Environmental Science and Public Policy

Subject: Environmental Sci & Public Pol

Environmental Sci & Public Pol 78 Section: 1

Environmental Politics (112610)

Sheila Jasanoff

2016 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the history, organization, goals, and ideals of environmental protection in America. Examines the shifts in emphasis from nature protection to pollution control to sustainability over the past hundred years and develops critical tools to analyze changing conceptions of nature and the role of science in environmental policy formulation. Of central interest is the relationship between knowledge, uncertainty, and political or legal action. Theoretical approaches are combined with case studies of major episodes and controversies in environmental protection.

Course Notes:

Offered in alternate years with ESPP 77. This course, when taken for a letter grade, meets the General Education requirement for United States in the World.

Additional Course Attributes:

Attribute	Value(s)

Structural Transformation of African Agriculture and Rural Spaces (203665)

Christopher Barrett

2017 Spring (4 Credits)

Schedule:

R 0200 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Socially inclusive and environmentally sustainable economic growth in Africa, the world's poorest and most agrarian continent, requires structural transformation. This seminar explores the theory and, especially, the current empirical evidence on the ongoing and uneven transformation of rural Africa and its agricultural systems, largely but not exclusively through an economics lens. Students will read and discuss ongoing policy and research debates around, for example, smallholder farmer-centered strategies; public and private agricultural R&D (including biotechnology); sustainable agricultural intensification; food labor and land markets; the role of external development NGOs and non-market institutions; risk management; and the role of the rural non-farm economy.

30

Rapid human population growth and even more rapid growth in consumption are driving a transformation of most of Earth's natural systems including its climate system, its oceans, land cover, biogeochemical cycles, biodiversity, and coastal and fresh water systems. These systems underpin global food production, our exposure to infectious disease and natural hazards, even the habitability of the places where we live. We will explore the global human health impacts of this transformation of natural systems.

Course Notes:

Enrollment in this course will be limited, and students interested in enrolling are requested to submit a statement describing their interest and/or experience in planetary health related topics. Statements should be sent to the instructors: golden@hsph.harvard.edu and smyers@hsph.harvard.edu.

Conservation Biology (119814)

Onja Razafindratsima

2016 Fall (4 Credits)

Schedule:

W 0230 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Conservation biology strives to describe, understand, and forecast biodiversity dynamics by applying ecological and evolutionary theory within the contexts of resource management, economics, sociology and political science. This course will explore the motivations for preserving biodiversity and the consequences of decision-making under conflicting interests, with a focus on terrestrial ecosystems. Case studies will include endangered species protection and reintroduction, prioritizing choices in conservation, habitat fragmentation and loss, exotic species invasions, over-harvesting and sustainable development, exotic pet trade, and human-wildlife relationship. Local field trip within New England to be arranged.

China's Energy Economy: Perspectives from the Past: Challenges for the Future (123858)

Michael McElroy

Xinyu Chen

2016 Fall (4 Credits)

Schedule:

R 0230 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The seminar will provide a historical perspective on the development of the Chinese economy with emphasis on the energy sector, including analysis of related environmental problems. Energy options available for China's future will be discussed, including opportunities for clean-coal technology, nuclear, wind, hydro, and biofuels. The seminar will discuss tradeoffs implicit in these choices with respect to reconciling competing goals for environmental protection and economic development.

This seminar examines the world's systems for the production and distribution of food as they relate to the

earth's physical, chemical, and biological systems. Using scientific readings, papers about economics and politics, and cases about firms, we consider agriculture and food from scientific, public policy, and business strategy perspectives and in relation to environmental issues such as greenhouse gas emissions, carbon and nitrogen cycles, water and soil conservation (including erosion, pollution, and salinization), and the use of genetically modified organisms. Geographic and topical coverage will be broad: the Americas, Europe, Asia, and Africa; as well as water, seeds, fertilizers, animal protein, trade and development. We expect to have numerous guests from the scientific community, government, and business. Some background in biology, government or economics is useful, but not required.

M 0200 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

What's the right carbon price? What can whale oil and horse manure teach us today? What's the role of solar geoengineering? The course has two goals: to provide a set of tools to approach these and many other fundamental climate policy questions, and to help us distinguish positive ("what will be") from normative ("what should be") analysis. Economics and political economy provide particularly powerful lenses through which to analyze climate policy—past, present, and future.

Native Americans in the 21st Century: Nation Building II (160752)

Dennis Norman

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This field-based research course focuses on some of the major issues Native American Indian tribes and nations face as the 21st century begins. It provides in-depth, hands-on exposure to native development issues, including: sovereignty, economic development, constitutional reform, leadership, health and social welfare, land and water rights, culture and language, religious freedom, and education. In particular, the course emphasizes problem definition, client relationships, and designing and completing a research project. The course is devoted primarily to preparation and presentation of a comprehensive research paper based on a field investigation. In addition to interdisciplinary faculty presentations on topics such as field research methods and problem definition, students will make presentations on their work in progress and findings. Recommended course: PED-501M. Enrollment limited to 24 students. Permission of instructor required. Must contact instructor prior to enrolling by email, dennis_norman@harvard.edu. Jointly offered at Harvard Kennedy School as PED-502 and Harvard Graduate School of Education as A-102.

Course Notes: The course requires instructor consent.

Class Notes: Contact dennis_norman@harvard.edu by email with information about the current program that you are enrolled in, year of expected graduation, and why you are interested in this course. Professor Norman grants final approval for enrollment.

2016 Fall (4 Credits)

Schedule:

MW 1015 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Since ratification of the UN Convention on the Rights of the Child twenty years ago, considerable progress has been made in advancing young children's enjoyment of basic social and economic rights including access to basic education and health care. These gains are not matched by corresponding advances for older children, particularly girls, minorities, and migrants: in many developing societies, secondary and tertiary education remains widely inaccessible, maternal mortality remains the largest cause of female teenage death, and youth unemployment and violence have reached epidemic proportions. What explains

this differential performance, and how can the gap in realization of adolescent and youth human rights be addressed? The course will explore legal and other strategies for understanding and advancing the human rights of children, adolescents, and youth globally.

Jointly offered at Harvard Kennedy School of Government as IGA-305 and Harvard Law School as 2533.

Course Notes: This course is open to seniors with instructor consent.

Class Notes: This course is open to seniors with instructor consent. This course will meet at HKS.

Indigenous Worldviews: Critical Issues in Native North America (203063)

Christopher Clements

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores Indigenous perspectives on major topics and issues affecting Native North America. Through a deep engagement with Indigenous-authored works, students will explore Native viewpoints on issues ranging from settler colonialism & decolonization to feminism & gender equality. The course ultimately seeks to familiarize students with the major intellectual arguments and themes within the field of Native American & Indigenous Studies. Kahnawake Mohawk scholar Audra Simpson suggests that Indigenous people typically move within a "strangled political order" created by settler colonialism. As we move across topics and themes, students will continually return to this observation in order to consider how Indigenous political expression operates within settler societies.

American History Before Columbus (203969)

Matt Liebmann

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What happened in America before 1492? What were the major turning points in Native American history? Why don't we know more about the ancient history of North America? Anthropology 1080 answers these questions by introducing you to the discipline of North American archaeology. This lecture course will help you to understand how Native American societies developed in the millennia before the European invasion, why American Indian peoples live where they do today, and how their dynamic populations have changed over the course of the past 15,000 years. In the process you'll have the opportunity to examine a truly world-class collection of artifacts from the Peabody Museum, allowing you to hold the remains of American

history in your own hands and investigate the past with your own eyes.

Course Notes: This course is also offered through the Anthropology Department as Anthropology 1080. Credit may be earned for either Ethnicity, Migration, Rights (EMR) 126 or Anthropology 1080. Credit may not be earned for both and the course is not repeatable for credit.

Cultural Explanations for Ethnic and Racial Inequality in Education (203918)

Natasha Warikoo

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Scholars, educators, and journalists often use culture to explain differences in academic achievement by race--sometimes insightfully and other times more clumsily. However, the evidence for cultural explanations is thin and difficult to assess. Cultural explanations for low achievement have sometimes been criticized as blaming children for their own low achievement, and for offering little to practitioners and policymakers on ways to reduce educational inequality. On the other hand, cultural explanations for high achievement frequently assume a model minority myth. This course addresses how and when culture can lead to ethnic and racial inequality in education, in order to facilitate a better understanding of how to reduce educational inequality. We will analyze differences between and within ethnic and racial groups. In addition to ethnic and racial cultures, the course addresses school culture, youth culture, popular culture, and cultural identities. Discussing solutions for reducing inequality will be an important component of this course. The course will be run as a seminar.

This course is jointly offered offered in the Graduate School of Education as EDU A133.

Class Notes: This course will meet at the Graduate School of Education.

Expository Writing 10 Section: 117

Introduction to Expository Writing (118262)

Adrienne Tierney

2016 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Department**Enrollment Cap:**

10

A rigorous, intensive elective that helps students prepare for the demands of college writing. In small classes, students work closely with instructors on developing and organizing ideas, analyzing sources, and writing clear, engaging essays. Students also meet frequently in individual conferences with instructors to discuss their work. Assignments are based on sources from a range of disciplines and genres.

Course Notes: After taking Expository Writing 10, a student must pass Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In order to enroll in Expository Writing 10, you must have had an Expos 10 advising session at the Writing Program.

Expository Writing 20 Section: 201

Expository Writing 20 (116353)

Jerusha Achterberg

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Paradox in Public Health

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What happens when public health efforts to improve the wellbeing of a population undermine the wellbeing of individuals in that population? Can this outcome be avoided? Public health is characterized by the implications of this fundamental paradox: the health needs of a population are often at odds with the health needs of the very individuals who comprise that population. How does this larger paradox play out across various public health campaigns? In this class, we will use scientific articles to consider potential paradoxes in public health, both historical and contemporary. In Unit 1, we will

wrestle with issues of current vaccination requirements, and consider the intersection of personal choice versus societal responsibility using current MMR (measles, mumps and rubella) vaccines. In Unit 2, students will debate the nature of public health motivation and practice—who decides what existing public health needs are? Two case studies will guide this discussion: goiter—a successfully eliminated (but now reemerging!) disease of micronutrient deficiency—and ongoing tobacco-control efforts. In Unit 3, students will conduct their own research on a controversial modern public health issue of their choice, and consider how the larger tension between the individual and the population is manifested in the student's particular selected public health controversy.

All sections emphasize revision.

Topic: Wizards and Wild Things

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Once upon a time, there was no Harry Potter. Once upon a time, there was no such thing as children's literature. When and if children learned to read, they read what grown-ups read. How then did writing for children as we now know it come of age? Why does the genre have such an enduring hold on our cultural imagination, even as it continues to provoke sharp debate over its greater purpose and value? Are classic children's books like *The Wizard of Oz*, *The Wind in the Willows*, and *The Cat in the Hat* instructive or subversive, didactic or liberating? In this course we'll examine selections from three centuries of popular prose and verse written expressly for and about children as we investigate how this eclectic canon reflects evolving ideas about childhood, changing views about educating and enchanting young readers, and persistent disputes over what and how children should learn from books. In Unit 1 we'll survey landmark works in English for children from the Puritan through the Victorian eras, including the *New England Primer*, *Grimms' Tales*, and *Alice in Wonderland*, as we consider what these texts tell us about the origin and evolution of the genre. In Unit 2 we'll examine works by touchstone authors for younger readers including Mark Twain, Louisa May Alcott, Rudyard Kipling, E. B. White, C. S. Lewis, Maurice Sendak, and others, drawing on the critical perspectives of thinkers such as John Locke, Bruno Bettelheim, Alison Lurie, and Marina Warner to assess arguments about the essential function of imaginative literature from infancy through adolescence. In the final unit, students will conduct their own research to place a major children's author of their choice in a relevant cultural and historical context.

Topic: Slave Narratives

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Written from the late eighteenth to the late nineteenth century in the United States, slave narratives represented the story from slavery to freedom, the escape from the South to the North, and the intellectual journey towards literacy and public speaking. This course examines some famous representatives of the genre and the complex questions it provoked as well as post-Civil Rights modifications of such narratives. In the first weeks, we will investigate the popular *Narrative of the Life of Frederick Douglass* (1845) as well as the sensational and widely read account of William and Ellen Craft's *flight to Boston, Running a Thousand Miles for Freedom* (1860). We will analyze what roles literacy and rhetoric played in these texts, and hone in on the relationship between the black American writers of slave narratives and their white editors, who oversaw what was published, edited the narratives, vouched for their truth-value, and appended them with documents. In our second unit, we will focus on Toni Morrison's *Beloved* (1987) to look at how modern writers modified and updated the genre after the 1960s. How did African American authors rewrite the slave narratives and their conventions? How do their portrayals of the slave community and the language of slavery differ from their predecessors? Finally, we will examine how the genre of the slave narrative changes in the hands of a white director. How does Quentin Tarantino's *Django Unchained* (2012), Oscar-nominated yet also denounced as incendiary, modify the genre and the interaction between white editors and black American slaves? Our primary readings will be accompanied by seminal essays on the slave narratives, their literary development, and their high current cultural stakes.

Topic: Religious Pluralism

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and behavior. And despite predictions to the contrary, levels of devout religious belief remain high, evidenced by recent controversies over a proposed Islamic community center in Lower Manhattan, as well as Supreme Court rulings on female access to contraception and same-sex marriage. How do people—including nonbelievers—experience this religious multiplicity? How are these vast religious differences negotiated socially, culturally, politically, and legally? Moving beyond theology, this course will explore the broad concept of lived religion in the United States. Through readings in fiction, law, history, and sociology, we'll tackle these fundamental issues. In Unit One, we'll read Ayad Akhtar's 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars' arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

In Unit One, we'll read Ayad Akhtar's 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars' arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

Expository Writing 20 Section: 208

Expository Writing 20 (116353)

Collier Brown

2017 Spring (4 Credits)

Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: Department

Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and

secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Wastelands

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The impenetrable wilderness of *The Revenant*, the diseased streets of *Children of Men*, the trash heap cities of *Wall-E*—these are the wastelands that fascinate our pop culture. On the screen, they come to life as horrifying alternate universes and dead civilizations—the very fates we must avoid at all costs. And yet wastelands are not exclusively the stuff of science fiction. In this course, we will grapple with both imaginary and actual wastelands. We will begin with short stories by Jack London, Thomas King, and Octavia Butler. From the icy wilds of the Yukon to the borderlands of Native American exile, these writers question the way wastelands have been imagined, especially in North America, over the past century. Next, we will turn to real wastelands—to the garbage dumps and arid landscapes where nothing grows. We will ask what these places reveal about their inhabitants, their struggles, and their achievements. Finally, students will research a wasteland of their own choosing—anything from the mega slums of Mumbai to the sprawl of Boston's unused rooftops. Along the way, we will investigate how wastelands form and evolve, and how people adapt to them. Are wastelands actually the places we should avoid at all costs, or are they the places we can no longer afford to ignore?

Topic: Respectable Ladies, Rebellious

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Modern Americans typically view the idea of being "ladylike"—a notion of womanhood as bound up in respectability—as something restrictive, even demeaning. For a woman to be "ladylike," after all, often means she is relegated to a corner where she will not be assertive and empowered. But for centuries, women fought and died to be allowed that reputation. Being a "respectable" woman meant being fully human – and fully protected—and then over time that identity became a shackle to break free of. This course will examine the curious history of "respectable" womanhood to see what happened to those women who battled to be valued, sometimes for the most fundamental human status, and sometimes for the right to cross the bounds of propriety. What were the real risks of walking the line of respectable and unladylike and the dangers of stepping outside the lines? While modern feminism fights against restrictive stereotypes, why did some women fight to keep them? This course consists of three units, each focusing on a different moment in American history. We will begin with women who lost their lives when their neighbors began to question whether they really were "women" at all – the Salem witches. Using close reading skills we will sift through historical documents to understand just how the people of Salem were willing to decide some of their own daughters were not really human after all.

Next we will move forward two centuries to read the fascinating memoir of anti-lynching crusader Ida B Wells, a woman who once travelled for two days to protect her reputation against slander. We will learn about race and womanhood in the late 19th century to understand why in order to be a reformer, Wells had to be a lady first. Finally, we will take on a research project on iconic 20th-century figures from Civil Rights lawyer Pauli Murray to Hillary Clinton, women who found themselves caught between being ladies and being leaders. Throughout we will examine how racial and sexual stereotypes posed not only challenges but also unexpected opportunities for rebels and reformers. What power does being a lady hold, and what boundaries does it create? What does it mean, both yesterday and today, to be not just female, but a woman?

Topic: Imagining the Wild West

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: From a whistle-stop town with a gun-slinging sheriff to a desperate landscape filled with danger, where the American Dream appeared to come true, the West has occupied a central place in the American imagination for three centuries. But the West is a place whose imagined reality has often been at odds with its written history—a place where an ideal of rugged individualism coexists with massive federal management, where white men have been remembered and diverse populations forgotten, and where new opportunities have collided with bloody conflict. In this course, we will examine how Americans have remembered the West—how they have decided which stories to tell and which to bury. To answer these questions, we will examine the peculiar histories of Western myths, focusing on the invention and reinvention of the Wild West in American pop culture. For our first unit, we will develop our close reading skills as we

investigate memoirs detailing the "real" lives of Westerners—a Dakota woman stripped of her identity, a homesteader on the brink of starvation, cowboys both white and black, and immigrants dying for their rights. In unit two, we will turn to Buffalo Bill, the quintessential Wild West hero who brought in crowds of thousands across the country and reenacted Custer's Last Stand for the Queen of England. Students will consider Buffalo Bill in the context of Victorian ideas about men, women, and race as we attempt to explain why this story, which was essentially a Victorian fantasy, so powerfully captured the American imagination. What does Buffalo Bill's fame tell us about who Americans thought they were, or thought they could be? Finally, in unit three, we will examine how the myths of the Wild West have survived into modern pop culture through movies, television, and fashion. Whether it's George W. Bush posing as a cowboy president or bearded hipsters working at MacBooks while dressed as lumberjacks, these myths continue to animate our culture. For their final paper, students will choose a representation of the West in popular culture to research with the goal of understanding why these myths remain powerful and what assumptions underpin them. What does *Toy Story* have to do with Victorian office workers, or modern libertarians with last century's paperbacks? Is HBO's *Deadwood* a show about the 1880s, or a comment on modern capitalism? What do the Coen Brothers have in common with John Wayne? And when we tell stories about the Wild West, when we choose what to forget and what to immortalize, what are we saying about ourselves?

Expository Writing 20 Section: 212

Expository Writing 20 (116353)

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Who's Got The Power?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Our news feeds today present a panorama of struggles over power, from elections and peaceful protests to riots, revolutions, and civil wars. In each case, those who hold power cling to it at all costs, while those who feel oppressed or excluded fight to attain some power of their own. In most societies, power is concentrated in the hands of a select few, and even in the world's democracies, many citizens continue to feel powerless—the playthings of some distant and shadowy elite, or of grand political and economic forces beyond their control. In this course, we will consider some of the fundamental questions regarding the nature of power: Does power always have to be "power-over," with one group dominating the rest? Or is it possible for groups of people to generate "power-with," empowering themselves to act in pursuit of shared goals? Is power ultimately synonymous with violence, or wealth, or political authority? Is it possible to exercise power over culture and ideas in addition to people and resources? We will approach these questions through the methodological lenses of political science, sociology, anthropology, and history, while also considering examples drawn from documentaries and current events. In our first unit, we will establish working theories of power-over and power-with, and consider their application to both democratic and non-democratic contexts. In the second unit, we will refine our concept of power-over, testing it against studies of power and resistance in Appalachian mining communities, Malaysian peasant villages, and American low-income urban schools. We'll also take an in-depth look at a headline-making study that claimed to prove that America is more oligarchy than democracy. In the final unit, we'll revisit the concept of power-with by exploring the strategies that social movements like the Civil Rights Movement use to develop and exercise power, and conduct further research into contemporary movements like the Tea Party, Occupy Wall Street, and Black Lives Matter.

Expository Writing 20 Section: 214

Expository Writing 20 (116353)

Margaret Doherty

2016 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: War Stories

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: How should we represent the horrors of war, and how should we remember it? These are questions that have fascinated writers since the time of Homer, but the answers to these questions changed in the modern era, when war started to seem less noble and heroic and more totalizing and destructive. This course looks at artistic representations of modern warfare and asks what effects war has on those who survive it. What happens when the body is whole, but the mind is broken? How does war live on the memories of those who fought, or in the collective memory of a nation? Can—or should—art be made out of these painful, violent experiences? We'll start off with Tim O'Brien's *The Things they Carried*, a powerful collection of stories based on O'Brien's experiences as a soldier in Vietnam. The stories encourage us to ask how truthfully we remember and what moral judgments we make when we choose which stories to tell. From there, we'll pursue questions about memory and morality further by studying literature about the Great War, including Ernest Hemingway's *A Farewell to Arms*. We'll ask how national politics form in and around these wars and their legacies. Our last unit brings all of these topics together as we move from literature to the movies. We'll watch Francis Ford Coppola's *Apocalypse Now*, a movie that quickly became a classic of New Hollywood, and *Zero Dark Thirty*, Kathryn Bigelow's recent depiction of the War on Terror. Throughout the course, we'll debate whether the experience of war can ever be adequately communicated to those who weren't there, and whether these attempts can prevent future

generations from repeating the mistakes of the past.

Topic: Representations of American De

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Beyond the abstraction of American democracy as government of, by and for the people, what does democracy look like in its physical manifestations? What can we glean about our definitions of and faith in American democratic governance from historical and artistic representations of it? This course will examine what U.S. democracy looks like—its electoral mechanics, its collective bodies, its buildings, and its personality—when brought to life in campaign commercials, architecture, and films. We will ask what these representations of government suggest about the political ideals they ostensibly embody. How do the depictions of government in these works shape our understanding of the possibilities and constraints of democratic action? In what ways can citizens participate (or not) in these figurations of government? Our first unit will explore presidential television advertisements from the 1952 to the recent salvos of the 2008 campaign. With an eye to uncovering how their narratives, imagery, rhetoric, and stagecraft imply particular assumptions about democratic governance, we will examine how such commercials ask us to consent to a particular version of "government by the people." In our second unit we will study the architecture of the Massachusetts State House (which we will examine in person) and a few of Washington, D.C.'s federal buildings—the Capitol, the White House, the Supreme Court Building, and the Pentagon. Analyzing architectural drawings, photos, paintings, and online tours of these buildings, we hope to uncover not just the symbolism of their styles but the effect that their shape and allocation of space have on individual and collective behavior. We will compare, in our final unit, conceptions of

government in several conspiracy-theory films: *The Manchurian Candidate*, *All the President's Men*, *JFK*, *Wag the Dog*, and *State of Play*. We will consider how each film reflects fears commonly held at the time of its creation—fears of communist infiltrations, presidential abuses of power, or corporate manipulations of government officials, among others. How do the respective fears depicted in these films challenge our definitions of democracy? How do such narratives reinforce our relationship with government?

Topic: Eating Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresciewicz, in an opinion piece for the New York Times, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresciewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call "foodways"—the various forces involved in how different cultures produce, buy, sell,

and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, "food is good to think," as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food "disgusting" or "natural." How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, Top Chef, Iron Chef, and the Great British Bakeoff. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

Topic: The Psychology of Success and

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Who gets ahead in America? Why do some succeed while others fail? Given knowledge of someone's background, can we predict if she will become successful? Is it possible to change the course of an individual's trajectory? How do we account for the influence of various complex factors, including family, community, and society? In this

course, we will examine questions of success, failure, achievement, and identity viewed through the lens of current theories in psychology. We will begin with *The Overachievers*, a best-selling journalistic account of the pressure for academic achievement felt by students at an elite public high school on the East Coast. We'll consider how passion, motivation, and competition all contribute to an individual's drive to succeed. Next, we will read Malcolm Gladwell's *Outliers: The story of success* and apply it as a lens to analyze a longitudinal, ethnographic study of 12 American children. We will explore how race, gender, and familial wealth and resources affected these children's lived experiences of childhood and, later, their chances of successfully getting into college. In the final unit of the course, we will use a popular psychology book on habits as a jumping off point to complete independent research papers that examine how factors like self-control, willpower, mindfulness, and creativity contribute to success. Throughout the course, we will use psychological theory to motivate questions and answers about human behavior in a society where the demand for success can be tantalizingly high and the fear of failure devastatingly relentless.

Topic: Social Worlds of Friendship at

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: *Note: This Expos course requires participation in several activities scheduled outside of normal class hours.*

Social science research has traditionally suggested that we tend to seek out friends who are similar to ourselves. But is this always true? What factors inspire people to venture outside of their comfort zones through friendship – especially at Harvard? In collaboration with the Learning Lab at Harvard's Bok Center for Teaching and Learning, this course explores the formation of social networks on our campus and

investigates how meanings of identity and difference are constructed through the experience of friendship. In Unit 1, we examine Emerson's renowned essay, "Friendship" (1841), working with his handwritten manuscripts at the Houghton Library to search for clues that illuminate Emerson's often paradoxical thinking about the significance of friendship. We then carry forward the complexities of relationships that Emerson reveals into an interview-based research project that explores friendship and social life at Harvard. In Unit 2 we will read Harvard's important Report of the College Working Group on Diversity and Inclusion (2015) as well as theories of "social capital" (the networks and support systems that promote health and happiness) as we analyze the delicate interplay between the processes of how people "bridge" across boundaries of their identities, and how they "bond" within particular friendship groups. We will also explore how meanings of difference and belonging play out across specific contexts of the College (e.g., Annenberg, blocking, extracurriculars, and student organizations). In small teams, students will design individual research projects through proposals that involve both writing and on-camera speaking at the Bok Center's Learning Lab. In the third unit, students will carry out their individual research in close connection with their teams. Towards the end of the semester, we will publicly share our research findings through a class capstone project. For this class, students should be interested in working on visual presentations as well as written papers. This course is hands-on and heavily collaborative, modeling that which it studies – namely, a spirit of engagement, dialogue, and community.

Topic:

Humans, Nature, and the Enviro

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: "to imagine that which we know." How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson's *Silent Spring* (1962), and James Lovelock's *The Revenge of Gaia* (2006). And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog's *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson's *Silent Spring* (1962), and James Lovelock's *The Revenge of Gaia* (2006). And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog's *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

Expository Writing 20 (116353)

Janling Fu

2017 Spring (4 Credits)

Schedule:

TR 0200 PM - 0259 PM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Eating Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresciewicz, in an opinion piece for the *New York Times*, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresciewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call "foodways"—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, "food is good to think," as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food "disgusting" or "natural." How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, *Top Chef*, *Iron Chef*, and the *Great British Bakeoff*. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

Topic: Documenting Lives

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "To photograph is to appropriate the thing photographed. It means putting oneself into a certain relation to the world that feels like knowledge – and therefore, like power." When Susan Sontag wrote these somber words, only journalists, artists, and tourists took photographs on a daily basis. Today our networked devices go everywhere our bodies go, and we are accustomed to taking and sharing pictures of ourselves and others throughout the day. In an age of Instagram and Facebook, perhaps it's time to revisit the nature of photography's power. In this course we will explore the documentary status of photographic images, and in particular, the way in which they set out to capture the reality of our lives and that of others. We will pay close attention to the collaboration -- and competition -- between the photographic image and the written word. What kind of truth or reality can photographs reveal about other people? How might these images distort that reality? What are the ethics of photographing the poor, the disenfranchised, or one's own children? We will begin with *Let Us Now Praise Famous Men*, a pioneering book that combined photography and the printed word to reveal the lives of white sharecroppers during the Great Depression. We will then turn to a series of photographic essays commissioned by *Life* magazine in order to understand how commercial photojournalism shaped the way Americans saw themselves and others in the postwar years. Finally, we will look at the more recent controversy surrounding motherhood, sexuality, and childhood in the work of Sally Mann, a photographer who turned her family into the subject of her art.

All sections emphasize revision.

Topic: The Psychology of Success and**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Who gets ahead in America? Why do some succeed while others fail? Given knowledge of someone's background, can we predict if she will become successful? Is it possible to change the course of an individual's trajectory? How do we account for the influence of various complex factors, including family, community, and society? In this course, we will examine questions of success, failure, achievement, and identity viewed through the lens of current theories in psychology. We will begin with *The Overachievers*, a best-selling journalistic account of the pressure for academic achievement felt by students at an elite public high school on the East Coast. We'll consider how passion, motivation, and competition all contribute to an individual's drive to succeed. Next, we will read *Malcolm Gladwell's Outliers: The story of success* and apply it as a lens to analyze a longitudinal, ethnographic study of 12 American children. We will explore how race, gender, and familial wealth and resources affected these children's lived experiences of childhood and, later, their chances of successfully getting into college. In the final unit of the course, we will use a popular psychology book on habits as a jumping off point to complete independent research papers that examine how factors like self-control, willpower, mindfulness, and creativity contribute to success. Throughout the course, we will use psychological theory to motivate questions and answers about human behavior in a society where the demand for success can be tantalizingly high and the fear of failure devastatingly relentless.

Topic: Darwinian Dating

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Among animals, individuals choose mates based on biologically informative features such as long colorful tail feathers or a red posterior. We typically assume that human attraction (and love) is more nuanced and complex, but is it? Many features that humans find attractive, such as small waists, curvy hips, nurturing behavior, and dominance, can be tied to biological explanations. In this course we will explore biological explanations for these, and many other, aspects of human attraction. Using an evolutionary perspective, we will examine global patterns of attraction and challenge stereotypes of beauty. Are the Barbie-like women of Hollywood really most attractive to men? Do nice guys truly finish last? Do traditionally attractive features in western cultures—such as large breasts—actually provide an evolutionary benefit, or might some be false signals? In addition to exploring the biological roots of attraction, we will examine how principles of attraction are expressed in popular culture, as well as how they play out right here on a college campus. In the first unit, we will attempt to define the ongoing fundamental debate between those who explain human behavior like attraction as the result of evolution and those who see such behavior as determined by culture. We turn next to a comparison of the divergent explanations that have emerged in the body of research on female attraction. How do we reconcile some studies' findings that women want strong, aggressive men with high testosterone and large incomes with the findings of other studies showing that women prefer nurturing and intelligent men with slightly "feminine" qualities and facial features? Having wrestled with the question of what women want, our course concludes with the analogous question of what men want. Students will have an opportunity to undertake independent research as they explore the nature of male attraction in an era of complex messages about female beauty.

Topic: Humans, Nature, and the Enviro

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: "to imagine that which we know." How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson's *Silent Spring* (1962), and James Lovelock's *The Revenge of Gaia* (2006). And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog's *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Class, Race, and Space in Bost**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: This course explores the interplay between the physical spaces of American cities and the class and racial identities of urban residents. Focusing on Boston's and Cambridge's history from the 1960s to the present, we ask how spaces (from sidewalks to university campuses) shape residents' images of themselves and their neighbors. Course readings and assignments emphasize the contested nature of decision making processes, focusing on debates among politicians, courts, university officials, and neighborhood groups to determine residential and educational policies. We begin by examining a pioneering work in the field of urban studies: Jane Jacobs's *The Death and Life of Great American Cities* (1961). Jacobs vehemently critiqued programs for urban renewal and instead celebrated the vitality of social spaces found in older urban neighborhoods such as Boston's North End and New York's Greenwich Village. We then turn to one of the most tumultuous times in Boston's history as we investigate the protests surrounding the implementation of forced busing to integrate the Boston Public Schools in the 1970s. This period continues to be the subject of considerable debate, with scholars offering conflicting accounts of the role of racial, ethnic, class, and gender-based identities among opponents of busing. We build on the skills developed in the first two assignments in a final research paper that considers Harvard's own history of class, race, and space. Students first explore scholarship regarding "town gown" relations more generally and then conduct original research regarding a key episode in Harvard's interactions with neighboring residents in Boston or Cambridge.

Expository Writing 20 (116353)

Tamara Griggs

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: Department**Enrollment Cap:**

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Documenting Lives**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "To photograph is to appropriate the thing photographed. It means putting oneself into a certain relation to the world that feels like knowledge – and therefore, like power." When Susan Sontag wrote these words, only journalists, artists, and tourists took photographs on a daily basis. Today our networked devices go everywhere our bodies go, and we are accustomed to taking and sharing pictures of ourselves and others throughout the day. In an age of Instagram and Facebook, perhaps it's time to revisit the nature of photography's power. In this course we will explore the documentary status of photographic images, and in particular, the way in which they communicate both knowledge and power. Certain questions will guide us: what kind of truth or reality can a photograph reveal? How might that same image distort reality? Is it right to photograph the powerless? Throughout the course we will pay particular attention to the collaboration -- and competition -- between the photographic image and the written word. In the first two units we will center our discussion and writing on a series of photographic essays from LIFE magazine in order to understand how photojournalism shaped Americans' understanding of themselves and others in the 20th century. In Unit 1 we will look at a photo-essay from 1965, which describes – and makes visible -- the anxieties of a first-year student at Yale and the cut-throat world of the Ivy League university fifty years ago. In Unit 2, we will turn to LIFE's series on segregation and race in 1950s Alabama. Combining photographs and interviews, these ground-breaking articles conveyed the perspective of the segregationists -- *and* that of their victims. Your understanding of documentary photography and reporting after these two units will prepare you for the final unit in which you will conduct research and write a multi-source essay on a documentary film of your choice.

All sections emphasize revision.

Topic: Society and the Witch**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we analyze the film *Harry Potter and the Chamber of Secrets* and the television sitcom *Bewitched*, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on *Purity and Danger* and Pierre Bourdieu's critique of *Masculine Domination*. These theories help us examine, for example, how fictional representations of witches speak to political struggles over class and gender. For the research paper, each student chooses an example of witchcraft on which to conduct independent research. Sample topics include fairy tales, the Salem witch trials, neo-paganism, and the Broadway musical *Wicked*. What will unite our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

In an age of Instagram and Facebook, perhaps it's time to revisit the nature of photography's power. In this course we will explore the documentary status of photographic images, and in particular, the way in which they communicate both knowledge and power. Certain questions will guide us: what kind of truth or reality can a photograph reveal? How might that same image distort reality? Is it right to photograph the powerless? Throughout the course we will pay particular attention to the collaboration -- and competition -- between the photographic image and the written word. In the first two units we will center our discussion and writing on a series of photographic essays from LIFE magazine in order to understand how photojournalism shaped Americans' understanding of themselves and others in the 20th century. In Unit 1 we will look at a photo-essay from 1965, which describes -- and makes visible -- the anxieties of a first-year student at Yale and the cut-throat world of the Ivy League university fifty years ago. In Unit 2, we will turn to LIFE's series on segregation and race in 1950s Alabama. Combining photographs and interviews, these ground-breaking articles conveyed the perspective of the segregationists -- *and* that of their victims. Your understanding of documentary photography and reporting after these two units will prepare you for the final unit in which you will conduct research and write a multi-source essay on a documentary film of your choice.

Expository Writing 20 Section: 226

Expository Writing 20 (116353)

Richard Martin

2016 Fall (4 Credits)

Schedule:

MW 0200 PM - 0259 PM

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Society and the Witch

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we analyze the film *Harry Potter and the Chamber of Secrets* and the television sitcom *Bewitched*, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on *Purity and Danger* and Pierre Bourdieu's critique of *Masculine Domination*. These theories help us examine, for example, how fictional representations of witches speak to political struggles over class and gender. For the research paper, each student chooses an example of witchcraft on which to conduct independent research. Sample topics include fairy tales, the Salem witch trials, neo-paganism, and the Broadway musical *Wicked*. What will unite our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

Expository Writing 20 Section: 227

Expository Writing 20 (116353)

James Herron

2017 Spring (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed

evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Class and Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: It is commonplace to note that in the United States a large portion of the population self-identifies as "middle class" even though our society is marked by deep, persistent, and increasing class inequality. This incongruity between identity and social structure betrays the complex and often contradictory ways in which we experience social class in our everyday lives. This course explores the subjective experience of social class in the U.S. from an ethnographic perspective, focusing on the everyday lives and cultures of ordinary Americans. We will consider questions such as the following. What is it like to be a working class person in a society heavily invested in ideals of individual achievement and meritocracy? How do educational institutions such as high schools and colleges underwrite class mobility for some and reproduce disadvantage for others? What kinds of class cultures are cultivated in elite colleges such as Harvard? The first unit considers the identities of working class people before and after the Great Recession, examining how blue color workers imagine their place in an increasingly unequal world. In the second unit we will focus on how attending an elite public university shapes the class trajectories of working class and upper middle class female students. For the third unit students will develop their own original research project concerning the role played by class divisions on elite college campuses. The course readings are drawn mainly from the social sciences, especially anthropology and sociology.

Topic: The Femme Fatale

Course Notes: Students must pass one term of Expository Writing 20 to meet the

College's Expository Writing requirement.

Class Notes:

The femme fatale--the attractive, seductive woman who brings about the downfall of any man she encounters—has fascinated us through the ages, from Biblical figures like Eve, Delilah, and Salome and Ancient Egypt's Cleopatra to Catwoman, or even Nicki Minaj's media persona. In most stories, the femme fatale's dangerous actions empower her, but she ultimately must also submit to the idea that her empowerment renders her a villain. How does this contradiction in the femme fatale's character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real gender problems that modern women and men face? This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we'll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain's pulp novella *The Postman Always Rings Twice*. In our second unit, we'll move to a fictional account of two dueling femme fatales published during the height of the 1960s feminist movement, and examine Jim Thompson's noir thriller *The Grifters* alongside the updated film adaptation by director Stephen Frears. Finally, in our third unit, students will research a modern day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of what makes some modern women seem so dangerous.

Topic:

Darwinian Dating

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Among animals, individuals choose mates based on biologically

informative features such as long colorful tail feathers or a red posterior. We typically assume that human attraction (and love) is more nuanced and complex, but is it? Many features that humans find attractive, such as small waists, curvy hips, nurturing behavior, and dominance, can be tied to biological explanations. In this course we will explore biological explanations for these, and many other, aspects of human attraction. Using an evolutionary perspective, we will examine global patterns of attraction and challenge stereotypes of beauty. Are the Barbie-like women of Hollywood really most attractive to men? Do nice guys truly finish last? Do traditionally attractive features in western cultures—such as large breasts—actually provide an evolutionary benefit, or might some be false signals? In addition to exploring the biological roots of attraction, we will examine how principles of attraction are expressed in popular culture, as well as how they play out right here on a college campus. In the first unit, we will attempt to define the ongoing fundamental debate between those who explain human behavior like attraction as the result of evolution and those who see such behavior as determined by culture. We turn next to a comparison of the divergent explanations that have emerged in the body of research on female attraction. How do we reconcile some studies' findings that women want strong, aggressive men with high testosterone and large incomes with the findings of other studies showing that women prefer nurturing and intelligent men with slightly "feminine" qualities and facial features? Having wrestled with the question of what women want, our course concludes with the analogous question of what men want. Students will have an opportunity to undertake independent research as they explore the nature of male attraction in an era of complex messages about female beauty.

Topic: Human Rights as History

Course Notes: Students must pass one term of Expository Writing 20 to meet the

College's Expository Writing requirement.

Class Notes:

The U.N.'s Universal Declaration of Human Rights has thirty articles, among them *A Problem from Hell*, the Pulitzer Prize-winning book by U.S. Ambassador to the U.N. Samantha Power, who argues that powerful countries have a moral responsibility to prevent genocide. Power addresses examples such as the Rwandan genocide (where the U.S. failed to intervene) and the Balkan Wars (where NATO did intervene). But other experts say that intervention just makes suffering worse. When and why should a foreign power intervene to protect human rights? In the final unit, we will dig into several ongoing and highly contested issues in human rights, like the "right to be forgotten," which would force Google to erase certain unwelcome search results; the race-, religion-, and gender-infused debate over whether Muslim women should be allowed to wear headscarves in public spaces in France; Ta-Nehisi Coates's argument for reparations to the descendants of black American slaves; and the growing debates over transgender rights and restroom access.

Topic: Tragedy and Everyday Life

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The image of Oedipus blinding himself at the end of Sophocles' *Oedipus Tyrannus* is among the most violent in Western drama. Realizing that he has killed his father, married his mother, and brought a plague upon his people, Oedipus represents a human scenario too horrible to imagine. And yet Western culture does imagine it—it can't seem to stop imagining it—and the most horrible thing about the tragic fate of Oedipus is the suggestion that tragedy lurks within each of us as a fundamental risk of human existence. In this course we will examine tragedies both ancient and modern, asking why certain human scenarios are supposed to be tragic and whether those scenarios represent states of exception within the ordinary range of human experience—or exceptions that prove an unsettling rule. In Unit 1 we will read Sophocles' *Antigone* (442 BCE), examining the structure of tragic conflict and considering the manner in which this particular structure reflects the form of critical debate more generally. In Unit 2, we will compare Sophocles' *Oedipus Tyrannus* (429 BCE) and Shakespeare's *King Lear* (1606), asking whether the criteria of self-knowledge that plague Oedipus remain stable after two millennia or

present themselves in a new "modern" fashion. In Unit 3 we will view a selection of films, including *Vertigo* (1958), *Persona* (1966), *Memento* (2000), and *Black Swan* (2010), asking whether the tragedy of contemporary culture can be understood as an everyday and insoluble conflict between individuals, themselves, and the societies in which they live.

Topic: God and Government

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The separation of church and state is often considered to be a cornerstone of modern democracy, but this idea has nevertheless been a difficult concept to put into practice. Must the state completely avoid any entanglement with religious groups, or merely act in a non-preferential manner toward them? How does a state determine whether a given belief or practice is religious (and thus deserving of legal protection) or simply ethical or cultural in nature? Is the ideal of a neutral political secularism even possible or desirable? And what should we think of the many global actors, from Latin America to the Middle East to Sub-Saharan Africa, who reject this ideal entirely? This course will consider the many questions and challenges raised by religious diversity for the modern state. We begin in the first unit by considering two influential early accounts of the proper relationship of governments to religiously diverse populations, James Madison's "Memorial and Remonstrance" and Jean-Jacques Rousseau's "On Civil Religion." In the second unit, we will consider several judicial decisions from the U.S. Supreme Court and the European Court of Human Rights, which highlight the contentious legal landscape over the concept of "religious freedom." Our final unit turns to the international stage to examine several case studies from Brazil, Palestine, Nigeria, and India, to see how religious diversity is shaping

contemporary global conflict.

Topic: Segregation and Boston Schools

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Note – The "Engaged Scholarship" components of this course include three required meetings outside class time that have been tentatively scheduled in March and April: a panel discussion held on Harvard's campus with teachers from Brighton High (March 7 from 7:00-8:30 PM); a visit to Brighton High (students have the option of visiting on either April 5 from 7:45-10:45 AM or April 7 from 11:15 AM-2:15 PM); and a "Civics Fair" Hosted by the Harvard Ed Portal (April 28 from 10:30 AM-1:30 PM).

Over sixty years after the Supreme Court ruled that "separate but equal" schools are unconstitutional, segregation is on the rise. Today, despite widespread evidence that integrated education increases student learning and reduces prejudice, American public schools are increasingly divided by class and race. In this course, we investigate attempts to achieve educational equality in Boston, focusing on the decision to use busing to desegregate the public schools in the 1970s and the wave of violent opposition that followed. Throughout the semester, we undertake "engaged scholarship," combining academic learning and community engagement by collaborating with Bostonians directly affected by these historical events—we partner with history teachers and students at a neighborhood high school in the Boston Public Schools (BPS) system—and by focusing on communication with diverse audiences through writing, speaking, and visual presentation. To ground our understanding of the complex issues we will wrestle with, we begin with a journalist's Pulitzer Prize-winning account of school integration in the 1970s, contrasting the perspectives of black and white families. We next examine historical

debates on the causes of the "antibusing" movement and pedagogical debates about how to teach controversial and contested historical topics. For the final project, we have the opportunity to further investigate these topics and other current challenges around educational equity facing BPS. In thoughtful collaboration with our community partners and through research, we design lesson plans for a high school course on desegregation and prepare arguments for why the various plans might be effective. We not only delve into the remarkable written and visual materials in Harvard's libraries but also conduct conversations with teachers and students at Brighton High. The class culminates in a "Civics Fair" (held at Harvard's Education Portal serving residents of the Allston and Brighton neighborhoods) in which students present their lesson plans and engage with our partners at Brighton High and other community members.

directly affected by these historical events—we partner with history teachers and students at a neighborhood high school in the Boston Public Schools (BPS) system—and by focusing on communication with diverse audiences through writing, speaking, and visual presentation. To ground our understanding of the complex issues we will wrestle with, we begin with a journalist's Pulitzer Prize-winning account of school integration in the 1970s, contrasting the perspectives of black and white families. We next examine historical debates on the causes of the "antibusing" movement and pedagogical debates about how to teach controversial and contested historical topics. For the final project, we have the opportunity to further investigate these topics and other current challenges around educational equity facing BPS. In thoughtful collaboration with our community partners and through research, we design lesson plans for a high school course on desegregation and prepare arguments for why the various plans might be effective. We not only delve into the remarkable written and visual materials in Harvard's libraries but also conduct conversations with teachers and students at Brighton High. The class culminates in a "Civics Fair" (held at Harvard's Education Portal serving residents of the Allston and Brighton neighborhoods) in which students present their lesson plans and engage with our partners at Brighton High and other community members.

Expository Writing 20 Section: 233

Expository Writing 20 (116353)

Ben Roth

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:

The Narrative Self

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

"Life must be understood backwards, but lived forwards" the philosopher Kierkegaard wrote. Sartre, in one of his novels, develops the thought: "You have to choose: live or tell." Both suggest that living one's life and telling the story of it are mutually exclusive. Over the past few decades, many philosophers have disagreed, developing the

view that understanding one's life as a story is not only something that most of us do, but allows us to become full persons and to live well. We will begin the course by considering some of these recent views. Are we right to speak of chapters of our lives and authoring ourselves? To explain someone's behavior by referring to her character, or alternatively her role? To use literary genres such as tragedy to describe events in real life? What is entailed by such metaphors? Do they withstand careful scrutiny? Do our lives enact typical narrative arcs? Should they? Or do such claims confuse fiction and reality? In the middle part of the course, we will look at two fictional works that investigate similar issues. In Julian Barnes's *The Sense of an Ending*, the narrator's understanding of his life is upset by revelations concerning his past; the novel explores the fallibility of memory and its relation to material evidence. In the recent Swedish film *Force Majeure*, a wealthy family's ski vacation is upset when the husband reacts to an avalanche in an apparently cowardly manner, raising questions about character and situation, and what it means to be brave. At the end of the course, we will consider some critics of narrative self-understanding, as well as more specific applications of it. Do empirical studies challenge the idea that we have stable character? Does understanding one's life as a story preclude living in the moment? If lives are like stories, do they have a genre? Students could begin from these or other questions as they develop their own final research topics.

Topic: Society and the Witch

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated

through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we analyze the film *Harry Potter and the Chamber of Secrets* and the television sitcom *Bewitched*, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on *Purity and Danger* and Pierre Bourdieu's critique of *Masculine Domination*. These theories help us examine, for example, how fictional representations of witches speak to political struggles over class and gender. For the research paper, each student chooses an example of witchcraft on which to conduct independent research. Sample topics include fairy tales, the Salem witch trials, neo-paganism, and the Broadway musical *Wicked*. What will unite our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

Topic: The Femme Fatale

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The femme fatale--the attractive, seductive woman who brings about the downfall of any man she encounters--has fascinated us through the ages, from Biblical figures like Eve, Delilah, and Salome and Ancient Egypt's Cleopatra to Catwoman, or even Nicki Minaj's media persona. In most stories, the femme fatale's dangerous actions empower her, but she ultimately must also submit to the idea that her empowerment renders her a villain. How does this contradiction in the femme fatale's character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real gender problems that modern women and men face? This course will begin to explore these and other related questions by

studying accounts of femme fatales in literature and film. In our first unit, we'll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain's pulp novella *The Postman Always Rings Twice*. In our second unit, we'll move to a fictional account of two dueling femme fatales published during the height of the 1960s feminist movement, and examine Jim Thompson's noir thriller *The Grifters* alongside the updated film adaptation by director Stephen Frears. Finally, in our third unit, students will research a modern day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of what makes some modern women seem so dangerous.

Topic: Privacy and Surveillance

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to some of our communications in the name of national security. It is easy to decry this state of affairs as Orwellian, or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice. In the first unit, we will explore the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally

troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? In the second unit, we will consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Do these non-citizens have any privacy rights vis-à-vis the U.S. government? Are there adequate legal protections for American citizens whose communications—both dangerous and innocent—are swept up in surveillance that is targeted at foreigners? In the final unit we will turn to the issue of privacy rights against corporations. Do we have a right to be forgotten online, or should truthful information about private citizens be available via internet search engines indefinitely? Can internet users be regarded as having given meaningful consent to privacy agreements that they have not read and would in any case likely not fully understand? For this unit, students will write a research paper about the appropriate limits on the power that private entities have over our online lives.

Topic: Human Rights as History

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The U.N.'s Universal Declaration of Human Rights has thirty articles, among them the more familiar — "life, liberty, and security of person" — and the less familiar — the right to a family, to cultural life, to rest and leisure. We often presume that human rights need no justification or explanation. But what are human rights? Are they really universal? We begin our course by looking at the origins of the concept itself. Some historians see human rights as the brainchild of the American and French Revolutions; others see them as an alternative system born at the end of the Cold War in frustration with traditional national

and party politics. After analyzing the development of this idea over time, we'll think about how human rights are (or are not) protected. We'll draw on *A Problem from Hell*, the Pulitzer Prize-winning book by former U.S. Ambassador to the U.N. Samantha Power, who argues that powerful countries have a moral responsibility to prevent genocide. Power addresses examples such as the Rwandan genocide (where the U.S. failed to intervene) and the Balkan Wars (where NATO did intervene). But other experts say that intervention just makes suffering worse. When and why *should* a foreign power intervene to protect human rights? In the final unit, we will dig into several ongoing and highly contested issues in human rights, like the "right to be forgotten," which would force Google to erase certain unwelcome search results; the race-, religion-, and gender-infused debate over whether Muslim women should be allowed to wear headscarves in public spaces in France; Ta-Nehisi Coates's argument in *The Atlantic* for reparations to the descendants of black American slaves; and the growing debates over transgender rights and restroom access.

Topic: HIV/AIDS in Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Perhaps more than any other event in the last quarter of the twentieth century, the AIDS crisis condensed or crystallized cultural anxieties about the body, identity, and difference. From the early reports of a 'gay cancer' in the New York Times to contemporary fundraising campaigns like Project RED, public discourse surrounding the virus has often been more concerned with who contracts it and how rather than with its biological causes or medical treatment. In this course, we will examine the cultural response to HIV/AIDS in the Americas through fiction, poetry, and visual art from the pandemic's first fifteen years. We will begin by looking at the different metaphors and allegories deployed in the early eighties to conceptualize the disease through short fiction from the U.S. and Brazil. How was AIDS figured when it first burst into public consciousness? How did activists, writers, and

artists feed into these notions or push against them? In our second unit, we will consider the relationship between the visual arts, poetry and activism in the second half of that decade. How did activist groups such as ACT UP and Yeguas del Apocalipsis mobilize art to try to effect change in public consciousness and policy? How was art across the hemisphere shaped by the intense public debates surrounding it? The course will conclude by focusing on two longer works from the early nineties: Tony Kushner's *Angels in America* and Mario Bellatín's *Salón de belleza*. How do these two texts construct or demolish overarching narratives about the epidemic? What role does each see for art in combating the disease? Throughout the semester, we will make use of the insights provided by theorists and activists of the period —such as Susan Sontag, Douglas Crimp, Pedro Lemebel and Simon Watney— along with perspectives from a variety of disciplines including political science, epidemiology, and history of science. No knowledge of Spanish or Portuguese is necessary: all materials will be available in English.

Topic: Food

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What's for dinner? A seemingly simple question that raises even more. What *should* we eat? What *do* we eat? *Why* do we eat it? How we think about these questions in the context of dining at Harvard is the focus of this course. On the one hand, concerns about the environment or the welfare of animals or our own health might lead us to make deliberate choices about what we eat. On the other hand, less conscious forces – such as habits, how food is presented, culture, innate preferences – might also drive what we eat. In the first unit, we will consider the debate between "sustainable" and "industrialized" farming and ask what that debate can tell us about how we choose

what to eat and perhaps how we should choose what to eat. In the second unit, we will take a look at a failed food-related policy aimed at addressing obesity: the ban on large-sized sodas in New York City undertaken a few years ago by then-Mayor Michael Bloomberg. Using psychology research on eating, decision-making, habits, and behavior change, we will evaluate the policy and think about what lessons we can take away from its failure. In the final unit, students will apply what they have learned about why we eat what we eat to evaluate eating in Harvard's dining halls. Students will select an area of interest to research further and will propose evidence-based changes to the current system. Throughout the course, we will use scientific evidence to inform our thinking about food and eating.

Topic: HIV/AIDS in Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Perhaps more than any other event in the last quarter of the twentieth century, the AIDS crisis condensed or crystallized cultural anxieties about the body, identity, and difference. From the early reports of a 'gay cancer' in the New York Times to contemporary fundraising campaigns like Project RED, public discourse surrounding the virus has often been more concerned with who contracts it and how rather than with its biological causes or medical treatment. In this course, we will examine the cultural response to HIV/AIDS in the Americas through fiction, poetry, and visual art from the pandemic's first fifteen years. We will begin by looking at the different metaphors and allegories deployed in the early eighties to conceptualize the disease through short fiction from the U.S. and Brazil. How was AIDS figured when it first burst into public consciousness? How did activists, writers, and artists feed into these notions or push against them? In our second unit, we will consider the relationship between the visual arts, poetry and activism in the second half of that decade. How did activist groups such as ACT UP and Yeguas del Apocalipsis mobilize art to try to

effect change in public consciousness and policy? How was art across the hemisphere shaped by the intense public debates surrounding it? The course will conclude by focusing on two longer works from the early nineties: Tony Kushner's *Angels in America* and Mario Bellatín's *Salón de belleza*. How do these two texts construct or demolish overarching narratives about the epidemic? What role does each see for art in combating the disease? Throughout the semester, we will make use of the insights provided by theorists and activists of the period —such as Susan Sontag, Douglas Crimp, Pedro Lemebel and Simon Watney— along with perspectives from a variety of disciplines including political science, epidemiology, and history of science. No knowledge of Spanish or Portuguese is necessary: all materials will be available in English.

Expository Writing 20 Section: 240

Expository Writing 20 (116353)

Donna Mumme

2017 Spring (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: Department

Enrollment Cap:

14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Food

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What's for dinner? A seemingly simple question that raises even more. What *should* we eat? What *do* we eat? *Why* do we eat it? How we think about these questions in the context of dining at Harvard is the focus of this course. On the one hand, concerns about the environment or the welfare of animals or our own health might lead us to make deliberate choices about what we eat. On the other hand, less conscious forces – such as habits, how food is presented, culture, innate preferences – might also drive what we eat. In the first unit, we will consider the debate between "sustainable" and "industrialized" farming and ask what that debate can tell us about how we choose what to eat and perhaps how we should choose what to eat. In the second unit, we will take a look at a failed food-related policy aimed at addressing obesity: the ban on large-sized sodas in New York City undertaken a few years ago by then-Mayor Michael Bloomberg. Using

psychology research on eating, decision-making, habits, and behavior change, we will evaluate the policy and think about what lessons we can take away from its failure. In the final unit, students will apply what they have learned about why we eat what we eat to evaluate eating in Harvard's dining halls. Students will select an area of interest to research further and will propose evidence-based changes to the current system. Throughout the course, we will use scientific evidence to inform our thinking about food and eating.

Topic:

Breaking the Rules

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Everyone lives by rules, no matter how free they may feel. Some of these rules are written; others are unspoken. While we typically associate political rights with what it means to be "free," the seemingly small social conventions of everyday life can limit our real or perceived liberties in powerful ways, too. The codes of conduct we follow when, for example, we use social media, when we go on dates, or when we work for a company all have the capacity to rein us in, and if we knowingly or unknowingly violate those norms, our freedom may be at the price of our membership in a community. This course will use literature and film to interrogate the relationship between social rules and individual freedom while considering the following questions: What does it really mean to be "free"? How does social obligation impact our access to personal freedom? Are we even aware of the ways that society controls our behavior, or are rules of social conduct largely invisible? As we seek the answers to these questions, we'll start Unit 1 by performing close analysis of several short stories from both American and international authors—including Willa Cather, Flannery O'Connor and National Book Award winner Ha Jin—and discuss how they negotiate the relationship between individual desire

and social expectation. In Unit 2, we'll turn to films like *Mean Girls*, *The Social Network*, and *The Graduate* as we read theories of individual and collective freedom, questioning how the socially constrained environments of high school and college impact individuals' behavior and choices. Finally, we will conclude with a culminating research paper in which students will choose from novels, movies, or television series like *Mad Men* and *Downton Abbey*, in order to deconstruct the social pressures that impinge on us today.

Topic: The Voice of Authority

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In our daily lives we negotiate our relation to the authority of government, religion, school, parents, and peers. But what is authority? How does an entity gain authority in the first place? What happens when authority is abused? What does it mean to challenge authority? And what does authority have to do with human rights? We'll begin by reading the many-times-banned *One Flew Over the Cuckoo's Nest*, and we'll investigate that explosive novel's complex and nuanced treatment of, and reaction to, authority. Next, we'll read work by one or more international authors. These formerly or currently "at-risk" writers will visit our class, and we will analyze their work and what it reveals about authority and what happens when a writer who challenges governmental and cultural authority speaks openly about, and through, her/his work. This ongoing inquiry into the nature of authority will shape our research topics in the third unit, when we will investigate and theorize answers to questions arising out of our explorations of such topics as authority and: education, language and rhetorical strategy, politics, human rights, and art.

Topic: God and Government

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The separation of church and state is often considered to be a cornerstone of modern democracy, but this idea has nevertheless been a difficult concept to put into practice. Must the state completely avoid any entanglement with religious groups, or merely act in a non-preferential manner toward them? How does a state determine whether a given belief or practice is religious (and thus deserving of legal protection) or simply ethical or cultural in nature? Is the ideal of a neutral political secularism even possible or desirable? And what should we think of the many global actors, from Latin America to the Middle East to Sub-Saharan Africa, who reject this ideal entirely? This course will consider the many questions and challenges raised by religious diversity for the modern state. We begin in the first unit by considering two influential early accounts of the proper relationship of governments to religiously diverse populations, James Madison's "Memorial and Remonstrance" and Jean-Jacques Rousseau's "On Civil Religion." In the second unit, we will consider several judicial decisions from the U.S. Supreme Court and the European Court of Human Rights, which highlight the contentious legal landscape over the concept of "religious freedom." Our final unit turns to the international stage to examine several case studies from Brazil, Palestine, Nigeria, and India, to see how religious diversity is shaping contemporary global conflict.

Topic: Drugs, Mind, and War in the Am

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Psychoactive substances have played an outsized role in the modern history of the Americas. As marijuana is being decriminalized around the region, our class will ask how the Americas came to be embroiled in a war on the habits of its peoples. To provide background for our first unit, we will consider how the coca leaf, one of the defining symbols of indigenous culture in the Andes, has been transformed into cocaine, an international villain. We will then turn to analyzing a scene from Arthur Conan Doyle's *The Sign of the Four* to understand an influential way in which psychoactive drug use has been imagined in Western culture. In the second unit, we will examine the stereotypical images of the psychoactive drug user in classic texts from Sigmund Freud, Aldous Huxley, and others. To do so, we will draw on Edward Said's notion of "orientalism"—the long-running colonialist representation of non-European peoples as passive, irrational, part of nature, and in need of Western control. In our final unit, we will turn to investigating how the "War on Drugs" has changed the U.S. and Latin America, and consider whether we are currently at a historical watershed in the world's relationship with drugs. Throughout the course, we will also explore the practice of meditation, both to consider what has become a powerful alternative in our culture to psychoactive substance use and to better understand our own minds and cultivate concentration and equanimity.

Topic: The End of the World As We Know It

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Think of Harvard in ruins, its halls picked clean by marauders (like those in *Mad Max*) or by hungry undead (think *World War Z*). But what would it really be like to experience society's collapse? In some artistic visions, Apocalypse offers not just devastation, but a clean slate – room to start over. How bad would the "end of civilization" really be? Ten years ago, Jared Diamond's book *Collapse* described ancient and modern "ecocides" – social collapses after unsustainable environmental abuse. Diamond warned that "within the lifetimes of the children and young adults alive today," our environmental problems, if not corrected, would similarly provoke "warfare ... disease epidemics, and collapses of societies." But many historians and archaeologists have vigorously challenged Diamond's account of the past, fueling an ongoing and ethically charged debate about collapse: what collapse is, what (or who!) causes it, and whether its consequences might be catastrophic or quite livable for some remain contentious. Whether in our best research or in the latest film, collapse is hard to pin down. Together, we'll chase collapse through the ruins. In Unit 1, we'll read short fiction by George R. R. Martin, Elizabeth Bear, and John Langan, asking how post-apocalyptic visions balance annihilation and resilience. In Unit 2, we'll then compare leading scholarly models for actual social collapse, and test those models against evidence from *Rapa Nui*/Easter Island. Finally, in Unit 3, students will write a research paper illuminating the fate of one past society that allegedly collapsed (examples include the ancient Indus Valley civilization, the Late Bronze Age Aegean, the Mayan cities, or the Norse settlements on Greenland). The journey may be sobering – but perhaps the "end of civilization" isn't the end of the world, after all.

Topic: Jewish Identity in American Cu

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What does it mean to be Jewish in America in 2016? At a time when a majority of American Jews do not belong to a synagogue and an estimated one-third of married American Jews are married to non-Jews, is there such a thing as a shared identity among American Jews? This course will examine representations of Jews in American culture in an attempt to understand how Jewish-American culture has evolved since World War II, as well as how shifts in the cultural conversation about minorities in America have affected our conception of Jewish identity. As we consider recent works of literature, art, film, and television, we will question how they challenge and reinforce Jewish stereotypes, and how they continue to shape our ideas about assimilation, the Holocaust, ethnicity, and religious practice in America. We will begin by examining stories of assimilation by authors including Grace Paley, Allegra Goodman, Philip Roth, Nathan Englander, and others. We will then consider representations of the Holocaust, including Art Spiegelman's *Maus*, Judy Chicago's *Holocaust Project*, and Larry David's *Curb Your Enthusiasm* "survivor episode." In the final unit of the course, students will choose their own sources as they research and develop their ideas about Jewish identity in American culture.

Topic:

The Narrative Self

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

"Life must be understood backwards, but lived forwards" the philosopher Kierkegaard wrote. Sartre, in one of his novels, develops the thought: "You have to choose: live or tell." Both suggest that living

one's life and telling the story of it are mutually exclusive. Over the past few decades, many philosophers have disagreed, developing the view that understanding one's life as a story is not only something that most of us do, but allows us to become full persons and to live well. We will begin the course by considering some of these recent views. Are we right to speak of chapters of our lives and authoring our selves? To explain someone's behavior by referring to her character, or alternatively her role? To use literary genres such as tragedy to describe events in real life? What is entailed by such metaphors? Do they withstand careful scrutiny? Do our lives enact typical narrative arcs? Should they? Or do such claims confuse fiction and reality? In the middle part of the course, we will look at two fictional works that investigate similar issues. In Julian Barnes's *The Sense of an Ending*, the narrator's understanding of his life is upset by revelations concerning his past; the novel explores the fallibility of memory and its relation to material evidence. In the recent Swedish film *Force Majeure*, a wealthy family's ski vacation is upset when the husband reacts to an avalanche in an apparently cowardly manner, raising questions about character and situation, and what it means to be brave. At the end of the course, we will consider some critics of narrative self-understanding, as well as more specific applications of it. Do empirical studies challenge the idea that we have stable character? Does understanding one's life as a story preclude living in the moment? If lives are like stories, do they have a genre? Students could begin from these or other questions as they develop their own final research topics.

To explain someone's behavior by referring to her character, or alternatively her role? To use literary genres such as tragedy to describe events in real life? What is entailed by such metaphors? Do they withstand careful scrutiny? Do our lives enact typical narrative arcs? Should they? Or do such claims confuse fiction and reality? In the middle part of the course, we will look at two fictional works that investigate similar issues. In Julian Barnes's *The Sense of an Ending*, the narrator's understanding of his life is upset by revelations concerning his past; the novel explores the fallibility of memory and its relation to material evidence. In the recent Swedish film *Force Majeure*, a wealthy family's ski vacation is upset when the husband reacts to an avalanche in an apparently cowardly manner, raising questions about character and situation, and what it means to be brave. At the end of the course, we will consider some critics of narrative self-understanding, as well as more specific applications of it. Do empirical studies challenge the idea that we have stable character? Does understanding one's life as a story preclude living in the moment? If lives are like stories, do they have a genre? Students could begin from these or other questions as they develop their own final research topics.

Expository Writing 20 (116353)

Joshua Williams

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: Department

Enrollment Cap:

14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:

Black Autobiography

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Why is autobiography so key to the black literary tradition on both sides of the Atlantic? In this course we will search for answers by working our way through black autobiographies from a number of different genres. We will begin in the United States by reading excerpts from the "narratives" of former slaves, including Frederick Douglass, Harriet Jacobs, and Solomon Northrup, whose memoir was the basis for the award-winning film *Twelve Years A Slave*. What did the autobiographical truthfulness of these accounts accomplish? Why were they so important for the abolitionist movement? What do their popularity and political importance say about the nature of black suffering and its consumption as literature? We will then broaden the scope of our inquiry to consider narratives of blackness and suffering from elsewhere in the African diaspora. Our touchstone will be the Martinique-born philosopher Frantz Fanon, whose autobiographical engagement with racial trauma in *Black Skin, White Masks* remains one of the most important critical texts on blackness in the modern world. We will grapple with Fanon's account of realizing – quite late in life – that he was black and what that meant. This will help illuminate the broader world of postcolonial African and Caribbean politics and literature, including the poetry of Aimé Césaire and the fiction of Ama Ata Aidoo. In the final section of the course, we will return to the United States to engage with the #blacklivesmatter movement and some of the provocative music, film, and prose in dialogue with it: Beyoncé's *Lemonade*, Ryan Coogler's *Fruitvale Station*, and Ta-Nehisi Coates' *Between the World and Me*. What do these new black autobiographies have in common with their antecedents? How has the conversation about black life and black suffering changed? Or, has it changed at all?

Topic:

Privacy and Surveillance

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to some of our communications in the name of national security. It is easy to decry this state of affairs as Orwellian, or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice. In the first unit, we will explore the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? In the second unit, we will consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Do these non-citizens have any privacy rights vis-à-vis the U.S. government? Are there adequate legal protections for American citizens whose communications—both dangerous and innocent—are swept up in surveillance that is targeted at foreigners? In the final unit we will turn to the issue of privacy rights against corporations. Do we have a right to be forgotten online, or should truthful information about private citizens be available via internet search engines indefinitely? Can internet users be regarded as having given meaningful consent to privacy agreements that they have not read and would in any case likely not fully understand? For this unit, students will write a research paper about the appropriate limits on the power that private entities have over our online lives.

Topic:

Why Shakespeare?

Course Notes:

Students must pass one term of Expository Writing 20 to meet the

College's Expository Writing requirement.

Class Notes:

Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay \$2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve all this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We'll begin with a reading of the most famous artwork of the past millennium, *Hamlet*, a play about a bad philosopher trying to avenge his father's murder. Then we'll read Shakespeare's *Richard III* (about a mentally unstable man willing to do anything, including murder, to gain political power) alongside the Netflix show *House of Cards* (which modernizes *Richard III* with twenty-first-century American politics). We'll also run *Richard III* through some theories of criminology, a modern field that claims to offer scientific explanations for why crime happens. Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the cynical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Topic: The Knife's Edge

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: For most of human history, surgery has been a brutal, terrifying affair. Operations were carried out as quickly as possible to the sound of blood-curdling screams, and often ended in the patient's death. Historian of medicine Martin Pernick observed of surgeons before the advent of anesthesia that "the emotional ability to inflict vast suffering

was perhaps the most basic of all professional prerequisites." To say the state of the art has advanced since then is an understatement—incidentally, it is now even possible for complex surgeries to be carried out by robot, directed remotely by surgeons hundreds of miles away. Yet whether the scalpel is wielded by robotic arms or flesh-and-blood hands, it remains the case that operations are performed by human beings who are fallible, on bodies that are mortal, and there is still no way to wholly eliminate risk. As the surgeon and writer Atul Gawande has put it, when you are sick, "it's not science you call upon but a doctor." It is this fundamentally human endeavor of surgery, always rooted in specific social and historical contexts, that is the subject of this course. We begin the semester with historical and present-day accounts of surgical success and failure to explore what surgery has demanded from practitioners and patients over time. We next examine a major bioethical debate in one of the fields of surgery that has generated the most controversy and soul-searching throughout its history in societies around the world: organ transplantation. Lastly we consider an array of very different types of surgery that can significantly affect one's identity, self-presentation, and social position, such as cosmetic, bariatric, gender reassignment, and cochlear implant surgeries. Through independent research projects on related surgical phenomena of their choice, students will explore how the advent and availability of certain types of surgery in particular contexts has shaped social norms, concepts of the normal and the pathological, prevailing principles of medical ethics, and individual experience and self-understanding. What constitutes necessity, medical or otherwise? What should we be empowered to choose—and how far should we be allowed to go? What are the implications of responding to social problems not with social action, but with a surgeon's knife?

Topic:

Gothic Fiction

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Horror, madness, monstrosity, death, disease, terror, evil, and weird sexuality: these preoccupations, according to a recent critic, have animated Gothic fiction ever since it emerged in the mid-1700s. We will contemplate these preoccupations as we examine a range of Gothic texts from eighteenth-century Gothic fragments to stories by Edgar Allan Poe and Isabel Allende. And we will ask these questions about those texts: What makes Gothic fiction "Gothic"? How do we account for its immense popularity? Why have high-minded readers and writers always tended to scorn it? (What are they so worried about?) And what have modern Gothic writers and readers made of the genre they've inherited? We'll develop a working definition of the Gothic in our first segment, which will take a group of short stories—of various centuries and nations—as its primary texts. Next, we'll read Jane Austen's Gothic spoof, *Northanger Abbey*, in the context of both the popular fiction Austen parodies and the heated eighteenth-century debates about what young women should read. Our third segment will focus on Edgar Allan Poe and his tales of paranoia, insanity, and incest. This segment will extend the course's focus from the Gothic mansion (and the Gothic monster) to the Gothic mind.

Topic: Reading the Body

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What does it mean—and what has it meant—to have a body? Is a body a physical boundary separating a self from the rest of the world? If so, how do we account for cases like contagion or reproduction, where bodies implicate one another? How does the way we think about our bodies depend upon both the technologies we use to manage,

diagnose, and measure them and the artistic forms we use to represent them? We'll begin to explore these questions by visiting the Warren Anatomical Museum and the Putnam Gallery to examine Harvard's morbidly fascinating collections of medical curiosities and instruments—which include phrenological models of the brain, fetal skeletons, medical diagrams and prints, early X-ray machines, Civil War surgical instruments, and even Phineas Gage's skull. In our second unit, we will read across the boundaries of theology, literature, and science—genres we usually imagine as distinct—to understand how writers from a range of perspectives have grasped and represented the origin, construction, and development of the human body. We will examine the works of Jean Baptiste de Lamarck, William Paley, and Charles Darwin and analyze A. S. Byatt's treatment of their debate in her novella, "Morpho Eugenia." This interest in how the body has been understood in the past will inform your final research paper, where you will analyze representations of the body in the contemporary texts or contexts of your choice. Possibilities include (but are not limited to) disease films, modern dance, nude portraiture, college athletics, fitness magazines, and advertising. Throughout the semester, we will ask how and why the body has been theorized in such conflicting ways, calling into question any singular understanding of what constitutes a human body.

Topic:

HIV/AIDS in Culture

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Perhaps more than any other event in the last quarter of the twentieth century, the AIDS crisis condensed or crystallized cultural anxieties about the body, identity, and difference. From the early reports of a 'gay cancer' in the New York Times to contemporary fundraising campaigns like Project RED, public discourse surrounding the virus

has often been more concerned with who contracts it and how rather than with its biological causes or medical treatment. In this course, we will examine the cultural response to HIV/AIDS in the Americas through fiction, poetry, and visual art from the pandemic's first fifteen years. We will begin by looking at the different metaphors and allegories deployed in the early eighties to conceptualize the disease through short fiction from the U.S. and Brazil. How was AIDS figured when it first burst into public consciousness? How did activists, writers, and artists feed into these notions or push against them? In our second unit, we will consider the relationship between the visual arts, poetry and activism in the second half of that decade. How did activist groups such as ACT UP and Yeguas del Apocalipsis mobilize art to try to effect change in public consciousness and policy? How was art across the hemisphere shaped by the intense public debates surrounding it? The course will conclude by focusing on two longer works from the early nineties: Tony Kushner's *Angels in America* and Mario Bellatín's *Salón de belleza*. How do these two texts construct or demolish overarching narratives about the epidemic? What role does each see for art in combating the disease? Throughout the semester, we will make use of the insights provided by theorists and activists of the period —such as Susan Sontag, Douglas Crimp, Pedro Lemebel and Simon Watney— along with perspectives from a variety of disciplines including political science, epidemiology, and history of science. No knowledge of Spanish or Portuguese is necessary: all materials will be available in English.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:

The Science of Emotion

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Reason has been routinely championed as the epitome of human achievement and framed as profoundly at odds with emotion. For much of the 20th century, scientists had even characterized emotion as unimportant. However, after the past 30 years of research, we now understand emotion to be a crucial factor in human behavior, including reasoning. This class will focus on the science of emotion. In Unit 1, we'll explore what emotion is as we read several scientists' divergent theories, including Joseph LeDoux and Antonio Damasio, who disagree on whether love is an emotion. To help us evaluate their conclusions, we will consider a crucial theory offered by Paul Ekman, whose research on facial expressions of emotion was largely responsible for the modern field of emotion science. In Unit 2, we'll explore the conundrum that emotions are at the heart of individual—and thus seemingly subjective—experience and yet have so many elements that seem to be universal among humans of all cultures. We'll read sources that outline the "laws of emotion" that differentiate between emotion and feelings, and that present interesting data on emotion in children living in poverty. Our final unit will take up the matter of how cognition and emotion interact and give students an opportunity to research one of many perplexing questions in this subfield of emotion science: What, for example, is the role of emotion in decision-making? How does emotion interact with learning or moral judgments? How does emotion operate in adolescence or in various pathologies?

Topic: The Voice of Authority

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: ***NOTE: THERE IS A REQUIRED EXTRA MEETING OF THIS CLASS: Friday, March 24th from 6:00 - 7:30 p.m.***

In our daily lives we negotiate our relation to the authority of government, religion, school, parents, and peers. But what is authority? How does an entity gain authority in the first place? What happens when authority is abused? What does it mean to challenge

authority? And what does authority have to do with human rights? We'll begin by reading the many-times-banned *One Flew Over the Cuckoo's Nest*, and we'll investigate that explosive novel's complex and nuanced treatment of, and reaction to, authority. Next, we'll read work by one or more international authors. These formerly or currently "at-risk" writers will visit our class, and we will analyze their work and what it reveals about authority and what happens when a writer who challenges governmental and cultural authority speaks openly about, and through, her/his work. This ongoing inquiry into the nature of authority will shape our research topics in the third unit, when we will investigate and theorize answers to questions arising out of our explorations of such topics as authority and: education, language and rhetorical strategy, politics, human rights, and art.

Topic: Drugs, Mind, and War in the Am

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Psychoactive substances have played an outsized role in the modern history of the Americas. As marijuana is being decriminalized around the region, our class will ask how the Americas came to be embroiled in a war on the habits of its peoples. To provide background for our first unit, we will consider how the coca leaf, one of the defining symbols of indigenous culture in the Andes, has been transformed into cocaine, an international villain. We will then turn to analyzing a scene from Arthur Conan Doyle's *The Sign of the Four* to understand an influential way in which psychoactive drug use has been imagined in Western culture. In the second unit, we will examine the stereotypical images of the psychoactive drug user in classic texts from Sigmund Freud, Aldous Huxley, and others. To do so, we will draw on Edward Said's notion of "orientalism"—the long-running colonialist representation of non-European peoples as passive, irrational, part of

nature, and in need of Western control. In our final unit, we will turn to investigating how the "War on Drugs" has changed the U.S. and Latin America, and consider whether we are currently at a historical watershed in the world's relationship with drugs. Throughout the course, we will also explore the practice of meditation, both to consider what has become a powerful alternative in our culture to psychoactive substance use and to better understand our own minds and cultivate concentration and equanimity.

Topic: The End of the World As We Know It

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Think of Harvard in ruins, its halls picked clean by marauders (like those in *Mad Max*) or by hungry undead (think *World War Z*). But what would it really be like to experience society's collapse? In some artistic visions, Apocalypse offers not just devastation, but a clean slate – room to start over. How bad would the "end of civilization" really be? Ten years ago, Jared Diamond's book *Collapse* described ancient and modern "ecocides" – social collapses after unsustainable environmental abuse. Diamond warned that "within the lifetimes of the children and young adults alive today," our environmental problems, if not corrected, would similarly provoke "warfare ... disease epidemics, and collapses of societies." But many historians and archaeologists have vigorously challenged Diamond's account of the past, fueling an ongoing and ethically charged debate about collapse: what collapse is, what (or who!) causes it, and whether its consequences might be catastrophic or quite livable for some remain contentious. Whether in our best research or in the latest film, collapse is hard to pin down. Together, we'll chase collapse through the ruins. In Unit 1, we'll read short fiction by George R. R. Martin, Elizabeth Bear, and John Langan, asking how post-apocalyptic visions balance annihilation and resilience. In Unit 2, we'll then compare leading scholarly models for actual social collapse, and test those models against evidence from *Rapa Nui*/Easter Island. Finally, in Unit 3, students will write a research paper illuminating the fate of one past society that allegedly collapsed (examples include the ancient Indus Valley civilization, the Late Bronze

Age Aegean, the Mayan cities, or the Norse settlements on Greenland). The journey may be sobering – but perhaps the "end of civilization" isn't the end of the world, after all.

Topic:

Black Autobiography

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Why is autobiography so key to the black literary tradition on both sides of the Atlantic? In this course we will search for answers by working our way through black autobiographies from a number of different genres. We will begin in the United States by reading excerpts from the "narratives" of former slaves, including Frederick Douglass, Harriet Jacobs, and Solomon Northrup, whose memoir was the basis for the award-winning film *Twelve Years A Slave*. What did the autobiographical truthfulness of these accounts accomplish? Why were they so important for the abolitionist movement? What do their popularity and political importance say about the nature of black suffering and its consumption as literature? We will then broaden the scope of our inquiry to consider narratives of blackness and suffering from elsewhere in the African diaspora. Our touchstone will be the Martinique-born philosopher Frantz Fanon, whose autobiographical engagement with racial trauma in *Black Skin, White Masks* remains one of the most important critical texts on blackness in the modern world. We will grapple with Fanon's account of realizing – quite late in life – that he was black and what that meant. This will help illuminate the broader world of postcolonial African and Caribbean politics and literature, including the poetry of Aimé Césaire and the fiction of Ama Ata Aidoo. In the final section of the course, we will return to the United States to engage with the #blacklivesmatter movement and some of the provocative music, film, and prose in dialogue with it: Beyoncé's *Lemonade*, Ryan Coogler's *Fruitvale Station*, and Ta-Nehisi

Coates' *Between the World and Me*. What do these new black autobiographies have in common with their antecedents? How has the conversation about black life and black suffering changed? Or, has it changed at all?

Topic: Why Shakespeare?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay \$2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve all this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We'll begin with a reading of the most famous artwork of the past millennium, *Hamlet*, a play about a bad philosopher trying to avenge his father's murder. Then we'll read Shakespeare's *Richard III* (about a mentally unstable man willing to do anything, including murder, to gain political power) alongside the Netflix show *House of Cards* (which modernizes *Richard III* with twenty-first-century American politics). We'll also run *Richard III* through some theories of criminology, a modern field that claims to offer scientific explanations for why crime happens. Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the cynical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric

(Shakespeare is universal; Shakespeare invented the human).

Public Speaking Practicum (125227)

David Carter

2016 Fall (4 Credits)

Schedule:

MW 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

Expos 40 is an elective within the Writing Program, and focuses on developing and strengthening the skills necessary for successful public speaking. Students learn strategies for impromptu speaking, preparing and delivering presentations, formulating and organizing persuasive arguments, cultivating critical thinking, engaging with an audience, using the voice and body, and building confidence in oral expression.

Admission is by application only. Limited to 30 students per section (60 total).

Course Notes: Please visit the Expos 40 Canvas site for application information.

Folklore & Mythology 106

History of Witchcraft and Charm Magic (109652)

Stephen Mitchell

2017 Spring (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines witchcraft (and the "magical world view") from cross-cultural, historical, and literary perspectives. Although witches and witchcraft are considered in their non-Western settings, the course focuses on the melding of Christian and pagan views of witchcraft and magic in the European Middle Ages, and the evolving construction of witchcraft ideologies through the witch crazes of the sixteenth and seventeenth centuries to the rise of modern paganism.

Folklore & Mythology 114

Embodied Expression/Expressive Body: Dance in Cultural Context (122863)

Deborah Foster

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An examination of the ways in which the dancing body internalizes and communicates cultural knowledge to both dancer and observer. By participating in dance workshops, watching dance performances (live and on film), and reading ethnographic and theoretical texts, we attempt to understand the emergent meaning of dance performances from multiple perspectives.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief.

Folklore & Mythology 128

Fairy Tale, Myth, and Fantasy Literature (122553)

Maria Tatar

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

Traces the migration of traditional tales from communal storytelling circles into the literary culture of childhood and into new media. How are powerful cultural myths about innocence and seduction, monstrosity and alterity, or hospitality and hostility recycled in fairy-tale fashion? How do fantasy worlds - both utopian and dystopic - provide children with portals for exploring counterfactuals and worst-case scenarios? Authors include the Brothers Grimm, H.C. Andersen, Lewis Carroll, J.M. Barrie, and J.K. Rowling.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for either Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Folklore & Mythology 156

Traffic on the Road: The Folklorist and the Highway (203876)

Ruth Goldstein

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

The current global moment carries the mark of border-crossings and transgressions where not only people are on the move, but also ideas and images about them. The refugee, the migrant, and the terrorist - while itinerant figures of different orders - they all inspire particular narratives about what constitutes "human nature" and inhumane practices. This course explores the multiple meanings of mobility and stasis by examining the (dis)placement and circulation of people and things along with the (folk)tales that accompany "being on the road." New roads through rainforests can bring improved economic conditions to rural areas; they can also bring disease and environmental destruction. So-called "uncontacted" tribes still inhabit in parts of the Amazon rainforest and Bedouin tribes continue to trouble Middle Eastern states. These nomadic populations present a challenge to state politicians, in theory because they represent a nomadic legacy and the possibility of insurrection, along with the belief that they cannot coexist with the modern, fixed, nation-state. French thinkers Deleuze & Guattari write that "[h]istory is always written from the sedentary point of view and in the name of a unitary State apparatus, at least a possible one, even when the topic is nomads. What is lacking is a Nomadology, the opposite of a history." So what does a mobile history or global outlook sound like if not told from the sedentary point of view? How do our perspectives on movement inform notions (or realizations) of peace, war, progress, and development? And what does it mean to tell a tale in motion? From the side of the road and on the highway, who and what can move or stay -- as well as who can tell the tale -- has defined those people and things gain and maintain social value. Among the diverse array of authors and central figures for this course are: Gilles Deleuze and Felix Guattari, Miriam Camitta, Roxanne Dunbar-Ortiz, Jodi Byrd, as well as historically heroic actors such as Harriet Tubman, Frederick Douglass. We will also honor the thousands of unnamed refugees crossing state borders via land, air, and water every day. While the course has a focus on the Americas, Africa, (some readings on South East Asia) and European colonialism, the class discussions, presentations, and certainly the assignments provide space to examine migrations and mobilities on the global scale.

Readings and discussions will engage the topics of: spatial productions of power and knowledge-making; movement that occurs through terrestrial, aquatic, cyber and outer-space, border-crossings; disability studies; trans-national development projects and environmental disasters; nomads and refugees.

Course Notes: This course fulfills the Ethnicity, Migration, and Rights requirements for a secondary field.

Class Notes: This course will be taught by Harvard College Fellow Ruth Goldstein.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration

Folklore & Mythology 157

Plants, Potions and Pharmaceuticals: Ethnobotany and Biopiracy (203877)

Ruth Goldstein

2017 Spring (4 Credits)

Schedule: M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

With rising pandemics of mosquito-born viruses like zika, malaria, dengue and continuing searches for cures for ebola, cancer and HIV/AIDS, plants (as well as animals) provide insight, inspiration, and often resources /ingredients for possible cures. The World Intellectual Property Organization and the United Nations Educational, Scientific, and Cultural Organization have dedicated special programs for traditional knowledge (folklore) and genetic resources (biological specimens of plants and animals). The high value placed on traditional knowledge, particularly from indigenous communities, has lead to vandalism and biopirating of plants and animals across national borders. This course will examine how the category of the plant, not simply the animal, is politically-charged, particularly in terms of biodiversity conservation, indigenous intellectual property rights, and pharmaceutical development. Among our readings and foragings, we will encounter the works of famed Harvard ethnobotanist Richard Evans Schultes and his successors: Wade Davis, Timothy Ploughman, and Michael Balick as well as Brazilian shaman Davi Kopenawa, Native (North) American healers and activists such as Winona LaDuke and female scholar-shamans like Barbara Tedlock.

Class Notes: This course will be taught by Harvard College Fellow Ruth Goldstein.

Folklore & Mythology 158

The Eco-Feminist and the Folk (203878)

Ruth Goldstein

2017 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course takes eco-feminist and critical race studies approaches to the anthropology of gender and sexuality, taking "eco-feminism" as an identity, an object of analysis, and as a methodological approach. While "Feminism" in practice need not be (though often is) gender-specific, as a political and academic practice it often carries racialized inflections towards its objects of its inquiry as well as its activism. The term, "eco", from the Greek "oikos," means "dwelling," "household," "home," or "family", laying the foundation for examining the roles that gender and sexuality play in changing forms of kinship, citizenship, and (environmental) politics beyond and within the concept of the human. These different meanings of the "eco" in eco-nomy and eco-logy shape scholarly analyses as well as the lived experiences for those do not feel "at home" in a white hetero-normative structure. In investigating the intersections and interconnections of gender and sexuality with race, ethnicity, and class, we will consider "eco's" various forms and how humans come to think about the concept of "home." An overarching question for this course revolves around whether, if, or when, one should separate environmental justice from social justice – and what the possibilities and limits are to fusing naturecultures (Haraway). The readings will cover classic folkloristic and anthropological approaches, current critical theory and philosophy, as well as less-often-read scholars whose voices often fall between the lines – or at the margins of – mainstream academic discourse. This is an attempt both to decolonize the syllabus as well as show how thoughts and bodies, as well as body politics become colonized. What does it mean to decolonize bodies through words? How can language create and maintain (earth) body politics? How has the concept of "home" – the "eco" continued to structure ideas about who and what bodies may chose to, or be let, to live? How do notions of "home" and what is "normal" gain their gendered, sexualized, racialized texture? What does it mean to "be at home in one's own body?" When it comes to people's choices about their bodies, it is crucial to understand how certain human and nonhuman bodies and lives matter, and how others do not. The fundamental anthropological divisions of "nature" and "culture" frame how we think about what it means to be human as well as what it means "to be free to choose" what we do with our bodies. Authors include Audre Lorde, bell hooks, Kimberlé Crenshaw, Gloria Anzaldúa, along with Andrea Smith, and Winona LaDuke. We will read these authors along with Marilyn Strathern, Donna Haraway, Gayle Rubin, Judith Butler, Friedrich Engels, and the Gender Nihilists, to name a few.

Class Notes: This course will be taught by Harvard College Fellow Ruth Goldstein.

Folklore & Mythology 172

Quilts and Quiltmaking (127859)

Felicity Lufkin

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Are quilts the great American (folk) art? From intricately stitched whole-cloth quilts, to the improvisational patchworks of Gee's Bend; from the graphic simplicity of Amish quilts to the cozy pastels of depression-era quilts; from the Aids Quilt to art quilts; quilts have taken on extraordinary significance in American culture. This class surveys the evolution of quilt-making as a social practice, considering the role of quilts in articulations of gender, ethnic, class and religious identities, and their positions within discourses of domesticity, technology, consumerism, and cultural hierarchy.

Tattoo: Histories and Practices (161297)

Felicity Luffkin

2016 Fall (4 Credits)

Schedule: R 0200 PM - 0359 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 12

Tattooing has been practiced in many different social and cultural settings, in many different time periods, to different ends. In the United States, tattooing was long associated with marginalized and stigmatized groups, but since the 1970s, has become increasingly popular and even mainstream. This seminar style class will explore distinct regional histories of tattoo, the development of tattooing in the US, and the different ways that contemporary tattoo practitioners situate themselves historically and negotiate boundaries of race, class and gender. We will also consider tattoo as an art form that both invites and resists aesthetic judgments.

Freshman Seminars

Subject: Freshman Seminar

Freshman Seminar 21C

Cosmic Explosions (159717)

Edo Berger

2017 Spring (4 Credits)

Schedule:

W 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Somewhere in the Universe a massive star ends its life in a supernova explosion every second (you can count: "1 supernova, 2 supernova, 3 supernova..."). These supernovae, and other types of cosmic explosions like them, play a critical role in shaping the Universe. They are responsible for the synthesis and dispersal of all the chemical elements heavier than hydrogen and helium, and therefore provide the building blocks for the next generations of stars, for planets, and ultimately for life. These cosmic explosions also give birth to exotic objects such as neutron stars and black holes. Finally, the explosions are so powerful that they can influence the formation of new stars within their galaxies. In this Freshman Seminar we will explore how different types of cosmic explosions occur and how they influence the Universe and life in it. Equally important, we will actually use telescopes in Cambridge and in Arizona to study a new supernova explosion during the semester.

Freshman Seminar 21G

How Did the First Stars and Galaxies Form? (108389)

Abraham Loeb

2017 Spring (4 Credits)

Schedule:

M 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Since the Universe is expanding, it must have been denser in the past. But even before we get all the way back to the Big Bang, there must have been a time when stars like our Sun or galaxies like our own Milky Way did not exist because the Universe was denser than they are. We therefore face the important question about our origins: how and when did the first stars and galaxies form? Primitive versions of this question were considered by humans in religious and philosophical texts for thousands of years, long before it was realized that the Universe expands. The Seminar will summarize the fundamental principles and scientific ideas that are being used to address this question in modern cosmology. Previous generations of scholars have also wondered about the long-term future of the Universe. For the first time in history, we now have a standard cosmological model that agrees with a large body of data about the past history of the Universe. The Seminar will conclude with the forecast that this scientific model makes about our future. The Seminar will be based on a book with the same title written by Professor Loeb (Princeton University Press, 2010).

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Heart diseases have plagued humans since ancient times, but only in the past century has heart disease become epidemic throughout the world. Despite great progress in prevention and therapy, heart diseases will be major causes of death and disability throughout the next century. Modernization of civilization has played a major role in the rise of heart disease. Conversely, advances in heart disease have powerfully changed society and our personal daily behavior. In this seminar, we will examine some of the major intersection events between heart disease and modern society over the past century and consider how this could change the next century in America and throughout the world. The topics include highly visible events such as the deaths of American Presidents from cardiovascular disease, leading to the rise of biomedical research in the US, as well as relatively obscure events like a young physician inserting a urinary drainage tube into his heart—ultimately generating the modern life-saving treatment for heart attacks. We will explore how major lifestyle factors such as tobacco, alcohol, exercise and diet affect health, and how economics and politics often play a role in the complex relationship of health and society. In addition, we will visit a high technology modern cardiology facility and watch some technology in action.

Requirements: Course open to Freshman Students Only

Freshman Seminar 21V

Black Holes, String Theory and the Fundamental Laws of Nature (109627)

Andrew Strominger

2016 Fall (4 Credits)

Schedule:

T 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The quest to understand the fundamental laws of nature has been ongoing for centuries. This seminar will assess the current status of this quest. In the first five weeks we will cover the basic pillars of our understanding: Einstein's theory of general relativity, quantum mechanics and the Standard Model of particle physics. We will then examine the inadequacies and inconsistencies in our current picture,

including for example the problem of quantum gravity, the lack of a unified theory of forces, Dirac's large numbers problem, the cosmological constant problem, Hawking's black hole information paradox, and the absence of a theory for the origin of the universe. Attempts to address these issues and move beyond our current understanding involve a network of intertwined investigations in string theory, M theory, inflation and non-abelian gauge theories and have drawn inspiration from the study of black holes and developments in modern mathematics. These forays beyond the edge of our current knowledge will be reviewed and assessed. The format of the course will be discussion of weekly reading assignments, and a final paper. Non-scientists are welcome.

Recommended Prep: **Prerequisites:** High school level calculus and physics.

Requirements: **Course open to Freshman Students Only**

Freshman Seminar 21W

Research at the Harvard Forest: Global Change Ecology-Forests, Ecosystem Function, the Future (112349)

David Foster

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 11

Global change ecology is the line of scientific inquiry that integrates the responses of organisms, ecosystems, and their environments with changes in human activity and climate. This seminar will focus on state-of-the-art research, tools, and measurements used in evaluating and anticipating global change through ongoing studies at the Harvard Forest's 3,500-acre outdoor laboratory in Petersham, MA. Students will explore the key role that forests play in climate control and develop the necessary skills to present and discuss the ecological evidence for past and future global change. The seminar consists of four weekend-long field trips (Friday evening-Sunday) to the Harvard Forest, where students will visit various long-term ecological experiments, use long-term and real-time datasets to understand biosphere-atmosphere interactions, and discuss key scientific findings. The course will highlight integrated faculty studies of land-use history, forest dynamics, atmospheric exchange of carbon and water, plant phenology, invasive plants and pests, and the impacts of climatic warming on complex ecosystems. Transportation, accommodations, and meals at the Harvard Forest will be provided. A final, on-campus mini-symposium will give students an opportunity to present what they have learned in a public forum.

Course Notes: The seminar consists of four weekend-long field trips (Friday evening-Sunday) to the Harvard Forest, dates TBA. Transportation, accommodations, and meals at the Harvard Forest will be provided at no cost to the student.

Class Notes: Open to Freshmen only. Four weekends at the Harvard Forest in Petersham, MA (Fri, 3pm-Sun, late afternoon) dates TBA. Transportation, accommodations, and meals at the Harvard Forest will be provided.

Requirements: **Course open to Freshman Students Only**

Freshman Seminar 22C

Psychoactive Molecules from Babylon to Breaking Bad (159838)

Jon Clardy

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Psychoactive molecules change brain function in ways that result in altered perception, mood, or consciousness, and while 'psychoactive' hints at something illicit, examples range from caffeine to cocaine. After an introductory session, the seminar series begins with two meetings focused on foundational principles of brain chemistry. Subsequent meetings address four important molecular families: opioids, molecules like heroin, codeine, and Oxycontin; cannabinoids, molecules like THC, the active ingredient in marijuana and anandamide, our body's version of THC; serotonin, a neurotransmitter regulated by antidepressants like Prozac, Cymbalta, Celexa, and Wellbutrin XL; and amphetamines, molecules like Albuterol, Adderall, XTC/Molly, and crystal meth. Our meetings will use case studies from recent newspaper, magazine, or popular science articles to explore larger questions about how these substances were discovered; how they alter our brain chemistry; how they are used, abused and viewed today; and what they have taught us about how our brains work. These explorations often lead to unexpected connections. For example the three seminars on opioids also explore our brain's reward system; the nature of addiction; the connection between opioids, alcohol abuse, and genes; and the connection between opioid sensitivity and human bonding.

Recommended Prep:

This seminar will be geared to students with a background in chemistry and biology.

Requirements:

Course open to Freshman Students Only

Freshman Seminar 22D

Time for Sleep: Impact of sleep deficiency and circadian disruption in our 24/7 Culture (159839)

Charles Czeisler

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

America is a sleep-starved nation. The Institute of Medicine estimates that between 50 and 70 million Americans are suffering from chronic sleep deficiency or sleep disorders, increasing their risk of weight gain, heart ailments, mood disorders, errors and catastrophic road accidents that kill more than 7,000 and

maintain more than 50,000 Americans annually. Children of all ages are sleeping about two hours less per night than they did in prior generations, rendering them hyperactive and irritable and compromising their ability to sustain attention and learn in school. This hyperactivity leads many sleep-deprived children to be misdiagnosed with ADHD and treated for years with amphetamines and other stimulants that further disrupt sleep. Yet, prevailing cultural attitudes lead us all to undervalue sleep and lionize all-nighters, such that most patients with sleep disorders remain undiagnosed and untreated. This seminar will explore the function of sleep, the physiologic factors that regulate sleep and circadian rhythms, the impact of exposure to artificial light on sleep and circadian rhythms, historical and cultural differences in sleep habits, and the consequences of sleep deficiency, circadian disruption and sleep disorders on both the brain and the body. Public policy issues, such as school start times, limits on resident physician work hours, drowsy driving laws, and proposed regulations to screen transportation workers for sleep disorders will be debated. Students will be encouraged to track their own sleep patterns throughout the semester, identify the personal, structural and cultural barriers to maintaining healthy sleep while in college, and propose strategies to improve sleep health at Harvard College, the local community and the nation.

Requirements: Course open to Freshman Students Only

Freshman Seminar 22H

My Genes and Cancer (159990)

Giovanni Parmigiani

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The role of a person's genetic background in determining whether he or she will develop cancer, and when, is at the center of public discussions and active scientific investigations. Already, one's genetic background is used in making life-altering health decision aimed at preventing the occurrence of cancer, as was recently the case with actor Angelina Jolie. This seminar will explore the extent to which current scientific knowledge can inform this type of decisions. The goal is to gain enough understanding of the scientific background to critically evaluate the discourse of a genetic counseling session. The course will proceed at first by laying essential foundations of genetic inheritance in humans; cancer evolutionary theories; statistical risk; and decision-making in health care. Subsequently student will read articles from the scientific and popular press, and listen to podcasts. In class we will discuss the readings. There are no strict prerequisites, though some familiarity with the basic concepts of probability and genetics will be very helpful. There is a good deal of reading and listening, which everyone is expected to do ahead of class. Students can expect readings in genetics and statistics that will stretch them, though it will not always be necessary to understand all the technical details of every paper. Students can also expect to read opinion pieces with which they (as well as I) may disagree. Students will be required to write two 5-page double spaced essays (midterm and final) and to lead a class discussion on the topic of one of their two papers. A typical paper is the critique of a scientific or popular press article, chosen from a list of suggested options or identified independently by the student, with my approval, during the first seven weeks of classes. Attendance is essential, not only for the students' education, but for the benefit their contributions provide to the others.

Freshman Seminar 22M

The Amazing Brain (123659)

John Dowling

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Clinical cases have told us much about human brain function. This seminar will examine some of the famous neurological cases, what we have learned from them, and explore brain mechanisms. Included will be Broca's patient "Tan" whose case led to the identification of one of the brain's language areas; Phineas Gage, whose injury to a specific brain region changed his personality dramatically; and patient HM, who after brain surgery, no longer could remember things for more than a few minutes. We will expand on the cases by reading from my book *Creating Mind* which is an introduction to brain and mind mechanisms in language accessible to anyone who has had elementary high school science. Many of the chapters describe other medical cases, not as well-known as the classic cases described above, but instructive nevertheless.

Course Notes:

I especially invite those students who are not planning to concentrate in neurobiology or a natural science to join the seminar.

Recommended Prep:

High school science

Freshman Seminar 22R

Introduction to Technology and Society (160118)

Venkatesh Narayanamurti

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

From the digital revolution to social media, from global warming to sustainability, and from national security to renewable energy, technology plays a critical role in shaping our lives. This course explores concepts in physical sciences that span disciplines and examines broadly how technology shapes society and vice versa. Through case studies, students will be exposed to the importance of a conceptual understanding of science (including social science) underpinning technology and the tradeoffs necessary in tackling the great challenges facing a global society. The course has a foundation of both physical and social science concepts, sparking interest and encouraging future investigation into how technology and

society are interwoven and mutually dependent. Each class will start with a discussion of blog posts of current news related to technology followed by selected areas of deeper engagement and discussion. Students will be involved through individual reflection and small team assignments to address specific problems in, for example, the case of "wiki leaks" and its implications for issues of privacy and diplomacy and open government. The course is designed for physical science students to appreciate not only 'how things work' but 'how the world works' and for social science, arts and humanities students on not thinking of technology as a 'black box'.

Course Notes: There are no prerequisites, but an interview may be required to have a balanced distribution of students spanning interests in the natural sciences, arts and humanities and social sciences.

Freshman Seminar 22S

Quantum Mechanics Face to Face (160193)

Melissa Franklin

2017 Spring (4 Credits)

Schedule:

T 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course is for students who would like to be introduced to the ideas of quantum mechanics without the rigor of mathematics but who would be interested in learning by demonstration as well as spoken word and picture. We will be guided by a non-mathematical text *Introducing Quantum Theory*, read short pieces by the creators of quantum theory, including Bohr, Einstein, Heisenberg and Schrodinger, and each week watch and play with physics demonstrations of wave and particle physics. This course requires reading, watching short films, watching demonstrations in the lab and visiting places at the university where quantum mechanics is used on a daily basis.

Course Notes: Open to Freshmen only.

Requirements: Course open to Freshman Students Only

Freshman Seminar 22T

Why We Animals Sing (108564)

Brian Farrell

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

11

We do not sing alone. On land, four kinds of animals produce songs or calls: birds, frogs, mammals, and insects. Some of these (and fish) also do so underwater. The principal sounds such animal species make are signaling behaviors directly related to mating success. They are of individuals, usually males, marking territories, and wooing mates. However, in any one location, species may also compete with one another for occupation of acoustic space (that is, for bandwidth) and otherwise optimize their sound signals to features of their environment. We will explore these topics and others as we listen to and read about each of the various kinds of singers on earth, the biology of their sound production and reception, and the ways they attract mates while avoiding becoming meals for eavesdropping predators. We will listen to many different kinds of acoustic signalers across a wide array of acoustic communities in tropical and temperate settings, both terrestrial and aquatic, and we will examine sound spectra on a large screen as we listen and slow down and isolate sounds to help distinguish their parts. Finally, we will consider the biology and evolution of music in humans, considering evidence from brain studies, archaeology and anthropology, and the music of indigenous peoples. We will look at music parallels in different kinds in animals of other species. There will be field trips to listen to and record assemblages of local species. The overall objective is to awaken the students' sense, understanding, and appreciation of the acoustic environment from which we come, and the role of this environment in shaping human biology and culture. There is a fair bit of reading required in preparation for weekly discussions. Accordingly, participation will be expected for discussion of the readings and listening experiences.

Freshman Seminar 22V

Physics and Big Questions (160194)

Gerald Gabrielse

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Three types of big questions will be considered. The first are the big questions about the limits and domain of physics. To start, what are the limits and domain of applicability of the classical physics studies studied in high school? How do these relate to special relativity, quantum mechanics and quantum field theory? Next, what are some of the big questions that physics seeks to answer. For example, what is the "standard model" of particle physics and how is it tested? Other important big questions relate to how physics informs some major challenges to our society. For example, what does physics say about the options for powering our homes and cars given limited petroleum reserves and the need to reduce carbon dioxide production? The final set of big questions is about the compatibility or incompatibility of physics and religious faith. Here we will consider very divergent answers in a climate of respect for what will be big differences in opinion.

Freshman Seminar 23C

Exploring the Infinite (160198)

*Peter Koellner**W. Hugh Woodin*

2016 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Infinity captivates the imagination. A child stands between two mirrors and sees herself reflected over and over again, smaller and smaller, trailing off to infinity. Does it go on forever? ... Does anything go on forever? Does life go on forever? Does time go on forever? Does the universe go on forever? Is there anything that we can be certain goes on forever? ... It would seem that the counting numbers go on forever, since given any number one can always add one. But is that the extent of forever? Or are there numbers that go beyond that? Are there higher and higher levels of infinity? And, if so, does the totality of all of these levels of infinity itself constitute the highest, most ultimate, level of infinity, the absolutely infinite? In this seminar we will begin our exploration of the infinite with questions like these. We will examine the different senses of the infinite by seeing how the infinite arises in many disciplines, from theology to the arts, from physics to modern mathematics. We will eventually focus on the infinite in mathematics and we will pursue its systematic study. But even here we are beset by difficulties. For there are so-called "paradoxes of the infinite", paradoxes that have led some to the conclusion that the concept of infinity is incoherent. We will see, however, that what these paradoxes ultimately show is that the infinite is just quite different than the finite and that by being very careful we can sharpen the concept of infinity so that these paradoxes are transformed into surprising discoveries. We will follow the historical development, starting with the work of Cantor at the end of the nineteenth century, and proceeding up to the present. The study of the infinite has blossomed into a beautiful branch of mathematics. We will get a glimpse of this subject, and the many levels of infinity, and we will see that the infinite is even more magnificent than one might ever have imagined.

Freshman Seminar 23H

Anatomy and Ethical Transgressions in National Socialism (160215)

Sabine Hildebrandt

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

This course introduces students to the history and ethics of anatomy, and their relevance for current questions in medicine concerning the human body in life and death. The story of anatomy in National Socialist (NS or Nazi) Germany is an example of ethical transgressions in the anatomical sciences and reveals the complex relationship between anatomists and the Nazi regime. The historic causes of this development will be explored by examining the roots of the biologicistic NS ideology in the connections between anatomy, physical anthropology, the global eugenics movement and German racial hygiene. Many anatomists became members of the NS party, while others were persecuted for so-called "racial" and political reasons. An examination of the history of anatomical body procurement from ancient Greece to the 21st century demonstrates the changes of the traditional sources of bodies for anatomical dissection under NS rule, resulting in the use of many bodies of NS victims for anatomical purposes. Anatomical research changed with the exploitation of the rising number of bodies of executed men and women. Case studies of the work of individual anatomists reveal a gradual shift in the paradigm of anatomy. A few anatomists left the traditional paradigm- i.e. the gain of anatomical knowledge through work with the dead- in favor of a new paradigm- i.e. work with the "future dead"- in human experiments on prisoners who were subsequently murdered. Ultimately, anatomists became complicit with the government through their role in the complete destruction of the perceived "enemies" of the NS regime.

GeoSciFi Movies: Real vs. Fiction (160219)

Miaki Ishii

2016 Fall (4 Credits)

Schedule:

R 0230 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Natural disasters such as earthquakes, tsunamis, hurricanes, and volcanic eruptions have major impact on society and cause great tragedies. The participants in this seminar will examine one Earth-science related science fiction movie each week and discusses features that are real and fictitious based upon our current understanding of the science of disastrous events. Simple math and science concepts are used to test how likely some effects are (e.g., is magnitude 11 earthquake possible and why?), and to understand the underlying science behind these features (e.g., what are the factors that control the size of an earthquake?). If applicable, we discuss how these scientific ideas are exaggerated to dramatize the effects.

Course Notes: Students will be required to watch the assigned movie prior to class.

Recommended Prep: Students must be comfortable with high-school level math and science.

Requirements: Course open to Freshman Students Only

Freshman Seminar 23K

Insights from Narratives of Illness (117969)

Jerome Groopman

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

A physician occupies a unique perch, regularly witnessing life's great mysteries: the miracle of birth, the perplexing moment of death, and the struggle to find meaning in suffering. It is no wonder that narratives of illness have been of interest to both physician and non-physician writers. This seminar will examine and interrogate both literary and journalistic dimensions of medical writing. The investigation will be chronological, beginning with "classic" narratives by Tolstoy, Chekhov, and Kafka, and then moving on to more contemporary authors such as William Carlos Williams, Richard Selzer, Oliver Sacks, Susan Sontag, and Philip Roth. Controversial and contentious subjects are sought in these writings: the imbalance of power between physician and patient; how different religions frame the genesis and outcome of disease; the role of quackery, avarice, and ego in molding doctors' behavior; whether character changes for better or worse when people face their mortality; what is normal and what is abnormal behavior based on culture, neuroscience, and individual versus group norms. The presentation of illness in journalism will be studied in selected readings from the New York Times' and Boston Globe's Science sections, as well as periodicals like the New Yorker, The New York Review of Books, Harper's, and The Atlantic. The members of the seminar will analyze how the media accurately present the science of medicine or play to "pop culture." The seminar will study not only mainstream medical journalists, but so called alternative medical writers such as Andrew Weil also. Patients with different diseases will be invited to speak to the members of the seminar about their experiences. Students will try their hands at different forms of medical writing, such as an editorial on physician-assisted suicide that would appear in a newspaper and a short story that describes a personal or family experience with illness and the medical system.

Freshman Seminar 23P

Physics, Math and Puzzles (109319)

C. Vafa

2016 Fall (4 Credits)

Schedule: R 0600 PM - 0759 PM

Instructor Permissions: Instructor

Enrollment Cap: 17

Physics is a highly developed branch of science with a broad range of applications. Despite the complexity of the universe the fundamental laws of physics are rather simple, if viewed properly. This seminar will focus on intuitive as well as mathematical underpinnings of some of the fundamental laws of nature. The seminars will use mathematical puzzles to introduce the basic features of physical laws. Main aspects discussed include the role of symmetries as well as the power of modern math, including abstract ideas in topology, in unraveling the mysteries of the universe. Examples are drawn from diverse areas of physics including string theory. The issue of why the universe is so big, as well as its potential explanation is also discussed.

Course Notes: Friday class will be added if needed, TBD.

Class Notes: Section I: W., 4:30–6:30; Section II: F., 4-6

Recommended Prep: This seminar is recommended for students with a strong background in both math and physics and with keen interest in the relation between the two subjects.

Requirements: Course open to Freshman Students Only

Freshman Seminar 23R

Asteroids and Comets (161261)

Charles Alcock

2016 Fall (4 Credits)

Schedule: M 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Comets have been seen regularly since before the beginning of recorded history. They have often been regarded as disturbing portents. Asteroids, on the other hand, were not discovered until the 19th century, with the advent of astronomy with telescopes. Today we know of many more asteroids than comets, but we believe that there are vastly more comets than asteroids in the solar system. This seminar will start with the history of the study of comets and asteroids, including the "Great March Comet of 1843", observations of which led to the establishment of the Harvard College Observatory and its Great Refractor, at that time the largest telescope in the Americas. Our understanding of comets advanced dramatically in 1950 with the publication of two extraordinary papers: Whipple (then at Harvard) described the mixture of dust and ice that comprises the nuclei of comets, and Oort (Leiden University) showed that new comets enter the inner solar system from a vast, diffuse cloud surrounding the planetary system. Modern telescopes and spacecraft encounters provide us today with a wealth of information about comets and asteroids. We will examine these observations and learn what is known and what is inferred about the origin and structure of asteroids and comets. The students will observe with the Astronomy Laboratory's Clay Telescope on the roof of the Science Center. Students will take on projects, which may involve their own observing program, or which exploit existing data.

Course Notes: The seminar will make use of the Clay Telescope on the roof of the Science Center. There may also be a trip to the Observatory at 60 Garden Street to visit the Great Refractor.

Freshman Seminar 23Y

All Physics in 13 Days (109575)

John Doyle

2016 Fall (4 Credits)

Schedule: W 0715 PM - 0914 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

Some claim that there are 13 ideas or principles that can form the bedrock for a pretty good understanding our physical and technological world. These are:

1) Boltzmann factor and thermal equilibrium, 2) Turbulence, 3) Reaction rates, 4) Indistinguishable particles, 5) Quantum waves, 6) Linearity, 7) Entropy and information, 8) Discharges, ionization, 9) Relativity, 10) Nuclear binding energies, 11) Photon modes, 12) Diffraction, 13) Resonance. Each week we will discuss one of these principles and see how they explain certain things about the physical world. We will discuss these and connections with other principles, as well as how the principle shows up in technology and, more broadly, in our technological society.

Recommended Prep: Please note that this seminar will be geared to students likely to go on in physics or related areas, such as chem/phys or engineering. The introduction to certain principles is done with the expectation that students will return to a more formal course on the subject in the future. This course acts as a kind of road map for further studies in physics. Topics may change.

The Physics and Applied Physics Freshman Research Laboratory (118807)

Jene Golovchenko

2017 Spring (4 Credits)

Schedule: WF 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This year's Freshman Seminar will enable students with musical training to bridge this knowledge with Physics, Mathematics, software and hardware via experimentation with sound and music. Teams will be guided by faculty, staff and a practicing software entrepreneur. The course will be accessible to students with an interest in science/engineering and who currently play a musical instrument, at least at an elementary level.

Course Notes:

The instructor will contact selected students for an interview by phone or Harvard email so remember to check your Harvard email during the Winter Break. Please make sure your application is final and complete when you submit it so that the instructor may review it before the application deadline to consider you for a possible interview.

Recommended Prep:

The course will be accessible to students with an interest in science/engineering AND who currently play a musical instrument, at least at an elementary level.

Frederick Millham

2016 Fall (4 Credits)

Schedule: R 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

The history of surgery begins with the Hippocratic physicians whose principles were based, at least partly, on observation and measurement. However, surgical thinking for first three quarters of the "modern era" was dominated by Galen of Pergamum who, "fooled by his monkeys," established a school thought as false as it was tightly held. The exposure of Galen's errors by Vesalius in 1543 and Harvey in 1628 began a Medical Enlightenment. It would take until the 19th century for the next era of discovery to begin. During this time, the pace and significance of medical discovery increase, yet adoption of good ideas, like

antisepsis, seems to take much too long, while bad ideas find adherents in spite of poor or no supporting evidence. Throughout this period, the ghost of Galen continues to haunt hospitals and battlefields. It will not be until the 1930's that Galenism is banished from the wards. Our study will track this history and conclude with a consideration of the management of combat casualties from the time of the first "modern" surgeon, Ambrose Pare, to that of contemporary forward surgical teams in Afghanistan and Iraq. The seminar will consist of weekly discussion, informed by assigned reading and independent inquiry. We will visit the site of the first use of ether anesthesia, and duplicate William Harvey's experiments in the anatomy lab. From time to time we will be joined by other doctors with expertise in specific areas such as infectious disease, combat surgery and anatomy.

Freshman Seminar 24K

The Surprising Science of Happiness (128118)

Nancy Etcoff

2017 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

After a century of studying how to cure mental illness, scientists have started to explore what makes us happy. What have they discovered? In this course, we will critically examine the findings from the new science of happiness, including research in cognitive science, evolutionary biology, psychology, and neuroscience and reveal how this work alters our understanding of what happiness is, the optimal ways to achieve and increase it, the role of circumstance in its occurrence, its effect on our physical health, and its place in human nature. We will consider the notion of a biologically determined "hedonic set point," and question whether there are people who "have started in life with a bottle or two of champagne inscribed to their credit; whilst others seem to have been born close to the pain threshold," as William James noted over a century ago. We will examine how the brain's reward circuitry generates feelings of pleasure, desire, comfort and craving, and the ways it propels us to achieve biologically significant goals. Among the questions we will consider are: What is happiness for? Can one make oneself happier by conscious effort? What are some of the myths about happiness? Finally, is happiness a worthy goal for one's life? Highlighting the most rigorous and promising work in this field, we will attempt to construct a "happiness toolkit." The course will be didactic, interactive and experiential and provide an introduction to a burgeoning field of scientific inquiry.

Freshman Seminar 24N

Child Health in America (119619)

Judith Palfrey

2016 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

How can American health care be improved for children? How a nation cares for its children's health is often considered a measure of its commitment to the general citizenry and to its future. The members of the seminar will review together the history of children's health and health care in the United States, exploring the impact of geography, environment, nutrition, clean water, as well as of the scientific discoveries of the late 19th century and the early 20th century and the emergence of the high technology care of the middle and late 20th century. Then they will pose the question, "Does America provide children and youth the best possible health care available in the 21st century?" To approach this question, students will analyze the current causes of illness, disability and death among U.S. children and youth and compare United States epidemiology with that of other developed and developing nations. Students will also explore how child health delivery is financed.

Freshman Seminar 24Q

Biology of Symbiosis: Living Together Can Be Fun! (110305)

Colleen Cavanaugh

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course examines the remarkable diversity of symbiotic associations on Earth, their ecology and evolution, and their roles in human health and disease, agriculture, and biotechnology. Symbioses - "living together" - with microbes are ubiquitous in nature, ranging from lichens to the human microbiome. Symbiosis drives evolution, resulting in "new organisms" and charges us to think about biodiversity on a new level. In this freshman seminar, microbial symbioses with animals (including humans), plants, fungi, protists will be discussed, complemented by microscopy and field trips to local environs including Boston Harbor Islands, the New England Aquarium, and your own microbiome.

Class Notes:

W., 2-4 with occasional meetings until 5 pm for trips or projects

Requirements:

Course open to Freshman Students Only

Freshman Seminar 24U

How Did I Get Here? Appreciating "Normal" Child Development (128122)

Laura Prager

2017 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Understanding "normal" growth and development may seem like a relatively easy task at first. We take the nuances of developmental differences for granted because we're so accustomed to experiencing them. Nevertheless, defining normal (versus abnormal) development is a complex and controversial task. Development involves a tricky intermingling of environmental stimuli, cultural and social expectations, rapid and not always intuitive changes in brain development, temperamental differences, genetic inheritance, and mind-boggling brain plasticity. The course will start with a consideration of general themes and then move to a chronologic perspective. First, we approach child development as a dynamic force, one which simultaneously engages multiple domains: social/relational, cognitive, physical, moral. We will then switch to examine stages of development in sequence, using our understanding of neurobiological, physical, cultural, and psychological factors to inform our assessment of how children change over time. Readings will include classic papers on development, textbook chapters that provide overviews of specific developmental stages, recently published research articles on genetic inheritance, selected contemporary children's and young adult literature, personal memoirs, and short stories written about childhood.

Freshman Seminar 25N

Finding Connections: Perspectives on Psychological Development and Mental Illness (122458)

Nancy Rappaport

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The seminar's challenge will be to deepen our understanding of human development and how individuals cope with serious emotional or social difficulties (neglect, bipolar disorder, autism, depression, schizophrenia). We will use multiple perspectives: medical observations and texts that provide practical knowledge (e.g. The New England Journal of Medicine review articles), narrative readings to understand how patients experience the meaning of illness from the inside out (e.g. The Center Cannot Hold), visitors who will discuss their experience with mental illness, and how development-related mental illness is portrayed in the press (e.g. The New Yorker articles). We will start with the mental life of babies and how scientists interpret infants' nonverbal ways of finding safety and security. This begins the journey of our understanding fundamental needs for tenderness, holding, and making meaning. Understanding how conditions such as autism, depression, and schizophrenia are described in clinical research and literature will help us to appreciate the biological vulnerabilities and relational patterns that may disrupt the human connection. We will examine the resourcefulness required for both fragility and resiliency. Throughout the seminar, the instructor, as a practicing child and adolescent psychiatrist, will bridge the gap between

research findings, clinical applications, and everyday insight.

Freshman Seminar 25O

Building a Living Cell One Brick at a Time (108555)

Alain Viel

2016 Fall (4 Credits)

Schedule:

W 0230 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

Synthetic biology is an emerging multi-disciplinary field of research aimed at developing solutions to problems impacting our individual lives and ultimately our long-term survival as a species. Some challenges can be addressed by the development of microorganisms re-engineered to perform new functions. New fast and effective methods to sequence the genome of re-engineered bacteria have been developed. In this "hands-on" laboratory course, students will modify the genome of *E. coli* and study the inner workings of nanopore sequencing, a method allowing for the fast sequencing of entire bacterial genomes. The course gives students the experience of how science is done and how technologies are developed through the practice of experimental inquiry. To understand how a synthetic biological system is built, students will learn how to design experiments and then test their designs. To understand how nanopore technology was developed and how the commercially available nanopore-sequencing instrument works, students will perform experiments illustrating the guiding scientific principles behind this technology. The weekly meetings will include short discussions of selected topics and a discussion of the planned experiments. During the 3-hour laboratory sessions, teams of students will have access to a fully equipped laboratory dedicated to undergraduate research and will perform experiments that they design during previous class meetings. This course will show how a multidisciplinary approach contributes to today's scientific discoveries. Students will have flexible access to the teaching laboratory to continue their experiments outside of the hours scheduled for the seminar.

Freshman Seminar 25P

Neurotoxicology: Biological Effects of Environmental Poisons (120755)

S Counter

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This seminar will explore a wide range of environmental and man-made neurotoxic substances and their effects on human and animal populations. Particular attention will be given to pediatric exposure to neurotoxic agents and associated neurodevelopmental disabilities, as well as neurobehavioral and immunological changes. The seminar will examine the impact on children of lead (Pb) exposure from Pb glazing activities, household paints, and automobile petroleum emissions in the environment. Mercury poisoning through contaminated foods, cosmetics, vaccine preservatives, inorganic mercury in teething powders, elemental mercury from amalgamation, and magico-religious rituals will define another area of study. The basic neurophysiology and neurochemistry of a number of other neurotoxins, including arsenic, tetrodotoxin, saxitoxin, botulinum, curare, cocaine, and "nerve gas" will be reviewed. What dangers do these toxins pose? What can or should be done to prevent exposure?

Recommended Prep: This course welcomes science and non-science concentrators. Some background in high school biological and physical sciences is useful and preferred.

Requirements: Course open to Freshman Students Only

Freshman Seminar 25W

Responsibility, the Brain, and Behavior (120969)

Ronald Schouten

2016 Fall (4 Credits)

Schedule: T 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap: 11

Explores philosophical and legal bases of the concept of individual responsibility as applied in the criminal justice system. Examines how forensic mental health professionals assess an individual's mental state at time of an alleged criminal act, the legal standards applied, and the social and political forces that help shape the legal decision. Considers the insanity defense; examines modern concepts of the biological basis of behavioral disorders and their relationship to existing standards of criminal responsibility.

Course Notes: The seminar may include an optional trip outside of class time to Bridgewater State Hospital, Massachusetts's maximum security forensic hospital. Transportation will be provided free of charge.

Recommended Prep: There are no prerequisites, but an interest in law, psychology, or related fields would be advantageous.

Requirements: Course open to Freshman Students Only

Freshman Seminar 25X

Human Brain in Health and Disease: A Neurologist's Perspective (108257)

Thomas Byrne

2016 Fall (4 Credits)

Schedule:

T 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Is the human mind an "emergent" property of the brain? How might that occur? We study how structure and properties of the brain and mind are shaped by biology, chemistry, experience and disease. For example, experiences during "critical periods" modify brain anatomy/function; learning a foreign language before or after puberty is revealed by a native or foreign accent. Mirror neurons play a role in perception, motor skills and emotion. Examples include "contagious" happiness or sadness, empathy and theory of mind; their dysfunction may cause autism. Beyond these "bottoms up" explanations, we will also consider a "top down" approach, in which the intention or purpose of a behavior or idea can "pull" our behavior or state of mind, what Aristotle termed "Final Cause." The human brain/mind is a pattern-seeking organ that uses logical patterns to predict the future. From infancy we make sense of the world by seeking logical patterns; mathematics is "core knowledge" of infants. We then use these patterns to look into the future to anticipate where a given pattern will lead and are thus "pulled" to that goal or not; thus the goal can determine behavior and worldview. We read Victor Frankl's "Man's Search for Meaning" which explores human thought, behavior and purpose. This seminar straddles the realms of science, which asks "how?" and the humanities, which traditionally asks "why?" and strives to reconcile these two approaches to understanding the world and our place in it.

Recommended Prep:

The course is intended for those who have scored -5- on AP Biology or Chemistry.

Freshman Seminar 26F

Dreams: Our Mind by Night (107340)

Deirdre Barrett

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

John Steinbeck wrote: "It is a common experience that a problem difficult at night is resolved in the morning after the committee of sleep has worked on it." Steinbeck doesn't name the dream as spokesperson for the Committee of Sleep. However, most stories of nocturnal problem solving involve dreams. They are documented to have given the waking world one Nobel laureate's scientific experiment, music from classical masterpieces to pop chartbusters, innumerable novels and paintings, and inventions from the automated sewing machine to the computerized anti-aircraft gun. This course examines dreams with an emphasis on their relation to the creative process and problem solving. We'll first read about a variety of psychological aspects of dreaming—neurophysiology, biochemical, clinical, personality, and lucid dreaming research. The course also includes perspectives from history, religion, art, literature, and

anthropology. In the later part we'll focus on the phenomena of problem solving and creativity in dreams—both the historic anecdotes and modern research on college students attempting to 'incubate' problem-solving dreams and how this may relate to which brain areas are active during dreaming sleep. We'll visit a sleep laboratory and a dream artist's studio. You'll get a chance to work with your own dreams—in at-home assignments and also in class exercises. You'll keep a dream journal for the first half of the course, participate in experiential dreamwork exercises, and write a term paper to explore a topic of your choice in more depth.

The Universe's Hidden Dimensions (121549)

Lisa Randall

2017 Spring (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This seminar will give an overview and introduction to modern physics. As with the book, *Warped Passages*, on which it will be loosely based, the seminar will first consider the revolutionary developments of the early twentieth century: quantum mechanics and general relativity; and then it will investigate the key concepts which separated these developments from the physical theories which previously existed. We will then delve into modern particle physics and how theory and experiment culminated in the "Standard Model of particle physics" which physicists use today. Then we will move beyond the Standard Model into more speculative arenas, including supersymmetry, string theory, and theories of extra dimensions of space. We will consider the motivations underlying these theories, their current status, and how we might hope to test some of the underlying ideas in the near future.

Class Notes: Lisa Randall (Department of Physics)

Requirements: Course open to Freshman Students Only

Freshman Seminar 26K

Transformative Ideas in Brain Science: War, technology, and disease pioneered discovery (156450)

Jeffrey Macklis

2016 Fall (4 Credits)

Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This seminar will offer an integrated historical-neurobiological-neurological introduction to foundational and transformative ideas in the ~3,700 year history of brain science, neuroscience, and "lay" neurology – all accessible to freshmen with interests from history, art, and literature to economics, social policy, and business to neuroscience and (molecular, developmental, organismic, evolutionary, or regenerative) biology. No background will be assumed. Rather, a series of historical vignettes and sources will be tied to modern understanding of elements of the nervous system, its organization, function, and modes of investigation and manipulation– and some historical contexts, often involving war, disease, serendipity, and technology advancement, will be highlighted as advancing knowledge in surprising ways. An interdisciplinary approach will benefit from each student bringing insights from their own reading of primary source and history of science texts, to be added to in-session discussion, with moderation and direction from me (JDM). We will visit a number of the Harvard Collections and museums, including Comparative Zoology, Herbaria, History of Science, the HMS Warren Anatomical Museum collection (Phineas Gage's skull and railroad tamping rod), the Harvard collection of historical scientific instruments (advances in microscopy, electrical measurement, e.g.), and the state-of-the-art Center for Brain Science imaging facility, providing context.

Course Notes: Open to Freshmen only.

Freshman Seminar 26V

Blood: From Gory to Glory (125286)

David Scadden

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Blood has long symbolized life and death, hope and horror, health and disease. Ritual places it rightly as representative of life itself. What it actually is as a substance depends on perspective. The course examines how blood, like many things we think we know, is different depending on context. Therefore, we examine how the ancients, literary and visual artists, the early experimentalists and current day explorers bring us different ways of understanding blood. We discuss how blood is a magical substance, a commercial commodity and a paradigm for scientific understanding of stem cells and regeneration. We read Dracula, debate the values inherent in a free market of body components like blood, conduct the experiments that proved blood has stem cells and meet patients undergoing therapy for blood gone bad.

The Biology and Science of Cancer and Its Treatments: From Empiric to Scientific to Humanistic (125960)

George Demetri

2017 Spring (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

"Cancer" represents hundreds of different diseases with a wide variety of causative mechanisms, as well as enormous social impact. This seminar aims to provide an introduction to the biology of cancer and what makes a normal cell become a cancerous one, delving into acquired and inherited genetic abnormalities and effects of environmental factors, such as nutrition, radiation, and tobacco. Current approaches to cancer will be discussed from prevention and early detection to treatment and survivorship. Treatment modalities continue to evolve—no longer just surgery, chemotherapy and radiotherapy, but development of targeted therapies such as monoclonal antibodies, signal transduction inhibitors, vaccines, and angiogenesis inhibitors, which are rationally aimed at biological mechanisms uniquely important to the cancer cells themselves with the goal of reducing side effects of therapy and improving outcomes. Although cancer incidence continues to increase, mortality is decreasing, resulting in many more cancer survivors and a need to care for the secondary effects of the treatment and the societal impact of this disease. We will discuss the field of Integrative Oncology, an evolving discipline that treats the patient as a whole and combines the best of eastern and western medicine. As successful cancer management becomes more targeted with the newer therapies, there needs to be an integrative approach which focuses on clinical outcomes for patients, personalized approaches to individual cancers, yet which takes into account the financial impact of new therapies at a global level and allows development of wise public policy decisions.

Freshman Seminar 26Z

What is Life? (156181)

Guido Guidotti

2016 Fall (4 Credits)

Schedule:

R 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar will consider the conditions of a cell necessary to support life. The central questions are: what are the principal constituents of the cell, what is the role of water in cellular activities, what determines the size of a cell, what are the consequences of crowding of the components of the cell, what is the role of diffusion in biological interactions, what is the energy currency of the cell, what are the critical reactions that provide energy for the cell, how does the cell evade the requirement for an increase in entropy for a spontaneous process. The proposal is to find a definition for a living system using information and principles of biology, chemistry and physics. Answers to the central questions may allow an understanding of the size of prokaryotic and eukaryotic cells, of the ionic composition of the cell cytoplasm, and of the involvement of molecular interactions and complementarity in cellular processes.

What is College and What is It For? (121171)

Paul Barreira

2017 Spring (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

In the fall of 2012, more than 20 million students enrolled in U.S. colleges and universities. Who are these students, and why do they go to college? What are they seeking? This seminar asks students to think and write critically about higher education, considering, in Clark Kerr's famous phrase, "the uses of the university," from a variety of perspectives: historical, sociological, economic and developmental. As they do so, the seminar will address the questions that have faced students, administrators and public legislatures for over three centuries: What constitutes a liberal arts education? What are its goals? How should students be assessed? What role does extracurricular life, such as sports and fraternities and sororities, play in a college education? Does a college degree certify a vocational education, an intellectual one or a moral one?

Freshman Seminar 31D

Nietzsche (159736)

Mathias Risse

2016 Fall (4 Credits)

Schedule: W 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Friedrich Nietzsche addresses some of the big questions of human existence in a profoundly searching but often disturbing manner that continues to resonate with many. Hardly any philosopher (except Karl Marx) has exercised such a far-reaching and penetrating impact on intellectual life in the last 150 years or so. He has influenced thinkers and activists across the political spectrum. Nietzsche has always been of special interest to young people who have often appreciated the irreverence and freshness of his thought, as well as the often very high literary quality of his writing. In this course, we explore Nietzsche's moral and political philosophy with emphasis on the themes he develops in his best-known and most accessible work, *The Genealogy of Morality*. The best-known themes from this book include the slave rebellion in morality, resentment, bad conscience, and ascetic ideals. However, we also read several other of Nietzsche's works, and do so chronologically (except that we begin with his auto-biography, *Ecce Homo*, which Nietzsche wrote briefly before his mental collapse in 1889). The others works include *The Birth of Tragedy*, *The Gay Science*, *Beyond Good and Evil*, and *The Antichrist*. We do not read any secondary literature, though the instructor will recommend such literature as appropriate. The point is to become familiar with Nietzsche's writings themselves and to engage with his thought.

Freshman Seminar 31E

Money and Other Virtual Realities (109471)

Shigehisa Kuriyama

2016 Fall (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

What is money? Its practical importance is plain, but its essence is a mystery. In different places, at different times, it has assumed such wildly varying forms as seashells paper notes, and computer data—a fact that reminds us that money isn't any fixed, concrete thing, a tangible object in the world, but rather a

sort of virtual reality, something whose presence and power depends entirely on human perception. What makes money seem so potent and real? The seminar will bring together exploration of this question with the study of illusionism in two other domains—cinema and close-up magic. We will not only read about and discuss the theory of how virtual realities like money work, but also pursue practical hands-on exercises in movie-making and the design of mystifying tricks.

Course Notes: No prior knowledge of economics, or experience with media or magic performance is required; the only prerequisites are curiosity and a spirit of adventure.

Requirements: Course open to Freshman Students Only

Freshman Seminar 31G

The Pleasures of Japanese Poetry: Reading, Writing, and Translation (156179)

2016 Fall (4 Credits)

Schedule:

Instructor Permissions: Instructor **Enrollment Cap:** 12

When you hear Japanese poetry mentioned, do you automatically think "haiku"? This seminar will show you what you have been missing! The world of the classical waka and its modern descendant, the tanka, will be at the seminar's heart, but participants will also read examples of linked verse (renga) and modern poems in free and prose-poem forms. (And haiku too!) The seminar will examine poems and poets from the seventh to the twenty-first century, encountering such themes as desire, renunciation, time, memory, war, death, sorrow, and receptivity. Students will be encouraged to make connections with poems already known in other languages and traditions. All readings will be in English, but there will be ample opportunity for some Japanese to "rub off" in the process. Students will be asked to keep a diary of their encounters with the new poetry and will have the chance to practice the art of sequencing and to make their own translations based on literal renderings and explanations of Japanese originals.

Freshman Seminar 31N

Beauty and Christianity (121903)

Robert Kiely

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In Book X of *The Confessions* Augustine wrote, "I have learned to love you late, Beauty at once so ancient and so new!" In addressing God as source and model of beauty, Augustine joins theology and aesthetics in one sentiment that has informed and sometimes troubled Christianity throughout its history. There is no doubt that the life and teachings of Jesus have inspired some of the greatest works of art, literature, and music in Western culture, but it is also true that Christians have not always agreed on the definition and function of beauty. The seminar will consider certain key Christian aesthetic theories, including those of Augustine, Gregory the Great, Aquinas, and Calvin. But the focus will be on the analysis of particular works, selections from Dante's *Paradiso*, poems of Herbert, Donne, and G.M. Hopkins, *The Little Flowers of St. Francis*, Bunyan's *Pilgrim's Progress*, Hawthorne's *Scarlet Letter*, Melville's *Billy Budd*, works of C.S. Lewis, and the short stories of Flannery O'Connor. Included as well will be paintings (eg Italian Renaissance depictions of Jesus, Mary, Mary Magdalene, John the Baptist, and St. Sebastian) and choral music (eg Bach's *Saint Mathew Passion* and selected African-American spirituals). The abiding question will be: In what ways does aesthetic form—beauty—enhance, qualify, complicate, or obscure the gospel?

Freshman Seminar 31P

Trials from Ancient Athens (109474)

Adriaan Lanni

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In classical Athens, litigants represented themselves before hundreds of jurors who rendered verdicts without instruction from a judge. Although Athens is often praised for its participatory political institutions, the best-known example of Athenian justice is an embarrassment: the trial and execution of Socrates. Was the Athenian legal system a shining example of the potential of popular, democratic justice, or a cautionary tale suggesting that law is best left to experts? We will evaluate Athens' distinctively amateur legal system by reading surviving court speeches involving homicide, assault, adultery, prostitution, slander, treason, citizenship, property and commerce, as well as Plato's account of Socrates' defense speech. We will analyze the speeches as pieces of legal rhetoric and for the insight they offer into ancient approaches to crime and punishment, the regulation of sexuality (rape, adultery, prostitution, homosexuality), the trial jury, court procedure, and commercial law. Taught by a law professor, the focus will be on comparing ancient and modern approaches to problems faced by all legal systems. The broader goal will be to explore the role of law in a democratic society. Students will be expected to write one 5-page paper, to contribute to and lead one class discussion, and to participate in a "mock trial" of an Athenian homicide case.

Course Notes: Prior knowledge of ancient history or ancient languages is not required; all readings are in translation and the seminar is designed to be of interest to those without a background in the ancient world.

Requirements: Course open to Freshman Students Only

Freshman Seminar 31Q

Literal Looking: What We See in Art (109624)

Peter Burgard

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What do we really see when we look at a work of art? If we have little experience, we may not get far beyond discerning the theme and ascertaining whether the work is an accurate representation of reality (in the case of representational art); confronted with abstract art, seeing the work may result primarily in confusion or frustrated musing over what the point is. If we have too much experience — the seminar will address what "too much experience" might be and how literal looking relates to it — we may see the work as a function of historical, religious, aesthetic, mythological, and other concerns, or we may get caught in the web of a work's iconography. Either way, our too little or too great experience can prevent us from seeing what is there. This seminar is an exercise in seeing what is actually there in a series of great works of art, in moving beyond too much mystification yet staying this side of too much sophistication, an exercise in evaluating composition and representation as they present themselves to the viewer directly and without context. We will spend most of our time looking and talking about what we think we see, what we actually see, and how it informs interpretation, but we will also read short texts where professionally encumbered lookers (i.e., experts) say what we should see, so that we can compare the two and explore the degree to which literal looking aids or is aided by contextually informed looking. Works by Raphael, Caravaggio, Bernini, Velázquez, Turner, Renoir, Sargent, Klimt, Schiele, Kandinsky, Warhol, Richter.

Course Notes: The seminar meets in the Art Study Center of the Harvard Art Museums, where original works of art pertinent to those we are studying will be displayed in the seminar room for our examination and

discussion. There will also be one trip to the Museum of Fine Arts in Boston, which will entail one Wednesday on which you will have to be available from 2-6 PM.

Freshman Seminar 32M

Food for Thought: Culinary Culture in Spain and Beyond (109626)

Johanna Damgaard Liander

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The French have said that the history of a nation depends on what they eat. Yet in the case of Spain, it's clearly the reverse. What Spain has eaten has been a consequence of the country's vast -and often turbulent- history. Invasions, expansions, exile and immigration have created and continue to create the cuisine and culture, which will be our focus in this seminar. Likewise, we will consider Spain's culinary exchange with Latin America, with specific reference to Argentina, Peru and the Caribbean. From don Quijote's rudimentary repas, to Almodóvar's gazpacho, we'll conclude at the tables of the globalized metropolis. We will first consider food and identity, then food, its rituals and traditions. We will examine Spain from the Middle Ages until the present, the history and regions of the peninsula, and the culinary consequences of transatlantic voyages. We will also consider the repercussions of Europeans arriving in the 19th century, and those of the many closer, traumatic events of the 20th century, and beyond. The readings, all in English, are by novelists, historians, chefs, food critics, sociologists, poets, cartoonists and travel writers over the span of ten centuries. The films and videos are more recent, and will have subtitles. No previous knowledge of Spanish language, or travel to any of the countries mentioned, is required. Neither do prospective students need extensive cooking skills. The only pre-requisite is curiosity about what, why, and how the people of Spain and Latin America have eaten throughout their history, and how this reflects identity and culture of these lands.

Course Notes: The class will engage in hands-on sessions in the kitchen.

Recommended Prep: No previous knowledge of Spanish language, travel to any of the countries mentioned, or extensive cooking skills are required.

Freshman Seminar 32R

Autobiography and Black Freedom Struggles (159835)

Tommie Shelby

2016 Fall (4 Credits)

Schedule:

W 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar introduces the main traditions of African American political thought and the history of the black fight for justice through the genre of autobiography. Students will read some classic autobiographies by African Americans (for example, those by Frederick Douglass, Booker T. Washington, and Malcolm X), along with some lesser-known works (for instance, autobiographies by Ida B. Wells, Shirley Chisholm, and Amiri Baraka). They will discover how an influential set of black individuals, both men and women, came to political consciousness and participated in the collective struggle for justice in America. Students will reflect on these figures' personal struggles to find meaning and solace under unjust conditions and to forge dignified modes of resistance. The seminar provides an opportunity to see how these personalities interpreted key events and periods in U.S. history—slavery, the Civil War, Reconstruction, the Jim Crow era, the two World Wars, the Great Depression, the civil rights movement, and the post-industrial urban crisis—as social actors who participated and lived through them. Close attention will be paid to their engagement with and contributions to the political traditions of liberalism, conservatism, socialism, black nationalism, and feminism. And students will critically examine how these influential thinkers and activists understood ideals like freedom, equality, democracy, fairness, and tolerance.

Freshman Seminar 32V

The Art of Storytelling (122447)

Deborah Foster

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Throughout the centuries and across all continents, men and women have told stories to express the values they find in their common experiences of everyday life. While the multiple storytelling traditions of the teller influence the content and form of the emergent tale, each narrator shapes the story to reflect his or her own intentions, making it personally expressive as well as publicly meaningful to a particular audience in a specific place and time. Drawing on scholarship of oral storytelling traditions and reading (in translation) myths, tales, legends, plays and other forms from several traditions, this seminar will examine the nature of storytelling, its enduring appeal, and its ability to adapt to multiple new platforms (stage, print, film, internet). Participants will engage in the storytelling process itself in order to understand better the interrelationship of structure, plot, character, imagery, rhythm, voice and gesture to the story as a whole in a variety of media, ranging from mime to video.

Freshman Seminar 32X

Topics in Indo-Tibetan Buddhism (116129)

2016 Fall (4 Credits)

Schedule:**Instructor Permissions:** Instructor**Enrollment Cap:** 12

Through the study of Tibetan Buddhism, the members of the seminar will consider important issues of cultural contact by investigating a series of interrelated topics that have played a significant role in Tibetan history and that are connected to Tibet's acculturation to Buddhism in the eighth and ninth centuries. Which aspects of Tibetan Buddhism are indigenous? Which were imported with Buddhism itself from China and India? The seminar will seek to answer these questions through the study of several historical aspects of Tibetan society including the different narratives of Tibetan kingship, the formation of schools of Buddhist thought, the transmission of texts, scholastic loyalty, monasteries and their inhabitants, the appearance of Buddhist mysticism in the Tantra, and reincarnation—one of the defining features of Tibetan Buddhism. After developing a sense of the historic role of Buddhism in Tibetan life, the members of the seminar will consider the role of Buddhism and the Dalai Lama in contemporary Tibetan culture and society.

Freshman Seminar 330

Animation--Getting Your Hands on Time (126211)

Ruth S. Lingford

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:** 15

Students in this practice-based seminar will experiment with a variety of animation techniques to gain new perspectives on time. Using drawing, we will break down time into frames, understanding movement as both a liquid flow and a sequence of distinct infinitesimals. Using pixillation, a technique from the beginning of cinema, we will analyze and deconstruct human movement, then reassemble it for magical effect. Using strata-cut animation, we will attempt to think of time as a solid, and visualize the progression of time in terms of volume and shape. Using editing software, we will explore cinematic constructions of time through the use of cutting and juxtaposition. Each session will include screenings, discussion and practical work. There will be practice-based assignments each week. Each student will have the opportunity to make a film of around one minute, using an animation technique of their choice. Or they may decide to collaborate with others to make a longer piece. No previous experience of drawing or animation is required.

Course Notes:**There will be an optional screening on Fridays, 1-3 that students are**

strongly encouraged to attend.

Freshman Seminar 33X

Complexity in Works of Art: Ulysses and Hamlet (116807)

Philip Fisher

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Is the complexity, the imperfection, the difficulty of interpretation, the unresolved meaning found in certain great and lasting works of literary art a result of technical experimentation? Or is the source extreme complexity—psychological, metaphysical, or spiritual? Does it result from limits within language, or from language's fit to thought and perception? Do the inherited forms found in literature permit only certain variations within experience to reach lucidity? Is there a distinction in literature between what can be said and what can be read? The members of the seminar will investigate the limits literature faces in giving an account of mind, everyday experience, thought, memory, full character, and situation in time. The seminar will make use of a classic case of difficulty, Shakespeare's Hamlet, and a modern work of unusual complexity and resistance to both interpretation and to simple comfortable reading, Joyce's Ulysses. Reading in exhaustive depth these two works will suggest the range of meanings for terms like complexity, resistance, openness of meaning, and experimentation within form.

Course Notes: There may be interviews for selected applicants during Opening Days week.

Freshman Seminar 34O

You and Your Camera (108513)

Peter S. Pershan

2017 Spring (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The goal of representing the 3-dimensional world on a 2-dimensional surface dates back at least 30,000 years. For nearly all of these past centuries there were relatively few people who had the talent to create

realistic 2-dimensional images of the people and things that wanted preservation. Although photography has changed this there are still significant differences between the images that most people create and the photographs of leading photographers. The hope is that this seminar will give students the tools to improve their photographs. After a brief review of the historical review of art and photography the seminar will proceed to discuss the components of a modern camera, what the components are and how they work. Topics to be covered include both the physical optics of simple and compound lenses as well as the quantum physics that is the basis of the electronic devices that are fundamental to digital photography. The differences between the RAW, JPEG and TIFF methods for storing digital photographs will be discussed along with artifacts such as the aliasing that can arise in the digitization of images. Exercises will include, amongst other things, how to manipulate images using the open source GIMP software. An essential issue for color photography is the manner in which the human visual system transforms the wavelength information in the light entering the eye into perceptions of color. The seminar will explain the trichromatic theory of color vision and then discuss the management systems for color printing.

Course Notes: Arrangements for loaned cameras will be made for those that do not own one.

Recommended Prep: Ideally students should have a good high school physics course; however, individuals who are motivated to understand the science of photography should not have a problem with the material taught in the seminar. Similarly students should feel comfortable with high school algebra and trigonometry.

Freshman Seminar 34S

The Art of Noticing (108514)

Gordon Teskey

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This is an advanced writing course on writing about poetry, music and art. The assumption of the course is that noticing is a mental discipline like any other and can be cultivated by good habits, exercises and practice. Noticing is also the one basic mental practice shared by the sciences and the humanities, and is indispensable to both. The word 'aesthetics' is from the Greek word for 'perception'—arguably interpretable as 'noticing.' After the eighteenth century, aesthetics came to mean philosophical meditation on art. But in this course aesthetics means the art of noticing things one doesn't normally see, and deciding which of these things is important. We will be examining together in the classroom poems and works of visual art, and there will be outings to the Harvard Art Museums, the Museum of Natural History as well as to the Boston Museum of Fine Arts and the Isabella Stewart Gardner Museum. Evaluation will be based on writing done in and out of class in a journal each student will be required to keep. Journals and papers will be turned in at the end of the class for a cumulative evaluation interview.

Freshman Seminar 35E

What is Beauty? (125964)

Francesco Erspamer

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

Of the three fundamental concepts of Western civilization—truth, goodness, and beauty—beauty is the only one that does not demand loyalty or consistency. One moment we are entirely absorbed by a person or an object, the next moment we find it insignificant. Beauty does not promise or imply the possibility of verification, not even in a distant future—there will be no comprehensive research and no day of reckoning to finally prove that Leonardo's Mona Lisa or Beethoven's Ninth Symphony are in fact beautiful. But perhaps this is precisely the reason why we need beauty, and why it is worth studying: it teaches the contingency of values and the revocability of absolutes; it is a most effective training for tolerance and innovation. Selections from Plato, Kant, and other Western classics of aesthetics will be discussed in the first part of the seminar. In the second part we will explore the representation of beauty in literature, art, opera, cinema, and design, with examples mostly taken from the culture of a country, Italy, that successfully self-fashioned itself as the land of beauty. Topics will include the Renaissance "invention" of art, Mozart's Don Giovanni, Fellini's La dolce vita, and Benetton's advertising campaigns.

The Art and Craft of Acting (126838)

Remo Airaldi

2016 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

We've all watched a great performance and wondered, "How did that actor do that?" Acting is undoubtedly the most popular, most widely experienced of the performing arts and yet, in many ways, it remains a mystery. This seminar will give students an opportunity to demystify the art of acting by introducing them to the basic tools of the trade; they will learn about the craft of acting by actually "doing" it. It will provide an introduction to acting by combining elements of a discussion seminar with exercises, improvisations and performance activities. Improvisation will be used to improve group/ensemble dynamics minimize

habitual behaviors and to develop characters. Students will explore a range of acting techniques designed to give students greater access to their creativity, imagination and emotional life. The aim will be to improve skills that are essential to the acting process, like concentration, focus, relaxation, observation, listening, etc. In the later part of the term students will work on monologues. Students will also attend and critique productions at the Loeb Drama Center and other theaters in the Boston area.

Course Notes: Students will be required to attend theater performances (dates TBD) during the course of the term. There will be no charge to the student.

Requirements: Course open to Freshman Students Only

The Creative Work of Translating (128124)

Stephanie Sandler

2016 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Translation makes culture possible. Individual writers and thinkers draw sustenance and stimulation from works created outside their own cultures, and artists working in one format get ideas from those working in entirely different media. Translation between languages and between art forms will center our seminar's work. Taking a broad view of translation as a mental activity, we will study poems, fiction, film, photography, and music. We will stretch our own imaginative capacities by transposing material across media and genres, creating homophonic translations, and translating between languages. We will work individually as well as collaboratively. We will read a small amount translation theory, and some reflections by working translators. We will invite into our classroom a practicing poet, artist, and translator or two, attend poetry readings and lectures at Harvard, and have at least one field trip, to the Boston MFA. The only requirement is some knowledge of a language besides English – and a readiness to play with languages, art forms, and texts. Readings from Kazim Ali, Gennady Aygi, Walter Benjamin, Caroline Bergvall, Jorge Luis Borges, Joseph Brodsky, Anne Carson, Emily Dickinson, Forrest Gander, Robert Grenier, Susan Howe, Edmond Jabès, Velimir Khlebnikov, Vladimir Nabokov, Sappho, W. G. Sebald, Rosmarie Waldrop, Wang Wei, and the Bible; music by John Adams, Luciano Berio, and David Grubbs; artwork by Peter Sacks, Frances Stark. Films to include *The Clock*, *Despair*, and *The Golem*.

Course Notes: Open to Freshmen only. This course includes student art-making as part of the Elson Family Arts Initiative.

Recommended Prep: Requires knowledge of one language besides English.

Requirements: Course open to Freshman Students Only

To Far Places: Literature of Journey and Quest (126907)

William A. Graham

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this course, we read a highly diverse group of engaging texts in English translation. Most are fictional, mythic, or epic texts. All engage the theme of journey, quest, pilgrimage, passage, or sojourning. We will be attentive to enduring themes and basic questions associated with this varied literature, including parting and return, separation and reintegration, homelessness and homecoming, epic adventure and exploration, trial and suffering, loss and recovery, heroic action, tragedy, pathos, orientation and disorientation, internal and external travel, faith and courage, aesthetic vision, heightened perception, self-discovery and growth, companionship, loneliness, risk, and death. Readings will be selected from among the following: Gilgamesh, J.R.R. Tolkien's *Hobbit*, Homer's *Odyssey*, Virgil's *Aeneid*, Matsuo Basho's *Narrow Road to Oku*, Hermann Hesse's *Siddhartha*, Thomas Mann's *Death in Venice*, Rudyard Kipling's *The Man Who Would be King*, Ashvagosha's *Life of the Buddha*, Shusaku Endo's *Deep River*, Annie Dillard's *Pilgrim at Tinker Creek*, John Hersey's *A Single Pebble*, Charles Frazier's *Cold Mountain*, Fariduddin Attar's *Conference of the Birds*, Naguib Mahfouz's *Journey of Ibn Fattouma*, Cormac McCarthy's *The Road*, Rachel Joyce's *The Unlikely Pilgrimage of Harold Fry*, and Italo Calvino's *Invisible Cities*.

Comparative Historical Mythology (128176)

Michael Witzel

2016 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

Deals with an innovative approach to comparative mythology by incorporating an *historical* approach, not by the commonly assumed archetypes or diffusion. Working backwards from our earliest written sources (Egypt, etc.), successively earlier stages are detected through repeated reconstructions. Recent developments in genetics, archaeology, linguistics support the proposed historical model that tentatively reaches back to the "African Eve". Testing the proposal offers a wide scope for students participation and research in texts and in the sciences. Open to Freshmen only.

Money Matters (108768)

Evridiki Georganteli

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0329 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

Money matters aims to engage first-year students with the economics, politics and aesthetics of one of the most fascinating and enduring aspects in human history. The seminar is a study of money in all its manifestations from the early agrarian societies to the first financial crisis of the 21st-century global market. How have individuals and societies reacted to and used money in business, politics and religion? What are the factors that shaped the metallic content and iconography of coins from the 7th-century BC to the end of the Gold Standard in the 20th century? Why are early modern American and European banknotes so important for the study of social history? What are the links between art, literature, theatre, cinema and money? Seminars will take place at the Harvard College, the Harvard Carpenter Center for the Visual Arts and the Harvard Art Museums, introducing students to the world-class Harvard Coin Collection and offering them the opportunity to handle, research and discuss priceless artefacts. Money matters is intended for students with an interest in history, art history, archaeology, political science, economics and the study of world religions. Handling sessions, group discussions and a short essay on a choice coin from the Harvard Coin Collections will offer students a sense of immediacy and accessibility of Harvard's splendid numismatic holdings and the opportunity to understand why money makes indeed the world go round.

Horror in Literature and Movies: Cultural, Psychological, and Scientific Aspects of the Horror Genre (156293)

Steven Schlozman

2016 Fall (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Horror films and horror stories have been in existence since movies and stories themselves have been in existence. In other words, from the time that humans could tell stories, some of those stories have been deliberately frightening. Nevertheless, a clear definition of horror as a genre remains elusive and even controversial. This course will attempt to make sense of horror stories. We will work towards a comprehensive definition of fictional horror through careful exploration of scholarly literature from film theorists, literary critics, cultural psychologists, neuroscientists, and the popular press. The course will also make use of classic and more recent horror movies and writing. In addition, there will be a strong creative component to this course. The instructor is a physician and an assistant professor at Harvard Medical School and also a professional horror writer. He will utilize many of the techniques that have been incorporated into writing workshops, panel discussions, and film festivals in which he has himself participated. In this fashion, we will as a course develop our own sense of what constitutes horror through careful academic scrutiny of the topic and through the honing of our own creative talents.

Freshman Seminar 37U

Bob Dylan (119171)

Richard Thomas

2016 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar will examine Dylan as a musical, literary, and general cultural phenomenon, in the context of popular culture of the last 55 years, but also in the context of the much more long-lived poetic, literary and musical cultures of which he is demonstrably an important part. Dylan has been at the center of popular culture ever since he arrived in New York City on 24 January 1961, from Hibbing MN, by way of Minneapolis,

Madison and Chicago. The seminar will trace the evolution of his songs and lyrics from its early folk, even earlier rock and roll, gospel, and protest roots, through the transition from acoustic to electric, also through the many evolutions, reinventions, and innovations that followed—and that continue to emerge. We will also focus on Dylan's frustrations of audience expectation, from the anger evoked by his apparent abandonment of the serious protest and static urban folk traditions, to his apparent embracing of Christianity, to attacks focused on Dylan's "plagiarism" which show a lack of understanding of the vital and original literary process that expects the reader/listener to notice the thefts and reworkings. The seminar will also explore the multiple versions of many of Dylan's songs that show him to be not unlike an oral poet in his ability to re-perform and recreate through performance, in the process often transforming utterly the original lyrics and meanings of his own songs. Attention will be given to the ways in which Dylan's career builds up through periods of evolution and experimentation to productions that can only be called "classics" from a diachronic perspective, among others *Highway 61 Revisited* (1965), *Blonde on Blonde* (1966), *Blood on the Tracks* (1975), *"Love and Theft"* (2001), *Modern Times* (2006), *Tempest* (2012), and the bootleg and outtakes from the 1990s to the astonishing *Telltale Signs* (2008) and the highly revealing *The Cutting Edge* (2015). The seminar will also consider Dylan's role in film, particularly the brilliant commercial failure, *Masked and Anonymous*, from 2003, a work of high allegorical import. We will also look at Todd Haynes' insightful 2007 movie *I'm Not There*, which captures the essence of some of Dylan's persona creation, even though it initially met with bafflement from many critics. We will also read Dylan's *Chronicles* vol. 1, itself a work of genius, a sprawling Dylan prose song posing as an autobiography.

Course Notes: Open to Freshmen only.

Freshman Seminar 38V

Film Music and Film Sound (108913)

Carolyn Abbate

2016 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This seminar centers on classic film music written for movies from the 1920s to the 1960s, and will discuss some of the very greatest soundtracks and musical scores from this era, dealing with both Hollywood and European cinema. We also explore film sound in general: the technologies that made silent movies "talk," the rules and tricks of sound and music production for film, and the scientific and aesthetic theories behind different approaches to the soundtrack.

Course Notes: Mandatory film screenings will be held on Monday evenings, 7-9PM. Students do not need to read music for this seminar: film music and sound are aural arts, based on listening while seeing, and we rarely refer to musical notation.

Requirements: Course open to Freshman Students Only

Freshman Seminar 38X

Work: an Audio/Visual Exploration (107839)

Robb Moss

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

A video and audio production course, the class explores the nature, contours, and experience of working people in the City of Cambridge. Film screenings, readings, and journal writing augment the central activity of the class, which is to find aural and visual ways to expressively explore a range of work-experiences.

Course Notes:

1-hour labs will meet occasionally after class, Weds, 4-5. No previous production experience is necessary to take this class, and the class can be considered a gateway course for admission into the Department of Visual and Environment.

Freshman Seminar 39N

The Call of Beauty (109953)

Elaine Scarry

2017 Spring (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Across the centuries, philosophers, poets, scientists, and mathematicians have meditated on the nature and power of beauty. Some have said beauty calls on us to educate ourselves; others have said it is a call to repair the injuries of the world. Our readings will come from both men and women: Plato and Sappho in ancient Greece; Aquinas and Lady Murasaki in the medieval period; Rilke and Maya Lin today. We will study features associated with beauty such as color (e.g. "The Lady and the Unicorn" tapestries depicting the five senses) and symmetry (e.g. Augustine's *De Musica*; a book on symmetry by astrophysicist Mario Livio; a recorded debate among physicists about math and beauty). Does the call of beauty change according to its location? Among the sites we will contemplate are the beauty of earth (e.g. the writings of environmentalist Rachel Carson; the ephemeral sculptures of Andy Goldsworthy) and the beauty of faces (such as Homer on Helen, Seamus Heaney on an unnamed soldier).

The Transformation of Marketing (160713)

Elie Ofek

2017 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Marketing is the process by which an organization creates value for customers and extracts a share of that value for the organization. The seminar will cover the basics of marketing management and explore how the advent of new digital technologies, the increasingly global nature of business, and recent societal trends are impacting the marketing field. The seminar draws upon concepts in psychology, sociology and economics and infuses many examples to illustrate relevant issues. Each meeting covers a specific topic, with pre-readings forming the basis for in-class discussion. There will be two short assignments during the term and one final paper.

Freshman Seminar 40E

Law and Society through the Cinematic Frame (160785)

Ofrit Liviatan

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this seminar we will explore the interaction of law and society using the lens of film. The cinematic experience has become a key site through which the public understanding of law is produced, debated and influenced. Driven first and foremost by market and audience considerations, law related films often inject drama, contentious dimensions and even misrepresentations into the portrayal of real events. Nonetheless, by raising awareness about legal themes that pervade the plot, these films offer valuable insights toward discovering social scientific perspectives on the manner in which law functions in everyday life. Hence, the seminar will not focus on legal doctrine or teach you the fundamentals of the legal profession. Rather, using films as a framework for discussion, we will study law's working in relations to the social, political, economic and cultural environments in which it operates. Central thematic topics to be discussed include: the relationship between law, justice and morality; how does law intervenes in social relations and whether

it is over-utilized as part of these relations; the dynamics between law and social change; is access to the legal process equal to everyone; and the function of law in deeply divided societies. Throughout the semester film viewing will occur outside class as part of your weekly preparation for the seminar. However, we will dedicate one class as a field trip to watch a law-related film together and analyze its themes through the sociolegal perspective.

Freshman Seminar 40F

Sex, Technology, and Trump: What Lies Ahead for The Constitution (159741)

Laurence H. Tribe

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Donald Trump's unexpected victory on November 8th represents a seismic shift that may soon affect—even during this semester—subjects including separation of powers, federalism, immigration, corruption, religious freedom, and freedom of speech: in short, all things constitutional. Yet, as unpredictable as the future may be, the decisions of the executive branch and the electorate remain constrained, at least in theory, by a legal system built on a Constitution that emerged from the social and political conflicts of eras long past. Students entering the Class of 2020 weren't alive when civilization-ending military conflagration seemed a real possibility, or when an American president was driven from office because of a scandal linked to hacking the opposing candidate's private information. Today's students cannot easily recall a time before the terrorist attacks of 9/11 and the global responses they triggered. Nor can they imagine a world before the internet, social media, and interactive videogames, a world not immersed in images of sex and violence—a time more innocent, perhaps, yet in many ways more repressive. Social and cultural revolutions have upended the pace of political upheaval and conventional understandings of family, sexuality, and intimacy. Economic dislocation and a sense of exclusion have disrupted partisan affiliations. Scientific revolutions and technological innovations have provided new opportunities for communication and connection even as they have created new mechanisms for surveillance, profiling and control—at once improving democratic accountability and yet strengthening the state's grip and the prospects for tyranny. Adapting the words of this Constitution and the values it embodies requires analyzing the blend of politics and law practiced in and by the United States Supreme Court and influenced by popular culture and political discourse. This seminar, drawing on judicial opinions and secondary sources, will explore how our most basic legal framework, that of the U.S. Constitution and the law surrounding its interpretation and implementation, shapes and is shaped by modern forces battling for the character of the national soul.

Freshman Seminar 40J

Advice to Young Leaders (127970)

David Armitage

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Many of the classic works of political and ethical theory in the western tradition were written for young people about to enter public service or positions of authority. This Freshman Seminar takes a selection of these major texts of advice and encouragement, among them works by Plato, Aristotle, Cicero, Machiavelli, Burke, James, Weber, and Woolf. The class will introduce students to some major thinkers and ideas through a selection of texts that might speak to their own condition and ambitions. It will also show how to treat such works historically, in their own terms and their own contexts, while also applying them to current concerns and dilemmas. The overarching aim of the class will be for students to think rigorously about their own imminent responsibilities as citizens and leaders by reflecting on arguments addressed to similar rising generations in the past, in classical Greece, ancient Rome, early modern Europe, the eighteenth, nineteenth, and early twentieth centuries.

Freshman Seminar 40L

Free Speech (110427)

Sanford Ungar

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

13

In this age of rapid globalization and heightened cross-cultural contacts, nations struggle to reaffirm their identities and values. In the United States, one of the most precious values is free speech, embedded in the First Amendment to the Constitution and regarded as a keystone of American democracy. But arguments over the boundaries of free speech have become intense, especially in the era of electronic communication. This seminar will examine the dialogue taking place within the United States and around the world on free speech issues – sometimes civil, but often a political or cultural confrontation that turns violent. We will discuss international and domestic protests over politically sensitive cartoons, controversies over Holocaust denial, whether hate speech should be banned on campuses, whether the domestic media can ever be legitimately constrained on national security grounds, whether anti-gay religious activists have a right to disrupt military funerals, whether pornography and violent music lyrics should be regulated, and what constitutes free speech on the Internet or cell phones. Through Supreme Court decisions and by other means, we will examine the debate over what it means to be patriotic and whether patriotism requires Americans to say, or prohibits them from saying, certain things – and examine how standards have changed over the years. We will ask whether other countries' attitudes toward free speech and the other First Amendment freedoms should influence US foreign policy toward those countries. Examples of

constraints on free speech in our daily lives and work, unwitting or not, will also be considered.

Freshman Seminar 41D

Sick and Tired of being Sick and Tired: Health Disparities and African Americans (159832)

Evelynn Hammonds

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Since the arrival of Africans from Africa to America, their health and health care has been a critical issue for the nation. From the era of slavery to the present, African Americans have been disproportionately burdened by disease and ill health. Health disparities are the "inequalities that occur in the provision of healthcare and access to healthcare across different racial, ethnic and socioeconomic groups." This course examines this issue over the long time frame from the 17th century to the present. Currently, compared to the white population, African Americans are at an overall greater risk for many serious and life threatening diseases. This course will examine how these disparities emerged over time. It will explore the strategies and practices that African Americans employed to improve their health care. It will also examine, the ways that cities, states and the federal government supported or ignored the health of African Americans.

Freshman Seminar 41E

The American Death Penalty: Morality, Law, and Politics (109475)

Carol Steiker

2016 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar will address the controversies that swirl around the American death penalty in the distinct but related contexts of morality, law, and politics. At the level of moral theory, we will consider whether the death penalty is ever justified as a state practice, both in the abstract and in application, given concerns about its fairness and efficacy in deterring crime. We will explore the U.S. Supreme Court's "constitutionalization" of capital punishment starting with its landmark decision in 1972 in the case of *Furman v. Georgia*. We will trace the Court's attempt to deal with issues of fair process, proportionality,

cruelty, reliability, and racial discrimination. Close readings of key opinions will show how the Court's interpretation of the majestic generalities of the Constitution—the guarantees of "due process", "equal protection," and protection from "cruel and unusual punishments"—have been informed by moral theory. Finally, we will consider the American death penalty in political context, both nationally and internationally. We will assess explanations for the anomaly of American retention of capital punishment, alone among Western democracies. We will consider how moral philosophy and legal regulation have affected the course of the American death penalty in the political sphere and contemplate the legal and political future of the institution. Will (or can) the death penalty be reformed? What are the prospects for nationwide abolition (or large-scale resurgence)? Will (or should) the death penalty's future lie in the hands of the courts or the political branches of government?

Freshman Seminar 41F

Feuding and Peacemaking in Viking Age Iceland (c.870 to c.1150 C.E) (159806)

Stephen White

2016 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Settled primarily by people from the Scandinavian mainland, Viking Age Iceland (c.870 to c.1150 C.E.) was a stateless society with a highly sophisticated legal culture but without public officials to adjudicate disputes, enforce the law, or punish legal violations. The main sanctions against wrongdoing were monetary compensation, vengeance, feuding, and outlawry. To understand how this complex but unstable legal order was maintained and how competition for honor and power was kept within bounds, the seminar uses close readings, written analyses and class discussions of Icelandic family sagas, poems, historical narratives, and legal texts to study feuding and peacemaking, honor and shame, anger and hatred, kinship and marriage, gender, chieftaincy and clientage, gift-giving and plundering. It gives particular attention to the politics and group psychology of violent revenge and the roles of both men and women in containing it. By studying these topics in a medieval Icelandic context, the course also introduces students to subjects of ongoing research and controversy among historians of early Europe and to the social theories and paradigms that underlie their work. The course presupposes no previous knowledge of medieval history or literature.

Freshman Seminar 41J

The Problem of Economic Development (156421)

Michael Kremer

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Understanding the determinants of the wealth of nations has long motivated the study of economics and it is arguably the most important problem in the field for human welfare. This seminar will examine the problem of economic development, looking both at historical experience and at contemporary issues in developing countries. It will focus on writing in economics, but will also draw on other disciplines, including history, political science, and sociology. The course will start with readings of Adam Smith, Karl Marx, and Max Weber. Participants will then read non-technical works illustrating some of the techniques and modes of reasoning associated with contemporary microeconomics and statistical analysis. Finally, it will conclude with contemporary writing on development, including work that addresses big-picture political economy models of the role of institutions in development, a historical account of India since independence, and more microeconomic approaches.

Course Notes: Open to Freshmen only.

Recommended Prep: Students are expected to have had some background in economics, such as an AP economics course in high school, Ec 10a, or simultaneous enrollment in Social Analysis 10.

Requirements: Course open to Freshman Students Only

Freshman Seminar 41K

Human Rights, Law and Advocacy (156502)

Susan Farbstein

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Human rights practitioners confront numerous ethical, strategic, and legal dilemmas in their struggles for social justice. This freshman seminar explores the underlying legal framework in which human rights advocates operate, and then uses specific case studies to consider the various challenges they must grapple with in their work. The seminar is designed to encourage students to critically evaluate the human rights movement while offering an introduction to some of the essential tools and strategies used by human rights advocates, including advocacy, litigation, documentation, and report writing. Students will be asked to grapple with tough questions, such as: How can human rights be harnessed to successfully influence and change behavior? What does responsible, effective human rights advocacy look like? How do we engage without perpetuating power differentials along geopolitical, class, race, gender, and other lines? How do we find ways to work in collaboration with directly affected communities? What does it mean to be a human rights advocate working on abuses affecting individuals and communities remote from yourself? How do you balance broader advocacy goals with the needs of individual survivors or clients?

How do you determine when to intervene and devote limited resources to a given issue? Students will also consider a series of dynamics (e.g., north/south, insider/outsider, donor/donee, lawyer/non-lawyer) that influence how and why advocacy is formulated and received. Finally, the seminar considers the limits of the human rights paradigm and established methodologies, such as litigation and "naming and shaming," and explores alternative sources and forms of advocacy, including the role of community lawyering in the human rights context.

American Presidential Campaigns and Elections 1960-2016 (124777)

Maxine Isaacs

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

For two hours each week, students will work to understand the history, forces and politics of American presidential campaigns and elections. Each student will be "responsible" for one presidential election between 1960 and 2016, and, together, members of the seminar will develop some perspective on dramatic changes as well as enduring factors that have shaped our own times, issues and society. With the help of some guests – practitioners including political leaders, public opinion analysts and journalists – students will develop a deeper understanding of contemporary politics; the impact of demographic patterns and changes; public opinion and polling; and political communication. Students will learn about the relationship among politics, news and public opinion, and who influences whom. Participants will be introduced to excellent contemporary studies about modern presidential campaigns and elections. At the end of the term, students will make oral reports to the class on lessons learned from a past election which can help all of us better understand this one.

Freshman Seminar 42C

The Role of Government (160196)

Oliver Hart

2017 Spring (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Economists have a very positive view of the role of markets. The intellectual foundations of this are the first and second theorems of welfare economics. The purpose of the seminar is to introduce the students to these results but also to their limitations. For example, for markets to work well it is essential to have a legal system that upholds contracts and protects property rights. The legal system is also important to deter crime. But who can provide the legal system other than a government that has the coercive power to raise taxes? The legal system is an example of a public good, but of course there are many others including national defense, clean air, etc. Markets under-provide public goods and they also do not work well in the presence of externalities, a highly topical example of which is global warming resulting from carbon emissions. Another very topical issue is inequality. There is no particular reason to think that a market economy will yield an equitable distribution of income, and given this what is the appropriate government response? Throughout the seminar the analysis of ideas and concepts will be interspersed with policy issues such as whether and what limitations should be placed on the right to smoke or consume drugs, the right to marry, the right to buy and sell organs, the right to bear arms, and the freedom of businesses to decide whom to serve. We will also consider the pros and cons of the Affordable Care Act (Obamacare), the role of government nudges, and whether goods or services paid for by the government need to be produced by the government or can be outsourced: the issue of privatization.

Freshman Seminar 42H

The U.S. Energy Revolution and its Implications (160203)

James H. Stock

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

How we produce and use energy has major implications for the economy, energy security, and climate change. The U.S. "energy revolution" – nonconventional oil and gas production (fracking), increasing use of renewable energy, and reduced demand – has contributed to a sharp decline in U.S. oil imports, a 10% reduction in U.S. carbon dioxide emissions, and economic growth. This course examines the changing U.S. energy landscape, energy security, U.S. climate policy, and the connection between these issues and our own lives. The conceptual framework is economics (but no prior economics is assumed), a powerful tool for understanding market failures and for designing government policies that are efficient, effective, and appropriate. The course starts by looking at our – your – energy and carbon footprint, how much it can change, and how it connects with broader issues of energy markets, energy security, and climate change. The course then dives into three current policy issues: biofuels, the mining of coal from public lands, and the regulation of CO₂ emissions from fossil-fuel fired power plants. In each case, critics complain that these policies are expensive, ineffective, and/or have unintended consequences, while others complain that they don't go far enough given the magnitude of the challenge posed by climate change, and we will evaluate these arguments.

Freshman Seminar 42N

From the Arab Spring to ISIS: National Security Challenges in the Mideast (124885)

Charles Freilich

2017 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The Middle East is home to many diverse peoples, with ancient and proud cultures, in varying stages of political and socio-economic development, often times in conflict. Now in a state of historic flux, the Arab Spring and subsequent regional tumult have transformed the Middle Eastern landscape, with great consequences for the national security strategies of the countries of the region. The primary source of the world's energy resources, the Middle East remains the locus of the terror-WMD-fundamentalist nexus, which poses a significant threat to regional and international security, as does the rise of ISIS. The course surveys the national security challenges facing the region's primary players (Egypt, Saudi Arabia, Iran, Iraq, Syria, Lebanon, Israel, the Palestinians, Jordan, and Turkey) and how the recent upheaval has affected them. Unlike many Middle East courses, which focus on US policy in the region, the course concentrates on the regional players' perceptions of the threats and opportunities they face and on the strategies they have adopted to deal with them. Students play the role of senior advisers to the actual regional leaders in power and write "real world" policy papers for them, from their perspective and given the strategic, political

and personal constraints they face. The course provides an essential vantage point for all those interested in gaining a deeper understanding of the region, especially those with an interest in "real world" international relations and national security.

Technology to Save the World (160206)

Latanya Sweeney

2017 Spring (4 Credits)

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Technology designers are the new policy makers. No one elected them and most people do not know their names, but the arbitrary decisions they make when producing the latest gadgets and online innovations dictate the code by which we conduct our daily lives and govern our countries. As technology progresses, every societal value and every state rule comes up for grabs and will likely be redefined by what technology enables or not. No one is thinking about how it all fits together or falls apart. This class is a hands-on lab exploration to reveal unusual and insightful ways technology is changing our world and what we, in our lab course, can do to shape that change.

Freshman Seminar 42U

The Laws of War and the War on Terrorism (125124)

Gregg Peeples

2016 Fall (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

The United States is currently engaged in a "Global War on Terrorism." How that war is prosecuted has been the subject of heated national and international debate. How do (or should) the "laws of war" regulate the conduct of the United States - its officers, soldiers, and agents? This seminar will explore the historical context for this debate. We will examine the development of the two central topics addressed by the Laws

of War: jus ad bellum, which outlines a set of legitimate justifications and circumstances for the use of armed force; and jus in bello, known as the Law of Armed Conflict, which relates to the conduct and duties of belligerent states (and their soldiers) during times of war. We will investigate how governments, militaries, non-governmental organizations, lawyers and scholars have interpreted these laws, paying particular attention to examples of military interventions and intra-state conflicts (such as civil wars and insurgencies). The seminar will also look into relevant U.S. law and institutions. Finally, drawing on this historical and legal background, seminar participants will engage in a series of informed discussions on how these laws, both international and domestic, have influenced the manner in which the U.S. has conducted military, intelligence, and anti-terrorism operations since 9/11.

Freshman Seminar 43C

Human Rights and the Global South (160211)

Jacqueline Bhabha

Caroline Elkins

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Human rights have become a global lingua franca, invoked by leaders and movements across the political, religious and cultural spectrum. Because they can come into conflict with each other, human rights can serve to justify wars (to combat terrorists), religious intolerance (to counter fundamentalists), gender discrimination (to support religious tenets), refusal of safe haven to refugees (to promote domestic human security). Despite over half a century of international law making and domestic enactment of human rights treaties, and despite a vibrant civil society that has embraced human rights principles world-wide, remedies for violations such as torture, rape, genocide, political or economic persecution, and crippling destitution, remain elusive. This dilemma is particularly clear in situations of forced migration, when vulnerable populations are separated from individuals and institutions that traditionally provide support. This seminar will focus on the Global South and address key issues in contemporary human rights theory and practice through the lens of displaced, disenfranchised, and threatened individuals and groups. Members of the seminar will first study the philosophical and political traditions that led to codification of human rights. The seminar will then cover the legal frameworks of contemporary international human rights and humanitarian law and examine how they affect some of the most egregious human rights violations of the current period. Case studies of pivotal controversies and decisions will be examined to explore such questions as who is a refugee or an internally displaced person (IDP), what is trafficking, when is deportation justified, what protections do civilians have in conflict settings, and what are major crimes of atrocity and war.

Freshman Seminar 43D

Christianity and Slavery in America, 1619-1865 (160213)

Catherine Brekus

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Most people today assume that Christianity and slavery are incompatible. For most of Christian history, however, the opposite was true. Christians not only owned slaves, but they argued that slavery was sanctioned by the Bible. This course will explore the relationship between Christianity and slavery in America from 1619, when the first slaves arrived in Virginia, to the Emancipation Proclamation in 1865. We will ask several questions. How did white Christians become convinced that slavery was sinful? Why did many slaves convert to Christianity, the religion of their oppressors? How did enslaved Christians make sense of their suffering? Students will read major historical interpretations of slavery, but they will particularly focus on primary documents, including proslavery tracts and sermons, abolitionist speeches, poems, and the personal religious narratives of enslaved men and women. We will also read parts of Harriet Beecher Stowe's *Uncle Tom's Cabin*, one of the most controversial novels ever published in the United States. In addition to discussing the readings during class meetings, we will listen to spirituals and analyze paintings, photos, and other objects (for example, abolitionist tokens). In addition to our regular class meetings, we will take a guided walking tour of Boston's Black Heritage Trail. The tour will include an exploration of the African Meeting House.

Freshman Seminar 43F

When Bad Things Happen Early in Life: the Effects of Early Adversity on Brain and Behavioral Develop (160221)

Charles Nelson

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Decades of research tell us that the foundations of healthy development are built early in life. Genes provide the basic blueprint for brain architecture, but experiences shape the activity of the genome and thus determine how the circuitry is wired. Significant adversity can derail developmental processes and distort brain maturation, leading to limited economic and social mobility. Exposure to significant adversity early in life, particularly during critical periods of brain development, may increase risk for a host of chronic physical health problems, including cardiovascular disease, hypertension, diabetes, and addictive behavior; it can also lead to a variety of mental health problems, including depression and anxiety and characterological problems. Science clearly indicates that the longer we wait to intervene on behalf of such children, the more difficult it becomes to achieve healthy outcomes. This constraint is particularly true for children who sustain the wear and tear of early exposure to so-called "toxic stress". In this seminar we will critically examine the range of adverse early experiences that impact children growing up in both low and

high resource countries. Key themes include a) the nature of the adversity children are exposed to, b) the timing of the adversity c) the chronicity of the adversity, and d) individual differences (including genetic and environmental factors that may confer protection on children exposed to early adversity). We will pay particular attention to the short- and long-term outcomes on physical, neurological and psychological health.

Freshman Seminar 43H

White Collar Blues?: Work in the Age of Flexible Capitalism (160231)

Rachel Meyer

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Does flexible work lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? This course will examine the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory, and we will critically engage in the debate about the social and personal consequences of such "flexible" labor. We will investigate what flexibility means in a variety of economic sectors and occupations, exploring the experience of work in the contemporary political economy with an eye toward both its liberating and oppressive potential. How do different forms of work affect our personalities, life circumstances, and connections to each other? What is meaningful work? Our approach will be rooted in the crucial question of workers' control over their own labor and we will explore this through case studies. What does flexibility mean for tech workers in Silicon Valley and bankers on Wall Street? Throughout the course we will pay particular attention to occupations where social class is ambiguous or problematic, leading us to the question: what does it mean to be a worker versus a professional? In examining the labor process under modern capitalism we will focus on both its structural aspects as well as on culture, ideology, and identity. And we will examine how the workplace intersects with gender, the family, and one's experience outside of the factory gate or office cubicle. We will read prominent social theorists along with a variety of ethnographic accounts which in different ways seek to elucidate the conditions of work under modern capitalism.

Freshman Seminar 43M

Psychology of Religion (125718)

2016 Fall (4 Credits)

Schedule:

M 0330 PM - 0529 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

This course will address some of the fundamental questions about the nature of the self, issues which appear at the intersection of religion and psychology: Where do we turn, if anywhere, for ultimate meaning? What happens when individuals undergo some sort of crisis and radically change their belief system or how they engage with the world? How do we face death? An underlying assumption of the course is that no individual or society can thrive without resting on a fundamental value system or symbol-system which provides some kind of orientation to the cosmos. The course will therefore explicitly address the ways in which both individuals and cultures create frameworks of meaning—religion being a basic one for many—and the limits of those frameworks. The course will also explore the complexities raised by those who might not be able to create such systems of meaning for themselves (such as those with certain mental illnesses) and those of might be unwilling or unable to abide by or live within culturally established norms. The readings explore philosophical, psychological, and literary perspectives on these questions and issues and will include works by Freud, Dostoevsky, William James, Flannery O'Connor, Malcolm X, and others.

Freshman Seminar 44G

Public Policy Approaches to Global Climate Change (115417)

Richard Cooper

2017 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

14

After a review of what is currently known about greenhouse gas emissions' possible impact on climate and of how such knowledge is acquired, the seminar will explore the possible impact of climate change on social and economic conditions over the next century. Participants will investigate possible public policy responses to these developments, including actions both to adapt to and to mitigate climate change. What would be the costs of adaptation? Would an investment in mitigating the changes be worthwhile? The seminar will also address the requirements and possibilities for international cooperation in dealing with the problem of global climate change, the solution to which transcends national boundaries and competence. Throughout, the seminar will emphasize the analysis of complex problems in public policy. Members of the seminar will be exposed to concepts of cost-benefit analysis and considerations of uncertainty in decision-making. The seminar will rely on student research.

Health and Mental Health in Everyday Life (128123)

Mary Ruggie

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Why do students feel ill before an exam? Why do women seem to suffer more than men from depression and eating disorders, whereas men use and abuse substances more than women? Why do some race/ethnic groups have better or worse health and mental health outcomes than others? These are some of the questions this course addresses. Using interdisciplinary perspectives we will investigate how such social and personal characteristics as gender, race/ethnicity, family background, and self-esteem impact health and mental health behaviors and outcomes. We will also examine how specific configurations of circumstances and contexts contribute to health and mental health problems. For instance, college students, regardless of gender, race/ethnicity, etc., are increasingly experiencing stress and turning to amphetamines at higher rates than young adults who are not in college. One goal in these classes will be to explore causes and consequences. Another will be to understand the role of individuals themselves, their personal and social support networks, and health care professionals in developing and guiding positive strategies for coping and healing. Throughout, we traverse the boundary between health and illness in order to understand the complex web of factors that create and jeopardize well-being. Students will present analyses of the readings in class and write short papers based on class readings and discussions, as well as additional research. Students will also give two brief presentations: a team project and a representation of health and/or mental health in the arts.

The Holocaust in History, Literature, and Film (119999)

Kevin Madigan

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce freshmen to the use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. Here the seminar will use literary and cinematic resources as well as discursive theological ones. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude with an assessment of the role played by the Holocaust in today's world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

Measurements of the Mind: The Creation and Critique of the Psychological Test (121907)

Marla Eby

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar will introduce students to the history of psychological tests, both from the point of view of the psychologists using them and the people tested. We will examine the creativity within psychology in the making of such tests, as well as the drawbacks and dangers of the (mis)uses of these instruments. The

seminar will explore tests in current use, as well as tests contained in various Harvard archives of psychological tests. We will discuss the issue of how psychological tests are perceived by and presented to the public, paying particular attention to recent museum exhibitions and films in this area. Students will also engage in a project of designing their own psychological tests.

Freshman Seminar 50C

The Art, Science and Technology of Glass (202997)

David Clarke

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Glass is ubiquitous in our daily lives so it may be easy to forget what a remarkable material it is. It allows the passage of light and yet sequesters heat. Able to be colored and shaped, glass has been used for millennia as an aesthetic medium, whether in jewelry, stained glass windows, such as in Memorial Hall, and in the modern glass sculpture of artists such as Dale Chihuly. Glass has transformed the way we can view the world, through microscopes, telescopes or eye-glasses. Glass formed into fibers serves as the basis for modern telecommunications and glass can play a role in solar energy engineering. At a larger scale, glass is now also a substance for architectural expression. Glass is a material for all ages and all seasons, a material that can be plastic as well as brittle, a material that can be manufactured at the nanoscale and yet cast in sheets. Using a combination of readings, experimental exploration and discovery, students will have the opportunity to learn why glass is so unusual and how it has profoundly changed Society in many ways. The basis for many of its unusual properties, as well as its ability to be formed into complex shapes, will be illustrated by experimenting on the origins of color, the dichotomy between its plasticity and brittleness, its optical properties as well as its crystallization behavior. Many of these experiments also illustrate some of the essential elements of modern materials science and engineering. Each class will include readings describing the historical, artistic or scientific basis for the individual topics. Students will also undertake a research project culminating in a final, preferably video presentation.

"Where are you from?" Ancestry in the age of genomics (202998)

David Haig

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

A human interest in ancestry and kinship is found in most cultures. This interest is not a construct of the modern age, but recent advances in genetics can now provide a wealth of previously unavailable information about our genetic descent. The seminar will discuss examples of what genetics can tell us about where we are from and address the kinds of questions genetics can answer and the kinds it cannot answer. What should we conclude when cultural tradition and genetics tell different stories? Are genetic answers relevant or irrelevant to competing cultural narratives of identity? Is the question "Where are you from?" an invitation to explore our common humanity amid diversity or is it a microaggression that constructs barriers between us?

The Science of Cats (202999)

Jonathan Losos

2016 Fall (4 Credits)

Schedule:

W 0230 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar will focus on how scientists are using state-of-the-art methods from the fields of evolutionary biology, ecology, behavior and molecular biology to understand *Felis catus*, the housecat. Questions we will examine include: From what species was the housecat derived and when and where did domestication occur? Is the housecat actually domesticated and, if so, how did that happen? Is the behavior of housecats a legacy of their evolutionary past or does it represent adaptation to living with humans? What effect do housecats and their feral relatives have on local ecosystems? What is the history of cat breeds and how are new ones developed? Is there anything useful to be learned by comparisons with—shudder—dogs? We will also consider the role of cats in art and human culture. We will approach all of these questions not only through readings, but also by field trips to museums and local cat events (film festivals, cat shows), laboratory genetic exercises sequencing cat DNA, and behavioral studies using kitty-cams.

Artificial and Natural Intelligence (203000)

2016 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

What is intelligence? An inquiry into the nature of intelligence can take different forms – philosophical, biological, mathematical or technological. In this Freshman Seminar, we will use machine intelligence (everything from voice recognizing smartphones to Jeopardy-playing computers) as a handle to think about natural intelligence (brains and behavior of animals). Although we will start with big, general questions, we will quickly move to concrete queries about brains and computers. This approach, rather than just starting with brains of animals, may be useful in framing more universal questions independent of the specific architecture of brains of animals. This Seminar targets students that are interested in brains and computers in equal measure, and are comfortable with analytical thinking (logic, math etc).

Where Do We Come From? What Are We? Where Are We Going? (203083)

John Huth

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

This seminar explores the human sense of 'place' in spatial, personal, and social contexts. Starting from considerations from the neurosciences and cognitive psychology, we first examine local space: how we orient ourselves where the universe is a plane dividing land and the sea from the sky. The correlation of spatial and social consciousness is explored – how the language of spatial orientation becomes a metaphor for social structure and how people lead their lives. The metaphor of journey as life has a neurological basis. We examine conceptions of the sky and earth in a number of cultures, including cosmographies. As a turning point, we examine Dante Alighieri's Paradiso as a window into the concept of the universe in Medieval Europe. Beyond this we examine the emergent view of the solar system, and the concept that physical nature on earth is the same as in the sky (Newton). Since Newton, astronomy and physics have combined to create an expanding vision of space and time that stretches the human capacities to envision the universe. We look at how Einstein's special relativity mixed space and time, and the emergence of the cosmological principle in an expanding universe. We survey the current knowledge of the structure of the universe, including the possibilities of multiple universes and what that might imply. Coming full circle, we explore whether scientific constructs in quantum mechanics and the cosmological principle can also be employed as meaningful social metaphors.

Freshman Seminar 50H

The Biology of Movement (203243)

Andrew Biewener

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Movement is a fundamental property of life that underlies many biological functions, ranging from collecting or catching food, predator escape, dispersal of offspring, mating and reproduction, to migration, social interaction, sport, and artistic expression. This seminar will explore why and how organisms move, providing an overview of the biological motors animals and microbes use to power movement, and mechanisms plant use for growth and geo-/photo-taxis. The seminar will survey historical photographic and modern filming approaches; examine how movement is depicted in art and evoked in dance; how movement shapes perception and cognitive interpretation; and how and why movement plays a central role health and disease. The broader relevance of movement to the humanities and social sciences will therefore be examined. Students will be introduced to a variety of filming methods, allowing them to explore how movement is studied, and will learn how to quantify movement patterns to inquire and gain insight into their functional significance. Students will actively participate by video-recording observed movements of interest, exploring their functional relevance to terrestrial locomotion, swimming, flying, dance, athletics, and cognition as well as plant movement. This seminar will include 'field trips' to Harvard Museums and Libraries, a dance studio and the Concord Field Station. Students will read general articles and share weekly video recordings throughout the term. Students will complete a course project based on a video-kinematic analysis of movement highlighting its biological, social and/or artistic significance; or by writing a final paper that examines in-depth some aspect of the biology of movement.

Freshman Seminar 50I

The Temporal Universe (203269)

Jonathan Grindlay

2017 Spring (4 Credits)

Schedule:

T 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The Universe is not static, but rather stars and entire galaxies are evolving as revealed by their variability on timescales ranging from gigayears for galaxies to milliseconds for collapsed stars (neutron stars and black holes). In this seminar we shall explore stars and galaxies through variability – from how brightness variability of stars with binary companions measured with small telescopes measures star masses and radii, to the extremes of variability of stars that undergo repeated huge flares, to enormously luminous variations from accretion onto gargantuan black holes in the nuclei of "Active Galaxies" (Blazars and Quasars). We shall use the Clay Telescope on the Science Center roof to make some repeated observations (from the 8th floor Astronomy Lab) of an example of each of these two types of variable stars and deduce

what life would be like if either were our Sun. From a Blazar, we shall observe historical outbursts that occasionally change brightness to exceed its host galaxy by a factor of ~100, by using the digitized brightness measures of this object on thousands of glass plate images taken by Harvard telescopes from 1885 – 1992 and now digitized and on line from our Digital Access to a Sky Century @ Harvard (DASCH) project. The seminar will include readings from an introductory Astronomy text as well as both popular and journal articles and the short book Black Hole (Bartusiak). Students will use astronomical software to measure stellar brightness and variability from telescope images as well as learn temporal analysis techniques with applications to other disciplines. Students discuss in class readings and observations conducted and write short papers on their observations and deductions.

Course Notes: This seminar is open to all but may be of particular interest to those considering Physical Science or Engineering concentrations.

Freshman Seminar 50J

The Exceptional Primate: Debating Key Questions in Human Origins (203396)

Manuel Dominguez-Rodrigo

2016 Fall (4 Credits)

Schedule: M 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

What does it mean to be human? Do we understand "humanity" from traits we share with other animals, or by examining what separates us from them? What constitutes a "human" body, brain, or behavior, and how are these aspects of ourselves the products of long-term adaptation? The origins of humanity can be studied from several interrelated perspectives: biological, behavioral and adaptive. In this freshman seminar, we will explore how these three perspectives can be integrated to better understand our origins and to address the "big questions" that drive research on our evolutionary history. Each course meeting will focus on one aspect of humans as unique primates, for example our physical movements, eating patterns, or social behaviors. Through readings, discussions, and hands-on learning, including visits to the Peabody Museum collections, we will examine the roots of our uniqueness. We will rigorously examine and critique the scientific evidence for six million years of human origins, including fossil, genetic, and archaeological data. At the same time we consider evidence that some traits that are not, as commonly supposed, unique to humans, but rather are shared with other primates. Discussion of "exceptionally human" features will not be limited to the past, but will also take students into the present, for example by critically examining the ways in which our modern skeleton, our digestive system and contemporary health conditions, our diverse physical appearances, our choices of intimate partners, and our tendencies toward violence or peacemaking have been shaped by long-term evolutionary processes.

Freshman Seminar 50K

Neurofashion (203398)

Kevin K. Parker

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

How does the way our brain is encoded to process visual signals influence the clothes we like? Some classic fashions, such as the Little Black Dress and the tuxedo seem timeless. A close examination of these fashions suggest that in some form, they have transcended time and culture. If they are conserved in this manner, it suggest that there may be some biological reason why these fashions are so universally appealing. This seminar will examine fashion and visual signal processing in the human in an effort to understand if the structure-function relationships in the brain effectively 'hard wire' us to prefer some clothing. We will cast a broad net from the design of fashions, their manufacture, the influences of culture, and neuroscience in an attempt to understand the fundamental laws of fashion.

Freshman Seminar 50L

Quantum Entanglement (203399)

Subir Sachdev

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Quantum mechanics was discovered in the early 20th century in experiments involving single electrons and photons, such as the emission and absorption of light by a gas of hydrogen atoms. The quantum theory introduced a revolutionary new perspective on the nature of physical reality, replacing the powerful classical paradigms of Newtonian mechanics. Indeed, some of the most remarkable implications of the quantum theory have only become clear in the past few decades, and it is likely that more surprises will appear in the future. The fundamental new idea introduced by quantum theory is that of "superposition". This has no counterpart in Newtonian mechanics, and allows a particle (an electron, or even atoms and molecules) to be in a superposition of states at two or more distinct locations. When extended to multi-particle systems, a corollary of superposition is that of "entanglement": this allows measurements of two or more particles to be correlated with each other even though they may be separated by large distances. The objective of the seminar will be described how entanglement can be used as a resource to perform tasks that are not possible classically. We will begin by discussing the basic structure of quantum mechanics using the concept of a "qubit". The simplest protocols for quantum cryptography and quantum teleportation will be described, followed by an introduction to quantum computing and quantum error correction. Ideas on "anyons" will lead to a discussion of topologically protected quantum computing.

Recommended Prep:

A background in AP Physics would be helpful. Complex numbers and vector spaces will be employed, but a full course in linear algebra is not a prerequisite. The seminar will begin with discussion of the basic

needed axioms of linear algebra.

How Stuff Works (203400)

Richard McCullough

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The rise of electronics-based technology has completely revolutionized the world over the last thirty years giving rise to new ways to be entertained, to communicate, and to work. Advancements in electronics have been primarily based on the chemistry and physics of new and improved electronic, magnetic, and optical properties of the underlying materials. This course for non-scientists will focus on discussing and understanding how stuff works with a particular focus on electronic and optical devices. In addition, we will learn about how magnetic stuff works, where color comes from, about modern fabrics, and other topics that students would find interesting. The course will also have the students read, research, and discuss what future innovations and technologies might be possible. Students will be encouraged to be active participants in prognostication. Students will have to write a paper on a future technology or innovation that they predict will be commonplace in the future or on the topic of how XXXX works.

Course Notes: There are no prerequisites for this course and it does not require any scientific background and is open to all.

Requirements: Course open to Freshman Students Only

Freshman Seminar 50N

What Is the Internet, and What Will It Become? (203428)

Michael Smith

James Waldo

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The internet has become a central part of our everyday life, a conduit for commerce, and part of the connecting tissue of our social networks— from email to the World Wide Web to the way we get

entertainment, run video-conferences, shop, or find information. But what, exactly, is the Internet? Who runs it, how did it happen, and what is its future? How does it change our way of finding information, of working, or of seeing the world? What are the trends, in technology, policy, and law that will form the internet and, by extension, our lives going forward? This seminar will look at all these questions, and some others. We will start by looking at the history of the internet— how it happened, what design choices informed its construction, and how the various standards that define this network of networks were decided, adopted, and enforced. We will then look at various controversies that center on the current internet, including issues like who should govern it, what influence national laws should have on this seemingly borderless entity, and the role of encryption in communication, security, and privacy. We will then turn to some possible futures, and the implications of these futures on the way we live our networked lives. Will the internet change the way we work? The way we vote? The way we think? This course does not pre-suppose any knowledge of how the internet works or how it is governed. While there will be some discussion of the technical aspects of networking, computer hardware, and computer software, all that will be needed to understand the issues will be presented as part of the seminar.

Several times a day, you decide what to eat and drink. What happens to the food in your body; how is it turned into you and how has evolution shaped some of your choices? We alternate among popular nutrition literature, peer reviewed papers and discussion of data to unravel some of the complicated issues surrounding human nutrition. We will examine the published results from "The Biggest Loser" television program and explore the effects of alcohol on the body and brain. We will, of course, cook. The class will meet for three hours each week and attendance is mandatory. As a group, the class will plan a cooking and eating experience, and each student will present on at least one of the topics in the class.

Freshman Seminar 50Q

Gut Reactions: Discovering Chemistry from the Human Microbiota (203461)

2017 Spring (4 Credits)

Schedule:

T 0230 PM - 0529 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

The human gut is colonized by trillions of microorganisms that exert a profound influence on our health. Notably, the chemical capabilities of gut microbes extend beyond those found in our own cells, playing roles in nutrition, directing immune system development, and protecting against pathogens. However, we still do not understand how the vast majority of this microbial chemistry actually takes place, which stands in stark contrast to our knowledge of human physiology. The aim of this laboratory-based seminar is to expose students to a cutting-edge area of research at the interface of chemistry and microbiology. Over the course of a semester, students will work as a team to design and implement an experimental approach for discovering new enzymes from human gut microbes. Potential targets include enzymes involved in antibiotic resistance, metabolism of dietary components and pharmaceuticals, and modification of host metabolites. Students will pursue these goals in a fully equipped laboratory dedicated to undergraduate research. Course meetings will combine time in the lab with discussion of research literature and experimental techniques. Students will also have flexible access to the teaching laboratory to continue their experiments outside of the hours scheduled for the seminar. By having the opportunity to both explore a timely scientific problem and to drive the direction of their own research at a very early stage in their academic experience, students in this seminar will be extremely well prepared to seek out further undergraduate research opportunities and to pursue scientific career paths.

Freshman Seminar 60C

Comics and Graphic Novels (203001)

Stephanie Burt

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Comics and graphic novels, or sequential art, are one of the world's great storytelling media: we're going to learn how to read them, how to talk about how they get made and how they work, how to understand—and how to enjoy—some of the kinds of comics and graphic novels (that is, some of the genres) that make up the history of this medium in the modern English-speaking world. That history has three strands, which cross and re-cross, but which need to be understood independently, and we will see all three: short-form strip comics, designed for newspapers beginning in the 1890s and now flourishing on the Web; action-adventure and superhero comics, invented in the late 1930s, transformed in the 1960s and again in the 1980s, usually created by teams, and important to popular culture today; and a third strand beginning with "underground" or "alternative" comics or comix (with an x) in the 1960s and evolving into long form graphic novels, often created by single writer-artists, today. That history comes with visual references, which you will learn to recognize; comics also comes with its own set of theoretical terms, which you'll learn to use. Comics today share a medium (pictures and usually words in sequence) but belong to several genres: we'll learn how to talk about them, and how they've evolved. You'll get the chance to make comics, and to figure out how creators collaborate, advocate, distribute, and sometimes even earn a living from the comics they make, but the course will focus on existing comics, from McCay to Bechdel, from Kirby to Ms.

Marvel— as events in culture and as works of art.

Freshman Seminar 60D

Ireland Rising (203002)

Catherine McKenna

2016 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

2016 marks the centenary of the violent, short-lived rebellion of Irish nationalists against English rule that is known as the Easter Rising. Unpopular and ineffectual in itself, the Rising marked a turning point in Irish politics that ultimately led to the establishment of the Irish Free State in 1922 and the Republic of Ireland later on. As Nobel laureate William Butler Yeats wrote of "Easter 1916", "A terrible beauty is born." This seminar will concentrate on the development of a sense of "Irishness" in the fifty years or so leading up to the Easter Rising—in music, literature and the visual arts, in athletics, in language, in fascination with traditional Irish folklore—as well as on the politics of nationalism and the causes and consequences of violent rebellion. We'll find our way back into the 1916 moment and beyond, to the cultural revival that enabled it, by examining writers and storytellers of the period—including Yeats, Lady Gregory, Douglas Hyde and James Joyce—images and objects in the Harvard Art Museums, documentary films, hurling matches, music, and more. We'll discuss the pros and cons of violent revolution as the means by which a colonized people "summons her children to her flag and strikes for her freedom," to quote the Proclamation of the Irish Republic of April 24, 1916. And we will explore the range of cultural practices that defines a people and a nation.

Course Notes:

Attendance will be required at a performance of The Abbey Theatre of Ireland's production of *The Plough and The Stars* at the American Repertory Theater on Weds, September 28th. There will be no charge to the student.

Freshman Seminar 60F

Tell a Personal Story Through Sound (203003)

Hans Tutschku

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Through the creation of a personal sound story, students are invited to discover new forms of communication and relating ideas. Perception of sound, as well as creative use of sound will be at the core of our discussions. We will learn to shape sound in order to express a specific idea. Each student will write a personal short story as a script. Those stories don't focus on the visual aspects of things, but should describe their sounding scene with adjectives particularly spelling out the sounding environment and qualities. There are no prerequisites in music. An open-minded, creative and curious attitude is expected. We will listen to the weekly assignments in class and develop a specific form of group critique. The final sound story compositions will be presented in a public listening session. Each student is required to bring his/her laptop and headphones to class. We will use the software, Reaper, for editing and a cheap but powerful sound editor, Twisted Wave for Macintosh.

Poetry as a Language Laboratory (203004)

Aleksandra Kremer

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Typical means of everyday communication, such as speaking, writing, or printing, can be taken to extremes in poetry. In our seminar we will explore such cases. We will measure voices of poets performing their texts, view electronic archives of poetry, examine untypical artists' publications, attend a poetry reading, study barely legible texts, listen to sound poetry, and look at visual poems. We will confront these poetic experiments with scholarly texts from such disciplines as acoustic phonetics, sound studies, neuroscience, bibliography, literary studies, or graphic design. Ultimately, we will ask if artistic texts may contribute to our knowledge about writing, reading, hearing, speaking, or publishing. In other words: can poets anticipate, modify, or inform academic research? We will study poems from different times and regions, with a special emphasis on the twentieth-century European and American literature. We will discuss historical pattern poetry, contemporary artists' books, Dadaist poetic performances, French sound poetry, German concrete poetry, Pre-Raphaelite poems for pictures, as well as recordings of Eliot, Wat, Miłosz, and Brodsky. We will find these works in the collections of Harvard libraries, and in diverse internet visual and sound archives. We will ask about the limitations and benefits of the use of digital tools in humanities. On one evening we will participate in a poetry reading in Cambridge.

Faith and Fiction in American History (203005)

David Holland

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Moving chronologically from the the early national period to the turn of the twenty-first century, this course uses key literary works to examine the religious history of the United States. Wrestling with questions of deism, Calvinism, revivalism, race, gender, secularization and much more, we bore into the faith-inflected cultures of American history through the imagined narratives of some of its most celebrated writers, including the likes of Susanna Rowson, Harriet Beecher Stowe, James Baldwin, Rudolfo Anaya, Pearl Abraham and Marilynne Robinson. I will offer mini-lectures to contextualize these works in their historical moment. We will read a pair of scholarly works to give us some theoretical tools of analysis. But mostly we will read and talk about the novels themselves.

Freshman Seminar 60I

The Adventures of Theodore Roosevelt (203242)

Michael Canfield

2017 Spring (4 Credits)

Schedule:

R 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

At heart, Theodore Roosevelt was an adventurer. At regular intervals throughout his life he went to the field as a naturalist, hunter, rancher, soldier, conservationist, and president. He chased grizzly bears and outlaws in the American West. He tracked lion and elephant in Africa. As a Harvard student, he followed birds in the Adirondacks to provide data for his first publication. Using Roosevelt's original diaries, journals, and notebooks that are housed in Houghton Library, this seminar encourages students to explore Roosevelt's adventures through original documents, and to understand how narratives about his life have been created from them. Some topics will focus our attention far afield in South America, in Africa, and in the Caribbean. Others times Roosevelt's field notes will reveal rambles much closer to our meeting place in Houghton, such as his trips to Concord, and his time at his boarding house on Winthrop Street and at the Museum of Comparative Zoology. For the final project in the course, students will examine a one-week period in Roosevelt's life when an adventure took place. They will collect a portfolio of primary documents that will then support an analytical paper that illuminates the historical context of that week. The course will meet in Houghton Library, and the Curator of the Theodore Roosevelt Collection, Heather Cole, will be a regular participant in the activities of the course.

Musical Jokes from the Middle Ages to the Present Day (203244)

Suzannah Clark

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

How good is music at telling jokes? What kinds of jokes and related forms of humor does music have at its disposal? How can we tell when music is joking? What do listeners need to know in order to get the jokes? In the first few weeks of the course, we will lay some foundations through the study of definitions of verbal jokes and prevailing philosophical, psychological, and anthropological theories of why humans tell and appreciate jokes. We will test out these definitions and theories on *viola* jokes before turning our attention to music. Our musical examples will span the history of Western music from roughly the late 12th century to the present day in order to investigate which kinds of musical jokes are timeless and which ones are bound to their stylistic, historical, social, political, and cultural contexts. Along the way, we will encounter music's full range of humor, including some splendid pranks played on performers and audiences; clever send-ups; examples of stinging satire of the church and religion; musical barbs aimed at incompetent composers; critiques of social class, and not least jokes about classical music itself. One might imagine that a prerequisite for this class is a keen sense of humor. However, perhaps more relevant is a desire to discover what insights may be gained from studying music through the lens of its humorous utterances.

Freshman Seminar 60K

The Grail Quest of Marcel Proust (203268)

Virginie Greene

2017 Spring (4 Credits)

Schedule:

R 0200 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

We will read Chrétien de Troyes' *Tale of the Grail*, the most ancient known Grail story (c. 1190) and large excerpts of Marcel Proust's *In Search of Lost Time*, which I propose to read as a grail quest, involving a young ignorant hero discovering the world and seeking something else than money, fame, and love (but also money, fame and love). Through comparing a medieval and a modern text we will reflect on the passing of time, modernity and memory, reality and fiction, romance and novel. We will focus on the visual aspects of both stories, whose heroes share a contemplative/voyeuristic temper. The *Tale of the Grail* has generated an immense corpus of images from thirteenth century illuminated manuscripts to the 1895 Edwin

Austin Abbey wall paintings at the Boston Public Library and Grail films (1975 Monty Python Holy Grail, 1981 Raiders of the Lost Ark, etc.). In Search of Lost Time has been called a "cathedral work," that is, like a gothic cathedral, a space of eclectic visions. Real and fictional paintings illuminate the novel like a medieval manuscript. No previous knowledge of the Middle Ages, Proust or French is necessary. All members of the seminar will be invited to share their experiences of reading, viewing, and writing. Texts will be available in English and French. The seminar will follow the model of a quest: each class will be held in a different location (Harvard house, museum, garden, etc.) in the Boston area. All locations will be wheelchair accessible and reachable by public transportation.

Freshman Seminar 60L

Thinking about the Unthinkable: From the Eighteenth Century Cult of Feeling to the Holocaust (203267)

Rita Goldberg

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course is about remembering, responding to and reflecting about experiences that we describe as unspeakable or unthinkable, yet that somehow must be expressed in language, because language of one kind or another is all we have. We'll explore some literary moments centered largely on young people in bad situations, starting in the mid-eighteenth century, when writers became obsessed with the feeling response as a measure of virtue (often manifested in tears), and continuing with readings of Blake and Dickens. In the second half of the course, we'll turn to memory, as expressed in the form of the memoir. We'll start with two memoirs of slavery by Frederick Douglass and Harriet Jacobs. We will spend another few weeks on memoirs of the Holocaust by people who were children in those years, and we'll look at Freud and other more recent writers on trauma and memory. Students will be expected to participate actively in the seminar, to write a page or two weekly on the readings, and to be responsible for opening one week of discussion. There will be a short concluding paper. It will not be all darkness and gloom. Hovering over the course is the spirit of Anne Frank and the sense that even in these darkest of narratives, the flame of life can continue to burn, and that words can recover their power, especially for the young.

Freshman Seminar 60M

The Poetry of Elizabeth Bishop and Sylvia Plath (203247)

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar studies in detail the poetry and prose of two of the most significant American poets of the mid- to late Twentieth Century, Elizabeth Bishop and Sylvia Plath. While the intention will be to gain some general knowledge of lyric poetry, readings will focus closely on the works of these two quite different poets. We shall examine their entire poetic oeuvres while also reading selections of their prose writings (fiction, letters). Issues of self-presentation, expatriation, loss, vocation, memory, gender and sexuality, as well as techniques of description and expression – these will recur throughout the readings. Other poets may be added for context. While acknowledging the differences between the principal poets (for example the oblique self-portraiture of Bishop as opposed to the more direct "confessional" style of Plath), we shall also seek common motifs both in their situations as writers and in their achieved poems.

Lawrence of Arabia: His Life, Literature, and Legacy (203276)

Charles Stang

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

During the First World War, a young British officer by the name of T.E. Lawrence helped lead an Arab Revolt against the Ottoman Empire, a war and a revolt that determined the shape of the modern Middle East, for good or for ill. After the war, Lawrence became famous in the West—the war's first celebrity, "Lawrence of Arabia." However, the long memoir he wrote shortly thereafter, *Seven Pillars of Wisdom*, was hardly celebratory. On the contrary, it is a tortured confession of the triumph and tragedy of the revolt: what "waking dreams" were had, and how they were dashed. Into that narrative Lawrence weaves captivating meditations—philosophical, psychological, and religious. This course will look closely at Lawrence's life, literature, and legacy, through his own writings, and writings (and films) about him. We will endeavor to get past the myth, and to the man; past his part (however over or underrated) in geopolitics, and to his peculiar and ambivalent genius. To that end, we will also attend to his life after the war, when he sought anonymity in the ranks of the Royal Air Force, devoted himself to new writing projects (including a translation of Homer's *Odyssey*), and his fatal love affair with speed—which led to his untimely death in a motorcycle accident in 1935.

Unhappily Ever After: Love's Unhappy Endings, a la Francaise (203270)

Annabel Kim

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

From *Pépé le Pew* to Robert Doisneau's iconic photograph of a couple kissing by Paris's *Hotél de Ville* (City Hall), the French have a privileged relationship to love and romance that few countries can rival: French is the language of love, Paris is the city of light and lovers, seduction is a French art, etc. And yet, for a culture that is so love-centric, the French love story rarely ends well. Indeed, French literature could be described as an enormous lonely hearts club, with one story of love and loss after another. In this seminar, we will retrace the long and venerable history of broken hearts, from the Middle Ages to today, and as we move from one ruined life to the next, we will be able to unpack such weighty and historically-contingent concepts as love, desire, morality, sexuality, gender, race, class, and how they transform and are transformed by writing. Authors read will include Madame de la Fayette, George Sand, Gustave Flaubert, Marcel Proust, and Marguerite Duras, among others.

Freshman Seminar 60Q Section: 1

In Search of Roman Myth (203434)

Jared Hudson

2016 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Classical Mythology has traditionally been identified with Greek mythology: mythos, that fundamentally Greek concept, is after all a Greek word. Although countless other non-Greek traditions of "myth" have been documented and studied by scholars (Maya Myth, Celtic Myth, Maori Myth, etc.), the primary role played by Romans in the area of mythology has been seen as borrowers, and as preservers—of Greek myth. Early modern scholars of Roman culture offered various explanations for this awkward gap: perhaps, being a more practical, less imaginative culture than their Greek neighbors, the Romans really never had a mythology of their own; or else, when faced with the older and more sophisticated mythological system of the Greeks, they simply adopted it, and promptly forgot their own. This seminar will take as its working assumption the simple idea that there was such a thing as Roman myth, distinct from that of the Greeks: traditional—ultimately authorless—"Roman" stories that Romans told themselves about their culture and their city. To take just a few of the more familiar examples, stories such as those of Romulus and Remus, Lucretia, Cincinnatus, Virginia, were used by Romans, from a very early period, as vital narrative tools for thinking with, for articulating their most pressing cultural values and concerns. Participants in the seminar will use textual (as well as material) detective work to piece together and interpret the scattered and often puzzling remains of these traditional tales in Roman (and Greek) literature.

Course Notes: All readings are in translation. The course will include visits to both the Harvard Art Museums and the Museum of Fine Arts in Boston.

The Beginnings Of Business (203501)

Gojko Barjamovic

Eugene Soltes

2017 Spring (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Business as a way of life has existed for thousands of years. In *The Beginnings of Business* we explore where many of the practices that we tend to take for granted today come from. What are the origins of money? What causes trade to occur and thrive? How has trust been built, and what are the ways in which people have sought to cheat (and avoid being cheated)? We'll investigate these questions through the lens of multiple disciplines—archaeological and textual evidence from the ancient world, economics, history, and anthropology. By understanding what was needed to create businesses in the past, we'll be able to understand modern limitations that exist in the world today.

Death: Its Nature and Significance (203486)

Jeffrey Behrends

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Here's a hard truth: You are going to die. That's nothing against you, of course. I'm going to die, too, and so is everyone else - it's just the way of things for creatures like us. Yet, despite the central role that death plays in our existence, it seems to remain deeply mysterious in a number of ways. It is difficult even to say precisely what death is—is it a mere biological phenomenon? If so, is there any sense to be made of the idea that I might continue to exist after my death, perhaps as a soul? Or is death instead final, in the sense that it causes me to cease existing altogether? Beyond these kinds of questions about death's nature, there

are also questions about death's significance or value: Is death bad for the person who dies? If they go out of existence, how could it be bad - things can't be good or bad for us if we don't exist, it seems! Is it better to die at a certain age or time than some other? What should I think about my future death - should I fear it? Would it be better for us if we were immortal? In this class, we'll examine important philosophical work that responds to each of these questions, and more.

Freshman Seminar 60T

Harvard Poets (203345)

Elisa New

2016 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The first 1/3 of course will include close readings, video tours and on-foot excursions around 17th and 18th 19th century Harvard Square as we read Ann Bradstreet, Edward Taylor, Michael Wigglesworth, Phillis Wheatley, Henry Wadsworth Longfellow, James Russell Lowell, Maria White Lowell and Ralph Waldo Emerson . In this part of the course we will practice a range of approaches to reading poems, considering a poem's form alongside its cultural function, surveying the diverse and changing media and formats in which poems circulate--manuscript, performance, print, aural recording, performance; individual volume, general circulation magazine or newspaper, literary quarterly, schoolbook, gift book, psalter and more. Excursions may include visits to First Parish or Memorial Church, to Mt Auburn Cemetery and the Washington's Headquarters and the Longfellow House. In the second 2/3 of the course we will focus on 20th century Harvard and its writers , with particular attention to 4 Harvard inflected moments in American literary history—the emergence of Modernism (with attention to Robinson, Du Bois, Frost, Reed, Stevens, Cullen); the rise of the New Criticism in the 1950's (its standard bearers Eliot and Lowell); the critique of New Criticism and rise of counter movements, New York School, Black Mountain, Beat Language, L=A=N=G=U=A=G=E (from O'Hara, Ashbery, Koch, Creeley to Hejinian, Bernstein, Howe) ; and, finally, Harvard and Radcliffe's role in fostering poets from Gertrude Stein, Elizabeth Bishop through June Jordan and Adrienne Rich. Our 20th century studies will take us to the Woodberry Poetry Room, to Houghton and Schlesinger libraries, and students in the seminar will make their own contribution to Harvard's long poetic tradition by filming individual and group readings and interpretations of American poems for inclusion in the Poetry in America MOOC and other online outlets.

Freshman Seminar 60U

One Hundred Years of Labor: Literature, Cinema, and Political Thought since the Russian Revolution (203346)

Michael Kunichika

2017 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The year 2017 will mark the centennial of the Russian Revolution. The century that lay between these two years of 1917 and 2017 can be approached in many ways, focusing on the rise and fall of the Soviet Union; the confrontation of liberalism, communism and fascism in World War Two; the competition between the Soviet Union and America throughout the Cold War; or spread (and crises) of global capitalism. The thread we will follow throughout this course is to think of the past century in terms of the story, or better, stories of labor and the forms by which labor has been represented with a diverse array of media. We will examine how labor and work have been represented in primarily Russian and Soviet literature and film, while drawing comparisons from American and European cultural sources. We will consider both the Revolution as a historical phenomenon, examining central texts in which its ambitions and significance were contested, and then consider chapters in the on-going career of labor from the 1920s to the present-day. We examine the seminal statements of Marx, Lenin, and Trotsky; the groundbreaking films of Dziga Vertov and Sergei Eisenstein; and the enduring literary works of Andrei Platonov and Alexander Solzhenitsyn among others. Alongside the Russian texts, we will read or screen works by John Steinbeck, Charlie Chaplin, Fritz Lang, and Eugene O'Neil. Throughout, we will be guided by several questions and concerns: how does a particular work represent labor and conceive its value? What is the nature of work? How is intellectual labor understood in relation to others forms of labor? How are bodies configured by different labor processes? And, lastly, what might this history tell us about the present state and challenge of labor and social inequity at the centennial of the Revolution?

Freshman Seminar 60V

The Moral Compass (203401)

Anat Schechtman

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What determines the moral values and principles that orient and guide the lives of individuals and societies—the "moral compass" we use to navigate through the thickets of decision and indecision? What is this compass, and where does it come from? Is it God-given? Or, rather, is it the product of culture and society? Or is it perhaps a matter of our genes, an evolutionarily-determined instinct? Or, instead, is it the province of Reason, discoverable through the rational intellect (possibly by analogy to logic or mathematics)? Further, we might ask, is there just one compass, or maybe several legitimate ones, which can sometimes point in different and even incompatible directions? This course will explore a range of candidates for the moral compass or compasses. The aim is to better understand these candidates, by reflecting on a number of attempts to develop and defend—or, in some cases, criticize and reject—a particular moral compass. We will read and discuss authors ranging from antiquity to the present day,

including Aristotle, David Hume, Immanuel Kant, Friedrich Nietzsche, and Hannah Arendt, and examine how their ideas are reflected in works of art and reportage. A primary aim of the class will be to learn how to analyze, evaluate, and construct a philosophical argument, both in writing and in oral conversation. Another aim is to gain acquaintance with key figures and texts in the history of Western philosophy. A third aim is to practice adopting a reflective stance towards one's own moral compass and its philosophical underpinnings.

Slaps and Embraces: How to Read in a Minor(ity) Key (203402)

Doris Sommer

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Almost always, we learn to read literature and the world through a framework that assumes reader and writer will share a common language, with its particular references and values. Classical rhetoric encourages us to get to understanding or even agreement that outsiders are invited in through uses of language that we can or already do share. This equal grounding has morphed in modern times into a universalism among educated readers. It amounts to assuming that all people are fundamentally equal and therefore understandable to one another. The rhetorical devices and interpretive frames that we have inherited from the classics therefore seem adequate today too.

But minority writers, by definition, cannot assume continuity with the majority of readers and therefore the tropes, strategies, and styles developed in "mixed company" are significantly different from those we have learned to expect. These stylistic differences, which mark cultural distances, make ethnically marked writing distinctive. It often teases readers with promises of intimate unveiling and then turns the page onto a freshly felt distance. As Toni Morrison says about her own writing, "it slaps and embraces." We become better readers, and better citizens in an ever more culturally complex world, as we learn to recognize the clever moves that are not always meant to affirm an expectation of our mastery. Assignments include weekly response papers on readings and a final paper.

Freshman Seminar 60X

Visualizing the Divine in Ancient Polytheistic Civilizations: Divine Images and Their Worship (203403)

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

This seminar will focus on the modes of representing the divine in the ancient civilizations of Mesopotamia, Egypt, and India. Through the use of rich iconographic data and the relevant ancient texts (in English translation) the members of the seminar will study the ways in which the Mesopotamians, Egyptians, and Hindu conceived of the divine and represented it visually. We will begin by asking what is the meaning of "divine" and "deity" in a polytheistic religious system, and how, in particular, were these two concepts understood in Mesopotamia, Egypt and India; and what makes divine images special and unique, and how do they differ from other types of visual representations. We will then systematically study the ways of representing the divine in the three civilizations in question, and observe how divine images functioned in religious praxis. The seminar will finally consider the issue of iconoclasm as a recurring historical phenomenon: from the Biblical injunction against "graven images," through the early Christian and Islamic polemics against the use of divine representations, down to the destruction of the "idols" by the Taliban and ISIS in our own time.

Great Books of Judaism (203404)

David Stern

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

What makes a foundational religious book? How do the texts of these books develop, and what functions do they serve as material objects—physical books—in religious communities and traditions beyond conveying the texts they contain? This seminar will explore these questions by examining four "canonical" books of Judaism—the Babylonian Talmud; the Bible commentary of Rashi, the most famous Jewish commentator; the Prayerbook; and the Passover Haggadah—as they have developed from the ancient period until today. In the case of each book, the text will be studied historically—"excavated" for its sources and roots, and its subsequent development over the centuries—and holistically, as a canonical document in Jewish tradition. Class time will be devoted primarily to learning to read the primary sources in translation; supplementary secondary readings will provide historical and cultural context. The seminar will also include regular visits to Houghton Library to look at manuscripts, early printed editions, and facsimiles of these books in order to consider the relationship of materiality to textuality, and to study the changing shapes these books have taken as a key to understanding how they were studied and used. While each book will raise its own set of issues, we will repeatedly deal with three basic questions: What makes a "Jewish" text? How do these texts represent different aspects of Jewish identity? What can these books tell us about the canonical books of other religious traditions?

Course Notes:

No previous background in Jewish Studies or knowledge of Hebrew is required.

Freshman Seminar 60Z

Go Rococo! The Architecture of Mischief, Excess, and the Mess (203405)

Andrew Holder

2016 Fall (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

"Go Rococo" is a hybrid course that will combine the reading and writing typical of an architectural theory seminar with a design project. Analytical observations will be put into practice and students will learn by making. At the beginning of the 18th century, baroque architecture and art in Western Europe entered a new phase called the rococo, characterized by extreme visual complexity, ornamentation, and the collapse of compositional and political hierarchy. Architectural interiors became excessive and messy (or at least no longer classically ordered) during this period, filled almost to the point of overflowing with painting and sculpture, much of it depicting characters in mischievous and compromising postures. Coursework will be founded on two related propositions: first, that the architecture and art of the Rococo are remarkably similar to the visual and material culture of the present day; and second, that contemporary design stands to benefit from a close examination of its predecessor. Each week, students will examine a rococo building precedent, reading the architecture of the period against a series of texts on contemporary design theory. In addition, students will undertake a semester-long design project using Adobe Creative Cloud digital design tools to create and animate an architectural interior in the manner of the rococo. Regular class sessions will be supplemented by software tutorials and trips to the Houghton Library and Fogg Museum to encounter rococo artifacts in-person.

Course Notes:

Design skill, expensive software, and specialized computer hardware
ARE NOT REQUIRED. Absolute neophytes welcome.

Afro-Cuba: History, Culture and Conflict (203006)

Alejandro de la Fuente

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Ninety-five percent of the Africans transported to the Americas from the 16th century to the 19th century did not come to the United States, but went instead to Latin America and the Caribbean. African-based cultural forms are clearly visible in the religious, musical, dance, oral, and community practices of numerous countries in Latin America. Through complex processes of creolization, filtering, and incorporation, those cultural expressions have become icons of "national" cultures. From tango in Argentina to rumba in Cuba, from Brazilian Candomblé to Haitian Vodou, the Africans and their descendants have left indelible marks in the cultures of the region. How did this happen? How did the cultures of the enslaved Africans become national cultural symbols in Latin America? We explore these questions using the example of Cuba, which was, not counting Brazil, the last country to abolish slavery in the Americas (1886). The Afro-Cubans' struggles for recognition and equality are inseparable from the conflicts surrounding the creation of Cuba as an independent nation, from United States efforts to control the island for most of the 20th century, and from the Cuban revolution of 1959. This seminar explores how Africans and their descendants have shaped the formation of a national culture in Cuba and how their contributions have frequently met with resistance and opposition. The seminar covers from colonial times to the present, but emphasis is placed on the cultural production of postrevolutionary and contemporary Cuba, including recent developments in the visual arts, music (especially Hip-hop), and cinema.

One World, 1943: Or, How Americans Discovered the World (203007)

Erez Manela

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In late 1942, with World War II raging, US President Franklin D. Roosevelt sent his erstwhile opponent in the election of 1940, Wendell L. Willkie, on a trip around the world. Willkie's 1943 book about the trip, *One World*, sold millions of copies and topped bestseller lists for months. That book, since largely forgotten, will serve as the launching pad for our explorations. Following along with Willkie's itinerary, we will consider America's views and relations with the peoples of the "Global South", including Africa, the Middle East, and Asia. We will also probe the wartime vision of "One World", tracing its origins, contours, and legacies, grappling with its promise and problems, and assessing its profound implications for our own time.

Climate Change Economics: Analysis and Decisions (203008)

Martin Weitzman

2017 Spring (4 Credits)

Schedule:

R 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Climate change is one of the most difficult problems facing humanity. A small sample of questions to be asked and answers attempted in this seminar includes the following. How do we analyze and decide what to "do" about climate change? What are the basic "models" combining economics with climate science, what are these models telling us, and how do we choose among their varying messages? How are risk and uncertainty incorporated? How do we estimate future costs of carbon-light technologies? How do we quantify damages, including ecosystem damages? Who pays for what? Why are discounting and the choice of discount rate so critical to the analysis and what discount rate should we use? What is the "social cost of carbon" and how is it used? Which instruments (prices, quantities, standards, etc.) are available to control greenhouse gas emissions and what are the strengths and weaknesses of each? What is "climate sensitivity" and why is it, and the feedbacks it incorporates, so important? How should the possibility of catastrophic climate change be evaluated and incorporated? What are costs and benefits of geoengineering the planet to counter global warming? Why has climate change been characterized as "the biggest international market failure of all time" and how might the world resolve the associated free-rider problem?

Freshman Seminar 70F

Bioethics through Film: An Exploration of the Law and Ethics of Medicine (203009)

I. Cohen

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0414 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Should animals have the rights of persons? What about very sophisticated robots? Is it ethical to run clinical trials in the developing world for drugs that will be unaffordable there? How far should we go in genetic screening and attempts to eradicate certain disabilities in our children? Is it wrong to buy and sell organs? Should the state be allowed to use neuroscience in the courtroom to convict or exculpate? In this freshman seminar we will examine these and other contemporary issues in bioethics using film and television paired with readings from law, philosophy, medicine, and shot story. Possible films/topics include (but are not limited to): A.I. (speciesism and the boundaries of legal and ethical personhood); The Constant Gardener (research ethics and running experimental drug trials in sub-Saharan Africa); Gattaca (genetic privacy and enhancement); Dirty Pretty Things (commodification and markets for organs); Minority Report (free will and criminal responsibility); Never Let Me Go (the ethics of creating children with disabilities), the Surrogate (sex and disability); Eternal Sunshine of the Spotless Mind (pharmacological interventions and the medicalization of happiness). This Freshman Seminar is a good fit for students

interested in these topics and ready and willing to engage in discussions of hard questions and argue their positions. Some of the teaching will be Socratic (i.e., students will be called on to express their views to the class).

Freshman Seminar 70G

Entrepreneurship and Venture Capital in the Global Economy (203010)

Paul Gompers

2017 Spring (4 Credits)

Schedule:

R 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Entrepreneurial activity has been a potent source of innovation and job generation in the global economy. In the U.S., the majority of new jobs are generated by new entrepreneurial firms. Entrepreneurship has had many definitions over the past two and one half centuries since Richard Cantillon first used the term in the early 18th century. Some have focused on the risk-bearing nature of entrepreneurship, while others have focused on the innovations that entrepreneurs create. Both are important elements of what entrepreneurs do, but neither is a complete definition of entrepreneurship. This seminar will examine the role that entrepreneurship and venture capital plays in economic development and innovation. Academics and policy makers have long highlighted the critical role that these sectors play in promoting a dynamic economy and opportunities for sustained competitive advantage. In particular, venture capitalists have been the source of financing for most of the major technology leaders including Microsoft, Apple, Google, Amgen, and Facebook. Numerous countries have sought to grow their domestic venture capital industry. This seminar will explore the phenomenon through the lenses of economics, history, and psychology. Entrepreneurial and venture capital markets in the US, Israel, and China will be examined in depth through academic articles, books, and Harvard Business School case studies. In addition to traditional class sessions, the seminar will incorporate field trips to the Harvard Innovation Lab and startup companies.

Freshman Seminar 70H

Landmark Cases in American Constitutional History (203011)

Michael Klarman

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This freshman seminar will cover landmark Supreme Court decisions in American history: *Marbury v. Madison* (1803) (origins of judicial review); *Plessy v. Ferguson* (1896) (racial segregation in railroad transportation); *Korematsu v. United States* (1944) (Japanese-American internment); *Brown v. Board of Education* (1954) (school segregation); *Brown II* (1955) (Brown's remedial order); *Engel v. Vitale* (1962) (school prayer); *Reynolds v. Sims* (1964) (legislative malapportionment); *Miranda v. Arizona* (1966) (right against self-incrimination); *Furman v. Georgia* (1972) (death penalty); *Roe v. Wade* (1973) (abortion); *Bakke v. Board of Regents* (1978) (affirmative action); and *Obergefell v. Hodges* (2015) (gay marriage). Each session will discuss one case or one issue involving a couple of related cases. The seminar's aim is to elucidate how the Supreme Court functions as a political institution—that is, to see how the Court's decisions reflect the broader social and political context, and to consider the consequences of its rulings. The readings aim to present enough different angles from which to view the Court's rulings to enable discussion of how a particular issue—such as the death penalty—became a topic of social controversy and of constitutional law, why Justices' opinions were written as they were, and an evaluation of the decision's reasoning and its consequences. Readings for each session will average about two hours. In addition to discussing the readings, students will be required to write three papers reacting to the readings, each of about four or five pages. Students will be afforded some degree of choice in the weeks for which they write papers.

Freshman Seminar 70I

Contagion: Epidemics and Endemics from Black Death to Ebola (203012)

Ahmed Ragab

2016 Fall (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

For centuries, communicable diseases ravaged different communities causing massive mortality and morbidity. The death toll disrupted social organizations, destroyed families, and challenged medical thought and State authority. Physicians struggled to make sense of contagion, disease factors and treatment; State authorities were faced with demands to intervene, protect and support the sick, all while its own institutions were ravaged by diseases; social, religious and legal institutions were disrupted, stressed and tested time and again. In this course, we trace how epidemic and endemic diseases influenced medical practice and public and global health, and how they impacted social structures in different periods and regions. We ask about the meaning of contagion, and how physicians understood disease transmission before and after germ theory. We investigate the history of quarantines and isolations, and ask about stigma attached to diseases, and about race, gender and sexuality in the making of stigma. We also look at how colonialism impacted disease transmission and how colonial powers dealt with epidemic and endemic diseases. The course moves from Black Death in the fourteenth century to other plague epidemics in the eighteenth century, where debates on contagion in medicine became most heated. We study tropical diseases and discuss the Cholera epidemics of the nineteenth century to the much feared Tuberculosis. We then discuss vaccination and eradication as we analyze small pox, measles and polio ending with our most recent epidemics: HIV and Ebola. The course introduces students to history of medicine and history of epidemics as well as to discussions of epidemiology, medical practice and medicine in society.

Freshman Seminar 70J

Social Science and American Social Problems (203013)

Mary Waters

2016 Fall (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This course will examine nine major social problems facing the United States today—income inequality, political polarization, race, immigration, poverty, education, incarceration, work and family, and climate change. We will read leading social science books and articles that define the problems, discuss their causes and consequences, and propose solutions. We will focus on how social science research from the disciplines of sociology, political science, economics and psychology measure and track changes in these areas. Because there will be a presidential election occurring we will spend some time discussing how the candidates differ in positions on public policies addressing these problems, and how their platforms and positions use social science research. The class will collectively decide on three other problems we should learn about and three teams of four students each will prepare a presentation and paper on the topic. The final paper will take the form of a memo to the incoming new president.

Freshman Seminar 70K

Morality, Leadership, and Gray Area Decisions (203014)

Joseph Badaracco

2016 Fall (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Everyone with serious responsibilities, at work and throughout their lives, faces gray area decisions. In organizations, these highly uncertain, high stakes decisions are delegated upward, to men and women in leadership positions. They have to make final decisions on these problems, despite the gray, and these decisions test their competence and their humanity. This seminar offers a variety of important perspectives on gray area problems and on ways to resolve them, responsibly and effectively. The seminar begins by examining gray area problems in various professions and lines of work. Subsequent sessions focus on three different ways of resolving gray area problems – in terms of accountability, character, and action. A

typical session of the seminar will draw upon classic works of fiction, basic ideas in moral philosophy, and contemporary situations. These situations are typically described in short case studies involving men and women early in their careers, and they give students in the seminar the opportunity to grapple with these problems in personal terms – by discussing what they would do in these situations. From time to time, students will write short papers, which will be discussed in the seminar.

Ancient East Asia: Contested Archaeologies of China, Korea and Japan (203386)

Rowan Flad

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What are the origins of the people, cultures, and civilizations of East Asia, and how do we understand those origins? The varied and complicated histories and relationships among people and societies in the modern Nation-States of China, Korea, Japan and other nearby countries are rooted in a distant past for which our only evidence comes from the material remains left behind and studies by archaeologists. This class explores those origins, and focuses on controversies that show the stakes of archaeological interpretation to political and social discourse in the modern world. We will discuss fundamental questions in the prehistory and early history of East Asia through the lens of archaeological discoveries, including human origins, the origins of agriculture, how stratified, complex societies emerged, early processes of globalization and connections across Eurasia, conflicts between centers and peripheries, connections between China, Korea and Japan in prehistory, Buddhist origins, and more. In addition to learning about the major issues in Ancient East Asian archaeology, we will explore controversies that have emerged in recent East Asian archaeological research and discuss why archaeological topics are subject to controversial interpretation and what is at stake in the disagreements. These examples illustrate the significance of ancient cultural material in the modern world and the what is at stake in debates over who owns the past.

Creating Cultures of Sexual Respect on Campus (203406)

Diane Rosenfeld

2016 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Campus sexual assault has emerged into the national discourse in an unprecedented way. This Seminar provides an opportunity for students to engage in productive discourse about the issues, debates and tensions within the movement to protect students from sexual assault. We will grapple with the various cultural, societal, legal, moral and political factors that contribute to this problem with a focus on identifying the levers most likely to produce social change. We begin with an examination of the current debate on college campuses concerning the rights and responsibilities of students toward each other, and the schools' corresponding responsibility to create a safe and equal learning environment for all. Many of the issues are playing out here on our own campus at Harvard, and we will deconstruct the constellation of factors that contribute to the current campus climate. For example, how might popular culture, music, pornography and advertising inform questions of consent between students? How does the role of alcohol and drug use either complicate or simplify our analysis of these cases? What role might sports culture and male-only social spaces play in creating an unequal educational environment? Is it the same for all-female spaces? How might dominant culture impact racial, sexual and gender minorities? How can we harness the power of peer-to-peer influence to generate a refreshed discourse on sexual respect? Drawing from law, anthropology, sociology, philosophy and political science, we will explore innovative approaches informed by student experience in creating cultures of sexual respect.

Freshman Seminar 70N

Finding Your Inner Neanderthal (203388)

Christian Tryon

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Much of our history is written in our genes, and analyses of ancient and modern DNA have revealed that many living humans retain a genetic signature from our extinct evolutionary cousins, the Neanderthals. In this course, we will work together to help you find your inner Neanderthal. Our understanding of the past begins as you learn to make your own stone tools, a unique window to interpret the Paleolithic record. This experience guides your examination and analysis of real artifacts made and used by Neanderthals >50,000 years ago, drawn from the extensive collections of Harvard's Peabody Museum. The ability to create and interpret the archaeological record provides unparalleled insight to explore what the Neanderthals did and thought, and how they lived, loved, and died in Ice Age Eurasia. In addition to artifact manufacture, analysis, and weekly readings, there will be a field trip to the American Museum of Natural History in New York City to examine how Neanderthals and other early humans are represented in public displays of the past, and the course will culminate in the student design of a museum exhibit to be displayed on the Harvard campus. This freshman seminar will draw on perspectives from archaeology, paleontology, the history of science, and museum studies to study the Paleolithic, will provide the ability to think critically about how we interpret the past, and will explore how a study of our extinct relatives reveals the biases inherent in our perceptions of the world around us.

The City of Tomorrow: Constructing and Inhabiting the 21st Century (203389)

Arthur Segel

2016 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The built environment has profound effects on both our daily lives and the human condition at large; it determines where and how we live, work, play, and dream. The built environment embodies concrete stances on a wide variety of material, spatial, and cultural issues within a society. For example, the quality and availability of affordable housing is not merely an economic concern, but also a value judgment about the obligations of a society to its citizens. Underlying the practical aspects of the built environment—can this be built?—are cultural and societal considerations. By examining these issues on a variety of scales, ranging from a personal home to a megacity, this seminar focuses on how the built environment is a fingerprint of our societal values and how it can be a vehicle for change. This seminar weaves together the practical aspects and social factors that make up the built environment. Each week, students will take on the role of decision-makers and engage with a wide variety of ethical, aesthetic, political, environmental, and social considerations. We will discuss how issues such as climate change, rapid urbanization, resource scarcity, economic inequality, and geopolitical conflicts, affect us as both inhabitants and constructors of the built environment. At the end of the seminar, students will bring together both ideological and practical considerations to design a new utopia.

Course Notes:

As part of this dual process of investigation and application, students will have the opportunity to meet with architects, urban planners, and developers, while also taking excursions into Cambridge and Boston.

Understanding Islam and Contemporary Muslim Societies (108890)

Ali S. Asani

2017 Spring (4 Credits)

Schedule:

TR 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course is an introduction to the fundamental concepts of Islam and the role that religious ideas and institutions play in Muslim communities around the world. Its main concern is to develop an understanding of the manner in which diverse notions of religious and political authority have influenced Muslim societies politically, socially and culturally. Through specific case studies of countries such as Saudi Arabia, Iran, Turkey, Egypt, Pakistan, and Afghanistan, the course considers the role played by ideologies such as jihad, colonialism, nationalism, secularism, and globalization in shaping the ways in which Muslims interpret and practice their faith today. The course briefly considers the contemporary situation of Muslim minorities in Europe and the United States.

Course Notes:

Offered jointly with the Divinity School as 3628. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Reason and Faith in the West (123064)

Ann Blair

2016 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Examines from an historical perspective one of the central themes in the Western intellectual tradition: the desire to reconcile rational philosophy with religious and biblical authority. Discusses the transformations in conceptions of reason, science, biblical interpretation, and divine intervention (among other themes) in the context of the long period of change from medieval to modern. Readings emphasize primary sources—including, for example, Augustine, Aquinas, Galileo, Descartes, Newton, and Darwin.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: Occasional Fridays are required. Please check course syllabus for details.

Pathways through the Andes - Culture, History, and Beliefs in Andean South America (123735)

Gary Urton

2016 Fall (4 Credits)

Schedule:

TR 0130 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores the arts and cultures of Andean South America from the Pre-Columbian through Colonial periods. Emphasis is on the place of objects—textiles, ceramics, sculptures, and books—in the construction of meanings, identities and values as these changed over time. Readings are drawn from archaeology, ethnohistory, ethnology, art history and original sources. Students will work with Pre-Columbian and Colonial Andean artifacts in the collections of the Peabody Museum.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Societies of the World, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Gregory Nagy

2016 Fall (4 Credits)

Schedule:

MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course takes a close look at the human condition, as viewed through the lens of classical Greek civilization (and some modern comparanda). The readings, all in English translation, are the Homeric Iliad and Odyssey, seven tragedies (Aeschylus' Oresteia Trilogy, Sophocles' two Oedipus dramas, and Euripides' Hippolytus and The Bacchic Women), and two dialogues of Plato (the Apology and the Phaedo, both centering on the last days of Socrates); also, selections from the dialogue On Heroes by an eminent thinker in the "second sophistic" movement, Philostratus.

Studying Buddhism, Across Place and Time (125085)

Janet Gyatso

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This class studies the basic elements of Buddhist thought, practice, and historical communities, and their vision of human flourishing. We will study Buddhist classic writings as well as later works from South, Central and East Asia on meditation, discipline, and creativity. Key themes of our readings are the relationship between self and other, the education of the emotions, paths of self-cultivation, and the (im) possibility of perfection. We will be especially attentive to how the approach to such things has shifted as Buddhism spread through Asia, and more recently to the rest of the world, as received by the 19th century Transcendentalists, the Beat poets, and socially engaged religion. Throughout the course we will consider the relevance of this material to our own views of the world and how we should lead our lives.

Course Notes:

Offered jointly with the Divinity School as 3830. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

James Robson

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course provides an introduction to the study of East Asian religions. It covers the development of Buddhism, Daoism, Confucianism and Shinto. It is not a comprehensive survey, but is designed around major conceptual themes, such as ritual, image veneration, mysticism, meditation, death, and category formation in the study of religion. The emphasis throughout the course is on the hermeneutic difficulties

attendant upon the study of religion in general, and East Asian religions in particular.

Course Notes: Offered jointly with the Divinity School as 3010. This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Societies of the World, but not both. Classical Mythology (126004)

Brigitte Libby

2017 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Incest and parricide, cannibalism and self-blinding: classical mythology has fascinated artists, writers, and thinkers throughout western civilization, and this course will serve as an introduction to this strange and brilliant world. We will move from the very first works of Greek literature through to the classic Greek tragedies and the Roman tales in Ovid's *Metamorphoses*. Along the way, we will confront the question of what "mythology" is and how it works, and we will discuss how these traditional stories changed over time to fit different cultural circumstances. We will also consider ancient rationalizations of myth, the relationship of myth and politics, and the reception of classical myth in the modern world.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Apocalypse Then! Forging the Culture of Medieval Rus' (111958)

Michael Flier

2016 Fall (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

When the natives of Medieval Rus (later Russians, Ukrainians, and Belarusians) accepted Orthodox Christianity in the 10th century, their nature-based paganism gave way to a powerfully sensual belief system that made good use of the visual and the verbal to prepare these newest Christians for the coming Apocalypse and Last Judgment. We investigate this transformation from the conversion of Saint Vladimir and the excesses of Ivan the Terrible through the Time of Troubles and the modern turn of Peter the Great. The class features close analysis of architecture, icons and frescoes, ritual, folklore, literature, and history to understand this shift in worldview, including the role of women. Special attention is devoted to the ways in which Medieval Rus is portrayed in film, opera, and ballet.

Course Notes: All readings in English. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Communism and the Politics of Culture: Czechoslovakia from World War II to the Velvet Revolution (123734)

Jonathan Bolton

2017 Spring (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What was Communism, and how did it shape the intellectual life of East Central Europe after World War II? How do artists and writers counter the ideological pressures of the state? This course examines how the intense political pressures of invasion, occupation, and revolution shape a country's cultural life and are shaped by it in turn. We look at Czechoslovakia's literature, drama, film, and music from the 1948 Communist takeover, through the Prague Spring and Soviet invasion of 1968, to the 1989 Velvet Revolution, a hallmark of the peaceful overthrow of Communism in Europe. We consider works by Milan Kundera, Bohumil Hrabal, Vaclav Havel; films of the Czech New Wave (Milos Forman, Vera Chytilova, Jiri Menzel); clandestine publishing and underground art; and theories of political dissent under authoritarian regimes.

The History of the English Language (126847)

Daniel Donoghue

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Everyone who uses English has experienced its idiosyncrasies. Why is pronunciation at odds with spelling? Why so many irregular verbs? What happened to "thou"? What did Shakespeare sound like? How do we know? What about the current stature of English as a world language? This course addresses such questions as it surveys the long history of the language. While the topic is fascinating on its own, a historical knowledge of English gives critical and creative writers more command over the medium of their craft; it also sharpens reading skills. Lectures will be supplemented by exercises from the course website.

Course Notes:

American Protest Literature from Tom Paine to Tupac (119747)

*John Stauffer**Timothy McCarthy*

2016 Fall (4 Credits)

Schedule:

MW 1200 PM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This interdisciplinary course examines the rich tradition of progressive protest literature in the US from the American Revolution to the rise of Hip Hop, globalization, and modern-day slavery. Using a broad definition of "protest literature," it focuses on the production and consumption of dissent as a site of progressive social critique, using a wide variety of print, visual, and oral forms. We examine the historical links between modes of protest and meanings of literature, and explore how various expressions of dissent function as aesthetic, performative, rhetorical, and ideological texts within specific cultural contexts. "Readings" range from novels to photographs and music.

Making the Middle Ages (108161)

Sean Gilsdorf

Justine Landau

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

56

This course offers a general introduction to the cultures and beliefs of medieval Europe. We focus on a variety of artifacts and cultural productions as the centerpieces of a broad and interdisciplinary exploration of medieval studies. Using specific objects and texts as points of entry into a vanished world, we encourage students to explore those areas that interest them most, teasing out the cultures and beliefs of the past while simultaneously developing their skills in research and writing. Through collaborative projects and a creative exploration of texts, images, and collections at Harvard and beyond, students will be invited to make their own Middle Ages.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. See the course website for more details.

Sacred and Secular Poetry (108402)

Judith Ryan

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Tracing poetry from its origins in religious practice, the course examines the process of secularization and the ways in which modern poems retain traces of sacred texts. As poets grapple with an increasingly secular world, the emergence of modernity is revealed in vivid ways. Class discussions will explore the extent to which reminiscences of the sacred form part of the deeper appeal of poetry and its ability to shape meaning in the modern world.

This is a course in linguistic anthropology. We explore key theoretical issues in the semiotic anthropology of language use, focusing on communication, social (inter)action, representation, cultural conceptualization, and language ideology. By presenting many of the most influential and innovative contributions to the study of language in culture and society—both recent and classic—the course aims to guide students in asking fundamental questions about language and communication more broadly as facts of everyday sociocultural experience.

Course Notes:

No previous knowledge of linguistics or of anthropology is required. This course may fulfill the Entry Course requirement for Social Anthropology.

Subject: Science of Physical Universe

Science of Physical Universe 12

Natural Disasters (112430)

Brendan Meade

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

98

Natural disasters, such as earthquakes, hurricanes, and floods, claim thousands of lives and cause tens of billions of dollars in damage each year. Moreover, changes in Earth's climate are raising sea level, changing precipitation patterns, and likely causing an increase in the occurrence of damaging storms, putting more of our increasing exposed global population at risk. In this course we develop an understanding of these natural hazards from an earth science perspective, and examine several case studies to assess their catastrophic impacts. Given our scientific understanding of these phenomena, we examine ways to assess and forecast future natural disasters, and to mitigate the adverse impacts to our societies. Sections will emphasize the use of GIS technology to measure the impacts of natural hazards.

Why You Hear What You Hear: The Science of Music and Sound (114922)

Eric Heller

2017 Spring (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

Sound and music are integral parts of all human cultures, and play critical roles in communications and social interactions. In this course, we study the production, transmission, and perception of sound, with the aim of expanding communication, musical, and artistic horizons. The course includes many class demos and hands on tools for students to explore. Psychoacoustics (the study of how we perceive and interpret sound) is a central theme of the course, providing a lens through which we can better understand the generation, propagation, and analysis of sound. Student-selected projects (with staff consultation) are an important part of the course.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

How to Build a Habitable Planet (118517)

Charles Langmuir

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The story of Earth from the inception of the universe at the Big Bang to the revolution in planetary function and capability associated with the rise of human civilization. The aim of the course is to place human beings in a universal and planetary context, and to see the steps in planetary evolution as an essential perspective on how we relate to Earth today. Topics covered include the Big Bang, origin of the elements, formation of minerals, origin of the solar system, formation of planets, climate regulation, origin of life, co-evolution of ocean, atmosphere, solid earth and biosphere, development of plate tectonics, the modern Earth as an interconnected system, and the human era and its consequences for the planet. Current environmental problems can then be considered in a planetary context. Finally we consider whether Earth may be a microcosm reflecting laws of planetary evolution that may be common to a class of planets throughout the universe, or alternatively may be a low probability accident.

Science of Physical Universe 17

The Einstein Revolution (113225)

Peter Galison

2017 Spring (4 Credits)

Schedule:

R 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

Albert Einstein has become the icon of modern science. Following his scientific, cultural, philosophical, and political trajectory, this course aims to track the changing role of physics in the 20th- and 21st-centuries. Addresses Einstein's engagement with relativity, quantum mechanics, Nazism, nuclear weapons, philosophy, and technology, and raises basic questions about what it means to understand physics and its history. This is a hybrid course that will combine online lessons with an active, participatory class structure.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Science of Physical Universe 22

The Unity of Science: From the Big Bang to the Brontosaurus and Beyond (126149)

Irwin Shapiro

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Science is like well-woven, ever-expanding fabric, designed to (un)cover Nature's secrets. This course emphasizes the strong connections between subfields of science, showing it as the never-ending and greatest detective story ever told, with evidence always the arbiter. These characteristics are exhibited in the semi-historical treatment of three themes: unveiling the universe, the earth and its fossils, and the story of life.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Science of Living Systems, but not both.

Additional Course Attributes:

Attribute	Value(s)

Science of Physical Universe 25

Energy and Climate: Vision for the Future (120031)

Michael McElroy

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

105

The climate of our planet is changing at a rate unprecedented in human history. Primarily responsible is the build-up of heat-trapping gases in the atmosphere, most notably carbon dioxide emitted in conjunction with the combustion of coal, oil and natural gas. Concentrations in the atmosphere of CO₂ are higher now

than at any time over at least the past 850,000 years, higher arguably than at any time since dinosaurs roamed the planet 50 million years ago. The course will provide a perspective on what we may expect in the way of future climate change if we fail to take action – more violent storms, extremes of precipitation, heat waves, pressures on food production, and an inexorable rise in sea level. It will survey the energy choices available should we elect to take action to minimize future damage to the climate system. Special attention will be directed to the challenges and opportunities confronting China and the US, the world's two largest current emitters. The overall goal will be to develop a vision for a more sustainable environmental future, one in which energy is supplied not by climate-altering fossil fuels but rather by zero carbon alternatives such as wind, solar, hydro, geothermal, tidal and nuclear.

Course Notes: Students who have taken Science A-52 may not take this course for credit.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Recommended Prep: Students are expected to have a background of high school algebra and trigonometry.

Science of Physical Universe 26

Primitive Navigation (126603)

John Huth

2016 Fall (4 Credits)

Schedule: MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 165

We use the theme of primitive navigation to open the eyes of students to the physical world in a direct and palpable manner. Basic principles include human cognition of physical and mental maps, dead reckoning, direction finding from nature. The course includes the basics of astronomy, including planetary orbits, meteorology, thermodynamics, bird behavior, electromagnetic radiation, optics, waves, tides, ocean currents, and fluid dynamics. Navigational practices of Pacific Islanders, Norse, medieval Arabs, and early western Europeans provide a focus. Some facility with algebra and trigonometry is useful. A series of hands-on projects are employed to understand navigational practices discussed in lecture.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Science of Physical Universe 27

Science and Cooking: From Haute Cuisine to Soft Matter Science (126638)

David Weitz

Pia Sorensen

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a collaboration between world-class chefs and Harvard professors. Each week, a chef will lecture about some aspect of gastronomy. This lecture will introduce and motivate a lecture about the science of soft materials by a Harvard professor. The course will cover the basic concepts in the science of soft materials, providing a solid understanding of their properties and behavior. All food is made of soft materials, and cooking relies on many of their fundamental properties. The course will also include laboratory work that uses concepts of cooking to understand and motivate experimental measurements on soft materials.

Course Notes:

Occasionally there will be an optional 15-30 minute question and answer session with visiting chefs.

Science of Physical Universe 29

The Climate-Energy Challenge (126633)

Daniel Schrag

2016 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

75

This course will examine future climate change in the context of Earth history, and then consider various strategies for what might be done to deal with it. The likely impacts of continued greenhouse gas emissions will be explored, emphasizing the scientific uncertainties associated with various predictions, and how this can be understood in the context of risk. In the latter third of the class, the question of how to mitigate climate change will be discussed, including an examination of various options for advanced energy systems.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. See the course website for more details.

Science of Physical Universe 30

Life as a Planetary Phenomenon (120881)

Dimitar Sasselov

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

105

This course considers the relationship between life and the planet on which it resides. It examines the scientific quest to understand where life might thrive beyond Earth. On Earth, life was born of planetary processes and has been sustained by plate tectonics and other physical processes. Through evolution, life has in fact emerged as major influence on our planet's surface. Fundamental features of terrestrial life and evolution are addressed in the context of astronomy, planetary physics and chemistry. These, in turn, provide a basis for the exploration for other habitable planets, both within our solar system and in the greater universe.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Empirical & Math Reasoning 11

Making Sense: Language, Logic, and Interpretation (125750)

Gennaro Chierchia

Virginie Greene

Stuart Shieber

2016 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Why is human language capable of conveying meaningful information to a degree unmatched by natural or artificial codes? Why does semantic content spontaneously attach to speech sounds, but not in the same way to, say, music? We claim that this has to do with language being the carrier of a spontaneous form of logic. We investigate our hypothesis by using formal models from logic, linguistics, computer science, and literary criticism. We show how such models can be helpful in better understanding ordinary, everyday communication, as well as literary fiction through a reading of texts by Euripides, Cervantes, Austen, Proust, and others.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Empirical and Mathematical Reasoning, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Empirical & Math Reasoning 13

Analyzing Politics (113170)

Kenneth Shepsle

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A commonsensical survey of rational theories of politics comprised of: (1) individual choice, (2) group choice, (3) collective action, and (4) institutions. The underlying theme is that politics may be described and understood as rational, goal-seeking behavior by citizens, politicians, bureaucrats, and interest groups in various settings. Students are encouraged to think deeply about current events, history, and public life generally, as well as to analyze the politics of private life--in families, clubs, firms, churches, universities, even Harvard Houses--since private politics, like public politics, may be understood in terms of rational

behavior. Instruction is by lecture, small-group section interactions, and experiments.

Additional Course Attributes:

Logical Reasoning (112199)

Ned Hall

2016 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The concepts and principles of symbolic logic: valid and invalid arguments, logical relations of statements and their basis in structural features of those statements, the analysis of complex statements of ordinary discourse to uncover their structure, the use of a symbolic language to display logical structure and to facilitate methods for assessing arguments. Analysis of reasoning with truth-functions ("and", "or", "not", "if...then") and with quantifiers ("all", "some"). Special attention will be given to the norms underlying valid reasoning, to applications of formal techniques to "arguments in the wild", and to the wide variety of non-logical ways that ordinary discourse can succeed at being (illicitly) persuasive.

Class Notes:

Weekly quizzes will be held Fridays 11-1 and 1-3. Students are required to select one of these time periods when registering for the course.

U.S. Health Care Policy (125751)

Amitabh Chandra

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

180

This course provides an overview of the U.S. health care system in historical and international perspective, and engages students in critically analyzing health policy issues. The course is focused around three

complex and interdependent policy challenges that every health system must address: *ensuring access to health care, paying for new innovations, and improving quality*. Using primarily an economic lens, students will grapple with the complexity of the issues, learn to analyze policy arguments, evaluate evidence, identify tradeoffs, and recognize the limits of economic analysis - critical skills for engaging constructively as informed citizens in a wide range of policy debates.

Course Notes: Students who have taken General Education 186 or Extra-Departmental Courses 186 may not take this course for credit.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Requirements: Anti-Req: Cannot be taken for credit if GEN-ED 186 has been taken.

United States in the World 19

American Food: A Global History (126205)

Joyce Chaplin

2017 Spring (4 Credits)

Schedule: TR 1200 PM - 1259 PM

Instructor Permissions: Instructor **Enrollment Cap:** 105

Europeans "discovered" America in search of foodstuffs, specifically spices. And food has been central to the American experience from the starving time in early Virginia to the problem of obesity in the United States today. But what is American about American food? How have individual food choices and national food policies connected Americans to the larger world, both the social worlds of other human beings and the natural world of all other living beings?

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Reinventing (and Reimagining) Boston: The Changing American City (122320)

Robert Sampson

David Luberoff

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In the last half of the 20th century, there was gloom about urban life and many cities were projected to decay. Although some did, others became models of urban renaissance. Using Boston as a case study of urban change, this course examines key issues such as economic inequality, political governance, crime and criminal justice institutions (e.g. policing, incarceration), racial segregation, immigration, and gentrification. We draw on a wide range of reading and data sources, as well as presentations by notable local practitioners, student visits to different parts of Boston, and a variety of writing assignments designed to help students better appreciate, understand, and participate in contemporary urban life.

Course Notes:

This course, when taken for a letter grade, may be counted for introductory Sociology concentration requirement.

Sex and the Citizen: Race, Gender, and Belonging in the United States (126319)

Caroline Light

2016 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

105

Even before the formal establishment of the United States, assumptions about so-called "natural" human differences – like sex, race, and ethnicity – have influenced who is entitled to (and not entitled to) the rights, privileges, and protections of full citizenship. Until 1920, most women were excluded from the political process, and most African American men and women could not safely vote until passage of the 1965 Voting Rights Act. Until 1967, states could legally prohibit marriage between whites and those categorized as "non-whites," and until 2015, states could prevent people of the same assigned sex from marrying. This course addresses the history of our nation's investment in regulating sex, desire, and procreation among the citizenry and how these historical legacies continue to shape contemporary understandings of

citizenship and belonging.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Slavery/Capitalism/Imperialism: The US in the Nineteenth Century (123124)

Walter Johnson

2017 Spring (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course treats the history of the 19th-century US and the Civil War in light of the history of US imperialism, especially the War of 1812, the Mexican-American War, and the illegal invasions of Cuba and Nicaragua in the 1850s. Likewise, it relates the history of slavery in the US to the Haitian Revolution, the Louisiana Purchase, Indian removal, Atlantic cotton, land and money markets, and the hemispheric history of antislavery.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: This course will occasionally meet on Fridays throughout the semester. Please check the syllabus on the course website for more details.

Designing the American City: Civic Aspirations and Urban Form (116243)

Alex Krieger

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An interpretive look at the American city in terms of changing attitudes toward urban life. City and suburb are experienced as the product of design and planning decisions informed by cultural and economic forces, and in relationship to utopian and pragmatic efforts to reinterpret urban traditions in search of contemporary alternatives. Topics include: persistent ideals such as the single-family home, attitudes toward public and private space, the rise of suburbs and suburban sprawl, cycles of disinvestment and renewed interest in urban centers, and impacts of mobility and technology on settlement patterns.

Course Notes:

Offered jointly with the Graduate School of Design as DES 0330200. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Civil War from Nat Turner to Birth of a Nation (128327)

John Stauffer

2017 Spring (4 Credits)

Schedule:

MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This interdisciplinary course reframes traditional understandings of the Civil War in three ways. First, by showing that civil conflict in the United States began well before 1861 and ended well after 1865, taking the form of slave uprisings and Klan terrorism, as well as conventional war. Second, by showing that the former Confederacy won this longer Civil War by establishing a new order of black unfreedom. And third, by placing this war in the context of international politics and trade. "Readings" range from fiction, film, letters, and speeches to poetry, pamphlets, prints and photographs, songs, and history.

Dilemmas of Equity and Excellence in American K-12 Education (107341)

Katherine K. Merseth

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

75

Events such as Teach for America's 20th anniversary and films like Waiting for Superman highlight urgent concerns about the quality and reach of American schooling in the 21st century. Against this backdrop, the course grapples with several dilemmas that have defined American K-12 education throughout history. What constitutes educational excellence? Can excellence be achieved for everyone? Why do we have schools and what is their purpose? Given that families, politicians, and the courts often disagree vehemently about the answers to these questions, the course considers who and what will define the future of American education and its role in society.

Class Notes:

US-WORLD 35 will be offered twice in Fall 2016 (Tu,Th 10:00- 11:30 and Tu,Th 11:30-1:00). Students must register for and attend only one of the two offerings.

The Great Experiment: A History of the United States (203045)

Jill Lepore

2017 Spring (4 Credits)

Schedule:

T 0300 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

84

This course is an introduction to American history with an emphasis on the origins and development of democratic political institutions, from the party system to the secret ballot, from the town meeting to talk radio. It begins in 1492 and ends with the present. While the course is a survey, open to all undergraduates, it is as demanding as democracy itself: informed and engaged participation is required. All readings are from primary sources and section meetings will take the form of debates.

Course Notes:

Section meetings will require intensive written and oral preparation. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Ancestry (203820)

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

75

Everyone comes from somewhere. We carry our ancestries in our DNA, genealogy, family stories, and more. What do these forms of evidence tell us about who we are, as a species, as a social group, or as an individual? This course looks at ancestry from a range of perspectives: biology, anthropology, genealogy, history, law, and memory—from the origins of human populations to the origins of you. Features hands-on assignments and interactive lectures.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Understanding Darwinism (125195)

Andrew Berry

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

An interdisciplinary exploration of Darwin's ideas and their impact on science and society. The course links the history of Darwin's ideas with the key features of modern evolutionary biology. We review the development of the main elements of the theory of evolution, highlighting the areas in which Darwin's ideas have proved remarkably robust and areas in which subsequent developments have significantly modified the theory. By also analyzing the historical context of the development of evolutionary thought beyond Darwin, the course emphasizes the dynamic interplay between science and society.

Daniel Lieberman

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How and why did humans evolve to be the way we are, and what are the implications of our evolved anatomy and physiology for human health in a post-industrial world? Why do we get sick, and how can we use principles of evolution to improve health and wellbeing? To address these questions, this course reviews the major transitions that occurred in human evolution, from the divergence of the ape and human lineages to the origins of modern humans. Also considered are the many effects of recent cultural and technological shifts such as agriculture and industrialization on human health.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The course introduces students to the functioning of the human body in health and disease. Students will examine critical determinants of their own health (genetics, diet, sleep, exercise, stress, social interactions) and also consider how these and other factors impact the health of diverse communities in both rich and poor countries. Emphasis will be placed on responses of the human organism to infection, injury, and environmental stress, and on topics with high public health impact (obesity, smoking, mental health). Activities include lectures, 3 guided laboratories/demonstrations, weekly sections to review key concepts, and a directed term project.

This course will introduce students to nutrition and global health problems through exploration of demographic, epidemiological, biological, social, political, and economic determinants of nutritional status. Emphasis will be placed on the role of nutritional status and dietary intake, both as a determinant and as a consequence, of these health problems. Students will be encouraged to think critically about the major challenges to improve nutrition and health at a global level, with a focus on nutrition and infectious diseases, maternal and child health, and chronic diseases. Nutritional assessment, study design, and efficacy of nutrition interventions, will be explored in detail.

The Toll of Infection: Understanding Disease in Scientific, Social, and Cultural Contexts (110382)

Donald Goldmann

2016 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

This course will review the devastating impact of infectious diseases on wars, politics, economics, religion, public health, and society as reflected in history, literature, and the arts. We will study how infections spawned revolutionary epidemiologic and scientific advances in detection, treatment, and prevention. We will address the gaps between discovery and implementation, including ethical, social, economic, and health systems barriers to progress. The disparate impact of infections on underserved and minority populations, and approaches to addressing such injustice, will be emphasized. We will confront challenges posed by microbial mutation (e.g., antibiotic resistance, evasion of immunity, and adaptation of animal viruses to humans). By weaving together knowledge from science and the humanities, students will understand the historical and contemporary impact of infections and potential solutions to the challenges they pose.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Explore the arts as social and professional resources! Whether you pursue medicine, law, engineering, business, government, etc., the arts will enhance your work and your citizenship. Active citizens construct opportunities for positive social change. A lecture series by a range of professionals demonstrates that change in practically any field depends on art. Theoretical readings (Schiller, Kant, Dewey, Freire, Gramsci, Rancière, Mockus, Boal, Nussbaum, Pasolini, inter alia) are grounded in concrete cases of agency. The final project will be a design for a creative social intervention, including reflections on creating the design.

Class Notes: Though the University will be on a "Monday" schedule, this course will still have its first lecture on Wednesday, August 31st.

A study of five famous pieces of music, both as timeless works of art and as moments of cultural history. Close attention is given to techniques of musical listening, and to the details of the first performance of each work, with a consideration of the problems involved in assembling such a picture. Works studied are Beethoven, *Symphony no. 9*; Berlioz, *Symphonie fantastique*; Stravinsky, *Le sacre du printemps*; Handel, *Messiah*; Monteverdi, *Orfeo*. The course concludes with the first performance of a new work especially commissioned for this course.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

This course is designed to enable students to analyze a wide range of Japanese cultural creations—including the traditional Noh theater, modern Japanese paintings, and contemporary anime—by illustrating the influence of Buddhism both on their forms and at their depths. The first part of the course is a study of major Buddhist philosophy and its impact on Japanese literature. The second part observes Buddhist ritual practices and their significance for Japanese performing arts. The last part traces the development of Japanese Buddhist art, and considers the influence of Buddhism on diverse contemporary popular Japanese art media.

Monuments of Islamic Architecture (126634)

David J. Roxburgh

2017 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to ten iconic monuments of the Islamic world from the beginning of Islam to the early modern period. The course introduces various types of building-mosques, palaces, multifunctional complexes-and city types and the factors that shaped them, artistic, patronal, socio-political, religio-cultural, and economic. Each case study is divided into two lectures. The first presents the monument or city by "walking" through it. The second is devoted to themes elicited from the example, developed in light of comparative monuments, sites, and/or written sources, and to problems of patronage, production, audience and meaning as they pertain to architectural history.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

David Der-Wei Wang

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course introduces a unique dimension of Chinese modernity: amorous engagement in fiction and lived experience, its discursive and visual representations, and its institutional implementation (gender, marriage, family, law, nation/state, etc.), censorship, and transgression. It examines how the modern lure of free will and emancipated subjectivity drove Chinese to redefine terms of affect, such as love, feeling, desire, passion, sexuality, loyalty, dedication, revolution and sacrifice. It also looks into how the moral, legal and political consequences of affect were evoked in such a way as to traverse or fortify consensual boundaries and their manifestations.

Tomiko Yoda

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines Japanese animation (or *anime*) through its generic conventions, formal aesthetic, and narrative motifs. At the same time, the course approaches anime as a lens through which we study contemporary media culture and its local and global production, distribution, and reception. In this sense, anime will be treated as a node in an extensive transnational network involving commercial as well as non-commercial mediums such as graphic novels, live-action films, video games, character merchandises, and fanzines/fan-events.

Ewa Lajer-Burcharth

Maria Gough

Benjamin Buchloh

2016 Fall (4 Credits)

Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

The course examines the defining moments in the development of modern European and American art from the eighteenth- through to the twentieth-century. Anchored by a significant date, each lecture focuses on the relationship between a major artistic event and the social, political, cultural, and technological conditions of its emergence. A wide range of media, from painting, sculpture, and print-making to photography, photomontage, video, installation, and performance art, will be considered. Situating the key aesthetic transformations that defined art's modernity in a broader historical context, the course explores the fundamental role of advanced forms of artistic practice in the formation of modern culture and society.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Nazi Cinema: The Art of Propaganda (108580)

Eric Rentschler

2016 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

As thinking beings we consider the limits of human potential and wonder what is the worst. The Nazis obsess us because they were masters of extremity who brought to the world unprecedented violence, destruction, and murder. They were also masters of propaganda who engineered sophisticated techniques of mass manipulation; in this endeavor cinema and modern media assumed a seminal role. This course considers why films proved to be so essential to the Hitler regime and so captivating to German audiences of the Third Reich. It also reflects on the continuing allure of Nazi sights and sounds for contemporary mass culture.

Course Notes:

No knowledge of German required. An additional film screening will be held on Sundays, 1-3. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Modern China presents a dual image: a society transforming itself through economic development and

infrastructure investment that aspires to global leadership; and the world's largest and oldest bureaucratic state, with multiple traditions in its cultural, economic, and political life. The modern society and state that is emerging in China will bear the indelible imprint of China's historical experience, of its patterns of philosophy and religion, and of its social and political thought. These themes are discussed in order to understand China in the 21st century and as a great world civilization that developed along lines different from those of the Mediterranean. This year the course introduces a variety of new online learning features.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: This course will occasionally meet on Thursdays throughout the semester. Please check the syllabus on the course website for more details.

Japan is a collection of islands, but its past and present unfolds through continuous interaction with wider worlds. This course places Japan in contexts of Asian and global history. It begins with the people, institutions, and ideas of premodern Japan, from the emergence of a court-centered state 1500 years ago to a warrior-dominated society centuries later. We then examine the tumultuous process of change from the 19th century through the present and explore how people in Japan have dealt with the dilemmas of modernity that challenge us all.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

This course examines Europe from the aftermath of the world's most destructive war to today's euro crisis. Using the idea of "trials" both literally and figuratively, we will address the major themes of postwar retribution, the Cold War, decolonization, new social movements, the fall of Communism, the expanding European Union, and the dilemmas facing a pluralist and postcolonial Europe. The roles of vigilante justice, terrorism, social justice and economic welfare will also be explored. Students will study the transcripts and accounts of political and civil rights trials to examine how these themes occurred and recurred in post-war Europe.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Global Health Challenges: Complexities of Evidence-Based Policy (126193)

Sue J. Goldie

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

300

This course introduces the global health challenges posed by failure to adequately reduce infections, malnutrition, and maternal-child health problems in the most vulnerable populations, escalating rates of non-communicable diseases/injuries, and emerging health risks that cross national boundaries. We will assess social responses to these challenges at the community, national, and global levels. Through an understanding of population health measures, we will examine patterns of disease/mortality between and within countries, capture important time trends, and identify determinants of health inequalities. While emphasizing science driven policy, comparative case examples will illuminate influential systemic factors, health system performance, and the economic/social/political climate.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for either Societies of the World or Empirical and Mathematical Reasoning, but not both.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Africa and Africans: The Making of a Continent in the Modern World (116991)

Caroline Elkins

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Understanding Africa as it exists today requires an understanding of the broader historical trends that have dominated the continent's past. This course will provide an historical context for understanding issues and problems as they exist in contemporary Africa. It will offer an integrated interpretation of sub-Saharan African history from the middle of the 19th century and the dawn of formal colonial rule through the period of independence until the present time. Particular emphasis will be given to the continent's major historical themes during this period. Selected case studies will be offered from throughout the continent to provide illustrative examples of the historical trends.

Course Notes: This course fulfills the AAAS 11, Introduction to African Studies, course requirement for a concentration or secondary field in African and African American Studies. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Additional Course Attributes:

Political Economy After The Crisis (126203)

Roberto Mangabeira Unger

Dani Rodrik

2017 Spring (4 Credits)

Schedule: M 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

The world's economic and political order reels under mounting challenges: the global financial crisis, the austerity debacle, a slowdown in economic growth and productivity, the aggravation of inequality and the inadequacy of conventional responses to it, the discrediting of the Washington Consensus, the globalization backlash, the re-emergence of nationalist politics in Europe and the United States, and a contest over the meaning, value, and requirements of democracy. We examine connections among these phenomena and explore alternative ways of thinking about contemporary market economies and their reconstruction. We organize the course around four related themes: the worldwide financial and economic crisis and its management; the effort to promote socially inclusive economic growth in richer as well as in poorer countries; the nature, fate, and dissemination of the new knowledge-intensive style of production; and the past, present, and future of globalization.

Course Notes: Students should have some previous acquaintance with economics but no advanced economic training is required. The course is open to undergraduate and graduate students outside as well as within economics. Readings will be drawn from the classic and contemporary literatures of economics, political science, philosophy, and social theory.

Extended take-home examination/Writing assignments. Jointly offered

with the Law School.

The Caribbean: Globalization, Socio-Economic Development & Cultural Adaptation (118290)

Orlando Patterson

2016 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Caribbean societies are largely the economic and political creations of Western imperial powers and are among the earliest products of globalization. Though *in* the West, they are only partly *of* it, and their popular cultures are highly original blends of African, European and Asian forms. The course examines the area as a system emerging through genocide, piracy, plantation slavery, colonialism and globalization, from a situation of great social and cultural diversity to the present tendency toward socio-economic and cultural convergence. Patterns of underdevelopment and government are explored through national case studies (Puerto Rico, Cuba, Jamaica & Haiti) and selected, region-wide modern issues (hurricanes, earthquakes and other natural disasters; migration & transnationalism; crime & drug trafficking), as are cultural adaptations through studies of Afro-Caribbean religions, folkways, and music. America's special role in the region is emphasized.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Conditional Equality: The Case of the Jews of Europe in Modern Times (126640)

Jay Harris

2017 Spring (4 Credits)

Schedule:

MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a study in the relations between majorities and minorities in modern Europe, using the Jews

as a focus. It will examine the ways in which the equal status of a minority is negotiated through cultural and political interaction, both subtle and blunt. It will further focus on the role that such negotiations have in the formation of identities of both the majority and the minority. Finally, it will examine the ways in which majorities can exercise control over minorities rendering them conditionally rather than fully equal participants in the national projects of the age.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The movement of people from China and India around the world are among the great migrations of history. This class explores Chinese and Indian emigration past and present, examining similarities and distinctions between (and among) these two great migrations. We focus on the connections between communities overseas, their encounters with each other and with other diasporas. The fundamental questions this class considers are: how have migrants from India and China shaped the modern world? How do their journeys relate to other migrations? These are questions that should be of interest not only to people of Asian descent, but to everyone.

Schedule:

TR 0130 PM - 0259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course guides students on an exploration of the largest and most complex civilization of Pre-Columbian America - the Inca Empire of Andean South America. We will address such questions as how did a civilization emerge and thrive at 12,000 feet above sea level? How could a state-level society exist without markets, the wheel, or writing? In addition to lectures and discussions, students will experience the products of Inca civilization through hands-on study of artifacts in the Peabody Museum of Archaeology and Ethnology.

Japan's Samurai Revolution (114776)

David Howell

Ian J. Miller

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

On July 8, 1853, Commodore Mathew C. Perry steamed into Japan's Edo Bay with four heavily armed US Navy warships. Two were the so-called "black ships," ominously painted coal-burning steamships of the latest design. There, within view of a stunned populace, Perry issued an ultimatum: open the country to trade or face unstoppable bombardment. Thus began Japan's modern engagement with the outside world, a new chapter in the broader encounter between "East" and "West." Through primary sources, discussion and lecture, this course examines Japan's rapid development from samurai-led feudalism into the world's first non-Western imperial power.

Course Notes:

No Japanese language skills required. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Contemporary Developing Countries: Entrepreneurial Solutions to Intractable Problems (107464)

Tarun Khanna

2016 Fall (4 Credits)

Schedule:

MW 0330 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will provide a framework (and multiple lenses) through which to think about the salient economic and social problems of the five billion people of the developing world, and to work in a team setting toward identifying entrepreneurial solutions to such problems. Case study discussions will cover challenges and solutions in fields as diverse as health, education, technology, urban planning, and arts and the humanities. The modules themselves will be team-taught by faculty from engineering, the arts, urban design, healthcare and business. The course will embrace a bias toward action by enabling students to understand the potential of individual agency in addressing these problems. All students will participate in the development of a business plan or grant proposal to tackle their chosen problem in a specific developing country/region, emphasizing the importance of contextualizing the entrepreneurial intervention. The student-team will ideally be comprised of students with diverse backgrounds from across the University.

Course Notes:

Offered jointly with the Business School as 1266, the School of Public

Health as GHP 568, the Kennedy School as PED-338, the Law School as HLS 2543 and the Graduate School of Education as A-819.

The Worlds of Business in Modern China (108854)

William Kirby

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

60

China was home to the world's largest economy two centuries ago. Within two decades it will be the world's largest economy again. This course uses business as a lens through which to study modern China. Using new Harvard Business School cases, we explore traditional family firms and internet startups; state-owned enterprises and their private-sector challengers; and the catalytic role of Hong Kong, Taiwan, and foreign enterprise in shaping contemporary China. Case studies cast light on larger themes: the role of party and government (national and local) in business and society; the legal environment; and the global impact of China's development.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Politics of Nature (122012)

Ajantha Subramanian

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines the historical, social, and political life of nature in its many manifestations--as a source of life and livelihood, as a resource for exploitation, as a heritage to be protected, and as a post-industrial hybrid--in order to understand the variety of human interactions with the natural environment. Through a focus on property relations, imperialism, development, and science, students will be exposed to the intimate connection between social inequality and ecological degradation, and encouraged to envision possibilities for a future of greater equality and sustainability.

Russia in Global Perspective (109891)

Julie A. Buckler

Kelly A. O'Neill

2017 Spring (4 Credits)

Schedule:

TR 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

From the Middle East to the Pacific rim, Russia has re-emerged as a major player on the world stage. Russia has transitioned in significant ways since the 1991 break-up of the Soviet Union ("the evil empire"), just as it did during the tumultuous aftermath of the 1917 Bolshevik Revolution that ended a 300-year imperial dynasty. Through in-depth, interdisciplinary examination of six key themes with contemporary as well as historical resonance (conquest, political terror, the environment, commerce, imaginative representations, and mobility), we will investigate the evolving concept of "Russianness" in a global context. Assignments include curation of a "Russia in the World" digital exhibit.

Islam and Politics in the Modern Middle East (126908)

Malika Zeghal

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

80

This course examines the origins, ideologies, and political strategies of twentieth and twenty-first century Islamist movements in the Middle East and beyond. We will pay particular attention to the evolution of these movements in the larger historical and political context, up to and including the Arab Spring. We will use primary sources in translation and in Arabic (for those with reading proficiency). There are no language or other prerequisites for this class.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. Graduate students interested in this course should take Religion 1080 (Modern States, Islam, and Politics) instead. Sections offered in English or Arabic.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. Criminal trials have served throughout history to enforce revolutionary change, to impose conformity and stifle dissent, or, alternatively, to advance democracy. Students examine trials in their historical and moral context to weigh such issues as who can prosecute; can crimes be defined after the fact; can punishing speech be justified? Cases include Socrates, Louis XVI, General Dyer, the Soviet purges, Nuremberg, Eichmann, American cold-war hearings, and today's international tribunals and truth commissions.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Self, Freedom, and Existence (118771)

Richard Moran

2016 Fall (4 Credits)

Schedule:

MW 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How is human freedom possible? Does acting freely mean acting in accordance with reasons or acting arbitrarily, or neither? Are values chosen, discovered, or invented? How is self-knowledge possible and how is it different from the knowledge of others? Specific issues to be discussed include: self-deception and bad faith; the nature of freedom and autonomy; subjectivity and our relation to others; rationality and irrationality. Readings, which will provide an introduction to a few of the major texts of Existentialism, will be drawn from Kant, Sartre, Dostoevsky, and various contemporary writers.

Class Notes:

Occasional Fridays are required. Please check course syllabus for details.

Classical Chinese Ethical and Political Theory (121778)

Michael J. Puett

2016 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What is the best way to live a fuller and more ethical life? Concretely what should we do to begin to live in a more flourishing and inspiring way? Questions such as these were at the heart of philosophical debates in China. The answers that classical Chinese thinkers developed in response to these questions are among the most powerful in human history. Regardless of whether one agrees with them or not, they should be studied and taken seriously by anyone who cares about ethics, politics, and the ways to live life more fully.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Philosopher and the Tyrant (107880)

David Damrosch

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Philosophers and politicians alike struggle to set the terms for living a good life in a world of conflict. How do court counselors and professional philosophers speak truth to power? How do rulers - and citizens like ourselves - weigh the competing demands of liberty and order, self-fulfillment and self-restraint? Moving from Plato and the *Bible* to responses to Hitler's *Mein Kampf*, this course will examine particularly rich examples of relations between the pursuit of wisdom and the pursuit of power, from the extremes of conflict (the executions of Socrates, Han Fei, Jesus, Sir Thomas More) to the opposite dream of the philosopher king.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Security: Carefree or Careless (108398)

John T. Hamilton

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The term "security" has enjoyed a complex and ambivalent career. Broadly defined as a "removal of care," security leaves its subjects either carefree or careless. Pursuing an itinerary from the Stoics to psychoanalysis, from international relations to feminist theory, the course draws out the ethical implications of the persistent concern to be free of concern. Does "security" make us vigilant or negligent, confident or complacent? Does it promote more fear than it assuages? Is a security purchased with freedom or human rights morally viable? Such questions broach a more informed, nuanced, and critical engagement concerning our civic, professional and personal lives.

Medical Ethics and History (108405)

David Shumway Jones

2016 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Disease and medicine have generated ethical dilemmas that have challenged patients and doctors for centuries, from abortion and euthanasia to informed consent and compulsory treatment. Although moral philosophy can clarify the relevant issues, resolution often depends on the details of the specific clinical and social contexts. Taking a historical approach to medical ethics, this class explores how the moral discourse in health care has changed over time in order to understand how social factors influence the persuasiveness of moral arguments. The focus will be on medical practice in the United States in the twentieth century.

Capitalism organizes society around individual pursuits of material gain. Capitalism seems to have won the great ideological struggle with other ways of organizing society. But there is much discontent: the Occupy Movement made clear that even Americans now care about excessive inequality, and many worry about the future in an increasingly economically divided society where access to technology richly rewards some to the exclusion of many others. Capitalism is also closely associated with what is arguably the biggest policy problem of the 21st century: climate change. So how can we justify capitalism? And what are feasible alternative ways of organizing society?

Sex and Ethical Reasoning (161179)

Mark Jordan

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

170

"Immorality" once meant sexual misconduct, especially by women. Now many people are unclear whether ethics can say anything convincing about sex at all. Such rapid change in ethical views makes sex a very good place to think about how ethical reasoning develops and how it might matter to our lives. We will study the historical shifts and current ranges of some American controversies about sex, including sexual identity, rape or assault, adultery or polyamory, prostitution, pornography, and online sex. You will then be encouraged to use these cases to clarify and critique your own sexual ethics.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Intermediate Swedish: Childhood in Swedish Literature and Culture (112472)

Agnes Broome

2016 Fall (4 Credits)

Schedule:

MTWR 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Sweden and Swedish Finland have produced some of the most translated and beloved works of children's fiction in the world. In this intermediate Swedish language course, we will review the essentials of Swedish grammar and vocabulary as we explore some of these classic works of children's fiction, film, and comic books and the aspects of Swedish culture they illuminate. The final project for this class involves producing your own work of children's fiction or film.

Course Notes: Conducted in Swedish. Not open to auditors.

Prerequisite: Swedish Ab or equivalent.

Recommended Prep: Swedish Ab or equivalent.

Special Topics in Swedish Literature and Culture: Women of Letters (112953)

Agnes Broome

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In this fourth semester Swedish course, the theme is immigration and emigration from a Swedish perspective. We will be studying the Swedish emigration to America in the 19th century, both in fiction and through letters sent home to Sweden, the so-called amerikabrev. Modern day immigration will be discussed through recent authors who have written about their experiences moving to Sweden. We will also be following the political debate about immigration through reading news stories and opinion pieces.

Course Notes: Conducted in Swedish.

Prerequisite: Swedish Ba or equivalent.

Recommended Prep: Swedish Ba or equivalent.

Special Topics in Swedish Literature and Culture: Migration and Identity (203488)

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0329 PM

R 0300 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

30

The second term of intermediate Swedish takes as its theme migration and identity from a Swedish perspective. Through literature, film and media, students will explore how emigration and immigration has helped shape Swedish identity and culture, both historically and in our own times. Particular emphasis will be placed on gaining a deeper understanding of today's diverse, multi-ethnic Sweden and the debates, growth and challenges to which immigration has given rise in recent years.

Course Notes: Conducted in Swedish. Prerequisite: Swedish Ba or equivalent.

Environment Matters: Green Thought in the German-Speaking World (203479)

Fatima Naqvi-Peters

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

The German-speaking world has long been known for its ecological concern and green credentials. Myriad films and novels from the post-1945 period deal with the degradation of the environment and the concomitant threat to human life. In this course we will look at novels from and about the former East Germany, newspaper and journal articles about the Green Party in West Germany, and both German and Austrian fiction films and documentaries dealing with the fragile state of the global environment. What kinds of formal features do these texts evince? Do they at times suggest a counter-argument to the large-scale destruction they depict? Do they actually promote an "ecology of images" (Sontag)? How do these texts relate their narratives of environmental damage to post-colonial politics or to international economic policies? How has the recent rise of "extreme cinema" influenced the kinds of films being made about such topics? Finally, do the films privilege a peripheral perspective and, if so, does this offer certain advantages? Texts by Heidegger, Adorno and Horkheimer, Mitscherlich, Sontag, Johnson, Maron, Wolf; films by Herzog, Wenders, Geyrhalter, Glawogger, Sauper, Maurer, Haneke, Seidl.

This course examines geographical, political and literary border-crossings within German-speaking Europe. We will explore how the notion of border crossings has been articulated in the small form, including poetry, the short story, the newspaper article, film, and visual art. Topics include literary projections of America (Kafka, Kracauer), exile communities before and during the Second World War (Zweig, Sebald), the Berlin Wall and German division (Grass, Schlöndorff, Schneider), multiculturalism in contemporary Germany, Austria, and Switzerland (Özdamar, Zaimoğlu), the current refugee crisis (Erpenbeck), and multilingual experimentation (Herta Müller, Pastior, Tawada).

German Literature, Culture, and Society (159603)

Anna Horakova

2016 Fall (4 Credits)

Schedule: MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: 30

This course examines the major social-political trends and tensions that have informed literature and culture in the German-speaking countries. Students will develop the language skills to discuss, analyze, and interpret a variety of texts and cultural phenomena from the 18th to the 21st centuries, with special attention to social theory and political critique. Our readings and discussions are organized around pairs of thinkers who address the same issues from a different time, place, angle, or genre. Further emphasis is placed on the history of ideas and how it contributes to current issues and debates. Paired readings may include Kant and Kleist, Freud and Kafka, Benjamin and Brecht, Böll and Celan, Seghers and Wolf.

Course Notes: Readings and discussion in German.

German Literature, Art, and Thought (159710)

Nicole Suetterlin

2017 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

This course explores the major trends and tensions that have informed German literature, art and thought from the 18th to the 21st centuries. In addition to developing the language skills to discuss, analyze and interpret literature, students will explore the rich cultural tradition in the German-speaking countries and its continued relevance for the world. Figures include: Kant, Goethe, Nietzsche, Freud, Benn, Kafka, Celan,

Beethoven, and Wagner, plus a selection of writers from the post-War period.

Understanding Beethoven (203284)

Peter Gordon

Alexander Rehding

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This undergraduate seminar, co-taught by two professors, combines historical, cultural, and musicological approaches so as to develop a deepened understanding and appreciation of Beethoven's music, assessing its intrinsic character while also placing it in German cultural, intellectual, and political history. The course does not require extensive musicological knowledge, but an understanding of basic music theory and music history will be presumed. Students will be required to attend performances by the Parker String Quartet, and there will be at least one class-trip to a performance at the Boston Symphony Orchestra. The course counts for credit in either history or music or German.

Course Notes:

This course is also offered through the Music Department as MUS 192r

and the History Department as HIST 13k. Credit may be earned for only one of the following: German 134, Music 192r, or History 13K.

Additional Course Attributes:

This course examines the history of Germans in Europe and elsewhere, starting with the revolutions of 1848 and ending with the separation of Austria, West Germany, and East Germany following the Second World War. We will consider multiple different visions of what "Germany" should be, what borders it should have, and who should be considered "German."

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. This course is also offered through the History Department as History 1265. Credit may be earned for either History 1265 or German 143, but not both.

German 176 Section: 1

Staging War: Representations of Violence and Conflict in Drama and Theater (203279)

Michael Auer

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None**Enrollment Cap:**

30

Ever since Homer's epic *Iliad*, war has been a prominent subject of literature. Drama plays a particularly interesting role in this respect as it is faced with the problem of how to represent battle and warfare: to stage it by bodily action or by mere narration. In fact, throughout the centuries the immediate presentation of violence was seen as a threat to theater and its auditorium as it introduces dissent, strife, and violence to the center of the community. This is why Hegel famously sees drama as an ideal medium for (the representation of) domestic wars and civil strife. And it is why the strategies ancient Greek drama developed to keep such dangers at bay have proven so long living. The use of techniques such as the messenger report, *teichoscopy* or the *synecdoche* in representative protagonists remains remarkably stable until well into the 20th century -- and that in spite of a great number of technological, aesthetic, political, and social developments. In this class we will pursue the strategies of bringing war on stage and of keeping war off stage in German drama and theater. Before turning to the pivotal years around 1800 (Schiller, Goethe, Kleist, and Grabbe) we will establish the historical background by, firstly, identifying the main strategies in Aeschylus and, then, juxtaposing two early modern models that were highly influential on the later German authors: Racine's and Shakespeare's. With Bertolt Brecht, Heiner Müller, and Elfriede Jelinek we will, finally, discuss how twentieth-century theater positions itself in relation to these classical texts, both German and non-German, and show how the old strategies are put to new theatrical and ideological uses."

Engineering Texts: Avantgardes in Twentieth-Century Germany (203511)

Anna Horakova

2017 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

This seminar explores the intersections among art, science, and industry as they were thematized by

innovative strands of twentieth-century German culture. Topics will include the fascination of artists with the machine and the artificial human being at the dawn of the twentieth-century; the literary responses to the mechanized warfare of the First World War; the modern metropolis; media and politics in interwar Berlin; the architectural projects of the Third Reich; and the literature and culture of the divided Germany. The seminar will conclude by examining new possibilities afforded to German-speaking cultures with the arrival of cybernetics and the internet. Our readings and viewings will include Benjamin, Brecht, Kittler, Lang, Riefenstahl, Vostell, and others.

German 231 Section: 1

Schwarze Romantik (203225)

Nicole Suetterlin

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

The term "Schwarze Romantik" ("Dark Romanticism"), coined by Mario Praz in the 1930s, denotes a wide range of European literatures that draw on gothic motifs such as monsters, violence, and eroticism. Before and since Praz, the notion of a deviant Romantic literature has informed a number of fascinating aesthetic theories from *Ästhetik des Hässlichen* (Rosenkranz) to *Ästhetik des Horrors* (Brittnacher), *Ästhetik des Ekels* (Menninghaus), and *Ästhetik des Schmerzes* (Borgards). Focusing on German texts around 1800, this course explores "schwarzromantische" literature and its cultural implications. What larger epistemic shifts is this literature symptomatic of? Schwarze Romantik, thus our working hypothesis, is inextricably linked with developments such as the emergence of new sciences around 1800 (anthropology, biology, psychology, psychiatry), changes in penal law and the concomitant rise of criminology, shifts in societal and political systems in the wake of the French Revolution, the advent of new media, and last but not least, the rise of experimental and characteristically 'modern' aesthetics. We also explore German Romanticism's relation to 18th-century aesthetics (Bodmer/Breitinger) and its impact on other literatures and arts (Poe, Baudelaire, surrealism), on 20th-century critical theory (Benjamin, Bakhtin, Foucault, de Man), psychoanalysis (Freud), media history (Kittler), and political theory (Carl Schmitt). Authors include Goethe, Schiller, Moritz, Novalis, Arnim, Brentano, Hoffmann, Tieck, Kleist, Büchner.

Course Notes:

Readings and discussions in German. Open to undergraduates with permission of instructor.

The Frankfurt School on Film and Mass Culture (203378)

Eric Rentschler

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This seminar considers the Frankfurt School's deliberations on film, radio, television, and mass culture. We will devote the majority of the course to three seminal figures: Siegfried Kracauer, Walter Benjamin, and T. W. Adorno. More generally, we will focus on the debates catalyzed by the emergence of modern mass media and an industrialized visual culture; we will also reflect on the pertinence of these debates for our own contemporary culture of media convergence.

Course Notes: This course is also offered through Visual and Environmental Studies as VES 289. Credit may be earned for either VES 289 or German 254, but not both.

Requirements: Anti-Req: Cannot be taken for credit if VES 289 is already complete

Architecture and the Literary Imagination from the 19th to the 21st Century (203294)

Fatima Naqvi-Peters

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

In German culture, a rich tradition of thought deals with the importance of architecture and urban planning

for human development and growth. This course seeks to retrace the outlines of this tradition, focusing on the 19th century to the present day. How does architecture respond to the pressing demand of housing humans in a manner adequate to the historical moment? How does literature reflect on and expand more abstract ideas on the built environment? After a brief foray into theoretical texts by Goethe and Hegel, we will look at realist works of the 19th century that outline a specific way of living as it is conducive to a young person's *Bildung* or education (Grillparzer, Stifter, Ebner-Eschenbach). At the turn of the 20th century, we will focus on the designs and writings of urban planners and architects such as Camillo Sitte, Otto Wagner, and Josef Hoffmann, as well as texts by Karl Kraus, Adolf Loos, Robert Musil and Arthur Schnitzler. In the 1920s and 1930s, we will turn our attention to the designs and theorizations of the German Bauhaus in conjunction with models and texts by Ludwig Wittgenstein, Adolf Loos, Josef Frank, and Zea Canetti. In the post-World War II period, a new theoretical discourse bemoans the overhasty development of both rural and urban areas. We will examine some of the writings of the neo-avantgardist architects of the "Austrian Phenomenon" (Hans Hollein, Walter Pichler) in conjunction with prose by Thomas Bernhard. Finally, we look at "parametric" architecture (Zaha Hadid) and experimental literature (Brigitta Falkner, Elfriede Jelinek).

Course Notes: Conducted in English.

Voice, Affect, Subversion. The German and English Ode around 1800. (203426)

Michael Auer

2016 Fall (4 Credits)

Schedule:

W 1100 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

According to Friedrich Kittler, the discursive network 1800 produces a medial voice suggesting a hallucinatory immediacy. In this seminar we will apply Kittler's insight to the "lyrisches Ich" established in late eighteenth- and early nineteenth-century Germany and compare it to the "universal voice" simultaneously developed in England. The ode has always been understood as the medium of a common voice engendered, and sustained, by a shared affect, redefined when a new circuit of production, distribution, and consumption supplements the classical rhetoric of amplification by a medial amplification. In reconstructing these historical developments, we shall pursue the new aesthetic and political configurations they give rise to, and determine how the two traditions interact and can be contrasted from one another. Of particular interest is how the medially amplified affective voice subverts traditional rhetorical gestures of amplification, and at what point this voice itself fails.

The Quality of Health Care in America (114957)

Ashish Jha

Anupam Jena

2017 Spring (4 Credits)

Schedule:

MW 0330 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

42

Offers information and experiences regarding most important issues and challenges in health care quality. Overview of the dimensions of quality of care, including outcomes, overuse, underuse, variation in practice patterns, errors and threats to patient safety, service flaws, and forms of waste. Each session focuses on one specific issue, exploring patterns of performance, data sources, costs, causes, and remedies. Explores desirable properties of health care systems that perform at high levels in many dimensions of quality.

Course Notes: Lotteried course, enrollment limited to 42.

Negotiation and Conflict Management: From the Interpersonal to the International (107669)

Daniel Shapiro

2016 Fall (4 Credits)

Schedule:

M 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

How can you best negotiate conflict in your own life? How should policymakers negotiate global conflict? Around the world, conflict imposes profound direct and indirect costs on global health and individual well-being, ranging from death and injury to trauma, the loss of social networks, and destabilization of political systems. Rather than focusing on how to address the aftermath of conflict and violence, this course examines theory and practical methods to prevent destructive conflict. Explores theory, frameworks, and tools developed to negotiate the substantive, emotional, and identity-based dimensions of conflict. Applies the theory to a diversity of real-life negotiations, ranging from interpersonal disputes between friends to international conflicts in the Middle East and elsewhere.

This highly interactive course aims to improve students' skill in resolving conflicts, and draws on a variety of learning methodologies, including lecture, case simulations, self-reflection exercises, and application of negotiation frameworks to conflicts depicted in movies. Students will have the opportunity to analyze firsthand case narratives of senior-level global leaders who have negotiated serious conflicts; these cases are part of an emerging Global Curriculum on Conflict Management spearheaded by the instructor, the Harvard International Negotiation Program, and the World Economic Forum.

Global Response to Disasters and Refugee Crises (161268)

Stephanie Kayden

Michael VanRooyen

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Climate change, urbanization, and conflict mean that global disasters are on the rise. How should the world respond when disasters force people from their homes? How can we better help the world's refugees? This course examines the past, present, and future of the international humanitarian response system. We will explore how Doctors Without Borders, the United Nations, the Red Cross, and other aid agencies came to be and how global response standards, international humanitarian law, and new technologies are shaping worldwide disaster relief.

Through interactive discussions and case studies, students will learn how aid workers interact with governments, militaries, and civil society to provide refugee aid. At the end of the course, students can choose to live the refugee experience during a large-scale, weekend outdoor simulated humanitarian response training program together with other students and professional aid workers from around the world.

Course Notes: Lotteried course, enrollment limited to 25.

Re-imagining Health Care: Effective Altruism and Beyond (204456)

Nir Eyal

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Real-world health systems are a mess. They stem from the successful or failed efforts of multiple constituencies with different medical, political, and economic priorities over many years. But what does an ethical health system aspire to achieve in the first place? Does it, for example, seek only to reduce premature death and disability, or also to distribute these burdens more equally? Does it make economic calculations, or emphatically reject putting a dollar sign over human lives? When resources are scarce, does a fair system prioritize patients in the prime of their lives over ones who have already had their "fair share" of life years? Should extra priority go to those who have suffered from severe disability for years—current practice notwithstanding? Students in this seminar will re-think what a health system should try to achieve—an important input toward reforming real-world health systems.

The seminar will start with a practical decision: an independent donor has offered your group \$25,000 for charity, and you will debate over two sessions which charity will receive it. To reach a decision, you will evaluate arguments for and against "effective altruism." The seminar will then build on these insights to tackle, over ten sessions, a larger question: What are the philosophical contours of an ideal health system? A final meeting will examine how this characterization of ethical health systems may have changed your minds about what charity to support. You will then select the winning charity.

Instructor Permissions: Instructor

Enrollment Cap:

45

Explores research topics and methods that are critical to evaluating current issues in national and global health care policy. Students will develop and execute an original research project that utilizes quantitative or qualitative research approaches to studying a domestic and global health policy topic of their interest. Such topics may include: the elements of health care reform, cost containment, quality measurement and improvement, racial and ethnic disparities in care, politics of health care, comparative health systems, global health, and organizational influences on quality.

Course Notes:

This course fulfills the research requirement of the Secondary Field in Global Health and Health Policy and enrollment is ordinarily limited to seniors in the GHHP Secondary Field. Underclass GHHP students may petition to take the course if all other Secondary Field requirements have been met. Course is primarily taught by graduate students in the PhD in Health Policy program and guest lecturers. May not be taken pass/fail.

Foundations of Political Theory (124414)

Eric Beerbohm

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course investigates the central problems of political theory that concern the justification of democracy. Is democratic rule the uniquely just form of collective decision-making? What political institutions best express the democratic values of equality, deliberation, and participation? What are the moral responsibilities of citizens - whose representatives exercise political power in their name? Is democracy a human right? Readings integrate contemporary work in political philosophy with canonical thinkers, including Plato, Aristotle, Rousseau, and J.S. Mill.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

American Government: A New Perspective (111813)

Paul Peterson

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Provides an overview of contemporary American politics. It analyses the way in which recent changes in elections and media coverage have helped shape key aspects of American government, including the courts, Congress, and the Presidency, the workings of interest groups and political parties, and, also, the making of public policy. Permanent political campaigns have altered governmental institutions and processes. The course explains how and why.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for United States in the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Enrollment Cap: n/a

This class will introduce students to techniques used for research in the study of politics. Students will learn to think systematically about research design and causality, how data and theory fit together, and how to measure the quantities we care about. Students will learn a `toolbox' of methods---including statistical software---that enable them to execute their research plans. This class is highly recommended for those planning to write a senior thesis.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course must be taken for letter grade.

Research Practice in Quantitative Methods (108286)

Michael Peress

2016 Fall (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This class introduces students to a variety of statistical methods used to investigate political phenomena. We will address the principles behind these methods, their application, and their limitations. The course will be useful to those undertaking a quantitative methods thesis in Government, but not solely. Indeed, the course aims to provide anyone interested in political science with a proficient understanding of the intuitions behind several of the methods used to analyze political data and identify causal paths. By the end of the course, students will have acquired important analytical and practical skills and will be able to evaluate the quality and reliability of scholarly and journalistic work done using quantitative methods. Students will learn statistical software skills (STATA). For the course's final assignment, students will be given the choice between writing a research paper using data and writing a different kind of project more suitable to those who are not interested in writing a quantitative research paper.

With the goal of preparing students to undertake original research, this course introduces students to basic principles and tools of qualitative research in the social sciences. Focus is on comparative research design and the principal tools of qualitative research. Topics examined include the pitfalls of selection bias, the logic of causal inference, measurement and conceptualization, and the potential of mixed methods. Research techniques covered are process tracing, analytic narratives, natural experiments, archival research, interviews, and ethnography.

How to Write About Politics: A Practicum (203655)

Yascha Mounk

2017 Spring (4 Credits)

Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

How can you convey insights from political science to a wider audience? In this course, we explore how to use both analytical and narrative techniques to animate an important topic; to convey a scientific finding; or to express a considered opinion. To this end, we discuss the core components of excellent political writing and workshop ideas and drafts for op-eds, long-form narratives, policy analyses as well as works of data and explainer journalism by members of the class. Readings include Jamelle Bouie, Ta-Nehisi Coates, Jeffrey Goldberg, Jill Lepore, George Orwell, Anne-Marie Slaughter, E. H. Smith, and David Foster Wallace.

The Politics of Citizenship and Naturalization (203859)

Colin Brown

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This course seeks to examine the very different conceptions of citizenship in different states and at different times, particularly through the lens of migration. What does being a citizen of a state mean in a modern sense, and why is it the focus of so much of the current European and American debate over migration? How are policies about who belongs and who becomes a citizen determined? How has naturalization policy changed over time, and how have debates over citizenship and migration changed the overall political system? Multiculturalism and its effects on the citizenship debate are also examined, and the course ends with a look at transnationalism and other phenomenon that may continue to change the nature of migration and citizenship.

Comparing India and China: An Examination of State-Society Relations (160335)

Nara Dillon

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

In the late 1940s, India witnessed a peaceful transition to democracy, while China experienced a Communist revolution. After this divergence, both countries began pursuing market reforms in the effort to accelerate economic growth in the 1980s and 1990s. We will explore the ways in which power has been consolidated and distributed under these very different regimes and the implications this has had for a

range of socio-political and economic outcomes, including famine, economic development, and urbanization. Throughout the course we will place India and China in the context of comparative debates about other parts of the developing world.

The Theory and Politics of Constitutions (203523)

Jonathan Bruno

2017 Spring (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Constitutions are everywhere. In the U.S., the federal constitution frames and scaffolds almost every civic question we face. Yet we rarely consider what the constitution—or any constitution—is actually supposed to accomplish. What are its aims, and how (if at all) should it structure politics? How are constitutions made, and how do they change? What is the significance of national constitutions in a globalized world? Sitting at the crossroads of political theory, comparative politics, and public law, this seminar explores such questions using contemporary readings and case studies.

From Voice to Influence: Understanding Citizenship in a Digital Age (203475)

Danielle Allen

Chaebong Nam

2016 Fall (4 Credits)

Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

How we gather information about current events and communicate it with others has been transformed by the rapid rise of digital and social media platforms. The political is no longer confined to the institutional and electoral arenas and that has profound implications for how we understand civic agency and political participation. This course will introduce students to an array of research and concepts that help clarify the political landscape in a digital age, as well as inviting them into close consideration of a set of design principles to guide effective, equitable, and self-protective civic agency in the contemporary

communications environment.

Is Democracy Possible Everywhere? (109743)

Daniel Ziblatt

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Is democracy an obtainable ideal in all societies? This course introduces students to political science and sociological theories of democratization and offers the opportunity to apply these theories to diverse contexts, including the contemporary Middle East, Africa, and East Asia, and the history of Latin America, the U.S., and Europe. The quality of democracy in today's rich capitalist societies such as the United States is also examined.

New European democracies: the 2016 Spanish democratic revolution in a comparative perspective (156725)

Jose Martinez sierra

2017 Spring (4 Credits)

Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

This seminar aims to develop an in-depth understanding of modern Democracy's discontent through the Spanish case study in a comparative perspective. In 40 years Spain has turned from being an exemplary model of transition to democracy to a leading example of disaffection with political and economic elites. The Indignados movement and two new political parties (Podemos and Ciudadanos) unexpectedly emerged and within two years have come to govern the largest cities (Barcelona, Madrid, and Valencia) and are becoming the most influential political parties in the most important regional governments (Andalucia, Madrid, and Valencia). Is this a model for democratic transformation in Europe? Can citizens really change traditional political party agendas or replace them?

Course Notes: This course will be conducted in Spanish.

The Politics and Ethics of Medical Care (109731)

Gabriel Katsh

2017 Spring (4 Credits)

Schedule: R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

This course is an introduction to medical ethics and the ways in which political theory can inform our understanding of the moral and political dimensions of medical care. Using case studies as a launching point, we will explore ideas about autonomy, paternalism, beneficence, and distributive justice, and their application to issues such as informed consent, euthanasia, the right to refuse care, the distribution of scarce resources, and conflicts between patient rights and the public good.

Inhuman Wrongs: Crimes Against Humanity in Theory, Politics, and Law (125015)

Cheryl Brown Welch

2016 Fall (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

After considering some analytical perspectives on extraordinary cruelty in modern political thought-on abuses whose wrongness has been called "morally overdetermined"-we turn to nineteenth-century cases of scandals against humanity: slavery, extermination, barbarous warfare. We then trace the legalization of the metaphor of a crime against humanity in the twentieth century and consider contemporary debates about how to prevent, punish, or repair inhuman wrongs.

Inequality and American Democracy (125211)

Theda Skocpol

2017 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

The "rights revolutions" of the 1960s and 1970s removed barriers to full citizenship for African Americans, women, and other formerly marginalized groups. But inequalities of wealth and income have grown since the 1970s. How do changing social and economic inequalities influence American democracy? This seminar explores empirical research and normative debates about political participation, about government responsiveness to citizen preferences, and about the impact of public policies on social opportunity and citizen participation.

Educational Justice (204038)

Meira Levinson

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1159 AM

Instructor Permissions: Instructor**Enrollment Cap:**

30

Educators and educational policy makers regularly face challenging ethical decisions. For example, what should be done about a student with diagnosed emotional issues who frequently disrupts class, but who benefits from being mainstreamed? Should teachers resist grade inflation even if it helps their students in the college and labor market? Is it just to expand a charter school that achieves outstanding academic outcomes at the cost of high attrition rates? When school closure or teacher evaluation policies disproportionately impact low-income communities of color, is that in itself evidence of an injustice that must be addressed? These kinds of questions are often addressed as technocratic challenges of leadership, legal compliance, or accountability. This course, by contrast, addresses the ethical dimensions of educational practice and policy, with justice as our primary focus. We will engage with philosophical, theoretical, and empirical readings from a wide variety of disciplines. We will also grapple with case studies of dilemmas of educational justice from classrooms, schools, districts, and organizations in the United States and abroad. Our goals will be to deepen our own understandings of educational justice, to engage with others about complex ethical judgments across multiple lines of difference, and to learn how to enhance educators' and policymakers' capacities to make ethical decisions under challenging conditions.

History and Freedom in German Idealism (123540)

Michael Rosen

2016 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

The high period of German Idealism (from 1781, the date of the publication of Kant's Critique of Pure Reason, to the death of Hegel in 1831) is one of the most revolutionary in the history of philosophy. We shall study the period using the central ideas of history and freedom as our guide and trace how modern ideas regarding freedom, the self, and the historical character of knowledge have their origins in the

Idealists' thought.

The Future of Europe (126486)

Jose Maria Beneyto

2017 Spring (4 Credits)

Schedule:

TR 0845 AM - 0959 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Is the European Union facing an "existential" crisis? A significant number of political leaders and analysts have expressed their concern about the current status and projects of the European Union. What started off as a very promising process towards European unity after WWII, and continued for many years as such, is today facing a wide range of serious challenges, from the economic to the political, and from the social to the cultural. The European Union remains, however, a cornerstone of European stability and economic prosperity, and its legacy is undisputed. This course examines such key issues for the future of the Continent as the underlying cultural changes in European societies, the difficulties Europe faces in combining sustained economic growth with reforms and technological adjustment, the challenge of populism from right and left, and how Europe can achieve its ambitions of becoming an effective geopolitical actor in the face of Russia's assertiveness and the threat of terrorism. The course will also discuss proposals for institutional reform and social and political innovation. It will appeal to all those who wish to acquire a comprehensive understanding of the crossroads at which Europe now finds itself.

Elections are the foundation of American democracy. This course focuses on the simple questions: Who wins elections and why? Answers to these questions guide the interpretation of elections and evaluation of how well government represents the public preferences. The first half of the course presents the basic

explanations and models of elections and voting behavior, and asks students to make their best forecast of the election. The second half of the course will examine why the models worked or didn't work. Students will learn how to interpret and analyze surveys and other data, to estimate models and make forecasts, and test arguments and models using predictions.

This course is both a simple introduction to game theory, and a literature review of game theoretical approaches to the study of international conflict and war. Game theory is a tool for analyzing strategic interaction between rational actors. The course will feature games like the Prisoners' Dilemma, the Chicken, and models of bargaining. Students will learn how these and related tools can be used to understand and analyze historical and current instances of international conflict. Specifically, we will try to answer questions like: why do states fight costly wars in international relations? Why do peaceful negotiations fail? How does deterrence work? Why do states get into costly arms races? How does domestic politics shape international conflict?

The International Relations of East Asia (119485)

Alastair Johnston

2017 Spring (4 Credits)

Schedule:

MW 0200 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

50

What are the main characteristics of international relations in East Asia? Are these distinctive? How ^^^stable" are inter-state relations in the region? How does one explain changing levels of conflict and cooperation in the region over time? How useful are Euro-centric international relations theories in understanding East Asia? This course examines the effects of changing distributions of strategic power, economic development and trade liberalization, multilateral institutional development, political development and democratization, and cultural convergence/divergence on conflict and cooperation in East Asia.

Central Challenges of American National Security, Strategy, and the Press (113210)

Graham Allison

David Sanger

2016 Fall (4 Credits)

Schedule: M 0415 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

Using a series of case studies from the front page, and from the most urgent issues on the U.S. national security agenda, this course will engage students in grappling with the hardest American national security challenges of the decade ahead. Issues range from the Arab Awakening and intervention in civil wars to combating Iran's nuclear ambitions and dealing with the economic and military rise of China. Assignments require strategic thinking: analyzing dynamics of issues and developing strategies in a government whose deliberations are discombobulated by leaks, reports about internal differences among policymakers, and press analyses. Students will learn to devise strategies and write strategic options memos as participants in the policymaking process. Strategic options memos combine careful analysis and strategic imagination, on the one hand, with the necessity to communicate to major constituencies in order to sustain public support, on the other. A subtheme of the course explores coping with a world where a pervasive press makes secrecy more often the exception than the rule. In each case, there will be exploration of how media coverage affects decision making, with an examination of WikiLeaks, the revelations about drones and secret, American-led cyberattacks, and other examples of the publication of classified information. Because of time constraints, Mr. Sanger will be joining a limited number of class sessions, and will join some remotely.

Course Notes: Offered jointly with the Kennedy School as IGA-211.

Class Notes: IR_subfield

Course location: LAND Hall, HKS

Optional Shopping Day: Monday, August 29th from 4:15-5:30pm in LAND.

Additional class Wednesday, September 7th from 4:15-6pm in L140 at the Kennedy School (strongly encouraged).

Causal Inference (111530)

Michael Peress

2016 Fall (4 Credits)

Schedule: T 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap: n/a

Substantive questions in empirical social science research are often causal. Does voter outreach increase turnout? Do political institutions affect economic development? Are job training programs effective? This class will introduce students to both the statistical theory and practice behind making these kinds of causal inferences. We will cover causal identification, potential outcomes, experiments, matching, regression, difference-in-differences, instrumental variables estimation, regression discontinuity designs, sensitivity analysis, dynamic causal inference, and more. The course will draw upon examples from political science, economics, sociology, law, public health, and public policy.

Liberalism and Theodicy (125905)

Eric Nelson

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course will investigate the theological origins of what we have come to call "liberal" political philosophy. In particular, it will explore the degree to which central liberal commitments—to the freedom of the will, religious toleration, and political liberty—emerged as responses to the problem of "theodicy" (the challenge of vindicating God's justice, given the manifold evils present in the world). Throughout, we will be seeking to understand the fraught relationship between contemporary egalitarianism and the early-modern liberal tradition. Readings will include Grotius, Milton, Locke, Leibniz, Rousseau, Kant, Rawls, Dworkin, and Cohen.

Class Notes:

Open to graduate students and qualified undergraduates

Party System Institutionalization, Decay, and Collapse (203550)

Scott Mainwaring

2017 Spring (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This course will examine the building, decay, and collapse of political parties and party systems, as well as the consequences of these processes. In 1942, the well known political scientist E. E. Schattschneider famously wrote that "Political parties created modern democracy and modern democracy is unthinkable save in terms of the parties." When we survey the world's democratic and semi-democratic polities, however, outside of the advanced industrial democracies, many have weak parties and inchoate party systems. In many countries, once powerful parties have disappeared. In other third and fourth wave democracies, solid parties underpin solid democracies, just as Schattschneider expected. What accounts for successful party building and for the institutionalization of a party system? What accounts for the collapse of major parties and even entire party systems? Why do parties remain weak in some democracies and semi-democracies? How does the institutionalization of parties under authoritarian rule affect the political regime? These are some of the questions we will grapple with.

2017 Spring (4 Credits)

Schedule: M 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course is a graduate-level research seminar in international security studies. The course has two related goals: to introduce students to interesting research and debates in the field, and to help each student to initiate a research project in this area.

Requirements: Course open to Doctoral Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Government 3000A

Reading and Research (113694)

2017 Spring (4 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual work. Must be arranged with a professor listed under Government 3000. Requires written work; it involves meetings as arranged between professor and graduate student.

Class Notes:

Members of the Department

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Government 3000A

Reading and Research Seminar (113694)

James Alt

2016 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Small seminar on special topics. May be arranged with faculty listed under Government 3000. Requires written work as does Government 3000, but also involves regular class meetings.

Class Notes:

Members of the Department

History

Subject: History

History 13H

Jewish Identity in the Modern World (203043)

Derek Penslar

2016 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course offers an extended exploration of the construction of modern Jewish selfhood and the relationship between religiosity, secularization, individualism, and collectivism in modern Jewish history. Covering Europe, Asia, and the Americas, we will discuss the Jewish Enlightenment (Haskalah), 19th-century movements to reform and reframe Judaism, acculturation and assimilation, conversion, diaspora nationalism, and Zionism. Our readings will blend memoir and literature with historical scholarship. Requirements include active participation, three response essays, and a research essay.

Intimate Frontiers: Gender, Sexuality and the Settlement of Australia (203039)

Penelope Russell

2017 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This unit explores the significance of gender and sexuality in the making of a settler society. With a specific focus on Australia, it opens up themes of cross-cultural encounter, domestic disharmony, prostitution, citizenship, modernity and power that have general and comparative application. It will familiarise students with Australia's rich feminist historiography and acquaint them with wider themes in its national and transnational history.

Understanding Beethoven (203019)

Peter Gordon

Alexander Rehding

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

This undergraduate seminar, co-taught by two professors, combines historical, cultural, and musicological approaches so as to develop a deepened understanding and appreciation of Beethoven's music, assessing its intrinsic character while also placing it in German cultural, intellectual, and political history. The course does not require extensive musicological knowledge, but an understanding of basic music theory and music history will be presumed. Students will be required to attend performances by the Parker String Quartet, and there will be at least one class-trip to a performance at the Boston Symphony Orchestra. The course counts for credit in either history or music.

Course Notes:

Counts for credit as one of the following: German 134, History 13K or Music 192r.

Additional Course Attributes:

Attribute	Value(s)

From Tattoos to Torture: Body Modification in History (203425)

Jake Ransohoff

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

From tattoos and piercings to haircuts and high heels, we modify our bodies every day in ways both large and small. This seminar examines practices of body modification from prehistory to the present, analyzing the ways body modification is intertwined with community formation, identity, gender, rites of passage, political economy, freedom and slavery, and ritual purity. Weekly readings introduce students to body modification in a wide array of historical contexts, as well as to changing ideas about body modification over time. Students will compose an original research paper on a topic of their choice related to themes of the course.

History 13M

Fascists, Communists, and Democrats: Contesting Power in Interwar Europe (203478)

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar explores political life in interwar Europe. Beginning with the Treaty of Versailles and ending on the eve of the Second World War, this course examines many ways in which power was contested. We will not only discuss the Nazis, Communists, and other large political movements, but we will move beyond traditional party politics to think about power dynamics at the local level of towns and on the global stage in international organizations. Students will build skills for understanding political history more broadly that they can use for future coursework or a senior thesis.

American Immigration (203429)

Shaun Nichols

2016 Fall (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Immigration has emerged as one of the most vexing and stubborn political debates in America today. Through readings and discussions of key works spanning the American immigrant experience since the late-nineteenth century, this seminar introduces students to the main themes and debates surrounding American immigration: the catalysts of migration and return migration, xenophobia, race, assimilation, labor, as well as the legislative history of border-making and immigration control. The seminar will finish with an analysis of immigration today, looking to the ways in which an understanding of the history of immigration might help shape how we think about current policies.

History 13O

When the Bottom Falls Out: The History of Economic Crisis in America (203430)

Shaun Nichols

2017 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course engages in an interdisciplinary inquiry into the checkered history of economic crisis in America, spending each week analyzing the circumstances surrounding (and consequences arising from) twelve of the most spectacular economic catastrophes in American history: the panics/depressions/recessions of 1785, 1792, 1819, 1837, 1857, 1873, 1893, 1907, 1929, 1938, 1973, and 2008. Assigned readings will span both philosophical and theoretical works on economic crisis; monographs in business, economic, and labor history; primary sources in art, literature, music, and oral history; and recent work in contemporary economics, political science, and legal studies.

History 13P

Race & Riots in American History, 1600-Present (203427)

Andrew Pope

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The course will examine the history of riots in America from the 1600s to the present. The course takes an expansive interpretation of what constitutes a riot in an effort to study the circumstances under which protests and rebellions are interpreted as riots. What a riot is, if a riot is distinct from a rebellion, and the politics of labeling actions a riot will all be subject to our scrutiny throughout the course. While race has been an important element to every riot in American history, most riots represented overlapping interests of race, gender, class, and even sexuality. As such, the course will consider riots that occurred in a variety of circumstances, including riots in response to racial restrictions, over-zealous police action, worsening poverty, and government interventions into private affairs.

Migration in South Asia, 1500-2000 (203874)

Catherine Warner

2017 Spring (4 Credits)

Schedule:

R 1100 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

How has migration shaped South Asia as a region across time? What distinguishes contemporary movements of people from pre-colonial circulation? How have ordinary people used mobility to negotiate colonial and post-colonial power structures? Beginning with the early modern period, this course will examine how migration has informed the cultures, politics, and social life of the subcontinent. Topics will include forced and voluntary migration, imperial circuits and labor, national border regimes, gender, information networks, diaspora, urbanization, and globalization. Students will investigate methods and theories of historical migration studies in order to shape their own research projects.

The Worlds of Joseph Conrad (127715)

Maya Jasanoff

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Anarchists, asylum-seekers, ivory-traders, gun-runners, sea captains, empire-builders and corporate agents gone rogue: welcome to the world of 1900 as described by Joseph Conrad, the greatest novelist to write about globalization as we recognize it today. Course explores the history of modern globalization using secondary works and Conrad novels including Heart of Darkness. Topics include race, immigration, multinational capitalism, and technological change; we also discuss the relationship between history and literature.

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The twentieth-century United States is a vibrant and flourishing field of historical study. The goal of this seminar is to introduce students to the central questions, problems and debates in the history of the "American century." Students will learn how the literature of history has developed through reading both

older and newer approaches. Readings focus on questions of politics, political culture, the state and social life. The course is both thematic and chronological (as well as necessarily selective). Students are expected to prepare well for seminar and to participate actively in discussion. Each class will begin with a brief introduction to the readings (no more than five minutes) by a member of the seminar. The idea here is for one student to take special responsibility for leading discussion, raising questions and problems posed by the reading.

This Old House: A Social and Environmental History (115630)

Laurel Ulrich

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course centers on the General Artemas Ward House, a Shrewsbury, Massachusetts property that came to Harvard in 1925 with a proviso that it be opened as a "public patriotic museum." Changes in the house between its initial construction in 1720 and its opening as a museum reflect broader themes in U.S. and world history, including settler-colonialism, revolution, western migration, and industrialization. Employing

a range of scholarly tools, including comparative research in other Harvard collections, students will help prepare new materials for interpretation. In addition to weekly meetings, the course features two half-day site visits to Shrewsbury and an optional excursion to the Harvard Forest. For more detail, see the course website.

"What is Intellectual History?" (109927)

David Armitage

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Intellectual historians study almost every period, place, and theme in human history: from classical times to the present, from Asia to the Americas, by examining philosophy and religion, social and political thought, literature and art, and other expressions of human agency and intention that range from ancient epics to graphic novels. This section will draw examples from a wide range of moments and regions to ask how intellectual history has developed as a field, what methods it uses, and how it can be distinguished from other forms of history even as it informs debates of interest to all historians.

Everything has a history, and the discipline of history has a particularly long and broad one. In this section we'll focus on ideas about how and why to study history and on the practices of historical research and writing as they have varied across different cultural contexts. In selected case studies we will consider who wrote and who read history, and how historians answered questions that we also ask ourselves today. E.g. What features are essential to a good historical account? Does the study of history teach moral lessons? How does history interact with memory?

"What is Environmental History?" (109929)

Ian J. Miller

2017 Spring (4 Credits)

Schedule:

T 1200 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This section gives new History concentrators an introduction to environmental history. Most historians leave the natural world out of the story, but environmental historians regard nature as the inescapable context for human history, including the human impact on nature. We will explore how the histories of the environment and of humans can (and perhaps should) be written together. Is there a "natural archive" which historians can consult in parallel with conventional libraries and archives? Do places have "biographies," just as people do? Can natural entities (mountains, dogs, rivers, microbes, climate) have "agency" in the same way human actors can?

"What is Imperial History?" (109930)

Dimitar Angelov

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Though empires have recently disappeared from the map, for historians these sprawling multi-ethnic, multi-confessional states remain crucial laboratories for the study of violence, power, ideology, aesthetics, and identity. This section will introduce students to the many ways historians define empires and interpret the experiences of those who inhabited them. How does one write the history of such diverse, expansive entities? How does imperial history incorporate the perspectives of disenfranchised, enslaved, and colonized peoples? What is its scale? How does the work of historians relate to images of empire generated through public commemoration and popular memory?

"What is Social History?" (203047)

Sidney Chalhoub

2017 Spring (4 Credits)

Schedule:

R 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

For a long time, the writing of history focused mainly on kings, politicians, landlords, slave owners, capitalists –that is, on those with the means to write letters, autobiographies, official documents. In the past decades, historians have increasingly studied the lives of people not apparently entitled to have their histories told: peasants, slaves, women, industrial workers. Social History is the study of the experiences of those who lived most or all of their lives submitted to the power and the oppression of others. What did these people do with what was done to them? What sources are there to investigate this question and how

should historians analyze them?

The American Revolutionary War (203018)

Jane Kamensky

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

This course explores the causes, experience, and consequences of the war known in the United States as the American Revolution. Treating the conflict as a multi-sided struggle, our vantage point will range among the thirteen rebellious colonies of the North American seaboard, the thirteen other colonies that comprised Britain's America, and the vast stretches of the American continent that lay outside Britain's domain, but were nonetheless embroiled in the bloody civil war that reshaped the first British Empire and resulted in the founding of the United States. We will also take in the view from London and elsewhere around the globe, as America's revolution remapped European alliances and colonial relationships among Europe, the Americas, Africa, and Asia. Our focus will largely center on the war itself, with only a brief foray into the politics and society of the early United States. We will try, whenever we can, to view history forward rather than backwards, thus exploring the contingencies, interdependencies, and possibilities that scholars too often flatten into a narrow, smooth road to American Independence.

Course Notes:

Our format consists of 3 parts hybrid lecture and discussion to one "laboratory," which will include small group work with objects and documents from the Harvard Archives, the Map Collection, and the Art Museums. This course, when taken for a letter grade, meets the General Education requirement for United States in the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The State of Israel in Comparative Perspective (203044)

Derek Penslar

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course addresses controversies surrounding the history of Zionism and the state of Israel. Central to these controversies are questions of comparison. Is Zionism a movement for collective liberation, like national movements of stateless or colonized peoples, or a variety of western colonialism? Does Israeli statecraft operate within a normal geopolitical spectrum, or is it unusually expansionist and aggressive? This course seeks to answer such questions through a broad and deep analysis that spans the 19th and

20th centuries, pays close attention to Israel's social and cultural history as well as high politics and military affairs, and imbeds modern Israel into multiple global contexts.

This course traces the continuum of socio-political and cultural developments in the Near East that led, over the course of three millennia, from stateless societies to the emergence of Assyria as the first empire in history. The class focuses on the long-term history of power centralisation, and the role of ideology and propaganda in overcoming resistance to this concentration of authority. The course material covers a broad evidentiary and chronological range. We will employ textual, visual, and archaeological sources to explore the evolution of the political and cultural landscape in the Near East and the Mediterranean, from the emergence of the first city-states in the late fourth millennium BCE to the early development of Roman imperial ideology around the start of the Common Era.

Vengeance and the Law in Medieval Europe (121661)

Daniel Smail

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course surveys habits of violence, vengeance, and peacemaking in medieval Europe, using an extensive array of primary sources. Is the spirit of vengeance a "primitive" emotion now removed from the world by our civilized habits of doing law? Or was medieval violence itself a legal process? How retributive is our own society and our own legal system? This course is designed for students interested in violence in the human past, pre-law students, and anyone curious about studying emotions in history. All students should expect vigorous in-class discussions touching on the many moral and ethical dimensions of law and violence.

The Silk Road: Recentering World History from Alexander the Great to Osama bin Laden (203353)

Gregory Afinogenov

2017 Spring (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This lecture course explores the pivotal world-historical role of the Silk Road that linked China to Central Asia, Persia, the Mediterranean, and Europe. From Greco-Buddhists to Christian Mongols and Chinese Muslims, this region has for thousands of years hosted an unparalleled diversity of cultures. It has also played a decisive role in the Islamic Golden Age, the Mongol conquests, and the nineteenth-century Great Game between Russia and Great Britain. The course will cover all aspects of the region's history from 400 BCE to the present, focusing on the ways it has shaped and continues to shape our world.

History 1144

The Renaissance in Florence (114065)

James Hankins

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

The Renaissance has been described by historians as a revival of antiquity, as a revolt against the Middle Ages, and as the beginning of the modern world. This course examines these claims in the context of a detailed examination of the society and culture of Florence, the most important Renaissance center, from the time of Dante to the time of Machiavelli.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

U.S. Foreign Policy in a Global Age (160977)

Fredrik Logevall

2017 Spring (4 Credits)

Schedule: MW 0115 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

The United States is the most powerful player on the international scene today, and is unlikely to relinquish that position any time soon. Understanding how and why this condition arose, and what it means for world

affairs today, is our concern in this course. The emphasis is on U.S. policymaking over the past century, with due attention to the international and domestic political context in which decisions were made. Issues to be explored include the tension between isolationism and interventionism and between unilateralism and multilateralism; the emergence of the U.S. as a superpower; the Soviet-American confrontation; the rise of presidential power in foreign affairs; the wars in Iraq and Afghanistan; and the nature of American power in today's world.

Course Notes: Offered jointly with the Kennedy School as IGA-217. The enrollment limit for FAS students is 20.

History of Sexuality in the Modern West (126552)

Nancy Cott

2016 Fall (4 Credits)

Schedule:

MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will examine sexual rules and behavior over four centuries in the U.S. and Europe, probing the making of sexual categories such as 'normal' and 'deviant', and asking how understandings of men and women as sexual beings have changed over time. A premise of the course is that human sexual behavior is malleable, and that understanding a society's values about what is right and wrong in sex sheds light on social relations as a whole. Likewise, modes of sexual regulation reveal a social order's priorities. We will consider how popular beliefs, dominant discourses on sexuality and modes of sexual regulation relate to assumptions about class, gender, race, and age.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

This lecture course will provide a survey of some of the major issues in the history of post-imperial China (1912-). Beginning with the decline of the Qing and the dramatic collapse of China's imperial system in 1911, the course shall examine how China has sought to redefine itself anew over the past one-hundred years. The revolutionary years of 1911, 1949, and 1978 will serve as our three fulcra, as we investigate how China has tussled with a variety of 'isms' (such as republicanism, militarism, nationalism, socialism, and state capitalism) in its pursuit of an appropriate system of governance and social organization. In so doing, we shall also explore the social, economic, cultural, and scientific changes wrought by these varied attempts at state-building.

The Middle East from 1750 to 1914 (160207)

Khaled Fahmy

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course offers a background to the emergence of the modern Middle East. It starts with a brief survey of the geography, demography and religions of the region around 1750. Topics covered include the transformations of the Ottoman state; Islamic reform movements; growing European economic, diplomatic, military and intellectual challenges; spread of nationalism; state formation in Egypt; and economic transformations in Anatolia, Greater Syria and Egypt. Also stressed are the ethnic diversity, popular culture and family life. The course ends with a close look at developments leading up to the First World War and the collapse of the Ottoman Empire.

Polygamy Debates: Competing Visions of Marriage, 1600-present (203135)

Laurel Ulrich

2017 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course focuses on controversies over polygamy that emerged in the early modern period as Europeans encountered variant forms of marriage in African and the Americas and that reappeared in the nineteenth- and twentieth-centuries. We will explore historical definitions of marriage as they changed over time, and consider connections between polygamy and slavery, polygamy and other forms of sexual alliances, and polygamy and women's rights. We will read accounts of historical and contemporary marriages practices among dissenting groups, including Latter-day Saints (Mormons) and American Muslims.

Japan's 2011 Disasters and Their Aftermath: A Workshop on Digital Research (109459)

Andrew Gordon

Theodore Bestor

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The course explores the historical and ethnographic contexts of Japan's compound disasters of March 2011. As people sought to survive and make sense of the disasters, social media as well as photos, videos and websites played critical roles. We examine the role of these records, using a participatory digital archive developed at Harvard. Student teams will develop research questions, collect digital material, and create multimedia narratives. Students will complement their research with study of responses to similar global events as well as critical reflection on digital scholarship and the emerging practice of "crisis archiving."

Course Notes:

This course is also offered through the Anthropology Department as Anthropology 1923. Credit may be earned for either History 1923 or Anthropology 1923, but not both.

This course seeks to analyze the ways in which Machado de Assis, the most important Brazilian novelist of all times, appropriated the European tradition of the novel of adultery. In doing so, he sought to discuss literary models (realism), scientific ideologies (social Darwinism), gender (he expected the misogyny of readers to fill the lacunae of the narration), and class conflict (characters in dependent relations, women in particular, deploy an array of strategies to deal with the potential violence of patriarchal figures). Readings: selected pieces on theoretical approaches to fiction from the perspective of social history and novels by Flaubert and Machado de Assis.

Social Revolutions in Latin America (159555)

Alejandro de la Fuente

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course seeks to explain why social revolutions have taken place in Latin America and analyzes their impact on the region. The objective is for students to gain a critical understanding of the origins, development, and impact of revolutionary movements in Latin America during the twentieth century. The course examines several case studies, which may include Mexico, Cuba, Chile, Nicaragua, the Zapatista uprising in Chiapas, and the so-called "Bolivarian revolution" of Venezuela. Our goal is to identify similarities and differences among these cases.

Course Notes:

This course is also offered through the African and African American Studies Department as AAAS 199X. Credit may be earned for either History 1937 or AAAS 199X, but not both.

Gangsters, Spies, and Revolutionaries: The Underside of US Empire (203249)

Stuart Schrader

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Drugs, spies, assassinations, coups: what does US state power across the globe look like if we focus on its seedy underside? This conference course will equip students with theoretical and methodological tools to ask new questions about the nature of freedom, coercion, empire, the state, and knowledge itself. The course will analyze less-than-celebrated aspects of 20th century US history in transnational perspective. We will read texts on surveillance, intelligence, and espionage; terrorism, crime, and policing; political denunciation and scandal; and war. We will also consider the prominent roles of race, gender, sexuality, and class in the sinews of state power.

Global Things, American Dreams (203239)

Megan Black

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Where in the world did American actors and institutions get the materials that built America? Commodity histories are almost always global stories. This course considers how the flow of commodities, materials, and things has shaped and been shaped by American foreign relations, capitalist entities, and the environment. Using optics like sugar, cotton, bananas, uranium, and drugs, we will trace a pattern of global resource exploitation back to American sites of policy-making and consumption. This class is designed for students interested in American foreign relations, political economy, environmental history, globalization, and regions throughout the global South.

Mapping History (203235)

Kelly A. O'Neill

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The history of maps and mapping from the age of Enlightenment to the era of GIS and GeoJSON. We will examine the way states and individuals have used maps to create ideas, shape policies, and generate political and cultural capital. We will also study the production of maps – both print-based and digital – by historians themselves. What new insights about the past can we gain by mapping it? How are innovations in cartographic technology changing the way historians think and write? In today's interactive digital environments, where does the map end and history begin?

Emotions in History: Issues, Approaches and Cases (203038)

Penelope Russell

2016 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What is the place of emotion in history? The question itself holds multiple meanings, and in this course we consider two in particular: how to write the history of emotion(s), and how the historian's emotions affect the writing of history. Do historians benefit more from proximity to, or distance from, their historical subjects? Should historians of emotion suppress, or cultivate, their feelings of empathy? Does emotive writing inevitably fail the test of scholarly rigour and balance? We will explore some possible analytic frames for the history of emotion and debates over the subjectivity of history, and consider their application to case studies drawn from Australian history.

The Arc of Life: A Human History of Early America, 1600-1850 (203017)

Jane Kamensky

Laurel Ulrich

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

From antiquity to the present, societies have imagined human life unfolding in stages, often as an arc rising from infancy to maturity and then descending to debility and old age. Using British America and the early United States as a laboratory, this course explores documentary, visual, and material sources for exploring the many ways the inhabitants of those places in time understood, marked, and managed life's stages. Gender, race, and religion will be special foci of our inquiry. Students will develop annotated bibliographies, conduct independent research, and produce article-length scholarly essays or their equivalents. The course will include several field trips to museums and archives.

European Legal History Workshop (203246)

Tamar Herzog

Adriaan Lanni

2016 Fall (4 Credits)

Schedule:

M 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

11

Offered jointly with the Harvard Law School, this workshop will examine some of the most innovative research in European Legal history, conducted by both historians and legal scholars. Classes will alternate between in-group discussions of certain fields, questions or methodologies, and presentations by leading scholars.

Course Notes:

This course is open to undergraduates with the instructors'

permission. Students will choose between writing several short response papers or a substantial final paper. Law students who will choose to write a substantial paper will receive three credits upon successful completion of the course; law students who will choose to write short response papers will receive two credits. Whether they write short response papers or a final paper, FAS students who enroll in the workshop will receive four credits upon successful completion of the course. The Latin American History Seminar and Workshop is a yearlong research seminar and workshop that meets every other week to study a central question in Latin American history (in the fall) and provide opportunities for scholars to share their own work and learn about the scholarship of others in a workshop form (in the spring). In 2016-2017 we will discuss how differences were defined, negotiated, represented, and challenged in colonial Latin American, creating both inclusion and exclusion. Among differences considered would be distinctions between local and metropolitan; citizens and foreigners; narratives of origin and ancestry based on racial, ethnic, or religious criteria; and gender distinctions. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Asian Environments (Graduate Seminar in General Education) (202983)

Sunil Amrith

Arunabh Ghosh

Ian J. Miller

2017 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course will use the history of Asia, the world's most populous and economically dynamic region, to illuminate the most urgent environmental issues of our time. We will build a curriculum based on crucial episodes and sites in Asia's environmental past: moments of political and moral crisis or choice; places and encounters that continue to shape our present and future. Note: The seminar will design and develop a General Education course on these themes for undergraduates. A key aim of the graduate seminar will be to identify and develop a series of virtual "site visits" that will allow undergraduate students to engage, intellectually and imaginatively, with Asia's environmental history. Students from all areas and disciplines welcome.

The History of the People's Republic of China: Research Seminar (202996)

Arunabh Ghosh

2016 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

For long, 1949 marked a boundary that historians of China did not transgress. The post-1949 years were almost exclusively the domain of political scientists, sociologists, economists, and anthropologists. But over the last twenty years, spurred by the increasing accessibility of materials inside and outside the archive and by methods such as oral history, historians have offered new and compelling perspectives on

the early years of the People's Republic of China. In this research seminar students will explore this history by reading some of the most innovative work in the field and developing and presenting research that will culminate in a 25-35 page research paper. Each week we shall also have the opportunity to discuss a particular kind of source. This will help prepare students for research in China by giving them practical experience of dealing with a variety of materials, textual and non-textual.

10

This is a reading course designed to provide an intellectual framework for students undertaking general exam fields in modern Middle Eastern history. It focuses on more recent work, and especially work that raises important historiographical and methodological issues, deploys new approaches, utilizes new sources, or is in some other way of particular interest. The course is also open to other graduate students who desire an intensive introduction to the historiography of the field – but they must 1) understand this underlying purpose and 2) demonstrate to the instructor's satisfaction that they have sufficient knowledge of the basic narrative of Middle Eastern history.

Additional Course Attributes:

The Postwar American Road Narrative (108091)

David Alworth

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines a vibrant subgenre of post-World War II American literature. We will read major novels by Kerouac, Nabokov, and Didion as well as less familiar (yet still fascinating) writings by Hunter S. Thompson, Tom Wolfe, Patricia Highsmith, Ralph Ellison, and others. In addition, students can expect to analyze both primary and secondary historical sources, while giving some attention to visual art (e.g. John Chamberlain) and to film (e.g. Bonnie and Clyde).

History & Literature 90BA

England After Empire (109958)

Duncan White

2016 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

15

This course considers the way England was transformed through the demise of its Empire after the Second World War through to the present day. From the birth of the welfare state to the rise of Thatcherism, from post-colonial migration to multicultural Britain, from the Swinging Sixties to punk rock and riots, we will track these radical political, social and cultural changes through novels, poetry, theater, film, pop music, photography, fashion, food and sport. We will explore the way Britain sought to retain its influence in the world, through its involvement in the Cold War, its relations with the Commonwealth, and its continuing 'special relationship' with the United States, even as what being English or British began to change in meaning. As well as reading literary works by Philip Larkin, Jean Rhys, JG Ballard, Salman Rushdie, China Miéville, and Zadie Smith, we will consider the nation's popular culture, from The Beatles to The Sex Pistols, from James Bond to J.K. Rowling.

We the Readers: Reading Communities in Early America (156004)

Jennifer Brady

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar asks who was reading, what was read, and how reading was practiced, imagined, and used in early America. Focusing on moments when reading's potential to create or divide communities was under question, "We the Readers" considers how the mundane acts of reading printed sermons, daily newspapers, bestselling novels, political pamphlets, and urban signs were understood to have varying consequences for women, Native Americans, subjects, citizens, and slaves—and through them, a nation.

Colonialism, Globalization, and Culture in Asian Diaspora(s) (156607)

Genevieve Clutario

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course takes a cultural approach to historical developments of Asian diaspora, colonialism, and globalization through the lenses of appearance and performance. We examine performative and cultural arenas including literary fiction, spectacles, and visual texts to examine efforts to strategically use discourses of race, gender, class, ethnicity, sexuality, and (trans)nationalism to structure and maintain colonial forces. This class pushes us to consider how marginalized individuals and communities also used the same arenas to resist and critique colonial subjugation.

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Why do American sports differ from the rest of the world? How did soccer become a global sport? What explains the distribution of cricket and rugby around the world? Are sports a form of cultural imperialism? This course will explore these questions (and more) as we examine the connection between sports and imperialism. Themes we will cover include race, class, gender, professionalism, and commercialization. Readings include rule books, novels, poems, periodicals, memoirs, and films.

Early Modern Encounters (159792)

Michael Tworek

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course explores the dynamic and diverse movement of people, texts, ideas, and objects across the world during the early modern period (1300-1800). Each week approaches global exchanges through a case study of a local cross-cultural encounter from the Americas and Asia to Africa and Europe. The course will examine diverse topics like the Renaissance, Confucianism, the Age of Discovery and art, material culture, cosmopolitanism and travel, Islamic music, and the environment from historical, literary, and digital perspectives.

Cultures of Commodity Production Across the Americas (159793)

Frances Sullivan

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar uses social and cultural approaches to explore the history of Latin American and Caribbean commodity production, from silver to cocaine. Drawing on historical texts, poetry, fiction, and film (all

translated into English), we will study the communities created by those who mined, planted, harvested, and labored in the region's major export industries. This course challenges us to consider the socio-cultural implications of wider economic and trade processes.

Cold War Cinema (160728)

Paul Adler

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines the history of the United States and the Cold War using popular films made during the conflict as the principal texts. The class is divided into two units -- the first looks at the effects of the "Red Scare" on culture and politics in the United States from the 1940s to the mid-1960s. The second section examines U.S. interventions in the "Third World" from the 1950s to the 1980s and their influences both on countries from Algeria to Afghanistan and domestically.

Harvard, Meritocracy, and the Making of Elites (160729)

Ryan Acton

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The belief that resources such as education and rewards such as high pay should go to the meritorious is so deeply ingrained in our culture that it provides much of the basic logic and vocabulary for making sense of inequality and hierarchy in everyday life. This course historicizes meritocracy as an ideal and practice by focusing on Harvard University since the Civil War. Throughout this period, Harvard has seen its role as training a meritorious elite to lead society. We will study the historical politics of this elitism in the context of class, race, gender, capitalism, and mass democracy.

Boundaries, Borders, Bodies (160733)

Maryam Monalisa Gharavi

2016 Fall (4 Credits)

Schedule:

T 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Border geographies and urban boundaries delimit the terms of identity, reinforcing the notion of the city-state with material conditions and force. Such demarcations throw light on basic understandings of inclusion and exclusion, and how "us" and "them" are defined along the course of time. They are often in subtle or outright conflict with concurrent notions of selfhood, property, freedom, and mobility associated with modern life. The course traces along zones of passage that limit, regulate, and control mobility (including frontiers, enclosures, walls, barbed wire, among others) and theories of the distribution of the sensible (including security, circulation, mobility, flow, etc.). The course doubles as an arts practicum whereby students will engage weekly with works of art relating to the course themes, and create their own artwork with material guidance.

The Civil War in the American Imagination (203217)

Erin Pearson

2017 Spring (4 Credits)

Schedule:

W 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course asks how Americans have made sense of the Civil War. It begins by investigating texts that reflect the escalating sectional tensions in the decades preceding the war, particularly in regard to slavery. Moving from secession to Lincoln's assassination, the heart of the course considers how people grappled with the war in a variety of formats, from speeches and newspaper editorials to diaries, poetry, and photography. We conclude by examining how the war has continued to shape American culture, in fiction and film as well as in current practices of Civil War reenactment and debates over the Confederate flag.

The American Prison & The Literature of Punishment (203218)

Thomas Dichter

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The United States currently keeps more people behind bars than any other country. While the US's emergence as the leader in incarceration rates is relatively recent, the prison has loomed large in American public life for 200 years. In this class, we will approach the prison not as a marginal phenomenon, but as an institution central to American culture. Readings include works of literature by and about prisoners as well as reformers' pamphlets, sociological studies, government reports, and inmate manifestos. We will trace debates about freedom and captivity from the birth of the penitentiary through the era of mass incarceration.

Remembering the American Revolution (203222)

Caitlin Hopkins

2016 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The American Revolution ended two centuries ago, but Americans have never stopped talking (or arguing, or singing, or painting) about it. What has captivated so many for so long? Why does the story of the Revolution keep changing? Why is everyone so excited about Hamilton? This interdisciplinary seminar explores public commemoration of the Revolution through various media, from the Bunker Hill Monument and "Paul Revere's Ride" to Bicentennial protest literature and the lyrics of Lin-Manuel Miranda. Assignments include a scavenger hunt for local memorials and a field trip to the Freedom Trail.

Computers and American Culture (203223)

Jennifer Schnepf

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course introduces students to digital culture in the United States after 1945. In the span of only a few decades, the role of computers in American society dramatically transformed from a complex tool serving the aims of the military to a children's toy found in the domestic space of the American home. How did authors and filmmakers make sense of this dramatic transformation? We will engage with cultural sources ranging from classic midcentury novels and educational films, to Looney Tunes cartoons and DC Comics in order to formulate answers to this question. Course includes film screenings and field trips.

Literature and Design (203250)

David Alworth

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Design is ubiquitous, complex, and all but impossible to define. It affects almost everything that we experience through our senses, and it permeates our lives, both waking and sleeping. Texts, images, objects, environments, minds, and social encounters are all shaped by design, which has a subtle yet definite power that often operates just below the threshold of conscious perception. And yet, design emanates from the conscious mind; in the most capacious sense, it designates, as the Oxford English Dictionary explains, a "plan or scheme conceived in the mind and intended for subsequent execution; the preliminary conception of an idea that is to be carried into effect by action; a project." With this definition in mind, you could construct a 500,000-year history of design, beginning with the primitive tools of proto-humans and extending to the open-source code on GitHub. Or you could begin even earlier, say, with God.

This course takes a more modest historical approach. It tracks the history of design from the Industrial Revolution to the digital revolution in the United States, and it gives sustained attention to the relationship between this history and American literature, broadly conceived. At least since Edgar Allan Poe published his "Philosophy of Furniture" in 1840, American authors have engaged with the objects and ideas of design thinking. Such engagement has taken many different forms since the mid-nineteenth century: simultaneous attraction to and repulsion from the technological, the industrial, and the machine; obsession with the distinctions among art, craft, and decoration; fascination with cities as designed spaces and with literary art as a designed (if not exactly designer) thing; and attention to the poetics of fashion, advertising, shopping, décor, bric-a-brac, trash, and other superficial matters. But engaging with such matters, superficial or otherwise, provokes deep and abiding questions for the literary authors on this syllabus—questions about the relation between economics and politics, about the cultural forces of race, class, gender, and ethnicity, about the status of art and aesthetic experience in a democratic society, and about the very definition of what it means to be human—all of which are highly relevant to us today, as we

navigate through an increasingly designed, increasingly virtual world of lived experience.

N. B. This course may include a "design studio" component featuring book designer Peter Mendelsund. Stay tuned for more information.

Beauty and Power: Race and Gender in the 20th and 21st Centuries (203464)

Genevieve Clutario

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines processes of defining beauty through both cultural productions and historical works during the 20th and 21st Centuries. We will explore how beauty is used to manage bodies, define social hierarchies, and gain or maintain power. We will also investigate how presentations of beauty could also be used as forms of subversion and resistance. Looking at sites such beauty pageants, cosmetic consumer cultures, drag performances, cosmetic surgery, and the transnational production and consumption of beauty vloggers we will investigate how race, gender, sexuality, and class informs definitions of beauty and how definitions of beauty inform constructions of race, gender, sexuality, and class.

Breaking the Law: American Crime Stories (203587)

Nicholas Donofrio

2016 Fall (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

What is crime? Who commits it? When and where is it likely to occur? How should it be punished? And why do we find it so interesting? These are the questions at the dark heart of American crime fiction—questions whose answers have changed considerably over time. Course examines detective stories, spy novels, police procedurals, gangster movies, and more. Readings from Poe, Doyle, Christie, Hammett, and Highsmith; films include *Mildred Pierce*, *The Godfather*, and *Boyz n the Hood*.

Asian American Cultural Studies (203588)

Terry Park

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

From yellow peril invaders to model minorities, Asian Americans have long been the indispensable threat and reliable punch line of U.S. popular culture. In response to these reductive constructions, Asian Americans have crafted their own dynamic cultural expressions in a number of media—from film, television, and music to fashion, sports, and food—that reveal the broad complexity of Asian America and contest the contradictions of the U.S. nation-state. Asian American culture also uniquely sits at the nexus of immigration flows and digital technologies, providing a transnational lens to view the US's place in the world. This seminar, then, will introduce students to the study and practice of Asian American culture as heterogeneous, hybrid, and multiple. In doing so, students will gain an understanding of the shifting and interlocking tensions among the local, the national, and the global that form the cultural geographies of Asian America.

Poverty, Wealth, and Religion in the Middle Ages (203670)

Brian FitzGerald

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar considers the ethical, political, and spiritual questions arising from the existence of wealth and poverty, the rich and the poor, in medieval European culture. What was the relationship between Christian charity and economic activity in the Middle Ages? How did the religious values of a simple, austere life inform and conflict with changes in both Church and society? Drawing on saints' lives, theological treatises, art and architecture, and the work of poets such as Dante, Chaucer, and Shakespeare, the course will examine how the interaction of spiritual ideals and material realities shaped cultural developments and affected beliefs and practices from late antiquity to the Protestant Reformation.

Latin American Cultural Criticism (203879)

Rene Carrasco

2016 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will examine the world of ideas that has shaped Latin America. It is designed to provide students with the necessary tools to think critically about topics such as nationalism, capitalism, literary criticism, historiography, political and economic theory, identity politics, modernity, colonialism/postcolonialism, gender, and many other topics that have shaped intellectual debates in Latin America and all over the world. We will labor at the intersection where literature, history, politics, theories and practices meet. This course will examine ideas and the practices they inform, as well as practices and the ideas that sustain them, as products of human culture that can be contested and changed.

Stories of Slavery and Freedom (156003)

Timothy McCarthy

2016 Fall (4 Credits)

Schedule:

T 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

In the last generation, scholars have revolutionized our understanding of slavery and freedom in the modern Atlantic world. This sea-change has been the result of a major methodological shift: to view this history through the eyes of slaves rather than the eyes of masters. This course will examine the history of the "black Atlantic" through a diverse range of cultural texts--poetry, pamphlets, court cases, petitions, autobiographies, novels, speeches, and sermons--produced by slaves, free blacks, and abolitionists from the Age of Revolution to emancipation.

Architecture Studio 1: Transformations (109375)

Megan Panzano

2017 Spring (4 Credits) **Schedule:** WF 0100 PM - 0359 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course introduces basic architectural concepts and techniques used to address issues of form, function, ornament and material. This course provides instruction in project analysis, visualization, communication, and fabrication using both physical and digital modeling. Students proceed through a series of progressively complex investigations of transformational processes, context, program and material assemblage. As an introduction to architectural design, we will explore comprehensive and foundational design principles, skill sets and critical thinking and making. The course material will be presented through a series of presentations, exercises, workshops, reviews and discussions. This course fosters the development of a design methodology founded on thoughtful, creative and rigorous work practices in service of exploring meaningful expressions of the constructed environment.

Connections - Studio II (110362)

Lisa Haber-Thomson

2017 Spring (4 Credits) **Schedule:** TR 0100 PM - 0359 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Architecture, as an act of design, is about placing objects the world. But architecture also fundamentally asks us to continuously engage with, and re-conceptualize, the world for which we are designing. As such, architecture as a discipline requires us to challenge our own positionality with regards to the world we all occupy.

This studio takes on the challenge through a series of design exercises focused on understanding,

engaging with, and reimagining the urban condition. In this course, we will be mobilizing the autonomous architectural transformations mastered in HAA 96A to intervene with a programed architectural project designed for a specific site in Harvard Square. Students will produce projects that address existing site conditions, and will develop designs in response to a determined program. Students will be expected to take into account projected occupants and other users of the site. Throughout the course, we will approach architectural design as both a method of producing urban environments, and also as an avenue through which to understand our cities. We will be directly confronting the social, environmental, and cultural contexts that are necessarily implicated in any design process.

The studio centers on three progressive design assignments, culminating in an architectural project for a site in Harvard Square. Design exercises will be supplemented with a series of short readings. Technical workshops will allow students to further develop skills in mapping, rendering, and simple animation.

To what extent do the availability of materials and development of material technology influence artistic choice and innovation? How was a particular work of art made, and why does it look the way it does? The course will explore these and other questions of materiality through a combination of close looking at objects in the Harvard Art Museums' collections, hands-on experimentation with a range of artist's materials and techniques, and discussions of related readings. Among the goals of the course are for students to gain a better understanding of the dynamic relationship between makers and the materials and techniques they use; to be able to better recognize traces of artistic processes in works of art; and consider the implications of alterations that can occur in objects over time. The course will be taught by the Harvard Art Museums' research curator for conservation and technical studies in collaboration with staff of the Straus Center for Conservation and Technical Studies - professionals who routinely consider questions of materiality and how they effect the way we understand, interpret, preserve and present works of art.

Course Notes: This course will be held at the Harvard Art Museums' Materials Lab

Francisco de Goya : Art as Testimony, the Artist as Witness (203078)

Felipe Pereda

2016 Fall (4 Credits)

Schedule: MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Francisco de Goya (1746-1828) signals the beginning of a new understanding of the power of art as a historical testimony. Sometimes considered the "patriarch of war photographers" Goya gave a new image of war in which anonymous victims take over the protagonism traditionally held by national heroes. This course will be a general introduction to Goya's art, from the popular imagery of his early years to his late Black Paintings, but it will also look into Goya's "modernity" from the standpoint of art's reflection of contemporary history.

Twentieth Century Photography (204427)

Benjamin Buchloh

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This conference course will introduce and discuss some of the key moments in twentieth century photography, its various deployments and theorizations in avantgarde cultural contexts. Presenting some of the central movements of the twentieth century, such as American Pictorialism and Straight Photography in the first decade, American Social Realist and Documentary Photography of the 1930s, Weimar Germany's New Objectivity, Soviet Productivism and Factography and French Surrealism of the 1920s and 1930s, the course will conclude with studying the usages of photography in American Pop Art and Conceptual practices of the 1960s.

Beyond the introduction to some of the key figures and practices in the history of twentieth century photography, the course will also introduce some of the most important theoretical texts that have accompanied the various formations of a photographic avantgarde, especially those essays that attempted to clarify photography's eternally challenged qualifications as a truly artistic practice, its various roles as both a medium and a critique of masscultural formations. These texts will comprise both, a number of original documents that were formulated at the time by the photographers themselves, as well as a group of critical and scholarly critical texts of the past five decades that have contributed to a reconsideration of the centrality of photography as one of the most important media in the twentieth century.

Vision and Justice: The Art of Citizenship (203077)

Sarah Lewis

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will focus on the historic interplay of art, vision, citizenship, and justice in the context of social movements within the United States. Each class centers on case studies to show the connection between artistic and social movements in the contestation for citizenship in American and, in particular, African American life. Inspired by Frederick Douglass's understudied Civil War speech about the role of images for American progress, topics will include: the role of art and critical vision for the invention of race, the abolition of transatlantic slavery, the creation of and destabilization of U.S. segregation, the New Negro Movement, and the long Civil Rights movement. This course aims to develop skills of interdisciplinary research that they can be utilized in other courses and research projects in Art History, African American Studies, American Studies, and beyond.

Halftone, Benday, Screen: Commercial Printing and the art of the Sixties (203299)

Jennifer L. Roberts

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Over the course of the 1960s, the techniques of mass commercial printing took on increasingly conspicuous roles in the fine arts. Methods of image formation and transfer that had been developed in -- and restricted to -- the commercial arts, such as the halftone and the screenprint, were now prominently displayed on the walls of galleries and museums. This seminar will explore these printing processes in detail, tracing their historical, material, and economic specificity, and the implications of their deployment in the work of artists like Andy Warhol, Roy Lichtenstein, and Richard Hamilton. Because the history of these commercial printing processes has not been widely explored by art historians, the students in this seminar will explore technical archives and write original research papers that will make new contributions to our understanding of the art of this period.

Jinah Kim

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Understood as a divine abode in Indic mythology and envisioned as the immortal realm of "Shangri-la" by later western interpreters, the Himalayas abound with Hindu and Buddhist holy sites. This course explores the vibrant visual culture of the Himalayan region. Two learning goals are: 1) Understanding the historical development of distinctive artistic forms in paintings and sculptures of Nepal and Tibet during major moments of artistic innovations in the region, including the artistic responses to the current political situation; 2) Locating this knowledge in the context of the history of reception and collecting of Himalayan art in the west.

Sacred Places and Sacred Objects: The Art of Japanese Religion (159913)

2016 Fall (4 Credits)

Schedule:

Instructor Permissions: None

Enrollment Cap:

n/a

An interdisciplinary study of the art and material culture of the buddhist and Shinto religious traditions. The class will focus on the temples and shrines that serve as the loci of religious practice and the works of art associated with them - sculptures and paintings, sutras and reliquaries, ritual implements and temple adornments. It will examine in depth some of Japan's most influential sacred places, including Ise Shrine, Todaiji, the Byodoin, and Mount Fuji, and will also look at the way contemporary architects and artists such

as Ando Tadao and Sugimoto Hiroshi have attempted to create new sacred places and sacred objects.

The Evidence of Images in Renaissance Art (204046)

Joseph Koerner

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Images can be enlisted as evidence in arguments about facts, values, and attitudes. Images are also themselves, in distinctive ways, evident as visually conspicuous displays. Yet their interpretation often demands evidence - textual, circumstantial, technical - beyond what they exhibit. Exploring understandings of evidence in the making, reception, and analysis of Renaissance art, this course considers the changing nature of images as representation and presentation during the period. Special attention will be paid to objects in the Harvard collections.

Exhibiting Blackness: The Role of Exhibitions in the Black Atlantic World (203296)

Sarah Lewis

2017 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

In 2016, the final museum on Washington Mall opened, The Smithsonian's National Museum of African American History and Culture. Taking its inspiration from this occasion, this seminar, open to graduate students as well as qualified undergraduates, focuses on the historic role exhibitions of African American art in the Black Atlantic world. As a final project, it offers students the chance to curate their own online exhibition. Class discussions will center on analyzing the impact of monographic and thematic exhibitions as forms of statement, critique, and advocacy. The course will be held in the Harvard Art Museums' study center, focusing seminar discussions on object based study, complimented with trips to neighboring exhibitions and incorporating interviews with key artists and curators as guest speakers. The final project will be presentation of an exhibition concept to the class, complete with a curatorial entry for each object and a suite of curated images.

Class Notes:

Open to graduate students and qualified undergraduates.

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

If the artisanal and technical skills behind artmaking are forms of knowledge, how can (or should) that knowledge be integrated into the analytical methods of art history? This seminar will provide a wide-

ranging exploration of this question, examining theories of craftsmanship, fabrication, and material reciprocity, debates over the concept of "tacit intelligence" and the value of making or remaking as historical method, issues of skill and deskilling on the part of both artists and art historians, and the challenge of exhibiting making in an art museum context. We will explore the transformative possibilities of rigorous attention to making, such as its potential to create forms of interpretation that cut across the fine, decorative, and industrial arts. The course will include close looking sessions in the Harvard Art Museums, hands-on making exercises, and visits from guest artisans.

Architecture Cultures of Latin America: Primary Readings (204426)

Patricio del Real

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Modern architects throughout Latin America created an impressive array of world-class buildings and projects that continue to draw international attention and contemporary scholarship. Architects, such as Luis Barragan, Lina Bo Bardi, Carlos Raul Villanueva, Eladio Dieste, Oscar Niemeyer, and Clorindo Testa have been associated primarily and almost exclusively with their built works. Yet, these and other architects produced critical writings that positioned their work in national, regional and international debates on modern architecture and culture. This graduate seminar explores the development of modern architecture culture in Latin America by focusing on the writings by architects and designers of the region. It aims to contextualize architectural production and select buildings by examining critical debates that flourished in the region with the onset and development of global modernism. Readings will address themes such as modernization and the new architecture; nationalism and regionalism; the synthesis of the arts; the city and the territory; technology and development; premises for social and political engagement; manifestoes and testimonials; among others.

Class Notes: Requirement: Reading proficiency in Spanish and/or Portuguese.

Tutorial - Sophomore Year (115419)

Anne Harrington

2017 Spring (4 Credits)

Schedule: M 1200 PM - 0129 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Sophomore tutorial is a hands-on course that introduces students to some of the most exciting and productive questions in the history of science, technology and medicine, while developing critical reading, presentation and discussion skills. Small groups of students will tackle different aspects of a larger theme each week and share discoveries in sessions led by the faculty instructor. The course will be further enhanced by a series of supervised individual projects.

Course Notes: Required for undergraduate concentration in History and Science. Students must register for the plenary class session that meets on Mondays from 12:00-1:30, as well as a weekly section to be arranged.

History of Science 102V

Knowing the World: Globalizing the History of Science (203469)

James Delbourgo

2016 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course introduces undergraduate students to the history of science by a taking a global approach to the subject. Such introductory courses have often been focused on Western Europe and North America and utilized some form of the "scientific revolution" narrative to organize them. But what happens when we open up the history of science to a range of other peoples' histories without subordinating them to the traditional narrative? Our class will raise questions about knowing the world in the most expansive sense of that phrase by drawing on recent scholarship that is reconceiving the field through exciting new questions about the history of science for a global age. We will focus on the early modern period of world history broadly conceived while also examining core methodological issues that increasingly confront history of science as a whole, as well as moving beyond early modernity to explore debates about postcolonial science and technology with implications for the present day. We will pay close attention to the role of networks in the making of knowledge; processes of cultural mixture and translation in the intersection of different knowledge traditions; and the production of polemical claims to cultural and racial superiority based on science and technology – claims about who is modern and who is not, about who possesses merely local knowledge and who can truly know the world.

Course Notes:

This course is allowed to substitute for History of Science 100, Knowing the World: An Introduction to the History of Science, and fulfills the History of Science 100 requirement for History and Science concentration credit.

Bodies, Sexualities, and Medicine in the Medieval Middle East (127093)

Ahmed Ragab

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will examine the ways in which medical, religious, cultural, and political discourses and

practices interacted in the medieval and early modern Middle East to create and reflect multiple understandings of human bodies and sexualities. Special attention to debates on health, sexuality, and gender and racial identities.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

History of Science 118

Instruments and the Material Culture of Science in Early Modern Europe, 1500-1800 (108927)

Jean-Francois Gauvin

2016 Fall (4 Credits)

Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

What is an instrument? Can there be more than one definition? What, if any, is the epistemological difference between Galileo's telescope and rolling balls? Between Newton's prisms, Hooke's microscope, and Réaumur's thermometer? This course looks at three centuries of science and particularly at its material culture. What makes an "instrument" a "scientific" instrument? Are all instruments "scientific"? How does an object become a scientific instrument? What are the relationships between theory and instruments? Readings and discussion, though at the core of the course, will be supplemented with visits in other Harvard museums and hands-on classes using the Collection of Historical Scientific Instruments.

History of Science 136

History of Biotechnology (107858)

Sophia Roosth

2016 Fall (4 Credits)

Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

What becomes of life when researchers can materially manipulate and technically transform living things? In this course, we will historically investigate biotechnology in the twentieth and twenty-first centuries, paying attention to how efforts to engineer life are grounded in social, cultural, and political contexts. Topics include reproductive technologies, genetic engineering and cloning, genetically modified foods,

genomics, stem cells, intellectual property, and biosafety and biosecurity. The course is organized around five crosscutting domains in which we will explore the ethical, legal, and social impacts of biotechnology: (1) food, (2) property and law, (3) sex and reproduction, (4) disease and drugs, and (5) genomic identities. We will read and discuss historical accounts of biotechnology, primary scientific publications, and legal cases. We will learn to evaluate the social constitution and impact of biotechnology on daily life, as well as how to place contemporary issues and debates in biotechnology in historical context.

History of Science 137

Animals in History (160366)

Janet Browne

2017 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

This course serves as an introduction to animal studies while also exploring the history of animals in relation to humans. Topics include the history of animals as food, laboratory animals, animal-human boundaries, museum and zoo displays, conservation and extinction, panda diplomacy, the anti-vivisection movement, animals in literature, and animals as pets. All these issues invest animals with crucial socio-political meaning. There will be a field trip and perhaps films. Small research projects through the semester will allow students to explore their own interests as well as relevant issues in the news. Among the things that make animal studies such an interesting area is the constant need for scholars to be aware of their own commitments and assumptions. Students from History, History of Science, and History and Literature are all welcome.

Course Notes:

Enrollment limited to 18.

History of Science 140

Public Health on the Border: Race, Politics, and Health in Modern Mexico (204416)

Gabriela Soto Laveaga

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

36

Why does the Mexico-U.S. border continue to be a space for debate and controversy? This course examines how the creation of the U.S.-Mexico border in 1848 shaped modern Mexican society from the nineteenth century to our present. For many, the border served (and serves) as a protective barrier from poverty, violence, and, especially, disease. By the early twentieth century many Mexican bodies were perceived as "alien," "illegal," and in need of patrolling. Yet these descriptions were also used by Mexican

politicians to describe and isolate groups such as Indigenous and Chinese within Mexico. By examining, for example, Mexican public health campaigns, response to epidemics, and how Mexican ideas of race and health played out within Mexico we can better understand the U.S.-Mexico border today.

Bodies in Flux: Medicine, Gender, and Sexuality in the Modern Middle East (156290)

Soha Bayoumi

2017 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines how bodies, genders and sexualities in the modern Middle East, from the nineteenth century to the Arab revolts, have been shaped and represented via changing and competing discourses. Through a variety of historical, ethnographic, media and literary readings, the course studies multiple and dynamic representations of bodies in flux: medicalized bodies, gendered bodies, sexualized bodies, (re)productive bodies, aging bodies and bodies in revolt. The course pays special attention to medicine and science in their interaction with laws, traditions and religious practices. Some of the topics covered include analyzing histories of and discourses on slavery, femininity and masculinity, homosexuality, health, reproduction, disabilities, circumcision and genital cutting/mutilation and gender-based violence.

The History and Culture of Stigma (110099)

Allan Brandt

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course will investigate the history of a number of stigmatized conditions and diseases including, for example, cancer, mental illness, addiction, obesity, AIDS, and disability. A central goal will be to understand the stigmatization of disease and its effects in diverse historical and cultural contexts. The course will evaluate both the impact of stigmatization on health disparities and outcomes, as well as attempts to de-stigmatize conditions that are subject to discrimination, prejudice, and isolation.

An American Way of War: Technology and Warfare (203128)

Matthew Hersch

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

American society has, from its founding, been transformed by the experience of warfare. This lecture course explores two interconnected ideas: the development of military technologies from the earliest settlement of North America to the present day, and the profound impact of these technologies on people, including veterans and the societies to which they returned. Beginning with an examination of bladed weapons and the psychology of killing, we will look at how supposedly revolutionary weapon systems—the gun, the tank, the airplane, the atomic bomb, the drone—came to define a distinctly American mode of warfare, and created new problems for those exposed to their lethality.

The World We Made: Technology and Society (203610)

Matthew Hersch

2017 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

125

For as long as people have lived on Earth, they have shaped their world and have, in turn, been shaped by it. This lecture course surveys humans' relationships with the built world, beginning with the origins of civilization and extending through the present day. During the semester, we will track the development of transformative technologies—from fire-making to the Internet—throughout human history and across the globe, and place them in their social contexts. In so doing, we will learn how humanity chooses which technologies to exploit, and how human society is transformed by those choices.

Science and Religion in America (203705)

Naomi Oreskes

2017 Spring (4 Credits)

Schedule:

W 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines the history of science and religion, with a focus on the United States. Science and religion are often viewed as intrinsically at odds with each other, but are they?? Or have we over-emphasized a small number of conspicuous conflicts? And why have certain controversies loomed so large in U.S. historiography? Topic will include the founding father's views of science and religion; the 19th century creation of government-based scientific agencies; the development of research universities as an alternative to denominationally-based higher education; Andrew Dickson White and the "warfare of science and religion" thesis, the trial of Tennessee school teacher John Scopes for teaching evolution and the popular interpretation of that trial; creationism in the mid-late 20th century, and religious-based opposition to climate science. We will pay particular attention to the question of how the relationship between science and religion has changed over the course of U.S. history, and the drivers of those changes.

Course Notes: Open to advanced undergraduates with a background in history and/or history of science.

Studying Sex in the Medieval World (204097)

Ahmed Ragab

2016 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

What is sex historically? How can we understand sex and sexuality in the premodern world? How is Sex a topic in the study of premodern science, religion and culture? The seminar investigates how to study sex and sexuality in relation to medicine and religion in the medieval world. We focus on methodological questions including queer theory, theories of ritual and performance and gender theory and analyze major trends in the scholarship over the past decades. Attending HS108 lectures are required. Additional times will be announced.

Collecting the World: Technologies of Gathering Objects and People (203605)

James Delbourgo

2016 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This graduate course explores a vital theme in contemporary critical inquiry and recent STS: the relation between material objects, knowledge and society. One central aim is to bridge the divide between the literatures of history of science, art, anthropology, archaeology and museum studies. By reading these together, we will explore what might be called the political epistemology of artifaction – the processes by which things (and people) become objects of knowledge, gathering specific kinds of public around them, and organizing relations between western and non-western societies through putatively rational modern sciences. We will discuss a range of periods and geographies focusing on technologies of collecting: triumphs and natural history in the ancient Roman world; the circulation and destruction of relics and icons in the medieval west and contemporary Middle East; global natural history's encyclopedic techniques of accumulation and cataloguing in the Enlightenment; festivals of excavation and spoliation as revolutions in space and time; "artifaction" in archaeology, specifically Egyptology; photographs as material artifacts; techniques of measuring, installing, curating, sound-recording and filming ethnographic subjects; and Surrealist anthropology as a response to the long shadow cast by scientific universalism. Our readings will link Europe, the US, the Middle East, the Caribbean, South America and Australasia in various ways, making connections between the ancient, medieval and modern periods. Students are welcome to propose additional topics and areas and especially to pursue such in their written work for the class.

Technical Lands (203594)

Peter Galison

2016 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Over the last century, we have produced a new kind of scientific and technological landscape, one put to the uses of scientific, high-tech industrial, and military uses. From radio and optical telescopes to accelerators, nuclear weapons and missile testing areas, the land itself has taken on a new politics, complexion, economics, environmental justice, and even metaphysical status in relation to our encounter with it. We will look at the geography of these territories through the alternating lenses of anthropology, history, ethnography and science—comparing and contrasting industrial scale scientific alteration of land with the the postwar development of earthwork art including Robert Smithson's "Spiral Jetty" or Michael

Heizer's "Double Negative."

Current Topics in the Social Study of the Life Sciences (156317)

Sophia Roosth

2016 Fall (4 Credits) **Schedule:** T 0200 PM - 0359 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

This seminar tracks the history and current status of concepts of the biological. We will interrogate how the category of "life itself" has been transfigured by experimental, medical, and theoretical interventions into living things, from animal experimentation in the eighteenth century, to nineteenth century theories of inheritance, to mid-twentieth century breakthroughs in immortalizing cell cultures, to contemporary attempts to fabricate organisms from synthetic genetic components. We will focus primarily on recently published work in the history and anthropology of biomedicine, as well as cultural theory, philosophy, and media studies addressing the life sciences. Throughout, we will pay special attention to where biologists have imagined the seat of vitality, whether organismic, cellular, genetic, or informatic. How has life recently entered into new circulations of capital, intellectual property, and political rhetoric as it is sequenced, synthesized, licensed, patented, cut up, frozen, cloned? What has life been, what has it become, and what will it be next?

Magic, Miracles, and Prophetics: Medicine and Religion in the Medieval Islamic World (203614)

Ahmed Ragab

2017 Spring (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Along with herbs, pills and pastes of different tastes and colors, amulets, prayers and images of prophets and saints served as tools for healing and for medical care constituting a significant part of the landscape of medical practice. In the Islamicate context, 'Prophetic medicine' was considered the most important representation of these types of "religious healing." Relying on sayings and deeds of Muhammad and his companions, volumes of prophetic medicine discussed medical questions and offered medical advice. From the ninth century to the present, this body of literature, accompanied by certain types of foods, herbs

and other preparations, continued to survive in changing shapes and forms that reflected changes in medical knowledge and in the study of prophetic traditions. This course will investigate the traditions of prophetic medicine and ask questions about the relationship of medicine and Islam from the medieval to the modern period.

Course Notes: Jointly offered as HDS 3343.

Health, Science, and Development in the Twentieth Century (204422)

Gabriela Soto Laveaga

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

In this graduate seminar we examine how the rhetoric of science was used to 'solve' problems in Africa, Latin America, and South Asia in the twentieth century. From civil engineering wonders, like the Panama Canal, to agricultural solutions, like the Green Revolution, we will discuss the unexpected consequences of foreign models in colonial and postcolonial spaces. Examining cases such as uranium extraction in African nations or glaciology in Peru can help us understand the socio-political consequences of science-on-ground when countries become laboratories for foreign-led aid.

Big Data: Past, Present, Future (156326)

Rebecca Lemov

2017 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

The goal of this class is to understand more deeply the roots and current practices involved in "Big Data," an umbrella term and current buzzword used to mark the revolutionary potential inherent in working with scaled-up collections of data and new data-processing and -storage technologies. We will begin by examining claims that Big Data has ushered in a new era of epistemology and scientific understanding. Next, we will investigate the historical development as well as material and political conditions that produced the current moment. We will read histories and ethnographies of Big Data and its historical precursors across fields as diverse as (but not limited to) bioinformatics, climate science, anthropology, library science, and paleontology, and will consider the interpenetration of Big Data's practices in commerce, national security, personal life ("self-tracking") and the project of self-engineering. The aim of the course is to be better able to assess the challenges and opportunities the current "data deluge" poses to society.

Teaching the History of Science and Technology (203611)

Matthew Hersch

2017 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This seminar provides graduate students with both an accelerated introduction to the history of science and technology, and to current methods for teaching this subject to undergraduates. While the course will

engage with methodological questions, our principal focus will be on developing a series of explanatory frameworks for 5,000 years of techno-science, and crafting a series of discrete lessons capable of conveying important knowledge and skills to students. Intended for graduate students in any field, this course serves as both a refresher on Western technological history and a teaching practicum intended to prepare doctoral students for oral examinations and teaching positions in the field.

Agnotology: The History of Knowledge and Ignorance (203706)

Naomi Oreskes

2017 Spring (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Historians of science have traditionally been concerned with the production of scientific knowledge, but in recent years have turned their attention to the production of ignorance. This course focuses on the production of ignorance as a social, political, cultural, economic and epistemic question, with attention both to techniques of deliberate ignorance production, and to the inadvertent and often uncontested production of ignorance that arises from accepted research practices and from the conditions that shape the direction and forms of scientific inquiry.

Course Notes:

Open to graduate students and advanced undergraduates in history of science, and to others with instructor's permission.

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

History of Science 300 Section: 012

Direction of Doctoral Dissertations (112941)

Shigehisa Kuriyama

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

History of Science 300 Section: 013

Direction of Doctoral Dissertations (112941)

Rebecca Lemov

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

History of Science 300 Section: 013

Direction of Doctoral Dissertations (112941)

Rebecca Lemov

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

History of Science 300 Section: 014

Direction of Doctoral Dissertations (112941)

Elizabeth Lunbeck

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

History of Science 300 Section: 014

Direction of Doctoral Dissertations (112941)

Elizabeth Lunbeck

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

History of Science 300 Section: 015

Direction of Doctoral Dissertations (112941)

Naomi Oreskes

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

History of Science 300 Section: 015

Direction of Doctoral Dissertations (112941)

Naomi Oreskes

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

History of Science 300 Section: 016

Direction of Doctoral Dissertations (112941)

Scott Podolsky

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

History of Science 300 Section: 016

Direction of Doctoral Dissertations (112941)

Scott Podolsky

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

History of Science 300 Section: 017

Direction of Doctoral Dissertations (112941)

Ahmed Ragab

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

History of Science 300 Section: 017

Direction of Doctoral Dissertations (112941)

Ahmed Ragab

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

History of Science 300 Section: 018

Direction of Doctoral Dissertations (112941)

Sarah Richardson

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

All: Cross Reg Availability	Not Available for Cross Registration

History of Science 300 Section: 018

Direction of Doctoral Dissertations (112941)

Sarah Richardson

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

History of Science 300 Section: 019

Direction of Doctoral Dissertations (112941)

Sophia Roosth

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

History of Science 300 Section: 019

Direction of Doctoral Dissertations (112941)

Sophia Roosth

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

History of Science 300 Section: 020

Direction of Doctoral Dissertations (112941)

Mark Schiefsky

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

House Seminars

Subject: Winthrop House Seminar

Winthrop House Seminar 75

The Laws of War (125443)

Gregg Peeples

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

What are the "laws of war"? This seminar examines the historical development of two legal concepts: *jus ad bellum*, which judges the legitimacy of the use force in international relations; and *jus in bello*, which defines the duties of belligerents during an armed conflict. Drawing on this background in international and U.S. law, the seminar then explores how these laws have influenced the U.S. "War on Terror" and how they might shape future conflicts.

Course Notes: Open to students from all Houses.

Requirements: Course open to Undergraduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Leverett House Seminar 75

(Mis)Understanding Islam Today (161256)

Bilal Malik

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course grapples with key controversies – suicide bombings, blasphemy, gender, Muslim minorities, Islamism – as a point of entry into understanding Muslim cultures and societies. Drawing on insights from Cultural Anthropology and related fields (Religious Studies, History, Government, Philosophy, Law), the course also encourages self-reflection on our own assumptions regarding religion, secularism, freedom, tolerance and violence. Finally, by dwelling on the case of cross-cultural (mis)understandings related to Islam, the course underscores that no matter what our personal objectives – social theorizing, developing policy, or being an engaged global citizen – there is value in understanding how historical and cultural contexts shape us all. No prior familiarity with Islam is required or assumed.

Course Notes: This class is also offered as ANTHRO 1661. Students may not take both classes for credit. Eligible for GenEd (under new policies) and

Anthro/NELC credit. See course site for details, or email bmalik@fas

Human Evolutionary Biology 1200

Neanderthals and Other Extinct Humans (160614)

Bridget Alex

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Over the past 100,000 years why did modern humans survive while other human lineages went extinct? This seminar will center on comparing modern humans to Neanderthals using the genetic, fossil, and archaeological records. Areas of comparison will include anatomy, genomes, life history, technology, diet, symbolic behavior, and demographic history. We will also discuss other known or proposed humans from this period - Denisovans, *Homo floresiensis*, and super-archaics - as well as the evidence for interbreeding between the groups.

Course Notes: This course fulfills the human evolution subfield requirement for Human Evolutionary Biology.

Recommended Prep: Science of Living Systems 16 or Human Evolutionary Biology 97 or by permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1210

Research in Human Biomechanics and Physiology (127206)

Nicholas Holowka

Neil Roach

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

8

Introduces students to experimental techniques used to investigate the structure and physiology of humans. Students undertake a supervised research project in the Skeletal Biology and Biomechanics Laboratory. Students meet to introduce their project, discuss their work and progress, and to present their final results. An extensive commitment of time in the laboratory is required. Grades are based on the work completed, the oral presentation, and a short research paper.

Course Notes: This course fulfills the research seminar concentration requirement for Human Evolutionary Biology

Recommended Prep: Life Sciences 2 required.

Human Evolutionary Biology 1235 Section: SEM

African Roots: Origins and dispersals of modern humans (204527)

Bridget Alex

Christian Tryon

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Genetic, fossil, and archaeological evidence indicate that all living humans descend from a population living in Africa around 200,000 years ago. By 40,000 years ago modern humans had expanded across Africa and dispersed to Eurasia and Australia, in the process colonizing new lands and entering regions inhabited by other hominins like the Neanderthals. The global spread of modern humans involved a complex process of interbreeding, competition, and extinctions of different human lineages. What biological, behavioral, and technological changes allowed for the origin and dispersals of modern humans? Why are we still here, whereas other members of our genus, such as *Homo erectus*, went extinct? This discussion seminar will uniquely incorporate hands-on examination of the rich collections of Paleolithic artifacts and fossils housed at Harvard University's Peabody Museum as well as experimental replication of ancient tools.

Human Evolutionary Biology 1250

Genetics and Human Evolution (202993)

Amanda Lobell

2016 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course will explore major questions in human evolution from a genetic perspective. Students will learn how genetic data are used to reconstruct the past, to identify unique human adaptations and to understand relationships among living and archaic hominin species.

Course Notes: For this course students are not expected to have an extensive background in genetics beyond Life Sciences 1b.

Preference will be given to HEB concentrators.

Human Evolutionary Biology 1280

Human Nature (202992)

*Joseph Henrich**Alexandra Rosati**Richard Wrangham*

2016 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course will examine the evolutionary origins, biological foundations, and psychology underlying human behaviors including kinship, sexuality, incest, parental love, xenophobia, status, homicide, warfare, culture, cooking, language, and religion. Using a comparative approach, we will contextualize human behavior by examining both studies of non-human primates, especially chimpanzees, and the full breadth of human diversity, including both ethnographic and experimental data from hunter-gatherers, agriculturalists, and—the most unusual of all—people from industrialized societies.

Course Notes:

This course is most relevant for freshmen and sophomores who have not yet declared a concentration in Human Evolutionary Biology, for HEB concentrators who have not yet taken courses in the evolution of behavior, or for other concentrators looking for an introduction to evolutionary theories of human behavior.

Graduate students interested in this course should enroll in HEB 2480.

This course fulfills the behavior subfield requirement for Human Evolutionary Biology.

Requirements:

Course open to Undergraduate Students Only

Human Evolutionary Biology 1290

Cultural Evolution (159565)

Joseph Henrich

2016 Fall (4 Credits)

Schedule:

MW 0200 PM - 0330 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

Unlike other species, humans are heavily reliant on learning from others to acquire many important aspects of their behavior, and this cultural transmission has created a second system of inheritance that has driven much of our species' genetic evolution. In addition to having shaped our species' anatomy and physiology, cultural evolution has important implications for understanding human nature, and for how to tackle basic problems in psychology, economics and anthropology. The first third of this course will develop the basic principles and lines of inquiry while the remainder will apply, hone and refine them by exploring economic development, the history of modern institutions, and global inequality.

Course Notes: Students must seek instructors' permission to enroll in the course by sending Professor Joseph Henrich a paragraph via email to explain their interest in the course.

Additional Course Attributes:

Human Evolutionary Biology 1300

Evolutionary Origins of the Human Mind (159567)

Alexandra Rosati

2017 Spring (4 Credits)

Schedule: MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Human behavior is strikingly different from other animals: we speak languages, create tools, work together on large-scale endeavors, and even learn from others in university classrooms. What cognitive processes underlie these behaviors, and how did they emerge? In this course, we will examine the evolutionary origins of human cognition, with an eye to identifying what human psychological capacities are unique versus shared with other species. To do so, we will integrate theoretical perspectives from biology concerning the evolution of intelligent behavior, with current empirical research from comparative psychology. Topics will include: social cognition, communication, inhibitory control, and memory and planning, with a focus on humans and other primates.

Recommended Prep: Students wishing to enroll in this course must have completed at least one of the following courses: Human Evolutionary Biology 1280, Human Evolutionary Biology 1329, Human Evolutionary Biology 1330, Human Evolutionary Biology 1335, Science of Living Systems 15, or Science of Living Systems 20, or by permission of instructor.

Additional Course Attributes:

All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1310

Hormones and Behavior (112219)

Carole Hooven

2017 Spring (4 Credits)

Schedule:

MW 1100 AM - 1229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the interaction between hormones and behavior, emphasizing research in humans. General principles of endocrine physiology are presented. The course then focuses on how hormones affect the brain and body in early development and later in adulthood, and the relationship of hormones to sex and gender. We will explore human reproduction, energy metabolism, mating and sexuality, parental behavior, stress, and dominance interactions.

Course Notes: This course is a prerequisite for Human Evolutionary Biology 1418.

This course fulfills the Anatomy/Physiology subfield requirement in HEB

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science

All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1313

Stress (127757)

Judith Flynn

2017 Spring (4 Credits)

Schedule:

R 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

An examination of stress from a scientific perspective with a focus on stress research in mammals,

especially primate and humans. A writing and speaking intensive seminar that will explore the basics of the stress response, physiological effects of the stress and factors that affect stress responsiveness, such as perinatal and early life effects, social support, outlets for frustration and coping skills. The relationship between stress and disease will also be explored. Scientific studies of the effectiveness of modalities of stress reduction will also be discussed. Students will present primary scientific literature that highlights current research on a variety of topics in the field.

Human Evolutionary Biology 1320

Stones, Bones, and the Evolution of Human Behavior (203608)

Manuel Dominguez-Rodrigo

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How did the earliest humans spend their days? What traces of their activities can we hope to uncover after 2.5 million years or more? Using comparative primate ecology as a framework, this course delves into how we interpret the material remains discarded by early humans at specific African locales. It emphasizes a behavioral approach (with a strong archaeological component) to understanding the emergence and evolution of humanity during the Early Pleistocene. Ultimately, it converges with evidence from physical anthropology to define "human" both from a physical and behavioral point of view.

Recommended Prep:

Students wishing to enroll should have some background in Human Evolutionary Biology, Archaeology, or Primatology. Science of Living Systems 16 or Human Evolutionary Biology 97 are recommended, but not required.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students

Human Evolutionary Biology 1321

Food, Drink and Energy (160432)

Noreen Tuross

Linda M. Reynard

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

8

This course explores how the food you eat, the beverages you drink and your activity level are part of your total energy budget. The focus of the course is on how energy is measured including food and drink energy

content, dietary intake records and recall, activity monitors and recalls, the resting metabolic rate and finally, the use of doubly labeled water in animals and humans.

Course Notes: This course fulfills the research seminar requirement for Human Evolutionary Biology.

Course includes a laboratory component in addition to the seminar portion.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a and Life Sciences 1b required.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1330

Primate Social Behavior (113837)

Richard Wrangham

Vivek Venkataraman

2017 Spring (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

A review of the behavioral interactions in natural primate populations, drawing on experimental, observational, and theoretical studies. Discussion of ecological, physiological, and developmental bases of primate social behavior, with special attention to the evolution of patterns of behavioral interactions among individuals of different age, sex, relatedness, and status. Topics include sexual conflict, sexual selection, and mating systems; care of offspring and other aid-giving; manipulative and cooperative aspects of communication; competition, dominance, and territoriality; and the evolution of social relationships.

Course Notes: This course fulfills the behavior concentration requirement for Human Evolutionary Biology.

Class Notes: This course will include a mandatory field trip to the Franklin Park Zoo at a date to be determined.

Recommended Prep: HEB 1280 or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Prove It With Science (204529)

Kate Carter

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

How do we tell whether a scientific paper represents good science? The goal of this research methods course is to help you develop skills to discern good science from bad, by focusing on the grey area of human evolution research. We will create biased surveys, p-hack our way to statistical significance, and learn all the slights of hand researchers use to massage their data. We will also discuss some of the major papers in both medicine and human evolution to critically evaluate their methods and results. As a final project, you will use all the grey area techniques we've discussed to concoct (then deconstruct) your own fallacious research project.

Course Notes:

Enrollment in Human Evolutionary Biology 1358 includes a required discussion section, which will be held on Wednesdays or Thursdays from 4-5 p.m.

This course fulfills the junior research seminar requirement for Human Evolutionary Biology concentrators.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1361

Hormones and Life History Physiology (203615)

Peter Ellison

Susan Lipson

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

A survey of human life history physiology and the role of hormones in the orchestration of key transitions, the allocation of energy to optimize fitness, and the consequences for human health and disease. Although the focus will be on humans, relevant comparisons with non-human primates and other vertebrates will also be made.

Lectures will be supplemented by reading and discussion of primary literature.

Course Notes:

Prerequisite for enrollment: Human Evolutionary Biology 1310, "Hormones and Behavior," or Human Evolutionary Biology 1418, "Research Methods in Endocrinology," or with permission of instructor.

Credit for this course will not be given to students who completed Human Evolutionary Biology 1351, "Reproductive Ecology".

Class Notes:

Enrollment in Human Evolutionary Biology 1361 includes a required discussion section meeting on Wednesdays from 1-2:29 p.m.

Requirements: Anti-req: Cannot be taken for credit if HEB 1351 already complete

Additional Course Attributes:

Human Evolutionary Biology 1362 Section: SEM

Hunter-Gatherers (204530)

Vivek Venkataraman

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Modern industrialized life is highly unusual from an evolutionary perspective. For the vast majority of our species' history, we lived in small, mobile, social groups and subsisted on non-domesticated foods. This hunting and gathering way of life has profoundly influenced our evolved physiology, life history, psychology, and social behavior. In this seminar, we examine recent human evolution and adaptation through the lens of the food quest: the goal of acquiring adequate energy to stay alive and reproduce. After establishing fundamental ecological and evolutionary principles, we then survey hunter-gatherer populations around the globe. We focus on cross-cultural variation in foraging and subsistence, technology, life history, co-residence patterns, and social behavior. The course highlights the strengths and weaknesses of using modern hunter-gatherers as models for the past.

Human Evolutionary Biology 1410

Gut Microbiome and Human Health (204010)

Rachel Carmody

2017 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

Microorganisms residing in the human gastrointestinal tract outnumber our own cells and together encode at least 100 times as many unique genes. In this research seminar, we explore gut microbial contributions to human physiology in states of health and disease. We consider the pivotal roles of the gut microbiota in digestion, detoxification, energy regulation, and immunity, and discuss emerging evidence for the microbial modulation of risks and/or treatment of metabolic syndrome, cardiovascular disease, cancer, and behavioral disorders. Students will be introduced to bench and bioinformatics techniques used to investigate gut microbial communities, allowing students to pilot projects that dovetail with topics discussed in seminar.

Course Notes:

This course fulfills the research seminar requirement for Human Evolutionary Biology.

Preference will be given to Human Evolutionary Biology concentrators fulfilling a research seminar requirement and Human Evolutionary Biology graduate students.

Enrollment in Human Evolutionary Biology 1410 involves a required three-hour weekly lab section, hours to be arranged.

Recommended Prep: Life Sciences 2 or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1418

Research Methods in Endocrinology (110741)

Susan Lipson

2016 Fall (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 8

An introduction to research in behavioral endocrinology (the study of how hormones and behavior are related), focusing on: 1) laboratory techniques (immunoassay) for the measurement of hormone levels (testosterone, cortisol, and C-peptide) in saliva and urine and 2) study design strategies and data analysis methods.

Students complete original research projects, collecting samples, analyzing data on hormone levels and how they are related to various aspects of behavior and/or physiology, and presenting their results orally to the class, and in written reports.

Course Notes: This course includes a mandatory two-hour laboratory section per week. Students will be given the option to choose either Monday or Wednesday afternoon for their laboratory section.

Lab safety training required (after enrollment).

This course fulfills the research seminar requirement for Human Evolutionary Biology.

Recommended Prep: Human Evolutionary Biology 1310 or Life Sciences 2 or with permission of instructor.

Human Evolutionary Biology 1480

Human Evolution through Developmental Change (156174)

Terence Capellini

Neil Roach

2016 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

Humans and our primate relatives display marked variation in biological traits. This variation results from natural selection operating on pre- and post-natal developmental mechanisms. While these mechanisms remain mostly unknown, recent advances in genetics, genomics, and developmental biology now allow us to begin to understand how evolutionary processes influence and are influenced by underlying developmental and genetic organization. This course explores these inter-relationships in the context of the primate paleontological record. We focus on the evolution of the post-cranial skeleton (i.e., the axial skeleton, girdles, and limbs), and present studies that cast light on the mechanisms that underlie major transitions in human evolution.

Course Notes: This course fulfills the research seminar requirement for Human Evolutionary Biology.

Recommended Prep: Life Sciences 1b and Life Sciences 2 recommended.

Human Evolutionary Biology 1610

Genes and Human Adaptations (203909)

Maryellen Ruvolo

2016 Fall (4 Credits)

Schedule: W 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 8

Natural selection produces genetic changes that make a population better able to reproduce and survive in

an ever-changing environment, a process known as adaptation. This course examines adaptations common to all humans (since divergence from our closest primate relatives) and those that have occurred in particular populations as humans dispersed around the globe and responded to the challenges of novel environments, diets, and diseases. We will focus on the genetic evidence for adaptations as detected from the signals left by natural selection on the genome. Evidence for potentially adaptive alleles having been introduced into some human genomes from hominin relatives, the Neandertals and Denisovans, will be considered. To place human adaptations in broader evolutionary perspective, we will investigate adaptations in diverse non-human species where the genetic and genomic bases of adaptation are often known more completely.

Recommended Prep: An A or B grade in Life Sciences 1b, Organismic Evolutionary Biology 50, or a college-level genetics course .

Additional Course Attributes:

Human Evolutionary Biology 2100

Diet and Exercise (204009)

Rachel Carmody

Daniel Lieberman

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar considers evolutionary factors underlying how variations in diet and exercise affect the human body. Why do we tend to crave foods rich in fat and sugar? How unhealthful are saturated fats? Why has the prevalence of food allergies skyrocketed? Why are we so susceptible to sports injuries? Is exercise really medicine?

Weekly readings and discussion will be used to explore how ancestral diets and forms of physical activity have shaped human anatomy and physiology, and how differences between past and present diets and forms of exercise may contribute to illness, mortality, and variations in reproductive success. In doing so, we challenge popular conceptions of what it means to be "healthy."

Course Notes: Preference will be given to Human Evolutionary Biology graduate students and advanced undergraduate students concentrating in Human Evolutionary Biology.

Recommended Prep: Life Sciences 2 or permission of the instructors.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3000

Reading and Research (126279)

Terence Capellini

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3000 Section: 002

Reading and Research (126279)

Rachel Carmody

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3000 Section: 002

Reading and Research (126279)

Rachel Carmody

2016 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3000 Section: 003

Reading and Research (126279)

Peter Ellison

Susan Lipson

2016 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3350

Laboratory Methods in Primate and Human Nutrition (126406)

Rachel Carmody

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3350

Laboratory Methods in Primate and Human Nutrition (126406)

Rachel Carmody

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3350 Section: 002

Laboratory Methods in Primate and Human Nutrition (126406)

Richard Wrangham

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3350 Section: 002

Laboratory Methods in Primate and Human Nutrition (126406)

Richard Wrangham

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3400

Advanced Reading and Research (126282)

Terence Capellini

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Class Notes: Members of the Department

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3400

Advanced Reading and Research (126282)

Terence Capellini

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3400 Section: 002

Advanced Reading and Research (126282)

Rachel Carmody

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3400 Section: 002

Advanced Reading and Research (126282)

Rachel Carmody

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3400 Section: 003

Advanced Reading and Research (126282)

Peter Ellison

Susan Lipson

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3400 Section: 003

Advanced Reading and Research (126282)

Peter Ellison

Susan Lipson

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3400 Section: 004

Advanced Reading and Research (126282)

Joseph Henrich

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3400 Section: 004

Advanced Reading and Research (126282)

Joseph Henrich

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3400 Section: 005

Advanced Reading and Research (126282)

Daniel Lieberman

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3400 Section: 005

Advanced Reading and Research (126282)

Daniel Lieberman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3400 Section: 006

Advanced Reading and Research (126282)

David Pilbeam

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3400 Section: 006

Advanced Reading and Research (126282)

David Pilbeam

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3400 Section: 007

Advanced Reading and Research (126282)

Alexandra Rosati

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3400 Section: 007

Advanced Reading and Research (126282)

Alexandra Rosati

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3400 Section: 008

Advanced Reading and Research (126282)

Maryellen Ruvolo

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3400 Section: 008

Advanced Reading and Research (126282)

Maryellen Ruvolo

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3400 Section: 009

Advanced Reading and Research (126282)

Noreen Tuross

Linda M. Reynard

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3400 Section: 009

Advanced Reading and Research (126282)

Noreen Tuross

Linda M. Reynard

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3400 Section: 010

Advanced Reading and Research (126282)

Richard Wrangham

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3400 Section: 010

Advanced Reading and Research (126282)

Richard Wrangham

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3500

Direction of the Doctoral Dissertation (126283)

Terence Capellini

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Class Notes: Members of the Department

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3500

Direction of the Doctoral Dissertation (126283)

Terence Capellini

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Class Notes: Members of the Department

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3500 Section: 002

Direction of the Doctoral Dissertation (126283)

Rachel Carmody

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3500 Section: 002

Direction of the Doctoral Dissertation (126283)

Rachel Carmody

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3500 Section: 003

Direction of the Doctoral Dissertation (126283)

Peter Ellison

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3500 Section: 003

Direction of the Doctoral Dissertation (126283)

Peter Ellison

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3500 Section: 004

Direction of the Doctoral Dissertation (126283)

Joseph Henrich

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3500 Section: 004

Direction of the Doctoral Dissertation (126283)

Joseph Henrich

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3500 Section: 005

Direction of the Doctoral Dissertation (126283)

Daniel Lieberman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3500 Section: 005

Direction of the Doctoral Dissertation (126283)

Daniel Lieberman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3500 Section: 006

Direction of the Doctoral Dissertation (126283)

David Pilbeam

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3500 Section: 006

Direction of the Doctoral Dissertation (126283)

David Pilbeam

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3500 Section: 007

Direction of the Doctoral Dissertation (126283)

Alexandra Rosati

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Course Notes:** Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3500 Section: 007

Direction of the Doctoral Dissertation (126283)

Alexandra Rosati

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3500 Section: 008

Direction of the Doctoral Dissertation (126283)

Maryellen Ruvolo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3500 Section: 008

Direction of the Doctoral Dissertation (126283)

Maryellen Ruvolo

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3500 Section: 009

Direction of the Doctoral Dissertation (126283)

Noreen Tuross

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3500 Section: 009

Direction of the Doctoral Dissertation (126283)

Noreen Tuross

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3500 Section: 010

Direction of the Doctoral Dissertation (126283)

Richard Wrangham

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3500 Section: 010

Direction of the Doctoral Dissertation (126283)

Richard Wrangham

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3595

Laboratory Methods in Evolutionary Genetics (144613)

Maryellen Ruvolo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Limited to graduate students conducting doctoral dissertation

research in Professor Maryellen Ruvolo's Evolutionary Genetics lab.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3595

Laboratory Methods in Evolutionary Genetics (144613)

Maryellen Ruvolo

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Limited to graduate students conducting doctoral dissertation research in Professor Maryellen Ruvolo's Evolutionary Genetics lab.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3596

Laboratory Methods in Human Developmental Genetics (160709)

Terence Capellini

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Supervised independent laboratory research focusing on discovering the developmental genetic and genomic mechanisms that control musculo-skeletal development in the context of human evolutionary anatomy. Students will be conducting research in Professor Terry Capellini's Developmental and Evolutionary Genetics Lab.

Course Notes: Limited to graduate students in Human Evolutionary Biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

FAS Divisional Distribution	None

Human Evolutionary Biology 3596

Laboratory Methods in Human Developmental Genetics (160709)

Terence Capellini

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Supervised independent laboratory research focusing on discovering the developmental genetic and genomic mechanisms that control musculo-skeletal development in the context of human evolutionary anatomy. Students will be conducting research in Professor Terry Capellini's Developmental and Evolutionary Genetics Lab.

Course Notes: Limited to graduate students in Human Evolutionary Biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3600

Current Issues in Human Evolutionary Biology (126616)

Terence Capellini

2017 Spring (4 Credits)

Schedule: T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Weekly seminars in human evolutionary biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3600

Current Issues in Human Evolutionary Biology (126616)

Terence Capellini

2016 Fall (4 Credits)

Schedule: T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Weekly seminars in human evolutionary biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3600 Section: 002

Current Issues in Human Evolutionary Biology (126616)

Rachel Carmody

2017 Spring (4 Credits)

Schedule:

T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Weekly seminars in human evolutionary biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3600 Section: 002

Current Issues in Human Evolutionary Biology (126616)

Rachel Carmody

2016 Fall (4 Credits)

Schedule:

T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Weekly seminars in human evolutionary biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3600 Section: 003

Current Issues in Human Evolutionary Biology (126616)

Peter Ellison

2016 Fall (4 Credits)

Schedule:

T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Weekly seminars in human evolutionary biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3600 Section: 003

Current Issues in Human Evolutionary Biology (126616)

Peter Ellison

2017 Spring (4 Credits)

Schedule:

T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Weekly seminars in human evolutionary biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3600 Section: 004

Current Issues in Human Evolutionary Biology (126616)

Joseph Henrich

2017 Spring (4 Credits)

Schedule:

T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Weekly seminars in human evolutionary biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3600 Section: 004

Current Issues in Human Evolutionary Biology (126616)

Joseph Henrich

2016 Fall (4 Credits)

Schedule:

T 1200 PM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Weekly seminars in human evolutionary biology.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3600 Section: 005

Current Issues in Human Evolutionary Biology (126616)

Daniel Lieberman

2017 Spring (4 Credits)

Schedule:

T 1200 PM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Weekly seminars in human evolutionary biology.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3600 Section: 005

Current Issues in Human Evolutionary Biology (126616)

Daniel Lieberman

2016 Fall (4 Credits)

Schedule:

T 1200 PM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Weekly seminars in human evolutionary biology.

Requirements: **Course open to Graduate Students Only**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3600 Section: 006

Current Issues in Human Evolutionary Biology (126616)

David Pilbeam

2017 Spring (4 Credits)

Schedule:

T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Weekly seminars in human evolutionary biology.

Requirements: **Course open to Graduate Students Only**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3600 Section: 006

Current Issues in Human Evolutionary Biology (126616)

David Pilbeam

2016 Fall (4 Credits)

Humanities

Subject: Humanities

Humanities 10A

A Humanities Colloquium: From Homer to Garcia Marquez (110440)

Louis Menand

Stephen Greenblatt

Deidre Lynch

Jill Lepore

Davíd L. Carrasco

Jay Harris

2016 Fall (4 Credits)

Schedule:

T 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

90

2,500 years of essential works, taught by six professors. Humanities 10a includes works by Homer, Plato, Aristotle, Sophocles, Dante, Shakespeare, Mozart, Austen, Douglass, and Garcia Marquez, as well as the Hebrew Bible, the New Testament, and the Declaration of Independence. One 90-minute lecture plus a 90-minute discussion seminar led by the professors every week. Students also receive instruction in critical writing one hour a week, in writing labs and individual conferences. Students who take both Humanities 10a and 10b fulfill the College Writing Requirement. This is the only course outside of Expository Writing that satisfies that requirement. Students also have opportunities to visit cultural venues and attend musical and theatrical events in Cambridge or Boston.

Course Notes:

Humanities 10a will be lotteried by application process. See the course website for more details. Humanities 10b, which meets in the Spring, is open only to students who have completed Humanities 10a and includes works by Joyce, Nietzsche, Rousseau, Montaigne, Shakespeare, Murasaki, Augustine, Virgil, Sophocles, and Homer. Most students take both semesters of Hum 10, but students who do not take 10b receive full credit for 10a. Hum 10a meets the General Education requirement for Aesthetic and Interpretive Understanding. Hum 10a and 10b meets the General Education requirements for both Aesthetic and Interpretive Understanding and Culture and Belief as well as the Expos requirement. The course is open only to freshmen. No auditors. The course may not be taken Pass/Fail.

Class Notes:

The course will be lotteried by application process, administered at the first meeting, on Thursday, September 1. See the course website for more details.

Additional Course Attributes:

Humanities 11A

Frameworks: The Art of Looking (109854)

Jennifer L. Roberts

2017 Spring (4 Credits)

Schedule:

T 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

105

Visual information today is superabundant thanks to our smartphones, tablets, and other screen-based gadgets. But few of us recognize how thoroughly our habits and experiences of looking have been conditioned by interfaces with long and complex histories. Participants in this course, developed as part of the Humanities Project at Harvard, will approach looking through a consideration of key technologies from

its history, such as the telescope, the cinema, and the easel painting. Students will learn about the hidden intricacies of looking and hone skills of visual, material, and spatial analysis through encounters with aesthetic objects from Harvard's collections.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. Students are expected to attend a weekly two-hour section.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Humanities 11B

Frameworks: The Art of Listening (109855)

Alexander Rehding

John T. Hamilton

2016 Fall (4 Credits)

Schedule:

T 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

90

Our world is steeped in sound, but we must learn to pay attention to listening. Sounds produce emotions, mark out spaces, call up memories; silence can be deafening; voice is a marker of identity. This course will sharpen our ears. We explore the sonic world through diverse readings and creative projects with sound. Discussions and assignments will open our minds (and ears) to listening practices, what the arts teach us about listening, and how we describe our experiences as listeners. We examine the relationships between sound and time, community, responsibility and attentiveness, and explore the soundscape in which we live.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding. Students will meet once weekly for two-hour sections.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

The Urban Imagination (160422)

Julie A. Buckler

2016 Fall (4 Credits)

Schedule:

TR 0200 PM - 0329 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Cities are one of humankind's most richly complex inventions and can best be understood through both creative and critical thinking. Offered in connection with a Mellon-funded initiative in Architecture, Urbanism, and the Humanities, this course invites you to join an interdisciplinary investigation of the urban form and fabric, socio-cultural life, and artistic representation of five iconic cities — Boston, Berlin, Moscow, Istanbul, and Mumbai, as well as the special case study of Łódź, Poland. We will treat literature, film, and photography alongside cultural history, experiment with urban fieldwork, and use digital tools for mapping and curating virtual exhibitions.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding

What do the world's almost 7,000 languages have in common? Why do they show recurrent commonalities and principled differences? What do they reveal about the human ability for speaking and thinking? How do languages develop? How do they die? This course addresses these and related questions while introducing the languages of the world; their distribution, recurrent structural properties, and genetic classification; processes of language contact; and the relationship between language and the brain.

Linguistics 101

The Science of Language: An Introduction (110785)

Isabelle Charnavel

2017 Spring (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course introduces components of study of language: phonology, morphology, syntax, and semantics.

It presents the view that knowledge of language is best characterized as an unconsciously internalized set of abstract rules and principles. Evidence is drawn from a variety of signed and spoken languages, language universals, child language acquisition, language change, language games, and language disorders.

Linguistics 102

Sentence Structure (121089)

Jenneke van der Wal

2016 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What determines how the words in a sentence are put together in a given language? This course introduces the field of syntax, and the study of order and structure among words. Students will learn to construct and evaluate syntactic analyses and argumentation and will be exposed to variation and universals in the syntactic patterns found in natural languages. The course will also provide an introductory survey of syntactic phenomena, including question formation, the passive, anaphora, and agreement.

Linguistic Field Methods (123611)

Jenneke van der Wal

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In our study of human language we rely on data from different, sometimes underdescribed, languages. But how do we obtain reliable data? This course provides tools for the elicitation of phonological, morphological, and syntactic information, working with a native speaker of an unfamiliar language. We focus on the practical methodology and discuss problems of data collection and grammatical description in the field, with the aim to prepare students for their own potential fieldwork.

The language we will be discovering in Ling 117r Field Methods Spring 2017 is called Lugwere (or Gwere). It is an understudied Bantu language spoken in Uganda. Andrew Nalani will serve as our informant (a native speaker) to help us discover his language.

FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 147

Semantics of Questions (203755)

Yimei Xiang

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is an in-depth investigation into the semantics of questions. Several canonical approaches are introduced, including Categorical Semantics, Partition Semantics, and Alternative Semantics. Topics covered include composition of questions, variations of exhaustivity, uniqueness effects, quantificational variability effects, and mention some readings.

Recommended Prep: Linguistics 106 or equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 148

Language Universals (123446)

Jenneke van der Wal

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Provides an introduction to the study of cross-linguistic variation and analyzes alternative approaches to language universals (functional explanations, processing explanations, explanations in terms of universal grammar). Topics to be studied include word order, case marking, agreement, lexical categories, subject-hood, and information structure. Sampling techniques and the use of hierarchies will also be covered.

Recommended Prep: Linguistics 102 or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 156

Structure of Bantu (204397)

Jenneke van der Wal

2017 Spring (4 Credits)

Schedule:

M 1100 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

While you may have heard of languages like Swahili and Zulu, the family of Bantu languages actually consists of around 500 languages, spoken in Sub-Saharan Africa by an estimated 240 million speakers. For linguists this is a true language treasure chest: new data from underdescribed languages can be discovered, and despite the very similar basics (SVO, agglutinative) there is much microvariation. This course will cover the basic linguistic characteristics of Bantu languages in phonology, morphology, syntax and discourse, both from a descriptive and a theoretical point of view.

Course Notes: This is a new course.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

Linguistics 171

Structure of Chinese (115947)

C.-T. James Huang

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Introduction to the syntactic structure of Mandarin Chinese: the basic structure of clauses and nominal constituents; words, compounds, and phrases; word order and variations; selected special topics (passives, resultatives, ba-construction, topic and relativized structures, questions, anaphora, pro drop); syntactic structure and semantic interpretation.

Recommended Prep: Linguistics 102 in previous or current term or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 176

History and Prehistory of the Japanese Language (114299)

Wesley Jacobsen

2017 Spring (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap: n/a

An examination of evidence from the comparative method, internal reconstruction, and written documents for reconstructing prehistoric stages of the Japanese language and an overview of major developments in Japanese phonology and grammar from the Nara period through the present day

Recommended Prep: Knowledge of Japanese equivalent to Japanese 120b, or familiarity with historical linguistics, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 200

Second Language Acquisition (125242)

Jennifer Li-Chia Liu

Nicole Mills

2016 Fall (4 Credits)

Schedule: R 0215 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

An overview of second-language teaching and learning focused on theoretical models, learning objectives, developmental stages, materials design, and the use of new technology in teaching. The course explores the nature of second language acquisition, focused specifically on the needs of graduate students teaching a second language.

Course Notes: This course must be taken for letter grade.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 204R

Topics in Syntax (114737)

C.-T. James Huang

2017 Spring (4 Credits)

Schedule: M 0300 PM - 0459 PM**Instructor Permissions:** None**Enrollment Cap:** n/a**Examination of current issues in syntactic theory with focus on topics of interest to the class.****Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 205R

The Syntax-Semantics Interface (114962)

Isabelle Charnavel

2016 Fall (4 Credits)

Schedule: M 0100 PM - 0259 PM**Instructor Permissions:** None**Enrollment Cap:** n/a**An exploration of issues related to the architecture of the grammar, with emphasis on the structures that are interpreted at the semantic interface, and how they are derived.****Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Linguistics 212

Syntactic Theory II (123099)

Isabelle Charnavel

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course is designed to enable students to follow current research in syntax. Topics vary from year to year; may include head movement, case and agreement, anaphora, functional categories, ellipsis, argument structure, constraints on movement and derivations, and on form-meaning mappings.

Recommended Prep: Linguistics 112, equivalent, or permission of instructor.**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 215

Phonological Theory II (107809)

Aleksei Nazarov

2017 Spring (4 Credits)

Schedule:

R 1100 AM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course addresses topics of current interest in phonological theory, potentially including competing constraint grammar frameworks, learnability, naturalness biases, prosody, quantitative approaches (experimental or corpus-driven), variation, gradience, and the morphological interface.

Recommended Prep: Linguistics 105, equivalent, or permission of the instructor**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 216

Semantic Theory II (117103)

Gennaro Chierchia

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Continuation of Linguistics 116. Designed to enable students to follow current research in semantics. Topics covered include: intensional contexts, indexicals, modalities, event based semantics, presuppositions, and formal theories of implicatures.

Recommended Prep: Linguistics 116, equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 219R

Advanced Phonology (111288)

Aleksei Nazarov

2017 Spring (4 Credits)

Schedule:

T 1100 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An examination of why phonological phenomena exist at all, and the nature of phonological computation. Primarily exemplification from harmony, reduplication, and meter. Design conditions imposed by economy, perception, articulation, the learning path, and the lexicon.

Recommended Prep: Linguistics 114 or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

Linguistics 220AR

Advanced Indo-European (112991)

Jay Jasanoff

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Topics in Indo-European comparative grammar, including Anatolian. Conducted as a seminar.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics

Subject: Mathematics

Mathematics ESPA

Emerging Scholars: Problem Solving Exploration (204095)

Dusty Grundmeier

2016 Fall (2 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In his seminal work from 1945, *How to Solve It*, George Polya introduced principles of mathematical problem solving that are widely applicable to problems in science and engineering. This year-long class focuses on building a powerful and portable problem-solving and modeling tool kit while bridging the divide between mathematics and science courses. The second semester will be organized around projects in areas of student interest. Both Math ESPA and Math ESPB must be taken in the same academic year to receive credit.

Additional Course Attributes:

Mathematics MA

Introduction to Functions and Calculus I (111161)

Brendan Kelly

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

The study of functions and their rates of change. Fundamental ideas of calculus are introduced early and used to provide a framework for the study of mathematical modeling involving algebraic, exponential, and logarithmic functions. Thorough understanding of differential calculus promoted by year long reinforcement. Applications to biology and economics emphasized according to the interests of our students.

Course Notes:

This is a lecture course taught in small sections. In addition, participation in two one-hour workshops is required each week. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course, when taken together with Mathematics Mb, can be followed by Mathematics 1b. Mathematics Ma and Mb together cover all the material in Mathematics 1a (and more).

Class Notes:

Required first meeting: Wednesday, August 31, 8:30 am, Science Center D.

Fall section times: M., W., F., at 10; M., W., F., at 11; M., W., F., at 12 (with sufficient enrollment) and a twice weekly lab session to be arranged.

Brendan Kelly, Sarah Chisholm, Matthew Demers, Karen Edwards, Dusty Grundmeier, Neha Gupta, and members of the Department.

Mathematics MB

Introduction to Functions and Calculus II (113464)

Brendan Kelly

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Continued investigation of functions and differential calculus through modeling; an introduction to integration with applications; an introduction to differential equations. Solid preparation for Mathematics 1b.

Course Notes:

This is a lecture course taught in small sections. In addition,

participation in two one-hour workshops is required each week. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course, when taken together with Mathematics Ma, can be followed by Mathematics 1b. Mathematics Ma and Mathematics Mb together cover all the material in Mathematics 1a (and more).

Class Notes: Required first meeting: Monday, January 23, 8:30 am, Science Center A.

Spring Section Times: M., W., F., at 10; M. W., F., at 11; M., W., F., at 12 (with sufficient enrollment); and a twice weekly lab session to be arranged.

Brendan Kelly, Sarah Chisholm, Karen Edwards, Neha Gupta, Matthew Demers, and members of the Department.

Requirements: Prerequisite: Mathematics MA

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Quantitative Reasoning
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 1A

Introduction to Calculus (123680)

Neha Gupta

2017 Spring (4 Credits)

Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

The development of calculus by Newton and Leibniz ranks among the greatest achievements of the past millennium. This course will help you see why by introducing: how differential calculus treats rates of change; how integral calculus treats accumulation; and how the fundamental theorem of calculus links the two. These ideas will be applied to problems from many other disciplines.

Course Notes: In the fall, Math 1a is taught in sections of 20-30 students. In the spring, Math 1a is taught in a larger lecture format. Participation in a weekly 90-minute workshop is required. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. Mathematics Ma and Mb together cover all of the material in Mathematics 1a (and more).

Class Notes: Spring section time: M.W.F. at 10 and weekly lab section to be arranged.

Recommended Prep: A solid background in precalculus.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 1B

Calculus, Series, and Differential Equations (111010)

Robin Gottlieb

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Speaking the language of modern mathematics requires fluency with the topics of this course: infinite series, integration, and differential equations. Model practical situations using integrals and differential equations. Learn how to represent interesting functions using series and find qualitative, numerical, and analytic ways of studying differential equations. Develop both conceptual understanding and the ability to apply it.

Course Notes:

This is a lecture taught in small sections. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes:

Required first meeting in spring: Monday, January 23, 8:30 am, Science Center D.

Spring section times: M.W.F. at 10; M.W.F. at 11; M.W.F. at 12; Tu.Th. 10-11:30 (with sufficient enrollment); Tu Th 11:30-1 (with sufficient enrollment).

Robin Gottlieb, Brendan Kelly, Yu-Wen Hsu, Anand Patel, Katherine Penner, and members of the Department.

Recommended Prep:

Mathematics 1a or Ma and Mb; or 5 on the AB advanced placement test; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Core Curriculum	Quantitative Reasoning

Mathematics 18

Multivariable Calculus for Social Sciences (125396)

Yu-Wen Hsu

2016 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Focus on concepts and techniques of multivariable calculus most useful to those studying the social sciences, particularly economics: functions of several variables; partial derivatives; directional derivatives and the gradient; constrained and unconstrained optimization, including the method of Lagrange multipliers. Covers linear and polynomial approximation and integrals for single variable and multivariable functions; modeling with derivatives. Covers topics from Math 21a most useful to social sciences.

Course Notes:

Mathematics 21b can be taken before or after Mathematics 18. Examples draw primarily from economics and the social sciences, though Mathematics 18 may be useful to students in certain natural sciences. Students whose main interests lie in the physical sciences, mathematics, or engineering should consider Math or Applied Math 21a. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep:

Mathematics 1b or equivalent, or a 5 on the BC Advanced Placement Examination in Mathematics.

Requirements:

Anti-Requisite: Not to be taken in addition to Mathematics 21a or Applied Mathematics 21a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Final Assessment Category	Three-hour Exam
FAS: Core Curriculum	Quantitative Reasoning

All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 19A

Modeling and Differential Equations for the Life Sciences (110596)

John Cain

2016 Fall (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Considers the construction and analysis of mathematical models that arise in the life sciences, ecology and environmental life science. Introduces mathematics that include multivariable calculus, differential equations in one or more variables, vectors, matrices, and linear and non-linear dynamical systems. Taught via examples from current literature (both good and bad).

Course Notes:

This course is recommended over Math 21a for those planning to concentrate in the life sciences and ESPP. Can be taken with or without Mathematics 21a,b. Students with interests in the social sciences and economics might consider Mathematics 18. This course can be taken before or after Mathematics 18. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep:

A course in one variable calculus preferably at the level of Mathematics 1b.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Course Level	Primarily for Undergraduate Students
FAS: Core Curriculum	Quantitative Reasoning

Mathematics 19B

Linear Algebra, Probability, and Statistics for the Life Sciences (122219)

Rosalie Belanger-Rioux

2017 Spring (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Probability, statistics and linear algebra with applications to life sciences, chemistry, and environmental life sciences. Linear algebra includes matrices, eigenvalues, eigenvectors, determinants, and applications to probability, statistics, dynamical systems. Basic probability and statistics are introduced, as are standard models, techniques, and their uses including the central limit theorem, Markov chains, curve fitting, regression, and pattern analysis.

Course Notes:

This course is recommended over Math 21b for those planning to concentrate in the life sciences and ESPP. Can be taken with Mathematics 21a. Students who have seen some multivariable calculus can take Math 19b before Math 19a. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: A course in one variable calculus preferably at the level of Mathematics 1b.

Requirements: Not to be taken in addition to Mathematics 21b or Applied Mathematics 21b.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Core Curriculum	Quantitative Reasoning
FAS: Course Level	Primarily for Undergraduate Students

Mathematics 21A

Multivariable Calculus (119196)

Janet Chen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

To see how calculus applies in practical situations described by more than one variable, we study: Vectors, lines, planes, parameterization of curves and surfaces, partial derivatives, directional derivatives and the gradient, optimization and critical point analysis, including constrained optimization and the Method of Lagrange Multipliers, integration over curves, surfaces and solid regions using Cartesian, polar, cylindrical, and spherical coordinates, divergence and curl of vector fields, and the Green's, Stokes's, and Divergence Theorems.

Course Notes: This is a lecture taught in small sections. May not be taken for credit by students who have passed Applied Mathematics 21a. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. Activities using computers to calculate and visualize applications of these ideas will not require programming experience.

Class Notes: Required first meeting in spring: Monday, January 23, 8:30 am, Science Center C.

Spring section times: M.W.F. at 9 (with sufficient enrollment); M.W.F. at 10; M.W.F. at 11; M.W.F. at 12 (with sufficient enrollment). Tu.Th 10-11: 30; Tu.Th. 11:30-1 (with sufficient enrollment).

Janet Chen, Jameel Al-Aidroos, Wes Cain, Yu-Wen Hsu, and members of the Department.

Recommended Prep: Mathematics 1b or an equivalent background in mathematics.

Requirements: Anti-requisite: Not to be taken in addition to AM21a.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS: Core Curriculum	Quantitative Reasoning

FAS: General Education	Empirical and Mathematical Reasoning
FAS: Final Assessment Category	Three-hour Exam

Mathematics 21B

Linear Algebra and Differential Equations (110989)

Oliver Knill

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Matrices provide the algebraic structure for solving myriad problems across the sciences. We study matrices and related topics such as linear transformations and linear spaces, determinants, eigenvalues, and eigenvectors. Applications include dynamical systems, ordinary and partial differential equations, and an introduction to Fourier series.

Course Notes: This is a lecture taught in small sections. May not be taken by students who have passed Applied Mathematics 21b. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: Required first meeting in spring: Monday, January 23, 8:30 am, Science Center B.

Spring section times: M.W.F. at 9 (with sufficient enrollment), M.W.F. at 10, M.W.F. at 11, M.W.F. at 12, Tu.Th. 10-11:30, Tu.Th. 11:30-1.

Oliver Knill, Rosalie Belanger-Rioux, William Boney, Matthew Demers, Stephen Hermes, Brendan McLellan, and members of the Department.

Recommended Prep: Mathematics 1b or an equivalent background in mathematics. Mathematics 21a is commonly taken before Mathematics 21b, but is not a prerequisite, although familiarity with partial derivatives is useful.

Requirements: Anti-requisite: Not to be taken in addition to Math 19b or AM 21b.

Mathematics 23A

Linear Algebra and Real Analysis I (111695)

Anand Patel

2016 Fall (4 Credits)

Schedule:

TR 0130 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Linear algebra: vectors, linear transformations and matrices, scalar and vector products, basis and dimension, eigenvectors and eigenvalues, including an introduction to the R scripting language. **Single-variable real analysis:** sequences and series, limits and continuity, derivatives, inverse functions, power series and Taylor series. **Multivariable real analysis and calculus:** topology of Euclidean space, limits, continuity, and differentiation in n dimensions, inverse and implicit functions, manifolds, Lagrange multipliers, path integrals, div, grad, and curl. Emphasis on topics that are applicable to fields such as physics, economics, and computer science, but students are also expected to learn how to prove key results.

Course Notes: Course content overlaps substantially with Mathematics 21a, 25a,b, so students should plan to continue in Mathematics 23b. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: Mathematics 1b or a grade of 4 or 5 on the Calculus BC Advanced Placement Examination, plus an interest both in proving mathematical results and in using them.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students

Mathematics 23B

Linear Algebra and Real Analysis II (145010)

Anand Patel

2017 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A rigorous, integrated treatment of linear algebra and multivariable calculus. Topics: Riemann and Lebesgue integration, determinants, change of variables, volume of manifolds, differential forms, and exterior derivative. Stokes's theorem is presented both in the language of vector analysis (div, grad, and curl) and in the language of differential forms.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep:

Mathematics 23a.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Course Level	Primarily for Undergraduate Students

Mathematics 25A

Honors Linear Algebra and Real Analysis I (110808)

Eric Peterson

2016 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A rigorous treatment of linear algebra. Topics include: Construction of number systems; fields, vector spaces and linear transformations; eigenvalues and eigenvectors, determinants and inner products. Metric spaces, compactness and connectedness.

Course Notes:

For students with a strong interest and background in mathematics. Expect to spend a lot of time doing mathematics. May not be taken for credit after Mathematics 23. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes:

Only for students with a strong interest and background in mathematics. There will be a heavy workload. May not be taken for credit after Mathematics 23.

Recommended Prep:

5 on the Calculus BC Advanced Placement Examination and some

familiarity with writing proofs, or the equivalent as determined by the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Core Curriculum	Quantitative Reasoning

Mathematics 25B

Honors Linear Algebra and Real Analysis II (110855)

Eric Peterson

2017 Spring (4 Credits)

Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

A rigorous treatment of basic analysis. Topics include: convergence, continuity, differentiation, the Riemann integral, uniform convergence, the Stone-Weierstrass theorem, Fourier series, differentiation in several variables. Additional topics, including the classical results of vector calculus in two and three dimensions, as time allows.

Course Notes: Expect to spend a lot of time doing mathematics. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: There will be a heavy workload.

Requirements: Prerequisite: Mathematics 25A OR Mathematics 55A

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 55A

Honors Abstract Algebra (113627)

Noam D. Elkies

2016 Fall (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

A rigorous treatment of abstract algebra including linear algebra and group theory.

Course Notes: Mathematics 55a is an intensive course for students having significant experience with abstract mathematics. Instructor permission required. Every effort will be made to accommodate students uncertain of whether the course is appropriate for them; in particular, Mathematics 55a and 25a will be closely coordinated for the first three weeks of instruction. Students can switch between the two courses during the first three weeks without penalty. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to rigorous mathematics, axioms, and proofs, via topics including set theory, symmetry groups, and low-dimensional topology.

Course Notes: Familiarity with algebra, geometry and/or calculus is desirable. Students who have already taken Mathematics 23a,b, 25a,b or 55a,b should not take this course for credit. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course given fall term and repeated spring term.

Recommended Prep: An interest in mathematical reasoning. Acquaintance with algebra, geometry and/or calculus is desirable. Students who have already taken Math 25a,b or 55a,b should not take this course for credit.

Requirements: Anti-Req: Not to be taken in addition to Mathematics 23a,b or 25a,b or 55a,b.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS: Core Curriculum	Quantitative Reasoning
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: General Education	Empirical and Mathematical Reasoning

Mathematics 101

Sets, Groups and Knots (122943)

Curtis McMullen

2016 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to rigorous mathematics, axioms, and proofs, via topics such as set theory, symmetry groups, and low-dimensional topology.

Mathematics 110

Vector Space Methods for Differential Equations (126610)

Brendan McLellan

2017 Spring (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Develops the theory of inner product spaces, both finite-dimensional and infinite-dimensional, and applies it to a variety of ordinary and partial differential equations. Topics: existence and uniqueness theorems, Sturm-Liouville systems, orthogonal polynomials, Fourier series, Fourier and Laplace transforms, eigenvalue problems, and solutions of Laplace's equation and the wave equation in the various coordinate systems.

Recommended Prep:

Mathematics 23a,b or 25a,b or Mathematics 19a,b or 21a,b plus any Mathematics course at the 100 level; or an equivalent background in Mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Final Assessment Category	Three-hour Exam

Mathematics 112

Introductory Real Analysis (109817)

Fabian Haiden

2017 Spring (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

An introduction to mathematical analysis and the theory behind calculus. An emphasis on learning to understand and construct proofs. Covers limits and continuity in metric spaces, uniform convergence and spaces of functions, the Riemann integral.

Recommended Prep:

Mathematics 19a,b or 21a,b and either an ability to write proofs or concurrent enrollment in Mathematics 101; or an equivalent background in mathematics.

Requirements:

Anti-Req: Not to be taken in addition to Mathematics 23a,b or 25a,b or 55a,b.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 113

Analysis I: Complex Function Theory (113608)

Yum Tong Siu

2017 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Analytic functions of one complex variable: power series expansions, contour integrals, Cauchy's theorem, Laurent series and the residue theorem. Some applications to real analysis, including the evaluation of indefinite integrals. An introduction to some special functions.

Recommended Prep: Mathematics 23a,b or 25a,b or 112, or an equivalent background in mathematics.

Requirements:**Anti-Req:** Not to be taken in addition to Mathematics 55b.**Additional Course Attributes:**

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam

Mathematics 114

Analysis II: Measure, Integration and Banach Spaces (123227)

Fabian Haiden

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Lebesgue measure and integration; general topology; introduction to L^p spaces, Banach and Hilbert spaces, and duality.

Recommended Prep: Mathematics 23a,b or 25a,b or 55a,b or 112; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 115

Methods of Analysis (111065)

Aruna Kesavan

2017 Spring (4 Credits)

Schedule:

TR 0300 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Complex functions; Fourier analysis; Hilbert spaces and operators; Laplace's equations; Bessel and Legendre functions; symmetries; Sturm-Liouville theory.

Course Notes: Mathematics 115 is especially for students interested in physics.

Recommended Prep: Mathematics 23a,b or 25a,b or 55a,b or 112; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 116

Real Analysis, Convexity, and Optimization (118302)

Paul Bamberg

2016 Fall (4 Credits)

Schedule:

MW 1230 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Develops the theory of convex sets, normed infinite-dimensional vector spaces, and convex functionals and applies it as a unifying principle to a variety of optimization problems such as resource allocation, production planning, and optimal control. Topics include Hilbert space, dual spaces, the Hahn-Banach theorem, the Riesz representation theorem, calculus of variations, and Fenchel duality. Students will be expected to understand and invent proofs of theorems in real and functional analysis.

Recommended Prep: Mathematics 23a,b or 25a,b or 55a,b; or Mathematics 21a,b plus at least one other more advanced course in mathematics; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 117 Section: LECT

Probability and Random Processes with Economic Applications (127947)

Paul Bamberg

2016 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

A self-contained treatment of the theory of probability and random processes with specific application to the theory of option pricing. Topics: axioms for probability, calculation of expectation by means of Lebesgue integration, conditional probability and conditional expectation, martingales, random walks and Wiener processes, and the Black-Scholes formula for option pricing. Students will work in small groups to investigate applications of the theory and to prove key results.

Course Notes: A problem-solving section is required.

Recommended Prep: A thorough knowledge of single-variable calculus and infinite series, plus at least one more advanced course such as MATH 23a that provides experience with proofs and elementary real analysis. Acquaintance with elementary probability is desirable.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam

Mathematics 118R

Dynamical Systems (118429)

John Cain

2017 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

Introduction to dynamical systems theory with a view toward applications. Topics include existence and uniqueness theorems for flows, qualitative study of equilibria and attractors, iterated maps, and bifurcation theory.

Recommended Prep: Mathematics 19a,b or 21a,b or Math 23a,b or Math 25a,b or Math 55a,b; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 121

Linear Algebra and Applications (120228)

Brooke Ullery

2016 Fall (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Real and complex vector spaces, linear transformations, determinants, inner products, dual spaces, and eigenvalue problems. Applications to geometry, systems of linear differential equations, optimization, and

Markov processes.

Recommended Prep: Mathematics 19b or 21b or an equivalent background in mathematics.

Requirements: Anti-Req: Not to be taken in addition to Mathematics 23a or 25a or 55a.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 122

Algebra I: Theory of Groups and Vector Spaces (122603)

Michael Hopkins

2016 Fall (4 Credits)

Schedule: MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Groups and group actions, vector spaces and their linear transformations, bilinear forms and linear representations of finite groups.

Recommended Prep: Mathematics 23a or 25a or 101 or 121; or an equivalent background in mathematics.

Requirements: Anti-Req: Not to be taken in addition to Mathematics 55a.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 123

Algebra II: Theory of Rings and Fields (116503)

Barry Mazur

2017 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

Rings and modules. Polynomial rings. Field extensions and the basic theorems of Galois theory. Structure theorems for modules.

Requirements: Prerequisite: Mathematics 122 or Mathematics 55a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 124

Number Theory (111533)

Arnav Tripathy

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Factorization and the primes; congruences; quadratic residues and reciprocity; continued fractions and approximations; Pell's equation; selected Diophantine equations; theory of integral quadratic forms.

Recommended Prep:

Mathematics 101 or 122; or 55a which can be taken concurrently; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 129

Number Fields (115734)

Mark Kisin

2017 Spring (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Algebraic number theory: number fields, unique factorization of ideals, finiteness of class group, structure of unit group, Frobenius elements, local fields, ramification, weak approximation, adeles, and ideles.

Recommended Prep:

Knowledge of the material in Mathematics 123.

Requirements:

Prerequisite: Mathematics 123

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 130

Classical Geometry (123211)

Michael Hopkins

2017 Spring (4 Credits)

Schedule:

MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Presents several classical geometries, these being the affine, projective, Euclidean, spherical and hyperbolic geometries. They are viewed from many different perspectives, some historical and some very topical. Emphasis on reading and writing proofs.

Recommended Prep:

Mathematics 19a,b or 21a,b or 23a or 25a or 55a which may be taken concurrently; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 131

Topology I: Topological Spaces and the Fundamental Group (111458)

Joseph D. Harris

2016 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

First, an introduction to abstract topological spaces and their properties; and then, an introduction to algebraic topology and in particular homotopy theory, fundamental groups and covering spaces.

Recommended Prep:

Some acquaintance with metric space topology as taught in Mathematics 23a,b, 25a,b, 55a,b, 101, or 112; and with groups as taught in Mathematics 101, 122 or 55a.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 132

Topology II: Smooth Manifolds (123212)

George Melvin

2017 Spring (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Differential manifolds, smooth maps and transversality. Winding numbers, vector fields, index and degree. Differential forms, Stokes' theorem, introduction to cohomology.

Recommended Prep:

Mathematics 23a,b or 25a,b or 55a,b or 112; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 136

Differential Geometry (111133)

Cliff Taubes

2016 Fall (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

The course is an introduction to Riemannian geometry with the focus (for the most part) being the Riemannian geometry of curves and surfaces in space where the fundamental notions can be visualized.

Recommended Prep: Mathematics 19a,b or 21a,b or 23a or 25a or 55a (may be taken concurrently); or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 137

Algebraic Geometry (116452)

Peter Kronheimer

2017 Spring (4 Credits)

Schedule:

MWF 0200 PM - 0259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Affine and projective spaces, plane curves, Bezout's theorem, singularities and genus of a plane curve, Riemann-Roch theorem.

Recommended Prep: Knowledge of the material in Mathematics 123.

Requirements: Prerequisite: Mathematics 123

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 145A Section: LECT

Set Theory I (156119)

William Boney

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to set theory covering the fundamentals of ZFC (cardinal arithmetic, combinatorics, descriptive set theory) and the independence techniques (the constructible universe, forcing, the Solovay model). We will demonstrate the independence of CH (the Continuum Hypothesis), SH (Suslin's Hypothesis), and some of the central statements of classical descriptive set theory.

Recommended Prep: Any mathematics course at the level of Mathematics 19a or 21a or higher; or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 152

Discrete Mathematics (116191)

Paul Bamberg

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

An introduction to sets, logic, finite groups, finite fields, finite geometry, finite topology, combinatorics and graph theory. A recurring theme of the course is the symmetry group of the regular icosahedron. Elementary category theory will be introduced as a unifying principle. Taught in a seminar format: students will gain experience in presenting proofs at the blackboard.

Course Notes: Covers material used in Computer Science 121 and Computer Science 124. Enrollment limited to 16.

Recommended Prep: Mathematics 19b or 21b or 23a or 25a or 55a (may be taken concurrently) or an equivalent background in mathematics. Previous experience with proofs is not required.

Requirements: Not to be taken in addition to Computer Science 20, Mathematics 55a/b or Mathematics 122.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 153

Mathematical Biology-Evolutionary Dynamics (119502)

Martin Nowak

2016 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduces basic concepts of mathematical biology and evolutionary dynamics: evolution of genomes, quasi-species, finite and infinite population dynamics, chaos, game dynamics, evolution of cooperation and language, spatial models, evolutionary graph theory, infection dynamics, somatic evolution of cancer.

Recommended Prep: Mathematics 19a,b or 21a,b or 23a,b or 25a,b or 55a,b; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 154

Probability Theory (113811)

Cliff Taubes

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to probability theory. Discrete and continuous random variables; distribution and density functions for one and two random variables; conditional probability. Generating functions, weak and strong laws of large numbers, and the central limit theorem. Geometrical probability, random walks, and Markov processes.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: A previous mathematics course at the level of Mathematics 19ab, 21ab, or a higher number. For students from 19ab or 21ab, previous or concurrent enrollment in Math 101 or 112 may be helpful. Freshmen who did well in Math 23a, 25a or 55a fall term are also welcome to take the course.

Combinatorics (116196)

Joseph D. Harris

2017 Spring (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to counting techniques and other methods in finite mathematics. Possible topics include: the inclusion-exclusion principle and Mobius inversion, graph theory, generating functions, Ramsey's theorem and its variants, probabilistic methods.

Recommended Prep: The ability to write proofs and some knowledge of linear algebra will be needed.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 157

Mathematics in the World (159763)

Joseph D. Harris

2017 Spring (4 Credits)

Schedule: MW 0400 PM - 0529 PM

Instructor Permissions: None

Enrollment Cap: n/a

An interactive introduction to problem solving with an emphasis on subjects with comprehensive applications. Each class will be focused around a group of questions with a common topic: logic, information, number theory, probability, and algorithms.

Recommended Prep: Mathematics 19b or 21b or 23a; or an equivalent background in mathematics. More importantly, students should have a broad mathematical curiosity and be eager to brainstorm during in-class problem solving sessions.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Enrollment Cap:

n/a

Continuation of Mathematics 231a. Vector bundles and characteristic classes. Bott periodicity. K-theory, cobordism and stable cohomotopy as examples of cohomology theories.

Recommended Prep: Knowledge of the material in Mathematics 231a.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 232A

Introduction to Algebraic Geometry I (123441)

Philip Engel

2016 Fall (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to complex algebraic curves, surfaces, and varieties.

Recommended Prep: Knowledge of the material in Mathematics 123 and 132 and 137.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Mathematics 243

Evolutionary Dynamics (119511)

Martin Nowak

2017 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Advanced topics of evolutionary dynamics. Seminars and research projects.

Recommended Prep: Experience with mathematical biology at the level of Mathematics 153.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 252

Linear Series and Positivity of Vector Bundles (203026)

Brooke Ullery

2017 Spring (4 Credits)

Schedule:

MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this course, we will cover a variety of topics related to positivity in algebraic geometry. We will start with the basics of divisors, line bundles, vector bundles, and linear series and their cohomological and numerical properties. Other topics may include but are not limited to: syzygies and Castelnuovo-Mumford regularity, vanishing theorems, asymptotic linear series, degeneracy loci, Fujita's conjecture and Reider's Theorem, and stability of vector bundles

Additional Course Attributes:

Mathematics 256X

Heisenberg Calculus in Quantum Topology (203030)

Brendan McLellan

2016 Fall (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The main goal of this course is to provide a hands-on introduction to the Heisenberg calculus of Beals-Greiner and Taylor. This pseudodifferential calculus provides a natural method for studying non-elliptic problems where the classical abelian symbol calculus is not applicable. This theory is of independent interest and also makes connections with diverse topics such as harmonic analysis, noncommutative

geometry, number theory, partial differential equations, representation theory, sub-Riemannian geometry, quantum field theory, and shows up as a key tool in the Julg-Kasparov proof of the $SU(n,1)$ Baum-Connes conjecture. Some key topics to be covered are: Heisenberg groups, model operators, principal symbols, kernels, pseudodifferential operators, hypoellipticity, parametrices, the Rockland condition, contact/CR manifolds, Hormander's sum of squares, Kohn Laplacian, horizontal sub-Laplacian, and the Rumin (contact) Laplacian. A secondary goal for the course is to consider applications of the Heisenberg calculus in quantum Chern-Simons theory and to motivate some problems of current research interest. Some further possible topics: asymptotic expansion conjecture, eta/zeta functions, Rumin-Seshadri and analytic torsion, and perturbative quantum invariants.

Mathematics 258Y

Degenerations in Algebraic Geometry (203029)

Anand Patel

2016 Fall (4 Credits)

Schedule:

MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Many results in algebraic geometry can be proved by degenerating the varieties under consideration. The construction of useful degenerations is more an art rather than a science, highly dependent on context, but it is helpful to have an understanding of some "standard" examples. This course is intended to study examples which serve to illustrate common technical issues that arise under degeneration. We will attempt to cover instances of degeneration in three areas: enumerative problems, irreducibility results, and "generic" results. Suggestions are invited, and we will cover an example that the class wants to see.

Mathematics 260

Low Dimensional Topology: Mapping Class Groups (203032)

Bena Tshishiku

2017 Spring (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to mapping class groups and their cohomology. Possible topics: surface bundles, monodromy Earle-Eells theorem; Miller-Morita-Mumford classes, nontriviality, Atiyah-Kodaira constructions; curve complexes and homological stability; flat surface bundles and Nielsen realization problems; Morita's nonlifting theorem, Bott vanishing, Thurston stability; sections of surface bundles and Milnor-Wood inequalities.

Mathematics 263

Analytic Techniques in Algebraic Geometry (203034)

Tristan Collins

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course will discuss applications of analysis to algebraic geometry. Topics: the d-bar equations, pluripotential theory and techniques of multiplier ideal sheaves with applications to Kodaira embedding, the Fujita conjecture, invariance of plurigena (after Siu) and asymptotic invariants of line bundles. Possible further topics: applications of harmonic maps to the Frankel conjecture (after Siu-Yau), and applications to Yang-Mills theory to classification of class VII surfaces.

Symplectic Duality (203050)

Arnav Tripathy

2016 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course will give an introduction to symplectic duality, especially as related to 3d mirror symmetry in

the physics literature. Topics may include the foundational papers of Braden-Licata-Proudfoot-Webster, the proposed construction of the Coulomb branch in the moduli space of vacua by Braverman-Finkelberg-Nakajima, and relations to geometric Langlands and two-dimensional mirror symmetry, especially quantum cohomology of symplectic resolutions and mirror symmetry for hypertoric varieties.

Mathematics 283

Geometric Langlands Correspondence in Characteristic p (203028)

Dennis Gaitsgory

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The genuine geometric Langlands correspondence is a difficult open problem. But it has a variant that is much more easily accessible (but still very interesting): when we consider D -modules in characteristic p . We will cover recent developments in this field, surveying the works of Braverman, Bezrukanikov, Chen, Travkin, and Zhu.

Recommended Prep: A graduate course in algebraic geometry.

Medical Sciences

Subject: Neurobiology - Graduate

Neurobiology - Graduate 200

Neurobiology (117726)

John Assad

Matthew Frosch

2016 Fall (4 Credits)

Schedule:

MWF 0830 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

60

This is a comprehensive course in Neuroscience. Basic principles of organization and function of the nervous system will be discussed with frequent reference to pathophysiology of neurological and psychiatric disorders. Combining pathophysiology with basic neuroscience should provide physician/scientists and Ph.D. candidates with a dynamic picture of the rapidly evolving field of neuroscience and the experimental process from which the picture is derived, and all students should emerge with a greater awareness both of the applications of their work in alleviating disease, and of the ways that disease can provide insight into basic scientific questions. The course will span modern neuroscience from molecular neurobiology to perception and cognition, and will include the following major topics: Anatomy and Development of the Brain; Cell Biology of Neurons and Glia; Ion Channels and Electrical Signaling; Synaptic Transmission, Integration, and Chemical Systems of the Brain; Sensory Systems, from Transduction to Perception; Motor Systems; and Higher Brain Function (Memory, Language, Affective Disorders).

Course Notes:

Offered jointly with the Medical School as HT 130. Follows the Medical School calendar. Nine hours of lecture or lab/conference weekly.

Recommended Prep:

Introductory cell and molecular biology course.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Neurobiology - Graduate 204

Systems Neuroscience (148097)

Rachel Wilson

Richard Born

Mark Andermann

Michael Do

Christopher Harvey

Margaret Livingstone

2017 Spring (4 Credits)

Schedule:

MW 0900 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

25

This course introduces major themes and fundamental concepts underlying current research in systems neuroscience. Each week covers a different theme, and draws on research from different sensorimotor modalities and model organisms.

Course Notes: Offered jointly with the Medical School as NB 721.0.

Recommended Prep: Neuro 200 / HST 130 or permission of instructor

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 211

Molecular and Developmental Neurobiology (159930)

Lisa Goodrich

Matthew Pecot

Sandeep Datta

Michela Fagiolini

Pascal Kaeser

Joshua Kaplan

Maria Lehtinen

Beth Stevens

Corey Harwell

2017 Spring (4 Credits)

Schedule: TRF 0900 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

Integrated introduction to the molecular events that govern development and function of neural circuits. Topics include neurogenesis, circuit assembly, synaptic transmission, and the associated signaling pathways. Lectures, discussion of primary literature, and original research proposal.

Course Notes: This is an advanced course that assumes prior knowledge of the nervous system. Only students who have completed Neuro 200 or its equivalent will be allowed to enroll, as determined by the Course Director.

Recommended Prep: Neurobiology 200 or the equivalent

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Neurobiology - Graduate 220

Cellular Neurophysiology (111276)

Bruce Bean

Wade Regehr
Bernardo Sabatini
Gary Yellen

2016 Fall (4 Credits)

Schedule:

TR 0900 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to the physiology of neurons, focusing on using electrophysiology and imaging to study function of ion channels, generation of action potentials, and physiology of synaptic transmission. Includes problem sets and reading of original papers.

Course Notes: Offered jointly with the Medical School as NB 714.0.

Recommended Prep: Introductory neurobiology.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 230

Visual Recognition: Computational and biophysical perspective (107755)

Gabriel Kreiman

2016 Fall (4 Credits)

Schedule:

M 0330 PM - 0529 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How does cerebral cortex store information, compute and learn? How can we build prosthetic devices to fix or augment brain function? How can we build biologically inspired artificial intelligence? This course will examine these questions in the context of visual cognition. Topics: architecture of visual cortex, neurophysiology, visual consciousness, computational neuroscience, models of pattern recognition and computer vision, artificial intelligence, brain-machine interfaces.

Course Notes: Course website: http://klab.tch.harvard.edu/academia/classes/hms_neuro300_vision/hms_neuro300_vision.html
Neurobiology 230, Visual Recognition, brain-machine interfaces and artificial intelligence

Neuro 230 cannot be taken if Neuro 130 has been taken. Neuro 230 cannot be taken concurrently with Neuro 130.

Recommended Prep: Life Sciences 1a (or Life and Physical Sciences A) and Life Sciences 1b (or equivalent). Recommended: Math (Maa/Mab, Math 1A,1B, Math 19 a or equivalent). Physical Sciences 1. MCB 80.

Requirements: Anti-Req: Cannot be taken for credit if NEURO 130 already complete.

Additional Course Attributes:

Attribute	Value(s)

Neurobiology - Graduate 300

Advanced Topics in Neurobiology (117896)

David Cardozo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Topics cover areas at the molecular, cellular, and systems levels in both basic and clinical neuroscience. A series of reading and discussion seminars, each running for a half term (seven weeks).

Course Notes:

Two seminars, which can be taken in different terms, are required for credit. Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Instructor Permissions: None

Enrollment Cap: 80

The goal of this camp is to introduce you to programming in the MATLAB environment and to show you the power this provides for analyzing data and for gaining intuition about the behavior of complex systems through the use of numerical simulations. Some of you, upon encountering in the previous sentence words like "programming" and "numerical simulations," will feel the cold hand of fear grip your stomach, because you have never done any programming and, in fact, have tried to avoid math as much as possible. If so, **YOU ARE PRECISELY THE PERSON WE HAD IN MIND** as we were planning the course. We are aiming to help you break through this barrier of darkness and fear into the radiant sunshine of quantitative enlightenment. The true beauty of MATLAB, as we will personally demonstrate, is that it allows people who are not mathematically adept (e.g. some of the instructors of this course) to use powerful numerical methods and visualization tools to gain an understanding of concepts that are very difficult to grasp analytically.

Course Notes: This bootcamp course will meet in August from 8/8/16 - 8/19/16.

The Molecular Pathology and Current Therapies for Retinal Diseases (109255)

Dong Chen

Joseph Arboleda-Velasquez

Kin-Sang Cho

Daniel Sun

Petr Baranov

2016 Fall (2 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

Retinal diseases are major causes of irreversible blindness. A surge of progress resulting from studies in the disease mechanisms and the development of new imaging technology have led to a huge step forward in the therapies for diagnosing and treating retinal diseases and preventing blindness. This course will offer students an in-depth examination of current knowledge regarding retinal diseases, molecular pathology, and therapy, with an emphasis on recent breakthroughs and discussion of key studies in the field. The class consists of lectures and group discussions that focus on seminal papers selected from both the basic science and clinical ophthalmology, which will serve as a basis for teaching students basic concepts of ophthalmology and becoming familiar with animal models of retinal diseases. Each session will review the landmark publications on a particular topic or disease. As the retina has long served a standard model for studying the CNS, the class will foster discussion on the implications of these studies in other disease mechanisms and therapy.

Course Notes: Offered in alternate years.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 315

Molecular mechanisms of Proliferation and Survival in Neural development (110615)

Rosalind Segal

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 316

The Development, Organization, and Functions of Sensory Neurons that Mediate Touch (110230)

David Ginty

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 316

The Development, Organization, and Functions of Sensory Neurons that Mediate Touch (110230)

David Ginty

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 317

Development and organization of neural circuits underlying hearing and vision (118840)

Lisa Goodrich

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 317

Development and organization of neural circuits underlying hearing and vision (118840)

Lisa Goodrich

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 317L

Identification of pre-markers of developmental dyslexia (DD) in the pre-reading and infant brain and (110232)

Nadine Gaab

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 317L

Identification of pre-markers of developmental dyslexia (DD) in the pre-reading and infant brain and (110232)

Nadine Gaab

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 318

Molecular Genetics of Cerebral Cortical Development (123216)

Christopher Walsh

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 318

Molecular Genetics of Cerebral Cortical Development (123216)

Christopher Walsh

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 318L

Neurobiology of motivational states (156718)

Michael Crickmore

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 318L

Neurobiology of motivational states (156718)

Michael Crickmore

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 319

Neurological Control of Cell Growth and Differentiation (112119)

Michael Greenberg

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 319

Neurological Control of Cell Growth and Differentiation (112119)

Michael Greenberg

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 319L

Characterizing the Molecular, Neural Circuit & Ecological Underpin. of Behavior in the Fruit Fly (110233)

Benjamin de Bivort

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 319L

Characterizing the Molecular, Neural Circuit & Ecological Underpin. of Behavior in the Fruit Fly (110233)

Benjamin de Bivort

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 320

Neuroprotection and Neuronal Repair in Neurodegenerative Disease (114243)

Ole Isacson

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 320

Neuroprotection and Neuronal Repair in Neurodegenerative Disease (114243)

Ole Isacson

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 320L

Neural Circuits Underlying Cognitive Behaviors in Mice (109095)

Christopher Harvey

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 320L

Neural Circuits Underlying Cognitive Behaviors in Mice (109095)

Christopher Harvey

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 321

Visual Perception, Object Recognition, Higher Cognitive Functions, Vision and Art (115924)

Margaret Livingstone

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 321

Visual Perception, Object Recognition, Higher Cognitive Functions, Vision and Art (115924)

Margaret Livingstone

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 321L

Multi-Modal, Multiscalar Studies of Human Neurophysiology from Single Neurons to Neuronal Ensembles (109096)

Sydney Cash

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 321L

Multi-Modal, Multiscalar Studies of Human Neurophysiology from Single Neurons to Neuronal Ensembles (109096)

Sydney Cash

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 322

Cellular and Molecular Mechanisms in Axon Guidance and Regeneration (114637)

Zhigang He

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 322

Cellular and Molecular Mechanisms in Axon Guidance and Regeneration (114637)

Zhigang He

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 322L

Molecular Mechanisms of Reward-Related Behavior (109099)

Elena Chartoff

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 322L

Molecular Mechanisms of Reward-Related Behavior (109099)

Elena Chartoff

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 323

Synaptic Plasticity (118839)

Florian Engert

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 323

Synaptic Plasticity (118839)

Florian Engert

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 323L

Sensory Transduction in Hair Cells of the Mammalian Inner Ear (109101)

Jeffrey Holt

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 323L

Sensory Transduction in Hair Cells of the Mammalian Inner Ear (109101)

Jeffrey Holt

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 324

Research in Neuropeptide Gene Regulation (136833)

Joseph Majzoub

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 324

Research in Neuropeptide Gene Regulation (136833)

Joseph Majzoub

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 324L

Neuroscience and Genetics of Human Variation in Reward and Self-Control (109102)

Joshua Buckholz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 324L

Neuroscience and Genetics of Human Variation in Reward and Self-Control (109102)

Joshua Buckholtz

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 325

Synaptic Transmissions and Dendritic Processing (111229)

Wade Regehr

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 325

Synaptic Transmissions and Dendritic Processing (111229)

Wade Regehr

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 325L

Genetic Dissection of Inhibitory Modulation in the Central Nervous System (109103)

Uwe Rudolph

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 325L

Genetic Dissection of Inhibitory Modulation in the Central Nervous System (109103)

Uwe Rudolph

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 326

Age-Dependent Mechanisms of Perinatal Brain Injury (119610)

Frances Jensen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 326

Age-Dependent Mechanisms of Perinatal Brain Injury (119610)

Frances Jensen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 326L

Extracellular Matrix/neuron/glia Interactions in Pathophysiology of Schizophrenia & Bipolar Disorder (109104)

Sabina Berretta

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 326L

Extracellular Matrix/neuron/glia Interactions in Pathophysiology of Schizophrenia & Bipolar Disorder (109104)

Sabina Berretta

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 327

Rotation Course in Neurosciences (116607)

Rosalind Segal

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Course Notes: Primarily for students in Neuroscience.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 327

Rotation Course in Neurosciences (116607)

Rosalind Segal

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Course Notes: Primarily for students in Neuroscience.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 327R

Lab Rotations in Neurosciences (109330)

Rosalind Segal

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 327R

Lab Rotations in Neurosciences (109330)

Rosalind Segal

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 328

Mechanisms of Cell Death in Stroke and Trauma (112849)

Eng Lo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 328

Mechanisms of Cell Death in Stroke and Trauma (112849)

Eng Lo

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 328L

Role of Sleep in Memory and Emotional Processing in Healthy Subjects, Schizophrenia, Autism, and PTS (109253)

Robert Stickgold

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 328L

Role of Sleep in Memory and Emotional Processing in Healthy Subjects, Schizophrenia, Autism, and PTS (109253)

Robert Stickgold

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 329

Molecular Mechanisms of Neurodegeneration in Alzheimer's and Parkinsons Diseases (124384)

Dennis Selkoe

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 329

Molecular Mechanisms of Neurodegeneration in Alzheimer's and Parkinsons Diseases (124384)

Dennis Selkoe

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 329L

The Genetic and Neural Basis of Sleep in Drosophila (109254)

Dragana Rogulja

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 329L

The Genetic and Neural Basis of Sleep in Drosophila (109254)

Dragana Rogulja

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 330

Effects of stress and other experiences on motivated behavior (115975)

William Carlezon

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 330

Effects of stress and other experiences on motivated behavior (115975)

William Carlezon

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 330L

Translational Genomics of Parkinsons Disease: Cause, Cures, Diagnostics (109252)

Clemens Scherzer

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 330L

Translational Genomics of Parkinsons Disease: Cause, Cures, Diagnostics (109252)

Clemens Scherzer

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 331

Neural Differentiation, Regeneration and Stem Cell Regulation in the Brain and Eye (115976)

Dong Chen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 331

Neural Differentiation, Regeneration and Stem Cell Regulation in the Brain and Eye (115976)

Dong Chen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 331L

Motivational Influences on Cortical Networks Underlying Attention, Learning and Memory of Sensory Cu (109256)

Mark Andermann

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 331L

Motivational Influences on Cortical Networks Underlying Attention, Learning and Memory of Sensory Cu (109256)

Mark Andermann

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 332

Ligand-Gated Ion Channels: Structure and Function (110882)

Jonathan Cohen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 332

Ligand-Gated Ion Channels: Structure and Function (110882)

Jonathan Cohen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 332L

Biological and Computational Underpinnings of Visual Processing (109257)

David Cox

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 332L

Biological and Computational Underpinnings of Visual Processing (109257)

David Cox

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 333

Intercellular Communication (111693)

David Paul

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 333

Intercellular Communication (111693)

David Paul

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 333L

Behavioral and synaptic plasticity in neuropsychiatric disorders; mechanisms of axon guidance and sy (109293)

Christopher Cowan

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 333L

Behavioral and synaptic plasticity in neuropsychiatric disorders; mechanisms of axon guidance and sy (109293)

Christopher Cowan

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 334

Hair Cells and Afferent Neurons of the Inner Ear (123141)

Ruth Anne Eatock

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 334

Hair Cells and Afferent Neurons of the Inner Ear (123141)

Ruth Anne Eatock

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 334L

Cellular and Molecular Mechanisms of Cortical Circuit Assembly (109369)

Corey Harwell

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 334L

Cellular and Molecular Mechanisms of Cortical Circuit Assembly (109369)

Corey Harwell

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 335

Physiological Function and the Pathogenetic Actions of Genes Implicated in Neurodegenerative Disease (109376)

Mark Albers

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 335

Physiological Function and the Pathogenetic Actions of Genes Implicated in Neurodegenerative Disease (109376)

Mark Albers

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 335L

Molecular Mechanisms Underlying the Assembly of Neural Circuits (156902)

Matthew Pecot

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 335L

Molecular Mechanisms Underlying the Assembly of Neural Circuits (156902)

Matthew Pecot

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 336

Developmental Cognitive Neuroscience, Focusing Primarily on Memory and Face Processing (121800)

Charles Nelson

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 336

Developmental Cognitive Neuroscience, Focusing Primarily on Memory and Face Processing (121800)

Charles Nelson

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 336L

Synapse formation and refinement in the mammalian brain (156926)

Hisashi Umemori

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 336L

Synapse formation and refinement in the mammalian brain (156926)

Hisashi Umemori

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 337

Neurobiology of the Human Circadian Pacemaker (115515)

Charles Czeisler

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 337

Neurobiology of the Human Circadian Pacemaker (115515)

Charles Czeisler

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 337L

Human and primate social decision making, executing functioning and memory (160771)

Ziv Williams

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 337L

Human and primate social decision making, executing functioning and memory (160771)

Ziv Williams

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 338

Neural Circuitry of Primate Visual Cortex (116539)

Richard Born

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 338

Neural Circuitry of Primate Visual Cortex (116539)

Richard Born

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 338L

Molecular Biology, Genetics, & Neural Circuitry of Fear in Animals & Human Fear-Related Disorders (160775)

Kerry Ressler

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 338L

Molecular Biology, Genetics, & Neural Circuitry of Fear in Animals & Human Fear-Related Disorders (160775)

Kerry Ressler

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 339

Synaptic and Neuronal Network Mechanisms of Learned and Innate Fear (119841)

Vadim Bolshakov

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 339

Synaptic and Neuronal Network Mechanisms of Learned and Innate Fear (119841)

Vadim Bolshakov

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 339L

Cell-extracellular matrix interaction in brain development and malformation (203215)

Xianhua Piao

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: 30

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 341

Cognition and Cognitive Disorders; the Role of Translational Regulation (123142)

Raymond Kelleher

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 341

Cognition and Cognitive Disorders; the Role of Translational Regulation (123142)

Raymond Kelleher

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 342

Neurophysiology of Visual Cortex and LGN (111946)

R. Reid

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 342

Neurophysiology of Visual Cortex and LGN (111946)

R. Reid

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 343

Neuronal Metabolism and Excitability; Molecular Physiology of Ion Channels (111077)

Gary Yellen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 343

Neuronal Metabolism and Excitability; Molecular Physiology of Ion Channels (111077)

Gary Yellen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 344

Neurobiology and Protein Biochemistry Underlying Parkinson's Disease (107634)

Matthew LaVoie

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 344

Neurobiology and Protein Biochemistry Underlying Parkinson's Disease (107634)

Matthew LaVoie

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 345

Molecular Basis of Neuron Glia Interactions (114397)

Gabriel Corfas

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 345

Molecular Basis of Neuron Glia Interactions (114397)

Gabriel Corfas

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 346

Visual Processing in Primates (111038)

John Assad

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 346

Visual Processing in Primates (111038)

John Assad

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 347

Alzheimer's Disease Research (118956)

Bradley Hyman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 347

Alzheimer's Disease Research (118956)

Bradley Hyman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 348

Neural stem cells and cerebrospinal fluid (108355)

Maria Lehtinen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 348

Neural stem cells and cerebrospinal fluid (108355)

Maria Lehtinen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 349

Olfactory and Vomeronasal Systems Molecular and Developmental Neurobiology (115980)

Catherine Dulac

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 349

Olfactory and Vomeronasal Systems Molecular and Developmental Neurobiology (115980)

Catherine Dulac

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 350

Development, degeneration, and circuitry of the vertebrate retina (146731)

Connie Cepko

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 350

Development, degeneration, and circuitry of the vertebrate retina (146731)

Connie Cepko

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 351

Neurogenetics of Disease (112135)

Louis Kunkel

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 351

Neurogenetics of Disease (112135)

Louis Kunkel

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 352L

Neural circuitry of sleep and sleep disorders (203807)

Thomas Scammell

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 352L

Neural circuitry of sleep and sleep disorders (203807)

Thomas Scammell

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 353

Physiology, with an Emphasis on Ion Channels, Signal Transduction, and Imaging (134189)

David Clapham

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 353

Physiology, with an Emphasis on Ion Channels, Signal Transduction, and Imaging (134189)

David Clapham

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 354

Structural Biology of Signaling and Transport Through Biological Membranes (123145)

Rachelle Gaudet

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 354

Structural Biology of Signaling and Transport Through Biological Membranes (123145)

Rachelle Gaudet

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 355

A Biophysical Approach to System Function (107746)

Michael Do

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 355

A Biophysical Approach to System Function (107746)

Michael Do

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 356

Ion Channels in Neural Cell Membranes (144968)

David Corey

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 356

Ion Channels in Neural Cell Membranes (144968)

David Corey

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 357

Experience-Dependent Neuronal Circuit Maturation and Plasticity (123610)

Michela Fagiolini

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 357

Experience-Dependent Neuronal Circuit Maturation and Plasticity (123610)

Michela Fagiolini

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 358

Neurogenetics of Human Disease (121701)

Xandra Breakefield

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 358

Neurogenetics of Human Disease (121701)

Xandra Breakefield

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 359

Functional and Behavioral Interrogation of Neural Circuits in the Mammalian Olfactory System (126396)

Sandeep Datta

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 359

Functional and Behavioral Interrogation of Neural Circuits in the Mammalian Olfactory System (126396)

Sandeep Datta

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 360

Neural Signal Processing and Mechanisms of General Anesthesia (119842)

Emery Brown

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 360

Neural Signal Processing and Mechanisms of General Anesthesia (119842)

Emery Brown

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 361

Immunobiology of the Nervous System and its Tumors (116018)

Lois Lampson

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 361

Immunobiology of the Nervous System and its Tumors (116018)

Lois Lampson

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 362

Optical Imaging in Alzheimer's Disease (125535)

Brian Bacskai

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 362

Optical Imaging in Alzheimer's Disease (125535)

Brian Bacskai

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 363

Axonal Development and Reorganization (120337)

Larry Benowitz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 363

Axonal Development and Reorganization (120337)

Larry Benowitz

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 364

hypothalamic circuitry controlling sleep and circadian rhythms (131279)

Clifford Saper

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 364

hypothalamic circuitry controlling sleep and circadian rhythms (131279)

Clifford Saper

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 365

Behavioral Pharmacology of Stimulant Drugs and Brain Dopamine Systems (121799)

Barak Caine

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 365

Behavioral Pharmacology of Stimulant Drugs and Brain Dopamine Systems (121799)

Barak Caine

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 366

Functional Organization of the Retina (121350)

Richard Masland

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 366

Functional Organization of the Retina (121350)

Richard Masland

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 367

Neocortical Development and Regeneration (113770)

Jeffrey Macklis

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 367

Neocortical Development and Regeneration (113770)

Jeffrey Macklis

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 368L

Serotonin neurotransmission in behavior and psychopathology (203814)

Kathryn Commons

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 368L

Serotonin neurotransmission in behavior and psychopathology (203814)

Kathryn Commons

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 369L

Statistical neuronal computations underlying complex decisions and behavior under uncertainty (203815)

Jan Drugowitsch

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
