Genetic and Molecular Studies of Neurodegenerative Diseases (118843)

Rudolph Tanzi

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 371

Sensory Neuron Development and Sleep Using Genetics and Live Imaging in Zebrafish (123147)

Alexander Schier

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 371

Sensory Neuron Development and Sleep Using Genetics and Live Imaging in Zebrafish (123147)

Alexander Schier

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 372

Neurotransmitter Control of Ion Channels (112805)

Bruce Bean

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 372

Neurotransmitter Control of Ion Channels (112805)

Bruce Bean

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 373

Developmental Studies of the Murine Trigeminal Sensory System (112846)

Qiufu Ma

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 373

Developmental Studies of the Murine Trigeminal Sensory System (112846)

Qiufu Ma

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 374

Molecular Basis of Alzheimer's Disease & Parkinson's Disease (112852)

Jie Shen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 374

Molecular Basis of Alzheimer's Disease & Parkinson's Disease (112852)

Jie Shen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 375

Mechanisms of Synaptic Transmission & Plasticity (112850)

Venkatesh Murthy

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 375

Mechanisms of Synaptic Transmission & Plasticity (112850)

Venkatesh Murthy

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 376

Genetics of Neuronal Cell Biology (115462)

Thomas Schwarz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 376

Genetics of Neuronal Cell Biology (115462)

Thomas Schwarz

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 377

Physiological Studies of Phototransduction and Light Adaptation (116020)

Clint Makino

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 377

Physiological Studies of Phototransduction and Light Adaptation (116020)

Clint Makino

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 378

Neuronal Mechanisms and Animal Behavior (123148)

Naoshige Uchida

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 378

Neuronal Mechanisms and Animal Behavior (123148)

Naoshige Uchida

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 379

Growth Factor Regulation of Neural Development and Oncogenesis (116022)

Scott Pomeroy

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 379

Growth Factor Regulation of Neural Development and Oncogenesis (116022)

Scott Pomeroy

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 380

Functional Wiring of the Rabbit Retina, Control of Postnatal Development (116024)

Elio Raviola

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 380

Functional Wiring of the Rabbit Retina, Control of Postnatal Development (116024)

Elio Raviola

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 381

Glutamate Transporters, Cell Death, Sleep/Wake Regulation (116025)

Paul Rosenberg

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 381

Glutamate Transporters, Cell Death, Sleep/Wake Regulation (116025)

Paul Rosenberg

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 382

Hypothalamus and Melanin Concentrating Hormone in the Regulation of Energy Homeostasis (117277)

Eleftheria Maratos-Flier

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 382

Hypothalamus and Melanin Concentrating Hormone in the Regulation of Energy Homeostasis (117277)

Eleftheria Maratos-Flier

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 383

Role of the Basal Ganglia in Learning and Motivation (125277)

Emad Eskandar

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 383

Subject: Immunology

Immunology 201

Principles of Immunology (148547)

Thorsten Mempel

Michael Carroll

Ulrich von Andrian

2016 Fall (4 Credits)

Schedule: TR 0300 PM - 0359 PM
TR 0130 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 50

Comprehensive core course in immunology. Topics include a broad but intensive examination of the cells and molecules of the immune system. Special attention given to the experimental approaches that led to general principles of immunology.

Course Notes: Intended for students who have had prior exposure to immunology on the undergraduate level. In the absence of such exposure, students must obtain the permission of the Course Director. Offered jointly with the Medical School as IM 702.0.

Recommended Prep: A background in genetics and biochemistry strongly recommended.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Immunology 202

Immune and Inflammatory Diseases (148503)

Filip Swirski

Mikael Pittet

2017 Spring (4 Credits)

Schedule:

TR 0130 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

IMM202 builds on IMM201 and explores fundamental principles of immunology in the context of immune and inflammatory diseases. Through a series of lectures and discussion, students will survey a broad range of diseases in which the immune system is essential. Topics will include not only diseases that mobilize classical immunity but also conditions to which we now know the immune systems contributes. Students will use oral and written exercises to learn how to evaluate and synthesize major concepts and tools germane to immunology's relationship to bioscience.

Course Notes: Offered jointly with the Medical School as IM 712.0.

Recommended Prep: Immunology 201 or its equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 204

Critical Readings for Immunology (143254)

Duane Wesemann

2017 Spring (4 Credits)

Schedule:

R 1000 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Original research articles from fields including immunology, biochemistry, genetics, and cell and developmental biology will be critically analyzed in an intensive small group format. Grading will be based on class participation and oral presentations.

Course Notes: Required for first-year immunology students, open to second-year immunology students. No auditors. Offered jointly with the Medical School as IM 703.0.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Immunology 300

Advanced Topics in Immunology (141598)

David Cardozo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Reading and discussion seminars each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit. Topics include the role of intracellular and transmembrane protein phosphates in signal transduction.

Course Notes:

Intended for first- and second-year Immunology graduate students. Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Call 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Immunology 301

Immunology Seminar (142204)

William Haining

Galit Alter

Shiv Pillai

2017 Spring (4 Credits)

Schedule: W 0330 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Gives students exposure to research topics in Immunology. Students prepare for the weekly seminar through readings, discussions, and preparing brief write-ups. These discussions are facilitated by members of the Committee on Immunology.

Course Notes: Required for, and limited to, first-year Immunology graduate students. All others will be evaluated for enrollment on a case by case basis.

Additional Course Attributes:

2016 Fall (4 Credits)

Schedule:

W 0330 PM - 0459 PM

W 1215 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: 20

Gives students exposure to research topics in Immunology. Students prepare for the weekly seminar through readings, discussions, and preparing brief write-ups. These discussions are facilitated by members of the Committee on Immunology.

Course Notes: Required for, and limited to, first-year Immunology graduate students. All others will be evaluated for enrollment on a case by case basis.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 301QC

Autoimmunity (146257)

Francisco Quintana

2017 Spring (2 Credits)

Schedule:

M -

Instructor Permissions: None

Enrollment Cap: n/a

This course will focus on basic immunological mechanisms of autoimmune diseases, with an emphasis on recent advances in the field. At each session, we will focus on a particular topic and discuss three important publications.

Course Notes: Offered in alternate years. Expected to be given in the first quarter of the spring term in academic year 2014-2015

Class Notes: Class start February 6, 2017 through May, 22, 2017

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 302

Innate and Adaptive Immune Inflammation in Allergic and Asthmatic Models (131252)

K Austen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 302

Innate and Adaptive Immune Inflammation in Allergic and Asthmatic Models (131252)

K Austen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 302QC

Clinical Sessions (146352)

Rachael Clark

2017 Spring (2 Credits)

Schedule: T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Lectures by physician scientists and clinical exposure to patients with immunologically mediated diseases. The goal is to foster translational research into human immunologic disease.

Course Notes: Limited to Immunology students.

Class Notes: Class start March 9, 2017 through May, 9 2017

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 303

Immunity to Tuberculosis (143100)

Samuel Behar

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 303

Immunity to Tuberculosis (143100)

All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 305QC

Neuro-Immunology in Development, Regeneration and Disease (130342)

Isaac Chiu

Beth Stevens

Michael Carroll

2017 Spring (2 Credits)

Schedule: R 0400 PM - 0629 PM

Instructor Permissions: None

Enrollment Cap: n/a

It is increasingly clear that the nervous system and immune system share parallel molecular pathways, and communication between neurons and immune cells play significant roles in homeostasis and disease. This course will investigate current topics in neuro-immunology: CNS development, chronic pain, neuro-degeneration, aging, axon regeneration, auto-immunity and infection. We will focus our discussions on molecular mechanisms shared by the immune and nervous systems and the molecular cross-talk between these two systems.

Course Notes: Each class will cover a specific topic in neuro-immunology. Students should be prepared to lead discussions on pre-selected papers for each session.

Class Notes: Class starts on April 13, 2017 through June 1, 2017

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 306QC

Systems Immunology (146654)

Nir Hacohen

William Haining

Christophe Benoist

2017 Spring (2 Credits)

Schedule:

F 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Our focus in this course is on the emerging field of systems immunology. Each session will review a class of experimental approaches, followed by a critical discussion of illustrative papers. Hands-on workshops will introduce students to computational tools for analyzing large-scale datasets, focusing on gene expression.

Class Notes: Class start January 27, 2017 through April 28, 2017

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 307QC

Cancer Immunology (130614)

Kai Wucherpfennig

Cathy Wu

Stephanie Dougan

Michael Goldberg

2016 Fall (2 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

There have been many exciting recent developments in the cancer immunology field, and multiple therapeutic approaches have shown efficacy against diverse types of cancer. This course will emphasize new mechanistic insights, in particular on the following topics: Mechanisms of spontaneous protective anti-tumor immunity; Key effector cell populations of anti-tumor immunity; Inflammation and tumor microenvironment; Immunosuppressive mechanisms in tumor immunity; Targeting of inhibitory receptors; Cancer vaccines; New approaches for delivery of immunotherapies into tumors.

Course Notes: Must be PhD student at Harvard or postdoctoral fellow

Class Notes: Course meets October 31, 2016 through December 12, 2016.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 330

Molecular Aspects of Mast Cells - Mediated Immune Responses (148215)

Richard Stevens

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 330

Molecular Aspects of Mast Cells - Mediated Immune Responses (148215)

Richard Stevens

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 330L

CD4+ T Cell Tolerance (130514)

James Moon

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 330L

CD4+ T Cell Tolerance (130514)

James Moon

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 331

Lymphoid Organs (143527)

Joan Stein-Streilein

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 331

Lymphoid Organs (143527)

Joan Stein-Streilein

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 331L

Immune Regulation of Cancer (160772)

Shadmehr Demehri

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 331L

Immune Regulation of Cancer (160772)

Shadmehr Demehri

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 332

The Role of Cysteinyl Leukotrienes and their Receptors in Pulmonary Inflammation and Fibrosis (144366)

Yoshihide Kanaoka

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 332

The Role of Cysteinyl Leukotrienes and their Receptors in Pulmonary Inflammation and Fibrosis (144366)

Yoshihide Kanaoka

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 332L

Genetic dissection of neural circuits that control stress-induced behavioral states (160778)

Todd Anthony

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 332L

Genetic dissection of neural circuits that control stress-induced behavioral states (160778)

Todd Anthony

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 334

Understanding the Mechanisms of Pathogen-sensing by the Innate Immune System (146383)

Terry Means

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 334

Understanding the Mechanisms of Pathogen-sensing by the Innate Immune System (146383)

Terry Means

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 334L

Function of Genes Associated with Autoimmune Disease (160972)

Stephan Kissler

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 334L

Function of Genes Associated with Autoimmune Disease (160972)

Stephan Kissler

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 335

Neuro-immunology of Pain and Host Defense (160760)

Isaac Chiu

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 335

Neuro-immunology of Pain and Host Defense (160760)

Isaac Chiu

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 336

T-Lymphocyte Recognition (144165)

Michael Brenner

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 336

T-Lymphocyte Recognition (144165)

Michael Brenner

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 337

Influence of Initial Bacterial Colonization on the Development of the Mucosal Immune Systems (131243)

W. Allan Walker

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 337

Influence of Initial Bacterial Colonization on the Development of the Mucosal Immune Systems (131243)

W. Allan Walker

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 337L

Vascular and Cell Biology of Inflammation and Wound Healing (146665)

Christopher Carman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 337L

Vascular and Cell Biology of Inflammation and Wound Healing (146665)

Christopher Carman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 339

Function and Regulation of Cellular Adhesion Mechanisms (144591)

Martin Hemler

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 339

Function and Regulation of Cellular Adhesion Mechanisms (144591)

Martin Hemler

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 340

The Human Major Histocompatibility Complex, Immune Function, and Disease (143640)

Chester Alper

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 340

The Human Major Histocompatibility Complex, Immune Function, and Disease (143640)

Chester Alper

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 341

Gene Regulation in Normal and Leukemic Stem Cells (144368)

Daniel Tenen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 341

Gene Regulation in Normal and Leukemic Stem Cells (144368)

Daniel Tenen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 342

Immune Cell Signaling, Gene Transcription and Tissue Injury in Lupus (145026)

George Tsokos

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 342

Immune Cell Signaling, Gene Transcription and Tissue Injury in Lupus (145026)

George Tsokos

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 343

The Regulation of Eicosanoid Generation (148188)

Jonathan Arm

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 343

The Regulation of Eicosanoid Generation (148188)

Jonathan Arm

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 344

Genetic Analysis of Lymphocyte Development and Nuclear Oncogene Function (143482)

Frederick Alt

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 344

Genetic Analysis of Lymphocyte Development and Nuclear Oncogene Function (143482)

Frederick Alt

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 345

Assembly and Function of pre-B Cell-fate and B Lymphocyte Antigen Receptors (145022)

Shiv Pillai

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 345

Assembly and Function of pre-B Cell-fate and B Lymphocyte Antigen Receptors (145022)

Shiv Pillai

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 346

Trafficking of Antigen in Lymph Nodes (131316)

Michael Carroll

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 346

Trafficking of Antigen in Lymph Nodes (131316)

Michael Carroll

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 347

Lymphocyte development, antibody diversity and host - microbe interactions (161335)

Duane Wesemann

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 30

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 347

Lymphocyte development, antibody diversity and host - microbe interactions (161335)

Duane Wesemann

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 348

Cell Biology, Biochemistry, and Immunology of Leukocyte-endothelial Adhesion (142207)

Francis Luscinskas

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 348

Cell Biology, Biochemistry, and Immunology of Leukocyte-endothelial Adhesion (142207)

Francis Luscinskas

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 349L

Cell death, cytopenia and immunosuppression triggered by pathogen recognition (203783)

Ben Croker

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 349L

Cell death, cytopenia and immunosuppression triggered by pathogen recognition (203783)

Ben Croker

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 350

Regulation of Autoimmune T Cell Responses (131343)

Vijay Kuchroo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 350

Regulation of Autoimmune T Cell Responses (131343)

Vijay Kuchroo

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 351

Studies on Glycosylation and Adaptive Immunity (144582)

Charles Dimitroff

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 351

Studies on Glycosylation and Adaptive Immunity (144582)

Charles Dimitroff

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 353

Innate and Adaptive Immune Responses in HIV-1 Infection (144750)

Marcus Altfeld

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 353

Innate and Adaptive Immune Responses in HIV-1 Infection (144750)

Marcus Altfeld

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 354

Topics in Transplantation Biology (146705)

David Sachs

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 354

Topics in Transplantation Biology (146705)

David Sachs

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 355

Molecular Mechanisms of Antigen Presentation (130016)

Edda Fiebiger

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 355

Molecular Mechanisms of Antigen Presentation (130016)

Edda Fiebiger

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 356

Cytotoxic T Lymphocytes (144903)

Judy Lieberman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 356

Cytotoxic T Lymphocytes (144903)

Judy Lieberman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 357

Microbial-epithelial-immune Cell Interactions in Mucosal Tissues (146787)

Richard Blumberg

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 357

Microbial-epithelial-immune Cell Interactions in Mucosal Tissues (146787)

Richard Blumberg

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 359

Immunoregulatory Mechanisms at Mucosal Surfaces, Including the Lung and Gut, Affecting the Developme (148219)

Dale Umetsu

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 359

Immunoregulatory Mechanisms at Mucosal Surfaces, Including the Lung and Gut, Affecting the Developme (148219)

Dale Umetsu

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 360

Hematopoietic Stem Cells and their Niche (131562)

David Scadden

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 360

Hematopoietic Stem Cells and their Niche (131562)

David Scadden

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 360L

Understanding the Immune Microenvironment (204568)

Stephanie Dougan

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 361

Induction and Regulation of Antigen-specific T Cell Responses (146786)

Gilles Benichou

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 361

Induction and Regulation of Antigen-specific T Cell Responses (146786)

Gilles Benichou

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 362

Chemokine and Lipid Chemoattractants in Immune Cell Trafficking in Normal Physiology and Disease (131559)

Andrew Luster

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 362

Chemokine and Lipid Chemoattractants in Immune Cell Trafficking in Normal Physiology and Disease (131559)

Andrew Luster

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 363

Regulation of Immune and Inflammatory Responses by the Leukocyte Immunoglobulin-like Receptor Family (131556)

Howard Katz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 363

Regulation of Immune and Inflammatory Responses by the Leukocyte Immunoglobulin-like Receptor Family (131556)

Howard Katz

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 364

T-cell Differentiation, Tolerance and Autoimmunity (131766)

Diane Mathis

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 364

T-cell Differentiation, Tolerance and Autoimmunity (131766)

Diane Mathis

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 365L

Macrophage biology in multiple contexts, including IBD and metabolism. (203786)

Tiffany Horng

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 365L

Macrophage biology in multiple contexts, including IBD and metabolism. (203786)

Tiffany Horng

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 366

Immune Mechanisms in Cardiovascular Disease (131558)

Andrew Lichtman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 366

Immune Mechanisms in Cardiovascular Disease (131558)

Andrew Lichtman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Subject: Virology

Virology 200

Introduction to Virology (116413)

Max Nibert

David Knipe

Priscilla Yang

2016 Fall (4 Credits)

Schedule: F 0830 AM - 1029 AM
W 0900 AM - 1029 AM

Instructor Permissions: Instructor

Enrollment Cap: 20

Introduction to virology. The lecture component reviews the basic principles of virology and introduces the major groups of human viruses. Weekly discussion groups critically analyze selected papers from the literature. Weekly written critiques of the selected papers are also required.

Course Notes:

There will be mid-term and final projects consisting of proposals based on laboratory rotations. Offered jointly with the <http://www.courses.fas.harvard.edu/6075> Medical School as MG 705.0.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Virology 201

Virology (110546)

Sean P.J. Whelan

James Cunningham

2017 Spring (4 Credits)

Schedule: MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

The course focuses on the following areas of virology: (i) epigenetic regulation, (ii) RNA virus replication mechanisms, (iii) innate responses to viral infection, (iv) inhibition of viral infection. The course will

comprise lectures as well as reviewing literature that describes fundamental breakthroughs relevant to these areas. Within those areas, the class will read and discuss papers dealing with virus structure, replication, pathogenesis, evolution, emerging viruses, chronic infection, innate and adaptive immunity, anti-viral drugs/vaccines. Special emphasis will be placed on preparing students to critically evaluate the literature, formulate hypotheses and design experiments.

Course Notes: Course format will be lectures, literature-based critical reading and discussion. Prepare and defend a written research proposal. Offered jointly with the Medical School as MG 723.0.

Recommended Prep: Graduate standing and permission required.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Virology 202

Proposal Writing (117649)

Benjamin Gewurz

James DeCaprio

Daniel Lingwood

Sylvie Le Gall

Margaret McLauglin-Drubin

2016 Fall (4 Credits)

Schedule: W 0145 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Students will write, present, and evaluate research proposals in the areas of virus replication, viral pathogenesis and treatment and prevention of viral infections.

Course Notes: Offered jointly with the Medical School as MG 724.0.

Class Notes: Classes begin on September 7, 2016 and ends on November 9, 2016.

Recommended Prep: General background in biochemistry and virology.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Virology 300QC

Advanced Topics in Virology (127510)

David Cardozo

2017 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks).

Course Notes: Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Virology 303

AIDS Pathogenesis Research in the Nonhuman Primate Model of SIV Infection with a Focus on Host Immun (125740)

Amitinder Kaur

2016 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Virology 304

Molecular Biology of Kaposi's Sarcoma-Associated Herpes Virus (112853)

Kenneth Kaye

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Virology 304

Molecular Biology of Kaposi's Sarcoma-Associated Herpes Virus (112853)

Kenneth Kaye

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Virology 305

Entry and Replication of Negative-Strand RNA Viruses (117886)

Sean P.J. Whelan

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Virology 305

Entry and Replication of Negative-Strand RNA Viruses (117886)

Sean P.J. Whelan

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Virology 306QC

Viruses of Bacteria and Archaea: Updates on Recent Key Literature (204372)

Max Nibert

2017 Spring (2 Credits)

Schedule:

TR 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

In this course, we will expand our view, commonly focused on viruses of humans and sometimes other vertebrates, to viruses of bacteria and archaea. Emphasis will be placed on exciting new findings in the recent literature. Active student participation will be expected and essential for the success of this readings and discussions based course, which is intended for students with previous advanced background in virology

Course Notes:

This course will be offered in spring term of odd-numbered years, starting 2017. It will be replaced in spring term of even-numbered years by Virology 302QC, Viruses of Nonvertebrate Eukaryotic Hosts

Class Notes:

Contact the course director for course room location. Class starts on March 21, 2017 through May 25, 2017

Pre-requisite: Virology 200, or equivalent approved by course director

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Virology 307

Genetics and Biochemistry of Prokaryotic Transposable Elements and Yeast Meiotic Chromosome Metabolism (143166)

Nancy Kleckner

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Virology 307

Genetics and Biochemistry of Prokaryotic Transposable Elements and Yeast Meiotic Chromosome Metaboli (143166)

Nancy Kleckner

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Virology 308

Molecular Genetics of Herpes Virus (112128)

Donald Coen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Virology 308

Molecular Genetics of Herpes Virus (112128)

Donald Coen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Virology 309

Immunology of Pregnancy, Tolerance and Multiple Sclerosis (113580)

Jack L. Strominger

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)

FAS Divisional Distribution	None

Virology 356

Pattern recognition by the B cell receptor (204094)

Daniel Lingwood

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Virology 356

Pattern recognition by the B cell receptor (204094)

Daniel Lingwood

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Subject: Microbiology

Microbiology 201

Molecular Biology of the Bacterial Cell (126271)

David Rudner

Thomas Bernhardt

Simon Dove

Ann Hochschild

2017 Spring (4 Credits)

Schedule: TR 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course is devoted to bacterial structure, physiology, genetics, and regulatory mechanisms. The class consists of lectures and group discussions emphasizing methods, results, and interpretations of classic and contemporary literature.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Microbiology 205

Mechanisms of Microbial Pathogenesis (146757)

Clyde Crumpacker

2016 Fall (4 Credits)

Schedule:

TR 0830 AM - 1229 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

The mechanisms of bacterial, mycoplasmal, fungal, and viral pathogenesis are covered. Topics are selected for intrinsic interest and cover the spectrum of pathophysiologic mechanisms of the infectious process. Emphasis on pathogenesis at the molecular level.

Course Notes: Offered jointly with the Medical School as HT 040.

Class Notes: Please note that there will be an additional fee for microscope rental.

Recommended Prep: A background course in molecular biology is strongly encouraged.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Microbiology 210

Microbial Sciences: Chemistry, Ecology, and Evolution (125823)

Michael Gilmore

2017 Spring (4 Credits)

Schedule:

F 0845 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This is an interdisciplinary graduate-level and advanced undergraduate-level course in which students explore topics in molecular microbiology, microbial diversity, and microbially-mediated geochemistry in depth. This course will be taught by faculty from the Microbial Sciences Initiative. Topics include the origins of life, biogeochemical cycles, microbial diversity, and ecology.

Course Notes: Also offered as Organismic and Evolutionary Biology 290.

Recommended Prep: For advanced undergraduates, Life Sciences 1a and 1b are required, or permission of instructor. MCB 52 is recommended.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Microbiology 213

Social Issues in Biology (122708)

Jonathan Beckwith

Louis Guenin

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Discussion course on topics selected from the following: history, philosophy of science; evolution vs. creationism; genetics and race; women and science; genetic testing; genetic enhancement; science journalism; genetics and criminality; science in wartime; scientists and social responsibility; theater and the public presentation of science.

Course Notes: Offered jointly with the Medical School as MG 722.0. Alternates yearly between the Longwood and the Cambridge campuses.

Recommended Prep: Some background in genetics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Microbiology 214

Mechanisms of Bacterial Pathogenesis and Host Immune Response (156454)

Marcia Goldberg

Jonathan Kagan

Michael Starnbach

Cammie Lesser

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course focuses on molecular mechanisms of bacterial pathogenesis and the host response to infection. The class consists of lectures and group discussions emphasizing methods, results, and interpretations of classic and contemporary literature. The course is designed to complement Microbiology 201.

Course Notes: Designed for graduate students in first year or beyond, however undergraduates with specific interest in the field may audit.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Microbiology 300

Advanced Topics in Microbiology and Molecular Genetics (111409)

David Cardozo

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

A series of reading and discussion seminars, each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit.

Course Notes: Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0605 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Recommended Prep: Dependent on seminar.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Microbiology 300

Advanced Topics in Microbiology and Molecular Genetics (111409)

David Cardozo

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Microbiology 302QC

Introduction to Infectious Disease Research: Infectious Diseases Consortium Boot Camp (109380)

Eric J. Rubin

Bradley Coleman

2017 Spring (2 Credits)

Schedule: MTWRF 0900 AM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This intensive January course provides an introduction to the breadth of infectious disease research carried out at Harvard. Students will learn techniques for studying infectious diseases, more about different types of infectious diseases, and meet faculty, students, and postdocs in infectious diseases labs at Harvard.

Course Notes: This is an intensive January course.

Class Notes: January Session; dates: January 9-13, 2017

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Microbiology 305

Molecular Determinants of Intracellular Bacterial Pathogenesis (112844)

Darren Higgins

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Principles of Molecular Biology (116477)

Joseph John Loparo

Melissa Leger-Abraham

Timur Yusufzai

Johannes Walter

Stirling Churchman

Dipanjan Chowdhury

2016 Fall (4 Credits)

Schedule: MWF 1045 AM - 1214 PM

Instructor Permissions: None

Enrollment Cap: n/a

Principles of Molecular Biology is a course organized around the Central Dogma of Biology with presentations covering fundamental aspects of DNA and RNA structure, their function and their interactions with proteins. The course opens with a discussion of the physical and chemical properties that drive the interactions of proteins with nucleic acids. This is used as a basis for understanding the material presented in the subsequent five modules, which cover DNA replication, DNA repair, gene regulation, transcription and translation. Throughout this course an emphasis will be placed on how the structure of small molecular machines (proteins) define their function in the processes and pathways that are introduced.

Course Notes: Offered jointly with the Medical School as BP 723.0.

Class Notes: Class meets in sections of 6 students on 6 dates throughout the semester (Monday, September 19; Wednesday, September 28; Friday, October 14; Wednesday, November 2; Wednesday, November 16;

Monday, December 5)

Recommended Prep: Intended primarily for graduate students familiar with basic molecular biology or with strong biology/chemistry background.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 213

Behavioral Pharmacology (141859)

Jack Bergman

Brian Kangas

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to behavioral pharmacology of CNS drugs (e.g., psychomotor stimulants, antischizophrenics, opioid analgesics, antianxiety agents); seminar format with emphasis on behavioral methodology (i.e., model and assay development) and pharmacological analysis (i.e., receptor selectivity and efficacy); attention to tolerance, drug dependence/addiction/treatment, and basic behavioral processes.

Course Notes: Offered jointly with the Medical School as BP 719.0.

Recommended Prep: 1 year biology or chemistry or 1 year psychology

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 218

Molecular Medicine (122596)

Irving London

George Daley

Vijay Sankaran

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

A seminar on various human diseases and their underlying genetic or biochemical bases. Primary scientific papers discussed. Lectures by faculty and seminars conducted by students, faculty supervision.

Course Notes: Faculty mentors will guide student-led discussions of the papers. Jointly offered with the Medical School as HT 140. Go to [canvas.hms.harvard](https://canvas.hms.harvard.edu) to view contents for the course.

Recommended Prep: College-level mastery of principles of cellular and molecular biology and genetics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 228

Macromolecular NMR (136204)

Gerhard Wagner

James Chou

Haribabu Arthanari

2016 Fall (4 Credits)

Schedule: MF 0200 PM - 0329 PM

Instructor Permissions: None

Enrollment Cap: n/a

Theory and practice of modern methods of macromolecular structure determination using multi-dimensional NMR.

Course Notes:

Given in alternate years. Offered jointly with the Medical School as BP 722.0. Classroom lectures on Mondays and Fridays. The course will include classroom lectures, practical training and hands-on problem solving. The latter includes basic aspects of spectrometer operation, computer-based assignment of protein NMR spectra and structure calculation.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Biolog Chem & Molecular Pharm 230

Principles and Practice of Drug Development (114740)

Stan Finkelstein

2016 Fall (4 Credits)

Schedule: W 0300 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Critical assessment of the major issues and stages of developing a pharmaceutical or biopharmaceutical. Drug discovery, preclinical development, clinical investigation, manufacturing and regulatory issues considered for small and large molecules. Economic considerations of the drug development process.

Course Notes:

Classes held at MIT.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 234

Cellular Metabolism and Human Disease (121820)

Thomas Michel

2017 Spring (4 Credits)

Schedule:

MWF 0900 AM - 1020 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Cellular and organismal metabolism, with focus on interrelationships between key metabolic pathways and human disease states. Genetic and acquired metabolic diseases and functional consequences. Interactive lectures and critical reading conferences are integrated with clinical encounters.

Course Notes: Enrollment may be limited

Recommended Prep: For Undergraduate students only: Knowledge of introductory biochemistry, genetics, and cell biology required (MCB 52 and 54 or equivalent); one year of organic chemistry.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 236

Modern Drug Discovery: From Principles to Patients (156104)

Timothy Mitchison

Catherine Dubreuil

Nathanael Gray

2017 Spring (4 Credits)

Schedule:

TR 0330 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will familiarize students with central concepts in drug action and therapeutics: specifically we will cover concepts surrounding Pharmacokinetics (PK) and the intersection of PK and medicinal chemistry in both lectures and cases based discussions. These concepts are central to modern drug development and evaluation. In the course we will cover drug-target interactions, Pharmacokinetics and Pharmacodynamics. This course will have a focus on modern approaches to therapeutic development for small molecules, protein based therapeutics, nucleic acid based drugs and antibacterial compounds as well new frontiers in therapeutic discovery.

Course Notes: This course is the combination of the BCMP 309qc and 307qc quarter courses, offered as half course. Students who plan to take the two quarters must sign up under BCMP 236.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 250

Molecular and Biophysical Mechanisms in Signal Transduction (204396)

Andrew Kruse

Stephen Blacklow

Michael Eck

Eric Fischer

2017 Spring (4 Credits)

Schedule:

TR 1030 AM - 1229 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Molecular and Biophysical Mechanisms in Signal Transduction focuses on the biochemical and biophysical mechanisms that underlie signal transduction and other essential biochemical processes. Major topics include biochemical thermodynamics and conformational equilibria, the structural basis for signal transduction, receptor pharmacology and allostery, and enzymatic mechanisms in signaling. The course includes both content lectures and research frontiers seminars focused on current research in signal transduction with a particular emphasis on application to therapeutically relevant pathways.

Recommended Prep: A foundational biochemistry course

Instructor Permissions: Instructor

Enrollment Cap: n/a

This intensive course, held during the first two weeks of January (nine days), covers principles of pharmacology and their translation into new drug development. Students participate in project groups composed of graduate students, medical students, and post-graduate M.D. fellows to propose a drug development strategy from target choice through clinical trials. Most mornings include two hours of lectures and/or panel discussions; most afternoons include (i) case studies presented by Harvard faculty and faculty from the pharmaceutical and biotechnology industries and/or (ii) time to work on the group project. Evaluation is based on written and oral presentations of the group project and on class participation. Enrollment may be limited.

Course Notes: Class begins Tuesday January 2nd, 2018 through Friday, January 12, 2018

Class Notes: Dates: January 9-20, 2017.

Alan Cantor

George Daley

Ramesh Shivdasani

Zhe Li

2016 Fall (2 Credits)

Schedule: W 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This quarter course will offer students an in-depth examination of current knowledge regarding mechanisms of cell fate decisions. It will examine these processes in the context of developmental cell plasticity, cellular reprogramming, and cancer. This will primarily be a literature-based course with examination and discussion of key studies in the field. Concepts involving the instructive role of lineage-specific transcription factors, transcription factor cross-antagonism, feedback loops, gene regulatory networks, multilineage priming, pioneer factors, epigenetics, chromatin remodeling factors, "super enhancers", stem cell bias, lineage identity maintenance, mitotic bookmarking, non-coding RNAs, cell polarity, asymmetric cell division, Notch signaling, lateral inhibition, lineage plasticity, and cellular reprogramming will be explored. These ideas will be examined in the context of several different tissue systems and organisms.

Class Notes:

Course meets Wednesdays, September 21, 28, October 5, 12, 19, 26 and November 2, 9, 16.

FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 329

Structure Biology of Cytoplasmic Signal Transduction (148041)

Michael Eck

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 330L

Protein aggregation and synaptic dysfunction (203803)

Dominic Walsh

2017 Spring (0 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 330L

Protein aggregation and synaptic dysfunction (203803)

Dominic Walsh

2016 Fall (0 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 331

Biochemistry and Biology of Neurodegenerative Diseases (117744)

Michael Wolfe

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 331

Biochemistry and Biology of Neurodegenerative Diseases (117744)

Michael Wolfe

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 333

Structural Biology of Mechanisms in Gene Regulation (110246)

Piotr Sliz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 333

Structural Biology of Mechanisms in Gene Regulation (110246)

Piotr Sliz

2016 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 334

MicroRNA Functions in Cancers and Quiescence (127373)

Shobha Vasudevan

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 334

MicroRNA Functions in Cancers and Quiescence (127373)

Shobha Vasudevan

2016 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 335

Biochemical and Genetic Analysis of Eukaryotic Gene Expression (122931)

Stephen Buratowski

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 335

Biochemical and Genetic Analysis of Eukaryotic Gene Expression (122931)

Stephen Buratowski

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 336

Molecular mechanisms of transmembrane signaling (160764)

Andrew Kruse

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 336

Molecular mechanisms of transmembrane signaling (160764)

Andrew Kruse

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 337

Drosophila Molecular Genetics (122426)

Welcome Bender

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 337

Drosophila Molecular Genetics (122426)

Welcome Bender

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 338

Gene Regulation in Yeast and Cancer (116302)

Kevin Struhl

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 338

Gene Regulation in Yeast and Cancer (116302)

Kevin Struhl

2016 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 340

Biologically Active Small Molecules (118845)

Jon Clardy

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 340

Biologically Active Small Molecules (118845)

Jon Clardy

2016 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 343

Molecular Genetics of Herpes Viruses (145027)

Donald Coen

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 343

Molecular Genetics of Herpes Viruses (145027)

Donald Coen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 344

Molecular Pharmacology of Excitable Membranes (131357)

Gary Strichartz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 344

Molecular Pharmacology of Excitable Membranes (131357)

Gary Strichartz

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 345

Transcription Factors in Hematopoiesis and Leukemogenesis (120174)

Alan Cantor

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 345

Transcription Factors in Hematopoiesis and Leukemogenesis (120174)

Alan Cantor

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 349

Targeting Deregulated Apoptotic and Transcriptional Pathways in Cancer (122746)

Loren Walensky

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 349

Targeting Deregulated Apoptotic and Transcriptional Pathways in Cancer (122746)

Loren Walensky

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 352

Chemical Mediators in Inflammation and Resolution (119614)

Charles Serhan

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 352

Chemical Mediators in Inflammation and Resolution (119614)

Charles Serhan

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 353

Epigenomics and Chromatin Systems Biology (122334)

Yujiang (Geno) Shi

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 353

Epigenomics and Chromatin Systems Biology (122334)

Yujiang (Geno) Shi

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 355

Transcriptional Control of Hematopoiesis and Leukemia (122740)

Hanno Hock

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 355

Transcriptional Control of Hematopoiesis and Leukemia (122740)

Hanno Hock

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 356

NMR Spectroscopy of Proteins and Metabolites (148268)

Gerhard Wagner

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 356

NMR Spectroscopy of Proteins and Metabolites (148268)

Gerhard Wagner

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 358

Targeting Apoptosis Regulation in Cancer (122742)

Anthony Letai

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 358

Targeting Apoptosis Regulation in Cancer (122742)

Anthony Letai

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 359

Molecular Mechanisms of Signal Transduction (144995)

Elaine Elion

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 359

Molecular Mechanisms of Signal Transduction (144995)

Elaine Elion

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 360

Regeneration of Cartilage and Skeletal Muscle (120048)

Andrew Lassar

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 360

Regeneration of Cartilage and Skeletal Muscle (120048)

Andrew Lassar

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 361

X-Ray Crystallographic Studies of Viruses and Proteins (137505)

James Hogle

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 361

X-Ray Crystallographic Studies of Viruses and Proteins (137505)

James Hogle

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 362

Eukaryotic Survival Decisions (114726)

David Fisher

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 362

Eukaryotic Survival Decisions (114726)

David Fisher

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 363

Normal cell division mechanisms and cell division defects in cancer (114763)

David Pellman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 363

Normal cell division mechanisms and cell division defects in cancer (114763)

David Pellman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 366

Stem Cells in Disease and Development (119609)

George Daley

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 366

Stem Cells in Disease and Development (119609)

George Daley

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 370

Advanced Topics in Biological Chemistry and Molecular Pharmacology (114232)

David Cardozo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit.

Course Notes: Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 370

Advanced Topics in Biological Chemistry and Molecular Pharmacology (114232)

David Cardozo

2016 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 371

Maintenance of genome stability in S phase (115348)

Johannes Walter

2017 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 371

Maintenance of genome stability in S phase (115348)

Johannes Walter

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 375

Biomolecular Nanotechnology (120627)

William Shih

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 375

Biomolecular Nanotechnology (120627)

William Shih

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 376

Mechanisms of Action of Antibiotics (121266)

Daniel Kahne

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 376

Mechanisms of Action of Antibiotics (121266)

Daniel Kahne

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 377

Quantitative Proteomics of Cancer Progression (121384)

Jarrold Marto

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 377

Quantitative Proteomics of Cancer Progression (121384)

Jarrold Marto

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 379

Biochemical and Molecular Regulation of Vascular Growth (121642)

Marsha Moses

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 379

Biochemical and Molecular Regulation of Vascular Growth (121642)

Marsha Moses

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 381

Functional Small Molecules for Biological Discovery (123001)

Nathanael Gray

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 381

Functional Small Molecules for Biological Discovery (123001)

Nathanael Gray

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 382

Mechanisms of RNAi in Stem Cells (123114)

Richard Gregory

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 382

Mechanisms of RNAi in Stem Cells (123114)

Richard Gregory

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 383

Integrated and Functional Genomic Studies of Human Cancer (125361)

Levi Garraway

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 383

Integrated and Functional Genomic Studies of Human Cancer (125361)

Levi Garraway

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 384

Embryonic stem cells, Nuclear Transfer, Cancer, Reprogramming (125402)

Konrad Hochedlinger

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 384

Embryonic stem cells, Nuclear Transfer, Cancer, Reprogramming (125402)

Konrad Hochedlinger

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 385

Control of Gene Expression in Tumorigenesis and Differentiation (128173)

Thomas Roberts

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 385

Control of Gene Expression in Tumorigenesis and Differentiation (128173)

Thomas Roberts

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 386

Kinase Signaling in Cancer (128175)

Jean Zhao

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 386

Kinase Signaling in Cancer (128175)

Jean Zhao

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 387

Single-molecule Biophysics and Force Spectroscopy (108354)

Wesley Wong

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Subject: Cell Biology

Cell Biology 201

Principles of Cell Biology (108339)

Danesh Moazed

Christopher Wood

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 113

CB201 is a graduate level course intended to teach critical concepts in cell biology, and expose students to current and quantitative approaches in cell biology research. Topics include the molecular basis of cellular dynamics, subcellular compartmentalization, protein trafficking, chromosome biology and epigenetics, regulated ubiquitin-proteasome pathways, cell cycle regulation, cytoskeleton and motor dynamics, signal transduction, cell-cell interactions, and programmed cell death.

Course Notes: Methodological focus on current approaches in cell biology including quantitative tools. Emphasis on experimental design. Offered jointly with the Medical School as CB 713.0.

Recommended Prep: Basic knowledge in biochemistry, genetics and cell biology.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Cell Biology 207

Vertebrate Developmental and Regenerative Biology (111215)

Andrew Lassar

John Flanagan

Jordan Kreidberg

Sean Megason

Jessica Whited

Olivier Pourquie

Jayaraj Rajagopal

Yingzi Yang

2017 Spring (4 Credits)

Schedule: MW 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

Analyzes the developmental programs of frog, chick, zebrafish, and mouse embryos, emphasizing experimental strategies for understanding the responsible molecular mechanisms that pattern the vertebrate embryo. Signaling pathways controlling morphogenesis, organogenesis, stem cells and regeneration will be discussed in detail.

Course Notes: Offered jointly with the Medical School as CB 710.0. Includes lectures and conference sessions in which original literature is discussed in depth. Short research proposals are required in lieu of exams.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Cell Biology 212

Biology of the Cancer Cell: From Molecular Mechanisms to Therapeutic Implications (125825)

David Frank

Nikhil Wagle

2017 Spring (4 Credits)

Schedule: MW 1230 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: 36

This semester long course takes a molecular approach to examine the basis of human cancer. The main concepts that we will cover include: cancer genetics and epigenetics, tumor suppressor genes and oncogenes, signal transduction, DNA damage and repair, angiogenesis, metastasis and invasion, apoptosis, cancer stem cells, and tumor immunology and immunotherapy. Lectures will be delivered by experts in the various fields to provide an integrated perspective on past, current and future approaches in cancer biology research. In addition, students will participate in workshops in which they will delve more deeply into the primary literature of several of these topics.

Course Notes: Given alternate years with Cell Biology 211.

Recommended Prep: Advanced biochemistry, molecular genetics, and cell biology.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 226

Concepts in Development, Self-Renewal, and Repair (121707)

Iain Drummond

Amar Sahay

2016 Fall (4 Credits)

Schedule: F 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Explores developmental mechanisms through the life cycle, contrasting pluripotency and cell fate

restriction in embryos and adult tissues. In depth analysis of in vivo approaches, with emphasis on adult stem cells, tissue repair and self-renewal.

Course Notes: Offered jointly with the Medical School as CB 721.0. For more information visit: http://www2.massgeneral.org/bbs/CB226/cb_226.htm

Recommended Prep: Upper division cell biology or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 300

Advanced Topics in Cell, Molecular, and Developmental Biology (116986)

David Cardozo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (seven weeks). Different topics are covered each term.

Course Notes: Two seminars, which can be taken in different terms, are required for credit. Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 302QC

Advanced Experimental Design for Biologists (127479)

Randall King

David Glass

2017 Spring (2 Credits)

Schedule:

MW 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

24

This course will focus on both the theory and practice of experimental design. The emphasis is on project planning and vetting, individual experimental design, and trouble-shooting. Special focus will be placed on methods to avoid experimental bias, and potential sources of inappropriate interpretation. Also the importance of system validation is especially emphasized.

Class Notes:

Class starts on January 30, 2017 through March 8, 2017

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 304QC

Introduction to Human Gross Anatomy (127989)

Gerald Greenhouse

Everett Anderson

Mohini Lutchman

Giorgio Giatsidis

David Cardozo

2017 Spring (2 Credits)

Schedule:

R 1200 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

24

Lectures, laboratory dissections, and prosections will provide students an opportunity to explore the gross structure and function of the human body. The course will provide a foundation for the student to acquire practical skills in recognizing, dissecting, and differentiating key anatomical structures. Structure/function relationships will be emphasized and some foundation will be provided for understanding the anatomic basis of diseases.

Each of the 13 sessions will include a lecture, 3 hours of dissection, and an evening guest lecturer on clinical or research aspects related to the dissections (supper provided).

Course Notes:

Open to graduate and undergraduate students. Students must sign up during the Spring semester sign up period.

Class Notes:

Class starts on June 2, 2017 through June 30, 2017

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course

Cell Biology 306QC

Teaching 100: The Theory and Science of Teaching (107400)

Johanna Gutlerner

Christopher Wood

2016 Fall (2 Credits)

Schedule: R 0130 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

For many graduate students, teaching will be part of their career, whether as mentoring, formal classroom teaching, or outreach. In addition, the theory and research evidence accumulating in the disciplines of cognitive psychology, neuroscience, and from STEM classrooms, has turned the question of, 'How do we best teach science?' into its own scientific discipline. The Theory and Science of Teaching focuses on understanding why certain teaching methods are effective by examining the scientific research and theoretical frameworks that support these methods. We will read and discuss foundational educational and cognitive psychology texts and primary literature, and then develop an annotated lesson plans that allows us to put these ideas into practice.

Course Notes:

The course has been designed as a companion to Genetics 302qc: Teaching 101, but neither course is a prerequisite of the other.

Class Notes:**Course meets September 29, 2016 through November 17, 2016.****Additional Course Attributes:**

Cell Biology 308QC

Introduction to Histology for Graduate Students (107831)

*Gerald Greenhouse**Everett Anderson**Stephen Liberles**Adrian Salic*

2017 Spring (2 Credits)

Schedule: MWF 0100 PM - 0459 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 11

Histology—the study of structure and how structure relates to function, in cells and tissues. The class will include a session on each of the major tissue types—epithelium, connective, muscle, and nerve. This will be followed by sessions during which organ systems will be studied. Each session will include an introductory lecture followed by shared observation of slides using a 12-headed light microscope. Pathology correlates will be included when possible. In the last two sessions, students will have hands on training in tissue staining with recently developed compounds in the lab of Adrian Salic and learn frozen section technique on brain tissue from Stephen Liberles.

Course Notes: This course is offered usually during the month of June or July each year. Undergraduates may enroll. Students must sign up during the Spring semester sign up period.

Class Notes: Class start on July 7, 2017 through July 28, 2017

Additional Course Attributes:

The Basics of Translation (109331)

Spyros Artavanis-Tsakonas

David Van Vactor

2016 Fall (2 Credits)

Schedule:

W 0530 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course covers multiple perspectives from early phase basic research all the way to defining therapeutic strategies, clinical trial design and business models for bringing effective compounds to the marketplace. This Course Begins in October, and highlights a different advanced topic each week that will illustrate how investigation of basic principles and phenomena in cell and molecular biology open important doorways to understanding of disease mechanisms. One primary research article and one review article will be assigned each week to prepare students for discussion. Dinner provided at each session.

In addition to mandatory weekly reading and discussion participation, one 6 page written assignment and oral presentation will be assigned to help students integrate the course material, improve communication skills, and identify novel experimental approaches: Write and present a proposal to launch a project with long-range therapeutic value for a neurodegenerative disorder.

Class Notes: Course meets Wednesdays, October 12, 19, 26, November 2, 9, 16, 23, 30 and December 7, 14

FAS: Course Level	Graduate Course

Cell Biology 328

Single-Molecule Biology and Visualization of Cellular Dynamics (139184)

Tomas Kirchhausen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 328

Single-Molecule Biology and Visualization of Cellular Dynamics (139184)

Tomas Kirchhausen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 329

The Ubiquitin-Proteasome Pathway (119495)

Daniel Finley

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 329

The Ubiquitin-Proteasome Pathway (119495)

Daniel Finley

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 330L

Lipid and Membrane Homeostasis (203804)

Tobias Walther

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 330L

Lipid and Membrane Homeostasis (203804)

Tobias Walther

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 332

Mass Spectrometry and Proteomics (115968)

Steven Gygi

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 332

Mass Spectrometry and Proteomics (115968)

Steven Gygi

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 333

Electron Microscopic Structure Determination (114751)

Thomas Walz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 333

Electron Microscopic Structure Determination (114751)

Thomas Walz

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 334L

Adipocyte development and energy metabolism (203841)

Yu-Hua Tseng

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 334L

Adipocyte development and energy metabolism (203841)

Yu-Hua Tseng

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 336

Signal Transduction in Normal and Transformed Cells (119551)

Joan Brugge

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 336

Signal Transduction in Normal and Transformed Cells (119551)

Joan Brugge

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 339

Cell Morphogenesis and Regulation (113489)

Marc Kirschner

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 339

Cell Morphogenesis and Regulation (113489)

Marc Kirschner

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 343

Mechanisms of Mammalian Cell Differentiation and Gene Expression (111198)

Bruce Spiegelman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 343

Mechanisms of Mammalian Cell Differentiation and Gene Expression (111198)

Bruce Spiegelman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 344

Molecular Mechanism of Signal Transduction (117770)

Xi He

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 344

Molecular Mechanism of Signal Transduction (117770)

Xi He

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 345

Protein Transport Across the Endoplasmic Reticulum Membrane (119350)

Tom Rapoport

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 345

Protein Transport Across the Endoplasmic Reticulum Membrane (119350)

Tom Rapoport

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 348

Transcriptional Regulation and Epigenetics in Breast and Prostate Cancer (110253)

Myles Brown

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 348

Transcriptional Regulation and Epigenetics in Breast and Prostate Cancer (110253)

Myles Brown

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 349

Gene Silencing and Chromosome Structure (124315)

Danesh Moazed

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 349

Gene Silencing and Chromosome Structure (124315)

Danesh Moazed

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 353L

Regulated protein degradation (203806)

John Hanna

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 353L

Regulated protein degradation (203806)

John Hanna

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 354

Basic and Applied Mechanisms of Intracellular Transport (112504)

Victor Hsu

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 354

Basic and Applied Mechanisms of Intracellular Transport (112504)

Victor Hsu

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 358

Mechanisms of Tumor Metastasis (143098)

Bruce Zetter

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 358

Mechanisms of Tumor Metastasis (143098)

Bruce Zetter

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 359

Intracellular Signaling Pathways in the Regulation of Cell Growth and Differentiation (110416)

David Frank

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 359

Intracellular Signaling Pathways in the Regulation of Cell Growth and Differentiation (110416)

David Frank

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 360

Genetic Control of Apoptosis in Drosophila (115969)

Kristin White

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 360

Genetic Control of Apoptosis in Drosophila (115969)

Kristin White

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 365

Mechanism and Biology of Ubiquitin-like Protein Conjugation Cascades (128171)

Wade Harper

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 365

Mechanism and Biology of Ubiquitin-like Protein Conjugation Cascades (128171)

Wade Harper

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 366

Mitochondria in Aging and Metabolism (128172)

Marcia Haigis

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 366

Mitochondria in Aging and Metabolism (128172)

Marcia Haigis

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 369L

Protein structure by high-resolution electron microscopy (203788)

Maofu Liao

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 369L

Protein structure by high-resolution electron microscopy (203788)

Maofu Liao

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 370

Mitotic Kinases, Chromatin and Chromosome Segregation (122739)

Jonathan Higgins

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 370

Mitotic Kinases, Chromatin and Chromosome Segregation (122739)

Jonathan Higgins

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 371

Nutrient Sensing and Metabolic Control (122998)

Pere Burguera

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 371

Nutrient Sensing and Metabolic Control (122998)

Pere Burguera

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 372

Cytoskeletal Dynamics (115000)

Timothy Mitchison

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 372

Cytoskeletal Dynamics (115000)

Timothy Mitchison

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 373

Molecular Genetics of Cell Interaction in Development (112515)

Spyros Artavanis-Tsakonas

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 373

Molecular Genetics of Cell Interaction in Development (112515)

Spyros Artavanis-Tsakonas

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 373L

Regulation of protein biosynthesis and quality control (204037)

Sichen Shao

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 373L

Regulation of protein biosynthesis and quality control (204037)

Sichen Shao

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 375

Cancer Genetics and DNA (127583)

David Weinstock

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 375

Cancer Genetics and DNA (127583)

David Weinstock

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 376

Chemical Approaches to Cell Division and Cancer (115970)

Randall King

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 376

Chemical Approaches to Cell Division and Cancer (115970)

Randall King

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 376L

Cell polarity, organoids, cancer biology and therapeutics (204028)

Senthil Muthuswamy

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 376L

Cell polarity, organoids, cancer biology and therapeutics (204028)

Senthil Muthuswamy

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 377

Islet cell signaling mechanisms, Stem cells, iPS Cells in diabetes (120176)

Rohit Kulkarni

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 377

Islet cell signaling mechanisms, Stem cells, iPS Cells in diabetes (120176)

Rohit Kulkarni

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 378

Bacterial Toxin Entry and Immunoglobulin Transport in Mucosal Epithelial Cells (120177)

Wayne Lencer

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 378

Bacterial Toxin Entry and Immunoglobulin Transport in Mucosal Epithelial Cells (120177)

Wayne Lencer

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 379

BMP Signaling in Organogenesis (120178)

Vicki Rosen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 379

BMP Signaling in Organogenesis (120178)

Vicki Rosen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 380

Cytoskeletal Mechanics of Blood Platelet Production (121645)

Joseph Italiano

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 380

Cytoskeletal Mechanics of Blood Platelet Production (121645)

Joseph Italiano

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 383

Internal and External Sensory Systems (125265)

Stephen Liberles

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 383

Internal and External Sensory Systems (125265)

Stephen Liberles

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 385

Epigenetic Mechanisms and Genomic Integrity (109085)

Mo Motamedi

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 385

Epigenetic Mechanisms and Genomic Integrity (109085)

Mo Motamedi

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 386

Systemic metabolism and cancer (109086)

Nada Kalaany

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 386

Systemic metabolism and cancer (109086)

Nada Kalaany

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 387

Calcium signaling in health and disease (109087)

Anna Greka

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 387

Calcium signaling in health and disease (109087)

Anna Greka

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 390

Membrane: Cytoskeleton Interface in Morphogenesis and Tumorigenesis/Metastasis (107868)

Andrea McClatchey

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 390

Membrane: Cytoskeleton Interface in Morphogenesis and Tumorigenesis/Metastasis (107868)

Andrea McClatchey

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 399

Nanocourses (121654)

David Cardozo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 399

Nanocourses (121654)

David Cardozo

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Subject: Human Bio & Translational Med

Human Bio & Translational Med 200

Pathology of Human Disease (107843)

Scott Lovitch

2017 Spring (4 Credits)

Schedule: R 0900 AM - 1259 PM
T 0900 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course provides a comprehensive overview of human pathology with emphasis on mechanisms of disease and modern diagnostic technologies. Topics include (1) general mechanisms of disease (inflammation, infection, immune injury, host response to foreign materials, transplantation, genetic disorders and neoplasia), (2) pathology of major organ systems, and (3) review of diagnostic tools from invasive surgical pathology to non-invasive techniques such as diagnostic imaging and molecular pathology. The objectives of this course are achieved through a set of integrated lectures and laboratories, as well as a student-driven term project leading to a formal presentation on a medical, socioeconomic, or technological issue in human pathology.

Course Notes: Enrollment may be limited. Jointly offered with HMS as HT035.0

Class Notes: Classes begin on January 31 2017 through May 11 2017.

Recommended Prep: General biology.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Human Bio & Translational Med 235

Principles of Human Disease: Physiology and Pathology (109394)

Connie Cepko

2016 Fall (4 Credits)

Schedule: MWF 0900 AM - 1029 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course covers the normal physiology and pathophysiology of selected organs, through lectures, readings, tutorials based on clinical cases, and patient presentations. Human biology is emphasized, with some examples also drawn from model organisms. Recent therapeutic approaches, including RNAi, gene therapy, and genome editing will be covered.

Course Notes: Course enrollment is open to graduate students from any program as well as undergraduates.

Class Notes: Students will have tutorial sessions once a week.

Recommended Prep: Knowledge of introductory biochemistry, molecular biology, and cell biology required (MCB52 and MCB54 or equivalent and one year of organic chemistry for undergraduates is recommended).

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 300QC

Advanced Topics in Human Biology and Translational Medicine (127506)

David Cardozo

2017 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks).

Course Notes: Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 300QC

Advanced Topics in Human Biology and Translational Medicine (127506)

David Cardozo

2016 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks).

Course Notes: Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-

432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Bio & Translational Med 301QC

Case Studies in Human Biology and Translational Medicine (127520)

Caren Solomon

Mary Hamel

2017 Spring (2 Credits)

Schedule: MTWRF 0900 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Two-week course that is required of and restricted to first-year LHB students. Each week of the course focuses on a different "case study" in translational medicine.

Course Notes: This is an intensive January term course. Restricted to Leder students only.

Class Notes: January Session; dates: January 9-20, 2017

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 302QC

Imaging and Microscopy Methods in Biology and Medicine (107418)

Lev Perelman

Vladimir Turzhitsky

Le Qiu

2016 Fall (2 Credits)

Schedule: T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Introduce modern imaging modalities with emphasis on modalities frequently employed in cellular, molecular biology and medicine. Overview of noninvasive medical imaging techniques frequently used in scientific research: X-ray CT, MRI, ultrasound, PET/SPECT and optical imaging.

Class Notes: Classes start October 11, 2016 through December 6, 2016.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 304

Resolution of Lung Inflammation and Injury (124267)

Human Bio & Translational Med 305QC

Molecular Bases of Eye Disease (127483)

Darlene Dartt

Magali Saint-Geniez

2017 Spring (2 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course provides an overview of the pathogenic process of prevalent ocular diseases. The goals of the course are: (i) to explore the structural and functional aspects of the eye relevant to understanding the pathology, (ii) to review the manifestations of the disease and its effects on vision, (iii) to discuss current views and research in the pathophysiology, and strategies for therapeutic intervention. For most sessions, the basic science and clinical topics will be presented by two faculty lecturers.

Class Notes: Class start January 23, 2017 through April 24, 2017

Additional Course Attributes:

Subject: Genetics

Genetics 201

Principles of Genetics (113752)

Fred Winston

Thomas Bernhardt

Maxwell Heiman

Mitzi Kuroda

Steven McCarroll

Jenna Galloway

2016 Fall (4 Credits)

Schedule:

MWF 0900 AM - 1020 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An in-depth survey of genetics, beginning with basic principles and extending to modern approaches and special topics. We will draw on examples from various systems, including yeast, *Drosophila*, *C. elegans*, zebrafish, mouse, human and bacteria.

Course Notes:

Intended for first-year graduate students. Offered jointly with the Medical School as GN 701.0.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 216

Advanced Topics in Gene Expression (111358)

Fred Winston

Robert Kingston

Stephen Buratowski

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This course covers different topics in gene regulation, covering genetic, genomic, biochemical, and

molecular approaches. A small number of topics are discussed in depth, using the primary literature. Topics range from prokaryotic transcription to eukaryotic development.

Course Notes: BCMP 310QC has merged with Genetics 216. Offered jointly with the Medical School as GN 703.0.

Recommended Prep: BCMP 200 and Genetics 201. All students taking Genetics 216 should read and be prepared to discuss the papers for the first meeting on January 24. The readings can be downloaded from the course web site.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Genetics 228

Genetics in Medicine - From Bench to Bedside (121745)

Christopher Newton-Cheh

David Sweetser

2017 Spring (4 Credits)

Schedule: F 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Focus on translational medicine: the application of basic genetic discoveries to human disease. Each three-hour class will focus on a specific genetic disorder and the approaches currently used to speed the transfer of knowledge from the laboratory to the clinic. Each class will include a clinical discussion, a patient presentation if appropriate, followed by lectures, a detailed discussion of recent laboratory findings and a student led journal club. Lecturers will highlight current molecular, technological, bioinformatic and statistical approaches that are being used to advance the study of human disease. There is no exam. Students will present one paper per session in a journal club style. Attendance and active participation for the duration of all class meetings is required. If you are unable to attend class, or cannot be present for the entire session you are expected to contact the course instructor. Two incomplete or missed sessions will result in a failing grade.

Course Notes: Course will be held at MGH (transportation provided to MGH). Offered jointly with the Medical School as GN 711.0. For more information visit <http://www2.massgeneral.org/bbs/gen228/gen228.htm>

Recommended Prep: Genetics 201 or equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Genetics 229

Computational Statistics for Biomedical Sciences (127525)

Peter Park

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None**Enrollment Cap:**

60

Analysis of large datasets has become an integral part of biological and biomedical sciences. This course will provide a practical introduction to data analysis, with high-throughput sequencing data as the main source of examples. In the first half, it will cover basic statistical concepts and techniques, including hypothesis testing, nonparametric methods, principal component analysis, correlation analysis, and linear regression. In the second half, it will cover several advanced topics, focusing on issues that one encounters in the literature but are seldom covered in introductory statistics courses. To carry out statistical tests and visualize data, students will learn R, a powerful programming language for statistical computing and graphics. The class will be a combination of lectures and computer labs. We will use recent literature to motivate the statistical methods, and assignments will frequently include attempts to reproduce published findings.

Course Notes:

Offered jointly with Medical School as BMI713.0.

Classes begin on Tuesday, September 6, 2016.

Please contact Katherine Flannery at Katherine_Flannery@hms.harvard.edu for any inquiries about the course.

Teaching 101: Bringing Effective Teaching Practices to your Classroom (127555)

Christopher Burtner

Bradley Coleman

2017 Spring (2 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

A course to develop the skills of effective teaching. Primary focus is hands-on experience with objective-oriented lesson planning and execution, with emphasis on active learning techniques and how they can be applied in both large and small enrollment classes.

Class Notes:

Class start February 2, 2017 through April 6, 2017

The class will meet on the following dates 2/2, 2/9, 2/16, 3/2, 3/9, 3/23, 2/30, 4/6, 4/13

FAS Divisional Distribution	None

Genetics 303

Molecular Biology of Pathogenesis (111152)

Frederick Ausubel

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 303L

Craniofacial Developmental Biology (156720)

Eric Liao

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 303L

Craniofacial Developmental Biology (156720)

Eric Liao

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 303QC

Current Tools for Gene Analysis (156915)

Neena Haider

2017 Spring (2 Credits)

Schedule: R 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 18

The goal of this course is to explore a number of the current online tools to analyze genes, gene function, pathways, DNA, RNA, and protein analysis. Each class we will introduce a new online tool. The majority of the class will be spent exploring the tool together in an interactive manner. At the end of each class students will be given an assignment which utilizes the knowledge they gained in class and helps them to further explore the new tool. After taking this class students will be proficient in the use of each online tool and will be able to apply their knowledge to learning new tools and programs.

Course Notes: Students will need to bring a laptop to class each day.

Class Notes: Class start February 2, 2017 through April 13, 2017

Recommended Prep: Genetics 201 or with permission from the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 304

Molecular Genetics Basis of Human Disease, Particularly Cardiovascular Pathogenesis (112845)

Christine Seidman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 304

Molecular Genetics Basis of Human Disease, Particularly Cardiovascular Pathogenesis (112845)

Christine Seidman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 305

Centrosomes, Cilia, Cysts and Diseases (114752)

Jing Zhou

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 305

Centrosomes, Cilia, Cysts and Diseases (114752)

Jing Zhou

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 306

Inherited Human Disorders (121121)

Jonathan Seidman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 306

Inherited Human Disorders (121121)

Jonathan Seidman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 307

Regeneration in Axolotls (160766)

Jessica Whited

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 307

Regeneration in Axolotls (160766)

Jessica Whited

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 308

Molecular Biology of Signal Transduction (116507)

Brian Seed

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 308

Molecular Biology of Signal Transduction (116507)

Brian Seed

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 309

Gene Expression in Yeast (113402)

Fred Winston

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 309

Gene Expression in Yeast (113402)

Fred Winston

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 310

Molecular Genetics of Neural Development and Gene Therapy to Prevent Blindness (118193)

Connie Cepko

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 310

Molecular Genetics of Neural Development and Gene Therapy to Prevent Blindness (118193)

Connie Cepko

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 311

Molecular Mechanisms of Transcription Regulation in Mammals (121057)

Robert Kingston

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 311

Molecular Mechanisms of Transcription Regulation in Mammals (121057)

Robert Kingston

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 312

Genetic analysis of small RNA pathways and surveillance of core cellular systems (123512)

Gary Ruvkun

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 312

Genetic analysis of small RNA pathways and surveillance of core cellular systems (123512)

Gary Ruvkun

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 313

Genomic Approaches to Human Disease Genetics (117268)

David Altshuler

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 313

Genomic Approaches to Human Disease Genetics (117268)

David Altshuler

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 314

The Origin of Cellular Life (120754)

Jack Szostak

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 314

The Origin of Cellular Life (120754)

Jack Szostak

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 315

Molecular Genetics of Inherited Disorders (112919)

James Gusella

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 315

Molecular Genetics of Inherited Disorders (112919)

James Gusella

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 316

Transcription Factors and DNA Regulatory Elements (117269)

Martha Bulyk

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

FAS Divisional Distribution	None

Genetics 343

Zebrafish Cardiovascular Development and Regeneration (110244)

Charles Burns

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 344

Computational Genomics (124202)

Peter Park

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 344

Computational Genomics (124202)

Peter Park

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 345

Computational Biology of Cancer (160951)

Franziska Michor

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 345

Computational Biology of Cancer (160951)

Franziska Michor

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 347

Ras signaling and colon cancer (107886)

Kevin Haigis

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 347

Ras signaling and colon cancer (107886)

Kevin Haigis

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 348

The Regenerative Biology of Tendons and Ligaments (156719)

Jenna Galloway

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 348

The Regenerative Biology of Tendons and Ligaments (156719)

Jenna Galloway

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 350

Genetic Regulation of Organogenesis and Organ Regeneration (114732)

Richard Maas

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 350

Genetic Regulation of Organogenesis and Organ Regeneration (114732)

Richard Maas

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 351L

Musculo-skeletal development (203793)

Olivier Pourquie

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 351L

Musculo-skeletal development (203793)

Olivier Pourquie

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 352

Cardiovascular Development and Disease, Muscle Biology (127376)

Da-Zhi Wang

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 352

Cardiovascular Development and Disease, Muscle Biology (127376)

Da-Zhi Wang

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 353

Genetics of Human Disease (122745)

Susan Slaughaupt

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 353

Genetics of Human Disease (122745)

Susan Slaughaupt

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 355

Molecular Genetics of Human Neuromuscular Diseases (126288)

Alan Beggs

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 355

Molecular Genetics of Human Neuromuscular Diseases (126288)

Alan Beggs

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 356

Research in Molecular Cytogenetics (107887)

Cynthia Morton

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 356

Research in Molecular Cytogenetics (107887)

Cynthia Morton

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 357

Lung Stem Cell Biology and Cancer (123104)

Carla Kim

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 357

Lung Stem Cell Biology and Cancer (123104)

Carla Kim

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 358

Developmental Neurobiology and Genetics (123342)

Susan Dymecki

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 358

Developmental Neurobiology and Genetics (123342)

Susan Dymecki

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 359

Cancer and development, intestinal development/differentiation (117740)

Ramesh Shivdasani

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 359

Cancer and development, intestinal development/differentiation (117740)

Ramesh Shivdasani

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 360

Microtubule Associated RNAs During Mitosis (123002)

Michael Demian Blower

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 360

Microtubule Associated RNAs During Mitosis (123002)

Michael Demian Blower

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 361

Epigenetic regulation by long noncoding RNAs (125583)

Jeannie Lee

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 361

Epigenetic regulation by long noncoding RNAs (125583)

Jeannie Lee

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 362

Molecular Biology and Genetics of Cancer (126670)

David Livingston

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 362

Molecular Biology and Genetics of Cancer (126670)

David Livingston

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 366

Molecular Genetic Approaches to Human Disease Mechanisms (110421)

Marcy MacDonald

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 366

Molecular Genetic Approaches to Human Disease Mechanisms (110421)

Marcy MacDonald

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 368

Molecular Genetics of Aging and Neurodegenerative Disorders (128166)

Bruce Yankner

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 368

Molecular Genetics of Aging and Neurodegenerative Disorders (128166)

Bruce Yankner

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 369

Molecular Mechanisms of Plant Signal Transduction (115351)

Jen Sheen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 369

Molecular Mechanisms of Plant Signal Transduction (115351)

Jen Sheen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 370

Molecular Basis of Breast Cancer Initiation and Progression (115356)

Kornelia Polyak

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 370

Molecular Basis of Breast Cancer Initiation and Progression (115356)

Kornelia Polyak

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 371

Functional Genomics and Proteomics (115465)

Marc Vidal

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 371

Functional Genomics and Proteomics (115465)

Marc Vidal

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 372

Molecular Mechanisms of Aging and Age Related Diseases (128167)

David Sinclair

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 372

Molecular Mechanisms of Aging and Age Related Diseases (128167)

David Sinclair

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 373

Kidney Disease, Genetics, Cytoskeleton (117272)

Martin Pollak

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 373

Kidney Disease, Genetics, Cytoskeleton (117272)

Martin Pollak

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 374

Mechanisms underlying accurate meiotic chromosome segregation (120007)

Monica Colaiacovo

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 374

Mechanisms underlying accurate meiotic chromosome segregation (120007)

Monica Colaiacovo

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 376

Cell Cycle Control and Genomic Integrity (120008)

Stephen Elledge

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 376

Cell Cycle Control and Genomic Integrity (120008)

Stephen Elledge

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 377

Molecular Genetics of Chromosome Organization and Gene Expression (120009)

Mitzi Kuroda

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 377

Molecular Genetics of Chromosome Organization and Gene Expression (120009)

Mitzi Kuroda

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 378

Aging, Stress Defenses, and Developmental Gene Regulation in *C. elegans* (128168)

T. Blackwell

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 378

Aging, Stress Defenses, and Developmental Gene Regulation in *C. elegans* (128168)

T. Blackwell

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 379

Applying Population Genetics to Find Disease Genes (119612)

David Reich

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 379

Applying Population Genetics to Find Disease Genes (119612)

David Reich

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 380

Molecular Approaches to Metabolism and Energy Balance (120011)

Evan Rosen

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 380

Molecular Approaches to Metabolism and Energy Balance (120011)

Evan Rosen

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 382

Muscle Stem Cell Commitment and Differentiation (120180)

Emanuela Gussoni

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 382

Muscle Stem Cell Commitment and Differentiation (120180)

Emanuela Gussoni

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 383L

Genome structure and function, Neuropsychiatric genomics (204036)

Michael Talkowski

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 383L

Genome structure and function, Neuropsychiatric genomics (204036)

Michael Talkowski

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 385

Cell Cycle Proteins in Development and Cancer (128169)

Peter Sicinski

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 385

Cell Cycle Proteins in Development and Cancer (128169)

Peter Sicinski

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 387

Stem Cells and Developmental Biology (125403)

Chad Cowan

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 387

Stem Cells and Developmental Biology (125403)

Chad Cowan

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 388

Genetics of Neuronal Morphogenesis and Connectivity in C. Elegans (127400)

Maxwell Heiman

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 388

Genetics of Neuronal Morphogenesis and Connectivity in C. Elegans (127400)

Maxwell Heiman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 389

Epigenomics of Allele-Specific Expression (128170)

Alexander Gimelbrant

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 389

Epigenomics of Allele-Specific Expression (128170)

Alexander Gimelbrant

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 390QC

Advanced Experimental Methods: Experimental Approaches in Genetic Analysis (125362)

Fred Winston

2017 Spring (2 Credits)

Schedule: MTWRF 0830 AM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 8

A survey of major themes in genetics combined with exposure to various experimental techniques, technologies, and model systems. Combines lectures and hands-on laboratory activities emphasizing experimental methods, hypothesis generation and testing, and data analysis.

Course Notes:

This is an intensive January course. Priority will be given to first year graduate students. Students must first contact the faculty for enrollment approval prior to registration for the course. Meeting Dates/Times: Approximately 8:30 am-5:00 pm each day for 8days.

Class Notes:

January 3, 2017 to Jan 13, 2017

Recommended Prep:

Students must also enroll in, or have taken, Genetics 201.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 391

Human genome variation, schizophrenia, and the molecular biology of neurons and microglia (127407)

Steven McCarroll

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 391

Human genome variation, schizophrenia, and the molecular biology of neurons and microglia (127407)

Steven McCarroll

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 392

Self-Renewal and Cancer (108113)

David Langenau

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 392

Self-Renewal and Cancer (108113)

David Langenau

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 393

Genetic basis of skeletal development and evolution (128192)

Matthew Harris

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 393

Genetic basis of skeletal development and evolution (128192)

Matthew Harris

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Developmental & Regen Biology 330QC

Experimental Approaches to Developmental Biology (122586)

David Van Vactor

Ya-chieh Hsu

2017 Spring (2 Credits)

Schedule:

MTWRFS 1000 AM - 0959 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This laboratory course is designed to provide a survey of major topics and contemporary research in developmental and regenerative biology. Students will rotate in the laboratories of DRB faculty across the Harvard campuses and affiliated hospitals. Students engage with faculty and gain hands on experience in a variety of model systems, experimental techniques and research areas. Each day of the course will consist of a lecture followed by hands-on laboratory activities and interactive discussions.

Course Notes: This is an intensive January course. Open to first-year and second-year BBS students; Not repeatable for credit.

Class Notes: Dates: January 4, 2016 to January 19, 2016

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Subject: Medical Sciences

Medical Sciences 250AB

Human Functional Anatomy (120066)

Lee Gehrke

Trudy Van Houten

Breda Zimkus

Mohini Lutchman

Sabine Hildebrandt

2016 Fall (8 Credits)

Schedule:

MWF 0130 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

52

Lectures, detailed laboratory dissections, and prosections provide a thorough exploration of the gross structure and function of the human body. Fundamental principles of embryology and bioengineering promote analytical approaches to understanding the body's design.

Course Notes: Open to qualified graduate students with permission of the course director. The course has a minimum enrollment of 30. This course requires rental of a locker for two hundred and ten dollars. Offered jointly with the Medical School as HT010.

Class Notes: Please note that there will be an additional fee for microscope rental.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Medical Sciences 300QC

Raju Kucherlapati

Kristin White

2016 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

This course is a required course for all DMS students and all who receive support from NIH training grants. The goal of this course is to inform students about the appropriate conduct of research and the many ethical and social problems that they may encounter during their research career in graduate school. The course consists of three lectures for the entire class and five highly interactive sessions with a small group of fellow students moderated by a faculty member. Some of the issues that will be discussed in this course include appropriate methods of collecting laboratory data, interactions with members of the laboratory and the mentor and issues dealing with research misconduct.

Course Notes: All current G2 students must register for this course on their Fall Semester 2016 study cards. Specific enrollment instructions will be sent to current G2s and other eligible students in the upcoming weeks. Please contact Tatevik Holmgren (tatevik_holmgren@hms.harvard.edu) for enrollment inquiries. Restricted to GSAS graduate students on the Longwood campus.

Additional Course Attributes:

2017 Spring (2 Credits)

Schedule: MTWRF 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap: 50

The course is open to all Ph.D. students interested in learning about the range of career options available to biomedical Ph.Ds. The course includes talks, didactic sessions, workshops and networking events to promote interactions between students and invited speakers. There will be a special emphasis on helping students design their own career map using a tool created by RA Capital. After each session there will be a small networking reception for both the students and lecturers.

Students will learn about the many career paths available to people with advanced degrees in biomedical research including academia, biotech, patent law, science writing/publishing, consulting/business, education, and science policy/regulation.

A Ph.D. education provides students with fundamental knowledge about the principles and practice of the scientific method and promotes development of problem-solving skills in ways that are quite useful for many different professions. Students will have the opportunity to learn from experienced professionals

representing each of these paths, to learn about strategies for career development, curriculum enrichment, and networking opportunities that will make them competitive for their career of choice.

Course Notes: Students are required to attend all five sessions

Class Notes: Classes begin April 24 and end April 28, 2017

Internships (203031)

David Cardozo

David Golan

Catherine Dubreuil

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: 30

Internships are considered an integral part of a student's educational experience and should be viewed as a path toward a student's career development. As such, approved internships can receive academic credit via this course number.

Course Notes:

Ordinarily, each student will be limited to one internship during his/her PhD career. The internship must be discussed with the PI and DAC committee (or, program advisor, where applicable) prior to approval. Not all students may be eligible for internships, due to program requirements, academic standing or advisor input.

2016 Fall (4 Credits)

Schedule:

TR 0300 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Students participate in intensive small group discussions focused on the critical analysis of basic research papers from a wide range of fields including biochemistry, cell and developmental biology, genetics, and microbiology. Papers are discussed in terms of their background, significance, hypothesis, experimental methods, data quality, and interpretation of results. Students will be asked to propose future research directions, to generate new hypotheses and to design experiments aimed at testing them. For the midterm exam, the students will have to submit written critiques of recent papers from the literature, with an emphasis on proposing new experimental directions to test the models proposed in the papers.

Course Notes:

This course is required for first year BBS students, and is open only to BBS students.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biological & Biomedical Sci 301

Embedded Teaching Practicum (for Graduate Teaching Assistants) (127207)

Johanna Gutlerner

Ronald Heustis

2016 Fall (4 Credits)

Schedule:

MF 1245 PM - 0229 PM

W 0600 PM - 0759 PM

Instructor Permissions: None

Enrollment Cap: n/a

The Embedded Teaching Practicum aims to enhance the teaching experience for TAs and the learning experience for enrollees in the core BBS courses. While TAs serve different functions and experience teaching from different perspectives in each of our core courses, they collectively serve a vital role in helping with the delivery a contemporary, high quality and accessible education to HMS graduate students. The embedded teaching practicum provides practice-based training in facilitating a group discussion; professionalism in the classroom; curriculum design, course evaluation, assessment development and DBER; and preparation for teaching throughout and beyond time in graduate school. Teaching assistants are provided training and experience in the development of an early-career teaching philosophy.

Course Notes: TAs should contact Jason Heustis (Ronald_Heustis@hms.harvard.edu).

Critical Thinking and Research Proposal Writing (156089)

Monica Colaiacovo

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

A small group tutorial systematically guiding students in the writing of original, hypothesis-driven research proposals from initial topic selection through completion of a final draft.

Course Notes: This course is required for second year BBS students; others need permission of the instructor. Dates, times, and locations for all sessions (except for Session 1) will be determined by the faculty running the tutorial sessions. Students will be able to sign up for their specific groups on a first-come, first-served basis. The BBS office will coordinate this process. Group assignments will be posted on the course website.

Class Notes: First class will be held in NRB 350 on Wednesday September 8 from 2PM- 4PM

Recommended Prep: Check course website for downloadable material

Subject: Speech & Hearing Sciences

Speech & Hearing Sciences 200

Acoustics, Production and Perception of Speech (108212)

Satrajit Ghosh

Hideko Nakajima

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0159 PM

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Reviews the physical processes involved in the production and propagation of sound, and acoustics related to hearing. Particular attention to how the acoustics and mechanics of the speech and auditory system define what sounds we are capable of producing and how we sense sound. Introduces acoustic theory of speech production, digital speech processing, and neural mechanisms of speech production and perception. Exposes students to applications around acoustics, recognition, and speech disorders. Also introduces analysis of various types of sounds. Includes take-home laboratory assignments and discussions of classic papers.

Course Notes:

This course is taught in consort with HST.714J at the Massachusetts Institute of Technology. Classes will be held at MIT.

Recommended Prep:

Mathematical methods in science (Applied Mathematics 21a or Mathematics 21a) or equivalent. Rigid body mechanics (Physics 11A), or electrical circuits (Engineering Science 154) or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Speech & Hearing Sciences 201

Biology of the Inner Ear (108213)

M. Liberman

Stephane Maison

2016 Fall (4 Credits)

Schedule:

TR 0900 AM - 1029 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Normal biology, biophysics, physiology and morphology of the inner ear, its sensory innervation and efferent control systems, and the mechanisms underlying sensorineural hearing loss and balance disorders. Material is presented through lectures, laboratory exercises and discussions of the primary literature.

Recommended Prep:

Introductory neurobiology recommended

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Speech & Hearing Sciences 202

Clinical Aspects of Speech and Hearing (108217)

Konstantina Stankovic

2017 Spring (4 Credits)

Schedule:

MW 0500 PM - 0659 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Clinical approach to speech and hearing disorders as practiced by physicians, audiologists, speech clinicians, rehabilitation specialists, bioengineers. Includes observation of patient care in clinic and operating room, audiology/balance disorders experience, lectures and discussion groups.

Course Notes:

Offered jointly with HST 724 at MIT. Classes to be held at the Massachusetts Eye and Ear Infirmary (MEEI)

Recommended Prep:

Anatomy of Speech and Hearing, Acoustics of Speech and Hearing or permission of the course director

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Speech & Hearing Sciences 203

Anatomy of Speech and Hearing (108218)

Barbara Fullerton

James Heaton

James Kobler

2017 Spring (4 Credits)

Schedule:

MTWRF 1030 AM - 1129 AM

MTWRF 0930 AM - 0129 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course covers anatomy of the head and neck, with cadaver dissection, stressing structures important in speech and hearing. Lecture topics also include basic neuroanatomy, imaging, surgery, and cancer of head and neck.

Course Notes:

This an intensive January Course. Offered jointly with MIT as HST 718. Classes to be held at the Harvard Medical School campus (HMS)

Class Notes:

January Session; dates: January 3-26, 2017

Recommended Prep:

Introductory biology or equivalent and director permission, if not SHBT student.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Medieval Studies

Subject: Medieval Studies

Medieval Studies 117

English Legal History, 600-1600 (142694)

Elizabeth Kamali

2017 Spring (4 Credits)

Schedule:

RF 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the legal and constitutional history of England from the Anglo Saxons to the end of the Tudor period, essentially 600 – 1600, including the development of private (e.g., contract, torts, property) and public law (e.g., criminal and constitutional law). No previous background in English legal history is assumed.

Course Notes:

Offered concurrently at the Law School as Law 42200A-1.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Medieval Studies 250

At Cross Purposes: The Crusades in Material Culture (109230)

Evriddi Georganteli

2017 Spring (4 Credits)

Schedule:

T 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Crusading expeditions in the Holy Land, Spain and Eastern Europe from 1096 until the end of the Middle Ages shaped the political, socio-economic and cultural map of Europe and the Middle East. This course explores the multifaceted encounters between crusaders, Byzantines, Jews, Armenians and Muslims through the material traces they left behind: architecture, Byzantine objects dispersed across Western Europe, coins, sculptures, frescoes, and manuscripts from the East and the West.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Medieval Studies 280

Literary Theory and Criticism in the Middle Ages: Seminar (112657)

Jan Ziolkowski

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Examines literary theory and criticism inside the curriculum (trivium) and outside it (oral culture), manuscripts and commentary tradition, biblical exegesis, the arts of poetry, letter-writing, and preaching, Platonic and Aristotelian traditions, allegory/allegoresis, and sign theory. Writers examined include Augustine, Snorri, Dante, and Boccaccio.

Course Notes: Knowledge of Latin not required. Qualified undergraduates welcome.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Medieval Studies Interdisciplinary Workshop (123301)

Virginie Greene

2016 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Focuses on dissertations in progress and other research topics of mutual concern.

Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Enrollment is open to all graduate students.

Class Notes: Curricular component of the Medieval Studies Interdisciplinary Workshop; meets concurrently with workshop sessions each semester

Additional Course Attributes:

Attribute	Value(s)
Full Year Course	Indivisible Course
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Mind, Brain & Behavior 980A

Conscious States: Waking, Sleeping, and Dreaming (124113)

Robert Stickgold

Anna Schapiro

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Focuses on waking, sleeping, and dreaming as examples of conscious states in both humans and animals. Original papers and Antonio Damasio's book (The Feeling of What Happens form the background for discussions of waking, sleeping, and dreaming from the perspectives of neurology, physiology, psychology, and cognitive neurosciences. Discusses various approaches to understanding the functions of sleep and wake (consciousness) and reviews several theories on the topic.

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students

Mind, Brain & Behavior 980B Section: 1

Addiction, Choice, and Motivation (124115)

Gene Heyman

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Seeks a comprehensive understanding of addiction and why it has been such a contentious topic. Topics include but are not restricted to (1) the characteristics of addition as revealed in biographies, epidemiological studies, clinical research, laboratory experiments, and "natural experiments;" (2) the current "opioid epidemic," including an exploration of its possible economic correlates; (3) genetic influences on alcohol consumption; (4) drug-induced cognitive changes and their implications for drug use; (5) smoking and delay discounting; and (6) a choice-based analysis of addiction.

Class Notes: Preference to juniors in MBB tracks or MBB secondary field.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students

Mind, Brain & Behavior 980F

Creativity Research: Madmen, Geniuses, and Harvard Students (128215)

Shelley Carson

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Examines human creativity from three perspectives: a) empirical research sources, b) case studies of eminent creative achievers, and c) ourselves as creative subjects. Topics include the definition and measurement of creativity, the creative process, the neuroscience of creativity, the creative personality, the role of family life and culture in creativity, the relationship of creativity to IQ, gender differences, and the relationship of creativity to psychopathology.

Class Notes: Preference to juniors in MBB tracks or MBB secondary field.

Mind, Brain & Behavior 980G

The Origins and Evolution of Cognition: A Comparative Study of Human and Nonhuman Abilities (109872)

Irene Pepperberg

2017 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Most scientists agree cognition is widespread in nature and involves an organism processing information to solve problems (like avoiding predators, finding prey, attracting a mate, achieving shelter), and in humans higher-level reasoning and conceptualizing. Less clear are the origins and evolutionary basis of cognition-what evolutionary pressures were exerted that selected for such processing? Explores possible ways to answer this question with research in anthropology, neurobiology, philosophy, psychology, genetics, sociality, and other disciplines. Faculty from a variety of departments attend discussions in their areas of expertise and assist students in coming to their own conclusions.

Class Notes:

Offered jointed with Psychology as Psychology 980JC. Only one of MBB 980G or Psychology 980JC can be taken for credit.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students

Mind, Brain & Behavior 980H

What Disease Teaches about Cognition (109866)

Michael Alexander

William Milberg

2017 Spring (4 Credits)

Schedule:

T 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Seeks to reconcile the complicated and messy problems of patients with brain disease with the concise analysis of precisely defined cognitive functions in normal subjects. Students will learn to overlap cognitive functions on to the brain in disease - at the gross dissection and imaging levels - and to understand some of the complex interactions of individual cognitive operations in disease. Includes dissection of a human brain, mapping on to imaging, dissection of multi-dimensional clinical disorders into their component functional parts.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mind, Brain & Behavior 980K

Fighting Cancer with the Mind (156497)

Jamie Jacobs

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Using contemporary mind-body practices as context, examines evidence (or lack of evidence) linking psychological practices with cancer survival. We will (1) review theoretical foundations for these links including psychoanalysis, psychoneuroimmunology, and cognitive-behavioral therapy; (2) analyze legitimization of mind-body practices for cancer in popular media; (3) interview mind-body medicine practitioners; and (4) examine published scientific data. Students will choose one mind-body practice for in-depth study, analyzing its underlying theories, scientific evidence, and appeal to patients.

Additional Course Attributes:

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students

Mind, Brain & Behavior 980L

Dopamine (160758)

Barak Caine

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

26

A Parkinson's victim regains control of her body with L-dopa. A schizophrenic man paralyzed by fear and hallucinations is freed from a mental institution by clozapine. A meth addict lies, cheats, and steals, ending up emaciated and dead. Miracles and monstrosities, all related to a single molecule - dopamine. The overall goal of this tutorial is to focus on a single subject, a single chemical neurotransmitter, and remaining on that topic to proceed through three phases of study, as follows. First, to orient students to tools from multiple traditional disciplines: synaptic mechanisms of neurotransmission, neuropharmacology, behavioral pharmacology, neuroanatomy, and psychiatry. Second, to elicit interest and curiosity through examples of specific and important disease states: Parkinson's Disease, Schizophrenia, and Drug Addiction. Third, to gain an historical perspective up to and including a current and sophisticated consensus (i.e., review articles of recent years). Socratic debate will be prioritized in the classroom. The main discipline presented in this course is pharmacology, specifically, in vivo pharmacology and more specifically, behavioral pharmacology in humans. Pharmacology has traditionally been a graduate-level subject and rarely present in undergraduate curricula. That is a shame, because pharmacology has played and continues to play a key role in the history of neuroscience, in many applications of clinical medicine, and in the relationships among "mind, brain, and behavior." Moreover, students with an interest in medical sciences and careers will find extremely useful the tools and concepts of pharmacology, from elucidating mechanisms of action using basic research, to applications in the clinic using analgesic, antipsychotic, anti-Parkinsonian, stimulant, and anesthetic drugs. My philosophy of teaching is that 70% of the work can be completed in the classroom. I believe the rest can be completed in 1-2 hours per week outside of the classroom. Mostly to study your notes from class together with an outline prepared and distributed by Dr. Caine, and then to complete the semi-weekly writing assignment ("take-home" quizzes, open book, open note, short answer, six assignments in all).

Class Notes:

Not open to students who have taken Neurobiology 95hfh or Neurobiology 101hfb. Preference to juniors in MBB tracks or MBB

secondary field.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Mind, Brain & Behavior 980M

Functional Neuroimaging of Psychiatric Disorders: Insights into the Human Brain-Mind (160759)

David Silbersweig

Marie-Christine Nizzi

2017 Spring (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Functional brain imaging has revolutionized the study of systems-level behavioral neuroscience and psychiatric disorders, through the ability to localize and characterize distributed brain activity directly associated with perception, cognition, emotion and behavior in disorders where there are not gross brain lesions. This seminar will introduce students to translational neuroimaging methods at the interface of neuroscience, psychology and medicine. It will cover recent and ongoing advances in our understanding of fronto-limbic-subcortical brain circuitry across the range of psychiatric disorders (e.g. mood disorders, anxiety disorders, psychotic disorders, personality disorders, addictions). It will discuss new, emerging biological (as opposed to descriptive) taxonomies and conceptualizations of mental illness and its treatment. It will explore the implications of such knowledge for issues such as consciousness, meaning, free will, emotion, resilience, and religiosity. It will incorporate clinical observations, scientific data and readings, and examine future directions in brain-mind medicine.

Class Notes:

Preference to juniors in MBB tracks or MBB secondary field. Additional class meetings for site visits to be arranged.

Additional Course Attributes:

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students

Mind, Brain & Behavior 980N Section: 1

Neuroaesthetics (161267)

Nancy Etcoff

2016 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Focuses on neuroaesthetics, an emerging field offering a scientific perspective on the nature of art and the ways that art reveals human nature. Integrates findings from neuroscience, psychology, evolutionary biology, philosophy, and scholarship in the arts and humanities. Begins with a brief history of ideas on aesthetics, art, beauty, and pleasure. Considers the neural underpinnings of response to art in the brain's reward system and default network. Among the questions considered: Why are people drawn to art that is neither conventionally beautiful nor entirely pleasurable? Is art a vehicle for simulating experiences and understanding other minds? What does it mean to "enjoy" sad music or chills and thrills in response to fiction or film? Can art promote well-being? The course will range across the arts but will focus on fiction,

film, and music, and response to art rather than its creation.

Class Notes: Preference to juniors in MBB tracks or MBB secondary field.

Additional Course Attributes:

Attribute	Value(s)

Mind, Brain & Behavior 980O Section: 1

The Self: What Philosophy, Psychology, and Neuroscience Tell Us (204011)

Florian Engert

Marie-Christine Nizzi

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Gives a more integrative understanding to sense of self using philosophical theories, neuropsychological quantitative cognitive tests, and neurological conditions involving self disorders. Considers two primary dimensions for sense of self: the diachronic self as based on memory and the synchronic self grounded in the body. Topics include personal identity, mind/brain reduction, first vs. third person perspective, phenomenology of self, introspection, quantitative vs. qualitative methods. Provides appreciation of the advantage of bringing together cross-disciplinary perspectives (neurological, philosophical, and psychological) and research methods (introspection, philosophical intuitions, psychometric tests, behavioral tests, empirical research, and clinical approach).

Course Notes: Not open to students who have taken MBB 94z. Preference to juniors in MBB tracks or MBB secondary field.

Class Notes: Not open to students who have taken MBB 94z. Preference to juniors in MBB tracks and MBB secondary field.

Molecular and Cellular Biology

Subject: Molecular & Cellular Biology

Molecular & Cellular Biology 60

Cellular Biology and Molecular Medicine (110424)

Alexander Schier

Dominic Mao

Martin Samuels

2016 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course provides an introduction to the principles of molecular and cellular biology and their connections to biomedicine. We explore how medical syndromes provide insights into biological processes and how biological mechanisms underlie human disease and physiology. Topics range from DNA repair, protein folding and vesicle transport to metabolism, cell migration and cancer. Lectures focus on the experimental evidence for key concepts, and the weekly sections combine a discovery-based laboratory research project with discussions that emphasize problem solving and primary literature.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems.

Recommended Prep:

LS 1b recommended.

Requirements:

Prerequisite: LPS A OR LS 1a

Additional Course Attributes:

Attribute	Value(s)

Biochemistry and Molecular Medicine (110450)

Alain Viel

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

35

The course integrates an introduction to the structure of macromolecules and a biochemical approach to cellular function. Topics addressing protein function will include enzyme kinetics, the characterization of major metabolic pathways and their interconnection into tightly regulated networks, and the manipulation of enzymes and pathways with mutations or drugs. An exploration of simple cells (red blood cells) to more complex tissues (muscle and liver) is used as a framework to discuss the progression in metabolic complexity. Students will also develop problem solving and analytical skills that are more generally applicable to the life sciences.

Requirements:

Prerequisite: LS 1a OR LPS A OR LIFESCI 50A/B

The Cell Biology of Human Life in the World (110451)

Robert Lue

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course teaches fundamental concepts in cell biology in the context of individual life histories drawn from different parts of the world. Each life case focuses on key aspects of human development, growth, aging and disease while providing a nuanced view of the interplay between the life sciences, geography and culture. For example, a comparative discussion of aging in the United States and Japan is used to explore diet, cellular metabolism and its relationship to protein damage and turnover, while the Human Immunodeficiency Virus and AIDS in South Asia is used to explore mucosal immunity and the basis for estimating relative infection risk. Each case delves into the cell biology of major biological events across the life history of the human

Cell Biology Through the Microscope (109851)

Ethan Garner

Jeff W. Lichtman

2017 Spring (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

MCB 68 explores three fundamental fields of eukaryotic cell biology: chromosome segregation, cell motility, and neuroscience. Each topic is approached from a historic and technical perspective. Students will discover these systems as the scientific field did, learning how each successive advance in microscopy revealed new biological details. Students will come away with a theoretical and hands-on understanding of microscopy as well as a grasp of the biological findings each technology revealed.

Recommended Prep: An additional introductory course in biology (e.g. MCB 52 or MCB 60, SCRB 10, MCB 80) is recommended but not required.

Requirements: Prerequisite: LS 1a OR LPS A

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 81

Fundamentals of Neuroscience (159708)

David Cox

2016 Fall (4 Credits)

Schedule: WF 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

An intensive introduction to topics in neuroscience, ranging from the inner workings of neurons, to the function of small neuronal networks, to the function of brain systems that give rise to perception, thought, emotion, cognition and action. The course will emphasize student-directed learning and will follow an "inverted" structure: students will be expected to watch lecture videos and complete exercises outside of class, and classroom time will be primarily reserved for discussion and in-class exercises.

Course Notes: This course serves as a more rigorous alternative to MCB 80 and is primarily intended for students who intend to concentrate in neurobiology or who intend to pursue neurobiology as a secondary field. MCB 81 may not be taken for credit by students who have taken MCB 80.

Recommended Prep: A strong quantitative background is desirable but not strictly required.

Human Genetics (156009)

Craig Hunter

2016 Fall (4 Credits)

Schedule:

MW 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

Genomic information is accelerating the discovery and characterization of the molecular and cellular basis of human health and disease. This new lecture/discussion course will explore how knowledge from new technologies is used to advance our understanding of human biology. Topics will include personal genomics, understanding genome-wide associated studies, epigenetics, gene-environment interactions, and complex traits, the importance of model organisms to investigate molecular mechanisms, and the prospects for cancer genomics and gene/genome therapy. This lecture/discussion course will rely extensively on primary literature and contemporary review articles. Students will actively participate in class discussions and prepare four written summaries of assigned articles and two literature-based research projects (one in the middle of the term and one at the end of the term) that critically assess the scientific basis of popular news articles and consumer-targeted genomics information.

Requirements: Prerequisite: (LS 1a AND LS 1b) AND (MCB 60 OR (MCB 52 and MCB 54))

Molecular & Cellular Biology 111

Mathematics in Biology (117342)

Elena Rivas

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Develops the mathematics needed for quantitative understanding of biological phenomena including data analysis, simple models, and framing quantitative questions. Topics include probability, transforms and linear algebra, and dynamical systems, each motivated by current biological research.

Recommended Prep: Mathematics 19 or higher.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 112

Biological Data Analysis (203081)

Sean Eddy

Timothy Dunn

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

Biology has become a computational science, requiring analysis of large data sets from genomics, imaging, and other technologies. This course teaches computational methods in biological data analysis, using an empirical and experimental framework suited to the complexities of biological data, emphasizing computational control experiments. The course is primarily aimed at biologists learning computational methods, but is also suited for computational statistical scientists learning about biological data.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 115

Cellular Basis of Neuronal Function (114789)

Venkatesh Murthy

2016 Fall (4 Credits)

Schedule:

MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The essential function of a neuron is to process complex signals derived from the external world. To accomplish this function, neurons employ diverse mechanisms that respond to chemical and electrical signals with incredible sensitivity and plasticity. In this course, we will study these electrical, molecular, and cellular processes using biophysical and biological approaches. Specifically, we will explore topics on excitable membranes, neurotransmission, ion channels, dendritic integration, intracellular signaling, and synaptic plasticity in the context of various model circuits in the brain.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 120

Global Health Threats (156011)

*Richard Losick**Barry Bloom*

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

The multidisciplinary application of epidemiology, molecular biology and genetics, pathogenesis, drug discovery, immunology and vaccine development, and economic analysis to understanding and combating major threats to human health in developing countries. Emphasis will be on critical readings and scientific writing. Grades will be based on papers in which students will propose the application of multidisciplinary approaches to global health threats not covered in lecture.

Course Notes:

This course cannot be taken if LS 120 has already been taken. MCB 120 cannot be taken concurrently with LS 120.

Requirements:

Prerequisite: (LS 1a AND LS 1b) OR (LPS A AND one additional course from the following: Chemistry 27, Engineering 53, Life Sciences 2, MCB 60, MCB 52, MCB 54, OEB 10, OEB 53, or SCRB 10)

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 121

The Microbes (127813)

Karine Gibbs

2016 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This general microbiology course will focus on the genetics, cell biology, and physiology of microorganisms. The goal of this course is to give the students a broad overview of microbial physiology in the context of disease and environmental applications. The course will primarily consist of lectures with problem sets; we will also incorporate current and classical literature.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 125

Molecular Basis of Behavior (159655)

Catherine Dulac

2017 Spring (4 Credits)

Schedule:

TR 0130 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Modern molecular genetic approaches are teaching us a great deal on how the brain controls behaviors. This course will cover newly developed experimental strategies of molecular neuroscience, and how they have helped uncover the nature and identity of behavior circuit components. How genes and molecules affect behaviors will be investigated through key examples of mammalian behaviors with an emphasis on instinctive and social behaviors, their expression, development, and associated mental disorders.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 131

Computational Neuroscience (117859)

Haim Sompolinsky

2017 Spring (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Follows trends in modern brain theory, focusing on local neuronal circuits as basic computational modules. Explores the relation between network architecture, dynamics, and function. Introduces tools from information theory, statistical inference, and the learning theory for the study of experience-dependent neural codes. Specific topics: computational principles of early sensory systems; adaptation and gain control in vision, dynamics of recurrent networks; feature selectivity in cortical circuits; memory; learning and synaptic plasticity; noise and chaos in neuronal systems.

Recommended Prep:

Basic knowledge of multivariate calculus, differential equations, linear algebra, and elementary probability theory.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 145

Neurobiology of Perception and Decision Making (123271)

Naoshige Uchida

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

One of the current goals of neuroscience is to understand neuronal circuits underlying perception and behavior. Recent advances in neuroscience have allowed us to glimpse neuronal processes that link perception and decision making. How is sensory information processed in the brain? How does an animal choose its action? How does an animal learn from ever-changing environments and adjust their behavior? The course will examine neurophysiological studies in perception and decision-making.

Requirements:

Prerequisite: MCB 80

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Molecular & Cellular Biology 146

Experience-Based Brain Development: Causes and Consequences (123272)

Takao Hensch

2017 Spring (4 Credits)

Schedule:

TR 0200 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

At no time in life does the surrounding environment so potently shape brain function as in infancy and early childhood. This course integrates molecular/cellular biology with systems neuroscience to explore biological mechanisms underlying critical periods in brain development. Understanding how neuronal circuits are sculpted by experience will motivate further consideration of the social impact on therapy, education, policy, and ethics.

Requirements:

Prerequisite: LPS A OR LS 1a AND MCB 80

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Molecular & Cellular Biology 148

The Neurobiology of Pain (159880)

Ryan W. Draft

2017 Spring (4 Credits)

Schedule:

TR 0200 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course will explore the neurobiological systems and mechanisms underlying both acute and chronic pain. Topics will include nociceptive/sensory systems, molecular basis and modulation of pain, neuroanatomy of peripheral and central pain circuits, pain pathologies, pharmacological and non

pharmacological treatments. The emphasis will be on understanding basic neurobiological concepts underlying pain systems and reading/discussing the primary scientific research in the field.

Requirements:

Prerequisite: MCB 80

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 169

Molecular and Cellular Immunology (111720)

Shiv Pillai

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The immune system is frontier at which molecular biology, cell biology, and genetics intersect with the pathogenesis of disease. The course examines in depth the cellular and molecular mechanisms involved in the development and function of the immune system and also analyzes the immunological basis of human disease including AIDS and other infectious diseases, autoimmune disorders, allergic disorders, primary immunodeficiency syndromes, transplantation, and cancer.

Class Notes:

Tu., Th., 10-11:30, and a 90-minute section to be arranged.

Recommended Prep:

Genetics and cell biology strongly recommended.

Requirements:

Prerequisite: LPS A OR LS 1a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science

Molecular & Cellular Biology 170

Brain Invaders: Building and Breaking Barriers in the Nervous System (109636)

Laura M. Magnotti

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

The brain has evolved a unique but very effective system to protect itself from invaders. In this course, we will explore the specific defenses that the nervous system uses to protect itself. We will also examine how

some pathogens evade or breach those defenses and the impact of those invasions. Finally, we will explore how scientists have been able to translate their understanding of these pathogenic mechanisms into technologies for research and therapeutic applications.

Requirements: Prerequisite: (LPS A OR LS1a) AND (MCB 60 OR MCB 80 OR MCB 81)

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 176

Biochemistry of Membranes (112742)

Guido Guidotti

2016 Fall (4 Credits)

Schedule: MW 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

A course on the properties of biological membranes, essential elements for cell individuality, communication between cells, and energy transduction. Topics include: membrane structure; membrane protein synthesis, insertion in the bilayer and targeting; transporters, pumps and channels; electron transport, H⁺ gradients and ATP synthesis; membrane receptors, G proteins and signal transduction; membrane fusion.

Class Notes:

M., W., 2–4, M., at 4

Recommended Prep: MCB 60 or MCB 52 and MCB 54 are recommended but not required.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 178

Biochemistry of Protein Complexes (128150)

Guido Guidotti

2017 Spring (4 Credits)

Schedule: MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

A course on the properties of protein complexes that serve as supports, machines and motors. Topics include : hemoglobin, actin filaments, myosin function, microtubules, kinesin, metabolon, photosynthesis, rotary motors, nuclear pores and transport, proteasome. Lecture on Monday is followed by student presentations on Wednesday. The course involves reading two research papers per week, and writing a research proposal.

Recommended Prep: Chemistry 27 and MCB 60 or MCB 54 are recommended, but not required.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 186

Sleep and Circadian Clocks: from Biology to Public Health (112001)

Charles Czeisler

Frank Scheer

Shadab Rahman

2017 Spring (4 Credits)

Schedule:

W 0230 PM - 0529 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The impact of the brain's circadian clock on sleep becomes evident when we travel across time zones or shift our sleep on weekends. How does this clock work? How does light from a tablet or smartphone affect our biology? What is the best time for sleep? What about naps? This course will explore the neurobiology of the brain's circadian clock that regulates the timing and structure of sleep, its interaction with the periodic environment, and the consequences of circadian disruption in our 24/7 society on health, performance and safety.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 188

Chromosomes (114864)

Nancy Kleckner

2017 Spring (4 Credits)

Schedule:

TR 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Chromosome morphogenesis in prokaryotic and eukaryotic organisms. Topics will include chromosome structure, interactions between chromosomes (sisters and homologs), DNA recombination and repair, topoisomerases, transposable elements and site-specific recombination, epigenetic inheritance. Genetic, cytological, and biochemical approaches will be integrated. Lecture, reading, and discussion of classical and current literature and consideration of future experimental directions.

Requirements:

Prerequisite: LS 1b AND (MCB 60 OR (MCB 52 and MCB 54))

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 195

Foundations of Systems Biology and Biological Engineering (123837)

Philippe Cluzel

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course builds an understanding of design principles in biology. We will ask why biological circuits are built the way they are and answer using mathematical models. Topics: elementary circuits in biological networks, robustness, pattern-formation in embryos, error-correction, and evolutionary optimization.

Course Notes:

Students from physics, engineering and other disciplines are also welcome.

Recommended Prep:

Familiarity with mathematics at the level of 19/20 is strongly recommended.

Requirements:

Prerequisite: (LPS A OR LS 1a) AND (LS 1b) AND (MCB 60 OR (MCB 52 AND MCB 54))

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 198

Advanced Mathematical Techniques for Modern Biology (127011)

Sharad Ramanathan

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

How do we find biologically meaningful patterns in a large amount of data? How do animals learn to use patterns in the environment to infer information despite the ignorance of the underlying laws? The course will introduce Bayesian analysis, maximum entropy principles, hidden markov models and pattern theory in order to study DNA sequence, gene expression and neural spike train data. The relevant biological background will be covered in depth.

Recommended Prep:

A strong background in calculus, linear algebra, fourier analysis, complex analysis at the advanced undergraduate level and an introductory knowledge of probability theory is required. Knowledge of statistical mechanics and comfort with programming will be useful.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 294

Interesting Questions in Physical Biology (122422)

Nancy Kleckner

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Physical biology can be defined as a discipline that seeks to understand biological processes through the lens of physics and engineering. Faculty and students will unite to review current research with the aim of identifying and pondering interesting emerging questions in this area. Combination of lecture and discussion format. Comprises a series of two-week modules, most of which are given by a one or a pair of

faculty drawn from MCB, Physics and SEAS.

Course Notes: Intended primarily for first year graduate students in the EPB PhD track of the MCO program but available to other graduate students and advanced undergraduates as space permits.

Additional Course Attributes:

Molecular & Cellular Biology 350

Scientific Integrity (156950)

Richard Losick

Polina Kehayova

2016 Fall (2 Credits)

Schedule: MW 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

MCB 350 is a discussion forum on scientific integrity using case studies to examine basic ethical and regulatory requirements for conducting research, and fulfills the National Institutes of Health (NIH) and National Science Foundation (NSF) requirements for formal Responsible Conduct of Research (RCR) instruction. Students are required to complete a pre-course assignment, attend all lectures including the final lecture in February, participate in class discussions, and complete a final course evaluation. A certificate will be issued upon successful completion of the course.

Course Notes: According to NIH Guidelines, students are required to take a Scientific Integrity Refresher Course every four years (*MCB 351).

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Molecular & Cellular Biology 351

Scientific Integrity Refresher (156951)

Sam Kunes

2017 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 30

MCB 351 is a refresher course in the Responsible Conduct of Research which must be completed by graduate students in the MCO PhD program every 4 years, and fulfills the National Institutes of Health (NIH) and National Science Foundation (NSF) requirements for formal Responsible Conduct of Research (RCR) instruction.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Molecular & Cellular Biology 352

Microscopy (156952)

Jeff W. Lichtman

Douglas Richardson

2017 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course presents the fundamental concepts that underlie modern light microscopy in a rigorous but non-mathematical way for biological applications. The students will learn about the four major frameworks for light (ray optics, wave optics, electromagnetism, and quantum optics). The ways lenses work, the theory of resolution, and the optical design of the compound microscope will be described. The course will also describe the photo-physical principles that underlie fluorescence and genetically encoded fluorescent proteins, and light detector and imaging strategies. Scanning (confocal and 2P), light sheet and super-resolution microcopies will also be described. We will end with a tour of the Harvard Center of Biological Imaging.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Molecular & Cellular Biology 353

Building Your Own Microscope (160485)

Venkatesh Murthy

2017 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Microscopes of various sorts are used by most biologists, who typically buy these off the shelf. With a little knowledge, however, most biologists can build their own microscopes to do many of the things that the commercial ones do. In this quarter course, you will learn to build an epifluorescence microscope and to acquire images using a computer.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Molecular & Cellular Biology 354

Introduction to Model Organisms (160493)

Craig Hunter

2016 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Model organisms are embedded in our scientific culture, from text books on the discovery of genetic material, to mod-encode genome projects. This quarter course is a means to formally introduce an enormously successful experimental scientific approach that has revealed uncountable new biological mechanisms for the last 70 years. Students in this class will engage in hands-on learning exercises to become familiar with commonly used model organisms. They will learn about the genesis of each model system and compare and contrast the features and available experimental approaches that govern whether a particular organism is an appropriate model for different biological phenomena.

Course Notes: Limited to first year graduate students in the MCO Ph.D. program.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Molecular & Cellular Biology 355

Visualizing, Analyzing and Presenting Macromolecular Structures with PyMOL (160523)

Rachelle Gaudet

2017 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

PyMOL is one of the most popular software programs to display and explore high-resolution structures of macromolecules. It is readily used to create publication-quality figures, and movies and animations of structural information. In this course, you will learn the basics of PyMOL and be able to display, explore and present three-dimensional structures of macromolecules. With this basic training, you will be able to generate high-quality images and simple movies, and have the resources to learn more on your own to generate more complex displays.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 356

Practical Introduction to Robotics (160558)

Benjamin de Bivort

2017 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 20

Automation and robotics have revolutionized molecular biology. Liquid handling robots are already facilitating the "omics" revolution in genome sequencing, proteomics and high throughput screening. Now, neuroscience and microscopy are adopting robotics for throughput and experiments requiring precision and repeatability, like targeted microelectrode placement. In this nano course, students will learn 1) basic principles of practical robotics including the interaction of software and hardware, 2) the roles of drivers, control cards, microcontrollers and sensor electronics, and 3) practical engineering skills including basic soldering, measurement of voltage, conductivity, polarity and resistance. Students will explore the challenges of translating conceptual operational algorithms into physical implementations.

Course Notes: To enroll, students must be apart of a Life Science Graduate Program, or permission of the instructor.

Subject: Life Sciences

Life Sciences 1A

An Integrated Introduction to the Life Sciences: Chemistry, Molecular Biology, and Cell Biology (121189)

Robert Lue

Richard Losick

Susan Mango

Daniel Kahne

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What are the fundamental features of living systems? What are the molecules imparting them and how do their chemical properties explain their biological roles? The answers form a basis for understanding the molecules of life, the cell, diseases, and medicines. In contrast with traditional presentations of relevant scientific disciplines in separate courses, we take an integrated approach, presenting chemistry, molecular biology, biochemistry, and cell biology framed within central problems such as the biology of HIV and cancer.

Course Notes:

For more information about the assignment process, please see the course website in the fall. This course, in combination with Life Sciences 1b, constitutes an integrated introduction to the Life Sciences. This course, when taken for a letter grade, meets the General Education requirement in Science of Living Systems.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: General Education	Science of Living Systems
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Core Curriculum	Science A
FAS: Course Level	Primarily for Undergraduate Students

Life Sciences 1B

An Integrated Introduction to the Life Sciences: Genetics, Genomics, and Evolution (121191)

Hopi Hoekstra

Kevin Eggan

Pardis Sabeti

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How are observable characteristics of organisms influenced by genetics? How do genomes change over

time to produce the differences we see among species? This course takes an integrated approach, showing how genetics and evolution are intimately related, together explaining the patterns of genetic variation we see in nature, and how genomics can be used to analyze variation. In covering Mendelian genetics, quantitative genetics, and population genetics, this course will emphasize developments involving our own species.

Course Notes: This course, in combination with Life Sciences 1a, constitutes an integrated introduction to the Life Sciences. This course, when taken for a letter grade, meets the General Education requirement in Science of Living Systems.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Science of Living Systems

Benjamin de Bivort

Erel Levine

Sean Eddy

2016 Fall (8 Credits)

Schedule: MTWRF 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: 25

This is an intensive two-semester, double course that introduces the natural sciences as an integrated whole to students who have a very strong interest in science. Our goal is to teach students how to solve scientific problems by drawing methods and concepts from biology, chemistry, physics, and mathematics. The course uses examples from biology as an integrating theme, principles from physics and mathematics to reduce complex problems to simpler forms, and computer simulation to allow students to develop their intuition about the behavior of the dynamical systems that control the physical and biological universe. The course includes bootcamps to introduce students to biological experiments and the computer language, Matlab. Each semester will include a project lab, in which students will work in small teams to do original research on unsolved biological problems.

Course Notes: Life Sciences 50a and 50b when taken together for a letter grade fulfill the General Education requirements of Science of Living Systems, Science of the Physical Universe, and Empirical and Mathematical Reasoning. LS 50a taken alone fulfills two of these requirements.

Class Notes: Lab is scheduled for Tuesdays OR Thursdays

Additional Course Attributes:

Life Sciences 100

Experimental Research in the Life Sciences (119061)

Alain Viel

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

A laboratory course that immerses students in a dynamic project-based research environment. Participate in experimental projects directly linked with ongoing faculty research. Students select a project from the following research tracks: neurobiology, microbial sciences, cell biology, and synthetic biology. New projects, including some in other research fields, are offered every term. In a highly collaborative atmosphere, students form a fully-functional and diverse research group based on the sharing of ideas and progress reports between projects. The spring microbiology project is part of the "genomes to Biomes" series.

Course Notes:

Location of the first meeting will be announced on the course website. Open to freshmen, sophomores, juniors, and seniors, regardless of concentration, and suitable for students either with or without extensive laboratory experience. The course may only be repeated once and the second enrollment must be approved by the instructor.

Recommended Prep:

Students interested in a neurobiology project will need MCB 80 or permission of the instructor. Please also note that students cannot take MCB 100 and LS 100 at the same time.

Requirements:

Prerequisite: LPS A OR LS 1a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Life Sciences 120

Global Health Threats (127010)

Richard Losick

Barry Bloom

2017 Spring (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap: 50

The multidisciplinary application of epidemiology, molecular biology and genetics, pathogenesis, drug discovery, immunology and vaccine development, and economic analysis to understanding and combating major threats to human health in developing countries. Emphasis will be on critical readings and scientific writing. Grades will be based on papers in which students will propose the application of multidisciplinary approaches to global health threats not covered in lecture.

Course Notes: This course cannot be taken if MCB 120 has already been taken. LS 120 cannot be taken concurrently with MCB 120.

Requirements: Prerequisite: LS 1a and LS 1b, or LPS A and one additional course from the following: Chemistry 27, Engineering 53, Life Sciences 2, MCB 60, MCB 52, MCB 54, OEB 10, OEB 53, or SCRB 10.

Music 1

1000 Years of Listening (156060)

Emily Dolan

2017 Spring (4 Credits)

Schedule: MW 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: 145

This course aims to introduce you to a variety of music, and a range of ways of thinking, talking and writing about music. The majority of music dealt with will be drawn from the so-called "Classical" repertory, from the medieval period to the present day, including Monteverdi, Bach, Handel, Mozart, Beethoven, Schumann, and Schoenberg. Class will explore the technical workings of music and together we will build a vocabulary for analyzing music and articulating a response to it; we will explore music as a cultural phenomenon. By the end of class, students will be equipped to embark on a lifetime of informed listening.

Course Notes: May not be taken for concentration credit. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Additional Course Attributes:

Foundations of Tonal Music I (118594)

Osnat Netzer

2017 Spring (4 Credits)

Schedule: W 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 120

Seeks to develop a greater understanding of music, musical analysis, and critical listening. We will study some of the organizing principles of musical works (from a range of styles) by means of composition projects, score analysis, and aural skills. While reading knowledge of simple musical notation is helpful, there will be at least one section for students with no previous experience.

Course Notes: Open to all students. May not be counted for concentration credit. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Introduction to Composition (111353)

Felipe De Souza Lara

2016 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Open to students with little or no prior experience in composition. Explores ways of thinking about and organizing basic compositional elements such as melody, harmony, rhythm and instrumental color, as well as developing skills of score preparation and analytical listening. The primary focus of the course is a series of short compositional exercises, culminating in a somewhat longer final project. Workshop performances of students' music take place throughout the term.

Course Notes: May not be counted for concentration credit.

Recommended Prep: Some prior experience in music theory or permission of the instructor.

This is an experiential learning course. The ensemble gives several concerts each year, sometimes joining with the chorus to perform large-scale works. Students are required to attend all rehearsals and certain special Saturday "retreats" announced in advance. Students are expected to practice the music outside the rehearsal time. Grades are based on attendance and participation.

Course Notes: The course is graded SAT/UNSAT based on attendance and participation. This course may be taken repeatedly, but to receive credit the course must be taken in the Fall and Spring semesters consecutively. A maximum of four semesters (two years) may be counted as credit towards the degree.

Class Notes: Auditions for the HRO are August 28, 2:00 pm - 8:00 pm and August 30, 10:00 am - 6:00 pm. Please see HRO website for details.

Recommended Prep: Two contrasting movements or pieces chosen by candidate.

Opera (204418)

Carolyn Abbate

2017 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This new lecture course will explore opera, a theatrical genre with a 400-year history, which is still a living and vibrant art. Opera has always been multimedia: Its marvelous singing, and its music, is shaped by drama, by characters, visual spectacles in staging, and theater architecture and machinery. Operatic performance, by engaging and even overwhelming multiple senses, challenges us to question intellectual truisms like critical detachment, sober analysis. Opera has always inspired intense passion in audiences. For some, it is the most beautiful and moving musical genre that has ever existed. For others, it can involve tedium and acoustic strangeness. Opera's special acoustic is defined by its singers, who are often called "gods" ("divas" and "divos"), with voices that are the most powerful unamplified human sonic force in existence. We will look at opera as it evolved over time from its origins in Italy into a global phenomenon, considering works by famous composers (including Mozart, Wagner, and Verdi) as well as obscure corners and byways. Students will be experiencing live opera performances (in class and on field trips), and opera as technological art in recordings, film, and other media. No previous music courses, no expertise in music theory or ability to read music, are required.

Course Notes:

No previous music courses, no expertise in music theory or ability to read music, are required. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Fundamentals of Improvisation & Composition, Dance (107426)

Jill Johnson

2016 Fall (4 Credits)

Schedule: WF 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

A dance course that explores fundamental skills of improvisation and composition. Using wide-ranging musical styles, experimentation, problem solving, and an equal curiosity about both success and failure — this course explores the processes of analytical and intuitive decision making in the dancing body. Students will learn a series of specific physical tasks, tools, and systems taught through intensive exercises, guided improvisations and rigorous real-time composition. Physical research and written work in the course connect dance to architecture, the visual arts, mathematics, philosophy, science, theater, and literature in ways which link the mind and body to innovation.

Course Notes: Minimal dance experience required.

Foundations of Modern Jazz: Topics (138072)

Yosvany Terry

2017 Spring (4 Credits)

Schedule: T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Art Blakey's Jazz Messengers. The Jazz Messengers were more than just a musical group; they were one of the greatest institutions in modern jazz, paving the way for several generations of musicians to develop new and original approaches to composition and improvisation. This course will introduce students to the Jazz Messengers and the concept of hard bop created by artists searching for new musical expressions, as a necessary evolutionary step after Be-Bop in modern Jazz. Students will become familiar with the Jazz Messengers' repertoire, gaining insight and practical experience by first playing and memorizing their songs, and, afterwards, transcribing and studying the recordings of key compositions. Additionally, students will gain proficiency in performing compositions by some of the Messengers' most prolific alumnae, including pianist Horace Silver, saxophonist Wayne Shorter, pianist Cedar Walton, saxophonist Benny Golson, and trumpeter Freddie Hubbard. Each week the students will make presentations on the selected class readings which are intended to deepen their understanding of the music by providing the social context in which this music was developed. Finally, students will select, rehearse, and perform some of the Jazz Messenger compositions in an end-of-semester concert.

Foundations of Modern Jazz: Topics (138072)

Yosvany Terry

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Through coursework, students will deepen their knowledge, understanding and appreciation of important rhythms, melodic patterns, and phrase models, but the fundamental goal is to enable them to feel these elements before and apart from their interpretation of written music. This attention to improvisation will develop the student's creative abilities and introduce them to methods of music composition. Exercises that involve the clapping and singing of specific rhythmic patterns will help students approach sight-reading in an intuitive and responsive way, because strong ear-training and musicianship skills are a key requirements for successful interpretations of and improvisations on the score. By examining instructional DVDs, historical and contemporary recordings, scholarly books and articles, and through the analysis and discussion of class material, the class will collectively develop a more thorough understanding of the principles guiding modern jazz musicians and composers. Students will be expected to contemplate and practice on their instruments the repertoire given to them between class meetings. The West African Ensemble's repertoire consists primarily of original compositions by Lionel Loueke (Benin), Avishai Cohen (Israel), Dafnis Prieto (Cuba), Edward Simons (Venezuela), and Yosvany Terry (Cuba). Other composers will be explored in accordance with the time limits and the direction of each class.

Topic: West African Musical Tradition

Class Notes:

This course is designed to familiarize students with the key structural elements in West African music and how to recognize them in modern jazz. Students will be given tools that will allow them to demonstrate these key concepts in both their improvisational work and assigned compositional exercises.

This course is an intensive, research-oriented workshop environment for advanced improviser-composers. Open to both undergraduate and graduate students. Through critical listening, readings, term papers, and collaborative musical projects, students will engage with a range of contemporary musical perspectives and practices. Graduate students are welcome.

Course Notes:

Between August 1 and 24, each student should submit a recording, up to fifteen minutes in of your performance, solo or with a group, of your own compositions or those of others, and featuring solo or group improvisation. Please provide details about the music -- instrumentation, repertoire, personnel, date of recording, and any other relevant descriptive information. Audio should be submitted via sharing links to YouTube, Soundcloud, Dropbox, or similar. Submit links to vijayiyer@fas.harvard.edu. Please do not email files. No applications will be accepted earlier than August 1 or later than August 24.

Class Notes:

Shostavovich and the Soviet Union. Through study of the unique life and work of Dmitri Shostakovich, the course will focus on the tragic relationship between ideology and creativity, between totalitarian power, intellectuals and artists in Soviet Union: the victims, the suffering, the "dissenters". Students will approach one of the most tragic pages of European history through one of the most problematic and compelling geniuses of twentieth century. The class will discuss how this tragedy sheds light on a variety of social and political environments.

Performers (instrumentalists and singers) will form chamber ensembles and perform in a final concert. Possible repertoire includes quartets nr. 3, 8, 15, Piano Quintet, Piano Trio, Jewish Folk Songs, Blok songs.

Non-performers will be assigned research on specific cultural and historical topics relating to Soviet literature and music.

Musicians of the Boston Symphony Orchestra with special ties to Shostakovich will be invited to coach the chamber groups of the class. Boston Symphony Music Director Andris Nelsons will be the distinguished guest in a conversation/masterclass on Shostakovich on November 16th in the Music Department

Topic: Shostakovich & Soviet Union

Course Notes: This class is open to performers (instrumentalists and vocalists) and non-performers.

Class Notes: Additional section required. Time will either be Tuesdays 6:30 - 8:30 pm or Thursdays 6:30 - 8:30 pm

Daniel Chong

Kee-Hyun Kim

Ying Xue

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Through auditions, students will be divided into chamber music ensembles by the Parker Quartet, and have weekly coachings with members of the Parker Quartet and pianist Katherine Chi. Students will be expected to rehearse between each coaching, and to participate in Performance Classes throughout the semester. There will be final jury evaluations prior to the final class performances, to be held sometime during Reading Period, and all students are required to be available. Students who do not meet the requirements in Notes below may take the course for PASS/FAIL credit. Pre-formed ensembles are encouraged, and will be accommodated as much as possible. No duos will be allowed. Audition dates will be announced.

Course Notes: This course is only offered for a letter grade when students are involved in one or more of the following: music concentrator, enrolled in a music department course in the same semester, a member of a faculty-led ensemble in the same semester. Pre-formed ensembles are encouraged and will be accommodated as much as possible.

Class Notes: Auditions for Spring of 2017 will be online video submissions only. These videos are not expected to be professional quality. Think of this as the equivalent of performing a live audition in front of your smartphone or tablet.

Audition Requirements:

A video recording needs to be made and submitted between Monday, January 2 and Thursday, January 26. In order for the recording to be valid, you must verbally state the date and time in your video recording before you perform. The recording is to be submitted as a live recording with no editing allowed and should be approximately 7 minutes of music that includes two works of contrasting styles. The live video along with a questionnaire must be submitted via Google Docs to thefourparkers@gmail.com. The questionnaire, which should be copied and pasted, can be found on the 189R Canvas home page: <https://canvas.harvard.edu/courses/25111> under Audition Info.

Students who enrolled in 189R for the fall 2016 semester, or are currently in the NEC/Harvard dual program need not audition. Any students who have enrolled in the course in past school years need to re-audition. Students intending to enroll in both the HRO and Music 189 must audition for each course separately. Students who do not meet the requirements below may take the course for PASS/FAIL credit, which must be done by petition after the first week of class. This course is only offered for a letter grade when students are involved in one or more of the following: music concentrator, enrolled in a music department course in the same semester, a member of a faculty-led ensemble in the same semester, a student of the NEC/Harvard dual program. Pre-formed ensembles are encouraged and will be accommodated as much as possible.

Understanding Beethoven. This undergraduate seminar, co-taught by two professors, combines historical, cultural, and musicological approaches so as to develop a deepened understanding and appreciation of Beethoven's music, assessing its intrinsic character while also placing it in German cultural, intellectual, and political history. The course does not require extensive musicological knowledge, but an understanding of basic music theory and music history will be presumed. Students will be required to attend performances by the Parker String Quartet, and there will be at least one class-trip to a performance at the Boston Symphony Orchestra. The course counts for credit in either history or music.

Course Notes: For spring term 2017, Music 192R is the same as History 13K and German 134. Students may take only one of the three classes for credit.

Performing Musical Difference: Case Studies from the Silk Road Project: This course, a collaborative venture in the classroom with musicians of the Harvard-affiliated Silk Road Ensemble, will explore the social processes and ethical challenges of intercultural musical exchange, composition, and performance. For fifteen-years, the Silk Road Project and its signature ensemble have sought to enhance intercultural communication through their music making, bringing together performers and composers from across the world to perform together. With an articulated humanistic goal of creating "unexpected connections, collaborations, and communities in pursuit of meaningful change," the Silk Road Project provides a rich laboratory for appraising how dimensions of difference have been conveyed through artistic performance as well as the many issues that such initiatives raise. Critical and reflexive theoretical approaches from ethnomusicology, anthropology, and performance studies, among other disciplines, will be used to frame selected case studies from the Silk Road Ensemble experience. Class sessions will include dialogue with musicians from the Silk Road Ensemble who will serve as interlocutors and provide insider perspectives of the ensemble's work in various domains. Each student will pursue a term project (with the possibility of collaboration with classmates) and present a discussion of it in class, focusing on ethnographic and /or archival materials that shed light on musical difference as daily practice; undertake a focused project in an aspect of social engagement and/or community service; or collaborate with an intercultural group of colleagues in a performance.

Country Music Studies. In current popular media, country music is often associated with working-class identity, rural idealization, hetero-normative gender roles, and various other ideologically loaded biases. However, a closer look at the genre—and scholarship surrounding it—often reveal a more complex picture. In this course, we will read and critique recent scholarship, particularly attending to how country music has served as a compelling site for addressing questions about authenticity, class, commercialization, and narrative tropes. In addition to reading widely in country music studies and evaluating ways in which the field has changed over time, we will also see how scholarship can affirm or resist common assumptions about country music and its community of musicians, audiences, and commercial media. While this class will not provide a survey of country music, students will be exposed to a variety of periods and styles within the genre from the context of scholarship connected to it.

Course Notes: Students from other departments are welcome. While this class will engage with some music-analytical materials, music-reading skills are not required for the course.

Rhythmic thinking and practice in Africa and Asia. Theories of rhythmic and other musical processes developed under very different circumstances in Africa and the high cultures of West, South and Central Asia. In this course we will consider both the theories themselves and the kinds of push-back they've encountered by "native" and Western scholars and musicians. The course will involve significant engagement with particular repertoires: careful and creative listening to examples in each local tradition. We will attempt to use both the writings about particular musical traditions and the lessons we learn by comparative listening to make our ears fresh and receptive to multiple ways of hearing.

Course Notes: Open to undergraduates with permission of instructor. May be taken by students from other departments by permission of instructor.

Technomusicology and Popular Music Studies. This seminar explores the possibilities of doing popular music studies through the forms of popular music itself. In addition to querying the notion of the "popular" and surveying key texts in the scholarly literature, from the canonical to the experimental, we will grapple with the central issues of pop music studies by producing audio/visual works that themselves tell musicological stories. Using audio-production software (e.g., Ableton Live) students will explore new techniques for publication and pedagogy by composing a series of études, or studies in particular techno-historical media forms (including mashups, DJ mixes, video montages, and podcasts), which audibly address the interplay between popular music and technology since the dawn of sound reproduction. No prior experience with the software is required, but a willingness to work through the learning curve will be necessary.

Course Notes: Open to undergraduates with permission of instructor.

Tristan. In September 2016, the Metropolitan Opera will premiere a new production of Richard Wagner's Tristan und Isolde. This seminar will have Tristan as its gravitational center, with multiple secondary topics in orbit around that point. Fundamentals: we'll read Gottfried von Strassburg's medieval narrative (Wagner's main source), and work close-up with Wagner's opera. To this end, participants are asked to acquire and have on hand three music-technological artifacts: the full score of the opera (Dover), the C.F. Peters vocal score, and the 1966 DGG recording, a live performance from Bayreuth conducted by Karl Böhm. We will consider historical issues; above all questions about the opera's extraordinary sound, its origins in nineteenth-century metamorphoses in instrumentation, and why Wagner called for novel instruments for Tristan that were never actually invented. We will also look at Tristan's acoustic genealogy in terms of contemporary techniques in European theatrical production, mechanisms like Tanagra, a miniaturization technology, and teichoscopy, converting un-realizable, unseen imagery into sound. The aftereffects of the opera have been many, and – avoiding reception-history clichés like Nietzsche and French Symbolism – we will look at Tristan's subsequent lives in film soundtracks starting in the 1930s, as well as its central role in Friedrich Kittler's theories of opera and modern media. The seminar will travel to New York to see a performance of the MET's new production.

Course Notes: Course open only to graduate students only.

Class Notes: This course is limited to graduate students only.

Musical Modernisms in Latin America. This seminar focuses on the development of modernist and avant-garde musical manifestations in Latin America vis-à-vis the development of larger modernist aesthetics throughout the world. Latin American and European musical manifestations will be critically examined in a comparative fashion. By taking into account the historical circumstances that gave birth to these forms of music as well as the power imbalances that have informed discourses about modernity, and center and periphery, this seminar seeks to challenge the notion that modernisms in the margins are mere copies of European and American modernisms. Instead we will discover that "third-world" modernisms are "the flip side of Enlightened modernity."

Course Notes: Open to undergraduates with permission of instructor.

***Ancient Greek Music and its Afterlives.* While Ancient Greece counts as the wellspring of western culture, its music was quite different from our own. This realization aroused surprise and controversy in 16th-century Italy, when scholars started studying ancient sources again. Adaptations of supposedly Greek music led to new and sometimes radical innovation. We will read salient texts from antiquity to the early modern.**

Musical Repetition and Experimentation. Taking repetition in the Bergsonian or Deleuzian sense as a creative process that produces novelty and particularity (rather than as a sterile reproduction of the same) we will explore ways repetition so understood can lead to fresh thinking about musical experience, tradition, and knowledge from many perspectives. Readings will be drawn from musicology, philosophy, psychology, and the history of science and technology. Throughout the semester we will work intensively with many types of music, comparing various styles of repetition. Repetition will also be understood as a process of practicing and learning (gaining skill or knowledge or power). This aspect of repetition will be understood as experimentation very broadly conceived. The work of the seminar will be carried out in various experiments – thought experiments, experiments in reading and writing, and experiments involving the observation of oneself and others. Participants will be encouraged to devise several experiments of their own. They will also be given the opportunity, if they so choose, to work with a graduate student from Psychology to learn some basic techniques and to exchange ideas about cross-disciplinary work.

This course is designed to stage next-generation research on the history of reading. Working outward from classic studies on print and orality by Roger Chartier, D. F. McKenzie, Jack Goody, Bruce Smith, and Michel de Certeau and grounded in close study of the material forms in which texts are conveyed, the seminar's interpretive toolkit will also draw theories from applied linguistics, musicology, and performance studies. Weekly assignments will be keyed to these readings. Seminar participants will produce a substantive essay treating an original source chosen in consultation with the professor. Global and cross-cultural studies are encouraged, as are perspectives of students specializing in literature, theater, linguistics, and history. Guest speakers include Roger Chartier and Ann Blair.

Networks of Experimental Music and Sound. This seminar examines issues of theory, method, practice, historiography, discourse, poetics, technology, and power in the intersections between experimental music, sound art, and academic sound studies. These fields function epistemologically in ways suggested by Bruno Latour: canons are formed, insiders and outsiders are posited, and the limits of knowledge and community are debated. Students will produce a new piece as the culmination of their work in the seminar.

"Hypen-Nation" will explore the interactions of ethnicity/race, migration, and human rights in shaping twenty-first century United States, with particular attention to the past and present experiences of Latina/o, Asian American, Native American, and African American communities. Students will design their own syllabus for a general education class on ethnic studies from the perspective of their particular disciplines to help fashion a multi-disciplinary approach to the social, cultural, and ethical processes that define nationhood.

Class Notes:

Graduate students will be selected to ensure cross-disciplinary representation and diversity of perspectives and backgrounds. Interested students are encouraged to contact the instructors in advance of the first meeting. All interested students must attend the entire first class session.

Near Eastern Languages and Civilizations

Subject: Arabic

Arabic AA

Elementary Arabic (116746)

Luke Leafgren

2016 Fall (4 Credits)

Schedule: MTWRF 0900 AM - 0959 AM

Instructor Permissions: Instructor

Enrollment Cap: 18

Introduces students to the phonology and script of classical/modern standard Arabic and covers the basic morphology and syntax of the written language. Emphasis on the development of the four skills (reading, speaking, listening, and writing). Samples of modern (contemporary) and classical styles of writing introduced into basic syllabus, and audio-visual material from the contemporary Arabic media. Required textbooks: (1) *Alif Baa* (with multimedia), 2nd edition. (2) *Al-Kitaab fii Ta'allum al-'Arabiyya*., Part I, 2nd edition. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Offered jointly with the Divinity School as 4345A. Each section is limited to 18 enrollment.

Not open to auditors. Cannot be taken pass/fail. Arabic AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Class Notes: If this 9am section is full, please register for section 005, also at 9am.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
Full Year Course	Indivisible Course
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Meets Foreign Lang Req	Arabic

2016 Fall (4 Credits)

Schedule:

MW 1200 PM - 0129 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will introduce students to the major writers, canonical works, and important literary movements of Arabic Literature from late antiquity up to the modern period. The course will be structured thematically with special focus on the historical context and cultural tradition within which literary works fit and resonated. The course will consider the development of various literary genres over time (poetry and *qaṣīda* form, narratives, fiction, Belles-lettres, *maqāma*, shadow plays and Drama, etc.). Selected works of literature will be read in translation but students with Arabic can work with the original texts in a separate section. Texts will often be discussed vis-à-vis parallel themes in other works of literature whenever relevant (e.g. The Qur'anic and Biblical Joseph, Maṣṣarrī's *Epistle of Forgiveness* and Dante's *Divine Comedy*, Ibn Baṣṣā and Marco Polo's travelogues, etc.) with special attention to the influence of Western Literature on Modern Arabic poetry and prose.

Course Notes: The course is open to both undergraduates and graduate students; there will be extra assignments for the graduate students.

Class Notes: One hour discussion section to be arranged.

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

"Literature in the Ashes of Home: Iraqi Literature Today and the Trauma of War"

This is a seminar on selected texts from contemporary Iraqi literature to examine, through the reading and literary analyses of these celebrated works from the last two decades, how the experience of war still dominates Iraqi articulations of self and place. We will be exploring how writers fashion their literary construction—through the sense of nonchalance, uncertainty, or naiveté that marks the perspectives and actions of their protagonists—to transform the narratives into parodies of the current Iraqi events, concepts, individuals, and the histories they depict. This course ultimately aims to underscore how literary works interrogate and deconstruct Iraq's cultural formations and initiate a new, multifaceted reading of past and present Iraq to prompt us to rethink our own understanding of modern Iraq as a dismembered nation.

Course Notes: Course conducted solely in Arabic; all readings in Arabic.

Recommended Prep: Four years of Modern Arabic or equivalent.

Historical Background to the Contemporary Middle East: Religion, Literature and Politics (110914)

Gojko Barjamovic

2017 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

What defines the Middle East? What long-term historical and cultural developments can we trace in the region? How do these affect contemporary global order and policy? This team-taught course in the

NELC department will address these three fundamental questions of great present relevance by introducing students to the ancient and modern peoples, languages, cultures, and societies of Western Asia and North Africa. The study of this diverse region is uniquely aided by a deep-time perspective afforded by thousands of years of vibrant art, writing and cultural artefacts. Relying on the classic expertise integral to area studies, the course brings together faculty from a variety of disciplines – from history and archaeology to literature and philology, and from sociology and economy to the political sciences – in a common endeavour to explore the rich cultural complex of the region through four key topics: history, religion, literature and politics.

Course Notes: Formerly NEC 97r, this course satisfies the NELC Sophomore Tutorial requirements. Taught by Members of the Department.

Class Notes: One hour section meeting to be arranged.

NELC Doctoral Colloquium: Research, Resources and Pedagogy (203473)

Justine Landau

2016 Fall (2 Credits)

Schedule:

R 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This practical colloquium addresses major issues of research and teaching competence. Designed to introduce graduate students to the Ph.D. requirements, to methodological issues and examples of ongoing scholarship in NELC, it further offers opportunity for reflection on the art of teaching (leading discussion sections, designing syllabi, giving lectures, etc.). Questions covered will include: How to choose coursework? How to prepare for qualifying and general exams? What are the challenges of language training? How does one prepare and write a prospectus? How to use the library resources most efficiently? What type of investment does recourse to digital and quantitative methodology require? How best to prepare for professional life after the Ph.D., both inside and outside of academia? In addition, NELC faculty will informally present their respective fields (main issues and methods), in broad strokes through their current research, and advanced Ph.D. students will present their prospectus for discussion and feedback before submitting it to the faculty.

NEC 299A/299B is designed as a year-long course. Students should plan to complete both terms of this course (parts A and B) within the same academic year.

Course Notes: Note: The Doctoral Colloquium will meet throughout the academic year (fall and spring semesters) once every other week. Sessions designed specifically for G1-G2 students, or alternatively, for G3-G4 students (and until approval of the prospectus) will be clearly tagged; assessment (SAT/UNSAT) will be based on attendance of a targeted number of sessions for each level. Required of all NELC G1 and G3 students.

Class Notes: NEC 299A/299B is designed as a year-long course. Students should plan to complete both terms of this course (parts A and B) within the

same academic year.

Subject: Ancient Near East

Ancient Near East 100

History of the Ancient Near East (120250)

Gojko Barjamovic

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course provides an overview of the history of the ancient Near East, with a focus on ancient Mesopotamia. It begins with the advent of writing in the late fourth millennium BCE and ends with the fall of Babylon to Cyrus the Great, in 539 BCE. The course combines archaeological, art historical, and textual data to explore the extraordinarily rich history of this region.

Course Notes:

Offered jointly with the Divinity School as 1115.

Ancient Near East 103

Ancient Lives (110014)

Gojko Barjamovic

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

What are the essential elements of human society? Have our fundamental conditions developed, and how? Can we use themes from ancient history to think about contemporary society and culture? These questions are in focus in this course on 'Ancient Lives', which explores the earliest human civilizations in the region commonly known as Mesopotamia (c. 3000-300 bce) in what is now Iraq, Iran, Syria and Turkey. Few elements in the way we live and organize ourselves today are to be taken for granted. There is, and has always been, a wealth of ways in which humans live. But biologically we are the same as our ancestors of 5000 years ago, at the dawn of history. Any likeness or difference between 'us and them' is therefore likely to be a product of history and culture. 'Ancient Lives' builds upon this realization to inspire a critical way of thinking about society in the broadest possible scope. Areas explored during the course are selected for their relevance across the range of contemporary life - they include freedom, music, public health, food, jurisprudence, trade, the visual arts, science, sexuality, religion and political power. You learn about how societies and individuals have dealt with change on multiple levels, from large-scale societal revolutions to personal transformation. Having taken this course, you will have gained a fundamental understanding and appreciation of human life in the broadest scope, as well as of your own life as a part of history. You will be

able to critically assess contemporary discourses on the study of 'the other' in past and present; engage with core concepts of human society, such as justice, beauty, value and belief on a broad historical base; be familiar with examples of classical social theory and thinkers through concrete cases in which their work has been applied to or shaped by the study of the past; and acquire skills in presenting scholarly work to a general audience.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Ancient Near East 145

Poetry in the Hebrew Bible and the Ancient Near East (203480)

Jonathan Kline

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

About one-third of the Hebrew Bible is poetry. This course will focus on these poetic texts and on the poetry of the neighbors of ancient Israel. Topics include: the distinction between poetry and prose; poetic genres (e.g., myths, epics, prayers, proverbs, laments, prophecies, wisdom, love poems); and literary devices (e.g., parallelism, meter, wordplay). All primary sources will be read in English translation, though students who can read the texts in the original languages will have opportunities to do so.

Course Notes: Offered jointly with the Divinity School as 1124.

Class Notes: Because the first day of fall 2016 FAS classes is following a Monday schedule, the first meeting of this class will be on Wednesday, August 31.

Additional Course Attributes:

Ancient Near East 210

Textual Criticism of the Hebrew Bible: Seminar (114445)

Richard Saley

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course focuses on the art of recovering the text of the Hebrew Bible using Hebrew and Greek manuscripts as well as other early textual witnesses.

Course Notes: Offered jointly with the Divinity School as 1819.

Class Notes: Enrollment limited to 12. Because the first day of fall 2016 FAS classes is following a Monday schedule, the first meeting of this class will be on Wednesday, August 31.

Recommended Prep: At least two years of Hebrew and one year of Greek; some knowledge

of Aramaic, Latin, and Syriac is helpful but not required.

Subject: Akkadian

Akkadian AA

Introductory Akkadian (114320)

Gojko Barjamovic

2016 Fall (4 Credits)

Schedule: MR 0130 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to the Semitic language of Akkadian, primarily through the Old Babylonian dialect and cuneiform writing system as used during the time of Hammurabi (c. 1750 BCE). Students learn the fundamentals of grammar and the writing system, as well as the most common cuneiform signs in official and cursive script. Readings span a variety of genres, including private letters, judicial documents, literary and religious texts, divinatory compendia, legal code, and royal inscriptions. The course also briefly introduces students to examples of texts from other periods and dialects of the Akkadian language for cultural and comparative purposes. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

Akkadian AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Gosta Gabriel

2016 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

More than 3,000 years old, the Standard Babylonian *enuma elish* is one of the most influential texts of the Mesopotamian cultures. Although it is mostly known as "Babylonian Creation Myth" (e.g. Talon 2005, Lambert 2013), it actually focuses on Marduk's rise to divine kingship. Moreover, it also develops a peaceful eternal world order – the *Pax Mardukiana* (Gabriel 2014). This course aims at understanding the main narratives, central ideas and underlying assumptions of the composition.

We will read the original Akkadian text using the score edition of Kämmerer and Metzler (2012), which specifies the textual variations of each manuscript. We will also explore Lambert's composite transliteration (2013) since it comprises more manuscripts than Kämmerer and Metzler.

We will start with reading the epilogue of the text, which provides us with crucial information on teleology and pragmatics of the epic. We will then read larger passages following their textual order. Special focus will be given to structural patterns (i.e. a parallel and a circular structure) and their link to the text's semantics. This facilitates tracking down the main lines of the story and reconstructing the various phases of Marduk's rise to divine kingship. We will see that Marduk's rule also serves to create a stable and peaceful order for all gods and all men. Finally, the course will reveal the high standard and the intriguing complexity of the composition.

Class Notes:

Instructor: Goesta Gabriel. Please note that due to Dr. Gabriel's travel schedule, the first meeting of the class will be on Friday, September 2.

Recommended Prep:

Akkadian grammar, basic vocabulary, knowledge of cuneiform script.

Assyrian Dialect (203409)

Gojko Barjamovic

2016 Fall (4 Credits)

Schedule: T 0130 PM - 0329 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course provides an overview of the main stages of the Assyrian dialects of Akkadian as well as the main resources for studying them. Reflecting the size of the surviving textual corpora, five meetings will focus on Old Assyrian texts, three on the Middle Assyrian, and four on Neo-Assyrian. Readings in all genres will be represented, including letters, laws, legal and administrative records, political treaties, literature, magical and religious texts.

The Yiddish Short Story: Folk Tales, Monologues, and Post-Apocalyptic Parables (203377)

Saul Zaritt

2017 Spring (4 Credits)

Schedule:

R 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Who are the storytellers of Yiddish literature? Where did their stories come from? Why did the short story become the central genre of modern Jewish literary culture? This course explores the genealogy of the Yiddish short story from the hasidic folk tale to the modernist sketch, from the monologues of Sholem Aleichem and Isaac Bashevis Singer to the haunting narratives of David Bergelson and Der Nister. Stretching from the nineteenth century to the present, we follow the short story in its comparative contexts from Eastern Europe to Western Europe, Palestine/Israel, and the US.

Course Notes:

All texts will be taught in translation; optional reading section for those with Yiddish knowledge.

Modern Hebrew 130B

Advanced Modern Hebrew II (126531)

Irit Aharony

2017 Spring (4 Credits)

Schedule: MW 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course is a continuation of Hebrew 130a. Texts, films, and other materials expose students to the richness and complexity of the contemporary sociolinguistics of Israeli society.

Course Notes: Conducted in Hebrew. Not open to auditors. Offered jointly with the Divinity School as 4043.

Recommended Prep: Modern Hebrew 130a, or equivalent level of proficiency.

Additional Course Attributes:

Modern Hebrew 241R

Advanced Seminar in Modern Hebrew: Israeli Culture: Cinema & Literature (127670)

Irit Aharony

2016 Fall (4 Credits)

Schedule: TR 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This course constitutes the final level of Modern Hebrew language studies. The course offers representative readings and screenings from contemporary Israeli literature and cinema, and it forms bases of discussion on major cultural and linguistic themes through academic readings. We will focus on the theme of the family in Israeli culture and relationships between fathers and sons in "Far away Islands"; "Book of Intimate Grammar"; the new series "Shtissel"; and more.

Course Notes: Offered jointly with the Divinity School as 4045. Not open to auditors. Discussions, papers, movies and texts presented only in Hebrew.

Class Notes: Enrollment limited to 15.

Recommended Prep: Modern Hebrew 130b or equivalent.

Islamic Civilizations 145A

Introduction to Islamic Philosophy and Theology: Formative and Classical Periods (8th to 15th C.) (121928)

Khaled El-Rouayheb

2016 Fall (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

Islamic Civilizations 145A is an introduction to some of the key problems and figures in medieval Islamic theology and philosophy. The main topics covered will be: The rise of theological controversies in early Islam and the crystallization of theological factions; the rise of an Arabic tradition of Neo-Platonized Aristotelianism with such figures as Farabi (d. 950) and Avicenna (d.1037); the confrontation between the theological and Aristotelian traditions in such works as *The Incoherence of the Philosophers* by the theologian al-Ghazali (d.1111) and the response by Averroes (d.1198); the powerful influence of philosophy on later Islamic theology; the anti-Aristotelian, Platonist philosophy of "Illumination" of Suhrawardi (d. 1191), and the mystical monism of Ibn Arabi (d.1240) and his followers.

Any student is welcome who would like to know more about the vigorous and long-lived Islamic traditions of theology and philosophy. No prior knowledge of Islam is presupposed, and all readings will be in English. Assigned readings, additional handouts and announcements for the course will be available through the course web site.

Course Notes:

Offered alternate years with Islamic Civilizations 145b. Though the two courses can be taken in either order, 145a covers the 8th-15th centuries and 145b covers the 19th-20th centuries. Offered jointly with the Divinity School as 3602a.

Islamic Civilizations 158

Introduction to the Qur'an (160949)

Shady Nasser

2017 Spring (4 Credits)

Schedule: R 1100 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

A critical introduction to the Qur'an as text and as scripture. Reading of the text in translation as well as of

primary and secondary sources to place it in historical context from its 7th-century origins through subsequent centuries. No previous study of Islam or Arabic is assumed, but students with Arabic can work with the original text in a separate section. Topics include: themes of the Qur'an; origins and debates regarding origins; the collection and variant readings of the Qur'an, shared biblical/prophetic history; the Qur'anic sciences (e.g., tafsīr/exegesis), style and theories of inimitability. The course is open to both undergraduates and graduate students; there will be extra assignments for the graduate students.

Course Notes: Additional hour to be arranged. Offered jointly with the Divinity School as 3376.

Sufi Masters of Persian Poetry: 'Attâr, Rumi, Hâfez (203470)

Justine Landau

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course offers an overview of the development of classical Persian Sufi poetry through the works of three major Persian poets from the 12th (Farid al-Din 'Attâr of Nishapur), 13th (Mowlânâ Jalâl al-Din Rumi) and 14th century (Hâfez of Shiraz). Students will become acquainted with the key notions and beliefs at work in pre-modern Persian Sufism, and with the variety of forms, images and rhythms designed to convey their subtleties to the heart, as much as to the mind of the listener.

Course Notes: Offered jointly with the Divinity School as 3026. Knowledge of Persian not required. Lectures and readings will be in English, and a separate section will be arranged for students with adequate reading knowledge of Persian.

Islam, Modernity and Politics (109243)

Ousmane Oumar Kane

2017 Spring (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

18

The aim of this seminar is to study the evolution of Islamic thought and political practices in Muslim societies from the 19th to the early 21st centuries. Attention will be devoted to the patterns of interaction between the Muslim World and the West because it is our assumption that these patterns contribute to influence ideological formations and modes of religious/political mobilizations in the Muslim World. By the end of the eighteenth century, much of the Muslim World was in "decline" whereas European imperial

powers, mainly France and Great Britain, were on the rise. The course will explore the response of Muslim societies and intellectuals to the rise of European prominence. The major 19th century reformist movements that appeared in the Muslim World will be discussed, ranging from movements advocating mild reform to those rejecting all influence of "Western civilization" and advocating a return to the Tradition of Muhammad. In the twentieth century, virtually all the Muslim World came under European colonial domination. During colonial rule and after, the Muslim world experienced major transformations which affected the nature and administration of law, politics and society. It is in this context, that the new Islamic revival that some have called "Islamism" was articulated as an alternative to Westernization. The course will address the rise of contemporary "Islamism," as an alternative to Western domination and modernization/Westernization. The major theorists of political Islam as well as the different trajectories of "Islamism" in diverse Muslim societies will be covered. The impact of political Islam in the West will also be addressed. The final part of the course will assess the trajectories of political Islam and address the ongoing debates on post-Islamism, secularism and modernity.

Course Notes: Offered jointly with the Divinity School as 3368.

Class Notes: Enrollment limited to 18.

Readings in Islamic Mysticism (203810)

Ousmane Oumar Kane

2017 Spring (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Sufism (Islamic mysticism) represents one of the most important forms of personal piety in Islam and Sufi orders have inspired modes of socio-political organizations throughout Islamic history. Sufi orders recruit from different social classes, age groups, and genders, both among masses and elites as well. Focusing on the Bilad al-Maghrib and West Africa, this seminar will survey the writings and socio-political impact of the teachings of influential Sufi thinkers. The course begins with a study of relations between these two regions followed by the analysis of central concepts of Sufism. Then course participants will look at how these concepts are embodied in the writings of Sufi authors in the Maghreb and West Africa. Participants will read closely selected writings of the influential authors in the region such as al-Jazuli, Ahmed al-Tijani and Ibrahim Niasse. The course will also analyze Sufi educational practices, master/student relationships and Sufi rituals in different contexts.

Course Notes: Offered jointly with the Divinity School as 3378.

Recommended Prep: Some background in Islamic studies as well as a reading proficiency in Arabic are required to take this course.

Ulama, Islamic Institutions and Religious Authority in the Middle East (North Africa, 19th-20th C) (127825)

Malika Zeghal

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This graduate seminar deals with the recent history and sociology of religious authorities and religious scholars ('ulama) in the Muslim world, with a special emphasis on issues and sources related to the Maghrib (North Africa) in the second half of the 19th and the 20th centuries. During this period of time, Islamic institutions have become the object of state-sponsored political reforms that have reshaped them. Yet, they have remained relevant. They include spaces for transmission of knowledge, legal theories and practice, religious endowments, that all need to be understood as sites of important ideological and political debates. We will examine the state of the literature on ulama, Islamic institutions and religious authority in modern times in combination with primary sources in Arabic and/or French, and will discuss possible paths for research and exploration. Reading proficiency in the Arabic and French languages required (primary sources will be in French and in Arabic. Secondary sources will be in English and in French). Enrollment is subject to instructor's approval.

Recommended Prep:

Reading proficiency in the Arabic and French languages required.

Subject: Hebrew

Hebrew 141

Ancient Dream Interpretation: The Hebrew Bible and Mesopotamia (204402)

Maria Metzler

2017 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

In the ancient world, dreams were often regarded as coded messages sent by deities or supernatural dream-figures. This course will investigate the role of dream decipherment in ancient Mesopotamian literature such as the Assyrian Dream Book and the Epic of Gilgamesh. We'll also read a number of texts from the Hebrew Bible, including the Joseph story in Genesis, where the accurate interpretation of dreams was regarded as proof of divine patronage. Topics of study will include rituals for generating dreams (incubation); fortune-telling through dreams (oneiromancy); and methods of healing from nightmares. Ancient understandings of dreams will be contrasted with modern psychological and literary views on dreaming (e.g., Freud and Cixous).

Course Notes:

A knowledge of Hebrew will be useful but is not required. All readings done in translation.

Modern Middle East 100

Introduction to the Modern Middle East (107349)

Malika Zeghal

2016 Fall (4 Credits)

Schedule: MW 1000 AM - 1059 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

An introduction to Middle Eastern Studies focusing on the modern period (19th and 20th centuries). Lectures will be broadly sequenced according to historical chronology but will be thematically organized. They will provide some historical context for each topic examined, as well as present specific examples through primary sources, visual sources, and numerical data when relevant.

This course is designed to give students an overall good grasp of the history of the modern Middle East and of some of the major themes in modern Middle Eastern Studies. Students will critically engage with some of the most important topics that resonate in that area of the world. We will cover topics such as reformism, economic development, colonialism and nationalism, authoritarianism and democratization, sectarianism, culture, gender, literature and the arts, as well as the role of religion in politics. Most of these topics, in one way or another, will speak to the construction of nation-states in the Middle East and to the challenges they have been confronting.

This is not a survey course. In particular, it will not be exhaustive in its coverage of the region in space or

time, and in its coverage of topics. Students in search of a specific topic, country, or period are strongly encouraged to take a look at the syllabus prior to enrolling to make sure their specific interests will be covered.

Assigned readings will consist of primary and secondary sources. Students will be exposed to first-hand accounts by protagonists in the history of the Middle East (primary sources) as well as to the diversity of approaches that the scholarly literature (secondary sources) has taken across disciplines, e.g. anthropological studies, quantitative analysis, philology and textual studies. The larger aim of the course is to develop students' critical thinking in dealing with the history, cultures, politics, and political economies of the contemporary Middle East. Required for all concentrators in The Modern Middle East. Open to all undergraduate and graduate students. There are no prerequisites for this course.

Course Notes: A required course for undergraduates pursuing a secondary field in Modern Middle Eastern Studies.

Jewish Studies 111

Modern Jewish Thought Seminar: Messianic Eschatology and Apocalyptic Time from Cohen to Levinas (118278)

Elliot Wolfson

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The seminar will explore the eschatological conception of time developed by the German-Jewish philosophers, Hermann Cohen and Franz Rosenzweig, and the impact of their thinking on the messianic and apocalyptic speculation of Gershom Scholem, Walter Benjamin, Ernst Bloch, Jacob Taubes, Jacques Derrida, and Emmanuel Levinas.

Course Notes:

Instructor: Elliot Wolfson (UC - Santa Barbara) Offered jointly with the Divinity School as 3035.

Jewish Studies 151

Introduction to Jewish Mysticism (203489)

Elliot Wolfson

2016 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The course will present a survey of the major trends of Jewish mysticism from the merkavah texts of late antiquity to the various schools of kabbalah that evolved in the Middle Ages. Attention will be paid to both the unique and shared aspects of each historical period. Topics to be discussed include: celestial ascent and the angelic transformation of the mystic; letter mysticism and magical techniques; envisioning the divine and mystical union; gender and the anthropomorphic representation of God; secrecy and mystical fellowship; ascetic eroticism and the spiritual ideal of worship.

Course Notes:

Instructor: Elliot Wolfson (UC - Santa Barbara)

Offered jointly with the Divinity School as 3032.

Studies in the Former Prophets: Seminar (203978)

Andrew Teeter

2016 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A close examination of select passages within the books of Joshua, Judges, Samuel and Kings, with particular attention to large-scale compositional strategies and principles of organization, to analogical patterns, to inner-scriptural relationships, and to the nature and function of allusion within these texts. This course will also serve as a prerequisite for the spring seminar, Rewriting Scripture in Jewish Antiquity, which will focus primarily on the book of Chronicles in Spring 2017.

Course Notes: Offered jointly with the Divinity School as 1300.

Recommended Prep: Two years of Hebrew (or equivalent) required; the course presumes proficiency with Biblical Hebrew.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Jewish Studies 207

Rewriting Scripture in Jewish Antiquity: Seminar (125365)

Andrew Teeter

2017 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A study of the phenomenon of scriptural rewriting in the Second Temple period, both within and outside of the received Hebrew Bible. Examination of exegetical techniques, aims, and presuppositions, with attention to higher level compositional strategies, to underlying conceptions of scripture/scriptural authority, and to the dynamics of canon formation. For spring 2017, our study will focus primarily on examples drawn from the Former Prophets and Chronicles.

Course Notes: Offered jointly with the Divinity School as 1302.

Recommended Prep: The course presumes proficiency with Hebrew. Two years of Hebrew (or equivalent) required. Prerequisite: HDS 1300 "Studies in the Former Prophets"

Additional Course Attributes:

Attribute	Value(s)

Jewish Studies 218

Jewish Law: The Rabbinic Idea of Law (204508)

Chaim Saiman

2017 Spring (4 Credits)

Schedule:

TW 0320 PM - 0450 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Law is pervasive in Judaism, as it regulates everything from conception to burial rituals. Yet the Jewish conception of law is far broader than "things that happen in court," "rules imposed by the state," or even "rules mandated by God." Though it embraces each of these categories, law simultaneously serves as a literary medium through which rabbinic thinkers express their ideas about life's greatest questions: the nature of God, love, justice, morality and community and more. The goal of this course is to provide a conceptual introduction to the multi-faceted nature of the Jewish legal tradition by demonstrating that what other cultures assess in terms of law, philosophy, ethics, politics, and theology are approached through the study of the Talmud and its legal doctrines.

Class Notes:

This class is jointly offered with, and meets at, Harvard Law School. (HLS course #2868). 20 seats, or more if available, are reserved for FAS students.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Jewish Studies 219

Business Law and Ethics: American and Jewish Legal Perspectives (204509)

Chaim Saiman

2017 Spring (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

6

This seminar will explore topics in business and commercial law and ethics from a comparative perspective. In addition to comparing legal doctrines, we will explore the competing conceptions of commerce, markets and regulatory theory present in each legal system culture. Student papers will assimilate classical sources of Jewish law with contemporary legal materials and jurisprudential analysis.

Class Notes:

This class is jointly offered with, and meets at, Harvard Law School. (HLS course #2930). Total enrollment is limited to 22; six seats, or more if available, are reserved for FAS students.

Recommended Prep:

None, although a basic understanding of the nature and function of classical rabbinic texts is recommended.

The course focuses on the reading and understanding of a selection of texts from various genres within the corpus of modern Persian poetry and prose. Students will become acquainted with the major actors of the early Iranian literary modernity (late 19th - early 20th century) through a selection of excerpts drawn from their literary as well as theoretical output. The detailed understanding of the language at play among Iranian modernists will complement the study of the context and literary significance of these texts.

Class Notes: Enrollment limited to 30.**Recommended Prep:** At least two years of Persian or equivalent.**Additional Course Attributes:**

Human Cognition: Reading and Writing the Neural Code (159700)

2016 Fall (2 Credits)

Schedule:

R 0600 PM - 0729 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this course, we will explore a new and cutting-edge discipline in neuroscience -- invasive human neurophysiology. Some neurosurgical procedures, such as deep brain stimulation surgery, allow for the unique opportunity to directly access the human brain while patients are awake-and-behaving. Topics will include: place/grid cells, deep brain stimulation, epilepsy, face processing, brain-machine control, and reward processing. Students must complete both terms of this course(parts A and B) within the same academic year in order to receive credit.

Requirements: Prerequisite: LS 1a AND MCB 80

Precision Neuroscience: Neural Circuits for Individuality (203341)

Eva Naumann

2016 Fall (2 Credits)

Schedule:

R 0700 PM - 0829 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

How do neural circuits produce variability in the behavior of individuals? To understand how brains generate the behavioral differences that shape personality, we will study modern advances in neuroscience, from ion channels to whole-brain activity mapping. We will explore these ideas with a focus on the individual and will discuss the possibility of precision medicine applied to mental illness. Students will receive credit upon completing Part B of the course.

Requirements:

Prerequisite: MCB 80 OR MCB 81

Sensing a Chemical World (203343)

2016 Fall (2 Credits)

Schedule:

T 0600 PM - 0729 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Animals are faced with the daunting task of making sense of the chemical world around them. Through lectures, activities, and discussion of primary literature, this course will introduce the molecular receptors that animals use to detect olfactory and taste stimuli in the environment, and the organizational principles by which the nervous system processes chemosensory cues to drive behaviors.

Course Notes:

Students will receive credit upon completion of Part B.

Requirements:

Prerequisite: MCB 80 OR MCB 81

What distinguishes a suitable project is the application of analytical skills to the object of Independent Study. Any sophomore, junior, or senior whose previous record is satisfactory may petition to undertake Independent Study for non-letter-graded credit. Students may access the petition for Independent Study on the [Office of Undergraduate Education website](#).

Course Notes:

A student may petition to take up to a total of four, four-credit courses

of Independent Study. Independent Study courses are subject to the same rules for dropping and withdrawing as any other course. The petition requires the signatures of a qualified adviser and the student's resident dean, as well as an outline of the student's proposed project. It must be submitted to the Allston Burr Resident Dean for approval, ordinarily in the first week of the term.

Elena Kramer

2016 Fall (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An integrated approach to the diversity of life, emphasizing how chemical, physical, genetic, ecological and geologic processes contribute to the origin and maintenance of biological diversity. Topics to be covered include the evolution of metabolic pathways, multicellularity and structural complexity; causes and consequences of differences in diversity over space and time; the role of species interactions (including symbioses) as an evolutionary force; and the evolution of humans and their impact on the environment.

Course Notes:

Knowledge of introductory molecular, cellular biology, and genetics is recommended. This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems. 2.5 hour mandatory sections and field trips.

Enrollment Cap:

n/a

Fundamental concepts in genetics and genomics forming a critical foundation for biology approached from two perspectives: (1) as a body of knowledge pertaining to genetic transmission, function, mutation, and evolution in eukaryotes and prokaryotes; and (2) as an experimental approach providing a toolkit for the study of biological processes such as development and behavior. Topics include structure, function, transmission, linkage, mutation, and manipulation of genes; genetic approaches in experimental studies of biological processes; and analysis of genomes in individuals and populations. Related ethical issues also discussed include genetically modified organisms, gene therapy, genetic testing, personalized medicine, and genetic privacy.

Organismic & Evolutionary Biol 51

Biology and Evolution of Invertebrate Animals (144597)

Cassandra Extavour

Gonzalo Giribet

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

14

Introduction to invertebrate diversity, will cover the development, adult anatomy, biology and evolutionary relationships of the main animal phyla including sponges, mollusks, annelids and arthropods among others. Special emphasis is placed on understanding the broad diversity of animal forms and their adaptations to different ecosystems and how these phenomena shape animal evolution. Lectures will be complemented with a mandatory weekly lab and a field trip to different areas of outstanding marine diversity in the Caribbean.

Course Notes:

Field trip to the Caribbean for research during spring break.

Recommended Prep:

LS1b, OEB 10, OEB 53 or permission of instructor required.

Lab component: Wednesdays, 3:00pm-6:00pm, Spring 2016

Additional Course Attributes:

Attribute	Value(s)

Organismic & Evolutionary Biol 52

Biology of Plants (131579)

Elena Kramer

Noel Holbrook

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to the structure, diversity, and physiology of plants with an emphasis on evolutionary relationships and adaptations to life on land. Topics include growth, resource acquisition, interactions with other organisms (i.e., fungi, bacteria, insects), reproduction, and survival in extreme environments. Laboratory sessions provide an overview of plant diversity and an introduction to basic physiological processes.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems.

Class Notes:

Tu., Th., 10-11:30, one afternoon laboratory per week, plus occasional

field trips

Additional Course Attributes:

2017 Spring (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Within our solar system, Earth is distinguished as the planet with life. Life was born of planetary processes, has been sustained for some four billion years by planetary processes, and through time has emerged as a set of planetary processes that is important in its own right. In this course we will investigate the ways that Earth and life interact, focusing in particular on the biogeochemical cycles of major elements. This will provide a framework for interpreting the history of life reconstructed from fossils and phylogeny.

Course Notes: OEB 56 is also offered as EPS 56. Students may not take both OEB 56 and EPS 56 for credit.

Class Notes: M., W., F., at 10, and a weekly three-hour lab to be arranged, and one field trip.

Recommended Prep: EPS 21, 22, or Life Sciences 1b; or permission of instructor.

Additional Course Attributes:

The Mouse in Science and Society (161184)

Steven Niemi

2017 Spring (4 Credits)

Schedule: TR 1230 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap: n/a

Mice remain the most popular vertebrates used in biomedical R&D today, with tens of millions of lab mice produced annually in the United States alone. At the same time, mice are commonly studied for their own characteristics that continue to enhance our knowledge about innate mammalian behavior, predator-prey

dynamics in changing ecosystems, and reservoir hosts for emerging diseases, to name a few. This course intends to provide a strong foundation in mouse biology, both basic and applied, as well as exposure to cultural and political aspects of the current impact of mice (real or fictitious) on contemporary societal values. Instructors: Steven M. Niemi and Kathleen Pritchett-Corning.

The Developmental Basis for Evolutionary Change (144999)

Mansi Srivastava

Matthew Harris

Clifford Tabin

2016 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A lecture course in evolutionary developmental biology. This course will focus on the molecular and cellular bases of how embryos generate adult body plans in order to understand how form, physiology, and life history strategies are modulated over the course of evolution. We will discuss insights from both invertebrate and vertebrate animal model systems as well as plants. We will investigate the forces driving change at both micro- and macro-evolutionary time scales. Particular emphasis will be placed on how changes in development underlie major evolutionary transitions and the origin of innovation in organismal evolution. The course will also emphasize learning of experimental design, molecular tools, and phylogenetic methods currently used by researchers in the field of evolutionary developmental biology.

Recommended Prep: Life Sciences 1a (or LPS A) and 1b, or permission of instructor. OEB

10, MCB 52, and MCB 54 are recommended but not required. Open to students from any concentration.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Organismic & Evolutionary Biol 125

Molecular Ecology and Evolution (144180)

Scott Edwards

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A survey of theory and applications of DNA technologies to the study of evolutionary, ecological and behavioral processes in natural populations. Topics to be covered will span a variety of hierarchical levels, timescales, and taxonomic groups, and will include the evolution of genes, genomes and proteins; the neutral theory of molecular evolution and molecular clocks; population genomics and phylogenetic principles of speciation and phylogeography; metagenomics of microbial communities; relatedness and behavioral ecology; molecular ecology of infectious disease; and conservation genetics.

Course Notes:

Weekly computer laboratories will introduce the use of the internet and computational software in DNA sequence alignment and phylogenetic and population genetic analysis.

Recommended Prep:

Life Sciences 1b, OEB 10, OEB 53 or MCB 52.

Additional Course Attributes:

Vertebrate Evolution (160453)

Stephanie Pierce

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course provides a comprehensive survey of the origin and evolution of vertebrates through an examination of the fossil record. A primary focus will be on major events in Earth's evolutionary history, with an emphasis on anatomical and physiological transformations in fish, amphibians, reptiles, birds and mammals. To compliment in-class lectures, students will be given hands-on experience identifying fossil material. As an added bonus, the course offers a spring recess fossil dig to the Triassic beds of Arizona.

Recommended Prep:

Life Sciences 2 and/or another whole animal biology course (e.g. OEB 51, OEB 101, OEB 167).

Requirements: Prerequisite: Must take OEB 53.

Additional Course Attributes:

Biogeography (145864)

Gonzalo Giribet

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Biogeography aims to explain distributions of organisms through historical and ecological factors. This course will focus on the history of biogeographic research, developments in the area of historical biogeography, and on ecological processes that affect distributions of whole clades. Topics include plate tectonics and earth history, vicariance and dispersal, areas of endemism, phylogenetic niche conservatism, latitudinal gradients in species richness, and the theory of island biogeography. Software for biogeographical analysis will be discussed and evaluated.

Recommended Prep: Two following courses: Life Sciences 1b, OEB 10, OEB 51, OEB 52, OEB 53, OEB 54, OEB 55, OEB 181, or permission of the instructor. There will also be a lab component in addition to the lecture component of the course.

Genes and Behavior (145857)

Yun Zhang

2016 Fall (4 Credits)

Schedule:

MW 0300 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Behavior is inheritable and regulated by genes. This lecture course explores the causal links between the genes encoded in the genome and various behaviors, aiming to provide mechanistic understandings on how gene products control and influence behavioral outputs. The topics of the lectures cover both important findings as well as major research approaches in the field. The behavioral traits in discussion include olfaction, mechanosensation, foraging, circadian rhythm, aggression, courtship, sleep, social recognition, learning and memory, etc. The organisms that we will discuss include invertebrates, vertebrates and humans. Life Science 1a.

Course Notes:

The class will include a new 4-week lab component for research

experience on genetic basis of behavior in Fall 2016.

Organismic & Evolutionary Biol 200

The Evolution of Stem Cells and Regeneration (204479)

Mansi Srivastava

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Among the many unique challenges that multicellular organisms face relative to unicellular ones is how they deal with the death (or loss) of a part of the organism. Should the organism heal and continue life without the missing part, or should it regrow that part? The vast majority of animal (and plant) lineages have species that will replace the missing portion, i.e., they are capable of regeneration. Despite the phylogenetically widespread nature of regeneration, very little is known about any universal cellular, molecular and genetic principles, if any, that control this process. In pursuit of these principles, the course will delve into the literature from a diverse range of species. We will focus on stem cells, which enable the production of new cells that reconstitute the missing tissues. First, we will address what it means to be a stem cell. We will explore how molecular studies of adult stem cells in species ranging from jellyfish to humans are revealing essential and highly evolutionarily conserved molecular mechanisms for stem cells. Second, we will compare the features of adult stem cells to those of other multipotent cells, such as early

embryonic cells. Third, we will consider how different species maintain pluripotent stem cells versus those with restricted potential, i.e., lineage-restricted stem cells. We will explore these ideas through the critical reading of the primary literature, including both classical and very recent papers in stem cell biology. Students will obtain a deep understanding of the main concepts and methods concerning the study of stem cells and will become familiar with comparative approaches as applied to stem cell biology and regeneration.

Course Notes: Course is open both to graduate students and to undergraduates who have taken LS1a and LS1b, LS50, or SCRB10, or by permission from the instructor.

Writing Scientific Papers (130327)

Andrew Richardson

2016 Fall (4 Credits)

Schedule: MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

You've designed your experiment, made your measurements, and analyzed your data. Now what? How do you write a paper that will not only get accepted, but also get cited? This is a hands-on workshop course targeted at graduate students who are ready to write up their first research paper for submission to a peer-reviewed scientific journal. The class will emphasize the idea that your paper should tell a (nonfiction!) story that engages the reader. By the end of the semester you will have a coherent, well-structured, and polished manuscript.

Contingency Versus Determinism: Is Evolution Predictable? (130656)

Jonathan Losos

2016 Fall (4 Credits)

Schedule:

T 0230 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In his 1989 Pulitzer-Prize winning book *Wonderful Life*, Stephen Jay Gould asked what would happen if we could replay the tape of life. That is, if somehow we could go back in time and re-start evolution from a previous point, would the evolutionary outcome be the same? Or would events—minor or major—perturb the evolutionary trajectory such that the world today would be a very different place? Presented as a thought experiment, Gould's metaphor has attracted widespread attention; twenty-five years on, approaches as disparate as molecular phylogenetics and experimental field studies of evolution have provided a wealth of data on the relative importance of contingency and determinism in evolutionary

diversification. In this seminar class, we will discuss Gould's ideas, how they have been developed and transformed over the last quarter century, and what the data say.

All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 299R

Forest Practice and Research (143232)

2016 Fall (4 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap: n/a

Field and laboratory research into the history, biology, ecology, culture, and economic problems of local, regional, and world forests. Individual research projects.

Course Notes: Seminars, conferences, field, and laboratory work at the Harvard Forest, Petersham, Massachusetts.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Organismic & Evolutionary Biol 300

Museum Collections Management and Curation (204477)

James Hanken

2017 Spring (4 Credits)

Schedule: M 0300 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap: 6

Practical training in and understanding of contemporary curatorial practices and procedures for zoological collections management. Students will attend a weekly seminar, complete two 6-week rotations (@ 10 hr/wk) in two different specimen collections in the Harvard Museum of Comparative Zoology, and participate in a 2-day field trip to the National Museum of Natural History in Washington, DC.

Course Notes: Interested students must seek instructor consent prior to enrolling in the course. Course enrollment will be limited.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 303

Theoretical Population Genetics (131537)

John Wakeley

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 303

Theoretical Population Genetics (131537)

John Wakeley

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 304

Mycology (141338)

Donald Pfister

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 304

Mycology (141338)

Donald Pfister

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 305

The Fundamental Interconnectedness of All Things (133893)

David Haig

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 305

The Fundamental Interconnectedness of All Things (133893)

David Haig

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 307

Biomechanics, Physiology and Musculoskeletal Biology (146785)

Andrew Biewener

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 307

Biomechanics, Physiology and Musculoskeletal Biology (146785)

Andrew Biewener

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 308

Evolution of Floral Developmental Mechanisms (142234)

Elena Kramer

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 308

Evolution of Floral Developmental Mechanisms (142234)

Elena Kramer

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 309

Evolution, Genomics, and Speciation (156737)

Jim Mallet

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 309

Evolution, Genomics, and Speciation (156737)

Jim Mallet

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 310

Metazoan Systematics (148072)

Gonzalo Giribet

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 310

Metazoan Systematics (148072)

Gonzalo Giribet

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 311

Ecosystem Ecology (143020)

Paul Moorcroft

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 311

Ecosystem Ecology (143020)

Paul Moorcroft

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 320

Biomechanics and Evolution of Vertebrates (131538)

George Lauder

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 320

Biomechanics and Evolution of Vertebrates (131538)

George Lauder

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 321

Evolution of Regeneration and Development (204093)

Mansi Srivastava

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 321

Evolution of Regeneration and Development (204093)

Mansi Srivastava

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 322

Temporal Community Ecology (204131)

Elizabeth Wolkovich

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 322

Temporal Community Ecology (204131)

Elizabeth Wolkovich

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 323

Advanced Vertebrate Anatomy (144847)

Stephanie Pierce

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 323

Advanced Vertebrate Anatomy (144847)

Stephanie Pierce

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 324

Molecular Evolution (131405)

Daniel Hartl

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 324

Molecular Evolution (131405)

Daniel Hartl

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 325

Marine Biology (140929)

Robert M. Woollacott

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 325

Marine Biology (140929)

Robert M. Woollacott

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 334

Behavioral Ecology (144912)

Naomi Pierce

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 334

Behavioral Ecology (144912)

Naomi Pierce

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 339

Whole-Plant Physiology (142435)

Noel Holbrook

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 339

Whole-Plant Physiology (142435)

Noel Holbrook

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 341

Coevolution (131524)

Brian Farrell

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 341

Coevolution (131524)

Brian Farrell

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 343

Microbial Ecology and Symbiosis (131235)

Colleen Cavanaugh

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 343

Microbial Ecology and Symbiosis (131235)

Colleen Cavanaugh

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 345

Biological Oceanography (141168)

James Mccarthy

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 345

Biological Oceanography (141168)

James Mccarthy

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 355

Evolutionary Developmental Biology (146798)

James Hanken

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 355

Evolutionary Developmental Biology (146798)

James Hanken

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 359

Paleobotany (131437)

Andrew Knoll

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 359

Paleobotany (131437)

Andrew Knoll

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 361

Somatic Evolution of Cancer (143495)

Martin Nowak

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 361

Somatic Evolution of Cancer (143495)

Martin Nowak

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 362

Research in Molecular Evolution (148190)

Scott Edwards

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 362

Research in Molecular Evolution (148190)

Scott Edwards

2016 Fall (4 Credits)

Schedule: W 0230 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 363

Plant Diversity and Evolution (148213)

Charles Davis

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 363

Plant Diversity and Evolution (148213)

Charles Davis

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 364

Ecological Physiology of Microbes (144166)

Peter Girguis

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 364

Ecological Physiology of Microbes (144166)

Peter Girguis

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 367

Evolutionary and Ecological Diversity (144580)

Jonathan Losos

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 367

Evolutionary and Ecological Diversity (144580)

Jonathan Losos

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 369

Molecular Genetics of Neuroscience (145004)

Yun Zhang

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 369

Molecular Genetics of Neuroscience (145004)

Yun Zhang

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 370

Mammalian Evolutionary Genetics (145035)

Hopi Hoekstra

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 386

Organismic and Evolutionary Plant Biology (148330)

William Friedman

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 386

Organismic and Evolutionary Plant Biology (148330)

William Friedman

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 387

Plant Evolution and Speciation (159947)

Robin Hopkins

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 387

Plant Evolution and Speciation (159947)

Robin Hopkins

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Organismic & Evolutionary Biol 390R

Writing fellowship and grant proposals for the biological sciences (204132)

David Haig

Yun Zhang

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 399

Topics in Organismic and Evolutionary Biology (148242)

David Haig

Yun Zhang

2017 Spring (4 Credits)

Schedule: W 0530 PM - 0829 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Presents the research interests and experiences of scientists in organismic and evolutionary biology. Specific topics treated vary from year to year.

Course Notes: Required of all first-year graduate students in Organismic and Evolutionary Biology.

Class Notes: W., 5-7 pm

Life Sciences 2

Evolutionary Human Physiology and Anatomy (123674)

Andrew Biewener

Kate Carter

Daniel Lieberman

George Lauder

2016 Fall (4 Credits)

Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Why is the human body the way that it is? This course explores human anatomy and physiology from an integrated framework, combining functional, comparative, and evolutionary perspectives on how organisms work. Major topics, which follow a life-course framework, include embryogenesis, metabolism and energetics, growth and development, movement and locomotion, food and digestion, stress and disease, and reproduction. Also considered is the relevance of human biology to contemporary issues in human health and biology.

Course Notes: This course replaces OEB 102. This course, when taken for a letter grade, meets the General Education requirement in Science of Living Systems. This course may not be taken Pass/Fail.

Class Notes: M., W., F., at 1, and three hours of laboratory/discussion weekly.

Philosophy 3X

Appearance and Reality (203452)

John Bengson

2017 Spring (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to central questions of philosophy and to basic methods of philosophical investigation, focusing on the relation between appearance and reality. Possible topics include the existence (or nonexistence) of material objects, the nature of time, the relation between consciousness and the physical world, the status of moral values, the identity of persons, the possibility of knowledge, and belief (or nonbelief) in God.

Ancient Ethics and Modern Morality (133181)

James Doyle

2017 Spring (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An examination of systematic thinking about ethics in the West, from the presocratics to now. Readings will include Plato, Aristotle, Stoics, Aquinas, Hobbes, Hume, Kant, Sidgwick, and some recent ethicists inspired by these. We will give some attention to the question of how our idea of morality, which is a distinctive way of thinking about ethics, emerged in the modern period.

Ancient Greek Philosophy (114416)

Jacob Rosen

2017 Spring (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

The origins of western philosophy. We will survey the fragmentary evidence remaining for the pre-Socratic philosophers, then spend most of the course examining questions raised and arguments put forward by Socrates (as portrayed by Plato), Plato, and Aristotle. What is it to learn, understand, and explain something? What are the most basic entities? What should be our highest aim in life? What is the difference between 'philosophy' and other (literary, political, religious, scientific) endeavors?

Class Notes: The Friday meeting for this course will be held at the discretion of the instructor.

Morality and the Good Life: An Introduction to Ethics (132738)

Jeffrey Behrends

2016 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

You probably want to live the best life for yourself. But what would that look like? Feeling pleasure, and avoiding pain? Having your desires satisfied? Maybe achieving knowledge, or securing fulfilling relationships? You might also care about living a moral life. But what would *that* look like? What actions are morally right or wrong, and what makes them that way? In this introduction to ethics, we'll begin by looking at three important theories of the good life: the pleasure theory, the desire-satisfaction theory, and the pluralist theory. We'll then turn to moral theories, investigating the relative strengths and weaknesses of those views that focus only on our actions' consequences, and those that reject this approach. In closing, we'll consider questions about the status of morality. What kind of judgment are we making when we say, for example, that something is morally wrong? Are there moral facts awaiting our discovery? If there are, how did they come to be - are they determined by humans and varying across cultures, like facts about the law or etiquette? Or perhaps determined by God? Or could they somehow have not been determined by anyone, standing as fundamental facts about reality?

Introduction to Feminist Political Philosophy (203261)

Regina Schouten

2017 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Work in feminist political philosophy is extraordinarily diverse. Some projects apply traditional philosophical tools and concepts to questions of particular feminist concern; others reject those tools and ideas altogether and propose alternatives allegedly better suited to theorizing about gender. Many regard "the personal is political" as the unifying insight of contemporary feminist philosophy. This will be the unifying theme of our study as well, as we work to better understand that slogan and explore its implications. We will begin by examining foundational work in contemporary political philosophy before turning to feminist challenges to that work. We'll see that the institution of the family remains widely regarded as the core of gender injustice. Accordingly, we'll pay special attention to the family, reading and thinking about such issues as marriage, parenting, and the gendered division of labor. We'll think about the role the family plays in sustaining gender inequality, consider several proposals for political interventions intended to make society more gender just, and ask whether those proposals constitute legitimate uses of political power. This will raise broader questions about whether and in what ways the institution of the family should enjoy a presumption against state interference. We'll finish up by exploring intersections between feminism and other issues of justice, including social class justice, race justice, and environmental justice.

Philosophy 101

Plato (156020)

James Doyle

2016 Fall (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

An examination of a range of Plato's dialogues, from shorter 'Socratic' conversations to 'Platonic' expositions of ambitious metaphysical theories. Topics will include the personality and philosophical activity of Socrates, Plato's account of his trial and death, Socrates' identification of virtue with a kind of knowledge and his related doctrine that everyone desires the good, his encounters with Sophists and teachers of rhetoric, Platonic theorizing about knowledge as a kind of recollection, the soul as structured and as immortal, and the famous Forms. Readings will include *Euthyphro*, *Apology*, *Crito*, *Protagoras*, *Meno*, *Gorgias*, and *Phaedo*.

Class Notes: Friday section will be held at the discretion of the instructor.

Philosophy 120

The Rationalists (111716)

Jeffrey McDonough

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The seventeenth and eighteenth centuries were among the most exciting and revolutionary periods in the history of philosophy. Among the most prominent philosophers working in that period, Descartes, Spinoza and Leibniz have traditionally been grouped together under the label "Continental Rationalists" in virtue of their embrace of systematic metaphysics and emphasis on rational reflection as a source of knowledge. This course aims to provide an overview of the development of early modern rationalism while exploring in detail a number of central issues, arguments and controversies. Topics will include philosophical methodology, skepticism, knowledge, substance, mind-body relations, and the metaphysical foundations of science.

Early Modern Metaphysics and Its Critics (Proseminar) (203454)

Anat Schechtman

2017 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An in-depth investigation of empiricist and skeptical critiques of traditional metaphysical notions of substance, essence, natural kinds, causation, and infinity in the 17th-18th centuries. Special attention will be paid to the writings of Bacon, Locke, Boyle, and Hume. To better understand and assess the debates, we will also take a close look at the texts of those metaphysicians who were the targets of serious criticism (e. g., Descartes, Spinoza, Leibniz, and representative scholastic authors).

Speech and Speech-Acts (Proseminar) (203445)

Richard Moran

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

We communicate with each other in all sorts of ways, both verbally and non-verbally, both directly and literally as well as indirectly and metaphorically, both consciously and intentionally as well as unwittingly. In this course we will be concerned with the question of what is distinctive about overt and direct speech and communication, and what kind of relation that establishes between two people in dialogue with each other. We will consider the nature of 'speech-acts' like 'telling' or 'promising' and Austin's theory of 'performative utterances'. And we will take up forms of indirect verbal communication such as implying or insinuating, as well as ways of speaking figuratively or metaphorically. Speech is a form of expression, but it is also an institutional or social act, and we will try to understand the relation between these aspects of verbal communication. Authors to be read may include Austin, Grice, Strawson, Searle, Hornsby, Saul, Benveniste, Sperber and Wilson.

Understanding (Proseminar) (203446)

John Bengson

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An investigation of central epistemological questions concerning the nature, varieties, and growth of understanding. How is understanding related to knowledge? Is one more valuable than the other, and if so, why? Does understanding require truth, or is it achievable also through falsehood? In what ways is understanding in theoretical disciplines (e.g., science and mathematics) similar to, or different from, understanding in other domains — for example, the practical understanding of a master carpenter or skilled athlete, or the aesthetic understanding of a virtuoso musician, or the ethical understanding of a moral exemplar?

Practical Reasons (203456)

Jeffrey Behrends

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Reasons are considerations that count for or against something - actions, in the case of practical reasons (as usually distinguished from beliefs, in the case of theoretical reasons). The notion of a practical reason has played a central role in ethical theorizing over the past several decades, and continues to enjoy close philosophical attention today. In this course, we'll first endeavor to get a clear sense of the general structure of practical reasons, and to disentangle them from nearby, but distinct, concepts. We'll then take a close look at several contemporary disputes about practical reasons. Primary among them is a question about how practical reasons are grounded: what makes it the case that something is a reason? Investigating this question will bring us into contact with debates about how reasons are related to desires, motivation, value, and moral requirements. We will also consider error-theoretic approaches to practical normativity, according to which there are no genuine practical reasons of the sort that most ethicists have in mind.

Philosophy 174A

Animals and Ethics (159744)

Christine Korsgaard

2016 Fall (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Do human beings have moral obligations to the other animals? If so, what are they, and why? Should or could non-human animals have legal rights? Should we treat wild and domestic animals differently? Do human beings have the right to eat the other animals, raise them for that purpose on factory farms, use

them in experiments, display them in zoos and circuses, make them race or fight for our entertainment, make them work for us, and keep them as pets? We will examine the work of utilitarian, Kantian, and Aristotelian philosophers, and others who have tried to answer these questions.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Educational Justice: Proseminar (203447)

Regina Schouten

2016 Fall (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

We subject children to around 18,000 hours of compulsory schooling. This course will explore the kinds of experiences children should have in schools and how those experiences should be distributed. We'll proceed by examining key topics pertaining to educational justice, including competing principles of justice in the distribution of education (egalitarian principles, sufficientarian principles, prioritarian principles, etc.); competing reform agendas; the justifiability and relative priority of different educational aims (education for citizenship, education for career preparation, education for social justice, etc.); the family and its role in educational inequality; and higher education access. In addition to the philosophical contributions to these conversations, we'll read enough of the relevant empirical literature to provide a working understanding of the structure and consequences of schooling in the US. Finally, we'll explore some case studies that look at specific choices that arise in real time for educational decision-makers. These case studies highlight the moral dimensions of decisions about discipline, charter schools, special education, and school districting.

Philosophy 188

Philosophy and Literature: Proust (127792)

Richard Moran

2017 Spring (4 Credits)

Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap: n/a

The course will attempt a sense of Proust's great novel, *In Search of Lost Time*, as a whole, necessarily in an abbreviated form, but with the aim of tracing the plan that Proust worked out when he began the project. The bulk of the reading will be in Proust's text, but there will be regular secondary readings in

philosophy and in the critical literature on Proust. Philosophical themes to be emphasized will include: the nature of subjectivity and the problem of other minds, the strategies of solipsistic desire, freedom and dependence, amour-propre and the desire for approbation, the nature and limits of the will (including 'involuntary memory'), personal identity and artistic vocation, the will to knowledge and self-deception.

Class Notes: Friday sections will be held at the discretion of the instructor.

Philosophy 202

Aristotle against the Atomists (203457)

Jacob Rosen

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Aristotle opens Book VI of his *Physics* by announcing the thesis that "nothing that is continuous can be composed of indivisibles." "Things that are continuous" include bodies, lengths, times and motions, and Aristotle offers a wealth of arguments for the infinite divisibility of all such entities. Our main goals in this seminar will be: (1) understand Aristotle's often difficult arguments and how they hang together; (2) see what we can learn about the earlier atomistic theories that Aristotle is rejecting, and the motivations for those earlier theories (Democritus, Leucippus, Plato...); (3) consider how atomists after Aristotle understood and responded to his arguments (Epicurus and his followers). We will also try to understand what is at stake in the debate over atomism — from simple questions like what it is for two things to touch, to larger questions like whether anything ever comes into being or perishes, and, if so, how. Since part of the debate seems to center around different responses to Eleatic arguments concerning the oneness of being and the impossibility of motion (Parmenides, Zeno), we will look at those arguments as well.

Primary texts will be made available both in Greek and in English translation. Required secondary readings will be in English, together with a few suggested readings in German for those who can read them. The

course will assume philosophical competence but no special knowledge of history or languages.

This course is a graduate research seminar on Early Modern Continental Rationalism. It will focus on reading and discussing cutting edge work being done on figures such as Descartes, Spinoza, Leibniz, and du Chatelet. In addition to preparing for and participating in weekly meetings, students will produce one substantive term paper. Prior enrollment in Phil 120 or an equivalent course is highly recommended. Students with insufficient background may wish to audit Phil 120 while enrolled in the course.

Explanation (Seminar) (203458)

Ned Hall

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This seminar will address questions about the nature and importance of explanation in science and philosophy. We will begin with a quick tour of the main theories of explanation philosophers have proposed over the last 60 years, including Carl Hempel's DN model of explanation, David Lewis's causal theory, and James Woodward's counterfactual theory. We will investigate the connections between explanation and unification, and between explanation and understanding. We will try to figure out what it could be for one explanation to be "deeper" than another. We will look into whether different sciences require different kinds of explanation, in particular, into the extent to which explanations in the social sciences and in mathematics fit theories driven by paradigms from other sciences, especially physics. And we will take up the question of whether and if so how explanation in the various branches of philosophy differs from explanation in the sciences.

Class Notes:

This course will also be offered at MIT with the course number of 24.810. Class meetings will alternate between the MIT and Harvard campuses.

Philosophy 259

Method, Essence, and Intuition in Metaethics (203459)

John Bengson

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This seminar will investigate methodology, essence, and intuition in metaethics. The focus of the seminar will be a book manuscript, co-authored by Terence Cuneo, Russ Shafer-Landau, and the instructor, that develops a non-naturalist, intuitionist, and essence-based version of moral realism. We will also read works by, among others, Blackburn, Gibbard, Korsgaard, Mackie, Smith, and Street. Specific topics include philosophical methodology and intellectual progress in metaethics (and beyond); the nature and status of data in philosophy (esp. metaethics); the essences of moral concepts and properties; whether some moral truths are conceptual truths; the supervenience of the moral on the non-moral; categorical reasons; the nature and epistemic status of moral intuition; debunking arguments; and moral disagreement. Terence Cuneo and Russ Shafer-Landau will each visit the seminar and discuss parts of the manuscript with participants.

Democracy and Human Rights (203450)

Amartya Sen

Eric Maskin

Cass Sunstein

2016 Fall (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

The course will analyze the theory and practice of democracy, and draw on law as well as the social sciences. Questions to be considered include: What are the advantages and drawbacks of democracy relative to other forms of government? What are the roles of fair elections and free public discussion? Can rights precede legislation? Are rights preconditions or constraints on democracy? What is the role of courts in a democratic society?

Note: Enrollment will be limited to about 25.

Class Notes: There are no specific course prerequisites, but students should have a background in formal reasoning; specifically, they should be able to understand formal models in the social sciences.

This seminar course will examine some of the way in which philosophical analysis and discussions of what the law is and ought to be can enrich each other. Students in the seminar will write several short papers focused on weekly readings and a longer final paper. For roughly half of the weeks, the readings will be drafts of works-in-progress by philosophers, political theorists, and law professors who will present their work in the seminar.

Course Notes: Offered jointly with the Law School as 2470 and the Kennedy School as DPI 260. Admission into this seminar is by permission of the instructor.

Physics

Subject: Physics

Physics 12B

Electromagnetism and Statistical Physics from an Analytic, Numerical and Experimental Perspective (109457)

Melissa Franklin

Anna Kales

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This is the second term of a two-semester introductory sequence that uses a combination of analytic and numerical methods to understand physical systems, to analyze experimental data, and to compare data to models. Topics include electrostatics and magnetostatics, electromagnetic fields, optics [all topics illustrated with applications to current technological and societal challenges], and an introduction to the physics of many-body systems and their aggregate properties such as entropy, temperature and pressure. The course is aimed at second year students who have an interest in pursuing a concentration in the sciences and/or engineering. The course structure includes lecture, discussion and laboratory components.

Course Notes:

May not be taken for credit by students who have passed Physics 15b or Physics 15c. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe.

Recommended Prep:

Physical Sciences 12a

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Core Curriculum	Science A
FAS: General Education	Science of the Physical Universe
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 15A

Introductory Mechanics and Relativity (111164)

Jenny Hoffman

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Newtonian mechanics and special relativity. Topics include vectors; kinematics in three dimensions; Newton's laws; force, work, power; conservative forces, potential energy; momentum, collisions; rotational motion, angular momentum, torque; static equilibrium, oscillations, simple harmonic motions; gravitation, planetary motion; fluids; special relativity.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15a. Topics include experimental design, model testing, error

analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep: Mathematics preparation at least at the level of Mathematics 1b concurrently is required. However, some elementary ideas from multivariable calculus may be used and students are encouraged to take Mathematics 21a concurrently.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS: General Education	Science of the Physical Universe
FAS: Core Curriculum	Science A
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 15A

Introductory Mechanics and Relativity (111164)

David J. Morin

Amir Yacoby

Carey Witkov

Keith Zengel

2016 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Physics 15B

Introductory Electromagnetism and Statistical Physics (111896)

David J. Morin

Amir Yacoby

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Electricity and magnetism. Topics include electrostatics, electric currents, magnetic field, electromagnetic induction, Maxwell's equations, electromagnetic radiation, magnetic fields in materials, and some basic notions in kinetic theory, entropy, temperature, and phase transition associated with electricity and magnetism.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15b. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep:

Physics 15a, Physics 16, or written permission of the Head Tutor in Physics. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Vector calculus, (div, grad and curl) are used extensively--in principle, this is taught in the course. Students taking Mathematics 21a concurrently will likely find that some concepts are introduced in Physics 15b before they have seen them in Mathematics 21a. Some students may wish to postpone Physics 15b until they have completed Mathematics 21a.

Additional Course Attributes:

Physics 15C

Wave Phenomena (124154)

Cora Dvorkin

Mara Prentiss

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Forced oscillation and resonance; coupled oscillators and normal modes; Fourier series; Electromagnetic waves, radiation, longitudinal oscillations, sound; traveling waves; signals, wave packets and group velocity; two- and three-dimensional waves; polarization; geometrical and physical optics; interference and diffraction. Optional topics: Water waves, holography, x-ray crystallography, solitons, music, quantum mechanics, and waves in the early universe.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15c. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Reasoning, but not both.

Recommended Prep:

Physics 15a, Physics 15b, or written permission of the Head Tutor in Physics. Mathematics preparation at least at the level of Mathematics 21b taken concurrently is required. Some prior knowledge of complex numbers (for example as taught in Mathematics 1b) is helpful. Linear algebra and differential equations are used extensively. Students taking Mathematics 21b concurrently will likely find that some concepts are introduced in Physics 15c before they have seen them in Mathematics 21b. Some students may wish to postpone Physics 15c until they have completed Mathematics 21b.

Physics 16

Mechanics and Special Relativity (111197)

*Howard Georgi**Carey Witkov**Keith Zengel*

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Newtonian mechanics and special relativity for students with good preparation in physics and mathematics at the level of the advanced placement curriculum. Topics include oscillators damped and driven and resonance (how to rock your car out of a snow bank or use a swing), an introduction to Lagrangian mechanics and optimization, symmetries and Noether's theorem, special relativity, collisions and scattering, rotational motion, angular momentum, torque, the moment of inertia tensor (dynamic balance), gravitation, planetary motion, and a quantitative introduction to some of the mind-bending ideas of modern cosmology like inflation and dark energy.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 16. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. Emphasis is placed on collaborative teaching and learning. Many class materials are Mathematics notebooks. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep:

Score of 5 on the mechanics section of the Physics C Advanced Placement exam, or equivalent. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Thorough knowledge of calculus of one variable and vectors plus some mathematical sophistication. The mathematical level will be significantly higher than that of Physics 15a. If in doubt, check the Canvas site ahead of time, or email the professor at hgeorgi@fas.harvard.edu, or just shop.

Physics 90R

Supervised Research (111672)

David J. Morin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Primarily for selected concentrators in Physics, or in Chemistry and Physics, who have obtained honor grades in Physics 15 and a number of intermediate-level courses. The student must be accepted by some member of the faculty doing research in the student's field of interest. The form of the research depends on the student's interest and experience, the nature of the particular field of physics, and facilities and support available. Students wishing to write a senior thesis can do so by arranging for a sponsor and enrolling in this course.

Course Notes: A list of possible faculty sponsors and their fields is available in Lyman 238 and on the Physics Department Web page. Course enrollment forms may be obtained from Lyman 238.

Class Notes: David Morin and members of the Department

Additional Course Attributes:

Physics 91R

Supervised Reading Course for Undergraduates (110569)

David J. Morin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Open to selected concentrators in Physics, Chemistry and Physics, and other fields who wish to do supervised reading and studying of special topics in physics. Ordinarily such topics do not include those covered in a regular course of the Department. Honor grades in Physics 15 and a number of intermediate-level courses are ordinarily required. The student must be accepted by a member of the faculty.

Course Notes: A list of possible faculty sponsors and their fields is available in Lyman 238 and on the Physics Department's website. Course enrollment forms may be obtained from Lyman 238.

Class Notes: David Morin and members of the Department

Additional Course Attributes:

Physics 95

Topics in Current Research (111967)

Masahiro Morii

Christopher Stubbs

2016 Fall (4 Credits)

Schedule:

W 0700 PM - 0859 PM

M 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

The goal of this tutorial is twofold. First, students will learn about a range of modern physics research topics from experts at Harvard as well as from one another. Every Wednesday evening a faculty member speaks on his/her area of research, preceded by assigned reading and a student presentation designed to introduce the basic physics, as well as important developments and burning problems at the frontiers of that particular research area. Second, the tutorial provides structured activities to help students develop practical skills for their future careers, expanding knowledge on unfamiliar subjects, participating in discussions, presenting and writing clearly about complex topics, and engaging in self and peer evaluation.

Course Notes: Primarily for junior and senior concentrators, however interested sophomores are welcome.

Class Notes: The course meets Monday afternoons, 3:00pm - 4:15pm, and Wednesdays, 7:00 pm - 8:59 pm.

Physics 123

Laboratory Electronics (124108)

Thomas Hayes

Michael Hegg

2017 Spring (4 Credits)

Schedule:

TR 0130 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

A lab-intensive introduction to electronic circuit design. Develops circuit intuition and debugging skills through daily hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. Moves quickly from passive circuits, to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters. The digital half of the course treats analog-digital interfacing, emphasizes the use of microcontrollers and programmable logic devices (PLDs).

Course Notes: Physics 123 is the same course as Physics 223; if you are a graduate student, please enroll in 223. Two sections will be offered, limited to 20 students per section. Physics 123 is also offered as Engineering Sciences 153. Students may not take both for credit. Undergraduate engineering students should enroll in Engineering Sciences 153. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe.

Physics for Future Presidential Advisors (120167)

John Doyle

2016 Fall (4 Credits)

Schedule:

WF 0130 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Uses physics to analyze important technologies and real world systems. Stresses estimation and "back of the envelope" calculations, as are commonly used by research physicists when addressing new problems and analyzing national and international policy issues. New physical concepts are introduced as necessary. Example topics: energy production and storage (solar, nuclear, batteries), nuclear physics, power and weapons, airplanes, spy satellites, rockets, fluids, health effects of radiation, risk analysis, mechanical design and failure, communication, computation, global warming. Emphasis is on developing physical intuition and the ability to do order-of-magnitude calculations.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe.

Recommended Prep:

Physics 15a, b, c, and mathematics at the level of Mathematics 21a. Physics 143a and 181 are very helpful, and may be taken concurrently.

Additional Course Attributes:

Physics 129

Energy Science (125656)

Lene Hau

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Non-fossil energy sources and energy storage are important for our future. We cover four main subjects to which students with a background in physics and physical chemistry could make paradigm changing contributions: photovoltaic cells, nuclear power, batteries, and photosynthesis. Fundamentals of electrodynamics, statistical/thermal physics, and quantum mechanics are taught as needed to give students an understanding of the topics covered.

Recommended Prep:

Physics 15a (or 16), 15b,c or 11a,b. Pre/co-requisite Physics 143a or Chemistry 160 or equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 140

Introduction to the Physics of Living Systems (127814)

Aravinthan Samuel

2017 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

We will discuss how theoretical and experimental tools derived from physics - e.g., statistical mechanics, fluid mechanics - have been used to gain insight into molecular and cellular biology including the structure and regulation of DNA, genomes, proteins, the cytoskeleton, and the cell. Students will gain an intensive introduction to biological systems, as well as physical and mathematical modeling.

Course Notes:

Given in alternate years. Lectures, problem sets, discussions. May not be taken for credit by students who have taken MCB 140. This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems or Science of the Physical Universe, but not both.

Recommended Prep:

Physics 15a,b,c.

Additional Course Attributes:

Physics 141

The Physics of Sensory Systems in Biology (121885)

Aravinthan Samuel

2016 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Living organisms use sensory systems to inform themselves of the sights, sounds, and smells of their surrounding environments. Sensory systems are physical measuring devices, and are therefore subject to certain limits imposed by physics. Here we will consider the physics of sensory measurement and perception, and study ways that biological systems have solved their underlying physical problems. We will discuss specific cases in vision, olfaction, and hearing from a physicist's point of view.

Recommended Prep:

Physics 11a, b or 15 a, b, required.

Additional Course Attributes:

Physics 145

Elementary Particle Physics (117719)

Gary Feldman

2016 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to elementary particle physics. Emphasis is on concepts and phenomenology rather than on a detailed calculational development of theories. Starts with the discovery of the electron in 1897, ends with the theoretical motivation for the Higg's boson, and attempts to cover everything important in between. Taught partly in seminar mode, with each student presenting a classic paper of the field.

Recommended Prep: Physics 143a. Physics 143b or equivalent is useful.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 191 Section: 001L

Advanced Laboratory (121993)

Isaac F. Silvera

Robert Westervelt

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Students carry out three experimental projects selected from those available representing condensed matter, atomic, nuclear, and particle physics. Included are pulsed nuclear magnetic resonance (with MRI), microwave spectroscopy, optical pumping, Raman scattering, scattering of laser light, nitrogen vacancies in diamond, neutron activation of radioactive isotopes, Compton scattering, relativistic mass of the electron, recoil free gamma-ray resonance, lifetime of the muon, studies of superfluid helium, positron annihilation, superconductivity, the quantum Hall effect, properties of semiconductors. The facilities of the laboratory include several computer controlled experiments as well as computers for analysis.

Course Notes: A substantial amount of outside reading is expected. Physics 191 is the same course as Physics 247; if you are a graduate students, please enroll in 247.

The course is offered in Science Center 204.

Recommended Prep: Physics 15a or 16, 15b, 15c. Physics 143a is highly recommended.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students

Physics 195

Introduction to Solid State Physics (112107)

Eugene Demler

2016 Fall (4 Credits)

Schedule:

MW 1200 PM - 0129 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The physics of crystalline solids and their electric, magnetic, optical, and thermal properties. Designed as a first course in solid-state physics. Topics: free electron model; Drude model; crystal structure and vibration (phonons); electrons in solids, Bloch theorem and band formation; metals and insulators; semiconductors and their applications; magnetism; electronic transport in low-dimensional systems.

Course Notes:

Designed as a first course in solid state physics for students with knowledge of elementary quantum mechanics.

Students who intend to take Applied Physics 295, and who have not previously taken a formal course in solid state physics, are strongly advised to take this course first.

Recommended Prep:

Elementary quantum mechanics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam

Physics 201

Data Analysis for Physicists (161201)

Vinothan Manoharan

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course covers what to do with experimental data after acquiring it. We will start with how to load, parse, filter, and visualize data using modern computational tools, then proceed to more advanced methods including Markov chain Monte Carlo and time-series analysis. Throughout, students will learn methods of statistical inference from both frequentist and Bayesian frameworks. Applications to particle physics, biophysics, condensed matter, applied physics, astrophysics, and more.

Course Notes:

This course is suitable for students with limited or rusty programming skills. Students with more advanced programming skills may wish to take APMTH 207 or ENG-SCI 255.

Recommended Prep:

Research experience commensurate with that of a first-year (or higher) PhD student in experimental physics. Students without such experimental experience are recommended to take Physics 191r or Physics 247r (or equivalent) first.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Physics 210

General Theory of Relativity (114266)

Daniel Jafferis

2017 Spring (4 Credits)

Schedule:

WF 0300 PM - 0429 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

An introduction to general relativity: the principle of equivalence, Riemannian geometry, Einstein's field equation, the Schwarzschild solution, the Newtonian limit, experimental tests, black holes.

Recommended Prep:

Physics 151 and 153, and Mathematics 21 or equivalents.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Physics 211R

Topics in Cosmology and Particle Physics (117201)

Lisa Randall

2017 Spring (4 Credits)

Schedule:

W 1100 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will be about particle physics and cosmology, focusing on those aspects of cosmology most relevant to people studying particle model building and phenomenology. Topics will include inflation, dark matter, and dark energy. The course will be seminar style, with presentations by the lecturer and by students. The aim is to gear up for topics relevant to current research.

Recommended Prep:

General relativity at level of Physics 210 or equivalent. Physics 253a helpful, but not required.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 212

Cosmology (203431)

Cora Dvorkin

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Graduate course on Physical Cosmology. Topics will include: the physics of Inflation, Cosmic Microwave Background anisotropies, evidence for Dark Matter, discovery of Dark Energy, CMB polarization (including gravitational waves and weak lensing), likelihood analysis, structure formation.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 220

Fluid Dynamics (110144)

L Mahadevan

2016 Fall (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Continuum mechanics; conservation of mass and momentum, energy; stress, kinematics, and constitutive

equations; vector and tensor calculus. Dimensional analysis and scaling. Navier-Stokes equations, Reynolds number. Solutions for simple flow states. Low Reynolds number flows; porous media flows; lubrication theory; gravity currents. Inviscid flows, Kelvin circulation theorem, Bernoulli integrals, Vortical flows. Waves in fluids; acoustics, shocks, water waves. Airfoil theory. Boundary layers. Flow instabilities. Mixing, and turbulence in unbounded and bounded flows.

Class Notes: Q Scores for 2015 Fall when this course was taught as ENG-SCI 220 were as follows: Overall: 3.9; Instructor's Mean Score for L. Mahadevan: 4.2; Would You Recommend: 3.5.

Recommended Prep: Familiarity with dynamics, vectors, multivariable calculus, and partial differential equations. An undergraduate course in fluid dynamics or other continuum mechanics is strongly recommended.

Physics 223

Electronics for Scientists (109346)

Thomas Hayes

Michael Hegg

2017 Spring (4 Credits)

Schedule:

TR 0130 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

An introduction to electronic circuit design intended to develop circuit intuition and debugging skills through daily design exercises, discussion and hands-on lab exercises. The approach is intensely practical, minimizing theory. Moves quickly from passive circuits to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters. The digital half of the course treats analog-digital interfacing, emphasizes the use of microcontrollers and programmable logic devices (PLDs).

Course Notes: Physics 223 is the same course as Physics 123; if you are an undergraduate student, please enroll in 123. Two sections will be offered, limited to 20 students per section.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Course Notes:

Physics 223 is the same course as Physics 123; if you are an undergraduate student, please enroll in 123. Two sections will be offered, limited to 20 students per section.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 223 Section: 002

Electronics for Scientists (109346)

Thomas Hayes

Bradley Hubbard-Nelson

2016 Fall (4 Credits)

Schedule:

WF 0130 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

An introduction to electronic circuit design intended to develop circuit intuition and debugging skills through daily design exercises, discussion and hands-on lab exercises. The approach is intensely practical, minimizing theory. Moves quickly from passive circuits to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters. The digital half of the course treats analog-digital interfacing, emphasizes the use of microcontrollers and programmable logic devices (PLDs).

Course Notes:

Physics 232

Advanced Classical Electromagnetism (112263)

Jacob Barandes

2017 Spring (4 Credits)

Schedule:

WF 0130 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Special relativity, relativistic field theories, gauge invariance, the Maxwell equations, conservation laws, time-independent phenomena, multipole expansions, electrodynamics and radiation theory, radiation from rapidly-moving accelerating charges, scattering and diffraction, and macroscopic averaged fields and propagation in matter. Additional topics may include relativistic particles with spin, coherent states, superconductors, accelerator physics, renormalization, and magnetic monopoles.

Recommended Prep:

Prerequisites: Physics 153 and Physics 143a, or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 247

Laboratory Course in Contemporary Physics (145024)

Isaac F. Silvera

Robert Westervelt

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Three experimental projects are selected representing condensed matter, atomic, nuclear, and particle physics. Examples: experiments on pulsed nuclear magnetic resonance, microwave spectroscopy, optical tweezers, and non-linear optics, optical pumping, Raman scattering, scattering of laser light, nitrogen vacancies in diamond, neutron activation of radioactive isotopes, Compton scattering, relativistic mass of the electron, recoil free gamma-ray resonance, lifetime of the muon, studies of superfluid helium, positron annihilation, superconductivity, the quantum Hall effect, properties of semiconductors. The facilities of the laboratory include several computer controlled experiments as well as computers for analysis.

Course Notes: A substantial amount of outside reading is expected. Physics 247 is the same course as Physics 191; if you are an undergraduate, please enroll in 191.

The course is offered in Science Center 204.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Physics 247

Laboratory Course in Contemporary Physics (145024)

Isaac F. Silvera

Ronald Walsworth

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0459 PM

Instructor Permissions: Instructor

Physics 251A

Advanced Quantum Mechanics I (111314)

C. Vafa

2016 Fall (4 Credits)

Schedule:

WF 0130 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Basic course in nonrelativistic quantum mechanics. Review of wave functions and the Schrödinger Equation; Hilbert space; the WKB approximation; central forces and angular momentum; electron spin; measurement theory; the density matrix; perturbation theory.

Recommended Prep: Physics 143a, b or equivalent, or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 251B

Advanced Quantum Mechanics II (111876)

Girma Hailu

2017 Spring (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Path integrals; identical particles and second quantization; time-dependent perturbations; quantized radiation field; absorption and emission of radiation; symmetry principles; the Dirac equation and the Dirac field; inelastic scattering.

Recommended Prep: Physics 251a.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Physics 253A

Quantum Field Theory I (122930)

Matthew D. Schwartz

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to relativistic quantum field theory. This course covers quantum electrodynamics. Topics include canonical quantization, Feynman diagrams, spinors, gauge invariance, path integrals, ultraviolet and infrared divergences, renormalization and applications to the quantum theory of the weak and gravitational forces.

Recommended Prep: Physics 143a,b or equivalents.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 253B

Quantum Field Theory II (115442)

Matthew D. Schwartz

2017 Spring (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

A continuation of Physics 253a. Topics include: the renormalization group, implications of unitarity, Yang-Mills theories, spontaneous symmetry breaking, weak interactions, anomalies, and quantum chromodynamics. Additional advanced topics may be covered depending on time and interest.

Recommended Prep: Physics 253a.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 264

Lie Algebras, Representations and Quantum Mechanics (203512)

Howard Georgi

2017 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Lie algebras and their representations are indispensable tools in quantum mechanics. Starting from the operator treatment of angular momentum, this course explores some of the (many) useful approaches to this subject with applications in various areas of physics.

Recommended Prep: Some quantum mechanics beyond the level of Physics 143a.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 268R

Special Topics in Condensed Matter Physics. Quantum Many-Body Systems (160744)

Eugene Demler

2017 Spring (4 Credits)

Schedule:

MW 1200 PM - 0129 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will review field theory methods and Green's function approach to quantum many-body systems. Subjects discussed will include interacting electron systems, electron-phonon interaction and superconductivity, polarons, systems with dissipation, nonequilibrium phenomena and Keldysh Green's functions.

Recommended Prep: Applied Physics 295a or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 271

Topics in the Physics of Quantum Information (121970)

Mikhail Lukin

2016 Fall (4 Credits)

Schedule:

MW 0930 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to physics of quantum information, with emphasis on ideas and experiments ranging from quantum optics to condensed matter physics. Background and theoretical tools will be introduced. The format is a combination of lectures and class presentations.

Recommended Prep: Quantum mechanics at the level of introductory graduate courses.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 285A

Modern Atomic and Optical Physics I (118734)

Gerald Gabrielse

2016 Fall (4 Credits)

Schedule:

MW 1200 PM - 0129 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to modern atomic physics. The fundamental concepts and modern experimental techniques will be introduced. Topics will include two-state systems, magnetic resonance, interaction of radiation with atoms, transition probabilities, spontaneous and stimulated emission, dressed atoms, trapping, laser cooling of "two-level" atoms, structure of simple atoms, fundamental symmetries, two-photon excitation, light scattering and selected experiments. The first of a two-term subject sequence that provides the foundations for contemporary research.

Recommended Prep: One course in quantum mechanics (143a and b, or equivalent).

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 287A

Introduction to String Theory (111191)

Xi Yin

2016 Fall (4 Credits)

Schedule:

WF 0300 PM - 0429 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Introduction to the perturbative formulation of string theories and dualities. Quantization of bosonic and superstrings, perturbative aspects of scattering amplitudes, supergravity, D-branes, T-duality and mirror symmetry. Also a brief overview of recent developments in string theory.

Recommended Prep: Physics 253a, b or equivalent.**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 287BR

Topics in String Theory (114008)

Xi Yin

2017 Spring (4 Credits)

Schedule:

WF 0130 PM - 0259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

A selection of topics from current areas of research on string theory.

Recommended Prep: Physics 287a.**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 289R

Euclidean Random Fields, Relativistic Quantum Fields and Positive Temperature (118733)

Arthur Jaffe

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

The course will give the reconstruction of relativistic quantum fields from Euclidean fields as well as the relation between representations of the Poincaré group to those of Euclidean group. Related topics are reflection positivity and Osterwalder-Schrader quantization, and supersymmetry, some of which will be covered.

Recommended Prep: Physics 253a.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 295A

Introduction to Quantum Theory of Solids (127980)

Bertrand Halperin

2017 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

Electrical, optical, thermal, magnetic, and mechanical properties of solids will be treated based on an atomic scale picture and using the independent electron approximation. Metals, semiconductors, and insulators will be covered, with possible special topics such as superconductivity.

Recommended Prep: Physics 181 and Applied Physics 195 or equivalent, and a graduate level quantum mechanics course similar to Physics 251a. (Physics 251b would be helpful and may be taken concurrently.)

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Physics 295B

Quantum Theory of Solids (127979)

Subir Sachdev

2016 Fall (4 Credits)

Schedule: WF 0300 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap: n/a

Theory of the electron liquid. Fermi liquid theory. Feynman diagrams, path integrals, and fluctuation dissipation theorem. Collective modes and screening in the electron liquid. Ferromagnetism and anti ferromagnetism. Superconductivity: BCS and Landau-Ginzburg theories. Kondo models and mixed valence metals.

Course Notes: Physics 295b is also offered as Applied Physics 295b. Students may not take both for credit.

Recommended Prep: Physics 251a, b, an introductory course in solid state physics, or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 315B

Topics in Theoretical Atomic, Molecular, and Condensed Matter Physics (145282)

Eric Heller

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 317A

Topics in Biophysics (119763)

Xiaowei Zhuang

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 317A

Topics in Biophysics (119763)

Xiaowei Zhuang

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 317B

Topics in Biophysics (119764)

Xiaowei Zhuang

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 317B

Topics in Biophysics (119764)

Xiaowei Zhuang

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 319A

Topics in Experimental High Energy Physics (113986)

Melissa Franklin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 319A

Topics in Experimental High Energy Physics (113986)

Melissa Franklin

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 319B

Topics in Experimental High Energy Physics (113987)

Melissa Franklin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 319B

Topics in Experimental High Energy Physics (113987)

Melissa Franklin

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 321A

Experimental Soft Condensed Matter Physics (112282)

David Weitz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 321A

Experimental Soft Condensed Matter Physics (112282)

David Weitz

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 321B

Experimental Soft Condensed Matter Physics (112283)

David Weitz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 321B

Experimental Soft Condensed Matter Physics (112283)

David Weitz

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 323A

Topics in Condensed Matter Physics (203753)

Ashvin Vishwanath

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 323A

Topics in Condensed Matter Physics (203753)

Ashvin Vishwanath

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 323B

Topics in Condensed Matter Physics (203754)

Ashvin Vishwanath

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 323B

Topics in Condensed Matter Physics (203754)

Ashvin Vishwanath

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 324A

Topics in Modern Astrophysics (204541)

Douglas Finkbeiner

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 30

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 324B

Topics in Modern Astrophysics (204542)

Douglas Finkbeiner

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 327A

Topics in Condensed Matter Physics (117548)

David Nelson

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 327A

Topics in Condensed Matter Physics (117548)

David Nelson

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 327B

Topics in Condensed Matter Physics (118814)

David Nelson

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 327B

Topics in Condensed Matter Physics (118814)

David Nelson

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 329A

Condensed Matter and Statistical Theory (143256)

Bertrand Halperin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 329A

Condensed Matter and Statistical Theory (143256)

Bertrand Halperin

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 329B

Condensed Matter and Statistical Theory (118337)

Bertrand Halperin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 329B

Condensed Matter and Statistical Theory (118337)

Bertrand Halperin

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 331A

Topics in String Theory (125320)

Xi Yin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 331A

Topics in String Theory (125320)

Xi Yin

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 331B

Topics in String Theory (125321)

Xi Yin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 331B

Topics in String Theory (125321)

Xi Yin

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 333A

Experimental Atomic Physics (112040)

Mara Prentiss

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 333A

Experimental Atomic Physics (112040)

Mara Prentiss

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 333B

Experimental Atomic Physics (112042)

Mara Prentiss

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 333B

Experimental Atomic Physics (112042)

Mara Prentiss

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 335A

Topics in the History and Philosophy of Physics (148180)

Gerald Holton

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 335A

Topics in the History and Philosophy of Physics (148180)

Gerald Holton

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 335B

Topics in the History and Philosophy of Physics (138414)

Gerald Holton

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 335B

Topics in the History and Philosophy of Physics (138414)

Gerald Holton

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 337A

Topics in Experimental High Energy Physics (114834)

Masahiro Morii

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 337A

Topics in Experimental High Energy Physics (114834)

Masahiro Morii

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 337B

Topics in Experimental High Energy Physics (114835)

Masahiro Morii

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 337B

Topics in Experimental High Energy Physics (114835)

Masahiro Morii

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 339A

Condensed Matter and Atomic Physics (120869)

Subir Sachdev

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 339A

Condensed Matter and Atomic Physics (120869)

Subir Sachdev

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 339B

Condensed Matter and Atomic Physics (120868)

Subir Sachdev

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 339B

Condensed Matter and Atomic Physics (120868)

Subir Sachdev

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 341A

Topics in Experimental Atomic and Condensed Matter Physics (111169)

Markus Greiner

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 341A

Topics in Experimental Atomic and Condensed Matter Physics (111169)

Markus Greiner

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 341B

Topics in Experimental Atomic and Condensed Matter Physics (118950)

Markus Greiner

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 341B

Topics in Experimental Atomic and Condensed Matter Physics (118950)

Markus Greiner

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 343A

Observational Cosmology and Experimental Gravitation (119051)

Christopher Stubbs

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 343A

Observational Cosmology and Experimental Gravitation (119051)

Christopher Stubbs

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 343B

Observational Cosmology and Experimental Gravitation (119052)

Christopher Stubbs

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 343B

Observational Cosmology and Experimental Gravitation (119052)

Christopher Stubbs

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 345A

Experimental Gravitation: Radio and Radar Astronomy (115102)

Irwin Shapiro

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 345A

Experimental Gravitation: Radio and Radar Astronomy (115102)

Irwin Shapiro

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 345B

Experimental Gravitation: Radio and Radar Astronomy (115113)

Irwin Shapiro

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 345B

Experimental Gravitation: Radio and Radar Astronomy (115113)

Irwin Shapiro

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 347A

Topics in Quantum Optics (115495)

Mikhail Lukin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 347A

Topics in Quantum Optics (115495)

Mikhail Lukin

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 347B

Topics in Quantum Optics (115525)

Mikhail Lukin

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 347B

Topics in Quantum Optics (115525)

Mikhail Lukin

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 349A

Topics in Theoretical Particle Physics (125315)

Matthew D. Schwartz

2017 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 349A

Topics in Theoretical Particle Physics (125315)

Matthew D. Schwartz

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 349B

Topics in Theoretical Particle Physics (125316)

Matthew D. Schwartz

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 349B

Topics in Theoretical Particle Physics (125316)

Matthew D. Schwartz

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 351A

Experimental Soft Condensed Matter and Materials Physics (120872)

Vinothan Manoharan

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 351A

Experimental Soft Condensed Matter and Materials Physics (120872)

Vinothan Manoharan

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 351B

Experimental Soft Condensed Matter and Materials Physics (120873)

Vinothan Manoharan

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 351B

Experimental Soft Condensed Matter and Materials Physics (120873)

Vinothan Manoharan

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 353A

Topics in Statistical Physics and Quantitative Molecular Biology (125788)

Erel Levine

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 353A

Topics in Statistical Physics and Quantitative Molecular Biology (125788)

Erel Levine

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 353B

Topics in Statistical Physics and Quantitative Molecular Biology (125789)

Erel Levine

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 353B

Topics in Statistical Physics and Quantitative Molecular Biology (125789)

Erel Levine

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 355A

Theory of Elementary Particles (110565)

Roy Glauber

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 355A

Theory of Elementary Particles (110565)

Roy Glauber

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 355B

Theory of Elementary Particles (121811)

Roy Glauber

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 355B

Theory of Elementary Particles (121811)

Roy Glauber

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 357A

Experimental Condensed Matter Physics (113916)

Robert Westervelt

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Subject: Physical Sciences

Physical Sciences 2

Mechanics, Elasticity, Fluids, and Diffusion (122575)

Logan S. McCarty

2016 Fall (4 Credits)

Schedule: TR 0930 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to classical mechanics, with special emphasis on the motion of organisms in fluids. Topics covered include: kinematics, Newton's laws of motion, oscillations, elasticity, random walks, diffusion, and fluids. Examples and problem set questions will be drawn from the life sciences and medicine.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep: Physical Sciences 1 (or Chemistry 7), Mathematics 1b, or the equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Science of the Physical Universe
FAS: Core Curriculum	Science A
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Physical Sciences 3

Electromagnetism, Circuits, Waves, Optics, and Imaging (122576)

Louis Deslauriers

Gregory Kestin

2017 Spring (4 Credits)

Schedule:

TR 0930 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is an introduction to electromagnetism, digital information, waves, optics and sound. Topics covered include: electric and magnetic fields, electrical potential, circuits, simple digital circuits, wave propagation in various media, microscopy, sound and hearing. The course will draw upon a variety of applications to the biological sciences and will use real-world examples to illustrate many of the physical principles described. There are six laboratories.

Course Notes:

This course is part of an integrated introduction to the physical sciences intended for students who plan to pursue a concentration in the life sciences and/or satisfy pre-medical requirements in Physics. May not ordinarily be taken for credit in addition to Physics 1b, 11b, or 15b. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep:

Physical Sciences 2 (or Physics 1a or 11a), Mathematics 1b, or equivalent.

Additional Course Attributes:

FAS: General Education	Science of the Physical Universe

Physical Sciences 12A

Mechanics from an Analytic, Numerical and Experimental Perspective (109274)

Christopher Stubbs

2017 Spring (4 Credits)

Schedule:

TR 0930 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This is the first term of a two-semester introductory physical science and engineering course sequence. The focus is on quantitative scientific reasoning, with the first term's exploration framed in the context of basic mechanics. Students will gain competence in both analytic (using pencil, paper and single-variable calculus) and numerical (using computer modeling) approaches to modeling simple physical systems and for the analysis of experimental data. Topics include kinematics, linear and rotational motion, forces, energy, collisions, gravitation, simple fluids and a brief introduction to waves. Examples are drawn from across the physical sciences and engineering. The course is aimed at first year students who have an interest in pursuing a concentration in the sciences and/or engineering. The course structure includes lecture, discussion and laboratory components.

Course Notes:

Physical Sciences 12a may not be taken for credit by students who have passed Physics 11a, 15a or 16. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Quantitative Research Methods in Population Health Sciences I (203329)

Tyler VanderWeele

Guenther Fink

Jarvis Chen

2016 Fall (4 Credits)

Schedule: TR 0330 PM - 0520 PM

Instructor Permissions: None

Enrollment Cap: n/a

This is the core year-long quantitative methods course for the Population Health Science PhD students at the School of Public Health. The course integrates methods and concepts from the various disciplines represented by Population Health Sciences to equip students with the methodological tools to conduct their own research as well as collaborate across fields of study and areas of specialization. The course will cover foundational statistical methods including linear and logistic regression, generalized linear models, survival analysis, longitudinal data analysis, and multilevel modeling. Discussion will be given to important concepts including study design, sampling, scientific inference, causal reasoning, measurement, and replication. The course will also provide an overview of a number of additional and sometimes more advanced methods including Bayesian statistics, big data methods, missing data, sensitivity analysis, propensity scores, time-varying exposures, interaction, mediation, instrumental variables, regression discontinuity designs, difference-in-difference methods, selection models, time series, bootstrapping, simulations, and meta-analysis. With these latter topics, emphasis will be placed on understanding the basic definitions, assumptions, and methodology. Students will be referred to further readings and courses to gain more detailed understanding. Various software resources will be used throughout the course. The course will prepare students to critically read through the empirical population health science literature, and to implement a number of different methods in their own research. Students must complete both parts of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

This course is reserved for first-year Ph.D. students in Population Health Sciences. Population Health Sciences Ph.D. students are required to register for both semesters of this course and to achieve a

final average grade of B+ or higher.

Cognitive Neuroscience (126551)

Daniel Schacter

George Alvarez

2016 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

How do our brains give rise to our minds? Specifically, how are mental processes related to neural activity? This course will explore these questions, as well as the methods by which cognitive neuroscience seeks to answer them. We will focus on processes within perception, attention, memory, language, action, emotion, and social cognition, and methods including neuroimaging, neuropsychology, and electrophysiology.

Course Notes: This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7) before enrolling in this course

Additional Course Attributes:

Attribute	Value(s)

Social Psychology (114178)

Fiery Cushman

2016 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to social psychological research and theory regarding everyday behavior, incorporating methods from the life sciences (neuroscience, genetics, evolutionary biology). Topics include: attitudes and social influence; obedience to authority; stereotyping, prejudice, and intergroup relations; emotion; interpersonal attraction; morality and prosocial behavior; and errors of everyday human judgment

Course Notes: This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or 1B=7) before enrolling in this course for all freshmen and sophomores and for all students completing a concentration or secondary field in psychology.

Additional Course Attributes:

Developmental Psychology: Psychology of Early Childhood (110776)

Jesse Snedeker

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to theories and findings in the psychology of early childhood, roughly the period from 18 months to 6 years. The course will cover attachment; pretense and imagination; theory of mind/autism; moral development; memory development; emotion and understanding emotion; vocabulary growth; cross-cultural variation; brain development; learning through dialogue; and children's religious concepts.

Course Notes: This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Class Notes: This is a completely revamped course with a different instructor than is reflected in Q scores. The course has open enrollment but a glitch requires that students request permission to enroll. All requests will be approved.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB = 7) before enrolling in this course. Not open to students who have taken SLS-15.

Psychology 971

Contemporary Issues in Psychology: Intensive Cross-level Analyses (113094)

Laura Chivers

2017 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Department **Enrollment Cap:** n/a

Examines selected issues and phenomena in contemporary psychological research. Special attention to examining topics from a variety of perspectives, to reading primary sources in the field, and to developing thinking, writing, research, and discussion skills. This tutorial, or Psychology 975, is required of concentrators upon entering the concentration, normally in the sophomore year. Letter graded.

Course Notes: Students may take this course before formally declaring Psychology as their concentration. Psy 971 and Psy 975 are interchangeable for Psychology requirements.

Class Notes: This course is taught entirely in sections, so a required first meeting of this course for sectioning will be held the first day of classes. For Spring 2017, attend one of two meetings on Monday January 23rd: 1-2pm or 5-6pm in WJH 1550.

Recommended Prep: Science of Living Systems 20 (or equivalent) should be taken before this course. STAT 101 or PSY 1900 should be taken in advance or concurrently.

Imagining the Future (119784)

2016 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Our ability to represent, simulate, and plan for the future in complex ways is one of the most pervasive cognitive capacities setting humans apart from our evolutionary ancestors. However, while it is true that thus capabilities enables us to engage in a range of highly adaptive behaviors (e.g. emergency preparedness), we are nonetheless strikingly flawed in our ability to predict our own future states (e.g. how terrible we'll feel after pulling an all-nighter). Why is it that we are so successful in some forms of future-oriented thought and so fundamentally terrible at others? This course will attempt to answer this question by examining prospection, the ability to think about - and plan for - the future. This seminar will provide an overview of the social cognitive abilities required to engage in prospection, discuss the role of future-oriented thought in our everyday lives, and highlight the psychological biases (both beneficial and detrimental) that come along with our confidence in our ability to predict the future.

Course Notes: Not open to students who have previously taken PSY 1855.

Class Notes: Instructor is Kristen Leimgruber

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

In the Presence of the Enemy: Social-Psychological Approaches to Intergroup Conflict (156039)

2016 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Conflicts begin in human minds -therefore understanding conflict requires the understanding of the influence of social-psychological dynamics-. In this course we will focus on social psychological concepts of intergroup conflict, such as identity, collective memory and stereotypes, and inquire how they propel groups towards conflict. We will also consider how understanding these processes can help prevent and resolve conflicts. For example, we will ask, how individuals reform as one identity group. What role does collective memory play in sustaining conflicts? Can contact and dialogue help to overcome conflict? Which specific circumstances are required for a successful conflict resolution?

Class Notes: Instructor is Mariska Kappmeier

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and PSY 15 before enrolling in this course.

The Social Brain (156640)

Laura Chivers

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Many believe that the human brain evolved to support the complex demands of interacting with other people. In this class, we will explore how our brains are wired to allow us to know ourselves, to know what other people are thinking, and predict what they might do, and to regulate our actions to most effectively interact with others. We will combine theories and findings from social psychology, evolutionary psychology, and neuroscience to work towards an understanding of the brain in a social context.

Class Notes: The instructor for this course in Spring 2017 is Katherine Powers, who can be reached at kpowers@fas.harvard.edu

Class Notes: The Q scores below ARE for the SAME INSTRUCTOR and course content and format as is offered this semester, even though the course number has changed and the head tutor is now listed as course head above.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and either PSY 14 or MCB 80 before enrolling in this course, or permission of instructor.

Psychology 980JB

Styles of Thought (108956)

Laura Chivers

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

We think all the time. But what are thoughts made up of? And what are the many different ways in which we think? Do we think in pictures or in words? When you're hungry, do you think about "food" or about "almond pancakes with Vermont maple syrup"? Do children think differently from adults? How does imagination affect our moral judgment? How do we prospect about the future? Is abstract thinking "deeper" or "better" than concrete thinking? Are pictures more "emotional" than words? And do situational factors play a role in the way we think, or is it all about stable individual differences?

The purpose of this course is to think about thoughts. We will give some answers to these and other fascinating questions about how people think, and what are the implications of the style of thought to perceptions, judgments, predictions, and actions towards the social world. Our goals are (1) to understand the cognitive processes that underlie different styles of thought, and the neural correlates of these mechanisms; (2) to compare different approaches to the concept of abstraction; (3) to consider under what circumstances people naturally use more abstract (versus more concrete) representations of information; and (4) to examine the expression of abstraction processes in the realm of social cognition.

Class Notes: The instructor for this course in Spring 2017 is Elinor Amit, who can be reached at elinor.amit@gmail.com

Class Notes: The Q scores below ARE for the SAME INSTRUCTOR and course content and format as is offered this semester, even though the course number has changed and the head tutor is now listed as course head above.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course.

The Origins and Evolution of Cognition: A Comparative Study of Human and Nonhuman Abilities (204475)

*Irene Pepperberg**Laura Chivers*

2017 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Most scientists agree cognition is widespread in nature and involves an organism processing information to solve problems (like avoiding predators, finding prey, attracting a mate, achieving shelter), and in humans higher-level reasoning and conceptualizing. Less clear are the origins and evolutionary basis of cognition-what evolutionary pressures were exerted that selected for such processing? Explores possible ways to answer this question with research in anthropology, neurobiology, philosophy, psychology, genetics, sociality, and other disciplines. Faculty from a variety of departments attend discussions in their areas of expertise and assist students in coming to their own conclusions.

Course Notes: Preference given to juniors in Psychology, MBB tracks, or MBB secondary field. Offered jointly with Mind, Brain, Behavior as MBB 980G. Only one of MBB 980G or PSY 980JC can be taken for credit.

Class Notes: The instructor for this course in Spring 2017 is Irene Pepperberg, who can be reached at impepper@wjh.harvard.edu

The Q scores for this course with Dr. Pepperberg as instructor are listed under MBB 980G.

Class Notes: The Q scores below ARE for the SAME INSTRUCTOR and course content and format as is offered this semester, even though the course number has changed and the head tutor is now listed as course head above.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Psychology 980JD

Psychology from Lab to Life: Harnessing Basic Science to Effect Change in Policy and Practice (204526)

Laura Chivers

2017 Spring (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

The majority of basic psychological research remains comfortably in scientific journals. But what if psychological findings could have broader impacts? For example, can what we know about information dissemination in social networks reduce bullying among adolescents? Can what we know about how the developing mind encodes numbers, shapes, and letters improve our teaching of mathematics and reading in schools? Can what we know about visual perception and attention improve our basic interactions with the physical world? This course explores how rigorously designed field experiments, relying on new methods, can transform basic psychological research and move psychology from lab to life.

Class Notes: The instructor for this course in Spring 2017 is Moira Dillon, who can be reached at mdillon@fas.harvard.edu

This course will NOT be taught by Laura Chivers.

This is a new course in Spring 2017.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Growing Up and Growing Old: Cognitive Changes in Childhood and Aging (127535)

Laura Chivers

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This seminar will focus on the profound cognitive changes of early childhood and old age. We will be especially interested in what such changes tell us about how the adult mind -- perched between childhood and old age -- is organized. Topics include: theories of development and theories of aging, changes in the neural substrate; the rise and fall of executive functions; conceptual gain and conceptual loss; expertise and wisdom; healthy aging and dementias.

Class Notes:

The instructor for this course in Spring 2017 is Deborah Zaitchik-Samet, who can be reached at zaitchik@mgh.harvard.edu

Dr. Zaitchik-Samet was the course instructor in all previous offerings of this course as well. The Q scores below ARE for the SAME INSTRUCTOR and course content and format as is offered this semester even though the course heads listed are different.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Psychology of Left and Right (160162)

2016 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

What are the origins of the culture war between the political Left and Right? How do psychobiology, upbringing, temperament and moral values shape this difference in political orientations? In this course, we will explore the psychological factors underlying political divisions as well as the role of our social networks and desire for group identity in maintaining and widening the divide. The goal of this course is to develop your empirical, theoretical and methodological understandings of psychological research

underlying the Left-Right conflict while providing you with tools to detect partisanship and to promote the cooperation and connection necessary for a well-functioning democracy.

Class Notes: Instructor is Sasha Kimel.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Psychology 980P

Social Factors in the Development of Psychopathology (110110)

2016 Fall (4 Credits)

Schedule:

M 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Does bullying lead to school shootings? Can Facebook cause depression? Are "fitspiration" communities dangerous? This course will review the role social factors (social support, social interactions, social functioning, and the broader social context of communities) relate to the development and maintenance of psychopathology on biological and behavioral levels. In the context of disorders such as schizophrenia, depression (including suicide), eating disorders, and post-traumatic stress disorder, this course will look at how social factors might contribute to the development of mental illness, as well as how social factors might be indicators of mental illness, and finally how social factors might mediate the severity of or even prevent the development of mental illness.

Class Notes: Instructor is Sarah Hope Lincoln.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and PSY 18 or PSY 1861 before enrolling in this course.

Eating Disorders (119717)

Laura Chivers

2017 Spring (4 Credits)

Schedule:

W 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

The goal of this course is to provide a comprehensive overview of DSM-5 feeding and eating disorders (EDs) with a primary focus on anorexia nervosa, bulimia nervosa, and binge eating disorder. We will

explore the etiology (i.e., biological and environmental factors), symptom presentation, and empirically supported treatments across these EDs. Additional topics will include cultural considerations, gender and EDs, medical complications, impact of media/social media, and novel directions and treatments for these disorders.

Class Notes: The instructor for this course in Spring 2017 is Rebecca Shingleton, who can be reached at rshingleton@gmail.com.
This course will NOT be taught by Laura Chivers. This is a new course in Spring 2016.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and PSY 18 or PSY 1861 before enrolling in this course.

Psychological Challenges of Adolescence and Early Adulthood (156563)

2016 Fall (4 Credits)

Schedule:

T 0630 PM - 0829 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This seminar will examine research on a wide range of developmental, social, and psychological processes that affect the mental health of adolescents and young adults. We will discuss factors that facilitate resilience during adolescence and the transition to adulthood (such as personality traits and economic resources), as well as risk factors (such as parental maltreatment and exposure to violence). We will also explore questions specific to disorders common during this developmental period, such as whether adolescent mood and anxiety disorders are unidimensional or bidimensional constructs, and how recent social and neurobiological research can enhance our understanding of the unique challenges faced by adolescents and young adults with ADHD. Throughout the course, we will discuss research on emerging trends in media use and Facebook, and the impact of these technologies on depression, anxiety, substance abuse, and cyberbullying.

Class Notes: Course instructor is Sarah Erb. Please contact her with any questions about the course.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and PSY 18 or PSY 1861 before enrolling in this course.

Psychology 980V

The Psychology of Being Rich or Poor (119716)

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

As many strive for the American Dream, the gap between the rich and poor continues to widen. Although economic inequality affects us all, resulting in greater societal dysfunction and lower national happiness, the consequences vary greatly depending on your social class. In this course, we will examine how being rich or poor differentially impacts our sense of self, our morality, our ways of thinking, our sense of being in control, our achievements, the biases that we face, and our health and well-being. We will also consider psychological interventions for reducing the consequences of this wealth gap and for promoting mutual understanding across the divide.

Class Notes: Instructor is Sasha Kimel.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Evolving Morality: From Primordial Soup to Superintelligent Machines (203129)

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

200

This course examines the evolution of morality on Earth, from its origins in the biology of unthinking cooperative organisms, through the psychology of intelligent cooperative primates, and into a future inhabited by machines that may be more intelligent and better organized than humans. We begin with foundational scientific questions: What is morality? Where does it come from, and what does it do? How is it implemented in our brains? We then apply our scientific understanding of morality to foundational moral and political questions: How should human societies be organized? How should we resolve the moral questions that divide us? Finally, we consider the distinctive moral challenges posed by increasingly powerful artificial intelligence. Can machines (such as self-driving cars and military "drones") be programmed to behave morally? Will artificial intelligence displace human labor? If so, how can we adapt? Could machines displace humans entirely? If so, how can we stay in control? If machines do take over, will they be our conquerors or our children?

Course Notes:

Not open to students who have taken PSY 2250. This course, when taken for a letter grade, meets the General Education Requirement for Ethical Reasoning.

Psychology of Women (110216)

Nicole Noll

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

How does being a woman affect our behavior, our evaluations of ourselves, and our interactions with others? This course examines psychological science on women and girls in western industrialized societies, addressing such topics as gender stereotypes, girlhood, women and work, relationships, pregnancy and motherhood, mental health, violence against women, and women in later adulthood. We will consider these topics through an understanding of gender as a social construction, being mindful of the intersections of gender, sexuality, class, and race. Although focused on women's lives and experiences, this course is highly relevant to people of all genders.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 18, or Science of Living Systems 15 before enrolling in this course.

The Application of fMRI in Cognitive Neuroscience Research (126620)

Yaoda Xu

2017 Spring (4 Credits)

Schedule:

M 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

Functional magnetic resonance imaging (fMRI) is one of the most widely used methods in cognitive neuroscience research. In this course, students will learn the basics of fMRI research and gain hands-on experience in conducting fMRI experiments. In the first part of the course, students will have an overview of the fMRI methods, including how fMRI works, basic designs of fMRI experiments, fMRI data collection, analysis and interpretation, and current applications of fMRI in cognitive neuroscience research. In the second part of the course, students will design and conduct fMRI experiments and analyze fMRI data.

Course Notes: Open to graduate students and advanced undergraduates with permission of instructor.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 18, Science of Living Systems 15, or MCB 80 before enrolling in this course.

Music and the Mind (160684)

Olivia Kang

2017 Spring (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Music is universal, pervasive in our everyday lives, and compelling. How does music make our emotions soar, spark our creativity, and influence our relationships and interactions with others? This course will examine how the brain creates and experiences music, how music in turn shapes our brains and tunes our

ability to engage with our external environment, and what music reveals about the ability of the human brain to co-opt evolutionarily ancient mechanisms for seemingly "unique" human faculties. We will cover the relationship between music and emotions, movement, creativity, and sociality.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Your Brain on Drugs: Psychopharmacology (122224)

Scott Lukas

2016 Fall (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to how drugs affect mood, sensation, consciousness, and other psychological and behavioral functions in both healthy and disease states. Introduces concepts in neuroscience and pharmacology to understand how drugs are used to treat drug abuse, psychiatric disorders and why individuals use recreational drugs. Covers all CNS drugs, including antidepressants, antipsychotics, alcohol, and both licit and illicit drugs of abuse. Debates controversial topics such as research with psychiatric populations, diagnosing ADHD, teenage suicide, marijuana legalization, and needle exchange programs.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 18, or MCB 80 before enrolling in this course.

Modern Neuroanatomy (203208)

Randy Buckner

2017 Spring (4 Credits)

Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

How does the global architecture and local organization of brain systems support behavioral and cognitive functions? In this class, classical and newer neuroanatomical discoveries will be discussed that cover what defines brain areas; how areas are organized into parallel, distributed circuits; how distinct areas and systems are organized; and how anatomical form relates to function. Anatomy in the human brain and from model systems (worm, mouse, barn owl, and monkey) will be used to illustrate principles. Newer

techniques and analytical approaches will be discussed including micro-scale and macro-scale connectomics. The goal of this class is to survey examples of how emerging understanding of neuroanatomy provides insight into function. Each class will consist of lecture and discussion.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 18, or MCB 80 before enrolling in this course, or permission of instructor.

Brain Damage as a Window into the Mind: Cognitive Neuropsychology (116622)

Alfonso Caramazza

2016 Fall (4 Credits)

Schedule:

T 0130 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Examines the patterns of perceptual, motor, cognitive, and linguistic impairments resulting from brain damage. The focus is on the implications of the various types of neuropsychological deficits (such as visual neglect, dyslexia, and aphasia) for theories of the mind and the functional organization of the brain.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14 or MCB 80 before enrolling in this course.

Foundations of Cognitive Neuroscience Research (121887)

Randy Buckner

2016 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Intended for undergraduates or those with limited background in cognitive neuroscience. Students will attend and participate in laboratory research and in a seminar that includes discussion of active scientific projects, recent important journal articles, and didactic lecture on technical aspects of methods central to cognitive neuroscience research. Readings will be assigned that survey basic principles of system neuroscience, cognitive science, and methods including functional MRI, MEG, and single unit physiology.

Course Notes: Limited to students involved in research.

Class Notes: To express interest in enrollment, please email the instructor at

Cognitive and Neural Aspects of Object and Action Knowledge (127902)

Alfonso Caramazza

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Knowledge of objects and actions encompasses their perceptual and motor properties as well as more abstract properties such as information about their function (e.g., what they are used for, the goal of an action). How is this knowledge represented and organized in the brain? We will read and discuss key papers on object and action representation and critically evaluate results from behavioral, neurophysiological, neuropsychological, neuroimaging, and computational studies. The seminar will provide a critical review of the current literature and identify important challenges that await future research.

Course Notes:

Graduate students are welcome to enroll.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14 Cognitive Neuroscience or MCB 80 Neurobiology of Behavior before enrolling in this course.

Additional Course Attributes:

Attribute	Value(s)

Psychology 1401

Computational Cognitive Neuroscience: Building Models of the Brain (160656)

Samuel Gershman

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

"What I cannot create, I do not understand." This course applies Richard Feynman's dictum to the brain, by teaching students how to simulate brain function with computer programs. Special emphasis will be placed on how neurobiological mechanisms give rise to cognitive processes like learning, memory, attention, decision-making, and object perception. Students will learn how to understand experimental data through the lens of computational models, and ultimately how to build their own models.

Recommended Prep:

Students be comfortable with a numerical programming language (e.g., Python, Matlab, R). Psychology concentrators should have taken SLS 20 and at least one course from PSY 13, PSY 14, PSY 15, PSY 18, SLS15, or MCB 80

Additional Course Attributes:

Attribute	Value(s)

Psychology 1451

Debugging the Brain: Computational Approaches to Mental Dysfunction (203211)

Samuel Gershman

2017 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course examines recent work applying computational models to mental disorders. These models formalize psychopathology in terms of breakdown in fundamental neurocognitive processes, linking normal and abnormal brain function within a common framework. Computational modeling has already begun to yield insights, and even possible treatments, for a wide range of disorders, including schizophrenia, autism, Parkinson's, depression, obsessive-compulsive disorder, and attention-deficit hyperactivity disorder. The course will consist of weekly readings from the primary literature, with one student leading the discussion of each paper

Course Notes: Open to graduate students and advanced undergraduates, with permission of instructor.

Recommended Prep: PSY 18 or PSY 1401.

The Clever Human Brain: How we Control the Flow of Information and Make Good Decisions (203658)

Yaoda Xu

2016 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Vital to any intelligent system is the ability to extract useful information from our surroundings and use it to make good judgements and decisions. What clever tricks does our brain use to accomplish this task? In this seminar we will have an in-depth examination of how our brain gates the flow of information with attentional control, how it encodes and stores goal-directed information in working memory, and how it encodes values, resolves conflicts and makes good decisions.

Recommended Prep: Science of Living Systems 20 or equivalent and one of either MCB 80, Psy 14, PSY 1401, or other neuroscience or related experience by permission of instructor.

Cultural Psychology: Diverse Identities in the US and Beyond (107451)

Sasha Kimel

2017 Spring (4 Credits)

Schedule:

MW 0400 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

How does your nationality, social class, race/ethnicity, gender, faith and politics change the way you think, feel and behave? This course explores how your cultural background shapes your sense of self, emotions, motivation, decision-making and relationships. We will talk about God, sex, politics, violence and how our culture impacts the names we give our children. The goal of this course is to help you gain a better understanding of the ways in which human culture and the human psyche interact while enhancing your ability to promote greater intercultural harmony and to thrive in our increasingly multicultural and globalized world.

Course Notes: Not open to graduate students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Psychology of Close Relationships (107602)

Holly Parker

2017 Spring (4 Credits)

Schedule:

M 0730 PM - 0929 PM

Instructor Permissions: Instructor

Enrollment Cap:

130

This course is an in-depth exploration of close relationships. Examples of topics to be covered include the biological bases of attraction; relationship formation; the end of relationships through break-up, divorce, or death; relationship satisfaction; deception; gender roles; same-sex relationships; loneliness; relationships and well-being; and public perceptions about relationships. You will have an opportunity to explore these topics primarily through critical examination of the empirical literature as well as through popular press.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Groups and Networks: How Others Shape our Behavior, Beliefs, and Motivations (160683)

Olivia Kang

2016 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

We are an intensely social species. We have vast and complex social networks, connect with strangers for common goals, and gain a sense of identity through our "in group." Understanding the human mind therefore means understanding how we influence and are influenced by the larger social web around us. In this course, we will examine empirical research that reveals how groups work -- how they can make us smarter or dumber, how we form social bonds, how the making of "us" also means the making of "them," and how our social networks transmit everything from democracy to disease.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course.

Social Synchrony: On the Same Wavelength (160685)

Olivia Kang

2017 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Everyone longs for deep connection with others. But is connection more than a feeling? Common expressions describe social connection as being "on the same wavelength", "marching to the same beat", or becoming "one" with another person. This course will examine the ways in which these expressions are grounded in biological truth. We will cover topics such as: how do we synchronize our brains and bodies with others in our social environment, and what do these concordances reveal about the quality of our relationships? We will also examine how rapport can be reverse-engineered by manipulating synchrony in surprisingly simple ways.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Self Regulation and the Pursuit of Personal Goals (160696)

Amy Dent

2016 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Have you ever abandoned a New Year's resolution? Do you find yourself flipping through Facebook as a final exam nears? These common experiences can be explained by self-regulation, an exciting yet elusive construct that has captured the attention of researchers across psychology. In this course, students will explore the widespread influence of self-regulation through diverse scholarly sources accompanied by spirited discussion. Spanning several subdisciplines of psychology to address its hottest topics from the theoretical and empirical lens of self-regulation, we will divide the course by its many domains of practical

relevance (e.g., behavior, emotion, learning) and apply them to students' own lives.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY18, or Science of Living Systems 15 before enrolling in this course.

How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies (203916)

Bethany Burum

2016 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Why do our ideologies change when we are put in positions of power (e.g., victim dehumanization), or subordination (e.g., Stockholm Syndrome), or with peers with a different opinion (e.g., conformity)? Why are our moral and political ideologies so different across time and culture (e.g., the ideologies of ISIS members compared to Americans)? Why do we claim that our morals are logically justifiable when we cannot justify them (e.g., moral dumbfounding)? This course will explore the hidden incentives that can explain these and many other puzzling features of our beliefs and ideologies. Evidence from psychology, as well as philosophy, economics, history, and current events (including the election cycle), will demonstrate the crucial way that incentives outside of our awareness shape our beliefs and ideologies.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course; or, permission of instructor.

Psychology 1576

But Why?: Ultimate Explanations for the Quirks of the Mind (203917)

Bethany Burum

2016 Fall (4 Credits)

Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Social psychology has documented many surprising features of the human mind, providing robust evidence that people deceive themselves, are systematically overconfident, believe implausible things to avoid inconsistency, and so on. Explanations often focus on proximate psychological mechanisms (e.g., we avoid inconsistency because we find it uncomfortable). But behind every proximate mechanism is an ultimate explanation (why is inconsistency uncomfortable?)—why did evolution or learning lead us to be this way? This course will examine proximate and ultimate explanations for classic social psychological

phenomena and the insight that ultimate level explanations add, with a focus on how to test ultimate explanations convincingly

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course; or, permission of instructor.

The Invisible Hand: What Game Theory Reveals About Social Behavior (203927)

Bethany Burum

2017 Spring (4 Credits) **Schedule:** TR 1130 AM - 1259 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

What happens when the benefits of one strategy depend on the strategy chosen by another? From doing favors to driving on the right side of the road, this interdependence characterizes much of human social behavior, and game theory is the tool designed to reveal what results. This course will draw on models from game theory and evolutionary dynamics to explain some of the most puzzling aspects of our psychology, including why we speak indirectly, why people end up in feuds over trivial resources, and where our moral intuitions come from. No prior knowledge of game theory or evolutionary dynamics is required.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 1579

Self-reflection: Excessive Self-Interest versus the Quiet Ego (203980)

Katrina Jongman-Sereno

2017 Spring (4 Credits) **Schedule:** R 0200 PM - 0359 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Human's capacity to self-reflect is incredibly adaptive – it allows us to plan for the future, deliberately control our behavior, evaluate ourselves, introspect, and take others' perspectives. But, self-reflection has a dark side as well that underlies depression, anxiety, rumination, and egotism. This course examines how self-reflective biases such as self-preoccupation, self-interest, and egocentrism contribute to feeling superior about one's point of view, being unwilling to recognize that one's opinions may be incorrect, behaving in ways that are selfishly inconsiderate and antisocial, and having emotional overreactions to

trivial transgressions. In addition, this class examines how these negative consequences can be reduced through a "quiet ego," a way of living characterized by less self-reflection, self-focus, and self-centeredness. Empathy, altruism, morality, humility, self-compassion, flow, mindfulness, authenticity, and forgiveness will be examined.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Impression Management and Social Influence (203983)

Katrina Jongman-Sereno

2017 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course will focus on the private and public parts of the self – what people keep to themselves versus show others. Specifically, we will focus on the role of impression management in determining behavior—how does the presence of other people change one's behavior? What are the ways in which people manage the impressions others form of them? What is at stake when people try to make certain impressions on others? We will examine cognitive, emotional, and relational precursors in professional and social contexts. We will cover issues pertaining to professional success, forming and maintaining relationships, and engaging risky behavior, as well as what happens when people are placed in situations in which they attempt to convey conflicting impressions.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Psychology 1661

Citizens in the crib: Children's emerging sense of fairness and justice (203925)

Felix Warneken

2017 Spring (4 Credits)

Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

Is human nature selfish? How do we learn to tell right from wrong, good from evil, fair from unfair? Can we overcome prejudice and bias? Can we predict who will be a good citizen and who will become a psychopath? These are fundamental questions for all human societies, and also questions that have motivated recent research in the behavioral sciences investigating at the origins and the development of moral judgment and conduct. In this seminar, we will read state-of-the-art literature from developmental psychology and related fields that use empirical methods to address the roots of human nature. This course is discussion-based, with the goal of bringing new ideas (your ideas!) to bear on tricky questions that are still unresolved. Emphasis is put on reading the original literature, writing short weekly response papers in preparation for class, and engage in lively discussions.

The course is multidisciplinary in nature and relevant to students from different disciplines that can provide their unique perspectives, including Psychology, HEB, HGSE, Sociology, Economics, Philosophy, and other social sciences.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Psychology 1707

Personality and Self-Knowledge (203926)

Katrina Jongman-Sereno

2016 Fall (4 Credits)

Schedule: MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 40

This course focuses on the role that personality plays in determining behavior. Cognitive, emotional, and motivational aspects of personality will be covered. For example, what leads people to be rigid in their beliefs versus open to new ideas and experiences? Why are some people motivated by money and others are motivated to form relationships? Topics include: self-knowledge – how well do we know ourselves? What do we know about ourselves? How well do others know us?; personality stability and change – who are you if your personality is not stable?; maladaptive personalities – both in the "normal" range as well as personality disorders. This course takes a modern approach to personality and also introduces methodological advances and techniques such as using smart phones to record data and room observation – what can you tell about someone from their living spaces and belongings?

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Anxiety Disorders (114346)

Richard McNally

2017 Spring (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Concerns current theory and research on the etiology and treatment of anxiety disorders (e.g., panic

disorder, obsessive-compulsive disorder, social phobia, post-traumatic stress disorder). Cognitive, behavioral, and biological approaches are emphasized.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and PSY 18 Abnormal Psychology or PSY 1861 Developmental Psychopathology.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Psychology 1852

Clinical Psychology in Everyday Life (110203)

Lauren Santucci

2017 Spring (4 Credits)

Schedule: R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 40

The goal of this course is to give you exposure to the types of evidence-based psychological interventions available for many clinical and non-clinical conditions, such as sadness, anxiety, substance use, insomnia, pain, and arguments with your significant other. While this seminar emphasizes intervention research in the context of children and adolescents, the principles are often applicable across age groups.

Through this seminar, you will learn to notice and apply principles of psychological intervention to the world around you, not only in theory but also in practice. The seminar is not a self-help program or a training program for providing therapeutic services to others. Instead, the weekly discussions, exercises, and assignments will help you view the world through the lens of a scientist-practitioner – and apply those insights to everyday life in a scientific manner.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and PSY 18 before enrolling in this course. PSY 18 must be taken prior to enrolling in this course, not concurrently.

Psychology 1858

Stress, Coping, and Resilience (156561)

Evan Kleiman

2016 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 40

The goal of this course is to give an in-depth understanding of the theoretical and empirical work on stress (e.g., negative life events, psychological and physiological stress), coping, and resilience. Theories of

stress will be discussed from social, cognitive, and biological perspectives. Major focus will be given to the study of resilience to stress and related topics (e.g., psychopathology, self-injury) through the lens of positive psychology. By the end of the course, students will understand the causes, course, and consequences of stress and resilience to stress.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and PSY 18 or PSY 1861 before enrolling in this course.

Psychology 1900

Introduction to Statistics for the Behavioral Sciences (118254)

Max Krasnow

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Provides a conceptual and practical introduction to statistics used in psychology and other behavioral sciences. Covers basic topics in statistics including: measures of central tendency and variability; probability and distributions, correlations and regression, hypothesis testing, t-tests, analysis of variance, and chi-square tests. Includes a lab section with instruction in statistical analysis using a computer program.

Course Notes: Open to freshmen with permission of instructor. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: M, W, at 10, and an additional lab to be arranged

Additional Course Attributes:

Attribute	Value(s)

Evan Kleiman

2017 Spring (4 Credits)

Schedule:

M 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

40

This is a laboratory course only. Our goal is for you to master the essentials of behavioral experimentation through a succession of projects, starting with a small number of fundamental paradigms that can be used

in many areas of psychology, culminating with a larger final project. Emphasis will be on acquiring practical laboratory skills and more abstract conceptual tools. Basic aspects of data exploration and analysis will be covered. A high value will be placed on the communication of results through effective visual graphics in oral and written reports.

Class Notes: There will be a required 2.5 hour lab session scheduled for Wed. 7-9:30 p.m. If the enrollment permits a second section, it will be held Thurs. 2:30-5. Students must be able to fit one or the other into your schedule.

Recommended Prep: One of Psychology 1900, Statistics 100, 101, 104, or the equivalent.

Psychology 2070

Psychometric Theory and Method Using R (204369)

Patrick Mair

2017 Spring (4 Credits)

Schedule:

W 0930 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

By its classical definition, Psychometrics is concerned with the theory and techniques of psychological measurement. In this class we will cover a wide variety of modern psychometric methods; a big portion of them going beyond the classical psychometrics definition boundaries.

We start the class with a variety of exploratory scaling methods (units 1-5) where the aim is to scale and visualize association patterns in complex, multivariate datasets. Such techniques include principal components analysis (PCA), correspondence analysis (CA), G₂ models, multidimensional scaling (MDS), and biplots. There will also be a unit on networks where we cover basic (social) network analysis as well as more advanced techniques such as latent networks.

In the second part of the class (units 7-10) we focus on some classical psychometric approaches. The starting point is path models (which also include mediator/moderator models as special cases) which will then be extended to latent variable path models such as structural equation models (SEM). Subsequently, we will have two units on item response theory (IRT), which represents a large family of methods for scale construction and scale evaluation. We will cover unidimensional as well as multidimensional IRT models.

The third part of the class (units 11-12) focuses on the analysis of functional magnetic resonance imaging (fMRI) data. We will learn how to work with big datasets in R, how to obtain a parametric map through a general linear model χ^2 , and how to deal with the huge multiple testing problem. Subsequently, the last unit deals with multivariate fMRI methods such as independent components analysis (ICA) and some aspects of multi-voxel pattern analysis (MVPA) such as representational similarity analysis (RSA).

All topics covered will be supported by corresponding computations and illustrations in R. Basic R knowledge is required for this class. Lab units will be scheduled if needed.

Recommended Prep: The Psychology Department requires that both Harvard graduate and

undergraduate students have completed Psych 1950 (or an equivalent course), as well as having basic R knowledge

Social Cognitive Development: Research Seminar (125976)

Felix Warneken

2017 Spring (4 Credits)

Schedule:

F 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

In this year-long lab-course, you will have the opportunity to participate in research on social behaviors in children. We are studying the origins of our sense of fairness, how children cooperate with others, and how they judge behaviors as moral and immoral. We take a developmental and evolutionary perspective, drawing on insights from psychology, anthropology, and primatology. You will work closely with graduate students and other senior lab members in developing experiments and running studies with children from toddlerhood into school-age. In addition to data collection, students learn how to code behavioral data via video. We also hold weekly lab-meetings to discuss ongoing projects and read the relevant literature.

Please visit our website to learn more about our research and how to join our lab:

<https://software.rc.fas.harvard.edu/lds/research/warneken/research/>

Course Notes: Open to all undergraduates with permission of instructor.

Class Notes: For information on this lab, contact the instructor at warneken@wjh.harvard.edu

Recommended Prep: For undergraduates, Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 18 or Science of Living Systems 15.

Psychology 2390

Advanced fMRI Analysis (203089)

2016 Fall (4 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap: 30

When approaching functional neuroimaging data, the landscape of possible analysis techniques (and their do's and don'ts) is constantly changing. This course will have both lab-style and lecture formats, to discuss the current cutting edge analyses methods, and to explore in detail the specific analysis challenges that you as an fMRI practitioner are facing in your current neuroimaging research projects. Students are strongly encouraged to have their own fMRI data set, and must have basic familiarity with the fMRI methodology and proficiency with MatLab/R.

Recommended Prep:

Students are strongly encouraged to have their own fMRI data set, and must have basic familiarity with the fMRI methodology and proficiency with MatLab/R.

Psychology 2464R

Research Methods in Child & Adolescent Clinical Psychology (124970)

John Weisz

2017 Spring (4 Credits) **Schedule:** W 1200 PM - 0129 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

This course is designed to give you exposure to the concepts, as well as the nuts and bolts, of research in clinical psychology of childhood and adolescence. There is a special emphasis in this course (as in the lab) on intervention research addressing youth depression, anxiety, and conduct-related problems and disorders. If you are a psychology concentrator at Harvard, you may have already taken classroom-based courses covering theories and methods that guide research in clinical psychology, such as Abnormal Psychology and Developmental Psychopathology. You may also have taken courses that introduced you

to the types of statistical analyses (Psych 1900) and research methods (Psych 1901) used in psychological research. In this course, we will build on the foundation you received in such courses by applying what you have learned to the conduct of specific research projects.

In this class, you will participate in several aspects of the clinical research process via your active involvement in the research of our psychology laboratory. More specifically, through attending weekly class/lab meetings and participating in one or more research projects, you will learn how specific research ideas take shape; how research questions and hypotheses are generated; how studies are designed to address these research questions and hypotheses; how data are collected, cleaned, entered into study datasets, then analyzed; and how findings are interpreted and organized for presentation at professional meetings and in scientific publications.

The main goals of research in our lab are to build an understanding of which interventions for child and adolescent mental health problems are effective, and to promote use of the best evidence-based assessment and intervention in everyday clinical practice for youths and families. In pursuing these goals, we and our colleagues develop ways of structuring evidence-based practices to make them user-friendly and tailored to the settings in which youngsters typically receive mental health care—e.g., community mental health clinics and schools. Much of our work focuses on developing and testing these tailored approaches. We also conduct meta-analyses of the youth psychotherapy research literature, to sum up what has been learned from all the treatment studies with children and adolescents.

This course is designed to be useful to students who plan to pursue a career in child and adolescent mental health, particularly those with an interest in psychological research. However, the skills conveyed (e.g., critical thinking, research design, science writing) may be useful in a variety of ways and relevant to a number of different career paths.

Class Notes: Students planning to take the course should e-mail Gabriela Hungerford at ghungerford@fas.harvard.edu to schedule a phone call to discuss course objectives and requirements.

Recommended Prep: An interview with the instructors is required.

Intergroup Relations: Research Seminar (122753)

James Sidanius

2017 Spring (4 Credits)

Schedule:

F 0900 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

The seminar provides students with research experience concerning different forms of intergroup relations, including the social psychology of interracial and interethnic conflict and prejudice. Graduate and undergraduate students meet on a weekly basis to discuss ongoing research on psychological mechanisms involved in power, stereotyping, inequality, identity, and ideology. Undergraduate enrollees will work under the supervision of a graduate student in the design and conduct of lab-based and survey experiments, and the input, coding and early analysis of empirical data. Undergraduate enrollees will also attend biweekly critical discussions of research articles in the field, and will have the opportunity to develop and receive feedback on their own research ideas.

Class Notes:

For information about this lab, e-mail the instructor at sidanius@wjh.harvard.edu. The class meets Tuesdays 2-3:30 p.m. for graduate students and Fridays 9-11 a.m. for undergraduate research assistants. Important: First meeting for graduate and undergraduate students will be Tuesday the 24th at 2 pm. However, the undergrad lab meeting will meet on Fridays from 9-11 am starting Week 2 of the semester. For more information about this lab, e-mail the instructor at shudson@g.harvard.edu or check out the lab website

Psychology 2651

Social Cognition from a Developmental and Evolutionary Perspective (126553)

Felix Warneken

2016 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The course addresses traditional questions about the role of social cognition in human evolution and development, integrating the newest findings from comparative and developmental psychology. The course is structured around three themes (cultural learning, cooperation, and competition), corresponding to the three main theoretical approaches that have given rise to the study of social cognition from an evolutionary perspective. This course is discussion-based, bringing some new ideas (your ideas!) to bear on tricky questions that are still unresolved in the field.

Recommended Prep:

For undergraduate psychology students, completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 or other relevant coursework before enrolling in this course.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Psychology 2660R

Research Seminar in Mindfulness Theory (114362)

Ellen Langer

2016 Fall (4 Credits)

Schedule:

T 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Research will be designed/conducted on the relationship between mindfulness and physical health/well-being, broadly conceived. For example, topics include cancer, autism, Alzheimer's, bullying, innovation.

Course Notes:

Open to students doing research with Prof. Langer.

Class Notes:

For information about this lab, contact Natalie Trent at ntrent@fas.harvard.edu or Jack Demick at jackdemick@fas.harvard.edu

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Psychology 2660R

Research Seminar in Mindfulness Theory (114362)

Ellen Langer

2017 Spring (4 Credits)

Schedule:

T 0130 PM - 0329 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Research will be designed/conducted on the relationship between mindfulness and physical health/well-being, broadly conceived. For example, topics include cancer, autism, Alzheimer's, bullying, innovation.

Course Notes: Open to students doing research with Prof. Langer.

Class Notes: For information on this lab, e-mail the instructor at langer@wjh.harvard.edu

Psychology 2661R

Research Seminar in Nonverbal Behavior, Social Perception, and Psychophysiology (110217)

Amy Cuddy

2016 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Students will gain human subject research skills and experience in the lab and online. We will cover a range of topics in social psychology, including but not limited to: nonverbal behavior, social perception, personal power, hormones, emotions, and performance in stressful situations. In biweekly meetings, students will have the opportunity to provide and receive feedback on the work of the lab as well as discuss relevant papers. In addition, monthly trainings will be held covering research tools such as eye-trackers, physiological measures, Qualtrics, and Mechanical Turk.

Recommended Prep: Science of Living Systems 20 plus one from PSY 14, 15, 18, or Science of Living Systems 15

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Psychology 2670A

Decision Making and the Psychology of Possibility (131189)

Ellen Langer

2016 Fall (4 Credits)

Schedule: W 0930 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Topics in decision making such as rationality, risk-taking, helplessness, and health are examined through the lens of mindfulness theory. Special emphasis given to the psychology of possibility in applied settings.

Course Notes: Open to qualified undergraduates.

Recommended Prep: The Psychology Department requires undergraduates to complete Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Additional Course Attributes:

Attribute	Value(s)

Incarnation and Desire (107859)

Courtney Lamberth

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course offers an introduction to Christian thought by considering major texts, figures and ideas from the first century to the present in their changing cultural contexts. Central themes include the categories of body, flesh and soul; free will, desire and sin in relation to divine grace; and the meaning of incarnation. Texts include canonical and non-canonical early Christian literatures, Patristic and medieval texts, Reformation theologies, as well as modern and contemporary authors. Students will develop a sense of the distinguishing features of the Christian world view, while gaining an appreciation for the significant diversity across the tradition

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Religion and Contemporary Fiction (156934)

Matthew Potts

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will study the role of religious images, theologies, traditions, and identities in contemporary fiction. The course will seek to ask what it might mean for a literary text to bear religious meaning in contemporary life. What does it mean for a text (or a person, for that matter) to be understood as religious today? We will pursue these questions primarily through the study of literary texts (novels and short stories) published within the last half century, with authors to include Cormac McCarthy, Toni Morrison, Charles Johnson, Salman Rushdie, and Lorrie Moore, among others.

Religion 46

The Letters of Paul: Ethnicity, Sex, Ethics, and the End of the World (109528)

Laura Nasrallah

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This introductory course focuses on 1) the Pauline epistles in their first-century sociopolitical context, and their earliest interpretations; 2) recent trends in Pauline studies, including feminist and postcolonial interpretation, the New Perspective, and European philosophical treatments (Badiou, Zizek). Special attention will be given to ideas of the gendered/enslaved body and its potential for transformation and pollution, ethnicity in the Roman world, the relations of communities to Roman imperial power, and views of time and the impending eschaton.

Course Notes:

Offered jointly with the Divinity School as 1544. Former course title: Paul's Letters and Their Interpreters: Ethnicity, Empire, the Body, and the End of the World. This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

From Soul to Personality: Religion and Modern Psychology (204551)

Mara Block

2017 Spring (4 Credits)

Schedule:

F 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Critics and religious adherents alike have used psychology to understand religion for centuries. Some argue that knowledge of the human mind can "explain away" religion while others argue to the contrary that it buffers religious belief. This course takes a different approach to understanding the modern self, religion, and the rise of new scientific languages and practices used to make sense of them. Throughout this course, we will track shifting conceptions of the self (soul, mind, psyche, personality) and their role in understanding religion in a range of psychological, literary, anthropological, and philosophical texts. We will examine the function of these texts-the purposes they serve in alleviating suffering and teaching readers the "good life" as well as critiquing authoritative ways of knowing the self in the modern world. We will read exemplary texts through the rise of empirical psychology, the making of a field of the "psychology of religion," psychoanalysis, and the sciences of personality.

What is an authentic individual life? How does one find meaning in light of modern challenges to claims about the nature of God, revelation and the soul? Is religious faith compatible with an understanding of historicity and the threat of nihilism? This course introduces central questions in Western philosophy of religion through close reading of fundamental texts in existentialism with some attention to their Christian theological sources. Reading and participatory discussion of text by Plato, Paul, Luther, Kierkegaard, Nietzsche, Dostoevsky, Sartre, de Beauvoir, Camus, Heidegger, Bultmann and Tillich.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Cultures of Health and Healing: Religion, Medicine, and Global Health (160969)

Mara Block

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What does it mean to "be healthy" and "to heal" in different contexts? What sorts of medical, ritual, or religious expertise authorizes different sorts of healers and forms of healing? What conceptions of human bodies and their capabilities are assumed? These questions probe entanglements of religion and medicine in everyday life. This course focuses on ways in which these issues might inform, challenge, and enrich thinking about global health. We will examine moral and religious histories of the global health movement alongside pressing contemporary questions such as, how do disease epidemics shape religious practice? How does religious belief shape the reception of biomedical technologies? We will consider examples from a range of contexts and traditions. Topics include colonialism, medical missionaries, social gospel and public health, human rights, bioethics, and liberation theology. Throughout the course, we will discuss the relevance of socio-economics, race, gender, and sexuality.

Religion, Gender, and Politics in Transnational Perspective (156112)

Ann Braude

Leila Ahmed

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course follows key themes in religion and gender as these were shaped and reshaped through the colonial and post-colonial eras. In particular, the religious history of American women and the history of women in Islam primarily in relation to the Middle East (professors Braude's and Ahmed's fields respectively) are intertwined and brought into conversation. The interaction of religion, gender and sexuality and the turns and complexities imparted to these by the politics of imperialism, race, resistance, and the politics of class, are examined in the context of the emergence of modernity, nationalism, feminism

and the globalization of religions in the wake of empire and Christian mission.

Poetry and Religion (108502)

Michael Jackson

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This course explores human experience at the limits of *logos* ('reason,' 'word,' or 'rational principle'), when normal habits of thought and rules of social location are lost or disrupted, when we confront sides of ourselves that ordinarily do not see the light of day, yet from which new modes of consciousness and expression may emerge - a penumbral zone that Wallace Stevens alluded to in his image of 'the palm at the end of the mind,' standing 'beyond thought', on 'the edge of space,' while a gold-feathered bird sings in the palm 'without human meaning, without human feeling, a foreign song.' Several (mainly modernist) poets and poems will be scheduled for discussion (including Wallace Stevens, Emily Dickinson, Gerard Manley Hopkins, T.S. Eliot, W.H. Auden, Dylan Thomas, Elizabeth Bishop, Anna Akhmatova, Philip Larkin, Ted Hughes, Carol Ann Duffy, Sylvia Plath), but students are invited to work with poets of their own choosing.

Art and Religion (203207)

Michael Jackson

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course explores the common ground between art and religion. It seeks to go beyond such binaries as secular/sacred, material/spiritual, primitive/modern in order to understand the work of art as a labor-intensive process whereby inner compulsions, mundane objects, and organic processes become the raw material out of which shareable images, affecting presences and transcendent experiences are fashioned. The course will be focused on artists from many cultures and many periods of history, using many different media, but students will be encouraged to develop projects around artists of their own choosing.

Course Notes: Offered jointly with Divinity School as 2443.

Anthropology of "the Religious" Part 1: Theory (126769)

Aisha Beliso-De Jesus

2016 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Conducting fieldwork with groups and people based on their religious/spiritual beliefs requires a complex understanding as well as critical knowledge of both the theory and methods of the "field research" process. This year-long course will provide students interested in conducting anthropological style "field research" with religious/spiritual groups/peoples, an in-depth and critical survey of theory and methodological approaches towards an anthropology of "the religious." The first semester will focus primarily on the theoretical questions/problems in the study of religion in anthropology, including what is a field site, how is it constituted, and how do we understand our own research and theory in relation other academic projects? The second semester is a methodological workshop, where students will be required to conduct method-intensive weekly projects. Through different methodological modalities, students will be required to think about what their research means to the communities they intend to work with as well as questions of positionality, the divide between participant/observer, new forms of research methods and other problematics of research.

Course Notes: Offered jointly with the Divinity School as 3103.

Contesting Sex and Gender, Making Early Christianity (108151)

Karen King

2016 Fall (4 Credits)

Schedule:

W 0500 PM - 0759 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Religion has been and remains a critical site both for constructing and for contesting sex/gender identities, roles, and sexualities. Women's relationship with religion has been particularly fraught. We will examine early Christian and contemporaneous texts through different lenses, drawing upon: feminist biblical interpretation and hermeneutics, literary and legal theory, anthropology, historical-critical studies, theology, lesbian-feminist theory, transgender studies, rabbinics, and classics. We will give special attention to critical theories of religion in gender/feminist studies, emphasizing the plural possibilities, contestations, and instability of religious texts. We will introduce various resources for critically engaging constructions of sex/gender/sexuality of both "orthodox" and "heretical" materials in conversation with

Greek, Roman, and Jewish materials. The aims are to promote analytic reading strategies that engage the constructed, contested, and multi-perspectival character of varied religious materials and to discuss both the limits and the possibilities that this material offers for imagining a more expansive sphere for human flourishing today.

This course is being offered through The Graduate Consortium of Women's Studies. The first class will be held September 7 and runs through December 7. Interested students are required to apply via the online application system for GCWS: <http://web.mit.edu/gcws/courses/application.html>. The GCWS will accept applications until August 22, 2016. The faculty team will meet soon after that date to make their selections for the course and students will be notified by the GCWS Program Manager, Andi Sutton.

Course Notes: Offered jointly with the Divinity school as 1505.

History of Western Christianity, 150-1100 (117053)

Kevin Madigan

2016 Fall (4 Credits)

Schedule: MW 0400 PM - 0529 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course is designed to provide a historical overview of the Church and society in western Europe from the second through the twelfth century. Thus, this course will investigate late-antique and early medieval Christianity in its social and its cultural context. Narrative and theological story lines to be pursued will include the varieties of early Christianity; relations with the Roman state (including persecution of Christians by it); the emergence of normative or "early Catholic" Christianity; early and early medieval monasticism; the search for the Christian doctrine of God and Christ; early Christian architecture, piety and worship; Christianity and other world religions (especially Judaism and Islam); western and eastern Christianity; the emergence of the Roman primacy; the Christianization of the north of Europe; the nature of parochial Christianity; the emergence of the pope, in the eleventh century, as an international religious force; the crusades; and early medieval piety. We will also be strengthening our skills as interpreters of primary sources. Some attention will be paid to major historiographical issues.

Course Notes: Offered jointly with the Divinity School as 2230.

Religion 1449

Philosophy in the Desert: An Introduction to Egyptian Monasticism (203932)

Charles Stang

2016 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The fourth century CE saw the explosion of a new forms of Christian community, what we have come to call collectively "monasticism": men and women withdrew from society, renounced sexuality and other pleasures (and burdens) of the flesh, and devoted themselves to spiritual exercises such as prayer, study, contemplation, and (crucially) wrestling with demons. This way of life was styled a new "philosophy," and much informed by the vibrant intellectual scene in Alexandria. Egypt was at the center of this wider counter-cultural movement, and its deserts became the scenes for the pursuit of holiness – hence "philosophy in the desert." This course will introduce students to the major figures and texts associated with Egyptian monasticism, including Antony the Great (through his Life and Letters) and the other early Desert Fathers (through the Apophthegmata), Pachomius, Evagrius of Pontus, Palladius of Hellenopolis, and finally John Cassian.

Religion 1457

Reading Between the Lines: Esotericism in Origen and Augustine (204027)

2017 Spring (4 Credits)

Schedule:

Instructor Permissions: None

Enrollment Cap:

n/a

Early Christian readers were convinced that their scriptures contained more than a surface reading would suggest, that they possess "deeper," more "spiritual" meanings accessible only to certain readers. These same readers were also often writers, which raises the possibility that early Christians were not only "reading between the lines" of scripture, but in fact writing in such a way as to invite others to read between the lines of their own texts. This seminar explores the question: what are the strategies and criteria we might use to identify and interpret such esoteric dimensions of early Christian texts (and by extension, texts from other times and traditions)? This seminar will sample reading strategies suggested by a diverse array of twentieth century theorists, including Sigmund Freud, Stanley Fish, Paul Ricoeur, Umberto Eco, and Arthur Melzer. We will test the tools and approaches these theoretical readings supply through close readings of two very different texts that we might plausibly take to offer hidden dimensions of meaning: Origen's *On First Principles* and Augustine's *Confessions*. In addition to the opportunity to perform close analysis of two complex and influential early Christian texts, this course offers a basic introduction to reader response-inflected literary theory. The seminar will be explicitly experimental and collaborative in orientation, asking: what reading practices can we use to understand how multi-layered theological texts attempt to not just inform, but ultimately transform, their readers?

Course Notes: Jointly offered with Divinity as 1758

This course is an introduction to the field of feminist biblical studies. We will discuss the intellectual history and institutional development of feminist biblical studies around the globe and explore different methods of analysis such as gender, queer, or intersectional kyriarchal analyses. We also will explore biblical women's stories such as Sarah, Hagar Mary of Magdala, Phoebe or Thecla as well as discuss the cultural and religious history of women in the 1st century. Lectures, group meetings, discussions, and presentations seek to foster participatory, collaborative and democratic styles of learning.

Theologies of the Body (203416)

Mayra Rivera

2017 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

The body changed theology. How and for what purpose? What does the role of the body reveal about the aims of contemporary theology and its relationship to ethics? This lecture course introduces Christian theology focusing on these questions. We will study theologies written from the Second World War to the present—texts that respond to state violence, economic oppression, and ecological devastation; to wrestle with the significance of race, gender, sexuality, and disability. By turning to the body, these theologies do not merely add an item to the list of themes that theology treats. They transform the way of doing theology.

Course Notes: Jointly offered with the Divinity School as 2412

Enrollment Cap: 12

This seminar seeks to provide a space for exploring the intersections of feminist theory with feminist the*logy and Feminist Studies in Religion. We will focus on different feminist categories of analysis, discuss different feminist the*logical directions and explore how their theoretical frameworks, methods and visions are shaped by their different socio-cultural- religious locations and struggles. In so doing we will engage in a participatory democratic style of learning.

Course Notes: Offered jointly with the Divinity School as 2689.

This course is a survey of American religion from the French, Spanish, and British settlements of the 1600s to the Civil War. Topics include Puritanism, Native American religion, witchcraft trials, the First Amendment, revivalism, immigration, African-American Christianity, abolitionism, religious intolerance, and the religious roots of the Civil War. Throughout the course we will pay close attention to both religious ideas and practices. Besides reading major scholarly accounts, we will consult a wide variety of primary sources, including memoirs, diaries, sermons, theological treatises, music, and portraiture. Readings will highlight the diversity of religious traditions in America, including Methodism, Congregationalism, Judaism, Mormonism, Unitarianism, Catholicism, and the Baptists.

Course Notes: Offered jointly with the Divinity School as 2367.

This course is a survey of American religion from Reconstruction to the present. We will ask several related questions. How did religious communities shape social and political movements like women's suffrage, the anti-lynching campaign, the Civil Rights Movement, and second-wave feminism? How did religious communities respond to developments like urbanization, segregation, industrialization, the Great Depression, and the creation of new media? How did ordinary people practice their faith? We will discuss a wide variety of religious communities and movements, including the Social Gospel, Catholicism, Fundamentalism, Judaism, Pentecostalism, New Thought, and the Christian Right. We will also discuss the transformation of the American religious landscape after the 1965 Immigration and Nationality Act. In addition to reading major scholarly accounts, we will consult a wide variety of primary sources, including memoirs, sermons, religious periodicals, speeches, and music.

Course Notes: Offered jointly with the Divinity School as 2376.

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce students to the critical use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

Course Notes: Offered jointly with the Divinity School as 2293. Some background in European history is desirable but not required.

David Holland

2017 Spring (4 Credits)

Schedule: T 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap: n/a

From before Tom Paine's Age of Reason and the flood of anxious responses it provoked, to the current spate of books and films devoted to the cause of countering modern skepticism, efforts to challenge beliefs and bolster the believers have had a long history in American culture. This course traces the history of these campaigns, charting both their broad patterns of change and their static elements, using them as windows onto the religious topography of the United States. Course readings consist of both primary sources that stretch from the eighteenth to the twenty-first century and contemporary scholarly analyses. Student will be asked to historicize these conflicts and recognize recurring patterns of engagement.

Course Notes: Jointly offered with Divinity as 2340.

The Niebuhr Brothers, Past and Present (156642)

K. Healan Gaston

2016 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will explore the work of two of the most influential Protestant ethicists and theologians of the twentieth century: Reinhold Niebuhr and H. Richard Niebuhr. We will survey the similarities and differences between the brothers and their most important writings, with a particular eye to themes of race, class, Judaism, Catholicism, religious pluralism, feminism, and secularism. We will also ask how the legacies of the Niebuhr brothers speak to contemporary movements such as Black Lives Matter, LGBTQ rights, and environmentalism. The rich decades-long dialogue between the brothers will also be explored, both in their published writing and their private correspondence, some of which resides in the Andover-Harvard Theological Library at HDS. In addition, the premiere of a new PBS documentary on Reinhold Niebuhr this fall will give us an opportunity to talk with the filmmakers about the documentary process, work with the Niebuhr materials in the HDS archives, and consider how films like this can contribute to the public discourse on religion and ethics.

Course Notes: Offered jointly with the Divinity School as 2318.

War, Peace and Religion in the United States (204023)

David Holland

2017 Spring (4 Credits)

Schedule:

R 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Religious ideas and religious institutions have had a fraught relationship with war in the United States. During the American Revolution, many Protestant preachers actively drummed up support for the war while Quaker meetings renewed their commitment to pacifism. During the Vietnam War, Catholic priests such as Phillip and Daniel Berrigan famously pushed for peace while the Catholic War Veterans association publically endorsed an expansion of the war into Cambodia. Beginning with Metacom's War, and concluding with the current "War on Terror," this course will examine the ways in which religious faith and military conflict have intertwined in the history of colonial North America and the United States. We will read a number of historians working on a broad range of conflicts, including Jill Lepore's writing on Metacom's War, Thomas Kidd's writing on the Revolution, Harry Stout's and Mark Noll's on the Civil War, Jonathan Ebel on the World Wars, David Settje's on the Cold and Vietnam Wars, and more.

Course Notes: Jointly offered with Divinity as 2339.

Yoga Sutras in a Comparative Perspective (126783)

Francis Clooney

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This seminar is for students interested in the study of primary Indian/Hindu texts, read in translation and in the context of a comparative dynamic of reading religiously across the boundaries of traditions. The Yoga Sutras – the 195 sutras – is the focus of the course, along with its primary commentary (Vyasa's Bhasya), plus selections from other classic commentaries, and the modern Light on the Yoga Sutras by BKS Iyengar. All these will be read (in English). Some comparisons will be made, by way of noticing parallel Hindu and Buddhist versions of yoga, and instances of Muslim and Christian reception of the Sutras. No language prerequisite, but students who know Sanskrit will be encouraged to make use of their expertise.

Course Notes: Offered jointly with the Divinity School as 3931.

Recommended Prep: No language prerequisite, but students who know Sanskrit will be encouraged to make use of their expertise.

This course explores the doctrines and practices of the Ismailis, adherents of a minority branch of Shia Islam that recognizes the continuation of religious authority after the Prophet Muhammad through a particular line of his descendants known as the *Imams*. Focusing on their historical evolution and manifestations in diverse political, cultural and social contexts, the course will consider three major communities: the Nizari Ismailis (in Syria, Iran, Central Asia, and South Asia); the Tayyibi (Daudi Bohra) Ismailis (in Yemen and South Asia) and the Druze (in Syria and Lebanon). Principal themes to be considered include conceptions of the *Imamah* and notions of authority, messianic doctrines, philosophy, ritual practice and devotional traditions. The course will also briefly consider the contemporary situation of these communities as minorities in North America and Europe.

2016 Fall (4 Credits)

Schedule:

T 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Whatever else the word "modern" means, it has named a crisis in European and American styles or forms—a crisis of inheritance for traditional forms, a crisis of confidence about form as such. Histories of modern arts or literatures tell familiar stories about how the crisis played itself out by defacing the old or improvising the new. It is not so obvious what story could be told about modern Christian theology. Indeed, it may not be clear how much modern theology there has been in this sense—namely, theology

written as deliberate response to a cultural crisis of forms.

This course will pose the question, what modernity means for writing about God up through the second 'World War.' It will look within and beyond theology's academic boundaries to a selection of formally deliberate texts in a variety of genres. These texts will include among others works by Soren Kierkegaard, Friedrich Nietzsche, Karl Barth, Djuna Barnes, Simone Weil, and Walter Benjamin. The choice of texts is only a selection, not a survey. Its aim is not to judge everything that has been written so much as to find help for what might yet be written.

Course Notes: Offered jointly with the Divinity School as 2374.
Course has additional section hour to be arranged.

Disobedience: The Defiance of Genre in Contemporary English Language Poetry (203930)

Amy Hollywood

2016 Fall (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

"Poetry is the new space of possibility and everyone knows it," writes Eileen Myles, thereby defining poetry as possibility rather than anything whose boundaries can be prescribed. As Myles explains, "a lot of things that people like are beginning to need to happen in the same pieces of writing and those things may be gossip, theory, sexual description, or simply an implication that it's there or just happened (art)." We will

explore this principled disobedience – an aesthetic, philosophical, and perhaps also a theological act – through the reading of important pieces by contemporary artists, among them Eileen Myles, Susan Howe, Alice Notley, Claudia Rankine, Maggie Nelson, Dana Ward, Rob Halpern, and Bhanu Kapil.

Course Notes: Offered jointly with the Divinity School as 2566.

According to the Gospel of John, the greatest form of love is one realized in the giving of a death. This course will explore the unsettling relationship between love and death, suffering and desire, as it is expressed in theology and philosophy and in contemporary fiction and film. Readings will include selections from Adrienne von Speyr, Hans Urs von Balthasar, Jacques Derrida, Julia Kristeva, Marilynne Robinson, Toni Morrison, and others, with screenings of films by Kenji Mizoguchi and Yasujiro Ozu.

Course Notes: Offered jointly with the Divinity School as 2179.

Religion 2527A

Nietzsche and the Greeks (203947)

Charles Stang

2016 Fall (2 Credits)

Schedule:

F 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Friedrich Nietzsche began his career not as a philosopher but as a classical philologist. From beginning to end, his writings bear the trace of that influence. Nietzsche sought to uncover and appreciate the dark and terrifying depths of Greek thought, which had in his view been obscured by a philhellenic aesthetic of serene beauty and balance. This seminar will examine Nietzsche's early writings on the Greeks, focusing on *The Birth of Tragedy*, but also his unfinished work, "Philosophy in the Tragic Age of the Greeks," and his lectures on the pre-Platonic philosophers. We will consider, among other questions, whether and to what extent Nietzsche ever really left philology for philosophy. The course will meet bi-weekly over the course of the entire year. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Course meets biweekly. Jointly offered with Divinity as 2004A.

Recommended Prep: Prerequisites: some familiarity with modern philosophy and classical Greek literature.

Additional Course Attributes:

Religious Experience: Seminar (156102)

David Lamberth

2016 Fall (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

An in-depth analysis of the emergence, construction and critique of "religious experience" in philosophy of religion, theology, critical religious thought and contemporary neuroscience. Issues will include asking what is at stake in the appeal to experience, what experience is or might be, and what evidence for such experiences currently looks like. Authors may include Edwards, Schleiermacher, James, Otto, Katz, Proudfoot and contemporary neuroscientists such as Damasio.

Course Notes: Offered jointly with the Divinity School as 2675.

Recommended Prep: Previous work in theology or philosophy recommended.

Hegel and His Contemporary Revival: Querying Spirit and Social Practice (203570)

David Lamberth

2016 Fall (4 Credits)

Schedule:

F 1100 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

An examination of selected works of Hegel in light of contemporary revival of his views, attending to the place of religion in his work, and his conception of philosophy and religion. Primary sources will include early essays, *Phenomenology of Spirit*, the *Logic* and excerpts from the *Encyclopedia*, and the *Lectures on the Philosophy of Religion*. Secondary authors include Beiser, Pippin, Pinkard, Brandom, Lewis, Malabou.

Course Notes: Jointly offered with the Divinity School as 2675.

Recommended Prep: Prior work in philosophy or theology recommended.

Hindu Ethics (110434)

Anne E. Monius

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

An intensive exploration of the place of ethics and moral reasoning in Hindu thought and practice. Materials to be examined will be drawn from a wide range of sources, from classical Sanskrit dharmashastra, epic narrative, devotional poetry, and modern ethnography, but emphasis will be placed throughout upon the particularity of different Hindu visions of the ideal human life.

Course Notes: Offered jointly with the Divinity School as 3923.

Recommended Prep: Previous study of South Asian religions.

Additional Course Attributes:

Religion 2720

Indian and Tibetan Yogācāra (204474)

Jay Garfield

2017 Spring (4 Credits)

Schedule:

M 0100 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar introduces students to Yogācāra thought as it developed in India and as it was understood in certain Tibetan commentarial and philosophical literature, with a bit of a peek at how Yogācāra ideas crop up in the 20th and 21st centuries. The Yogācāra school is often described as Buddhist idealism. More

recent scholarly reassessment has also seen important strands of phenomenological investigation in Yogācāra. The Yogācāra literature is large and complex, and probably includes texts that fit on both sides of this divide. Yogācāra philosophers also contribute to the philosophy of mind, epistemology and the philosophy of language, and much of this work is independent of questions about idealism. Our goal will be to limn the contours of this school and to ask what insights are relevant to contemporary philosophical problems on the one hand, and to Buddhist philosophy more broadly on the other. We will read texts by and about Vasubandhu, Asaṅga, Sthiramāti and Dignāga in India, as well as some Tibetan texts that take up these themes and some recent scholarship addressing this material. All texts will be taught in English translation, but for students interested in reading in Tibetan, we can set up separate sessions.

Course Notes: Jointly offered with Divinity as HDS 3544

Recommended Prep: At least one course in Buddhism or Philosophy required.

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

Topic for 2016-17: Monotheism in Antiquity? Scholars debate the meaning and definition of monotheism in antiquity. Taking up this theme, we will investigate early Christianity and within its philosophical and theological context in the Greco-Roman world. We will 1) explore a range of literature from the first to the fourth century CE, especially apologetic and philosophical, on the idea of the highest god. Readings will include Philo, Josephus, the Gospel of John, Epictetus, Justin, Iamblichus, and epigraphic evidence; and 2) investigate the theoretical underpinnings and tacit definitions of religion and the divine among scholars engaged in this debate (in early Christian studies, Roman history, etc.). Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: A course available to Th.M., Th.D., and Ph.D. candidates, and qualified MTS and M.Div. students with permission of the instructor. Required for Th.M. candidates in the field and for Th.D. and Ph.D. candidates until the term following successful completion of general exams. Offered jointly with the Divinity School as 1980A.

Recommended Prep: Some knowledge of Greek required. Consult instructor if you have questions.

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish Aa and Ab, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.

This course is taught by members of the Department.

Class Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the Spanish Ab website. After Spanish Aa and Ab, students should be

able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.

This course is taught by members of the Department.

Class Notes: Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the Spanish Aa website. Students who have studied Spanish for two years or more in secondary school must begin at Spanish Ab or higher.

Recommended Prep: A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

Spanish 40 Section: 003

Advanced Spanish Language II: Viewing the Hispanic World (125014)

Johanna Damgaard Liander

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An advanced language and culture class that further develops linguistic competence using a region or regions of the Hispanic world as a focus for class discussion, grammar review, and an introduction to Hispanic social contexts and texts. Course materials may also include films, interviews, paintings, photography, music, selections from the press, as well as literary or historical readings. Frequent written and oral assignments, and a thorough review of grammar. Consult course website for current semester topics.

Course Notes:

Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department.

Recommended Prep: A score between 681-720 on the SAT II test or on the Harvard Placement Test, AP 5, Spanish 30, or permission of course head.

Additional Course Attributes:

Spanish 49H

Spanish for Latino Students (109820)

Maria Parra-Velasco

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

Designed for Latino students, this course builds on students' previous knowledge of Spanish to expand and strengthen their oral and written interpersonal, interpretive and presentational communicative skills. Spanish grammar is reviewed using a functional approach to highlight differences found in informal and academic contexts. Students explore the topics of language, cultures and identity in the U.S and in the Spanish-speaking world, using a variety of texts and genres, music, videos, films and visual arts.

Course Notes:

Spanish 49h was formerly Spanish 35; therefore, students cannot take 49h if they've already taken 35. Spanish 49h should be a prerequisite for 59h (or permission of the instructor).

Spanish for Latino Students II: Connecting with Communities (159938)

Maria Parra-Velasco

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An advanced language course for Spanish heritage learners that aims to: strengthen students' oral and written linguistic range, with emphasis on Spanish use for academic contexts; and to further develop students' critical language and social awareness around important issues for Latinos in our globalized era: Spanish as global language, identity, language rights, global migration and labor, U.S.-Latino America relations, food and environment, the 'war on drugs'. Students explore these topics through various genres (newspapers and academic articles, debates, literary essays, short novels, poetry, visual art, film and music) and through 4 hours a week of community service.

Additional Course Attributes:

The Ethics of Business in Latin America (127573)

Adriana Gutierrez

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An advanced language and culture class that examines literature and films portraying the political, sociological, financial and environmental impact of multinational companies doing business in Latin America. Students' linguistic competency is developed through discussion of the ethics of business, grammar reviews, and weekly writing assignments. Students will also choose a specific project for a business in Latin America and research its possible outcome and social, political, and environmental consequences.

Course Notes: Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Class Notes: Interested students must apply in writing to Dr. Gutiérrez no later than August 21, 2015 (Fall Term) or January 15, 2016 (Spring Term). Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Adriana Gutierrez and members of the Department

Recommended Prep: A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

The Ethics of Business in Latin America (127573)

Adriana Gutierrez

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An advanced language and culture class that examines literature and films portraying the political, sociological, financial and environmental impact of multinational companies doing business in Latin America. Students' linguistic competency is developed through discussion of the ethics of business, grammar reviews, and weekly writing assignments. Students will also choose a specific project for a business in Latin America and research its possible outcome and social, political, and environmental consequences.

Course Notes:

Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Recommended Prep:

A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

Beyond the Frame: An Introduction to Spanish Cinema (203893)

Vanessa Ceia

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

This course outlines major historical, aesthetic and thematic trends and developments in Spanish cinema, from the silent and surrealist films of Luis Buñuel and Salvador Dalí in the 1920s to the experimental works and global partnerships of the late twentieth and twenty-first centuries. Focusing on topics such as memory, violence, gender and sexuality, autism, (im)migration, landscape, spectatorship, and the politics of aesthetics and representation, this course will give students substantial training in film and visual analysis and also provide an eclectic introduction to Spanish culture in context.

Introduction to Modern Latin American Literature (126853)

Sergio Delgado Moya

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a survey of Latin American Literature from the last decades of the 19th century to the present. It offers an overview of the most salient moments in modern Latin American cultural history, placing emphasis on the ways in which specific literary works relate to the social and political developments that have shaped the region since the late 19th century. Readings by Machado de Assis, Rulfo, Borges, Gioconda Belli, Bellatin, Pizarnik, and others.

Course Notes: Conducted in Spanish.

Class Notes: None

Recommended Prep: A score above 780 on the SAT II or on the Harvard Placement test; a 50-, or 60-level course in Spanish; or permission of course head.

Sampling Media: Narratives of Identity in Contemporary Spain (203897)

Vanessa Ceia

2017 Spring (4 Credits)

Schedule:

R 1200 PM - 0159 PM

T 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

Drawing on cultural and media studies and the digital humanities, this course explores how individual and collective identities have been narrated and shaped by a range of Spanish literary, visual and digital texts since Spain's transition to democracy in the mid 1970s. Students will read critical theory, analyze a corpus of contemporary Spanish texts and performances, and study the interplay of text, image and technology to examine the role of culture and media in reproducing and challenging the dominant ideologies that undergird constructs of gender and sexuality, heroism, race, nationhood, family, memory, politics, otherness and desire in Spanish culture. Students will also learn to use digital tools and archives to map, queer, interrogate and re-imagine said constructs and histories.

The 'Aztecs' Thought Otherwise: Indigenous Culture in Mexico (203887)

Martin Vega Olmedo

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0229 PM

R 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course challenges students to think through and beyond binaries such as "Indian" and "European," "Pre-conquest" and "Post-conquest" as they develop familiarity with a range of indigenous cultural objects. With the Florentine Codex as a basis, the course will revolve principally around Nahua (aka Aztec) history,

art and ritual in central Mexico. Special attention is placed on the 'entanglements' between the Nahuas and other ethnic and cultural groups, such as the Maya. The colonial period will serve as a vantage point for exploring the ruptures and continuities of indigenous cultural expression in Mexico, from the pre-Hispanic period to the present. The analysis of texts and objects will be supplemented by theoretical essays that engage with issues of history, hybridity, and material culture.

Indigenous Plant Knowledge, Magic and Shamanism in Latin America (203899)

Martin Vega Olmedo

2017 Spring (4 Credits)

Schedule:

MW 1100 AM - 1229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course deals with the question of culturally sanctioned drug use in Latin America from colonial period to the present as seen in medicinal treatises, ethnographic accounts, and Inquisition reports as well as in film and music. We will compare the rituals of drug consumption in indigenous and Western cultures in light of the illnesses (imagined and real) that plague modern society. Coursework includes conversations with indigenous researchers from Mexico and Peru and journalists covering the "drug war" in the Americas.

Kingmakers, Dangerous Grandmothers and Inconsolable Prostitutes: Women in Conquest Narratives (203900)

Martin Vega Olmedo

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course casts a feminist lens on the conquest of Mexico primarily and the Americas more broadly. Drawing on early colonial and pre-Hispanic prose and visual histories, we will read for those feminine voices and bodies that intermittently break onto scenes of conquest. At the same time, we will consider how the episodic presence of women as objects of exchange, power brokers and fighters challenges the masculine ethos within conquest narratives. Moving in stages, the course will end with a reflection on the contemporary traffic in women.

Don Quixote and the Art of Reading (110688)

Mary Gaylord

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In the beginning was the book. From his library the *hidalgo*, bent on writing himself into History, sallies forth into a world of actors, storytellers, and readers. How do books come by their power to shape individuals and their world? We read Cervantes' masterpiece alongside seminal Renaissance works his characters and readers knew (Erasmus, Vives, More, Castiglione), and modern studies of reading and print culture.

Course Notes:

There will be class visits to the Houghton Library of Rare Books and screenings of film versions of the novel.

Recommended Prep:

Conducted in Spanish; an advanced reading knowledge of Spanish is essential. Previous course work at the 70, 80 or 90 level strongly recommended.

What exactly does the word "latinidad" mean? How has "the Latino" been constructed in U.S. culture? What has been the importance of "latinidad" in the social and political history of people of Latin American descent in this country? What place does "latinidad" occupy within the North American academy? Our course attempts to respond to these inquiries through an analysis of Latino performance and its representation within particular literary and cultural productions: poetry, theater, film, and stand-up comedy.

Course Notes:

Class will be conducted in English. Discussions in English and Spanish according to class composition.

Tropical Fantasies: The Hispanic Caribbean and Haiti in Contemporary Literature (203758)

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

The Caribbean has long been portrayed as an exotic region of the world. Colonial depictions of the Caribbean imagined wild, savage creatures that ate human flesh. Travel narratives of the 19th century chronicled the region as backward, and underdeveloped while rendering Caribbean subjects, particularly women, as hypersexual and sexually available for consumption. This course proposes an analysis of the different myths and fantasies that have been created about the Caribbean and of the historical and cultural realities surrounding these myths. Through a close reading of literary, artistic, critical, and historical texts we will examine topics such as: race, ethnic, and gender identity constructions; the rise of the plantation economy; and the emergence of modern nations. The relationship between the presence of coloniality—evidenced in the continued ties between Caribbean islands and United States and Europe—and the emergence of diasporic Caribbean voices of dissidence will be a guiding tone for our conversations throughout the semester as we unpack the links between colonialism and diaspora in the Caribbean. Although our class will mainly focus on the Hispanic Caribbean and Haiti, we will establish a dialogue with intellectual productions from other islands.

The course offers an interdisciplinary approach to Barcelona, a multilayered space furnished by Roman, French, Muslim, and Spanish legacies that shaped a singular culture and language. Developing from periods of egalitarian social and political institutions in the Middle Ages to strong socioeconomic industrial development in the 19th century and later tourism, Spain's most European city is inscribed by a deep sense of civic and industrious society permanently seeking innovation and modernity, yet facing the consequences of its complex past. Through readings of historians, art critics, urban designers, and writers, and supported by visual materials, the course offers an integrated perspective which opens questions in every field of the Humanities and the Social Sciences on Catalan and Hispanic Cultures.

Course Notes: The course will be conducted in Spanish. The readings will be in English & Spanish.

Global Latinidad: Racial Translations and National Belonging in the Age of Immigration (203619)

Lorgia Garcia Pena

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course proposes Latinidad as a global category for understanding the ways in which race and immigration intersect in the production of minoritized citizens of color in the New Millennium. Expanding the conceptual, geographical and temporal limitations that continue to produce Latino/a Studies as a presentist, U.S. based category of human and cultural expression, our course will engage in a genealogical study to Latino/a thought from the late nineteenth century to the present including new immigrant enclaves in Italy and Spain. Geographically we will cross land and liquid borders to theorize how the triple consciousness of Latinidad that results from the palimpsestic colonialities regulating Latin America (European and U.S. Colonialism) and its diasporas can help us better understand current events (such as the Trump candidacy and the growing anti-immigrant violence in Europe). Our conversations will thus be interdisciplinary, intersectional and transnational in nature while theoretically grounded on Latino/a criticism and race and ethnicity theory. Some of the primary authors will be study are: Arthur Schomburg, Julia de Burgos, Héctor Tóbar, Rita Indiana Hernández, and Achy Obejas. We will read critical texts by Wendy Roth, Nicole Guidotti-Hernández, Ulla Berg, Silvio Torres-Saillant and George Lipsitz.

Latina/o Theory: Being and Knowing (156603)

Mayra Rivera

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Latina/o literary theory gives a central place to the effects of history and geo-political conditions on the production of knowledge. Therefore, Latina/o theorists begin their critical work by foregrounding the distinct contexts from which the intellectual work of Latinas/os arise and how those contexts relate to the content, language, and style of their writing. How do Latina/o writers challenge assumptions about literature and national languages? How do they understand the self, identity, race, and gender in their relation to context? What is the relationship between myth, history, and the self? What is the relationship between knowledge, power, and wisdom; between creative writing and political transformation? In this seminar we will explore these questions through close readings of key Latino/a scholars and writers, including Gloria Anzaldúa, Walter Dignolo, María Lugones, and Eduardo Mendieta, among others. We will also read key literary texts from which the theorists draw for their analyses.

Course Notes: Offered jointly with the Divinity School.

The Non-Cosmopolitan and the Post-Global: Worlds of Destitution in Theory, Literature and Film (203595)

Mariano Siskind

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This graduate seminar is based on an intuition: cosmopolitanism and globalization, the two master concepts that were extremely useful to understand subjective universalistic desires and material processes of global dislocation, disjuncture and displacement (as well as fantasies of totality, transparent communication and interrelations and fictions of totality) no longer can account for our present cultural-political situation. The tentative notions of the non-cosmopolitan and the post-global invoked in the title of the seminar do not signal a return to the local, the particular, the national or ethno-religious difference; on the contrary, the experience of destitution and dislocation, of not belonging, the displacement of immigrants and refugees, the new forms of crossing boundaries, the discontent of those who can't leave, and the global trauma of perpetual war and terrorism are symptoms of a radical reconfiguration of the translocal place we used to name "world". This is a seminar with questions, without answers about the experiences, theoretical discourses and aesthetic formations that constitute this new non-world (for a lack of a better term yet) that demands to be conceptualized, thought again. In order to work through these notions we read Bolaño, Kant, Nussbaum, Hegel, Chejfec, Jameson, Nancy, Appadurai, Hardt and Negri, Arendt, Kristeva, Honig, Khalili, Yu Hua, Lyotard, Braidotti, Derrida, Noll, Teju Cole and Guattari and films by Di Tella, Jia Zhangke and Wong Kar Wai.

Course Notes: Language: This seminar will be conducted in English with a very flexible linguistic policy. Every single text in the syllabus but one can be found in their original language and in English translation. You can choose to read texts in whatever language you want, and we will contrast translations in class.

Subject: French

French 10

Beginning French I: French Identity through Visual Media (126933)

Nicole Mills

2017 Spring (4 Credits)

Schedule: MTWR 1000 AM - 1059 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

This elementary French course provides an introduction to French with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. Students engage in interactive communicative activities, both online and in the classroom, that provide rich exposure to the French and francophone language and culture. The course addresses the theme of identity through engagement in the discussion and interpretation of various French visual media including video, images, and film.

Course Notes:

French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students at GSAS may take the course Sat/Unsat with permission of course head. French 10 is taught by members of the Department.

French 11

Beginning French II: Exploring Parisian Life and Identity (126935)

Nicole Mills

2017 Spring (4 Credits)

Schedule:

MTWR 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap:

n/a

In the second course in the Elementary French sequence, students will engage in an online simulation of life in Paris while exploring diverse facets of Parisian identity. Through the interpretation and analysis of Parisian texts, film, paintings, and photography, students will actively engage in oral and written communication in the past, present, and future. Students will learn to make suggestions, express emotions and opinions, extend invitations, and convey hypothetical situations.

Course Notes:

French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students at the GSAS may take the course Sat/Unsat with the permission of course head. This course is taught by members of the Department.

Recommended Prep:

Completion of French Aa/10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.

2016 Fall (4 Credits)

Schedule: MTWR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

In the second course in the Elementary French sequence, students will engage in an online simulation of life in Paris while exploring diverse facets of Parisian identity. Through the interpretation and analysis of Parisian texts, film, paintings, and photography, students will actively engage in oral and written communication in the past, present, and future. Students will learn to make suggestions, express emotions

and opinions, extend invitations, and convey hypothetical situations.

Course Notes: French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students at the GSAS may take the course Sat/Unsat with the permission of course head. This course is taught by members of the Department.

Recommended Prep: Completion of French Aa/10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Meets Foreign Lang Req	French
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Intensive Beginning French: Parisian Identity through Visual Media (124332)

Nicole Mills

2017 Spring (8 Credits)

Schedule:

TR 1100 AM - 1159 AM

MTWRF 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This intensive Beginning French course provides an accelerated introduction to Beginning French with intensive work on interpersonal communication and interpreting and producing language in written and oral forms. Students explore diverse facets of Parisian identity through the interpretation of various forms of visual media. Students learn to speak and write in the past, present, and future, make descriptions, ask questions, make comparisons, accept and refuse invitations, give advice, and express hypothetical situations, emotions, and opinions.

Course Notes:

May not be used to fulfill the language requirement and may not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the French 15 course head and receive permission to enroll in the course.

This course is taught by members of the Department.

Class Notes:

The on-line request form is available on the French 15 canvas site and must be submitted by August 26, 2016 (Fall Term) and January 16, 2017 (Spring Term).

Recommended Prep:

An advanced knowledge of at least one foreign language but no previous study of French.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students

Intermediate French: The Culture of Food and Friendship in Francophone Countries (126938)

Tali Zechory

2016 Fall (4 Credits)

Schedule:

MTWR 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap:

n/a

In this intermediate level language course, students will study and discuss issues faced in contemporary France and other francophone countries. Students will interpret French and francophone culture, in particular the different customs surrounding food and friendship, through a variety of texts, films, and multimedia resources, while participating in a range of oral and written communicative activities. Students will also review and refine their knowledge of various grammatical structures.

Course Notes:

Conducted in French. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

This course is taught by members of the Department.

Recommended Prep:

A score no lower than 451 and no higher than 600 on the SAT II test or the Harvard Placement Test; 3 years of French in high school; French A, Ab, Acd, or Bab; or permission of course head.

Additional Course Attributes:

French 50

Advanced French II: Recounting the Francophone Experience: Love, Loss, and Rebellion (126998)

Tali Zechory

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course builds on the interpersonal, interpretive, and presentational skills acquired in French 40, with a particular emphasis on honing students' writing proficiency. Students will read a broad range of stories, poems and essays, as well as view films and videos that explore timeless, ever-resonant themes: love and loss, culture and identity, and tradition and rebellion in the Francophone world. Using these texts, students will study and reproduce various genres of written and spoken French (description, portrait, film critique, etc.)

Course Notes:

Conducted in French. Students may take no more than two courses numbered in the 50s. May not be taken Pass/Fail, but may be taken

Sat/Unsat by GSAS students. Not open to auditors.

Recommended Prep: French 40; a score of 721-750 on the SAT II test or the Harvard Placement test; or permission of course head.

Modern Stories about Paris (116673)

Ericka Knudson

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines contemporary narratives set in Paris. Students explore writers' and filmmakers' perceptions of Paris and analyze the different ways in which the Parisian experience is presented. By reading and viewing stories about Paris, students gain insights into methods of narration and integrate various techniques into their own writing and speaking. They also develop a sophisticated understanding of how the French language is evolving, especially in its spoken form.

Course Notes: Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than two courses at the 60 level. Not open to students who have already taken French 51.

Business French: Cultural and Communicative Foundations (148202)

Tali Zechory

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course focuses on the cultural knowledge, vocabulary, and linguistic skills and tools that are needed to work and succeed in an international French-speaking setting. It provides an overview of the organization and culture of French companies, highlighting important aspects of conducting business in France, such as attitudes, customs, written and unwritten laws, as well as economic and geographical factors. Moreover, students learn specialized French business terminology and acquire the language skills needed to understand and discuss, in speaking and writing, topics within a professional environment.

Course Notes:

Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details and section on-line on the French 61N website.

Class Notes:

Students who have taken French 55 should not take this course.

French Theater across Time: An Introduction to Performance (109826)

Sylvaine Guyot

2016 Fall (4 Credits)

Schedule: T 1130 AM - 1259 PM

R 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Aims to help students, including those who are genuine novices in acting, to understand and experience theater as a form of physical expression that evolve as aesthetic and ideological contexts change across time. Readings include the most famous French playwrights of both the early modern age (Molière, Corneille, Racine) and the later 20th / early 21st centuries. We explore how theater is used to interrogate questions such as sexual taboos, social injustices, or political engagement. Special emphasis paid to the power of performance through practical workshops and videos of recent productions. The final project consists of an excerpt to be performed in French.

Course Notes: Conducted in French. May not be taken for credit by students who have previously taken French 71a or FRSEMR 30r.

Recommended Prep: A 50- or 60-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.

Imagining Elsewhere (203382)

Annabel Kim

2017 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

The French novelist Stendhal once described the novel as "un miroir qu'on promène le long d'un chemin," a mirror we carry along the road. This course examines science-fiction, utopian (and dystopian) novels and films that opt instead to imagine elsewhere and whose refusals to act as a mirror on our world can tell us as much about our reality as those ostensibly more faithful mirrors we find in realism.

Course Notes: Conducted in French.

A La Francaise: French Feminisms Today (108716)

Alice Jardine

2017 Spring (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Close readings of postwar French fiction and theory with emphasis on what is called "the feminine" in key psychoanalytic, philosophical, and literary writings of the French poststructuralist tradition. In particular, we will focus on fifty years of dialogue between postwar theory in France and feminist practice in the United States. Writers considered include Cixous, Duras, Hyvrard, Irigaray, Kristeva, and Wittig as well as Deleuze, Derrida, and Lacan.

Recommended Prep: Excellent reading knowledge of French.

Additional Course Attributes:

The 18th Century: Ethical Dilemmas (111339)

Natasha Lee

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What does it mean to write about fanaticism, cultural differences, inequality, slavery, or seduction? How do Enlightenment writers present ethical problems of their time that resonate with our own? What is the relationship to authority in theological, philosophical, political and social models? We will explore the ethical dilemmas posed through connecting sensibility and the rational in literary, artistic, philosophical and political discourses between 1715-1789.

Course Notes:

Course eligible for Gen Ed credit in Moral Reasoning, for concentration credit and a French secondary (if work done in French).

Additional Course Attributes:

French 144

Humanimals in Medieval French Literature (203310)

Virginie Greene

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

Animals are everywhere in medieval literature. We find horses and dogs in epic and courtly romances, birds in love poetry, pigs, cows, sheeps and chickens in fabliaux, lions and eagles in fables, Renard the fox in his own romance, unicorns, phenix and yales (yes, yales...) in bestiaries, and the human animal in all the above mentioned. Using texts by Aristotle and medieval theologians and philosophers, we will examine the unstable distinction between human and animal, their frequent fusion and confusion, their relationship, and their coexistence.

Course Notes: The course will be taught in modern French, and the texts made available in Old or Middle French with a modern French translation. No knowledge of the Middle Ages is necessary to take this course.

Performing in French: A Production of a Modern Tragedy (109972)

Sylvaine Guyot

2017 Spring (4 Credits)

Schedule:

W 1100 AM - 1259 PM

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course focuses on the preparation of a student-led production of a contemporary French play, and concludes with a performance in French at the end of the semester. To react to the challenges we will face in staging a "modern tragedy", we will examine the diversity of tragic forms and motifs since the 17th century up to our days through the close readings of a given set of plays, as well as the main trends in the contemporary staging, through the viewing and discussion of video versions of recent productions.

Requirements: Prerequisite: French 61c OR French 61g OR French 61h OR French 61m OR French 71a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
FAS: Meets Foreign Lang Req	French

The Novel after the New Novel (203385)

Annabel Kim

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A survey of the contemporary French novel, defined loosely as the novel after the New Novel, viewed by some as the last avant-garde literary movement in France. We will begin with the New Novel and move chronologically through to the present, reading authors from a period—the contemporary—whose canon is in the process of being formed. Readings will include Carrère, Chevillard, Darrieussecq, Echenoz, Ernaux, Pireyre, Volodine.

Course Notes: Conducted in French.

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Homelessness, hunger, a living wage, prison reform, immigration – headlines today but also in 1800's France. We debate these problems daily and search for effective, ethical solutions, often using the same ideas and language of 200 years ago. Course examines representations and responses to humanitarian questions in 19th-century French fiction and film to help us reflect on our practices today. Texts include selections from Hugo's *Les Misérables* and Sue's best-selling *Les Mystères de Paris*, Zola's *Paris*, plus short works by Sand, Tristan, Charles Baudelaire. Considers aesthetic aspects; the contexts of Romanticism, Realism, and Naturalism; and socioeconomic and political conditions.

Course Notes: Conducted in French. Students not needing RLL credit may write essays in English. Students must use specific abridged edition of *Les Misérables* published by Bordas, and none other.

"The Words to Say It": Women Writing in French from Colette to Satrapi (126038)

Alice Jardine

2016 Fall (4 Credits)

Schedule: W 0430 PM - 0629 PM

Instructor Permissions: None

Enrollment Cap: n/a

Motherhood, romantic love, independence, sexuality, citizenship, fantasy, death: these are just some of the themes explored in women's novels, written in French, in the twentieth century. We will read eight novels together, exploring how they have finally become classics, even given what they say about life and what it means for women to write about it.

Sophomore Tutorial: Poetics, Practice, and Politics in Romance Societies (114941)

Kathy Richman

2017 Spring (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course introduces students to a range of analytical and theoretical approaches to "reading" fiction, poetry, film, and essays. We will pair critical writings and creative texts of importance to the Romance world to help students develop their own voice and analytical stance. Prepares students for advanced work in literary and cultural studies in Romance Languages and Literatures and related fields.

Course Notes: Language of instruction to be decided upon by student in consultation with the Undergraduate Adviser in Romance Studies. Successful completion of one term of Romance Studies 97 (or equivalent) is required of all concentrators in their sophomore year.

Additional Course Attributes:

Attribute	Value(s)

The Global Game: Soccer, Politics, and Popular Culture (127880)

Francesco Erspamer

Mariano Siskind

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Soccer is not only the sport of the world, but a most socially significant practice. In Latin America and Europe it is a staple feature of popular culture, closely connected with national politics. The course will make use of filmic, visual, literary, theoretical, and historical materials to analyze the relationship of soccer to social movements, colonialism, violence, gender, architecture, music, and the star system (Pelé, Maradona, Zidane, Totti, Cristiano Ronaldo, Messi).

Course Notes: Conducted in English.

Additional Course Attributes:

Attribute	Value(s)

Visceral Iberia: Gender, Affect and Embodiment in Modern and Contemporary Culture (203896)

Vanessa Ceia

2017 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Through a range of critical approaches to gender, sexuality, affect, and embodiment, this course scrutinizes contemporary attitudes toward and constructions of the body in 20th and 21st century Spanish and Portuguese literary, visual and digital cultures. Limits, transgressions, technologies and representations of the body will be questioned through readings of primary and theoretical texts, archival documents, and testimonies that engage histories and materialities of the body, surveillance, authoritarianism, and activism. Special attention will be given to the social and historical contexts of said texts, as well as to current trends in gender, cultural, and affect studies scholarship.

Romance Studies 148

Love, Knowledge and Debate in the Middle Ages: The Roman de la rose and Libro de buen amor (203311)

Virginie Greene

Luis Giron Negron

2016 Fall (4 Credits)

Schedule:

MW 0300 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The Old French Roman de la rose and the Old Spanish Libro de buen amor are two treasure troves of medieval stories, poems, fables, treatises, lores, and recipes on love. Whether they consider love as a disease, a social game, a science, a civilizing art or a destructive mania, these books use love to provoke contradictory debates and question fundamental aspects of culture and society. We will focus on these two influential books, plus a few other related texts (e.g. treatises on medicine, love poems, short stories, religious literature) helping us to understand the diverse traditions they hail from, transform, and at times transgress. This course will also constitute an introduction to the medieval world, across languages and cultures. We will be particularly attentive to the contacts and exchanges between Western Europe, the Mediterranean area, and the Near and Middle East, as well as between Muslims, Christians and Jews.

Course Notes:

Course taught in English. Texts in English translation (but also available in the original languages for students who can work with any of the languages involved)

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Romance Studies 201

Questions of Theory (118221)

John T. Hamilton

Jeffrey Schnapp

2016 Fall (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The seminar is built around a sequence of fundamental questions regarding the literary disciplines, their history and epistemology. Discussions are instigated by readings in philology, stylistics, the history of ideas, semiotics, structuralism, psychoanalysis, post-structuralism, film theory, genetic criticism, literary sociology, cultural studies, and digital humanities.

Course Notes:

Conducted in English. Required of all graduate students in Romance Languages and Literatures.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Subject: Italian

Italian 10

Beginning Italian I: Pathways to Italy (113814)

Elvira G. DiFabio

2017 Spring (4 Credits)

Schedule:

MTWR 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

For students with little or no knowledge of Italian. Aims at achieving basic communication skills and vocabulary. Emphasis on oral expression and listening comprehension. The cultural component examines everyday life through a comparative perspective: families, shopping, food culture. This course will give you the language you need to communicate effectively in Italy, and is the best way to prepare for a summer study in Italy. Course materials include workbook, audio-lab, and video.

Course Notes:

Conducted in Italian. Students whose placement score does not entitle them to enter a more advanced course are assigned to Italian 10. Students who have studied Italian for two years or more in secondary school must begin at Italian 11 or higher. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Additional Course Attributes:

Beginning Italian I: Pathways to Italy (113814)

Elvira G. DiFabio

2016 Fall (4 Credits)

Schedule:

MTWR 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

For students with little or no knowledge of Italian. Aims at achieving basic communication skills and vocabulary. Emphasis on oral expression and listening comprehension. The cultural component examines everyday life through a comparative perspective: families, shopping, food culture. This course will give you the language you need to communicate effectively in Italy, and is the best way to prepare for a summer study in Italy. Course materials include workbook, audio-lab, and video.

Course Notes:

Elvira G. DiFabio

2017 Spring (8 Credits)

Schedule: T 1000 AM - 1129 AM
MW 1000 AM - 1059 AM
R 0900 AM - 1129 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

A complete first-year course in one term for students with no knowledge of Italian, focused on developing all four communicative skills. Students are introduced to contemporary Italian culture through a variety of topics from everyday life (family, shopping, food, fashion) to the arts (music, literature, cinema). Materials include films and cultural readings that present capsules on the history of modern Italy. Excellent choice for students planning to study in Italy.

Course Notes: May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Students who have not placed out of the language requirement must take one full year of a language. Italian 15 taken alone may not be used to fulfill the language requirement. However, there are ways to combine Italian 15 with another course in order to fulfill the language requirement. Consult Dr. Elvira DiFabio or the Undergraduate Adviser in Italian for details. Conducted in Italian. Not open to auditors.

Recommended Prep: An advanced knowledge of at least one foreign language, preferably a modern Romance language, but no previous study of Italian.

Designed for students who wish to refine their command of Italian grammar. We will explore notions of phonology, morphology, syntax and the analysis of frequently occurring linguistic phenomena especially within the verb paradigm. Includes modules on the evolution of standard literary Italian, the dialects of Italy and some comparative Romance linguistics within the context of Italy's diverse language communities.

Course Notes: Conducted in Italian. Appropriate for concentrators in the Italian Studies and Romance Studies tracks, as well as for students pursuing a secondary field in Italian.

Recommended Prep: Italian 50; a score above 750 on the SAT II test or on the Harvard Placement test; or permission of course head.

A Panorama of Italian Literature (1300-present) (203616)

Sarah Axelrod

2017 Spring (4 Credits)

Schedule:

WF 1100 AM - 1229 PM

Instructor Permissions: None

Enrollment Cap: n/a

Italian as a standardized language is barely more than 150 years old, but what we call 'letteratura italiana' has been around for centuries. The Italian consciousness has always looked to literature to offer perspective and guidance, and Italian poets and prose authors have always felt responsible for providing both. We will read selections from a wide range of Italian authors (including but not limited to Boccaccio, Petrarch, Ariosto, Foscolo, Leopardi, Manzoni, Pirandello, Aleramo, Svevo, Montale, N. Ginzburg, Calvino, Ferrante) spanning genres and centuries, and we will become intimate with the Italian canon and how it defines and redefines itself throughout history.

Course Notes: Conducted in Italian.

Adam Muri-Rosenthal

Sarah Axelrod

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A creative and critical exploration of poetry through image-making practice, this course investigates the great works of modern and contemporary Italian poetry through a process of cross-media translation. Among the questions the course will seek to answer are the following: What makes a text or film poetic? How do words and images evoke sensory experience? What is the fundamental task of the translator and what does it mean to "translate" from one medium to another? Students will create regular short video pieces in response to these foundational questions and to works studied. Inspiration will be drawn from filmmakers both within the Italian canon, such as Antonioni and De Seta, and without, such as Gehr and Brakhage. Major poets studied will include Marinetti, Ungaretti, Montale, Pasolini and Rosselli.

Course Notes: Conducted in Italian.

Weekly individual instruction for students writing a senior thesis in Italian. Part two of a two part series.

Course Notes: For honors seniors writing a thesis. Successful completion of two terms of Italian 99 is required of all thesis-track honors concentrators. Students who do not complete a thesis are required to submit a substantial paper in order to receive either 4.0 credits for each part of the series.

Recommended Prep: Satisfactory completion of a junior tutorial and prior faculty approval of proposed thesis topic.

Requirements: Prerequisite: Italian 99A OR equivalent.

Italian 110

Italian Mysteries (156583)

Maria Grazia Lolla

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The single best-selling genre in modern times, the mystery has been embraced by Italian novelists and academics alike. Whether the goal was searching for the motive or the culprit of a crime or redressing a past or present injustice, or questioning the limits of our investigations of the past, the mystery has attracted the attention of internationally renown figures such as Umberto Eco, Leonardo Sciascia, Carlo Ginzburg, Andrea Camilleri, Michelangelo Antonioni and Alessandro Manzoni. Beginning with contemporary best-sellers, the course will cover a variety of genres - novels, comic books, films, historical writing - from the nineteenth century to the present.

Recommended Prep: Excellent reading knowledge of Italian required; class discussions in English or Italian, to be decided.

Boccaccio's 'Io' from Novella to Encyclopedia (203617)

Sarah Axelrod

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will provide an overall introduction to Giovanni Boccaccio's brilliant 14th century masterpiece, the Decameron, paying special attention to the figure of the author as character within the one hundred tales. Subsequently, we will also read three highly influential short works: Teseida delle nozze d'Emilia, Elegia di madonna Fiammetta and De mulieribus claris. Here too, we will analyze how Boccaccio playfully and artfully weaves himself into the structure of the text.

Course Notes: Conducted in English.

The Fascist Century (203308)

Jeffrey Schnapp

2017 Spring (4 Credits)

Schedule: F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 30

A research seminar on fascism and culture: this course will provide an in-depth introduction to fascism, its intellectual and political roots, its critique of liberal democracy and communism, and its legacies, with particular attention to fascism's cultural expressions. Its first half will be devoted to readings from key fascist thinkers and theorists; its second half to a series of case studies of major artists, writers, architects, and film-makers who embraced the fascist faith: among them Ezra Pound, author of the Cantos, one of the masterpieces of 20th century American poetry; Leni Riefenstahl, the German film director of classic documentaries such as Olympia and Triumph of the Will; F. T. Marinetti, founder of the Italian Futurist movement; and Mario Sironi, the leading painter, muralist, and graphic artist of the so-called Lictorial Style. Course themes will include: fascism vs. nazism; collectivism vs. individualism; radical right attitudes towards technology and industrialization; and comparisons between mid-20th century fascisms and the sub-cultures of the contemporary new right (from Le Pen's Front National to Baathism to the American militias to so-called "Islamofascism").

Subject: Portuguese

Portuguese 10

Beginning Portuguese I: From Cambridge to Copacabana (120398)

Viviane Gontijo

2016 Fall (4 Credits)

Schedule: MTWR 0900 AM - 0959 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

Intended for those with no prior experience in the target language, this course emphasizes interpersonal communication as well as the interpretation and production of written and spoken language. Students take

their first steps on the journey from speaking English to carrying conversations with Portuguese speakers over the course of one semester, thanks to immersion activities and dynamic, interactive learning. Students will be exposed to contextualized Luso-Afro-Brazilian culture through music, film, social media, as well as via Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have previously studied Portuguese must take a placement exam. Students with a solid knowledge of Spanish should enroll in PORTUG 10s instead of PORTUG 10. This course is taught by members of the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Meets Foreign Lang Req	Portuguese

Portuguese 10S

Beginning Portuguese for Spanish Speakers I: It's SAMBA, not Salsa! (113806)

Viviane Gontijo

2017 Spring (4 Credits)

Schedule:

MTWR 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Designed specifically for students with a sound knowledge of Spanish. This course presents linguistic and cultural structures necessary for basic communication, emphasizing the features of Portuguese most challenging for Spanish Speakers: pronunciation, idioms, and grammatical structures peculiar to Brazilian Portuguese. Over the course of the semester, students learn to express themselves effectively using their Brazilian voice, distinct from their Spanish voice. Students experience contextualized Lusophone culture through music, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes:

Conducted entirely in Portuguese. Requires a solid knowledge of but not necessarily native proficiency in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep:

Prerequisite: 720 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; a 30s level Spanish course; or permission of Course Head.

Portuguese 15

Intensive Beginning Portuguese (156944)

Viviane Gontijo

2017 Spring (8 Credits)

Schedule:

TR 0430 PM - 0529 PM

MW 0430 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This intensive Beginning Portuguese course provides an accelerated introduction to Portuguese with emphasis on interpersonal communication and interpreting and producing language in written and oral forms. Goals include building students' vocabulary, fluency, proficiency, and confidence. Students are exposed to Brazilian Portuguese and culture through music, cinema, and various media sources. The

course covers the equivalent of a full first-year of Portuguese language study.

Course Notes: May not be used to fulfill the language requirement and may not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the Portuguese 15 course head and receive permission to enroll in the course.

Class Notes: The on-line request form is available on the Portuguese 15 course site and must be submitted by January 22, 2017.

Class Notes: An extra hour of Teletandem interaction will be arranged according to enrolled students' schedule and availability.

Recommended Prep: An advanced knowledge of at least one other foreign language but no knowledge of Portuguese.

Portuguese 20

Intermediate Portuguese: Palcos e Palavras (121934)

Viviane Gontijo

2017 Spring (4 Credits)

Schedule: MTWR 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap: n/a

An intermediate course for students interested in expanding and strengthening their Portuguese language skills. Reading, writing, and conversational competencies are emphasized through a panoramic study of Luso-Afro-Brazilian Theater. The course will continue to promote cross-cultural understanding by introducing learners to different textual genres such as screenplays, critical review as well as a selection of literary work that represents the Lusophone arts. The weekly online Teletandem interaction with college students in Brazil, unique to the Portuguese Program, allows learners to discuss readings, and engage in peer-review of writing completed for this course.

Course Notes: Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.

Recommended Prep: Prerequisite: PORTUG 11 (AB) or 11s (AD) OR permission of Course Head.

Requirements: Prerequisite: Portuguese 11 OR Portuguese 11s

Everton Vargas da Costa

2017 Spring (4 Credits)

Schedule:

TR 0400 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This course focuses on a deep reflection on the social functions of written texts in Lusophone cultures and aims to develop writing, reading and speaking skills in the Portuguese language. Portuguese 50 will guide the students through the analyses of essays, articles, editorials, letters, short stories, and poems, as well as the enhancement of vocabulary and complex grammar structures. Students will produce a variety of textual genres and will find their own voices as Portuguese writers.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail, but may be taken SAT/UNS by GSAS students. Not open to auditors.

Recommended Prep: Prerequisite: PORTUG 40; A score between 721-750 on the SAT II or on the Harvard Placement Test; or permission of the Undergraduate Adviser in Portuguese and Brazilian Studies

This is an advanced language course examining the Luso-African-Brazilian experience in the United States. This course promotes community engagement as a vehicle for greater linguistic fluency and cultural understanding. Students are placed with community organizations within the Boston area and volunteer for four hours a week. Class work will focus on expanding students' oral and written proficiency through discussing and analyzing readings, arts, and films by and about Luso-African-Brazilians in the US.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

Beyond Samba and Bossa Nova: The Construction of Brazilian Society through the Study of Music (203375)

Viviane Gontijo

2017 Spring (4 Credits)

Schedule:

MW 0200 PM - 0329 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Deciphering contemporary Brazilian society through its music. This seminar-like course will employ critical reading, writing, and listening without excluding its hands-on elements and music workshops. Students will develop a deeper knowledge of political currents that have influenced Brazilian music, have the opportunity to explore a wide variety of musical genres that surpasses Samba and Bossa Nova, as well as interact with Brazilian musicians and critics from Brazil and beyond. The diversity of Brazil's music will be celebrated by considering its regional (música do norte, nordeste, sul e sudeste), political, social and gastronomical aspects.

Course Notes: Taught in Portuguese. No music experience is necessary, but enthusiasm to participate in the dance and music workshops is indispensable.

Recommended Prep: Prerequisites: PORTUG 50, 59 OR permission of Course Head

Devouring and Being: Anthropophagy and Cannibalism through the "Ontological Turn" (204461)

Dylon Robbins

2017 Spring (4 Credits)

Schedule:

F 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Western thought teaches us that people who eat people are "bad." Indeed, the notion of cannibalism is a recurring concern in the history of ideas regarding the primitive, the animalistic, the monstrous, or any of the other classifications frequently invoked to mark others, regardless of their actual culinary preferences. An extended reflection on cannibalism as an intellectual phenomenon suggests how people eating people, or at least the possibility of it, says a great deal about those that do not. Interesting, as well, is the fact that, in some regions of the Caribbean and Brazil, ideas regarding cannibalism have made an important turn, such that the cannibal has become a provocative affirmation of self. The aim of this course is to think about cannibalism, not, as it often is, as a theme for anthropologists and ethnographers, but rather as an intellectual problem that has enjoyed a very long life in the history of ideas about self, shaping even contemporary critiques of culture. In this course, we shall revisit a selection of texts regarding cannibalism and anthropophagy from Columbus' diaries to the present, and including many noteworthy and fascinating interventions about the idea of cannibalism by, among others, Montaigne, Shakespeare, Hans Staden, Jean de Léry, Oswald de Andrade, Raul Bopp, Nelson Pereira dos Santos, Rubem Fonseca, João Guimarães Rosa, Suely Rolnik, and others. This course will call upon additional materials pertinent to Brazilian history and culture in relation to the transition from the Colonial period to the present in the Americas. Through our discussions we will also think through problems related to cultural theory, difference, the politicization of practices and corporality, post-colonial critiques of history, Eduardo Viveiros de Castro's idea of "ontological predation," as well as the implications of consumption and waste.

Course Notes:

Class discussion will be conducted in Portuguese, while readings will be made available in Portuguese, Spanish, and English.

Subject: Catalan

Catalan 10

Introduction to Catalan (114279)

Elvira G. DiFabio

2017 Spring (4 Credits)

Schedule: TR 0100 PM - 0259 PM**Instructor Permissions:** None**Enrollment Cap:** n/a

An introductory course in spoken and written Catalan, the language of approximately ten million people in Spain, France, Italy, and Andorra, and the most widely used of minoritized languages in Europe today.

Native Catalan speakers include Antonio Gaudí, Salvador Dalí, Joan Miró, Antoni Tàpies, Mercè Rodoreda, and Pau Casals. Emphasizing oral communication, reading, and writing, offers students contact with contemporary Catalan culture.

Course Notes: Conducted in Catalan. Knowledge of another Romance language is useful but not essential. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

This course is taught by members of the Department.

Russia and the Representation of Race (203286)

Michael Kunichika

2016 Fall (4 Credits)

Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

This course examines Russian and Soviet culture and the representation of race. We will approach this topic in terms of Russia's own engagement with questions of race, focusing on episodes in the literary and cinematic representation of minority peoples throughout the empire and the Soviet Union. We will also consider how Russia and the Soviet Union served as a mirror in which minorities from other countries saw their experiences partially reflected. Topics will include: Ralph Ellison's *Invisible Man* and its relationship with Fyodor Dostoevsky's *Notes from the Underground*; representations of Central Asia by such figures as Langston Hughes and Andrei Platonov; African-American intellectuals and the Soviet Union (Du Bois, Hughes, McKay); Aleksandr Pushkin and questions of "blackness"; the cinematic representation of minority bodies in the work of Dziga Vertov and Vsevolod Pudovkin; the Soviet critique of American race-relations; and Russia's position between the symbolic antinomies of East and West. We will draw our critical theoretical models from such figures as Homi Bhabha, Dipesh Chakrabaty, Stuart Hall and Trinh Mihn-Ha.

Class Notes: Course will be taught by Visiting Assistant Professor Michael Kunichika

Narrative Strategies in Gogol's Short Fiction (110039)

Oleh Kotsyuba

2016 Fall (4 Credits)

Schedule:

M 0215 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course offers an opportunity to read Nikolai Gogol's short fiction in the original while also reflecting on challenges for translation into English that Gogol's language and style pose. We will explore contextual issues and productive critical approaches and pay close attention to Gogol's narrative strategies, structural solutions, and the form and function of Gogolian humor. Weekly readings of short fiction will be placed in the context of larger theoretical issues (language, interpretation, narrative, translation, etc.). Students will prepare two short translations of their own and discuss functions of different text elements in short position papers and interpretive essays. We will also consider some film adaptations of Gogol's works and discuss their success or failure in rendering the texts' important features.

Recommended Prep: Good reading knowledge of Russian.

War and Literature: Responses to WWII in Polish Culture (119975)

Aleksandra Kremer

2016 Fall (4 Credits)

Schedule:

R 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The survey course War and Literature will introduce you to the works of Polish art and literature which resulted from direct experiences, collective memory, or an individual study of the Second World War, the event which demanded a radical revision of artistic means of expression, and continuously has numerous repercussions for Polish culture and politics. Literary works of different genres (poetry, novel, memoir, reportage, essay) and different traditions will be supplemented with visual arts (films, performances,

paintings, photographs) and juxtaposed with recent scholarly texts and debates. We will examine works created between the 1940s and contemporary times, which refer to life under occupation, the Warsaw and Ghetto Uprisings, the Holocaust, Nazi concentration camps, Soviet gulags, as well as the post-war condition of the country, its art and survivors. Through this topic we will study different artistic strategies adopted by renowned Polish authors: Miłosz, Różewicz, Borowski, Nałkowska, Białoszewski, Wat, Grotowski, Kantor, Wróblewski, Wajda, Krall, including works belonging to the so-called Polish Film School, Polish School of Poetry and Polish School of Reportage.

Course Notes: All texts will be available in English.

Class Notes: Course will be taught by Assistant Professor Aleksandra Kremer

Miłosz and America (203535)

Aleksandra Kremer

2017 Spring (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap: n/a

Czesław Miłosz spent almost half of his life in the United States, translated selected American poems, and maintained different personal contacts with American intellectuals. However, numerous roles that he played in the US as a professor of Slavic literatures, poet, essayist, translator, editor, and Nobel Prize winner, were mostly aimed at explaining and promoting his own cultural and historical background. His presentations of East-European heritage and his vision of poetry were built with American audience in mind and frequently in opposition to his convictions about Western culture. We will discuss diverse texts revealing different (often contradictory) faces of Miłosz as a poet who tried to control translations of his poems and his reception, as a teacher of Polish literature and promoter of Polish poets, as an interlocutor and correspondent of Brodsky and Merton, as a critic of the West, as a speaker at Harvard, as a translator of Eliot and Whitman, or as an author dedicating his texts to Ginsberg and Lowell. We will also study the recognition that Miłosz gradually won in the US and his impact on English-language poets, such as Hirsch, Hass, and Heaney.

Course Notes: All texts will be available in English.

Global Voices: Russian Literature Today (160740)

Oleh Kotsyuba

2017 Spring (4 Credits)

Schedule:

W 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this course we will read some of the most interesting and influential literary works in prose and poetry written in Russian during the last thirty years. The period since the collapse of the Soviet Union has been marked by rampant experimentation, as the literary production was freed completely from censorship for the first time in over 200 years. We will discuss artistic and institutional motivations that underpin each work and place them within theoretical and historic frameworks. We will explore works by authors from other countries (Ukraine, Belarus, Kyrgyzstan, Uzbekistan, Israel, United States, etc.) that were originally written in the Russian language. Our goal will be to get a good sense of the entire spectrum of the contemporary Russian-language literary scene, to discuss questions of identity-formation, experimentation vs. traditionalism, gender dynamics, and genre. We will try to understand what makes a literature "national" and what the global aspects of literature are today. We will also consider thematic focus vs. stylistic preferences as elements of an author's literary identity and self-positioning. Readings will include prose, drama, and poetry by Venedikt Erofeev, Vladimir Sorokin, Sasha Sokolov, Ludmila Pertrushevskaya, Tatiana Tolstaia, Elena Shvarts, Viktor Pelevin, Zakhar Prilepin, Eduard Limonov, Chingiz Aitmatov, Ludmila Ulitskaya, Dmitrii Bykov, Olena Stiazhkina, Linor Goralik, Andrei Kurkov, Svetlana Alexievich, Hamid Izmailov, Shamshad Abdullaev, Polina Barskova, and others. To round off our discussion of literary works we will also consider two innovative contemporary Russian-language films – Myroslav Slaboshpytskyi's *The Tribe* (Ukraine, 2014) and Andrei Zviagintsev's *Leviathan* (Russia, 2014).

Course Notes: All readings will be in English translation. Films will be subtitled (if applicable).

Russian and Soviet Silent Film (115709)

Daria Khitrova

2016 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Explores filmmaking and film culture from Imperial to early Soviet Russia; from the former's deep and deliberately slow psychological melodramas directed by Yevgeni Bauer to super-dynamic, politically charged montage movies that brought fame to directors as different as Dziga Vertov, Lev Kuleshov, and Sergei Eisenstein. The range of genres include: revolutionary heroics, adventure films, eccentric and social comedies, newsreels and documentaries. Films from Russia will mix with Ukrainian and Georgian silent films. Readings (all in English) include contemporary film theory (now classic) and critical reviews. Weekly screenings will be arranged.

Course Notes: All readings in English.

East Central European Novel after World War II (119278)

Jonathan Bolton

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Writers from Poland, Czechoslovakia, Hungary, Yugoslavia, and Romania have imagined their region as

one of multicultural harmony and murderous ethnic cleansing, as home to Europe's most debased forms of evil and most inspiring spirit of resistance, as Europe's neglected backwater and its true conscience. For Milan Kundera, Central Europe was the kidnapped conscience of the West; for György Konrád it was a subversive dream, for Josef Kroutvor a melancholy grotesque. What holds these contradictory identities together? This seminar will introduce you to some of the classics of Central European literature after World War II, including authors such as David Albahari, Thomas Bernhard, Elias Canetti, Bohumil Hrabal, Ryszard Kapuściński, Danilo Kiš, Milan Kundera, Norman Manea, Sándor Márai, Czesław Miłosz, Herta Müller, Magda Szabó, and others. We will ask how these writers can be understood in a regional context rather than a national one, and we will examine some key themes of the modern Central European novel (including war and occupation, the encounter with Communism, emigration and exile, the interplay of personal biography and national history, and the encounter between artists and the state).

Course Notes: All readings in English.

Slavic 197

Dissidents from Plato to Pussy Riot (123117)

Jonathan Bolton

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

From Socrates and Antigone to Pussy Riot and Ai Weiwei, we are fascinated by the courage of dissidents who oppose tyrannical regimes. But who are dissidents, and where do they gain the conviction, imagination, and political skill to stand up for their beliefs? In this interdisciplinary course, we will investigate questions about the role of non-violent dissent in political and cultural life, and in particular the figure of the dissident as represented in literature, political theory, journalism, and documentary film. After considering some classic statements of dissent (Plato's *Apology*, Thoreau's "On Civil Disobedience," Martin Luther King's "Letter from Birmingham Jail"), we will turn to recent and contemporary dissidents to think about their paths into protest, their complicated relationship with their fellow citizens, and their portrayal in domestic and international media. Our focus will be on individuals rather than on social movements, and on non-violent rather than violent or revolutionary protest. Drawing examples from the Soviet Union and Russia, East Central Europe during the Cold War (Poland, Czechoslovakia, East Germany), and China, we will consider figures such as Václav Havel, Adam Michnik, Aleksandr Solzhenitsyn, Vladimir Bukovsky, Irina Ratushinskaya, Liu Xiaobo, Ai Weiwei, Pussy Riot, and others.

Course Notes: All readings are in English.

A one-time only, collaborative course organized around the October, 2016 performance at Harvard of Petersburg's Bolshoi Drama Theater's production of *The Visible Side of Life*, a one-woman play about the poet Elena Shvarts. This is a year-long course, for four credits. The course will meet for four 90-minute sessions in fall, 2016 to discuss traditions of performing poetry in the theater; the history of the Bolshoi Drama Theater; Russian performances as a research topic; Russian poets' styles of reading; poetry performance across media; and the poetry of Elena Shvarts, particularly its dramatic aspects. The goal of the fall semester sessions will be to prepare students for the theater performance of *The Visible Side of Life*; to build a foundation for students to do academic work in performance studies; and to formulate research questions on adaptation, transformation, translation across media and art forms.

In the spring semester, students will work on independent projects under the supervision of a faculty member. Collaborations, curated web sites, performances, performance proposals, conference presentations, and traditional seminar papers will all be welcome. The spring semester will end in a celebratory gathering for participants to share their work.

Recommended Prep: Reading knowledge of Russian.

Subject: Czech

Czech AA

Elementary Czech I (111301)

Veronika Tuckerova

2016 Fall (4 Credits)

Schedule: MWF 1000 AM - 1059 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

Part one of a two part introductory course in modern Czech language and culture, designed for students without previous knowledge who would like to speak Czech or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Czech culture through work with film and literature and gain some familiarity with the major differences between literary and spoken Czech as they learn to use the language both as a means of communication and as a tool for reading and research. Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

Please note that this course will also meet for an additional hour of speaking practice to be arranged the first week of classes. See [language course notes](#) on our website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing.

Additional Course Attributes:

Part two of a two part introductory course in modern Czech language and culture, designed for students without previous knowledge who would like to speak Czech or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Czech culture through work with film and literature and gain some familiarity with the major differences between literary and spoken Czech as they learn to use the language both as a means of communication and as a tool for reading and research. Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

Please note that this course will also meet for an additional hour of speaking practice to be arranged the first week of classes. See [language course notes on our website](#) for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing.

Course Notes:

Note on Auditing, Pass/Fail and Satisfactory/Unsatisfactory (Sat/Unsat): As a general rule, no auditors are permitted in language courses. If fellowship terms or other circumstances prohibit registration, students must speak with the Director of the Language Program to request permission to audit. Undergraduate students are generally discouraged from taking language courses Pass/Fail and may do so only after consultation with and permission from the Director of the Language Program and the course instructor. Graduate students may register on a Pass/Fail basis (as Sat/Unsat) with permission of the Director of the Language Program and the course instructor.

2016 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Part one of a two part intermediate course in modern Czech language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Czech grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms. The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Please note that this course will also meet for an additional hour of speaking practice to be arranged the first week of classes. See [language course notes on our website](#) for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing.

Recommended Prep: Completed Czech AB, or placement at the B-level. Familiarity with fundamentals of Czech grammar, particularly case endings and elementary competence in spoken Czech.

All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms. The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Please note that this course will also meet for an additional hour of speaking practice to be arranged the first week of classes. See [language course notes on our website](#) for information about sectioning, pass/fail,

satisfactory/unsatisfactory, and auditing.

Recommended Prep: Czech BA or placement at the B-level. Familiarity with fundamentals of Czech grammar, particularly case endings and elementary competence in spoken Czech.

2016 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family, education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social situations (sociolinguistic competence). Computer exercises on selected topics. Any full course in Russian at the B-level (Russian Ba-Bb, Russian Bta-Btb, or Intensive Russian Bab) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Please note that this course will also meet for two additional hours of speaking practice to be arranged the first week of classes. See [language course notes on our website](#) for information about sectioning, pass/fail, satisfactory/unsatisfactory, auditing, and language track information.

Recommended Prep:

Russian Aa-Ab, Aab, Ata-Atb, Ah, or placement at the B-level. Familiarity with fundamentals of Russian grammar, particularly case endings, verb conjugation, and elementary competence in spoken Russian.

2016 Fall (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family,

education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social situations (sociolinguistic competence). Computer exercises on selected topics. Any full course in Russian at the B-level (Russian Ba-Bb, Russian Bta-Btb, or Intensive Russian Bab) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Please note that this course will also meet for two additional hours of speaking practice to be arranged the first week of classes. See [language course notes on our website](#) for information about sectioning, pass/fail, satisfactory/unsatisfactory, auditing, and language track information.

The Chinese Immigrant Experience in America (159824)

Nicole Newendorp

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Uses the history of Boston's Chinatown as a case study to examine the experiences of Chinese immigrants in the U.S. from the 1880s until the present. Employs historical, anthropological, and sociological perspectives to examine major themes related to the social and economic development of U.S. Chinatowns and Chinese immigrant communities throughout the 20th and 21st centuries. This course is an activity-based learning course, limited to students who are concurrently participating in a Harvard-affiliated service program in or around Boston's Chinatown. Class discussions and assignments will make active links with students' service work. Open to students in all concentrations.

Additional Course Attributes:

Education and Community in America: Universities and Community Engagement, 1890-2016 (159823)

Ariane Mary Liazos

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Explores efforts to realize the civic purpose of American universities, particularly in terms of attempts to engage local communities through educational outreach programs. Examines major periods of experimentation

and innovation in the 20th and 21st centuries, from the settlement house movement of the early 1900s to recent efforts to revive the public mission of universities through service-learning and other forms of civic education. This course is an activity-based learning course, limited to students who are concurrently participating in education-related service programs affiliated with Harvard. Class discussions and assignments will make active links with students' service work. Enrollment capped at 12.

Development and Modernization: A Critical Perspective (116329)

Stephen Marglin

2016 Fall (4 Credits)

Schedule: T 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

What assumptions about human beings underlie the conviction that development and modernization constitute progress, that the developed West points the way for the rest of the world? Does economic growth involve a package that necessarily changes the society, the polity, and the culture along with the economy? This tutorial provides a framework for thinking about these questions, both in the context of the West, and in the context of the Third World.

Course Notes: This course will be lotteried.

Law and American Society (121345)

Terry Aladjem

2017 Spring (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

Examines law as a defining force in American culture and society in four dimensions—as it establishes individual rights, liberties, and limits of toleration; as it attempts to resolve differences among competing constituencies; as it sets out terms of punishment and social control, and as a source of informing images and ideological consistency.

Course Notes: A prison trip is planned, subject to approval. This course will be lotteried.

Art, Popular Culture, and Civic Life (116288)

Kiku Adatto

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

The seminar explores the interplay of the arts, popular culture and civic life. It will draw on studies in art, history, philosophy, literature, sociology, and photography. Among the questions we will address are: How is historical memory constructed, and what are the competing forces that shape it? What is the significance of public apologies, and does solidarity create moral responsibilities for historical injustices? What accounts for impulse to control and censor the arts? How is cultural domination exerted, and how is it resisted? In what ways does rhetoric shape politics, and what role does it play in national narratives? Why does the contest to control images loom so large in politics and in our everyday lives?

Course Notes: This course will be lotteried.

Andrew Jewett

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Explores how education has been and continues to be a central institution of American society, reflecting social ideals and ideologies while also directly shaping the contours and structures of society in both productive and detrimental ways. Examines different philosophical foundations of formal learning and how those theories have become manifested across time in various educational practices. Investigates how schools currently operate, specific issues the American educational system faces, and the implications of various schooling practices for structuring American society.

Migration in Theory and Practice (127021)

Nicole Newendorp

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

In this course, we will examine how and why people migrate from one location to another, focusing both on the theoretical paradigms scholars use to explain migration processes as well as on the individual experiences of migrants. Topics include transnationalism, diaspora, identity formation, integration and assimilation, citizenship claims, and the feminization of migration. Ethnographic readings focus primarily on migration to the US, but also include cases from other world areas, most notably Asia.

Mass Violence, Memory, and Reconciliation (128057)

Jonathan Hansen

2017 Spring (4 Credits)

Schedule: M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This tutorial examines the problem of national reconciliation after mass violence. How does a nation sundered by genocide, civil war, or political repression reestablish the social trust and civic consciousness required of individual and collective healing? What makes some reconciliations successful, others less so? The course will engage these and other questions from historical and contemporary perspectives, exploring the legacy of mass violence going back centuries, while comparing reconciliation projects across cultures, countries, and continents.

Course Notes: This course will be lotteried.

Human Rights in Africa (109963)

Gwyneth McClendon

2016 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

To what extent are human rights discussed, contested and protected in Sub-Saharan Africa? This course addresses this question by taking seriously the enormous variation across Sub-Saharan African countries. Among the topics we discuss are: To what extent does a human rights agenda have an indigenous history and support on the continent? To what extent have African independence and other social movements made use of human rights claims and to what effect? To what extent has the human rights agenda in Sub-Saharan Africa involved socio-economic rights versus civil and political rights? To what extent has the agenda involved issues facing women and members of the LGBT community? And to what extent and how should non-African governments and organizations be involved in promoting a human rights agenda in these countries? We examine variation in colonial institutions, contemporary state-society relations, democratization and social identity groups in order to understand more about how configurations of power, state institutions and civil society condition the promotion of human rights in Sub-Saharan African countries.

Course Notes: This course will be lotteried.

Humans, Technology, and Biopolitics (109964)

Anya Bernstein

2016 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

Recent scientific and technological advances are increasingly questioning what it means to be human. Debates on life extension, gene editing, and artificial intelligence regularly appear in the media, with views ranging from techno-optimism—the idea that such breakthroughs will deliver us from suffering—to the warnings that technoscience is advancing at such a rapid pace, that there is not enough time for ethical guidelines to be developed. Some argue that science is increasingly delivering on the promises traditionally made by Judeo-Christian religions, while others assert that such techno-optimist thinking is a kind of new religion in and of itself. Debates around emerging technologies cut across traditional political lines, making them specifically biopolitical, where such issues as human enhancement, control of reproduction, genetic engineering, and many others, create new types of political positions and actors. This course will examine these issues, focusing specifically on what concepts of "the human" emerge from these debates, and how certain ideas about the future affect how we live and manage our time now, as futurist discourses are producing affective states of both hope and fear. Among the case studies for this course, we will look at the cultural and philosophical movements of transhumanism and posthumanism, new utopian and eschatological imaginaries, as well as ethical and legal questions of developing and using biomedical technologies, including their non-therapeutic use. As we proceed, we will pay particular attention to the shifting relations between body and person, human and time, transcendence and corporality, and technology and biology, while discussing how they contribute to the rethinking of the human condition in the technological age. Materials for the course will include academic pieces from a range of disciplines: STS, anthropology, philosophy, bioethics, as well as non-academic media sources, documentaries, and science fiction films.

The Politics of the Environment in Asia (159815)

Kevin Caffrey

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

Scholars have noted the connection between environment and specific forms of Asian politics and society.

Today China reengineers the flow of its rivers to address social demands for water. South & Southeast Asian polities realize how politics beyond their borders can determine the flow of the region's rivers--and thus the health of their societies. The dangers of poor air quality, polluted land, and contaminated food energize social movements and unrest. Asian development models have resulted in extreme pollution, and with resulting public health problems, governmental attention to the environment has increased. In this research seminar students will explore "politics and environment" in Asia, with some attention being given to the future.

Course Notes: This course will be lotteried.

Political Rhetoric and American Democracy (159816)

Adam Sandel

2016 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

In this course, we will investigate a question at the heart of democratic politics: in what sense, if any, is rhetoric a part of reasoned political argument? Is rhetoric a regrettable feature of democracy, or a practice worth cultivating? We often denigrate rhetoric as pandering or manipulation. We often assume that stories, images, and metaphors intended to persuade a particular audience are, at best, adornments to the "real argument." At worst, they are means of trickery, ways of moving people to a decision that their better reason would reject.

But examples of great rhetoric force us to question this assumption. The speeches of political figures such as John F. Kennedy, Lyndon Johnson, and Martin Luther King arguably derive their moral force not simply from the principles they invoke, but from the way in which they appeal to the life circumstances of their listeners.

We will examine the case for and against rhetoric by turning to classical texts (Aristotle, Plato, Hobbes, Kant), contemporary political theory (Garsten, Beiner, Chambers), and great political speeches (Douglass, Lincoln, Johnson, and others.)

Environmental Theory (203273)

Rebecca Ploof

2017 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

The term "anthropocene" – which suggests that the natural world has been profoundly altered by human activity – originated in the physical sciences and has become an increasingly popular a way to describe the time in which we live. But how have the social sciences understood nature and humanity's relationship to it? Is this relationship best framed in terms of human exceptionality and domination? Is our connection to the natural world and its non-human inhabitants best construed, alternatively, in terms of interdependence or, perhaps, ethical obligation? What are the social, political, and economic implications of the relationship between nature and humanity? This course will explore these and related concerns by pairing classic texts from the history of social and political thought with contemporary ecological discourse.

Global Democratic Theory (203274)

Angela Maione

2017 Spring (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

What does it mean to think democratic politics in a transnational or global vein? What might global democracy look like? Does it differ from global democratic practice? In this seminar we will consider the advantages and disadvantages of various contemporary responses to these questions. We will also turn to history in order to trace a genealogy of the possibilities and limits of global democratic theory from the 18th century to the present. Finally, we will engage a series of contemporary debates around digital democracy, transnational feminism, radical cosmopolitanism, and human rights in light of both the history of political thought as well as in relation to more recent democratic theory. Readings may include Rousseau, Marx, Luxemburg, and Arendt from the history of political thought as well as contemporary scholarship by Raymond Geuss, Martha Nussbaum, Seyla Benhabib, James Ingram, Claude Lefort, Etienne Balibar and Robert Meister, among others.

Crime and Governance in Latin America (203415)

Ieva Jusionyte

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This course examines how governing through crime has become a dominant mode of power and sovereignty in Latin America. Through ethnographic case studies on forced disappearances, drug trafficking, transnational gangs, and government corruption in Mexico, Guatemala, El Salvador, Brazil, and Argentina, we will analyze historical, economic, social and cultural process that have shaped the organized brutalities and petty delinquencies in the region. The underlying questions motivating our discussions throughout the semester include: Who has the power to outlaw particular activities and what is the logic behind designating people who engage in them as criminals? While laws establish formal boundaries between the legal and the illegal, how does a bottom-up approach to governance and lived experiences of crime blur this separation?

Course Notes: This course will be lotteried.

Empire and Colonialism in the Modern World (160338)

Daragh Grant

2017 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This tutorial will expose students to the scholarship on modern empire from across the fields of anthropology, history, law, and political science. Students will be asked to consider the differences and commonalities in empires across space and time. They will also explore how relations of empire and colonialism were constituted through structures of law and of economic relations, as well as how notions of race and culture were shaped by imperial encounters. Finally, the readings for this tutorial will introduce students to a range of methodological approaches to the study of empire, with an emphasis on historical methods, and will invite them to consider the strengths and weaknesses of these different approaches.

The Critical Theory of the Frankfurt School (156263)

Peter Verovsek

2016 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This tutorial examines the major thinkers and themes associated with the Frankfurt School of critical theory. From its origins in the interwar crisis, critical theory has sought to diagnose the pathologies of the present in order to chart paths for social and political emancipation in the future. The readings trace the development of the Frankfurt School its various generations, engaging with many of the most important themes of twentieth century continental philosophy, including fascism, democracy, capitalism, bureaucracy, globalization and inequality, to name just a few. The goal of the tutorial is not only to gain a deeper understanding of the Frankfurt School, but also to assess the continued relevance of this distinctive approach to the critical theory of society.

Sociology

Subject: Sociology

Sociology 23

Introduction to Political Sociology (159779)

Bart Bonikowski

2016 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Politics is about power and authority. But the production, conservation and distribution of power and authority occur far beyond Capitol Hill: in family dynamics, neighborhood residential patterns, racial discrimination, welfare policies, social movements, nation-states and the globalized economy. So how is power exerted? Where is it, and how is it gained and lost? How do power centers get challenged? In this course, we examine such questions using the conceptual framework and analytic tools of political sociology. Major themes will include the nation-state and its challengers, capitalism, democracy, and globalization. Abstract, theoretical works are explored with practical applications and illustrations in specific national/historical contexts. Students will also become aware of criticisms and debates in political sociology – as well as its limitations.

Introduction to Social Inequality (117584)

Benjamin Sosnaud

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

At its core, the study of social inequality seeks to answer two simple questions: who gets what, and why? The course is organized into three units that represent core elements of social position: social class, race/ethnicity, and sex/gender. Each unit will begin with a descriptive assessment of how socioeconomic resources are distributed. We will then explore the social processes, structures, and institutions that influence the distribution of these resources. The course materials consist of a selection of books that have defined contemporary research on social inequality.

Enrollment Cap:

n/a

Social movements and revolution have long been driving forces behind political, social, and cultural change. From the Civil Rights movement of the 60s to the recent and unpredicted "Arab Spring," the extraordinary mobilization of ordinary people is routinely credited with fundamentally re-shaping societal institutions--the polity, the economy, religion, gender, race, and even the environment. But can we really define and study something as ephemeral as social mobilization? Do we know how social movements begin? Why might they become revolutionary? Can they make a difference in the societies they target? This course examines these questions within the sociological literature on collective action. Theories of social movements and revolutions are then applied to a series of case studies around the globe. Case studies may include the US, Iran, China, El Salvador, Chile, India, Poland, Argentina, Egypt, and Nigeria, among others. Students will also be required to apply course readings to the collective action case of their choosing throughout the semester.

Sociology 98CA

Culture and Criminal Justice (203487)

2017 Spring (4 Credits)

Schedule: M 1000 AM - 1159 AM

This course examines how cultural meanings structure the functioning and experience of the American criminal justice system. Students will be introduced to key concepts in cultural sociology, through which they will examine how beliefs, attitudes, norms, symbolic boundaries, and frames shape the criminal justice process—from policing and court processing to incarceration and re-entry. Course readings will focus on how the interplay between cultures of dominant actors (e.g., police, prosecutors, and politicians) and those of subordinate actors (e.g., criminal defendants, juvenile offenders, and families) shapes inequality. We will also consider how culture could be used as a tool for creating positive social change in the management of crime and the pursuit of justice. Students will complete an independent research project on some aspect of criminal justice, employing in-depth interviews and/or ethnographic methods to investigate the cultural worlds of institutional actors. Through in-class workshops, we will formulate research questions and develop practicable research designs. These projects will enable students to deeply explore how a qualitative cultural sociological approach can confirm, complement, or even call into question other perspectives on criminal justice. Students will also be expected to consider the limitations of a qualitative cultural sociological approach. Given the sensitive nature of research on the criminal justice system, students will be guided to focus their projects on accessible institutions and actors, such as policymakers, politicians, open court proceedings, and organizations for the formerly incarcerated.

Arts, Culture, and Urban Neighborhoods (126247)

Matthew Kaliner

2016 Fall (4 Credits)

Schedule: W 1200 PM - 0159 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 10

Cities have long been centers of cultural innovation, such that creativity, arts, and culture are key factors of urban life and increasingly relevant to public policy. Grounded in contemporary debates around the role of arts and culture in the contemporary urban city, this course will introduce students to the key research traditions in two distinct subfields: urban sociology and the sociology of culture. The focus will necessarily be on research that spans both fields, hitting key topics such as musical scenes, neighborhood images, "nightlife economy," and museums and cultural hierarchies. Along the way, we will explore broader issues of city life, like neighborhood boundaries, gentrification, city growth, racial segregation, and the concentration of poverty – as well as perspectives on the production and reception of artistic work. Ultimately, the course seeks to blend these diverse but intertwined research fields to highlight the relation of urban change to artistic creativity – and to critically evaluate the prospect of culturally-led revitalization efforts. Through a series of projects and assignments, students will gain experience in at least three modes of qualitative research: street interviews, participant observation, and semi-structured interviews.

Course Notes: Required of and limited to Sociology concentrators.**Requirements:** Prerequisite: Sociology 97 AND Sociology Concentrators.**Additional Course Attributes:**

Protest and the State (159924)

Danilo Mandic

2016 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Social movement protests challenging state policy, legitimacy and leadership have become a central feature of American political life. This tutorial explores major protest episodes in the United States, emphasizing historical trajectories and movement precedents. Four major trajectories will be considered: (1) the Civil Rights Movements of the 1950s and 1960s, and Black Lives Matter activism; (2) 1960s student movements and 2000s antiwar activism; (3) early 20th century US labor movements, and anti-globalization and Occupy Wall Street activism; and (4) suffragist and early feminist movements, and the women's movement of the 1960s and 1970s and contemporary LGBTQ activism. Students will conduct an independent research project on a movement of their choosing (not necessarily one covered in the syllabus) using the conceptual and methodological tools of sociology – archival research, content analysis, interviews, and/or ethnography. In addition to learning about issues of protest and the state, the tutorial will be dedicated to exploring issues in research design and methods. Several weeks will be devoted to student presentations and workshopping, as students develop an independent research project with original data collection.

10

There is growing awareness of the importance of social factors in shaping health outcomes. In this course, we will explore these social determinants of health through the study of issues like differences in mortality and morbidity between social groups, the influence of social networks on health behaviors, the structure of health insurance provision, the effects of public health expenditures, and the environmental factors that influence health outcomes. Students will develop independent quantitative research projects on a topic of interest and gain experience with the process of research design, data collection, and analysis.

"Studying Up": Privilege, Elite Education, and Inequality (160224)

Tiffany Ting

2016 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Privilege is an understudied but important topic in educational and social science research. Recent scholarship increasingly attends to the role that elite educational institutions play in producing and maintaining social and economic inequalities. In this course, we will investigate the connections between class, privilege, and educational advantage. By employing the lens of cultural sociology, we will explore various contexts for elite education, the cultural practices around which they are organized, and the ways in which individuals negotiate a sense of legitimacy and identity within these spaces.

Higher Education: Institutions, Inequalities, and Controversies (203333)

Manja Klemencic

2016 Fall (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar explores modern higher education systems and institutions through sociological lenses. We will identify major issues and controversies in contemporary higher education policy and research – such as rising student debt, inequality in access, grade- and degree "inflation", commercialization of higher education, and the increased bureaucratization of universities. We will explore these issues drawing on the seminal works and concepts of the sociology of higher education, such as the study of inequalities, college impact, universities as organisations, academic profession, higher education politics and higher education culture. This will be an opportunity to gain perspectives into established and emerging areas of research into higher education and insights into today's changing landscape in higher education across the world.

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

International humanitarian organizations are often first on the scene when armed conflicts erupt or natural disasters strike, but their efficiency and legitimacy are constantly questioned. This course examines humanitarian activism from a sociological perspective by looking at its history and its role in contemporary society. We will examine the origins of organized humanitarian activism and the dilemmas and challenges that NGOs must often face. We will investigate the consequences, justifications, and limitations of humanitarian work, focusing substantively on several case studies including the Kosovo War, the Nigerian Civil War, and the 2004 Indian Ocean Tsunami. The course will conclude with presentations based on students' independent research and exploration of an applied topic from the course.

This seminar offers perspectives on the role of higher education institutions in the politicization of students. We will examine the origins, trajectories, and effects of student activism on campuses in the US and compare these to student activism in other parts of the world. Some of the major questions addressed will be: What are the similarities and differences between contemporary student activism? How does student activism relate to social movements? How is the tension between student representation and activism resolved in various higher education contexts? What are effective ways for university leaders to address student activism? And how do we define the success of student activism? We will read some of the major works on student activism and probe the sociological tools to analyze and explain contemporary student activism from a comparative perspective.

Social Trauma and Collective Identity (203441)

Shai Dromi

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Even though trauma is often a personal experience, it can also affect groups, regions, and even whole nations. This course explores the notion of social trauma by focusing on its emergence, commemoration, and transmission in different societies. How do ideas of trauma stay constant across generations? And what are the consequences of these processes in a variety of sites such as politics, social activism, art, and domestic life? The main analytic assignment enables students to further explore a site of their choice that represents collective trauma. Upon collection of primary evidence, students will analyze their case using

the concepts and readings covered in class.

The Pursuit of Community in America (159927)

Matthew Kaliner

2017 Spring (4 Credits)

Schedule:

TR 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What is community? Where does it come from, and what does it accomplish? To engage these questions, we will explore community from three distinct but complimentary perspectives: ethnography, intention, and policy. We begin with classic accounts of urban and suburban communities, and more recent work on communities struggling through changes like gentrification or environmental disasters. From there we turn to communities formed through intention: cults, communes, workplace cultures, social movements, and virtual networks. Finally, we consider how community enters the policy and planning domain, through community policing and new urbanist planning principles. Students will have opportunities to reflect on their own ideas about community via analytical response papers and an original piece of research exploring a community of their own choosing.

Shai Dromi

2016 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Most moral and religious frameworks uphold some form of benevolence and charity. However, societies have different ways of thinking about the roles of philanthropy and nonprofit organizations. This course investigates the nature of philanthropy and nonprofit organizations and their influence on civil society. We will consider different sociological approaches to charitable giving and apply them to substantive topics, such as competing philosophies of giving and the relationship between philanthropic and state-sponsored programs. We will also address issues of social responsibility that arise when corporate actors engage in philanthropic work. As a culminating active learning exercise, students will identify and evaluate nonprofits as potential donation recipients, and will assess the impact a donation would make for those organizations.

In this course, we will use culture as an analytic lens for investigating the institution and experience of school. We will examine 1) relationships and borders between schooling and broader educational contexts including families and communities; 2) schools as dynamic social and cultural systems, and 3) classrooms as sites of conflict, collaboration, and innovation in teaching and learning. Throughout, we will consider how individuals in a variety of roles – teachers, students, administrators, parents, researchers – interpret, negotiate, and respond to the practices and arrangements of schooling. We will examine the complex role of cultural factors in producing, maintaining, and potentially reducing inequalities in educational access, opportunity, and outcomes.

Identity, Inequality and Social Media (161284)

Keridwen Luis

2017 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course asks how gender, sexuality, race, dis/ability, class, and other intersections of identity impact how we use and appear on social media. Early internet theorists imagined the World Wide Web as a "free" society, where "bodily" issues such as race, gender, and disability would somehow disappear. However, these identities have not vanished; in fact, we might argue that they remain even more potent in today's age of constant media connection. We will explore sociological and feminist theories of media, gender, sexuality, and race, as well as applying these theories to current events online. Students will explore the boundaries of digital activism, question the ways we continue to be embodied online, and consider power relations, discipline, and surveillance.

Situating China in the context of the transition from socialism, this seminar provides an overview of contemporary Chinese society. We will explore recent structural changes in China's economy, political system, legal institutions, media, family forms, education, stratification and inequality, and contests over space—as well as how all these various changes interact with one another. We will begin with the Chinese Communist Revolution and then the Cultural Revolution as crucial historical context, and then move on to examine the profound social transformations of the post-1978 reform period. The course will examine how these changes have impacted social relations, how they have been experienced and understood by individuals, and how, in turn, the responses of individuals have also shaped the trajectory of reforms.

Course Notes:

/c/ This course, when taken for a letter grade, meets the Core area requirement for Foreign Cultures.

Economic Sociology (204172)

Leah Muse-Orlinoff

2017 Spring (4 Credits)

Schedule:

MW 1200 PM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

The field of economic sociology brings our attention to ways that economic priorities and processes reflect social dynamics. From ceremonial exchanges of goods in the South Pacific, to the development of modern capitalism, and from interlocking relationships between large corporations to wages, remittances, and social networks, economic sociology considers the social contexts that influence how individuals, communities, and societies organize their resources and how these processes in turn impact our lives. This course offers an overview of economic sociology's major theories and findings across several major themes. The first part of the course focuses on the theoretical underpinnings of economic sociology, and what characterizes a sociological view of the economy. In the second part of the course, we explore some of the social and cultural forces that have shaped key economic institutions such as corporations, insurance, wages and benefits, and marketplaces. The third part of the course considers the impact that these economic institutions have on the quality of life for individuals, communities, and societies. We conclude by asking how the field of economic sociology approaches issues of inequality and social mobility in the United States and globally.

In this course, we will study health differences between social groups. We will begin by examining the extent to which health is unevenly distributed across groups defined by nationality, neighborhood, race, gender, and class. We will then seek to pinpoint the reasons for these disparities with a detailed analysis of the pathways through which these factors are linked to health status. Finally, we will discuss new research on the sociology of population health that shows how health disparities depend on meso- and macro-scale causes like neighborhoods, social policy arrangements, global organizations, and climate change.

Political Economy and Global Transformation (203913)

Martin Arboleda

2016 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course introduces students to some of the core methods, questions, and theoretical frameworks in the tradition of global political economy. It does so through a sociological exploration of recent transformations in global capitalism, seeking to reveal the worlds of human social practice hidden behind economic categories such as debt, prices, and money, among others. We live in an era of unprecedented social transformation, where the expansion of markets and monetary relations has interwoven the most diverse ecosystems, human groups, cities and settlements into a complex whole. The course begins by analyzing the genesis or 'pre-history' of globalization in the forms of market-making and economic interdependence that emerged in the context of empire and modern colonial rule. We then shift towards recent decades in order to interrogate the ways in which global restructurings of capitalist production have transformed world agriculture, finance, urbanization, ecology, governance, and warfare. Because uneven geographical development is a collateral effect of globalization, the course also explores the varieties of sociopolitical contestation concomitant to it. Anti-eviction movements in Spain, far-right political parties across Europe, global peasant movements, fossil fuel divestment movements, and the politics of occupation, will be some of the cases to be examined.

A key aim of the course is to provide students with critical analytical skills to decipher the multiple connections between the political and the economic, ranging from the geopolitical relations of the nation state to the gender relations of the nuclear family. The course introduces students to vibrant sociological theorizations of economic life that have systematically challenged the boundaries between local and global, society and nature, urban and rural. The course is also aimed at furthering the intellectual skills of students by interweaving critical reflection on complex theoretical texts with the analysis of contemporary social, political and economic events.

Justice Oliver Wendell Holmes wrote: "The life of the law is not logic, but experience." While law school curriculum focuses on legal doctrine, law-in-action often diverges from law-on-the-books. For instance, although civil rights laws make workplace discrimination illegal, such laws are not often enforced. This gap between law-on-the books and law-in-action has prompted social-legal scholars to examine the latter more closely. Adopting a law-in-action approach, this course examines the relationship between law and society. We will survey major theoretical perspectives and empirical studies that analyze the dynamics between law and legal institutions and their social, political, economic, and cultural contexts. Topics that will be discussed include but are not limited to: (1) concepts and theories of law and society; (2) the experiences of different actors in the legal system, particularly, lawyers, judges, jurors, law enforcement agents, litigants, and citizens; (3) legal consciousness and legal culture; and (4) the relationship between law and social change. A major focus of the course will be civil rights. We will explore, for example, the extent to which court decisions on civil rights have brought about social change in the United States.

Sociology 186

Refugees in Global Perspective (203272)

Danilo Mandic

2017 Spring (4 Credits)

Schedule:

MW 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The recent influx of Middle Eastern refugees into Europe has caught citizens and policy-makers off guard. Yet such waves will continue to rock our globalized world in coming decades: massive movements of forced migrants will be "the new normal." Why is the world producing so many refugees? How are they displaced? Where do they travel, and why? This course will inquire into the nature, causes and consequences of contemporary refugee waves in our globalized world. Students will survey regional dynamics in the Middle East, Africa, Southeast Asia, Eastern Europe and North America. We will examine the particularities of refugees (compared to other migrants) and the changing nature of forced migration since the Second World War. Students will explore historical precedents to contemporary waves, learn about different host society approaches to asylum, compare government and criminal mechanisms of forced migration, and examine the reasons refugees are the object of increasing suspicion and hostility around the world. Particular attention will be paid to the recent EU crisis, the role of refugee camps in the 21st century, and alternative strategies for global asylum management by bridge and destination countries.

Politics and Social Class (203392)

Benjamin Sosnaud

2016 Fall (4 Credits)

Schedule:

TR 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How does social class matter in politics? Do party coalitions reflect class divisions? Does class position shape opportunities for political mobilization? Has there been a realignment in class interests in recent elections? In this course, we will explore these questions in an effort to understand the complex relationship between social class and politics. Our primary focus will be the United States, though we will supplement our analysis with cross-national comparisons. Topics of study will include a review of sociological research on social class and class consciousness, an analysis of how class influences political behavior and party identification, a historical examination of developments in the relationship between class and voting behavior, and opportunities to apply course concepts to the 2016 elections.

Multiculturalism and Integration in Europe and Beyond (204417)

Paul May

2017 Spring (4 Credits)

Schedule:

W 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines state policies and practices with respect to multiculturalism. It investigates the variety of political approaches to how different cultures are recognized and whether individuals have the means to maintain and transmit their cultural differences.

We will focus on the practical implications of an increasingly diverse population in the context of postcolonial immigration in Western countries. We will examine what diversity means, what practical consequences it has, and how political institutions at various levels have responded to it. Areas to be studied include education, employment, and religious accommodation; these will be placed in the context of current debates about national identity, economic crisis and globalization.

The course utilizes case studies of contemporary events including Brexit, terrorism, and controversies about free speech. It will include as primary sources newspaper reports and other media coverage, citizenship tests, and recorded interviews with political figures. The focus will be Western Europe, but we will also reference cases from other parts of the globe.

Intermediate Quantitative Research Methods (119985)

Peter Marsden

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Descriptive and inferential techniques used in quantitative sociological research. Emphasis is on the fundamentals of the linear regression model for continuous response variables, focusing on assumptions and interpretation. Motivation, application, and presentation are stressed; topics include categorical covariates, interactions, and diagnostics. Because the linear regression model is the foundation for more specialized models that are often applied in sociological research, the aim of this course is to develop the skills necessary to (a) understand quantitative sociological research, (b) produce convincing analysis, (c) evaluate quantitative analysis, and (d) learn more specialized techniques as needed.

Course Notes: Required of, and limited to, first-year graduate students in Sociology

Recommended Prep: Familiarity with basic statistics.

Additional Course Attributes:

Networks, Stratification, and Emergent Social Structure (203968)

Steven Rytina

2016 Fall (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Nearly all recent writers agree that stratification is multi-dimensional but differ on the particulars and on whether or how empiricism should inform choice. This course will survey competing conceptions of stratification and social structure with special attention to social networks. The concluding sections will present analytic and empirical grounds for an unorthodox conclusion: a unified, one-dimensional pattern governs stratification. Prominent data-sets for USA and UK provide sustaining evidence.

Class Notes: Professor Steven Rytina

Sociology 246

Seminar in Crime and Justice (109694)

Bruce Western

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This multidisciplinary seminar will read and discuss research on crime, the social context in which it occurs, and criminal justice policy. We address this literature in the historic context of shifts in US crime policy to a less punitive regime, where incarceration rates may be significantly reduced. Besides studying

empirical research on crime and punishment, we will also consider the future of crime policy, and how principles of justice can guide the role of police and corrections in poor communities.

Class Notes: This course will not be open to undergraduate students. Ten students will be admitted from each of the schools: FAS, HKS (SUP 705), HLS. Class held at HLS in Wasserstein 3016.

This course examines the dimensions and magnitude of inequality in industrial societies, with a heavy emphasis on the United States since the mid-20th century. The readings and class discussion are designed to expose students to a broad range of influential pieces in the social stratification literature. In particular, we will study inequality through: pay for work, race, neighborhoods, gender, family, mobility, education, social capital, and rising income inequality since 1980.

Culture, Inequality, and Black Youth (139026)

Orlando Patterson

2016 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

The seminar examines the complex situation of black youth in America with an emphasis on the matrix of cultures that support, enrich and, in conjunction with racial and structural forces, undermine their life chances. We will attempt to unravel the sociological puzzle of the socio-economic disconnection, hyper-segregation, violence, gender conflicts, familial fragility, and high incarceration rate that beset a significant minority of them, on the one hand, and, on the other, their remarkable prominence and integration in the nation's popular culture. We tackle the complex and controversial problem of how best to understand, theoretically and pragmatically, the interactive role of culture in disentangling this conundrum. We conclude with a review of the best policies and practices aimed at improving their condition.

Teaching Practicum (111781)

Mary Waters

2016 Fall (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course is intended to enhance the teaching skills of graduate students in the Sociology Department. Through a combination of classroom discussions and teaching simulations, the seminar challenges students to discover and hone their teaching styles, to develop a personal philosophy about teaching and learning, to develop self-confidence leading and facilitating small and large group discussions, to learn about the teaching resources that are available to them throughout the university, to experiment with designing engaging courses of study, and to discover that teaching can be a rewarding and stimulating element of an academic career.

Course Notes:

Required of and limited to graduate students in Sociology. Attendance at first meeting is required. Not repeatable for credit.

Additional Course Attributes:

Sociology 313

The Urban Data Lab (203599)

Robert Sampson

Mario Small

2016 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Professors Robert Sampson and Mario Small are organizing a small lab to support research by students and postdocs examining a subset of topics regarding the urban condition in the 21st century. Students enrolled in the lab must be working on one of the following datasets: the Project on Human Development in Chicago Neighborhoods, the Los Angeles Family and Neighborhood Survey, the project on Twitter Data and Human Mobility, and the project on Alternative Measures of Resource Access in Poor Neighborhoods. The lab is organized around two themes: big data (fall) and the comparative analysis of urban dynamics in Chicago and LA (spring). Students will meet to discuss readings and present papers to others in the working lab. By permission.

Course Notes: Meets sporadically.

Jocelyn Viterna

2017 Spring (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This year TSI will be joining forces with the new "Politics and Social Change" (PSC) Workshop hosted by Harvard's Sociology Department. We will broaden our scope to include political sociology, political economy, development organizations/institutions, political organizations/institutions, policy making and social movements. We will ask how the national and the transnational are intertwined and mutually reinforce and/or thwart each other.

Faculty and graduate students from Harvard as well as other Boston-area institutions are invited to present their ongoing research. We will meet twice each month – one meeting will be devoted to workshop presentations and a second meeting will be devoted to public lectures on topics related to our shared interests. Open to the public. The seminar is co-chaired by Jocelyn Viterna, associate professor of sociology, Harvard University, and Peggy Levitt, Chair and Professor of sociology, Wellesley College.

Class Notes: Co-taught with Professor Peggy Levitt, Wellesley University/Weatherhead Center

South Asian Studies 130

Economic History of India (160720)

Sunil Amrith

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The economic transformation of India over the past two decades has been dramatic. The contradictions of this transformation—the juxtaposition of new wealth and enduring poverty—are rooted in the region's economic history. This research seminar explores many dimensions of economic life in colonial and post-colonial India. Topics include: the history of markets and commodities, property and labor; the history of economic ideas in India; the changing nature of economic and social inequality; and the close relationship between economic and cultural change. Students will write a substantial research paper using primary sources.

South Asian Studies 176

Gender and the Making of Modern South Asia (203891)

Catherine Warner

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will explore gender history in 20th-century South Asia as well as the methodological importance of history within South Asian gender studies. We will use gender analysis to understand the shaping of nationalism and anti-colonialism, public and private spheres, the state, conflict, popular culture, and the construction of South Asia as a region. Further, we will trace the development of women's movements and feminisms in modern South Asia. Students will consider how gender intersects with multiple forms of identity while thinking about how South Asia can offer a unique site for theorizing gender in the modern world.

Class and the City in Indian Cinema (156558)

Shankar Ramaswami

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course will examine imaginaries and understandings of class and cities in Indian cinema. How are struggles for earnings and mobility in the city - of migrants, workers, and middle classes - represented in Indian cinema? In what ways is the city viewed as a space of ethical deviations and compromises? How does class shape experiences of friendship, family, and erotic love? What visions of politics, justice, and hope arise in Indian cinema? The course will explore these questions in commercial, art, and documentary films (in Bengali, Hindi, and Marathi, with English subtitles), along with readings in history, anthropology, and cinema studies. Screenings will include films by Satyajit Ray, Guru Dutt, Raj Kapoor, Yash Chopra, Muzaffar Ali, and Anand Patwardhan.

Capitalism and Cosmology in Modern India (110207)

Shankar Ramaswami

2017 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course will seek to understand unfolding processes of development in contemporary India through explorations of the lives, politics, and cosmologies of poor and working people. The course will examine debates on growth, development, and ecology; experiences of migration, work, slums, and cities (Delhi and Mumbai); and the ethical ideals, political activities, and cosmological visions of working people. The course will draw on a range of sources, including ethnographies, economics, religious studies, narrative nonfiction, novels, Hindi cinema, and documentaries.

Introductory Hindi-Urdu (113639)

Richard Delacy

2016 Fall (4 Credits)

Schedule: MTWR 0300 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

An Introduction to the modern standard form of the most widely spoken language in South Asia, Hindi-Urdu. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film, in particular recent Bollywood songs, to reinforce

structures and vocabulary. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Not open to auditors.

Enrollment Cap: n/a

Introduction to Classical Sanskrit, the translocal language of intellectual life in South Asia for much of the last two millennia. This course provides the essential grammar and reading proficiency necessary to take up the language's many rich literary traditions: scripture (*Upaniṣad*), epic (*Rāmāyaṇa* and *Mahābhārata*), poetry, Hindu and Buddhist philosophy, etc. After completing the textbook, we will read a narrative (*Hitopadeśa*) drawn from one of the most popular literary works in the pre-modern world.

A reading course designed to give students the tools necessary for advanced study in Classical Sanskrit. Readings in epic (*itihāsa*) or narrative (*kathā*), poetry (*kāvya*) or systematic thought (*śāstra*) will introduce students to a variety of important genres and their distinctive conventions. A focus upon the Sanskrit tradition's categories of analysis - grammatical, commentarial and prosodic - will enable students to begin to make sense of original Sanskrit texts as generations of the tradition's own readers have.

Continuation of Tamil 102. Covers topics of advanced grammar and is designed to further develop proficiency in speaking, listening, reading, and writing. Texts include modern literature, classical poetry, devotional literature, epic literature, and selections from minor literary forms. Films and other audiovisual materials will be used as well.

Course Notes: Not open to auditors.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Meets Foreign Lang Req	Tamil
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration

Special Concentrations

Subject: Special Concentrations

Special Concentrations 91R

Supervised Reading and Research (111972)

Tessa Lowinske Desmond

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Course Notes: Open to Special Concentrations concentrators who wish to pursue supervised study for graded credit in an area not covered by courses currently offered by regular Departments and Committees. Students must secure the written approval of the faculty member with whom they wish to study and the signature of the Faculty Adviser and the Director of Undergraduate Studies of Special Concentrations.

Class Notes: Deborah Foster and members of the Committee

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Undergraduate Students

Special Concentrations 91R

Statistics 100

Introduction to Quantitative Methods for the Social Sciences and Humanities (113431)

Kerrie Nelson

2016 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

"Introduction to key ideas underlying statistical and quantitative reasoning. Topics covered: methods for organizing, summarizing and displaying data; elements of sample surveys, experimental design and observational studies; methods of parameter estimation and hypothesis testing in one- and two-sample

problems; regression with one or more predictors; correlation; and analysis of variance. Explores applications in a wide range of fields, including the social and political sciences, medical research, and business and economics."

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Quantitative Reasoning

Statistics 102

Introduction to Statistics for Life Sciences (110094)

David P. Harrington

2017 Spring (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Introduces the basic concepts of probability, statistics and statistical computing used in medical and biological research. The emphasis is on data analysis and visualization instead of theory. Designed for students who intend to concentrate in a discipline from the life sciences.

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: M., W., F., at 11, and weekly sections to be arranged.

Introduction to Quantitative Methods for Economics (114027)

Michael Parzen

2017 Spring (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

A rigorous introduction to statistics for students intending to study economics. Examples drawn from finance, decision analysis and economic decision-making. In addition to descriptive statistics, probability, inference and regression modeling, also covers portfolio optimization, decision analysis, and time series analysis. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques.

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Introduction to Business and Financial Statistics (127043)

Michael Parzen

2016 Fall (4 Credits)

Schedule:

MW 0930 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduces the technical skills required for data-driven analysis of business and financial data. Emphasis on applying statistical methods to summarize and make inferences from complex data and to develop quantitative models to assist business decision making. Topics include: how to collect and summarize financial data, understanding the concept of risk, portfolio construction and analysis, testing trading systems, and simulation techniques.

Course Notes:

The software packages Excel and R will be used to obtain quantitative solutions to financial problems.

Recommended Prep:

Statistics 100, 101, 104 or equivalent.

Additional Course Attributes:

Introduction to Computational Biology and Bioinformatics (122304)

Xiaole (Shirley) Liu

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course will cover basic technology platforms, data analysis problems and algorithms in computational biology. Topics include sequence alignment and search, high throughput experiments for gene expression, transcription factor binding and epigenetic profiling, motif finding, RNA/protein structure prediction, proteomics and genome-wide association studies. Computational algorithms covered include hidden Markov model, Gibbs sampler, clustering and classification methods.

Recommended Prep:

Good quantitative skills, strong interest in biology, willingness and diligence to learn programming.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Data Science 1: Introduction to Data Science (203101)

Kevin A. Rader

Weiwei Pan

Pavlos Protopapas

2016 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Data Science 1 is the first half of a one-year introduction to data science. The course will focus on the analysis of messy, real life data to perform predictions using statistical and machine learning methods. Material covered will integrate the five key facets of an investigation using data: (1) data collection - data wrangling, cleaning, and sampling to get a suitable data set; (2) data management - accessing data quickly and reliably; (3) exploratory data analysis – generating hypotheses and building intuition; (4) prediction or statistical learning; and (5) communication – summarizing results through visualization, stories, and interpretable summaries. Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes:

Only one of CS 109a, AC 209a, or Stat 121a can be taken for credit. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109a, AC 209a, or Stat 121a for credit.

Recommended Prep: Programming knowledge at the level of CS 50 or above, and statistics knowledge at the level of Stat 100 or above (Stat 110 recommended).

Requirements: Not to be taken in addition to Computer Science 109 or Computer Science 109A, or Applied Computation 209, or Applied Computation 209A.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Statistics 121B

Data Science 2: Advanced Topics in Data Science (203102)

Mark Glickman

Verena Kaynig-Fittkau

Hanspeter Pfister

2017 Spring (4 Credits)

Schedule: MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

Data Science 2 is the second half of a one-year introduction to data science. Building upon the material in Data Science 1, the course introduces advanced methods for data wrangling, data visualization, and statistical modeling and prediction. Topics include big data and database management, interactive visualizations, nonlinear statistical models, and deep learning. Part two of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Can only be taken after successful completion of CS 109a, AC 209a, Stat 121a, or equivalent. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109b, AC 209b, or Stat 121b for credit.

Recommended Prep: : CS 109a, AC 209a, or Stat 121a required.

Requirements: Requisite: (Must take CS 109A OR APCOMP 209A OR STAT 121A before taking STAT 121B) AND (Cannot take STAT 121B, if already taken STAT 121 OR CS 109 OR CS 109B OR APCOMP 209 OR APCOMP 209B)

Applied Quantitative Finance (126048)

Stephen Blyth

2017 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to financial derivatives and the probabilistic techniques used to analyze them. Topics include: forwards, swaps and options; replication, no-arbitrage and risk-neutrality; martingales, numeraires and the fundamental theorem of asset pricing; and an introduction to interest-rate derivatives and their valuation. Provides a rigorous but accessible treatment of the elegant theory underpinning quantitative finance, motivated by real problems from the financial industry.

Course Notes:

Designed for those seeking an understanding of the quantitative challenges on Wall Street and the probabilistic tool-kit developed to address them.

Recommended Prep:

Statistics 110 or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students

Statistics 139

Statistical Sleuthing Through Linear Models (110751)

Michael Parzen

2017 Spring (4 Credits)

Schedule:

MW 0930 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

A serious introduction to statistical inference with linear models and related methods. Topics include t-tools and nonparametric alternatives (including bootstrapping and permutation-based methods), multiple-group comparisons, analysis of variance, linear regression, model checking and refinement, and causation versus correlation. Emphasis on thinking statistically, evaluating assumptions, and developing tools for real-life applications.

Class Notes: Fall: M., W., 9:30-11, and a weekly section to be arranged; Spring: To be arranged, and with a weekly section also to be arranged.

Recommended Prep: Statistics 100 or equivalent and Mathematics 21a and 21b or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Multilevel and Longitudinal Models (160736)

Luke Miratrix

2016 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Data often have structure that needs to be modeled explicitly. For example, when investigating students'

outcomes we need to account for the fact that students are nested inside classes that are in turn nested inside schools. If we are watching students develop over time, we need to account for the dependence of measurements across time. If we do not, our inferences will tend to be overly optimistic and wrong. The course provides an overall framework, the multilevel and generalized multilevel (hierarchical) model, for thinking about and analyzing these forms of data. We will focus on specific versions of these tools for the most common forms of longitudinal and clustered data. This course will focus on applied work, using real data sets and the statistical software R. R will be specifically taught and supported. While the primary focus will be on the linear model with continuous outcomes (i.e., the classic regression framework) we will also discuss binary, categorical, and ordinal outcomes. We will emphasize how to think about the applicability of these methods, how they might fail, and what one might do to protect oneself in such circumstances. Applications of hierarchical (multi-level) models will include the canonical specific cases of random-slope, random-intercept, mixed effect, crossed effect, marginal, and growth-curve models.

Recommended Prep: Permission of instructor required. Prerequisite: S-052, Stat 139, or an equivalent. Jointly-offered in the Graduate School of Education.

Statistics 170

Quantitative Analysis of Capital Markets (122306)

Neil Shephard

Reza Solgi

2016 Fall (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the analysis of capital markets using quantitative methods. Concepts include risk, expected utility, discounting, binomial-tree valuation methods, martingales, continuous time stochastic calculus methods, stochastic discount factors, financial econometric models and Monte Carlo simulations. These concepts are applied to equities, risk management and derivative pricing.

Recommended Prep: Good quantitative skills including calculus and linear algebra, Statistics 110 or equivalent (i.e. multivariate random variables and conditional distributions), strong interest in finance. Willingness to do some programming.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Statistics 171

Introduction to Stochastic Processes (113721)

Joseph Blitzstein

Neil Shephard

2017 Spring (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introductory course in stochastic processes. Topics include Markov chains, branching processes, Poisson processes, birth and death processes, Brownian motion, martingales, introduction to stochastic integrals, and their applications.

Recommended Prep: Statistics 110 and Mathematics 21a and 21b, or equivalent

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Statistics 186

Statistical Methods for Evaluating Causal Effects (110022)

Donald Rubin

2017 Spring (4 Credits)

Schedule:

MW 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Statistical methods for inferring causal effects from data from randomized experiments or observational studies. Students will develop expertise to assess the credibility of causal claims and the ability to apply the relevant statistical methods for causal analyses. Examples from many disciplines: economics, education, other social sciences, epidemiology, and biomedical science. Evaluations of job training programs, educational voucher schemes, changes in laws such as minimum wage laws, medical treatments, smoking, military service.

Recommended Prep: Statistics 100; Mathematics 21a, b or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Statistics 210

Probability I (111696)

Joseph Blitzstein

2016 Fall (4 Credits)

Schedule:

MW 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Random variables, measure theory, reasoning by representation. Families of distributions: Multivariate Normal, conjugate, marginals, mixtures. Conditional distributions and expectation. Convergence, laws of large numbers, central limit theorems, and martingales.

Course Notes: Formerly Stat 210a

Class Notes: M., W., 11:30 -1, and weekly sections to be arranged.

Recommended Prep: Statistics 110 or equivalent required; Statistics 111 or equivalent recommended.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Statistics 211

Statistical Inference I (111130)

Tirthankar Dasgupta

2016 Fall (4 Credits)

Schedule: MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

Inference: frequency, Bayes, decision analysis, foundations. Likelihood, sufficiency, and information measures. **Models:** Normal, exponential families, multilevel, and non-parametric. Point, interval and set estimation; hypothesis tests. Computational strategies, large and moderate sample approximations.

Course Notes: Formerly Stat 211a.

Recommended Prep: Statistics 111 and 210a or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Statistics 212

Probability II (156452)

Daniel Stroock

2017 Spring (4 Credits)

Schedule: TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

A graduate introduction to advanced probability. Foundations of probability: exchangeability and de Finetti's type theorem. **Martingales:** convergence theorems, optional stopping, Polya urn schemes and applications to statistics. **Poisson processes:** general spaces, marked processes, applications to Bayesian nonparametrics. **Gaussian processes:** existence theorem, Brownian bridges, meanders and excursions. **Empirical processes:** inequalities, central limit theorems and the bootstrap. **Markov Chains:** ergodicity, convergence and MCMC algorithms. **Stochastic calculus:** Ito's formula.

Course Notes: Formerly Sat 210b

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Statistics 213

Statistical Inference II (159802)

Pierre Jacob

2017 Spring (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Stat 213 will build upon Stat 211 and give some tools to study and validate statistical methods (asymptotic statistics, well-specified and mis-specified models, model comparison, cross-validation, bootstrap). These concepts will be discussed in the context of advanced statistical models: non-parametric regression, regularized regression, latent variable and hidden Markov models. Numerical methods required to put such models into practice will be discussed.

Course Notes: Formerly Stat 211b**Recommended Prep:** Stat 210, 211, 212(stat 210b)**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam

Statistics 215

Introduction to Computational Biology and Bioinformatics (126060)

Xiaole (Shirley) Liu

2017 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Meets with Statistics 115, but graduate students are required to do more coding, complete a research project and submit a written report during reading period in addition to completing all work assigned for Statistics 115.

Recommended Prep: Good quantitative skills, strong interest in biology, good programming skills in C/C++, Java, Perl or Python.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Statistics 220

Bayesian Data Analysis (118016)

Jun Liu

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Basic Bayesian models, followed by more complicated hierarchical and mixture models with nonstandard solutions. Includes methods for monitoring adequacy of models and examining sensitivity of models.

Course Notes: Emphasis throughout term on drawing inferences via computer simulation rather than mathematical analysis.

Recommended Prep: Statistics 110 and 111.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Statistics 221

Statistical Computing and Learning (115077)

Edoardo Airoidi

2016 Fall (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Computational methods commonly used in statistics: random number generation, optimization methods, numerical integration, Monte Carlo methods including Metropolis-Hastings and Gibbs samplers, approximate inference techniques including Expectation-Maximization algorithms, Laplace approximation and variational methods, data augmentation strategies, data augmentation strategies.

Course Notes: Computer programming exercises will apply the methods discussed in class.

Recommended Prep: Linear algebra, Statistics 111, and knowledge of a computer programming language (R or Matlab) required; Statistics 220 recommended.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Statistics 230

Multivariate Statistical Analysis (119940)

S. C. Samuel Kou

2016 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Multivariate inference and data analysis. Advanced matrix theory and distributions, including Multivariate Normal, Wishart, and multilevel models. Supervised learning: multivariate regression, classification, and discriminant analysis. Unsupervised learning: dimension reduction, principal components, clustering, and factor analysis.

Recommended Prep: Statistics 110 and 111.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science

Statistics 244

Linear and Generalized Linear Models (127856)

Mark Glickman

2016 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The theory and application of linear and generalized linear models, including linear models for normal responses, logistic models for binary and multinomial data, log-linear models for count data, overdispersion and quasi-likelihood methods, regularization, and computational issues. An introduction to smoothers, additive models and generalized additive models

Recommended Prep: Strong statistics background required (at the second-year graduate level), Statistics 210 may be taken concurrently, Statistics 211 desirable.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Big data statistics in genomic and genetic research (204455)

Xiaole (Shirley) Liu

Jun Liu

2017 Spring (4 Credits)

Schedule:

R 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

As biomedical research community generates more and more high throughput genomic profiles, the need for careful statistical analyses also increases. In this weekly course, we will first introduce the main statistical challenges and basic solutions to big data in genomic and genetic research. We will also ask students to read a selection of methodology and data analysis papers for biomedical big data, and debate about their statistical and computational merits and drawbacks.

Course Notes: (new course)

Recommended Prep: Students taking the course should have a reasonable background and knowledge in statistical (e.g. STAT111/139), genomics and bioinformatics (e.g. STAT115/215).

Additional Course Attributes:

Attribute	Value(s)

Statistics 317

Seminar on Bayesian nonparametrics (111463)

Pierre Jacob

2017 Spring (4 Credits)

Schedule:

MW 0930 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

The Ultimate Inference Bake-off... with Bayesian Nonparametrics! This course is fundamentally about gaining a deep understanding of state-of-the-art inference techniques for probabilistic models, with the goal of also thinking of ways to address their shortcomings. Since probabilistic models are obviously a very large area, we'll focus on Bayesian Nonparametric models. After a brief overview of Bayesian Nonparametric models we'll begin our ultimate inference bake-off: starting with the tried-and-true techniques and going to the current state-of-the-art. Along the way, we'll learn what works when, and where the gaps are. Students will complete several programming assignments, lead discussion on papers, and complete a substantial final project.

Course Notes: Statistics 317 is also offered as Computer Science 282r. Students may not take both for credit.

Recommended Prep: Students will be expected to be comfortable with distributions and inference at the level of something like CS281. Practically: Can you derive and implement Bayesian linear regression for a modestly-sized data set? A Gibbs sampler for a mixture model? An importance sampler for a given distribution?

Design and Analysis of Experiments at Scale (204453)

Edoardo Airoldi

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap: 5

Description. Graduate seminar on strategies for designing, executing and analyzing experiments on large populations, as well as large collections of experiments. We will consider settings where units of analysis may be assigned treatment in multiple experiments, running concurrently. The course is largely based on critical reading of recent articles and technical reports, and on the instructor's own experience in designing

complex field experiments, and in working with experimentation platforms at large IT companies.

Course Notes: new course

Molecular Genetics and Genomics in Development and Disease (156398)

John Rinn

Alexander Meissner

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The sequencing of the human genome has ushered in a new era of scientific investigation. In parallel, advances in molecular biology have made it possible to explore the processes underlying normal development and disease pathogenesis. We will apply principles and techniques of molecular biology - ranging from DNA structure to the Central Dogma, from PCR to cutting-edge genome-editing technology - to understand how genetics and genomics inform gene regulation and cell identity and, ultimately, the human condition.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b (or equivalent) or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)

Ethics, Biotechnology, and the Future of Human Nature (121192)

Douglas Melton

Michael Sandel

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Explores the moral, political, and scientific implications of new developments in biotechnology. Does science give us the power to alter human nature? If so, how should we exercise this power? The course examines the science and ethics of stem cell research, human cloning, sex selection, genetic engineering, eugenics, genetic discrimination, and human-animal hybrids. Readings will be drawn from literature in the areas of biology, philosophy, and public policy.

Course Notes:

May not be taken concurrently with Government 1093. May not be taken for credit if Government 1093 has already been taken. The course is open to both science and non-science concentrators. Ethical Reasoning 22 (Justice) is recommended as a background. This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Requirements:

Anti-req: Cannot be taken for credit if Government 1093 already complete

Additional Course Attributes:

Biomedical Entrepreneurship: Turning Ideas into Medicine (128040)

Derrick Rossi

2016 Fall (4 Credits)

Schedule:

W 0900 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Medicines and other therapeutics have revolutionized the treatment of many diseases. Few of us pause to consider how these products are developed from an initial discovery in the lab to the treatment of patients. This course will consider this journey by incorporating scientific, biotechnology, intellectual property, venture capital, and business perspectives. In addition to lectures, students will work on group projects to chart a strategy toward bringing a novel biomedical idea to the clinic.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 52, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 140

Developmental and Molecular Basis of Growth and Regeneration (126744)

Fernando Camargo

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will focus on the biology of organ growth and regeneration from a developmental perspective. How is the size and symmetry of our organs set? How does a regenerating animal sense that something is missing and eventually stop the regenerative process when tissues reform? We will learn about conserved developmental pathways that are necessary for adult regeneration and discuss how the aberrant activation of these pathways can lead to overgrowth disorders such as cancer.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam

From Cells to Tissues, in Sickness and in Health (161207)

Ya-chieh Hsu

David Scadden

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Every cell is a part of a larger "community", working together to enable tissue function. This course will explore the principles of building complex tissues from cells. How do cells know what tissues to make and when to make them? How do cells communicate with one another? What diseases can arise when these principles go awry? How can we build tissues in the lab? In addition to lectures, students will engage deeply in primary literature.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 152

Asking Cells Who They Are: Computational Transcriptomics Using RNA-Seq (156937)

Douglas Melton

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This course is a hands-on introduction to computational analysis of RNA sequencing data as a measure of genome-wide transcription. We will cover methods spanning the spectrum of RNA-Seq analysis: starting from raw sequencing reads, obtaining gene expression measures, and interpreting biological significance by differential expression analyses, clustering, and visualization. Coursework will consist of programming assignments in Python exploring real datasets. The course will emphasize skills applicable to independent biological research.

Recommended Prep:

Life Sciences 1a or Life and Physical Sciences A or permission of the instructor; Mathematics at the level of Math 19a or statistics at the level of Stat 102 or above. CS 50 or some previous exposure to programming is preferred but not required.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Stem Cell & Regenerative Biol 162

Experimental Regenerative Biology (126746)

Qiao Zhou

Susanne Jakob

2017 Spring (4 Credits)

Schedule:

M 0200 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This laboratory course will allow advanced undergraduate students to explore classical and modern

experimental models of regeneration, and through experimentation, understand the important concepts and key challenges of the regenerative biology field. We will focus in particular on the regeneration of complex tissues and entire organ systems using both invertebrate and vertebrate models, including the planarian worm, the salamander, and the mouse.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Stem Cell & Regenerative Biol 167

Stem Cells and Regeneration in the Pathobiology and Treatment of Human Disease (125200)

Leonard Zon

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Stem cells are the basis for tissue maintenance and repair, thus, are essential elements of normal organ and tissue physiology. Stem cells are also targets for disease processes and through transplantation are important therapeutic agents. This course will allow advanced undergraduates to explore how stem cells and tissue regeneration impact human disease pathogenesis and how stem cells might be exploited to advance new therapies for disease.

Class Notes: Leonard Zon and members of the Department

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10; MCB 52 or MCB 54.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 175

Glucose: From Molecule to Society (128041)

Richard Lee

2016 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

We will explore the biochemistry, cell biology, and physiology that make glucose our main source of energy. How did humans depend on and crave this molecule? What consequences does it hold for normal metabolism and disease? Students will integrate evolution, endocrinology, biostatistics, bioengineering, and regenerative biology approaches in considering sugar and all its consequences. Finally, we will evaluate legal and business issues necessary to move scientific and technical innovations from the laboratory to the patient.

Class Notes:

M., W., at 11, and a lab component to be arranged

Recommended Prep:

Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b;
SCRB 10 or MCB 54; MCB 52 or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 182

Got (New) Brain? The Evolution of Brain Regeneration (159693)

Paola Arlotta

2016 Fall (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will cover concepts and theories on evolutionary changes in nervous system regenerative capacity of different organisms. Material will be taught in a dynamic setting combining lectures and brainstorming of the literature with hands-on experience in the laboratory. Students will become familiar with classic, paradigm-changing experiments that have shaped how we think about brain regeneration and repair and also consider the newest theories on cellular reprogramming as a way to regenerate the nervous system.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 187

Brains, Identity, and Moral Agency (109360)

Steven Hyman

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

100

Human beings experience a sense of self that provides a stable foundation from which to understand personal experience, consciously formulate goals, and initiate actions. The view that people act in accordance with freely formed intentions underlies important concepts of moral agency and culpability, yet evidence from neuroscience questions this assumption. This course will examine competing views of human agency grounded in concrete scientific examples to encourage reflection on the implications for identity and moral agency.

Course Notes:

For students who have taken MCB 80, it is contemplated that there will be a section that incorporates more advanced concepts from neurobiology. This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Recommended Prep:

LPS A or LS 1a (or equivalent - permission of instructor required).

Additional Course Attributes:

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Systems Biology 212

Communication of Science (108839)

Galit Lahav

Angela Depace

Allon Klein

2016 Fall (4 Credits)

Schedule:

F 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Students will work collaboratively with faculty and one another on critical science communication skills including crafting graphics, writing fellowships, and giving oral presentations.

Course Notes: This is a required course for first year Systems Biology students.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Systems Biology 300HFA

Introduction to Systems Biology Research (120829)

Timothy Mitchison

2016 Fall (2 Credits)

Schedule:

M 0600 PM - 0729 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Series of lectures to introduce the research areas of current program faculty in systems biology. Students must complete both parts of this course (parts A and B) within the same academic year in order to receive credit.

Additional Course Attributes:

Attribute	Value(s)
Full Year Course	Indivisible Course
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Systems Biology 300HFB

Introduction to Systems Biology Research (160680)

Timothy Mitchison

2017 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Series of lectures to introduce the research areas of current program faculty in systems biology. Students must complete both parts of this course (parts A and B) within the same academic year in order to receive credit.

Attribute	Value(s)
Course Search Attributes	Display Only in Course Search
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
Full Year Course	Indivisible Course

Systems Biology 300QC

Advanced Topics in Systems Biology (109968)

Timothy Mitchison

2017 Spring (2 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Series of intensive seminars, each running for 6 hours. Three seminars, which can be taken in different terms, are required for credit.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Systems Biology 300QC

Advanced Topics in Systems Biology (109968)

Timothy Mitchison

2016 Fall (2 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Series of intensive seminars, each running for 6 hours. Three seminars, which can be taken in different terms, are required for credit.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Systems Biology 302QC

Quantitative Human Physiology (127596)

2016 Fall (2 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap: n/a

Introduction to selected mathematical and computational models of human physiology, disease, and treatment monitoring. Topics may include glucose regulation, kidney filtration, blood cell homeostasis and anemia, cell growth and cancer, and pharmacokinetics and pharmacodynamics.

Class Notes:

Hours to be arranged.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 303QC

Dynamic and Stochastic Processes in Cells 1 (128032)

Jeremy Gunawardena

2016 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

We will examine how the some of the key requirements of living systems are implemented at the molecular level and how quantitative experimental methods and mathematical analysis can help us understand them.

Course Notes: Tuesday September 3, 2013-Thursday, October 10, 2013. Students enrolled in SystBio303qc can never enroll in SystBio304qc.

Class Notes: Tu., Th., 10-11:30, and a weekly section to be arranged

Recommended Prep: College-level calculus.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 304QC

Dynamic & Stochastic Processes in Cells Part 2 (128034)

Johan Paulsson

2016 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: October 15, 2013 - December 3, 2013. Students enrolled in SystBio304qc can never enroll in SystBio303qc.

Class Notes: October 15, 2013 - December 3, 2013. Students enrolled in SystBio304qc can never enroll in SystBio303qc.
Tu., Th., 10-11:30, a weekly section to be arranged

Recommended Prep: College-level calculus.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 320QC

Quantitative Measurement and Analysis (204480)

Allon Klein

2017 Spring (2 Credits)

Schedule: WF 0900 AM - 1029 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

The mission of the course is to impart students with a strong intuition for designing quantitative assays and performing data analysis in biology. The course will extract general principles through a set of lectures and workshops, focusing on some of the major techniques used in biology today. We will discuss the physicochemical basis of major measurement techniques in biology, and we will explore how this basis leads to particular errors, and what types of statistical pitfalls might be encountered in data analysis.

Recommended Prep: Knowledge of programming, statistics, physics and chemistry.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350

Systems Biology Research (121507)

Jacob Hooker

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Class Notes:

Timothy J. Mitchison (Medical School) 3713 and members of the Committee

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350

Systems Biology Research (121507)

*Ramy Arnaout**Timothy Mitchison*

2016 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Class Notes:

Timothy J. Mitchison (Medical School) 3713 and members of the Committee

FAS: Course Level	Graduate Course

Systems Biology 350 Section: 025

Systems Biology Research (121507)

Galit Lahav

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 026

Systems Biology Research (121507)

Erel Levine

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 026

Systems Biology Research (121507)

Erel Levine

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 027

Systems Biology Research (121507)

Richard Losick

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 027

Systems Biology Research (121507)

Richard Losick

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 028

Systems Biology Research (121507)

Debora Marks

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 028

Systems Biology Research (121507)

Debora Marks

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 029

Systems Biology Research (121507)

Sean Megason

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 029

Systems Biology Research (121507)

Sean Megason

2016 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 030

Systems Biology Research (121507)

Timothy Mitchison

2017 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Theater, Dance, and Media

Subject: Theater, Dance & Media

Theater, Dance & Media CAMR

Advanced Playwriting: Workshop (203500)

Sam Marks

2017 Spring (4 Credits)

Schedule:

T 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This workshop is a continued exploration of writing for the stage. Students will be encouraged to excavate their own voice in playwriting. They will examine and attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Ibsen and Beckett as well as contemporary dramatists such as Annie Baker, Caryl Churchill and Sam Shepard.

Course Notes:

TDM CAMR is the same course as ENGLISH CAMR. Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Drama, Theater, Theory (160648)

Martin Puchner

2017 Spring (4 Credits)

Schedule: M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This sophomore tutorial of the concentration in Theater, Dance, and Media, explores the theater as a medium that brings together all the other arts, from architecture and design to literature and music, through readings, discussions, and exercises. We also consider the intellectual traditions connected to theater, including philosophy, politics, and sociology. Key texts include Plato, Euripides, Brecht, and Churchill; sessions at the Harvard Theater Collection.

Recommended Prep: Required of all, and limited to, concentrators.

Theater, Dance & Media 105

Introduction to Dramaturgy (Documentary Theater and A.R.T. 2016-17 Season) (118876)

Ryan McKittrick

2016 Fall (4 Credits)

Schedule: W 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course introduces students to the fundamentals of dramaturgy, with a special focus on documentary/verbatim theater and the American Repertory Theater's 2016-17. Students will analyze a wide range of theatrical texts, meet with the artists involved in the creation of those works, and write their own documentary or verbatim dramas that will be read aloud at the end of the semester.

Theater, Dance & Media 110

Beginning Acting (112880)

Thomas Derrah

2017 Spring (4 Credits)

Schedule: MW 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

An exploration of the basic techniques of acting, beginning with exercises that flex the imagination and heighten observation; the course will then move towards work on rhythm, an actor's instincts, focus, concentration, and character with an ongoing emphasis in improvisation. The texts of Anton Chekhov will be used as a point of reference for the work. The latter part of the course will concentrate on selected scene study from Chekhov's major plays.

Course Notes: Enrollment determined by audition. Students will audition for the course with a short improvisation described by the professor at the first class meeting.

Theater, Dance & Media 111

Acting: 20th Century Texts (117461)

Karen MacDonald

2017 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

14

An expansion of basic acting techniques, with an emphasis on the actor's work done during rehearsal: creating a character, building a role and finding one's own way of preparing for and making the most of rehearsal time. Actors will use exercises and improv to help explore character and sharpen instincts, and do monologue and scene work using contemporary texts, both comic and dramatic.

Course Notes: Enrollment determined by audition.

Theater, Dance & Media 114

Practical Aesthetics (123901)

Scott Zigler

2016 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Practical Aesthetics Acting Technique was developed by playwright David Mamet and actor William H. Macy, based on the work of the American acting teacher Sanford Meisner and the Russian acting teacher Konstantin Stanislavski. In this course, students will focus on rigorous text analysis combined with emphasis on enhancing the actor's spontaneity through training in Meisner's "Repetition Exercise." Students will do scene work drawn from a wide selection of plays.

Course Notes: Enrollment will be determined by lottery at the first class meeting.

Recommended Prep: Dramatic Arts course in Acting, previous study in Practical Aesthetics, or extensive undergraduate performance experience.

Additional Course Attributes:

All: Cross Reg Availability	Available for Harvard Cross Registration

Theater, Dance & Media 116

Acting Workshop: Comedy (117460)

Scott Zigler

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

A course developing the actor's approach to and playing of comedy and humor. The class will focus on marrying comedy's need for technical precision with a truthful and spontaneous approach to acting based on the methodology of Konstantin Stanislavski. Specific comic skills studied will include timing, focus, choreography, and the mechanics of how a joke builds from set up to punchline. Acting skills will focus on moment to moment pursuit of objective and creation of character. Styles of comedy will include farce, drawing room/comedy of manners and contemporary comic playwriting such as David Lindsay-Abaire, Nicky Silver, Christopher Durang and Sarah Ruhl.

Course Notes: Enrollment determined by audition on the first day of class. Students are asked to prepare a 30 second comic monologue, classical or contemporary, for the audition.

Theater, Dance & Media 119

Vocal Production for the Stage (118497)

Erika Bailey

2016 Fall (4 Credits)

Schedule: R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

Whether one is performing in a play, speaking professionally, teaching a class or leading a group, the ability to use one's voice effectively is a primary element of the success of the presentation. Using several major techniques of speaking training, students learn not only how to use the voice, but how these various approaches to voice training correspond to specific performance challenges.

Course Notes: Enrollment determined by short interviews to be conducted on the first day of class.

Additional Course Attributes:

Attribute	Value(s)

Theater, Dance & Media 120

What's so Funny?: Introduction to Improvisational Comedy (160654)

Remo Airaldi

2017 Spring (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Comedy has often been thought of as the poor relation to Drama but, as Lenny Bruce said, "the only honest art form is comedy because you can't fake it." We will attempt to take comedy seriously by studying its component parts and engaging in committed, creative and collaborative "play" that will tap into each student's personal, individual sense of humor. The class will focus on the basics of improvisation: group

games, narrative skills, patterns, offers, spontaneity, agreement, using the space around you, building on-stage relationships and, eventually, scene work.

Theater, Dance & Media 128X

Death of a Salesman (or Two) (203087)

David Levine

2016 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course combines research and practice, offering an introduction to discursive, realist, and devised theater by examining the legacy of Arthur Miller's 1949 play, *Death of a Salesman*. Hailed (by Americans) as an American masterpiece, at once maudlin, mordant, embarrassingly timebound and irritatingly prescient, the play provides a basis for thinking about capitalism, ethics, theater, film, and what it means to "act American." The course is open to specialists and non-specialists alike, and will combine experimental dramaturgy with regular performance and directing assignments. It will culminate in a final project.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Theater, Dance & Media 130R

Directing (123080)

Marcus Stern

2016 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

9

A directing class for directors interested in theater, television and film, as well as for actors, dramaturgs, and designers investigating all aspects of theater. The class accommodates beginning to advanced levels of work. Students may bring in video or film scenes as part of the class work, and live video camera work for the stage will also be part of the course. Through constant scene work the course examines the directorial tools of text analysis, staging, design, and working with actors. The focus is on how to tell a story clearly and effectively.

Course Notes: Enrollment determined by short interviews to be conducted on the first day of class.

Additional Course Attributes:

Attribute	Value(s)

Theater, Dance & Media 131

Directing Lab (126812)

Shira Milikowsky

2017 Spring (4 Credits)

Schedule:

R 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This class is designed for students interested in expanding their understanding of directing for theater. The course will focus on the work of American experimental theater artists from the 1960's to the present, examining the various ways avant-garde directors and ensembles have experimented with form to seek out radical new modes of storytelling. Students will create work inspired by the artists and productions studied, applying theory to practice in rehearsals and presentations.

Course Notes: Enrollment determined by short interview to be conducted on the first day of class.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration

Directing Film: Telling the Story and Working with Actors (109653)

Marcus Stern

Alfred Guzzetti

2017 Spring (4 Credits)

Schedule:

MW 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

9

In this course students will produce short films. Includes the study of scenes in film and instruction in the techniques of directing, working with actors, and video production. Emphasis will be placed on clarity of storytelling, eliciting performances from actors, and visceral impact of the filmed events.

Class Notes: The first meeting of the course is Monday, January 23, from 1:00-4:00pm with no meeting on Wednesday, January 25, 2017.

Additional Course Attributes:

Attribute	Value(s)

Movement Lab (161233)

Jill Johnson

2017 Spring (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course explores the practice of choreography in a dynamic research environment. Students will learn interdisciplinary tools for devising, modifying, and editing motion for the stage, screen or site-specific work. Compositional discernment and keen visual evaluation skills will be developed through: extensive studio practice creating and interpreting movement phrases and gestures; discussion and feedback of individual movement composition assignments; viewing and analyzing the structure, dramaturgy, music, set and lighting design in seminal dance and theater pieces from around the world (e.g. Fabre, Naharin, Jones, Graham, Bausch, Goebbels, Petipa, Pite, Kahn); and examining how new media can be utilized for appraising, capturing and documenting motion in the 21st century. Classes will be held in the seminar room and studio.

Class size: 20. No prior dance experience required. Enrollment determined by short interview during the first week of class (shopping week).

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration

Theater, Dance & Media 142

Contemporary Dance: Countertechnique (203636)

Mary Davis

2016 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

Countertechnique is a system of movement designed by esteemed Dutch choreographer, Anouk Van Dijk. The technique offers a dynamic dance practice that focuses on directing and counter-directing the body through space so that each participant can develop authentic, sincere and unique movement vocabularies – tools that Van Dijk believes will prepare the dancing body and mind for negotiating demanding dance practices in the 21st century. Scale, risk-taking, fluidity, strength and flexibility are skills this course aims to expand.

Course Notes: Some dance experience required

Class Notes: Taught by certified *Countertechnique* expert, dancer, choreographer and educator, Joy Davis.

Theater, Dance & Media 143

GAGA: Movement Language created by Ohad Naharin (204031)

Mario Zambrano

2017 Spring (4 Credits)

Schedule:

MW 0900 AM - 1029 AM

Instructor Permissions: Instructor

Enrollment Cap:

35

Gaga—the movement language created by Ohad Naharin, artistic director and choreographer of Batsheva Dance Company in Israel—is a continuous, sensation-based movement class. Students are encouraged to interpret and experience the somatic practice of listening to the body while activating a total sensorial attention. Gaga offers a creative framework for students to engage with physicality and imagination, bridging the activity between body and mind while increasing physical potential. There are no mirrors in Gaga, and there are no observers. The class moves in continuum without breaks for a minimum of an hour.

Class Notes: This course will be taught by Lecturer Mario Zambrano

Theater, Dance & Media 144

Embodied Expression/Expressive Body: Dance in Cultural Context (203432)

Deborah Foster

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This seminar explores the ways in which dance forms create, express, interrogate and challenge ideas and values of personal and interpersonal significance in ritual, theatrical and social contexts. By observing several dance forms on film and in live performances, participating in dance workshops, and reading ethnographic, historical and theoretical texts, we will attempt to understand the emergent (and unstable) significance of dance from the perspective of both movers and witnesses.

Course Notes: This is the same course as FOLKMYTH 114.

This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief.

Additional Course Attributes:

Theater, Dance & Media 147

Deconstructing a Novel Into a Dance (204032)

Mario Zambrano

2017 Spring (4 Credits)

Schedule:

F 1100 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This is a project-based course that will study the structure and thematic elements of a novel as a means to compose a choreographic work. Divided into three units, the course will begin with a close reading of three novels—*Giovanni's Room* by James Baldwin, *The Waves* by Virginia Woolf, and *The Buddha in the Attic* by Julie Otsuka. Unit II (in studio) will be dedicated to improvisational tasks derived and inspired from the novels. By sourcing structure and language—metaphor, style, and rhythm—the movement exercises will embody the literature we study. Unit III will focus on composition, arranging what we've learned in prior units, and will culminate in a choreographic architecture both literary and physical.

Class Notes: This course will be taught by lecturer Mario Zambrano.

The Art of Scenography: 20th and 21st Century Directorial Concepts and Set Design (110319)

Julia Smeliarsky

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In this course, students will study the work of the great 20th and 21st century auteur directors and set designers. Students will explore a range of artistic movements including Constructivism, Futurism and Dada, and discuss how the theater became a place to experiment with the concepts and discoveries of these movements. Examining primary source materials in the Harvard Theatre Collection, students will research the work of artists including Gordon Craig, Richard Wagner, Leon Bakst, Pablo Picasso, Konstantin Stanislavsky and Vsevolod Meyerhold. The course will also focus on the work of such contemporary directors and designers as Robert Wilson, George Tsypin, and Robert Lepage.

Scenography Studio (109545)

Sara Brown

2017 Spring (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Theater designers use figures, space, objects, time and light to create environments that are integral to performance events. The potential for action and the integration with the performance as a whole is key to the design process. Like any artist, the designer needs to create visual studies to explore possibilities and communicate ideas. In Scenography Studio students will respond to architecture, photography, fiction, painting, sculpture, etc., to develop a series of performance design projects. In the course of developing

these projects, students will gain skills in a variety of digital and manual media as well as study significant 20th and 21st century artists and theorists. Artists studied include but are not limited to - Robert Rauschenberg - John Cage - Sol LeWitt - Adolph Appia - Richard Serra - Alan Kaprow - Cindy Sherman - Italo Calvino - Bertolt Brecht.

Class Notes:

Sara Brown (Massachusetts Institute of Technology)

Introductory Theater Design: Lighting, Audio, and Video (204029)

Johnathan Carr

Justin Paice

Andrew Will

2017 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

The process of making theater is a collaboration between different people and different crafts. This course will introduce students to the basics of design and production for three of those crafts: Lighting, Audio, and Video. Through lectures, hands on work, and practical projects, students will explore these three crafts as tools to help tell a story onstage and on screen. Students will learn not only about the technology and methods used in these design fields, but also the underlying principles of design that are universal across these three, and many other crafts.

Enrollment Cap: 18

This course will ask students to engage with both the historiography of performance and the performance of historical forms. Mining the extensive archives of Harvard's Houghton Theater Collection we will seek to interrogate and reanimate what are often considered to be arcane theatrical genres in American theater history, including melodrama, minstrelsy, oratory, burlesque, Shakespeare (19th century), circus, vaudeville, Chautauqua, the tableau vivant, and more. Following a period of reading and discussion about theater historiography, the archive, meta-theater, and historical performance genres we will examine

several case studies of contemporary works that mine theater history in order to speak to the present cultural moment. All the while, we will work closely with Houghton identify our own topics of inquiry based on objects and artifacts from the collection. Moving from theory to practice, we will then work together to create a performance event to showcase our findings modeled on the 19th century Dime Museum. Students will work together to devise a series of performance pieces that move beyond historical reenactment to embody the vitality of their chosen genres and their legacies in the context of contemporary theater culture. Our concluding Dime Museum performance will be open to the public.

Performance Elective: Acting and Authenticity (156461)

David Levine

2017 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This studio-based seminar examines the concept of "building a character" and pushes it towards performance art. While acquiring Stanislavski- and Method-based acting techniques, students will also consider psychological realism in light of philosophical, psychological, sociological and scientific notions of authenticity and falsehood, presence, mimesis, identity, and empathy. What does it mean to turn into someone else? How total is the transformation? What are the implications for our understanding of the individual? What does "realist acting" mean in an era of AI, social media, and motion capture? The seminar involves both readings and exercises, and culminates in a final project where participants turn into each other.

The Artist-Citizen: Socially Engaged Art in the 21st Century (203086)

Katherine Pearl

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

This course takes as its context the fractured state of our country: at a time when the United States is tending towards division, we will investigate artists whose work is choosing to bring us closer together. From Architect Maya Lin, whose interactive Vietnam War Memorial rewrote the function of a monument to be about personal encounter and shared reckoning, to artist Paul Ramirez Jonas, whose "Key to the City" project gave thousands of people access to private spaces across New York, to "Haircuts by Kids," a project of the Canadian theater company Mammalian Diving Reflect, in which third graders are trained to

offer haircuts to adults, artists across disciplines are making the move towards the social, breaking out of insularity and privileged space to engage with their communities head-on. Contextualizing this work within the current sociopolitical climate as well as the historical context of public art, we will locate strategies used by the Artist-Citizen to effectively engage in the most difficult issues of our time. The course is hands-on and experiential as well as theoretical: content includes HOW to make socially engaged work, examines WHY this work is important, and then asks WHAT makes this work successful. Students will generate small-project work throughout the semester, supported by critical readings and viewings of work by current practitioners. By creating spaces for meaningful personal encounter, can the Artist-Citizen lead the way towards a more humane and equitable country, a more cohesive American community? The class culminates in a final project that responds to a need or conversation currently present within the Harvard community.

Course Notes: This course will be taught by visiting lecturer Katie Pearl.

Making the Avant-Garde (203528)

David Chambers

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

MAKING THE AVANT-GARDE is a laboratory practicum. Roughly half the class time will be devoted to research studies of contemporary avant-garde theatre and dance ensembles and their processes of collective creation; the rest of the time we will be on the floor making our own performance piece, incorporating and refracting various strategies of the artistic ensembles we study. Starting with investigations of radical performance groups of the 1960's and 70's - The Living Theatre, The Open Theatre, Judson Dance Theatre, and the Polish Laboratory Theatre/Jerzy Grotowski - we will progress to examining theatre and dance troupes still active today, including multi-media theatre ensembles such as The Wooster Group, Gob Squad, Ex Machina/Robert LePage, and dance companies such as Rosas/Anne Teresa de Keersmaeker, Tanztheater Wuppertal/Pina Bausch. Issues such as radical politics, body and sexuality, post-dramatic atextual performance, and collective creation will be examined as a means of interrogating what "avant-garde" performance might be today - if anything. Enrollment will be limited to 16 participants with priority given to actors, dancers, directors, choreographers, musicians, videographers, and dramaturgs. The goal is to inspire students to run away from Harvard and start their own circus (or at least think about it).

Class Notes: David Chambers is a Visiting Professor with Theater, Dance & Media.

Devising Physical Performance (203088)

Daniel Kramer

2016 Fall (4 Credits)

Schedule:

R 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

How does one make space speak void of language? In this course, students will explore how to transform their ideas, emotions, conflicts, tensions and questions into their bodies and the empty space. Students will push their bodies to speak independent of words and mimesis. Students will study composition techniques to layer images and movements that create an emotional or intellectual arc with or without story. For the final exam, small groups will devise and present complete short works of physical and image based performance for an invited audience. Each student will be expected to participate daily in an array of physical techniques ranging from Etienne Decroux, commedia dell'arte, divine proportions and sacred geometry, Laban, Viewpoints, Antonin Artaud, the Theatre of the Absurd, and classical theatre, opera and choreography.

Class Notes:

This course will be taught by Visiting Lecturer Daniel Kramer.

Dress code: exercise/gym/dance style clothing to each class; all religious exceptions respected

TOTAL THEATER (based on nothing) (203544)

James Stanley

2017 Spring (4 Credits)

Schedule:

W 1000 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

This class will take a space-specific and deeply collaborative approach to theater making. Our goal will be to interrogate, through readings (in history, theory and critique) and through practice (by making our own piece of theater) the contemporary drift toward "immersive" theatrical forms. Starting with Wagner's articulation of *gesamkunstwerk* – of theater as the Total Work of Art – and Adorno's blistering critique of it, we will trace thinking on immersive artistic and cultural forms and responses to them, throughout the modern and postmodern periods. Concurrent with our readings, we will look at contemporary immersive works, including Jim Findlay's *Dream of the Red Chamber*, Michael Counts's escape room *Paradiso*, and Punch Drunk's immersive juggernaut *Sleep No More*, alongside emerging theories and technologies of virtual and augmented reality.

Meanwhile, employing all of the theatrical tools at our disposal (light, sound, space, song, movement, dance, language) we will come together as a company to create a site specific immersive theater piece of our own with "nothing" at its core. Pairing an episode of the hit TV show "Seinfeld"- the "show about nothing" - with Cage's writing on "silence" and Sartre's writing on "nothingness," we will create a piece that both embodies and critiques the immersive theatrical form.

This is a class for performers, directors, writers, designers, dancers, choreographers and media artists who are game to participate across disciplines. We will incorporate Viewpoints training as part of our development process. Our class will culminate in a public performance of the piece we create.

Performance Studies: An Introduction (203708)

Vivian Huang

2017 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How is performance an object of study, a methodology, and an analytic? This seminar is an introduction to performance studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and post-colonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, and movement.

Course Notes: TDM 1135 and WGS 1135 are the same class and students may not take both for credit.

Class Notes: This course will be taught by Harvard College Fellow Vivian Huang

Vivian Huang

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

If "Asian American" is a historically contested and dynamic term, then what are the concerns and potentials in identifying theater and performance as Asian American? This seminar is a survey of Asian American dramatic literature as well as an introduction to Asian American performance, which will include genres of freak show, television, performance art, video art, and spoken word. Students will examine the themes, forms, and styles through which studied authors and artists tell stories, asking after the historic racialization and gendering of the Asian body. Developing performance methodologies, students will explore artistic strategies and linger in the intersections of race, gender, and sexuality; nation, empire, and migration; performance, liveness, and the archive.

Course Notes: TDM 1229 and WGS 1229 are the same class and students may not take both for credit.

Class Notes: This course will be taught by Visiting College Fellow Vivian Huang

Titled after Phillip Guston, this course has two agendas: technical assignments that improve your ability to move paint around, and laying conceptual groundwork for personal projects. One task of an artist is to have a relationship with a world. From the vantage of individual studios, we will discuss the boundaries between interior and exterior discourse, as well as the social role of artists and the artist's voice through self-expression as well as abnegation—auteurs, flaneurs, and ventriloquists.

Course Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

2017 Spring (4 Credits)

Schedule:

TR 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Following an introductory exercise, each student will spend the term making a single nonfiction video on a subject of his or her choosing.

Course Notes:

Students seeking to enroll are encouraged to bring a paragraph describing a proposed subject to the first class meeting.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes:

SPRING 2017 FIRST MEETING NOTE: The first meeting of VES 52r will then be from 1-2pm on Jan. 24 in Sever 415.

Fundamentals of Animation (110676)

Paul Bush

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

An introduction to the possibilities of animation. Using a mixture of traditional and 2D digital tools, students will complete practical exercises which will familiarize them with basic skills and techniques. Screenings and discussions will help develop the specialized thinking needed to understand the discipline.

Course Notes: Drawing skills are optional, though helpful.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: This course has a mandatory film screening on Fridays from 1pm to 3pm.

Animating Science (126181)

Ruth S. Lingford

Alain Viel

2017 Spring (4 Credits)

Schedule: T 0100 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This hands-on class will investigate the cross-overs between science and animation. How can animation communicate abstract ideas? How can science inspire the artist? Students will acquire some fundamental animation skills, and will work on individual and group projects. This class will be suitable for students with an interest either in science or visual art, or both.

Course Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: This course has an additional weekly film screening, Fridays, 1-3 pm.

Animation/Studio (127188)

Matt Saunders

2016 Fall (4 Credits)

Schedule: M 0600 PM - 0759 PM

M 0100 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

Assailing animation, from the studio. "Animation" will be treated broadly as a strategy of synthetic filmmaking, ranging from installation and gallery spaces to the animated potential of the still image. Assignments include painting and drawing, as well as collage, montage, slide works, and short videos/animations. This term VES56s will be "in residence" in the Lightbox Gallery of the Harvard Art

Museums, taking that space as our special challenge and venue.

Course Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Visual & Environmental Studies 67R

Persuasive Projections: Film, Video, and Moving-Image Installation (159777)

Jennifer Bornstein

2017 Spring (4 Credits)

Schedule: MW 1000 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This is an introductory course in experimental video and film art, as well as forms of installation that incorporate the moving image. Screenings will include works by Andy Warhol, Bruce Nauman, and Yvonne Rainer, as well as hand-made animation and non-art sources such as film noir and television; all types of moving-image media will be part of the class's expanding brainstorm. Students will create individual projects that develop skills in lighting, camera, editing, and sound.

Course Notes: Prerequisite: a familiarity with studio art is preferred, but the course is open to everyone.
Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: SHOPPING WEEK SPRING 2017 LOCATION: This course will meet in the 2nd floor sculpture studio of the Carpenter Center (24 Quincy Street) during the first week of the spring semester. After that, this course will meet in its usual location of Linden 109.

The Art of Film (115688)

Rebecca Sheehan

2017 Spring (4 Credits)

Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introductory course that focuses on the language of film and moving image media. It will provide the students with the analytical tools to respond both critically and creatively to moving image media, with an emphasis on close formal analysis. In the interest of exploring the vast possibilities of the moving image, we will watch a broad selection of narrative and non-narrative works from around the globe alongside canonical feature films.

Course Notes: No background in film history or theory necessary. Required for all undergraduates concentrating in Film and Visual Studies. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Class Notes: This course has a mandatory weekly film screening on Tuesdays from 7-9 pm, and a weekly section to be arranged.

Additional Course Attributes:

Attribute	Value(s)

Surveillance and Cinema (203407)

Rebecca Sheehan

2016 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines cinema's implication in cultures of surveillance, from the late 19th century's use of the medium to 20th century reflections on surveillance and the police state, the (self)-surveillance of contemporary social media and the modern state's expanded usage of the moving image (ubiquitous surveillance from the city streets to space, the use of "body cams"). To understand cinema's relationship to surveillance, we will also examine topics of voyeurism, spectatorship, and documentary ethics.

Course Notes:

All undergraduate students welcome; no previous film studies experience required. Freshmen and sophomores are strongly encouraged to enroll if they are considering VES as a concentration.

NOTE: There are mandatory weekly film screenings for this course and mandatory weekly discussion sections for this course.

Class Notes:

For the 2016 fall term, mandatory screenings will be held on Wednesdays from 7pm to 9pm in the Carpenter Center Lecture Hall.

Critical Studies: The Artist (203367)

Carrie Lambert-Beatty

2017 Spring (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

What does it mean to be an artist? Challenging assumptions about the artist as cultural role, this seminar explores the different ways makers of aesthetic things have been named and defined, trained and treated. It uncovers the histories that shaped the modern, Western model of the artist, and evaluates the challenges and alternatives that have weakened that model's dominance. Working toward an understanding of

contemporary artists' many choices and challenges, we will turn to sources including works of art and conversations with contemporary artists as well as primary texts, historical and anthropological scholarship, films, literary representations, and biographies.

Course Notes: ***Strongly recommended for students considering concentrating in any area of VES. For VES concentrators, this course fulfills one history/theory requirement in the film/video and studio tracks, and it meets the one of the two introductory course requirements in the film and visual studies track, although it is a triple-digit course.**

Format is a weekly seminar meeting plus one weekly special session (e.g. film screening, studio visit, or museum trip) during a reserved "screening" time.

Principles and Plasticity: Intermediate Painting Course (203413)

Kianja Strobert

2017 Spring (4 Credits)

Schedule: M 0130 PM - 0429 PM
M 0900 AM - 1159 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This studio course explores abstraction through the principles of two-dimensional design, from the Gestalt theories of perception to the teachings of Hans Hofmann and additional artists working within this tradition. Employing discussion, text, film, music and in-class lab assignments, we will attempt a 360-degree examination of the visual and philosophical foundations of expressionist mark making. The in-class lab emphasizes the role of composition, form and color in abstraction.

Course Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: *Special First Meeting Notes for Spring 2017:* There will be 2 separate shopping week sessions for this course on Monday, Jan. 23. The first one will be from 9:15am to 10am, and the second one will be 1:30pm to 2:15pm in the Carpenter Center 3rd floor painting studio. Interested students must choose one session; do not attend both.

Starting Jan. 30, this course meets for 6 hours on Mondays; from 9am-12pm, and then from 1:30pm to 4:30pm. This is the normal schedule and students must be able to attend the entire class session to take the course.

Recommended Prep: At least one VES studio course or permission of instructor.

Intermediate Video Workshop: Studio Course (117216)

Robb Moss

2017 Spring (4 Credits)

Schedule:

F 0100 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

A workshop for students with experience in video to explore further the capabilities of the medium by working in the nonfiction genres of the documentary, the experimental, and the experimental documentary. Students may work singly or together to make either an extended project or a series of shorts.

Course Notes:

Students seeking to enroll are encouraged to bring to the first class meeting a paragraph describing a proposed project, whether extended or short.

Recommended Prep:

One VES half-course in video production.

Visual & Environmental Studies 164 Section: 1

Video, Performance, Narrative, Text, Actions (160185)

Jennifer Bornstein

2017 Spring (4 Credits)

Schedule: MW 0300 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

Taking its title from an essay by Lucy Lippard, this course uses video as a springboard for exploring new genres media. During the semester, students will create artworks that blend video with performance and studio art; projects exploring poetry, intermedia, and emerging art forms are also invited. Artists such as Joan Jonas, Chris Burden, and Mike Kelley will be introduced. The goal is to emphasize the development of artistic ideas by broadening and challenging students' investigations.

Course Notes: Prerequisite: a familiarity with studio art is preferred, but the course is open to everyone.
Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: SHOPPING WEEK SPRING 2017 LOCATION: This course will meet in the 2nd floor sculpture studio of the Carpenter Center (24 Quincy

Street) during the first week of the spring semester. After that, this course will meet in its usual location of Linden 109.

The Digital Image (203347)

Alexander Galloway

2016 Fall (4 Credits)

Schedule:

F 1100 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Digital devices permeate contemporary life. But what exactly does the digital mean? Are all computers digital? What about photography or film? We begin with a working definition of digitality as "representation via discrete units." Using this definition, we explore the various technologies of the computer age, but also look beyond them. Source sections are devoted to technical images, digital versus analog images, global digital networks, and, ultimately, the concept of a non-digital image.

Art of the Real (156235)

Dennis Lim

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

A historical survey of the documentary from the silent era to the digital present, with an emphasis on documentary as art. The seminar will discuss the evolution of documentary in terms of cinematic engagements with the generative possibilities of the real, the confluence of documentary and experimental film, and the emergence of documentary as a mode of art making.

Class Notes: This course has mandatory weekly film screenings on Tuesdays from 10 am to 1 pm.

Additional Course Attributes:

Border Cinema (203410)

Rebecca Sheehan

2017 Spring (4 Credits)

Schedule:

W 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Cinema's documentary impulse and its ability to communicate in images that transcend linguistic and cultural borders uniquely suits it to address the ideological, ethnic, racial, gendered, sexual and class divisions that national borders generate and maintain. Departing from the intersections of cinema studies and border studies, Border Cinema looks at cinema's participation in the construction and reification of national and cultural borders and how it has also been used to unsettle and challenge them.

Course Notes: There is a mandatory weekly screening for this course.

Class Notes: This course has mandatory weekly film screenings on Mondays from 10am to 12:30pm in the Carpenter Center Lecture Hall.

Visual & Environmental Studies 181

Film Theory, Visual Thinking (114647)

Giuliana Bruno

2017 Spring (4 Credits)

Schedule:

R 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How do moving images transform the way we think? Introduction to film theory aimed at interpreting the visual world, and developing skills to analyze films and media images. Survey of classical and contemporary film theory goes from turn-of-the-century scientific motion studies to the virtual movements of today. Considers theories of space, time, and motion, including Eisenstein's theory of montage and architecture. Treats visual technology and sensate space, the cultural history of the cinematic apparatus, the body and physical existence, affect and gender, and screen theory. Different theoretical positions guide us in understanding and reading films.

Course Notes: Offered jointly with the Graduate School of Design as HIS 4132. This course has an additional weekly film screening, Wednesday, 7 pm-9pm in the Carpenter Center Lecture Hall.

Additional Course Attributes:

Attribute	Value(s)

The Non-Actor (203394)

Dennis Lim

2017 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course traces the conception and status of the non-actor, linked so often to slippery notions of authenticity and truth, across a wide range of cinematic genres and forms. From Soviet montage cinema and Italian neo-realism to the works of Bresson, Rouch, Warhol, Pedro Costa, and others, this seminar explores both the presence of non-actors in fiction films and the role of performance and re-enactment in non-fiction.

Class Notes: This course has mandatory weekly film screenings on Tuesdays from 11 am to 2 pm.

Cinema and French Culture from 1896 to the Present (123960)

Tom Conley

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Focuses on relations of cinema to French culture from the silent era to the age of video. Explores film in dialogue with cultural and historical events, development of a national style and signature, a history of criticism. Correlates study of cinema to cultural analysis. Takes up Renoir and poetic realism, unrest in 1930s, France and other filmic idioms (Italy, Hollywood, Russia), new wave directors, feminist and minoritarian cinema after 1980.

Course Notes: This course has mandatory weekly film screenings and weekly mandatory discussion sections.

Class Notes: For the fall 2016 term, mandatory weekly film screenings will be held on Tuesday evenings from 7pm to 9pm in the Carpenter Center Lecture Hall.

The Dream Factory: The Art, Industry and Imagination of the Hollywood Studio System, 1927-1974 (108652)

Haden Guest

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines the "Golden Age" of American cinema as an industry, art and mode of popular imaginary by looking closely at the system of motion picture production studios that flourished in Southern California from the early 1920s and through the 1950s. Using a diverse range of primary documents and period films to explore the different stages and roles of industrialized filmmaking, this class will also trace Hollywood's changing self-image and place in popular culture..

Class Notes:

SPRING 2017: The first meeting of this class will be **MONDAY, Jan. 23** at 1pm to 3pm in the Carpenter Center Lecture Hall. There will be no class meeting on Wednesday, Jan. 25.

Film Curatorship: Film Cinematheques, Archives, Museums (203370)

Haden Guest

2016 Fall (4 Credits)

Schedule:

W 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Although the curating of art has long been recognized as a professional discipline and field of critical study, film curatorship remains largely marginalized and misunderstood, with cinema increasingly subsumed by the museum in problematic ways. Exploring the deeper histories of film curatorship within its various institutional settings- the archive, the cinematheque, the film festival- this course studies the theories and practices that ground and singularly define the work of the film curator.

Class Notes:

This course has required weekly film screenings on Mondays from 11:30 am to 1:30pm.

First Meeting Note: First meeting is Weds, August 31 at 11:30am in Carpenter Center Lecture Hall.

The Nonhuman: Aesthetics and Politics of Personhood (203348)

Alexander Galloway

2016 Fall (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

From climate change and infrastructure to objects and animality, the nonhuman realm exerts a growing influence on contemporary life. In this seminar we consider persons as things and things as persons, but also peer beyond the human into a world devoid of humanity. What does personhood mean in the age of the posthuman? Themes include precarity, proletarianization, posthumanism, new materialism, cognition,

willful subjects, and generic personhood.

Materiality, Visual Culture, and Media (203315)

Giuliana Bruno

2017 Spring (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

What is the place of materiality in our visual age of rapidly changing materials and media? How is it fashioned in the arts, architecture and media? This seminar investigates a "material turn" in philosophy, art, media, visual and spatial culture. Topics include: actor-network theory, thing theory, the life of objects, the archive, the haptic and the affect, vibrant materialism, elemental philosophy, light and projection, and the immateriality of atmosphere.

Course Notes: Interested students must attend the first meeting of the class during shopping week.

This course is jointly offered at the Graduate School of Design as HIS 4451; GSD students should enroll in the course via the GSD.

This course has a weekly film screening on Tuesdays from 7pm to 9pm in Carpenter Center B04.

Class Notes: This course has occasional weekly film screenings on Tuesdays from 7pm to 9pm in Carpenter Center B04.

The Frankfurt School on Mass Media and Mass Culture (156172)

Eric Rentschler

2017 Spring (4 Credits)

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This seminar considers the Frankfurt School's deliberations on film, radio, television, and mass culture. We will devote the majority of the course to three seminal figures: Siegfried Kracauer, Walter Benjamin, and T. W. Adorno. More generally, we will focus on the debates catalyzed by the emergence of modern mass media and an industrialized visual culture; we will also reflect on the pertinence of these debates for our own contemporary culture of media convergence.

Course Notes: This course is also offered through Germanic Languages and Literatures as German 254. Credit may be earned for either VES 289 or German 254, but not both.

Requirements: Anti-Req: Cannot be taken for credit if GERM 254 is taken for credit.

Rebecca Sheehan

2016 Fall (4 Credits)

Schedule:

W 0200 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will investigate works central to the history of American and European avant-garde cinema in the context of their poetic and philosophical influences. Departing from the premise that avant-garde films philosophize, this course will consider this cinema in the context of texts essential to the field of "film philosophy" (Deleuze, Cavell, Wittgenstein) in order to better understand what concepts of representation, ethics, identity, and language avant-garde cinema advances.

Course Notes: Film screenings are incorporated into the weekly class meeting time.

2017 Spring (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course supports the writing of the junior paper through seminar discussions and one-on-one tutoring. In the seminar portion of the course, students discuss feminist methodologies across the humanities, social sciences, and life sciences through engagement with diverse readings from these fields. In the practicum, students work with an individual tutor on a semester-long research project in his or her area of interest.

Course Notes: Required of all Honors concentrators in their junior year.

Women, Gender & Sexuality 1125

Gender, Poverty and Health: Social Inequalities and Social Policy (115949)

Mary Ruggie

2017 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Among advanced countries, the United States has the highest rates of poverty and the lowest outcomes on such measures of health as infant mortality. Social inequalities based on gender, race and ethnicity exacerbate the negative impact of poverty on ill-health. Moreover, these inequalities persist despite relatively high levels of government expenditures on health and related social programs. This course examines some of the many reasons for entrenched inequalities in poverty and health, including fragmented funding and delivery systems and institutionalized discrimination. In addition, our concern throughout will be on what can be done to alleviate social exclusion and stigma. To that end, we will consider the possible contributions of a variety of social actors and organizations. Our topics include: understanding poverty and its relationship to health; gender, race and ethnic variations in poverty and health; and the role of public policies on infant, child, and maternal health; food insecurity; homelessness; and HIV/AIDS.

Women, Gender & Sexuality 1127

Beyond the Sound Bite: Women, Gender, and Sexuality in The Daily News (108619)

Alice Jardine

2016 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

35

We are bombarded by sound bites from all over the globe, moving at disorienting speeds, reorganizing our relationship to time and space with increasingly dystopic results. This course will focus on selected televisual and digital events in "real time" from September-December 2016. We will analyze the embedded bits of gender and sexuality always at work in the representations of those events. Topics include: politics, the environment, military adventures, and popular revolt in dialogue with important texts in WGS Studies.

Course Notes: Weekly lecture and a one hour section to be arranged.

Additional Course Attributes:

Performance Studies: An Introduction (203719)

Vivian Huang

2017 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

How is performance an object of study, a methodology, and an analytic? This seminar is an introduction to performance studies, an interdisciplinary field in conversation with theater studies, gender studies, anthropology, philosophy, literary theory, visual studies, dance studies, ethnic studies, queer theory, and post-colonial studies. Students will study and experiment with performance while reading theoretical texts to grapple with concepts including ritual, restored behavior, performativity, mimicry, liveness, the body, objecthood, archive, and movement.

Course Notes:

WGS 1135 and TDM 1135 are the same class and students may not take both for credit. Total course enrollment is limited to 15.

Additional Course Attributes:

Women, Gender & Sexuality 1200FH

The History of Feminism: Narratives of Gender, Race, and Rights (123545)

Phyllis Thompson

2017 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Feminism has told a number of stories about its history, and they have influenced ideology and action alike. But stories are often simplified, or sanitized, for effect. What cultural work has been performed by narratives of difficulty and progress? What sorts of stories have proved ripe for co-optation? How can the past help us write a more equitable future? Themes include the fight for political and economic citizenship, from 1700s through 1990s, and the shifting terms in which it has been framed; the changing nature and regulation of family and domestic life; issues of control over the body and freedom of sexual expression; and the role of idealism and utopian visions.

Course Notes:

Weekly lecture and a one hour section to be arranged.

Women, Gender & Sexuality 1213

One Is Not Born, But Rather Becomes . . . : The Intellectual History of Feminism in France, 1946-2016 (203352)

Alice Jardine

2017 Spring (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Since Simone de Beauvoir declared in 1949 that "One is not born, but rather becomes, a woman," the most important works of French post-war thought (including what is known as French Poststructuralism) have been in one way or another grappling with the implications of that declaration. What is sometimes referred to as "French Feminism" represents a vital part of that intellectual history even as its most radical insights are often erased from mainstream disciplinary discussions of French-influenced philosophical, literary, and cultural theory. This seminar is designed as an accessible introduction for non-French speakers to some of the most important thinkers of gender and sexuality in post-war France, including Helene Cixous, Luce Irigaray, Julia Kristeva, and Monique Wittig. Course is conducted entirely in English.

Women, Gender & Sexuality 1218

Women in American Medicine (159884)

Jenna Tonn

2016 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course explores the history of women in American medicine from the colonial period to the present. We will consider both the changing place of women within the medical profession and the development of

medical knowledge about women's health and disease. How have women practiced medicine as traditional healers, midwives, nurses, physicians, and caregivers? What is the historical relationship between female medical practitioners and the production of medical knowledge about the female body? We will pay particular attention to structural inequalities within the American medical profession and the important role that practitioners, patients, and feminists have played in challenging gender-based discrimination in medicine as well as sexist assumptions about the female body.

Leaning In, Hooking Up: Visions of Feminism and Femininity in the 21st Century (159887)

Phyllis Thompson

2016 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

What does it mean to "do" feminism, or to "be" a feminist in the 21st-century United States? What can we make of the dominant social expectations for a woman's life? This course explores contemporary ideals of feminine success, including their physical, familial, professional, and political manifestations. We will engage with highly-contested topics—including sexual violence and Title 9; work-life balance; the imperatives of self-care and presentation; and new models for sexuality, reproduction, family, motherhood, and domestic life—using the tools of theory and cultural studies to interrogate their framing within popular discourse. Throughout, we will critique ideological formations of gender, particularly as bounded by race, class, and sexuality.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.

Asian American Theater and Performance (203539)

Vivian Huang

2016 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

If "Asian American" is a historically contested and dynamic term, then what are the concerns and potentials in identifying theater and performance as Asian American? This seminar is a survey of Asian American dramatic literature as well as an introduction to Asian American performance, which will include genres of freak show, television, performance art, video art, and spoken word. Students will examine the themes, forms, and styles through which studied authors and artists tell stories, asking after the historic racialization and gendering of the Asian body. Developing performance methodologies, students will explore artistic strategies and linger in the intersections of race, gender, and sexuality; nation, empire, and

migration; performance, liveness, and the archive.

Course Notes: WGS 1229 and TDM 1229 are the same course and students may not take both for credit. Total enrollment is limited to 15.

LGBT Literature (109800)

Linda Schlossberg

2017 Spring (4 Credits)

Schedule:

TR 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines a range of works from the British and American LGBT (lesbian, gay, bisexual, and transgender) canon. Our starting premise will be that LGBT themes have been central, rather than peripheral, to the Western literary tradition. We'll pay close attention to how sexual identity, gender identity, sex, and desire are understood and represented in different social and historical circumstances, as well as the aesthetic traditions and personal experiences shaping these individual works. Authors include James Baldwin, E.M. Forster, Nella Larsen, and Audre Lorde.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Weekly lecture and a one hour section to be arranged.

I Will Survive: Women's Political Resistance Through Popular Song (156084)

Michael Bronski

2016 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

50

This course will examine how women, through popular music, have articulated a clear political analysis of their oppression that has reached large audiences and become foundational to American culture. We will begin with African-American blues in the early 20th century and move through jazz, torch singing, folk, girl groups, disco, and contemporary song. Along with music readings we will include biographical, historical, and critical texts that will place these women in their artistic and political contexts. Performers studied will include, among others, Bessie Smith, the Boswell Sisters, Billie Holiday, Marian Anderson, Peggy Lee, Joan Baez, Gloria Gaynor, and Amy Winehouse.

Instructor Permissions: Instructor

Enrollment Cap:

12

How are notions of human difference, including ethnicity, race, gender, and sexuality, used to sell products in an increasingly global market? We will start in the nineteenth century with the rise of consumer culture, examining how cultures and people considered "primitive" achieved value as objects for exchange and entertainment, and then investigate how this idea takes shape in our contemporary moment. Topics include: sex tourism; commodification of "queer" and multiracial aesthetics; "compassionate" consumption.
