present-day medical practices and relevant law to be discussed.

Recommended Prep: All students are welcome, but this seminar is particularly geared to pre-medical and pre-law students. Students are advised that this course is intended to be introductory.

Nutrition and Public Health (125226)

Clifford W. Lo

2015 Fall (4 Credits)  
**Schedule:** T 0630 PM - 0829 PM

Instructor Permissions: Instructor  
**Enrollment Cap:** 15

Introduction to the critical reading of technical nutrition and medical literature; surveys current issues in public health and public policy relating to nutrition. Critical analysis of different types of medical literature: historical monographs, metabolic laboratory observations, clinical case reports, epidemiological surveys, prospective randomized controlled trials, metaanalyses, and literature reviews. Prepares science and non-science concentrators to examine critically current controversies for themselves; requires active participation and presentation by students.
Course Notes: Clinical rounds with Nutrition Support Services at Children's Hospital are optional.

Requirements: Course open to Freshman Students Only

Freshman Seminar  23P

Physics, Math and Puzzles (109319)

C. Vafa

2015 Fall (4 Credits) Schedule: W 0430 PM - 0629 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Principles of modern physics are based on simple but at the same time deep concepts. Many of these concepts are naturally encountered when solving mathematical puzzles. The aim of this seminar is to illustrate the connection between physics and mathematics and use simple ideas and puzzles to shed light on this relation. We will also draw upon ideas encountered in the context of string theory and higher dimensional realizations of our universe. Recommended for students deeply interested in both physics and mathematics.

Course Notes: Friday class will be added if needed, TBD.

Class Notes: Section I: W., 4:30–6:30; Section II: F., 4-6

Recommended Prep: This seminar is recommended for students with a strong background in both math and physics and with keen interest in the relation between the two subjects.

Requirements: Course open to Freshman Students Only

Freshman Seminar  23R

Asteroids and Comets (161261)

Charles Alcock

2016 Spring (4 Credits) Schedule: M 0700 PM - 0859 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Comets have been seen regularly since before the beginning of recorded history. They have often been regarded as disturbing portents. Asteroids, on the other hand, were not discovered until the 19th century, with the advent of astronomy with telescopes. Today we know of many more asteroids than comets, but we believe that there are vastly more comets than asteroids in the solar system. This seminar will start with the history of the study of comets.
and asteroids, including the "Great March Comet of 1843", observations of which led to the establishment of the Harvard College Observatory and its Great Refractor, at that time the largest telescope in the Americas. Our understanding of comets advanced dramatically in 1950 with the publication of two extraordinary papers: Whipple (then at Harvard) described the mixture of dust and ice that comprises the nuclei of comets, and Oort (Leiden University) showed that new comets enter the inner solar system from a vast, diffuse cloud surrounding the planetary system. Modern telescopes and spacecraft encounters provide us today with a wealth of information about comets and asteroids. We will examine these observations and learn what is known and what is inferred about the origin and structure of asteroids and comets. The students will observe with the Astronomy Laboratory’s Clay Telescope on the roof of the Science Center. Students will take on projects, which may involve their own observing program, or which exploit existing data.

Course Notes: The seminar will make use of the Clay Telescope on the roof of the Science Center. There may also be a trip to the Observatory at 60 Garden Street to visit the Great Refractor.

Requirements: Course open to Freshman Students Only

Freshman Seminar 23Y

All Physics in 13 Days (109575)

John Doyle

2015 Fall (4 Credits) Schedule: M 0715 PM - 0914 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This seminar will introduce 13 key pieces of knowledge about our physical world: 1) Boltzmann factor and thermal equilibrium, 2) Turbulence, 3) Reaction rates, 4) Indistinguishable particles, 5) Quantum waves, 6) Linearity, 7) Entropy and information, 8) Discharges, ionization, 9) Relativity, 10) Nuclear binding energies, 11) Photon modes, 12) Diffraction, 13) Resonance. Each week we will discuss one of these principles and see how we might gain an understanding of our physical and technological world.

Recommended Prep: Professor Doyle has made a change to the prerequisites. Since this is a fall term course, applicants will not be required to have taken Mechanics 11a, 15a, or 16. Please note that this seminar will be geared to students likely to go on in physics or related areas, such as chem/phys or engineering. The introduction to certain principles is done with the expectation that students will return to a more formal course on the subject in the future. This course acts as a kind of road map for further studies in physics. Topics may change.

Freshman Seminar  24E
The Physics and Applied Physics Freshman Research Laboratory (118807)

Jene Golovchenko

2015 Fall (4 Credits)  Schedule:  WF 0300 PM - 0459 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

Exposes students considering careers in science or engineering to environment of a modern research laboratory. Research teams construct, perform, analyze, and report on cutting-edge experiments in physical, engineering, and biological sciences. Projects provide insight into the mathematical, mechanical, electronic, chemical, computational, and organizational tools and skills that characterize modern experimental science. Past projects focused on atomic, nuclear, and solid state physics, materials science, dynamical systems, and biophysical science. Projects highlight both team and individual effort.

Course Notes:  There will be interviews for selected students on August 26-27th. This class will meet off-campus at the Rowlands Institute at Harvard. Transportation will be provided at no charge to students.

Freshman Seminar  24G
A Brief History of Surgery (127976)

Frederick Millham

2015 Fall (4 Credits)  Schedule:  R 0700 PM - 0859 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

In this seminar, students explore the historical foundation of modern surgical practice. They will study the medical notions of the ancients, and then see these notions overturned in The Enlightenment. Advances of the 19th century will be studied in detail. We will end with a session on combat casualty care, aided by an experienced combat surgeon. Students will write a 5 page paper on a topic in surgical history and will present their work to the class.

Child Health in America (119619)  
Judith Palfrey  
2015 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 12  
Schedule:  M 0400 PM - 0559 PM  
Reviews history of children's health care in the United States; explores the impact of geography, environment, nutrition, clean water, as well as scientific discoveries of the late 19th and the early 20th centuries and the emergence of high technology care in middle and late 20th century. Does America provide children the best possible health care available? Compares United States epidemiology with that of other developed and developing nations. Explores how child health delivery is financed.

Freshman Seminar 24P  
Getting to Know Charles Darwin (128119)  
William Friedman  
2015 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 12  
Schedule:  W 0300 PM - 0559 PM  
We will read a selection of Darwin's publications, as well as his private correspondence, paying close attention to...
the man behind the science as revealed by his writings. We will get to know Darwin, the avid breeder of pigeons, lover of barnacles, devoted father and husband, gifted correspondent and tactician, and remarkable backyard scientist. Together, the class will reproduce ten of Darwin’s classic Down House experiments and observations that were central to his case for natural selection and evolution.

**Course Notes:**
Required field trips to the Arnold Arboretum of Harvard University, the Museum of Comparative Zoology, and a local pigeon fancier will be included.

**Requirements:**
Course open to Freshman Students Only

**Biology of Symbiosis: Living Together Can Be Fun! (110305)**

*Colleen Cavanaugh*

2015 Fall (4 Credits)  

**Schedule:**  
W 0200 PM - 0459 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
12

This course examines the remarkable diversity of symbiotic associations on Earth, their ecology and evolution, and their roles in human health and disease, agriculture, and biotechnology. Symbioses - "living together" - with microbes are ubiquitous in nature, ranging from lichens to the human microbiome. Symbiosis drives evolution, resulting in "new organisms" and charges us to think about biodiversity on a new level. In this freshman seminar, microbial symbioses with animals (including humans), plants, fungi, protists will be discussed, complemented by microscopy and field trips to local environs including Boston Harbor Islands, the New England Aquarium, and your own microbiome.

**Class Notes:**  
W., 2–4 with occasional meetings until 5 pm for trips or projects

**Requirements:**
Course open to Freshman Students Only

**How Did I Get Here? Appreciating "Normal" Child Development (128122)**

*Laura Prager*

2016 Spring (4 Credits)  

**Schedule:**  
T 0400 PM - 0559 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
n/a

How do we conceptualize "normal" growth and development? In this seminar, we will examine stages of child
development from many vantage points: neurobiological, physical, cultural, and psychological. Readings will include classic papers on development, textbook chapters that provide overviews of specific developmental stages, recently published research articles on brain development and genetic inheritance, selected contemporary children's and young adult literature, personal memoirs, and short stories written about childhood. We will also examine clips from contemporary films. Assignments will consist of three short response papers and a longer final paper. There are no prerequisites for this course.

You Are What You Eat (120746)

*Karin Michels*

2015 Fall (4 Credits)

**Schedule:** M 0400 PM - 0629 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 15

What does food do to our bodies? What does a healthy diet entail? Explores and critically evaluates diet recommendations and knowledge about the role of diet in maintaining health. Discusses the obesity epidemic, with a focus on childhood obesity and the role of school lunch programs. Explores local resources including Harvard Community Gardens and Food Literacy Program and how meals are prepared at the Harvard University Dining Services. Discusses genetically modified foods and mindful cooking and eating. Will review the book "Eat, drink, and be healthy". Hands-on experience in nutrition education.

Building a Living Cell One Brick at a Time (108555)

*Alain Viel*

2015 Fall (4 Credits)

**Schedule:** W 0230 PM - 0529 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 14

Synthetic biology is an emerging multi-disciplinary field of research aimed at developing solutions to problems impacting our individual lives and ultimately our long-term survival as a species. We need to find alternative and renewable sources of energy and food, new ways to process and recycle limited resources, and tools to detect and address environmental pollutants. These and other challenges can be addressed by the development of microorganisms re-engineered to perform new functions. In this "hands-on" laboratory course students will design experiments and build and then test synthetic biological systems. Additionally, students will present and discuss
selected topics in synthetic biology.

Neurotoxicology: Biological Effects of Environmental Poisons (120755)

*S Counter*

2015 Fall (4 Credits)  

**Schedule:**  

W 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a

Explores wide range of environmental and man-made neurotoxic substances and effects on human and animal populations. Attention to pediatric exposure to neurotoxic agents and associated neurodevelopmental disabilities, as well as neurobehavioral and immunological changes. Examines impact of lead and mercury poisoning, PCBs. Investigates neurophysiology and neurochemistry of a number of other neurotoxins, including arsenic, tetrodotoxin, saxitoxin, botulinum, curare, cocaine, and "nerve gas." What dangers do these toxins pose? What can or should be done to prevent exposure?

**Course Notes:** This course welcomes science and non-science concentrators.

**Recommended Prep:** Some background in high school biological and physical sciences is useful and preferred.

Understanding Emotions (108574)

*Matthew Leeds*

2015 Fall (4 Credits)  

**Schedule:**  

R 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

Large and small, simple and complex, self-evident and confusing, emotions in all their variety are a fundamental part of life. But just what are emotions? Are they the same in all cultures? What, if any, functions do they serve? Can we control our emotions? What role do they play in development, personality, relationships and well-being? What effects can they have on physical health? And do they present special challenges to scientific study? This seminar will take up these and other fundamental questions, and will discuss methods used to study emotion and the current state of knowledge about human emotion.
**Freshman Seminar 25W**
Responsibility, the Brain, and Behavior (120969)

*Ronald Schouten*

2015 Fall (4 Credits)

**Schedule:** T 0700 PM - 0859 PM

**Instructor Permissions:** Instructor
**Enrollment Cap:** 11

Explores philosophical and legal bases of the concept of individual responsibility as applied in the criminal justice system. Examines how forensic mental health professionals assess an individual's mental state at time of an alleged criminal act, the legal standards applied, and the social and political forces that help shape the legal decision. Considers the insanity defense; examines modern concepts of the biological basis of behavioral disorders and their relationship to existing standards of criminal responsibility.

**Course Notes:** The seminar may include a required trip outside of class time to Bridgewater State Hospital, Massachusetts's maximum security forensic hospital. Transportation will be provided free of charge.

**Recommended Prep:** There are no prerequisites, but an interest in law, psychology, or related fields would be advantageous.

**Requirements:** Course open to Freshman Students Only

**Freshman Seminar 25X**
Human Brain in Health and Disease: A Neurologist's Perspective (108257)

*Thomas Byrne*

2015 Fall (4 Credits)

**Schedule:** T 0700 PM - 0859 PM

**Instructor Permissions:** Instructor
**Enrollment Cap:** 15

Brain function serves as the basis for how we make rational and irrational decisions, learn to read or not (dyslexia), learn and remember or not (amnesia), empathize and understand the perspective of another or not (autism). The mind is shaped by the interaction of the brain and environment. Our understanding of the brain enables us to attempt to modify the environment to enhance the mind. This course will look at these issues in individuals with normal brain function and those with neurological disorders.

**Requirements:** Course open to Freshman Students Only
Freshman Seminar  26F

Dreams: Our Mind by Night (107340)

Deirdre Barrett

2015 Fall (4 Credits) Schedule: T 0300 PM - 0529 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This course examines dreams with an emphasis on their relation to the creative process and problem solving. It draws on psychology predominantly-neurophysiology, clinical, and personality research while also including perspectives from history, religion, art, literature, and anthropology. We'll visit a sleep laboratory and a dream-artist's studio. Students will keep a dream journal, and engage in exercises to improve dream recall, influence content toward lucidity and other goals, and to interpret your dreams. Students will write a term paper on a dream-related topic of their choice.

Requirements: Course open to Freshman Students Only

Freshman Seminar  26J

The Universe's Hidden Dimensions (121549)

Lisa Randall

2016 Spring (4 Credits) Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Based loosely on book, Warped Passages, considers revolutionary developments in Physics in early 20th century: quantum mechanics and general relativity; investigates key concepts which separated these developments from the physical theories which previously existed. Topics: particle physics, supersymmetry, string theory, and theories of extra dimensions of space. We will consider the motivations underlying these theories, their current status, and how we might hope to test some of the underlying ideas in the near future.

Class Notes: Lisa Randall (Department of Physics)

Requirements: Course open to Freshman Students Only
Freshman Seminar 26V
Blood: From Gory to Glory (125286)
David Scadden
2015 Fall (4 Credits) Schedule: M 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: 10
Humans have long understood that the blood flowing in their veins was imperative to their health and well-being. This course will examine the history, attitudes and beliefs surrounding blood. We will study human beliefs about blood and its uses in cultural beliefs and ceremonies. We will examine the science associated with blood: the production and the function of blood in the body, ideas of blood regarding medicine, healing, blood-related illnesses, biotechnology, nanotechnology and stem cell research.

The Biology and Science of Cancer and Its Treatments: From Empiric to Scientific to Humanistic (125960)
George Demetri
2016 Spring (4 Credits) Schedule: W 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
"Cancer" represents hundreds of different diseases with a wide variety of causative mechanisms. We will study the biology of cancer and what makes a normal cell become a cancer one, delving into acquired and inherited genetic abnormalities and effects of environmental factors, such as nutrition, radiation, and tobacco. Current approaches to cancer will be discussed from prevention and early detection to treatment of survivorship.

What is Life? (156181)
Guido Guidotti
2015 Fall (4 Credits) Schedule: R 0230 PM - 0429 PM
Instructor Permissions: Instructor Enrollment Cap: 15
This seminar considers the conditions of a cell necessary to support life. The proposal is to find a definition for a
living system using information and principles of biology, chemistry and physics to characterize some central properties of living cells, like energy and material uptake and use, cellular crowding, diffusion and molecular interactions, homeostasis and growth.

Global Health: Comparative Analysis of Healthcare Delivery Systems (108829)

_Sanjay Saini_  
_Garry Choy_

2015 Fall (4 Credits)  
**Schedule:** M 0200 PM - 0459 PM

Instructor Permissions: Instructor  
Enrollment Cap: 15

This interactive seminar will allow students to obtain greater understanding of global health issues through critical comparative analysis of healthcare systems of selected countries from the developed, emerging and developing world. Weekly sessions will comprise of student-led discussion that revolves around an important healthcare issue. Domain expert guest speakers will be included allowing students to network with thought leaders. Student will explore in-depth a topic of their choice and prepare a manuscript for publication in a peer-reviewed medical journal.

**Freshman Seminar  27J**

Prediction: From Ancient Omens to Modern Computer Simulations (156929)

_Alyssa Goodman_

2015 Fall (4 Credits)  
**Schedule:** W 0230 PM - 0429 PM

Instructor Permissions: Instructor  
Enrollment Cap: 12

We will discuss the variety of approaches humans have taken to predicting their own future. Early weeks will focus on Omens, Oracles, Religion and Prophecy. Next, we will move on to the so-called Scientific Revolution, exemplified by the work of Galileo, and the Age of Exploration, enabled by John Harrison’s solution to finding longitude at sea. The last several weeks of the seminar will focus on predictive work in epidemiology, finance, and climate, and ultimately on work about the Universe’s future. Students will conclude with a discussion of how computer models of health/wealth/climate combine to predict our future.
Freshman Seminar  30C

Fictions of War (159725)

Nancy Cott

2015 Fall (4 Credits)  Schedule:  T 0200 PM - 0359 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

This seminar will focus on landmark works of fiction (in English) that grapple with individual experiences and social consequences of major wars involving the U.S. Military confrontations are immensely destructive but, as human enterprises, they also produce culture. The seminar will investigate how modern soldiers have represented the aims and outcomes of the field of war in fiction. More inclusively, it will examine both the intentional and unintentional cultural work of war. The seminar's title is deliberately ambiguous, also allowing for the implication that nations construct fictions about aims or enemies in order to galvanize their people to wage war.

Waste: Contemporary Fictions of Abjection (159721)

Ju Yon Kim

2015 Fall (4 Credits)  Schedule:  M 0300 PM - 0459 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

This seminar will examine contemporary novels concerned with the relationship between the environmental and psychic management of material waste, and the formation of outcast communities. We will explore how and why these novels link trash and decay with processes of social exclusion. By studying novels alongside related films, images, and essays, we will consider the place of waste in contemporary culture and ask what fiction, in particular, can contribute to discussions about trash, ecological disasters, and marginalized communities.

Freshman Seminar   30F
Taxi Driver and/in American Film History (159724)
Richard Pena
2015 Fall (4 Credits) Schedule: W 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: 12
A key work of the modern American cinema, Martin Scorsese's TAXI DRIVER will be closely examined from a variety of approaches: in terms of film history, both US and international; in relation to genre; with regards to the historical moment of its release, especially the end of the Vietnam War; in connection with parallel movements in the visual arts, such as photo-realism. The seminar will work together to prepare a highly detailed, shot-by-shot breakdown and analysis of the film.

Digging Up the Past: Harvard and Egyptian Archaeology (108261)
Peter Der Manuelian
2015 Fall (4 Credits) Schedule: T 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: 12
Explores the spectacular history and discoveries of the 40-year Harvard-MFA (Museum of Fine Arts, Boston) Expedition to 23 sites in Egypt and Nubia (1905-1947). Topics include the early development of responsible archaeological method, famous finds and explorers, Western colonialism/imperialism in Egypt, early Harvard and MFA history, archival research, and the current debate on repatriation of artifacts. Field trips to museum collections, and exciting new digital technologies (such as 3D Giza Pyramids in Harvard's Visualization Center) applied to early 20th century archaeology.

Living on the edge: imagining the unknown in ancient ethnography (159726)
Naomi Weiss
2015 Fall (4 Credits) Schedule: W 0300 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: 12
This course explores how ancient Greeks and Romans thought about the edges of the known world. We will examine ancient accounts and images of people, cultural practices, and geography at the margins of western experience, and try to understand how such stories developed. Topics include maps, ethnocentrism, Orientalism, Roman triumphal processions, and science fiction. Our discussions will regularly draw on comparable ways of constructing the unknown in modern American culture.

Freshman Seminar  30Q

Death and Immortality (110425)

Cheryl Chen

2015 Fall (4 Credits) Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor Enrollment Cap: 12

In this course, we will discuss philosophical questions about death and immortality. What is death? Is there a moral difference between "brain death" and the irreversible loss of consciousness? Is the classification of a person as dead a moral judgment, or is it an entirely scientific matter? Is death a misfortune to the person who dies? How can death be a misfortune if you are no longer around to experience that misfortune? Is it possible to survive after death? What does it mean for you to survive after your death? Is there such a thing as an immaterial soul distinct from your body? Is immortality something you should want in the first place? Even if you do not live forever, is it nevertheless important that humanity continues to exist after your death? By discussing these questions about death, we will hopefully gain insight about the importance and meaning of life.

Freshman Seminar  30R

Performing French Theater Across Time and Media (159727)

Sylvaine Guyot

2015 Fall (4 Credits) Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This seminar aims to help students, including those who are genuine novices in acting, to understand and experience theater as a form of physical expression that evolve as aesthetic and social contexts change across time. Readings include the most famous French playwrights of both the early modern age (Molière, Corneille, Racine) and the later twentieth / early twenty-first centuries. Special emphasis is paid the transformative power of performance and the development of the students’ acting skills through practical workshops and videos of recent
productions. The final project consists of an excerpt to be performed in French or bilingual format.

Course Notes: Readings, written assignments, oral presentation and discussions may be in English or French. The final project consists of an excerpt to be performed in French or bilingual format.

Freshman Seminar  30U

Multiethnic American Short Stories: Tales We Tell Ourselves (156930)

*Tessa Lowinske Desmond*

2015 Fall (4 Credits)  Schedule:  F 1000 AM - 1159 AM

Instructor Permissions: Instructor  Enrollment Cap:  12

Taken up by many ethnic groups in America, the short story has been used to convey experiences with immigration and assimilation, discrimination and oppression, generational divides, and interactions across difference. Examination of such short stories opens up readers to a deeper understanding of America's multiethnic landscape. Together we will examine historical context for the short story's ongoing role in American culture, its relationship with publishing houses and critics, as well as its adaptability to new technologies. Reading Toni Morrison, Jhumpa Lahiri, Junot Diaz, and Sherman Alexie, among others, we will consider ties that both link and divide our multiethnic world.

Freshman Seminar  31C

American Moderns and Photography (159735)

*John Stauffer*

2015 Fall (4 Credits)  Schedule:  W 0200 PM - 0359 PM

Instructor Permissions: Instructor  Enrollment Cap:  12

This course explores Modern American fiction from Du Bois and Stein through Anderson, Toomer, Cather, Hemingway, Fitzgerald, Faulkner and Dos Passos. We focus on form and structure in relation to meaning and subject matter (love, sex, family, community, race, war, bureaucracy, and alienation), and the lines of influence these writers had on each other. Each of these writers was greatly influenced by photography, and we examine the degree to which the form and structure of their fiction was inspired by Alfred Stieglitz' Camera Work and similar art books and exhibitions.
Freshman Seminar  31D
Nietzsche's Moral and Political Philosophy (159736)

Mathias Risse
2015 Fall (4 Credits)  Schedule:  W 0700 PM - 0859 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

We explore Nietzsche's moral and political philosophy with emphasis on the themes in his best-known work, The Genealogy of Morality. However, we also read several other of Nietzsche's works, and do so chronologically (except that we begin with his auto-biography, Ecce Homo, which Nietzsche wrote briefly before his mental collapse). We do not read any secondary literature, though the instructor will recommend such literature as appropriate. The point is to become familiar with Nietzsche's writings themselves. Nietzsche addresses some of the big questions of human existence in a profoundly searching but often disturbing manner that continues to resonate with many.

Requirements:  Course open to Freshman Students Only

Freshman Seminar  31E
Money and Other Virtual Realities (109471)

Shigehisa Kuriyama
2015 Fall (4 Credits)  Schedule:  M 0400 PM - 0559 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

What is money? Its practical importance is plain, but its essence is a mystery. In different places, at different times, it has assumed such wildly varying forms as shells and paper notes, cigarettes and computer data-a fact that reminds us that money isn't any fixed, concrete thing, a tangible object in the world, but rather a sort of virtual reality, something whose presence and power depends entirely on human perception. What makes money seem so powerful and real? We will study this puzzle by exploring how various other domains-such as painting, digital media, and magic performance-make their illusions seem so compelling. The class will involve regular practical activities: we will not only read about and discuss the theory of how virtual realities like money work, but also experiment with various hands-on applications of theory. These experiments will range from exercises in verbal and non-verbal persuasion, to the creative use of digital media for convincing presentations, and the design of mystifying magic tricks. No prior knowledge of economics, or experience with media or magic is required; the only prerequisites are curiosity and a spirit of adventure.

Freshman Seminar  31G
The Pleasures of Japanese Poetry: Reading, Writing, and Translation (156179)

Edwin Cranston
2015 Fall (4 Credits)
Schedule: W 0200 PM - 0459 PM
Instructor Permissions: Instructor
Enrollment Cap: 12

Reads classical waka, its modern descendant the tanka, and examples of linked verse (renga) and modern poems in free and prose-poem forms. (And haiku too!) Focuses on themes such as desire, renunciation, time, memory, war, death, sorrow, and receptivity. Students keep a diary of their encounters with the new poetry, practice the art of sequencing, and make their own translations based on literal renderings and explanations of Japanese originals.

Happiness (159737)

Susanna Rinard
2015 Fall (4 Credits)
Schedule: W 0300 PM - 0459 PM
Instructor Permissions: Instructor
Enrollment Cap: 12

What is happiness? To what extent is our own happiness under our control, and what are the causes and consequences of happiness? Is happiness important for living a good and successful life? How does the pursuit of personal happiness interact with our obligations to others? In this seminar we will work toward answering these and other questions by analyzing recent work from both philosophy and psychology. Our goal is to construct a unified picture of happiness that incorporates what is best from both disciplines but appropriately takes into account various challenges that each has posed for the other.

Freshman Seminar  31L
Gregorian Chant (159738)

Thomas F. Kelly

2015 Fall (4 Credits)  Schedule:  R 0300 PM - 0529 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

Introduction to medieval chant. Medieval Latin church music, usually called Gregorian Chant, is the oldest surviving repertory of music in western culture, and is still sung today. We will consider the function of chant in medieval society, and the role of chant in ritual and liturgy. Members of the seminar will be expected to sing, but no previous experience or knowledge of notation is required. We will examine manuscript in the Houghton Library. We will study the musical aspects of a few pieces in great detail, and will come to know the great variety and artistry of this timeless repertory.

Beauty and Christianity (121903)

Robert Kiely

2015 Fall (4 Credits)  Schedule:  W 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12
Jesus has inspired great works of art, literature, and music, but Christians have not always agreed on the function of beauty. This seminar will consider Christian aesthetics, art (Italian Renaissance), and music (Bach, Messiaen, and spirituals), but the focus will be on literary works of St. Francis, Dante, Herbert, Donne, Hopkins, Hawthorne, Melville, C.S. Lewis, and O'Connor. The abiding question will be: In what ways does aesthetic form-- beauty-- enhance, qualify, complicate, or obscure the gospel?

Trials from Ancient Athens (109474)

Adriaan Lanni

2015 Fall (4 Credits) Schedule: T 0100 PM - 0259 PM

Instructor Permissions: Instructor Enrollment Cap: 12

In classical Athens, litigants represented themselves before hundreds of jurors who rendered verdicts without instruction from a judge. We will read surviving Athenian court speeches involving homicide, assault, adultery, prostitution, slander, treason, citizenship, and commerce, as well as Plato's account of Socrates' defense speech. Taught by a law professor, the focus will be on comparing ancient and modern approaches to problems faced by all legal systems and on evaluating Athens' distinctively amateur legal system. Students will be expected to write one 5-page paper, to contribute to and lead one class discussion, and to participate in a "mock trial" of an Athenian homicide case.

Course Notes: Prior knowledge of ancient history or ancient languages is not required; all readings are in translation and the seminar is designed to be of interest to those without a background in the ancient world.

Guilty until Proven Innocent. Finding Justice and Truth in the Middle Ages (159739)

Racha Kirakosian

2016 Spring (4 Credits) Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Diving into the world of medieval law and rituality, students will discover the "Real Game of Thrones". We are going to explore concepts of justice and law, encompassing the first written laws from the time of the so-called Barbarian Invasions, Church law, and reminiscences of pre-Christian rituals. The place of the divine in search of truth and
justice, of women in a male-dominated culture, of Jews in a world ruled by Christian sovereigns will be analyzed in particular. Students will work with primary sources in order to elucidate the ways in which truth and justice were searched and established.

The Christian Bible Then and Now: Formations and Debates (159734)

Laura Nasrallah

2015 Fall (4 Credits) Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor Enrollment Cap: 12

Politicians, writers, religious leaders, and others today make arguments using the Bible, whether leading with the clause "The Bible says . . . " or through allusions to or quotations of the Bible. Together in this seminar we'll learn and practice the analytical tools for addressing such claims. The seminar explores ancient and modern formations and uses of the Christian Bible, including ancient processes of canonization. It also explores how the Bible has been mobilized recently in the U.S. to address issues of sex and sexuality, economics, ecology, race, and slavery.

We Are the World (159796)

Samuel Moyn

2016 Spring (4 Credits) Schedule: R 0100 PM - 0259 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

How did we come to think that everybody living everywhere might count as our fellow citizens? Since 1989, a long-term canon in philosophy has emerged, casting "cosmopolitanism" as long-brewing since the time of the Greeks, running through Immanuel Kant, into our own day, as a new theory called "global justice" prevailed. We will revisit this canon as intellectual historians, attempting to reconcile it with how sudden the turn to global justice in our own age of globalization and human rights has been, and how the specter of power has always haunted the most grandiose moral visions.

Requirements: Course open to Freshman Students Only
Freshman Seminar  32F

German Literature and Philosophy (159797)

John T. Hamilton

2015 Fall (4 Credits)  Schedule:  T 0200 PM - 0359 PM

Instructor Permissions:  Instructor  Enrollment Cap:  12

In this seminar students are introduced to exemplary works of philosophy and literature in the German tradition across 200 years of revolutions, wars, and social crises. Focus is on the significance of human life, desire, and knowledge, on the limits of abstraction and the infinite nuances of individual love, passion and anxiety. Participants will acquire skills in literary interpretation and philosophical argumentation, while becoming intimately familiar with shifting historical, social and cultural contexts. Above all, the seminar will teach students how to formulate innovative, probing, and fruitful questions, and thereby impart a capacity to engage critically with masterful texts.

Course Notes: Open to Freshmen only.

The Art of Storytelling (122447)

Deborah Foster

2016 Spring (4 Credits)  
Schedule:  
T 0200 PM - 0359 PM

Instructor Permissions:  
Instructor   
Enrollment Cap:  
n/a

People everywhere tell stories to express both the verities and contradictions found in experiences of everyday life. Based on storytelling traditions, a narrator shapes the story to reflect his or her own intentions, making it personally expressive as well as publicly meaningful to a particular audience. This seminar examines the nature of storytelling, its enduring appeal, and its ability to adapt to multiple technologies (print, film, internet). Participants engage in the storytelling process itself.

Borges, Garcia Marquez, Bolano and Other Classics of Modern Latin American Literature (159836)

Mariano Siskind

2015 Fall (4 Credits)  
Schedule:  
T 0100 PM - 0259 PM

Instructor Permissions:  
Instructor   
Enrollment Cap:  
12
This course introduces students to some of the most important Latin American literary works produced during the twentieth century. We will explore the ways in which these novels, short-stories, essays and poems interrogate the historical traumas, political contexts and aesthetic potential of the region between 1920s and 1980s. We will shed light on their place in the historical and cultural formation of the literary canon, as well as on the concept of ‘classic’. The goal of this seminar is two-fold. On the one hand, it introduces students to the Latin American literary and critical tradition through some of the best and most interesting literary and critical works (each novel or grouping of short stories and poems are paired with an important critical essay that situates them historically and aesthetically). On the other, it provides them with the fundamental skills of literary analysis (close reading, conceptual and historical framing, continuities and discontinuities with the aesthetic tradition), and that is why I have selected a relatively small number of readings, in order to have time to work through them, discuss them and have some flexibility to extend the classes we dedicate to a given author when our discussions merit it.

Freshman Seminar  33D  

Drawing: Exploring a Visual Language (159886)  

*Katarina Burin*  

2015 Fall (4 Credits)  

Schedule: T 0200 PM - 0459 PM  

Instructor Permissions: Instructor  

Enrollment Cap: 12  

A studio course using the human figure as a model and subject to build the skills of drawing and expand students' visual vocabulary. Drawing from life will be the main focus for the first part of the semester, using the model as our guide to understand the rendering of space, depth, perspective and movement. Equal emphasis will be placed on enhancing our observational sensibilities and focusing technical development, as students work both collaboratively and independently on exercises to expand individual skill with intention and purpose. During the second half of the semester we will delve into the development of abstract and conceptual principles in relation to figurative work, including expanded notions of portraiture, working from photographs and incorporating sheer invention.

Freshman Seminar  33F  

Mind, Matter, Me: Map your way into Philosophy (159904)  

*Alison Simmons*  

*Parimal G. Patil*  

2015 Fall (4 Credits)  

Schedule: M 0300 PM - 0459 PM  

Instructor Permissions: Instructor  

Enrollment Cap: 12
Humans clearly have minds; we just as clearly have bodies. This raises many puzzles: Are mind and body two things or one? How are they related to each other and the person called me? In this course, we'll look at a range of arguments about how to understand mind-body-self relations. Deeply engaging these arguments requires the skills of close reading and argument analysis. To develop these skills, this course will teach Argument Mapping, which involves identifying the essential elements of an argument and constructing a visual map that conveys the argument’s structure at a glance.

**Freshman Seminar  33H**

Collecting the Past (160195)

*Adrian Staehli*

2015 Fall (4 Credits)  

**Schedule:** M 0400 PM - 0559 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

This seminar will explore historical practices of collecting and displaying Classical art in museums from the earliest periods through the Middle Ages and the Renaissance to most recent times, including the contemporary debate about cultural property and the acquisition policies of museums. The seminar will consider how various forms of collecting and archiving —such as collections of war booty in ancient Rome, cabinets of curiosities in the Renaissance, or modern art museums from the 18th century onwards—have shaped our knowledge and understanding of the past.

**Course Notes:** The seminar will include required field trips to museums in Boston and Cambridge, dates to be arranged. Transportation and entrance fees are provided free of charge.

The Chinese Language, Present and Past (160197)

*C.-T. James Huang*

2016 Spring (4 Credits)

**Schedule:** M 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a

This course offers an opportunity to learn about the Chinese language in ways that will be of use both to prospective Chinese language learners and to students curious about the structure, history, cultural traditions, and
social relevance of the language. Taking a partly hands-on approach, we will examine the fundamental principles that make up the sound system and govern the grammar of Mandarin, looking closely at its system of tones, its writing system, and the issues of Chinese as a heritage language. Looking deeper, we will see how the study of Chinese can contribute to understanding language as a central component of human cognition.

Freshman Seminar  34C

The Problem of Evil and the Nature of Human Freedom (160199)

Courtney Lamberth

2015 Fall (4 Credits)  

Schedule: W 0300 PM - 0529 PM

Instructor Permissions: Instructor  

Enrollment Cap: 12

Common sense seems to confirm the reality of evil. From the genocides of the 20th century to the homicides that fill our daily news, evil seems to be a category of ordinary language and experience. But what do we really mean when we use the word "evil" to describe a person, an action or an historical event? Why does the word pack an emotional punch that other terms do not? The term "evil" seems to point to an incomprehensible quality that marks the limits of human understanding and control. Theologians, philosophers and poets have long struggled with these limits, drawing on their deepest imaginative powers in writing about the meaning and consequences of evil. This course will consider key texts in Western philosophy, theology and other literary forms that have sought to frame the question and offer readers avenues for responding to the problem of evil.

Freshman Seminar  34D

Dead Cthulhu Waits Dreaming: H.P. Lovecraft and Mythology (160202)

James Russell

2015 Fall (4 Credits)  

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor  

Enrollment Cap: 12

H.P. Lovecraft, the American writer of science fiction, horror, and fantasy, created a cosmology, a mythology, and an alternative vision of life and reality so compelling that over the years some readers have come to believe that his invented Necronomicon is a real book (in the Widener stacks). Like his predecessor, Edgar Allan Poe, Lovecraft lived and died without recognition in his own country: American culture then as now valued practicality and social engagement. What is it, then, that captivates Lovecraftians? The seminar will explore the invention of personal mythologies, languages, and narratives of counter-realities by Lovecraft and other writers (including Poe, C.G. Jung,
Ursula Le Guin, Colin Wilson, and Philip K. Dick) as ways of individuation, and of resistance to conformity, through creative imagination.

**Freshman Seminar  34F**

The Folklore of Gaelic Scotland (160204)

*Natasha Sumner*

2015 Fall (4 Credits)  

Schedule: M 0230 PM - 0529 PM

Instructor Permissions: Instructor  

Enrollment Cap: 12

This course explores the 'treasure house' of Gaelic folklore recorded in the Highlands of Scotland since the nineteenth century. The international controversy over Macpherson's 'Ossian' poems in the 1760s prompted interest in the Scottish Gaelic folklore from which they were adapted. Folklorists have since documented a wealth of orally recorded material, including tales of ancient heroes (e.g. Finn McCool) and beliefs in malevolent fairies, seal-people, dangerous water-horses, the evil eye and second sight. As we explore these fascinating topics, we will take into account international scholarly approaches to folklore.

Course Notes:

No knowledge of Scottish Gaelic is required for this course. The seminar will also include 'an end-of-term 'ceilidh", a traditional social gathering often involving song, dance, and/or storytelling.

**Freshman Seminar  34H**

Is Knowledge Power? (160237)

*Julie Reuben*

2015 Fall (4 Credits)  

Schedule: T 0300 PM - 0559 PM

Instructor Permissions: Instructor  

Enrollment Cap: 12

The aphorism "knowledge is power" evokes menacing images, such as state surveillance or corporate ownership of personal information, and hopeful images, such as curing disease or controlling personal destiny. We hear contradictory messages that the internet and other new information tools are either freeing us or enslaving us. What then is the relation between knowledge and power? This course will examine this question through close study of three historical cases, each rich with source material and analytic accounts. In the final section of the course, students will select and analyze current issues that raise unresolved problems of knowledge and power.
You and Your Camera (108513)
Peter S. Pershan
2016 Spring (4 Credits)
Schedule: W 0400 PM - 0559 PM
Instructor Permissions: Instructor
Enrollment Cap: n/a

The goal of representing the 3-dimensional world on a 2-dimensional surface dates back at least as far as the approximately 30,000 year old cave drawings. For all of these past centuries there were relatively few people who could create realistic 2 dimensional images of the people and things that wanted preservation. Although photography has changed this there are still significant differences between the images that most people create and the photographs of our leading photographers. In this seminar we will discuss the artistic history, the nature of vision and the fundamental physics on which modern digital photography is based.

Course Notes: Arrangements for loaned cameras will be made for those that do not own one.

Recommended Prep: Ideally students should have a good high school physics course; however, individuals who are motivated to understand the science of photography should not have a problem with the material taught in the seminar. Similarly students should feel comfortable with high school algebra and trigonometry.

The Art of Noticing (108514)
Gordon Teskey
2015 Fall (4 Credits)
Schedule: T 0200 PM - 0359 PM
Instructor Permissions: Instructor
Enrollment Cap: 12

A seminar on aesthetics, or techniques for active noticing when writing about poetry, music and art. Derived from a Greek word for ‘perception,’ aesthetics in the eighteenth century changed from the philosophical investigation of perception to meditation on art, according to such general concepts as ‘the beautiful’ and ‘the sublime.’ This course returns aesthetics to the field of perception by attending to details one does not normally see and deciding which are important. In addition to classroom work, there will be visits to Harvard and Boston museums. Students will write essays and keep a journal.
Freshman Seminar 34T
Experimental Fiction (125969)
George Grabowicz
2015 Fall (4 Credits) Schedule: W 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 12
Experimentation in modern prose fiction as a challenge to formal conventions, to "content" and to society. Examines the role of the fantastic; play with narrative and perspective; stream-of-consciousness, fragmentation and collage; mixing of genres and modes; hypertextuality, intertextuality and parody; constraints (lipograms), and the intersection of prose, poetry and visual art. Focuses on the works of Kafka, Joyce, Gertrude Stein, Nabokov, Robbe-Grillet, Gombrowicz, Bartheleme, Pynchon, Calvino, Pavic, Matthews and Philips.

Freshman Seminar 34V
Broadway Musicals: History and Performance (156241)
Carol Oja
2015 Fall (4 Credits) Schedule: T 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: 12
This seminar will explore a core group of Broadway musicals. Historical, musical, and theatrical discussions will be paired with student performances and staging of individual scenes (done under the guidance of Allegra Libonati from the A.R.T. Institute). The seminar will touch on signal moments over the course of the "Golden Age" of the musical, stretching up to the present day: Oklahoma! (1943), South Pacific (1949), West Side Story (1957), A Chorus Line (1975), Wicked (2003), and In the Heights (2008). The class will attend a performance of Stephen Sondheim's A Little Night Music at Boston's Huntington Theatre. Blending historical study and hands-on practice, this seminar aims to offer a wide range of perspectives on the interpretation and performance of Broadway musicals.

Course Notes: Student musicians and actors are welcome in the course, as are students who love to watch shows but not necessarily perform in them. Ability to read music is desirable but not required.

Requirements: Course open to Freshman Students Only

Explores use and misuse of linguistic evidence. The 19th-century identification of the Indo-European language family misled some intellectuals to posit the now rejected idea of a genetically and culturally superior Aryan "race." Linguistic evidence still plays an important role in studies of the past. What does the fact that languages are related tell us about their speakers? How can genuine cases of linguistic borrowing or "influence" be distinguished from resemblances that come about through pure chance?

</tbody>
</table>

This course will offer a critical, close-reading approach and a creative art-making approach to exploring ways of combining sound and moving image. The first few weeks will involve analysis and discussion of uses of music/sound in excerpts from a variety of movies and TV series episodes and mastering skills for working with ProTools, a digital audio workstation system that can incorporate video. As skills with Pro Tools develop emphasis will shift to composition exercises that experiment with combining sound and image. Since all students will be given the same assignments we will have the opportunity of testing and discussing various solutions. The seminar will accept students with and without compositional training and the ability to notate music. Sound will be composed in various ways, many of which will not involve conventional music notation. All students will learn to use high quality field recorders to gather sound materials that can then be sculpted with Pro Tools. The final project will be the production of a sound track to an assigned short film (5-10 minutes) and a public screening.

Course Notes:  

The ability to read musical notation is not a pre-requisite.

The Art and Craft of Acting (126838)

Remo Airaldi

2015 Fall (4 Credits)  

**Schedule:**  
M 0400 PM - 0559 PM

Instructor Permissions: Instructor  

Enrollment Cap: 12

Provides an introduction to acting by combining elements of a discussion seminar with exercises, improvisations and performance activities. Uses improvisation to improve group/ensemble dynamics, minimize habitual behaviors and to develop characters. Explores a range of acting techniques designed to give students greater access to their creativity, imagination and emotional life. In the later part of the term we will work on monologues. Students also attend and critique productions at the Loeb Drama Center and other theaters in the Boston area.

**Course Notes:**  
Students will be required to attend theater performances (dates TBD) during the course of the term. There will be no charge to the student.

**Requirements:**  
Course open to Freshman Students Only

Comparative Historical Mythology (109498)

Michael Witzel

2016 Spring (4 Credits)  

**Schedule:**  
R 0400 PM - 0559 PM

Instructor Permissions: Instructor  

Enrollment Cap: n/a

Deals with an innovative approach to comparative mythology by incorporating an historical approach, not by the commonly assumed archetypes or diffusion. Working backwards from our earliest written sources (Egypt, etc.), successively earlier stages are detected through repeated reconstructions. Recent developments in genetics, archaeology, linguistics support the proposed historical model that tentatively reaches back to the "African Eve." Testing the proposal offers a wide scope for students' participation and research in texts and in the sciences. Open to Freshmen only.

Horror in Literature and Movies: Cultural, Psychological, and Scientific Aspects of the Horror Genre (156293)

*Steven Schlozman*

2015 Fall (4 Credits)  
**Schedule:** T 0700 PM - 0859 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

This seminar involves defining fictional horror and also creating horror stories. As such, the course is both a discussion of horror and an introduction to creative horror writing. We will utilize literature from film theorists, literary critics, cultural psychologists, neuroscientists, and the popular press. We will also examine seminal films and written stories. The instructor is both a medical school professor and a professional horror writer. Through techniques that have been employed at writing workshops and panel discussions, we will develop our own sense of what constitutes horror and at the same time hone our creative writing skills.

Muslim Voices in Contemporary World Literatures (156178)

*Ali S. Asani*

2015 Fall (4 Credits)  
**Schedule:** T 0700 PM - 0929 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

What do Muslims think of acts of terrorism committed in the name of Islam, the mixing of religion with politics, the status and rights of women, the hegemony of the "West"? This seminar investigates the viewpoints of prominent Muslim writers on these and other "hot button" issues as reflected in novels, short stories and poetry from different parts of the world. Explores a range of issues facing Muslim communities in various parts of the world by examining the impact of colonialism, nationalism, globalization and politicization of Islam on the search for a modern Islamic identity. Readings of Muslim authors from the Middle East, sub-Saharan Africa, South Asia, Europe and America.

**Course Notes:** No prior knowledge of Islam required. Assignments include compiling a portfolio of creative responses to the weekly readings using different media.

What is technology? How do we understand its relevance to ancient societies? This course introduces the concept of technology, especially as it is approached by archaeologists, using ancient China as a case study. Through hands on experiences, the practices involved in different technologies are introduced, and the historical contexts of
their development in ancient China are considered through readings that are discussed in class. The course covers
stone tool production, agriculture, animal domestication and use, divination, metallurgy, pottery manufacture and
more. Students will be involved in the creation of a museum exhibit based on artifacts from Harvard Museums.

The Transformation of Marketing (160713)
Elie Ofeh
2016 Spring (4 Credits) Schedule: T 0300 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
Marketing is the process by which an organization creates value for customers and extracts a share of that value for
the organization. The seminar will cover the basics of marketing management and explore how the advent of new
digital technologies, the increasingly global nature of business, and recent societal trends are impacting the
marketing field. The seminar draws upon concepts in psychology, sociology and economics and infuses many
eamples to illustrate relevant issues. Each meeting covers a specific topic, with pre-readings forming the basis for
in-class discussion. There will be two short assignments during the term and one final paper.

Freshman Seminar  40E
Law and Society through the Cinematic Frame (160785)
Ofrin Livitan
2016 Spring (4 Credits) Schedule: M 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
In this seminar we will explore the interaction of law and society using the lens of film. The cinematic experience has
become a key site through which the public understanding of law is produced, debated and influenced. Driven first
and foremost by market and audience considerations, law related films often inject drama, contentious dimensions
and even misrepresentations into the portrayal of real events. Nonetheless, by raising awareness about legal
themes that pervade the plot, these films offer valuable insights toward discovering social scientific perspectives on
the manner in which law functions in everyday life. Hence, the seminar will not focus on legal doctrine or teach you
the fundamentals of the legal profession. Rather, using films as a framework for discussion, we will study law's
working in relations to the social, political, economic and cultural environments in which it operates. Central thematic
topics to be discussed include: the relationship between law, justice and morality; how does law intervenes in social
relations and whether it is over-utilized as part of these relations; the dynamics between law and social change; is
access to the legal process equal to everyone; and the function of law in deeply divided societies. Throughout the
semester film viewing will occur outside class as part of your weekly preparation for the seminar. However, we will
dedicate one class as a field trip to watch a law-related film together and analyze its themes through the sociolegal
perspective.

Sex, Terror, and Technology: The Constitutional Law of Love and Hate (159741)

*Laurence H. Tribe*

2016 Spring (4 Credits)  

**Schedule:**  
W 0300 PM - 0459 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
n/a

All of us live in a world that would be unrecognizable to those who wrote the Constitution. Nearly everything—from
the technology we use to communicate and connect with (or spy on) one another to society's attitudes towards sex
and speech—has changed, but the Constitution still governs. Over time, new generations of lawyers, judges, and
activists have read stronger conceptions of privacy, liberty, equality and personal dignity into this enduring
document. Each change has triggered new controversy. This seminar will explore how constitutional law copes
with—at times resisting and at times facilitating—dramatic social and cultural transformations.

We will consider a number of important questions in the field of development economics: Why are some countries
so rich and others so poor? What factors have determined which countries prosper? Can these factors be changed
with specific economic policies? If so, what are they and how are they best implemented? Are there country-specific
characteristics that determine economic fate? Or, is prosperity just the result of luck? Does the enjoyment of the
rich somehow depend on the continuing suffering of the poor?
Freshman Seminar 40I

Defining Crime in the History and Literature of England, 1550-1900 (122068)

2016 Spring (1 Credits)  

Schedule:  

Instructor Permissions: Instructor  

Enrollment Cap: 12  

A vibrant collection of rogues and robbers, penitent sinners and resolute recidivists occupied the English popular imagination between 1550 and 1900. Surveys the various ways in which English people defined, experienced, and wrote about crime and criminality. Through original texts and scholarly studies, enlarges investigation to the study of notions of community, state authority, guilt, and gender as well as to the history of the development of genres of media and literary expression.

The Supreme Court in U.S. History (123660)

Richard Fallon  

2016 Spring (4 Credits)  

Schedule: T 0400 PM - 0559 PM  

Instructor Permissions: Instructor  

Enrollment Cap: n/a  

Often described as the world's most powerful court, the US Supreme Court has not always enjoyed high prestige or unquestioned authority. The Court's significance has waxed and occasionally waned, with the variations typically depending on surrounding currents in the nation's social and political history. Examines the history of the Court from the nation's founding to the present. Highlights relation between constitutional law and ordinary politics, and the ways in which they influence one another.

Freshman Seminar   40K
America’s $3 Trillion Challenge: Health Care Access and Productivity in the Health Reform Era (109334)

Alan Garber
2016 Spring (4 Credits) Schedule: W 0300 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

Health care in the United States is often criticized for its expense, ineffectiveness, and inequity. Every policy solution for increasing access to care faces the challenge of dealing with its costs. Because per capita annual health expenditures exceed 8,000 dollars, the subsidies needed to support health insurance expansions are large and controversial. The fundamental challenge to improving health and health care is to rationalize expenditures by improving the efficiency or productivity of care. This seminar explores barriers to health care productivity in the U.S, along with potential approaches to enhance the value of care.

Recommended Prep: Background in microeconomics at the level of first-semester Economics 10 is required. Knowledge of AP-level statistics is desirable. The course is relevant to anyone with an interest in applied economics, public policy, health care, or public health.

Requirements: Course open to Freshman Students Only

Free Speech (110427)

Sanford Ungar
2015 Fall (4 Credits) Schedule: R 0300 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: 12

In this age of rapid globalization and heightened cross-cultural contacts, nations struggle to reaffirm their identities and values. In the United States, one of the most precious values is free speech, embedded in the First Amendment to the Constitution and regarded as a keystone of American democracy. But arguments over the boundaries of free speech have become intense, especially in the era of electronic communication. This seminar will examine the dialogue taking place within the United States and around the world on free speech issues - sometimes civil, but often a political or cultural confrontation that turns violent.

Freshman Seminar   40R
Personal Agency and Social Networks (159743)
The study of social networks is vast, involving everything from the structure of ties among Facebook friends to the process through which people decide whom to ask for help. In spite of the popularity of social media and recent attention to network data by businesses, the study of networks has a long-standing history, with important contributions by anthropologists, sociologists, and psychologists dating back to as early as the 1930s. This course examines two questions in that vast body of work—how people's behavior is affected by their networks and how they make decisions about how to use their networks.

The American Death Penalty: Morality, Law, and Politics (109475)

*Carol Steiker*

2015 Fall (4 Credits)  
**Schedule:** T 0400 PM - 0559 PM

**Instructor Permissions:**  
**Instructor**  
**Enrollment Cap:** n/a

This seminar will address the American death penalty, now an anomalous practice among Western democracies. We will explore the controversies that swirl around the institution of capital punishment in the distinct but related contexts of morality, law, and politics. How have the abstract arguments of moral philosophers informed American constitutional interpretations of commitments to "due process," "equal protection," and protection against "cruel and unusual punishments"? How have the arguments of moral philosophers and the interpretations of the Supreme Court affected the political sphere? What is the future of the anomalous American death penalty?

Freshman Seminar  41H

Islam in Black America (159831)

Marla Frederick

2015 Fall (4 Credits)  
Schedule:  
W 0200 PM - 0359 PM

Instructor Permissions:  
Instructor

Enrollment Cap:  
n/a

Much of the study of black religion in the United States has focused on its Christian roots. And, while the predominant impulse of black religious expression in the American context came from Christian worshippers, Muslim adherents were among those first brought to America's shores under the force and violence of slavery. This course explores the history of Islam among African Americans from the ante-bellum period through the present. It looks at significant moments in the development and transformation of Islam in the US through what Sherman Jackson calls its three “resurrections.”

The Problem of Economic Development (156421)

Michael Kremer

2015 Fall (4 Credits)  
Schedule:  
W 0300 PM - 0459 PM

Instructor Permissions:  
Instructor

Enrollment Cap:  
12

Understanding the determinants of the wealth of nations has long motivated the study of economics and it is arguably the most important problem in the field for human welfare. This seminar will examine the problem of economic development, looking both at historical experience and at contemporary issues in developing countries. It will focus on approaches from economics, but will also draw on other disciplines, including history, political science, and sociology.

Course Notes:  
Open to Freshmen only.

Recommended Prep:  
Students are expected to have had some background in economics, such as an AP economics course in high school, Ec 10a, or simultaneous enrollment in Social Analysis 10.

Requirements:  
Course open to Freshman Students Only

American Presidential Campaigns and Elections 1960-2016 (124777)

*Maxine Isaacs*

2015 Fall (4 Credits)  
**Schedule:** R 0100 PM - 0259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a  

What can we learn from earlier presidential elections about the presidential election of 2012 and our own political era? In this seminar, we examine changes and continuities in campaigns and elections since 1960; demographic and opinion shifts over the last fifty years; the nature and structure of American public opinion; and ways American news media transmit information and people learn about matters in the public sphere. Through this lens, we will come to better understand the politics, issues and society of our own time.

Media in American Politics (159837)

*Matthew Baum*

2015 Fall (4 Credits)  
**Schedule:** R 0100 PM - 0259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12  

This course considers the degree to which Americans' political opinions and actions are influenced by the media as well as the influence of the media on public policy. Topics to be covered include the history of the mass media, recent trends in the media, theories of media effects, the implications for politics of changes in media (e.g., the rise of the Internet, social media and partisan media), the ways in which the news shapes the public's perceptions of the political world, campaign communication, how the media affect the manner in which public officials govern, and the general role of the media in the democratic process.

The Role of Government (160196)

Oliver Hart

2016 Spring (4 Credits)  Schedule: M 0300 PM - 0459 PM
Instructor Permissions: Instructor  Enrollment Cap: n/a

The course will examine the role of government from an economic perspective. We will start with the classical welfare theorems that show that laissez-faire can achieve an efficient outcome. We will discuss how these theorems depend on a legal system that upholds contracts and protects property rights as well as on the absence of externalities or public goods. We will consider the cases for income redistribution and for government nudges. Throughout we will intersperse discussion of concepts with policy issues, such as freedom of speech, gun control, global warming, drug laws, kidney sales, and Obamacare.

Crime and Punishment in the United States, 1800-2000 (160200)

Lisa McGirr

2016 Spring (4 Credits)  Schedule: R 0200 PM - 0359 PM
Instructor Permissions: Instructor  Enrollment Cap: n/a

This course will examine the history of crime and punishment in the United States from the nineteenth through the twentieth century. We will examine early ideas about crime and punishment, and how they changed over the past two centuries. Topics will include the rise of the penitentiary, the rise and decline of the Southern convict lease system, progressive era penal knowledge and reform, and the criminalization of alcohol and drugs during the 1920s Prohibition era. Finally, the rise of the system of mass incarceration since the 1970s will be discussed.

The U.S. Energy Revolution and its Implications (160203)

James H. Stock

2015 Fall (4 Credits)  Schedule: T 0200 PM - 0359 PM
Instructor Permissions: Instructor  Enrollment Cap: 12
The U.S. “energy revolution”—nonconventional oil and gas production (fracking), increasing use of renewable energy, and reduced demand—has contributed to a sharp decline in U.S. oil imports, a 10% reduction in U.S. carbon dioxide emissions, and economic growth. This course examines the changing U.S. energy landscape, energy security, U.S. climate policy, and the connection between these issues and our own lives. Four case studies (biofuels, mining coal on public lands, regulating carbon dioxide emissions from power plants, and university divestment) illustrate the economic considerations, tradeoffs, and legal and political constraints facing U.S. energy and climate policy in practice.

From the Arab Spring to ISIS: National Security Challenges in the Mideast (124885)

*Charles Freilich*

2016 Spring (4 Credits) Schedule: T 0300 PM - 0459 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

The course surveys the national security threats and opportunities facing the primary countries of the Middle East, from their perspective. Issues discussed include the domestic sources of national security considerations, including regime change and the impact of the Arab Spring, relations with regional and international players, military doctrine, foreign policy principles. The seminar is an interactive, "real world" exercise, in which students play the role of leaders in the countries of their choosing and write practical policy recommendations on current affairs.

Technology to Save the World (160206)

*Latanya Sweeney*

2016 Spring (4 Credits) Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Technology designers are the new policy makers. No one elected them and most people do not know their names, but the arbitrary decisions they make when producing the latest gadgets and
online innovations dictate the code by which we conduct our daily lives and govern our countries. As technology progresses, every societal value and every state rule comes up for grabs and will likely be redefined by what technology enables or not. No one is thinking about how it all fits together or falls apart. This class offers a hands---on lab exploration to reveal and to shape those changes.

The Laws of War and the War on Terrorism (125124)

Gregg Peeples
2015 Fall (4 Credits) Schedule: W 0300 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

How do the "laws of war" regulate the conduct of the United States in the "Global War on Terrorism?" This seminar examines the historical development of two legal concepts: jus ad bellum, which determines the legitimacy of the use of armed force; and jus in bello, which defines the duties of soldiers and belligerent states. Drawing on this background, the seminar explores how these laws have influenced U.S. military and anti-terrorism operations since 9/11.

Freshman Seminar  43D
Christianity and Slavery in America, 1619-1865 (160213)

Catherine Brekus
2016 Spring (4 Credits) Schedule: W 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: n/a

Most people today assume that Christianity and slavery are incompatible. For most of Christian history, however, the opposite was true. Christians not only owned slaves, but they argued that slavery was sanctioned by the Bible. This course will explore the relationship between Christianity and slavery in America from 1619, when the first slaves arrived in Virginia, to the Emancipation Proclamation in 1865. We will ask several questions. How did white Christians become convinced that slavery was sinful? Why did many slaves convert to Christianity, the religion of
their oppressors? How did enslaved Christians make sense of their suffering?

**When bad things happen early in life: effects of early adversity on brain and behavioral development (160221)**

*Charles Nelson*

2015 Fall (4 Credits)  

**Schedule:** M 0100 PM - 0259 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

Millions of children throughout the world are exposed to early adversity that greatly limits their developmental potential. Before or after birth children can be deprived of food or adequate caregiving, or be exposed to various forms of toxic stress. These adverse early events may not just impact child development; rather, there is now abundant evidence that many of these events, particularly if they are experienced during a critical period of development, can exert effects that persist throughout adulthood. The overall goal of this seminar is to critically examine the scientific literature that links exposure to adversity early in life to subsequent physical, neurological and psychological development.

**White Collar Blues?: Work in the Age of Flexible Capitalism (160231)**

*Rachel Meyer*

2015 Fall (4 Credits)  

**Schedule:** T 0100 PM - 0259 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

Does flexible work lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? This course will examine the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory, and we will critically engage in the debate about the social and personal consequences of such "flexible" labor. We will explore the similarities and differences between workers and professionals, and we will be attentive to both structure and culture. Readings include prominent social theorists along with detailed ethnographic accounts representing a variety of workplaces which in different ways seek to elucidate the conditions of work under modern capitalism.

**Requirements:** Course open to Freshman Students Only
Freshman Seminar  43M

Psychology of Religion (125718)

Jon Boyd

2015 Fall (4 Credits)  

Schedule:  
M 0330 PM - 0529 PM

Instructor Permissions:  
Instructor

Enrollment Cap:  
n/a

This course addresses some of the fundamental issues of the nature of the self, issues which appear at the intersection of religion and psychology: Where do we turn for ultimate meaning? What happens when individuals undergo some sort of crisis and radically change their belief system or how they engage with the world? How do we face death? The course will focus on the ways in which both individuals and cultures create frameworks of meaning. The readings explore philosophical, psychological, and literary perspectives on these issues and questions and include works by Freud, Dostoevsky, William James, Flannery O'Connor, Malcolm X, and others.

Public Policy Approaches to Global Climate Change (115417)

Richard Cooper

2015 Fall (4 Credits)

Schedule:   W 0200 PM - 0359 PM

Instructor Permissions:  Instructor

Enrollment Cap:  12

Reviews what is known about greenhouse gas emissions' possible impact on climate. Explores possible impact of climate change on social and economic conditions over the next century. Investigates possible public policy responses to these developments, including actions both to adapt to and to mitigate climate change. What would be the costs of adaptation? Would an investment in mitigating the changes be worthwhile? Are there possibilities for international cooperation in dealing with the problem?

Health and Mental Health in Everyday Life (128123)

Mary Ruggie

2015 Fall (4 Credits)

Schedule:   M 0200 PM - 0359 PM

Instructor Permissions:  Instructor

Enrollment Cap:  n/a
This course adopts interdisciplinary perspectives toward understanding how health and mental health problems and well-being are manifest, if and how common patterns are changing, and how circumstances and contexts impact outcomes. We examine similarities and differences based on gender, race/ethnicity and other personal and social characteristics. Topics include everyday stress, body image, eating disorders, depression, substance abuse, sexual activity and gender-based violence. Throughout, we traverse the boundary between health and illness in order to explore the role of individuals, their social support networks, and health care professionals in developing and guiding positive strategies for coping and healing.

Freshman Seminar  49N

Measurements of the Mind: The Creation and Critique of the Psychological Test (121907)

Marla Eby

2015 Fall (4 Credits)  Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

Introduces the history of psychological tests, from the perspective of the psychologists using them, the people tested, and the general public. Examines the creativity within psychology in the making of such tests, as well as the drawbacks and dangers of the (mis)uses of these instruments. Explores tests in current use, as well as tests contained in various Harvard archives. Final project for this seminar involves the design of an original psychological test.
Freshman Seminar  49Y
Amateur Athletics (120400)

Harry Lewis

2015 Fall (4 Credits)  Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor  Enrollment Cap: 12

The study of sports as a lens through which to explore social and ethical paradoxes of American life. Where did the amateur ideal come from, and does it make sense today? The history of athletics in ancient Greece, Victorian England, and America. College, Olympic, and professional athletics. Athletic competition as a social, spiritual, educational, and commercial institution. The relation to the amateur ideal of recent trends in higher education, including democratization, internationalization, and rising cost.

Course Notes: Requirements: Short papers based on weekly readings and targeted questions, and one 10-page research paper due at the end of the course, with a draft due earlier. The research project will be on a topic of the student's choosing related to the history and development of college sports. Students will learn to use the Harvard Archives, where in previous years students in this seminar have uncovered fascinating, untold stories about Harvard's place in sports history. Students should also expect to be active discussants and engaged followers of current events, calling relevant news stories to the attention of their fellow students.

Cultural Agents (123834)

Doris Sommer

2015 Fall (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor
Enrollment Cap: n/a

Explore the arts as social and professional resources! Whether you pursue medicine, law, engineering, business, government, etc., the arts will enhance your work and your citizenship. Active citizens construct opportunities for positive social change. A lecture series by a range of professionals demonstrates that change in practically any field depends on art. Theoretical readings (Schiller, Kant, Dewey, Freire, Gramsci, Rancière, Mockus, Boal, Nussbaum, Pasolini, inter alia) are grounded in concrete cases of agency. The final project will be a design for a creative social intervention, including reflections on creating the design.

Class Notes: Though the University will be on a "Monday" schedule, this course will still have its first lecture on Wednesday, September 2.

First Nights: Five Performance Premieres (110744)

Thomas F. Kelly

2015 Fall (4 Credits)

Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: Instructor
Enrollment Cap: n/a

A study of five famous pieces of music, both as timeless works of art and as moments of cultural history. Close attention is given to techniques of musical listening, and to the details of the first performance of each work, with a consideration of the problems involved in assembling such a picture. Works studied are Beethoven, Symphony no. 9; Berlioz, Symphonie fantastique; Stravinsky, Le sacre du printemps; Handel, Messiah; Monteverdi, Orfeo. The course concludes with the first performance of a new work especially commissioned for this course.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Ancient Fictions: The Ancient Novel in Context (124912)

David Elmer  
Jasmine Hu  
Massimo Ce  
Stephanie Kenen  

2015 Fall (4 Credits)  

Schedule: MW 1100 AM - 1159 AM  

Instructor Permissions: Instructor  
Enrollment Cap: n/a  

The novel is often thought of as a distinctively modern form, but Greco-Roman antiquity had its own version. Fictional prose narratives about adventure and romance in exotic lands were immensely popular in antiquity. We will explore this tradition by reading the five surviving Greek novels, the *Golden Ass* of the Roman Apuleius, and selected other texts, along with works by contemporary theorists and critics. Topics include: definitions of the "novel"; ancient representations of desire; gender and class politics; relationships between secular and religious narratives.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Buddhism and Japanese Culture (123913)

Ryuichi Abe  

2016 Spring (4 Credits)  

Schedule: TR 0200 PM - 0259 PM  

Instructor Permissions: None  
Enrollment Cap: n/a  

This course is designed to enable students to analyze a wide range of Japanese cultural creations—including the traditional Noh theater, modern Japanese paintings, and contemporary anime—by illustrating the influence of Buddhism both on their forms and at their depths. The first part of the course is a study of major Buddhist philosophy and its impact on Japanese literature. The second part observes Buddhist ritual practices and their significance for Japanese performing arts. The last part traces the development of Japanese Buddhist art, and considers the influence of Buddhism on diverse contemporary popular Japanese art media.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Introduction to the Bible in the Humanities and the Arts (126284)

*Gordon Teskey*

2015 Fall (4 Credits)  
**Schedule:** MW 0400 PM - 0459 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

A course on the structure of the Bible, which William Blake called "the great code of art." Major themes include the invention of God, the invention history, and the invention of the city (or rather, of two cities, that of the devil and that of God). About two-thirds of the Authorized Version (King James) of 1611 will be read.

**Course Notes:** The course does not count for the English concentration "Arrivals" requirement. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Chinese Stories: Tradition and Transformation (124661)

*David Der-Wei Wang*  
*Wai-Yee Li*

2015 Fall (4 Credits)  
**Schedule:** MW 1100 AM - 1159 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

What makes a story prevail through time? We will visit the most beloved, enduring works in the Chinese tradition and discover cultural icons from the Handsome Monkey King to the Nobel prize-winning novel *Soul Mountain*. We will explore the cultural trends and themes that have been the stuff of popular Chinese novels, TV, cinema, and thought. This course offers a comprehensive, yet unique and unconventional window into Chinese tradition and modernity, past and present.

**Course Notes:** No previous knowledge of Chinese required. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Monuments of Islamic Architecture (126634)

_Gulru Necipoglu-Kafadar_
_David J. Roxburgh_

2015 Fall (4 Credits)  
**Schedule:** TR 1100 AM - 1159 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

An introduction to ten iconic monuments of the Islamic world from the beginning of Islam to the early modern period. The course introduces various types of building-mosques, palaces, multifunctional complexes—and city types and the factors that shaped them, artistic, patronal, socio-political, religio-cultural, and economic. Each case study is divided into two lectures. The first presents the monument or city by “walking” through it. The second is devoted to themes elicited from the example, developed in light of comparative monuments, sites, and/or written sources, and to problems of patronage, production, audience and meaning as they pertain to architectural history.

**Course Notes:** This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Aesthetic & Interpretive  42
Revolution, Reform and Conservatism in Western Culture (125749)

_W. Simpson_

2015 Fall (4 Credits)  
**Schedule:** TR 1000 AM - 1059 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

What is the function of literary texts in moments, from Plato to the Russian Revolution, that promise total, enlightened societal transformation? Each week, this course will focus on two texts related to selected “revolutionary” moments, one philosophical and one literary. Literary texts do not participate easily in the revolutionary order. They resist the textual simplicities of philosophy. Which do we trust: philosophy or literature? Texts include many found in traditional “Great Books” courses: Plato, Virgil, Augustine, Dante, Luther, Milton, Swift, Rousseau, Twain, Kant, Marx, and Chekov, among others.

**Course Notes:** Offered jointly as Humanities 53. Students who have taken Culture and Belief 18 or Humanities 53 may not take this course for credit. This course, when taken for a letter grade, meets the General Education requirement for
Culture and Belief or Aesthetic and Interpretive Understanding, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

For the Love of God and His Prophet: Religion, Literature, and the Arts in Muslim Cultures (125190)

**Ali S. Asani**

2016 Spring (4 Credits)  
**Schedule:** TR 1130 AM - 1259 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

The course surveys the literary and artistic dimensions of the devotional life of the world's Muslim communities, focusing on the role of literature and the arts (poetry, music, architecture, calligraphy, etc.) as expressions of piety and socio-political critique. An important aim of the course is to explore the relationships between religion, literature, and the arts in a variety of historical and cultural contexts in the Middle East, sub-Saharan Africa, South Asia, Europe, and America.

**Course Notes:** No prior knowledge of Islam required. You do not need to be "artistically" talented to do well in this course -- just willing to think "out of the box."

Offered jointly with the Divinity School as 3627. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

American Dreams from Scarface to Easy Rider (109501)

**Eric Rentschler**

2015 Fall (4 Credits)  
**Schedule:** MW 1000 AM - 1059 AM  
**Instructor Permissions:** Department  
**Enrollment Cap:** n/a
This class familiarizes students with popular films produced during crucial junctures in the modern history of the United States, from the Great Depression and World War II through the Cold War, McCarthy era, and the 1960s. More specifically, we will study how Hollywood's dream factory responded to dramatic challenges that states of crisis and emergency posed to the founding ideals of our democracy. We will look at the wide range of functions that commercial fantasy productions assumed, how they at times legitimated and bolstered the status quo, but at others also interrogated, exposed, and even indicted social inequity. Course films provide a representative sampling of classical American features from 1932 to 1969, including *Scarface, It Happened One Night, The Wizard of Oz, Gone with the Wind, Citizen Kane, Casablanca, High Noon, The Invasion of the Body Snatchers, The Manchurian Candidate, and Easy Rider.*

**Course Notes:**
Alternate weekly film screenings will be held on Sunday afternoons. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

**Class Notes:**
If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Literature and Art in an Era of Crisis and Oppression: Modernism in Eastern Europe (124798)

*George Grabowicz*

2016 Spring (4 Credits)  
**Schedule:**  
M 0100 PM - 0259 PM  

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

The course will examine seminal literary works (with forays into film and art) from Eastern Europe in the first half of the 20th century with special attention to their response to convention, censorship and totalitarian strictures as well as "high modernist" experimentation and a "low modernist" focus on popular genres and a new poetics of trash. Focus on Kafka, Zamiatin, Bulgakov, Capek, Nabokov, Platonov, Witkacy, Schulz, Gombrowicz, Vertov, Dovzhenko and others.

**Course Notes:** All texts can be read in English translation.

Aesthetic & Interpretive   62

California in the 60's (156264)

Kate van Orden

2016 Spring (4 Credits)  Schedule:  MW 1200 PM - 1259 PM

Instructor Permissions:  Instructor  Enrollment Cap:  100

This course examines American youth culture in the "long" 1960s through the lens of music in California. Both "popular" and "art" music will be considered, including early minimalism, songs from L.A. and the Laurel Canyon crowd, and San Francisco psychedelia. In addition to understanding musical forms, performance styles, and the effects of technology (radio, recording, electric instruments), the class will delve into the politics of race, gender, resistance, and the draft.

Course Notes:  This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Culture and Belief, but not both.

Class Notes:  If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

East Asian Cinema (110464)

Jie Li

2016 Spring (4 Credits)  Schedule:  W 0100 PM - 0259 PM

Instructor Permissions:  Instructor  Enrollment Cap:  108

This course introduces major works, genres, and waves of East Asian cinema from the silent era to the present, including films from Mainland China, Japan, Korea, Taiwan, and Hong Kong. We will discuss issues ranging from formal aesthetics to historical representation, from local film industries to transnational audience reception. This course does not assume prior knowledge of East Asian culture or of film studies, but rather seeks to provide students with a basic understanding of modern East Asian cultural history through cinema, and with an essential toolkit for analyzing film and media, including narrative, cinematography, editing and sound. In addition to critical approaches, students are strongly encouraged to creatively respond to course materials by collaborating on their own short films, beginning with the illustration of film terms in the first two weeks and culminating in the Oscar-like "Golden Monkey Awards."

Course Notes:  All films subtitled in English. No prior knowledge of East Asian history or film studies necessary.

Class Notes:  Weekly film screenings, Monday, 6-8 pm.

If student interest exceeds the course limit, a random lottery will be
conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Chaucer: The Canterbury Tales (146214)

*Nicholas Watson*

2015 Fall (4 Credits)  
**Schedule:** MW 0200 PM - 0259 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 120

One of the most astonishing, vibrant, multivalent texts in the English language, Chaucer’s *The Canterbury Tales* contains characters high and low telling stories of edification and pleasure, in poetry and prose, on topics bawdy and pious. We will read this work in its entirety, while also looking at some of Chaucer’s shorter poems and the historical and cultural milieu in which he wrote.

**Course Notes:** This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

**Class Notes:** If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Performance, Tradition and Cultural Studies: An Introduction to Folklore and Mythology (125216)

Stephen Mitchell

2015 Fall (4 Credits)  Schedule: MWF 0900 AM - 0959 AM

Instructor Permissions: Instructor  Enrollment Cap: n/a

Examines major forms of folklore (e.g., myths, legends, epics, beliefs, rituals, festivals) and the theoretical approaches used in their study. Analyzes how folklore shapes national, regional, and ethnic identities, as well as daily life; considers the function of folklore within the groups that perform and use it, employing materials drawn from a wide range of areas (e.g., South Slavic oral epics, American occupational lore, Northern European ballads, witchcraft in Africa and America, Cajun Mardi Gras, Sub-Saharan African oral traditions).

Course Notes: Required of Concentrators and for the Secondary Field in Folklore and Mythology. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: Occasional Fridays are required. Please check course website for details.

The Ancient Greek Hero (113501)

Gregory Nagy

2015 Fall (4 Credits)  Schedule: MW 1200 PM - 1259 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

This course takes a close look at the human condition, as viewed through the lens of classical Greek civilization (and some modern comparanda). The readings, all in English translation, are the Homeric Iliad and Odyssey, seven tragedies (Aeschylus' Oresteia Trilogy, Sophocles' two Oedipus dramas, and Euripides' Hippolytus and The Bacchic
Women), and two dialogues of Plato (the Apology and the Phaedo, both centering on the last days of Socrates); also, selections from the dialogue On Heroes by an eminent thinker in the “second sophistic” movement, Philostratus.

A History of Photography (117020)

Robin Kelsey

2015 Fall (4 Credits) Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

Modern society is unthinkable without the photograph, and yet we rarely have occasion to ponder what photographs are, what they do, and how they do it. In this course, we will consider photography from its origins to the digital era, paying particular attention to its role as an engine of belief in various cultural domains. Our goal will be to understand more incisively how photographs define and shape relations between their subjects and their viewers.

Course Notes: Students who have taken Literature and Arts B-24 may not take this course for credit. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

East Asian Religions: Traditions and Transformations (126199)

James Robson

2015 Fall (4 Credits) Schedule: TR 0100 PM - 0229 PM
This course provides an introduction to the study of East Asian religions. It covers the development of Buddhism, Daoism, Confucianism and Shinto. It is not a comprehensive survey, but is designed around major conceptual themes, such as ritual, image veneration, mysticism, meditation, death, and category formation in the study of religion. The emphasis throughout the course is on the hermeneutic difficulties attendant upon the study of religion in general, and East Asian religions in particular.

Course Notes: Offered jointly with the Divinity School as 3010. This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Societies of the World, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Classical Mythology (126004)

Brigitte Libby

2016 Spring (4 Credits) Schedule: TR 1100 AM - 1159 AM

Incest and parricide, cannibalism and self-blinding: classical mythology has fascinated artists, writers, and thinkers throughout western civilization, and this course will serve as an introduction to this strange and brilliant world. We will move from the very first works of Greek literature through to the classic Greek tragedies and the Roman tales in Ovid’s Metamorphoses. Along the way, we will confront the question of what “mythology” is and how it works, and we will discuss how these traditional stories changed over time to fit different cultural circumstances. We will also consider ancient rationalizations of myth, the relationship of myth and politics, and the reception of classical myth in the modern world.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Culture & Belief  38

Apocalypse Then! Forging the Culture of Medieval Rus’ (111958)
When the natives of Medieval Rus (later Russians, Ukrainians, and Belarusians) accepted Orthodox Christianity in the 10th century, their nature-based paganism gave way to a powerfully sensual belief system that made good use of the visual and the verbal to prepare these newest Christians for the coming Apocalypse and Last Judgment. We investigate this transformation from the conversion of Saint Vladimir and the excesses of Ivan the Terrible through the Time of Troubles and the modern turn of Peter the Great. The class features close analysis of architecture, icons and frescoes, ritual, folklore, literature, and history to understand this shift in worldview, including the role of women. Special attention is devoted to the ways in which Medieval Rus is portrayed in film, opera, and ballet.

Course Notes: All readings in English. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Hebrew Bible (125055)

Shaye J.D. Cohen

2015 Fall (4 Credits) Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course is a survey of the major books and ideas of the Hebrew Bible (commonly called the Old Testament). The course will also treat the historical contexts in which the Bible emerged, and the Bible’s role as canonical scripture in Judaism and Christianity.

Course Notes: All readings in translation. No prior knowledge of the subject is assumed. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: Occasional Fridays are required. Please check course syllabus for details.

Popular Culture and Modern China (120681)

David Der-Wei Wang

2016 Spring (4 Credits)  Schedule:  MW 1100 AM - 1159 AM  Enrollment Cap:  n/a

Instructor Permissions:  None  Instructor Permissions:  None

This course examines "popular culture" as a modern, transnational phenomenon and explores its manifestation in Chinese communities (in People's Republic of China, Taiwan, Hong Kong, Southeast Asia and North America) and beyond. From pulp fiction to film, from "Yellow Music" to "Model Theater", from animations to internet games, the course looks into how China became modern by participating in the global circulation of media forms, and how China helps in her own way enrich the theory and practice of "popular culture".

Course Notes:  This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Aesthetic and Interpretive Understanding, but not both.

Wythe Marschall
Jenny Pham
Nissanka Subodhana Wijeyeratne
Stephanie Kenen
Eli Nelson
Tope Fadiran

2016 Spring (4 Credits)  Schedule:  TR 1000 AM - 1059 AM  Enrollment Cap:  210

Instructor Permissions:  None  Instructor Permissions:  None

Why is evolutionary theory so controversial in the public sphere? This course looks to the history of cultural changes in the West for answers. We cover the intellectual structure and social context of evolutionary ideas as they emerged in the 19th and 20th centuries, emphasizing Darwinism as a major transformation in Western thought. Topics include key aspects of Darwin's ideas; the comparative reception of Darwinism in Britain, US, Germany, Russia and France; social Darwinism, eugenics and racial theories; early genetics and the search for the gene; religious controversy then and now. The course alternates with Culture and Belief 20.

Course Notes:  This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The European Postwar: Literature, Film, Politics (127826)

Peter Gordon

2015 Fall (4 Credits) Schedule: MW 1200 PM - 1259 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

What happened in the last half century in European culture and politics? How can we read history through culture, and culture through history? This undergraduate lecture survey offers a general overview of European history since 1945, with a primary focus on some of the greatest works of postwar European film and literature. We will interrogate major trends in cinema and literature (e.g., expressionism, existentialism, neo-realist, minimalism, the New Wave, the realist political dramas of the 1970s, and so forth); in conjunction with new modalities of political discourse concerning communism, democracy, colonialism, and sexuality. Note: The course includes six classic novels by postwar European authors, and nine of the greatest postwar films by noteworthy European directors.

Course Notes: The course includes six classic novels by postwar European author, and nine of the greatest postwar films by noteworthy European directors. This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Societies of the World, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Culture & Belief 51

Making the Middle Ages (108161)

Nicholas Watson

Sean Gilsdorf

2016 Spring (4 Credits) Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: Instructor Enrollment Cap: 56

This course offers a general introduction to the cultures and beliefs of medieval Europe. We focus on a variety of
artifacts and cultural productions as the centerpieces of a broad and interdisciplinary exploration of medieval studies. Using specific objects and texts as points of entry into a vanished world, we encourage students to explore those areas that interest them most, teasing out the cultures and beliefs of the past while simultaneously developing their skills in research and writing. Through collaborative projects and a creative exploration of texts, images, and collections at Harvard and beyond, students will be invited to make their own Middle Ages.

**Course Notes:** This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

**Class Notes:** If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

*Case Studies in the Medical Humanities: Interdisciplinary Perspectives on the Experience of Illness (109790)*

*David Shumway Jones*  

*Arthur Kleinman*  

*Karen Thornber*

2015 Fall (4 Credits)  

**Schedule:** T 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a
Disease and healing pose pragmatic and moral challenges for individuals and societies. Artists and writers have struggled to make sense of these tragic and transcendent experiences through fiction, poetry, art, and music. Scholars can explore these archives of the illness experience to understand not just disease and medicine but also what it means to be human. This interdisciplinary course examines how the medical humanities can change how we think about suffering, resilience, and care-giving, an endeavor relevant to anyone who expects to encounter these problems in life (i.e., everyone). In 2015 the course will focus on epidemics; case studies may include plague, tuberculosis, cancer, AIDS, SARS, and Ebola. Future offerings might address chronic disease, mental illness, death and dying, or caregiving.

Language and Culture (112218)

Nicholas Harkness

2015 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Schedule: TR 0100 PM - 0159 PM

This is a course in linguistic anthropology. We explore key theoretical issues in the semiotic anthropology of language use, focusing on communication, social (inter)action, representation, cultural conceptualization, and language ideology. By presenting many of the most influential and innovative contributions to the study of language in culture and society, both recent and classic, the course aims to guide students in asking fundamental questions about language and communication more broadly as facts of everyday sociocultural experience.

Course Notes: No previous knowledge of linguistics or of anthropology is required. This course may fulfill the Entry Course requirement for Social Anthropology.

Empirical & Math Reasoning  11

Making Sense: Language, Logic, and Interpretation (125750)

Gennaro Chierchia
Stuart Shieber
Virginie Greene

2016 Spring (4 Credits)  
Schedule: MW 0100 PM - 0229 PM
Instructor Permissions: None  Enrollment Cap: n/a

Why is human language capable of conveying meaningful information to a degree unmatched by natural or artificial codes? Why does semantic content spontaneously attach to speech sounds, but not in the same way to, say, music? We claim that this has to do with language being the carrier of a spontaneous form of logic. We investigate our hypothesis by using formal models from logic, linguistics, computer science, and literary criticism. We show how such models can be helpful in better understanding ordinary, everyday communication, as well as literary fiction through a reading of texts by Euripides, Cervantes, Austen, Proust, and others.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Empirical and Mathematical Reasoning, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Analyzing Politics (113170)

Kenneth Shepsle

2016 Spring (4 Credits)  Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None  Enrollment Cap: n/a

A commonsensical survey of rational theories of politics comprised of: (1) individual choice, (2) group choice, (3) collective action, and (4) institutions. The underlying theme is that politics may be described and understood as rational, goal-seeking behavior by citizens, politicians, bureaucrats, and interest groups in various settings. Students are encouraged to think deeply about current events, history, and public life generally, as well as to analyze the politics of private life—families, clubs, firms, churches, universities, even Harvard Houses—since private politics, like public politics, may be understood in terms of rational behavior. Instruction is by lecture, small-group section interactions, and experiments.

Empirical & Math Reasoning 17

Logical Reasoning (112199)

Ned Hall
The concepts and principles of symbolic logic: valid and invalid arguments, logical relations of statements and their basis in structural features of those statements, the analysis of complex statements of ordinary discourse to uncover their structure, the use of a symbolic language to display logical structure and to facilitate methods for assessing arguments. Analysis of reasoning with truth-functions ("and", "or", "not", "if...then") and with quantifiers ("all", "some"). Attention to formal languages and axiomatics, and systems for logical deduction. Throughout, both the theory underlying the norms of valid reasoning and applications to "arguments in the wild" will be investigated.

**Class Notes:**
Fridays 1-3 reserved for weekly quizzes.

The Business and Politics of Health (125932)

*David Cutler*

2015 Fall (4 Credits)

**Schedule:** TR 1000 AM - 1129 AM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

Health and medical care pervade every aspect of our lives. This course uses quantitative methods (graphical analysis, algebra, data analysis) to examine issues related to health, disease, and systems for delivering health care. Topics to be covered include differences in health between rich and poor countries, differences in types of medical care and who receives it, and the political context for reforming health care policy. Techniques for analysis will be developed and demonstrated in class and section. The course uses examples from a variety of international settings, but focuses mainly on health and health care in the US.

**Course Notes:**
This course counts for Ec concentration credit. Economics concentrators wishing to obtain writing credit for this course will need to write a term paper that uses Economics 10 concepts. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning or United States in the World, but not both.

**Requirements:**
Anti-Req: Students who have taken Economics 1460 may not take this course for credit. Anti-Req: EMREAS 20

Subject: Ethical Reasoning
Criminal trials have served throughout history to enforce revolutionary change, to impose conformity and stifle dissent, or, alternatively, to advance democracy. Students examine trials in their historical and moral context to weigh such issues as who can prosecute; can crimes be defined after the fact; can punishing speech be justified? Cases include Socrates, Louis XVI, General Dyer, the Soviet purges, Nuremberg, Eichmann, American cold-war hearings, and today's international tribunals and truth commissions.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

What is a good life? How does it relate to personal happiness, to being a good ruler, citizen, or lover? What is the relative value of justice, citizenship, loyalty, friendship, personal profit, and pleasure? Is the good life the same for everyone? This course is devoted to investigating how classical South Asian intellectuals approached such questions and to thinking critically about their responses. As we will see, far from being mere artifacts from someone else's historical past, classical South Asian texts provide powerful frameworks for thinking about our own lives and the ways in which we reason about them.

### Ethical Reasoning  28

Moral Inquiry in the Novels of Tolstoy and Dostoevsky (126834)

**Justin Weir**

2015 Fall (4 Credits)  
**Schedule:** TR 0100 PM - 0159 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course considers how Tolstoy and Dostoevsky take up moral inquiry in their fiction, introduces students to philosophical texts that informed their major fiction, and asks why the novel as a literary genre may be a good forum for the discussion of ethics. We will read Tolstoy's *Anna Karenina*, Dostoevsky's *Notes from Underground* and *The Brothers Karamazov*, as well as selected texts from Rousseau, Schopenhauer, Nietzsche, and others.

### Ethical Reasoning  29

Time, History, and the Creation of the New (127567)

**Samuel Moyn**  
**Roberto Mangabeira Unger**

2016 Spring (4 Credits)  
**Schedule:** W 0100 PM - 0259 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course uses the creation of the new —natural phenomena, social arrangements, and machines or ideas that never existed before —as a provocation to probe some of our most basic assumptions about nature, society,
humanity, and the mind. We address a longstanding but dissident tradition in philosophy, science, and social thought that treats time as real, structure as mutable, and natural and human history as open. We go on to ask how democracies, economies, and schools can best be organized to exploit our potential as creators of the new.

**Course Notes:** Offered jointly with the Law School.

**Ethical Reasoning  38**

The Meaning of Life (110453)

*Mathias Risse*

2015 Fall (4 Credits)  

**Schedule:**  

MW 1000 AM - 1059 AM

**Instructor Permissions:**  

Instructor

**Enrollment Cap:**  

n/a

Is there a point to life as a whole? That is the question about the "meaning of life," a question that is notoriously hard to make precise but has animated much literature, art and philosophy. Philosophers have provided both very disheartening answers and more uplifting ones. Serious scrutiny of such answers should be of interest to anybody who wishes to make reflection on her/his life as a whole part of her/his education. This class is wide-ranging, but its main focus is on contributions by relatively recent thinkers in the Anglo-American analytical tradition of philosophy.

Money, Markets, and Morals (156035)

*Micahel Sandel*

2015 Fall (4 Credits)  

**Schedule:**  

MW 1100 AM - 1159 AM

**Instructor Permissions:**  

Instructor

**Enrollment Cap:**  

n/a

What should be the role of money and markets in our society? Are there some things that money should not be able to buy? For example: Should people be permitted to buy sex, votes, babies, citizenship, or college admission? What about buying and selling the right to pollute, procreate, immigrate, discriminate, or to hunt endangered species? Should we use markets to allocate health care, education, and military service?

**Class Notes:**  

If student interest exceeds the course capacity, a lottery will be conducted. Priority will be given to students who attend the first lecture. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.
Ethical Reasoning  40 Section: 0001

History of Human Rights (159646)

Samuel Moyn

2015 Fall (4 Credits) Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

Is morality found or made? Every belief comes from someplace and somewhere, but we rarely think this affects its truth. Is morality neatly separable from the pathways and contexts thanks to which it comes to our attention? Taking contemporary human rights norms, laws, and movements as a case study, this course examines this question. We will study where human rights norms come from, the history of international organizations, and how non-governmental actors came to defend human rights. The relationship of human rights to the histories of governance, empire, warfare, emotions, and victimhood will be taken up.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Ethical Reasoning  41

Economic Justice (159809)

Mathias Risse

2016 Spring (4 Credits) Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None Enrollment Cap: n/a

Capitalism organizes society around individual pursuits of material gain. Capitalism seems to have won the great ideological struggle with other ways of organizing society. But there is much discontent: the Occupy Movement made clear that even Americans now care about excessive inequality, and many worry about the future in an increasingly economically divided society where access to technology richly rewards some to the exclusion of many others. Capitalism is also closely associated with what is arguably the biggest policy problem of the 21st century: climate change. So how can we justify capitalism? And what are feasible alternative ways of organizing society?
Ethical Reasoning 42

Sexual Ethics as Ethical Reasoning (161179)

Mark Jordan

2016 Spring (4 Credits) Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: Instructor Enrollment Cap: 150

"Immorality" without specification used to mean sexual misconduct, especially by women. Now many people are unclear whether there is any ethics specific to sexual activity at all. This rapid change in ethical views makes sex a very good place to think about ethical reasoning and how it matters to human lives. We will study the historical shifts and current ranges of some controversies about sexual desire, activity, criminality, and identity. We will then use these cases to consider whether there is or ought to be ethical reasoning about sex.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Subject: Science of Living Systems

Science of Living Systems 15

Developmental Psychology: Origins of Knowledge (117469)

Susan Carey

Elizabeth Spelke

2016 Spring (4 Credits) Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None Enrollment Cap: n/a

Developmental Psychology explores, first, how universal human capacities arise in ontogenesis and, second, how people come to have their unique suite of skills and personalities. First, the origins and development of space perception, mathematical capacity, moral judgments, and concepts of objects, agents, and social relations are studied in relation to two larger time scales: biological evolution and historical/cultural change. Second, the course looks at individual differences in IQ, executive functioning, and social relationships. The interplay between psychological and biological levels of analysis in accounting both for universal development and for individual differences is discussed throughout.

Course Notes: For Psychology concentrations, this course meets a Foundation Course requirement.
Requirements: Anti-Req: Students who have taken Psychology 16 cannot take this course for credit.

Science of Living Systems   16
Human Evolution and Human Health (112339)

Daniel Lieberman
2016 Spring (4 Credits) Schedule: TR 0100 PM - 0229 PM
Instructor Permissions: None Enrollment Cap: n/a

How and why did humans evolve to be the way we are, and what are the implications of our evolved anatomy and physiology for human health in a post-industrial world? Why do we get sick, and how can we use principles of evolution to improve health and wellbeing? To address these questions, this course reviews the major transitions that occurred in human evolution, from the divergence of the ape and human lineages to the origins of modern humans. Also considered are the many effects of recent cultural and technological shifts such as agriculture and industrialization on human health.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Human Physiology: From Personal To Public Health (118903)

Stephanie Shore
Nancy Long Sieber
2016 Spring (4 Credits) Schedule: MWF 1200 PM - 1259 PM
Instructor Permissions: Instructor Enrollment Cap: 75

The course introduces students to the functioning of the human body in health and disease. Students will examine critical determinants of their own health (genetics, diet, sleep, exercise, stress, social interactions) and also consider how these and other factors impact the health of diverse communities in both rich and poor countries. Emphasis will be placed on responses of the human organism to infection, injury, and environmental stress, and on topics with high public health impact (obesity, smoking, mental health). Activities include lectures, 3 guided laboratories/demonstrations, weekly sections to review key concepts, and a directed term project.
Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Nutrition and Global Health (126200)

Clifford W. Lo
Christopher Duggan
Wafaie Fawzi

2016 Spring (4 Credits) Schedule: M 0300 PM - 0459 PM
Instructor Permissions: None Enrollment Cap: n/a

This course will introduce students to nutrition and global health problems through exploration of demographic, epidemiological, biological, social, political, and economic determinants of nutritional status. Emphasis will be placed on the role of nutritional status and dietary intake, both as a determinant and as a consequence, of these health problems. Students will be encouraged to think critically about the major challenges to improve nutrition and health at a global level, with a focus on nutrition and infectious diseases, maternal and child health, and chronic diseases. Nutritional assessment, study design, and efficacy of nutrition interventions, will be explored in detail.

Science of Living Systems  20S

Psychological Science Seminar (160737)

Jason Mitchell

2015 Fall (4 Credits)  

Schedule:  

MW 0100 PM - 0259 PM

Instructor Permissions:  
Instructor  

Enrollment Cap:  
12

An introduction to the sciences of mind, including foundational concepts from neuroscience, evolution, genetics, philosophy, and experimental methods, and specific topics such as perception, memory, reasoning and decision-making, consciousness, child development, psychopathology, personality, language, emotion, sexuality, violence, morality and social relations.

Course Notes:  

Instructor Signature Required for Enrollment. This section of the course is limited to 12 students. It is intended for students who, on the basis of their high-school preparation for writing and science, expect that they would benefit from additional faculty instruction. The Psychology concentration counts this course as equivalent to other versions of Science of Living Systems 20 in terms of concentration requirements and pre-requisites. Students who have completed another psychology course (including AP Psychology) may not enroll in this seminar.

Class Notes:  

The course will be lotteried by application process, administered at the first...
meeting on Wednesday, September 2. See the course website for more details.

Human Influence on Life in the Sea (126635)

Robert M. Woollacott
James McCarthy

2015 Fall (4 Credits) Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor
Enrollment Cap: n/a

Many important marine fish stocks are over-harvested and their futures are in doubt. Other human activities, such as pollution and anthropogenic climate change, are also affecting the stability and productivity of marine ecosystems. This course will ask what we need to know about the causes and effects of anthropogenic change to best protect marine ecosystems and ensure sustainable harvests from the sea.

Science of Living Systems  26

The Toll of Infection: Understanding Disease in Scientific, Social, and Cultural Contexts (110382)

Donald Goldmann

2015 Fall (4 Credits) Schedule: MW 0100 PM - 0229 PM

Instructor Permissions: Instructor
Enrollment Cap: 60

This course will review the devastating impact of representative infectious diseases on wars, politics, economics, religion, public health, and society as reflected in history, literature, and the arts. We will study how infections spawned revolutionary epidemiologic and scientific advances in detection, treatment, and prevention. We will address the gaps between discovery and implementation, including ethical, social, economic, and health systems barriers to progress. We will confront challenges posed by microbial mutation (e.g., antibiotic resistance, evasion of immunity, and adaptation of animal viruses to humans). By weaving together knowledge from science and the humanities, students will understand the historical and contemporary impact of infections and potential solutions to the challenges they pose.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.
Science of Physical Universe  12

Natural Disasters (112430)

Brendan Meade

2016 Spring (4 Credits)  

Schedule:  
TR 1000 AM - 1129 AM

Instructor Permissions:  Instructor
Enrollment Cap:  98

Natural disasters, such as earthquakes, hurricanes, and floods, claim thousands of lives and cause tens of billions of dollars in damage each year. Moreover, changes in Earth’s climate are raising sea level, changing precipitation patterns, and likely causing an increase in the occurrence of damaging storms, putting more of our increasing exposed global population at risk. In this course we develop an understanding of these natural hazards from an earth science perspective, and examine several case studies to assess their catastrophic impacts. Given our scientific understanding of these phenomena, we examine ways to assess and forecast future natural disasters, and to mitigate the adverse impacts to our societies. Sections will emphasize the use of GIS technology to measure the impacts of natural hazards.

Class Notes:  
If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Science of Physical Universe  13

Why You Hear What You Hear: The Science of Music and Sound (114922)

Eric Heller

2016 Spring (4 Credits)  

Schedule:  
MW 0230 PM - 0359 PM

Instructor Permissions:  Instructor
Enrollment Cap:  60

Sound and music are integral parts of all human cultures, and play critical roles in communications and social interactions. In this course, we study the production, transmission, and perception of sound, with the aim of expanding communication, musical, and artistic horizons. The course includes many class demos and hands on tools for students to explore. Psychoacoustics (the study of how we perceive and interpret sound) is a central theme...
of the course, providing a lens through which we can better understand the generation, propagation, and analysis of sound. Student-selected projects (with staff consultation) are an important part of the course.

**Class Notes:** If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

### Science of Physical Universe  14

**How to Build a Habitable Planet (118517)**

*Charles Langmuir*

2015 Fall (4 Credits)  

**Schedule:** MWF 1100 AM - 1159 AM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a  

The story of Earth from the inception of the universe at the Big Bang to the revolution in planetary function and capability associated with the rise of human civilization. The aim of the course is to place human beings in a universal and planetary context, and to see the steps in planetary evolution as an essential perspective on how we relate to Earth today. Topics covered include the Big Bang, origin of the elements, formation of minerals, origin of the solar system, formation of planets, climate regulation, origin of life, co-evolution of ocean, atmosphere, solid earth and biosphere, development of plate tectonics, the modern Earth as an interconnected system, and the human era and its consequences for the planet. Current environmental problems can then be considered in a planetary context. Finally we consider whether Earth may be a microcosm reflecting laws of planetary evolution that may be common to a class of planets throughout the universe, or alternatively may be a low probability accident.

### Science of Physical Universe  18

**Time (121960)**

*Gary Feldman*

2015 Fall (4 Credits)  

**Schedule:** MWF 1230 PM - 0159 PM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** n/a  

We study how our understanding of time and of related issues, such as the predictability of the future, have evolved over the past three centuries. We start with Newtonian mechanics, which envisions a universal time, symmetric between past and future. This leads to the concept of a clockwork universe. We then see how developments in the...
19th and 20th centuries destroy this view of time. In the 19th century, the distinction between past and future emerges from considerations of statistical processes. In the 20th century, the theory of relativity forces fundamental changes in the concept of time. Time ceases to be universal and becomes entangled with space and gravity. Quantum mechanics limits the predictability of the future and introduces verified effects so weird that Einstein wrote of them, "No reasonable definition of reality could be expected to permit this."

Course Notes: Some knowledge of secondary school physics useful, but not required. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Science of Physical Universe  20

What is Life? From Quarks to Consciousness (126148)

Logan S. McCarty
Andrew Berry

2015 Fall (4 Credits) Schedule: MWF 0930 AM - 1059 AM
Instructor Permissions: Instructor Enrollment Cap: 60

This course views life through multiple lenses. Quantum physics involves uncertainty and randomness, and yet paradoxically it explains the stability of molecules, such as DNA, that encode information and are critical to life. Thermodynamics is about the universe’s ever increasing disorder, and yet living systems remain ordered and intact. This course will examine how these physical laws underpin life and how life itself has diversified since originating 3.5 billion years ago.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Science of Living Systems, but not both.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. See the course website for more details.

Science of Physical Universe  21

Stellar Understanding of the Cosmos (114190)

Jonathan Grindlay

2015 Fall (4 Credits) Schedule: MW 0100 PM - 0229 PM

Instructor Permissions: Instructor Enrollment Cap: 21

Direct measurements of the stars and Sun with telescopes at the Science Center to learn how we can understand our solar system, Galaxy and the distant Universe from stars, the basic building blocks and markers of cosmic evolution. In small sections, students conduct both visual and computer-assisted telescope observations to measure key properties of stars and formulate their own cosmic understanding from simple physical laws. Solar observations are done in class on clear days; stellar observations use the 16in computer-controlled Clay Telescope on the Science Center rooftop in weekly 1hour evening sections, which include data analysis and discussion of lecture and readings.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Science of Physical Universe  22

The Unity of Science: From the Big Bang to the Brontosaurus and Beyond (126149)

Irwin Shapiro

2016 Spring (4 Credits) Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: None Enrollment Cap: n/a

Science is like well-woven, ever-expanding fabric, designed to (un)cover Nature's secrets. This course emphasizes the strong connections between subfields of science, showing it as the never-ending and greatest detective story ever told, with evidence always the arbiter. These characteristics are exhibited in the semi-historical treatment of three themes: unveiling the universe, the earth and its fossils, and the story of life.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Science of Living Systems, but not both.

Science of Physical Universe   25

Energy and Climate: Vision for the Future (120031)

Michael McElroy

2016 Spring (4 Credits)  Schedule:  MW 0100 PM - 0229 PM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

The climate of our planet is changing at a rate unprecedented in human history. Primarily responsible is the build-up of heat-trapping gases in the atmosphere, most notably carbon dioxide emitted in conjunction with the combustion of coal, oil and natural gas. Concentrations in the atmosphere of CO2 are higher now than at any time over at least the past 850,000 years, higher arguably than at any time since dinosaurs roamed the planet 50 million years ago. The course will provide a perspective on what we may expect in the way of future climate change if we fail to take action – more violent storms, extremes of precipitation, heat waves, pressures on food production, and an inexorable rise in sea level. It will survey the energy choices available should we elect to take action to minimize future damage to the climate system. Special attention will be directed to the challenges and opportunities confronting China and the US, the world’s two largest current emitters. The overall goal will be to develop a vision for a more sustainable environmental future, one in which energy is supplied not by climate-altering fossils fuels but rather by zero carbon alternatives such as wind, solar, hydro, geothermal, tidal and nuclear.

Course Notes:  Students who have taken Science A-52 may not take this course for credit.

Class Notes:  If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Recommended Prep:  Students are expected to have a background of high school algebra and trigonometry.

Science of Physical Universe   27

Science and Cooking: From Haute Cuisine to Soft Matter Science (126638)

Michael P. Brenner
Pia Sorensen

2015 Fall (4 Credits)  Schedule:  TR 0100 PM - 0229 PM

Instructor Permissions:  Department  Enrollment Cap:  n/a

This course is a collaboration between world-class chefs and Harvard professors. Each week, a chef will lecture about some aspect of gastronomy. This lecture will introduce and motivate a lecture about the science of soft materials by a Harvard professor. The course will cover the basic concepts in the science of soft materials, providing a solid understanding of their properties and behavior. All food is made of soft materials, and cooking relies on many of their fundamental properties. The course will also include laboratory work that uses concepts of
cooking to understand and motivate experimental measurements on soft materials.

**Course Notes:** Occasionally there will be an optional 15-30 minute question and answer session with visiting chefs.

**Class Notes:** If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

**Science of Physical Universe 29**

The Climate-Energy Challenge (126633)

*Daniel Schrag*

2015 Fall (4 Credits)  
**Schedule:** MW 0900 AM - 0959 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 75

This course will examine future climate change in the context of Earth history, and then consider various strategies for what might be done to deal with it. The likely impacts of continued greenhouse gas emissions will be explored, emphasizing the scientific uncertainties associated with various predictions, and how this can be understood in the context of risk. In the latter third of the class, the question of how to mitigate climate change will be discussed, including an examination of various options for advanced energy systems.

**Class Notes:** If student interest exceeds the course limit, a random lottery will be conducted. See the course website for more details.

**Science of Physical Universe 30**

Life as a Planetary Phenomenon (120881)

*Dimiter Sasselov*

2016 Spring (4 Credits)  
**Schedule:** TR 1130 AM - 1259 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This course considers the relationship between life and the planet on which it resides. It examines the scientific quest to understand where life might thrive beyond Earth. On Earth, life was born of planetary processes and has
been sustained by plate tectonics and other physical processes. Through evolution, life has in fact emerged as major influence on our planet's surface. Fundamental features of terrestrial life and evolution are addressed in the context of astronomy, planetary physics and chemistry. These, in turn, provide a basis for the exploration for other habitable planets, both within our solar system and in the greater universe.

Energy Resources and the Environment (156316)

John Shaw

2016 Spring (4 Credits) Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: Instructor Enrollment Cap: 105

The course provides an overview of the energy resources that we use to sustain our global economies, and explores the impact of these activities on our environment. We address the full life cycle of each energy resource, including its origins, methods used to explore for and exploit it, how it is used in our economies, and the environmental impacts of these activities. Topics include coal, petroleum (conventional and unconventional), nuclear power, geothermal systems, and renewable energy options (hydro, tidal, solar, wind power). Lectures and labs will introduce students to data and methods used in these energy and environmental sectors.

Course Notes: This course is similar in content to EPS 109. Interested students may want to consult the Q evaluations from that course. Students who took EPS 109 may not take this course for credit.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Subject: Societies of the World

Societies of the World  12

China (142451)

Peter K. Bol
Modern China presents a dual image: a society transforming itself through economic development and infrastructure investment that aspires to global leadership; and the world's largest and oldest bureaucratic state, with multiple traditions in its cultural, economic, and political life. The modern society and state that is emerging in China will bear the indelible imprint of China's historical experience, of its patterns of philosophy and religion, and of its social and political thought. These themes are discussed in order to understand China in the 21st century and as a great world civilization that developed along lines different from those of the Mediterranean. This year the course introduces a variety of new online learning features.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: This course will meet on the first two Thursdays of the semester, in addition to the first Tuesday. After that the course will only meet on Tuesdays for the remainder of the term.

Societies of the World 13

Japan in Asia and the World (142657)

Andrew Gordon
David Howell

2016 Spring (4 Credits) Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None Enrollment Cap: n/a

Japan is a collection of islands, but its past and present unfolds through continuous interaction with wider worlds. This course places Japan in contexts of Asian and global history. It begins with the people, institutions, and ideas of premodern Japan, from the emergence of a court-centered state 1500 years ago to a warrior-dominated society centuries later. We then examine the tumultuous process of change from the 19th century through the present and explore how people in Japan have dealt with the dilemmas of modernity that challenge us all.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The British Empire (125049)

Maya Jasanoff

2015 Fall (4 Credits)  

Schedule:  

MW 1000 AM - 1059 AM

Instructor Permissions:  

Enrollment Cap: 180

Less than a century ago the British Empire ruled a quarter of the world. This course surveys the empire's extraordinary rise and fall from the American Revolution to World War II. Course presents a narrative of key events and personalities, introduces major concepts in the study of global history, and considers the empire's political and cultural legacies for the world today. Includes multimedia presentations, in-class discussion and debate, and engaging readings ranging from Niall Ferguson to Mahatma Gandhi.

Course Notes:  

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:  

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Global Health Challenges: Complexities of Evidence-Based Policy (126193)

2016 Spring (4 Credits)  

Schedule:  

Instructor Permissions:  

Enrollment Cap: n/a

This course introduces the global health challenges posed by failure to adequately reduce infections, malnutrition, and maternal-child health problems in the most vulnerable populations, escalating rates of non-communicable diseases/injuries, and emerging health risks that cross national boundaries. We will assess social responses to these challenges at the community, national, and global levels. Through an understanding of population health measures, we will examine patterns of disease/mortality between and within countries, capture important time trends, and identify determinants of health inequalities. While emphasizing science driven policy, comparative case examples will illuminate influential systemic factors, health system performance, and the economic/social/political climate.

Course Notes:  

This course, when taken for a letter grade, meets the General Education requirement for either Societies of the World or Empirical and Mathematical Reasoning, but not both.
Case Studies in Global Health: Biosocial Perspectives (124127)

Arthur Kleinman
Paul Farmer
Anne Becker
Salmaan Keshavjee

2015 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: Instructor
Enrollment Cap: n/a

Examines, through lectures and case-based discussions, a collection of global health problems rooted in rapidly changing social structures that transcend national and other administrative boundaries. Students will explore case studies (addressing AIDS, tuberculosis, mental illness, and other topics) and a diverse literature (including epidemiology, anthropology, history, and clinical medicine), focusing on how a broad biosocial analysis might improve the delivery of services designed to lessen the burden of disease, especially among those living in poverty.

Course Notes: Course counts as Social Anthropology.
Class Notes: This course will not be offered in Fall 2016.

The Two Koreas (116999)

Carter Eckert

2016 Spring (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Instructor
Enrollment Cap: 108

This course seeks to provide a broad historical context in which to understand the contemporary political division on the Korean peninsula. It examines key historical forces that have created and shaped the two Koreas before, during, and after the actual partition of the country in 1945. Topics include nascent nation-building efforts between 1876 and 1910, the impact of Japanese colonialism and the Cold War, and North/South development and interaction after 1948. The course interweaves political, socioeconomic, and cultural themes within an historical framework centered on nation-building while also highlighting a number of major historiographical issues in modern Korean history.
Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Moctezuma's Mexico: Then and Now (112754)

*David L. Carrasco*  
*William Fash*

2015 Fall (4 Credits)  
**Schedule:** TR 1000 AM - 1059 AM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a  

Explorations of the mythical and social origins, glory days and political collapse of the Aztec Empire and Maya civilizations followed by study of the sexual, religious and racial interactions of the "Great Encounter" between Mesoamerica and Europe. Focus on the archaeology, cosmovision, human sacrifice, divine kingship, the mystery of 2012 and rebellion in Mesoamerican cities and in colonialism. Hands-on work with objects at the Peabody Museum aid in examining new concepts of race, nation and the persistence of Moctezuma's Mexico in Latino identities in the Mexico-US Borderlands.

**Course Notes:** Offered jointly with the Divinity School as 3158. This course, when taken for a letter grade, meets the General Education requirement for Societies of the World or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

### Societies of the World  31

Political Economy After The Crisis (126203)

*Roberito Mangabeira Unger*
Alternative ways of thinking about contemporary market economies and their reconstruction, explored in three contexts: the recent world financial and economic crisis and the struggle for recovery, the effort to advance socially inclusive economic growth in rich as well as in developing countries, and the character and consequences of globalization. We explore the ideas that can best help us understand how contemporary economies work and how they can be reformed, especially in the interest of innovation and inclusion. Readings drawn from the classic and contemporary literatures of economics, politics, and law.

Course Notes: Previous acquaintance with economics useful but no pre-requisite. Jointly offered with the Law School.

Tokyo (117529)

Theodore Bestor

2015 Fall (4 Credits) Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Tokyo has been one of the world's great metropolitan centers since the 17th century, both the urban hub of Japanese society and culture, and the place where Japanese domestic society and global influences have intersected. This course examines trajectories of change in Tokyo's urban culture, lifestyles, social structure, and spatial environment across the city's history, using ethnography, history, literature, diaries, architecture, photography, art, cartography, animation, film and the Internet to explore Tokyo as an urban culture in comparative perspectives drawn from anthropology, history, and other social sciences.

Course Notes: Graduate students interested in this course should enroll in Anthropology 2682, which requires permission of the instructor. This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Societies of the World, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: Occasional Fridays are required. Please check course syllabus for details.

The Caribbean: Globalization, Socio-Economic Development & Cultural Adaptation (118290)

Orlando Patterson

2015 Fall (4 Credits)  Schedule:  TR 1100 AM - 1159 AM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Caribbean societies are largely the economic and political creations of Western imperial powers and are among the earliest products of globalization. Though in the West, they are only partly of it, and their popular cultures are highly original blends of African, European and Asian forms. The course examines the area as a system emerging through genocide, piracy, plantation slavery, colonialism and globalization, from a situation of great social and cultural diversity to the present tendency toward socio-economic and cultural convergence. Patterns of underdevelopment and government are explored through national case studies (Puerto Rico, Cuba, Jamaica & Haiti) and selected, region-wide modern issues (hurricanes, earthquakes and other natural disasters; migration & transnationalism; crime & drug trafficking), as are cultural adaptations through studies of Afro-Caribbean religions, folkways, and music. America’s special role in the region is emphasized.

Course Notes:  This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Pyramid Schemes: The Archaeological History of Ancient Egypt (126641)

Peter Der Manuelian

2016 Spring (4 Credits)  Schedule:  MW 1100 AM - 1159 AM

Instructor Permissions:  None  Enrollment Cap:  n/a

Surveys ancient Egyptian pharaonic civilization. Emphasizes Egyptian material culture: pyramids, temples, tombs, settlements, and artifacts. Explores major developmental themes that defined the Egyptian state: the geographical landscape, kingship, social stratification, and religion. Follows a chronological path with excursions into Egyptian art, history, politics, religion, literature, and language (hieroglyphs). Also touches on contemporary issues of object repatriation, archaeology and cultural nationalism, and the evolution of modern Egyptology. Includes field trips to the Egyptian collections of the Peabody Museum and the Museum of Fine Arts, Boston, along with immersive 3D computer models in Harvard’s Visualization Center. No prior experience in Egyptology expected.

Course Notes:  This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Incas: The Last Great Empire of Pre-Columbian South America (117137)

Gary Urton

2016 Spring (4 Credits) Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None Enrollment Cap: n/a

This course guides students on an exploration of the largest and most complex civilization of Pre-Columbian America - the Inca Empire of Andean South America. We will address such questions as how did a civilization emerge and thrive at 12,000 feet above sea level? How could a state-level society exist without markets, the wheel, or writing? In addition to lectures and discussions, students will experience the products of Inca civilization through hands-on study of artifacts in the Peabody Museum of Archaeology and Ethnology.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Medieval Europe (113789)

Michael McCormick

2015 Fall (4 Credits) Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

From the ruins of the ancient world, women and men created a new civilization: Europe. Combining history, archaeology and science, this course examines the extraordinary transformations of belief systems, warfare, technology, law and government, business practices, food production, disease and climate in the Middle Ages, between the fall of Rome and the Italian Renaissance. Themes include the spread of Christianity, the challenge of Islam, the Vikings, Crusades, feudalism, Europe's economic rise and the Black Death.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Societies of the World or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Human Trafficking, Slavery and Abolition in the Modern World (127538)

Orlando Patterson

2016 Spring (4 Credits)  Schedule:  TR 1100 AM - 1159 AM
Instructor Permissions:  None  Enrollment Cap:  n/a

This course surveys the nature, types and extent of modern servitude, distinguishing broadly between those resulting from international trafficking such as trans-national prostitution, human smuggling into bonded labor, child soldiering and organ trafficking, and more intra-national forms such as debt-bondage and the domestic exploitation of women and other vulnerable groups. Examines the conceptual and theoretical issues raised in attempts to distinguish among these types of differential power relations; the empirical difficulties of estimating the magnitude of what are inherently secretive processes; and the ideological controversies surrounding the subject. Explores ethical, socio- political and practical issues raised by these trends.

Contemporary Developing Countries: Entrepreneurial Solutions to Intractable Problems (107464)

Tarun Khanna

2015 Fall (4 Credits)  

Instructor Permissions:  Instructor  

Enrollment Cap:  n/a

This course will provide a framework (and multiple lenses) through which to think about the salient economic and social problems of the five billion people of the developing world, and to work in a team setting toward identifying entrepreneurial solutions to such problems. Case study discussions will cover challenges and solutions in fields as diverse as health, education, technology, urban planning, and arts and the humanities. The modules themselves will be team-taught by faculty from engineering, the arts, urban design, healthcare and business. The course will embrace a bias toward action by enabling students to understand the potential of individual agency in addressing these problems. All students will participate in the development of a business plan or grant proposal to tackle their chosen problem in a specific developing country/region, emphasizing the importance of contextualizing the entrepreneurial intervention. The student-team will ideally be comprised of students with diverse backgrounds from across the University.

Course Notes:  Offered jointly with the Business School as 1266, the School of Public Health as GHP 568, the Kennedy School as PED-338, the Law School as HLS 2543 and the Graduate School of Education as A-819.

The Worlds of Business in Modern China (108854)

William Kirby

2016 Spring (4 Credits)  Schedule:  MW 1000 AM - 1059 AM
Instructor Permissions:  Instructor  Enrollment Cap:  60

China was home to the world's largest economy two centuries ago. Within two decades it will be the world's largest economy again. This course uses business as a lens through which to study modern China. Using new Harvard Business School cases, we explore traditional family firms and internet startups; state-owned enterprises and their private-sector challengers; and the catalytic role of Hong Kong, Taiwan, and foreign enterprise in shaping contemporary China. Case studies cast light on larger themes: the role of party and government (national and local) in business and society; the legal environment; and the global impact of China's development.

Class Notes:  If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Islam and Politics in the Modern Middle East (126908)

Malika Zeghal

2015 Fall (4 Credits)  Schedule:  MW 1000 AM - 1059 AM
Instructor Permissions:  Instructor  Enrollment Cap:  72

This course examines the origins, ideologies, and political strategies of twentieth and twenty-first century Islamist movements in the Middle East and beyond. We will pay particular attention to the evolution of these movements in the larger historical and political context, up to and including the Arab Spring. We will use primary sources in translation and in Arabic (for those with reading proficiency). There are no language or other prerequisites for this class.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. Graduate students interested in this course should take Religion 1080 (Modern States, Islam, and Politics) instead. Sections offered in English or Arabic.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.
Subject: United States in the World

United States in the World   11
U.S. Health Care Policy (125751)
Amitabh Chandra
2016 Spring (4 Credits)                       Schedule:            MW 0100 PM - 0229 PM
Instructor Permissions: Instructor           Enrollment Cap:       100
This course provides an overview of the U.S. health care system in historical and international perspective, and engages students in critically analyzing health policy issues. The course is focused around three complex and interdependent policy challenges that every health system must address: ensuring access to health care, paying for new innovations, and improving quality. Using primarily an economic lens, students will grapple with the complexity of the issues, learn to analyze policy arguments, evaluate evidence, identify tradeoffs, and recognize the limits of economic analysis - critical skills for engaging constructively as informed citizens in a wide range of policy debates.

Course Notes:                Students who have taken General Education 186 or Extra-Departmental Courses 186 may not take this course for credit.

Class Notes:                If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Offered jointly with the the Kennedy School as SUP-501.

Requirements:               Anti-Req: Cannot be taken for credit if GEN-ED 186 has been taken.

United States in the World   19
American Food: A Global History (126205)
Joyce Chaplin
2016 Spring (4 Credits)                       Schedule:            TR 1200 PM - 1259 PM
Instructor Permissions: Instructor           Enrollment Cap:       n/a
Europeans “discovered” America in search of foodstuffs, specifically spices. And food has been central to the American experience from the starving time in early Virginia to the problem of obesity in the United States today. But what is American about American food? How have individual food choices and national food policies connected Americans to the larger world, both the social worlds of other human beings and the natural world of all other living beings?

**Course Notes:** This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

### United States in the World  24

**Reinventing (and Reimagining) Boston: The Changing American City (122320)**

_David Luberoff_

_Matthew Kaliner_

2015 Fall (4 Credits) **Schedule:** TR 0100 PM - 0229 PM

**Instructor Permissions:** Instructor **Enrollment Cap:** n/a

This multi-disciplinary course uses Boston's dramatic economic, demographic, and physical transformations over the last several decades to help students better appreciate, understand and participate in contemporary urban life. In particular, it explores four central questions at the heart of any conversation about any city. "How do things work? What do they mean? How do things get done and how should they get done?" To answer these questions, the course draws on a wide number of sources and disciplines, as well as presentations by notable local practitioners, student visits to different parts of Boston, and a variety of writing assignments. In all of that work, we take seriously that studying a city—and teaching a Gen Ed course—is an exercise in dissonance, plurality, and negotiation.

**Course Notes:** This course, when taken for a letter grade, may be counted for introductory Sociology concentration requirement.

### United States in the World  29

**Designing the American City: Civic Aspirations and Urban Form (116243)**

_Alex Krieger_

2016 Spring (4 Credits) **Schedule:** TR 0100 PM - 0159 PM

**Instructor Permissions:** None **Enrollment Cap:** n/a
An interpretive look at the American city in terms of changing attitudes toward urban life. City and suburb are experienced as the product of design and planning decisions informed by cultural and economic forces, and in relationship to utopian and pragmatic efforts to reinterpret urban traditions in search of contemporary alternatives. Topics include: persistent ideals such as the single-family home, attitudes toward public and private space, the rise of suburbs and suburban sprawl, cycles of disinvestment and renewed interest in urban centers, and impacts of mobility and technology on settlement patterns.

Course Notes: Offered jointly with the Graduate School of Design as DES 0330200. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

**United States in the World 34**

The Civil War from Nat Turner to Birth of a Nation (128327)

*John Stauffer*

2016 Spring (4 Credits)  
**Schedule:** MW 1200 PM - 1259 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a  

This interdisciplinary course reframes traditional understandings of the Civil War in three ways. First, by showing that civil conflict in the United States began well before 1861 and ended well after 1865, taking the form of slave uprisings and Klan terrorism, as well as conventional war. Second, by showing that the former Confederacy won this longer Civil War by establishing a new order of black freedom. And third, by placing this war in the context of international politics and trade. "Readings" range from fiction, film, letters, and speeches to poetry, pamphlets, prints and photographs, songs, and history.

**Course Notes:** This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

**United States in the World 35**

Dilemmas of Equity and Excellence in American K-12 Education (107341)

*Katherine K. Merseth*

2016 Spring (4 Credits)  
**Schedule:** TR 1130 AM - 1259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 75
Events such as Teach for America's 20th anniversary and films like Waiting for Superman highlight urgent concerns about the quality and reach of American schooling in the 21st century. Against this backdrop, the course grapples with several dilemmas that have defined American K-12 education throughout history. What constitutes educational excellence? Can excellence be achieved for everyone? Why do we have schools and what is their purpose? Given that families, politicians, and the courts often disagree vehemently about the answers to these questions, the course considers who and what will define the future of American education and its role in society.

Class Notes: US-WORLD 35 will be offered twice in Spring 2016 (Tu, Th 10:00-11:30 and Tu, Th 11:30-1:00). Students must register for and attend only one of the two offerings.

See the course website for more details about the lottery process for this course.

United States in the World 36

Innovation and Entrepreneurship: American Experience in Comparative Perspective (107712)

David L. Ager

Mihir Desai

2015 Fall (4 Credits) Schedule: MW 0330 PM - 0459 PM

Instructor Permissions: Instructor Enrollment Cap: 95

What gives rise to entrepreneurial opportunity and innovative activity? How do innovators and entrepreneurs think about the world? How are organizations born and how do they grow? How can innovation and entrepreneurship address the major challenges facing the world? The course will address these questions by bringing together faculty members of Harvard University to provide a diverse set of perspectives on the nature of innovation and entrepreneurship. The course has three complementary pedagogical methods. Members of the Harvard Business School faculty will provide a set of interactive lectures using case studies that illustrate how for-profit and not-for-profit organizations recognize and capitalize on opportunities. Second, faculty members from around the University will provide lectures on specific areas related to their expertise. Third, a set of group projects that allow students to work in the field with sponsoring organizations will be completed over the course of the semester.

Course Notes: Unlike other General Education courses, this course assumes advanced coursework in a relevant social science and thus is open to freshmen only with permission of the instructor.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

United States in the World  38
Forced to be Free: Americans as Occupiers and Nation-Builders (108359)
Andrew Gordon
Erez Manela
2015 Fall (4 Credits) Schedule: TR 1100 AM - 1159 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

The United States has launched numerous projects of military occupation and nation-building in foreign lands since the late 19th century. These have been contradictory enterprises, carrying ideals of freedom and self-determination "offered" by force or by fiat. This course will assess the meanings and legacies of these projects by examining the ideas, strategies, policies, and outcomes of occupations ranging from the Philippines and Haiti early on, to Japan, Germany, and Korea in mid-century to, most recently, Afghanistan and Iraq. The course focuses on American activities and ideas but also examines the responses of the occupied.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

United States in the World  39
History of American Democracy (109544)
David Moss
2015 Fall (4 Credits) Schedule: MW 0330 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: 78

Today we often hear that American democracy is broken—but what does a healthy democracy look like? How has American democratic governance functioned in the past, and how has it changed over time? This course approaches American history with these questions in mind. Based on the case method, each short reading will introduce students to a different critical episode in the development of American democracy, from drafting of the Constitution to contemporary fights over same-sex marriage. The discussion-based classes will encourage students to challenge each other’s assumptions about democratic values and practices, and draw their own conclusions about what "democracy" means in America.

Course Notes: Offered jointly with the Business School as 1139. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: PREPARATION REQUIRED for first day of class. Please see the course website for specific requirements. If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted
by the lottery; all students will be notified of their results. See the course website for more details.

United States in the World  41

Power and Protest: The United States in the World of the 1960s (125516)

Lisa McGirr

2016 Spring (4 Credits)  

Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: None  

Enrollment Cap: n/a

This course charts the key events, actors, ideas and strategies of collective movements for social change during the "long 1960s." It situates these mobilizations within the key economic, social and political developments in the post-World War II period in the United States and the world. Topics include Cold War politics from Eisenhower to Nixon, the civil rights movement, the new left, the women's movement, the war in Vietnam, black power, as well as the emergence of a revitalized political Right. The legacies of these movements and the more recent economic and political shifts that have challenged some of their core assumptions are also considered.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

This course is designed to further students’ spoken and written German at the advanced level. Students will analyze and practice the stylistic and rhetorical features of various written and spoken genres. By focusing on aspects of contemporary society in the German-speaking countries, students will broaden and refine their vocabulary and idiom, become sensitized to different registers, as well as hone points of grammar.

Course Notes:  

Conducted in German.

Recommended Prep:  

German 61, equivalent preparation, or permission of the instructor.

Germany and Europe: Heimat, Exile, Return (160494)

Dania Hueckmann

2016 Spring (4 Credits)  

Schedule:  

TR 1130 AM - 1259 PM

Instructor Permissions:  

Instructor

Enrollment Cap:   

30

This course discusses 20th and 21st Century German culture and poetics in dialogue and dispute with its European neighbors. Particular emphasis will be put on the effect of history on contemporary political, cultural and historical issues. How did the rest of Europe react to the German unification? How does Germany relate to its „Gastarbeiter“ today? This course is designed to provide students with the ability to gain insights into how personal and collective identity is constructed and problematized through art and culture. In this interdisciplinary course we will work with a variety of written genre (poetry, short stories, plays, essays, journalistic non-fiction), as well as visual art, architecture, and film. The class is conducted entirely in German. We will take a cultural studies approach to understanding how to read effectively and interpret textual and visual materials.

German Literature, Culture, and Society (159603)
Dania Hueckmann
2015 Fall (4 Credits)  Schedule:  MW 1100 AM - 1159 AM
Instructor Permissions:  Instructor  Enrollment Cap:  30
This course examines the major social-political trends and tensions that have informed literature and culture in the German-speaking countries. Students will develop the language skills to discuss, analyze, and interpret a variety of texts and cultural phenomena from the 18th to the 21st centuries, with special attention to social theory and political critique. Our readings and discussions are organized around pairs of thinkers from literary Realism and filmic representations to recent political editorials. We will put thinkers in dialogue with one another who address the same issues from a different time, angle, or place. Further emphasis is placed on the history of ideas and how it contributes to current issues and debates. Readings range from Goethe and Hegel through Benjamin and Brecht, Kafka and Jelinek, Arendt and Adorno.

Course Notes:  Readings and discussion in German.

Social Dynamics in Twentieth-Century Modernism (159712)
Judith Ryan
2016 Spring (4 Credits) Schedule: M 0400 PM - 0559 PM
Instructor Permissions: Instructor Enrollment Cap: 30
The course explores the relationship between experimental German modernist texts and their representations of social dynamics. Why do these texts tend to focus on madmen, criminals, fanatics, outsiders, alongside various types of intellectuals? Texts are predominantly short, but one novel and a drama are also included. Authors treated: Schnitzler, Hofmannsthal, Carl Einstein, Rilke, Kafka, Thomas Mann, Döblin, Benn, and Musil. Theorists include Freud, Bahr, Weber, Simmel, Mannheim, Broch, Canetti and others.

Readings in German, discussion in English

German 146
The Ethics of Atheism: Marx, Nietzsche, Freud (126632)
Peter Burgard
2016 Spring (4 Credits) Schedule: T 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 40
Examines the Western secular tradition through the work of three seminal figures whose critiques of religion -- in social and political theory, philosophy, and psychoanalysis and anthropology -- are motivated by ethical concerns. Introductory readings of Kant and Feuerbach ground analysis of Marx's, Nietzsche's, and Freud's ethical atheism. Students do not develop or debate formulae for behavior, but rather become critically aware of ethical considerations that underlie actions and that are negotiated vis-à-vis prevailing moral codes. Readings include (some selections and some complete works): Kant, Prefaces to Religion within the Limits of Reason Alone; Feuerbach, The Essence of Christianity; Marx, Critique of Hegel's Philosophy in General, Introduction to Critique of Hegel's Philosophy of Right, On the Jewish Question, Theses on Feuerbach, Communist Manifesto; Nietzsche, On Truth and Lie in the Extra-Moral Sense, The Gay Science, Beyond Good and Evil, On the Genealogy of Morals, The Antichrist; Freud, Three Essays on the Theory of Sexuality, Totem and Taboo, The Future of an Illusion. The course is conducted as a large seminar with preparatory section meetings the afternoon or evening before the full seminar meeting.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Ethical Reasoning, but not both.

Class Notes: CLICK ON COURSE SITE TO ACCESS COURSE ISITE, THEN LOGIN TO COURSE ISITE.

German 170

Biopolitics and Vampire Aesthetics, 1716-2016 (156124)

Nicole Suetterlin

2016 Spring (4 Credits)  

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: None  

Enrollment Cap: n/a

This course traces the infamous bloodsucker's bite-marks through major periods of European literature from the 18th century to the present, exploring how the notion of vampirism is inextricably linked with the emergence of what Michel Foucault has famously called 'biopolitics' or 'bio-power'. Since the 18th century, institutions such as schools, clinics and prisons have exerted an increasing "hold over life" (Foucault), conditioning the ways in which we think and act. Why does the emergence of these modern institutions coincide precisely with the vampire's first appearance in European literature? Have the arts been defying the biopolitical hold over life by creating a vampiric aesthetics? We pursue these questions by engaging in a dialogue between literature, film, the natural sciences, and critical theory. Readings include canonical authors such as Goethe, Byron, Hoffmann, Baudelaire, Nietzsche, Stoker, Tawada.

Course Notes: Readings and discussions in English. Open to freshmen with permission of the instructor.
German 171
Case Studies - Law and Literature (160435)

Dania Hueckmann

2016 Spring (4 Credits)  
**Schedule:** M 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 30

This seminar examines the relationship between legal discourses and poetic representations of justice from the late 18th to the 21st Century. Can literature offer poetic justice when, as Schiller suggests, the legal system fails? Moreover, to what extent can literature adequately testify to historical events? Is fiction necessarily false testimony? Or is testimony fictional? Following an initial examination of Aeschylus’ Eumenides, where the vengeful furies yield power to the law, the course turns to modern depictions of criminals (Schiller, Goethe, Büchner, Kleist), holy justice (Droste-Hülshoff, Gotthelf), historical trials (Kippardt), and human rights (Arendt). We will conclude with the on-going debate about vengeance and forgiveness in literature and film (Wiesenthal, Améry, Tarantino).

With texts from Weimar Classicism, Romanticism, Realism and Modernism, the seminar offers a cultural-theoretical framework for reading each literary epoch alongside historical legal developments.

German 182
Music and German National Identity (125709)

Lisa Parkes

2015 Fall (4 Credits)  
**Schedule:** M 0100 PM - 0259 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Introduction to the relationship between ‘German’ music, history, society and politics. By analyzing texted (vocal) music in various settings - historical, political, filmic, literary - this course revisits important and often controversial moments in musical history that have shaped German cultural and national identity. Musical genres include the Lied, folk song, the choral symphony, opera, cabaret, post-war popular music, and contemporary hip-hop. Reading and listening in German and English; discussion in German. An ability to read musical notation is not required.

German 182
Modern Drama (114526)
Examines modern drama from Ibsen to Jelinek, tracing its structural transformations and devoting particular attention to the changing relation between the dramatic text, the idea of theater, and the stage itself. Works by Ibsen, Schnitzler, Kaiser, Pirandello, Brecht, Ionesco, Artaud, Beckett, Dürenmatt, Handke, Weiss, Müller, Wilson, and Jelinek. No knowledge of German required. All readings and discussions in English; German concentrators read the majority of texts in the original.

German 200
Dragons, Knights, Popes, and Whores - Medieval German for Absolute Beginners (135718)

Racha Kirakosian

2015 Fall (4 Credits)  Schedule:  W 0400 PM - 0559 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Diving into "The Real Game of Thrones", students will find out about medieval tales and history by the study of medieval German texts. We work closely with a range of primary sources (poetical, religious, scientific, historiographical, etc.), translating and analyzing them as well as discussing their cultural context. This course brings together historical linguistics, grammar, manuscript studies, literature, and culture and serves as a fundamental grounding for further readings in Middle High German. A workshop with medieval manuscripts at the Houghton Library is part of the course. This is a pre-requisite course for the Philosophical Mysticism class offered by the same professor in Spring Term 2016.

German 215
Philosophical Mysticism -- Meister Eckhart and His Influence on German Philosophy and Literature (120844)

Racha Kirakosian

2016 Spring (4 Credits)  Schedule:  W 0400 PM - 0559 PM
Instructor Permissions:  None  Enrollment Cap:  n/a
Modern Philosophy from Hegel to Heidegger and Derrida, and German literature from Novalis to Paul Celan and Ingeborg Bachmann has been highly influenced by so called "mystical" traditions. Meister Eckhart's philosophical mysticism played a major role in the history of modern thought. Reading the key texts written by him will provide the basis on which we will discuss their impact on 19th and 20th century authors and philosophers. We will explore the ways in which medieval mystical thought has shaped the modern discussion and formation of a concept of subjectivity.

Knowledge of Medieval German is required (offered in Fall Term 2015 as German 200).

Course Notes: Readings available in both German and English; discussions in English.

Literatur, Theorie, Wissen: E.T.A. Hoffmann (159641)

*Nicole Suetterlin*

2015 Fall (4 Credits)       Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor  Enrollment Cap: 30

Explores the fascinating œuvre of E.T.A. Hoffmann, using it as a case study for applying literary theories, on the one hand, and for investigating the history of knowledge (Wissensgeschichte), on the other. We thus engage with: the most widely-read German romantic author; salient methodologies such as hermeneutics, trauma theory, and deconstruction; major cultural and scientific developments around 1800, such as the birth of psychiatry, analytics of sexuality, and the innovation of new media.

Course Notes: Readings and discussions in German.

Robert Musil: Seminar (159642)

*Judith Ryan*

2015 Fall (4 Credits)       Schedule: M 0200 PM - 0359 PM

Instructor Permissions: Instructor  Enrollment Cap: 30
Alongside his shorter narrative works, the seminar will focus on Musil's famous novel *Der Mann ohne Eigenschaften* (1930-1942). At issue is his incorporation of contemporary science, philosophy, and psychology (as well as personal experiences) into his creative work, establishing a new form of "essayistic" fiction. Readings in German, discussion in English.

Skandal! Postmoderne und Dekonstruktion in Deutschland? (147287)

*Nicole Suetterlin*

2016 Spring (4 Credits)  
**Schedule:** T 1200 PM - 0159 PM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

When postmodernism and deconstruction hit 1960s Europe and the Americas, international opinion was divided between euphoria and resistance. Nowhere, however, did these 'scandalous' movements meet with more blatant rejection than in Germany, where they continue to do so. What accounts for German cultural anxieties about postmodern pluralists and deconstructive parasites? In this course we explore: postmodern German literature including Jelinek, Ransmayr, and Süskind; postmodernism's and deconstruction's controversial reception from Gadamer to Gumbrecht; salient deconstructive investigations into the German tradition, including Derrida on Kafka and de Man on Kleist.

**Course Notes:**  
Readings and discussions in German.

**German 272** Section: 1

Hermeneutics and the Philology of the Flesh (160387)

*John T. Hamilton*

2016 Spring (4 Credits)  
**Schedule:** F 0100 PM - 0259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 30

The course offers an historical overview of theories of interpretation from Luther to Gadamer and Merleau-Ponty, with specific focus on metaphors of incarnation, embodiment, and revelation. In tracking the shift from interpretation as an auxiliary art to hermeneutics as a philosophical universal, the literary readings broach questions concerning theories of the verbal sign,
understanding, self-consciousness, phenomenology, and the human condition - all in relation to the theological paradigms that have persistently motivated and shaped these investigations.

Rhetoric: Disciplines of Persuasion (Graduate Seminar in General Education) (159714)

2016 Spring (4 Credits)  
***Schedule:*** TBD

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

Examines rhetoric from Aristotle to the present. Addresses rhetoric in literature, philosophy, science, statistics, politics, journalism, art, film, and digital media. Explores how we communicate to and with one another, how we construct and present arguments, how we persuade and are persuaded. Seeks to understand better the rhetoric we use and to which we are subjected as well as the fact that we regularly use and are subjected to rhetoric.

**Course Notes:**  
The seminar will design and develop a General Education course on these themes for undergraduates. Open to undergraduates with permission of the instructor.

When requesting permission to enroll, please include the following information: your G year and field of study (for undergraduates, your class year and concentration), any previous study of rhetoric (not a prerequisite), the likelihood that you would actually enroll (expressed in whatever metric you prefer).

One Hundred Years of Scandinavian Cinema (159715)

*Agnes Broome*

2016 Spring (4 Credits)

**Schedule:**

W 1200 PM - 1259 PM  
M 1200 PM - 0159 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 30

This course explores Scandinavian cinema from the pioneers of the silent era to the globally successful hit films of the present day. Students will trace the development of Scandinavian cinema through the films of directors such as Viktor Sjöström, Carl Th. Dreyer, Lars von Trier, Ingmar Bergman and Lukas Moodysson and discover the profound influence the region's films have had, and continue to have, on filmmaking in America and the world.

**Course Notes:** Conducted in English.

Scandinavian  160A
Old Norse Language, Literature, and Culture: The Viking Legacy (118050)

Stephen Mitchell

2015 Fall (4 Credits)  Instructor Permissions:  Enrollment Cap:  12

Schedule:  W 1200 PM - 0159 PM

Introduction to the language and literary culture of medieval Scandinavia, emphasizing works treating the Viking Age and their valorization of an heroic ideal. In addition to basic language skills, students acquire familiarity with key...
critical tools of the field. Readings include skaldic poetry, selections from *Egils saga* and the Vinland sagas, and various runic monuments.

Intermediate Swedish: Childhood in Swedish Literature and Culture (112472)

Agnes Broome

2015 Fall (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: n/a

Sweden and Swedish Finland have produced some of the most translated and beloved works of children's fiction in the world. In this intermediate Swedish language course, we will review the essentials of Swedish grammar and vocabulary as we explore some of these classic works of children's fiction, film, and comic books and the aspects of
Swedish culture they illuminate. The final project for this class involves producing your own work of children's fiction or film.

**Course Notes:** Conducted in Swedish. Not open to auditors.

**Recommended Prep:** Prerequisite: Swedish Ab or equivalent.

Special Topics in Swedish Literature and Culture: Women of Letters (112953)

*Agnes Broome*

2016 Spring (4 Credits)  

**Schedule:** TR 1130 AM - 1259 PM

**Instructor Permissions:** None  

**Enrollment Cap:** n/a

In this fourth semester Swedish course, the theme is immigration and emigration from a Swedish perspective. We will be studying the Swedish emigration to America in the 19th century, both in fiction and through letters sent home to Sweden, the so-called amerikabrev. Modern day immigration will be discussed through recent authors who have written about their experiences moving to Sweden. We will also be following the political debate about immigration through reading news stories and opinion pieces.

**Course Notes:** Conducted in Swedish.

**Recommended Prep:** Prerequisite: Swedish Ba or equivalent.

The Quality of Health Care in America (114957)

Ashish Jha
Anupam Jena
2016 Spring (4 Credits) Schedule: TR 0430 PM - 0559 PM
Instructor Permissions: Instructor Enrollment Cap: 40

Offers information and experiences regarding most important issues and challenges in health care quality. Overview of the dimensions of quality of care, including outcomes, overuse, underuse, variation in practice patterns, errors and threats to patient safety, service flaws, and forms of waste. Each session focuses on one specific issue, exploring patterns of performance, data sources, costs, causes, and remedies. Explores desirable properties of health care systems that perform at high levels in many dimensions of quality.

Negotiation and Conflict Management: From the Interpersonal to the International (107669)

Daniel Shapiro
2015 Fall (4 Credits) Schedule: M 0200 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: 40

How can you best negotiate conflict in your own life? How should policymakers negotiate global conflict? Around the world, conflict imposes profound direct and indirect costs on global health and individual well-being, ranging from death and injury to trauma, the loss of social networks, and destabilization of political systems. Rather than focusing on how to address the aftermath of conflict and violence, this course examines theory and practical methods to prevent destructive conflict. Explores theory, frameworks, and tools developed to negotiate the substantive, emotional, and identity-based dimensions of conflict. Applies the theory to a diversity of real-life negotiations, ranging from interpersonal disputes between friends to international conflicts in the Middle East and elsewhere.

This highly interactive course aims to improve students' skill in resolving conflicts, and draws on a variety of learning methodologies, including lecture, case simulations, self-reflection exercises, and application of negotiation frameworks to conflicts depicted in movies. Students will have the opportunity to analyze firsthand case narratives of senior-level global leaders who have negotiated serious conflicts; these cases are part of an emerging Global Curriculum on Conflict Management spearheaded by the instructor, the Harvard International Negotiation Program, and the World Economic Forum.

Climate change, urbanization, and conflict mean that global disasters are on the rise. How should the world respond when disasters force people from their homes? How can we better help the world's refugees? This course examines the past, present, and future of the international humanitarian response system. We will explore how Doctors Without Borders, the United Nations, the Red Cross, and other aid agencies came to be and how global response standards, international humanitarian law, and new technologies are shaping worldwide disaster relief. Through interactive discussions and case studies, students will learn how aid workers interact with governments, militaries, and civil society to provide refugee aid. At the end of the course, students can choose to live the refugee experience during a large-scale, three-day outdoor simulated humanitarian crisis together with other students and professional aid workers from around the world.

Class Notes: The first meeting of GHHP 70 will be in Sever 203 on Thursday, January 28 from 1-3pm.

Research in Global Health and Health Policy (123102)

David Cutler

2016 Spring (4 Credits)  Schedule:  W 0330 PM - 0529 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

Explores research topics and methods that are critical to evaluating current issues in national and global health care policy. Students will develop and execute an original research project that utilizes quantitative or qualitative research approaches to studying a domestic and global health policy topic of their interest. Such topics may include: the elements of health care reform, cost containment, quality measurement and improvement, racial and ethnic disparities in care, politics of health care, comparative health systems, global health, and organizational influences on quality.

Course Notes:  This course fulfills the research requirement of the Secondary Field in Global Health and Health Policy and enrollment is ordinarily limited to seniors in the GHHP Secondary Field. Underclass GHHP students may petition to take the course if all other Secondary Field requirements have been met. Course is primarily taught by graduate students in the PhD in Health Policy program and guest lecturers. May not be taken pass/fail.

Foundations of Political Theory (124414)

Eric Beerbohm

2016 Spring (4 Credits)  Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None  Enrollment Cap: n/a

This course investigates the central problems of political theory that concern the justification of democracy. Is democratic rule the uniquely just form of collective decision-making? What political institutions best express the democratic values of equality, deliberation, and participation? What are the moral responsibilities of citizens - whose representatives exercise political power in their name? Is democracy a human right? Readings integrate contemporary work in political philosophy with canonical thinkers, including Plato, Aristotle, Rousseau, and J.S. Mill.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Foundations of Comparative Politics (117853)

George Soroka

2015 Fall (4 Credits)  Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: Instructor  Enrollment Cap: n/a

Provides an introduction to key concepts and theoretical approaches in comparative politics. Major themes include the causes of democratization, economic development, ethnic conflict, and social revolutions; as well as the role of the state, political institutions, and civil society. Examines and critically evaluates different theoretical approaches to politics including modernization, Marxist, cultural, institutionalist, and leadership-centered approaches. Compares cases from Africa, Asia, Europe, Middle East and Latin America to provide students with grounding in the basic tools of comparative analysis.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Societies of the World.

Class Notes: comparative_subfield
Government  30

American Government: A New Perspective (111813)

Paul Peterson

2015 Fall (4 Credits) 

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Provides an overview of contemporary American politics. It analyses the way in which recent changes in elections and media coverage have helped shape key aspects of American government, including the courts, Congress, and the Presidency, the workings of interest groups and political parties, and, also, the making of public policy. Permanent political campaigns have altered governmental institutions and processes. The course explains how and why.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for United States in the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: american_subfield

Introduction to Political Science Research Methods (123443)

Muhammet Bas

2016 Spring (4 Credits)  

Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: None  

Enrollment Cap: n/a

This class will introduce students to techniques used for research in the study of politics. Students will learn to think systematically about research design and causality, how data and theory fit together, and how to measure the quantities we care about. Students will learn a "toolbox" of methods—including statistical software—that enable them to execute their research plans. This class is highly recommended for those planning to write a senior thesis.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course must be taken for letter grade.

Research Practice in Quantitative Methods (108286)

Chiara Superti

2016 Spring (4 Credits)  

Schedule: M 1000 AM - 1159 AM

Instructor Permissions: Instructor  

Enrollment Cap: n/a

This class introduces students to a variety of statistical methods used to investigate political phenomena. We will address the principles behind these methods, their application, and their limitations. The course will be useful to those undertaking a quantitative methods thesis in Government, but not solely. Indeed, the course aims to provide anyone interested in political science with a proficient understanding of the intuitions behind several of the methods used to analyze political data and identify causal paths. By the end of the course, students will have acquired important analytical and practical skills and will be able to evaluate the quality and reliability of scholarly and journalistic work done using quantitative methods. Students will learn statistical software skills (STATA). For the course's final assignment, students will be given the choice between writing a research paper using data and writing a different kind of project more suitable to those who are not interested in writing a quantitative research paper.
Government 62

Research Practice in Qualitative Methods (108287)

Frances Hagopian

2016 Spring (4 Credits) Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

With the goal of preparing students to undertake original research, this course introduces students to basic principles and tools of qualitative research in the social sciences. Focus is on comparative research design and the principal tools of qualitative research. Topics examined include the pitfalls of selection bias, the logic of causal inference, measurement and conceptualization, and the potential of mixed methods. Research techniques covered are process tracing, analytic narratives, natural experiments, archival research, interviews, and ethnography.

Government 63

Topics and Resources in Political Theory (108285)

Michael Rosen

2016 Spring (4 Credits) Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course introduces students to some of the methodological approaches in contemporary political theory-philosophical and historical-by looking at analyses of the "just war." We then turn to other topics reflecting the individual interests of students who enroll. Designed to help participants to make the transition from being critical readers of political thought to being independent contributors to debate, the course will be especially useful for those considering writing a political theory thesis.

Is Democracy History or Destiny? (161203)

Marjorie Sa’Adah

2016 Spring (4 Credits) Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: 16

Democratic theory and practice emerged in specific historical circumstances. Those circumstances no longer exist, even in the countries where democratic government is most securely established. What then is democracy’s future? Is it history? Will China be democratic in fifty years? Will Egypt? Will the US? On what foundations does democratic government rest? How can we think intelligently about democracy’s recurrent crises and the enormous challenges of democratization?

Global Distributive Justice (126992)

Cheryl Brown Welch

2016 Spring (4 Credits) Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This course examines how concerns about socio-economic justice apply beyond the limits of the domestic state. Do we have reason to care about equality at the international level? If so, should we care about the relative standing of individuals, or of nation-states? Who, if anyone, is responsible for addressing global inequalities? Topics covered include the moral relevance of borders, natural resource distribution, immigration policy, climate change, the international status of women, and global institutional design.

Border Politics: Migration, Detention, and Il/legality (159826)

Alison Mountz

2015 Fall (4 Credits) Schedule: T 0100 PM - 0259 PM

Instructor Permissions: Instructor Enrollment Cap: 16

This course dwells in under-explored border spaces such as airport waiting zones, undocumented crossings, cross-border protests, and detention centers. US borders with Canada and México offer comparative platforms for discussion of border politics. Despite efforts to harmonize immigration and refugee/asylum policies, US residents and their neighbors to the north and south face distinct economic, cultural, historical, and political landscapes. Students will explore and interrogate border practices, policies, and struggles and debate contemporary migration politics.

Authority and Disobedience (159825)

Laura Valentini

2015 Fall (4 Credits) Schedule: W 1000 AM - 1159 AM

Instructor Permissions: Instructor Enrollment Cap: 16

This course examines the relationship between individuals and ‘governing agencies’—most prominently, the state—from an analytic political-theory perspective. The course is divided into two parts. Part I focuses on theories of legitimate political authority: it considers different answers to the question of what, if anything, grounds states’—and similar entities’—moral right to rule. Part II addresses the dilemmas raised by non-compliance with authority (topics covered might include civil disobedience, punishment, and revolution).

Democracy and Authoritarianism in Sub-Saharan Africa, 1950s - present (160372)

Cheryl Brown Welch

2015 Fall (4 Credits) Schedule: M 0200 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: 12

This course looks at broad trends in the political dynamics of sub-Saharan Africa. The first half focuses on the brief moment of political pluralism at Independence and then authoritarian politics during the Cold War. The second half
explores various aspects of multi-party politics since 1990. Students apply the theoretical concepts of each week to a country of their choosing. These exercises build in to a research prospectus due at the end of the semester.

Borders and Boundaries in International Relations (161248)

*Beth Simmons*

2016 Spring (4 Credits)  

**Schedule:** W 0400 PM - 0559 PM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 16

This seminar explores the meaning of borders and boundaries in international relations. How do borders, border regions, and border activities speak to national encounters with neighbors and the rest of the world? We will examine the meaning and function of boundary-making between states from multiple perspectives. Borders, border regions and border crossings have multiple significance as designations of state authority, security buffers, expressions of social meaning and opportunities for economic integration. Students will write brief reaction papers and will have the opportunity to participate in faculty research using satellite images and mapping technologies.

Casino Capitalism: Gambling, Finance, and the Ethics of Speculation (156441)

*Michael Sandel*

2015 Fall (4 Credits)  

**Schedule:** T 0200 PM - 0359 PM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 16

Is casino gambling morally objectionable? What about financial speculation? Are they morally on a par? The seminar will explore ethical controversies about various risk-taking activities, from lotteries to life insurance to hedge funds.

Comparing India and China: An Examination of State-Society Relations (160335)

*Nara Dillon*
In the late 1940s, India witnessed a peaceful transition to democracy, while China experienced a Communist revolution. After this divergence, both countries began pursuing market reforms in the 1980s and 1990s. We will explore the ways in which power has been consolidated and distributed under these very different regimes and the implications this has had for a range of socio-political and economic outcomes, including famine, economic development, and urbanization. Throughout the course we will place India and China in the context of comparative debates about other parts of the developing world.

To Vote or Not to Vote: voting behavior and electoral institutions (159827)

*Chiara Superti*

2015 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 16

What is voting? Why do people vote? And what institutions shape voting behaviors? This course addresses these questions by combining classical work on voting behavior with less known literature on voting as protest and identity affirmation. The course also investigates voting institutions (e.g., electoral systems and compulsory voting regulations), their pathologies (e.g., vote buying and electoral fraud) and their role in shaping voting behaviors.

Mapping Social and Environmental Space (123501)

*David Smith*

2016 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 16

This seminar will use mapping as a methodological technique to examine social and environmental issues. Students will be expected to use mapping software to examine spatial data for a location and topic of their choice for their final paper. Weekly discussions will be conducted in class on various mapping related topics. References will range from books like "How to lie with Maps" to current journal articles examining the use of GIS in social science.

Government 94ES
New European democracies: the 2016 Spanish democratic revolution in a comparative perspective (156725)

Jose Martinez sierra
2016 Spring (4 Credits) Schedule: M 0400 PM - 0559 PM
Instructor Permissions: Instructor Enrollment Cap: 16

This seminar aims to develop an in-depth understanding of modern Democracy’s discontent through the Spanish case study in a comparative perspective. In 40 years Spain has turned from being an exemplary model of transition to democracy to a leading example of disaffection with political and economic elites. The Indignados movement and two new political parties (Podemos and Ciudadanos) unexpectedly emerged and within two years have come to govern the largest cities (Barcelona, Madrid, and Valencia) and are becoming the most influential political parties in the most important regional governments (Andalucia, Madrid, and Valencia). Is this a model for democratic transformation in Europe? Can citizens really change traditional political party agendas or replace them?

Course Notes: This course will be conducted in Spanish.

Presidents, Governors, and Mayors: Chief Executive Power in Comparative Perspective (125238)

Carlos Diaz Rosillo
2015 Fall (4 Credits) Schedule: W 0700 PM - 0859 PM
Instructor Permissions: Instructor Enrollment Cap: 16

Analyzes the foundation, development, and exercise of chief executive power at the national, state, and local levels of government in the United States. Examines the applicability of different political science theories of presidential power to the broader exercise of chief executive power. Explores the sources and limits of executive authority, the roles and responsibilities of political chief executives at different levels of government, and the way in which institutions affect the exercise of chief executive power.

State-Society Relations in Latin America (109734)

*Alberto Vergara*

2016 Spring (4 Credits)  
**Schedule:** W 0400 PM - 0559 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 16
Although democracy has consolidated in much of LA, the region’s democracies diverge on many fronts. Why is civil society strong in some countries but not others? Why are states effective in some cases but weak in others? What explains the rise of powerful leftist and indigenous movements in some countries but not others? This seminar examines how evolving patterns of state-society relations underlie the “varieties of democracy” in contemporary Latin America, with a focus on Argentina, Bolivia, Mexico and Peru.

Government 94LG

Legalism (109736)

Nancy Rosenblum

2015 Fall (4 Credits)  
Instructor Permissions: Instructor  
Schedule: W 0200 PM - 0359 PM  
Enrollment Cap: 16

The course invites students to explore the distinctive characteristics of legalistic modes of thought and the moral justifications offered for legalism. We will also consider a variety of moral objections to legalism: the power of romantic resistance to rule-making and rule-following, “realism” and others. Legalistic practices and institutions - juries, university disciplinary committees, contracts, “truth commissions”, and others -- provide materials for reflecting on the use and misuse of rule-making and rule-following. Readings include political theory, literature, and court cases.

Government 94MH

Power, Politics, and the American City (160489)

Cheryl Brown Welch

2016 Spring (4 Credits)  
Schedule: R 0200 PM - 0359 PM  
Enrollment Cap: 12

This course intends to help revive the study of American cities as political entities. Pushing beyond the anecdotal accounts associated with city politics, the course applies modern political science methodology and new, continually evolving data to answer the fundamental question: Who has power in the American city? And, more importantly, what does this power mean for its citizens?
Government 94NL
Election Polling and Public Opinion (156488)

Chase Harrison

2015 Fall (4 Credits) Schedule: T 0600 PM - 0759 PM
Instructor Permissions: Instructor Enrollment Cap: 16

Political polls and other survey methodologies are frequently used to understand and explain both voter intentions and public opinion. This course will examine the theoretical and practical issues involved in using polls and surveys. We will explore the normative assumptions involved in polling, study possible sources of error in survey measures, and discuss the prospective implications of polling for policy and governance.

Law and Politics in Multicultural Democracies (128009)

Ofrit Liviatan

2015 Fall (4 Credits) Schedule: T 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 16

Examines the role of law in the governance of cultural diversity drawing on examples from the USA, Western Europe, India and Israel. Central themes at the intersection of law and politics will be explored, including: the impact of courts on rights protections, law's function as a venue of conflict resolution, and courts' relationship with other political institutions. Specific attention will be given to contemporary controversies such as Islamic veiling, abortion and same sex marriage.

Topics in American Public Law (160374)

Cheryl Brown Welch

2016 Spring (4 Credits) Schedule: T 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This course will explore topics in American public law, with a focus on how insights from political theory and political science can inform legal doctrine. Topics will include judicial review and the role of the court, theories of legal interpretation, the First Amendment's treatment of speech and religion, and different conceptions of equality under law. In addition to a final research paper, students will be required to complete short weekly assignments.

Background in American constitutional law is helpful, and preference for discretionary slots will be given to students who have taken Gov 1510 or otherwise have relevant background in the topic.
Government 94PT

Political Parties in Developed Democracies (156448)

-Colin Brown

2016 Spring (4 Credits) Schedule: T 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 16

This seminar will prepare students to think about political parties as institutional actors in political science, in the context of developed democracies. The first part of this course will focus on the origins of parties, using the American case to think more broadly about how parties form. The second part of the course will expand to cover different party systems in depth (the UK and the Netherlands) and different party families more broadly (social democrats, Christian democrats, green and radical right parties). Students will get a better understanding of what types of parties can and have existed, how parties are born, change and die, and how to use some of the more theoretical tools of political science in understanding party politics.

Class Notes:

Cheryl Welch and Colin Brown

Government 94PY

Revolution and Politics in Contemporary Iran (109733)

-Payam Mohseni

2015 Fall (4 Credits) Schedule: T 0400 PM - 0559 PM
Instructor Permissions: Instructor Enrollment Cap: 16

Iran is increasingly a significant power in the Middle East and a salient country to global affairs. Accordingly, this course examines the intricacies of Iranian politics since the 1979 revolution. It explores a broad range of topics including the causes of the Iranian revolution; the political implications of the Islamic regime's institutional architecture; the competitive factional dynamics within the ruling elite; Iranian foreign policy, Iran-US relations, and nuclear negotiations; and Shia political ideology.

Cyberpolitics (109738)

Ruxandra Paul

2016 Spring (4 Credits)  
Instructor Permissions: Instructor  
Schedule: T 0400 PM - 0559 PM  
Enrollment Cap: 16

This seminar examines how the digital age has transformed politics around the world, in democratic and authoritarian contexts. Information and communication technologies change how people, states, and non-state actors interact. Social media (Facebook, Twitter) facilitate information-sharing and collective action. Technology creates new access points and new vulnerabilities. The course includes four modules: e-Democracy (civic engagement, elections, accountability); Online Revolutions (resistance, repression, mobilization); Security (cyberwar, terrorism, hacking); and Beyond State Boundaries (international cooperation, diasporas, transnational activism).

Migration and Politics in the Era of Globalization (156443)

Ruxandra Paul

2015 Fall (4 Credits)  Schedule:  T 0400 PM - 0559 PM
Instructor Permissions:  Instructor  Enrollment Cap:  16

International migrations constantly reshape politics, markets and societies. They generate challenges and opportunities for people, communities, businesses, civil society organizations, political parties, governments and international institutions. This course examines the political, social and economic consequences of migrations around the world, in both sending and receiving countries. We will study the impact of migration on citizenship, sovereignty, political regimes and platforms, economic development, inequality, human capital, as well as on political values and participation.

Political Theory of Civil-Military Relations (160592)
Hugh Liebert
2016 Spring (4 Credits) Schedule: TR 0100 PM - 0159 PM
Instructor Permissions: None Enrollment Cap: n/a

Who shall guard the guardians? This course examines a series of answers to this question within the history of political thought and contemporary political science. We will explore the difference between soldiers and civilians, consider how variations in political regime and economic development shape relations between military and society, and examine recent "crises" in U.S. civil-military relations. Readings include Plato, Plutarch, Shakespeare, Machiavelli, Harrington, Huntington, and Feaver.

History and Freedom in German Idealism (123540)
Michael Rosen
2015 Fall (4 Credits) Schedule: TR 1000 AM - 1059 AM
Instructor Permissions: Instructor Enrollment Cap: n/a

The high period of German Idealism (from 1781, the date of the publication of Kant's Critique of Pure Reason, to the death of Hegel in 1831) is one of the most revolutionary in the history of philosophy. We shall study the period using the central ideas of history and freedom as our guide and trace how modern ideas regarding freedom, the self, and the historical character of knowledge have their origins in the Idealists' thought.

Progressive Alternatives: Institutional Reconstruction Today (125860)

Roberto Mangabeira Unger

2016 Spring (4 Credits)  Schedule:  T 0100 PM - 0259 PM
Instructor Permissions:  None  Enrollment Cap:  n/a

An exploration of the past and future agenda of progressives, whether self-described as liberals or as leftists. What should they propose, now that they no longer believe in the usefulness of governmental direction of the economy or in the sufficiency of redistributive social programs? How can democracies and markets be reorganized to suit progressive goals? Emphasis on the structural imagination about society and its institutional alternatives in which contemporary social science and political discourse are deficient. Readings from several disciplines and examples from many countries.
Government 1096
Legal Thought Now: Law and the Structure of Society (110223)

Roberto Mangabeira Unger

2016 Spring (4 Credits)  Schedule: M 0100 PM - 0259 PM
Instructor Permissions: None  Enrollment Cap: n/a

Law is the institutional form of the life of a people. It embodies the formative institutions and assumptions of society. But law is never a closed system: we can enlist its disharmonies in the service of reimagining and reform.

This course considers the character and consequences of a practice of legal analysis, couched in the language of purpose, policy, and principle, that has become dominant in the United States and in much of the world. It asks how we might change this practice to make it both more realistic about established law and more useful to the development of alternative futures for society. It provides an introduction to jurisprudence from the standpoint of an interest in transformation.

Course Notes: Offered jointly with the Law School as 2389. Meets at Law School.

**Political Geographies of Violence** (125958)

*Alison Mountz*

2016 Spring (4 Credits)  
**Schedule:** MW 0100 PM - 0159 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 35

Political geography explores relationships between politics and space. How does location, for example, influence how, where, and when political struggles unfold? What constitutes violence, and what framings (e.g., human security, structural violence) enhance understanding of its causes and effects? We will explore these questions through study of the political geographies of violence, understood from a variety of scales and locations: from local to transnational, embodied fears and small-scale acts to state-based conflicts.

**The Making of Modern Politics: The Development of Democracy in Europe from the Middle Ages to the Eu** (114770)

*Peter Hall*

2015 Fall (4 Credits)  
**Schedule:** TR 1130 AM - 1229 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

How are democracies created and why do they collapse? What causes revolution? What were the consequences of the industrial revolution? What roles do ideas, institutions and interests play in processes of political change? This course examines the long-term historical developments behind the creation of modern politics. Focusing on Britain, France, Germany and Italy from the 1600s to the 2000s, it explores the lessons Europe offers for the development of democracy.

**Course Notes:** This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Comparative Politics of the Middle East (142447)

*Melani Cammett*

2016 Spring (4 Credits)  

**Schedule:** TR 0100 PM - 0159 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

The Middle East is currently in the midst of a dramatic transformation since the Arab uprisings in 2011. This course situates the ongoing developments within the broader historical and political context of the region. It examines the politics of the Middle East through a variety of topics, including the modern state-building project, the legacy of empires and Western colonialism, Islam and politics, monarchies and authoritarianism, political economies, war and conflict, and the prospects for democratization.

Arab-Israeli Conflict (159678)

*Marjorie Sa’Adah*

2015 Fall (4 Credits)  

**Schedule:** TR 0100 PM - 0159 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

In this course, we will examine the several dimensions and levels (domestic, international) of the ongoing crisis in, around, and about Israel/Palestine. In what ways is the Arab-Israeli conflict central to broader political patterns in the region, and why has it proven so intractable? How have the various parties to the conflict defined its stakes, understood their interests, viewed their adversaries, mobilized support, and formulated policy? What possibilities does the future hold?

Politics in Brazil (109554)

Frances Hagopian
Introduces students to politics and political change in Latin America's largest country. Outlines historical perspectives and contemporary challenges, and examines political institutions, civil society, and contemporary politics and policy. Emphasis is on how institutional change, decentralization, and the mobilization of civil society have interacted to change the trajectory of Brazilian politics by deepening citizen participation, strengthening political parties and political representation, reforming social policy, guaranteeing citizenship rights, and ultimately reducing inequality and deepening democracy.

The Road to the White House (125228)

Carlos Diaz Rosillo

This course examines the role of presidential campaigns and elections in American politics. It studies the origins and evolution of the presidential selection process and explores how modern campaigns inform, influence, and mobilize voters. Topics to be studied include the role of political parties and candidates, campaign strategies and tactics, political advertising and media coverage, campaign finance and voter mobilization, and the transition from campaigning to governing. The 2016 campaign will be used as a laboratory in which to explore political science research on presidential campaigns and elections.

Models of Conflict in International Relations (109556)

Muhammet Bas

2016 Spring (4 Credits) Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None Enrollment Cap: n/a

This course is both a simple introduction to game theory, and a literature review of game theoretical approaches to the study of international conflict and war. Game theory is a tool for analyzing strategic interaction between rational actors. The course will feature games like the Prisoners' Dilemma, the Chicken, and models of bargaining. Students will learn how these and related tools can be used to understand and analyze historical and current instances of international conflict. Specifically, we will try to answer questions like: why do states fight costly wars in international relations? Why do peaceful negotiations fail? How does deterrence work? Why do states get into costly arms
races? How does domestic politics shape international conflict?

The Origins of Modern Wars (123775)

Stephen Walt

2016 Spring (4 Credits) Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None Enrollment Cap: n/a

This course explores the causes of war. It examines the different theories that have been devised to explain organized violence between states (or groups seeking to control a state), and evaluates these competing theories by exploring several major conflicts of the past 100 years: World War I, World War II, the Cold War, the Arab-Israeli conflict, and the recent wars in the Persian Gulf. The course also considers the phenomenon of ethnic conflict, the implications of nuclear weapons and the question of whether large-scale war is becoming "obsolete."

Course Notes: This course, when taken for a letter grade, meets the Core area requirement for Historical Study A.

*Graham Allison*

2015 Fall (4 Credits)  
**Schedule:** M 0415 PM - 0659 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 30

Using a series of case studies from the front page, and from the most urgent issues on the U.S. national security agenda, this course will engage students in grappling with the hardest American national security challenges of the decade ahead. Issues range from the Arab Awakening and intervention in civil wars to combating Iran's nuclear ambitions and dealing with the economic and military rise of China. Assignments require strategic thinking: analyzing dynamics of issues and developing strategies in a government whose deliberations are discombobulated by leaks, reports about internal differences among policymakers, and press analyses. Students will learn to devise strategies and write strategic options memos as participants in the policymaking process. Strategic options memos combine careful analysis and strategic imagination, on the one hand, with the necessity to communicate to major constituencies in order to sustain public support, on the other. A subtheme of the course explores coping with a world where a pervasive press makes secrecy more often the exception than the rule. In each case, there will be exploration of how media coverage affects decision making, with an examination of WikiLeaks, the revelations about drones and secret, American-led cyberattacks, and other examples of the publication of classified information. Because of time constraints, Mr. Sanger will be joining a limited number of class sessions, and will join some remotely.

**Course Notes:** Offered jointly with the Kennedy School as IGA-211.

**Class Notes:**  
*Classroom Location:* Land Hall, Belfer at Harvard Kennedy School.

This is a Monday only course. The course is not meeting on Wednesday, September 3. A make-up class will be held this Friday, September 5, from 4:15pm to 7pm in Land Hall, Harvard Kennedy School.

Causal Inference (111530)

Matthew Blackwell

2015 Fall (4 Credits)  
**Schedule:** R 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Substantive questions in empirical social science research are often causal. Does voter outreach increase turnout? Do political institutions affect economic development? Are job training programs effective? This class will introduce students to both the statistical theory and practice behind making these kinds of causal inferences. We will cover causal identification, potential outcomes, experiments, matching, regression, difference-in-differences, instrumental variables estimation, regression discontinuity designs, sensitivity analysis, dynamic causal inference, and more. The course will draw upon examples from political science, economics, sociology, law, public health, and public policy.

**Requirements:**  
Prerequisite: Government 2000 AND Government 2001 AND Course Open to Doctoral Students Only.

Government 2036

Athenian Democracy and its Critics (113985)

Danielle Allen

2016 Spring (4 Credits) Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course will open up ancient political thought and contemporary democratic theory through close study of Athenian politics and ideology and of the philosophical response. The ancient Athenians invented an unusually successful type of political regime and were remarkably self-conscious about what they were trying to do and how and why it worked. An important feature of their democracy was a largely sustained openness to ideas. The execution of Socrates was the exception not the rule, and dissent thrived in Athens. The philosophical work of Plato and Aristotle did not occur in isolation of or separation from the politics of the city. To an important extent, the ancient critics of Athens were also trying to cure it of what they saw as its failings. A study of key ancient Greek thinkers as critics of the democracy shines valuable light on their political theory generally. Importantly, it is only with the moderns—the Federalist Papers, Constant, Mill, Berlin, and even Rawls—that we find purely apolitical and theoretical criticism of ancient Athens. Their target is the Athenian ideal of political equality. By extending our study of critics of Athenian democracy into the contemporary period, we gain new insight about the place of the ideal of political equality in contemporary democratic theory and theories of justice.

Jeffry Frieden

2016 Spring (4 Credits)  
**Schedule:** TBD

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Intended for graduate students in the third year and above, this course welcomes scholarship of all types and on all aspects of political economy. Intended to provide a venue in which to develop and to debate work in progress. Part two of a two-part series; students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Government 3008A

Research Workshop in Political Theory (121718)

Harvey Mansfield
Government 3008B
Research Workshop in Political Theory (159969)

*Harvey Mansfield*

2016 Spring (4 Credits)  
**Schedule:** TBD

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

History
Subject: History

History 13C
St. Louis from Lewis and Clark to Michael Brown (159640)
Walter Johnson
2015 Fall (4 Credits) Schedule: W 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: 15
St. Louis was the epicenter of American empire in the nineteenth century: the point of embarkation for Lewis and Clark; the military headquarters for U.S. Indian wars. It was likewise central to the history of slavery: from the Missouri Compromise to Dred Scott. The city's intertwining of the history of empire and race continued through the twentieth century in its prominent role in the defense industry as well as the history of segregation, urban "redevelopment," and police violence. How does the global capitalist and imperialist history of St. Louis relate to its recalcitrant inequality, structural racism, and endemic violence?

History 13D
Iran's Revolutions (159592)
Afsaneh Najmabadi
2015 Fall (4 Credits) Schedule: M 0300 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: 15
Iran witnessed two major revolutions in the twentieth century; the Constitutional Revolution in the first decade of the twentieth Century and the Islamic Revolution of 1979. Starting with the 1979 revolution, this seminar journeys back in time (and then to the present) to offer an overview of modern Iranian history. We will examine the major social, cultural, and political characteristics of the 1979 Revolution in relation to the history of Iran in the twentieth century and from a comparative perspective between the two revolutionary moments. We will then return to the present by examining the nature of the state and society that has resulted from the 1979 revolution.

Women and Work in the United States (160424)

Elizabeth More

2016 Spring (4 Credits)  Schedule: R 0300 PM - 0459 PM

Instructor Permissions: Instructor  Enrollment Cap: 15

Women have always worked. But the content, conditions, and location of their work have changed drastically, moving from farmhouses, plantations, and family workshops to factories, offices, and private homes. This course explores the causes and consequences –social, cultural, political, and economic –of this transformation. Drawing on primary and secondary sources, we ask: How has the concept of "work" been gendered? What forces pushed or pulled women into the workforce? How has American society resisted or accommodated the rising numbers of mothers working outside the home? How has women's work been shaped by class, race, and ethnicity?

From Wastelands to Wal-Mart: U.S. Labor History in Global Perspective (160572)

Holger Droessler

2015 Fall (4 Credits)  Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor  Enrollment Cap: 15

People did not discover America, they made it. The goal of this reading seminar is to introduce students to the history of working people in North America and beyond. We will begin with labor systems among Native American societies prior to European contact and will conclude with current debates about the future of work and capitalism in the United States and elsewhere. Topics to be discussed include theories of labor and capital, settler colonialism, indentured servitude, slavery, socialism, the New Deal, the service economy, and global inequality.

Modern Japan's history from the Meiji Restoration through to the “Greater East Asia War” presents a dramatic
chronicle of empire building and national renovation in the crucible of war. We suspend the judgment of hindsight to
examine the ideology and war aims of the Japanese empire on its own terms, and place its creation, dynamics and
demise within global and international trends of imperialism, nationalism, and modernity. The course will familiarize
students with the narratives of modern Japanese history attentive to how and why Japan's wars shaped its twentieth
century, and provide a framework of understanding the impact of war on the foundations of contemporary East Asia.

Religion and Politics: India, 1800-2015 (160190)

*Mou Banerjee*

2015 Fall (4 Credits)  
**Schedule:**  
T 0200 PM - 0359 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

The course is an introduction to the role of religious faith in shaping political consciousness and action in India. It examines the interactions between Christianity, Hinduism and Islam in the subcontinent, in relation to the realities of colonial rule. These engagements shaped discourses on personal identity and civil law. The main focus will be on nineteenth and early twentieth century debates on the role of religion in modern nation-states. It concludes with a survey of contemporary critiques of secularism, conversion, citizenship, and the use of religious faith to incite political violence against minorities.

Gender, Money and Power in Colonial South Asia (161200)

*Catherine Warner*

2016 Spring (4 Credits)  
**Schedule:**  
M 0100 PM - 0259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This seminar considers economic change in South Asia in the nineteenth and early twentieth centuries through the lens of social, and especially gender, history. We will read primary and secondary sources to understand connections between gender and money as languages of power and domains of meaning. How, and to what extent, did colonial rule redefine monetary regimes and systems of gender relations in South Asia? Students will conduct original research exploring the intersection of economic and gender history in colonial South Asia.

Henry Kissinger: Statecraft in Theory and Practice (108495)

Niall Ferguson

2015 Fall (4 Credits)  Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor  Enrollment Cap: 15

As National Security Adviser and Secretary of State, Henry Kissinger was the architect of the policy of détente with the Soviet Union, of the "opening" to China, and of the effort to salvage "peace with honor" in Vietnam. Yet Kissinger should be understood as a scholar as well as a statesman. Using selections from his writings, this seminar will assess Kissinger in his own terms and in the context of modern international history.

History 92R
History Lab (109759)

Gabriel Pizzorno

2016 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

History Lab offers History concentrators and other students a chance to spend a semester working with History faculty on faculty research projects. Outcomes will include familiarity with a range of digital tools for research and data visualization and insights on how to design and execute a major research project. Students will be assessed on the basis of blogs and presentations of research assignments. Consult dighist.fas.harvard.edu for more details.
The emergence of the science of medicine and its professionalization have been integral aspects of human history. The history of medicine allows us to trace the various traditions that have come together to create "modern medicine." In this section, students will examine the human endeavor to be healthy and to cure disease. The practice of medicine draws on changing ideas about the natural world and the body. It also demands interventions in the physical environment so as to maximize public health, and readily incorporates transformative technologies from other sectors of human society. Students will be asked to reflect on the interaction of medicine and culture through questions such as: How did western powers use biomedicine in the context of empire? How do non-western cultures appropriate and indigenize biomedicine?

**History 97B**

"What is Intellectual History?" (109927)

*Andrew Jewett*

2016 Spring (4 Credits)  
**Schedule:** T 0100 PM - 0359 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

Intellectual historians study almost every period, place, and theme in human history: from classical times to the present, from Asia to the Americas, by examining philosophy and religion, social and political thought, literature and art, and other expressions of human agency and intention that range from ancient epics to graphic novels. This section will draw examples from a wide range of moments and regions to ask how intellectual history has developed as a field, what methods it uses, and how it can be distinguished from other forms of history even as it informs debates of interest to all historians.

"What is the History of History?" (109928)
Ann Blair  
2016 Spring (4 Credits)  
Schedule: W 0100 PM - 0359 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 15  

Everything has a history, and the discipline of history has a particularly long and broad one. In this section we’ll focus on ideas about how and why to study history and on the practices of historical research and writing as they have varied across different cultural contexts. In selected case studies we will consider who wrote and who read history, and how historians answered questions that we also ask ourselves today. E.g. What features are essential to a good historical account? Does the study of history teach moral lessons? How does history interact with memory?

History 97E  
"What is Imperial History?" (109930)  
2016 Spring (4 Credits)  
Schedule:  
Instructor Permissions: Instructor  
Enrollment Cap: 15  

Though empires have recently disappeared from the map, for historians these sprawling multi-ethnic, multi-confessional states remain crucial laboratories for the study of violence, power, ideology, aesthetics, and identity. This section will introduce students to the many ways historians define empires and interpret the experiences of those who inhabited them. How does one write the history of such diverse, expansive entities? How does imperial history incorporate the perspectives of disenfranchised, enslaved, and colonized peoples? What is its scale? How does the work of historians relate to images of empire generated through public commemoration and popular memory?

History 97H  
"What is Urban History?" (110445)  
Elizabeth Hinton  
2016 Spring (4 Credits)  
Schedule: T 1200 PM - 0259 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 15  

This section will explore the methods historians have used to understand the political, economic, and social development of cities and urban life over the past four centuries. How have historians approached the study of metropolitan regions and their inhabitants? What methods have they used to examine the ways in which social and spatial forms differ by time and place? How does urban history provide a unique vantage to analyze issues of class, ethnicity, migration, race, and gender? Readings and discussions will give special attention to cities and transformations in the United States, but we will draw comparative examples from the histories of urban centers across the globe.
History 97J

"What is Family History?" (160421)

Jane Kamensky

2016 Spring (4 Credits)  
**Schedule:**  W 0200 PM - 0459 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

Every family has a history; every past actor had a family. This section investigates the practices and purposes of family history. We will explore primary sources such as diaries, child-rearing manuals, and portraits, and survey methods ranging from demography to cultural history to biography. Our topics will include the "invention" of childhood, the meanings of marriage, and the relationship between the household and the state. In addition to tracing the contours of family life across a wide array of times and places, we will investigate the ebbs and flows of family history itself, including the worldwide boom in amateur genealogy today.

Pacific Crossroads: Histories of Asian America (159559)  

*Genevieve Clutario*

2015 Fall (4 Credits)  

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: Instructor  
Instructor
Enrollment Cap: n/a

This course examines comparative histories of modern transpacific movement and migration between Asia and the Americas, under the scope of multiple colonizations and imperial expansions. We will study empire and colonialisms impact transnational movements of ideas, commodities, and people, tracing how movements also occur within and between colonial spaces and across hemispheres. By connecting transnational histories of Asia, including the Philippines, as well as Pacific Islands, like Guam, Samoa, and Hawai’i to the “Americas,” this course explores how legacies of empire shaped and continue to shape forms of Asian migration, global formations, and diaspora.

Gender & Empire (156553)  

*Genevieve Clutario*

2016 Spring (4 Credits)  

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None  
None
Enrollment Cap: n/a

This course takes a cultural approach to connected histories and more contemporary developments of (post)colonial national identity formations, U.S. empire, and globalization during the nineteenth and twentieth centuries through the lenses of gender, race, and appearance. We will examine visual and performative cultural arenas such as beauty pageants, advertising, mass media, film, and video and investigate how discourses of racial and gendered aesthetics functioned in structuring and maintaining colonial forces and empire.

History 1035

Byzantine Civilization (108059)

2016 Spring (4 Credits)  Schedule:
Instructor Permissions: None  Enrollment Cap: n/a

The Byzantine (Eastern Roman) Empire outlived the fall of Rome by a thousand years. In what ways did Byzantium preserve the institutions and politics of imperial Rome? In what ways was it a medieval civilization? How did Byzantium's professional armies, able diplomats, and brilliant intellectuals ensure its survival and renewed expansion? This course traces the story of the Byzantine Empire between c. 600 and 1453, setting it in the context of medieval and world history.

Course Notes:
This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

First Empires: Power and Propaganda in the Ancient World (159593)

Gabriel Pizzorno

2016 Spring (4 Credits)  Schedule: TR 0200 PM - 0259 PM
Instructor Permissions: None  Enrollment Cap: n/a

This course traces the continuum of socio-political and cultural developments in the Near East that led, over the course of three millennia, from stateless societies to the emergence of Assyria as the first empire in history. The class focuses on the long-term history of power centralisation, and the role of ideology and propaganda in overcoming resistance to this concentration of authority. The course material covers a broad evidentiary and chronological range. We will employ textual, visual, and archaeological sources to explore the evolution of the political and cultural landscape in the Near East and the Mediterranean, from the emergence of the first city-states in the late fourth millennium BCE to the early development of Roman imperial ideology around the start of the Common Era.

History 1042

History of U.S. Imperialism, 1600-1900 (160573)

Holger Droessler
In three turbulent centuries, a small European outpost in a world of indigenous peoples grew into the most powerful nation-state in North America. The emergence of the United States as a global power, stretching from the Atlantic across a vast continent to the Pacific, had momentous consequences for millions of people far beyond its national borders. This lecture course explores the history of U.S. imperialism to 1900 from a global and bottom-up perspective. Among the course’s major themes are indigenous politics, Atlantic slavery, capitalism, migration, and imperialism in the Pacific.

History of U.S. Imperialism, 1900-present (160574)

*Holger Droessler*

2016 Spring (4 Credits) Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None Enrollment Cap: n/a

This lecture course explores the rise of the United States from a hemispheric to a global power over the course of the twentieth century. Two world wars, a global depression, the Cold War, and a series of smaller but no less violent conflicts dominated U.S. foreign relations during that time. The course concludes with an outlook on America's role in a world marked by the rising influence of China and India as well as non-governmental actors. Throughout our discussions, we will pay special attention to the ways in which everyday people colluded and collided with U.S. imperialism.

Anglo-Saxon and Viking-Age England, AD 400-1100: An Archaeology (160241)

*Christopher Loveluck*

2015 Fall (4 Credits) Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Instructor Enrollment Cap: n/a

This course explores the archaeology of Anglo-Saxon and Anglo-Scandinavian England, from the withdrawal of the Late Roman imperial administration until the immediate aftermath of the Norman Conquest. Themes examined include: the creation of 'Anglo-Saxon' societies in different parts of England, from a combined heritage derived from northern Germany, southern Scandinavia and Britain itself; evidence of pagan beliefs and the conversion to Christianity; reflections of social hierarchy in rural settlement and cemetery evidence; transformations from central
places to towns; the Viking impact and the creation of the kingdom of England, AD 800-1000; and Eleventh-century England from the Danish to Norman conquests.

Medieval Britain and Ireland, c. AD 800-1600 (160242)

Christopher Loveluck

2016 Spring (4 Credits)                                             Schedule:       MW 1000 AM - 1059 AM

Instructor Permissions:     None                               Enrollment Cap: n/a

This course provides an overview of the development of societies in Britain and Ireland from the Viking Age to the Reformation (c. AD 800-1600), using evidence from archaeology, buildings and iconography. Coverage includes: the impact of the Scandinavians; the West Saxon Kingdom of England, the Hiberno-Norse kingdoms of Ireland and the polities of Wales and Scotland; the Norman Conquests of the 11th and 12th centuries; and the development of near-global networks in the 'Old World' in the later medieval period, culminating in the Black Death and its aftermath. The course finishes with the Reformation and the birth of Atlantic empires.

Hue-Tam Tai

Brett Flehinger

2015 Fall (4 Credits)                                             Schedule:       MW 1000 AM - 1059 AM

Instructor Permissions:     Instructor                              Enrollment Cap: n/a

Examines modern conflicts in Vietnam and their implications for the US from 1945-75, from both Vietnamese and American perspectives. Seeks to provide an understanding of the complexity of the war and the ethical dilemmas it raised by examining issues ranging from the power-politics assumptions of decision makers to the personal experiences of those caught in the war. Covers both background and consequences of the war, but the main focus is on the 30-year period during which the fortunes of America and Vietnam became intertwined.

U.S. Foreign Policy in a Global Age (160977)

Fredrik Logevall

2016 Spring (4 Credits) Schedule: MW 0845 AM - 0959 AM

Instructor Permissions: Instructor Enrollment Cap: 5

The United States is the most powerful player on the international scene today, and is unlikely to relinquish that position any time soon. Understanding how and why this condition arose, and what it means for world affairs today, is our concern in this course. The emphasis is on U.S. policymaking over the past century, with due attention to the international and domestic political context in which decisions were made. Issues to be explored include the tension between isolationism and interventionism and between unilateralism and multilateralism; the emergence of the U.S. as a superpower; the Soviet-American confrontation; the rise of presidential power in foreign affairs; the wars in Iraq and Afghanistan; and the nature of American power in today's world.

Course Notes: Offered jointly with the Kennedy School as IGA-217. The enrollment limit for
FAS students is 5. This class will be held in Weil Town Hall (BL-1) on the first floor of the Belfer Building.

2016 Spring (4 Credits)  
**Schedule:** TR 1000 AM - 1129 AM  
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This lecture course will provide a survey of some of the major issues in the history of post-imperial China (1912- ). Beginning with the decline of the Qing and the dramatic collapse of China's imperial system in 1911, the course shall examine how China has sought to redefine itself anew over the past one-hundred years. The revolutionary
years of 1911, 1949, and 1978 will serve as our three fulcra, as we investigate how China has tussled with a variety of 'isms' (such as republicanism, militarism, nationalism, socialism, and state capitalism) in its pursuit of an appropriate system of governance and social organization. In so doing, we shall also explore the social, economic, cultural, and scientific changes wrought by these varied attempts at state-building.

Ottoman State and Society II (1550-1920) (148158)

_Cemal Kafadar_

2015 Fall (4 Credits)  

Instructor Permissions: Instructor  

Instructor Cap: n/a

Schedule: TR 1100 AM - 1159 AM

Surveys the transformations of the Ottoman order in the Middle East and southeastern Europe in the early modern era and in the long nineteenth century until the demise of the state. Topics include changes in the conduct of state; social and religious movements; the impact of the new world economy and new trade routes; relations with Europe; emergence of nationalism; the 'Eastern Question.' Ethnic and religious diversity, rural society, urban popular culture, guilds, gender and family life are also examined. The importance of this era for understanding today's Middle East is stressed.

_Khaled Fahmy_

2015 Fall (4 Credits)  

Instructor Permissions: Instructor  

Instructor Cap: n/a

Schedule: TR 0100 PM - 0159 PM

This course offers a background to the emergence of the modern Middle East. It starts with a brief survey of the geography, demography and religions of the region around 1750. Topics covered include the transformations of the Ottoman state; Islamic reform movements; growing European economic, diplomatic, military and intellectual challenges; spread of nationalism; state formation in Egypt; and economic transformations in Anatolia, Greater Syria and Egypt. Also stressed are the ethnic diversity, popular culture and family life. The course ends with a close look at developments leading up to the First World War and the collapse of the Ottoman Empire.

2015 Fall (4 Credits)  Schedule: T 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 15

The Pacific Ocean covers a third of the Earth’s surface and one-third of humanity lives on its shores and islands, from Russia to New Zealand and from Southeast Asia to South America. This seminar introduces students to oceanic and global history via works in Pacific history by scholars of the Pacific Islands, Asia, Australasia, Europe, and the Americas. Themes covered include cultural encounters, exploration, migration, history of science, geopolitics, and economic history.

**Course Notes:** Students can count the course towards the fulfillment of an Ethnic Studies Secondary Field.

History 1914
The History of Environmental Activism (159654)

*Joyce Chaplin*

2015 Fall (4 Credits)  Schedule: W 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 15

Why do some human beings step forward to defend the non-human? It has been unusual, in human history, to
express concern for the non-human parts of nature; to do something politically relevant with that concern is rarer still. In this class, we will examine the history of why and how people have done both. We will trace the origins of environmental ideas, broadly defined, and then the historical processes by which activism on behalf of the environment has become part of national and global cultures. As well, we will analyze different media and modes for expressing environmentalist action, as they have developed over time. And we will interrogate the character and role of the activist.

Telling Lives in Asia (124512)

*Hue-Tam Tai*

2015 Fall (4 Credits)  

**Schedule:**  
M 0200 PM - 0359 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
15

Using sources ranging from diaries and memoirs to biographies, autobiographies, records of interrogations, resumes and self-criticisms, we will explore the ways in which individuals, both famous and ordinary, make sense of their lives in Asia. The focus will be on the upheavals of the twentieth century were experienced and how individual biographies and national histories enrich one another.

Violence, Substances and Mental Illness: African Perspectives (159556)

*Emmanuel Akyeampong*  
*Arthur Kleinman*

2016 Spring (4 Credits)  

**Schedule:**  
W 0100 PM - 0259 PM

**Instructor Permissions:**  
Instructor

**Enrollment Cap:**  
15

An introduction to African perspectives on mental illness, exploring the development and practice of psychiatry as a medical field in Africa, examining the grey areas within psychiatric knowledge, and engaging the ongoing debates about the interface between race, culture and psychiatry. Will review African therapeutic systems; witchcraft, causation and mental health; substance abuse; violence and mental illness; and more recent links between HIV/AIDS, loss and depression.

History 1928

Istanbul: Eventful City & Quotidian Modernity since the Invention of Coffeehouses in the 16th c. (160401)

Cemal Kafadar

2015 Fall (4 Credits) Schedule: W 0200 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: 15

This introduction to the history of Istanbul will explore emerging forms of urban, cultural and societal modernity through spatial practices, as shaped by everyday lives of ordinary citizens in public spaces (cafes, streets, bazaars, etc.) as well as by major public events (fires, rebellions, etc.). Participants are expected to contribute original research and/or analytical studies that feed into a collective class project. Experimentations with digital techniques of mapping, text analysis and data visualization will be welcome.

Course Notes: Offered jointly offered with the Graduate School of Design as GSD 4405. This course will meet at 7 Sumner Road, Room 104. Instructor: Professor Sibel Bozdogan

Recommended Prep: For eligible participants, a possible extension of the seminar will be a follow-up study trip to Istanbul for two weeks in summer 2016.

History 1930

Literature and Social History: A View from Brazil (159656)

Sidney Chalhoub

2015 Fall (4 Credits) Schedule: R 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 15

The objective of this course is to study major authors and works of nineteenth-century Brazilian fiction. Writing fiction from a spot deemed to be in the "periphery" of the western world meant a difficult and complex engagement with European literary and intellectual traditions. The course will focus primarily on the evidence regarding changes in the politics of social dominance in the period—from slavery and paternalism to the worlds and meanings of "free" labor. Questions of class, gender and race in the general context of defining and setting new limits of citizenship rights will be emphasized.

History 1931

Slavery, Disease and Race: A View from Brazil (159657)

Sidney Chalhoub

2016 Spring (4 Credits) Schedule: R 0300 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: 15
Slavery and emancipation were major issues in nineteenth-century Brazilian history. In the 1870's and 1880's, with the drama of emancipation unfolding, yellow fever meant death to European immigrants and a major obstacle to achieving a social configuration that valued the whitening ideal and excluded people of African descent from social and economic opportunities. Although the primary focus of this course is Brazil, students may opt to write a final paper that compares an aspect of the social history of slavery and/or race and/or disease in Brazil and another nation or region. Class materials will include a range of primary sources.

The Vietnam War: A Legal History (159591)

*Samuel Moyn*

2015 Fall (4 Credits)                    Schedule: T 0500 PM - 0659 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 6

This course will focus on the legal aspects of the American phase of the Vietnam War. What was the legal basis for the intervention? What sorts of compliance with the law of war occurred? Was the American people concerned about the dubious legality of revelations like the My Lai massacre and the "secret" Cambodian bombings? What legal steps were taken in the aftermath? The course will consist of a series of readings to show how little historians have investigated these questions, and a series of assignments culminating in a serious research paper based on original sources.

**Course Notes:** Offered jointly with the Law School as 2783. The enrollment for FAS students is 6. This course will meet at the Law School.

MEGA China (159562)

*Arunabh Ghosh*

2015 Fall (4 Credits)                    Schedule: W 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 15

More than any other country in the recent past, China has attempted to solve its problems through massive, mostly state-led projects of technological and social transformation. Whether it is the construction of dams, railways, and special economic zones, or the mobilization of entire populations during the Great Leap Forward and the one-child policy, the Chinese have consistently sought solutions by going big. In this seminar, we shall examine a variety of such MEGA projects as a window onto some of the central themes in twentieth century Chinese history: state-society relations, economic development, environmentalism, technological change, inequality, and law and justice.
History 1947

Material Cultures: An Archaeology and History of Western and Mediterranean Europe, c. AD 600-1200 (160243)

*Christopher Loveluck*

2016 Spring (4 Credits)  
**Schedule:** W 0200 PM - 0359 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course uses archaeological and textual sources to explore the social and economic forces that shaped western and Mediterranean Europe in the Early Middle Ages, from c. AD 600-1200. Themes include social identity and hierarchy in rural lifestyles; practices of burial, commemoration and religion; northern European and Mediterranean towns and urban societies; travel and trade networks between Europe, the Mediterranean and Asia; and ‘Frankish’ (northwest European), Byzantine and Islamic interaction in the central and eastern Mediterranean. The course includes study of the ‘biographies’ (materials and use lives) of medieval artifacts from Harvard Art Museums and the Museum of Fine Arts.

History 1948

World Environmental History (160326)

*Brett Walker*

2016 Spring (4 Credits)  
**Schedule:** M 0400 PM - 0559 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course examines world history from 1492 to the present, focusing on environmental shifts and their relationship to social, cultural, and political change. It explores the human interaction with the natural environment in all its complexities, including interactions with nonhuman animals, agriculture and engineered landscapes, contagions and colonial regimes, oceans and fisheries, and industrial pollution. In this course, nature becomes an agent and history becomes the ongoing story of the manner in which we shape the environment and the environment shapes us.

History 1964

International History: Empires, State Systems, and International Organizations (119143)

*Niall Ferguson*
Charles Maier
2016 Spring (4 Credits)  
**Schedule:** W 0200 PM - 0359 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 20

A comparative approach to the history of international relations, including theories of war and peace; imperial, hegemonic and other orders; the protection of minorities and human rights; and the enforcement of transnational norms. Readings will include theoretical as well as historical texts.

**Course Notes:** History 1964 and 1965 are designed particularly for advanced undergraduates in the international history track of the concentration and graduate students preparing a general examination field in the history of international relations. Seminar credit can be earned by completion of an appropriate research paper and presentation to graduate members of the class.

Time and Place in the History of American Capitalism (160188)

*Samantha Iyer*

2016 Spring (4 Credits)  
**Schedule:** W 0200 PM - 0359 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

This course examines the connections between the rapid political and economic changes of the nineteenth to twenty-first centuries and the everyday experience of time and place. How have the imperatives to invest, save, consume, earn a living, and make a profit influenced the experience of the day, general conceptions of time, and life in urban and rural spaces for different groups of people? While our focus will be the modern United States, we will also think comparatively through narratives from Europe, Asia, and the Middle East. Topics include the workday, financial speculation, migration, the harvest cycle, unemployment, nightlife, and sleep.

American Humanitarianism (160399)

*Megan Black*

2016 Spring (4 Credits)  
**Schedule:** T 0100 PM - 0259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

How have humanitarian Americans crossed and collapsed boundaries between the United States and the world? This course examines the political, economic, and cultural foundations of American humanitarian engagements in the modern era. Although humanitarianism today signifies a particular form of apolitical, life-saving relief associated with a global welter of NGOs, the impulse to help humanity had a longer trajectory that encompassed a range of
investments: abolitionism, missionary work, imperialism, modernization, development, human rights, and military intervention. This course traces a genealogy of humanitarianism—its origins and impacts, proponents and critics, and competing definitions. Course themes include capitalism, globalization, and governance.

Eurasia in the Twentieth Century (160413)

Timothy Nunan

2015 Fall (4 Credits) Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor Enrollment Cap: 15

The history of the southern borderlands of the Russian Empire/Soviet Union and the surrounding neighborhood (especially Iran and Afghanistan) from the collapse of the imperial order to September 11th. Main themes include the impact of Communism; inter-war experiments in nation-building; the Second World War; postwar international development and modernization; Communism and the rise of transnational political Islam; the 1980s (the Soviet war in Afghanistan, the Islamic Revolution in Iran, and Soviet demographic challenges); the emergence of new states after 1991 and the Eurasian Union as counter-project to the European order.

The History of Policing in the United States (160400)

Stuart Schrader
This course will investigate "the police power of the state" and its expression in the institutions called "the police." We will inquire into the what, how, and why of policing, across a long sweep of US history, from the antebellum South to New York City of the 1990s. Students will engage with policing from a variety of angles, from social theory to legal and political history to popular culture. A key task of this course is to ask how the US history of race relations has intersected with the history of policing, including in key moments of crisis and transformation.

Popular Culture in 20th Century North America (160398)

Sean Graham

This conference course examines popular culture in Canada and the United States through the twentieth century and the ways in which the two nations have engaged in cultural exchange. A dominant force in twentieth century society, this course will explore the continental environment in which popular culture has developed. Students will examine the dominant national historiography in both countries while also exploring the emerging continentalist literature. Students will have the opportunity to engage with primary materials such as films, television programs, and music in order to assess the content of popular culture through the period under study.

Ancestry (Graduate Seminar in General Education) (161185)
Maya Jasanoff

2016 Spring (4 Credits)  Schedule:  M 0100 PM - 0259 PM

Instructor Permissions:  Instructor  Enrollment Cap:  15

Everybody comes from somewhere. We carry our ancestry in our DNA, our genealogy, our family stories, memories, and more. How do our origins—biological, cultural, personal—affect our sense of who we are? This seminar explores the biology, anthropology, history, and arts of ancestry with a view to designing an undergraduate Gen Ed course on the topic. Seminar involves intensive engagement with pedagogical methods and exploration of Harvard resources. Highly interdisciplinary. Biologists, anthropologists, sociologists, students of art, literature, law, or history are all welcome! Course offered one time only.

Eastern Europe: Peoples and Empires: Proseminar (109605)

Serhii Plokhii

2016 Spring (4 Credits)  Schedule:  T 0200 PM - 0359 PM

Instructor Permissions:  Instructor  Enrollment Cap:  10

This course is an introduction to major themes and debates in the early modern and modern history of the "other Europe." Its main focus is on the histories of European Russia, Ukraine, Belarus, Lithuania, and Poland. Readings discuss international and political developments in the region and their impact on the formation of imperial, national, religious and cultural identities from the rise of Reformation to the collapse of Communism. The course is designed to prepare students for a general exam field in East European history. It is open to graduate and advanced undergraduate students working on a senior thesis.

The Political Thought of Hannah Arendt: Seminar (159564)

*Peter Gordon*

2016 Spring (4 Credits)  
**Schedule:** W 0200 PM - 0359 PM

**Instructor Permissions:** None  
**Enrollment Cap:** n/a

This graduate seminar examines the political thought of Hannah Arendt with some attention to biographical and historical-contextual conditions that shaped her work. We will begin with the early dissertation on Saint Augustine and the biography of Rachel Varnhagen, to the early reflections on totalitarianism and the later report on the Eichmann trial, along with a sustained examination of her major contributions to political theory, *The Human Condition*, *On Revolution*, and *The Life of the Mind*. Along the way we will consider major knots of interpretative controversy such as the banality of evil thesis, the question of Arendt's intellectual debts to Heidegger, and Arendt's contribution to Cold-War liberalism. The course will be limited to twelve students and will require some familiarity with political theory, political philosophy, and/or intellectual history. Visiting lectures by several major scholars of Arendt's work will be scheduled throughout the semester (outside of regular course times).

Graduate Readings in 20th-Century African-American History: Seminar (122157)

Evelyn Brooks Higginbotham
2015 Fall (4 Credits)
Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor
Enrollment Cap: 10

In this graduate seminar we will read books and articles on topics that reflect the diverse experiences and ideologies of African Americans in the twentieth century. We will discuss and analyze differing historical interpretations and methodologies. We will also explore a variety of historical writings, e.g., biography, intellectual history, race and gender studies, labor history, transnational history, etc. Students are required to write a short report on a recommended reading each week, in addition to being prepared to discuss the required reading. A historiographic paper will be due at the end of the term.

**History of American Capitalism: Seminar (160380)**

*Sven Beckert  
Kenneth Mack  
Michael Zakim*

2015 Fall (2 Credits)  
**Schedule:** M 0400 PM - 0559 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a  

This year-long research seminar explores American capitalism as an historical form of political economy, developed over three centuries. In association with the Warren Center fellows’ workshop on the same theme, the inquiry will extend the history of the American economy so as to include a cross-disciplinary endeavor including the sociology of knowledge, the study of technology and material culture, changing paradigms of political authority, the re-organization of family life, the invention of the modern private subject, and the birth of liberal ideology. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

**Course Notes:** This course is jointly-offered with the Law School as 2778.

History 2638
Readings in Modern Chinese History: Proseminar (159563)
Arunabh Ghosh
2015 Fall (4 Credits) Schedule: R 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 15
This Pro-Seminar will examine developments in the field of modern Chinese history, with a particular focus on the twentieth century. Our principal goal is to gain some familiarity with the historical debates and methodological approaches that have given shaped to the field. Readings will aim to achieve a balance between classics in the field and contemporary scholarship. Topics covered include empire and semi-colonialism, rebellion and revolution, nationalism, civil society and public sphere, economic development, war, science and technology, foreign relations, and foreign relations.

This Pro-Seminar is particularly recommended for students planning an examination field in modern Chinese history. Reading knowledge of Chinese is recommended but not a required; students must have some prior coursework in Chinese history.

Japanese History: Seminar (115288)
Andrew Gordon
2016 Spring (4 Credits) Schedule: W 0200 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 15
Students write research papers on topics of their own choosing drawing on sources in Japanese, and other languages as appropriate.

Recommended Prep: Reading knowledge of Japanese.
History 2653

Historiography of Modern Japan: Proseminar (124013)

Andrew Gordon

2015 Fall (4 Credits)  Schedule:  T 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

A critical introduction to the historiography of modern Japan, with emphasis on English-language scholarship.

History 2707

Comparative Slavery & the Law: Africa, Latin America, & the US: Seminar (159554)

Emmanuel Akyeampong
Alejandro de la Fuente

2015 Fall (4 Credits)  Schedule:  T 0100 PM - 0259 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

This seminar surveys the booming historiographies of slavery and the law in Latin America, the United States, and Africa. Earlier generations of scholars relied heavily on European legal traditions to draw sharp contrasts between U.S. and Latin American slavery. The most recent scholarship, however, approaches the legal history of slavery through slaves’ legal initiatives and actions. These initiatives were probably informed by the Africans' legal cultures, as many of them came from societies where slavery was practiced. Our seminar puts African legal regimes (customary law, Islamic law) at the center of our explorations concerning slaves' legal actions in the Americas.

History 2709

Themes in Modern Sub-Saharan African History: Proseminar (116161)

2016 Spring (4 Credits)  Schedule:  
Instructor Permissions:  Instructor  Enrollment Cap:  14

An in-depth study of the major themes in sub-Saharan African history from the mid-19th century to the present, including the scholarship and debates on the changing relationship between Africa and the West.
Course Notes: Open to undergraduates with permission of instructor.

Class Notes: Open to undergraduates with permission of instructor.

Gender & Sexuality: Comparative Studies of Islamic Mid. East, N. Africa, & S. Asia: Proseminar (119090)

_Afsaneh Najmabadi_

2016 Spring (4 Credits)  
_Schedule:_ T 0200 PM - 0359 PM

_Instructor Permissions:_ None  
_Engrollment Cap:_ n/a

Informed by theories of gender and sexuality, this seminar investigates how historically notions of desire, body, sex, masculinity, femininity, gender and sexual subjectivities have formed and reformed in Islamicate cultures of the Middle East, North Africa, and South and East Asia.

### History 2880

Law, Medicine and Justice in Modern Egypt: Proseminar (160220)

_Khaled Fahmy_

2016 Spring (4 Credits)  
_Schedule:_ T 0400 PM - 0559 PM

_Instructor Permissions:_ None  
_Engrollment Cap:_ n/a

This seminar offers an introduction to the history of modern Egypt through the study of forensic medicine. Lying at the intersection of medicine and law, forensic medicine enables us to study two disciplines that are foundational to the modern Egyptian state. The course follows the processes of medical and legal reform since the 19th century covering such topics as investigating crime in Islamic law; dissection in modern medical education; sacral and spiritual views of the human body; and evolving conceptions of justice. The course closes with analyzing the role played by forensic medicine in the Egyptian revolution of January 2011.

Revolution and Reform in Britain and France, 1820-1880 (109640)

Mo Moulton

2015 Fall (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 15

Schedule:  
M 0300 PM - 0459 PM

The Industrial Revolution transformed social class and caused urban squalor, deep poverty, and unrest. But while France saw three major revolts (1830, 1848, 1871) Britain remained quiet. Why? This course explores that question, using novels by Dickens and Hugo and historical evidence on life in London and Paris. We will also look at contemporary representations of the 19th century, asking what they tell us about modern understandings of class inequality, revolution, and reform.

Youth Protest in Europe (109642)

Rachel Gillett

2016 Spring (4 Credits)  
Instructor Permissions: Instructor  
Enrollment Cap: 15

Schedule:  
F 1000 AM - 1159 AM

This seminar examines the "spirit of 1968" in Prague, Paris, and Berlin. It examines specific protests in these cities in the context of widespread challenges to state control, capitalism and racism. The seminar show how political critiques were expressed through nonconformity in dress, sexuality, and gender. It explores the anger and passion of '68 through an analysis of films, music, manifestos, and memoirs. The course reflects briefly on the legacy of the protest mentality of 1968.

Class Notes:  
Designed for freshmen and sophomores, this course is open to all undergraduates.

We the Readers: Reading Communities in Early America (156004)

Jennifer Brady
2016 Spring (4 Credits)  
Schedule: R 1000 AM - 1159 AM  
Instructor Permissions: Instructor  
Enrollment Cap: 15

This seminar asks who was reading, what was read, and how reading was practiced, imagined, and used in early America. Focusing on moments when reading's potential to create or divide communities was under question, "We the Readers" considers how the mundane acts of reading printed sermons, daily newspapers, bestselling novels, political pamphlets, and urban signs were understood to have varying consequences for women, Native Americans, subjects, citizens, and slaves—and through them, a nation.

Class Notes: Designed for freshmen and sophomores, this course is open to all undergraduates.

National Bodies, Public Health (159791)

_Todd Carmody_

2015 Fall (4 Credits)  
**Schedule:**  
M 0300 PM - 0459 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
n/a

This course explores the relations among health, the body, and the US nation at the turn of the twentieth century. These years witnessed profound transformations in the national economy and international politics; in debates about the meanings of race, class, and gender; and in shifting understandings of health and disease. Against this backdrop, we will draw on readings from across the disciplines to ask how biological, social, and cultural ideas about bodies became central to US national identity.

Early Modern Encounters (159792)

_Michael Tworek_

2015 Fall (4 Credits)  
**Schedule:**  
M 0100 PM - 0259 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
15

This course explores the dynamic and diverse movement of people, texts, ideas, and objects across the world during the early modern period (1300-1800). Each week approaches these global exchanges through a case study of a cross-cultural encounter from the Americas and Asia to Africa and Europe. The course will examine the major developments of the period such as the Renaissance, Reformation, Age of Discovery, and the Enlightenment from
This seminar uses social and cultural approaches to explore the history of Latin American and Caribbean commodity production, from silver to cocaine. Drawing on historical texts, poetry, fiction, and film (all translated into English), we will study the communities created by those who mined, planted, harvested, and labored in the region’s major export industries. This course challenges us to consider the socio-cultural implications of wider economic and trade processes.

Class Notes: Designed for freshmen and sophomores, this course is open to all undergraduates.

History & Literature  90BX

World War I in Fiction, Film, Poetry, and Memoir (160727)

Lauren Kaminsky

Steven Biel

2015 Fall (4 Credits)  Schedule:  F 1000 AM - 1159 AM

Instructor Permissions: Instructor  Enrollment Cap:  15

On the centenary of WWI, this seminar will explore a wide range of representations of the conflict that began in the Balkans but swept through Europe to the Middle East and Russia, to the Atlantic, Pacific, and Indian Oceans, to the Mediterranean, Baltic, and Black Seas, and drew in soldiers and civilians from Africa, Asia, and the Americas. By looking closely at materials across genres and cultural forms, we will examine the contradictions and contingencies of the war that set the stage for a century of political, social, and cultural history.

Cold War Cinema (160728)

Paul Adler

2015 Fall (4 Credits)  Schedule:  R 0300 PM - 0459 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

This course offers a history of the United States and the Cold War through films made during the conflict. We will examine the Cold War through two themes which drove much U.S. Cold War policymaking, from McCarthyism to Vietnam. The first theme is subversion: the fear that the United States (or our allies) would be quietly infiltrated by Communists and other radicals who would seize power “from the inside.” The second theme is insurgency: the fear of a violent uprising by marginalized communities that would weaken or overthrow free world institutions.

Harvard, Meritocracy, and the Making of Elites (160729)

Ryan Acton

2015 Fall (4 Credits)  Schedule:  W 0300 PM - 0459 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

The belief that resources such as education and rewards such as high pay should go to the meritorious is so deeply ingrained in our culture that it provides much of the basic logic and vocabulary for making sense of inequality and hierarchy in everyday life. This course historicizes meritocracy as an ideal and practice by focusing on Harvard University since the Civil War. Throughout this period, Harvard has seen its role as training a meritorious elite to lead society. We will study the historical politics of this elitism in the context of class, race, gender, capitalism, and mass democracy.

Cocaine: Customs and War in the Americas (160730)

Ezer Vierba

2015 Fall (4 Credits)  Schedule:  W 0100 PM - 0259 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

No Latin American commodity produced in the last century has been as destructive as cocaine. No other substance has drawn as much attention from scholars, journalists, filmmakers and state agencies. In this seminar, students will look at a variety of primary and secondary sources: accounts of historians, anthropologists, filmmakers, witnesses and survivors. We will ask questions about the content of these texts and look at their form, while also thinking about their audiences, their genres and ideologies. Doing so will enable us to gain a new understanding of the U.S.
and Latin America, and to reevaluate the relationship between them.

Early American Environments (160732)

Lynne Feeley

2016 Spring (4 Credits)  Schedule:  T 0200 PM - 0359 PM

Instructor Permissions:  Instructor  Enrollment Cap:  15

This course explores the multiple meanings of North America's wild areas to its early American denizens by studying the fictional and nonfictional texts these landscapes have inspired. By studying writers from different social classes (from statesmen to enslaved people), we will pay particular attention to the role a writer's social position played in the way she/he responded to and wrote about the American wilderness. We will pose these questions to a range of early American genres—sermons, memoirs, natural histories, novels, and newspapers—as we seek to understand the manifold and conflicting meanings of the "central fact" of American experience.

Class Notes:  Designed for freshmen and sophomores, this course is open to all undergraduates.

Boundaries, Borders, Bodies (160733)

Maryam Monalisa Gharavi

2016 Spring (4 Credits)  Schedule:  T 0200 PM - 0359 PM

Instructor Permissions:  Instructor  Enrollment Cap:  15

Border geographies and urban boundaries delimit the terms of identity, reinforcing the notion of the city-state with material conditions and force. Such demarcations throw light on basic understandings of inclusion and exclusion, and how "us" and "them" are defined along the course of time. They are often in subtle or outright conflict with concurrent notions of selfhood, property, freedom, and mobility associated with modern life. The course traces along zones of passage that limit, regulate, and control mobility (including frontiers, enclosures, walls, barbed wire, among others) and theories of the distribution of the sensible (including security, circulation, mobility, flow, etc.).

Class Notes:  Designed for freshmen and sophomores, this course is open to all undergraduates.

Red Tape: Bureaucracy in American Culture (160968)

*Nicholas Donofrio*

2015 Fall (4 Credits)  
Schedule: W 0100 PM - 0259 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 15

Bureaucracy is boring. And yet, its dreary routines and million petty frustrations have inspired some of the most interesting art and thought of the past two centuries. Where did bureaucracy come from, and why has it proved such a persistent object of fascination, particularly in the U.S.? How have bureaucratic institutions (government agencies, the modern corporation, etc.) shaped culture, and how have cultural objects shaped our ideas about bureaucracy? Readings from Melville, Weber, Orwell, Arendt, and Foucault; films include The Apartment, Die Hard, and Contagion.

Stories of Slavery and Freedom (156003)

*Timothy McCarthy*

2015 Fall (4 Credits)  
Schedule: T 0200 PM - 0359 PM  
Instructor Permissions: Instructor  
Enrollment Cap: 15

In the last generation, scholars have revolutionized our understanding of slavery and freedom in the modern Atlantic world. This sea-change has been the result of a major methodological shift: to view this history through the eyes of slaves rather than the eyes of masters. This course will examine the history of the "black Atlantic" through a diverse range of cultural texts--poetry, pamphlets, court cases, petitions, autobiographies, novels, speeches, and sermons--produced by slaves, free blacks, and abolitionists from the Age of Revolution to emancipation.

Landmarks of World Architecture (113337)

Joseph Connors

2016 Spring (4 Credits)  
**Schedule:** TR 0100 PM - 0159 PM
**Instructor Permissions:** None  
**Enrollment Cap:** n/a

Examines major works of world architecture and the unique aesthetic, cultural, and historical issues that frame them. Faculty members will each lecture on an outstanding example in their area of expertise, drawing from various periods and such diverse cultures as modern and contemporary Europe and America, early modern Japan, Mughal India, Renaissance and medieval Europe, and ancient Rome. Sections will develop thematically and focus on significant issues in the analysis and interpretation of architecture.

**Course Notes:** This course, when taken for a letter grade, meet the General Education requirement for Aesthetic and Interpretive Understanding. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

**Class Notes:** TBD and members of the Department and the GSD faculty

Art of the Italian Renaissance (160560)

Jessica Maratsos

2015 Fall (4 Credits)  
**Schedule:** TR 1000 AM - 1059 AM
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

An exploration of Renaissance art beginning with Leonardo da Vinci and extending through the late sixteenth century, this course will focus primarily on painting and sculpture, but will also consider the critical role played by drawings, prints, and architecture in this area. We will investigate developing ideas about the status of the artist and the nature of artistic creativity within the newly emergent genres of art theory and history. Other topics will include artists' workshops; interactions between artists and patrons; the role of the spectator; the relationship of center to periphery; devotional versus secular function; and Renaissance ideas about beauty, love, and identity.

Modern Architecture (160563)

*Jeffrey Lieber*

2015 Fall (4 Credits)  
**Schedule:** TR 1200 PM - 1259 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course charts the rise of the architectural avant-gardes and transformations in modern architecture in the 20th century. We explore the drama in the story of modern architecture, how major figures navigated cataclysmic events, shifting ideological and political forces, the changing demands of mass societies, and radical challenges to the modernist project itself, in their attempts to shape a new world. Along the way, we situate architecture within a broad cultural history encompassing art, film, and philosophy.

Arts of South and Southeast Asia (109835)

*Jinah Kim*  
*Sonali Dhingra*

2015 Fall (4 Credits)  
**Schedule:** MW 1200 PM - 1259 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 20

This is an introduction to the arts of South and Southeast Asia from the second millennium BCE to the present. Each lecture will examine selective artifacts and sites to understand the history of major artistic traditions developed in response to cultural exchanges and political dynamics within and beyond the region. By examining a wide range of material, such as Buddhist sculptures, Hindu temples, Jain manuscript paintings, Islamic tombs, calendar art, and so on, with fundamental art historical questions, we will consider what makes the arts of South and Southeast Asia unique as well as universal in the twenty-first century context.

China in Twelve Artworks (161270)

*Eugene Wang*

2016 Spring (4 Credits)  
**Schedule:** MW 1100 AM - 1159 AM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 130

China is grasped through twelve artworks, spanning three millennia from the Bronze Age to the twentieth century. These artworks form both a timeline and a jigsaw puzzle with recurrent themes, e.g., the correlation between
cosmos, body, and mind. The course consists of case studies, revealing both larger intellectual trends and the nuanced way artworks engage established formal conventions. Students learn about China through art and acquire visual literacy that takes art on its own terms.

Architecture Studio 1: Transformations (109375)

Megan Panzano

2016 Spring (4 Credits)  Schedule:  WF 0100 PM - 0359 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

This course introduces basic architectural concepts and techniques used to address issues of form, function, ornament and material. This course provides instruction in project analysis, visualization, communication, and fabrication using both physical and digital modeling. Students proceed through a series of progressively complex investigations of transformational processes, context, program and material assemblage. As an introduction to architectural design, we will explore comprehensive and foundational design principles, skill sets and critical thinking and making. The course material will be presented through a series of presentations, exercises, workshops, reviews and discussions. This course fosters the development of a design methodology founded on thoughtful, creative and rigorous work practices in service of exploring meaningful expressions of the constructed environment.

Connections - Studio II (110362)

Zaneta HONG

2016 Spring (4 Credits)  Schedule:  TR 0100 PM - 0359 PM

Instructor Permissions:  None  Enrollment Cap:  n/a

Over half the world's inhabitants live in urban environments. Understanding, engaging, and re-imaging the urban condition, with all its complexities, structures, processes, and idiosyncrasies has become a pressing issue for architects, landscape architects, and urban designers alike. This studio will focus on the urban condition as a byproduct of the connections between both human and nonhuman frameworks (systems + environments). Using diagramming and mapping processes, both iteratively and speculatively, students will investigate system-environment relationships through the examination of qualities, behaviors, and territories for a select set of urban agents. Each investigation will reveal latent, suppressed, emerging, provisional, and otherwise unmapped connections, which influence the formation of urban spaces, infrastructures, and technologies. Course material is presented through a series of exercises, lectures, workshops, and reviews, which introduce students to the application of foundational design principles and critical design strategies. This course fosters the development of a design methodology founded on thoughtful, creative, ethical and sustainable practices, and explores meaningful expressions for the built environment.

Architecture in Early Modern Mediterranean (121805)

*Gulru Necipoglu-Kafadar*

2016 Spring (4 Credits)  
**Schedule:** T 0100 PM - 0259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

Architecture of the Mediterranean basin ca. 1350-1600 emphasizing transcultural and cosmopolitan trends. The focus is on Islamic architecture but within a comparative perspective including references to the Latin West, particularly Italy and Spain. Topics to be considered include cross-cultural encounters, uses of the shared Roman-Byzantine heritage, spolia, materiality and marble, the dome, science and technology, treatises and travel literature, architectural practice, plans and models, the architect, patronage, multimedia ornament, ports and islands, fortifications, architecture of trade, religious and palatial architecture, villas and gardens. Some visiting lectures by Prof. Alina Payne.
A common stereotype is that Islam is against images, a deficit resulting from religious doctrine and endemic iconoclasm that in turn fostered the arts of writing and geometric abstraction without figuration. Such assertions are misleading and incomplete. The seminar looks at the broad scope of two-dimensional images produced throughout the Islamic lands from the formation of Islam in the seventh century to the present day. Selected case studies span diverse subject matters, media (from ink and watercolor to print and photography), functions, and contexts of use, and invite examination of a spectrum of formal operations and modalities of representation.
This extraordinary building, with its dome and open spatial interior stood as a marvel of architecture throughout the middle ages. In this great space, many rituals and ceremonies took place, which will also be studied during the semester.

### History of Art & Architecture 150V

Michelangelo: Monuments and Mythmaking (160561)

Jessica Maratsos

2015 Fall (4 Credits)  

**Schedule:** W 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  

This course will examine both Michelangelo's extensive artistic production—in painting, drawing sculpture, architecture, and poetry—as well as the image of him created by contemporary and subsequent biographies, critiques, and theoretical texts. Exalted as the pinnacle of creative genius within his own lifetime, we will consider how the multi-faceted exemplar of Michelangelo shaped the visual culture of his age and continued to have a lasting impact on generations of artists that followed.

### History of Art & Architecture 157K

The Age of Albrecht Durer: Prints and Drawings at Harvard (159977)
Examines the revolution in image making that occurred in Germany during the early modern period. Focussing on Durer's achievements, but ranging widely through other Northern Renaissance masters, this course is also a primer in close looking at original works of art in the Museum's Art Study Center.

Contemporary Architecture and Critical Debates (160726)

Jeffrey Lieber

2016 Spring (4 Credits)

Schedule: M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

Investigates architecture circa the 1960s to the present, focusing on such issues as the afterlife of modernism, the impact of globalization, and the spectacularization of culture in our time. Topics include: architecture and the visual culture of catastrophe, discourses on postmodernism, architecture's relationship to "Reaganomics," "fractal" sensibilities, architecture as the subject of contemporary art and exhibitions, the significance of Berlin, and the socio-cultural and political ramifications of the destruction of the World Trade Center.

Drawing on Exhibition (159687)

Ewa Lajer-Burcharth

2015 Fall (4 Credits)

Schedule: T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Course designed in preparation for a curricular exhibition of 18th &19th-century drawings to take place at Harvard Art Museums involving students. Explores the invention of drawing as a modern medium. Examines practices, theories, and debates on drawing. Offers hands-on experience of works of art and honing of curatorial skills through practice in exhibition design and discussions with experts. Materiality, technique, the aesthetic, philosophical, and institutional parameters of drawing, including the notions of line, touch, stain, surface, sight, time, instruction, reproduction, generation, curiosity, will be discussed among others.

Body Image in French Visual Culture: 18th and 19th Century (116935)

Ewa Lajer-Burcharth
Ashley Hannebrink

2016 Spring (4 Credits)  Schedule:  TR 1100 AM - 1159 AM
Instructor Permissions:  Instructor  Enrollment Cap:  99

Functions and meanings of the body as privileged visual signifier in French visual arts (painting, sculpture, printed imagery, photography). Body image seen as both instrument of different discourses of modernity and a site of resistance to them. Among the issues addressed: the king's body, republican corporeality; the problem of the nude, bodily spectacles; race; otherness; androgyny; monstrosity; pornography; representations of hysteria; images of desire; fetishism; body and/in space; body and the self.

American and European Art, 1945-1975 (121784)

Benjamin Buchloh

2015 Fall (4 Credits)  Schedule:  MW 1200 PM - 1259 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

This course will examine artistic production in the US and Europe between 1945 and 1975 to clarify some of the most crucial questions of this thirty year period: How did post war visual culture repress or acknowledge the recent 'caesura of civilization' brought about by World War II?; how did the neo-avantgarde position itself with regard to the legacies of the avantgardes of the 1920s?; how did artistic production situate itself in relation to the newly emerging apparatus of Mass Media culture?

Language of Photography in the USA: From Walker Evans to Lorna Simpson (159916)

Robin Kelsey

2015 Fall (4 Credits)  Schedule:  R 0300 PM - 0459 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

Does photography have a language? For the past several decades, a series of practitioners in America have grappled with this question. By using such devices as repetition, sequence, differentiation, and spatial arrangement,
artists such as Walker Evans, Robert Frank, Martha Rosler, and Lorna Simpson have considered the possibility of photography possessing a distinctive syntax within a larger social field. In this course, we will consider the history of these efforts to define and engage the limits of photographic significance.

## History of Art & Architecture 179X

**Tectonics Lab: Conference Course (110270)**

*Mark Mulligan*

*Michael Smith*

2015 Fall (4 Credits)

**Schedule:**

- **F 0200 PM - 0459 PM**
- **M 1100 AM - 1159 AM**

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

Tectonics Lab (formerly "Construction Lab") introduces students to material properties, structural behavior, and fabrication-and-assembly issues in architecture through a combination of lectures, workshops, and design-build projects. The course emphasizes two modes of architectural experimentation: analytical and intuitive. Abstract and architectonic exercises involving these modes of experimentation will take place in a workshop format, with students working in teams of varying sizes. Weekly lectures provide a theoretical basis for the design-build projects, with topics including fundamental, non-quantitative statics (e.g., free-body diagrams, types of forces and reactions) and generic structural approaches; material properties and fabrication; joinery and assembly; scalar transformation; modular construction; kinetic structures; and more. Design-build projects challenge students to engage lecture material in a hands-on manner; these projects focus on the construction of full-scale artifacts that may be tested against a range of performance criteria. In each project, students will explore the role of material expression, figuration, and formal gesture in communicating their ideas. Project documentation through drawing, photography, and video is an essential component of coursework, and a comprehensive course portfolio will be due at the end of term.

The principal objective of Tectonics Lab is to extend our shared knowledge of material properties, structural behavior, and construction techniques by testing new ideas. Our research model is a hybrid: equal parts scientific laboratory (where narrowly defined hypotheses are tested and evaluated) and artist's atelier (where expression of ideas, both articulated and ineffable, is the goal).

**Recommended Prep:** HAA 96a is useful, but not mandatory

**Himalayan Art (109902)**

*Jinah Kim*

2016 Spring (4 Credits)

**Schedule:**

- **M 0100 PM - 0259 PM**

**Instructor Permissions:** Instructor

**Enrollment Cap:** 15
Understood as a divine abode in Indic mythology and envisioned as the immortal realm of "Shangri-la" by later western interpreters, the Himalayas abound with Hindu and Buddhist holy sites. This course explores the vibrant visual culture of the Himalayan region. Two learning goals are: 1) Understanding the historical development of distinctive artistic forms in paintings and sculptures of Nepal and Tibet during major moments of artistic innovations in the region, including the artistic responses to the current political situation; 2) Locating this knowledge in the context of the history of reception and collecting of Himalayan art in the west.

Sacred Places and Sacred Objects: The Art of Japanese Religion (159913)

Samuel Morse

2015 Fall (4 Credits)  Schedule: TR 1200 PM - 1259 PM

Instructor Permissions: Instructor  Enrollment Cap: n/a

An interdisciplinary study of the art and material culture of the Buddhist and Shinto religious traditions. The class will focus on the temples and shrines that serve as the loci of religious practice and the works of art associated with them - sculptures and paintings, sutras and reliquaries, ritual implements and temple adornments. It will examine in depth some of Japan's most influential sacred places, including Ise Shrine, Todaiji, the Byodoin, and Mount Fuji, and will also look at the way contemporary architects and artists such as Ando Tadao and Sugimoto Hiroshi have attempted to create new sacred places and sacred objects.

The Imperial Arts of the Inca and the Aztec (114575)

Thomas Cummins

2016 Spring (4 Credits)  

Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: Instructor  

Enrollment Cap: 30

This course concentrates on the art and architecture of the two ancient American civilizations, surveying the forms of representation used to establish imperial presence within the accepted vernacular of Mesoamerican and Andean artistic traditions. Special attention is given to the role of art as a means of expressing imperial claims to mythic and historic precedents, upon which political and economic expansion could be realized.

History of Art & Architecture 199N
Between Europe and Asia: Colonial Latin America and the Art of Fusion (159982)

Thomas Cummins

2015 Fall (4 Credits)  

Schedule: TR 0100 PM - 0159 PM

Instructor Permissions: Instructor  

Enrollment Cap: n/a

This new course will take advantage of the Fall 2015 exhibition, Made in America, at MFA to study the creative interactions between Asia and Europe as they transpired in Mexico and Peru as well as the cultural and artistic exchanges with both areas. In 1565, a systematic exchange between Asia and Mexico began, and known as the Manila Galleon. Ivories, silks, lacquer ware were brought to the port of Acapulco from Manila where they were either taken to Mexico City and sold or were transported to Lima Seville or else where. Chinese and Japanese artisans and diplomats also travelled to Mexico City, Madrid and Rome in the 16th and Seventeenth Centuries. These exchanges were equalled with European artists, diplomats and missionaries traveling to China and Japan. Such exchanges find resonance in the arts throughout the world, be it the choir stalls of Sucre Bolivia, or Peter Paul Ruben's drawing of a man from Seoul Korea. To be addressed in the class are issues of influence (how does it manifest itself and why) narratives of global exchange (we will read the log of a Florentine Merchant who went around the world trading, what do they tells and how and why in the early 17th century). How do such objects as Japanese screens become an object in Mexico and a medium of representation of cultural contact in Japan? Also, with the expansion of Europe into the rest of the world, how do cultures become to be seen in relation to each other? First and foremost was the universal desire to evangelize all parts of the known world. How then do these different historical element affect our understanding of Colonial Latin American art, culture and society?

The syllabus will include reading from primary sources as well as recent studies. Several readings will be from the catalogue to the exhibition, which also will be our textbook. Students will also be able to take advantage of a two-day symposium (September 19th and 20th) to be held at Harvard and the MFA. Scholars from around the world will present some of the newest research on various aspects of this earliest global artistic and cultural interaction.

Recent art historical debates concerning the definition of the Renaissance have addressed a wide range of issues—from chronological to geographical to methodological. New questions of a globalized Renaissance have been posed alongside calls for a more broadly conceived notion what constitutes art and artistic culture. Perhaps one of the most deeply entrenched concepts of the previous era that has come under intense scrutiny is the notion of the Renaissance as the moment during which, as Hans Beling phrased it, “the holy image could not escape its metamorphosis into a work of art.” This course will examine previous and current formulations of the sacred image in the Renaissance, focusing primarily, though not exclusively, on works, theories, and historiography pertaining to
the Italian peninsula.

Post WW-II Architecture and the 'Crisis in Culture' (160564)

Jeffrey Lieber

2015 Fall (4 Credits) Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor Enrollment Cap: 30

This seminar addresses the work of key figures of postwar architecture in relation to major philosophical and political themes of the period: discourses on beauty and democracy, humanism and monumentality, mass culture and camp, religion and technology, as well as the relationship between ancient civilizations and modern ideals. Particular focus on the conflicted legacies of American architects such as Bunshaft, Stone, and Johnson and writings by Arendt and Scully, among others.

History of Art & Architecture 278W
Photography in Weimar Germany, and in Exile, 1919-1959 (160002)
Benjamin Buchloh
2016 Spring (4 Credits) Schedule: W 0100 PM - 0259 PM
Instructor Permissions: Instructor Enrollment Cap: 30
The seminar, offered to graduate students and advanced qualified undergraduate art history majors, will study the development of photographic practices in Weimar Germany, from 1918-1933, and trace a number of selected case studies of photographers in exile in the US, Latin American countries and France after 1933.

Focusing on the opposition between the key movements of New Objectivity and New Vision, the seminar will study the theoretical and artistic and cultural implications of this opposition, with August Sander and Laszlo Moholy Nagy serving as the key opponents.

Particular emphasis will be given to the large number of female photographers working both as artists and producers for the milieu of advertisement and fashion. In particular figures like Lotte Jacobi, Grete Stern and Ellen
Auerbach, Gisele Freund, Anne Biermann and Ilse Bing, will be at the center of our studies tracing the differentiations in their oeuvres between Weimar and their production in Exile.

The seminar will read the major theoretical and critical literature on photography to emerge from the Weimar debates as much as it will carefully study the increasingly detailed monographic accounts that have been published over the past ten years on the work of these photographers.

### History of Art & Architecture 280R

**Topics in Chinese Art (159952)**

*Eugene Wang*

2015 Fall (4 Credits)  
**Schedule:** R 0300 PM - 0459 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 30

The seminar explores ways in which heaven is visualized in Chinese art. Topics include astrology, ceiling decoration, heaven-earth correlative cosmology, macro-microcosms, etc. Media include tombs, caves, buildings, and other structures. The periods covered range from the early to late imperial times. Students will be presented with a general body of literature and encouraged to explore their own specific topics.

### History of Art & Architecture 281Z

**Art of Buddhist Caves: Cosmology and Psychology (161253)**

*Eugene Wang*

2016 Spring (4 Credits)  
**Schedule:** T 0100 PM - 0259 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

How do cosmology and psychology meet through art? How does an embellished cave map out a meditative program? The seminar seeks to answer these challenging questions through close analysis of the pictorial-cum-sculptural program of a sixth-century Dunhuang cave that showcases this fusion of spatial and mental dimensions. Students learn the programmatic logic underlying the cave design. The seminar is also a workshop producing detailed annotation to the design of an immersive virtual reality environment.
History of Art & Architecture 284V

Japanese Religious Art of the Medieval Period (160003)

Samuel Morse

2016 Spring (4 Credits)  

**Schedule:** W 0100 PM - 0259 PM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 30

The twelfth and thirteenth centuries witnessed the rise of new devotional cults, orders, and sects as well as the revival of earlier practices all of which transformed the religious landscape of Japan. This seminar will focus on the artistic forms that accompanied that transformation - statues and reliquaries, illustrated hagiographies and pilgrimage mandalas, temple halls and shrine complexes. Among the topics to be covered will be the rise of pilgrimage routes, the revival of Mount Koya, the cult of Hachiman, and the installation of dedicatory objects into sculptures.

South Asian Temple: Theory and Practice (109836)

Jinah Kim

2015 Fall (4 Credits)  

**Schedule:** W 0300 PM - 0459 PM  

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 12

The main mode of production in Indian temple architecture is often explained through a strict diagram or vastupurusamandala, an idea extracted from Sanskrit artistic treaties (silpasastra or vastusastra) of varying dates. Going beyond this essentialist tendency, the seminar will explore design strategies adopted to create the most powerful sacred space for each religious and political community and examine the historical relationship between the circulation of such architectural (and artistic) knowledge and the production and use of an actual temple. In particular, we will explore the relationship between the architectural representation (as in architectural motif in sculpture and painting) and the architecture as built environment. The regional focus for this semester will be on Deccan (i.e., cave temples). While some prior knowledge of South and Southeast Asian art, history, or religion may be helpful, none is required for the successful completion of this course.

China in Twelve Artworks (159998)

Eugene Wang
The seminar is a prelude to the full-fledged Gen Ed course to be offered in the spring. Exclusively drawn from the Harvard Art Museums’ collection, the twelve artworks range from a Shang dynasty bronze vessel to early twentieth-century painted fan. The seminar selects, sorts out, and filters relevant background readings, identify key issues embedded in the materials, and researches related works that substantiate the central storyline inherent to the twelve key artworks.

### History of Art & Architecture 291N

**Miraculous Images in the New World** (160725)

*Thomas Cummins*

2015 Fall (4 Credits)  
**Schedule:** W 0100 PM - 0259 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 30

This seminar will be a comparative analysis of those Christian images in the New World that come to be considered in some way as being extraordinary and therefore developed their own cults. We will examine well-known images such as the Virgin of Guadalupe, the Virgin of Chiquinquirá, the Virgin of Copacabana, Nuestro Señor de los Temblores, el Señor de los Milagros as well as more regionally important cult images. Are the miraculous images of colonial Latin America some how distinct from those of Spain? Are the narratives about them somehow distinct? That is, how does the universality of the Catholic Church become localized through miraculous images, and how does the concept of localization shift historically from the sixteenth to the eighteenth century. A sub-text to the seminar will consider issues of orthodox and unorthodox referentiality (blasphemy, idolatry, doubling, etc.) as articulated through miraculous images and the texts produced in relation to them. A second interest centers on the corporeal presence of the mystical in the human body such as Santa Rosa of Lima and how it becomes marked both during and after life.

Tutorial - Sophomore Year (115419)
Anne Harrington
2016 Spring (4 Credits) Schedule: M 1200 PM - 0129 PM
Instructor Permissions: Instructor Enrollment Cap: n/a
Sophomore tutorial is a hands-on course that introduces students to some of the most exciting and productive
questions in the history of science, technology and medicine, while developing critical reading, presentation and
discussion skills. Small groups of students will tackle different aspects of a larger theme each week and share
discoveries in sessions led by the faculty instructor. The course will be further enhanced by a series of supervised
individual projects.

Course Notes: Required for undergraduate concentration in History and Science. Students
must register for the plenary class session that meets on Mondays from
12:00-1:30, as well as a weekly section to be arranged.

### History of Science 100

Knowing the World: An Introduction to the History of Science (123398)

**Alex Csiszar**

2015 Fall (4 Credits)

**Schedule:** TR 1000 AM - 1059 AM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

What are the origins of modern science and of the scientific method? Have the ways of knowing the world of different cultures and societies changed over time? How has scientific knowledge been related to other enterprises such as art, religion, literature, and commerce? We will ask these questions and more through a broad survey of many of the crucial moments in the development of science from the Scientific Revolution of the 17th century to the present day. Topics and figures will include Galileo, evolution, eugenics, the atomic bomb, and the human genome project.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: Tu., Th., at 10

### History of Science 115

Instruments & Mechanical Marvels: Studies in the Material Culture of Science, 17th-20th Century (156531)

**Jean-Francois Gauvin**
This course is dedicated to the work of one historian of science who has considerably influenced our methods of studying and thinking about material culture. This Fall, we will focus on Simon Schaffer's body of work, the 2013 Sarton medal recipient. His extensive scholarly, grand public, and media productions span the period between the 17th and the 20th century, offering a comprehensive look at things from a variety of perspectives: theoretical, technological, sociological, cultural, experimental, and museum studies. The classes will consist of half lecture, half discussion. We will try to answer this simple, yet loaded question: What is an instrument? There will be two short assignments and one final study of an instrument coming from the Collection of Historical Scientific Instruments.

**History of Science 126V**

Scientific Knowledge, from Certainty to Uncertainty (161236)

*Aaron Wright*

In 1927, Werner Heisenberg combined certain experimental facts and certain mathematical deductions to analyse atoms. His result was uncertainty, raised to the status of a principle. How did that happen? And how can we locate this moment in a larger historical narrative about the relative status of certain versus uncertain knowledge in science? Topics include the certification of physical knowledge as certain knowledge in the Enlightenment; the mathematicization of biological populations and variations; how uncertainty and randomness were placed at the heart of both; atomic physics and population biology; moral uncertainties and certainties raised by physicists’ involvement in the atomic bomb project; and social transformations engendered by life in a world marked, not by certainty but by uncertainty, randomness, and risk.

Animals in History (160366)

*Janet Browne*

This course serves as an introduction to animal studies while also exploring the history of animals in relation to humans. Topics include the history of animals as food, laboratory animals, animal-human boundaries, museum and zoo displays, conservation and extinction, panda diplomacy, the anti-vivisection movement, animals in literature, and animals as pets. All these issues invest animals with crucial socio-political meaning. There will be a field trip and perhaps films. Small research projects through the semester will allow students to explore their own interests as well as relevant issues in the news. Among the things that make animal studies such an interesting area is the
constant need for scholars to be aware of their own commitments and assumptions. Students from History, History of Science, and History and Literature are all welcome.

Course Notes: Enrollment limited to 15.

Public Health and Welfare in America and Europe (160367)

Alexander More

2015 Fall (4 Credits) Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

This seminar focuses on the history of public health and welfare in America and Europe, from the pre-modern period to the present. We will explore crises and responses to epidemics, vaccination, new scientific and medical discoveries, chronic poverty, severe climate change, famine and outbreaks resulting from global travel and exploration. In all instances, we will pay particular attention to the experience of those affected, as well as the expectation, legal justification and effects of government response. There are no pre-requisites to enroll in the course.

Masculinities and Health: History and Politics of Men's Health and Illness (160519)

Sean O'Donnell

2016 Spring (4 Credits) Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor Enrollment Cap: 15

This course will introduce recent theories of masculinity and performativity in gender theory with the aim of exploring possible links to medical and public health constructions of the male body and men's health. From 19th century concerns about degeneration and the identification of "effete" male to the military's failed policy of "don't ask, don't tell," we will consider the various ways cultural anxieties about "manliness" have been addressed by medical, psychological, and public health experts. Topical areas will include: risk taking, sports, body image, sexuality, violence, depression, ADHD, sociopathy, suicide, aging and life expectancy.

Course Notes: Enrollment limited to 15.

Medical Technologies in Historical Perspective (159730)

Evelynn Hammonds

2015 Fall (4 Credits)  Schedule:  MW 1000 AM - 1059 AM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

The course examines the ways in which various medical technologies shaped and were shaped by physician and nurse practices and goals as well as ideas about patient care in American medicine from the 19th-century to the present. We will look at how the meanings attached to medical technologies grew out of specific historical, social, political and medical contexts. Medical technologies examined include: imaging machines; clinical, diagnostic and genetic tests; reproductive technologies; and artificial organs.

Bodies in Flux: Medicine, Gender, and Sexuality in the Modern Middle East (156290)

Soha Bayoumi

2015 Fall (4 Credits)  Schedule:  MW 1100 AM - 1159 AM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

This course examines how bodies, genders and sexualities in the modern Middle East, from the nineteenth century to the Arab revolts, have been shaped and represented via changing and competing discourses. Through a variety of historical, ethnographic, media and literary readings, the course studies multiple and dynamic representations of bodies in flux: medicalized bodies, gendered bodies, sexualized bodies, (re)productive bodies, aging bodies and bodies in revolt. The course pays special attention to medicine and science in their interaction with laws, traditions and religious practices. Some of the topics covered include analyzing histories of and discourses on slavery, femininity and masculinity, homosexuality, health, reproduction, disabilities, circumcision and genital cutting/mutilation and gender-based violence.

The Changing Concept of Race in America: From Jefferson to Genomics (160520)

Evelynn Hammonds

2016 Spring (4 Credits)  Schedule:  R 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

This course explores changing concepts of race in American science and medicine, and examines the historical meanings and uses of these concepts in U.S. society from the 18th century to the present. The course asks the following questions: How have diverse scientific and medical disciplines historically defined, measured, and
produced knowledge about “race”? How have scientific and medical concepts of race historically interrelated with key political, economic, and social institutions? How do current 21st century genomic concepts of race fit into this larger history of race and science?

Course Notes: Enrollment limited to 15.

Health and Disease in America (160370)

*Alexander More*

2016 Spring (4 Credits)

Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course will explore major historical developments in medicine and public health policy in the United States, from the early modern period to the present. Major themes of the course will cover the social and cultural impact of epidemic disease, the creation and evolution of healthcare institutions, the rise of the medical profession, the place of race and gender in medical practice and scientific experimentation, and the creation of national policies to increase access to medical care. Lectures will frame each week’s topics in their social, cultural and economic contexts.

Explaining Epidemics (109847)

*Sean O’Donnell*

2015 Fall (4 Credits)

Schedule: MW 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Outbreaks of epidemic disease have played a role in shaping human societies from the beginning of recorded history, transforming demographic patterns, social practices, and cultural expectations. Although they take fewer lives than the diseases we encounter every day, epidemics possess an extraordinary hold over our collective imagination. This course seeks to understand why. Through an analysis of outbreaks ranging from the Black Death to Avian Flu, we will explore the place of epidemic disease in human history, taking into account how those living in different times and places have responded when epidemics have appeared.

History of Anthropology (156895)

Rebecca Lemov

2016 Spring (4 Credits) Schedule: M 0100 PM - 0259 PM

Instructor Permissions: None Enrollment Cap: n/a

This conference course looks at the long history of anthropological inquiry. We will begin with early modern "Curiosity Cabinets" that sequestered anthropological materials alongside the miraculous, marvelous, and mundane. We then turn to the age of exploration with its first-hand encounters between high-seas explorers or cross-continental travelers and tribal or non-Western groups sometimes known as "natives." After some attention to anthropological zoos and world's fairs, we will discuss the dawn of anthropology's professional golden age in the twentieth century; the arrival of epistemological and political crises during the 1960s, 1970s, and 1980s; and finally the current day's ontological turn, circling back to the interpretive and epistemological goals that have often animated the field.

What is Enlightenment?: Science, Religion, and the Making of Modernity (109003)

Soha Bayoumi

2015 Fall (4 Credits) Schedule: M 0200 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

From Immanuel Kant's answer to this question in 1784 to Michel Foucault's engagement with the same question
and answer in 1984, two centuries had passed and much water had flowed under the bridge. From the inception of
its ideals in the Anglo-Saxon world in the seventeenth century at the hands of Spinoza, John Locke and Isaac
Newton, to its development in France in the eighteenth century by Voltaire, Montesquieu and Rousseau and
culmination with the writings of Immanuel Kant, the Enlightenment developed into an important intellectual
movement which helped shape modernity and its repercussions in the contemporary world. This course will trace
the history of Enlightenment in primary sources, enriched by a collection of secondary readings, and will explore
contemporary reflections on Enlightenment from various schools of thought, ranging from romanticism to marxism,
and from feminism to postmodernism. Some of the themes addressed include the politics of the Enlightenment,
philosophy and morality, rationalism and empiricism, science and education, and religion and toleration.

Course Notes: Offered jointly with the Divinity School as 3302.

Broken Brains (160496)
Anne Harrington
2016 Spring (4 Credits) Schedule: W 1200 PM - 0159 PM
Instructor Permissions: Instructor Enrollment Cap: 20

An exploration of the complex relationship between doctors and scientists who study and treat different kinds of
"broken brains," the patients they study and treat, and larger public conversations about being human in today's
neurological society. Topics include iconic cases of brain damage that catalyze new scientific understandings (like
the case of H.M.), the study of brain damage in war, the emergence of writings (including memoirs and novels) that
attempt to describe "what it is like" to suffer from disorders like autism and Alzheimer's, and controversies over
recent efforts to see psychiatric disorders like depression as simple products of a chemically "broken brain."

Course Notes: Enrollment limited to 20.

Critical Experiments in the Human Sciences (122167)
Rebecca Lemov
2016 Spring (4 Credits) Schedule: TR 1100 AM - 1159 AM
Instructor Permissions: None Enrollment Cap: n/a

This course focuses on high-impact experiments - among them, the Milgram "Obedience" experiments and the
Stanford Prison Experiment - carried out in the twentieth-century human sciences by anthropologists, sociologists,
social psychologists, and/or experimental psychologists. Many dreamed of a "technology of human behavior" and
conducted experiments toward this end. What were the results, and how do they continue to affect our thinking and
daily lives today?
History of Science 179

The Freudian Century (109859)

Elizabeth Lunbeck

2015 Fall (4 Credits)  Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: Instructor  Enrollment Cap: n/a

Explores the consolidation and rise to prominence of a distinctively modern psychological perspective on human nature, motivation, and desire from 1900 to the present. Opens with the debut of therapeutic culture and the Freudian recasting of the self, with attention to dreams, sexuality, interiority, gender, and cultures of trauma. Moves to the mid-century period and beyond, the heyday of the psychological perspective in the United States, looking at the psychology of affluence, the invention of “identity,” the new narcissism, and personalities and power in the workplace. Ends with an assessment of the virtues and liabilities of the 21st century expressive self.

History of Science 180

Science, Technology, and Society in Modern East Asia (124589)

Dong Won Kim

2015 Fall (4 Credits)  Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: Instructor  Enrollment Cap: n/a

This course aims to survey the history of science and technology in East Asian countries - China, Japan and Korea - since the late 19th century. It will emphasize the mutual influence between science &technology and society to answer how they become major industrial powers in the 21st century.

History of Science 181  Section: 01

Humans in Space: Past, Present, Future (160334)

Matthew Hersch

2015 Fall (4 Credits)  Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Instructor  Enrollment Cap: n/a
This lecture course will survey the history of spaceflight, beginning with ancient anticipations and ending with space travel in the twenty-first century and beyond. From high-altitude ballooning and airplane flight to rocketry and interplanetary travel, we will both trace the development of technologies humans have used to leave their home planet, and place these technologies within the context of political, economic, and social change. The course will also examine how the development of space vehicles was accompanied by transformations of the human body and mind, from the development of high-altitude pressure suits to the rise of space psychology.

The Empire Strikes Back: Science Fiction, Religion, and Society (160332)

*Ahmed Ragab*

*Sophia Roosth*

2015 Fall (4 Credits) Schedule: MW 1000 AM - 1059 AM

**Instructor Permissions:** Instructor Enrollment Cap: n/a

From the seventeenth century to today, science fiction has reflected the aspirations of scientific innovation and anticipated new discoveries. It has reflected rhetorical practices by which science melds present contexts with futurism, extrapolation, and promissory logics. Authors have engaged with ethical problems, fears about innovations gone awry, and pessimism about the prospects of technological development, all while critiquing views on gender, race, and sexuality, and subverting colonial ambitions while engaging postcolonial aspirations. At the same time, science fiction has engaged religious and spiritual views, both interacting with religious imaginaries and engaging with the role of religion in society and in relation to science.
In this course, we trace science fiction through history. We analyze how it has understood science and technology, war and colonialism, sex, race and gender, health and disease. We investigate how it has interacted with religion and influenced social and cultural attitudes. We will read major works in science fiction and understand how they live with and within us. Topics include: time travel, utopias and dystopias, race, gender, and sexuality, religion and culture, embodiment and disembodiment, posthumanism. In addition to novels and short stories, lectures will incorporate film, television, graphic novels, music videos, and other science fictional subgenres.

The course will be accompanied by a film series of major science fiction films and guest speakers (film series attendance is optional).

### History of Science 194V Section: 01

**Brave New Worlds: Imagining the Futures of Science (160191)**

*Melinda Baldwin*

2015 Fall (4 Credits)  
**Schedule:** R 0400 PM - 0559 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** 15

Writers, filmmakers, and artists have often used speculative fiction to comment on new knowledge about the natural world, and to think about how that knowledge might affect humanity's future. Some works of art express hope that science and technology will improve the human condition; others express anxiety about the consequences of scientific findings and technological developments. This seminar examines science fiction (broadly defined) in its historical context and considers how specific works both reflected and shaped changing beliefs about science and its role in society. Students will analyze works of fiction alongside scholarly literature about developments in the history of science. Topics will include poems and treatises about "new worlds" written during the Scientific Revolution, fables from Victorian Britain that drew on Charles Darwin's theory of evolution, fiction and films about radioactivity and nuclear war, and science fiction about gender and fertility written during and after the women's movement.

History of Science  209

Science and Religion: Debates, Approaches and Controversies (127097)

Ahmed Ragab

2015 Fall (4 Credits)  
Instructor Permissions: Instructor  
Schedule: M 0400 PM - 0559 PM  
Enrollment Cap: n/a

How is your cellphone part of religious experience? Why do some people refuse to vaccinate their children? And why do some reject evolution and global warming? What is missionary medicine and how is it related to global health? What role do religious institutions play in our lives? And why does research show that prayers can improve health outcomes? How important is Pope Francis's encyclical on the environment? And why should we care?!

The study of science and religion has been dominated by a limited set of views that range from animosity to attempts at reconciliation. Yet, these approaches remain largely normative and are deeply rooted in particular readings of European history. In this course, we move beyond debates of conflict or harmony into deeper discussions of how scientific and religious discourses impact daily lives and how issues of race, gender, sexuality and socioeconomic status impact these discourses. The course is a research lab where students are trained on research methods, and on different genres of scholarly writing, including grants. Students choose two modules out of four addressing religion and (1) medicine and global health, (2) environmental and natural sciences, (3) social sciences, and (4) art. In each module, students learn about major questions in the field, work with different methods, and produce innovative research projects.

Course Notes: The course is open for undergraduate and graduate students. Offered jointly with the Divinity School as HDS 3341.

History and Anthropology of Medicine and Biology (108519)

David Shumway Jones

2016 Spring (4 Credits)  
Instructor Permissions: Instructor  
Schedule: T 0200 PM - 0359 PM  
Enrollment Cap: n/a

Explores recent historical and anthropological approaches to the study of life in both medicine and biology. Topics include: natural history and medicine before the emergence of biology; the history of heredity and molecular biology; race and medicine in the colonies and the metropole; bioeconomic exchange; old and new forms of biopower at molecular, organismic, and global scales. The seminar trains students to engage in scholarly debates in the humanities, social sciences, and natural sciences about the nature of life, the body, and biomedicine. Co-taught with Professor Stefan Helmreich (MIT Anthropology); the class will meet at Harvard.
History of Science 252

Sciences of History (160522)

Alex Csiszar

2016 Spring (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

What is historical method, and in what sense might history be made a science? Proposed answers to these questions have varied over time, in part according to changing conceptions of science and its methods. Course topics will include concepts of the event, agency, and causation; the constitution and use of archives; quantitative approaches to history; values of objectivity and completeness; and big history. Emphasis, not exclusive, on how historians of science have approached these historiographical problems.

History of Science 253

Bioethics, Law, and the Life Sciences (122616)

Sheila Jasanoff

2016 Spring (4 Credits)

Schedule: MW 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

Seeks to identify and explore salient ethical, legal, and policy issues and possible solutions associated with developments in biotechnology and the life sciences.

Course Notes: Offered jointly with the Kennedy School as IGA-515.

Requirements: Anti-Req: Cannot be taken for credit by students who have already taken IGA-515

History of Science 261

Ethnography of Science and Technology (108933)

Sophia Roosth
This course surveys monographs in the ethnography of science, both canonical and current. How have the methods and tools of the interpretive social sciences been applied to cultures of science and technology? What is the relation of description to analysis in ethnographies of science? How do such ethnographies approach theory-building and interpretation? Beginning with early work in the sociology of scientific knowledge and laboratory studies, students will read work in feminist science studies, field and environmental studies, multi-sited ethnography, sensory ethnography, and ethnographic accounts of digital worlds. Throughout, pressure will be placed on issues of method, style, and representation.

Big Data: Past, Present, Future (156326)

Rebecca Lemov

2015 Fall (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: n/a

The goal of this class is to understand more deeply the roots and current practices involved in "Big Data," an umbrella term and current buzzword used to mark the revolutionary potential inherent in working with scaled-up collections of data and new data-processing and -storage technologies. We will begin by examining claims that Big Data has ushered in a new era of epistemology and scientific understanding. Next, we will investigate the historical development as well as material and political conditions that produced the current moment. We will read histories and ethnographies of Big Data and its historical precursors across fields as diverse as (but not limited to) bioinformatics, climate science, anthropology, library science, and paleontology, and will consider the interpenetration of Big Data's practices in commerce, national security, personal life ("self-tracking") and the project of self-engineering. The aim of the course is to be better able to assess the challenges and opportunities the current "data deluge" poses to society.

Sources and Methods in the History of Technology (160503)

Matthew Hersch

2016 Spring (4 Credits)

Instructor Permissions: Instructor

Enrollment Cap: n/a

Intended for graduate students, this seminar provides a comprehensive introduction to the field of history of technology and surveys its canonical works. Readings by authors like Thomas Hughes, Jennifer Light, and Fred Turner will explore the evolving histories of industrialization, computing, military and aerospace technologies, gender and technology, and other areas of student interest. Students will also gain experience working with primary
sources, including archival documents, oral histories, popular media, memoirs, and material culture. At the conclusion of the term, each student will prepare a research prospectus suitable for a grant application or future work in the field.

Entangled Objects: Or the Stuff of Science, Culture, and Society (107818)

*Jean-Francois Gauvin*

2016 Spring (4 Credits)  
**Schedule:**  
W 0400 PM - 0559 PM

**Instructor Permissions:**  
Instructor  
**Enrollment Cap:**  
n/a

This course focuses on things: from Medieval reliquaries to the modern clocks and big data. Its aim is to look at objects from a variety of angles (science, anthropology, art, cultural studies) and to investigate what makes them such powerful anchors--actors--of our daily lives. The readings and discussions will provide a strong theoretical background to the final assignment: designing and mounting a temporary exhibit.

The Physics of Fiction: Pynchon, Narrative, Theory (127069)
This course focuses on an extraordinary body of work by Thomas Pynchon, including "Entropy," "Crying of Lot 49," "Gravity's Rainbow," and "Mason and Dixon." By studying this work we explore Pynchon's vision of modernity, but also important themes in the history of science and in philosophy. We will grapple with communication, surveying, and weaponization of science in the twentieth century on the one hand, and with clashing accounts of explanation on the other. How (for example) does one explain the pattern of V2 rocket-bombs exploding around London in World War II? Do we learn about the location of future detonations from the ones that come earlier as Pavlov might have had it? Or is the world, at root, inextricably random, with events utterly independent one from the other as Poisson would say? Such reflections on the world—and they extend through identity, love, war, and materiality—feed back into the very nature of writing itself, and in the final sessions of the seminar, we will turn to literary-philosophical questions such as this: How, in the absence of causality and continuity, does narrative itself function? What might be a postcausal (postmodern) novel? Along with Pynchon's original text, we will read widely in the history of technology, warfare, science, literary theory, and philosophy.

Scientific Biographies (160707)

Oren Harman

2015 Fall (4 Credits)  

Schedule:  

R 0400 PM - 0559 PM

Instructor Permissions:  

Instructor  

Enrollment Cap:  

15

Scientific Biography is a genre with a history. A history, in fact, that can teach us a lot about how our view of science and knowledge and truth and art have changed over time, ever since the Greeks. In this course, we will be reading biographies of scientists from different fields - physics, mathematics, biology, geology, astronomy, medicine—and different historical times, closely examining both the art and craft of biography, as well as its changing historical contexts. Some of the characters we will meet include Pythagoras, Descartes, Galileo, Darwin, Einstein, Marie and Pierre Curie, Barbara McClintock, and George Price. Using literature, plays, film, and art - we will see how biographies of scientists have evolved, and continue to change dramatically, and why that's meaningful and important. But the course will also deal with biographies of a different kind —of ideas, objects, diseases, even equations. Here we'll encounter, among others, Lonesome George the Galapagos turtle, E=mc2, H2O, and cancer. Using literary, philosophical, scientific, and historical analysis, we'll ask how the evolution of the genre of scientific biography can be used as a prism to understand broad developments in the sciences themselves, as well as in the history of science as a discipline.

Course Notes:  

Open to advanced undergraduates with permission of instructor.

Leverett House Seminar  75

(Mis)Understanding Islam Today (161256)

Bilal Malik

2016 Spring (4 Credits)  Schedule:  R 0100 PM - 0259 PM
Instructor Permissions:  Instructor  Enrollment Cap:  n/a

Islam and Muslims have increasingly become the subject of various controversies in pop culture, news media, popular imagination, and political debates. Concerns about Islam in this coverage are wide-ranging: terrorism; challenges of Muslim minorities in (and for) Western secular democracies; implications of Islamist movements for democratic politics; the status of women within Muslim communities; blasphemy; the social impact of Islamic Law and norms (shariah), etc. In this course, we will bring these topical concerns around Islam into conversation with insights from Cultural Anthropology and other fields, including Religious Studies, History, Government, Philosophy and Law.

QUESTIONS AND GOALS: While interrogating concerns around contemporary Islam, participants in this course will explore two overarching questions: What kinds of insights into Muslim communities are enabled when we are sensitive to local categories, attentive to people's experiences, and grapple deeply with the complexity (and messiness) of historical circumstances and contemporary social life? In turn, how may our self-awareness about our own perspectives and experiences be deepened through this process? These two questions mirror the two main goals of the course: I) to deepen understanding of Islam, Muslim societies and peoples in the world today; and (in the process of doing that) II) to engage and reflect on our self-understandings (concerning our own notions of religion, democracy, secularism, freedom, and --ultimately--what it means to be 'human'). A third goal of the course is to also underscore the value of a liberal arts education. In particular, by dwelling on the case of cross-cultural understandings (and misunderstandings) related to Islam today, the course attempts to underscore that no matter what one's personal objectives --social theorizing for a better understanding of the world, engaging issues of policy and practice, or simply the pursuit of one's life and career as an engaged global citizen --there is value in critically reflecting on the world, and the place of others and ourselves in it as products of historical and cultural contexts.

ENROLLMENT: To be considered for enrollment, please submit the survey titled 'Brief statement of interest' available on the course website: https://goo.gl/3DvJLf (email bmalik@fas for issues in accessing survey or any other questions).

Course Notes:  No prior familiarity with Islam is required or assumed. Students of all departments/concentrations can enroll (though the course does count towards the Anthropology concentration). The course is open to undergraduate students of all years, and also available for cross-registration, but enrollment is limited and by instructor-permission.

Winthrop House Seminar  75

The Laws of War (125443)

Gregg Peeples

2016 Spring (4 Credits)  Schedule:  M 0300 PM - 0459 PM

Instructor Permissions:  Instructor  Enrollment Cap:  n/a

What are the “laws of war”? This seminar examines the historical development of two legal concepts: jus ad bellum, which judges the legitimacy of the use of force in international relations; and jus in bello, which defines the duties of belligerents during an armed conflict. Drawing on this background in international and U.S. law, the seminar then explores how these laws have influenced the U.S. “War on Terror” and how they might shape future conflicts.

Course Notes:  Open to students from all Houses.

Requirements:  Course open to Undergraduate Students Only

**Human Evolutionary Biology 1200**

Neanderthals and Human Evolutionary History (160614)

*Tanya Smith*

2015 Fall (4 Credits)

**Instructor Permissions:** Instructor

**Enrollment Cap:** 10

**Schedule:** R 0300 PM - 0529 PM
This course explores the human fossil record, including the earliest evidence of putative bipedal humans in the late Miocene, and continuing up to the origin and expansion of modern humans in the Upper Paleolithic. Students will be challenged to critically evaluate on-going debates in paleoanthropology, and will develop skills in reading and discussing primary scientific literature. The second half of the course will focus on the discovery and study of our "cousins," the Neanderthals. The recent history of the Neanderthals will be explored in detail, mirroring intellectual developments in biological anthropology ranging from the re-conceptualization of race to innovations in recovering ancient DNA.

Course Notes: Freshman and sophomore students considering a concentration in Human Evolutionary Biology are encouraged to enroll.

Class Notes: This course counts towards the Human Evolution subfield requirement in HEB.

Human Evolutionary Biology 1210

Research in Comparative Biomechanics: Seminar (127206)

Daniel Lieberman
Nicholas Holowka

2016 Spring (4 Credits) Schedule: TBD

Instructor Permissions: Instructor Enrollment Cap: 8

Introduces students to experimental techniques used to investigate the structure and physiology of humans. Students undertake a supervised research project in the Skeletal Biology and Biomechanics Laboratory. Students meet to introduce their project, discuss their work and progress, and to present their final results. An extensive commitment of time in the laboratory is required. Grades are based on the work completed, the oral presentation, and a short research paper.

Course Notes: This course fulfills the research seminar concentration requirement for Human Evolutionary Biology

Recommended Prep: Life Sciences 2 required

Human Evolutionary Biology 1290

Cultural Evolution: an interdisciplinary perspective (159565)

Joseph Henrich
Nathan Nunn
James Robinson

2015 Fall (4 Credits) Schedule: T 0900 AM - 1159 AM
Unlike other species, humans are heavily reliant on learning from others to acquire many important aspects of their behavior, and this cultural transmission has created a second system of inheritance that has driven much of our species’ genetic evolution. In addition to having shaped our species’ anatomy and physiology, cultural evolution has important implications for understanding human nature, and for how to tackle basic problems in psychology, economics and anthropology. The first third of this course will develop the basic principles and lines of inquiry while the remainder will apply, hone and refine them by exploring economic development, the history of modern institutions, and global inequality.

Course Notes: Students must seek instructors’ permission to enroll in the course by sending the instructors a paragraph via email about why they want to take the course and what they hope to get out of it.

Human Evolutionary Biology 1300

Evolutionary Origins of the Human Mind (159567)

Alexandra Rosati

2016 Spring (4 Credits)  
Schedule: MW 0100 PM - 0229 PM

Instructor Permissions: Instructor  
Enrollment Cap: n/a

Human behavior is strikingly different from other animals: we speak languages, create tools, work together on large-scale endeavors, and even learn from others in university classrooms. What cognitive processes underlie these behaviors, and how did they emerge? In this course, we will examine the evolutionary origins of human cognition, with an eye to identifying what human psychological capacities are unique versus shared with other species. To do so, we will integrate theoretical perspectives from biology concerning the evolution of intelligent behavior, with current empirical research from comparative psychology. Topics will include: social cognition, communication, inhibitory control, and memory and planning, with a focus on humans and other primates.

Course Notes: This course fulfills the behavior concentration requirement for Human Evolutionary Biology

Class Notes: In addition to the weekly lectures, students will be required to attend a weekly one-hour-long discussion section.

Recommended Prep: Students wishing to enroll in this course must have completed at least one of the following courses: Human Evolutionary Biology 1329, Human Evolutionary Biology 1330, Human Evolutionary Biology 1335, Science of Living Systems 15, or Science of Living Systems 20

Human Evolutionary Biology 1312
Human Sexuality: Research and Presentation Seminar (122589)

Judith Flynn

2015 Fall (4 Credits)  Schedule:  R 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  15

An examination of human sexuality from a scientific perspective. Students will read and present primary scientific
literature that highlights current research on a variety of topics including: sexual development, gender identity,
sexual orientation, cross cultural variations in mating systems, promiscuity, the evolution of monogamy, sexual
attraction, sexual communication, including an exploration of the existence of human pheromones, libido and sexual
dysfunction.

Class Notes:  This course counts towards the Human Evolution subfield requirement in HEB.

Human Evolutionary Biology 1313
Stress: Research and Presentation Seminar (127757)

Judith Flynn

2016 Spring (4 Credits)  Schedule:  F 0200 PM - 0359 PM
Instructor Permissions:  Instructor  Enrollment Cap:  12

An examination of stress from a scientific perspective with a focus on stress research in mammals, especially
primate and humans. A writing and speaking intensive seminar that will explore the basics of the stress response,
physiological effects of the stress and factors that affect stress responsiveness, such as perinatal and early life
effects, social support, outlets for frustration and coping skills. The relationship between stress and disease will also
be explored. Scientific studies of the effectiveness of modalities of stress reduction will also be discussed. Students
will present primary scientific literature that highlights current research on a variety of topics in the field.

Human Evolutionary Biology 1321
Food, Drink and Energy (160432)

Noreen Tuross
Linda M. Reynard

2015 Fall (4 Credits)  Schedule:  W 0200 PM - 0459 PM
This course explores how the food you eat, the beverages you drink and your activity level are part of your total energy budget. The focus of the course is on how energy is measured including food and drink energy content, dietary intake records and recall, activity monitors and recalls, the resting metabolic rate and finally, the use of doubly labeled water in animals and humans.

**Course Notes:**
This course counts towards the Anatomy/Physiology subfield requirement and the research seminar requirement in HEB. Course includes a laboratory component in addition to the seminar portion.

**Class Notes:**
This course counts towards the Anatomy/Physiology subfield requirement and the research seminar requirement in HEB. Course includes a laboratory component in addition to the seminar portion.

**Recommended Prep:**
Life and Physical Sciences A or Life Sciences 1a and Life Sciences 1b required.

**Human Evolutionary Biology 1330**
Primate Social Behavior (113837)

*Richard Wrangham*

*Zarin P. Machanda*

2016 Spring (4 Credits) **Schedule:** MWF 1100 AM - 1159 AM

**Instructor Permissions:** None **Enrollment Cap:** n/a

A review of the behavioral interactions in natural primate populations, drawing on experimental, observational, and theoretical studies. Discussion of ecological, physiological, and developmental bases of primate social behavior, with special attention to the evolution of patterns of behavioral interactions among individuals of different age, sex, relatedness, and status. Topics include sexual conflict, sexual selection, and mating systems; care of offspring and other aid-giving; manipulative and cooperative aspects of communication; competition, dominance, and territoriality; and the evolution of social relationships.

**Course Notes:**
This course fulfills the behavior concentration requirement for Human Evolutionary Biology

**Class Notes:**
This course will include a mandatory field trip to the Franklin Park Zoo at a date to be determined.

Behavioral Ecology of Chimpanzees (126512)

Zarin P. Machanda

2015 Fall (4 Credits)  
**Schedule:** T 0200 PM - 0459 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** 12

An advanced seminar on current topics in behavioral ecology research of chimpanzees and bonobos. Topics will include: foraging, dominance, cooperation, adolescence, reproductive strategies, culture, ranging, cognition, molecular ecology, and relationships. We will discuss behavioral flexibility of chimpanzees between different communities across Africa and learn how to collect and analyze behavioral data. We will compare the behavior of chimpanzees and bonobos with that of humans and examine how these species might serve as models for human evolution.

**Course Notes:** This course counts towards the Human/Primate Behavior subfield requirement and the research seminar requirement in HEB.

**Class Notes:** This course counts towards the Human/Primate Behavior subfield requirement and the research seminar requirement in HEB.

Human Evolutionary Biology 1355
Evolution and Religion (121996)

Peter Ellison

2015 Fall (4 Credits) Schedule: M 0300 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: 20

A seminar focusing on the relationship between Darwinian evolution and religion. This relationship has contributed in major ways to the social response to evolutionary biology from the 19th century to the present. We will consider this relationship from a number of perspectives, relying on the reading of primary texts from Paley to Dennett. We will consider both religious critiques of evolutionary theory and evolutionary approaches to understanding religion.

Human Evolutionary Biology 1380
Behavioral Biology of Women (126152)

Lara Durgavich

2016 Spring (4 Credits) Schedule: TR 0230 PM - 0359 PM
Instructor Permissions: None Enrollment Cap: n/a

This course is an exploration of female behavioral biology from an evolutionary and biosocial perspective. We will focus on physiological, ecological, and social aspects of women's development from puberty, through reproductive processes such as pregnancy, birth and lactation, to menopause and aging. We will also explore female life-history strategies in a variety of cultural settings. Topics include cognitive and behavioral differences between men and women and male and female reproductive strategies. Examples are drawn primarily from traditional and modern human societies; data from studies of nonhuman primates are also considered.

Course Notes: Priority given to Human Evolutionary Biology concentrators.
Human Evolutionary Biology 1390

Game Theory and Social Behavior (160738)

Moshe Hoffman
Erez Yoeli

2015 Fall (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: Instructor
Enrollment Cap: n/a

We will apply an evolutionary framework - with the help of models from "game theory" and "evolutionary dynamics" - to explain social behavior typically considered the realm of psychologists and philosophers, such as why we speak indirectly, in what sense beauty is socially constructed, and where our moral intuitions come from.

Game theory and evolutionary dynamics will be taught from scratch but will not be redundant to experienced students. Five problem sets will be required, which can be done in groups and will require basic programming and math. Tutorials will be available for students in need of additional assistance. Weekly readings will be assigned from various related disciplines, such as psychology, philosophy, economics, and animal behavior. The readings will help students answer weekly discussion prompts which will be discussed in weekly discussion sections. Students will also work on a final project (n groups, if desired) that advances either the theoretical or empirical component of the course material.

Course Notes: In addition to the lectures, students will be required to attend weekly discussion groups. Optional math and programming tutorials will be offered biweekly for students who require additional assistance.

Human Evolutionary Biology 1413

Mechanics of the Human Diet (160458)

Katherine D. Zink

2015 Fall (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: Instructor
Enrollment Cap: 12

What did you eat today? The human diet has changed drastically over the course of evolutionary history. In this research seminar we will use a combination of lectures, discussions, and experiments to explore how modern, highly-processed diets have affected human chewing, cranio-dental growth, and energetics. Students will gain an appreciation for the ways that dietary changes have impacted human biology, as well as hands-on experience collecting diet data by using a variety of experimental techniques.

Course Notes: This course counts towards the research seminar requirement in HEB
Human Evolutionary Biology 1418

Endocrinology and Behavior: Research Seminar (110741)

Susan Lipson

2015 Fall (4 Credits)  

**Schedule:** MWF 1100 AM - 1159 AM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 8

An introduction to laboratory techniques and research design in behavioral endocrinology. Students conduct pilot research projects.

**Course Notes:** Preference given to Human Evolutionary Biology concentrators. Lab safety training required (after enrollment).

This course counts towards the research seminar requirement in HEB.

**Class Notes:** This course includes a mandatory two-hour laboratory section per week. Students will be given the option to choose either Monday or Wednesday afternoon for their laboratory section.

**Recommended Prep:** Human Evolutionary Biology 1310 or Life Sciences 2 or with permission of instructor.

Human Evolutionary Biology 1419

Laboratory Methods in Human Evolutionary Biology (108669)

Linda M. Reynard

2016 Spring (4 Credits)  

**Schedule:** W 0100 PM - 0359 PM

**Instructor Permissions:** Instructor  

**Enrollment Cap:** 10

An introduction to laboratory methods in Human Evolutionary Biology. We will use state-of-the-art equipment and techniques to explore subjects of relevance to HEB, such as how humans metabolize caffeine and alcohol. Topics include quantitative pcr and genetic analysis, immunological methods, enzyme kinetics, chromatography, and measurement of isotope ratios in tissues. This course may be taken in preparation for lab-based thesis projects.

**Course Notes:** This course fulfills the research seminar requirement for Human Evolutionary Biology

**Recommended Prep:** Life Sciences 1a and Life Sciences 1b required.
Human Evolutionary Biology 1420
Human Evolutionary Anatomy (116069)
Neil Roach
Katherine D. Zink
2016 Spring (4 Credits)  
Schedule: TR 0100 PM - 0229 PM
Instructor Permissions: None  
Enrollment Cap: n/a
How did the human body evolve, and how does it develop, grow and function? This course provides an integrative regional overview of human anatomy, with an emphasis on the musculo-skeletal system, and a comparative approach to the evolution of modern anatomy. Additional topics include skeletal and dental development, and gross anatomy of the nervous, circulatory, and digestive systems.

Course Notes: This course fulfills the anatomy/physiology concentration requirement for Human Evolutionary Biology
Recommended Prep: Life Sciences 2 recommended, but not required

Human Evolutionary Biology 1421
Teeth (125032)
Tanya Smith
2015 Fall (4 Credits)  
Schedule: W 0300 PM - 0529 PM
Instructor Permissions: Instructor  
Enrollment Cap: 6
Teeth are one of the best preserved and most commonly recovered elements in archaeological and fossil assemblages. This interactive seminar will focus on ways in which dental remains may inform studies of human and primate growth and development, evolution, and health. Students will read and discuss current scientific literature, engage in histological studies in the Dental Hard Tissue Laboratory, and conduct research projects in consultation with the professor.

Course Notes: Preference given to Human Evolutionary Biology junior and senior concentrators.
Class Notes: This course counts towards the research seminar requirement in HEB.
Recommended Prep: HEB 97, Sophomore Tutorial, recommended but not required.
Human Evolutionary Biology 1422
Human Origins in Context (160488)

David Pilbeam
John Barry
Zarin P. Machanda

2016 Spring (4 Credits) Schedule: TR 1000 AM - 1129 AM
Instructor Permissions: Instructor Enrollment Cap: 12

Understanding the pattern and timing of ape and human evolution is key to reconstructing the common ancestor of humans and chimpanzees, and hence of the origin of our lineage. The living apes share a distinct body form that differs to varying degrees, often considerably, from those seen in fossil apes. The interpretation of these similarities and differences is therefore crucial to understanding the radiation of apes and humans, and to reconstructing the human-chimpanzee ancestor.

The course involves hands-on analysis and interpretation of both the fossil record and living apes and humans.

Course Notes: This course fulfills the research seminar concentration requirement for Human Evolutionary Biology

Class Notes: In addition to the lectures, this course will include a weekly two-hour-long discussion section

Recommended Prep: Life Sciences 1b required. Life Sciences 2 or Science of Living Systems 16 or HEB 1420 strongly recommended.

Human Evolutionary Biology 1451
Primate Functional Genetics and Genomics (109815)

Terence Capellini

2016 Spring (4 Credits) Schedule: TR 1000 AM - 1129 AM
Instructor Permissions: Instructor Enrollment Cap: 12

Recent advances in genetics, genomics, and developmental biology are improving our understanding of human and non-human primate biological traits. These disciplines, when incorporated into a multi-faceted context, can reveal the mechanistic basis of evolutionary adaptations. This seminar is designed to investigate and critically evaluate foundational and novel research in primates (and other organisms) that employs the tools of these trades. In doing so, students are exposed to an integrative perspective upon which to explore classic and modern questions in functional biology.

Course Notes: This course fulfills the research seminar concentration requirement for
Human Evolutionary Biology 1463

Molecular Evolution of Primates (132169)

Maryellen Ruvolo

2015 Fall (4 Credits) Schedule: R 0100 PM - 0359 PM

Instructor Permissions: Instructor Enrollment Cap: 6

Molecular biology, DNA sequencing, and genomics have transformed our knowledge of evolution at the molecular level. This course explores how genetic data inform us about adaptations of humans and other primates. We will explore how natural selection molds primate genomes over time. Topics include the neutral theory of molecular evolution, the molecular clock concept and its applications, evolution of multigene families, relationships between phenotypic and molecular evolution, the evolution of primate color vision genes, and human disease variants in an evolutionary context.

This year features a new small-group format with emphasis on active student participation and skill development including how to think critically about data. Students will have the opportunity to learn how to write a research paper including how to effectively research the scientific literature, develop an outline, avoid inadvertent plagiarism, and present the body of a developing research paper to peers in order to get useful feedback in time to modify their final papers.

Class Notes: This course counts towards the research seminar requirement in HEB.

Recommended Prep: Life Sciences 1b required.

Human Evolutionary Biology 1480

Human Evolution through Developmental Change (156174)

Terence Capellini

Neil Roach

2015 Fall (4 Credits) Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: Instructor Enrollment Cap: 12

Humans and our primate relatives display marked variation in biological traits. This variation results from natural selection operating on pre- and post-natal developmental mechanisms. While these mechanisms remain mostly unknown, recent advances in genetics, genomics, and developmental biology now allow us to begin to understand how evolutionary processes influence and are influenced by underlying developmental and genetic organization. This course explores these inter-relationships in the context of the primate paleontological record. We focus on the
evolution of the post-cranial skeleton (i.e., the axial skeleton, girdles, and limbs), and present studies that cast light on the mechanisms that underlie major transitions in human evolution.

**Class Notes:** This course counts towards the Human Evolution subfield requirement and the research seminar requirement in HEB. Mandatory weekly lab section.

**Recommended Prep:** Life Sciences 1b and Life Sciences 2 recommended.

**Human Evolutionary Biology 1540**

**Human Migration (108665)**

*Noreen Tuross*

2015 Fall (4 Credits)

**Schedule:** T 0100 PM - 0259 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 10

The course will explore human migration at several scales, time depths and data sources, including the movement of humans out of Africa and the complex movements of the first farmers across Europe. We will explore the impacts that climates and disease burden have had on human migrations, and discuss recent movements of people and the reasons for migratory behavior in humans. In addition, a personal migration story will be developed by the class.

**Class Notes:** This course counts towards the research seminar requirement in HEB.

**Recommended Prep:** Life Sciences 1b required.

**Human Evolutionary Biology 1562**

**The Behavioral Biology of Human Aggression (160455)**

*Richard Wrangham*  
*Carole Hooven*

2015 Fall (4 Credits)

**Schedule:** T 0100 PM - 0329 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 16

Discussion focuses on aggression and violence as natural behaviors rather than as aberrations. We therefore consider explanations based in evolutionary theory, using ultimate and proximate perspectives. The course will refer often to animal examples. It will include discussion of war, fighting, sexual violence and domestic violence. Core principles will come from behavioral ecology, complemented by material from endocrinology, neurobiology, social anthropology, dual inheritance theory, behavioral genetics, social psychology, developmental psychology, political science, and international relations.

**Course Notes:** Preference will be given to Human Evolutionary Biology concentrators.
course counts towards the Human/Primate Behavior subfield requirement and the research seminar requirement in HEB.

Human Evolutionary Biology 1600
Evolutionary Genetics of Complex Human Traits (161269)

Maryellen Ruvolo

2016 Spring (4 Credits) Schedule: R 0100 PM - 0359 PM
Instructor Permissions: Instructor Enrollment Cap: 8

An advanced seminar on complex human traits with a special focus on behavior. Topics will include human genetic variation as a consequence of our evolutionary history, what we can learn from model organisms, the genetics of domestication, complicating factors in the analysis of complex traits, issues of replicability in genetics and psychology, gene-by-environment interactions, human behavioral disorders, the genetic bases of language and cognition, and prospects for the reconstruction of past human behavior from genomic evidence.

Course Notes: This course fulfills the research seminar concentration requirement for Human Evolutionary Biology

Recommended Prep: Required prerequisite: An A or B grade in Life Sciences 1b, Organismic Evolutionary Biology 50, or a college-level genetics course

Human Evolutionary Biology 2310
Mechanisms of Life History Evolution (161218)

Peter Ellison

2016 Spring (4 Credits) Schedule: M 0300 PM - 0459 PM
Instructor Permissions: Instructor Enrollment Cap: 12

This seminar will focus on the mechanisms - hormonal, genetic, social, developmental, epistatic, etc. - that underlie life history variation and life history evolution. The taxonomic focus will be very broad, including plants, invertebrates, and vertebrates other than primates, as well as human and non-human primates.

The course will consist of weekly readings and discussion, as well as a term paper.

Recommended Prep: Exposure to physiology and endocrinology at least at the level of Life Sciences 2 is required.
Human Evolutionary Biology 2312
Current Topics in Human Evolutionary Genetics (123208)

Maryellen Ruvolo

2016 Spring (4 Credits) Schedule: TBD
Instructor Permissions: Instructor Enrollment Cap: n/a

Critical reading of current literature on the genetics of living humans and discussion of evolutionary implications.

Course Notes: Open to first and second year graduate students in Human Evolutionary Biology.

Requirements: Course open to Graduate Students Only

Humanities  10A

A Humanities Colloquium: From Homer to Descartes (110440)

Alison Simmons
Kathleen Coleman
Jay Harris
Jonathan Bolton
Racha Kirakosian

2015 Fall (4 Credits)                      Schedule:      T 1000 AM - 1129 AM

Instructor Permissions:  Instructor  Enrollment Cap:  75

2,500 years of essential works alongside current art events. Humanities 10a includes works by Homer, Plato, Thucydides, Virgil, Augustine, Dante, Chaucer, Shakespeare, Descartes, as well as the Hebrew Bible and the New Testament. All sections are led by professors.

Course Notes: Weekly two-hour sections in this course are led by the professors. The course is designed for freshmen and sophomores interested in further work in the Humanities, but all students are welcome. Humanities 10b, which meets in the Spring, includes works by Montaigne, Shakespeare, Franklin, Goethe, Austen, Wagner, Nietzsche, Freud, Joyce, Arendt, and Kieslowski. Freshmen who have been recommended for Expos 20 may take the full year of Hum 10a/b for Expos credit. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding. This course, when taken for a letter grade together with Humanities 10b, meets the General Education requirements for both Aesthetic and Interpretive Understanding and Culture and Belief. The course may not be taken Pass/Fail, and auditors are not permitted.

Class Notes: The course will be lotteried by application process, administered at the first meeting, on Thursday, September 3. See the course website for more details.

2016 Spring (4 Credits) Schedule: T 1000 AM - 1129 AM
Instructor Permissions: None Enrollment Cap: 75

2,500 years of essential works alongside current art events. Hum 10b includes works by Montaigne, Shakespeare, Franklin, Goethe, Austen, Wagner, Nietzsche, Freud, Joyce, Arendt, and Kieslowski. All sections are led by professors. Join the conversation. Part two of a two part series.

Course Notes: Only students who have satisfactorily completed the Fall 2015 term of Hum 10a are eligible to enroll in Hum 10b. Weekly two-hour sections in this course are led by the professors. This course, when taken for a letter grade together with Humanities 10a, meets the General Education requirements for both Aesthetic and Interpretive Understanding and Culture and Belief. The course may not be taken Pass/Fail, and auditors are not permitted.

Frameworks: The Art of Looking (109854)
Robin Kelsey
2016 Spring (4 Credits) Schedule: T 1130 AM - 1259 PM
Instructor Permissions: Instructor Enrollment Cap: 105

Visual information today is superabundant thanks to our smartphones, tablets, and other screen-based gadgets. But few of us recognize how thoroughly our habits and experiences of looking have been conditioned by interfaces with long and complex histories. Participants in this new Framework Course, developed as part of the Humanities Project at Harvard, will approach looking through a consideration of key technologies from its history, such as the telescope, the television, and the easel painting. Students will learn about the hidden intricacies of looking and hone skills of visual, material, and spatial analysis through encounters with aesthetic objects from Harvard's collections.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Humanities 11B
Frameworks: The Art of Listening (109855)

Alexander Rehding

2015 Fall (4 Credits) Schedule: W 1100 AM - 1159 AM

Instructor Permissions: Instructor Enrollment Cap: 90

Our world is steeped in sound, but we must learn to pay attention to listening. Sounds produce emotions, mark out spaces, call up memories; silence can be deafening; voice is a marker of identity. This course will sharpen our ears. We explore the sonic world through diverse readings and creative projects with sound. Discussions and assignments will open our minds (and ears) to listening practices, what the arts teach us about listening, and how we describe our experiences as listeners. We examine the relationships between sound and time, community, responsibility and attentiveness, and explore the soundscape in which we live.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Class Notes: Though the University will be on a "Monday" schedule, this course will still have its first lecture on Wednesday, September 2.

Humanities 11C
Frameworks: The Art of Reading (109856)

Julie A. Buckler

2016 Spring (4 Credits) Schedule: T 0200 PM - 0329 PM

Instructor Permissions: None Enrollment Cap: n/a

This course introduces "reading" as a wide-ranging practice of interpretation, applicable to social phenomena and historical narratives as well as to literary texts. Participants in this introduction to the humanities will examine a range of texts, from poems and political journalism to graphic novels and blogs, both to practice close and subtle reading and to see how these texts seek to establish rules for their own interpretation. Rather than look at a particular artistic tradition or literary history, we will develop a set of "all-terrain" interpretive skills that can be deployed on a range of intellectual and cultural objects.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Class Notes: In addition to the Tuesday 2-3:30 meeting, this course requires attendance at a mandatory Thursday session (2-4), which includes section.

Human History (156633)

Maya Jasanoff
Niall Ferguson

2016 Spring (4 Credits) Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: None Enrollment Cap: n/a

Five hundred years of world history through the prism of twelve encounters between “the West” and “the Rest” -- beginning with the clash between Portuguese buccaneers and Chinese eunuchs in 1517 and ending yesterday. Human History takes globalization personally, but views it from at least two very different perspectives—those of the professors. (We also show how to resurrect the dead.)

Revolution, Reform and Conservatism in Western Culture (160423)

W. Simpson

2015 Fall (4 Credits) Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: Instructor Enrollment Cap: n/a
What is the function of literary texts in moments, from Plato to the Russian Revolution, that promise total, enlightened societal transformation? Each week, this course will focus on two texts related to selected “revolutionary” moments, one philosophical and one literary. Literary texts do not participate easily in the revolutionary order. They resist the textual simplicities of philosophy. Which do we trust: philosophy or literature? Texts include many found in traditional “Great Books” courses: Plato, Virgil, Augustine, Dante, Luther, Milton, Swift, Rousseau, Twain, Kant, Marx, and Chekov, among others.

**Course Notes:**
Offered jointly as Aesthetic and Interpretive Understanding 42. Students who have taken Culture and Belief 18 or Aesthetic and Interpretive Understanding 42 may not take this course for credit. This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Aesthetic and Interpretive Understanding, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Urban Imagination (160422)

Julie A. Buckler

2015 Fall (4 Credits)  
**Schedule:** TR 0200 PM - 0329 PM  
**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

Cities are one of humankind's most richly complex inventions and can best be understood through both creative and critical thinking. Offered in connection with a Mellon-funded initiative in Architecture, Urbanism, and the Humanities, this course invites you to join an interdisciplinary investigation of the urban form and fabric, socio-cultural life, and artistic representation of five iconic cities—Boston, Berlin, Moscow, Istanbul, and Mumbai. We will treat literature, film, and photography alongside cultural history, experiment with urban fieldwork, and use digital tools for mapping and curating virtual exhibitions.

**Class Notes:** This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

*Ronald Garner*
*Richard Losick*

2015 Fall (4 Credits)

**Schedule:** TR 0100 PM - 0229 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** n/a

What are the fundamental features of living systems? What are the molecules imparting them and how do their chemical properties explain their biological roles? The answers form a basis for understanding the molecules of life, the cell, diseases, and medicines. In contrast with traditional presentations of relevant scientific disciplines in separate courses, we take an integrated approach, presenting chemistry, molecular biology, biochemistry, and cell biology framed within central problems such as the biology of HIV and cancer.

**Course Notes:** For more information about the assignment process, please see the course website in the fall. This course, in combination with Life Sciences 1b, constitutes an integrated introduction to the Life Sciences. This course, when taken for a letter grade, meets the General Education requirement in Science of Living Systems.

**Enrollment Cap:** n/a

How are observable characteristics of organisms influenced by genetics? How do genomes change over time to produce the differences we see among species? This course takes an integrated approach, showing how genetics and evolution are intimately related, together explaining the patterns of genetic variation we see in nature, and how
genomics can be used to analyze variation. In covering Mendelian genetics, quantitative genetics, and population genetics, this course will emphasize developments involving our own species.

Course Notes: This course, in combination with Life Sciences 1a, constitutes an integrated introduction to the Life Sciences. This course, when taken for a letter grade, meets the General Education requirement in Science of Living Systems.

Evolutionary Human Physiology and Anatomy (123674)

Andrew Biewener
Daniel Lieberman
George Lauder

2015 Fall (4 Credits) Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Why is the human body the way that it is? This course explores human anatomy and physiology from an integrated framework, combining functional, comparative, and evolutionary perspectives on how organisms work. Major topics, which follow a life-course framework, include embryogenesis, metabolism and energetics, growth and development, movement and locomotion, food and digestion, stress and disease, and reproduction. Also considered is the relevance of human biology to contemporary issues in human health and biology.

Course Notes: This course replaces OEB 102. This course, when taken for a letter grade, meets the General Education requirement in Science of Living Systems. This course may not be taken Pass/Fail.

Class Notes: M., W., F., at 1, and three hours of laboratory/discussion weekly.

Integrated Science (159706)

Andrew W. Murray
Michael Desai
Cassandra Extavour
Benjamin de Bivort
This is an intensive two-semester, double course that introduces the natural sciences as an integrated whole to students who have a very strong interest in science. Our goal is to teach students how to solve scientific problems by drawing methods and concepts from biology, chemistry, physics, and mathematics. The course uses examples from biology as an integrating theme, principles from physics and mathematics to reduce complex problems to simpler forms, and computer simulation to allow students to develop their intuition about the behavior of the dynamical systems that control the physical and biological universe. The course includes bootcamps to introduce students to biological experiments and the computer language, Matlab. Each semester will include a project lab, in which students will work in small teams to do original research on unsolved biological problems. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Life Sciences 50B

Experimental Research in the Life Sciences (119061)

*Alain Viel*

2015 Fall (4 Credits)  
**Schedule:** R 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

A laboratory course that immerses students in a dynamic project-based research environment. Participate in experimental projects directly linked with ongoing faculty research. Students select a project from the following research tracks: neurobiology, microbial sciences, cell biology, and synthetic biology. New projects, including some in other research fields, are offered every term. In a highly collaborative atmosphere, students form a fully-functional and diverse research group based on the sharing of ideas and progress reports between projects. The spring microbiology project is part of the "genomes to Biomes" series.

**Course Notes:** Location of the first meeting will be announced on the course website. Open to freshmen, sophomores, juniors, and seniors, regardless of concentration, and suitable for students either with or without extensive laboratory experience. The course may only be repeated once and the second enrollment must be approved by the instructor.

**Recommended Prep:** Students interested in a neurobiology project will need MCB 80 or permission of the instructor. Please also note that students cannot take MCB 100 and LS 100 at the same time.

**Requirements:** Prerequisite: LPS A OR LS 1a

**Life Sciences 100**

Experimental Research in the Life Sciences (119061)

*Alain Viel*

2016 Spring (4 Credits)  
**Schedule:** M 0100 PM - 0229 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a
A laboratory course that immerses students in a dynamic project-based research environment. Participate in experimental projects directly linked with ongoing faculty research. Students select a project from the following research tracks: neurobiology, microbial sciences, cell biology, and synthetic biology. New projects, including some in other research fields, are offered every term. In a highly collaborative atmosphere, students form a fully-functional and diverse research group based on the sharing of ideas and progress reports between projects. The spring microbiology project is part of the "genomes to Biomes" series.

**Course Notes:** Location of the first meeting will be announced on the course website. Open to freshmen, sophomores, juniors, and seniors, regardless of concentration, and suitable for students either with or without extensive laboratory experience. The course may only be repeated once and the second enrollment must be approved by the instructor.

**Recommended Prep:** Students interested in a neurobiology project will need MCB 80 or permission of the instructor. Please also note that students cannot take MCB 100 and LS 100 at the same time.

**Life Sciences 120**

Global Health Threats (127010)

*Richard Losick*

*Barry Bloom*

2016 Spring (4 Credits)

**Schedule:** TR 0100 PM - 0229 PM

**Instructor Permissions:** Instructor

**Enrollment Cap:** 50

The multidisciplinary application of epidemiology, molecular biology and genetics, pathogenesis, drug discovery, immunology and vaccine development, and economic analysis to understanding and combating major threats to human health in developing countries. Emphasis will be on critical readings and scientific writing. Grades will be based on papers in which students will propose the application of multidisciplinary approaches to global health threats not covered in lecture.

**Course Notes:** This course cannot be taken if LS 120 has already been taken. MCB 120 cannot be taken concurrently with LS 120.

**Requirements:** Prerequisite: LS 1a and LS 1b, or LPS A and one additional course from the following: Chemistry 27, Engineering 53, Life Sciences 2, MCB 60, MCB 52, MCB 54, OEB 10, OEB 53, or SCRB 10.

Linguistics 83
Language, Structure, and Cognition (122514)

Kathryn Davidson

2016 Spring (4 Credits) Schedule: MW 1100 AM - 1159 AM
Instructor Permissions: None Enrollment Cap: n/a

What do the world's almost 7,000 languages have in common? Why do they show recurrent commonalities and principled differences? What do they reveal about the human ability for speaking and thinking? How do languages develop? How do they die? This course addresses these and related questions while introducing the languages of the world; their distribution, recurrent structural properties, and genetic classification; processes of language contact; and the relationship between language and the brain.

**Linguistics 101**

The Science of Language: An Introduction (110785)

*Kevin Ryan*

2015 Fall (4 Credits)  **Schedule:** MW 1100 AM - 1159 AM

**Instructor Permissions:** Instructor  **Enrollment Cap:** 50

This course introduces components of study of language: phonology, morphology, syntax, and semantics. It presents the view that knowledge of language is best characterized as an unconsciously internalized set of abstract rules and principles. Evidence is drawn from a variety of signed and spoken languages, language universals, child language acquisition, language change, language games, and language disorders.

**Linguistics 102**

Sentence Structure (121089)

*Cheng-yu Tsai*

2015 Fall (4 Credits)  **Schedule:** MW 1000 AM - 1059 AM

**Instructor Permissions:** Instructor  **Enrollment Cap:** n/a

What determines how the words in a sentence are put together in a given language? This course introduces the field of syntax, and the study of order and structure among words. Students will learn to construct and evaluate syntactic analyses and argumentation and will be exposed to variation and universals in the syntactic patterns found in natural languages. The course will also provide an introductory survey of syntactic phenomena, including question formation, the passive, anaphora, and agreement.
Linguistics 105

Sounds of Language (111954)

Cheng-yu Tsai

2015 Fall (4 Credits)     Schedule: TR 1000 AM - 1059 AM
Instructor Permissions: Instructor     Enrollment Cap: n/a

What are the sounds of the world languages, and how are they organized to make words and sentences? Why are some sounds hard to hear or make? Is there a 'universal inventory' of sounds? This class introduces students to the sounds of the world's languages, and provides tools for studying them systematically. We will study the setup to transfer thoughts from one brain to another.

Linguistics 106

Knowledge of Meaning (117788)

Roberta Pires de Oliveira

2016 Spring (4 Credits)     Schedule: MW 1000 AM - 1059 AM
Instructor Permissions: None     Enrollment Cap: n/a

An introductory course on semantic interpretation in natural language. What does it mean to "know the meaning" of an utterance? This course provides the tools to characterize and study the meanings of sentences. Topics covered include the relation between form and meaning, ambiguity, reference, context dependency, and the role of logic vs. pragmatics in communication.

Linguistics 108

Introduction to Historical Linguistics (123850)

Jeremy Rau

2015 Fall (4 Credits)     Schedule: MW 1100 AM - 1159 AM
Instructor Permissions: Instructor     Enrollment Cap: n/a
Methods and goals of linguistic reconstruction. Topics include the regularity of sound change, types of linguistic change, the relationship between linguistic reconstruction and synchronic analysis, language contact and borrowing, and mechanisms of linguistic change, including recent theories.

Additional Course Attributes:

**Linguistics 112**

Syntactic Theory I (114153)

*C.-T. James Huang*

2015 Fall (4 Credits)  
**Schedule:** W 0300 PM - 0459 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course provides an intensive introduction to generative syntactic theory. Emphasis on syntactic argumentation. Topics center on foundational problems in the theory of syntax, including phrase structure of nominals and clauses, varieties of movement, locality, argument structure, ellipsis case agreement, and the syntax-semantics interface.

**Recommended Prep:** Linguistics 102, equivalent, or permission of the instructor.

**Linguistics 115**

Phonological Theory I (123439)

*Kevin Ryan*

2015 Fall (4 Credits)  
**Schedule:** R 0100 PM - 0259 PM

**Instructor Permissions:** Instructor  
**Enrollment Cap:** n/a

This course is an intensive introduction to phonological theory and experimental work in phonology. This includes rule-based and constraint-based approaches, the typology of phonological processes (vowel and consonant harmony, assimilation and dissimilation, lenition and fortition, etc.), and phonological acquisition. Experimental approaches will deal with gradience, exceptionality, and productivity with an introduction to the quantitative methodologies that these phenomena require.

**Recommended Prep:** Linguistics 105, equivalent, or permission of the instructor

Linguistics 149
Languages of the Caucasus (159718)

Maria Polinsky

2015 Fall (4 Credits)        Schedule:        F 1030 AM - 1229 PM
Instructor Permissions:     Instructor
Enrollment Cap:             n/a

This course pursues two related goals: to introduce the students to the empirical complexity of languages of the
Caucasus and to discuss theoretical analyses in phonology, morphology, and syntax motivated by these languages.
The course involves a subsidiary field methods component, with students working with a native speaker in class,
learning ways to elicit complex data from a little known language.

Recommended Prep:          Linguistics 83 or Linguistics 101.

Additional Course Attributes:

Linguistics 160
Psychology of Language (156739)

Gennaro Chierchia
Jesse Snedeker

2016 Spring (4 Credits)        Schedule:        TR 0100 PM - 0229 PM
Instructor Permissions:        None
Enrollment Cap:                n/a

How do children manage to learn the sounds, the words and the grammar of their native language in three years or
less? Does the language that we speak change how we think? What happens in the mind (and brain) that allows us
to convert sound into meaning during language comprehension (and meaning into motor movements during
language production)? Why are human languages similar to each other in some ways, and what allows them to vary
in others? We will explore these questions integrating the perspectives of linguistics, psychology and cognitive
neuroscience.

Course Notes:                  This is the same course as Psychology 1605. Only one of the two courses
                               may be taken for credit.

Recommended Prep:              For psychology concentrators, Science of Living Systems 20. For linguistics
                               concentrators: this course may be substituted for Linguistics 83 or
                               Linguistics 101 as a requirement for the concentration.

Advanced Readings in Church Slavonic Texts (122524)

Michael Flier

2016 Spring (4 Credits)

Schedule: F 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Readings in canonical Old Church Slavonic texts and later Church Slavonic redactions.

Recommended Prep: Linguistics 250.

Mathematics
Subject: Mathematics

Mathematics  MA
Introduction to Functions and Calculus I (111161)
Brendan Kelly
2015 Fall (4 Credits)  Schedule:  TBD
Instructor Permissions: Instructor  Enrollment Cap: n/a
The study of functions and their rates of change. Fundamental ideas of calculus are introduced early and used to
provide a framework for the study of mathematical modeling involving algebraic, exponential, and logarithmic
functions. Thorough understanding of differential calculus promoted by year long reinforcement. Applications to
biology and economics emphasized according to the interests of our students.

Course Notes:  This is a lecture course taught in small sections. In addition, participation in
two one-hour workshops is required each week. This course, when taken for
a letter grade, meets the General Education requirement for Empirical and
Mathematical Reasoning. This course, when taken together with
Mathematics Mb, can be followed by Mathematics 1b.

Class Notes:  Required first meeting: Wednesday, September 2, 8:30 am, Science Center
D.
Fall section times: M., W., F., at 10; M., W., F., at 11; M., W., F., at 12 (with
sufficient enrollment) and a twice weekly lab session to be arranged.
Brendan Kelly, Sarah Chisholm, Matthew Demers, Dusty Grundmeier, and
members of the Department.

Additional Course Attributes:

Mathematics  MB
Introduction to Functions and Calculus II (113464)
Sarah Chisholm
2016 Spring (4 Credits)  Schedule:  TBD
Instructor Permissions:  None  Enrollment Cap:  n/a
Continued investigation of functions and differential calculus through modeling; an introduction to integration with
applications; an introduction to differential equations. Solid preparation for Mathematics 1b.

Course Notes:  This is a lecture course taught in small sections. In addition, participation in
two one-hour workshops is required each week. This course, when taken for
a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course, when taken together with Mathematics Ma, can be followed by Mathematics 1b.

Class Notes: Required first meeting: Monday, January 25, 8:30 am, Science Center A.

Spring Section Times: Section I: M., W., F., at 10; Section II: M., W., F., at 11; Section III: M., W., F., at 12 (with sufficient enrollment); and a twice weekly lab session to be arranged.

Brendan Kelly, Sarah Chisholm, and members of the Department

Requirements: Prerequisite: Mathematics MA

Mathematics 1A

Introduction to Calculus (123680)

Brendan Kelly

2016 Spring (4 Credits) Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None Enrollment Cap: n/a

The development of calculus by Newton and Leibniz ranks among the greatest achievements of the past millennium. This course will help you see why by introducing: how differential calculus treats rates of change; how integral calculus treats accumulation; and how the fundamental theorem of calculus links the two. These ideas will be applied to problems from many other disciplines.

Course Notes: This is a lecture course taught in small sections. Participation in a weekly 90-minute workshop is required. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: Spring section time: M.W.F. at 10 and weekly lab section to be arranged.

Recommended Prep: A solid background in precalculus.

Additional Course Attributes:

Mathematics 1B

Calculus, Series, and Differential Equations (111010)

Robin Gottlieb
2015 Fall (4 Credits)  
Schedule: TBD
Instructor Permissions: Instructor  
Enrollment Cap: n/a

Speaking the language of modern mathematics requires fluency with the topics of this course: infinite series, integration, and differential equations. Model practical situations using integrals and differential equations. Learn how to represent interesting functions using series and find qualitative, numerical, and analytic ways of studying differential equations. Develop both conceptual understanding and the ability to apply it.

Course Notes: This is a lecture taught in small sections. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: Required first meeting in Fall: Wednesday, September 2, 8:30 am, Science Center C.

Fall section times: M.W.F. at 9 (with sufficient enrollment); M.W.F. at 10; M.W.F. 11; M.W.F. 12 (with sufficient enrollment); Tu.Th. 10-11:30; Tu.Th. 11:30-1.

Robin Gottlieb, Rosalie Belanger-Rioux, Sarah Chisholm, Yu-Wen Hsu, Eric
Recommended Prep: Mathematics 1a or Ma and Mb; or 5 on the AB advanced placement test; or an equivalent background in mathematics.

Additional Course Attributes:

Mathematics  18

Multivariable Calculus for Social Sciences (125396)

Peter M. Garfield
Focus on concepts and techniques of multivariable calculus most useful to those studying the social sciences, particularly economics: functions of several variables; partial derivatives; directional derivatives and the gradient; constrained and unconstrained optimization, including the method of Lagrange multipliers. Covers linear and polynomial approximation and integrals for single variable and multivariable functions; modeling with derivatives. Covers topics from Math 21a most useful to social sciences.

Course Notes: Mathematics 21b can be taken before or after Mathematics 18. Examples draw primarily from economics and the social sciences, though Mathematics 18 may be useful to students in certain natural sciences. Students whose main interests lie in the physical sciences, mathematics, or engineering should consider Math or Applied Math 21a. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: Mathematics 1b or equivalent, or a 5 on the BC Advanced Placement Examination in Mathematics.

Requirements: Anti-Requisite: Not to be taken in addition to Mathematics 21a or Applied Mathematics 21a

Mathematics 19A

Modeling and Differential Equations for the Life Sciences (110596)

John Cain

2015 Fall (4 Credits) Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: Instructor Enrollment Cap: n/a

Considers the construction and analysis of mathematical models that arise in the life sciences, ecology and environmental life science. Introduces mathematics that include multivariable calculus, differential equations in one or more variables, vectors, matrices, and linear and non-linear dynamical systems. Taught via examples from current literature (both good and bad).

Course Notes: This course is recommended over Math 21a for those planning to concentrate in the life sciences and ESPP. Can be taken with or without Mathematics 21a,b. Students with interests in the social sciences and economics might consider Mathematics 18. This course can be taken before or after Mathematics 18. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: A course in one variable calculus preferably at the level of Mathematics 1b.
Mathematics 19A

Modeling and Differential Equations for the Life Sciences (110596)

John Cain

2016 Spring (4 Credits)  

Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: None  

Enrollment Cap: n/a

Considers the construction and analysis of mathematical models that arise in the life sciences, ecology and environmental life science. Introduces mathematics that include multivariable calculus, differential equations in one or more variables, vectors, matrices, and linear and non-linear dynamical systems. Taught via examples from current literature (both good and bad).

Course Notes: This course is recommended over Math 21a for those planning to concentrate in the life sciences and ESPP. Can be taken with or without Mathematics 21a,b. Students with interests in the social sciences and economics might consider Mathematics 18. This course can be taken before or after Mathematics 18. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: A course in one variable calculus preferably at the level of Mathematics 1b.

Mathematics 19B

Linear Algebra, Probability, and Statistics for the Life Sciences (122219)

Rosalie Belanger-Rioux

2016 Spring (4 Credits)  

Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: None  

Enrollment Cap: n/a

Probability, statistics and linear algebra with applications to life sciences, chemistry, and environmental life sciences. Linear algebra includes matrices, eigenvalues, eigenvectors, determinants, and applications to probability, statistics, dynamical systems. Basic probability and statistics are introduced, as are standard models, techniques, and their uses including the central limit theorem, Markov chains, curve fitting, regression, and pattern analysis.

Course Notes: This course is recommended over Math 21b for those planning to concentrate in the life sciences and ESPP. Can be taken with Mathematics 21a. Students who have seen some multivariable calculus can take Math
19b before Math 19a. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

**Recommended Prep:**
A course in one variable calculus preferably at the level of Mathematics 1b.

**Requirements:**
Not to be taken in addition to Mathematics 21b or Applied Mathematics 21b.

### Mathematics 21A

Multivariable Calculus (119196)

*Janet Chen*

2016 Spring (4 Credits)

**Schedule:** TBD

**Instructor Permissions:** None

**Enrollment Cap:** n/a

To see how calculus applies in practical situations described by more than one variable, we study: Vectors, lines, planes, parameterization of curves and surfaces, partial derivatives, directional derivatives and the gradient, optimization and critical point analysis, including constrained optimization and the Method of Lagrange Multipliers, integration over curves, surfaces and solid regions using Cartesian, polar, cylindrical, and spherical coordinates, divergence and curl of vector fields, and the Green's, Stokes's, and Divergence Theorems.

**Course Notes:**
This is a lecture taught in small sections. May not be taken for credit by students who have passed Applied Mathematics 21a. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. Activities using computers to calculate and visualize applications of these ideas will not require programming experience.

**Class Notes:**
Required first meeting in spring: Monday, January 25, 8:30 am, Science Center C.

Spring section times: M.W.F. at 9 (with sufficient enrollment); M.W.F. at 10; M.W.F. at 11; M.W.F. at 12 (with sufficient enrollment). Tu.Th 10-11:30; Tu.Th. 11:30-1 (with sufficient enrollment).

Janet Chen, Jameel Al-Aidroos, Matthew Demers, Yu-Wen Hsu, and members of the Department.

**Recommended Prep:** Mathematics 1b or an equivalent background in mathematics.

**Requirements:**
Anti-requisite: Not to be taken in addition to AM21a.

**Additional Course Attributes:**
