Subject: Neurobiology - Graduate

Neurobiology - Graduate 200

Neurobiology (117726)

John Assad

Matthew Frosch

2017 Fall (4 Credits)

Schedule:

MWF 0830 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

60

This is a comprehensive course in Neuroscience. Basic principles of organization and function of the nervous system will be discussed with frequent reference to pathophysiology of neurological and psychiatric disorders. Combining pathophysiology with basic neuroscience should provide physician/scientists and Ph.D. candidates with a dynamic picture of the rapidly evolving field of neuroscience and the experimental process from which the picture is derived, and all students should emerge with a greater awareness both of the applications of their work in alleviating disease, and of the ways that disease can provide insight into basic scientific questions. The course will span modern neuroscience from molecular neurobiology to perception and cognition, and will include the following major topics: Anatomy and Development of the Brain; Cell Biology of Neurons and Glia; Ion Channels and Electrical Signaling; Synaptic Transmission, Integration, and Chemical Systems of the Brain; Sensory Systems, from Transduction to Perception; Motor Systems; and Higher Brain Function (Memory, Language, Affective Disorders).

Course Notes:

Offered jointly with the Medical School as HT 130. Follows the Medical School calendar. Nine hours of lecture or lab/conference weekly.

Recommended Prep:

Introductory cell and molecular biology course.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Neurobiology - Graduate 209

Neurobiology of Disease (116455)

Edward Kravitz

Patricia Musolino

2018 Spring (4 Credits)

Schedule:

W 0700 PM - 0929 PM

M 0600 PM - 0829 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This course covers a major disease or disorder of the nervous system each week, including Alzheimer's, Huntington's and Parkinson's Diseases, Mood and Autism Spectrum disorder and others. The course is taught at the Harvard Medical School on Monday (6-8:30 PM) and Wednesday (7-9:30 PM) evenings. The Monday sessions involve patient presentations and "core" lectures describing clinical progression, pathology, and basic science underlying a major disease or disorder. On Wednesdays, students present

material from original literature sources, and there is general discussion. The course is for advanced undergraduates, graduate students, and MD and MD/PhD students. The recommended prerequisite are: Introductory neurobiology, biochemistry, and genetics/molecular biology. The course is given in alternate years and is listed at the Medical School as NB 713.0. The first meeting is on January 22 in Goldenson 122 at the Medical Quadrangle on Longwood Avenue (M2 shuttle bus from Quincy Street near Lamont Library—Harvard id gets you on the bus)

Course Notes: Given in alternate years. Offered jointly with the Medical School as NB 713.0. Next offered in Spring 2020. For advanced undergraduate, graduate students, MD and MD/PhD students.

Class Notes: Classes will be held in Goldenson 122

Recommended Prep: Introductory neurobiology, biochemistry, and genetics/molecular biology recommended.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 215A

Pascal Kaeser

2017 Fall (4 Credits)

Schedule: TR 0900 AM - 1150 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course will endow students with the broad conceptual fluency in the discipline of neuroscience

required to relate genes to circuit function, metabolism to neurological disease, and cell biology to neural computations. Through a combination of lectures and in-class activities, students will learn to design, quantitatively analyze, and interpret experiments that address a variety of questions spanning molecular to systems neuroscience. During the first semester, students will think critically about the fundamental units of the nervous system within the context of cellular function, electrical conduction, and chemical signaling. The second half of the course builds upon this foundation to focus on broadly defined "networks of neural function" as related to coordinated neural activity, the concerted execution of genetic programs, and anatomically defined structural networks. The course culminates with students writing a grant proposal in the style of the NIH NRSA.

Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Please note that Program in Neuroscience (PiN) students must take both semesters to fulfill the requirement. Non-PiN students may enroll in just the fall semester with the instructor's approval

Class Notes: Class will be held in WAB 236

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 230

Visual Recognition: Computational and biophysical perspective (107755)

Gabriel Kreiman

2017 Fall (4 Credits)

Schedule:

M 0330 PM - 0529 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How does cerebral cortex store information, compute and learn? How can we build prosthetic devices to fix or augment brain function? How can we build biologically inspired artificial intelligence? This course will examine these questions in the context of visual cognition. Topics: architecture of visual cortex, neurophysiology, visual consciousness, computational neuroscience, models of pattern recognition and computer vision, artificial intelligence, brain-machine interfaces.

Course Notes:

Course website: http://klab.tch.harvard.edu/academia/classes/hms_neuro300_vision/hms_neuro300_vision.html
Neurobiology 230, Visual Recognition, brain-machine interfaces and artificial intelligence

Neuro 230 cannot be taken if Neuro 130 has been taken. Neuro 230 cannot be taken concurrently with Neuro 130.

Class Notes:

Classes begin on September 11, 2017 through December 4, 2017.
Classes will be held in Biolabs 2062

Recommended Prep:

Life Sciences 1a (or Life and Physical Sciences A) and Life Sciences 1b (or equivalent). Recommended: Math (Maa/Mab, Math 1A,1B, Math 19 a or equivalent). Physical Sciences 1. MCB 80.

This course will be held in Biolabs 2062.

Requirements:

Anti-Req: Cannot be taken for credit if NEURO 130 already complete.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Instructor Permissions: Instructor

Enrollment Cap: 80

The goal of this camp is to introduce you to programming in the MATLAB environment and to show you the power this provides for analyzing data and for gaining intuition about the behavior of complex systems through the use of numerical simulations. Some of you, upon encountering in the previous sentence words like "programming" and "numerical simulations," will feel the cold hand of fear grip your stomach, because you have never done any programming and, in fact, have tried to avoid math as much as possible. If so, **YOU ARE PRECISELY THE PERSON WE HAD IN MIND** as we were planning the course. We are aiming to help you break through this barrier of darkness and fear into the radiant sunshine of quantitative enlightenment. The true beauty of MATLAB, as we will personally demonstrate, is that it allows people who are not mathematically adept (e.g. some of the instructors of this course) to use powerful numerical methods and visualization tools to gain an understanding of concepts that are very difficult to grasp analytically.

Course Notes: This bootcamp course will meet in August from 8/8/16 - 8/19/16.

Richard Born

Brian Healy

2017 Fall (2 Credits)

Schedule:

W 0600 PM - 0759 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Probability & statistics taught with an emphasis on using simulations and re-sampling methods to both analyze data and understand core statistical concepts. Prior to class, students will view online lectures from Dr. Brian Healy's biostatistics course. In class, we will focus on MATLAB coding exercises to practice different approaches to analyzing real data sets, with an emphasis on resampling methods.

Course Notes:

This course will use a flipped design in which students will view video lectures from Dr. Brian Healy's Biostatistics Certificate Course (offered through Catalyst) prior to in-class programming exercises.

Class Notes:

Classes begin on September 6 2017 through October 25 2017. Please contact Richard Born, richard_born@hms.harvard.edu for any questions concerning the course.

Recommended Prep:

Students are required to take Neurobiology 306QC as a pre-requisite for this course.

Neurobiology - Graduate 312QC

Development of the Central Nervous System (207085)

Mohini Lutchman

Christopher Walsh

2018 Spring (2 Credits)

Schedule:

M 0900 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

In this quarter course, students will learn about the genetics and neurodevelopment of the central nervous system. The course format will include lectures on topics on Microcephaly, Epilepsy and Autism. In addition, there will be case studies neuroanatomy laboratories and patient presentations of those affected with neurodevelopmental disease. Students will be assessed in a team-based setting.

Course Notes:

The lab demonstrations will allow students to examine and compare normal brains with those with neurodevelopmental abnormalities. Harvard Faculty will participate in the course. Undergraduate enrollment requires the permission of the instructor

Class Notes:

Classes start January 22, 2018 through March 5, 2018. Classes will be held in TMEC 447

Additional Course Attributes:

Human Neuroanatomy and Neuropathology (205296)

Matthew Frosch

Jean Augustinack

2017 Fall (2 Credits)

Schedule: MWF 0830 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 20

This course will cover human neuroanatomy in depth, with an emphasis on the functional implications of structure and medical implications of lesions. Teaching occurs through lectures, small group sessions, brain dissection and homework assignments.

Course Notes: Restricted to Graduate Students only. This course is offered as part of NB200/HT130. Students may not co-register for both courses.

Class Notes: Course begins on September 25, 2017 through November 3, 2017.
All lectures on Friday end by 10:30 a.m.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None

Neurobiology - Graduate 317QC

Comparative Neuroanatomy (207086)

Wei-Chung Lee

Taralyn Tan

2018 Spring (2 Credits)

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

Neuroscientists employ diverse experimental approaches and model systems to study nervous system structure and function. Using in-class discussions of primary literature, this course will introduce students to basic principles of nervous system organization and modern methods to study neural circuits. Interactions among brain systems and comparison of circuit function across organisms spanning invertebrates to primates will be highlighted.

Class Notes: Class start February 20, 2018 through April 24, 2018. Class will be held in WAB 236

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Ziv Williams

Dennis Selkoe

Emery Brown

Matthew Frosch

Takao Hensch

2017 Fall (2 Credits)

Schedule: MWF 0830 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 50

This block provides a basic framework for understanding common disease processes that affect the central and peripheral nervous system as well as their pathophysiology and treatment. Specific focus is placed on disorders frequently encountered in clinical practice such as neurodegenerative disorders, seizures, addiction and trauma. For each topic, clinical vignettes will be tied into basic diagnostic options and treatments. Disorders will also be broken down into their principle biological underpinnings, cellular and molecular dysfunction. Finally, a brief overview will be given of ongoing advancements in these fields and future directions.

Course Notes: All lectures on Friday end by 10:30 a.m. Restricted to Graduate Students only. This course is offered as part of NB200/HT130. Students may not co-register for both courses.

Class Notes: Classes begin September 4, 2017 through December 20, 2017.

Neurobiology of Psychiatric Disease: From Bench to Bedside (205053)

William Carlezon

Kerry Ressler

2017 Fall (2 Credits)

Schedule: T 0100 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

To provide clinical insight and critical analysis of basic and translational science approaches necessary for students to approach psychiatric disorders as scientific problems, and thus contribute future research work with clinical relevance. Each pair of lectures presents 1) basic neuroscience approaches to the neural circuitry, cell and molecular biology underlying disease, followed by 2) clinical neuroscience, genetics, neuroimaging, etc., including case studies of the disorders.

The lectures will focus on a range of psychiatric disorders, neural systems underlying behavior, and translational approaches to novel interventions, while providing insight on disease characteristics, current, novel and translationally-informed treatments, gene vs. environmental risk factors, animal models, and gaps in knowledge across the field. There will also be laboratory-based sessions (organized visits to McLean Hospital) to demonstrate examples of basic and human laboratory approaches to the study and treatment of psychiatric illness.

Class Notes:

Classes begin on September 12 2017 through October 17 2017. Please contact Bill Carlezon, carlezon@mclean.harvard.edu and Kerry Ressler, kressler@mclean.harvard.edu for any questions regarding the course

Neurobiology - Graduate 327R

Lab Rotations in Neurosciences (109330)

Rosalind Segal

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 327R

Lab Rotations in Neurosciences (109330)

Rosalind Segal

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 328

Mechanisms of Cell Death in Stroke and Trauma (112849)

Eng Lo

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 328

Mechanisms of Cell Death in Stroke and Trauma (112849)

Eng Lo

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 328L

Role of Sleep in Memory and Emotional Processing in Healthy Subjects, Schizophrenia, Autism, and PTS (109253)

Robert Stickgold

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 328L

Role of Sleep in Memory and Emotional Processing in Healthy Subjects, Schizophrenia, Autism, and PTS (109253)

Robert Stickgold

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 329

Molecular Mechanisms of Neurodegeneration in Alzheimer's and Parkinsons Diseases (124384)

Dennis Selkoe

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 329

Molecular Mechanisms of Neurodegeneration in Alzheimer's and Parkinsons Diseases (124384)

Dennis Selkoe

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 329L

The Genetic and Neural Basis of Sleep in Drosophila (109254)

Dragana Rogulja

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 329L

The Genetic and Neural Basis of Sleep in Drosophila (109254)

Dragana Rogulja

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 330

Effects of stress and other experiences on motivated behavior (115975)

William Carlezon

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 330

Effects of stress and other experiences on motivated behavior (115975)

William Carlezon

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 330L

Translational Genomics of Parkinsons Disease: Cause, Cures, Diagnostics (109252)

Clemens Scherzer

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 330L

Translational Genomics of Parkinsons Disease: Cause, Cures, Diagnostics (109252)

Clemens Scherzer

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 331

Neural Differentiation, Regeneration and Stem Cell Regulation in the Brain and Eye (115976)

Dong Chen

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 331

Neural Differentiation, Regeneration and Stem Cell Regulation in the Brain and Eye (115976)

Dong Chen

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 331L

Motivational Influences on Cortical Networks Underlying Attention, Learning and Memory of Sensory Cu (109256)

Mark Andermann

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 331L

Motivational Influences on Cortical Networks Underlying Attention, Learning and Memory of Sensory Cu (109256)

Mark Andermann

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 332

Ligand-Gated Ion Channels: Structure and Function (110882)

Jonathan Cohen

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 332

Ligand-Gated Ion Channels: Structure and Function (110882)

Jonathan Cohen

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 332L

Biological and Computational Underpinnings of Visual Processing (109257)

David Cox

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 332L

Biological and Computational Underpinnings of Visual Processing (109257)

David Cox

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 333

Intercellular Communication (111693)

David Paul

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 333

Intercellular Communication (111693)

David Paul

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 333L

Behavioral and synaptic plasticity in neuropsychiatric disorders; mechanisms of axon guidance and sy (109293)

Christopher Cowan

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 333L

Behavioral and synaptic plasticity in neuropsychiatric disorders; mechanisms of axon guidance and sy (109293)

Christopher Cowan

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 333QC

Careers in Neuroscience (207084)

David Ginty

Brendan Lehnert

2018 Spring (2 Credits)

Schedule: R 0530 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

This course is intended to provide PiN PhD candidates with a structured introduction to career skills that enable success after the completion of the PhD, and is directed to those considering both academic and non-academic paths. The course meets in WAB 236 from 5:30pm - 7:00pm beginning January 25th, 2017 and continues every other Thursday, though meeting dates may change subject to speaker availability. There

will be eleven sessions in total, and each session will feature one or more invited discussion leaders who can relate the merits and challenges of particular career paths and the skills required to be successful. Dinner is provided.

Course Notes: Course is offered every 2 years.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Neurobiology - Graduate 334

Hair Cells and Afferent Neurons of the Inner Ear (123141)

Ruth Anne Eatock

2018 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 334

Hair Cells and Afferent Neurons of the Inner Ear (123141)

Ruth Anne Eatock

2017 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 334L

Cellular and Molecular Mechanisms of Cortical Circuit Assembly (109369)

Corey Harwell

2018 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 334L

Cellular and Molecular Mechanisms of Cortical Circuit Assembly (109369)

Corey Harwell

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 335

Physiological Function and the Pathogenetic Actions of Genes Implicated in Neurodegenerative Disease (109376)

Mark Albers

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 335

Physiological Function and the Pathogenetic Actions of Genes Implicated in Neurodegenerative Disease (109376)

Mark Albers

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 335L

Molecular Mechanisms Underlying the Assembly of Neural Circuits (156902)

Matthew Pecot

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 335L

Molecular Mechanisms Underlying the Assembly of Neural Circuits (156902)

Matthew Pecot

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 336

Developmental Cognitive Neuroscience, Focusing Primarily on Memory and Face Processing (121800)

Charles Nelson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 336

Developmental Cognitive Neuroscience, Focusing Primarily on Memory and Face Processing (121800)

Charles Nelson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 336L

Synapse formation and refinement in the mammalian brain (156926)

Hisashi Umemori

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 336L

Synapse formation and refinement in the mammalian brain (156926)

Hisashi Umemori

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 351

Neurogenetics of Disease (112135)

Louis Kunkel

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 351

Neurogenetics of Disease (112135)

Louis Kunkel

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 352L

Neural circuitry of sleep and sleep disorders (203807)

Thomas Scammell

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 352L

Neural circuitry of sleep and sleep disorders (203807)

Thomas Scammell

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 353

Physiology, with an Emphasis on Ion Channels, Signal Transduction, and Imaging (134189)

David Clapham

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 353

Physiology, with an Emphasis on Ion Channels, Signal Transduction, and Imaging (134189)

David Clapham

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 354

Structural Biology of Signaling and Transport Through Biological Membranes (123145)

Rachelle Gaudet

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 354

Structural Biology of Signaling and Transport Through Biological Membranes (123145)

Rachelle Gaudet

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 355

A Biophysical Approach to System Function (107746)

Michael Do

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 355

A Biophysical Approach to System Function (107746)

Michael Do

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 356

Ion Channels in Neural Cell Membranes (144968)

David Corey

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 356

Ion Channels in Neural Cell Membranes (144968)

David Corey

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 357

Experience-Dependent Neuronal Circuit Maturation and Plasticity (123610)

Michela Fagiolini

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 357

Experience-Dependent Neuronal Circuit Maturation and Plasticity (123610)

Michela Fagiolini

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 358

Neurogenetics of Human Disease (121701)

Xandra Breakefield

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 358

Neurogenetics of Human Disease (121701)

Xandra Breakefield

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 358L

Genomic analyses of brain cell function and dysfunction (205912)

Evan Macosko

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 358L

Genomic analyses of brain cell function and dysfunction (205912)

Evan Macosko

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 359

Functional and Behavioral Interrogation of Neural Circuits in the Mammalian Olfactory System (126396)

Sandeep Datta

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 359

Functional and Behavioral Interrogation of Neural Circuits in the Mammalian Olfactory System (126396)

Sandeep Datta

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 360

Neural Signal Processing and Mechanisms of General Anesthesia (119842)

Emery Brown

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 360

Neural Signal Processing and Mechanisms of General Anesthesia (119842)

Emery Brown

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 361

Immunobiology of the Nervous System and its Tumors (116018)

Lois Lampson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 361

Immunobiology of the Nervous System and its Tumors (116018)

Lois Lampson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 362

Optical Imaging in Alzheimer's Disease (125535)

Brian Bacskai

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 362

Optical Imaging in Alzheimer's Disease (125535)

Brian Bacskai

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 363

Axonal Development and Reorganization (120337)

Larry Benowitz

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 363

Axonal Development and Reorganization (120337)

Larry Benowitz

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 363L

The genetics, biochemistry and physiology of forebrain inhibition (205895)

Gordon Fishell

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Using genetic, physiological and molecular methods to understand how inhibitory interneuron subtypes are generated and subsequently integrated into neural circuits in both normal and pathophysiological conditions.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 363L

The genetics, biochemistry and physiology of forebrain inhibition (205895)

Gordon Fishell

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Using genetic, physiological and molecular methods to understand how inhibitory interneuron subtypes are generated and subsequently integrated into neural circuits in both normal and pathophysiological conditions.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 364

hypothalamic circuitry controlling sleep and circadian rhythms (131279)

Clifford Saper

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 364

hypothalamic circuitry controlling sleep and circadian rhythms (131279)

Clifford Saper

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 365

Behavioral Pharmacology of Stimulant Drugs and Brain Dopamine Systems (121799)

Barak Caine

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 365

Behavioral Pharmacology of Stimulant Drugs and Brain Dopamine Systems (121799)

Barak Caine

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 366

Functional Organization of the Retina (121350)

Richard Masland

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 366

Functional Organization of the Retina (121350)

Richard Masland

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 367

Neocortical Development and Regeneration (113770)

Jeffrey Macklis

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 367

Neocortical Development and Regeneration (113770)

Jeffrey Macklis

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 368L

Serotonin neurotransmission in behavior and psychopathology (203814)

Kathryn Commons

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 368L

Serotonin neurotransmission in behavior and psychopathology (203814)

Kathryn Commons

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 369L

Statistical neuronal computations underlying complex decisions and behavior under uncertainty (203815)

Jan Drugowitsch

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 369L

Statistical neuronal computations underlying complex decisions and behavior under uncertainty (203815)

Jan Drugowitsch

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 370

Genetic and Molecular Studies of Neurodegenerative Diseases (118843)

Rudolph Tanzi

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 370

Genetic and Molecular Studies of Neurodegenerative Diseases (118843)

Rudolph Tanzi

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 371

Sensory Neuron Development and Sleep Using Genetics and Live Imaging in Zebrafish (123147)

Alexander Schier

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 371

Sensory Neuron Development and Sleep Using Genetics and Live Imaging in Zebrafish (123147)

Alexander Schier

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 372

Neurotransmitter Control of Ion Channels (112805)

Bruce Bean

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 372

Neurotransmitter Control of Ion Channels (112805)

Bruce Bean

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 373

Developmental Studies of the Murine Trigeminal Sensory System (112846)

Qiufu Ma

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 373

Developmental Studies of the Murine Trigeminal Sensory System (112846)

Qiufu Ma

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 374

Molecular Basis of Alzheimer's Disease & Parkinson's Disease (112852)

Jie Shen

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 374

Molecular Basis of Alzheimer's Disease & Parkinson's Disease (112852)

Jie Shen

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 375

Mechanisms of Synaptic Transmission & Plasticity (112850)

Venkatesh Murthy

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 375

Mechanisms of Synaptic Transmission & Plasticity (112850)

Venkatesh Murthy

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 376

Genetics of Neuronal Cell Biology (115462)

Thomas Schwarz

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 376

Genetics of Neuronal Cell Biology (115462)

Thomas Schwarz

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 377

Physiological Studies of Phototransduction and Light Adaptation (116020)

Clint Makino

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 377

Physiological Studies of Phototransduction and Light Adaptation (116020)

Clint Makino

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 377L

Structure, function, and development of neuronal networks (205935)

Wei-Chung Lee

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Neurobiology - Graduate 377L

Structure, function, and development of neuronal networks (205935)

Wei-Chung Lee

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Neurobiology - Graduate 378

Neuronal Mechanisms and Animal Behavior (123148)

Naoshige Uchida

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 378

Neuronal Mechanisms and Animal Behavior (123148)

Naoshige Uchida

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 379

Growth Factor Regulation of Neural Development and Oncogenesis (116022)

Scott Pomeroy

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 379

Growth Factor Regulation of Neural Development and Oncogenesis (116022)

Scott Pomeroy

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 380

Functional Wiring of the Rabbit Retina, Control of Postnatal Development (116024)

Elio Raviola

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 380

Functional Wiring of the Rabbit Retina, Control of Postnatal Development (116024)

Elio Raviola

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 381

Glutamate Transporters, Cell Death, Sleep/Wake Regulation (116025)

Paul Rosenberg

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 381

Glutamate Transporters, Cell Death, Sleep/Wake Regulation (116025)

Paul Rosenberg

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 382

Hypothalamus and Melanin Concentrating Hormone in the Regulation of Energy Homeostasis (117277)

Eleftheria Maratos-Flier

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 382

Hypothalamus and Melanin Concentrating Hormone in the Regulation of Energy Homeostasis (117277)

Eleftheria Maratos-Flier

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 383

Role of the Basal Ganglia in Learning and Motivation (125277)

Emad Eskandar

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 383

Role of the Basal Ganglia in Learning and Motivation (125277)

Emad Eskandar

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 384

Neuroscience of Human Emotions and Emotional Disorders (107633)

Diego Pizzagalli

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 384

Neuroscience of Human Emotions and Emotional Disorders (107633)

Diego Pizzagalli

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 385

Mammalian Gap Junctions, Inhibitory Neuronal Networks, and Corticothalamic Processing (124147)

Carole Landisman

2018 Spring (4 Credits)

Subject: Microbiology

Microbiology 201

Molecular Biology of the Bacterial Cell (126271)

David Rudner

Thomas Bernhardt

Simon Dove

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course is devoted to bacterial structure, physiology, genetics, and regulatory mechanisms. The class consists of lectures and group discussions emphasizing methods, results, and interpretations of classic and contemporary literature.

Class Notes: Classes will be held in NRB 1031

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Microbiology 205

Mechanisms of Microbial Pathogenesis (146757)

Clyde Crumpacker

Harvey Simon

2017 Fall (4 Credits)

Schedule: TR 0830 AM - 1229 PM

Instructor Permissions: Instructor

Enrollment Cap: 40

The mechanisms of bacterial, mycoplasmal, fungal, and viral pathogenesis are covered. Topics are selected for intrinsic interest and cover the spectrum of pathophysiologic mechanisms of the infectious process. Emphasis on pathogenesis at the molecular level.

Course Notes: Offered jointly with the Medical School as HT 040.

Class Notes: Please note that there will be an additional fee for microscope rental. Classes begin September 6, 2017 through December 19, 2017

Recommended Prep: A background course in molecular biology is strongly encouraged.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Microbiology 210

Microbial Sciences: Chemistry, Ecology, and Evolution (125823)

Michael Gilmore

2018 Spring (4 Credits)

Schedule: F 0845 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

This is an interdisciplinary graduate-level and advanced undergraduate-level course in which students explore topics in molecular microbiology, microbial diversity, and microbially-mediated geochemistry in depth. This course will be taught by faculty from the Microbial Sciences Initiative. Topics include the origins of life, biogeochemical cycles, microbial diversity, and ecology.

Course Notes: Also offered as Organismic and Evolutionary Biology 290.

Recommended Prep: For advanced undergraduates, Life Sciences 1a and 1b are required, or permission of instructor. MCB 52 is recommended.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Microbiology 213

Social Issues in Biology (122708)

Jonathan Beckwith

Morgan Thompson

2018 Spring (4 Credits)

Schedule: R 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

This is an active learning, discussion-based course on topics including: human cognition, history and philosophy of science; science and religion; genetic issues (determinism, testing, enhancement, etc.);

underrepresented groups in science; science in wartime; scientists and social responsibility; and the communication of science. Students will experience a problem-based learning (PBL) approach that allows them to shape their own directions of inquiry and develop skills as investigators and educators. Students will have ample opportunities to practice professional skills foundational to collaboration, mentoring, and leadership with the intention that they are supported in moving from recognizing issues to taking action.

Course Notes: Offered jointly with the Medical School as MG 722.0. Alternates yearly between the Longwood and the Cambridge campuses.

Class Notes: Class will be held in NRB 833

Recommended Prep: Some background in genetics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Microbiology 214

Mechanisms of Bacterial Pathogenesis and Host Immune Response (156454)

Marcia Goldberg

Jonathan Kagan

Michael Starnbach

Darren Higgins

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course focuses on molecular mechanisms of bacterial pathogenesis and the host response to infection. The class consists of lectures and group discussions emphasizing methods, results, and interpretations of classic and contemporary literature. The course is designed to complement Microbiology 201.

Course Notes: Designed for graduate students in first year or beyond, however undergraduates with specific interest in the field may audit.

Class Notes: Class begins August 31, 2017 through November 30, 2017.
Classes will be held in NRB 1031

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Microbiology 300

Advanced Topics in Microbiology and Molecular Genetics (111409)

David Cardozo

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit.

Course Notes:

Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0605 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Recommended Prep: Dependent on seminar.

Additional Course Attributes:

Microbiology 302QC

Introduction to Infectious Disease Research: Infectious Diseases Consortium Boot Camp (109380)

Eric J. Rubin

Bradley Coleman

2018 Spring (2 Credits)

Schedule: MTWRF 0900 AM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This January boot camp course provides a fun, informative introduction to the breadth of infectious disease research carried out at Harvard and beyond. The course will focus on several aspects of infectious diseases:

Underlying biology of infectious diseases and the diverse pathogens that cause them

Modern approaches to studying infectious diseases, including experimental biology, epidemiology, bioinformatics, and clinical microbiology

Modern approaches to developing new interventions, including drugs, vaccines, diagnostics, and public health measures

This will be accomplished through a mix of lectures, discussions, and reading combined with lab visits and

hands-on workshops. In addition, students will have the chance to meet faculty, students, and postdocs in infectious disease roles across Harvard.

Course Notes: This is an intensive January course. While most participants in this course come from biology graduate programs at HMS/HSPH, students from other programs or schools are welcome to register.

Class Notes: January Session; dates: January 9-13, 2017

The Human Microbiome: Comprehensive experimental design and methodologies (207117)

Aleksandar Kostic

Abigail Devlin

2018 Spring (2 Credits)

Schedule: WF 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This is a comprehensive introduction to the study of human microbial communities and their functions relevant to human physiology. Topics covered include metagenomics, mechanistic interactions of the microbiome with metabolism, the immune system, and the gut-brain axis. Rather than lectures, this course is primarily a critical discussion of the literature.

Class Notes: Classes will be held in Folin Wu room

Subject: Medical Sciences

Medical Sciences 210

Intro to Matlab, Statistics, and Dynamical Systems for Mathematical Biology in Pharma and Biotech (205991)

Catherine Dubreuil

2017 Fall (4 Credits)

Schedule: M 0600 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap: 24

This course provides an introduction to the use of mathematical modeling, continuous differential equations, statistics and analysis and programming in Matlab with a focus on mathematical biology applications in pharmaceutical and biotechnology industries. Biological topics will include dynamic systems math modeling and statistical analysis applied to the drug discovery and development pipeline. Computational tools, model simulations, and statistical analyses will be executed in MATLAB. MATLAB code will be covered in class.

Medical Sciences 250AB

Human Functional Anatomy (120066)

Lee Gehrke

Trudy Van Houten

Breda Zimkus
Mohini Lutchman
Sabine Hildebrandt

2017 Fall (8 Credits)

Schedule:

MWF 0130 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

52

Lectures, detailed laboratory dissections, and prosections provide a thorough exploration of the gross structure and function of the human body. Fundamental principles of embryology and bioengineering promote analytical approaches to understanding the body's design.

Course Notes:

Open to qualified graduate students with permission of the course director. The course has a minimum enrollment of 30. This course requires rental of a locker for two hundred and ten dollars. Offered jointly with the Medical School as HT010.

Class Notes:

Please note that there will be an additional fee for microscope rental.

Additional Course Attributes:

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a required course for all DMS students and all who receive support from NIH training grants.

The goal of this course is to inform students about the appropriate conduct of research and the many ethical and social problems that they may encounter during their research career in graduate school. The course consists of three lectures for the entire class and five highly interactive sessions with a small group of fellow students moderated by a faculty member. Some of the issues that will be discussed in this course include appropriate methods of collecting laboratory data, interactions with members of the laboratory and the mentor and issues dealing with research misconduct.

Course Notes: All current G2 students must register for this course on their Fall Semester 2017 study cards. Specific enrollment instructions will be sent to current G2s and other eligible students in the upcoming weeks. Please contact Tatevik Holmgren (tatevik_holmgren@hms.harvard.edu) for enrollment inquiries. Restricted to GSAS graduate students on the Longwood campus.

Class Notes: Classes begin on September 14, 2017 through November 16, 2017. Lectures will take place in Armenise 125(D)

Graduate TA Training in the Biomedical Sciences (207116)

Bradley Coleman

Ronald Heustis

Diane Lam

2018 Spring (2 Credits)

Schedule:

TR 0400 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

50

Instructs graduate student teaching assistants in the pedagogy and course management skills required to be an effective TA. The course begins with three two-hour class sessions that focus on the basics of evidence based teaching practice and practical strategies for working with students. As the semester progresses, students use their work as TAs as the basis for continued instruction and reflection on teaching best practices and the challenges of their application in real-world settings.

Recommended Prep:

Open to any graduate student currently serving as a Teaching Assistant, pending approval of the Curriculum Fellow overseeing the appropriate longitudinal component.

PhD Pathfinder (161280)

2018 Spring (2 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap: 50

The course is open to all Ph.D. students interested in learning about the range of career options available to biomedical Ph.Ds. The course includes talks, didactic sessions, workshops and networking events to promote interactions between students and invited speakers. There will be a special emphasis on helping students design their own career map using a tool created by RA Capital. After each session there will be a small networking reception for both the students and lecturers.

Students will learn about the many career paths available to people with advanced degrees in biomedical research including academia, biotech, patent law, science writing/publishing, consulting/business, education, and science policy/regulation.

A Ph.D. education provides students with fundamental knowledge about the principles and practice of the scientific method and promotes development of problem-solving skills in ways that are quite useful for many different professions. Students will have the opportunity to learn from experienced professionals representing each of these paths, to learn about strategies for career development, curriculum enrichment, and networking opportunities that will make them competitive for their career of choice.

Course Notes: Students are required to attend all five sessions

Class Notes: Classes begin April 23 and end April 27, 2018. Class ends at 6:30 and a reception follows immediately after. Classes will be held in Modell 100A except on Wednesday April 25, 2018 which will be held in Cannon.

Internships are considered an integral part of a student's educational experience and should be viewed as a path toward a student's career development. As such, approved internships can receive academic credit via this course number.

Course Notes: Ordinarily, each student will be limited to one internship during his/her PhD career. The internship must be discussed with the PI and DAC committee (or, program advisor, where applicable) prior to approval. Not all students may be eligible for internships, due to program requirements, academic standing or advisor input.

Frank Slack

Melissa Leger-Abraham

2017 Fall (4 Credits)

Schedule: MWF 1045 AM - 1214 PM

Instructor Permissions: None

Enrollment Cap: n/a

Principles of Molecular Biology is a course organized around the Central Dogma of Biology with presentations covering fundamental aspects of DNA and RNA structure, their function and their interactions with proteins. The course opens with a discussion of the physical and chemical properties that drive the interactions of proteins with nucleic acids. This is used as a basis for understanding the material presented in the subsequent five modules, which cover DNA replication, DNA repair, gene regulation, transcription and translation. Throughout this course an emphasis will be placed on how the structure of small molecular machines (proteins) define their function in the processes and pathways that are introduced.

Course Notes: Offered jointly with the Medical School as BP 723.0.

Class Notes: Classes run from August 30, 2017 through December 4, 2017.

Recommended Prep: Intended primarily for graduate students familiar with basic molecular biology or with strong biology/chemistry background.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Biolog Chem & Molecular Pharm 236

Modern Drug Discovery: From Principles to Patients (156104)

Timothy Mitchison

Catherine Dubreuil

Nathanael Gray

2018 Spring (4 Credits)

Schedule:

TR 0330 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will familiarize students with central concepts in drug action and therapeutics: specifically we will cover concepts surrounding Pharmacokinetics (PK) and the intersection of PK and medicinal chemistry in both lectures and cases based discussions. These concepts are central to modern drug development and evaluation. In the course we will cover drug-target interactions, Pharmacokinetics and Pharmacodynamics. This course will have a focus on modern approaches to therapeutic development for small molecules, protein based therapeutics, nucleic acid based drugs and antibacterial compounds as well new frontiers in therapeutic discovery.

Course Notes: This course is the combination of the BCMP 309qc and 307qc quarter courses, offered as half course. Students who plan to take the two quarters must sign up under BCMP 236.

Additional Course Attributes:

Biolog Chem & Molecular Pharm 250

Biophysical and Biochemical Mechanisms of Protein Function (204396)

Andrew Kruse

Stephen Blacklow

Michael Eck

Eric Fischer

Madhvi Venkatesh

2018 Spring (4 Credits)

Schedule:

TR 1030 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

40

Biophysical and Biochemical Mechanisms of Protein Function focuses on the molecular mechanisms that underlie essential biochemical processes such as signal transduction. Major topics include biochemical thermodynamics and conformational equilibria, protein structure and folding, receptor pharmacology, allostery, and enzymatic mechanisms of signaling. The course includes both content lectures and research frontiers seminars focused on current research in biochemistry with an emphasis on signal transduction in therapeutically relevant pathways.

Recommended Prep: A foundational biochemistry course

This intensive course, held during the first two weeks of January (nine days), covers principles of pharmacology and their translation into new drug development. Students participate in project groups composed of graduate students, medical students, and post-graduate M.D. fellows to propose a drug development strategy from target choice through clinical trials. Most mornings include two hours of lectures and/or panel discussions; most afternoons include (i) case studies presented by Harvard faculty and faculty from the pharmaceutical and biotechnology industries and/or (ii) time to work on the group project. Evaluation is based on written and oral presentations of the group project and on class participation. Enrollment may be limited.

Course Notes: Class begins Tuesday January 7th, 2019 through Friday, January 25, 2019

Seminars in Molecular Mechanistic Biology (207006)

*Joseph John Loparo**Madhvi Venkatesh*

2018 Spring (2 Credits)

Schedule:

M 0500 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

Seminars in Molecular Mechanistic Biology is a series of student work-in-progress talks that meets approximately once a month during the academic year. Each presentation will be attended by two faculty members (neither of whom are the presenting student's dissertation advisor) and students will receive feedback from both the faculty and the other students in the Molecular Mechanistic Biology (MMB) program. The peer-to-peer structure of this course (which is only open to students in MMB) should build community and a sense of belonging to the program. It will also help students develop a deeper understanding of the study of molecular mechanisms outside of their own labs and build relationships with faculty.

Course Notes:

Registration for this class is limited to students who are a part of the Molecular Mechanistic Biology program. Students should contact Madhvi Venkatesh (madhvi_venkatesh@hms.harvard.edu) regarding enrollment.
Students will be contacted directly with room

Cell Fate Decisions in Development and Disease (108999)

Alan Cantor

Ramesh Shivdasani

Zhe Li

2017 Fall (2 Credits)

Schedule: W 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This quarter course will offer students an in-depth examination of current knowledge regarding mechanisms of cell fate decisions. It will examine these processes in the context of developmental cell plasticity, cellular reprogramming, and cancer. This will primarily be a literature-based course with examination and discussion of key studies in the field. Concepts involving the instructive role of lineage-specific transcription factors, transcription factor cross-antagonism, feedback loops, gene regulatory networks, multilineage priming, pioneer factors, epigenetics, chromatin remodeling factors, "super enhancers", stem cell bias, lineage identity maintenance, mitotic bookmarking, non-coding RNAs, cell polarity, asymmetric cell division, Notch signaling, lateral inhibition, lineage plasticity, and cellular reprogramming will be explored. These ideas will be examined in the context of several different tissue systems and organisms.

Class Notes:

Course meets Wednesdays, September 20 through November 15.
Classes will be held at Karp Family Research Building, 7th floor conference room.

FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 329

Structure Biology of Cytoplasmic Signal Transduction (148041)

Michael Eck

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 330L

Protein aggregation and synaptic dysfunction (203803)

Dominic Walsh

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 330L

Protein aggregation and synaptic dysfunction (203803)

Dominic Walsh

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 331

Biochemistry and Biology of Neurodegenerative Diseases (117744)

Michael Wolfe

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 331

Biochemistry and Biology of Neurodegenerative Diseases (117744)

Michael Wolfe

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 333

Structural Biology of Mechanisms in Gene Regulation (110246)

Piotr Sliz

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 333

Structural Biology of Mechanisms in Gene Regulation (110246)

Piotr Sliz

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 334

MicroRNA Functions in Cancers and Quiescence (127373)

Shobha Vasudevan

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 334

MicroRNA Functions in Cancers and Quiescence (127373)

Shobha Vasudevan

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 335

Biochemical and Genetic Analysis of Eukaryotic Gene Expression (122931)

Stephen Buratowski

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 335

Biochemical and Genetic Analysis of Eukaryotic Gene Expression (122931)

Stephen Buratowski

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 336

Molecular mechanisms of transmembrane signaling (160764)

Andrew Kruse

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Biolog Chem & Molecular Pharm 336

Molecular mechanisms of transmembrane signaling (160764)

Andrew Kruse

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 337

Drosophila Molecular Genetics (122426)

Welcome Bender

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 337

Drosophila Molecular Genetics (122426)

Welcome Bender

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 338

Gene Regulation in Yeast and Cancer (116302)

Kevin Struhl

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 338

Gene Regulation in Yeast and Cancer (116302)

Kevin Struhl

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 340

Biologically Active Small Molecules (118845)

Jon Clardy

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 340

Biologically Active Small Molecules (118845)

Jon Clardy

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 343

Molecular Genetics of Herpes Viruses (145027)

Donald Coen

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 343

Molecular Genetics of Herpes Viruses (145027)

Donald Coen

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 344

Molecular Pharmacology of Excitable Membranes (131357)

Gary Strichartz

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 344

Molecular Pharmacology of Excitable Membranes (131357)

Gary Strichartz

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 345

Transcription Factors in Hematopoiesis and Leukemogenesis (120174)

Alan Cantor

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 345

Transcription Factors in Hematopoiesis and Leukemogenesis (120174)

Alan Cantor

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 349

Targeting Deregulated Apoptotic and Transcriptional Pathways in Cancer (122746)

Loren Walensky

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 349

Targeting Deregulated Apoptotic and Transcriptional Pathways in Cancer (122746)

Loren Walensky

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 352

Chemical Mediators in Inflammation and Resolution (119614)

Charles Serhan

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 352

Chemical Mediators in Inflammation and Resolution (119614)

Charles Serhan

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 353

Epigenomics and Chromatin Systems Biology (122334)

Yujiang (Geno) Shi

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 353

Epigenomics and Chromatin Systems Biology (122334)

Yujiang (Geno) Shi

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 355

Transcriptional Control of Hematopoiesis and Leukemia (122740)

Hanno Hock

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 355

Transcriptional Control of Hematopoiesis and Leukemia (122740)

Hanno Hock

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 356

NMR Spectroscopy of Proteins and Metabolites (148268)

Gerhard Wagner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 356

NMR Spectroscopy of Proteins and Metabolites (148268)

Gerhard Wagner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 358

Targeting Apoptosis Regulation in Cancer (122742)

Anthony Letai

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 358

Targeting Apoptosis Regulation in Cancer (122742)

Anthony Letai

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 359

Molecular Mechanisms of Signal Transduction (144995)

Elaine Elion

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 359

Molecular Mechanisms of Signal Transduction (144995)

Elaine Elion

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 360

Regeneration of Cartilage and Skeletal Muscle (120048)

Andrew Lassar

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 360

Regeneration of Cartilage and Skeletal Muscle (120048)

Andrew Lassar

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 361

X-Ray Crystallographic Studies of Viruses and Proteins (137505)

James Hogle

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 361

X-Ray Crystallographic Studies of Viruses and Proteins (137505)

James Hogle

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 362

Eukaryotic Survival Decisions (114726)

David Fisher

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 362

Eukaryotic Survival Decisions (114726)

David Fisher

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 363

Normal cell division mechanisms and cell division defects in cancer (114763)

David Pellman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 363

Normal cell division mechanisms and cell division defects in cancer (114763)

David Pellman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 366

Stem Cells in Disease and Development (119609)

George Daley

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 366

Stem Cells in Disease and Development (119609)

George Daley

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 370

Advanced Topics in Biological Chemistry and Molecular Pharmacology (114232)

David Cardozo

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit.

Course Notes:

Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 370

Advanced Topics in Biological Chemistry and Molecular Pharmacology (114232)

David Cardozo

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 371

Maintenance of genome stability in S phase (115348)

Johannes Walter

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 371

Maintenance of genome stability in S phase (115348)

Johannes Walter

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 375

Biomolecular Nanotechnology (120627)

William Shih

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 375

Biomolecular Nanotechnology (120627)

William Shih

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 376

Mechanisms of Action of Antibiotics (121266)

Daniel Kahne

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 376

Mechanisms of Action of Antibiotics (121266)

Daniel Kahne

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 377

Quantitative Proteomics of Cancer Progression (121384)

Jarrold Marto

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 377

Quantitative Proteomics of Cancer Progression (121384)

Jarrold Marto

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 379

Biochemical and Molecular Regulation of Vascular Growth (121642)

Marsha Moses

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 379

Biochemical and Molecular Regulation of Vascular Growth (121642)

Marsha Moses

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 381

Functional Small Molecules for Biological Discovery (123001)

Nathanael Gray

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 381

Functional Small Molecules for Biological Discovery (123001)

Nathanael Gray

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 382

Mechanisms of RNAi in Stem Cells (123114)

Richard Gregory

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 382

Mechanisms of RNAi in Stem Cells (123114)

Richard Gregory

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 383

Integrated and Functional Genomic Studies of Human Cancer (125361)

Levi Garraway

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 383

Integrated and Functional Genomic Studies of Human Cancer (125361)

Levi Garraway

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 384

Embryonic stem cells, Nuclear Transfer, Cancer, Reprogramming (125402)

Konrad Hochedlinger

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 384

Embryonic stem cells, Nuclear Transfer, Cancer, Reprogramming (125402)

Konrad Hochedlinger

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 385

Control of Gene Expression in Tumorigenesis and Differentiation (128173)

Thomas Roberts

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 385

Control of Gene Expression in Tumorigenesis and Differentiation (128173)

Thomas Roberts

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 386

Kinase Signaling in Cancer (128175)

Jean Zhao

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 386

Kinase Signaling in Cancer (128175)

Jean Zhao

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 387

Single-molecule Biophysics and Force Spectroscopy (108354)

Wesley Wong

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

2018 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 113

CB201 is a graduate level course intended to teach critical concepts in cell biology, and expose students to current and quantitative approaches in cell biology research. Topics include the molecular basis of cellular dynamics, subcellular compartmentalization, protein trafficking, chromosome biology and epigenetics, regulated ubiquitin-proteasome pathways, cell cycle regulation, cytoskeleton and motor dynamics, signal transduction, cell-cell interactions, and programmed cell death.

Course Notes:

Methodological focus on current approaches in cell biology including quantitative tools. Emphasis on experimental design. Offered jointly with the Medical School as CB 713.0.

Recommended Prep:

Basic knowledge in biochemistry, genetics and cell biology.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Cell Biology 207

Vertebrate Developmental and Regenerative Biology (111215)

Andrew Lassar
John Flanagan
Jordan Kreidberg
Sean Megason
Jessica Whited
Olivier Pourquie
Yingzi Yang

2018 Spring (4 Credits)

Schedule:

MW 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

Analyzes the developmental programs of frog, chick, zebrafish, and mouse embryos, emphasizing experimental strategies for understanding the responsible molecular mechanisms that pattern the vertebrate embryo. Signaling pathways controlling morphogenesis, organogenesis, stem cells and regeneration will be discussed in detail.

Course Notes: Offered jointly with the Medical School as CB 710.0. Includes lectures and conference sessions in which original literature is discussed in depth. Short research proposals are required in lieu of exams.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Examines the molecular basis of cancer formation including topics such as cancer epigenetic, tumor heterogeneity, systems biology proteomic approaches to study cancer, immune therapies in cancer, and therapeutic development.

Course Notes: Given alternate years with Cell Biology 212. Offered jointly with the Medical School as CB 704.0.

Class Notes: Classes will be held in TMEC 447. Classes begin on January 24, 2018 through April 23, 2018

Recommended Prep: General knowledge of biochemistry, molecular genetics, and cell biology.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 226

Concepts in Development, Self-Renewal, and Repair (121707)

Iain Drummond

Amar Sahay

2017 Fall (4 Credits)

Schedule:

F 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Explores developmental mechanisms through the life cycle, contrasting pluripotency and cell fate restriction in embryos and adult tissues. In depth analysis of in vivo approaches, with emphasis on adult stem cells, tissue repair and self-renewal.

Course Notes:

Offered jointly with the Medical School as CB 721.0. For more information visit: <https://canvas.harvard.edu/courses/31779>

Class Notes:

Classes begin on September 1 2017 through December, 8 2017. First class will be held in TMEC L007, subsequent classes Simches MGH 3.120

Recommended Prep:

Upper division cell biology or equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 235

History and Philosophy of Experimentation in Biology (156733)

David Glass

2017 Fall (4 Credits)

Schedule:

T 0630 PM - 0829 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

We will trace the influence of particular philosophical arguments concerning science that have developed over the last 500 years ,with the evolution of Scientific Method in biology, showing how changes in philosophy wrought changes in methodology. The course will impart on students familiar or new to the study of philosophy a framework for thinking about philosophical arguments, as well as a foundation for exploring how today's scientific method relates to scientific research, medicine, and society's popular understanding of science. This might be of particular importance given current controversies relating to the reproducibility of many published findings.

Class Notes:

Classes start on September 6, 2017 through December 19 2017. Class Location is Boylston Hall 110.

Cell Biology 301QC

The Epidemiology and Molecular Pathology of Cancer (127478)

Massimo Loda

2018 Spring (2 Credits) **Schedule:** TWRF 0900 AM - 0459 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This January course will provide students with an in-depth introduction to the epidemiology and molecular pathology of cancer. We will explore multiple types of cancer, including breast, colon, lung, prostate and brain, through a series of lectures and hands-on practice tutorials. These tutorials will include training in molecular pathology techniques, state of the art image analysis of human biomarkers, tissue processing, immunohistochemistry, and tumor histology. In addition, the epidemiology, genetics and relevant signal transduction pathways of cancer will be highlighted.

Course Notes: This is an intensive January course. Curriculum Fellow: Ryan Lee, Ryan_Lee@hms.harvard.edu. The course runs from January 9, 2018

through January 19, 2018.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 304QC

Introduction to Human Gross Anatomy (127989)

Gerald Greenhouse

2018 Spring (2 Credits)

Schedule:

MWF 1200 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

24

Lectures, laboratory dissections, and prosections will provide students an opportunity to explore the gross structure and function of the human body. The course will provide a foundation for the student to acquire practical skills in recognizing, dissecting, and differentiating key anatomical structures. Structure/function relationships will be emphasized and some foundation will be provided for understanding the anatomic basis of diseases.

Each of the 13 sessions will include a lecture, 3 hours of dissection, and an evening guest lecturer on clinical or research aspects related to the dissections (supper provided).

Course Notes: Open to graduate and undergraduate students. Students must sign up during the Spring semester sign up period.

Class Notes: Class starts on June 1, 2018 through June 29, 2018

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Teaching 100: The Theory and Science of Teaching (107400)

*Johanna Gutlerner**Bradley Coleman*

2017 Fall (2 Credits)

Schedule: R 0200 PM - 0359 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 20

For many graduate students, teaching will be part of their career, whether as mentoring, formal classroom teaching, or outreach. In addition, the theory and research evidence accumulating in the disciplines of

cognitive psychology, neuroscience, and from STEM classrooms, has turned the question of, 'How do we best teach science?' into its own scientific discipline. The Theory and Science of Teaching focuses on understanding why certain teaching methods are effective by examining the scientific research and theoretical frameworks that support these methods. We will read and discuss foundational educational and cognitive psychology texts and primary literature, and then develop an annotated lesson plans that allows us to put these ideas into practice.

Course Notes: The course has been designed as a companion to Genetics 302qc: Teaching 101, but neither course is a prerequisite of the other.

Class Notes: Course meets September 21, 2017 through November 16, 2017.

This course will discuss the role of chromatin dynamics in modulating molecular and cellular processes. The genetic information encoded in our DNA is organized in a defined set of chromosomes, which are condensed about 10,000 fold in order to fit in the cell nucleus. This compaction occurs through packaging of the DNA around histone proteins, a structure known as chromatin. In what was thought to be a rigid structure, today we know that chromatin is an amazingly dynamic folding that plays a crucial role in controlling accessibility of factors to the DNA, and as such, it regulates a vast number of critical biological functions, including gene transcription, DNA replication, DNA repair and cellular identity. In this course we will attempt to cover some of the basic molecular mechanisms that play a role in regulating chromatin dynamics, and in turn how chromatin itself modulate biological processes, including basic mechanisms of inheritance. We will specifically discuss the role of DNA methylation, histone modifications, nucleosome dynamics and novel epigenetic modulators in the context of different biological processes for which chromatin accessibility appears to play a crucial role.

Course Notes:

The course consists of 12 sessions, 1.5 hr each session; 8 regular Sessions, 4 Discussion Sessions.

Histology—the study of structure and how structure relates to function, in cells and tissues. The class will include a session on each of the major tissue types—epithelium, connective, muscle, and nerve. This will be followed by sessions during which organ systems will be studied. Each session will include an introductory lecture followed by shared observation of slides using a 12-headed light microscope. Pathology correlates will be included when possible. Students learn frozen section technique on brain tissue from Stephen Liberles.

Course Notes:

This course is offered usually during the month of June or July each year. Undergraduates may enroll. Students must sign up during the

Spring semester sign up period.

This course covers multiple perspectives from early phase basic research all the way to defining therapeutic strategies, clinical trial design and business models for bringing effective compounds to the marketplace. This Course Begins in October, and highlights a different advanced topic each week that will illustrate how investigation of basic principles and phenomena in cell and molecular biology open important doorways to understanding of disease mechanisms. One primary research article and one review article will be assigned each week to prepare students for discussion. Dinner provided at each session.

In addition to mandatory weekly reading and discussion participation, one 6 page written assignment and oral presentation will be assigned to help students integrate the course material, improve communication skills, and identify novel experimental approaches: Write and present a proposal to launch a project with long-range therapeutic value for a neurodegenerative disorder.

Class Notes: Classes will be held in SGM 502

Signaling Pathways in Cancer Cell Biology (109148)

Alex Toker

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 319

Signaling Pathways in Cancer Cell Biology (109148)

Alex Toker

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 321

Neuronal Pathfinding and Synaptogenesis (114269)

David Van Vactor

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 321

Neuronal Pathfinding and Synaptogenesis (114269)

David Van Vactor

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 323L

Cellular lipid metabolism (203781)

Robert Farese

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 323L

Cellular lipid metabolism (203781)

Robert Farese

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 325

Molecular and Cellular Regulators of Cancer Progression (127374)

Sandra McAllister

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 325

Molecular and Cellular Regulators of Cancer Progression (127374)

Sandra McAllister

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 326

Signal Transduction During Early Development (111066)

Malcolm Whitman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 326

Signal Transduction During Early Development (111066)

Malcolm Whitman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 328

Single-Molecule Biology and Visualization of Cellular Dynamics (139184)

Tomas Kirchhausen

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 328

Single-Molecule Biology and Visualization of Cellular Dynamics (139184)

Tomas Kirchhausen

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 329

The Ubiquitin-Proteasome Pathway (119495)

Daniel Finley

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 329

The Ubiquitin-Proteasome Pathway (119495)

Daniel Finley

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 330L

Lipid and Membrane Homeostasis (203804)

Tobias Walther

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 330L

Lipid and Membrane Homeostasis (203804)

Tobias Walther

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 332

Mass Spectrometry and Proteomics (115968)

Steven Gygi

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 332

Mass Spectrometry and Proteomics (115968)

Steven Gygi

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 333

Electron Microscopic Structure Determination (114751)

Thomas Walz

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 333

Electron Microscopic Structure Determination (114751)

Thomas Walz

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 334L

Adipocyte development and energy metabolism (203841)

Yu-Hua Tseng

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 334L

Adipocyte development and energy metabolism (203841)

Yu-Hua Tseng

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 336

Signal Transduction in Normal and Transformed Cells (119551)

Joan Brugge

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 336

Signal Transduction in Normal and Transformed Cells (119551)

Joan Brugge

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 339

Cell Morphogenesis and Regulation (113489)

Marc Kirschner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 339

Cell Morphogenesis and Regulation (113489)

Marc Kirschner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 343

Mechanisms of Mammalian Cell Differentiation and Gene Expression (111198)

Bruce Spiegelman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 343

Mechanisms of Mammalian Cell Differentiation and Gene Expression (111198)

Bruce Spiegelman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 344

Molecular Mechanism of Signal Transduction (117770)

Xi He

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 344

Molecular Mechanism of Signal Transduction (117770)

Xi He

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 345

Protein Transport Across the Endoplasmic Reticulum Membrane (119350)

Tom Rapoport

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 345

Protein Transport Across the Endoplasmic Reticulum Membrane (119350)

Tom Rapoport

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 348

Transcriptional Regulation and Epigenetics in Breast and Prostate Cancer (110253)

Myles Brown

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 348

Transcriptional Regulation and Epigenetics in Breast and Prostate Cancer (110253)

Myles Brown

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 349

Gene Silencing and Chromosome Structure (124315)

Danesh Moazed

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 349

Gene Silencing and Chromosome Structure (124315)

Danesh Moazed

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 353L

Regulated protein degradation (203806)

John Hanna

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 353L

Regulated protein degradation (203806)

John Hanna

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 354

Basic and Applied Mechanisms of Intracellular Transport (112504)

Victor Hsu

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 354

Basic and Applied Mechanisms of Intracellular Transport (112504)

Victor Hsu

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 358

Mechanisms of Tumor Metastasis (143098)

Bruce Zetter

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 358

Mechanisms of Tumor Metastasis (143098)

Bruce Zetter

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 359

Intracellular Signaling Pathways in the Regulation of Cell Growth and Differentiation (110416)

David Frank

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 359

Intracellular Signaling Pathways in the Regulation of Cell Growth and Differentiation (110416)

David Frank

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 360

Genetic Control of Apoptosis in Drosophila (115969)

Kristin White

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 360

Genetic Control of Apoptosis in Drosophila (115969)

Kristin White

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 365

Mechanism and Biology of Ubiquitin-like Protein Conjugation Cascades (128171)

Wade Harper

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 365

Mechanism and Biology of Ubiquitin-like Protein Conjugation Cascades (128171)

Wade Harper

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 366

Mitochondria in Aging and Metabolism (128172)

Marcia Haigis

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 366

Mitochondria in Aging and Metabolism (128172)

Marcia Haigis

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 369L

Protein structure by high-resolution electron microscopy (203788)

Maofu Liao

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 369L

Protein structure by high-resolution electron microscopy (203788)

Maofu Liao

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 370

Mitotic Kinases, Chromatin and Chromosome Segregation (122739)

Jonathan Higgins

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 370

Mitotic Kinases, Chromatin and Chromosome Segregation (122739)

Jonathan Higgins

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 371

Nutrient Sensing and Metabolic Control (122998)

Pere Burguera

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 371

Nutrient Sensing and Metabolic Control (122998)

Pere Burguera

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 372

Cytoskeletal Dynamics (115000)

Timothy Mitchison

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 372

Cytoskeletal Dynamics (115000)

Timothy Mitchison

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 373

Molecular Genetics of Cell Interaction in Development (112515)

Spyros Artavanis-Tsakonas

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 373

Molecular Genetics of Cell Interaction in Development (112515)

Spyros Artavanis-Tsakonas

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 373L

Regulation of protein biosynthesis and quality control (204037)

Sichen Shao

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 373L

Regulation of protein biosynthesis and quality control (204037)

Sichen Shao

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 375

Cancer Genetics and DNA (127583)

David Weinstock

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 375

Cancer Genetics and DNA (127583)

David Weinstock

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 376

Chemical Approaches to Cell Division and Cancer (115970)

Randall King

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 376

Chemical Approaches to Cell Division and Cancer (115970)

Randall King

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 376L

Cell polarity, organoids, cancer biology and therapeutics (204028)

Senthil Muthuswamy

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 376L

Cell polarity, organoids, cancer biology and therapeutics (204028)

Senthil Muthuswamy

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 377

Islet cell signaling mechanisms, Stem cells, iPS Cells in diabetes (120176)

Rohit Kulkarni

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 377

Islet cell signaling mechanisms, Stem cells, iPS Cells in diabetes (120176)

Rohit Kulkarni

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 378

Bacterial Toxin Entry and Immunoglobulin Transport in Mucosal Epithelial Cells (120177)

Wayne Lencer

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 378

Bacterial Toxin Entry and Immunoglobulin Transport in Mucosal Epithelial Cells (120177)

Wayne Lencer

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 379

BMP Signaling in Organogenesis (120178)

Vicki Rosen

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 379

BMP Signaling in Organogenesis (120178)

Vicki Rosen

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 380

Cytoskeletal Mechanics of Blood Platelet Production (121645)

Joseph Italiano

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 380

Cytoskeletal Mechanics of Blood Platelet Production (121645)

Joseph Italiano

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 383

Internal and External Sensory Systems (125265)

Stephen Liberles

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 383

Internal and External Sensory Systems (125265)

Stephen Liberles

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 385

Epigenetic Mechanisms and Genomic Integrity (109085)

Mo Motamedi

2018 Spring (4 Credits)

Subject: Genetics

Genetics 201

Principles of Genetics (113752)

Fred Winston

Maxwell Heiman

Thomas Bernhardt

Mitzi Kuroda

Steven McCarroll

Jenna Galloway

2017 Fall (4 Credits)

Schedule: MWF 0900 AM - 1020 AM

Instructor Permissions: None

Enrollment Cap: n/a

An in-depth survey of genetics, beginning with basic principles and extending to modern approaches and special topics. We will draw on examples from various systems, including bacteria, yeast, *Drosophila*, *C. elegans*, zebrafish, mouse and human.

Course Notes: Intended for first-year graduate students. Offered jointly with the Medical School as GN 701.0.

Class Notes: Classes begin August 30, 2017 through December 7, 2017

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 202

Human Genetics (125413)

Matthew Warman

Rachel Wright

2018 Spring (4 Credits)

Schedule:

MTWRF 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course examines genetic principles and experimental approaches for addressing fundamental questions about human variation, history, health, and disease. Each session is comprised of a lecture and a class discussion. Each lecture introduces a new topic while the class discussion addresses the previous week's lecture topic and solidifies knowledge about that topic through the critical reading and analysis of research and review articles. Class discussions utilize different types of source materials that are recommended by each lecturer. These materials will typically include a review article and a current article in that field. Additionally, two problem sets will be assigned over the course of the semester. These assignments will give students the opportunity to apply the concepts from the lecture and class discussion and get experience using tools critical to the study of human genetics. The knowledge and practical skills gained from this course will be applicable for many other lines of scientific inquiry.

Recommended Prep: Genetics 201 (or permission of the instructor) and basic knowledge of probability and statistics. Familiarity with bioinformatics and computational tools will be useful, but tutorial assistance will be provided where necessary.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Genetics 216

Advanced Topics in Gene Expression (111358)

Fred Winston

Robert Kingston

Stephen Buratowski

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This course covers different topics in gene regulation, covering genetic, genomic, biochemical, and molecular approaches. A small number of topics are discussed in depth, using the primary literature. Topics range from prokaryotic transcription to eukaryotic development.

Course Notes: BCMP 310QC has merged with Genetics 216. Offered jointly with the Medical School as GN 703.0.

Recommended Prep: BCMP 200 and Genetics 201. All students taking Genetics 216 should read and be prepared to discuss the papers for the first meeting on January 23. The readings can be downloaded from the course web site.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Genetics 228

Genetics in Medicine - From Bench to Bedside (121745)

David Sweetser

2018 Spring (4 Credits)

Schedule:

F 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Focus on translational medicine: the application of basic genetic discoveries to human disease. Each three-hour class will focus on a specific genetic disorder and the approaches currently used to speed the transfer of knowledge from the laboratory to the clinic. Each class will include a clinical discussion, a patient presentation if appropriate, followed by lectures, a detailed discussion of recent laboratory findings and a student led journal club. Lecturers will highlight current molecular, technological, bioinformatic and statistical approaches that are being used to advance the study of human disease. There is no exam. Students will present one paper per session in a journal club style. Attendance and active participation for the duration of all class meetings is required. If you are unable to attend class, or cannot be present for the entire session you are expected to contact the course instructor. Two incomplete or missed sessions will result in a failing grade.

Course Notes:

Course will be held at MGH (transportation provided to MGH). Offered jointly with the Medical School as GN 711.0. For more information visit <http://www2.massgeneral.org/bbs/gen228/gen228.htm>

Recommended Prep:

Genetics 201 or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 229

Computational Statistics for Biomedical Sciences (127525)

2017 Fall (4 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap:

60

Analysis of large datasets has become an integral part of biological and biomedical sciences. This course will provide a practical introduction to data analysis, with high-throughput sequencing data as the main source of examples. In the first half, it will cover basic statistical concepts and techniques, including hypothesis testing, nonparametric methods, principal component analysis, correlation analysis, and linear regression. In the second half, it will cover several advanced topics, focusing on issues that one encounters in the literature but are seldom covered in introductory statistics courses. To carry out statistical tests and visualize data, students will learn R, a powerful programming language for statistical computing and graphics. The class will be a combination of lectures and computer labs. We will use recent literature to motivate the statistical methods, and assignments will frequently include attempts to reproduce published findings.

Course Notes:

Offered jointly with Medical School as BMI713.0. Please contact Katherine Flannery at Katherine_Flannery@hms.harvard.edu for any inquiries about the course.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

Current Tools for Gene Analysis (156915)

Neena Haider

Rachel Wright

2018 Spring (2 Credits)

Schedule: R 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 18

The goal of this course is to explore a number of the current online tools to analyze genes, gene function, pathways, DNA, RNA, and protein analysis. Each class we will introduce a new online tool. The majority of the class will be spent exploring the tool together in an interactive manner. At the end of each class students will be given an assignment which utilizes the knowledge they gained in class and helps them to further explore the new tool. After taking this class students will be proficient in the use of each online tool and will be able to apply their knowledge to learning new tools and programs.

Course Notes: Students will need to bring a laptop to class each day.

Class Notes: Class start February 1, 2018 through April 12, 2018

Recommended Prep: Genetics 201 or with permission from the instructor.

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 323

Molecular Biology of V(D)J Recombination (143860)

Marjorie Oettinger

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 325

Human Genetics, Genomics and Complex Traits (117273)

Joel Hirschhorn

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 325

Human Genetics, Genomics and Complex Traits (117273)

Joel Hirschhorn

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 326

Human Molecular and Cancer Genetics (114753)

David Kwiatkowski

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 326

Human Molecular and Cancer Genetics (114753)

David Kwiatkowski

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 327

Systems Biology of Mammalian Cell Fate Decisions (126370)

Suzanne Gaudet

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 327

Systems Biology of Mammalian Cell Fate Decisions (126370)

Suzanne Gaudet

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 328

Lymphocyte Differentiation, Recombination, DNA Repair, Cancer (111897)

Frederick Alt

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 328

Lymphocyte Differentiation, Recombination, DNA Repair, Cancer (111897)

Frederick Alt

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 329

Genetic Analysis of Synaptic Transmission (117637)

Joshua Kaplan

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 329

Genetic Analysis of Synaptic Transmission (117637)

Joshua Kaplan

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 331

Developmental Oncobiology and Cancer Stem Cells (126371)

Zhe Li

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 331

Developmental Oncobiology and Cancer Stem Cells (126371)

Zhe Li

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 332

Combining genetic and biochemical approaches to elucidate mechanisms underlying cancer (115971)

Karen Cichowski

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 332

Combining genetic and biochemical approaches to elucidate mechanisms underlying cancer (115971)

Karen Cichowski

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 333

Computational biology of transcriptional and epigenetic regulation (109352)

Xiaole (Shirley) Liu

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 333

Computational biology of transcriptional and epigenetic regulation (109352)

Xiaole (Shirley) Liu

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 334

Genomics and the Genetics of Human Disease (117271)

Raju Kucherlapati

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 334

Genomics and the Genetics of Human Disease (117271)

Raju Kucherlapati

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 335

Genetics, epigenetics, gene regulation, evolution, disease (114764)

Chao-ting Wu

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 335

Genetics, epigenetics, gene regulation, evolution, disease (114764)

Chao-ting Wu

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 336

Developmental Biology of Hematopoiesis (120540)

Leonard Zon

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 336

Developmental Biology of Hematopoiesis (120540)

Leonard Zon

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 337

Human Molecular Genetics (120637)

Stuart Orkin

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 337

Human Molecular Genetics (120637)

Stuart Orkin

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 338

Epigenetic inheritance and small regulatory RNAs (159949)

Scott Kennedy

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 338

Epigenetic inheritance and small regulatory RNAs (159949)

Scott Kennedy

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 339

Mechanisms of Heritable Epigenetics (160777)

Eric Greer

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 339

Mechanisms of Heritable Epigenetics (160777)

Eric Greer

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 340L

Mechanisms of microtubule organization (203801)

Radhika Subramanian

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 340L

Mechanisms of microtubule organization (203801)

Radhika Subramanian

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 341

Development and Homeostasis of the Skeleton (124135)

Matthew Warman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 341

Development and Homeostasis of the Skeleton (124135)

Matthew Warman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 342

Genetic Analysis of Zebrafish Kidney Organogenesis (124201)

Iain Drummond

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 342

Genetic Analysis of Zebrafish Kidney Organogenesis (124201)

Iain Drummond

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 343

Zebrafish Cardiovascular Development and Regeneration (110244)

Charles Burns

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 343

Zebrafish Cardiovascular Development and Regeneration (110244)

Charles Burns

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 344

Computational Genomics (124202)

Peter Park

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 344

Computational Genomics (124202)

Peter Park

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 345

Computational Biology of Cancer (160951)

Franziska Michor

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 345

Computational Biology of Cancer (160951)

Franziska Michor

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 347

Ras signaling and colon cancer (107886)

Kevin Haigis

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 347

Ras signaling and colon cancer (107886)

Kevin Haigis

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 348

The Regenerative Biology of Tendons and Ligaments (156719)

Jenna Galloway

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 348

The Regenerative Biology of Tendons and Ligaments (156719)

Jenna Galloway

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 350

Genetic Regulation of Organogenesis and Organ Regeneration (114732)

Richard Maas

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 350

Genetic Regulation of Organogenesis and Organ Regeneration (114732)

Richard Maas

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 351L

Musculo-skeletal development (203793)

Olivier Pourquie

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 351L

Musculo-skeletal development (203793)

Olivier Pourquie

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 352

Cardiovascular Development and Disease, Muscle Biology (127376)

Da-Zhi Wang

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 352

Cardiovascular Development and Disease, Muscle Biology (127376)

Da-Zhi Wang

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 353

Genetics of Human Disease (122745)

Susan Slaughaupt

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 353

Genetics of Human Disease (122745)

Susan Slaughaupt

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 355

Molecular Genetics of Human Neuromuscular Diseases (126288)

Alan Beggs

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 355

Molecular Genetics of Human Neuromuscular Diseases (126288)

Alan Beggs

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 356

Research in Molecular Cytogenetics (107887)

Cynthia Morton

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 356

Research in Molecular Cytogenetics (107887)

Cynthia Morton

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 357

Lung Stem Cell Biology and Cancer (123104)

Carla Kim

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 357

Lung Stem Cell Biology and Cancer (123104)

Carla Kim

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 358

Developmental Neurobiology and Genetics (123342)

Susan Dymecki

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 358

Developmental Neurobiology and Genetics (123342)

Susan Dymecki

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 359

Cancer and development, intestinal development/differentiation (117740)

Ramesh Shivdasani

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 359

Cancer and development, intestinal development/differentiation (117740)

Ramesh Shivdasani

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 360

Microtubule Associated RNAs During Mitosis (123002)

Michael Demian Blower

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 360

Microtubule Associated RNAs During Mitosis (123002)

Michael Demian Blower

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 361

Epigenetic regulation by long noncoding RNAs (125583)

Jeannie Lee

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 361

Epigenetic regulation by long noncoding RNAs (125583)

Jeannie Lee

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 362

Molecular Biology and Genetics of Cancer (126670)

David Livingston

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 362

Molecular Biology and Genetics of Cancer (126670)

David Livingston

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 366

Molecular Genetic Approaches to Human Disease Mechanisms (110421)

Marcy MacDonald

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 366

Molecular Genetic Approaches to Human Disease Mechanisms (110421)

Marcy MacDonald

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 368

Molecular Genetics of Aging and Neurodegenerative Disorders (128166)

Bruce Yankner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 368

Molecular Genetics of Aging and Neurodegenerative Disorders (128166)

Bruce Yankner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 369

Molecular Mechanisms of Plant Signal Transduction (115351)

Jen Sheen

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 369

Molecular Mechanisms of Plant Signal Transduction (115351)

Jen Sheen

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 370

Molecular Basis of Breast Cancer Initiation and Progression (115356)

Kornelia Polyak

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 370

Molecular Basis of Breast Cancer Initiation and Progression (115356)

Kornelia Polyak

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 371

Functional Genomics and Proteomics (115465)

Marc Vidal

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 371

Functional Genomics and Proteomics (115465)

Marc Vidal

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 390QC

Advanced Experimental Methods: Experimental Approaches in Genetic Analysis (125362)

Fred Winston

2018 Spring (2 Credits)

Schedule: MTWRF 0830 AM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 8

A survey of major themes in genetics combined with exposure to various experimental techniques, technologies, and model systems. Combines lectures and hands-on laboratory activities emphasizing experimental methods, hypothesis generation and testing, and data analysis.

Course Notes: This is an intensive January course. Priority will be given to first year graduate students. Students must first contact the faculty for enrollment approval prior to registration for the course. Meeting Dates/Times: Approximately 8:30 am-5:00 pm each day for 8days.

Class Notes: January 3, 2017 to Jan 13, 2017

Recommended Prep: Students must also enroll in, or have taken, Genetics 201.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Subject: Virology

Virology 200

Introduction to Virology (116413)

Max Nibert

David Knipe

Priscilla Yang

Benjamin Gewurz

Philip Kranzusch

Margaret McLauglin-Drubin

2017 Fall (4 Credits)

Schedule: W 0145 PM - 0344 PM
M 0145 PM - 0314 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Introduction to virology. The lecture component reviews the basic principles of virology and introduces the major groups of human viruses. Weekly discussion groups critically analyze selected papers from the literature. Weekly written critiques of the selected papers are also required.

Course Notes: There will be mid-term and final projects consisting of proposals based on laboratory rotations. Offered jointly with the [courses.fas.harvard.edu/6075](http://www.courses.fas.harvard.edu/6075) Medical School as MG 705.0.

Class Notes: Classes begin on August 30, 2017 through December 7, 2017. Classes will be held in Room 447, TMEC

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Virology 201

Virology (110546)

Benjamin Gewurz

James Cunningham

2018 Spring (4 Credits)

Schedule: MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

The course focuses on the following areas of virology: (i) epigenetic regulation, (ii) RNA virus replication mechanisms, (iii) innate responses to viral infection, (iv) inhibition of viral infection. The course will comprise lectures as well as reviewing literature that describes fundamental breakthroughs relevant to these areas. Within those areas, the class will read and discuss papers dealing with virus structure, replication, pathogenesis, evolution, emerging viruses, chronic infection, innate and adaptive immunity, anti-viral drugs/vaccines. Special emphasis will be placed on preparing students to critically evaluate the literature, formulate hypotheses and design experiments.

Course Notes: Course format will be lectures, literature-based critical reading and discussion. Prepare and defend a written research proposal. Offered jointly with the Medical School as MG 723.0.

Recommended Prep: Graduate standing and permission required.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Virology 202

Proposal Writing (117649)

Margaret McLaughlin-Drubin

James DeCaprio

Daniel Lingwood

Sylvie Le Gall
Benjamin Gewurz
Sean P.J. Whelan

2017 Fall (4 Credits)

Schedule:

W 0145 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Students will write, present, and evaluate research proposals in the areas of virus replication, viral pathogenesis and treatment and prevention of viral infections.

Course Notes: Offered jointly with the Medical School as MG 724.0.

Class Notes: Classes begin on September 6, 2016 and ends on November 8, 2016.

Recommended Prep: General background in biochemistry and virology.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Virology 306QC

Viruses of Bacteria and Archaea: Updates on Recent Key Literature (204372)

Max Nibert

2018 Spring (2 Credits)

Schedule: TR 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap: 8

In this course, we will expand our view, commonly focused on viruses of humans and sometimes other vertebrates, to viruses of bacteria and archaea. Emphasis will be placed on exciting new findings in the recent literature. Active student participation will be expected and essential for the success of this readings and discussions based course, which is intended for students with previous advanced background in virology

Course Notes: This course will be offered in spring term of old-numbered years, starting 2017. It will be replaced in spring term of even-numbered years by Virology 302QC, Viruses of Nonvertebrate Eukaryotic Hosts

Class Notes: Contact the course director for course room location. Class starts on March 21, 2017 through May 25, 2017

Pre-requisite: Virology 200, or equivalent approved by course director

Additional Course Attributes:

Subject: Speech & Hearing Sciences

Speech & Hearing Sciences 200

Acoustics, Production and Perception of Speech (108212)

Satrajit Ghosh

Hideko Nakajima

John Rosowski

2017 Fall (4 Credits)

Schedule: W 0100 PM - 0159 PM
TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

Reviews the physical processes involved in the production and propagation of sound, and acoustics related to hearing. Particular attention to how the acoustics and mechanics of the speech and auditory system define what sounds we are capable of producing and how we sense sound. Introduces acoustic theory of speech production, digital speech processing, and neural mechanisms of speech production and perception. Exposes students to applications around acoustics, recognition, and speech disorders. Also introduces analysis of various types of sounds. Includes take-home laboratory assignments and discussions of classic papers.

Course Notes: This course is taught in consort with HST.714J at the Massachusetts Institute of Technology. Classes will be held at MIT.

Recommended Prep: Mathematical methods in science (Applied Mathematics 21a or Mathematics 21a) or equivalent. Rigid body mechanics (Physics 11A), or electrical circuits (Engineering Science 154) or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Speech & Hearing Sciences 201

Biology of the Inner Ear (108213)

M. Liberman

Stephane Maison

2017 Fall (4 Credits)

Schedule:

TR 0900 AM - 1029 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Normal biology, biophysics, physiology and morphology of the inner ear, its sensory innervation and efferent control systems, and the mechanisms underlying sensorineural hearing loss and balance disorders. Material is presented through lectures, laboratory exercises and discussions of the primary literature.

Class Notes:

Class begins on August 31, 2017 through December 13, 2017.

Recommended Prep:

Introductory neurobiology recommended.

Lecture notes will be available online.

Classes will be held in Mass. Eye and Ear Infirmary - EPL Library(4th Floor)

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	None

Speech & Hearing Sciences 202

Clinical Aspects of Speech and Hearing (108217)

Konstantina Stankovic

2018 Spring (4 Credits)

Schedule:

MW 0500 PM - 0659 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Clinical approach to speech and hearing disorders as practiced by physicians, audiologists, speech clinicians, rehabilitation specialists, bioengineers. Includes observation of patient care in clinic and operating room, audiology/balance disorders experience, lectures and discussion groups.

Course Notes:

Offered jointly with HST 724 at MIT. Classes to be held at the Massachusetts Eye and Ear Infirmary (MEEI)

Recommended Prep:

Anatomy of Speech and Hearing, Acoustics of Speech and Hearing or permission of the course director

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Speech & Hearing Sciences 203

Anatomy of Speech and Hearing (108218)

Barbara Fullerton

James Heaton

James Kobler

2018 Spring (4 Credits)

Schedule:

MTWRF 1030 AM - 1129 AM

MTWRF 0930 AM - 0129 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course covers anatomy of the head and neck, with cadaver dissection, stressing structures important in speech and hearing. Lecture topics also include basic neuroanatomy, imaging, surgery, and cancer of head and neck.

Course Notes: This an intensive January Course. Offered jointly with MIT as HST 718. Classes to be held at the Harvard Medical School campus (HMS)

Class Notes: January Session; dates: January 3-26, 2017

Recommended Prep: Introductory biology or equivalent and director permission, if not SHBT student.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Speech & Hearing Sciences 205

Audition: Neural Mechanisms, Perception and Cognition (108224)

Daniel Polley

Bertrand Delgutte

M. Brown

Joshua McDermott

2018 Spring (4 Credits)

Schedule:

MWF 0930 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: 20

Neural structures and mechanisms mediating the detection, localization and recognition of sounds. General principles are conveyed by theme discussions of auditory masking, sound localization, musical pitch, cochlear implants, cortical plasticity and auditory scene analysis.

Course Notes: Offered jointly with MIT HST.723J.

Recommended Prep: **Neurobiology 200 or permission of the instructor.**

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Speech & Hearing Sciences 300

Auditory neural coding laboratory (109006)

Bertrand Delgutte

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Research projects on the neural coding of sound and the neural basis of auditory perception, with emphasis on the mechanisms for listening in adverse environments comprising reverberation and competing sound sources.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Speech & Hearing Sciences 300

Auditory neural coding laboratory (109006)

Bertrand Delgutte

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Research projects on the neural coding of sound and the neural basis of auditory perception, with emphasis on the mechanisms for listening in adverse environments comprising reverberation and competing sound sources.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Speech & Hearing Sciences 301

Acoustics and Mechanics of the Middle Ear, with a Dual Emphasis on Comparative Phys (109007)

John Rosowski

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Investigates the acoustics and mechanics of the middle ear, with a dual emphasis on comparative phys.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Speech & Hearing Sciences 301

Acoustics and Mechanics of the Middle Ear, with a Dual Emphasis on Comparative Phys (109007)

John Rosowski

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Investigates the acoustics and mechanics of the middle ear, with a dual emphasis on comparative phys.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Speech & Hearing Sciences 301QC

Speech and Hearing Laboratory Visits (109015)

Bertrand Delgutte

2017 Fall (2 Credits)

Schedule: W -

Instructor Permissions: None

Enrollment Cap: n/a

Research on topics in theoretical, experimental, clinical, or translational aspects of Speech and Hearing Sciences arranged on an individual basis with a research supervisor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Speech & Hearing Sciences 302

The Mechanics and Physiology of the Peripheral Auditory System, with an Emphasis on Mechanisms of co (109008)

Christopher Shera

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Speech & Hearing Sciences 302

The Mechanics and Physiology of the Peripheral Auditory System, with an Emphasis on Mechanisms of co (109008)

Christopher Shera

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Speech & Hearing Sciences 303

Sensory Coding and Feedback Control, in the Mammalian Cochlea; Mechanisms of Sensorineural Hearing (109009)

M. Liberman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Speech & Hearing Sciences 303

Sensory Coding and Feedback Control, in the Mammalian Cochlea; Mechanisms of Sensorineural Hearing (109009)

M. Liberman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

2017 Fall (4 Credits)

Schedule:

TR 0300 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Students participate in intensive small group discussions focused on the critical analysis of basic research papers from a wide range of fields including biochemistry, cell and developmental biology, genetics, and microbiology. Papers are discussed in terms of their background, significance, hypothesis, experimental methods, data quality, and interpretation of results. Students will be asked to propose future research directions, to generate new hypotheses and to design experiments aimed at testing them. For the midterm exam, the students will have to submit written critiques of recent papers from the literature, with an emphasis on proposing new experimental directions to test the models proposed in the papers.

Course Notes:

This course is required for first year BBS students, and is open only to BBS students.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biological & Biomedical Sci 301

Embedded Teaching Practicum (for Graduate Teaching Assistants) (127207)

Ronald Heustis
Madhvi Venkatesh

2017 Fall (4 Credits)

Schedule:

MWF 1245 PM - 0229 PM
T 0600 PM - 0759 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

The Embedded Teaching Practicum aims to enhance the teaching experience for TAs and the learning experience for enrollees in the core BBS courses. While TAs serve different functions and experience teaching from different perspectives in each of our core courses, they collectively serve a vital role in helping with the delivery a contemporary, high quality and accessible education to HMS graduate students. The embedded teaching practicum provides practice-based training in facilitating a group discussion; professionalism in the classroom; curriculum design, course evaluation, assessment development and DBER; and preparation for teaching throughout and beyond time in graduate school. Teaching assistants are provided training and experience in the development of an early-career teaching philosophy.

Course Notes: TAs should contact Jason Heustis (Ronald_Heustis@hms.harvard.edu).

Class Notes: Course runs from August 30, 2017 through December 13, 2017. Students will be contacted directly with room.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biological & Biomedical Sci 330

Critical Thinking and Research Proposal Writing (156089)

Rosalyn Adam

Matthew Harris

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A small group tutorial systematically guiding students in the writing of original, hypothesis-driven research proposals from initial topic selection through completion of a final draft.

Course Notes: This course is required for second year BBS students; others need permission of the instructor. Dates, times, and locations for all sessions (except for Session 1) will be determined by the faculty running the tutorial sessions. Students will be able to sign up for their specific groups on a first-come, first-served basis. The BBS office will coordinate this process. Group assignments will be posted on the course website.

Class Notes: First class will be held in NRB 350 on Thursday September 7. Please contact the instructor for meeting times.

Recommended Prep: Check course website for downloadable material <https://canvas.harvard.edu/courses/27345>

Experimental Approaches to Developmental Biology (122586)

David Van Vactor

Ya-chieh Hsu

2018 Spring (2 Credits)

Schedule: MTWRFS 1000 AM - 0959 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This laboratory course is designed to provide a survey of major topics and contemporary research in developmental and regenerative biology. Students will rotate in the laboratories of DRB faculty across the Harvard campuses and affiliated hospitals. Students engage with faculty and gain hands on experience in a variety of model systems, experimental techniques and research areas. Each day of the course will consist of a lecture followed by hands-on laboratory activities and interactive discussions.

Course Notes: This is an intensive January course. Open to first-year and second-year BBS students; Not repeatable for credit.

Class Notes: Dates: January 4, 2016 to January 19, 2016

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Medieval Studies

Subject: Medieval Studies

Medieval Studies 107

Authority and Invention: Medieval Art and Architecture (118135)

Christine Smith

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Masterworks of art and architecture in Western Europe from the decline of Rome to the dawn of the Italian Renaissance. Explores the creative tension between the impulse to originality and the authority of classical models in the search for new art forms. Emphasis on representative works considered in their totality (architecture, painting, sculpture, and minor arts) as experiential wholes; and on the plurality of geographical and cultural contexts (Italy, Germany, France, and Spain).

Course Notes:

Offered jointly with the Graduate School of Design as 4358. Meets at the Graduate School of Design, Gund Hall. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Study of the Past

Medieval Studies 111

Sex, Love, and Marriage in the Middle Ages (205890)

Sean Gilsdorf

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This class explores the relationships of passion, love, and obligation that bound men and women over the course of nearly two millennia, from Rome in the first century B.C.E. to sixteenth-century Italy. In particular, it focuses on how those relationships were organized legally and institutionally, on the social roles created by such relationships, and on the connection (or lack thereof) between marriage, love, and sexual passion. Although marriage in the West long was viewed as an exclusively heterosexual estate, the course also considers how homosocial and homosexual desires have affected it throughout history.

Additional Course Attributes:

Medieval Studies 117

English Legal History, 600-1600 (142694)

Elizabeth Kamali

2018 Spring (4 Credits)

Schedule:

RF 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the legal and constitutional history of England from the Anglo Saxons to the end of the Tudor period, essentially 600 – 1600, including the development of private (e.g., contract, torts, property) and public law (e.g., criminal and constitutional law). No previous background in English legal history is assumed.

Course Notes: Offered concurrently at the Law School as Law 42200A-1.

Additional Course Attributes:

Attribute	Value(s)

FAS Divisional Distribution	Social Sciences
All: Cross Reg Availability	Available for Harvard Cross Registration

Medieval Studies 119

Constitutional and Legal History of Medieval Continental Europe (147748)

Charles Donahue

2018 Spring (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A survey of continental European constitutional and legal history from the fall of the Roman Empire to the "Rise of absolutism" at the beginning of the seventeenth century. Focuses on the main expressions of European legal culture over this long period of time. In each period an effort is made to relate the types of law produced to social, political, and religious history.

Course Notes: Offered concurrently, but with a separate section, at the Law School as Law 42100A-1.

Medieval Studies 210A

Introduction to Medieval Paleography: Seminar (126850)

Sean Gilsdorf

2017 Fall (2 Credits)

Schedule:

T 0430 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap: n/a

This bi-weekly workshop will train participants to read medieval handwriting from a variety of text-types, regions, and periods, and to recognize and decipher the abbreviations commonly used by medieval scribes. While the workshop's focus will be on Latin paleography, some vernacular texts will be examined as well. Students will be required to transcribe from manuscript samples in facsimile, as well as original documents in Harvard's Houghton Library, throughout each semester. Successful completion of both units of this workshop fulfills the Medieval Studies graduate secondary field requirement in paleography.

Course Notes: This is part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

Creativity Research: Madmen, Geniuses, and Harvard Students (128215)

Shelley Carson

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Examines human creativity from three perspectives: a) empirical research sources, b) case studies of eminent creative achievers, and c) ourselves as creative subjects. Topics include the definition and measurement of creativity, the creative process, the neuroscience of creativity, the creative personality, the role of family life and culture in creativity, the relationship of creativity to IQ, gender differences, and the relationship of creativity to psychopathology. This is a junior tutorial.

Class Notes:

Preference to juniors in MBB tracks or MBB secondary field.

Mind, Brain & Behavior 980H

What Disease Teaches about Cognition (109866)

Michael Alexander

William Milberg

2018 Spring (4 Credits)

Schedule:

T 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Seeks to reconcile the complicated and messy problems of patients with brain disease with the concise analysis of precisely defined cognitive functions in normal subjects. Students will learn to overlap cognitive functions on to the brain in disease - at the gross dissection and imaging levels - and to understand some of the complex interactions of individual cognitive operations in disease. Includes dissection of a human brain, mapping on to imaging, dissection of multi-dimensional clinical disorders into their component functional parts.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Social Sciences
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students

Mind, Brain & Behavior 980L

Dopamine (160758)

Barak Caine

2017 Fall (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

A Parkinson's victim regains control of her body with l-dopa. A schizophrenic man paralyzed by fear and hallucinations is freed from a mental institution by clozapine. A meth addict lies, cheats, and steals,

ending up emaciated and dead. Miracles and monstrosities, all related to a single molecule - dopamine. The overall goal of this tutorial is to focus on a single subject, a single chemical neurotransmitter, and remaining on that topic to proceed through three phases of study, as follows. First, to orient students to tools from multiple traditional disciplines: synaptic mechanisms of neurotransmission, neuropharmacology, behavioral pharmacology, neuroanatomy, and psychiatry. Second, to elicit interest and curiosity through examples of specific and important disease states: Parkinson's Disease, Schizophrenia, and Drug Addiction. Third, to gain an historical perspective up to and including a current and sophisticated consensus (i.e., review articles of recent years). Socratic debate will be prioritized in the classroom. The main discipline presented in this course is pharmacology, specifically, in vivo pharmacology and more specifically, behavioral pharmacology in humans. Pharmacology has traditionally been a graduate-level subject and rarely present in undergraduate curricula. That is a shame, because pharmacology has played and continues to play a key role in the history of neuroscience, in many applications of clinical medicine, and in the relationships among "mind, brain, and behavior." Moreover, students with an interest in medical sciences and careers will find extremely useful the tools and concepts of pharmacology, from elucidating mechanisms of action using basic research, to applications in the clinic using analgesic, antipsychotic, anti-Parkinsonian, stimulant, and anesthetic drugs. My philosophy of teaching is that 70% of the work can be completed in the classroom. I believe the rest can be completed in 1-2 hours per week outside of the classroom. Mostly to study your notes from class together with an outline prepared and distributed by Dr. Caine, and then to complete the semi-weekly writing assignment ("take-home" quizzes, open book, open note, short answer, six assignments in all).

Class Notes: Not open to students who have taken Neurobiology 95hfh or Neurobiology 101hfb. Preference to juniors in MBB tracks or MBB secondary field.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students

Mind, Brain & Behavior 980M

Functional Neuroimaging of Psychiatric Disorders: Insights into the Human Brain-Mind (160759)

David Silbersweig

Marie-Christine Nizzi

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Functional brain imaging has revolutionized the study of systems-level behavioral neuroscience and psychiatric disorders, through the ability to localize and characterize distributed brain activity directly associated with perception, cognition, emotion and behavior in disorders where there are not gross brain lesions. This seminar will introduce students to translational neuroimaging methods at the interface of neuroscience, psychology and medicine. It will cover recent and ongoing advances in our understanding of fronto-limbic-subcortical brain circuitry across the range of psychiatric disorders (e.g. mood disorders, anxiety disorders, psychotic disorders, personality disorders, addictions). It will discuss new, emerging biological (as opposed to descriptive) taxonomies and conceptualizations of mental illness and its treatment. It will explore the implications of such knowledge for issues such as consciousness, meaning, free will, emotion, resilience, and religiosity. It will incorporate clinical observations, scientific data and readings, and examine future directions in brain-mind medicine.

Class Notes: Preference to juniors in MBB tracks or MBB secondary field. Additional

class meetings for site visits to be arranged.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mind, Brain & Behavior 980N Section: 1

Neuroaesthetics (161267)

Nancy Etcoff

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Focuses on neuroaesthetics, an emerging field offering a scientific perspective on the nature of art and the ways that art reveals human nature. Integrates findings from neuroscience, psychology, evolutionary biology, philosophy, and scholarship in the arts and humanities. Begins with a brief history of ideas on aesthetics, art, beauty, and pleasure. Considers the neural underpinnings of response to art in the brain's reward system and default network. Among the questions considered: Why are people drawn to art that is neither conventionally beautiful nor entirely pleasurable? Is art a vehicle for simulating experiences and understanding other minds? What does it mean to "enjoy" sad music or chills and thrills in response to fiction or film? Can art promote well-being? The course will range across the arts but will focus on fiction, film, and music, and response to art rather than its creation.

Class Notes:

Preference to juniors in MBB tracks or MBB secondary field.

Mind, Brain & Behavior 980O

The Self: What Philosophy, Psychology, and Neuroscience Tell Us (204011)

Florian Engert

Marie-Christine Nizzi

2018 Spring (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Gives a more integrative understanding to sense of self using philosophical theories, neuropsychological quantitative cognitive tests, and neurological conditions involving self disorders. Considers two primary dimensions for sense of self: the diachronic self as based on memory and the synchronic self grounded in the body. Topics include personal identity, mind/brain reduction, first vs. third person perspective, phenomenology of self, introspection, quantitative vs. qualitative methods. Provides appreciation of the advantage of bringing together cross-disciplinary perspectives (neurological, philosophical, and psychological) and research methods (introspection, philosophical intuitions, psychometric tests, behavioral tests, empirical research, and clinical approach).

Course Notes: Not open to students who have taken MBB 94z. Preference to juniors in MBB tracks or MBB secondary field.

Class Notes: Not open to students who have taken MBB 94z. Preference to juniors in MBB tracks and MBB secondary field.

Mind, Brain & Behavior 980P Section: 1

The Role of Music in Health and Education (205158)

Lisa Wong

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Music shapes the course of human history at both a micro and macro scale; it can make an individual weep and rally crowds of thousands to cheer. The "universal language" has the power to connect people who share no other common ground. Its power to bind people together is intuitively understood, but only through recent neuroimaging advances over the past 50 years have scientists been able to move past intuition to reveal its impact on the brain. Through this course, we will examine the exciting progress of the fields of music and medicine, through a variety of lenses. Who are the key investigators and practitioners in today's emerging music / brain landscape? What are the latest discoveries about how music influences the brain? How does the direct application of music function — how do we hear, how do we listen, and what happens when this process goes wrong? What has music's role been through human history, and where does that bring us today? This course invites the student to deepen his/her relationship with music exploring different aspects of the art form through several perspectives, including neuroscientist, educator, musician, therapist, patient, and healthcare provider. By the end of this course, the learner will (1) understand the effect of music on the developing brain; (2) understand the mechanism of hearing music; (3) consider the pathophysiology of disordered movement and hearing and how music can be used therapeutically; and (4) understand how other disciplines can add educational and neuroscientific knowledge to therapeutic uses of music. Students will be invited to bring their own experiences to the seminar, and to pursue a final independent project, conducting a combination of scientific, historical, education, or psychology research. In the final weeks, they will present their findings to the group in oral, written or musical format. Given the transdisciplinary nature of the work, students will be challenged to read literature from a variety of genres, from lay literature to educational monographs to scientific papers. This will lead to discussion of one of the key questions in interdisciplinary study between the sciences and the arts: how to research and document outcomes. How do we agree on common definitions of research in disparate fields? What constitutes research to a musician? A music therapist? A neuroscientist? A physician? What is proof of success? What can/should be measured?

Course Notes: Preference to juniors in MBB tracks or MBB secondary field.

Mind, Brain & Behavior 980Q

Of Mice and Microbes: How Microbes Shape Animal Behavior (207089)

Chris Baker

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Animals constantly interact with an astonishing diversity of microbes, far outstripping the animals themselves in terms of cell counts or genetic content. While many interactions may be fleeting encounters in a shared environment, it is the capacity for symbiosis that makes animal-microbe interactions so special. Microbial symbioses range from highly antagonistic relationships to intimate obligate mutualisms. Across that spectrum, coevolution produces some of the most elaborate adaptations to be found in biology. This course explores a variety of animal-microbe symbioses through the lens of animal behavioral ecology. Topics may include gut microbiomes and host nutrition; microbial agriculture; host chemical defenses; mind-controlling parasitoids; host chemical communications; host behavior and symbiont acquisition; and the gut-brain axis and dysbiosis. The course will explore both proximate mechanisms and ultimate explanations, and will emphasize critical reading of the primary literature.

Class Notes:

Preference to juniors in MBB tracks or MBB secondary field.

Mind, Brain & Behavior 980R

Psychopaths and Psychopathy: Psychological, Neuroscientific, Legal, and Policy Issues (207090)

Ellsworth Fersch

2018 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Psychopathy is often used to describe individuals who act in criminal even non-criminal predatory or conscience-less fashion. It is not, however, an official term in the Diagnostic and Statistical Manual of Mental Disorders, though antisocial personality disorder has in the past been described as encompassing psychopathy and sociopathy. Psychopathy was explored by Cleckley in his 1944 book *The Mask of Sanity*; and by Robert Hare in his 1999 book *Without Conscience*, and in his 2003 revision of his *Psychopathy Check-list*. My psychology department seminar on Psychopaths and Psychopathy in 2005-6 focused on research and case studies up to that time. By that time the American Psychiatric Association had issued a statement that psychopaths and those with antisocial personality disorder were not, for heuristic reasons, eligible for the insanity defense. Also, at that time, the determination that a convicted killer was a psychopath was often a strong indicator that the death penalty was warranted. In that seminar, the students prepared their research for inclusion in a workbook. It included answers to frequently asked questions and a series of case studies of both unsuccessful and successful white-collar and street psychopaths. Since then research has expanded to explore neuroscience and the disorder and the related psychological, legal, and policy issues. In this seminar students will examine, and discuss that newer research, and write papers that can be incorporated into an updated supplementary workbook.

Class Notes:

Preference to juniors in MBB tracks or MBB secondary field.

Mind, Brain & Behavior 980S

Cognitive Neuroscience of Meditation (207091)

Sara Lazar

2018 Spring (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

18

Buddhist philosophy describes a model of how the mind works, as well as a method, mindfulness meditation, that can be used as a tool to transform consciousness and reduce mental distress. Neuroscientists have begun to study the impact of meditation on brain structure and function, often using Buddhist philosophy to guide their hypotheses. We will review and discuss how the science relates to Buddhist philosophy, using the four foundations of mindfulness as the primary framework. We will also compare and contrast the Buddhist model with modern scientific models of how conscious experience is created in the brain, in order to gain a more nuanced understanding of consciousness that integrates philosophy, neuroscience, and personal experience. No prior knowledge of Buddhism is required. The course will be a mixture of lecture, discussion of two primary scientific articles that are assigned each week, and formal powerpoint presentations by students. Students will write a final paper on a topic of their choice that is relevant to the themes of the course.

Class Notes:

Preference to juniors in MBB tracks or MBB secondary field.

Mind, Brain & Behavior 980T

Sleep and Mental Health (207092)

Edward Pace-Schott

2018 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

18

The scientific study of sleep is both highly interdisciplinary and among the most unifying of topics in psychology and the neurosciences. In the past several decades, exciting new discoveries on the neurobiology of sleep have been facilitated by technologies such as functional neuroimaging and molecular genetics. Sleep science exemplifies the translational approach in biomedical science whereby investigators in human and animal research work together to continually advance the field of sleep medicine. Scientific findings increasingly point to the importance of sleep for mental health and optimum performance, as well as to sleep disruption as both a result and potential cause of mental illness. In psychiatric neuroscience, sleep is an area in which many fundamental questions remain unanswered due to the unique challenges of studying human sleep.

Despite rapidly accelerating new discoveries and ever-increasing knowledge about the mechanisms and correlates of sleep, much remains controversial. Remarkably, there still is no scientifically agreed upon

"function" for this behavioral state that occupies one third of our lives! Why should a behavior as universal as sleep remain mysterious? My great curiosity about sleep is continually stimulated by such questions. By the end of this seminar, I very much hope that students will become similarly fascinated with this enigma that exists right under our noses, and perhaps some may choose to further explore this exciting area of neuroscience.

Each student will have the opportunity to ponder and form their own opinions on the functions of sleep. While the seminar will emphasize mental health and sleep medicine, my goal is for students to consider our daily alternation in states of consciousness from many perspectives. These might include sleep's roles at the level of genes and their protein products, sleep's manifestation across animal taxa, its possible evolutionary history and present ecology, sleep's influence on brain development, societal influences on sleep, and how and why consciousness should emerge during sleep in the form of dreams.

Following lectures providing an overview of the behavioral neuroscience of sleep, each student will focus on topic related to sleep and mental health that they will research in depth and present to the class. Such topics might include the characteristic abnormalities of sleep occurring in mood, anxiety, psychotic, addictive, autism spectrum or neurodegenerative disorders. Other topics might include the contribution of primary sleep disorders to psychiatric illnesses such as links between sleep apnea and depression, circadian rhythm disorders and bipolar illness, or insomnia as a risk factor for mood and anxiety disorders. Still other topics might include the role of sleep in the trafficking and disposal of abnormal proteins during sleep - disruption of which might constitute an important pathway to neurodegenerative illnesses.

Lectures taking place during the first 6-8 classes will cover the basics of sleep behavior, physiology and neuronal control. Subsequent classes will consist of presentations by each student on a topic of their choice in the area of sleep and mental health. The exact number of lectures will thus depend upon class enrollment in order to allow one hour for each student presentation. Readings will consist of chapters in the Sleep Research Society's Basics of Sleep Guide as well as recent review articles dealing with each lecture topic. Each student presenter will assign the class one original-source report and one comprehensive review on their chosen topic. Student evaluation will be based on weekly open-book study questions, in-cla

This course provides an introduction to the principles of molecular and cellular biology and their connections to biomedicine. We explore how medical syndromes provide insights into biological processes and how biological mechanisms underlie human disease and physiology. Topics range from DNA repair, protein folding and vesicle transport to metabolism, cell migration and cancer. Lectures focus on the experimental evidence for key concepts, and the weekly sections combine a discovery-based laboratory research project with discussions that emphasize problem solving and primary literature.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems.

Recommended Prep:

LS 1b recommended.

Requirements:

Prerequisite: LPS A OR LS 1a

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

The course integrates an introduction to the structure of macromolecules and a biochemical approach to cellular function. Topics addressing protein function will include enzyme kinetics, the characterization of major metabolic pathways and their interconnection into tightly regulated networks, and the manipulation of enzymes and pathways with mutations or drugs. An exploration of simple cells (red blood cells) to more complex tissues (muscle and liver) is used as a framework to discuss the progression in metabolic

complexity. Students will also develop problem solving and analytical skills that are more generally applicable to the life sciences.

This course teaches fundamental concepts in cell biology in the context of individual life histories drawn from different parts of the world. Each life case focuses on key aspects of human development, growth, aging and disease while providing a nuanced view of the interplay between the life sciences, geography and culture. For example, a comparative discussion of aging in the United States and Japan is used to explore diet, cellular metabolism and its relationship to protein damage and turnover, while the Human Immunodeficiency Virus and AIDS in South Asia is used to explore mucosal immunity and the basis for estimating relative infection risk. Each case delves into the cell biology of major biological events across the life history of the human

Enrollment Cap: 24

MCB 68 explores three fundamental fields of eukaryotic cell biology: chromosome segregation, cell motility, and neuroscience. Each topic is approached from a historic and technical perspective. Students will discover these systems as the scientific field did, learning how each successive advance in microscopy revealed new biological details. Students will come away with a theoretical and hands-on understanding of microscopy as well as a grasp of the biological findings each technology revealed.

Recommended Prep: An additional introductory course in biology (e.g., MCB 60, MCB 80 or SCRB10) is recommended but not required. The course design, level, and content is best suited for students in their sophomore year

Requirements: Prerequisite: LS 1a OR LPS A

Venkatesh Murthy

2017 Fall (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to the ways in which the brain controls mental activities. The course covers the cells and signals that process and transmit information, and the ways in which neurons form circuits that change with experience. Topics include the neurobiology of perception, learning, memory, language, emotion, and mental illness. This year we are changing the way in which this material is taught by emphasizing more student participation through active learning techniques and by providing real-world experiences and hands-on demonstrations each week.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems. The course is open to students with little formal training in biology.

Requirements: Anti-Req: Cannot be taken for credit if MCB 81 already complete.

Additional Course Attributes:

Fundamentals of Neuroscience (159708)

David Cox

2017 Fall (4 Credits)

Schedule:

WF 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

An intensive introduction to topics in neuroscience, ranging from the inner workings of neurons, to the function of small neuronal networks, to the function of brain systems that give rise to perception, thought, emotion, cognition and action. The course will emphasize student-directed learning and will follow an "inverted" structure: students will be expected to watch lecture videos and complete exercises outside of class, and classroom time will be primarily reserved for discussion and in-class exercises.

Course Notes: This course serves as a more rigorous alternative to MCB 80 and is primarily intended for students who intend to concentrate in neurobiology or who intend to pursue neurobiology as a secondary field. MCB 81 may not be taken for credit by students who have taken MCB 80.

Recommended Prep: A strong quantitative background is desirable but not strictly required.

Genomic information is accelerating the discovery and characterization of the molecular and cellular basis of human health and disease. This new lecture/discussion course will explore how knowledge from new technologies is used to advance our understanding of human biology. Topics will include personal genomics, understanding genome-wide associated studies, epigenetics, gene-environment interactions, and complex traits, the importance of model organisms to investigate molecular mechanisms, and the prospects for cancer genomics and gene/genome therapy. This lecture/discussion course will rely extensively on primary literature and contemporary review articles. Students will actively participate in class discussions and prepare four written summaries of assigned articles and two literature-based research projects (one in the middle of the term and one at the end of the term) that critically assess the scientific basis of popular news articles and consumer-targeted genomics information.

Requirements: Prerequisite: (LS 1a AND LS 1b) AND (MCB 60 OR (MCB 52 and MCB 54))

Biochemistry of Protein Complexes (128150)

Guido Guidotti

2018 Spring (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

A course on the properties of protein complexes that serve as supports, machines and motors. Topics include : hemoglobin, actin filaments, myosin function, microtubules, kinesin, metabolon, photosynthesis, rotary motors, nuclear pores and transport, proteasome. Lecture on Monday is followed by student presentations on Wednesday. The course involves reading two research papers per week, and writing a research proposal.

Recommended Prep:

Chemistry 27 and MCB 60 or MCB 54 are recommended, but not required.

Molecular & Cellular Biology 186

Sleep and Circadian Clocks: from Biology to Public Health (112001)

Charles Czeisler

Frank Scheer

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The impact of the brain's circadian clock on sleep becomes evident when we travel across time zones or shift our sleep on weekends. How does this clock work? How does light from a tablet or smartphone affect our biology? What is the best time for sleep? What about naps? This course will explore the neurobiology of the brain's circadian clock that regulates the timing and structure of sleep, its interaction with the periodic environment, and the consequences of circadian disruption in our 24/7 society on health, performance and safety.

Additional Course Attributes:

Molecular & Cellular Biology 188

Chromosomes (114864)

Nancy Kleckner

2018 Spring (4 Credits)

Schedule:

TR 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Chromosome morphogenesis in prokaryotic and eukaryotic organisms. Topics will include chromosome structure, interactions between chromosomes (sisters and homologs), DNA recombination and repair, topoisomerases, transposable elements and site-specific recombination, epigenetic inheritance. Genetic, cytological, and biochemical approaches will be integrated. Lecture, reading, and discussion of classical and current literature and consideration of future experimental directions.

Requirements:

Prerequisite: LS 1b AND (MCB 60 OR (MCB 52 and MCB 54))

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Molecular & Cellular Biology 208

Talking about Science (121320)

Michael Greenberg

Jeff W. Lichtman

Richard Losick

2018 Spring (4 Credits)

Schedule:

W 0400 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Teaches advanced students how to give a good research talk while exposing them to seminal scientific discoveries. Emphasis will be on speaking style, lecture organization, and use of video projection tools.

Course Notes:

In addition to lecture material from the instructor, students will present experiments from Nobel Prize-winning work. The presentations will be critiqued in class by the participants. Open to second year graduate students or with permission of the instructor.

Class Notes:

Class will be held in Goldenson 420, on the Harvard Medical School Campus.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Molecular & Cellular Biology 290A

Current Topics in Molecular, Cellular and Organismal Biology (127009)

Vladimir Denic

2017 Fall (2 Credits)

Schedule:

F 0330 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This class teaches students how to publicly present scientific papers to a diverse audience with emphasis on contextualizing the scientific problem under discussion, critically presenting the essential data, and using an engaging presentation style.

Course Notes:

Required for all first and second year graduate students in the Molecules, Cells and Organisms (MCO) Training Program. This course must be taken Sat/Unsat.

Class Notes:

Vladimir Denic, and members of the Department

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 291

Genetics, Genomics and Evolutionary Biology (124899)

Matthew Meselson

Jim Mallet

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course covers the fundamentals of classical genetics, molecular genetics, macro- and microevolution, phylogenetics, and developmental evolution. The emphasis is on major concepts and terminology, reading landmark primary literature, and acquainting students with research techniques.

Course Notes: Required for first year graduate students in the Molecules, Cells and Organisms (MCO) Training Program.

Class Notes: Lecture is held on Mondays and Wednesdays from 10:00 - 11:30, with a weekly section on Fridays from 10:00 - 12:00.

Class Notes: This graduate course will be open to interested undergraduates.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Molecular & Cellular Biology 292

Cellular Biology, Neurobiology and Developmental Biology (124900)

Ethan Garner

Bence Olveczky

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

25

The biology of the individual cell lies at the heart of multi-cellular phenomena such as development and neural function. This course will emphasize critical evaluation of the primary literature, experimental design

and scientific writing.

Course Notes: Required for first year graduate students in the Molecules, Cells and Organisms (MCO) Program, but open to graduates of all programs.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Molecular & Cellular Biology 293

Biochemistry, Chemical and Structural Biology (124901)

Rachelle Gaudet

Daniel Needleman

2017 Fall (4 Credits)

Schedule: MW 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course will introduce basic principles in general, organic and physical chemistry, including kinetics and thermodynamics, as well as macromolecular structure. Concepts will be illustrated with examples taken from the visual system.

Course Notes: Required for first year graduate students in the Molecules, Cells and Organisms (MCO) Training Program.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 294

Interesting Questions in Physical Biology (122422)

Nancy Kleckner

2017 Fall (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Physical biology can be defined as a discipline that seeks to understand biological processes through the lens of physics and engineering. Faculty and students will unite to review current research with the aim of identifying and pondering interesting emerging questions in this area. Combination of lecture and discussion format. Comprises a series of two-week modules, most of which are given by a one or a pair of faculty drawn from MCB, Physics and SEAS.

Course Notes: Intended primarily for first year graduate students in the EPB PhD track of the MCO program but available to other graduate students and advanced undergraduates as space permits.

Scientific Integrity (156950)

Polina Kehayova

Naoshige Uchida

2017 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

MCB 350 is a discussion forum on scientific integrity using case studies to examine basic ethical and regulatory requirements for conducting research, and fulfills the National Institutes of Health (NIH) and National Science Foundation (NSF) requirements for formal Responsible Conduct of Research (RCR) instruction. Students are required to complete a pre-course assignment, attend all lectures including the final lecture in February, participate in class discussions, and complete a final course evaluation. A certificate will be issued upon successful completion of the course.

Course Notes: According to NIH Guidelines, students are required to take a Scientific Integrity Refresher Course every four years (*MCB 351).

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Microscopy (156952)

*Jeff W. Lichtman**Douglas Richardson*

2018 Spring (2 Credits)

Schedule:

TBD

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

This course presents the fundamental concepts that underlie modern light microscopy in a rigorous but non-mathematical way for biological applications. The students will learn about the four major frameworks for light (ray optics, wave optics, electromagnetism, and quantum optics). The ways lenses work, the theory of resolution, and the optical design of the compound microscope will be described. The course will also describe the photo-physical principles that underlie fluorescence and genetically encoded fluorescent proteins, and light detector and imaging strategies. Scanning (confocal and 2P), light sheet and super-resolution microcopies will also be described. We will end with a tour of the Harvard Center of Biological Imaging.

Additional Course Attributes:

FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 353

Building Your Own Microscope (160485)

Venkatesh Murthy

2018 Spring (2 Credits)

Schedule:

TBD

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Microscopes of various sorts are used by most biologists, who typically buy these off the shelf. With a little knowledge, however, most biologists can build their own microscopes to do many of the things that the commercial ones do. In this quarter course, you will learn to build an epifluorescence microscope and to acquire images using a computer.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Molecular & Cellular Biology 354

Introduction to Model Organisms (160493)

Craig Hunter

2017 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Model organisms are embedded in our scientific culture, from text books on the discovery of genetic material, to mod-encode genome projects. This quarter course is a means to formally introduce an enormously successful experimental scientific approach that has revealed uncountable new biological mechanisms for the last 70 years. Students in this class will engage in hands-on learning exercises to become familiar with commonly used model organisms. They will learn about the genesis of each model system and compare and contrast the features and available experimental approaches that govern whether a particular organism is an appropriate model for different biological phenomena.

Course Notes: Limited to first year graduate students in the MCO Ph.D. program.

Additional Course Attributes:

Molecular & Cellular Biology 355

Visualizing, Analyzing and Presenting Macromolecular Structures with PyMOL (160523)

Rachelle Gaudet

2018 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

PyMOL is one of the most popular software programs to display and explore high-resolution structures of macromolecules. It is readily used to create publication-quality figures, and movies and animations of structural information. In this course, you will learn the basics of PyMOL and be able to display, explore and present three-dimensional structures of macromolecules. With this basic training, you will be able to generate high-quality images and simple movies, and have the resources to learn more on your own to generate more complex displays.

Additional Course Attributes:

Molecular & Cellular Biology 356

Practical Introduction to Robotics (160558)

Benjamin de Bivort

2018 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 20

Automation and robotics have revolutionized molecular biology. Liquid handling robots are already facilitating the "omics" revolution in genome sequencing, proteomics and high throughput screening. Now, neuroscience and microscopy are adopting robotics for throughput and experiments requiring precision and repeatability, like targeted microelectrode placement. In this nano course, students will learn 1) basic principles of practical robotics including the interaction of software and hardware, 2) the roles of drivers, control cards, microcontrollers and sensor electronics, and 3) practical engineering skills including basic soldering, measurement of voltage, conductivity, polarity and resistance. Students will explore the challenges of translating conceptual operational algorithms into physical implementations.

Course Notes: To enroll, students must be apart of a Life Science Graduate Program, or permission of the instructor.

Subject: Life Sciences

Life Sciences 1A

An Integrated Introduction to the Life Sciences: Chemistry, Molecular Biology, and Cell Biology (121189)

Richard Losick

Daniel Kahne

2017 Fall (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

What are the fundamental features of living systems? What are the molecules imparting them and how do their chemical properties explain their biological roles? The answers form a basis for understanding the molecules of life, the cell, diseases, and medicines. In contrast with traditional presentations of relevant scientific disciplines in separate courses, we take an integrated approach, presenting chemistry, molecular biology, biochemistry, and cell biology framed within central problems such as the biology of HIV and cancer.

Course Notes:

For more information about the assignment process, please see the

course website in the fall. This course, in combination with Life Sciences 1b, constitutes an integrated introduction to the Life Sciences. This course, when taken for a letter grade, meets the General Education requirement in Science of Living Systems.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Pardis Sabeti

Hadar Malca

Rickey Shah

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How are observable characteristics of organisms influenced by genetics? How do genomes change over time to produce the differences we see among species? This course takes an integrated approach, showing how genetics and evolution are intimately related, together explaining the patterns of genetic variation we see in nature, and how genomics can be used to analyze variation. In covering Mendelian genetics, quantitative genetics, and population genetics, this course will emphasize developments involving our own species.

Course Notes:

This course, in combination with Life Sciences 1a, constitutes an integrated introduction to the Life Sciences. This course, when taken for a letter grade, meets the General Education requirement in Science of Living Systems.

2017 Fall (8 Credits)

Schedule:

MTWRF 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

41

This is an intensive two-semester, double course that introduces the natural sciences as an integrated whole to students who have a very strong interest in science. Our goal is to teach students how to solve scientific problems by drawing methods and concepts from biology, chemistry, physics, and mathematics. The course uses examples from biology as an integrating theme, principles from physics and mathematics to reduce complex problems to simpler forms, and computer simulation to allow students to develop their intuition about the behavior of the dynamical systems that control the physical and biological universe. The course includes bootcamps to introduce students to biological experiments and the computer language, Matlab. Each semester will include a project lab, in which students will work in small teams to do original research on unsolved biological problems.

Class Notes:

Lab is currently scheduled for Tuesdays OR Thursdays. Life Sciences 50a and 50b, when taken together for a letter grade, fulfill the General Education requirements of Science of Living Systems, Science of the Physical Universe, and Empirical and Mathematical Reasoning. LS 50a taken alone fulfills two of these requirements.

Additional Course Attributes:

Experimental Research in the Life Sciences (119061)

Alain Viel

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

A laboratory course that immerses students in a dynamic project-based research environment. Participate in experimental projects directly linked with ongoing faculty research. Students select a project from the following research tracks: neurobiology, microbial sciences, cell biology, and synthetic biology. New projects, including some in other research fields, are offered every term. In a highly collaborative atmosphere, students form a fully-functional and diverse research group based on the sharing of ideas and progress reports between projects. The spring microbiology project is part of the "genomes to Biomes" series.

Course Notes: Location of the first meeting will be announced on the course website. Open to freshmen, sophomores, juniors, and seniors, regardless of concentration, and suitable for students either with or without extensive laboratory experience. The course may only be repeated once and the second enrollment must be approved by the instructor.

Recommended Prep: Students interested in a neurobiology project will need MCB 80 or permission of the instructor. Please also note that students cannot take MCB 100 and LS 100 at the same time.

Requirements: Prerequisite: LPS A OR LS 1a

Music 1

Introduction to Western Music, from Bach to Beyoncé (114594)

Michael Uy

2018 Spring (4 Credits)

Schedule: MW 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course aims to introduce you to a variety of music repertoires, and a range of ways to think, talk, and write about them. While we explore some of the great "classics" of the Western musical canon, including works by male composers such as Bach, Beethoven, and Stravinsky, we will also discover the critical roles played by renowned female performers, patrons, and writers, as well as the significant impacts made by artists of color. Ending in the present day, we will investigate what "Western classical music" means in a global context, and a world increasingly shaped by new technologies and digital networks. During the semester, you will build a vocabulary for analyzing music and articulating a response to it. No prior knowledge of music history or Western musical notation is necessary, and you will be graded on the improvements you make in engaging with the material. By the end of class, you will be equipped to embark on a lifetime of informed listening.

Course Notes: Music 1b can be taken independently of Music 1a. No prior knowledge of music presumed. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. May not be taken for concentration credit.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Music 2

Foundations of Tonal Music I (118594)

Osnat Netzer

2018 Spring (4 Credits)

Schedule: W 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 108

Seeks to develop a greater understanding of music, musical analysis, and critical listening. We will study some of the organizing principles of musical works (from a range of styles) by means of composition projects, score analysis, and aural skills. While reading knowledge of simple musical notation is helpful, there will be at least one section for students with no previous experience. Additional sections required on Mondays and Fridays, 11:00 am - 12:00 pm

Course Notes: Open to all students. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Aesthetic and Interpretive Understanding
FAS: Course Level	Primarily for Undergraduate Students

Music 4

Introduction to Composition (111353)

Felipe De Souza Lara

2017 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

Open to students with little or no prior experience in composition. Explores ways of thinking about and organizing basic compositional elements such as melody, harmony, rhythm and instrumental color, as well as developing skills of score preparation and analytical listening. The primary focus of the course is a series of short compositional exercises, culminating in a somewhat longer final project. Workshop performances of students' music take place throughout the term.

Recommended Prep: Some prior experience in music theory or permission of the instructor.

This is an experiential learning course. The ensemble gives several concerts each year, sometimes joining with the chorus to perform large-scale works. Students are required to attend all rehearsals and certain special Saturday "retreats" announced in advance. Students are expected to practice the music outside the rehearsal time. Grades are based on attendance and participation.

Course Notes: The course is graded SAT/UNSAT based on attendance and participation. This course may be taken repeatedly, but to receive credit the course must be taken in the Fall and Spring semesters consecutively. A maximum of four semesters (two years) may be counted as credit towards the degree.

Class Notes: Auditions for the HRO are August 28, 2:00 pm - 8:00 pm and August 30, 10:00 am - 6:00 pm. Please see HRO website for details.

Recommended Prep: Two contrasting movements or pieces chosen by candidate.

Radcliffe Choral Society (SSAA choir). The Radcliffe Choral Society is dedicated to the celebration and performance of women's choral music. Founded in 1899, RCS is Harvard's oldest women's organization and one of the country's premier women's choruses. The Choral Society sings a wide variety of repertoire including Medieval chant, Renaissance polyphony, Romantic masterworks, international folk songs, and contemporary women's choral music. RCS tours annually. The Choral Society frequently combines with the Collegium and the Glee Club, as well as the Harvard-Radcliffe Orchestra, to perform large-scale works. Students must complete both parts of this course (parts A and B) within the same academic year in order to receive credit.

Harvard Jazz Band (000018)

Yosvany Terry

2017 Fall (2 Credits)

Schedule:

W 0715 PM - 0814 PM

M 0715 PM - 0914 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

The Harvard Jazz Band was created in 1971 by Director of Bands Tom Everett when he first arrived at the University. Passionate that exposure to this unique American art form be part of students' education, he created a rag-tag jazz band of primarily Harvard [marching] Band recruits. Since its inception, the Harvard Jazz band has served as the vehicle for students across disciplines to study and learn the jazz canon. Over the years, the Jazz Band has focused on the literature of Duke Ellington and complete retrospective concerts of the music of Charles Mingus, Charlie Parker, Gerry Mulligan, Lee Konitz, Benny Carter, Buck Clayton, Clark Terry, J. J. Johnson, and Julius Hemphill. Other literature has ranged from the classic arrangements of Count Basie and Fletcher Henderson to the modern jazz of Gil Evans and Charles Mingus, the contemporary ensemble improvisations of Barry Guy and Lester Bowie, and the jazz-rock of Michael Gibbs, Russ Gershon Harvard '81, Rufus Reid, George Cables and Cassandra Wilson. In 2015, Yosvany Terry was appointed Director of Jazz Bands. Under his direction, the Harvard Jazz Band continues this tradition of focusing on a program of study that provides students with a grounding in a wide range of iconic and new literature. Students are required to take both parts of the course within the same academic year. The curriculum builds throughout the year.

Course Notes:

The course is graded SAT/UNSAT based on attendance and participation. This course may be taken repeatedly, but to receive credit the course must be taken in the Fall and Spring semesters consecutively. A maximum of four semesters (two years) may be counted as credit towards the degree.

Class Notes:

This year, the Harvard Jazz Band will prepare for its four annual concerts and two jazz master residencies. The Fall residency will include Grammy-Award winner, composer, drummer extraordinaire and Guggenheim Fellow, Jeff Watts. During the Spring the visiting master will be Grammy-Award winner, composer and world activist, Angelique Kidjo. The Jazz Band will perform the repertoire of some of the Jazz masters such as Thad Jones, Oliver Nelson and Benny Golson during the Montage concert in collaboration with the Harvard Wind Ensemble, the Harvard Band and the Sunday Jazz band at Sanders Theater on October 14. During the fall residency, the band will perform the music of Jeff "Tain" Watts in a concert at Lowell Hall on November 11. Looking ahead to the spring residency the band will perform the music of Angelique Kidjo and Celia Cruz at Sanders Theater on April 14. The last two concerts of the year will be the at Art First Festival at the end of April and the annual "Swing Dance" at the Sheraton Commander Hotel in Cambridge.

Class Notes: An audition is required to become a member of the HUJB. Auditions will be hold at the OFA rehearsal space during the first week of September. For more information please visit the HUJB website <http://harvardjazzbands.com> or the OFA website <https://ofa.fas.harvard.edu/arts> under Harvard Jazz Band audition information.

Music 20

Opera (204418)

Carolyn Abbate

2018 Spring (4 Credits)

Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This new lecture course will explore opera, a theatrical genre with a 400-year history, which is still a living and vibrant art. Opera has always been multimedia: Its marvelous singing, and its music, is shaped by drama, by characters, visual spectacles in staging, and theater architecture and machinery. Operatic performance, by engaging and even overwhelming multiple senses, challenges us to question intellectual truisms like critical detachment, sober analysis. Opera has always inspired intense passion in audiences. For some, it is the most beautiful and moving musical genre that has ever existed. For others, it can involve tedium and acoustic strangeness. Opera's special acoustic is defined by its singers, who are often called "gods" ("divas" and "divos"), with voices that are the most powerful unamplified human sonic force in existence. We will look at opera as it evolved over time from its origins in Italy into a global phenomenon, considering works by famous composers (including Mozart, Wagner, and Verdi) as well as obscure corners and byways. Students will be experiencing live opera performances (in class and on field trips), and opera as technological art in recordings, film, and other media. No previous music courses, no expertise in music theory or ability to read music, are required.

Course Notes: No previous music courses, no expertise in music theory or ability to read music, are required. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Exploring Leonard Bernstein's Young People's Concerts in Memory, Music, and Media (204968)

Carol Oja

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Focuses on the Young People's Concerts of the New York Philharmonic as famously led by Leonard Bernstein and broadcast on CBS television (1958-1972). Millions of Americans tuned in. The course fuses class discussion and weekly DVD assignments with hands-on student research. Taught in conjunction with the New York Philharmonic Archive. Class will visit New York City November 10-12 (all students will take part in this trip) to attend concerts and conduct interviews with longtime subscribers of the Philharmonic who experienced the YPC as children.

Class Notes: Because of the trip to New York City, enrollment in this class is capped at 15. Students who want to take the course--and have made a firm decision about it--should submit a one-paragraph statement of interest (no more than 250 words), explaining what they hope to gain from the class. Note that the trip (Nov 10-12) is required. Please email by Tuesday, September 5 at 10am to gedgar@g.harvard.edu. We will respond quickly so that you can plan your schedule accordingly.

A Social History of Rock 'n Roll (206891)

Katy Leonard

2018 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will examine the social and historical context of rock 'n' roll, including the ways in which the genre intersects with business, politics, gender, age, class, race, and technology. We will survey rock 'n' roll's early 20th century roots, the rock 'n' roll explosion of the 1950s, surf-rock, folk-rock, blues-rock, the British Invasion, and psychedelic rock through the early 1970s. As we discuss the evolution of "rock 'n' roll" of the 1950s to "rock" of the 1960s and 70s, we will consider the role of songs, albums, and artists, as well as producers, promoters, fans, and detractors.

Course Notes: No prior musical experience (academic or otherwise) is required to participate in this course.

Music 30

Music, theater and dance of South Asia (204974)

Richard Wolf

2017 Fall (4 Credits)

Schedule:

WF 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Music, Theater and Dance of South Asia will focus on the unified arts of South Asia. In ancient times, music was understood as part of a larger unit that included literature, drama, and dance (muttami in Tamil and sangita in Sanskrit)—analogous to mousiké in ancient Greece. The course will examine vernacular musical forms ranging from tribal music in South India, to Nepali drumming, to folk song of Northern Pakistan. Part of the course will be devoted to the vigorous literature on classical dance in relation to courtesanship and nationalism. Throughout the course, students will have the opportunity to do at least one assignment involving art-making or critical media practice. The entire class will participate in a set of workshops that constitute the highlight of this first offering: a visit to Harvard of a Kudiattam troupe. Kudiattam is the only living Sanskrit theater form today, found in the South Indian state of Kerala and normally performed for multiple days in connection with temple festivals. A UNESCO masterpiece of the oral and intangible heritage of humanity, Kudiattam is rarely seen outside of India. Students in this class will learn to perform a little bit of abhinaya (conventional facial and bodily expressions), basic postures for standing and sitting, and transitions from one persona to another. If the students are inspired to do so, they may include a brief performance inspired by this visit (and the other course materials) in their final projects.

Critical Listening (204967)

Vijay Iyer

2017 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

25

Much like reading, listening is a relational, highly contingent process of meaning construction. Founded on aural sensation, it also involves processes of prediction, recognition, and imagination. It is therefore so strongly conditioned by culture that we tend to privilege certain patterns of perception at the expense of others. In this writing-intensive course we will listen to music together, refine our attention to its ingredients and its construction, share and unpack our listening strategies, develop and strengthen our vocabularies to describe what we hear, and cultivate a critical perspective on the act of listening. Since our focus is on process, our repertoire will be wide-ranging and partly selected by the class. Students will collectively edit and self-publish a monthly anthology of their writings.

Critical Thinking (204975)

Braxton Shelley

2018 Spring (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

25

Music, one of the most ubiquitous aspects of human sociality, manifests the imbrication of sound and context. What are the relationships between such audible phenomena and their social settings? How does the intentional patterning of musical sound reflect, resist, and refashion the cultural, confessional, and commercial frameworks from which it springs? Animated by these questions, *Thinking about Music: Sound in/as/and Context* presents students with a diverse collection of musical forms and analytic methodologies, offering opportunities to think, write, and speak about musical sound's engagement with multiple contexts. Students will read ethnographic, historical, and analytic work on music ranging from Syrian Jewish Pizmonin to Bob Dylan's "It's Alright Ma (I'm Only Bleeding)" in order to feed their own exploration of works extending from Beethoven's *Eroica* to Beyonce's *Lemonade*. Along the way, the course will examine the way music's meanings arise in relationship to topics including expectation, textuality, materiality, and multimedia. Working comparatively, with such historical and cultural variety, students will encounter the richness of expression that music makes possible, while pursuing greater fluency in articulating their own music-analytic insights.

Cuban Counterpoint: Cuban Music through the Lens of Six Selected Composers from 1800 - 1950s. Understanding the music of Cuba requires learning about its social structures, complex immigration history and cultural heritage. Positioned on what is known as the key of the Gulf in the Caribbean, Cuba has embraced all of the musical traditions that arrived in the Antilles since the 1500s to the present day. This course will introduce the students to the musical legacy of six composers including Miguel Failde, Ernesto Lecuona, Sindo Garay, Ignacio Piñero, Arsenio Rodriguez and Bebo Valdes. Their musical contributions represent distinctive historical moments in the evolution and definition of the Cuban identity. Their work helped shape new musical genres such as Habaneras, Contradanzas, Danzón, Trova Tradicional, Són, Cuban Zarzuela, Bolero, Mambo, Cha-Cha-Chá and Jazz. By analyzing selected musical scores students will become acquainted with different musical styles and traditions and will develop an understanding of beat, syncopation and melodic counterpoint. Through the class students will become familiar with the fundamental rhythms of the clave, the cinquillo, cáscara, 6/8 clave and both rumba and son clave. Class work will include readings, DVD's, period and contemporary recordings and field trips to experience firsthand Cuban music performed live in the Boston area.

Topic: Cuban Counterpoint: Six Compos

Course Notes: Students need to be able to read and write music to take this course as we are planning to analyze music scores and play music during our final project.

What Is Musical Form? (114188)

Katherine Pukinskis

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores musical forms, both small- and large-scale, across a variety of genres and periods. Students will be introduced to issues and approaches to analysis of form, as well as the history of these practices. We will delve into questions of formal function in addition to examining modern theoretical and analytical engagement with this broad and multifaceted topic. Topics of focus will cover forms in the Western Music Canon but also explore structures in Jazz, Popular Music, Folk Musics of the world, and Musical Theatre.

Recommended Prep: Music 51 or equivalent.

In this course students will explore composition in multi faceted way. Each student is expected to come with joy towards experimenting and trying things out of their comfort zone. We will compose/ invent small pieces using self made objects, recordings, texts and will discover what it means to zero in on harmony or on rhythm or melody, orchestration, texture by individually exploring and experimenting. The class offers creative space to people who love composing whether they have a lot of experience or not. We will have class sessions and discussions and also about 4 individual sessions of 30 minutes for each student some weeks, replacing the class sessions. At the end of the semester we will have a concert with Parker String quartet accompanied by the class members.

Recommended Prep: One course in theory/composition or permission of the instructor.

Songwriting Workshop (206929)

Esperanza Spalding

2018 Spring (4 Credits)

Schedule:

T 0700 PM - 0959 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course will approach songwriting from two directions: analytical study of the methods of successful songwriters throughout the past 50 years together with students performing and critiquing their own original compositions. Throughout the course, we will address specific aspects of successful songwriting, including lyric development, song form, melody, harmonic progression, poetic imagery, story telling and presentation. The physical classroom will be designed to provide the experience of live performance in a club-like setting. In each unit, students will investigate a distinct songwriting style; compose an original work within that form; and perform it for peer review, including their own thoughtful analysis. The final for this course will be a showcase style performance of the students' own compositions. Any undergraduate or GSAS student who would like to increase their skill in songwriting is encouraged to apply. Those who wish to be considered must submit a questionnaire between January 2 and January 12, 2018 with a digital recording or link(s) of a video of themselves performing two (2) of their original compositions. Audio and video examples should be at least two minutes, and no more than six minutes in length. Fill out this google form: <https://docs.google.com/forms/d/1NpVTFELmOAsTJnG7v6m2ZBY6Ck6pYYYW8zuqT8YB3HM/edit>

2018 Spring (4 Credits)

Schedule:

R 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

The seminar centers on Bizet's *Carmen*, the opera that shocked 19th-century Europe for its bold expression of seduction and sexuality. Further consideration is given to historical precedents and consequences, from Mozart's *Don Giovanni* to Strauss's *Salomé*, including Wagner's *Tristan und Isolde* and *Parsifal* as counter-examples of non-seduction. Discussions of literary, historical, and theoretical materials (e.g., Kierkegaard, Nietzsche, Freud, Th. Mann, Bloch) complement musical analyses and rehearsals of selected pieces, with a public performance at the end of the semester.

Course Notes:

This class is open to everyone, performers (instrumentalists and vocalists) and non-performers, though some music knowledge is helpful.

Esperanza Spalding

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course will identify music that has been key to successful social movements; explore the specific methods used by those musicians to deliver their message effectively; and empower students to utilize their learning, designing and presenting their own musical campaign to further a cause of their choosing. Investigating the historical context of the composers cited, we will draw from the musical techniques that allowed them to successfully apply their passion to the causes they empowered. Through these case studies, students will be challenged to actually measure the effectiveness and scope of musical activism. We will learn how to utilize modern commercial marketing techniques to evaluate the effectiveness both of songs that have created a known effect on more recent social campaigns, and our own efforts to direct this learning to the causes dear to us. As we progress through the semester, students will (through live performance and/or social media) create, share, and analyze their own examples of musical activism.

This course will come together periodically with students from [Music 194rs](#), *Music, Power, and the Collective Voice* taught by Katherine Pukinskis, to share and cross-reference the focused learning of each.

Course Notes: This course is limited to #20 students and preference will be given to music concentrators and students who have enrolled in a faculty led ensemble course (Music 10 - Music 18).

Vocal Ensemble Music Performance: 1400 - 1600. A practical course exploring the rich repertoire of vocal chamber music composed in Europe in the 15th and 16th centuries, including French and Spanish songs, Italian madrigals, and sacred polyphony from across Europe. Students will prepare performances from original sources and write a short research paper. All works will be performed one person to a part. Although aimed primarily at singers, the class may also admit a small number of instrumentalists interested in playing medieval fiddle, single-row harp, or plectrum lute. Instruments may be loaned as needed.

Course Notes: Students should have strong musical skills and be prepared to delve into original materials.

Class Notes: The first class will meet on Friday, September 1, 2:00 - 5:00 pm but subsequent meetings are Thursdays 2:00 - 5:00 pm

This course is a workshop for the creation of rigorous new models for collectives, ensembles and organizations that perform and present 21st century music. Open to performers, composers/improvisers, musicologists and scholars who are engaged with contemporary music practice, cultural production, education and performance. New repertoires and new organizational practices will be explored in a laboratory format that includes pop-up concerts, community events and a final group performance. Performance and production activity will be carried out alongside research projects on existing 21st century music ensembles and entities. Guest speakers include leading members of Ensemble Intercontemporain, the Association for the Advancement of Creative Musicians (AACM), Bang on a Can, JACK Quartet and the International Contemporary Ensemble (ICE).

Course Notes:

Open to undergraduates from other departments and graduate students.

Composers of Today: The Music of Alvin Lucier (206893)

Claire Chase

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course will explore the music, writings and philosophy of Alvin Lucier - from the composer's groundbreaking 1970 work "I am sitting in a room" for voice and electromagnetic tape to recent and current projects - through a practice-based, collaborative approach which emphasizes performing, programming and presenting a final concert of Lucier's work, with the composer in attendance. The course is open to all graduate and undergraduate performers, improvisers, composers, musicologists, ethnomusicologists, sound artists, visual artists, writers or others who are interested in an in-depth exploration of this extraordinary figure's sound and imagination worlds. All students will be expected to perform and present on Lucier's work. Guest performers include the clarinetist Joshua Rubin and the sound engineer Levy Lorenzo from the International Contemporary Ensemble. The course will culminate in a special event, programmed and produced by the students in Music 187, during the composer's visit to campus in April 2018.

Class Notes:

Class size is limited to 12. Interested students should send links to two work samples (written, performative, or visual) and a 150-word statement about their goals for the course in a single email to chase@fas.harvard.edu between January 8 and January 17, 2018.

Chamber Music Performance (153042)

*Jessica Bodner**Daniel Chong**Kee-Hyun Kim**Ying Xue*

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

Through auditions, students will be divided into chamber music ensembles by the Parker Quartet, and have weekly coachings with members of the Parker Quartet and pianist Katherine Chi. Instrumentalists and vocalists are welcome to audition; however, no duos or vocal ensembles are allowed. Students will be expected to rehearse between each coaching and to participate in Performance Classes throughout the semester. There will be a final jury evaluation prior to the final class performances, to be held sometime during Reading Period, and all students are required to be available. Students who do not meet the requirements in Notes below may take the course for PASS/FAIL credit. Pre-formed ensembles are encouraged, and will be accommodated as much as possible. Please check audition dates and other mandatory meetings/classes in Class Notes below and on the Canvas Music 189R home page.

Course Notes:

Students who enrolled in 189R for the fall 2017 semester, are currently in the NEC/Harvard dual program, or have been a past winner of the Parker Quartet Guest Award need not audition; however, all students must fill out the questionnaire and submit this through Canvas: <https://canvas.harvard.edu/courses/38504>. Any students who have enrolled in the course in past school years need to re-audition. Students intending to enroll in both the HRO and Music 189 must audition for each course separately. Students who do not meet the requirements below may take the course for PASS/FAIL credit, which must be done by petition after the first week of class. This course is only offered for a letter grade when students are involved in one or more of the following: music concentrator, enrolled in a music department course in the same semester, a member of a faculty-led ensemble in the same semester, a student of the NEC/Harvard dual program. Pre-formed ensembles are encouraged and will be accommodated as much as possible.

Class Notes:

Auditions for Spring of 2018 will be online video submissions only. Information about the audition requirements is posted on the Music 189R Canvas home page: <https://canvas.harvard.edu/courses/38504>. A video recording needs to be made and submitted between Tuesday, January 8 and Tuesday, January 23. All students will be notified by January 27.

Students are required to attend the following appointments:

Mandatory Meeting: Tuesday, January 30, 7 - 8 pm, Classroom 9 in the Music Building (3 Oxford St, Cambridge, MA, 02138)

6 Performance Classes including one Guest Performance Class:
February 20, 21, 27, 28, March 20 & 21 - All classes are 7-8:30 pm
except Guest Performance Class on March 20, 7 - 9:30 pm

Final Jury: Thursday, April 26, 9 am – 12 pm

Final Performances: April 28, 29 & 30 - Performances begin at 7 pm -
DATES TO BE CONFIRMED AND SUBJECT TO CHANGE

Pre-formed ensembles are encouraged and will be accommodated as much as possible.

Class Notes:

Students are strongly encouraged to attend live auditions. Video submissions will be considered.

Live audition dates will be held on Monday, August 28, and Tuesday, August 29, 9 am - 12 pm, Classroom 9 in the Music Building (3 Oxford St, Cambridge, MA, 02138).

Students should prepare about 7 minutes of two contrasting pieces. Pianists may be asked to sight-read. Students are requested to fill out, and hand in a questionnaire, which can be found on the Music 189R Canvas home page: <https://canvas.harvard.edu/courses/31102> under Audition Info.

Video submissions are due by August 29, 2017.

These videos are not expected to be professional quality. Think of this as the equivalent of performing a live audition in front of your smartphone or tablet. A video recording needs to be made and submitted between Monday, July 31 and Tuesday, August 29. In order for the recording to be valid, you must verbally state the date and time in your video recording before you perform. The recording is to be submitted as a live recording with no editing allowed and should be approximately 7 minutes of music that includes two works of contrasting styles. The live video along with a questionnaire must be submitted via Google Docs to thefourparkers@gmail.com. The questionnaire, which should be copied and pasted, can be found on the Music 189R Canvas home page: <https://canvas.harvard.edu/courses/31102> under Audition Info.

Students who are currently in the NEC/Harvard dual program, or have been a past winner of the Parker Quartet Guest Award need not audition. Music, Power, and the Collective Voice. In the past five years, Americans have heard a rising tide of voices calling for solidarity and division, pride and denunciation—even voices calling for silence from all the voices. It is a "vocal moment," and it resonates with a vast repertoire of practices of collectively "speaking up" which stretch far beyond our current time and place. This course builds a framework for understanding how a community of voices can come together in singing, chanting, and even using silence as a way of creating sound, to shift the flow of a movement, time, idea, protest, or identity. We will take our material from real events, ranging from the 1960s to the present, focusing particular attention on moments outside the rehearsed, refined, and controlled environment of the concert hall. Our case studies will be oriented around elements of performance, power, identity, and the voice itself, asking how these pieces come together to create consciousness and effect change. Coursework will draw on readings, listening, and issues from sociology, media studies, political science, cultural studies, cognition, and music; locations of engagement will include protests, social media, community trauma, sports, memorial, and monument.

This course will come together periodically with students from [Music 178r](#), Applied Music Activism taught by Esperanza Spalding, to share and cross-reference the focused learning of each.

Topic: Music, Power, & Coll Voice

Course Notes: There are no prerequisites for this course and students do not need a working knowledge of music theory to enroll.

This course will come together periodically with students from Music 178r, Applied Music Activism, taught by Esperanza Spalding, to share and cross-reference the focused learning of each.

Music and the Anthropology of Ethics and Morality. The seminar explores the literature on moral anthropology in conjunction with ethnomusicological case studies from Mali, Indonesia, Trinidad, and indigenous Canada. In the last ten years a burgeoning anthropology of ethics and morality has addressed in new ways longstanding issues of cultural relativism, diversity, resistance, and personhood. Building on Durkheim and Foucault, authors such as Zigon, Fassin, Laidlaw, Ortner, and others have drawn attention to the pluralist quality of moral diversity, the relationship of ethics and freedom, and the lived experience of morality and ethics in an ontological sense. At the same time scholars such as Weintraub, Rommen, Dueck, Diamond, Skinner, Shelemay, and Perman have raised ethical issues in ethnomusicology. The seminar convenes a conversation to synthesize and extend the insights of this literature.

Course Notes: Open to undergraduates with permission of instructor.

Roman de Fauvel. This seminar delves into the fascinating Roman de Fauvel allegory, copied in a sumptuous manuscript in the early decades of the fourteenth century and now housed at the Bibliothèque nationale de France. Replete with illustrations and musical insertions that add biting political commentary to the tale, the poem centers on a monstrous fawn-colored horse, Fauvel, who, with the help of Lady Fortune, has risen from his lowly stable to reign within a grand and glittering palace, fawned upon by his courtiers. Topics to be covered in this hands-on seminar include the manuscript's palaeography and codicology, its music notation and illuminations, the vernacular literary traditions from which it draws, political and social history, and close readings of its music and text.

Course Notes: Open to undergraduates with permission of instructor.

Aurality, Listening, and Hearing: Histories. This seminar will put critical pressure on the methods by which Sound Studies, as well as the Music-and-Science mainstream, construct histories of humans and sound, considering two fundamental questions: (a) whether it is possible (or not) to recover the listening or hearing of past historical subjects; and (b) what it means to use sound (or music) as an "epistemic tool." We will discuss the proper domains and/or limits of keyword flashpoints like "auditory knowledge," "listening practices," and "epistemes of acoustics." Making a distinction between aurality and listening on the one hand, and hearing on the other, means delving into the science of physiological hearing, and to that end there will be guest seminars led by faculty from the Harvard Medical School. We will be considering the ideology of deafness, as well as early (nineteenth-century) investigations of aural acuity. Mara Mills (NYU, History of Science, and Disability Studies) will be a guest seminar leader for this section; we will be reading (in advance of the book publication) selected work group papers from the October 2016 conference at the Max Planck Institute in Berlin, Testing Hearing. We will also examine assertions that Golden-Age sound technologies such as the phonograph ushered in culturally widespread paradigm changes in listening practices, as part of a general consideration of the feedback loops between technological artifacts and human experience.

Course Notes: Course open only to graduate students only.

Class Notes: This course is limited to graduate students only.

Music and Politics in the 20th and 21st Centuries. We will examine some basic questions, such as: what do music and politics have to do with each other? What are the means by which aesthetic products can be seen to relate to events, institutions, and ideological programs? How broadly can and should the "political" be construed? How has music been employed for political purposes during the twentieth century, and into the twenty-first? What roles has music played in protest movements? How do the political associations given to music change over time? We will look at musical works as well as text sources (journalism, letters, manifestos, etc.), and will think about media theory and theories of politics. One of the large issues that will accompany us through the entire seminar is how or even whether political (or indeed any other) meaning can be observed in music, and where that meaning resides. Student projects may focus on any kind of music from anywhere in the world today or on historical music.

Groove. This seminar explores the phenomenon of groove, both as a topic of musicological discourse and an element within various musical practices. Common as the notion may be, groove resists simple definition. In certain contexts, "groove" may refer to relatively large-scale recursive structures (to which James Brown's "Play the groove!" makes reference). In other contexts, "groove" refers to the effect engendered by minute variations between sonic elements (summoned when performing musicians talk about "being in the groove"). What, then, is the relationship between these two conceptions of groove? What tensions arise from the term's multiple meanings? And how might the notion of groove be generalized beyond the contexts of popular music? This course seeks to examine these and other questions, in part, by showing how the syntactical and the sensory, the formal and the phenomenological dimensions of groove work together to animate various musical genres.

Course Notes: Open to undergraduates with permission of instructor.

Classic Texts and Current Trends in American Music. Explores the historiography of American music, with emphasis on recent developments. What is "American" music, and how does it fit into the world? The course cuts across time and deals with diverse genres, with explorations of race as a binding thread. Class projects will focus on local archives and resources, as well as the quickly growing realm of digitized sources.

Course Notes: Open to undergraduates with permission of instructor.

Structures of Feeling After Descartes. This seminar traces a genealogy of affect theory from the birth of modernity to the present day, drawing attention to the surprising and central role that music plays within this tradition. Although the primary focus of the seminar is historical music theory, we will consider a wide range of texts under that broad rubric. During the early modern era, musical affect was theorized in books on aesthetics, manuals for musical composition, pamphlets debating the merits of opera, satirical writings, and in works of literature. Together we will discover the sonorous, performative, and radically material dimensions of these affect theories, as we follow their development from early accounts of the passions to nineteenth-century physiognomy to contemporary literary theory. Our primary goal is to better understand how the conceptual domains of music, sound, and affect have influenced each other during the past four centuries. Along the way, we will have occasion to meta-critically reflect on our current post-subjective or posthumanist moment, and on the place of affect and music within it.

Course Notes: Open to undergraduates with permission of instructor.**Additional Course Attributes:**

What does Music Theory mean in the 21st century? What are the current debates? How might the field change in the near future? We will examine recent and contemporary discussions in (and about) the field, and we will attempt to trace some of the recent history of the field in order to better understand the present state of affairs. Three or four prominent theorists will be invited to share their perspective.

Moving together: an examination of music and its role in communication and empathy. From military drill to partner dance to the consolations of song and the political solidarity of taste, moving with, being moved by, and producing music in all its forms is a singularly powerful vehicle for fostering cooperation and attention to one another. In this seminar we will focus on interpersonal aspects of music-making from sociological, psychological, neuropsychological, and music therapeutic perspectives."

Course Notes: Open to undergraduates with permission of instructor.

The Problem of Presence. This is a cross-disciplinary research seminar in critical improvisation studies, focusing on the three interrelated topics of interest from the last few decades: temporality, embodiment, and improvisation. Their common underlying "discovery" is the very problem of presence. In our studies, recent scholarship in African diasporic music and aesthetics will join a larger conversation on improvisation across multiple areas of inquiry in the arts, the sciences, and the humanities. Through this range of readings, we will examine improvisation as a central feature of individual and collective subjectivities.

Near Eastern Languages and Civilizations

Subject: Ancient Near East

Ancient Near East 102

Introduction to Mesopotamian Religion (114298)

Piotr Steinkeller

2017 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A survey of the history and major concerns of ancient Mesopotamian religion from prehistoric times down to the reign of Alexander the Great. Among the topics treated are the key figures of the Sumero-Babylonian pantheon, the major mythological compositions (read in translation), personal religion, cosmogonies and theogonies, magic and divination, Mesopotamian temples, and cult and ritual. The course makes rich use of ancient iconography.

Course Notes: Offered jointly with the Divinity School as 3661.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	For Undergraduate and Graduate Students

Ancient Near East 103

Ancient Lives (110014)

Gojko Barjamovic

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

62

What are the essential elements of human society? Have our fundamental conditions developed, and how? Can we use themes from ancient history to think about contemporary society and culture? These questions are in focus in this course on 'Ancient Lives', which explores the earliest human civilizations in the region commonly known as Mesopotamia (c. 3000-300 bce) in what is now Iraq, Iran, Syria and Turkey. Few elements in the way we live and organize ourselves today are to be taken for granted. There is, and has always been, a wealth of ways in which humans live. But biologically we are the same as our ancestors of 5000 years ago, at the dawn of history. Any likeness or difference between 'us and them' is therefore likely to be a product of history and culture. 'Ancient Lives' builds upon this realization to inspire a critical way of thinking about society in the broadest possible scope. Areas explored during the course are selected for their relevance across the range of contemporary life - they include freedom, music, public health, food, jurisprudence, trade, the visual arts, science, sexuality, religion and political power. You learn about how societies and individuals have dealt with change on multiple levels, from large-scale societal revolutions to personal transformation. Having taken this course, you will have gained a fundamental understanding and appreciation of human life in the broadest scope, as well as of your own life as a part of history. You will be able to critically assess contemporary discourses on the study of 'the other' in past and present; engage

with core concepts of human society, such as justice, beauty, value and belief on a broad historical base; be familiar with examples of classical social theory and thinkers through concrete cases in which their work has been applied to or shaped by the study of the past; and acquire skills in presenting scholarly work to a general audience.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Ancient Near East 120A

Introduction to the Hebrew Bible/Old Testament 1: Pentateuch and Former Prophets (118849)

Andrew Teeter

2017 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

A critical introduction to the literature and theology of the Hebrew Bible, considered in light of the historical contexts of its formation and the interpretive contexts of its reception within Judaism and Christianity. The course, the first part of a divisible, year-long sequence, will focus on the major biblical narrative traditions, the Pentateuch and Former Prophets.

Course Notes: Offered jointly with the Divinity School as 1102.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration

Ancient Near East 120B

Introduction to the Hebrew Bible/Old Testament 2: Latter Prophets and Writings (126065)

Andrew Teeter

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

A critical introduction to the literature and theology of the Hebrew Bible, considered in light of the historical contexts of its formation and the interpretive contexts of its reception within Judaism and Christianity. The course, the second part of a divisible, year-long sequence, will focus on the Latter Prophets and the Writings.

Course Notes: Offered jointly with the Divinity School as 1103.

Ancient Near East 130

The Birth of Biblical Religion (205115)

Israel Knohl

2017 Fall (4 Credits)

Schedule:

TR 0830 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The inscriptions found in recent decades "For YHWH and his Asherah" have created a heated debate about the birth of biblical religion. Was the Canaanite goddess Asherah indeed YHWH's consort? If so, when and how did the biblical God become a single and a jealous God as we see him in the Ten Commandments? And what about Moses and his share in the process? Is he an historical figure? Was he influenced by the Egyptian revolutionist Pharaoh Akhenaten as Sigmund Freud has argued in his book "Moses and Monotheism"?

In this course, we will deal with these and other fundamental questions related to the Bible's beginnings. Based on new readings of biblical and Egyptian sources we will offer new ways to solve the mysteries involved in the birth of biblical religion.

Course Notes: Offered jointly with the Divinity School as 1126.

Class Notes: Instructor: Israel Knohl (Hebrew University of Jerusalem)

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Ancient Near East 131

Readings in the Septuagint (112752)

Richard Saley

2017 Fall (4 Credits)

Schedule:

TR 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Aims to increase facility with Septuagint Greek by reading representative prose portions of the Septuagint and studying the peculiarities of the grammar inductively. The fundamentals of Hellenistic Greek will be reviewed as necessary.

Course Notes: Offered jointly with the Divinity School as 4215.

Recommended Prep: One year of Greek.

Additional Course Attributes:

Attribute	Value(s)
FAS: Meets Foreign Lang Req	Greek
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Ancient Near East 214

Studies in the Latter Prophets I: Isaiah, Jeremiah, Ezekiel (207227)

Andrew Teeter

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A close examination of select passages within the books of Isaiah, Jeremiah, Ezekiel and the Book of the Twelve, with particular attention to large-scale compositional strategies and principles of organization, to analogical patterns, to inner-scriptural relationships, and to the nature and function of allusion and other comparative structures within these texts.

Course Notes: The course presumes proficiency with Biblical Hebrew. Two years of Hebrew (or equivalent) required.

Class Notes: The course will meet in Divinity 211 (HDS)

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Ancient Near East 227

Critical Readings on Ancient History (205397)

Gojko Barjamovic

2018 Spring (4 Credits)

Schedule:

R 1130 AM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

A weekly seminar for graduate students (advanced undergraduates can apply) in which we read and discuss a selection of old and new key monographs (and a few key articles) relevant to the field of Ancient Studies. The seminar targets students in Assyriology, Classics, Divinity, Egyptology, Hebrew Bible and Religion, but others might also find it interesting and relevant. We rehearse skills in critical reading, writing scholarly reviews, debating, and (of course) engage with a massive amount of relevant literature that we would not otherwise find the time to read.

Armenian 162

Contemporary Armenian Culture: Members, Movements, Milieus (206899)

Lisa Gulesserian

2018 Spring (4 Credits)

Schedule:

MW 1030 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Armenian culture spans more than two millennia. In this introductory course, we will explore a tiny sliver of that long history by focusing on contemporary Armenian cultural productions from the 20th and 21st centuries. We will discover works of literature, art, music, film, and dance created by exceptional members in established centers of diasporic and national Armenian culture. Among others, we will visit with Arshile Gorky in New York, Yeghishe Charents in Yerevan, Krikor Beledian in Paris, Atom Egoyan in Toronto, William Saroyan in Fresno, Micheline Aharonian Marcom in Northern California, Leon Surmelian in Los Angeles, and Adiss Harmandian in Beirut. No knowledge of Armenian is required.

Introduction to Yiddish language, literature, and culture. In the course of the year, students will acquire a thorough grounding in Yiddish grammar and will develop strong foundational reading, writing, speaking, and comprehension skills. The course will introduce students to the 1000-year history of Yiddish culture in Eastern Europe, the United States, and around the world. Students will learn about the past and present of this culture through exposure to Yiddish literature, music, theater, film, radio, oral history, and the Yiddish internet—an introduction to the dynamic world of Yiddish culture and scholarship that exists today. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

For students with little or no knowledge of Yiddish. Additional sections at different times may be added as needed. Contact instructor if you have a scheduling conflict. Yiddish AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Class Notes:

Interested students please email: macohen@fas.harvard.edu

Literary and Visual Narrative in the Persian Epic Tradition (107672)

Justine Landau

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

Foundational to Iranian cultural identity and a masterpiece of world literature, the Shahnameh of Abolqasem Ferdowsi (ca. 940 – 1019) can be said to epitomize the essential features of Persian epic, much like Homer's Iliad and Odyssey for Greek. With its unique combination of mythical, heroic and historical components, the Persian Book of Kings is also one of the most widely illustrated narratives in the Islamicate arts of the book. Alongside the reading of the Shahname in Dick Davis' authoritative English translation, students will become acquainted with the great Persian epic as a living tradition of telling and retelling in written, visual and oral form. Topics include the elements of marvel, romance and ethics characteristic of the epic genre, and the relationship between the text of the poem and its manuscript illustrations.

Recommended Prep: Knowledge of Persian not required. Lectures and readings will be in English, and a separate section will be arranged for students with adequate reading knowledge of Persian.

Instructor Permissions: None**Enrollment Cap:**

n/a

The course focuses on the reading and understanding of a selection of texts from various genres within the corpus of modern Persian poetry and prose. Students will become acquainted with the major actors of the early Iranian literary modernity (late 19th - early 20th century) through a selection of excerpts drawn from their literary as well as theoretical output. The detailed understanding of the language at play among Iranian modernists will complement the study of the context and literary significance of these texts.

Recommended Prep: At least two years of Persian or equivalent.**Additional Course Attributes:**

Classical Persian Literature Seminar: Poetics and Rhetoric (159760)

Justine Landau

2018 Spring (4 Credits)

Schedule:

R 1100 AM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

This course explores the development of Persian literary theory from the 11th century onwards, with readings from the major authors who shaped the technical, didactic and philosophical trends in classical literary scholarship. Students will become acquainted with the tools and concepts of literary analysis developed in pre-modern Iran and exert their skills through the practice of close reading and discussion of select literary material. Authors include: Râduyâni, Keykâvus, Nezâmi 'Arûzi, Shams-e Qeys-e Râzi, Nasir al-Din Tusi, Jâmi, Hoseyn Vâ'e-e Kâshefi and more.

Recommended Prep: Three years of Persian or equivalent.**Additional Course Attributes:**

Modern Middle East 100

Introduction to the Modern Middle East (107349)

Malika Zeghal

2018 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to Middle Eastern Studies focusing on the modern period (19th and 20th centuries). Lectures will be broadly sequenced according to historical chronology but will be thematically organized. They will provide some historical context for each topic examined, as well as present specific examples through primary sources, visual sources, and numerical data when relevant.

This course is designed to give students an overall good grasp of the history of the modern Middle East and of some of the major themes in modern Middle Eastern Studies. Students will critically engage with some of the most important topics that resonate in that area of the world. We will cover topics such as reformism, economic development, colonialism and nationalism, authoritarianism and democratization, sectarianism, culture, gender, literature and the arts, as well as the role of religion in politics. Most of these topics, in one way or another, will speak to the construction of nation-states in the Middle East and to the challenges they have been confronting.

This is not a survey course. In particular, it will not be exhaustive in its coverage of the region in space or time, and in its coverage of topics. Students in search of a specific topic, country, or period are strongly encouraged to take a look at the syllabus prior to enrolling to make sure their specific interests will be covered.

Assigned readings will consist of primary and secondary sources. Students will be exposed to first-hand accounts by protagonists in the history of the Middle East (primary sources) as well as to the diversity of approaches that the scholarly literature (secondary sources) has taken across disciplines, e.g. anthropological studies, quantitative analysis, philology and textual studies. The larger aim of the course is to develop students' critical thinking in dealing with the history, cultures, politics, and political economies of the contemporary Middle East. Required for all concentrators in The Modern Middle East. Open to all undergraduate and graduate students. There are no prerequisites for this course.

Course Notes: A required course for undergraduates pursuing a secondary field in Modern Middle Eastern Studies.

Modern Middle East 158B

Modern Arabic Literature Seminar: Lebanese Civil War: Histories and Fictions (121372)

William Granara

2017 Fall (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Examines the roots and issues of the Lebanese Civil War (1975-90) and its continuing impact on modern Arabic fiction. The syllabus pairs realistic and romanticized representations of family, sectarianism, and gender binaries against the destruction and fantasy of the urban landscape. Themes include nostalgia and memory, exile and return. Films and documentaries will also be viewed.

Course Notes: Arabic helpful but not required. Open to both undergraduates and graduates.

Class Notes: Because the first day of FAS classes, Wednesday August 30, follows a Monday class schedule, the first meeting for this class is on Wednesday, September 6.

Additional Course Attributes:

Modern Middle East 200A

Approaches to Middle Eastern Studies (117327)

William Granara

2017 Fall (4 Credits)

Schedule: M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

Interdisciplinary seminar serves as an introduction to the major disciplines constituting Middle Eastern Studies, including history, political science, anthropology, literature and Islamic Studies. Faculty affiliated with Center for Middle Eastern Studies serve as guest lecturers.

Course Notes: Taught by members of the department. Required for students pursuing the AM in Middle Eastern Studies. Primarily for first-term students in the AM in Middle Eastern Studies program, although open to Graduate students in related fields.

Class Notes: Because the first day of FAS classes, Wednesday August 30, follows a Monday class schedule, the first meeting for this class is on Wednesday, August 30.

Historical Background to the Contemporary Middle East: Religion, Literature and Politics (110914)

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

What defines the Middle East? What long-term historical and cultural developments can we trace in the region? How do these affect contemporary global order and policy? This team-taught course in the NELC department will address these three fundamental questions of great present relevance by introducing students to the ancient and modern peoples, languages, cultures, and societies of Western Asia and North Africa. The study of this diverse region is uniquely aided by a deep-time perspective afforded by thousands of years of vibrant art, writing and cultural artefacts. Relying on the classic expertise integral to area studies, the course brings together faculty from a variety of disciplines – from history and archaeology to literature and philology, and from sociology and economy to the political sciences – in a common endeavour to explore the rich cultural complex of the region through four key topics: history, religion, literature and politics.

Course Notes:

Formerly NEC 97r, this course satisfies the NELC Sophomore Tutorial requirements. Taught by Members of the Department.

Class Notes:

One hour section meeting to be arranged.

Near Eastern Civilizations 299A

NELC Doctoral Colloquium: Research, Resources and Pedagogy (203473)

Shady Nasser

2017 Fall (2 Credits)

Schedule:

T 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This practical colloquium addresses major issues of research and teaching competence. Designed to introduce graduate students to the Ph.D. requirements, to methodological issues and examples of ongoing scholarship in NELC, it further offers opportunity for reflection on the art of teaching (leading discussion sections, designing syllabi, giving lectures, etc.). Questions covered will include: How to choose coursework? How to prepare for qualifying and general exams? What are the challenges of language training? How does one prepare and write a prospectus? How to use the library resources most efficiently? What type of investment does recourse to digital and quantitative methodology require? How best to prepare for professional life after the Ph.D., both inside and outside of academia? In addition, NELC faculty will informally present their respective fields (main issues and methods), in broad strokes through their current research, and advanced Ph.D. students will present their prospectus for discussion and feedback before submitting it to the faculty.

NEC 299A/299B is designed as a year-long course. Students should plan to complete both terms of this course (parts A and B) within the same academic year.

Course Notes:

Note: The Doctoral Colloquium will meet throughout the academic year (fall and spring semesters) once every other week. Sessions designed specifically for G1-G2 students, or alternatively, for G3-G4 students

(and until approval of the prospectus) will be clearly tagged; assessment (SAT/UNSAT) will be based on attendance of a targeted number of sessions for each level. Required of all NELC G1 and G3 students.

Class Notes: NEC 299A/299B is designed as a year-long course. Students should plan to complete both terms of this course (parts A and B) within the same academic year.

Subject: Jewish Studies

Jewish Studies 225

Messianism in Early Judaism and Christianity (205293)

David Stern

Israel Knohl

2017 Fall (4 Credits)

Schedule: W 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Messianism is one of the messiest, most fraught topics in the history of early Christianity and Judaism. This seminar will trace the evolution and development of the many different ideas of the messiah—his character, his fate, his role in history—from its Ancient Near Eastern beginnings through the Hebrew Bible into early Jewish and Christian tradition up until the early Middle Ages. We will also pay attention to parallel developments in the Greco-Roman world. Topics to be studied include the semi-divinity of the messiah, the idea of the suffering or dying messiah, and the relationship between messianism and apocalypticism. Readings will include primary sources as well as the relevant secondary literature. All readings will be provided in English translation and (in the case of primary sources) in their original languages.

Course Notes:

Offered jointly with the Divinity School as 1127. Depending on the make-up of the class, the instructors will make special provisions (like an extra class hour) for those students interested and able to read the primary sources in their original languages.

Class Notes:

**Co-taught by Professor Israel Knohl
Yehezkel Kaufmann Professor of Bible
The Hebrew University, Jerusalem
§**

Because the first day of FAS classes, Wednesday August 30, follows a Monday class schedule, the first meeting for this class is on Wednesday, September 6.

Hebrew 154

Divine Justice?: Discussions of Death Penalty in Talmudic Literature (111791)

Shaye J.D. Cohen

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Tractate Sanhedrin describes an idealized rabbinic legal system, in which the rabbis have control of criminal law, both in terms of defining and delineating punishable offenses as well in implementing their punishments, including the death penalty. We will use these discussions to explore rabbinic views surrounding the death penalty. We will also use this topic as a window into the rabbinic enterprise as a whole, such that the course can serve as an introduction to the study of rabbinic literature. Some questions to be explored include: What crimes do the rabbis designate as being worthy of the death penalty? How do rabbinic discussions of the death penalty complicate their assumptions about human dignity? How do these discussions interface with the Roman criminal system? How do they interface with biblical law?

Texts will be studied in translation.

Course Notes:

Cross-listed with Harvard Law School as HLS 2120.

Exodus 2 in Three Contexts: Seminar (156094)

Jon Levenson

2018 Spring (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A close critical reading of the account of the early life of Moses in three contexts: (1) the Hebrew Bible and the ancient Near Eastern world in which it took shape; (2) rabbinic Judaism in Late Antiquity; and (3) medieval Jewish commentary. Texts to be read in Hebrew include Exodus 2 and a selection of rabbinic midrashim and medieval commentaries on it.

Course Notes: Offered jointly with the Divinity School as 1826.

Recommended Prep: Three years of Hebrew or the equivalent (not a course for those lacking a secure grasp of Hebrew grammar).

Additional Course Attributes:

Hebrew 241

Talmudic Narrative (205531)

David Stern

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Talmudic literature is full of stories. This is surprising, even odd, given the fact that Talmud is primarily a legal literature. What purpose do these stories serve? How, in particular, does narrative serve legal discourse? How are these narratives to be analyzed and understood, both as examples of narrative "art" and within their legal context? In addressing these questions, we will look at narrative theory in general as well as contemporary scholarship on Talmud and Talmudic narrative, with a particular focus on Mishnah and the Babylonian Talmud. Assignments will include secondary readings on and about narrative more generally, but the focus of the course-- and the majority of class-time-- will be on reading the Rabbinic texts in their original language.

Course Notes: Offered jointly with the Divinity School as 3031. Knowledge of Hebrew is required but provisions will be made for students with different levels of proficiency. All readings in the original language will also be provided in English translation.

Class Notes: Please note Hebrew 241 should not be confused with Modern Hebrew 241R. Please note the difference in the course description, title, and instructor.□

Recommended Prep: Some knowledge of Hebrew is required, but provisions will be made for students with different levels of proficiency. Students with questions as to whether their Hebrew proficiency is sufficient should consult the instructor.

Subject: Aramaic

Aramaic B

Targumic Aramaic (127230)

Shaye J.D. Cohen

Miriam-Simma Walfish

2017 Fall (4 Credits)

Schedule:

M 0230 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Targumic Aramaic is designed to improve the student's ability to work with ancient Aramaic texts. The Aramaic texts studied in this course will be selected from the major Targums – Targums Onkelos, Neofiti, Pseudo-Jonathan, and others. Class-time will be devoted primarily to reading and analyzing the selected texts. In addition to emphasizing Aramaic vocabulary, morphology, and syntax, this course will explore the exegetical practices of the targumists in their respective Targums. Students will attain reading proficiency in Targumic Aramaic and experience the rich but complex literary nature of the Targums.

Course Notes: Jointly offered with the Divinity School as 4060.

Class Notes: First Meeting: Wednesday, September 6, 3:15-4:45 to finalize timing.

Recommended Prep: Two years of biblical Hebrew, or the equivalent; and one semester of Aramaic.

Shady Nasser

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will introduce students to the major writers, canonical works, and important literary movements of Arabic Literature from late antiquity up to the modern period. The course will be structured thematically with special focus on the historical context and cultural tradition within which literary works fit and resonated. The course will consider the development of various literary genres over time (poetry and qasida form, narratives, fiction, Belles-lettres, maqama, shadow plays and Drama, etc.). Selected works of literature will be read in translation but students with Arabic may work with the original texts in a separate section. Texts will often be discussed vis-à-vis parallel themes in other works of literature whenever relevant (e.g. The Qur'anic and Biblical Joseph, Ma'arri's Epistle of Forgiveness and Dante's Divine Comedy, Ibn Battuta and Marco Polo's travelogues, etc.) with special attention to the influence of Western Literature on Modern Arabic poetry and prose.

Course Notes:

The course is open to both undergraduates and graduate students.

Social History of British and French Colonialism in the Middle East (119668)

Salim Tamari

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will examine the main features of the French and British Mandates in the Middle East between the two world wars, and their

consequence on state formation in the post-war period. The focus is on greater Syria (Lebanon, Syria, Palestine and Tran-Jordan), but there will be references to the French and Italian presence in North Africa. The course addresses the debate about the nature of Ottoman rule in the Arab East (Bilad al Sham) and the consequences of its defeat in WWI. It will also examine the post WWI and the growth of regional states from Sykes Picot accords, as well as the meaning of regionalism in current wars in Syria and Iraq. The following themes will also be covered: 1. Ottomanism and Arab Nationalism, 2. The formulation of French and British Colonial policies after Sykes Picot. 3. The nature of social transformations in greater Syria during the Mandates. 4. The colonial city and its features. 5. Popular Movements, resistance and counterinsurgency during the Mandates. 6. Biographic literature and the study of colonialism in the Middle East. 7. The Peasantry in greater Syria during colonial rule. The course will examine the impact of the colonial period on the make-up of the Jordanian, Syrian and Lebanese states in the 1950s and 1960s, as well as on the manner in which the partition plan of 1947, led to the creation of the state of Israel.

Class Notes: First meeting will be held in 38 Kirkland, Room 208.

Recommended Prep: Knowledge of Arabic and basic familiarity with Islamic law.

(Auto)biography and Social History (120313)

Salim Tamari

2018 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This seminar will attempt to investigate problems in the modern and early modern urban social history of the Middle East through the prism of biography and autobiographical literature. The bulk of the readings will be in the original Arabic texts. Participants will read and discuss a number of interpretive texts as well as original diaries, memoirs and autobiographies from the Arab countries, Turkey and Iran. The themes covered include: The emergence of notions of the self in the late Ottoman period; Religiosity and worldliness as dominant themes in intellectual biographies; The experience of the urban for small town and village migrants; Women's biographic narratives, and the issue of class and social insularity; Modernity as experienced at the margins of society: cafe culture, musicians, and bordellos; slave autobiographic narratives; The disintegration of communal solidarities; childhood narratives, and the experience of childhood; and finally, the discovery of Europe and the European in early modernist biographic and autobiographic narratives.

Class Notes: Course will be held in 38 Kirkland, Room 208.

Recommended Prep: At least three years of Arabic or advanced proficiency in Arabic.

Islamic Civilizations 145B

Introduction to Islamic Philosophy and Theology: The Modern Period (19th and 20th centuries) (109521)

Khaled El-Rouayheb

2017 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course is a continuation of Islamic Civilizations 145a but may be taken independently. It explores the thought of some of the major Islamic philosophers and theologians in the 19th and 20th centuries: Muhammad Abduh, Muhammad Iqbal, Said Nursi, Abu l-Ala Maududi, Sayyid Qutb, Ali Shariati, Murtaza Mutahheri and AbdolKarim Soroush.

Course Notes:

Offered alternate years with Islamic Civilizations 145a. Though the two courses can be taken in either order, 145a covers the 8th-17th centuries and 145b covers the 19th-20th centuries. Offered jointly with the Divinity School as 3602b.

Qur'anic Exegesis and Prophetic Tradition (205290)

Shady Nasser

2017 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to Qur'anic exegesis and prophetic tradition (Hadith). A survey of different schools of Qur'anic interpretation within the Islamic tradition. The course introduces the discipline of Hadith and the role it plays in Qur'anic commentary. Topics include: Hadith, transmission, collections of sound Prophetic traditions, Sunni and Shii Hadith collections, Schools of Qur'anic Exegesis, Esoteric interpretation, Modern Interpretation, Qur'an, science and modernity.

Course Notes:

Offered jointly with the Divinity School as 3381. No previous study of

Islam or Arabic is assumed. Students who previously took Islamic Civilizations 158 [now IC 158x / HDS 3376] may enroll in this course for credit.

Islam, Modernity and Politics (109243)

Ousmane Oumar Kane

2018 Spring (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

18

The aim of this seminar is to study the evolution of Islamic thought and political practices in Muslim societies from the 19th to the early 21st centuries. Attention will be devoted to the patterns of interaction between the Muslim World and the West because it is our assumption that these patterns contribute to influence ideological formations and modes of religious/political mobilizations in the Muslim World. By the end of the eighteenth century, much of the Muslim World was in "decline" whereas European imperial powers, mainly France and Great Britain, were on the rise. The course will explore the response of Muslim societies and intellectuals to the rise of European prominence. The major 19th century reformist movements that appeared in the Muslim World will be discussed, ranging from movements advocating mild reform to those rejecting all influence of "Western civilization" and advocating a return to the Tradition of Muhammad. In the twentieth century, virtually all the Muslim World came under European colonial domination. During colonial rule and after, the Muslim world experienced major transformations which affected the nature and administration of law, politics and society. It is in this context, that the new Islamic revival that some have called "Islamism" was articulated as an alternative to Westernization. The course will address the rise of contemporary "Islamism," as an alternative to Western domination and modernization/Westernization. The major theorists of political Islam as well as the different trajectories of "Islamism" in diverse Muslim societies will be covered. The impact of political Islam in the West will also be addressed. The final part of the course will assess the trajectories of political Islam and address the ongoing debates on post-Islamism, secularism and modernity.

Course Notes: Offered jointly with the Divinity School as 3368.

Class Notes: Enrollment limited to 18.

Muslim Societies in South Asia: Religion, Culture, and Identity (111918)

Ali S. Asani

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

South Asia (India, Pakistan, and Bangladesh) is home to the largest concentration of Muslims in the world. This course introduces students to a variety of issues that have characterized the development and evolution of South Asian Muslim communities. While the course will briefly survey the historical development of Islamic and Muslim institutions in the region, its central focus will be the formation of identity - as expressed through language, literature, and the arts - among South Asian Muslim communities. The issues that influence these identities will be considered with regard to the constantly evolving religious and political contexts of South Asia. Special attention will be given to recent attempts to redefine Muslim religious identities through reform and revivalist movements as well as state policies of Islamization. We will look at the impact of these policies on issues such as the status of Muslim women, relations between Muslim and non-Muslims and the growth of sectarian tensions between Muslim groups. The course is appropriate for those who wish to acquire a bird's-eye view of the Islamic tradition in South Asia, as well as those interested in exploring some of the issues confronting Muslim populations in contemporary times.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for either Culture and Belief or Societies of the World, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. Offered jointly with Divinity School as 3625.

Critical Perspectives on the Dynamics and Development of Islam in Africa (205305)

Ousmane Oumar Kane

2017 Fall (4 Credits)

Schedule: R 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap: n/a

An estimated 450 to 500 million Muslims live in Africa—close to a third of the global Muslim population. The overwhelming majority of them live in the northern half of the continent, above the equator. The spread of Islam increased the contact between the peoples of North Africa, the Sahara, and parts of sub-Saharan Africa. The course is designed to provide an understanding of the spread of Islam and the formation and transformation of Muslim societies in Africa. It is organized in two parts. The first part of the course will focus on the history of Islamization of Africa, and topics will include the ways in which Islam came to Africa, the relationships of Islam to trade, the growth of literacy in Arabic and Ajami, the rise of clerical classes and their contribution to State formation in the pre-colonial period. The second part of the course will feature guest lecturers who will present cutting edge research on the transformation of Islam in postcolonial Africa.

Course Notes: Offered jointly with the Divinity School as 3357.

Islamic Civilizations 181

Islam and Religious Diversity (207167)

Nicholas Boylston

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 15

The problem of religious diversity recurs in all of the major branches of Islamic thought and appears in complex permutations in diverse cultural contexts. Focusing primarily on pre-modern Islam, this course invites students to investigate perspectives on the religious other in the Quran, Islamic law, theology, philosophy and Sufism. In the final portion of the course we will look at Muslim Spain, Mughal India, and the Muslim-Confucians of late imperial China as examples of how these complex dynamics played out on the ground. The larger aim of this course is for students to develop interpretive skill in dealing with the internal complexity of a number of Islamic discourses and contexts by pursuing a single problematic across them. To this end the course will be taught in seminar format and participants will be encouraged to engage creatively with primary and secondary sources to develop their own scholarly points of view.

Recommended Prep: One course dealing with Islam or Instructor's Permission.

Islamic Civilizations 182

Love, Sanctity and Authority: An Introduction to Shii Islam (207168)

Nicholas Boylston

2018 Spring (4 Credits)

Schedule: R 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap: n/a

Though they are minority traditions often overlooked in the academy, the major branches of Shii Islam (Twelver, Ismaili and Zaydi) provide a valuable entry point into the study of those aspects of the Islamic tradition that are most constitutive and most contested. After examining the historical contexts in which these three branches arose, the course will address Shia theologies, rituals, law, spiritualities and notions of authority, comparing views across the three branches and highlighting their internal differences through history. We will inquire into what, if anything, unites the concerns of each branch, focusing on conceptions of Imamate and the central concept of wilāya/walāya, which means love, political and spiritual authority, filiation, sanctity, and proximity to God. In the final unit of the course we will examine the emergence of modern Shii social configurations and state building and their relationships to the doctrines and practices discussed throughout the class, focusing on Twelver Iran and Zaydi Yemen.

Course Notes: Additional discussion hour to be arranged.

Subject: Akkadian

Akkadian AA

Introductory Akkadian (114320)

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to the Semitic language of Akkadian, primarily through the Old Babylonian dialect and cuneiform writing system as used during the time of Hammurabi (c. 1750 BCE). Students learn the fundamentals of grammar and the writing system, as well as the most common cuneiform signs in official and cursive script. Readings span a variety of genres, including private letters, judicial documents, literary and religious texts, divinatory compendia, legal code, and royal inscriptions. The course also briefly introduces students to examples of texts from other periods and dialects of the Akkadian language for cultural and comparative purposes. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Akkadian AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Enrollment Cap:

n/a

More than 3,000 years old, the Standard Babylonian *enuma elish* is one of the most influential texts of the Mesopotamian cultures. Although it is mostly known as "Babylonian Creation Myth" (e.g. Talon 2005, Lambert 2013), it actually focuses on Marduk's rise to divine kingship. Moreover, it also develops a peaceful eternal world order – the *Pax Mardukiana* (Gabriel 2014). This course aims at understanding the main narratives, central ideas and underlying assumptions of the composition.

We will read the original Akkadian text using the score edition of Kämmerer and Metzler (2012), which specifies the textual variations of each manuscript. We will also explore Lambert's composite transliteration (2013) since it comprises more manuscripts than Kämmerer and Metzler.

We will start with reading the epilogue of the text, which provides us with crucial information on teleology and pragmatics of the epic. We will then read larger passages following their textual order. Special focus will be given to structural patterns (i.e. a parallel and a circular structure) and their link to the text's semantics. This facilitates tracking down the main lines of the story and reconstructing the various phases of Marduk's rise to divine kingship. We will see that Marduk's rule also serves to create a stable and peaceful order for all gods and all men. Finally, the course will reveal the high standard and the intriguing complexity of the composition.

Recommended Prep: Akkadian grammar, basic vocabulary, knowledge of cuneiform script.

Subject: Egyptian

Egyptian AA

The Language of the Pharaohs: Introduction to Egyptian Hieroglyphs I (126691)

Peter Der Manuelian

2017 Fall (4 Credits)

Schedule: MW 0130 PM - 0259 PM**Instructor Permissions:** None**Enrollment Cap:** n/a

This language course explores the fundamentals of Middle Egyptian, the classical stage of Egyptian hieroglyphs used throughout much of ancient Egyptian history. Lessons in the Egyptian writing system, grammar, and culture, with weekly vocabulary and exercises, will introduce the language and verbal system in a systematic fashion. By the end of the semester, students may begin to read selections from Egyptian classic stories and historical texts. Visits to the Semitic Museum and the Museum of Fine Arts, Boston, in order to read ancient hieroglyphic inscriptions on the original monuments, may also be included.

Course Notes: Continues as Egyptian Ab. Offered jointly with the Divinity School as 4120.

Additional Course Attributes:

Attribute	Value(s)

A Tale of Two Empires: The Sumerian and Inca Civilizations in Comparative Perspective (206982)

Gary Urton

Piotr Steinkeller

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course takes a comparative perspective on the study of two of the great civilizations of the ancient world – the Sumerians, in ancient Iraq, and the Incas, in the central Andes of South America. While Sumerian civilization stood near the beginning of a long line of descendant states and empires in the ancient Near East, the Incas were at the end of a long line of evolution of a number of earlier states and empires. One question we will examine is what effect this difference in the position of our two societies with respect to earlier or later societies has on our view of the accomplishments of each civilization. We will examine what was similar and what was different about these two ancient societies in their respective settings; what we can learn about the nature and organization of ancient empires from a comparative study of these two societies; and what a study of these two societies can teach us about the meaning of "civilization" from comparative, cross-cultural perspectives.

Neurobiology - Undergraduate 101BA

Beyond Neurons: The Role of Glia in Brain Function and Dysfunction (205098)

2017 Fall (2 Credits)

Schedule:

T 0600 PM - 0729 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The study of glia cells will be approached from the context of their role in disease as a means to better understand their important function in the brain. We will compare and contrast the various types of glia cells and their roles in the healthy brain as well as in various neurological and psychiatric diseases with an emphasis on neuroimmunology in particular. We will draw from primary literature in both basic sciences and translational medicine. Students will evaluate and critique contemporary scientific claims about glia cells informally in class discussions as well as formally during journal club presentations, both of which

are important skills used every day by scientists. At the conclusion of this course, students will be able to explain the multifaceted roles of glia in the central nervous system.

Requirements: Prerequisite: (LPS A OR LS 1A) AND (MCB 80 OR MCB 81)

12

Animals exhibit many innate, sex-specific behaviors that provide useful models to study the underlying neural circuits, and sex differences in the nervous system also have important implications for human health. Through discussions, activities, and lectures, this course introduces students to various aspects of sexually dimorphic neural circuits across model organisms, while emphasizing critical thinking and effective science communication.

Requirements: Prerequisite: (LPS A OR LS 1A) AND (MCB 80 OR MCB 81)

Additional Course Attributes:

Attribute	Value(s)

Neurobiology - Undergraduate 101HA

Visual Circuits: How Neurons and Networks See (205102)

2017 Fall (2 Credits)

Schedule:

M 0700 PM - 0829 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Vision is arguably our most dominant and most important sense. The visual system processes vast amounts of data continuously, and it can identify relevant objects in our complex environment faster and more accurately than any artificial system. Yet, as recently as 2012, a revolution in computer vision has begun to allow computers to approach human level performance, in some cases even outperforming humans. What led to this improvement? Deep neural networks: several neural networks stacked on top of each other. These networks have some striking similarities to circuits of the human visual system, and by studying them, we can learn about how our brains' own circuits function. In this class, we will learn both the fundamentals of the visual system circuitry (from retina to the visual cortex) as well as the structure and logic of neural network algorithms. In doing so, we will learn how artificial and natural networks can parse and recognize objects, detect direction and speed of motion, and modulate attention. We will be studying neural networks conceptually, so no prerequisites in math or computer science are needed.

Requirements:**Prerequisite: (LPS A OR LS 1A) AND (MCB 80 OR MCB 81)**

Additional Course Attributes:

Attribute	Value(s)
Full Year Course	Indivisible Course

Neurobiology - Undergraduate 120

Introductory Computational Neuroscience (205105)

Kenneth Blum

2018 Spring (4 Credits)

Schedule:

TR 0200 PM - 0329 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

This course introduces students to abstract models of what and how neurons compute and concrete analyses of real neurons in action. Topics include network models of sensory processing and memory, and techniques to compare these models with real experimental data. This course will emphasize students' contributions and classroom interactions. Programming projects will be a significant aspect of the course, so programming experience (Python, Matlab) is recommended. Familiarity—but not expertise—with linear algebra and differential equations will be assumed.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Neurobiology - Undergraduate 130

Visual Recognition: Computational and Biophysical Perspective (160750)

Gabriel Kreiman

2017 Fall (4 Credits)

Schedule:

M 0330 PM - 0529 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Examines how neuronal circuits represent information and how those circuits are implemented in artificial intelligence algorithms. Topics: architecture of visual cortex, neurophysiology, visual consciousness, computational neuroscience, models of pattern recognition and computer vision.

Course Notes:

Course website: Neurobiology 230, Visual Recognition

Neuro 130 cannot be taken if Neuro 230 has been taken. Neuro 130 cannot be taken concurrently with Neuro 230.

Recommended Prep:

Math (Maa/Mab, Math 1A,1B, Math 19 a or equivalent). Physical Sciences 1. MCB 80.

Requirements:

Prerequisite: ((LifeSci 1A OR LPS A) AND (LifeSci 1B)) AND may not be taken at the same time with NEURO 230

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Independent Study 1

Independent Study (150200)

Adam Muri-Rosenthal

Timothy Smith

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Independent Study is designed to provide credit for field research, academic study not available in regular course work, or practice or performance in the arts. What distinguishes a suitable project is the application of analytical skills to the object of Independent Study. Any sophomore, junior, or senior whose previous record is satisfactory may petition to undertake Independent Study for non-letter-graded credit. Students may access the petition for Independent Study on the [Office of Undergraduate Education website](#).

Course Notes:

A student may petition to take up to a total of four, four-credit courses of Independent Study. Independent Study courses are subject to the same rules for dropping and withdrawing as any other course. The petition requires the signatures of a qualified adviser and the student's resident dean, as well as an outline of the student's proposed project. It must be submitted to the Allston Burr Resident Dean for approval, ordinarily in the first week of the term.

Additional Course Attributes:

Independent Study is designed to provide credit for field research, academic study not available in regular course work, or practice or performance in the arts. What distinguishes a suitable project is the application of analytical skills to the object of Independent Study. Any sophomore, junior, or senior whose previous record is satisfactory may petition to undertake Independent Study for non-letter-graded credit. Students may access the petition for Independent Study on the [Office of Undergraduate Education website](#).

Course Notes: A student may petition to take up to a total of four, four-credit courses of Independent Study. Independent Study courses are subject to the same rules for dropping and withdrawing as any other course. The petition requires the signatures of a qualified adviser and the student's resident dean, as well as an outline of the student's proposed project. It must be submitted to the Allston Burr Resident Dean for approval, ordinarily in the first week of the term.

Instructor Permissions: None

Enrollment Cap:

n/a

An integrated approach to the diversity of life, emphasizing how chemical, physical, genetic, ecological and geologic processes contribute to the origin and maintenance of biological diversity. Topics to be covered include the evolution of metabolic pathways, multicellularity and structural complexity; causes and consequences of differences in diversity over space and time; the role of species interactions (including symbioses) as an evolutionary force; and the evolution of humans and their impact on the environment.

Course Notes:

Knowledge of introductory molecular, cellular biology, and genetics is recommended. This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems. 2.5 hour mandatory sections and field trips.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Science of Living Systems

Instructor Permissions: None

Enrollment Cap:

n/a

Fundamental concepts in genetics and genomics forming a critical foundation for biology approached from two perspectives: (1) as a body of knowledge pertaining to genetic transmission, function, mutation, and evolution in eukaryotes and prokaryotes; and (2) as an experimental approach providing a toolkit for the study of biological processes such as development and behavior. Topics include structure, function, transmission, linkage, mutation, and manipulation of genes; genetic approaches in experimental studies of biological processes; and analysis of genomes in individuals and populations. Related ethical issues also discussed include genetically modified organisms, gene therapy, genetic testing, personalized medicine, and genetic privacy.

Biology and Evolution of Invertebrate Animals (144597)

Gonzalo Giribet

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: 14

Introduction to invertebrate diversity, will cover the development, adult anatomy, biology and evolutionary relationships of the main animal phyla including sponges, mollusks, annelids and arthropods among others. Special emphasis is placed on understanding the broad diversity of animal forms and their adaptations to different ecosystems and how these phenomena shape animal evolution. Lectures will be complemented with a mandatory weekly lab and a field trip to different areas of outstanding marine diversity in the Caribbean.

Course Notes: Field trip to the Caribbean for research during spring break.

Recommended Prep: LS1b, OEB 10, OEB 53 or permission of instructor required.
Lab component: Wednesdays, 3:00pm-6:00pm, Spring 2016

Additional Course Attributes:

Geobiology and the History of Life (130331)

Andrew Knoll

2018 Spring (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Within our solar system, Earth is distinguished as the planet with life. Life was born of planetary processes, has been sustained for some four billion years by planetary processes, and through time has emerged as a set of planetary processes that is important in its own right. In this course we will investigate the ways that Earth and life interact, focusing in particular on the biogeochemical cycles of major elements. This will provide a framework for interpreting the history of life reconstructed from fossils and phylogeny.

Course Notes: OEB 56 is also offered as EPS 56. Students may not take both OEB 56 and EPS 56 for credit.

Class Notes: M., W., F., at 10, and a weekly three-hour lab to be arranged, and one field trip.

Recommended Prep: EPS 21, 22, or Life Sciences 1b; or permission of instructor.

Additional Course Attributes:

How to Build an Animal (204989)

Mansi Srivastava

Stephanie Pierce

2017 Fall (4 Credits)

Schedule:

T 1000 AM - 1129 AM

R 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Ever wonder why you and other animals have eyes? What about teeth or even skin? "How to Build an Animal" answers your questions by exploring the wonders of animal biology. Each week, we consider a prominent feature of animal anatomy; study its variation in form and function; and how it's made during embryonic development. To facilitate student learning, each topic is accompanied by a 'hands-on' activity that illustrates the concepts discussed in the lecture. Further, the course introduces a number of scientific areas, including comparative anatomy, functional morphology, phylogenetics, genomics, and experimental embryology. The overall goal is to provide a basic understanding of animal evolution and development and how these processes combine to shape the diversity of life on Earth.

Class Notes:

This course is made up of a traditional lecture on Tuesday and a hands-on activity on Thursday, plus a Discussion section on Friday. The first class meeting will take place on Thursday, August 31, in MCZ 101. This location only applies to the first Thursday; subsequent Thursday meetings will be held in NW B137.

Charles Davis

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

An introduction to the diversity and evolution of vascular plants. The course focuses mainly on flowering plants because of their dominant role on the earth, but lycophytes, ferns, and gymnosperms are studied as well. A phylogeny of vascular plants provides the framework for their evolution and diversification. Related subjects, including plant habitats, biogeography, phylogenetics, herbaria, nomenclature, and pollination biology are also presented in lecture and laboratory.

Course Notes: There will be a weekly 3-4 hour lab on Friday morning or Thursday afternoon; time to be determined at first class meeting. There are two midterms, a final, and frequent lab quizzes. Included in the course will be a spring break field trip to eastern Brazil in the state of Bahia to study plant diversity in their natural setting.

Recommended Prep: OEB 10 or permission of instructor.

Organismic & Evolutionary Biol 104

The Mouse in Science and Society (161184)

Steven Niemi

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Mice remain the most popular vertebrates used in biomedical R&D today, with tens of millions of lab mice produced annually in the United States alone. At the same time, mice are commonly studied for their own characteristics that continue to enhance our knowledge about innate mammalian behavior, predator-prey dynamics in changing ecosystems, and reservoir hosts for emerging diseases, to name a few. This course intends to provide a strong foundation in mouse biology, both basic and applied, as well as exposure to cultural and political aspects of the current impact of mice (real or fictitious) on contemporary societal values. Instructors: Steven M. Niemi and Kathleen Pritchett-Corning.

Organismic & Evolutionary Biol 130

Biology of Fishes (140830)

George Lauder

2018 Spring (4 Credits)

Schedule:

MW 1100 AM - 1229 PM

Instructor Permissions: Instructor

Enrollment Cap:

45

Fishes inhabit diverse aquatic environments including deep seas, intertidal zones, coral reefs, polar waters, the vast Amazonian basin, and great East African lakes. A single fish species may occupy diverse environments through extraordinary long distance horizontal and vertical migrations. To explore this unparalleled diversity, the course emphasizes bridging traditional academic boundaries with integrative analyses of the biology underlying rapid evolutionary radiations and stasis.

Genes and Behavior (145857)

Yun Zhang

2017 Fall (4 Credits)

Schedule:

MW 0300 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Behavior is inheritable and regulated by genes. This lecture course explores the causal links between the genes encoded in the genome and various behaviors, aiming to provide mechanistic understandings on how gene products control and influence behavioral outputs. The topics of the lectures cover both important findings as well as major research approaches in the field. The behavioral traits in discussion include olfaction, mechanosensation, foraging, circadian rhythm, aggression, courtship, sleep, social recognition, learning and memory, etc. The organisms that we will discuss include invertebrates, vertebrates and humans. Life Science 1a.

Course Notes: The class will include a new 4-week lab component for research experience on genetic basis of behavior in Fall 2016.

Organismic & Evolutionary Biol 157

Global Change Biology (143485)

Paul Moorcroft

James Mccarthy

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course examines how natural and anthropogenic changes in the earth system are affecting the composition and the functioning of the world's land and ocean ecosystems. Topics include: the ecological impacts of natural and anthropogenic changes in the earth's physical environment, and the effects of introduced species, species extinctions, land-use change, agriculture, and fishing.

Recommended Prep: OEB 10 or OEB 53 and Mathematics 1a required. OEB 55 is recommended.

Herpetology (145020)

James Hanken

2018 Spring (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to the biology of amphibians and reptiles. Lectures and laboratories examine the

morphology, systematics, natural history, behavior, ecology, evolutionary relationships, and biogeography of all major taxa.

Course Notes: LS 1b or OEB 10 recommended; students who haven't taken either course may require additional study on topics with which they are unfamiliar.
Freshman only admitted under exceptional circumstances.

The course also has a mandatory lab component in addition to the lecture times. This lab section will be scheduled for Wednesdays, 2:30-5:30 PM. A second weekly lab session may be added if warranted by a large enrollment.

In addition, the course is planning an optional week-long field trip during Spring Break.

Biology and Diversity of Birds (143846)

Scott Edwards

2018 Spring (4 Credits)

Schedule:

MW 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

An introduction to the biology of birds. Covers the fossil record and theories for avian origins, physiology and anatomy, higher-level systematics and field characters of the ~27 orders, speciation processes, nesting and courtship behavior, vocalizations, mating systems and sexual selection, cooperative breeding, demography and conservation. Optional field trip during spring break. Laboratories will consist of gross anatomy, bird watching excursions in the Cambridge area, field techniques and specimen preparation, and systematic study of avian groups using the collections of the Museum of Comparative Zoology.

Course Notes: OEB 10 or OEB 53 or permission of the instructor. Students in their third and fourth years are encouraged to enroll in the course.

Organismic & Evolutionary Biol 200

The Evolution of Stem Cells and Regeneration (204479)

Mansi Srivastava

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Among the many unique challenges that multicellular organisms face relative to unicellular ones is how they deal with the death (or loss) of a part of the organism. Should the organism heal and continue life without the missing part, or should it regrow that part? The vast majority of animal (and plant) lineages have species that will replace the missing portion, i.e., they are capable of regeneration. Despite the phylogenetically widespread nature of regeneration, very little is known about any universal cellular, molecular and genetic principles, if any, that control this process. In pursuit of these principles, the course

will delve into the literature from a diverse range of species. We will focus on stem cells, which enable the production of new cells that reconstitute the missing tissues. First, we will address what it means to be a stem cell. We will explore how molecular studies of adult stem cells in species ranging from jellyfish to humans are revealing essential and highly evolutionarily conserved molecular mechanisms for stem cells. Second, we will compare the features of adult stem cells to those of other multipotent cells, such as early embryonic cells. Third, we will consider how different species maintain pluripotent stem cells versus those with restricted potential, i.e., lineage-restricted stem cells. We will explore these ideas through the critical reading of the primary literature, including both classical and very recent papers in stem cell biology. Students will obtain a deep understanding of the main concepts and methods concerning the study of stem cells and will become familiar with comparative approaches as applied to stem cell biology and regeneration.

Course Notes: Course is open both to graduate students and to undergraduates who have taken LS1a and LS1b, LS50, or SCRB10, or by permission from the instructor.

Organismic & Evolutionary Biol 201

Introduction to experimental design and model building for ecologists and evolutionary biologists (205662)

Elizabeth Wolkovich

2017 Fall (4 Credits)

Schedule: W 1030 AM - 1229 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This class will cover the fundamentals of model building with a focus on regression, for data gathered from experiments as well as other approaches. The course will move briskly through basic statistics (averages, standard errors) and linear regression then focus on experimental design, model building and causal inference, covering sample size decisions, missing data, model verification and validation, and randomized experiments. Inference will be Bayesian-focused.

Recommended Prep: Open to graduate students who have taken OEB 153 or equivalent or by permission of the instructor. Students must be comfortable with R, Python or equivalent, or planning to learn either language quickly on their own during the course.

Additional Course Attributes:

Attribute	Value(s)

Organismic & Evolutionary Biol 217R

What Makes a Rodent? (160459)

Stephanie Pierce

2018 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

6

A student directed course that explores the origin and evolution of rodents through a mixture of literature discussions, cadaveric dissection and fossil observation. Discussion topics will be broad and far reaching, including such things as: evolutionary dynamics, ecomorphology, feeding and locomotor performance, disease, or even use as a model organism. Alongside in class discussions, students will participate in dissecting cadaveric material with the aim to build hands-on anatomical knowledge.

Course Notes:

Prerequisite: With permission of instructor. Seminar for upper undergraduates and graduate students. Students are encouraged to get in touch with the course instructor early on (well in advance of the spring term) as course enrollment is limited to six students maximum.

The specific animal of focus changes regularly. Past topics include "What Makes a Cat?"

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Phylogenetics and Phylogeography in the Era of Genomics (143845)

Scott Edwards

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The course will review the recent literature on methods of analysis in phylogenomics and phylogeography, with particular attention to analysis of large-scale data sets; accommodating gene tree heterogeneity; adequacy of models at the level of DNA sequence evolution and demographic history; and estimation of critical parameters of population history, such as phylogenetic relationships, reticulate evolutionary histories, rates of gene flow and species boundaries. Weekly sessions will consist of presentations and discussions led by students and by international experts, including hands-on sessions working with state-of-the-art software.

Course Notes: Participants should have an account on the FAS Research Computing Odyssey cluster prior to course beginning.

Recommended Prep: OEB 53, OEB 181, OEB 125 or equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Organismic & Evolutionary Biol 277

Topics in Symbiosis: The Human Microbiome (146387)

Colleen Cavanaugh

2018 Spring (4 Credits)

Schedule:

W 0130 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Symbiosis between bacteria and eukaryotes is a globally important phenomenon that has powerful effects on the physiology, ecology, and evolution of all living organisms. Symbioses can also be considered to have evolutionary potential in that the partnership can result in a "new organism", charging us to think about biodiversity on a different level. Within the last decade, it has become evident that the human microbiome, collectively the communities of microorganisms that live on and in us, are intimately connected with human health. With colonization at birth, and developing throughout our lifetime, the human microbiome provides many important services including contributing to our nutrition and to our immunity, and protecting us from pathogens. The human microbiome has also been implicated in numerous diseases including diabetes, cancer, obesity, inflammatory bowel disease, and mental disorders. This course will provide a broader understanding of these resident microbes and the ecosystems in which they reside with critical review and discussion of current research including differences between healthy and diseased states. Discussions and presentations will draw heavily from the primary literature, focusing on the most recent discoveries in the field. Students will also have the opportunity to participate in the American Gut project.

The course is open to graduate students and to interested upper-level undergraduates who have taken courses in microbial sciences and/or obtained permission from the instructor.

Course Notes: The first meeting will occur the first Wednesday of classes, 1:30 – 4:00

PM. Class meeting time will be finalized based on student and faculty schedules.

Class Notes: Spring 2018 class meetings will be held in Biolabs 2017.

Recommended Prep: Life Sciences 1a, 1b or equivalent, course(s) in microbial science, or permission of instructor.

Life Sciences 2

Evolutionary Human Physiology and Anatomy (123674)

Andrew Biewener

Katherine D. Zink

Daniel Lieberman

George Lauder

2017 Fall (4 Credits)

Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap: n/a

Why is the human body the way that it is? This course explores human anatomy and physiology from an integrated framework, combining functional, comparative, and evolutionary perspectives on how organisms work. Major topics, which follow a life-course framework, include embryogenesis, metabolism and energetics, growth and development, movement and locomotion, food and digestion, stress and disease, and reproduction. Also considered is the relevance of human biology to contemporary issues in human health and biology.

Course Notes: This course replaces OEB 102. This course, when taken for a letter grade, meets the General Education requirement in Science of Living Systems. This course may not be taken Pass/Fail.

Class Notes: M., W., F., at 1, and three hours of laboratory/discussion weekly.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy

Subject: Philosophy

Philosophy 3

The True and the Good (111175)

Bernhard Nickel

2017 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The course introduces students to philosophical argumentation and writing. It is organized around a range of central philosophical questions, concerning the nature of right and wrong, free will and responsibility, the relation between self, mind, and nature, and god and death. We'll pay particular attention to how answers to one question interact with answers to the others. No previous experience with philosophy is required.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
Writing Intensive Course	Yes
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students

Philosophy 6

Ancient Ethics and Modern Morality (133181)

James Doyle

2017 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An historical introduction to ethics, from the Greeks to, roughly, now. We begin with the concept of virtue in Homer and trace its development through Socrates, Plato, Aristotle, the Stoics and Aquinas. In the modern period we look, in a somewhat skeptical spirit, at the rise of the 'moral' as a supposedly sui generis category of reasons, traits, obligations etc, as this is found in Hume, Kant, Mill and others.

Philosophy 7

Ancient Greek Philosophy (114416)

Jacob Rosen

2017 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

In this course, we will study some of the major thinkers and movements in the philosophy of the ancient Greek world: the Presocratics, Socrates, Plato, Aristotle, Epicureanism, Stoicism, and Skepticism. These thinkers spent a lot of energy on some rather odd questions (for example, 'Is there more than one thing?' and 'Why doesn't the ground fall?'). But they also introduced many of the enduring, guiding questions of philosophy, such as: What is it to know or understand something, and have we ever succeeded in doing it? What exists at the most fundamental level (if anything)? What should be our highest aim in life? Should we fear death?

Additional Course Attributes:

Philosophy 8

Early Modern Philosophy: Self and World (124788)

Alison Simmons

2018 Spring (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to some of the major topics and figures of 17th- and 18th-century Western philosophy, and to the skills of close reading, argument construction, and clear writing. We will focus on such metaphysical and epistemological topics as the natures of mind, body and self, the equality of the sexes, the existence of the external world and God, the nature and limits of human knowledge, and the changing relationship between science and philosophy. We will read such philosophers as René Descartes, Princess Elisabeth of Bohemia, Margaret Cavendish, John Locke, David Hume, Lady Mary Shepard, and Immanuel Kant. No pre-requisites.

Additional Course Attributes:

Philosophy 14

Morality and the Good Life: An Introduction to Ethics (132738)

Jeffrey Behrends

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

You probably want to live the best life for yourself. But what would that look like? Feeling pleasure, and avoiding pain? Having your desires satisfied? Maybe achieving knowledge, or securing fulfilling relationships? You might also care about living a moral life. But what would that look like? What actions are morally right or wrong, and what makes them that way? In this introduction to ethics, we'll begin by looking at three important theories of the good life: the pleasure theory, the desire-satisfaction theory, and the pluralist theory. We'll then turn to moral theories, investigating the relative strengths and weaknesses of those views that focus only on our actions' consequences, and those that reject this approach. In closing, we'll consider questions about the status of morality. What kind of judgment are we making when we say, for example, that something is morally wrong? Are there moral facts awaiting our discovery? If there are, how did they come to be - are they determined by humans and varying across cultures, like facts about the law or etiquette? Or perhaps determined by God? Or could they somehow have not been determined by anyone, standing as fundamental facts about reality?

Philosophy 17

Feminist Political Philosophy (203261)

Regina Schouten

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Political philosophy is the project of offering and evaluating answers to normative questions about politics—about how we as a society should get along and share in all the benefits and costs of living cooperatively. The "feminist" in "feminist political philosophy" can be taken to modify different aspects of that project. Unsurprisingly, then, work in feminist political philosophy is extraordinarily diverse. Notwithstanding some in-fighting about the right way to be a feminist political philosopher, this diversity is part of what equips us to make good progress in developing and refining answers to important political questions. Still, we might wonder what unifies these different traditions and methodologies. Many regard "the personal is political" as the unifying insight of contemporary feminist philosophy. This will be the unifying theme for us as well, as we work to better understand that slogan and explore its implications. We will begin by examining foundational work in contemporary political philosophy on theories of justice, as well as feminist challenges to that work. The tradition of liberalism is of particular interest, because the values it celebrates seem at once empowering and problematic from the perspective of feminist political philosophy. Ideals of liberty, individuality, and free choice can be deployed by feminists to critique unjust institutions, but they also appear to shield a great deal of injustice from censure. On the applied side, then, we'll consider some "hard cases" for liberal feminist political philosophers: prostitution, pornography, and the gendered division of labor. Along the way, we'll hear from some more radical voices, and we'll explore intersections between feminism, social class, and race.

Class Notes:

This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Ethics of Climate Change (205079)

Lucas Stanczyk

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

How should governments respond to the problem of climate change? What should happen to the level of greenhouse gas emissions and how quickly? How much can the present generation be expected to sacrifice to improve conditions for future generations? How should the costs of mitigation and adaptation be apportioned between countries? Should significant funds be allocated to the study of geo-engineering? We will consider these and other questions in an effort to understand our responsibilities in respect of climate change, with a special focus on the structure of the analytical frameworks that have long been dominant among policymakers.

Philosophy 34

Existentialism in Literature and Film (109600)

Sean Kelly

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What is it to be a human being? How can human beings live meaningful lives? These questions guide our discussion of theistic and atheistic existentialism and their manifestations in literature and film. Material includes philosophical texts from Pascal, Kierkegaard, Nietzsche, Sartre; literature from Dostoevsky, Kafka, Beckett; films from Jean-Luc Godard, Alain Resnais, Carol Reed.

Plato's Gorgias (205350)

James Doyle

2017 Fall (4 Credits)

Schedule: M 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

A detailed study of Plato's third-longest dialogue. Particular attention will be paid to (i) the interaction between the overt philosophical content of the what the characters say and what Plato reveals through the unfolding drama; (ii) Socrates' apparent moving-away from the 'intellectualist' moral psychology presupposed in many shorter 'Socratic' dialogues, in the direction of an acknowledgement of the reality of akrasia and other forms of intrapsychic conflict; and (iii) the vivid and alarming presentation by Callicles of an aggressively skeptical response to Socrates' and the many's conceptions of justice.

Philosophy 108

Aristotle's Ethics and Politics (205352)

Jacob Rosen

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Close reading and discussion of central themes in two of Aristotle's works: the *Nicomachean Ethics* and the *Politics*. Questions will include: what role, if any, should a conception of virtue play in a theory of ethics and/or politics, and what role does such a conception in fact play in Aristotle's theory? Is Aristotle's theory egoistic? What are the respective contributions of habit, on the one hand, and reason, on the other, to an agent's acting finely? What is the ethical significance of friendship? What roles do justice and civic friendship play in holding a polity together? In addition to our primary texts, we will take some time to discuss recent(-ish) secondary literature, and, if possible, bring in scholars working in the field to discuss their work with us.

Beyond Dualism: Descartes and His Critics (121954)

Alison Simmons

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

We will explore Descartes' dualism in its historical context. After examining the transformation that Descartes brought about in our conceptions of body and mind (and ourselves), we will consider some of the notorious metaphysical problems his dualism gives rise to and some 17th- and 18th- century attempts to push back against it in the figures of Princess Elizabeth of Bohemia, Henry More, Margaret Cavendish,

Anne Conway, and Anton Amo.

The Later Philosophy of Wittgenstein (156749)

Richard Moran

2018 Spring (4 Credits)

Schedule:

MW 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A close reading of Ludwig Wittgenstein's *Philosophical Investigations*, focusing on its treatments of the topics of meaning, reference, rule-following, cognition, perception, "the private mental realm" knowledge, skepticism, and the nature of philosophy. Attention to Wittgenstein's philosophical methodology, with its claim to dissolve philosophical problems rather than propose solutions to them.

Philosophy 139

Later Heidegger (156116)

Sean Kelly

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A close reading of selected texts from Martin Heidegger's later work, starting from the period after the publication of *Being and Time*. Heidegger's later work rejects the humanism of his own earlier period as well as the humanist existentialism made famous by Sartre. In doing so, it attempts to gather and preserve meaningful possibilities of existence in our "destitute times." Topics will be chosen from among Heidegger's encounter with various figures in the history of philosophy as well as with such topics as thinking, poetry, gods, works of art, science, technology, and things.

Fundamentals of Logic (111424)

Warren Goldfarb

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Analysis of the central concepts of logic: validity, satisfiability, implication. Basic elements of model theory: completeness, compactness, Löwenheim-Skolem theorem. Applications to the foundations of mathematics. Attention also to higher-order logic and to non-classical (constructive) logical systems.

Course Notes:

May be taken as a first course in logic by those with some mathematical background (at least a grade of 4 or 5 on the Calculus BC Advanced Placement Exam or equivalent college work, or experience with discrete mathematics).

Philosophy of Probability (156133)

Susanna Rinard

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Probability, remarked Bishop Butler, is "the very guide of life." In this course we will investigate the extent to which probabilistic tools can help answer basic questions like these: How should I choose among my options? What should I believe? How should I revise my beliefs upon acquiring new information? Does it make sense to believe in God? No background in math is necessary; the beginning of the course will cover the essentials of probability theory.

Philosophy of Quantum Mechanics: Proseminar (125896)

Ned Hall

2018 Spring (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

A crowning achievement of 20th century science, quantum mechanics is also bizarre enough to lead intelligent people to claim that the universe perpetually splits into many copies of itself, that conscious minds can make physical systems "jump" unpredictably, that classical logic must be revised, that there is no objective reality, and much, much more. We will separate the wheat of genuine mystery from the chaff of philosophical confusion. No prior knowledge of quantum mechanics required.

Well-Being: Proseminar (159747)

Jeffrey Behrends

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Well-being, or welfare, is a kind of personal value – it is a value for some individual. We say that someone enjoys a high level of well-being when the life that they lead is a good one for them, and that when someone's life goes poorly for them, their level of well-being is low. We can all probably point to certain kinds of lives that are paradigmatically high or low in well-being. But it is harder to identify what makes it the case that someone has a particular level of well-being, primarily because it is not obvious what things fundamentally contribute to or detract from the value of one's life. In this seminar, we will consider contemporary approaches to welfare, including recent defenses of monistic theories like hedonism and the desire-satisfaction theory, as well as pluralistic theories. Though it will not be the primary focus of the course, we will also consider attempts to measure well-being in the social sciences, with special attention paid to what, if anything, value theorists and social scientists have to learn from one another.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Animals and Ethics (159744)

Christine Korsgaard

2017 Fall (4 Credits)

Schedule:

MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Do human beings have moral obligations to the other animals? If so, what are they, and why? Should or could non-human animals have legal rights? Should we treat wild and domestic animals differently? Do human beings have the right to eat the other animals, raise them for that purpose on factory farms, use them in experiments, display them in zoos and circuses, make them race or fight for our entertainment, make them work for us, and keep them as pets? We will examine the work of utilitarian, Kantian, and Aristotelian philosophers, and others who have tried to answer these questions.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Philosophy 177

Educational Justice: Proseminar (203447)

Regina Schouten

2017 Fall (4 Credits)

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

We subject children to around 18,000 hours of compulsory schooling. This course will explore the kinds of experiences children should have in schools and how those experiences should be distributed. We'll proceed by examining key topics pertaining to educational justice, including competing principles of justice in the distribution of education (egalitarian principles, sufficientarian principles, prioritarian principles, etc.); competing reform agendas; the justifiability and relative priority of different educational aims (education for citizenship, education for career preparation, education for social justice, etc.); the family and its role in educational inequality; and higher education access. In addition to the philosophical contributions to these conversations, we'll read enough of the relevant empirical literature to provide a working understanding of the structure and consequences of schooling in the US. Finally, we'll explore some case studies that look at specific choices that arise in real time for educational decision-makers. These case studies highlight the moral dimensions of decisions about discipline, charter schools, special education, and school districting.

Class Notes: This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Instructor Permissions: Instructor

Enrollment Cap: n/a

Recent work on the norms that govern belief and other doxastic attitudes. Questions to be addressed could include: Are there non-evidential reasons for belief? Is there a distinctively epistemic sense of rationality, and if so, what is its nature? Does belief have an aim, and if so, what is it? Does belief have fittingness conditions, and if so, what are they, and what is their relationship to the question of what one should believe? Can we choose to believe, and what implications does this have (either way) for questions about the norms of belief?

Amartya Sen

2017 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

We will explore different ideas of utility, ranging from the writings of Epicurus and Aristotle in ancient Greece to von Neumann, Ramsey, and Kahneman in the twentieth century. We will examine both predictive and normative issues, as well as comparison and aggregation of utility across individuals.

Class Notes: The first class meeting for this course will take place on September 6th.

FAS Divisional Distribution	Arts and Humanities

Philosophy 277A

Graduate Seminar in General Education: Family and Social Justice (205594)

Regina Schouten

2018 Spring (4 Credits)

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

In this seminar, we'll work together to design a course that examines the role families play in perpetuating social injustice. Consider the animating problem: We seem to have wide moral prerogative to take special care of those we love, including especially members of our families. But the institution of the family seriously hinders attempts to make society more just, as evidenced by the many ways families transfer advantage across generations. What are we to make of this tension between social justice and the family, and what—if anything—can we do to resolve it? These questions are deeply important for our own lives, and will be deeply important for the lives of the students we go on to explore them with. I hope our group will include participants from different social and disciplinary backgrounds, and correspondingly that the courses we design will incorporate readings and methodologies that reflect our diversity. Most of the readings for our seminar will be scholarship on the central substantive questions outlined above, and each participant will have the opportunity to propose readings for us to consider together. We will engage with the material both as scholarship and as possible content for our subsequent courses, and participants will write regular discussion memos on the readings. Each participant will also read a book on pedagogy or learning theory, and write a precis of the book for the class. The sustained pedagogical project of the course will be to build an understanding of student-centered course design by practicing it in the context of the course we'll be designing together.

Additional Course Attributes:

Philosophy 279

Topics in Political Philosophy (159754)

Lucas Stanczyk

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An examination of selected topics in political philosophy. Topics will vary from year to year. In 2017-18, the seminar will focus on questions of justice in the organization of production, and alternative ways of understanding the significance of inequality for distributive justice.

Philosophy 333

Preparation for the Topical Examination (111147)

Selim Berker

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333

Preparation for the Topical Examination (111147)

Selim Berker

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Philosophy 333 Section: 002

Preparation for the Topical Examination (111147)

Matthew Boyle

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Philosophy 333 Section: 003

Preparation for the Topical Examination (111147)

Warren Goldfarb

2017 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333 Section: 004

Preparation for the Topical Examination (111147)

Ned Hall

2017 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333 Section: 005

Preparation for the Topical Examination (111147)

Russell Jones

2017 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333 Section: 006

Preparation for the Topical Examination (111147)

Frances Kamm

2017 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Philosophy 333 Section: 007

Preparation for the Topical Examination (111147)

Sean Kelly

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Philosophy 333 Section: 008

Preparation for the Topical Examination (111147)

Peter Koellner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Philosophy 333 Section: 009

Preparation for the Topical Examination (111147)

Christine Korsgaard

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Philosophy 333 Section: 010

Preparation for the Topical Examination (111147)

Warren Goldfarb

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Physics

Subject: Physics

Physics 15A

Introductory Mechanics and Relativity (111164)

Girma Hailu

Robert Westervelt

Keith Zengel

Carey Witkov

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Newtonian mechanics and special relativity. Topics include vectors; kinematics in three dimensions; Newton's laws; force, work, power; conservative forces, potential energy; momentum, collisions; rotational motion, angular momentum, torque; static equilibrium, oscillations, simple harmonic motions; gravitation, planetary motion; fluids; special relativity.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15a. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep:

Mathematics preparation at least at the level of Mathematics 1b concurrently is required. However, some elementary ideas from multivariable calculus may be used and students are encouraged to take Mathematics 21a concurrently.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Science A
FAS: General Education	Science of the Physical Universe
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students

Physics 15B

Introductory Electromagnetism and Statistical Physics (111896)

Philip Kim

Amir Yacoby

Carey Witkov

Keith Zengel

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Electricity and magnetism. Topics include electrostatics, electric currents, magnetic field, electromagnetic induction, Maxwell's equations, electromagnetic radiation, magnetic fields in materials, and some basic notions in kinetic theory, entropy, temperature, and phase transition associated with electricity and magnetism.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15b. Students use creative problem-solving in applying theoretical topics to explore physical phenomena and design real life applications. Topics include experimental design, model testing, error analysis, basic programming, introductory circuit analysis, and practical applications of electromagnetism. PSI will meet weekly throughout the semester. This course, when taken for a letter grade,

meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep:

Physics 15a, Physics 16, or written permission of the Head Tutor in Physics. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Vector calculus, (div, grad and curl) are used extensively--in principle, this is taught in the course. Students taking Mathematics 21a concurrently will likely find that some concepts are introduced in Physics 15b before they have seen them in Mathematics 21a. Some students may wish to postpone Physics 15b until they have completed Mathematics 21a.

Physics 15C

Wave Phenomena (124154)

Cora Dvorkin

Mara Prentiss

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Forced oscillation and resonance; coupled oscillators and normal modes; Fourier series; Electromagnetic waves, radiation, longitudinal oscillations, sound; traveling waves; signals, wave packets and group velocity; two- and three-dimensional waves; polarization; geometrical and physical optics; interference and diffraction. Optional topics: Water waves, holography, x-ray crystallography, solitons, music, quantum mechanics, and waves in the early universe.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15c. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep:

Physics 15a, Physics 15b, or written permission of the Head Tutor in Physics. Mathematics preparation at least at the level of Mathematics 21b taken concurrently is required. Some prior knowledge of complex numbers (for example as taught in Mathematics 1b) is helpful. Linear algebra and differential equations are used extensively. Students taking Mathematics 21b concurrently will likely find that some concepts are introduced in Physics 15c before they have seen them in Mathematics 21b. Some students may wish to postpone Physics 15c until they have completed Mathematics 21b.

Physics 16

Mechanics and Special Relativity (111197)

Howard Georgi

Carey Witkov

Keith Zengel

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Newtonian mechanics and special relativity for students with good preparation in physics and mathematics

at the level of the advanced placement curriculum. Topics include oscillators damped and driven and resonance (how to rock your car out of a snow bank or use a swing), an introduction to Lagrangian mechanics and optimization, symmetries and Noether's theorem, special relativity, collisions and scattering, rotational motion, angular momentum, torque, the moment of inertia tensor (dynamic balance), gravitation, planetary motion and a little glimpse of quantum mechanics.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 16. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. Emphasis is placed on collaborative teaching and learning. Many class materials are Mathematics notebooks. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep: Score of 5 on the mechanics section of the Physics C Advanced Placement exam, or equivalent. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Thorough knowledge of calculus of one variable and vectors plus some mathematical sophistication. The mathematical level will be significantly higher than that of Physics 15a. If in doubt, check the Canvas site ahead of time, or email the professor at hgeorgi@fas.harvard.edu, or just shop.

Physics 90R

Supervised Research (111672)

David J. Morin

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Primarily for selected concentrators in Physics, or in Chemistry and Physics, who have obtained honor grades in Physics 15 and a number of intermediate-level courses. The student must be accepted by some member of the faculty doing research in the student's field of interest. The form of the research depends on the student's interest and experience, the nature of the particular field of physics, and facilities and support available. Students wishing to write a senior thesis can do so by arranging for a sponsor and enrolling in this course.

Course Notes: A list of possible faculty sponsors and their fields is available in Lyman 238 and on the Physics Department Web page. Course enrollment forms may be obtained from Lyman 238.

Class Notes: David Morin and members of the Department

Additional Course Attributes:

Attribute	Value(s)

Physics 95

Topics in Current Research (111967)

Christopher Stubbs

2017 Fall (4 Credits)

Schedule: W 0700 PM - 0859 PM
M 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

The goal of this tutorial is twofold. First, students will learn about a range of modern physics research topics from experts at Harvard as well as from one another. Every Wednesday evening a faculty member speaks on his/her area of research, preceded by assigned reading and a student presentation designed to introduce the basic physics, as well as important developments and burning problems at the frontiers of that particular research area. Second, the tutorial provides structured activities to help students develop practical skills for their future careers, expanding knowledge on unfamiliar subjects, participating in discussions, presenting and writing clearly about complex topics, and engaging in self and peer evaluation.

Course Notes: Primarily for junior and senior concentrators, however interested sophomores are welcome.

Class Notes: The course meets Monday afternoons, 3:00pm - 4:15pm, and

Wednesdays, 7:00 pm - 8:59 pm.

Additional Course Attributes:

Physics 101

Foundations of Theoretical Physics (207005)

Jacob Barandes

2018 Spring (4 Credits)

Schedule:

MWF 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

A comprehensive, fast-paced introduction to the conceptual and mathematical foundations of modern theoretical physics that starts from the very beginning of the subject, with an integrated, first-principles approach to its five main areas: analytical dynamics, statistical mechanics, relativity, fields, and quantum theory. Examples will be drawn from many areas of physics, including Newtonian mechanics, electromagnetism, particle physics, general relativity, and quantum information. In-class discussions will frequently address the history and philosophy of physics, as well as the conceptual implications of our modern physical theories for making sense of the world around us.

Course Notes:

The course is intended for students from a variety of backgrounds, including those who are considering pursuing advanced study of physics in the concentration as well as those who are unsure. The course is also meant for undergraduate and graduate students in other fields of study—such as pure or applied math, astronomy, biology, chemistry, computer science, history, and philosophy—who are interested in developing a better understanding of the modern foundations of theoretical physics either to serve the needs of their own academic work or as a first step toward switching their area of study to physics. Cooperation and diversity strengthen our academic community, so the course prioritizes collaboration and will aim to provide a welcoming and inclusive environment for students with diverse identities and backgrounds. The instructor will help students form study groups as needed.

Recommended Prep:

The course assumes a knowledge of single-variable differential and integral calculus, as well as a high comfort level with abstract concepts, but does not assume previous coursework in physics. The course is therefore appropriate both for students who have taken the Physics 15/16 sequence as well as those who have not. The course will cover relevant topics from undergraduate physics, vector calculus, linear algebra, complex analysis, and other areas of mathematics as needed, so a familiarity with these subjects, while helpful, is not required.

Physics 123

Laboratory Electronics (124108)

Thomas Hayes

Masahiro Morii

2018 Spring (4 Credits)

Schedule:

TR 0130 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

A lab-intensive introduction to electronic circuit design. Develops circuit intuition and debugging skills through daily hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. Moves quickly from passive circuits, to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters. The digital half of the course treats analog-digital interfacing, emphasizes the use of microcontrollers and programmable logic devices (PLDs).

Course Notes:

Physics 123 is the same course as Physics 223; if you are a graduate student, please enroll in 223. Limited to 20 students. Physics 123 is also offered as Engineering Sciences 153. Students may not take both for credit. Undergraduate engineering students should enroll in Engineering Sciences 153. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe.

Additional Course Attributes:

Moves quickly from passive circuits, to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters. The digital half of the course treats analog-digital interfacing, emphasizes the use of microcontrollers and programmable logic devices (PLDs).

Course Notes:

Physics 123 is the same course as Physics 223; if you are a graduate student, please enroll in 223. Limited to 20 students. Physics 123 is also offered as Engineering Sciences 153. Students may not take both for credit. Undergraduate engineering students should enroll in Engineering Sciences 153. This course, when taken for a letter grade,

meets the General Education requirement for Science of the Physical Universe.

Additional Course Attributes:

Laboratory Electronics (124108)

Thomas Hayes

Masahiro Morii

2018 Spring (4 Credits)

Schedule:

WF 0130 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

A lab-intensive introduction to electronic circuit design. Develops circuit intuition and debugging skills through daily hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. Moves quickly from passive circuits, to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters. The digital half of the course treats analog-digital interfacing, emphasizes the use of microcontrollers and programmable logic devices (PLDs).

Course Notes:

Physics 123 is the same course as Physics 223; if you are a graduate student, please enroll in 223. Limited to 20 students. Physics 123 is also offered as Engineering Sciences 153. Students may not take both for credit. Undergraduate engineering students should enroll in Engineering Sciences 153. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe.

Physics 125

Physics for Future Presidential Advisors (120167)

David J. Morin

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Uses physics to analyze important technologies and real world systems. Stresses estimation and "back of the envelope" calculations, as are commonly used by research physicists when addressing new problems and analyzing national and international policy issues. New physical concepts are introduced as necessary. Example topics: energy production and storage (solar, nuclear, batteries), nuclear physics, power and weapons, airplanes, spy satellites, rockets, fluids, health effects of radiation, risk analysis, mechanical design and failure, communication, computation, global warming. Emphasis is on developing physical intuition and the ability to do order-of-magnitude calculations.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe.

Recommended Prep: Physics 15a, b, c, and mathematics at the level of Mathematics 21a. Physics 143a and 181 are very helpful, and may be taken concurrently.

Additional Course Attributes:

Physics 129

Energy Science (125656)

Lene Hau

2018 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Non-fossil energy sources and energy storage are important for our future. We cover four main subjects to which students with a background in physics and physical chemistry could make paradigm changing contributions: photovoltaic cells, nuclear power, batteries, and photosynthesis. Fundamentals of electrodynamics, statistical/thermal physics, and quantum mechanics are taught as needed to give students an understanding of the topics covered.

Recommended Prep: Physics 15a (or 16), 15b,c or 11a,b. Pre/co-requisite Physics 143a or Chemistry 160 or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Physics 140

Introduction to the Physics of Living Systems (127814)

Aravinthan Samuel

2018 Spring (4 Credits)

Schedule: TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

We will discuss how theoretical and experimental tools derived from physics - e.g., statistical mechanics, fluid mechanics - have been used to gain insight into molecular and cellular biology including the structure and regulation of DNA, genomes, proteins, the cytoskeleton, and the cell. Students will gain an intensive introduction to biological systems, as well as physical and mathematical modeling.

Course Notes: Lectures, problem sets, discussions. May not be taken for credit by students who have taken MCB 140. This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems or Science of the Physical Universe, but not both.

Recommended Prep: Physics 15a,b,c.

Additional Course Attributes:

Physics 141

The Physics of Sensory Systems in Biology (121885)

Aravinthan Samuel

2017 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Living organisms use sensory systems to inform themselves of the sights, sounds, and smells of their surrounding environments. Sensory systems are physical measuring devices, and are therefore subject to certain limits imposed by physics. Here we will consider the physics of sensory measurement and perception, and study ways that biological systems have solved their underlying physical problems. We will discuss specific cases in vision, olfaction, and hearing from a physicist's point of view.

Recommended Prep: Physics 11a, b or 15 a, b, required.

Physics 145

Elementary Particle Physics (117719)

Roxanne Guenette

2018 Spring (4 Credits)

Schedule:

WF 1030 AM - 1159 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Introduction to elementary particle physics. Emphasis is on concepts and phenomenology rather than on a detailed calculational development of theories. Starts with the discovery of the electron in 1897, ends with the theoretical motivation for the Higg's boson, and attempts to cover everything important in between. Taught partly in seminar mode, with each student presenting a classic paper of the field.

Recommended Prep: Physics 143a. Physics 143b or equivalent is useful.**Additional Course Attributes:**

Attribute	Value(s)

Electrodynamics (111822)

Mikhail Lukin

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Aimed at advanced undergraduates. Emphasis on the properties and sources of the electromagnetic fields and on the wave aspects of the fields. Course starts with electrostatics and subsequently develops the Maxwell equations. Topics: electrostatics, dielectrics, magnetostatics, electrodynamics, radiation, wave propagation in various media, wave optics, diffraction and interference. A number of applications of electrodynamics and optics in modern physics are discussed.

Recommended Prep: Physics 15a, b, and c, or written permission of the Head Tutor;
Mathematics 21a, b or equivalent.

Additional Course Attributes:

Physics 191 Section: 001L

Advanced Laboratory (121993)

Isaac F. Silvera

Ronald Walsworth

2018 Spring (4 Credits)

Schedule: TR 0100 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Students carry out three experimental projects selected from those available representing condensed matter, atomic, nuclear, and particle physics. Included are pulsed nuclear magnetic resonance (with MRI), microwave spectroscopy, optical pumping, Raman scattering, scattering of laser light, nitrogen vacancies in diamond, neutron activation of radioactive isotopes, Compton scattering, relativistic mass of the electron, recoil free gamma-ray resonance, lifetime of the muon, studies of superfluid helium, positron annihilation, superconductivity, the quantum Hall effect, properties of semiconductors. The facilities of the laboratory include several computer controlled experiments as well as computers for analysis.

Course Notes: A substantial amount of outside reading is expected. Physics 191 is the same course as Physics 247; if you are a graduate students, please enroll in 247.

The course is offered in Science Center 204.

Recommended Prep: Physics 15a or 16, 15b, 15c. Physics 143a is highly recommended; 181 is also useful.

Additional Course Attributes:

Attribute	Value(s)

Physics 195

Introduction to Solid State Physics (112107)

Donhee Ham

2017 Fall (4 Credits)

Schedule:

WF 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The physics of crystalline solids and their electric, magnetic, optical, and thermal properties. Designed as a first course in solid-state physics. Topics: free electron model; Drude model; the physics of crystal binding; crystal structure and vibration (phonons); electrons in solids (Bloch theorem) and electronic band structures; metals and insulators; semiconductors (and their applications in pn junctions and transistors); plasmonic excitations and screening; optical transitions; solid-state lasers; magnetism, spin waves, magnetic resonance, and spin-based devices; dielectrics and ferroelectrics; superconductivity, Josephson junctions, and superconducting circuits; electronic transport in low-dimensional systems, quantum Hall effect, and resonant tunneling devices.

Course Notes:

Physics 195 is also offered as Applied Physics 195. Students may not take both for credit.

Recommended Prep:

Elementary quantum mechanics.

Physics 201

Data Analysis for Physicists (161201)

Vinothan Manoharan

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course covers what to do with experimental data after acquiring it. We will start with how to load, parse, filter, and visualize data using modern computational tools, then proceed to more advanced methods including Markov chain Monte Carlo and time-series analysis. Throughout, students will learn methods of statistical inference from both frequentist and Bayesian frameworks. Applications to particle physics, biophysics, condensed matter, applied physics, astrophysics, and more.

Course Notes:

This course is suitable for students with limited or rusty programming skills. Students with more advanced programming skills may wish to take APMTH 207 or ENG-SCI 255.

Recommended Prep:

Research experience commensurate with that of a first-year (or higher) PhD student in experimental physics. Students without such experimental experience are recommended to take Physics 191r or Physics 247r (or equivalent) first.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Physics 210

General Theory of Relativity (114266)

Jacob Barandes

2017 Fall (4 Credits)

Schedule:

WF 0300 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to general relativity: the principle of equivalence, Riemannian geometry, Einstein's field equation, the Schwarzschild solution, the Newtonian limit, experimental tests, black holes.

Recommended Prep:

Physics 143a (quantum mechanics), 151 (mechanics) and 153 (electromagnetism), and Mathematics 21 (multivariable calculus) or equivalents.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

David Nelson

2017 Fall (4 Credits)

Schedule:

TR 0130 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Basic principles of statistical physics and thermodynamics, with applications including: the equilibrium properties of classical and quantum gases; phase diagrams, phase transitions and critical phenomena, as illustrated by the liquid-gas transition and simple magnetic models. Time permitting, introduction to Langevin dynamics and polymer physics.

Course Notes: **Students may wish to take Applied Physics 284 when this course is bracketed.**

Recommended Prep: **Physics 143a and Physics 181 or Engineering Sciences 181.**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 264

Lie Algebras, Representations and Quantum Mechanics (203512)

Howard Georgi

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Lie algebras and their representations are indispensable tools in quantum mechanics. Starting from the operator treatment of angular momentum, this course explores some of the (many) useful approaches to this subject with applications in various areas of physics.

Recommended Prep: **Some quantum mechanics beyond the level of Physics 143a.**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Physics 267

Higher Representations in Physics and Mathematics (204938)

Adrian Ocneanu

2017 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The representation theory of simple Lie groups is best described in terms of subgroups of quantum $SU(2)$. Higher representation theory is constructed analogously from $SU(n)$. We present higher analogs of matrices, roots, weights, Dynkin diagrams, representations, Young diagrams, etc. The quantum $SU(2)$ representations are used in 1+1-dimensional conformal field theory. Higher representations appear to give insight into 3+1 dimensions.

Course Notes: Taught by Visiting Professor, Adrian Ocneanu.

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Physics 268AR

Special Topics in Condensed Matter Physics: Topological States of Matter (122818)

Bertrand Halperin

2018 Spring (4 Credits)

Schedule:

TR 0300 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Notions of topology have been invoked to clarify the properties of a variety of quantum systems and to classify the possible ground states of such systems. We shall explore in depth examples such as integer and fractional quantized Hall states in two-dimensional systems, and topological insulators in two and three dimensions. Discussions will include effects of disorder and localization phenomena, and practical issues of measurement that may have only marginal relation to topological concepts.

Topic: Topological States of Matter

Recommended Prep: Prerequisites: Physics 251b, Applied Physics 295a and Physics 262, or equivalents.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Physics 268BR

Special Topics in Condensed Matter Physics: Quantum Phases of Matter (160744)

Subir Sachdev

2018 Spring (4 Credits)

Schedule:

WF 0300 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A modern treatment of quantum many-particle systems. Quasiparticles and Fermi liquid theory. Broken symmetries. Topological order. Quantum critical points without quasiparticles, and their dualities. Non-Fermi liquids. Holography.

Topic: Quantum Phases of Matter

Recommended Prep: Applied Physics 295a or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 284

Strongly Correlated Systems in Atomic and Condensed Matter Physics (121875)

Eugene Demler

2018 Spring (4 Credits)

Schedule:

MW 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Explores an emerging interface involving strongly correlated systems in atomic and condensed matter physics. Topics include bosonic and fermionic Hubbard models, strongly interacting systems near Feshbach resonances, magnetism of ultracold atoms, topological states, low dimensional systems, polarons, disorder in interacting systems and many-body localization, Dicke model and superradiance.

Recommended Prep: Graduate quantum mechanics or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Physics 285B

Modern Atomic and Optical Physics II (118509)

Mikhail Lukin

2017 Fall (4 Credits)

Schedule:

MW 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to quantum optics and modern atomic physics. The basic concepts and theoretical tools will be introduced. Topics will include coherence phenomena, non-classical states of light and matter, atom cooling and trapping and atom optics. The second of a two-term subject sequence that provides the foundations for contemporary research.

Recommended Prep: A course in electromagnetic theory (Physics 232a or equivalent); one half-course in intermediate or advanced quantum mechanics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 287A

Introduction to String Theory (111191)

Xi Yin

2017 Fall (4 Credits)

Schedule:

WF 0300 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to the perturbative formulation of string theories and dualities. Quantization of bosonic and superstrings, perturbative aspects of scattering amplitudes, supergravity, D-branes, T-duality and mirror symmetry. Also a brief overview of recent developments in string theory.

Recommended Prep: Physics 253a, b or equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Physics 287BR

Topics in String Theory (114008)

Xi Yin

2018 Spring (4 Credits)

Schedule:

WF 0130 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A selection of topics from current areas of research on string theory.

Recommended Prep: Physics 287a.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Physics 295A

Introduction to Quantum Theory of Solids (127980)

Efthimios Kaxiras

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Electrical, optical, thermal, magnetic, and mechanical properties of solids will be treated based on an atomic scale picture and using the independent electron approximation. Metals, semiconductors, and insulators will be covered, with possible special topics such as superconductivity.

Recommended Prep: Physics 181 or equivalent, Applied Physics 195 or equivalent, and a graduate level quantum mechanics course similar to Physics 251a. (Physics 251b would be helpful and may be taken concurrently.)

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 295B

Quantum Theory of Solids (127979)

Eugene Demler

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course presents theoretical description of solids focusing on the effects of interactions between electrons. Topics include Fermi liquid theory, dielectric response and RPA approximation, ferro and antiferromagnetism, RKKY interactions and Kondo effect, electron-phonon interactions and superconductivity.

Course Notes: Physics 295b is also offered as Applied Physics 295b. Students may not take both for credit.

Recommended Prep: Physics 251a,b, an introductory course in solid state physics, or permission of instructor.

All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 323B

Topics in Condensed Matter Physics (203754)

Ashvin Vishwanath

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 323B

Topics in Condensed Matter Physics (203754)

Ashvin Vishwanath

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 324A

Topics in Modern Astrophysics (204541)

Douglas Finkbeiner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 30

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 324B

Topics in Modern Astrophysics (204542)

Douglas Finkbeiner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 327A

Topics in Condensed Matter Physics (117548)

David Nelson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 327A

Topics in Condensed Matter Physics (117548)

David Nelson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 327B

Topics in Condensed Matter Physics (118814)

David Nelson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 327B

Topics in Condensed Matter Physics (118814)

David Nelson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 329A

Condensed Matter and Statistical Theory (143256)

Bertrand Halperin

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 329A

Condensed Matter and Statistical Theory (143256)

Bertrand Halperin

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 329B

Condensed Matter and Statistical Theory (118337)

Bertrand Halperin

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 329B

Condensed Matter and Statistical Theory (118337)

Bertrand Halperin

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 331A

Topics in String Theory (125320)

Xi Yin

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 331A

Topics in String Theory (125320)

Xi Yin

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 331B

Topics in String Theory (125321)

Xi Yin

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 331B

Topics in String Theory (125321)

Xi Yin

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 333A

Experimental Atomic Physics (112040)

Mara Prentiss

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 333A

Experimental Atomic Physics (112040)

Mara Prentiss

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 333B

Experimental Atomic Physics (112042)

Mara Prentiss

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 333B

Experimental Atomic Physics (112042)

Mara Prentiss

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 335A

Topics in the History and Philosophy of Physics (148180)

Gerald Holton

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 335B

Topics in the History and Philosophy of Physics (138414)

Gerald Holton

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 337A

Topics in Experimental High Energy Physics (114834)

Masahiro Morii

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 337A

Topics in Experimental High Energy Physics (114834)

Masahiro Morii

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 337B

Topics in Experimental High Energy Physics (114835)

Masahiro Morii

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 337B

Topics in Experimental High Energy Physics (114835)

Masahiro Morii

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 338A

Experimental Neutrino Physics and Dark Matter (205501)

Roxanne Guenette

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 338A

Experimental Neutrino Physics and Dark Matter (205501)

Roxanne Guenette

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 338B

Experimental Neutrino Physics and Dark Matter (205502)

Roxanne Guenette

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 338B

Experimental Neutrino Physics and Dark Matter (205502)

Roxanne Guenette

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 339A

Condensed Matter and Atomic Physics (120869)

Subir Sachdev

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 339A

Condensed Matter and Atomic Physics (120869)

Subir Sachdev

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 339B

Condensed Matter and Atomic Physics (120868)

Subir Sachdev

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 339B

Condensed Matter and Atomic Physics (120868)

Subir Sachdev

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 341A

Topics in Experimental Atomic and Condensed Matter Physics (111169)

Markus Greiner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 341A

Topics in Experimental Atomic and Condensed Matter Physics (111169)

Markus Greiner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 341B

Topics in Experimental Atomic and Condensed Matter Physics (118950)

Markus Greiner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 341B

Topics in Experimental Atomic and Condensed Matter Physics (118950)

Markus Greiner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 343A

Observational Cosmology and Experimental Gravitation (119051)

Christopher Stubbs

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 343A

Observational Cosmology and Experimental Gravitation (119051)

Christopher Stubbs

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 343B

Observational Cosmology and Experimental Gravitation (119052)

Christopher Stubbs

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 343B

Observational Cosmology and Experimental Gravitation (119052)

Christopher Stubbs

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 345A

Experimental Gravitation: Radio and Radar Astronomy (115102)

Irwin Shapiro

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 345A

Experimental Gravitation: Radio and Radar Astronomy (115102)

Irwin Shapiro

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 345B

Experimental Gravitation: Radio and Radar Astronomy (115113)

Irwin Shapiro

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 345B

Experimental Gravitation: Radio and Radar Astronomy (115113)

Irwin Shapiro

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 347A

Topics in Quantum Optics (115495)

Mikhail Lukin

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 347A

Topics in Quantum Optics (115495)

Mikhail Lukin

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 347B

Topics in Quantum Optics (115525)

Mikhail Lukin

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 347B

Topics in Quantum Optics (115525)

Mikhail Lukin

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 349A

Topics in Theoretical Particle Physics (125315)

Matthew D. Schwartz

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 349A

Topics in Theoretical Particle Physics (125315)

Matthew D. Schwartz

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 349B

Topics in Theoretical Particle Physics (125316)

Matthew D. Schwartz

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 349B

Topics in Theoretical Particle Physics (125316)

Matthew D. Schwartz

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 350A

Experimental Physics in Low Dimensional Materials (116409)

Philip Kim

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 10

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 350A

Experimental Physics in Low Dimensional Materials (116409)

Philip Kim

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 10

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 350B

Experimental Physics in Low Dimensional Materials (205462)

Philip Kim

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 350B

Experimental Physics in Low Dimensional Materials (205462)

Philip Kim

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 351A

Experimental Soft Condensed Matter and Materials Physics (120872)

Vinothan Manoharan

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 351A

Experimental Soft Condensed Matter and Materials Physics (120872)

Vinothan Manoharan

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 351B

Experimental Soft Condensed Matter and Materials Physics (120873)

Vinothan Manoharan

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 351B

Experimental Soft Condensed Matter and Materials Physics (120873)

Vinothan Manoharan

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 353A

Topics in Statistical Physics and Quantitative Molecular Biology (125788)

Erel Levine

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 353A

Topics in Statistical Physics and Quantitative Molecular Biology (125788)

Erel Levine

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 353B

Topics in Statistical Physics and Quantitative Molecular Biology (125789)

Erel Levine

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 353B

Topics in Statistical Physics and Quantitative Molecular Biology (125789)

Erel Levine

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 355A

Theory of Elementary Particles (110565)

Roy Glauber

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 355B

Theory of Elementary Particles (121811)

Roy Glauber

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 355B

Theory of Elementary Particles (121811)

Roy Glauber

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 357A

Experimental Condensed Matter Physics (113916)

Robert Westervelt

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 357A

Experimental Condensed Matter Physics (113916)

Robert Westervelt

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 357B

Experimental Condensed Matter Physics (115410)

Robert Westervelt

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 357B

Experimental Condensed Matter Physics (115410)

Robert Westervelt

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 359A

Topics in Condensed Matter Physics (115526)

Eugene Demler

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 359A

Topics in Condensed Matter Physics (115526)

Eugene Demler

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 359B

Topics in Condensed Matter Physics (115527)

Eugene Demler

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 359B

Topics in Condensed Matter Physics (115527)

Eugene Demler

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 363A

Topics in Condensed Matter Theory (112091)

Efthimios Kaxiras

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 363A

Topics in Condensed Matter Theory (112091)

Efthimios Kaxiras

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 363B

Topics in Condensed Matter Theory (112092)

Efthimios Kaxiras

2018 Spring (4 Credits)

Subject: Physical Sciences

Physical Sciences 2

Mechanics, Elasticity, Fluids, and Diffusion (122575)

*Gregory Kestin**Suzanne Pittman*

2017 Fall (4 Credits)

Schedule: TR 0930 AM - 1059 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

An introduction to classical mechanics, with special emphasis on the motion of organisms in fluids. Topics covered include: kinematics, Newton's laws of motion, oscillations, elasticity, random walks, diffusion, and

fluids. Examples and problem set questions will be drawn from the life sciences and medicine.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep: Physical Sciences 1 (or Chemistry 7), Mathematics 1b, or the equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Science of the Physical Universe
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Science A

Physical Sciences 3

Electromagnetism, Circuits, Waves, Optics, and Imaging (122576)

Louis Deslauriers

Suzanne Pittman

2018 Spring (4 Credits)

Schedule: TR 0930 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course is an introduction to electromagnetism, digital information, waves, optics and sound. Topics covered include: electric and magnetic fields, electrical potential, circuits, simple digital circuits, wave propagation in various media, microscopy, sound and hearing. The course will draw upon a variety of applications to the biological sciences and will use real-world examples to illustrate many of the physical principles described. There are six laboratories.

Course Notes: This course is part of an integrated introduction to the physical sciences intended for students who plan to pursue a concentration in the life sciences and/or satisfy pre-medical requirements in Physics. May not ordinarily be taken for credit in addition to Physics 1b, 11b, or 15b. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Recommended Prep: Physical Sciences 2 (or Physics 1a or 11a), Mathematics 1b, or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Course Level	Primarily for Undergraduate Students
FAS: Core Curriculum	Science A
FAS: General Education	Science of the Physical Universe
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Physical Sciences 12A

Mechanics from an Analytic, Numerical and Experimental Perspective (109274)

Christopher Stubbs

2018 Spring (4 Credits)

Schedule:

TR 0930 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This is the first term of a two-semester introductory physical science and engineering course sequence. The focus is on quantitative scientific reasoning, with the first term's exploration framed in the context of basic mechanics. Students will gain competence in both analytic (using pencil, paper and single-variable calculus) and numerical (using computer modeling) approaches to modeling simple physical systems and for the analysis of experimental data. Topics include kinematics, linear and rotational motion, forces, energy, collisions, gravitation, simple fluids and a brief introduction to waves. Examples are drawn from across the physical sciences and engineering. The course is aimed at first year students who have an interest in pursuing a concentration in the sciences and/or engineering. The course structure includes lecture, discussion and laboratory components.

Course Notes:

Physical Sciences 12a may not be taken for credit by students who have passed Physics 11a, 15a or 16. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Course Level	Primarily for Undergraduate Students
FAS: General Education	Science of the Physical Universe
FAS: Final Assessment Category	Three-hour Exam
FAS: Core Curriculum	Quantitative Reasoning
FAS: Core Curriculum	Science A
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Physical Sciences 12B

Electromagnetism and Statistical Physics from an Analytic, Numerical and Experimental Perspective (109457)

Melissa Franklin

Anna Klates

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This is the second term of a two-semester introductory sequence that uses a combination of analytic and numerical methods to understand physical systems, to analyze experimental data, and to compare data to models. Topics include electrostatics and magnetostatics, electromagnetic fields, optics [all topics illustrated with applications to current technological and societal challenges], and an introduction to the physics of many-body systems and their aggregate properties such as entropy, temperature and pressure. The course is aimed at second year students who have an interest in pursuing a concentration in the sciences and/or engineering. The course structure includes lecture, discussion and laboratory components.

Course Notes: May not be taken for credit by students who have passed Physics 15b or Physics 15c. This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe.

Recommended Prep: Physical Sciences 12a

Additional Course Attributes:

Quantitative Research Methods in Population Health Sciences I (203329)

Jarvis Chen

Michael Hughes

2017 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

This is part one of a two part core year-long quantitative methods course for the Population Health Science PhD students at the School of Public Health. The course integrates methods and concepts from the various disciplines represented by Population Health Sciences to equip students with the methodological tools to conduct their own research as well as collaborate across fields of study and areas of specialization. The course will cover foundational statistical methods including linear and logistic regression, generalized linear models, survival analysis, longitudinal data analysis, and multilevel modeling. Discussion will be given to important concepts including study design, sampling, scientific inference, causal reasoning, measurement, and replication. The course will also provide an overview of a number of additional and sometimes more advanced methods including Bayesian statistics, big data methods, missing data, sensitivity analysis, propensity scores, time-varying exposures, interaction, mediation, instrumental variables, regression discontinuity designs, difference-in-difference methods, selection models, time series, bootstrapping, simulations, and meta-analysis. With these latter topics, emphasis will be placed on understanding the basic definitions, assumptions, and methodology. Students will be referred to further readings and courses to gain more detailed understanding. Various software resources will be used throughout the course. The course will prepare students to critically read through the empirical population health science literature, and to implement a number of different methods in their own research. Students are strongly encouraged to complete both parts of this course (parts A and B) within the same academic year.

Course Notes: This course is reserved for first-year Ph.D. students in Population Health Sciences. Population Health Sciences Ph.D. students are required to register for both semesters of this course and to achieve a final average grade of B or higher.

Requirements: Requisite: Course open to First Year GSAS (G1) Students Only

Additional Course Attributes:

Psychology

Subject: Psychology

Psychology 14

Cognitive Neuroscience (126551)

Daniel Schacter

George Alvarez

2017 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How do our brains give rise to our minds? Specifically, how are mental processes related to neural activity? This course will explore these questions, as well as the methods by which cognitive neuroscience seeks to answer them. We will focus on processes within perception, attention, memory, language, action, emotion, and social cognition, and methods including neuroimaging, neuropsychology, and electrophysiology.

Course Notes:

This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Psychology 15

Social Psychology (114178)

Fiery Cushman

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to social psychological research and theory regarding everyday behavior, incorporating methods from the life sciences (neuroscience, genetics, evolutionary biology). Topics include: attitudes and social influence; obedience to authority; stereotyping, prejudice, and intergroup relations; emotion; interpersonal attraction; morality and prosocial behavior; and errors of everyday human judgment

Course Notes:

This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or 1B=7 or Psyc S-1) before enrolling in this course for all

freshmen and sophomores and for all students completing a concentration or secondary field in psychology.

Additional Course Attributes:

Psychology 18

Abnormal Psychology (123973)

Joshua Buckholtz

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to the study of psychological dysfunction. Focuses on abnormal behavior as it relates to the definition, etiology, and treatment of major symptom domains. This course will emphasize critical evaluation of the causes and mechanisms of mental illness, with special attention paid to recent neuroscientific and genetic research on the neurobiology of psychopathology.

Course Notes: This course counts toward foundational requirements for Psychology

and should be taken before courses at the 1000 level or higher.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB = 7) before enrolling in this course.

Contemporary Issues in Psychology: Intensive Cross-level Analyses (113094)

Laura Chivers

Jill Hooley

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Examines selected issues and phenomena in contemporary psychological research. Special attention to examining topics from a variety of perspectives, to reading primary sources in the field, and to developing thinking, writing, research, and discussion skills. This tutorial, or Psychology 975, is required of concentrators upon entering the concentration, normally in the sophomore year. Letter graded.

Course Notes: Students may take this course before formally declaring Psychology as their concentration. Psy 971 and Psy 975 are interchangeable for Psychology requirements.

Class Notes: This course is taught entirely in sections, so a required first meeting of this course for sectioning will be held the first day of classes. For Spring 2018, attend one of two meetings on Monday January 22nd: 1-2pm or 5-6pm in WJH 1550.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor. PSY1900 or equivalent statistics course should be taken in advance or concurrently.

Psychology 980JB

Styles of Thought (108956)

Jill Hooley

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

We think all the time. But what are thoughts made up of? And what are the many different ways in which we think? Do we think in pictures or in words? When you're hungry, do you think about "food" or about "almond pancakes with Vermont maple syrup"? Do children think differently from adults? How does imagination affect our moral judgment? How do we prospect about the future? Is abstract thinking "deeper" or "better" than concrete thinking? Are pictures more "emotional" than words? And do situational factors play a role in the way we think, or is it all about stable individual differences?

The purpose of this course is to think about thoughts. We will give some answers to these and other

fascinating questions about how people think, and what are the implications of the style of thought to perceptions, judgments, predictions, and actions towards the social world. Our goals are (1) to understand the cognitive processes that underlie different styles of thought, and the neural correlates of these mechanisms; (2) to compare different approaches to the concept of abstraction; (3) to consider under what circumstances people naturally use more abstract (versus more concrete) representations of information; and (4) to examine the expression of abstraction processes in the realm of social cognition.

Class Notes: For information on this course, contact the instructor, Elinor Amit, at elinor.amit@gmail.com The Q scores shown are for Amit, although labeled Laura Chivers.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Helping and Harming: The Psychology of Altruism and Aggression (205016)

2018 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 16

How do people help and harm each other? Who helps or harms whom, and why? How do upbringing and early experience foster altruism and aggression? Which emotions, thoughts, and situations promote helping and harming? How important are biological (genetic, hormonal, brain) factors? What can we learn about humans from the behavior of chimpanzees and other species? Using concepts and research from social, developmental, and evolutionary psychology, we will explore specific ways people help and harm each other to work toward understanding and influencing altruistic and aggressive behavior.

Class Notes: For information on this course, contact the instructor, Anne McGuire, at ammcguir@fas.harvard.edu

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 980JF

The Human Factor: How Technology is Transforming Our Everyday Lives for Better and Worse (205021)

Jill Hooley

2017 Fall (4 Credits)

Schedule:

F 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Can you remember a friend's telephone number off the top of your head? Do you feel comfortable reading a paper map? Could you change a flat tire if you needed to? If the answer to any (if not all) of these questions is no, don't worry. You are not alone. Research shows humans fare poorly on such tasks. But the reasons why may surprise you.

The way we think, work and communicate is being transformed by technology. This transformation has been beneficial. For example, personal and professional productivity was often capped due to limits in human attention, memory and decision making. Society could – owing to these 'frailties' – only do, so much. Technology now helps us do more.

But its use also raises questions. For example, do we trust technology to much? Is it possible to rely on technology for work and still be good at work? And perhaps most importantly, should society be motivated to work if machines can perform that work more efficiently and safely?

This course explores these questions, with a focus on human factors considerations that are relevant for the 21st century work environment.

Class Notes: For information about the course, e-mail the instructor, Ashley Nunes, at anunes@fas.harvard.edu

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 980JG

Academic Success: What is it and what makes it? (205022)

2018 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

16

This course will focus on understanding the incredible diversity with which academic success is defined and measured, along with examining how factors at the individual and environmental levels uniquely and jointly facilitate or inhibit academic success from middle school through college. Honing into the tertiary level of education, timely topics such as the utility of SAT and GRE scores for college admission, the effectiveness of distance learning and MOOC courses, and the value of taking a gap year will also be critically analyzed.

Class Notes: For information on this course, e-mail the instructor, Katie Lowe, at katielow@fas.harvard.edu

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Trauma and Posttraumatic Stress Disorder (205591)

Jill Hooley

2017 Fall (4 Credits)

Schedule:

T 0600 PM - 0759 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Research suggests that the majority of US adults will experience a potentially traumatic event during their lifetime. What factors contribute to positive and negative mental health outcomes following such events? How do we best define what constitutes a "traumatic event"? How is posttraumatic stress disorder (PTSD) most effectively treated? This course is a scientifically-based exploration of psychological trauma and PTSD. We will examine topics related to the diagnosis, etiology, and treatment of trauma-related psychopathology, with a particular focus on empirical research.

Class Notes:

For information about the course, e-mail the instructor, Samantha Moshier, at sjmoshier@gmail.com

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology of Conversation (207162)

Jill Hooley

2018 Spring (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This seminar is about the psychology of conversation. We spend a good portion of our waking hours engaged in conversation. But how does it really work? We will talk about everything from the nitty-gritty

mechanics of conversation to the evolutionary origins of conversation. We will study the fundamental goals people bring to their conversations. We will look at gossip, storytelling, politeness, and humor. We will study how people anticipate their future conversations and remember their past conversations—and how people are bad at both these tasks. We will learn basic truths about how people converse, but also how this varies across age, sex, gender, personality, and culture. We will see what a positive impact conversation has on our social lives, but also the biggest mistakes we make and how we might fix them.

Class Notes: For information on this course, e-mail the instructor, Gus Cooney, at guscooney@gmail.com

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Growing Up and Growing Old: Cognitive Changes in Childhood and Aging (127535)

Jill Hooley

2017 Fall (4 Credits)

Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

This seminar will focus on the profound cognitive changes of early childhood and old age. We will be especially interested in what such changes tell us about how the adult mind -- perched between childhood and old age -- is organized. Topics include: theories of development and theories of aging, changes in the neural substrate; the rise and fall of executive functions; conceptual gain and conceptual loss; expertise and wisdom; healthy aging and dementias.

Class Notes: For information about the course, e-mail the instructor, Deborah Zaitchik-Samet, at zaitchik@mgh.harvard.edu.

The Q scores listed below are for the same Instructor who will be teaching this course this semester, Deborah Zaitchik-Samet

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology of Left and Right (160162)

Jill Hooley

2017 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

What are the origins of the culture war between the political Left and Right? How do psychobiology, upbringing, temperament and moral values shape this difference in political orientations? In this course, we will explore the psychological factors underlying political divisions as well as the role of our social networks and desire for group identity in maintaining and widening the divide. The goal of this course is to develop your empirical, theoretical and methodological understandings of psychological research underlying the Left-Right conflict while providing you with tools to detect partisanship and to promote the cooperation and connection necessary for a well-functioning democracy.

Class Notes:

For information about the course, e-mail the instructor, Sasha Kimel, at skimel@fas.harvard.edu

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Social Factors in the Development of Psychopathology (110110)

Jill Hooley

2017 Fall (4 Credits)

Schedule:

M 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Does bullying lead to school shootings? Can Facebook cause depression? Are "fitspiration" communities dangerous? This course will review the role social factors (social support, social interactions, social functioning, and the broader social context of communities) relate to the development and maintenance of psychopathology on biological and behavioral levels. In the context of disorders such as schizophrenia, depression (including suicide), eating disorders, and post-traumatic stress disorder, this course will look at how social factors might contribute to the development of mental illness, as well as how social factors might be indicators of mental illness, and finally how social factors might mediate the severity of or even prevent the development of mental illness.

Class Notes:

For information about the course, e-mail the instructor, Sarah Hope Lincoln, at slincoln@fas.harvard.edu

The Q scores listed below are for the same Instructor who will be teaching this course this semester, Sarah Hope Lincoln

Recommended Prep:

The Psychology Department requires completion of Science of Living

Eating Disorders (119717)

Jill Hooley

2018 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

The goal of this course is to provide a comprehensive overview of DSM-5 feeding and eating disorders (EDs) with a primary focus on anorexia nervosa, bulimia nervosa, and binge eating disorder. We will explore the etiology (i.e., biological and environmental factors), symptom presentation, and empirically supported treatments across these EDs. Additional topics will include cultural considerations, gender and EDs, medical complications, impact of media/social media, and novel directions and treatments for these disorders.

Class Notes:

For information on this course, e-mail the instructor, Rebecca Shingleton, at rshingleton@gmail.com. The Q scores shown are for Shingleton, even though labeled Chivers.

Recommended Prep:

Psychology 1002

Evolving Morality: From Primordial Soup to Superintelligent Machines (203129)

2018 Spring (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

200

This course examines the evolution of morality on Earth, from its origins in the biology of unthinking cooperative organisms, through the psychology of intelligent cooperative primates, and into a future inhabited by machines that may be more intelligent and better organized than humans. We begin with foundational scientific questions: What is morality? Where does it come from, and what does it do? How is it implemented in our brains? We then apply our scientific understanding of morality to foundational moral and political questions: How should human societies be organized? How should we resolve the moral questions that divide us? Finally, we consider the distinctive moral challenges posed by increasingly powerful artificial intelligence. Can machines (such as self-driving cars and military "drones") be programmed to behave morally? Will artificial intelligence displace human labor? If so, how can we adapt? Could machines displace humans entirely? If so, how can we stay in control? If machines do take over, will they be our conquerors or our children?

Course Notes:

Not open to students who have taken PSY 2250. This course, when taken for a letter grade, meets the General Education Requirement for Ethical Reasoning.

Psychology of Women (110216)

Nicole Noll

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

How does being a woman affect our behavior, our evaluations of ourselves, and our interactions with others? This course examines psychological science on women and girls in western industrialized societies, addressing such topics as gender stereotypes, girlhood, women and work, relationships, pregnancy and motherhood, mental health, violence against women, and women in later adulthood. We will consider these topics through an understanding of gender as a social construction, being mindful of the intersections of gender, sexuality, class, and race. Although focused on women's lives and experiences, this course is highly relevant to people of all genders.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology of Consumer Behavior (205550)

Prerana Bharadwaj

2017 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Psychological theory and research findings have wide and varied applications to almost every other field; the world of business marketing is no exception. Understanding the thoughts, attitudes, and behaviors of consumers is imperative for the success of businesses, governments, and, in fact, anyone else looking to influence others. The purpose of this course is to provide working knowledge of psychological concepts related to consumer behavior including but not limited to memory, attitudes, preferences, judgments, and decision making. In addition, the course aims to use case studies and research projects to develop the ability to apply and evaluate influential strategies that make use of these psychological concepts.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Your Brain on Drugs: Psychopharmacology (122224)

Scott Lukas

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to how drugs affect mood, sensation, consciousness, and other psychological and behavioral functions in both healthy and disease states. Introduces concepts in neuroscience and pharmacology to understand how drugs are used to treat drug abuse, psychiatric disorders and why individuals use recreational drugs. Covers all CNS drugs, including antidepressants, antipsychotics, alcohol, and both licit and illicit drugs of abuse. Debates controversial topics such as research with psychiatric populations, diagnosing ADHD, teenage suicide, marijuana legalization, and needle exchange programs.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 18, MCB 80, MCB 81 or Psyc S-1240 before enrolling in this course; or permission of instructor.

The Human Brain Then and Now (108478)

Randy Buckner

2018 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course will explore the "mismatch" between our ancestral brain and the modern world. After covering the evolution of the human brain, the bulk of the course will focus on case studies including how drugs hijack the normal function of brain systems, how the Facebook age places stresses on social systems that evolved to handle close-knit groups of 25 or so individuals, and how the brain degenerates as we live unexpectedly long.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 14, MCB 80, or MCB 81 before enrolling in this course, or permission of instructor.

T 0130 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Examines the patterns of perceptual, motor, cognitive, and linguistic impairments resulting from brain damage. The focus is on the implications of the various types of neuropsychological deficits (such as visual neglect, dyslexia, and aphasia) for theories of the mind and the functional organization of the brain.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, MCB 80, or MCB 81 before enrolling in this course; or permission of instructor.

Evolution and Cognition (156054)

Max Krasnow

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The goal of this course is for students to master the foundational logic and theory of evolutionary psychology. Students are exposed to and consider topics covering the range of human experience, including cooperation, mating, friendship, aggression, warfare, collective action, kinship, parenting, social learning, dietary choice, spatial cognition, reasoning, emotions, morality, personality and individual differences, predator avoidance, hazard management, and culture.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Foundations of Cognitive Neuroscience Research (121887)

Randy Buckner

2017 Fall (4 Credits)

Schedule:

F 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Intended for undergraduates or those with limited background in cognitive neuroscience. Students will attend and participate in laboratory research and in a seminar that includes discussion of active scientific projects, recent important journal articles, and didactic lecture on technical aspects of methods central to cognitive neuroscience research. Readings will be assigned that survey basic principles of system neuroscience, cognitive science, and methods including functional MRI, MEG, and single unit physiology.

Course Notes: Limited to students involved in research.

Class Notes: To express interest in enrollment, please email the instructor at randy_buckner@harvard.edu prior to the first class meeting.

Recommended Prep: Psychology concentrators should have taken SLS 20 or equivalent and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, Science of Living Systems 15, MCB 80 or MCB 81 before enrolling in this course; or permission of instructor. Non-psych concentrators are encouraged to enroll. Questions may be directed to the instructor at randy_buckner@harvard.edu.

Psychology 1355

The Adolescent Brain (110064)

Leah Somerville

2018 Spring (4 Credits)

Schedule:

T 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

This course will introduce students to the dynamics of brain development during the second decade of life. This course will examine key changes in structural, functional, connectivity, and neurochemical changes that take place in the brain during adolescence. We will assess how these changes influence several domains of the adolescent mind, including self-control, risky decision making, changes in daily emotions and moods, the onset of psychiatric illnesses (such as mood and anxiety disorders), and sensitivity to social evaluation. After building foundational knowledge in these areas, we will consider how to use this research to inform societal issues including trends in parenting, defining when a person reaches "adulthood", and considering when a person should be held responsible for their actions.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, MCB 80 or MCB 81 before enrolling in this course; or permission of instructor.

Psychology 1358

Cognitive and Neural Aspects of Object and Action Knowledge (127902)

Alfonso Caramazza

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Knowledge of objects and actions encompasses their perceptual and motor properties as well as more abstract properties such as information about their function (e.g., what they are used for, the goal of an action). How is this knowledge represented and organized in the brain? We will read and discuss key papers on object and action representation and critically evaluate results from behavioral, neurophysiological, neuropsychological, neuroimaging, and computational studies. The seminar will provide a critical review of the current literature and identify important challenges that await future research.

Course Notes:

Graduate students are welcome to enroll.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, MCB 80, or MCB 81 before enrolling in this course; or permission of instructor.

The Clever Human Brain: How we Control the Flow of Information and Make Good Decisions (203658)

Yaoda Xu

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Vital to any intelligent system is the ability to extract useful information from our surroundings and use it to make good judgements and decisions. What clever tricks does our brain use to accomplish this task? In this seminar we will have an in-depth examination of how our brain gates the flow of information with attentional control, how it encodes and stores goal-directed information in working memory, and how it encodes values, resolves conflicts and makes good decisions.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of either MCB 80, MCB 81, PSY 14,

PSY 1401, or other neuroscience or related experience by permission of instructor.

Cultural Psychology: Diverse Identities in the US and Beyond (107451)

Sasha Kimel

2018 Spring (4 Credits)

Schedule:

MW 0400 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

How does your nationally, social class, race/ethnicity, gender, faith and politics change the way you think, feel and behave? This course explores how your cultural background shapes your sense of self, emotions, motivation, decision-making and relationships. We will talk about God, sex, politics, violence and how our culture impacts the names we give our children. The goal of this course is to help you gain a better understanding of the ways in which human culture and the human psyche interact while enhancing your ability to promote greater intercultural harmony and to thrive in our increasingly multicultural and globalized world.

Course Notes:

Not open to graduate students.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology of Close Relationships (107602)

Holly Parker

2018 Spring (4 Credits)

Schedule:

M 0730 PM - 0929 PM

Instructor Permissions: Instructor

Enrollment Cap:

130

This course is an in-depth exploration of close relationships. Examples of topics to be covered include the biological bases of attraction; relationship formation; the end of relationships through break-up, divorce, or death; relationship satisfaction; deception; gender roles; same-sex relationships; loneliness; relationships and well-being; and public perceptions about relationships. You will have an opportunity to explore these topics primarily through critical examination of the empirical literature as well as through popular press.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

The Psychology of Leadership and Influence: How People Lead and Communicate With Impact (205536)

Amy Cuddy

2018 Spring (4 Credits)

Schedule:

MW 0400 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

In this course, we will explore the psychology of leadership and influence, tackling questions like: How is "good" leadership measured and what are its ingredients? How do cultures, organizations and individuals facilitate or impede the effectiveness of leaders? What allows people to be influential and lead well and ethically under high stress and uncertainty? Can people who lack formal power and status be truly influential? How do cognitive and social biases affect how people lead and are led, influence and are influenced? Combining theory and research from social, personality, and cognitive psychology and organizational behavior, with exercises and real-world cases, this course reveals the causes, characteristics, and outcomes of effective leadership and influence.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology of Diversity and Prejudice (205549)

Prerana Bharadwaj

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0700 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

Diversity, broadly defined, is a complex and contentious subject, particularly in psychological research. This course aims to examine various identities (including race, culture, gender, class, sexual orientation, religion, and disability) and the insights that psychological research can provide about them, and the

intersections between them. As a group, we will come to a better understanding of psychological theory related to diversity (such as stereotyping and prejudice), scrutinize the role of diversity in the content and methods of psychological research, and reflect on the impact of diversity through personal experiences in order to facilitate an interest in examining these social phenomena outside of the classroom.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Wired to Connect? The Neuroscience of Social Understanding and Interaction. (126848)

Mina Cikara

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 16

By some accounts, the large expansion of the human brain evolved due to the complex demands of dealing with social others—competing or cooperating with them, deceiving or empathizing with them, understanding or misjudging them. This discussion-based seminar surveys the emerging field of social cognitive neuroscience and its multi-level, multi-method approach to understanding the brain in its social context. We will review current theories and methods guiding the field and recent research examining the neural bases of social processes, including: theory of mind, empathy, morality, social decision-making, intergroup relations, among others.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 (or equivalent) and at least one foundational course from PSY 14, PSY 15, PSY 18, Science of Living Systems 15 or MCB 80 before enrolling in this course.

Research Seminar in Implicit Social Cognition (127489)

Mahzarin Banaji

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

An introduction to research on implicit social cognition, with special focus on attitudes, beliefs, and identity and in some cases its applications to law, business, medicine, and government. Students will be paired with individual researchers to work on ongoing projects that can turn into more independent projects. In addition to weekly work in the laboratory, students are expected to attend biweekly discussion groups focusing on current issues and directions in the laboratory as a whole.

How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies (203916)

Bethany Burum

2017 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Why do our ideologies change when we are put in positions of power (e.g., victim dehumanization), or subordination (e.g., Stockholm Syndrome), or with peers with a different opinion (e.g., conformity)? Why are our moral and political ideologies so different across time and culture (e.g., the ideologies of ISIS members compared to Americans)? Why do we claim that our morals are logically justifiable when we cannot justify them (e.g., moral dumbfounding)? This course will explore the hidden incentives that can explain these and many other puzzling features of our beliefs and ideologies. Evidence from psychology, as well as philosophy, economics, history, and current events (including the election cycle), will demonstrate the crucial way that incentives outside of our awareness shape our beliefs and ideologies.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 1576

But Why?: Ultimate Explanations for the Quirks of the Mind (203917)

Bethany Burum

2017 Fall (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Social psychology has documented many surprising features of the human mind, providing robust evidence that people deceive themselves, are systematically overconfident, believe implausible things to avoid inconsistency, and so on. Explanations often focus on proximate psychological mechanisms (e.g., we avoid inconsistency because we find it uncomfortable). But behind every proximate mechanism is an ultimate explanation (why is inconsistency uncomfortable?)—why did evolution or learning lead us to be this way? This course will examine proximate and ultimate explanations for classic social psychological phenomena and the insight that ultimate level explanations add, with a focus on how to test ultimate explanations convincingly

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Across Enemy Lines: Intergroup Relations (205551)

Prerana Bharadwaj

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

How do social groups come to a state of conflict or war? And how do they recover afterwards? Understanding group conflict and resolution requires examination of the social psychological dynamics that push people apart, and bring them together. This course uses social psychological research on

intergroup relations to attempt to understand global and domestic group conflicts using such concepts as group identity, prejudice, and collective emotions. Group conflict resolution strategies such as contact, dialogue, and apologies will also be evaluated.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 1578

The Invisible Hand: What Game Theory Reveals About Social Behavior (203927)

Bethany Burum

2018 Spring (4 Credits) **Schedule:** TR 0230 PM - 0359 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

What happens when the benefits of one strategy depend on the strategy chosen by another? From doing favors to driving on the right side of the road, this interdependence characterizes much of human social behavior, and game theory is the tool designed to reveal what results. This course will draw on models from game theory and evolutionary dynamics to explain some of the most puzzling aspects of our psychology, including why we speak indirectly, why people end up in feuds over trivial resources, and where our moral intuitions come from. No prior knowledge of game theory or evolutionary dynamics is required.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Self-reflection: Excessive Self-Interest versus the Quiet Ego (203980)

Katrina Jongman-Sereno

2018 Spring (4 Credits) **Schedule:** R 0300 PM - 0459 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Human's capacity to self-reflect is incredibly adaptive – it allows us to plan for the future, deliberately control our behavior, evaluate ourselves, introspect, and take others' perspectives. But, self-reflection has a dark side as well that underlies depression, anxiety, rumination, and egotism. This course examines how self-reflective biases such as self-preoccupation, self-interest, and egocentrism contribute to feeling superior about one's point of view, being unwilling to recognize that one's opinions may be incorrect, behaving in ways that are selfishly inconsiderate and antisocial, and having emotional overreactions to trivial transgressions. In addition, this class examines how these negative consequences can be reduced through a "quiet ego," a way of living characterized by less self-reflection, self-focus, and self-centeredness. Empathy, altruism, morality, humility, self-compassion, flow, mindfulness, authenticity, and forgiveness will be examined.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Impression Management and Social Influence (203983)

Katrina Jongman-Sereno

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course will focus on the private and public parts of the self – what people keep to themselves versus show others. Specifically, we will focus on the role of impression management in determining behavior—how does the presence of other people change one's behavior? What are the ways in which people manage the impressions others form of them? What is at stake when people try to make certain impressions on others? We will examine cognitive, emotional, and relational precursors in professional and social contexts. We will cover issues pertaining to professional success, forming and maintaining relationships, and engaging risky behavior, as well as what happens when people are placed in situations in which they attempt to convey conflicting impressions.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 1581

Psychology of Economic Inequality (205556)

Sarah Cotterill

2017 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Every society in the world is structured such that some people earn higher incomes, have greater access to resources, and enjoy more social power and status than others. Scholars across several disciplines have sought to explain why income inequality is ubiquitous and persistent. In this course, we are particularly concerned with how features of the mind, and the mind in society, help explain the widening gap between the rich and the poor. How do people perceive income inequality, and how do those perceptions influence their social attitudes and policy positions? Why do people who stand to benefit from redistribution sometimes oppose it? How do we decide what's fair, and when do perceptions of fairness emerge in human development? How does perceived lack of control or power affect the psychology of low-status groups, and how do those effects, in turn, influence power imbalances? In answering these questions, we'll consider a diversity of perspectives from the literatures on evolutionary and developmental psychology, social psychology, political science and social policy.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology of Belief Systems: Sense-Making, Motivated Reasoning, Ideology, and Misinformation (205557)

Sarah Cotterill

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

The human mind has a remarkable capacity for story-telling and meaning-making. We weave together narratives of our lives and the world around us, we readily justify our attitudes and behavior, and we tend to perceive the world in a manner that's consistent with our narratives and justifications, even when we're confronted with evidence to the contrary. This course explores why the human mind is so prone to building stories and rationales, and the consequences of these processes both for our everyday lives and for society at large.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 1583

Psychology of Social Protest (205558)

Sarah Cotterill

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

40

This course examines the psychological factors that drive people to engage in collective action to improve the status and standing of their social group, or to protest the status quo—as was seen, for example, in the Civil Rights Movement of the mid-twentieth century, the Occupy Wall Street protests, the Arab Spring, and the recent Women's March. The course begins with an introduction to the psychology of social groups, including perspectives from the literatures on social identity and self-categorization theory. We'll consider the conditions that cause people to be more likely to collectively challenge the status quo, as well as the equally compelling question of why low-status groups often don't protest inequity and injustice. Later in the course, we'll explore predictors of normative versus nonnormative collective action, and consider the problem of terrorism. What drives radicalization, and why are some people willing to die in order to inflict harm on others? In addressing these questions, the course incorporates perspectives from moral and political psychology, political science, and personality psychology.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 1584

Leadership Decision Making (205646)

Jennifer S. Lerner

2018 Spring (4 Credits)

Schedule:

MW 0245 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

Organizational leaders make decisions involving risk and uncertainty every day. Whom should our organization hire? Should we choose the gamble or the sure thing? How should we structure accountability systems? How do we avoid operating out of fear? But a leader's impact only goes so far unless s/he takes steps to engineer optimal decision environments for the organization as a whole. By gaining an understanding of fundamental mind-brain-behavior relationships in judgment and decision making, you will become better able to design decision environments that make everyone smarter - i.e., less susceptible to

common errors and biases. Taking this course will not tell you what to choose but it will give you frameworks that reveal how to choose and how to structure optimal decision environments. Specifically, course topics will include (a) cognitive processes in perception, memory and context-dependence; (b) how questions affect answers; (c) models of decision making; (d) heuristics and biases; (e) social and group influences; (f) common traps; and (g) de-biasing techniques. We will also discuss emotional influences on decision making. The lectures and discussions will be coordinated to complement weekly readings, which draw from psychology, behavioral economics, and neuroscience.

Throughout the course, the overarching goals are to: (1) Learn about the academic field of behavioral decision making, its major theories, results, and debates. (2) Become a critical consumer of research findings, learning methodological standards for evaluating the soundness of empirical studies. (3) Develop the ability to effectively write and speak about behavioral science theories, results, and debates. (4) Acquire practical skills for improving your own judgments and decisions. (5) Acquire knowledge of which biases leaders can address with training/knowledge versus which biases respond best to institutional design changes (e.g., nudges). (6) Learn when and how to conduct a randomized controlled field experiment. (7) Develop a capstone project in which you apply the material to improve professional decision making processes. Possible applications to legal process, government institutions, medical settings, public health, education, finance and other domains abound.

Course Notes: Also offered by the Harvard Kennedy School as MLD 301. Doctoral students will have customized assignments and an additional meeting time in order to receive credit.

Class Notes: This course will meet in Wexner 330 at the Harvard Kennedy School.

Recommended Prep: For undergraduates, the Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Enrollment Cap:

30

This course will focus on unpacking human development from ages 18 to 29, a period of the life course now known as "emerging adulthood" coined by Dr. Jeffrey Arnett in 2000. Topics explored will include domains of individual development, including cognitive development, mental health, and identity formation, and contexts that influence individual development, including family relationships, education and work settings, and media. Differences between the experience of emerging adulthood in industrialized and developing countries will be incorporated, as well as attention to debunking popularized myths about this period of development.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Develop. Disabilities: Neurobio., Treatment, Implications for Health & Education Policy (205609)

Nadine Gaab

2018 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

Developmental disabilities are highly prevalent and have a substantial impact on the health and educational outcomes of affected children and their families. This course will provide a comprehensive overview of the most common developmental disabilities, including autism, developmental dyslexia, dyscalculia, attention-deficit hyperactivity disorder, and others. Students will review etiological models from different theoretical perspectives with a primary focus on neurodevelopmental trajectories, cognitive variables and environmental factors. We will further discuss diagnostic criteria, symptomatology and key interventional strategies as well as comorbidities and protective factors. This information will be embedded into discussions pertaining to the intersection between typical and atypical neurodevelopment and health/education policy.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

It Takes a Village: Child Development and Social Policy (204545)

Sarah Hope Lincoln

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Will investing in the education of its children change a community's economic climate? Should lead screening be required for all children to prevent lead poisoning such as occurred in Flint, Michigan? What

is the effect of poverty on a child's cognitive functioning? Which policies exploit children and which policies protect them? This course examines the structure and implementation of social policy to solve problems related to children, using the lens of developmental psychology.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

The Emotional Mind (108490)

Leah Somerville

2017 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Not only do emotions permeate our everyday lives, they have aided in the survival of the human species. But what are emotions, and what are they good for? What causes us to experience an emotion? And how do emotional responses, in turn, influence our perception, memory, decision-making, and psychological well-being? This course will address these questions by drawing on key advances from historical, philosophical, psychological, and neuroscientific perspectives.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from MCB 80, MCB 81, PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Personality and Self-Knowledge (203926)

Katrina Jongman-Sereno

2017 Fall (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

40

This course focuses on the role that personality plays in determining behavior. Cognitive, emotional, and motivational aspects of personality will be covered. For example, what leads people to be rigid in their beliefs versus open to new ideas and experiences? Why are some people motivated by money and others are motivated to form relationships? Topics include: self-knowledge – how well do we know ourselves? What do we know about ourselves? How well do others know us?; personality stability and change – who are you if your personality is not stable?; maladaptive personalities – both in the "normal" range as well as personality disorders. This course takes a modern approach to personality and also introduces methodological advances and techniques such as using smart phones to record data and room observation – what can you tell about someone from their living spaces and belongings?

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych

AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Mood Disorders (156557)

Evan Kleiman

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

The goal of this course is to give an overview of the major research findings across mood disorders such as major depressive disorder, bipolar disorder, generalized anxiety disorder, and social anxiety disorder. Every class will involve classic and cutting edge research from the literature on mood disorders. The class will also involve discussion of psychological (i.e., therapeutic) and psychiatric (i.e., medical) perspectives on etiology and treatment. By the end of the course, students will understand the etiology, course, and treatment of a variety of mood disorders.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Psychotherapy: Science and Practice (160646)

John Weisz

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

Would you pay someone to help you change? Millions of people do, every week. Psychotherapy is a healing art, a subject of scientific inquiry, and—for many—a business venture. In this course we will bring these strands together, focusing on how psychotherapy is practiced in the real world and how clinical science is used to test claims of success. We will examine competing models of therapy, evaluate their scientific status, and dig into case examples of each. We will also explore hot topics in the field, including whether all therapies have about the same effect (the "dodo bird" hypothesis), whether internet-based therapies actually work, and how to get effective therapies to traumatized people in war-ravaged and low-resource countries.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before

enrolling in this course.

Stress, Coping, and Resilience (156561)

Evan Kleiman

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

The goal of this course is to give an in-depth understanding of the theoretical and empirical work on stress (e.g., negative life events, psychological and physiological stress), coping, and resilience. Theories of stress will be discussed from social, cognitive, and biological perspectives. Major focus will be given to the study of resilience to stress and related topics (e.g., psychopathology, self-injury) through the lens of positive psychology. By the end of the course, students will understand the causes, course, and consequences of stress and resilience to stress.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and either PSY 18 or PSY1861 before enrolling in this course; or permission of instructor.

Methods of Behavioral Research (127078)

Mina Cikara

2018 Spring (4 Credits)

Schedule:

M 1100 AM - 1159 AM

Instructor Permissions: Instructor**Enrollment Cap:**

40

This is a laboratory course only. Our goal is for you to master the essentials of behavioral experimentation through a succession of projects, starting with a small number of fundamental paradigms that can be used in many areas of psychology, culminating with a larger final project. Emphasis will be on acquiring practical laboratory skills and more abstract conceptual tools. Basic aspects of data exploration and analysis will be covered. A high value will be placed on the communication of results through effective visual graphics in oral and written reports.

Class Notes:

There will be a required 2.5 hour lab session scheduled for Wed. 7-9:30 p.m. If the enrollment permits a second section, it will be held Thurs. 2:30-5. Students must be able to fit one or the other into your schedule.

Recommended Prep:

The Psychology Department requires completion of Psychology 1900, Statistics 100, 101, 102, 104, or the equivalent.

Instructor Permissions: Instructor

Enrollment Cap:

20

The first series of lectures (units 1-4) covers advanced regression techniques. We extend the linear mixed-effects model in terms of non-linear effects which leads to generalized additive mixed-effects models (GAMM), with spline specifications at its core. At this point we will also introduce cross-validation as a tool for assessing predictive accuracy of a model while avoiding overfitting. This is followed by shrinkage/regularization techniques (Lasso) which are attractive for regression scenarios with many predictors. In the time series unit we introduce strategies for finding patterns in time trajectories and making corresponding predictions (ARIMA models, Holt-Winters smoothing).

In Unit 5 we model trajectories using concepts from functional data analysis (FDA) where each single individual is represented by a function (e.g. growth curve, EEG signal, etc.). Graphical models (Unit 6) allow us to model dependencies in complex multivariate datasets (e.g., studying relationships among clinical symptoms). In the subsequent units we move into Machine Learning territory. We start with unsupervised learning which is essentially clustering. Basic approaches such as hierarchical clustering techniques and k-means are explained. We proceed with borderline unsupervised/supervised approaches such as association rules and Kohonen networks. In Unit 9 we learn more advanced parametric clustering techniques (mixture distributions) which we will then integrate into a regression framework (mixture regression). Hidden Markov models will be introduced within this context as well.

The remaining three units are all about supervised learning where our aim is classification/prediction. Unit 10 presents tree-based approaches (decision/regression trees), model-based recursive partitioning (i.e., finding optimal predictor splits in e.g. a mixed-effects regression model), and ensemble tree learning (random forests).

In Unit 11 we briefly introduce discriminant analysis and extend it to support vector machines (SVM), often

applied on fMRI data. Finally, we will cover neural networks and some modern "deep learning" flavors.

Recommended Prep: It is required that students completed Psych 1950 or an equivalent class. Students need to be solid in multiple regression analysis including mixed-effects models. R knowledge is absolutely necessary

Empirical and computational approaches to early cognitive development (110323)

Elizabeth Spelke

2018 Spring (4 Credits)

Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

This graduate seminar will meet once weekly to consider five topics in cognitive science that are subject to current controversies: controversies that might be settled by a multi-pronged, interdisciplinary effort. We will devote two meetings to each topic: for the first week, we will overview the current state of research and theory on the topic, focusing both on settled and on open questions. For the second week, we will present and discuss student-generated (and maybe a couple of faculty-generated) approaches to addressing the questions. Students will write response papers each week. For the first of each pair of classes, their paper should point to one or more questions left open by the readings. For the following class, their paper should suggest an experiment or series of experiments that might help answer some open question in the domain. Response papers will not be graded and there is no final paper. Students are required, however, to submit the response papers and to lead or co-lead one class discussion. Everyone should expect to participate actively in thinking through the issues.

Laboratory on Reinforcement Learning and Decision Making (160657)

Samuel Gershman

2018 Spring (4 Credits)

Schedule: F 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This lab course provides instruction and experience in conducting research on reinforcement learning and decision making, using a combination of computational, behavioral and neural techniques. Students will learn how to fit models of reinforcement learning and decision making to behavioral data, collect and analyze functional MRI data, and develop algorithms for artificial intelligence. Undergraduates are required to write a research report at the end of the semester on the studies conducted in the lab.

Course Notes: Open to graduate and undergraduate students working in the instructor's laboratory.

Class Notes: For information about joining the lab, email gershman@fas.harvard.edu

Current topics in cognitive neuroscience of vision and cognition (204937)

Yaoda Xu

2017 Fall (4 Credits)

Schedule: M 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

In this seminar, we will learn about current developments in vision and cognitive neuroscience research. Based on the students' research interests, we will select appropriate papers that will cover the background and ongoing research effort on particular research topics, including, but not limited to, attention, working memory, and object representation. We will discuss research papers using behavioral, human neuroimaging and monkey neurophysiology methods. Students will also present their own ongoing work relevant to the research topics under discussion.

Course Notes: Not open to undergraduates.

Research Methods in Child & Adolescent Clinical Psychology (124970)

John Weisz

2018 Spring (4 Credits) **Schedule:** W 1200 PM - 0129 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

This course is designed to give you exposure to the concepts, as well as the nuts and bolts, of research in clinical psychology of childhood and adolescence. There is a special emphasis in this course (as in the lab) on intervention research addressing youth depression, anxiety, and conduct-related problems and disorders. If you are a psychology concentrator at Harvard, you may have already taken classroom-based courses covering theories and methods that guide research in clinical psychology, such as Abnormal Psychology and Developmental Psychopathology. You may also have taken courses that introduced you to the types of statistical analyses (Psych 1900) and research methods (Psych 1901) used in psychological research. In this course, we will build on the foundation you received in such courses by applying what you have learned to the conduct of specific research projects.

In this class, you will participate in several aspects of the clinical research process via your active involvement in the research of our psychology laboratory. More specifically, through attending weekly class/lab meetings and participating in one or more research projects, you will learn how specific research ideas take shape; how research questions and hypotheses are generated; how studies are designed to address these research questions and hypotheses; how data are collected, cleaned, entered into study datasets, then analyzed; and how findings are interpreted and organized for presentation at professional meetings and in scientific publications.

The main goals of research in our lab are to build an understanding of which interventions for child and adolescent mental health problems are effective, and to promote use of the best evidence-based assessment and intervention in everyday clinical practice for youths and families. In pursuing these goals, we and our colleagues develop ways of structuring evidence-based practices to make them user-friendly and tailored to the settings in which youngsters typically receive mental health care—e.g., community mental health clinics and schools. Much of our work focuses on developing and testing these tailored approaches. We also conduct meta-analyses of the youth psychotherapy research literature, to sum up what has been learned from all the treatment studies with children and adolescents.

This course is designed to be useful to students who plan to pursue a career in child and adolescent mental health, particularly those with an interest in psychological research. However, the skills conveyed (e.g., critical thinking, research design, science writing) may be useful in a variety of ways and relevant to a number of different career paths.

Class Notes: Students planning to take the course should e-mail Gabriela Hungerford at ghungerford@fas.harvard.edu to schedule a phone call to discuss course objectives and requirements.

Recommended Prep: An interview with the instructors is required.

Bad Genes, Bad Parents, Bad Behaviors (159711)

Joshua Buckholtz

2018 Spring (4 Credits)

Schedule: F 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

This class will explore the biology of criminal behavior and violence. We will examine the construct of "anti-sociality" and unpack clinical and diagnostic issues surrounding its diverse manifestations, such as psychopathy. A strong emphasis will be placed on biological mechanisms. A particular focus will be on understanding how genes and environments act and interact to predispose antisocial behavior by shaping brain function and development.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and either PSY 18 or PSY 1861 before enrolling in this course.

Intergroup Relations: Research Seminar (122753)

James Sidanius

2018 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

30

The seminar provides students with research experience concerning different forms of intergroup relations, including the social psychology of interracial and interethnic conflict and prejudice. Students meet on a weekly basis to discuss ongoing research on psychological mechanisms involved in power, stereotyping, inequality, identity, and ideology. Undergraduates will work under the supervision of a graduate student in the design and conduct of lab-based and survey experiments, and the input, coding and early analysis of empirical data. Undergraduate enrollees will also attend biweekly critical discussions of research articles in the field, and will have the opportunity to develop and receive feedback on their own research ideas.

Class Notes: For information about this lab, e-mail the instructor at sidanius@wjh.harvard.edu.

Doing Psychological Science (113780)

Daniel Gilbert

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Psychology 2580r is a hands-on course in which students participate in all aspects of the research process, from the design and execution of empirical research studies to the analysis of data. Each student works closely with a graduate student or post-doctoral mentor who supervises the student's daily activities. Students are admitted to PSY 2580r only by permission.

Course Notes: Open to students working on research in the instructor's laboratory.

For information about joining the lab, email the instructor at gilbert@wjh.harvard.edu

Class Notes: Course information may be found at <http://www.danielgilbert.com/2580r.htm>

Lab in Intergroup Neuroscience (156624)

Mina Cikara

2018 Spring (4 Credits)

Schedule: M 0330 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Year-long lab course exploring how cognition, affect, neural responses, and behavior change when social relations shift from "me and you" to "us and them." Students will participate in experiment development and data collection employing methods ranging from standard laboratory experiments, implicit and explicit self-reports, and behavioral measures, to fMRI and psychophysiology. Students will also read and discuss papers on intergroup relations in our weekly meetings.

Course Notes: Interested students should take the survey at <https://harvard.az1>.

Class Notes: For information about this lab, e-mail the instructor at mcikara@fas.harvard.edu

Recommended Prep: For undergraduates, Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from MCB 80, MCB 81, PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15.

Studying Religion and Media (207022)

Helen Hardacre

Anne E. Monius

2018 Spring (4 Credits)

Schedule:

TR 0830 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Religious language, imagery, and values permeate virtually all aspects of contemporary American life, even those that are explicitly taken to be "secular." While we may decry the horrific acts of torture and destruction done in the name of Islam by ISIS, we are far less likely to recognize as deeply Protestant the values and orientations embedded in American culture. Particularly in the case of the media, religious language and imagery continually bombard us, often without us recognizing them as such. This course invites you to think more deeply about what religion is and how it operates across a wide variety of media in the United States and around the world.

Religion 19

African American Religions: An Introduction (109755)

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

The purpose of this course is to introduce students to the religious practices, beliefs, and institutions of African Americans from the 17th century to present. Topics include, but are not limited to, black religions in North America under slavery, conjuring traditions, African institutional churches, black Muslims, Jews, the black freedom movement, and the relation of black religion to literature and sacred music. Readings will include W.E.B. Du Bois, Albert Raboteau, Evelyn Brooks-Higginbotham, James Baldwin, Barbara Diane-Savage, Judith Weisenfeld and Cornel West.

Incarnation and Desire (107859)

Courtney Lamberth

2017 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

The course offers an introduction to Christian thought by considering major texts, figures and ideas from the first century to the present in their changing cultural contexts. Central themes include the categories of body, flesh and soul; free will, desire and sin in relation to divine grace; and the meaning of incarnation. Texts include canonical and non-canonical early Christian literatures, Patristic and medieval texts, Reformation theologies, as well as modern and contemporary authors. Students will develop a sense of the distinguishing features of the Christian world view, while gaining an appreciation for the significant

diversity across the tradition

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Letters of Paul: Ethnicity, Sex, Ethics, and the End of the World (109528)

Laura Nasrallah

2018 Spring (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This introductory course focuses on 1) the Pauline epistles in their first-century sociopolitical context, and their earliest interpretations; 2) recent trends in Pauline studies, including feminist and postcolonial interpretation, the New Perspective, and European philosophical treatments (Badiou, Zizek). Special attention will be given to ideas of the gendered/enslaved body and its potential for transformation and pollution, ethnicity in the Roman world, the relations of communities to Roman imperial power, and views of time and the impending eschaton.

Course Notes: Offered jointly with the Divinity School as 1544. Former course title: Paul's Letters and Their Interpreters: Ethnicity, Empire, the Body, and the End of the World. This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Real Game of Thrones – Culture, Society, and Religion in the Middle Ages (205626)

Racha Kirakosian

2017 Fall (4 Credits)

Schedule:

MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The fictional world of "The Game of Thrones" is often associated with the Middle Ages. Why is this the case? What do our associations today tell us about the ways in which we appropriate history and narratives? In this course, we will use the popular fantasy show Game of Thrones to explore events, structures, and people in medieval history, art, and literature. Students will gain a reflective understanding of medieval culture, society, and religion while engaging in a critical discussion on medievalism.

A general and wide-ranging exploration of the Jewish religious tradition, from its inception in biblical Israel though its rabbinic, medieval, and modern iterations. The central focus lies on the literary meanings and existential questions of the classical tradition, as well as on the relationships between texts, religious claims, and practices. We shall also consider some of the restatements, reformulations, and challenges to tradition that have arisen in modern times. Open to undergraduates, including first year students, by permission.

Course Notes: Jointly offered with Divinity as 3036.

How was disease understood and healing sought in ancient Greek religion? What was the relationship of

religious healing to the practice of medicine in Mediterranean antiquity? What light does this history shed on contemporary ideologies and practices of health care? Exploring three prominent sanctuaries of the physician-god Asklepios that were sites of pilgrimage and religious healing (Epidauros, Kos, and Pergamon), the seminar will consider a range of archaeological and literary evidence. Enrollment limited to 15 with the permission of the instructor, by application at the first course meeting.

Scripture Stories of Women (119944)

Elisabeth Schussler Fiorenza

2017 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This course will engage in a feminist reading of - texts of Scripture about wo/men in order to reconstruct wo/men's religious history and to assess whether these texts are "good news" for wo/men. Special attention will be given to feminist hermeneutics, and historical reconstruction. Discussion will focus on the significance of social location, critical methods, and historical imagination for the interpretation and significance of these stories about Jewish wo/men and their significance for contemporary religious self-understanding and ministerial praxis. Lectures, group discussions, and group projects seek to foster a participatory democratic style of learning. Note: Course has additional hour to be arranged.

Course Notes:

Offered jointly with the Divinity School as 1503.

Apocalyptic Literature from the Second Temple period to Byzantium and Early Islam (109541)

Giovanni Bazzana

2017 Fall (4 Credits)

Schedule: T 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap: n/a

The course will review a broad sample of texts belonging to the apocalyptic genre and composed between the third century BCE and the seventh century CE. The main goal of the course is to reflect on the crucial role played by apocalyptic literature in shaping religious thoughts and practices as well as socio-political movements and ethical choices in a span of time that witnessed the formation of the Jewish, Christian, and Islamic traditions as we know them today. Moreover, the course will introduce students to interpretive tools useful to think about the relationship between ancient apocalyptic literature and the contemporary world in selected areas such as historical imaginations of the future, violence and religion, and means to reflect on change.

Course Notes: Offered jointly with the Divinity School as 1536.

Schedule:

MW 0400 PM - 0529 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is designed to provide a historical overview of the Church and society in western Europe from the second through the twelfth century. Thus, this course will investigate late-antique and early medieval Christianity in its social and its cultural context. Narrative and theological story lines to be pursued will include the varieties of early Christianity; relations with the Roman state (including persecution of Christians by it); the emergence of normative or "early Catholic" Christianity; early and early medieval monasticism; the search for the Christian doctrine of God and Christ; early Christian architecture, piety and worship; Christianity and other world religions (especially Judaism and Islam); western and eastern Christianity; the emergence of the Roman primacy; the Christianization of the north of Europe; the nature of parochial Christianity; the emergence of the pope, in the eleventh century, as an international religious force; the crusades; and early medieval piety. We will also be strengthening our skills as interpreters of primary sources. Some attention will be paid to major historiographical issues.

The Protestant Reformations (205627)

Michelle Sanchez

2017 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

The sixteenth century saw turmoil and rapid change in and beyond Europe: religious fragmentation, but also rising colonization, class warfare, new media, and the seeds of absolutism and nationalism. This course examines major movements of Protestant Reform, focusing on the role of theological arguments in reshaping concepts of power and representation. Why were certain reforms persuasive, and to whom? What were their political and social implications—not only for clergy, princes, and merchant-class men, but also peasants, women, Jews, Muslims, intellectuals, and artists? Finally, we will read these histories alongside our present, in which media-driven crisis has become the norm.

Pope Francis: His "Theology of the People" and the Future of Religion (205639)

Harvey Cox

2017 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Francis is the first pope in nearly two thousand years from outside Europe; the first to take the name "Francis;" the first Jesuit. Since his selection in 2013 he has become widely popular all around the world, but also bitterly opposed. What impact will his papacy have on the future of Christianity and religion in general?

In this seminar, we will examine together some biographical material on Francis and ask how his earlier life and intellectual and theological influences, including liberation theology have shaped his papacy; his peace-making efforts; his attempts to reform the Vatican and to reorient the church towards the poor. We will devote special attention to his major encyclicals, The Joy of the Gospel and Care for Creation.

The Existence of God: Arguments and Refusals (205630)

Michelle Sanchez

2018 Spring (4 Credits)

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

This introduction to Christian theology will ask why some Christian writers have crafted arguments for the existence of God while others have not. Who do these arguments hope to persuade? Under what conditions are they designed to work, and to what practical end? Conversely, what does it mean when a Christian author refuses the use of such arguments? After reading historical examples from authors including Augustine, Anselm, Aquinas, Calvin, Descartes, Kant, and Weil, we will contrast these sources with contemporary discourses in which the existence of God (or not) is often treated as the decisive feature of warring "worldviews."

Course Notes: Jointly offered with Divinity as 2314.

Calvin, Schleiermacher, Barth, Cone (205628)

Michelle Sanchez

2017 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

John Calvin, Friedrich Schleiermacher and Karl Barth are major figures of Reformed Protestantism whose work directly engaged the political and intellectual concerns of their own times. In the 1970s, James Cone's Black Theology took its point of departure, in part, from Cone's critique of Barth. This course will closely read each author, looking at similarities and differences in how they approach theological topics (e.g., God, human being, scripture, nature, salvation, church). Throughout, we will consider what these four projects can teach us both about the "tradition" of Reformed theology and the task and responsibility of theology more generally.

Course Notes:

Offered jointly with Divinity as 2278.

After Luther: Faith, Will, Law, and the Question of Goodness (205629)

Michelle Sanchez

2018 Spring (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Is it possible for a person to know and do "the good"? Can we trust in the law, the will, or faith to make us good? These questions were central to Luther's reforms. Kant, Kierkegaard, and Nietzsche, who spent their formative years in a Lutheran context, would also engage these questions in explicit, implicit, and deeply critical ways. Later, theologian Dietrich Bonhoeffer drew from all of these authors in order to rethink his own ethics of political resistance to fascism. This course will trace these questions across these five authors in critical conversation with contemporary ethical theorists.

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce students to the critical use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

Course Notes: Offered jointly with the Divinity School as 2293. Some background in European history is desirable but not required.

Malcolm, Martin, & Masculinity (205648)

Jonathan Walton

2018 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

The Civil Rights and Black Power movements (narrowly defined) were principally struggles for racial equality and economic justice. Yet both Martin and Malcolm extend from religious traditions where notions of social respectability and hyper-masculinity are inextricably linked to gendered conceptions of racial progress. The aim of this course, then, is to engage the theological, philosophical and social thought of these men while unmasking normative assumptions about race, domesticity and sexuality that informed their outlooks and animated their gendered moral frameworks and masculinist organizing strategies. We will critically unpack the gender ideologies that underlay the thought and praxis of Malcolm X and Martin

King while assessing ethical implications for contemporary politics and activism.

Religion and Race in the United States (207215)

Todne Thomas

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Religion and race mediate contested social memberships. Religious imaginaries often possess power through their association with eternal and transcendent truths. Racial identities have existed as powerful social taxonomies because they are believed to be fixed, innate, and biologically-determined. Thus, religious and racial phenomena are powerfully imagined as somehow existing beyond the realm of the social. When set in the context of the United States—a society that is self-referentially exceptional and multicultural but that is informed by hegemonic and colonial white Anglo-Saxon Protestant cultural norms—the critical, deconstructive study of religion and race emerges as a complex yet significant intellectual project. This new intermediate class examines how religion and race intersect in the United States from the nineteenth century until the present. Through our shared analysis of texts that straddle a number of disciplines and genres, we will explore how religion and race mutually inform shared

understandings of socio-political belonging, hierarchy and boundaries, recuperative institutional projects, and structural and personal identities.

Introduction to Islamic Mystical Traditions (113442)

Ali S. Asani

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course offers an introductory survey of mystical traditions of Islam, popularly labelled as "Sufism." It explores the fundamental concepts, practices, and institutions associated with these traditions, their historical development and their influence on the devotional, cultural and social lives of Muslim communities through the centuries. Through case studies drawn from the Middle East, South Asia, West Africa and North America, the course examines ways in which these traditions have developed and promoted alternative perspectives on what it means to be Muslim, challenging in recent times sectarian, legalistic and politicized understandings of Islam such as Wahhabi, Islamism and jihadism. The course assumes no prior knowledge of Islam.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. Offered jointly with the Divinity School as 3620.

The problem of religious diversity recurs in all of the major branches of Islamic thought and appears in complex permutations in diverse cultural contexts. Focusing primarily on pre-modern Islam, this course invites students to investigate perspectives on the religious other in the Quran, Islamic law, theology, philosophy and Sufism. In the final portion of the course we will look at Muslim Spain, Mughal India, and the Muslim-Confucians of late imperial China as examples of how these complex dynamics played out on the ground. The larger aim of this course is for students to develop interpretive skill in dealing with the internal complexity of a number of Islamic discourses and contexts by pursuing a single problematic across them. To this end the course will be taught in seminar format and participants will be encouraged to engage creatively with primary and secondary sources to develop their own scholarly points of view.

Recommended Prep: One course dealing with Islam or Instructor's Permission.

Love, Sanctity and Authority: An Introduction to Shii Islam (207015)

Nicholas Boylston

2018 Spring (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Though they are minority traditions often overlooked in the academy, the major branches of Shii Islam (Twelver, Ismaili and Zaydi) provide a valuable entry point into the study of those aspects of the Islamic tradition that are most constitutive and most contested. After examining the historical contexts in which these three branches arose, the course will address Shia theologies, rituals, law, spiritualities and notions of authority, comparing views across the three branches and highlighting their internal differences through history. We will inquire into what, if anything, unites the concerns of each branch, focusing on conceptions of Imamate and the central concept of wilāya/walāya, which means love, political and spiritual authority, filiation, sanctity, and proximity to God. In the final unit of the course we will examine the emergence of modern Shii social configurations and state building and their relationships to the doctrines and practices discussed throughout the class, focusing on Twelver Iran and Zaydi Yemen.

Additional hour to be arranged.

Religion 1920

The Politics of Storytelling (109925)

Michael Jackson

2017 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course addresses Hannah Arendt's thesis that storytelling is a critical strategy for bridging the gap between private and public realms. Storytelling is thus understood as a mode of social and political activity that involves a struggle between personal and collective representations of the "truth" and between unofficial and official versions of events. Through the close analysis of storytelling in a variety of situations, we will explore the ways in which the meaning of stories resides not in any ahistorical essence or internal logic, but emerges from the everyday human struggle to strike a balance between domains of experience that are, on the one hand, felt to belong to oneself or one's own kind, and, on the other, felt to be shared by or to belong to others.

Course Notes: Offered jointly with the Divinity School as 3859.

The Elementary Forms of Religious Life (205224)

Michael Jackson

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

In as much as the academic study of religion privileges sacred texts, and identifies religious life with liturgy or institutions like mosques, temples, churches, shrines and sacred sites, it reinforces an intellectual bias toward intransitive forms rather than transitional phenomena, and risks reducing lived experience to pre-established rubrics. The focus of this course is on modes of experience that dissolve or transgress the lines conventionally drawn between human and divine, body and mind, life and death, self and other, subject and object, human and animal, culture and nature, reality and dream. Readings for this course challenge entrenched Eurocentric distinctions between science and superstition, or modernity and premodernity, and explore the roots of religious experience in the human capacities for play, creative apperception, active imagination, and attachment.

Course Notes: Jointly offered with Divinity as 3708.

Religion 2021

Religion and the Historical Method: Part 1 (205624)

David Holland

2017 Fall (4 Credits)

Schedule:

T 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This course invites scholars of religion into sustained engagement with leading theories and methods in the study of history. We will consider first-order questions, principally what it means to think historically and how historical forms of inquiry differ from their alternatives. We will also grapple with more pragmatic concerns, such as how to navigate an archive, how to build a historical argument and how to write in a historical key. We will read influential self-reflective texts by historians, including Joyce Appleby's, et al., *Telling the Truth about History* and David Hackett Fischers's *Historians' Fallacies*, as well as materials that explicitly address the relationship of historiographical norms to religion, exemplified by a special issue of *Fides et Historia* dedicated to that topic. The culminating project for the course will be a research proposal and annotated bibliography for an article-length study in a field of religious history. The course's ventures into the disciplinary questions of history will always be framed in terms of their relevance to the study of religion.

Course Notes: Jointly offered with Divinity as 3130.

Religion and the Historical Method: Part 2 (205625)

David Holland

2018 Spring (4 Credits)

Schedule: T 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Part 2 of this course serves as a research seminar in which students develop writing projects that apply historical methodologies to religion-related questions. We will collectively workshop outlines and drafts, culminating in an article-length paper approaching publishable quality. Students are strongly encouraged to take Part 1 of the course before enrolling in the research seminar; however, exceptions can be made at the instructor's discretion.

Course Notes: Offered jointly with Divinity as 3131.

Politics of Life (156032)

2017 Fall (4 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap:

18

In this advanced seminar, we will analyze conceptualizations of "life itself" in contemporary political philosophy, paying especial attention to the legacy of religious ideas on contemporary "secular" theory.

In contemporary philosophical discussions, conceptualizations of life are prominent in two significantly

different areas of scholarship: "biopolitics" and the "new materialisms" (or "material ontologies"). Both of them inherit a notion of life marked by the emergence of biology as a field set apart from religion or metaphysics. Discussions of biopolitics focus on how regimes of power control human bodies. "New materialisms" seek to draw attention to the vitality of matter, claiming that contemporary scholarship has focused exclusively on the power of human actions, especially language. But what is the relationship, if any, between these two recent areas of debate? What conceptions of society and corporeality inform them? And what makes philosophical discussions of the meaning of life particularly important in the 21st century?

Course Notes: Jointly offered with Divinity as 2604.

Poetry and the Archive (204025)

Amy Hollywood

2017 Fall (4 Credits)

Schedule:

T 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Much contemporary American poetry in English, both in the United States and in Canada, roots itself in documentary and archival work, telling often fractured and multi-vocal stories about particular places, times, environments, and events. The course will explore key examples of this work alongside recent theoretical discussions of the archive. Authors to be read will likely include Jacques Derrida, Susan Howe, C. D. Wright, Brenda Coultas, S. Nourbese Philip, C. S. Giscombe, and Jill Magi.

Course Notes: Jointly offered with Divinity as 2575.

Politics and Scripture in the United States (205395)

Laura Nasrallah

David Holland

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Course participants will consider together how to construct a course about the intersection of the interpretation of scripture with key political and social issues in the history of the United States. Topics to be considered include the formation of canon, the history of scriptural interpretation in the academy, colonization, race, slavery, women's rights, public education, the Bible and state violence, LGBTQ rights, and the parallels between scriptural and constitutional interpretation. In addition, course members will

discuss issues of pedagogy, syllabus construction, and teaching with objects, including materials at the Houghton. While this is aimed especially for those thinking about undergraduate teaching, those interested in teaching settings in religious contexts and elementary and high schools are also welcome.

Seminar for Advanced New Testament Students (143084)

Elisabeth Schussler Fiorenza

2017 Fall (2 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

A bi-weekly seminar required for ThM candidates in the field and for ThD and PhD candidates until the term following successful completion of general exams; recommended for MTS and MDiv students who plan to apply for doctoral studies. Topic for 2017/2018: Exploring the Profession. The seminar will focus on N*T /Early Christian Studies as an academic discipline. We will examine the history, research areas, educational practices, theoretical paradigms and future visions of the discipline and doctoral work in religion in general. Special attention will be given to graduate professional education and pedagogy. The seminar is to be taken as sat/unsat. Consult instructor if you have questions.

Note: Students must complete both terms of the course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

A course available to Th.M., Th.D., and Ph.D. candidates, and qualified MTS and M.Div. students with permission of the instructor. Required for Th.M. candidates in the field and for Th.D. and Ph.D. candidates until the term following successful completion of general exams. Offered jointly with the Divinity School as 1980A.

Recommended Prep:

Some knowledge of Greek required. Consult instructor if you have questions.

2018 Spring (4 Credits)

Schedule: MTWR 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap: n/a

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening

students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish Aa and Ab, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.

This course is taught by members of the Department.

Class Notes: Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Section on-line on the Spanish Ab website. Students who have studied Spanish for two years or more in secondary school must begin at Spanish Ab or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.

Recommended Prep: A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

Spanish 11 Section: 008

Beginning Spanish II (125058)

Maria Celeste Moreno Palmero

2017 Fall (4 Credits)

Schedule:

MTWR 1100 AM - 1159 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish Aa and Ab, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes:

Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.

This course is taught by members of the Department.

Recommended Prep:

A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

2017 Fall (4 Credits)

Schedule:

MW 0830 AM - 0959 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

An advanced language class that reinforces the practice of oral and written communication in Spanish through topics in contemporary cultural materials from Spain and Latin America. Students will focus on improving proficiency, refining pronunciation and acquiring vocabulary. In addition to in-class discussions, course work involves grammar review and practice in writing. Consult course website for current semester topics.

Course Notes:

Conducted in Spanish. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.

This course is taught by members of the Department.

Recommended Prep: A score between 601-680 on the SAT II test or on the Harvard Placement Test, Spanish C, or permission of course head.

Additional Course Attributes:

Spanish 49H

Spanish for Latino Students I (109820)

Maria Parra-Velasco

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Designed for Latino students, this course builds on students' previous knowledge of Spanish to expand and strengthen their oral and written interpersonal, interpretive and presentational communicative skills. Spanish grammar is reviewed using a functional approach to highlight differences found in informal and academic contexts. Students explore the topics of language, cultures and identity in the U.S and in the Spanish-speaking world , using a variety of texts and genres, music, videos, films and visual arts.

Course Notes: Spanish 49h was formerly Spanish 35; therefore, students cannot take 49h if they've already taken 35. Spanish 49h should be a prerequisite for 59h (or permission of the instructor).

Additional Course Attributes:

Attribute	Value(s)
FAS: Meets Foreign Lang Req	Spanish
FAS Divisional Distribution	Arts and Humanities

Spanish 50

Advanced Spanish II: Creative Writing and Performance (115920)

Adriana Gutierrez

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An advanced language course designed to strengthen and develop competence in written expression. Close reading of texts in literary and non-literary genres will help students refine personal style. The performance of short excerpts of plays, combined with advanced work on oral expression and phonetics,

will help students increase their fluency and ease of expression.

Course Notes: Conducted in Spanish. Recommended for concentrators. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep: A score between 721-750 on the SAT II test or on the Harvard Placement Test, Spanish 40, or permission of course head.

Adriana Gutierrez

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An advanced language course designed to strengthen and develop competence in written expression. Close reading of texts in literary and non-literary genres will help students refine personal style. The performance of short excerpts of plays, combined with advanced work on oral expression and phonetics, will help students increase their fluency and ease of expression.

Course Notes: Conducted in Spanish. Recommended for concentrators. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep: A score between 721-750 on the SAT II test or on the Harvard Placement Test, Spanish 40, or permission of course head.

Additional Course Attributes:

The Ethics of Business in Latin America (127573)

Adriana Gutierrez

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An advanced language and culture class that examines literature and films portraying the political, sociological, financial and environmental impact of multinational companies doing business in Latin America. Students' linguistic competency is developed through discussion of the ethics of business, grammar reviews, and weekly writing assignments. Students will also choose a specific project for a business in Latin America and research its possible outcome and social, political, and environmental consequences.

Course Notes: Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Class Notes: Interested students must apply in writing to Dr. Gutiérrez no later than August 21, 2016 (Fall Term) or January 15, 2017 (Spring Term).

Recommended Prep: A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

Introduction to Modern Latin American Literature (126853)

Sergio Delgado Moya

2018 Spring (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a survey of Latin American Literature from the last decades of the 19th century to the present. It offers an overview of the most salient moments in modern Latin American cultural history, placing emphasis on the ways in which specific literary works relate to the social and political developments that have shaped the region since the late 19th century. Readings by Machado de Assis, Rulfo, Borges, Gioconda Belli, Bellatin, Pizarnik, and others.

Course Notes: Conducted in Spanish.

Recommended Prep: A score above 780 on the SAT II or on the Harvard Placement test; a

50-, or 60-level course in Spanish; or permission of course head.

Introduction to Latino/a Literature in the United States (205417)

Lorgia Garcia Pena

2017 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will provide an introduction to Latinx literatures and cultures in the United States from 1960 to the present, paying close attention to the historical and social events that have influenced the construction of U.S. Latinx identities as a field within American Studies. Through the examination of canonical texts produced in English, Spanish and Spanglish we will analyze questions of racial, ethnic, sexual, and cultural identities in conversation with current theoretical concepts such as Diaspora, border identities, code-switching, triple-consciousness, intersectionality. While our focus is on Latinidad as a U.S. concept, we will also explore its expansion as a political and cultural term in Latinx diasporas in Madrid, Milan, and Amsterdam.

Course Notes: Course is in English, with optional section in Spanish.

Table Talk and Food Writing (205164)

Johanna Damgaard Liander

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

From classroom to kitchen, picnic or café, this advanced language and food culture course will examine the Spanish table, its history and origins, expansions and innovations, from medieval times to present-day molecular gastronomy. Frequent reading, viewing and writing assignments and classroom discussion are all designed to reinforce language skills and academic literacy in the target language. The course, along with all materials and assignments, is entirely in Spanish, primarily focusing on literary, historical, linguistic and sociological texts and topics from Spain –selections ranging from Harvard's vast culinary collection to the most current media- with reference to Latin America and the Latino community in the United States, as well.

Course Notes:

6 hands-on cooking –and tasting- sessions are included each semester. Enrollment is limited to 16. Interested students must contact and interview with Dr. Liander before January 20, 2018.

Recommended Prep:

Pre-requisites: A score of 750 or beyond on SAT II or Harvard Placement; previous enrollment in Spanish 50 or higher; or permission of the instructor.

Colonial and Post-Colonial: Literary Liberties in Latin America (205421)

Doris Sommer

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Hierarchies established by the Conquest continue to color Latin American culture, often along racial lines. Independence often meant replacing Iberian bureaucrats with rich white Creoles. And abolition never managed to abolish the habits of racism practiced so long they can seem normal, unremarkable. But literary liberties unsettle norms; they trouble complacent readers and authorize minority subjects. Art disrupts structures and wields agency.

Authors include: El Inca Garcilaso de la Vega, Guamán Poma de Ayala, Álgvar Nuñez Cabeza de Vaca, Rigoberta Menchú, Fray Bartolomé de las Casas, José María Arguedas, Aníbal Quijano, Catalina de Erauso, Manuel Ramos Otero, Teresa de la Parra, Juan Francisco Manzano, Gertrudis Gómez de Avellaneda, W.E.B. Dubois (selections), José Rizal, José Julián Acosta, Oswaldo de Andrade, Fernando Ortiz, Antonio Luna, José Martí, Junot Díaz, Gloria Anzaldúa, Mario Vargas Llosa, Emmanuel Levinas, J. Lyotard, R. Barthes

Cultural and Political Myth-Making: Eva Peron, Che Guevara, Simon Bolivar and La Malinche (205168)

Diana Sorensen

2017 Fall (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

Political power rests on concrete factors involved in the administration of public resources and the implementation of governmental policies. But it cannot be fully understood without examining cultural strategies of self presentation and the ways in which social groups respond to them. Myth-making is intrinsic to politics, and we will trace its workings in a few Latin American cases.

Introduction to Spanish Art: A History of Its Masterpieces (206815)

Raquel Vega-Duran

2018 Spring (4 Credits)

Schedule: M 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course explores significant works of Spanish art, with a particular emphasis on painting, photography, and sculpture in their historical, political, and cultural context, as well as interactions between painting, photography, and film. Through masterpieces such as Goya's black paintings, Velazquez's Las Meninas, Picasso's Guernica, Frank Capa's photographs of the Spanish Civil War, Gaudi's Parc Güell, and Dali's contribution to the surrealist films of Buñuel and Hitchcock, among others, we will analyze interplays between art, history, and society. In this course we will develop a vocabulary for appreciating and discussing visual art, as well as learning what works of art can tell us about history and culture.

Course Notes: Conducted in Spanish.

Encounters in the Atlantic: Transnational Relations Between Spain and Hispanic America (134723)

Raquel Vega-Duran

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will explore the evolution of cultural, historical, and political relations between Spain and Latin America, starting with Christopher Columbus's diary of his first trip to the "New World" and finishing with stories about Latin American immigrants in Spain today. We'll study literary and political texts, chronicles, maps, paintings, photographs, personal letters, manuscripts, and films in order to understand the Atlantic as a space of both connection and separation from 1492 to the present. We will study works from Bolivia, Chile, Cuba, Guatemala, Mexico, Paraguay, Peru, Puerto Rico, Spain, and others.

Course Notes: Course will be conducted in Spanish.

Spanish 142

Immigration and the Globalization of Borders (206816)

Raquel Vega-Duran

2018 Spring (4 Credits)

Schedule:

W 1000 AM - 1159 AM

This course explores how film, painting, photography, literature, and multimedia projects relate to and narrate contemporary borders such as those between Mexico and the USA; Spain and Morocco; Haiti and Dominican Republic; and other "border spaces" such as the enclosed migrant detention centers in Ceuta (Spain), Lampedusa (Italy), and California; and the patrolled waters that separate Cuba from the US, West Africa from the Canary Islands, and North Africa from Southern Europe; among others. We will pay particular attention to the history of these walls, fences, and controlled spaces, and the stories they tell us, and consider border-crossing experiences of migrants from a variety of perspectives. We will look in depth at the role of art in relation to these walls, both on the actual walls (artists who use the fences as canvases, such as the project "Borrando la frontera" in the San Diego/Tijuana border, and *Ulises*, a graphic novel written on the wall of the North African city of Melilla), as well as the ways in which these walls are chronicled in literature, film, photography, and painting (including Danticat's novel *The Farming of Bones*; Spottorno's graphic novel on refugees *La grieta*; the online project *Poets on Borders*; Sebastiao Salgado's photographic cycle *Migrations*; and movies such as *Sin nombre* and *Balseros*; among other works).

Course Notes: Conducted in Spanish.

The course offers an interdisciplinary approach to Barcelona, a multilayered space furnished by Roman, French, Muslim, and Spanish legacies that shaped a singular culture and language. Developing from periods of egalitarian social and political institutions in the Middle Ages to strong socioeconomic industrial development in the 19th century and later tourism, Spain's most European city is inscribed by a deep sense of civic and industrious society permanently seeking innovation and modernity, yet facing the consequences of its complex past. Through readings of historians, art critics, urban designers, and writers, and supported by visual materials, the course offers an integrated perspective which opens questions in every field of the Humanities and the Social Sciences on Catalan and Hispanic Cultures.

Course Notes: The course will be conducted in Spanish. The readings will be in English & Spanish.

Subject: French

French 10

Beginning French I: French Identity through Visual Media (126933)

Nicole Mills

2018 Spring (4 Credits)

Schedule:

MTWR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This elementary French course provides an introduction to French with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. Students engage in interactive communicative activities, both online and in the classroom, that provide rich exposure to the French and francophone language and culture. The course addresses the theme of identity through engagement in the discussion and interpretation of various French visual media including video, images, and film.

Course Notes:

French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students at GSAS may take the course Sat/Unsat with permission of course head. French 10 is taught by members of the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS: Meets Foreign Lang Req	French
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	None

French 11

Beginning French II: Exploring Parisian Life and Identity (126935)

Nicole Mills

2018 Spring (4 Credits)

Schedule: MTWR 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap: n/a

In the second course in the Elementary French sequence, students will engage in an online simulation of life in Paris while exploring diverse facets of Parisian identity. Through the exploration of various forms of media, you will gain a more developed understanding of the diversity of Parisian life. Students will actively engage in oral and written communication in the past, present, and future and will learn to make suggestions, narrate in the past, express emotions and opinions, extend invitations, and convey hypothetical situations. Topics explored in the class include art, music, and graffiti in Paris, the various quarters of Paris, the role of media in the 2015 Paris attacks, and the 2017 elections. The course will immerse you in Parisian culture and language through virtual reality experiences, social networking, and archive exploration.

Course Notes: French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students at the GSAS may take the course Sat/Unsat with the permission of course head. This course is taught by members of the Department.

Recommended Prep: Completion of French Aa/10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.

Additional Course Attributes:

Attribute	Value(s)
FAS: Meets Foreign Lang Req	French

Students will actively engage in oral and written communication in the past, present, and future and will learn to make suggestions, narrate in the past, express emotions and opinions, extend invitations, and convey hypothetical situations. Topics explored in the class include art, music, and graffiti in Paris, the various quarters of Paris, the role of media in the 2015 Paris attacks, and the 2017 elections. The course will immerse you in Parisian culture and language through virtual reality experiences, social networking, and archive exploration.

Course Notes:

French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students at the GSAS may take the course Sat/Unsat with the permission of course head. This course is taught by members of the Department.

Recommended Prep:

Completion of French Aa/10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Intensive Beginning French: Parisian Identity through Visual Media (124332)

Nicole Mills

2018 Spring (8 Credits)

Schedule:

TR 0300 PM - 0459 PM

MWF 0400 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This intensive Beginning French course provides an accelerated introduction to Beginning French with intensive work on interpersonal communication and interpreting and producing language in written and oral forms. Students explore diverse facets of Parisian identity through the interpretation of various forms of visual media. Students learn to speak and write in the past, present, and future, make descriptions, ask questions, make comparisons, accept and refuse invitations, give advice, and express hypothetical situations, emotions, and opinions.

Course Notes:

May not be used to fulfill the language requirement and may not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the French 15 course head and receive permission to enroll in the course.

This course is taught by members of the Department.

Class Notes:

The on-line request form is available on the French 15 canvas site and must be submitted by August 26, 2016 (Fall Term) and January 16, 2017 (Spring Term).

Recommended Prep:

An advanced knowledge of at least one foreign language, preferably a modern Romance language, but no previous study of French.

Additional Course Attributes:

Attribute	Value(s)
FAS: Meets Foreign Lang Req	French
All: Cross Reg Availability	Available for Harvard Cross Registration

Modern Stories about Paris (116673)

Ericka Knudson

2017 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course examines contemporary narratives set in Paris. Students explore writers' and filmmakers' perceptions of Paris and analyze the different ways in which the Parisian experience is presented. By reading and viewing stories about Paris, students gain insights into methods of narration and integrate various techniques into their own writing and speaking. They also develop a sophisticated understanding of how the French language is evolving, especially in its spoken form.

Course Notes: Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than two courses at the 60 level.

This course focuses on the cultural knowledge, vocabulary, and linguistic skills and tools that are needed to work and succeed in an international French-speaking setting. It provides an overview of the organization and culture of French companies, highlighting important aspects of conducting business in France, such as attitudes, customs, written and unwritten laws, as well as economic and geographical factors. Moreover, students learn specialized French business terminology and acquire the language skills needed to understand and discuss, in speaking and writing, topics within a professional environment.

Course Notes: Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details and section on-line on the French 61N website.

Class Notes: Students who have taken French 55 should not take this course.

Recommended Prep: A score of 721-750 on the SAT II test or the Harvard Placement test; French 40 or 50; or permission of course head.

Introduction to French Literature II: 19th and 20th Centuries: Tales of Identity (119121)

Janet Beizer

2017 Fall (4 Credits)

Schedule:

TR 1030 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How do we know ourselves? Traditional definitions of the self have been founded on family, gender, race, religion, nationality. We'll read a number of texts from the 19th-21st centuries that pose questions and complicate answers to questions of identity. Readings include works by Claire de Duras, Balzac, George Sand, Merimee, Colette, Nothomb, and LeClezio.

Course Notes: Conducted in French; third hour devoted to discussion of texts studied.

Recommended Prep: A 50- or 60-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.

French Theater across Time: An Introduction to Performance (109826)

Sylvaine Guyot

2017 Fall (4 Credits)

Schedule:

T 1130 AM - 1259 PM

R 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Aims to help students, including those who are genuine novices in acting, to understand and experience theater as a form of physical expression that evolve as aesthetic and ideological contexts change across time. Readings include the most famous French playwrights of both the early modern age (Molière, Corneille, Racine) and the later 20th / early 21st centuries. We explore how theater is used to interrogate questions such as sexual taboos, social injustices, or political engagement. Special emphasis paid to the power of performance through practical workshops and videos of recent productions. The final project consists of an excerpt to be performed in French.

Course Notes:

Conducted in French. May not be taken for credit by students who have previously taken French 71a or FRSEMR 30r.

Recommended Prep:

A 60- or 70-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.

Mother Dearest: French and Francophone Writers Confront the Maternal (205161)

Annabel Kim

2018 Spring (4 Credits)

Schedule:

MW 1100 AM - 1229 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

An examination of the centrality of maternity in twentieth- and twenty-first-century French and Francophone literature. We will discuss the representation of maternity in the works of writers such as Albert Cohen, Maryse Condé, Marguerite Duras, Linda Lê, and Marcel Proust) to see how, through writing, they confront their complex, fraught relationships to the maternal. In grappling with these texts, we will be able to see how maternity, as a site of memory, trauma, desire, and identity, is a driving force of some of the most compelling (and canonical) works in modern French and Francophone literature.

From Rags to Riches: Money and the French Enlightenment (147699)

Natasha Lee

2017 Fall (4 Credits)

Schedule: R 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Between the first international financial crisis of 1720, and the French Revolution's overthrow of the monarchy and aristocratic privilege, economic realities and material concerns were at the heart of Enlightenment writers' understanding of contemporary social issues, as well as of their views on how to improve the human condition. This course will examine questions pertaining to money and the origin of value, luxury and consumption in a global context, the threats of despotism and acting with impunity, as well as the limits of commerce in slavery. What views of individual mobility and value did genres such as

novels, plays, essays and treatises propose? In turn, what strategies of resistance did they offer to individuals to define themselves outside of, or against, material wealth? Authors to be studied include Montesquieu, Voltaire, Rousseau, Diderot, Charrière and Raynal.

Vision and Violence in 17th Century France (127874)

Sylvaine Guyot

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Explores early modern ways of depicting and showing violence (physical, political, domestic, supernatural). The spectacle of violence represents a site of cultural conflict during the 17th century, since it implies both the pleasure taken by the viewer and the risk of imitation. Readings include plays, tragic histories, utopian and travel literature, historical and theoretical texts (Foucault, Rancière, Marin, Elias, Lyotard), and the analysis of images (paintings, frontispieces).

Course Notes:

Conducted entirely in French.

Queer Fictions (205160)

Annabel Kim

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A survey of modern and contemporary queer writing from twentieth- and twenty-first-century French literature. We will read writers such as Jean Genet, Hervé Guibert, Édouard Louis, Mireille Best, Violette Leduc, Monique Wittig, Anne Garréta. We will begin first with an introduction to some canonical texts in queer theory (e.g. Sedgwick, Butler, Bersani, Warner) and proceed to the fictions to see the ways in which literature itself theorizes, in addition to doing the work of deconstructing identity and desire.

Course Notes: This course is conducted in French.

Mediterranean Crossings: Exiles, Migrants and Refugees (156589)

Verena Conley

2018 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The Mediterranean has long been the locus of a turbulent history and of vast population movements. This course will focus specifically on the period since the middle of the twentieth century, that is, since decolonization in North Africa and the Middle East. Civil wars, political strife and economic hardship push many into voluntary, forced or even metaphoric exile, lead to massive migrations and produce refugees in record numbers. This course will study some of these movements with a triple focus on exiles, migrants and refugees, as seen through literary works and film. We will ask what artistic practices contribute and how they mediate these contexts.

Cacaphonies: Toward an Excremental Poetics (205162)

Annabel Kim

2018 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

22

French literature, from the Middle Ages to today, has been consistently and remarkably scatological. Fecal matter is omnipresent in works and authors that we consider canonical (e.g. the fabliaux, Rabelais, de Sade, Beckett, Céline) and yet its presence has been remarkably submerged or passed over in readerly and critical reception of modern and contemporary French literature. This course proposes to take this fecal presence seriously and to attend to the things it has to tell us (hence the plurality of cacaphonies) by starting with the following premise: If literature is excrement, then the canon is a chamber pot. We will focus on the twentieth and twenty-first centuries and read a diverse range of scatological texts in order to use the scatological as a means to: 1) Theorize an excremental poetics where excretion provides a model for the process of writing. The task of excretion, which translates into concrete form our experience of the world (we excrete what we take in, processing and giving it new form), is also the task of literature; 2) Allow for a new interrogation and critique of the canon and the ways in which it serves to conceal, contain, sanitize, and compel culture; 3) Provide another angle from which to approach the question of gender and writing, as gender organizes both literature (e.g. the paucity of canonical women writers) and defecation (e.g. the gendering of constipation as a feminine condition); 4) Offer an alternative theory of the significance of fecal matter to the dominant one provided by psychoanalysis (i.e. feces as gift, gold, à la Freud). The goal of the course is to begin to articulate and realize an original approach to literature that, rather than take feces as a site of disgust, takes it as a site of creation.

Course Notes: Readings in French, course conducted in English.

This course is open to undergraduates with permission of instructor.

Urban Cannibals: Les Mystères de Paris (205163)

Janet Beizer

2018 Spring (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Les Mystères de Paris, Eugène Sue's serialized novel of 1842-43, was one of the earliest French novels to focus on the working classes, and became an instant cross-cultural and international hit. It has not ceased to generate debate: around its project (simple potboiler or serious social reform?), its narrative aesthetics (crazy criss-crossed plotlines or proto-modernist collage?) and its ambiguous discursive strategies (populist and elitist, reformist and nationalist, abolitionist and racist, progressive and eugenic). We'll explore both the internal microcosm of the novel and the radiating external worlds it pulls into its pages from France in the world, circa 1840. Each student will choose a research project spinning out from the novel (prisons, markets, hunger, cannibalism, social services, journalism, poverty, criminality, crowds, slavery, reform, revolution, class conflict, imperialism, charity, urban/pastoral, etc.)

Selected readings from Saint-Simon, Fourier, Le Bon, Nordau, Charcot, Lombroso, Marx, and Sue's own maritime tales, from the nineteenth century, and the more recent work of Louis Chevalier, Dominic Kalifa, Kaja Silverman, Alex Woloch, and others.

Sophomore Tutorial: Poetics, Practice, and Politics in Romance Societies (114941)

Kathy Richman

2018 Spring (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course introduces students to a range of analytical and theoretical approaches to "reading" fiction, poetry, film, and essays. We will pair critical writings and creative texts of importance to the Romance world to help students develop their own voice and analytical stance. Prepares students for advanced work in literary and cultural studies in Romance Languages and Literatures and related fields.

Course Notes: Language of instruction to be decided upon by student in consultation with the Undergraduate Adviser in Romance Studies. Successful completion of one term of Romance Studies 97 (or equivalent) is required of all concentrators in their sophomore year.

Additional Course Attributes:

Attribute	Value(s)

Romance Studies 110

Haiti, Cuba, Martinique: Cultures of Resistance (161274)

Kathy Richman

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

What makes a novel moving, a film disturbing? How does humor work, even in the grimmest context? "Haiti, Cuba, Martinique" explores these aesthetic questions in works that engage slavery and its legacies, resistance and revolution, and paths to "development." We will consider historical context and discuss categories like "genre" fiction, didactic writing, realism, romanticism, and la littérature engagée, or "committed" literature. Includes works by Alejo Carpentier, Césaire, Chamoiseau, Condé, Cortázar, Gutiérrez Alea, and Lahens.

Course Notes: Taught in English. For concentration and secondary credit in Romance Languages and Literatures, readings and written work must be done in French or Spanish.

Romance Studies 130

Diaspora Archives: Transnational Stories of Immigration and Citizenship in Historical Perspective (205165)

Lorgia Garcia Pena

2018 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

22

This course proposes an innovative approach to archiving and researching through the engagement, analysis and recovery of oral histories and artistic productions of second-generation immigrants who identify as black and/or brown. Setting off from the analysis of twelve stories of self-identified black immigrants from Milan, Italy and Boston, Massachusetts, the students will engage in critical analysis of the historical relationship between race, diaspora, and citizenship. Building on the original stories and artistic materials, students will produce a digital archive and network that connects people, objects and events across the globe. Our goal is to make the archive a functional artistic piece for the larger Harvard University community.

Latin America in Theory (206845)

Nathaniel Wolfson

2018 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This seminar explores and critiques the place of theory in Latin American cultural studies. With reference to all of Latin America, including Brazil, our focus will be literature, intellectual debates and political movements that construct and deconstruct the notion of an original, syncretic or organic Latin American culture. These theoretical debates will include questions of representation, translation, subalternity and memory.

Course Notes: Readings and discussions in English.

Additional Course Attributes:

Futurisms (a comparative history) (205157)

Jeffrey Schnapp

2018 Spring (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

From its foundation in 1909 through WWII, futurism developed into the first international cultural-political avant-garde. Its aim was the revolutionary transformation of all spheres of life and its influence extended from Europe to the Americas to Asia. The seminar adopts a cross-disciplinary and comparative focus; and includes such topics as humans and machines; experimental poetics; futurism's ties to anarchism, bolshevism and fascism. Media surveyed include poetry, performance, music, painting, photography, radio, and film.

Questions of Theory (118221)

John T. Hamilton

Jeffrey Schnapp

2017 Fall (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The seminar is built around a sequence of fundamental questions regarding the literary disciplines, their history and epistemology. Discussions are instigated by readings in philology, stylistics, the history of ideas, semiotics, structuralism, psychoanalysis, post-structuralism, film theory, genetic criticism, literary sociology, cultural studies, and digital humanities.

Course Notes:

Conducted in English. Required of all graduate students in Romance Languages and Literatures.

Mahindra Humanities Center Workshop (207026)

Diana Sorensen

2018 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

30

A workshop style course designed to offer intellectual exchanges based on the different activities and conversations convened by the Mahindra Humanities Center. Some of the highlights include the Norton Lectures, the Mellon Seminar on Migration, and the Hauser Forum. Each student will choose three or four events a month, and we will discuss the ways in which they add depth and complexity to our thinking. Permission of the Instructor needed.

Course Notes: Permission of the Instructor needed.

Class Notes: The first class meeting will take place at 403 Boylston Hall at 5:30 on Tuesday January 23. The schedule will be determined according to the group.

Subject: Portuguese

Portuguese 10

Beginning Portuguese I: From Cambridge to Copacabana (120398)

Viviane Gontijo

2017 Fall (4 Credits)

Schedule: MTWR 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap: n/a

Intended for those with no prior experience in the target language, this course emphasizes interpersonal communication as well as the interpretation and production of written and spoken language. Students take their first steps on the journey from speaking English to carrying conversations with Portuguese speakers over the course of one semester, thanks to immersion activities and dynamic, interactive learning. Students will be exposed to contextualized Luso-Afro-Brazilian culture through music, film, social media, as well as via Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have previously studied Portuguese must take a placement exam. Students with a solid knowledge of Spanish should enroll in PORTUG 10s instead of PORTUG 10. This course is taught by members of the Department.

Schedule:

MTWR 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Designed specifically for students with a sound knowledge of Spanish. This course presents linguistic and cultural structures necessary for basic communication, emphasizing the features of Portuguese most challenging for Spanish Speakers: pronunciation, idioms, and grammatical structures peculiar to Brazilian Portuguese. Over the course of the semester, students learn to express themselves effectively using their Brazilian voice, distinct from their Spanish voice. Students experience contextualized Lusophone culture through music, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes: Conducted entirely in Portuguese. Requires a solid knowledge of but not necessarily native proficiency in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep: Prerequisite: 720 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; a 30s level Spanish course; or permission of Course Head.

This intensive Beginning Portuguese course provides an accelerated introduction to Portuguese with emphasis on interpersonal communication and interpreting and producing language in written and oral forms. Goals include building students' vocabulary, fluency, proficiency, and confidence. Students are exposed to Brazilian Portuguese and culture through music, cinema, and various media sources. The course covers the equivalent of a full first-year of Portuguese language study.

Course Notes: May not be used to fulfill the language requirement and may not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the Portuguese 15 course head and receive permission to enroll in the course.

Recommended Prep: An advanced knowledge of at least one other foreign language but no knowledge of Portuguese.

Portuguese 20

Intermediate Portuguese: Palcos e Palavras (121934)

2018 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap: n/a

An intermediate course for students interested in expanding and strengthening their Portuguese language skills. Reading, writing, and conversational competencies are emphasized through a panoramic study of Luso-Afro-Brazilian Theater. The course will continue to promote cross-cultural understanding by introducing learners to different textual genres such as screenplays, critical review as well as a selection of literary work that represents the Lusophone arts. The weekly online Teletandem interaction with college students in Brazil, unique to the Portuguese Program, allows learners to discuss readings, and engage in peer-review of writing completed for this course.

Course Notes: Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.

Nathaniel Wolfson

2018 Spring (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: Instructor**Enrollment Cap:**

20

This course examines culture in Brazil in the "long" decade of the 1960s, featuring the lead-up to the 1964 Military Dictatorship and its aftermath. With special attention to the subversive transformations in practices and discourses (literature, art, popular culture, cultural criticism, sexual identity, psychoanalysis), the course explores diverse material forms and genres, including music, concrete poetry, experimental fiction, tropicália, graphic and industrial design. Students will discuss how Brazilian writers and artists conceived of new and radical modes of expression in the context of sweeping political, social, and cultural transformations.**Course Notes:** Readings and discussions in Portuguese.**Additional Course Attributes:**

Subject: Italian

Italian 10

Beginning Italian I: Pathways to Italy (113814)

Elvira G. DiFabio

2018 Spring (4 Credits)

Schedule: MTWR 1200 PM - 1259 PM**Instructor Permissions:** None**Enrollment Cap:** n/a

For students with little or no knowledge of Italian. Aims at achieving basic communication skills and vocabulary. Emphasis on oral expression and listening comprehension. The cultural component examines everyday life through a comparative perspective: families, shopping, food culture. This course will give you the language you need to communicate effectively in Italy, and is the best way to prepare for a summer study in Italy. Course materials include workbook, audio-lab, and video.

Course Notes:

Conducted in Italian. Students whose placement score does not entitle them to enter a more advanced course are assigned to Italian 10. Students who have studied Italian for two years or more in secondary school must begin at Italian 11 or higher. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Additional Course Attributes:

A complete first-year course in one term for students with no knowledge of Italian, focused on developing all four communicative skills. Students are introduced to contemporary Italian culture through a variety of topics from everyday life (family, shopping, food, fashion) to the arts (music, literature, cinema). Materials include films and cultural readings that present capsules on the history of modern Italy. Excellent choice for students planning to study in Italy.

Course Notes:

Not open to auditors. May not be used to fulfill the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Recommended Prep:

An advanced knowledge of at least one foreign language, preferably a modern Romance language, but no previous study of Italian.

The Italian Joke: Taking Humor Seriously (205155)

Sarah Axelrod

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores humor as an invitation to critical reading and critical reading as a way of better appreciating humor. We will read a number of books that are hard to classify within a unique genre: this is part of where their humor comes from. We assume that a book is funny because of its underlying complexity, something created with intention and talent and attention to detail. Primary authors include Luigi Pirandello, Niccolò Machiavelli, Natalia Ginzburg, Giovanni Boccaccio and Italo Calvino.

Course Notes: Course will be conducted in Italian.

Recommended Prep: Advanced Italian (2 years or equivalent) is required.

Additional Course Attributes:

Attribute	Value(s)

Italian and the Community: Italy. Academic Internships in Italian Language and Culture: Special Crse (124993)

Elvira G. DiFabio

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

An opportunity to engage in the practical applications of Italian language and culture in an immersion environment. Internships may include placement in a variety of sectors, including public education, the media and the arts.

Course Notes: Though academic internships may be arranged in the Greater Boston area, this course can be proposed as integral to a study abroad program in Italy, the details of which are to be coordinated in consultation with the course head and the Office of International Education. Students are expected to produce substantial research papers based on relevant class work and field placements. The student, under the guidance of faculty and study abroad advisers, is responsible for arranging the terms of the internship.

This course is taught by members of the Department.

Class Notes: Students must submit a written proposal to Dr. DiFabio by August 31, 2017 for Fall term enrollment and by January 23, 2018 for Spring term enrollment.

Requirements: Prerequisite: Italian 50

Finding Home: Centuries of Migration in Italian Literature (205153)

Sarah Axelrod

2017 Fall (4 Credits)

Schedule: T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Italy hosts more than 5 million foreign residents who are now a part of the Italian cultural landscape, at times welcoming and at other times reluctant, even hostile. Through the works of Italians abroad and newcomers to the Italian peninsula, this course offers a multimedia exploration of how longstanding literary tradition both invites and rejects change and newness. Novels, films and cultural artifacts in the form of magazine publications and photographs will provide the context for a discussion about what the future holds for Italy and Italian-ness. Authors will include Ennio Flaiano, Amara Lakhous, and others. All texts will be provided in Italian and English, and the course will be conducted in English with weekly discussions in Italian for those interested.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities

Modernizing Spectatorship in Italian Culture (1850-1930) (205398)

Lisa Sarti

2017 Fall (4 Credits)

Schedule: T 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap: n/a

How did visual culture shape the identity and tastes of the modern Italian spectator? This course will seek an answer by addressing the question of spectatorship at the crossroad of literary texts, visual documents, and optical trickery with pictoriality, theater, and early cinematography.

Course Notes: Offered in Italian.

Class Notes: This course will be taught by Dr. Lisa Sarti.

Subject: Romance Languages

Romance Languages 210

Language Pedagogy: Theories, Approaches, and Practices (136717)

*Nicole Mills**Elvira G. DiFabio*

2017 Fall (4 Credits)

Schedule: W 0215 PM - 0414 PM**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

This course is designed for TFs and TAs in the department of Romance Languages and Literatures who are teaching a Romance language at Harvard for the first time, or those who are interested in foreign language learning and teaching. It introduces TAs and TFs to theories of second language acquisition (SLA) and explores their implications for the teaching of foreign language, culture, and literature. The course provides opportunities for students to learn to enact the specific pedagogical practices deemed essential to foreign language teaching. The intensive week before the start of classes includes reports on and discussion of general SLA theories and demonstrations and analysis of varied instructional approaches.

Course Notes: Students are required to attend the pre-service seminar that will take place the week before classes begin. Students who do not attend the pre-service seminar will not be permitted to enroll in the course. For details and further information, please contact the Course Heads. May be taken SAT/UNS. Permission of Course Head required.

Class Notes: Pre-service seminar will take place August 21-25, 2017.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Romance Languages 300

Graduate Seminar: Writing in the Romance Literatures (117638)

Josiah Blackmore

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

This year-long course will be offered as follows:

Fall semester, Article Publication Workshop - A writing-intensive workshop designed for advanced graduate students to produce an article ready for submission by the end of the semester. Students will learn what the life cycle of an article entails (the trajectory from submission to publication), how to choose a journal that fits, and most importantly, they will act as each other's peer reviewers to provide feedback for the multiple revisions each student will be expected to make. In the process of reading and writing with each other, we will discuss what entails good writing, addressing such questions as audience, voice, ethics, and style.

Spring Semester, Dissertation Writing - Addresses audience, voice, and ethics of critical writing (quotation, acknowledgement, controversy); and practical strategies for prospectus preparation, chapter organization, conference and job talks, publication. Meetings use manuscript work-shopping, reading, oral presentations, and guest lectures.

Course Notes: This course meets Bi-Weekly through the year. Please contact semester Course Head for seminar meeting schedule.

Recommended Prep: Completion or imminent completion of PhD general examinations.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Subject: Catalan

Catalan 10

Introduction to Catalan (114279)

Daniel Aguirre-Oteiza

2017 Fall (4 Credits)

Schedule: TR 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course offers a set of units that, while introducing critical topics of contemporary social, political, territorial, and artistic debates, teach the basics of Catalan language. By the end of the course students will be able to interact in daily situations with native speakers, read and write simple messages about themselves and others, and interpret cultural expressions and products.

Course Notes: Conducted in Catalan. Knowledge of another Romance language is useful but not essential. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

This course is taught by members of the Department.

Additional Course Attributes:

Slavic Languages and Literatures

Subject: Russian

Russian AA

Elementary Russian I (122907)

Steven Clancy

2017 Fall (4 Credits)

Schedule:

MWF 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Part one of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Course Notes:

Part one of a two-part series. Students are strongly encouraged to enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Russian AA together with Russian AB or Russian ATB (Elementary Russian through Authentic Texts II) satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A, AAB, and AT) prepare students for continued study of Russian in intermediate (B-level) courses (B, BAB, or BTA) and for study or travel abroad in Russian-speaking countries.

Recommended Prep:

No prior knowledge of Russian is required.

Additional Course Attributes:

Attribute	Value(s)

Course Notes:

Part two of a two-part series. Students are strongly encouraged to enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Russian AA together with Russian AB or Russian ATB (Elementary Russian through Authentic Texts II) satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A, AAB, and AT) prepare students for continued study of Russian in intermediate (B-level) courses (B, BAB, or BTA) and for study or travel abroad in Russian-speaking countries.

Requirements: Prerequisite: Elementary Russian I

Steven Clancy

2018 Spring (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Part two of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Course Notes:

2017 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family, education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social situations (sociolinguistic competence). Computer exercises on selected topics.

Course Notes:

Part one of a two-part series. Students are strongly encouraged to enroll in Russian BA in the fall and Russian BB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Any full course in Russian at the B-level (Russian Ba-Bb, Russian BTA-BTB, or Intensive Russian BAB) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Recommended Prep:

Russian AA-AB, AAB, ATA-ATB, AH, or placement at the B-level. Familiarity with fundamentals of Russian grammar, particularly case endings, verb conjugation, and elementary competence in spoken Russian.

Subject: Polish

Polish AA

Elementary Polish I (123076)

Anna Baranczak

2017 Fall (4 Credits)

Schedule: MWF 1200 PM - 1259 PM**Instructor Permissions:** None**Enrollment Cap:** n/a

Part one of a two part introductory course in modern Polish language and culture, designed for students without previous knowledge who would like to speak Polish or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Polish culture through reading of prose and poetry as they learn to use the language both as a means of communication and as a tool for reading and research.

Polish AA: Elementary Polish I together with Polish AB: Elementary Polish II satisfy the foreign language requirement and prepare students for continued study of Polish in intermediate-level courses and for study

or travel abroad in Poland.

Course Notes: Part two of a two-part series. Students are strongly encouraged to enroll in Polish AA in the fall and Polish AB in the spring within the same academic year.

This course will also meet for an additional hour of speaking practice to be arranged the first week of classes.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Part one of a two part intermediate course in modern Polish language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Polish grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Introduction to Polish literature through fiction and poetry, history and contemporary events, including readings from literary masterpieces from Polish literature from the era of the Renaissance to contemporary times including Jan Kochanowski, Wisława Szymborska, Zbigniew Herbert, Czesław Miłosz and others. Film clips and newspaper articles will introduce students to a variety of styles of contemporary Polish. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.

Intermediate Polish I and Intermediate Polish II together prepare students for continued study of Polish in advanced-level courses and for study or travel abroad in Poland.

Course Notes: Part one of a two-part series. Students are strongly encouraged to enroll in Polish BA in the fall and Polish BB in the spring within the same academic year.

This course will also meet for an additional hour of speaking practice to be arranged the first week of classes.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Recommended Prep: Polish AB or placement at the B-level. Familiarity with fundamentals of Polish grammar, particularly case endings and elementary competence in spoken Polish.

Polish BB

Intermediate Polish II (160408)

Anna Baranczak

2018 Spring (4 Credits)

Schedule:

R 0900 AM - 0959 AM

MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Part two of a two part intermediate course in modern Polish language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Polish grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Introduction to Polish literature through fiction and poetry, history and contemporary events, including readings from literary masterpieces from Polish literature from the era of the Renaissance to contemporary times including Jan Kochanowski, Wisława Szymborska, Zbigniew Herbert, Czesław Miłosz and others. Film clips and newspaper articles will introduce students to a variety of styles of contemporary Polish. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.

Intermediate Polish I and Intermediate Polish II together prepare students for continued study of Polish in advanced-level courses and for study or travel abroad in Poland.

Course Notes:

Junior Tutorial: Svetlana Alexievich: Fact and Fiction (159853)

Vera Koshkina

2018 Spring (4 Credits)

Schedule: M 0900 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

The tutorial will focus on reading selections from the works of Svetlana Alexievich, the 2015 recipient of the Nobel Prize in literature. A writer who has explored some of the darkest periods of Soviet history, Alexievich asks us in her work to think about how we tell stories -- and how we tell the truth -- amidst disaster, war, and public as well as private suffering. As we read her work, we will ask, with Alexievich, the ethical and philosophical questions posed by war, disaster and explore storytelling as a form of mourning. We will consider how Alexievich delves into these questions through quintessentially Russian stylistic devices such as skaz, and by interweaving a range of genres, including: literary fiction, documentary fiction, and oral history, as well as journalism and historical writing. Alexievich is known for re-crafting her stories through the years as she returns to re-interview her subjects: what do these revisions tell us about the nature of history, literature, and meaning?

Course Notes: Required of junior concentrators in Slavic Literatures and Cultures. Course open to non-concentrators by permission of the instructor.

Russian Poetry and Its Borders: Conference Course (205636)

Stephanie Sandler

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Without borders, can there be poetry? A white paper border surrounds printed poems; digital poems are bounded by the screen on which they are read; national boundaries keep cultural and linguistic traditions distinct; and aesthetic conventions create genres and demarcate poetry from music or dance or film. How Russian poetry perversely challenges such limits, and how it thrives at the edges of the permissible, will be the subject of this course.

We will study the cultural practice of poetry as it crosses four kinds of borders – performative, linguistic, geographic, and aesthetic. That yields four large topics: poetry in public places (how does poetry speak of politics, and how does it write collective trauma?); poetry and translation (how does translation change poetic practice? how to read mixed-language poems?); poetry and emigration/ exile (what happens to identities and allegiances when poets cross geographical borders? What happens to the poet's language?); and poetry and the other arts (how have music, film, drama, paintings, photography, and the philosophical essay been felt in poetry? can poems become visual artifacts, or scripts for performance?).

Examples from the work of Aygi, Brodsky, Dragomoshchenko, Goralik, Glazova, Kaminsky, Khlebnikov, Mandelstam, Mnatsakanova, Nabokov, Pushkin, Sedakova, Slutsky, Vvedensky. Comparisons to American poets, including Susan Howe and Anne Carson, and to films by Tarkovsky and others.

Recommended Prep: Reading knowledge of Russian

Cultures of Russian Revolution (205014)

Kevin Platt

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A century ago this fall, Russia was transformed by the allied, twin forces of the October Revolution and modernist art and literature. In 1991, the Soviet Union collapsed amid nearly universal consensus that the communist project had failed, at a moment when artists and philosophers were declaring the death of modernism in the new age of the postmodern.

This interdisciplinary course will study the intertwined history and continuing legacy of the Russian artistic and political revolutions of 1917. Readings will include theoretical studies and classical texts of revolution and modernism (K. Marx, V. Lenin, L. Trotsky, H. Arendt, P. Bürger), documentary and historical accounts of the Russian revolution (V. Shklovsky, R. Stites), representations and responses to the October Revolution in art, literature and film from around the globe (S. Eisenstein, D. Rivera, I. Babel, E. Zamyatin), examination of revolutionary memory and commemoration in later years (G. Orwell, A.

Sinyavsky, B. Pasternak, H. Frank), and consideration of the meaning of revolutionary history and practice in the present day (N. Tolokonnikova, N. Mikhalkov, V. Putin).

Slavic 149

Soviet Film Realisms (205019)

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

From its inception in 1934, Socialist Realism was the dominant aesthetic of the Soviet cinema. Soviet film, along with other arts, aspired to the "historically concrete representation of reality in its revolutionary development." Over the course of the subsequent fifty years, interpretations of this formulation of Socialist Realism led to the development of a variety of "realisms" in Soviet cinema, all alternately representing the Soviet reality in its idealism, stark harshness or humorous absurdity.

This course surveys a broad selection of Soviet films and film realisms (Socialist Realism, Neorealism, Magical Realism, Surrealism) from the 1930s to 1980s. It combines considerations of film form and cinematic technique with the discussion of the ever-difficult concept of realism in art. Students will develop a familiarity with the history of Soviet cinema as well as "visual literacy" – critical vocabulary and analytical tools that will enable them to respond to visual material critically and creatively. The screenings for this course will include the musical comedies of Grigori Alexandrov, historical epics of Sergei Eisenstein, surrealist dreamscapes of Andrei Tarkovsky and Tengiz Abuladze as well as the absurdist collages of Soviet reality of Kira Muratova, among many others.

Course Notes:

Students who enroll in this course will be required to attend a weekly film screening on Fridays at 4pm. The film screening time is subject to change based on student availability.

Chekhov (205085)

Yuri Corrigan

2018 Spring (4 Credits)

Schedule:

F 0200 PM - 0359 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course explores how Chekhov revolutionized the short story while simultaneously laying the foundations for modern drama. Reading his four major plays and a wide selection from his prose, we trace the arc of his career, looking closely at his aesthetic innovations, moral psychology, and philosophical perspective. Finally, we probe the relationship between the prose and drama by working together to dramatize his stories. Students will write, produce, and/or act in a final collective performance, thus retracing for ourselves Chekhov's steps in moving between art forms and inventing a new kind of psychological theater. All readings are in English translation.

Course Notes: For students able to read in Russian, additional texts and discussions will be made available.

Students will be required to attend occasional one-hour discussion sections where they will work in groups.

In the sixteenth and seventeenth centuries, Poland was one of the largest countries in Europe and a multi-ethnic commonwealth; just two centuries later, it had been erased from the map, occupied by three different empires and subjected to constant struggles for independence. Today, it is a medium-size monolithic nation state in the middle of Europe, closely watched for its political developments.

Our course will survey key topics in Poland's 1000-year history by examining important works of literature, art, architecture, and film. We will consider how the past, both celebrated and contested, can shape a country's contemporary politics and cultural landscape. We'll also examine the interplay between local, national, and international geographies as we track Poland's ever-changing borders; students will create a personal travel guide and symbolic map of Polish culture, considering the contributions and histories of Poles, Jews, Lithuanians, Ukrainians, Belarussians, Germans and Russians in what was one of Europe's most multi-ethnic and multi-confessional spaces.

Course Notes: No prior knowledge of Poland required. All readings will be in English.

Postwar Polish Poetry (205084)

Aleksandra Kremer

2018 Spring (4 Credits)

Schedule:

W 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Czeslaw Milosz, Wislawa Szymborska, Zbigniew Herbert, and Adam Zagajewski have been widely read and translated by American poets and critics, who have identified a "Polish School of Poetry" oriented on witnessing history, ethics, and politics, and associated closely with the traumas of World War II and Communist rule. But how accurate is this picture, and what does Polish poetry look like "from the inside"?

In this course, we will combine these perspectives, confronting canonical authors with lesser-known, experimental and contemporary poets, and we will ask how Polish poetry has changed since the democratic transition of 1989. What shapes poetry's role in society? What makes poetry political? Are some kinds of poetry more "translatable" than others, and how does this shape the American reception of Polish poets? Our course discussions will combine close reading with consideration of social and political context (censorship and newspeak); we will also consider recordings and performances, translation and emigration, as well as larger themes of privacy, feminism, and religion.

Course Notes: Intended for all students interested in poetry. No prior knowledge of Polish language or literature is required. All readings will be in English.

The Political Novel (205018)

Jonathan Bolton

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

No novel can be reduced to a set of political beliefs, and yet we often feel that novels speak to our political theories and practices. What makes a novel "political"? How does our understanding of political power change when we imagine detailed and dramatic confrontations between individuals and the state, individuals and empire, or individuals and global ideologies? How does narrative form reinforce or undermine ideology? What archetypal dramas—protest against authority, the loss of political innocence, the battle between tolerance and conviction—have shaped the political novel in its various traditions from the nineteenth century to the present? For spring 2018, our readings will include works by Pushkin, Dostoevsky, Conrad, Olbracht, Koestler, Kundera, Gordimer, Satrapi, Bolaño, and Hamid.

Stephanie Sandler

2017 Fall (4 Credits)

Schedule:

TR 0200 PM - 0329 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Russia is in the news these days for its politics and espionage, but what about the daily lives of Russian people? Nothing gets at that reality in all its pettiness and grandeur better than Russian literature. The stories, poems, plays, movies, memoirs, and documentaries of the last twenty-five years are the subject of this course. We will trace the chaotic transitions of the 1990s, the disparities of wealth and polarized politics of the 2000s, the rise of religious thinking (Orthodox, Islam, Jewish), and the several conflicts at Russia's borders. The impact of travel, diaspora, and the internet on breaking down old walls that once isolated the USSR will be as important as changes in the legal order. The different fates of former Soviet republics will be compared, with examples from Ukraine, the Caucasus, and the far North.

Writers include Svetlana Aleksievich, Joseph Brodsky, Elena Fanailova, Linor Goralik, Alisa Ganieva, Boris Khersonsky, Viktor Pelevin, Liudmila Petrushevskaya, Vladimir Sorokin, and Serhiy Zhadan. Films to include *Leviathan*, *Four*, *Alexandra*, *My Joy*, and *Maidan*. Students will also interview and create portraits (visual, verbal, and video) of émigrés from the former Soviet Union living in the Boston area, using the interviews as a context for the cultural representations of life in and beyond Russia.

Course Notes: All readings in English, with added section for those able to read in Russian

The Power of the Powerless: Dissidents from Socrates to Václav Havel (123117)

Jonathan Bolton

2017 Fall (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 14

From Socrates and Antigone to Pussy Riot and Ai Weiwei, we are fascinated by the courage of dissidents who oppose tyrannical regimes. But who are dissidents, and where do they gain the conviction, imagination, and political skill to stand up for their beliefs? In this course, we will investigate the role of non-violent dissent in political and cultural life, looking at both historical figures and political actors in the world today. After considering some classic statements of dissent (including Socrates' *Apology*, Sophocles' *Antigone*, and Martin Luther King's "Letter from Birmingham Jail"), we will turn to recent and contemporary dissidents to think about their paths into protest, their strategies of political and cultural protest, their complicated relationship with their fellow citizens, and their portrayal in domestic and international media.

Our focus will be on individuals rather than on social movements, and on non-violent rather than violent or revolutionary protest. Drawing examples from the Soviet Union and Eastern Europe during the Cold War, contemporary Russia, China, and other countries, we will consider figures such as Václav Havel, Aleksandr Solzhenitsyn, Vladimir Bukovsky, Liu Xiaobo, Ai Weiwei, Pussy Riot, and others.

Course Notes: All readings are in English.

Subject: Czech

Czech AA

Elementary Czech I (111301)

Veronika Tuckerova

2017 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Part one of a two part introductory course in modern Czech language and culture, designed for students without previous knowledge who would like to speak Czech or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Czech culture through work with film and literature and gain some familiarity with the major differences between literary and spoken Czech as they learn to use the language both as a means of communication and as a tool for reading and research. Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

Course Notes:

Part one of a two-part series. Students are strongly encouraged to enroll in Czech AA in the fall and Czech AB in the spring within the same academic year.

This course will also meet for an additional hour of speaking practice to be arranged the first week of classes.

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Additional Course Attributes:

Attribute	Value(s)
Full Year Course	Divisible Course
FAS Divisional Distribution	None
FAS: Final Assessment Category	Three-hour Exam

Czech BA

Intermediate Czech I (121469)

Veronika Tuckerova

2017 Fall (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Part one of a two part intermediate course in modern Czech language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Czech grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms. The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Course Notes: Part one of a two-part series. Students are strongly encouraged to enroll in Czech BA in the fall and Czech BB in the spring within the same academic year.

This course will also meet for an additional hour of speaking practice to be arranged the first week of classes.

See language course notes on the Slavic Department website for

information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Recommended Prep: Completed Czech AB, or placement at the B-level. Familiarity with fundamentals of Czech grammar, particularly case endings and elementary competence in spoken Czech.

Bosnian, Croatian & Serbian BB

Intermediate Bosnian, Croatian, and Serbian II (205525)

Tatiana Kuzmic

2018 Spring (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Part two of a two-part intermediate course in modern Bosnian, Croatian, and Serbian (BCS) language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of BCS grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop

confidence in reading.

The two-part course prepares students for continued study of BCS in advanced-level courses and for study or travel abroad.

Course Notes: Part two of a two-part series. Students are strongly encouraged to enroll in BCS BA in the fall and BCS BB in the spring within the same academic year.

The Chinese Immigrant Experience in America (159824)

Nicole Newendorp

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Uses the history of Boston's Chinatown as a case study to examine the experiences of Chinese immigrants in the U.S. from the 1880s until the present. Employs historical, anthropological, and sociological perspectives to examine major themes related to the social and economic development of U.S. Chinatowns and Chinese immigrant communities throughout the 20th and 21st centuries. This course is an Engaged Scholarship course, limited to students who are concurrently participating in a Harvard-affiliated service program in or around Boston's Chinatown. Class discussions and assignments will make active links with students' service work. Open to students in all concentrations.

Course Notes:

This course will be lotteried.

Education and Community in America: Universities and Community Engagement, 1890-2017 (159823)

Ariane Mary Liazos

2017 Fall (4 Credits)

Schedule: M 1200 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

Explores efforts to realize the civic purpose of American universities, particularly in terms of attempts to engage local communities through educational outreach programs. Examines major periods of experimentation and innovation in the 20th and 21st centuries, from the settlement house movement of the early 1900s to recent efforts to revive the public mission of universities through service-learning and other forms of civic education. This course is an Engaged Scholarship course, limited to students who are concurrently participating in education-related service programs affiliated with Harvard. Class discussions and assignments will make active links with students' service work. Enrollment capped at 10. Open to students in all concentrations.

Course Notes: This course will be lotteried

Justice in Housing (205517)

P. MacKenzie Bok

2018 Spring (4 Credits)

Schedule: W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

How do theories of justice deal with the problem of housing? What use does American housing policy and politics make of ideas about "fairness" and "justice"? This course will juxtapose contemporary philosophical debates about distributive justice with current concrete problems in housing policy, using the Boston/Cambridge area as a case study. Seminars will feature guests from a number of local housing-focused organizations, and students' final papers will assess real housing policy examples in light of a chosen framework of justice. As this is an Engaged Scholarship course, preference will be given to students involved in direct service to housing-insecure populations (whether in shelters, the public schools, urban summer camps, etc.).

Course Notes: This course will be lotteried.

Urban Health and Community Change: Action Planning With Local Stakeholders (205545)

Flavia Perea

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This is a project-based course on urban community health. We will examine urban health topics from a macro level in the classroom, while exploring community health issues at the local level by engaging with community stakeholders on a health promotion project. We will explore the social conditions people need to be healthy, and strategies to advance health equity that put people in diverse communities on pathways to health as opposed to disparities. To understand how health promoting environments can be created and sustained, we will discuss how community engagement, participatory planning, and cross-sector collaboration can advance health improvement efforts at the local level. There are great possibilities as well as challenges to creating and sustaining healthy communities, particularly in rapidly evolving cities in major metropolitan areas. This course will provide a window into how pressing, highly visible and complex national issues are experienced and addressed in real time, and the real-world complexities involved in advancing meaningful community change.

Open to students in all concentrations. Enrollment capped at 10.

Donald Trump and the Challenge to Liberal Democracy (205543)

E. J. Dionne

2017 Fall (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Is liberal democracy in crisis? Has it always been in crisis?

Until recently, liberal democracy was largely taken for granted in the West, and many saw it as the wave of the future around the globe. But over the last decade, it has come under challenge in unanticipated ways. Far-right parties gained ground in many countries, although recent elections in Europe suggest that they have plateaued and might even be in retreat. Donald Trump's election brought this conversation directly to American shores. This class will discuss the challenge to liberal democracy, with special reference to the United States, but also in comparative perspective. There will be particular attention to France, Britain, the Netherlands and Germany and also discussion of the similarities and differences between our time and the 1930s. We will discuss the economic, sociological, and cultural challenges to liberal democracy, and the obligations that fall upon those who would defend it.

Course Notes: This course will be lotteried.

Development and Modernization: A Critical Perspective (116329)

Stephen Marglin

2017 Fall (4 Credits)

Schedule:

T 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

What assumptions about human beings underlie the conviction that development and modernization constitute progress, that the developed West points the way for the rest of the world? Does economic growth involve a package that necessarily changes the society, the polity, and the culture along with the economy? This tutorial provides a framework for thinking about these questions, both in the context of the West, and in the context of the Third World. This is a junior tutorial.

Course Notes: This course will be lotteried.

Law and American Society (121345)

Terry Aladjem

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

The course examines law as a defining force in American culture and society in four dimensions: as it establishes individual rights, liberties, and limits of toleration; as it attempts to resolve differences among competing constituencies; as it sets out terms of punishment and social control, and as a source of informing images and ideological consistency. We will take up issues at the level of jurisprudence or political theory, but also at the level of legal cases and public controversy in which these questions arise—cases in which racial or gender equality are at stake, religious or sexual freedom, cases in which the claims of religious communities seem irreconcilable, cases in which the nature and extent of punishment have been debated and the question of who deserves to be punished decided, and notorious public trials in which the national self-understanding has been shaped. Our aim is to bring theory to bear, and down to earth, in each consideration, (we will read Foucault and also visit a prison) and since this is an inaugural presidential year, the issues being debated publicly concerning the law and U.S. Constitution will be much on our minds. This is a junior tutorial.

Course Notes: A prison trip is planned, subject to approval. April date to be determined. This course will be lotteried.

Art, Popular Culture, and Civic Life (116288)

Kiku Adatto

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

The seminar explores the interplay of the arts, popular culture and civic life. It will draw on studies in art, history, philosophy, literature, sociology, and photography. Among the questions we will address are: How is historical memory constructed, and what are the competing forces that shape it? What is the significance of public apologies, and does solidarity create moral responsibilities for historical injustices? What accounts for impulse to control and censor the arts? How is cultural domination exerted, and how is it resisted? In what ways does rhetoric shape politics, and what role does it play in national narratives? Why does the contest to control images loom so large in politics and in our everyday lives? This is a junior tutorial.

Course Notes: This course will be lotteried.

Justice and Reconciliation after Mass Violence (128057)

Jonathan Hansen

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

This seminar examines the problem of justice and reconciliation after mass violence: how does a nation sundered by genocide, civil war, or gross human rights violations reestablish the social trust and civic consciousness required of individual and collective flourishing? What is the proper balance between individual and collective responsibility? What is the role of apology (or confession) and amnesty in civil reconciliation? How do specific types of mass violence influence outcomes? What makes some reconciliations successful, others less so? The course engages these and other questions from historical and contemporary perspectives, exploring the legacy of mass violence going back centuries, while examining reconciliation projects across cultures, countries, and continents.

This course comprises three units: 1) a typology of mass violence (civil war, genocide, state repression, for instance) and historical responses; 2) case studies of the U.S. Civil War (and its continuing legacy), Argentina's Dirty War, the Bosnian War, and the Rwandan genocide; and 3) a research and writing workshop emphasizing students own work. The goal of the course is to introduce students to the literature of mass violence from an interdisciplinary perspective (including but not limited to historical, sociological, and anthropological approaches), ultimately launching students on their own research projects. This is a junior tutorial.

Course Notes: This course will be lotteried.**Additional Course Attributes:**

Environmental Political Theory (203273)

Rebecca Ploof

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

The term "anthropocene" – which suggests that the natural world has been profoundly altered by human activity – originated in the physical sciences and has become an increasingly popular way to describe the time in which we live. But how have social scientists in general, and political theorists in particular, understood nature and humanity's relationship to it? Is this relationship best framed in terms of human exceptionality or domination? Is our connection to the natural world and its non-human inhabitants best construed, alternatively, in terms of interdependence or, maybe even, obligation? What are the political implications of the relationship between humans and the natural world? How do the ways in which we answer ontological questions about the nature of being shape our understanding of this relationship? This course will explore these and related concerns by pairing classic texts from the history of political thought with contemporary ecological and environmental political theory. This is a junior tutorial.

Course Notes: This course will be lotteried.

Crime and Security in Latin America (203415)

Ieva Jusionyte

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course examines how governing through crime has become a dominant mode of power in Latin America and considers the political and social effects that such regime of governance has thus far produced. Combining social theory with ethnographic case studies – which include the "war on drugs" in Colombia and in Mexico, security tactics and aesthetics in urban Brazil, gang sovereignty and violence in El Salvador and Honduras, informal economies, smuggling, and unauthorized migration on the U.S.-Mexico border, among others – we will analyze historical, economic, and cultural processes that have shaped the organized brutalities and petty delinquencies in the region. The underlying questions throughout the semester will be the following: Who has the power to outlaw particular activities and what is the logic behind designating people who engage in them as criminals? How do security policies and strategies

shape the urban environment, and why does security buildup, such as militarization of borders and the building of fortified enclaves, create, rather than reduce insecurity While laws establish formal boundaries between the legal and the illegal, how does a bottom-up approach to the lived experiences of crime blur this separation? The main goal of this course to understand the entanglement between crime and security from a perspective that does not take the state or its legal categories for granted. This is a junior tutorial.

Course Notes: This course will be lotteried.

Global Slums (159821)

Kristin Skrabut

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course investigates "the slum" as a social product, an icon of disorder, and a setting for diverse cultures and modes of sociality. By comparing ethnographic case studies of slums from around the world, we explore how slums emerge at the intersection of global inequalities, state planning, and the insurgent practices of the poor. Topics we cover include: rural-urban migration and refugee resettlement, spatial segregation, formal and informal housing markets, infrastructure and sustainability, and urban social movements. This is a junior tutorial.

Capitalism and American Culture Since the Gilded Age (160158)

Ryan Acton

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course asks how capitalism and American culture have shaped each other since the rise of the modern economy after the Civil War. To what extent and in what ways has culture shaped economic life? To what extent and in what ways has economic life shaped the desires, aspirations, and values of Americans? Topics may include: evangelical businessmen, investment banking, race and suburban development, Walmart, cosmetic products, women in the corporate workplace, masculinity and the self-made man, the cult of celebrity, the "American Dream," and the astrology column of the LA Times. This is a junior tutorial.

Empire and Colonialism in the Modern World (160338)

Daragh Grant

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This junior tutorial will expose students to the scholarship on modern empire from across the fields of anthropology, history, and political science. Students will be asked to consider the differences and commonalities in empires across space and time. They will also explore how relations of empire and colonialism were constituted through structures of law and of economic relations, as well as how notions of race and culture were shaped by imperial encounters. Finally, the readings for this tutorial will introduce students to a range of methodological approaches to the study of empire, with an emphasis on historical methods, and will invite them to consider the strengths and weaknesses of these different approaches. This is a junior tutorial.

Course Notes: This course will be lotteried.

The Critical Theory of the Frankfurt School (156263)

David Lebow

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This junior tutorial examines the major thinkers and themes associated with the Frankfurt School of critical theory. From its origins in the interwar crisis, critical theory has sought to diagnose the pathologies of the present in order to chart paths for social and political emancipation in the future. The readings trace the development of the Frankfurt School its various generations, engaging with many of the most important themes of twentieth century continental philosophy, including fascism, democracy, capitalism, bureaucracy, globalization and inequality, to name just a few. The goal of the tutorial is not only to gain a deeper understanding of the Frankfurt School, but also to assess the continued relevance of this distinctive approach to the critical theory of society. This is a junior tutorial.

Rawls & the Moral Feelings (205452)

P. MacKenzie Bok

2017 Fall (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This tutorial will use the Harvard archive of the philosopher John Rawls to uncover his work on a complex theory of moral feelings in the 1950s. This moral theory would come to underpin Rawls's political philosophy in his famous text *A Theory of Justice*, yet most of the relevant documents are unpublished. After learning approaches for archival research from this case study, students will write a historical research paper using other materials in the Rawls archive -- or another archive, with permission of the instructor. This is a junior tutorial.

Course Notes: This course will be lotteried.

Democracy and Education in America (205453)

Leslie Finger

2017 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Education has been an active and contentious area of policymaking in the U.S. Many issues that policymakers grappled with throughout the 20th century – racial segregation, teachers' rights, etc. – continue to be the subject of legislative battles. This course seeks to provide students a comprehensive foundation in three of the most debated - and most important - policy areas in U.S. K-12 schooling today: desegregation, teachers' unions, and school choice. In each of the three focus areas, students will learn about the evolution of the issue, the different ethical perspectives on the issue, and its impact on political and student outcomes. We will hear from political scientists, sociologists, legal scholars, philosophers, and economists, among others. In addition to gaining deep content knowledge on the history, politics, and ethics of K-12 schooling, students will learn the basics of social science research design. They will put their research design skills to work through an original research paper on a topic related to education policy that they will work on throughout the semester. This is a junior tutorial.

Populism and Democracy (205454)

William Selinger

2017 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

Contemporary politics is haunted by the specter of populism. Yet what exactly is populism? Is it a genuine pathology facing democratic polities? Or is it a meaningless term that has been invented to impugn legitimate democratic movements? This course makes use of the tools of history and political theory to explore these and other questions, with the aim of achieving a better handle on the populist phenomenon. We will examine the rich contemporary literature on the relationship between populism and democracy. We will also delve into American history and consider whether there has in fact been a lasting populist undercurrent in American politics. This is a junior tutorial.

Instructor Permissions: Instructor**Enrollment Cap:**

10

Media and power are inextricably linked. On the one hand, mass forms of communication, such as national television and mainstream dailies, circulate hegemonic discourses and give legitimacy to state ideologies. On the other hand, nicknamed the "Fourth Estate," news organizations can act as watchdogs, monitoring the performance of the government and holding it accountable to the people. This course examines this dual role of the media in reproducing existing power relations and providing a forum in which citizens can critically discuss public matters. Using social theory and anthropology, we will pay close attention to the performativity of different media forms; consider how the media achieves effects of truth in its depiction of reality; and analyze situations in which it becomes a tool in the hands of those who seek to challenge official narratives and governance regimes. This is a junior tutorial.

Biomedicine plays a profound role in shaping social phenomena. It informs how we conceptualize ourselves, how we care for others, the ethical dilemmas we confront, and our global political engagements. Drawing on readings and insights from anthropology, science and technology studies, and the medical humanities, students will explore the socio-political, moral, and existential issues associated with biomedicine, while also developing theoretical and methodological tools they can use to conduct their own person-centered investigations of afflictions and therapies in the US and around the world. By engaging ethnographic case studies on topics such as abortion, addiction, organ transplants, disability, and infectious disease, students will develop an understanding of how social and political processes shape health and disease outcomes, as well as how culture is revealed and produced in the ways people pursue and receive medical care. This is a junior tutorial.

Modern Art, Politics, and Society (205459)

Ana Isabel Keilson

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

How can we understand modern society through art? How can modern art connect theories of politics and culture to lived experience? How do artworks, artistic communities, and ideas about aesthetic expression serve as the basis to analyze – and in some instances, change – the features of modern life? This tutorial seeks to answer these questions by examining the intellectual history of modern art, including concepts of "modernity" and "modernism" in literature, performance, and the visual arts from the mid-nineteenth century to the present. Combined with our own observations of the contemporary art scene, we will examine how the convergence of modern art and politics has historically negotiated boundaries between tradition and avant-gardism, nature and technology, the self and the community, protest and participation, consumption and production, reason and intuition, the body and object. Our focus will be on Europe, Russia/USSR, and the United States. Weekly assignments will combine primary and secondary readings in intellectual history, the arts, social theory, and philosophy with screenings and listening sessions. Together, we will attempt to answer the deceptively simple question: what does it mean to be modern? This is a junior tutorial.

Ancient Chinese Thought and Modern China (205479)

Sungbo Kimlee

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

The Hundred Schools of Thought that flourished during the Warring States period (475 BC – 221 BC) had a profound influence on Chinese culture and society. This course will examine the four major schools of Chinese thought: Confucianism, Mohism, Daoism, and Legalism. The course begins by introducing the key Confucian ideas and concepts. Then it investigates the Mohist, Daoist, and Legalist response to Confucianism. We conclude by discussing the enduring relevance of these philosophical ideas in modern China.

The course will focus on close readings of the primary texts. All texts will be read in translation, and no prior knowledge of Chinese philosophy is assumed. This is a junior tutorial.

New Populisms (205480)

Angela Maione

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Thinking the role of the people in politics has long been a topic in the history of political thought. On the one hand, democratic theory is rooted in the people. On the other hand, theorists worry about the consequences of the people behaving badly (that is, as masses, mobs, and multitudes). Together these views suggest that the people themselves are also always potentially the source of their own undoing. This thematic ambivalence about the people in the history of political thought differs sharply from more recent articulations of populism as either necessary or detrimental to democracy.

This course will compare and contrast views on popular mobilizations in the history of political thought with more recent accounts of populism. Is populism based on a sociological category, a particular political imaginary or something else? Can the relationship between populism and democracy be defined? Readings may include: Müller (What is Populism?, 2016), Laclau (On Populist Reason, 2007), Moffitt (The Global Rise of Populism, 2016), Grattan (Populism's Power, 2016), Urbanati (Democracy Disfigured, 2014), Zerilli (A Democratic Theory of Judgment, 2016) Rousseau (On the Social Contract), and Arendt, (On

Revolution). This is a junior tutorial.

Secularism and Its Critics (205481)

Justin Reynolds

2018 Spring (4 Credits)

Schedule:

W 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Often heralded as the antidote to religious conflict, "secularism" has come under attack in recent years by scholars across the political spectrum. This course explores these debates as they have taken shape around reappraisals of the "secularization thesis" – a once-dominant theory asserting the declining importance of religion in the modern world – since the Cold War. Our goal will be to explore the relation of religion to democratic thought and practice by reading both recent critics and defenders of secular modernity in the fields of history, philosophy, anthropology, and political theory. While the course will focus on Europe and the United States, it will also seek to understand how the legacies of colonialism and globalization have shaped the face of religion and the secular today. Two central questions of the course will be: Is secularism dead as a political program? If so, what ought to replace it? This is a junior tutorial.

Course Notes: This course will be lotteried.

Social Studies 98QK

The Ideal of the Open Mind (205483)

Adam Sandel

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

We commonly consider an open mind as essential to fair-minded moral, political, and legal judgment. If you are called for jury duty, for example, you will likely be asked whether you are confident you can judge the case with an open mind. If you answer "no," you will be dismissed from the jury. To have a closed mind is to resist the possibility of persuasion, to be dogmatic, recalcitrant, even bigoted. But what exactly is an open mind?

This course will examine and assess the ideal of the open mind as it has emerged in the Western philosophical tradition. In the first half of the course, we will consider the ideal of detachment and

impartiality that emerged during the Enlightenment and remains influential today. In the second half of the course, we will examine various attempts to recast and revive the case for tradition, partial association, and interpretive pre-judgments that emerged in reaction to the Enlightenment, some of which harken back to ancient political thought.

Throughout the course, we will address questions of contemporary relevance, drawn from the realms of law, politics, culture, history, and philosophy. For example: Is an impartial jury the same as a fair jury? Is political rhetoric invariably a form of manipulation and deceit, or is it a way of persuading people by appealing to them from within their own perspectives? Is one's own upbringing and linguistic background a regrettable limitation to the understanding of other cultures, or a resource for mutual understanding? Should we try to understand the past by setting aside our contemporary views and assumptions, or by drawing upon them? In what sense should a liberal arts education aim at cultivating an open mind? This is a junior tutorial.

Course Notes: This course will be lotteried.

Introduction to Political Sociology (159779)

Bart Bonikowski

2017 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Politics is a struggle for power—power over access to and the distribution of resources, over personal and collective status, and over the ability to define legitimate categories of thought. While politics can be found in all domains of social life, the ultimate site of political contestation is the state, which holds the legitimate monopoly on physical and symbolic violence. Hence, much political sociology is concerned with the relationship between the state and society: how the modern state came to exist, how it came to be viewed as legitimate, what factors shaped processes of democratization, how cleavages based on class, race, and gender affect democratic representation, how liberal democracies structure their welfare state policies, how states create and manage markets, and how social movements strive to effect political change by making claims on state actors. This course will offer an overview of these varied substantive topics, while exposing students to the analytical power of a sociological approach to politics.

Class Notes:

The first class of Intro to Political Sociology will be held Tuesday, September 5, 2017. There will be no class held on Thursday, August 31, 2017!

Introduction to Social Inequality (117584)

Michele Lamont

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

Social inequality concerns the distribution of resources and the recognition of cultural membership to various groups. Thus, at its core, this course seeks to answer a few simple questions: Who gets what? Who is included and excluded? How and why? We will cover core elements of social position: social class, race/ethnicity, and sex/gender. We will focus on patterns of inequality in the United States and other societies and explore the social processes, structures, narratives, and institutions that influence distribution and recognition. We will also apply key sociological concepts to a wide range of empirical cases drawn from contemporary research on social inequality.

Course Notes:

May be counted for introductory concentration requirement, if letter-graded.

Research Lab: Immigration (207118)

Leah Muse-Orlinoff

2018 Spring (4 Credits)

Schedule:

T 1200 PM - 0159 PM

Instructor Permissions: Instructor**Enrollment Cap:**

8

Temporary Protected Status (TPS) and Deferred Action for Childhood Arrivals (DACA) both grant certain undocumented immigrants in the United States the temporary, discretionary ability to live, work, and obtain drivers' licenses. However, with the end of DACA and the phasing out of TPS, the future of more than 1 million undocumented individuals who benefit from these programs is highly precarious. This research lab will explore how these two programs, and in particular the ways in which they have been discussed in the media, vary along important sociological axes. In this lab, students will explore how the programs' different constituencies affect the framing of these programs in our political and social movements discourse. How do public discussions of TPS and DACA differ based on the ethnic and national backgrounds of program participants, especially the crucial cases of Mexico, Central America, and Haiti? How are political and civic activism around these programs covered in the mainstream and ethnic media? And to what extent are TPS and DACA beneficiaries described differently (e.g., as "good" immigrants) relative to other undocumented communities?

In this research lab students will learn data collection and analysis skills that will help them answer these and related questions. Course content will include a robust research design and methodology component through its focus on media coverage of DACA and TPS in mainstream and ethnic media outlets. Course participants will develop qualitative research projects that analyze key sociological themes including race and ethnicity, social movements and political activism, civil unrest, crime, and the economic impact of immigration in sending and receiving communities. Students will learn how to formulate sociological research questions and hypotheses, collect and analyze data, and articulate findings in a formal academic paper. This course is limited to sociology concentrators; bilingual students are encouraged to enroll.

Course Notes:**Limited to Sociology concentrators. Preference given to those who have taken Sociology 128.****Additional Course Attributes:**

Collective Identity (205091)

Shai Dromi

2018 Spring (4 Credits)

Schedule:

W 1100 AM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

Blue collar and middle class, Blacks and Latinx, Christians and Muslims, Americans and French, Harvardians and Yalies –groups have, by their very definition, some criteria to discern those who belong from those who do not, whether they are as large as whole nations, or as small as a group of friends. But what does it mean for a group to have a collective identity? This course will examine what collective identity is and how we can study it sociologically. It will ask questions such as Does a collective identity rely on group members sharing the same past experiences, or does it rely on them facing similar present circumstances? To what extent do group members have to agree on what their collective identity is, and how are disagreement and conflicts managed? How do group members engage in identity politics, and how do they compare their groups to others?

The course will begin with a review of sociological literature that addresses some of the key debates on this topic. Moving forward, students will design and complete their own research projects. Each student will choose a group in the Boston area or on campus, formulate a research question, and conduct participant observations and / or interviews. The course will cover the various steps of the research process, from formulating a research question through collecting and analyzing data and reviewing existing literature, to constructing the final paper.

Schedule:

W 1200 PM - 0159 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

Cities are central to cultural innovation, and access to the arts is often a defining aspect of the urban experience. Grounded in urban sociology and the sociology of culture, this course focuses on topics that span the intersection of urban culture, like neighborhood images, music scenes, street art, nightlife economies, and museums and cultural hierarchies, festivals, and tourism. Along the way, we will explore broader issues of urban life, like gentrification, growth machines, racial segregation, and the concentration of poverty, as well as perspectives on the production and reception of artistic work and cultural authenticity. Through a sequence of distinct projects and assignments, students will develop their

expertise in least three modes of qualitative research: street interviews, participant observation, and semi-structured interviews. Bring your walking shoes – this course will require a lot of thinking (and researching) on your feet.

Course Notes: Required of and limited to Sociology concentrators.

Ya-Wen Lei

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Many of us begin our day by reading online news and surfing Facebook, Instagram, or Twitter. We follow what's going on and what our friends are doing online. Undoubtedly, media, especially social media, are now crucial to our social, political, and cultural lives. Events around the world—from the Arab Spring to the recent American presidential election—have also shown the importance of media in bringing about social and political change. This course explores the impact of the media—how they have transformed our means of communication, social interaction, news consumption, and political action. Reviewing a variety of theoretical and empirical perspectives, we will pursue the following questions, among others: To what extent and in what ways does social media drive political polarization? Is social media making us more or less social? How does social media help to organize collective action? Why can't people tell fake news from real? What are the consequences of fake news? Methodologically, we will cover how to conduct in-depth interviews, online ethnography, and content analysis. The purpose of the course is to give students the skills to do an empirical study of media, society and social change.

In this Junior Tutorial, students will conduct original research relating to the sociology of health. How do we, as a society, decide what constitutes healthy or unhealthy behavior? When one becomes mentally or

physically ill, how does this shape their social relations and experiences? What do transformations in the field of biomedicine mean for understanding individual risk and responsibility? Why do people hold certain beliefs about the government's role in healthcare provision? The course begins with an overview of key questions in the field relating to health values and lifestyles, the experience of illness, biomedicine, and the politics of healthcare provision. Within each substantive section we will pay particular attention to health inequalities relating to race, class, and gender. After the initial weeks of class, students will have developed a project proposal relevant to the course theme. The remainder of the course concentrates on research methodology, data collection and analysis, and workshoping projects. The focus will be on interview-based and content analysis research.

Sociology 98TA

"Studying Up": Privilege, Elite Education, and Inequality (160224)

Tiffanie Ting

2017 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Privilege is an understudied but important topic in educational and social science research. Recent scholarship increasingly attends to the role that elite educational institutions play in producing and maintaining social and economic inequalities. In this course, we will investigate the connections between class, privilege, and educational advantage. By employing the lens of cultural sociology, we will explore various contexts for elite education, the cultural practices around which they are organized, and the ways

in which individuals negotiate a sense of legitimacy and identity within these spaces.

Sociology 104

Higher Education: Institutions, Inequalities, and Controversies (203333)

Manja Klemencic

2017 Fall (4 Credits)

Schedule: T 1100 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This undergraduate seminar explores modern higher education systems and institutions through sociological lenses. We will identify major issues and controversies in contemporary higher education policy and research – such as rising student debt, inequality in access, grade- and degree "inflation", commercialization of higher education, and the increased bureaucratization of universities. We will explore these issues drawing on the seminal works and concepts of the sociology of higher education, such as the

study of inequalities, college impact, universities as organizations, academic profession, higher education politics and higher education culture. This will be an opportunity to gain perspectives into established and emerging areas of research into higher education and insights into today's changing landscape in higher education in the United States and across the world.

Humanitarian Activism and Civil Society (203440)

Shai Dromi

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

International humanitarian organizations are often first on the scene when armed conflicts erupt or natural disasters strike, but their efficiency and legitimacy are constantly questioned. This course examines humanitarian activism from a sociological perspective by looking at its history and its role in contemporary society. We will examine the origins of organized humanitarian activism and the dilemmas and challenges that NGOs must often face. We will investigate the consequences, justifications, and limitations of humanitarian work, focusing substantively on several case studies including the Kosovo War, the Nigerian Civil War, and the 2004 Indian Ocean Tsunami. The course will conclude with presentations based on students' independent research and exploration of an applied topic from the course.

Why do men and women tend to cluster into different occupations? Why do they earn different wages? Is there a certain path that all countries follow as they become more economically prosperous, or do issues concerning men's and women's work differ dramatically across countries because of cultural reasons? This course provides an overview of key issues and perspectives in the study of men, women, and work in contemporary society. May be counted for introductory concentration requirement, if letter-graded.

Media and Popular Culture (109705)

Matthew Kaliner

2017 Fall (4 Credits)

Schedule:

TR 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Explores American society and culture through the lens of its various media, including television, literature, music, movies, and the internet. Topics include class and cultural consumption, the business dynamics of the art world, the power of advertising and mass media, children's media and the online worlds of adolescents, and the rise of urban creative economy. Throughout, students will have opportunities to explore and evaluate ideas from class via independent social and media research. Appropriate for sociology concentrators and non-concentrators alike.

Sociology 122

Social Class in the Black Community (205208)

Jacqueline Rivers

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course focuses on the rise of class divisions among Black Americans. The effects of structural constraints on blacks' social and geographic mobility and how that resulted in a sense of "shared fate" will be the focus of the first portion of the course. The divergence of black people's material conditions as a result of the successes of the Civil Rights Movement, and the impact of factors such as black flight, deindustrialization and spatial mismatch of employment will be discussed. Other topics include changes in blacks' patterns of support for public policy options, divergences in their experience of mass incarceration, education and employment opportunities, and continuing similarities in academic underachievement. The conclusion of the course examines the roots of intergenerational poverty and considers the possibility that the gap between the two groups will continue to widen.

Sociology 124

Stratification, Social Structure, and Networks (205363)

Steven Rytina

2017 Fall (4 Credits)

Schedule:

W 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course will survey competing conceptions of stratification and social structure with special attention to social networks. In a minor but telling shift of emphasis, networks are cast as 'sticky': renewal of on-going contacts is strongly favored over starting afresh. The glue of social life is ever-tightening bonds of accumulating co-experience with partners. Everyday lives, including one's own, can provide multiple examples of the force of sticky networks. Stickiness binds persons into unequal circumstances that are hard to escape, that is, binds people into social strata. Overall, an overarching pattern of simple hierarchy can be shown to be inevitable. The concluding sections will present analytic and empirical grounds for an unorthodox conclusion: a unified, one-dimensional pattern governs stratification in the USA and the UK.

Instructor Permissions: None

Enrollment Cap:

n/a

This course introduces students to core methodological concepts and strategies used in social science research including: question formulation, hypothesis generation, the logic of hypothesis testing, sampling and measurement, experiments, survey analysis, content analysis, ethnography, and in-depth interviewing. In the course we will discuss and develop the analytic skills necessary to interrogate epistemological assumptions in published research specifically and truth-claims generally. In addition to critically evaluating previous research, students will collect and analyze their own data based on the different methods discussed in the class. By the end of the course, students should have acquired valuable research tools widely applicable in academic and professional settings.

Manja Klemencic

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

This Undergraduate Engaged Scholarship Course seeks to integrate the scholarship on sociology of higher education with (i) the service work that Harvard students perform for different communities at Harvard, and (ii) their political engagements to influence higher education policy and legislation. Students' grasp of concepts, such as university citizenship, student agency, mattering, belonging, community-building, and self-formation, will be reinforced through their experiential learning in two distinct yet related spheres of engagement: service roles on campus and influencing higher education policy and regulation. For the former, students will work on (auto)ethnographic multimedia projects to create digital stories of students' service to Harvard communities. For the latter, students will develop action research plans to influence a selected higher education policy issue (e.g. DACA). This course is particularly suitable for students who have interest in higher education issues, and already are or are considering to take a service role on campus (e.g. PAFs, pre-orientation program mentors, HoCo-s, First Generation SU, UC, Crimson, Diversity Peer Educators, Harvard College Honor Council, student interns in the University offices, centers and programs, such as Phillips Brooks House, The Derek Bok Center for Teaching and Learning, Harvard Foundation for Intercultural and Race Relation, Office for BGLTQ Student Life, or Women's Center; student athletes; student teaching fellows; and student research assistants).

Philanthropy and Nonprofit Organizations (203368)

Shai Dromi

2017 Fall (4 Credits)

Schedule:

TR 0200 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Most moral and religious frameworks uphold some form of benevolence and charity. However, societies have different ways of thinking about the roles of philanthropy and nonprofit organizations. This course investigates the nature of philanthropy and nonprofit organizations, as well as their influence on civil society. We will consider different sociological approaches to charitable giving and apply them to substantive topics, such as competing philosophies of giving and the relationship between philanthropic and state-sponsored programs. We will also address issues of social responsibility that arise when billionaire and corporate actors engage in philanthropic work.

As a culminating active learning exercise, students will work in groups to identify and evaluate nonprofits as potential donation recipients, and will assess the impact a donation would make for those organizations. Student groups will have a unique opportunity to decide how to disburse a grant provided by the Philanthropy Lab to nonprofits, and to experience first-hand the dilemmas donors face as they evaluate nonprofits for donation.

War, Revolution, and Organized Crime: In Theory, in Film, and in Reality (159926)

Danilo Mandic

2018 Spring (4 Credits)

Schedule:

MW 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores war, revolution and organized crime as interrelated social phenomena. Students will read sociologists, historians, political scientists and philosophers addressing the nature, causes and consequences of these phenomena in different national and historical contexts. The course will combine influential theoretical frameworks (by Karl Marx, Max Weber, Sigmund Freud, Hannah Arendt), middle-range social scientific approaches (by Anthony Giddens, Charles Tilly, Michael Mann, Theda Skocpol), and empirical and historical analyses (by Eric Hobsbawm, Benedict Anderson, James C. Scott, Eugen Weber). The three phenomena will further be scrutinized through their (mis)representation in movies by Mike Nichols, Milos Forman, Bernardo Bertolucci and others.

Enrollment Cap:

30

In this course, we will use culture as an analytic lens for investigating the institution and experience of school. We will examine 1) relationships and borders between schooling and broader educational contexts including families and communities; 2) schools as dynamic social and cultural systems, and 3) classrooms as sites of conflict, collaboration, and innovation in teaching and learning. Throughout, we will consider how individuals in a variety of roles – teachers, students, administrators, parents, researchers – interpret, negotiate, and respond to the practices and arrangements of schooling. We will examine the complex role of cultural factors in producing, maintaining, and potentially reducing inequalities in educational access, opportunity, and outcomes.

Sociology 140

Identity, Inequality and Social Media (161284)

Keridwen Luis

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course asks how gender, sexuality, race, dis/ability, class, and other intersections of identity impact how we use and appear on social media. Early internet theorists imagined the World Wide Web as a "free" society, where "bodily" issues such as race, gender, and disability would somehow disappear. However, these identities have not vanished; in fact, we might argue that they remain even more potent in today's age of constant media connection. We will explore sociological and feminist theories of media, gender, sexuality, and race, as well as applying these theories to current events online. Students will explore the boundaries of digital activism, question the ways we continue to be embodied online, and consider power relations, discipline, and surveillance.

Contemporary Chinese Society (116219)

Ya-Wen Lei

2017 Fall (4 Credits)

Schedule: T 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

Situating China in the context of the transition from socialism, this seminar provides an overview of contemporary Chinese society. We will explore recent structural changes in China's economy, political system, legal institutions, media, family forms, education, stratification and inequality, and contests over space—as well as how all these various changes interact with one another. We will begin with the Chinese Communist Revolution and then the Cultural Revolution as crucial historical context, and then move on to examine the profound social transformations of the post-1978 reform period. The course will examine how these changes have impacted social relations, how they have been experienced and understood by individuals, and how, in turn, the responses of individuals have also shaped the trajectory of reforms.

Course Notes: */c/* This course, when taken for a letter grade, meets the Core area requirement for Foreign Cultures.

Economic Sociology (204172)

Leah Muse-Orlinoff

2017 Fall (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

The field of economic sociology brings our attention to ways that economic priorities and processes reflect

social dynamics. From ceremonial exchanges of goods in the South Pacific, to the development of modern capitalism, and from interlocking relationships between large corporations to wages, remittances, and social networks, economic sociology considers the social contexts that influence how individuals, communities, and societies organize their resources and how these processes in turn impact our lives. This course offers an overview of economic sociology's major theories and findings across several major themes. The first part of the course focuses on the theoretical underpinnings of economic sociology, and what characterizes a sociological view of the economy. In the second part of the course, we explore some of the social and cultural forces that have shaped key economic institutions such as corporations, insurance, wages and benefits, and marketplaces. The third part of the course considers the impact that these economic institutions have on the quality of life for individuals, communities, and societies. We conclude by asking how the field of economic sociology approaches issues of inequality and social mobility in the United States and globally.

Death by Design: Health Inequalities in Global Perspective (159901)

Jason Beckfield

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

In this course, we will study health differences between social groups. We will begin by examining the extent to which health is unevenly distributed across groups defined by nationality, neighborhood, race, gender, and class. We will then seek to pinpoint the reasons for these disparities with a detailed analysis of the pathways through which these factors are linked to health status. Finally, we will discuss new research on the sociology of population health that shows how health disparities depend on meso- and macro-scale causes like neighborhoods, social policy arrangements, global organizations, and climate change.

Qualitative Methods in Sociology (205205)

Danilo Mandic

2018 Spring (4 Credits)

Schedule: M 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

What does it mean to "sample"? What is a good research question, and how can you go about answering it? What do we do about bias in our research designs? This seminar offers an introductory overview of qualitative research methods in sociology. Through a series of hands-on, applied exercises and practical case-studies, students will learn what qualitative research looks like in the real world. Students will receive training in the basic instruments, sampling strategies, data collections, practical dilemmas, and common problems of different methodological approaches. We will learn about the advantages and limitations of interview-based, survey, ethnographic, and archival research. Throughout the semester, students will have weekly applications of methods, including with programs such as Atlas.ti and Nvivo. We will learn how to formulate research questions, conceptualize social phenomena, create research designs, code and operationalize, collect data, and interpret and present findings for different purposes.

Inequality and Social Change in Japan (205106)

Mary Brinton

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course examines the sources and consequences of inequality in Japanese society. We consider how the lives of ordinary people were affected as Japan moved through decades of high economic growth followed by the "lost decades" of economic recession. The course uses ethnographies, historical accounts, survey data, film, and other sources. In analyzing inequality based on social class, gender, and ethnicity in Japan, students will learn how processes of inequality operate in similar or distinct ways from other societies. The course provides historical background and does not require prior knowledge of Japan.

Sociology of Immigration (126223)

Mary Waters

2018 Spring (4 Credits)

Schedule: MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Immigration is one of the most powerful forces in influencing the structure of societies, altering everything from educational and economic institutions to politics. Understanding the immigration process from a sociological perspective provides insight into why individuals and groups move, how they are received and incorporated into the host society, and the implications for the native-born and for those who stay behind. These theoretical issues will be explored through an examination of actual migration flows over time and around the world. Although the focus of the course will be on U.S. immigration, we will also spend some

time on non-U.S. flows, including the current refugee crisis in Europe.

Social Change in Modern Korea (109680)

Paul Chang

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores the incredible transformation of Korean society in the modern period. We begin with the demise of the Choso/a7n Dynasty at the end of the 19th century before covering the Japanese colonial period (1910-1945), the emergence of two Korean nation-states (1945-1948), the Korean War (1950-53), and the contemporary period (1960-present). The course is divided into two distinct parts. In the first part of the course we discuss Korea's political and economic transformation and in the second, we cover social and cultural change. Upon completion of the course, students should have a thorough grasp of the vast social changes Korea underwent in the 20th century.

Ya-Wen Lei

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Justice Oliver Wendell Holmes wrote: "The life of the law is not logic, but experience." While law school curriculum focuses on legal doctrine, law-in-action often diverges from law-on-the-books. For instance, although civil rights laws make workplace discrimination illegal, such laws are not often enforced. This gap between law-on-the books and law-in-action has prompted social-legal scholars to examine the latter more closely. Adopting a law-in-action approach, this course examines the relationship between law and society. We will survey major theoretical perspectives and empirical studies that analyze the dynamics between law and legal institutions and their social, political, economic, and cultural contexts. Topics that will be discussed include but are not limited to: (1) concepts and theories of law and society; (2) the experiences of different actors in the legal system, particularly, lawyers, judges, jurors, law enforcement agents, litigants, and citizens; (3) legal consciousness and legal culture; and (4) the relationship between law and social change. A major focus of the course will be civil rights. We will explore, for example, the extent to which court decisions on civil rights have brought about social change in the United States.

Theodore Leenman

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0159 PM

Instructor Permissions: Instructor**Enrollment Cap:**

80

In the name of "progress," science is constantly reshaping the economic, legal, and moral fabric of our lives. However, all great scientific advances have been met with resistance from some segment of the public, whether due to threats to established financial interests or through cultural shocks which challenge the existing social order. What are the common features of these panic-promoting innovations? Do they create new social cleavages or exacerbate existing ones? Can we reach a consensus about whether research is unethical or simply unprecedented? How do social contestations around knowledge eventually become resolved? This course reviews some of the most (in)famous historical backlashes against scientific advances - from consequential breakthroughs in disease control to the stuff of science fiction. Along the way we'll cover crucial case studies relating to sexuality, race, and the environment. After examining major themes and debates together, students will analyze and explain controversies through a series of short paper assignments and a take-home final.

Refugees in Global Perspective (203272)

Danilo Mandic

2017 Fall (4 Credits)

Schedule:

MW 0200 PM - 0259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

The recent influx of Middle Eastern refugees into Europe has caught citizens and policy-makers off guard. Yet such waves will continue to rock our globalized world in coming decades: massive movements of forced migrants will be "the new normal." Why is the world producing so many refugees? How are they displaced? Where do they travel, and why? This course will inquire into the nature, causes and consequences of contemporary refugee waves in our globalized world. Students will survey regional dynamics in the Middle East, Africa, Southeast Asia, Eastern Europe and North America. We will examine the particularities of refugees (compared to other migrants) and the changing nature of forced migration since the Second World War. Students will explore historical precedents to contemporary waves, learn about different host society approaches to asylum, compare government and criminal mechanisms of forced migration, and examine the reasons refugees are the object of increasing suspicion and hostility around the world. Particular attention will be paid to the recent EU crisis, the role of refugee camps in the 21st century, and alternative strategies for global asylum management by bridge and destination countries.

Democracy and Social Movements in East Asia (109681)

Paul Chang

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

Social movements are an important part of both democratic and non-democratic societies. This course assesses the state of civil society in East Asia by surveying contemporary social movements in China, Taiwan, Hong Kong, Japan, and South Korea. We start the course by discussing the main concepts and analytic approaches in social movement theory. We then apply these theoretical frameworks to specific mobilization efforts in East Asia, keeping in mind each country's unique historical context. With the theoretical and empirical tools gleaned from the lectures and readings, students will pursue a case analysis of an East Asian social movement of their choosing.

Sociology 196

Multiculturalism and Integration in Europe and Beyond (204417)

Paul May

2018 Spring (4 Credits)

Schedule:

W 1200 PM - 0159 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

This course examines state policies and practices with respect to multiculturalism. It investigates the variety of political approaches to how different cultures are recognized and whether individuals have the means to maintain and transmit their cultural differences.

We will focus on the practical implications of an increasingly diverse population in the context of postcolonial immigration in Western countries. We will examine what diversity means, what practical consequences it has, and how political institutions at various levels have responded to it. Areas to be studied include education, employment, and religious accommodation; these will be placed in the context of current debates about national identity, economic crisis and globalization.

The course utilizes case studies of contemporary events including Brexit, terrorism, and controversies about free speech. It will include as primary sources newspaper reports and other media coverage, citizenship tests, and recorded interviews with political figures. The focus will be Western Europe, but we will also reference cases from other parts of the globe.

Course Notes:

Sociology 198

Introduction to Social Network Methods (207219)

Peter Marsden

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

This course covers foundations for studying networks comprised of social relationships, stressing underlying concepts together with quantitative approaches to representing and understanding patterns in network data. Among the topics treated are visualization, centrality, homophily, identification of subgroups or "communities", "egocentric" or "personal" networks, networks based on individual-group relationships, and the "small world" phenomenon. Students will develop familiarity with software for undertaking basic analyses of network data.

Course Notes: Priority given to Sociology concentrators and Grad Students**Additional Course Attributes:**

Sociology 202

Intermediate Quantitative Research Methods (119985)

Peter Marsden

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1129 AM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Descriptive and inferential techniques used in quantitative sociological research. Emphasis is on the fundamentals of the linear regression model for continuous response variables, focusing on assumptions and interpretation. Motivation, application, and presentation are stressed; topics include categorical covariates, interactions, and diagnostics. Because the linear regression model is the foundation for more specialized models that are often applied in sociological research, the aim of this course is to develop the skills necessary to (a) understand quantitative sociological research, (b) produce convincing analysis, (c) evaluate quantitative analysis, and (d) learn more specialized techniques as needed.

Course Notes: Required of, and limited to, first-year graduate students in Sociology**Recommended Prep:** Familiarity with basic statistics.**Additional Course Attributes:**

"Doing" Transnational Historical Sociology (206969)

Yael Berda

2018 Spring (4 Credits)

Schedule:

MTWRF 0900 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

Sociologists have analyzed empires through the entire history of the discipline. Using imperial frameworks as a unit of analysis was fruitful for learning about state formation and consolidation of power, the innovation of governance methods in multicultural settings, migration and political membership and the relationship between state violence, law, economic extraction, and the growing repertoire of toolkits of government. This intensive course incorporates primary historical, administrative and legal source from the Roman, Mongolian, Mughal, Ottoman and British Empires, withfrom historians, sociologists and economists to provide basic skills to design a transnational historical research project, using historical archives, and particularly administrative data. Students will focus on methodological dimensions of transnational historical projects, will practice searching archive material from the British Empire (at Widener library) and are encouraged to bring their own research project to the course for discussion.

Course Notes:

This intensive course is designed for graduate students in Sociology (but also open political science, economics, law and public policy interested in conducting transnational historical research using archival data),

The course will meet in WJH 450:

9-12 on January 10th & 11th

9-2 on January 12th

9-12 on January 15th

9-2 on January 16th

9-12 January 17th and 18th

Class Notes:

This course will be taught by Yael Berda, Gerard Weinstock Visiting Lecturer on Sociology (winter session 2018)

Additional Course Attributes:

Sociology 220

Introduction to Computational Text Analysis (205062)

Bart Bonikowski

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course will serve as an overview of sociological approaches to big data, with a specific focus on large textual corpora. Topics covered will include obtaining data from online sources using web scraping and APIs and text analysis using dictionary methods, supervised machine learning, topic modeling, sentiment analysis, and basic lexical tagging. Students will learn how to use Python to collect, clean, analyze, and visualize data, how to parse HTML, JSON, and XML code, and how to properly document their work. While the emphasis will be on the application of specific methods, the course will also address the affordances and limitations of computational text analysis as a method for answering sociological research questions. The course will meet once a week for two hours and feature a combination of lectures and hands-on programming workshops. While no experience with text analysis is necessary, students will be expected to complete a short online Python course prior to enrollment.

Crime and Criminal Justice in Life-Course Perspective (205914)

Robert Sampson

2018 Spring (4 Credits)

Schedule:

M 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This seminar examines crime and criminalization across the life course. Social processes and context are emphasized. Key themes include the long-term study of continuity and change; trajectories, transitions, and turning points; cohort effects; and social change (e.g., mass incarceration, the crime drop). Both qualitative and quantitative approaches are covered, highlighting research on crime, inequality, and contextual change. A major portion of the seminar will be devoted to the development of student projects.

Steven Rytina

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This course examines the dimensions and magnitude of inequality in industrial societies, with a heavy emphasis on the United States since the mid-20th century. The readings and class discussion are designed to expose students to a broad range of influential pieces in the social stratification literature. In particular, we will study inequality through: pay for work, race, neighborhoods, gender, family, mobility, education, social capital, and rising income inequality since 1980.

Culture, Inequality, and Black Youth (139026)

Orlando Patterson

2017 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

The seminar examines the complex situation of black youth in America with an emphasis on the matrix of cultures that support, enrich and, in conjunction with racial and structural forces, undermine their life chances. We will attempt to unravel the sociological puzzle of the socio-economic disconnection, hyper-segregation, violence, gender conflicts, familial fragility, and high incarceration rate that beset a significant minority of them, on the one hand, and, on the other, their remarkable prominence and integration in the nation's popular culture. We tackle the complex and controversial problem of how best to understand, theoretically and pragmatically, the interactive role of culture in disentangling this conundrum. We conclude with a review of the best policies and practices aimed at improving their condition.

Qualitative Network Analysis (131291)

Mario Small

2018 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

50

This course examines how researchers have analyzed observational, interview, and textual data in the study of social networks. We will explore both classic and contemporary readings in anthropology, sociology, history, and other disciplines, and study both traditional and new techniques, including those based on large-n data but focused on meaning and qualitative aspects of the social world. Social Network Analysis or a similar course on SNA methods is strongly recommended but not required.

Course Notes: Sociology concentrators in their senior year may take the course with prior permission from Instructor.

Recommended Prep: Qualitative Social Analysis or a comparable course is a prerequisite.

Teaching Practicum (111781)

Jason Beckfield

2017 Fall (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course is intended to enhance the teaching skills of graduate students in the Sociology Department. Through a combination of classroom discussions and teaching simulations, the seminar challenges students to discover and hone their teaching styles, to develop a personal philosophy about teaching and learning, to develop self-confidence leading and facilitating small and large group discussions, to learn about the teaching resources that are available to them throughout the university, to experiment with designing engaging courses of study, and to discover that teaching can be a rewarding and stimulating element of an academic career.

Course Notes:

Required of and limited to graduate students in Sociology. Attendance at first meeting is required. Not repeatable for credit.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Social Sciences
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Sociology 307

Proseminar on Inequality and Social Policy III (112355)

Maya Sen

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

Students develop previously completed papers from Proseminar I and II into professional presentations and publishable articles, critique peer papers across disciplines, and discuss presentations of national experts.

Course Notes:

**Offered jointly with the Kennedy School as SUP-923.
Instructor TBD**

Recommended Prep:

Sociology 296a/Gov 2340a and Government 2340b/Soc 296b (or SUP-921 and SUP-922 at the Kennedy School).

The Urban Data Lab (203599)

*Robert Sampson**Mario Small*

2018 Spring (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Professors Robert Sampson and Mario Small are organizing a small lab to support research by students and postdocs examining a subset of topics regarding the urban condition in the 21st century. Students enrolled in the lab must be working on one of the following datasets: the Project on Human Development in Chicago Neighborhoods, the Los Angeles Family and Neighborhood Survey, the project on Twitter Data and Human Mobility, and the project on Alternative Measures of Resource Access in Poor Neighborhoods. The lab is organized around two themes: big data (fall) and the comparative analysis of urban dynamics in Chicago and LA (spring). Students will meet to discuss readings and present papers to others in the working lab. By permission.

Course Notes:**Meets sporadically.****Additional Course Attributes:**

Jocelyn Viterna

2018 Spring (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

The Politics and Social Change Workshop promotes the development of a community of scholars interested in how power relations shape social patterns in societies around the world. We define 'politics' broadly to include everything from gender politics within the household to state politics within a transnational system. Our participants' interests span a wide range of topics including political sociology, political economy, political violence, political behavior, governance, democracy, state welfare, education, social movements, civil society, NGOs, protest, race, ethnicity, gender, sexuality, class, the media, the environment, and development, among others. We meet twice a week. During most meetings, group participants take turns discussing their works in progress. Once or twice a semester, we also bring in outside speakers to discuss topics of interest to our members.

Class Notes:

Co-taught with Professor Peggy Levitt, Wellesley University/Weatherhead Center

Culture, History and Society (128274)

Orlando Patterson

2018 Spring (4 Credits)

Schedule: F 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

The Workshop in History, Culture, and Society is a forum for the exploration of new developments in historical social science, especially in the fields of Anthropology, Economics, History, Political Science, Psychology, and Sociology. The workshop's primary methodological goal is to initiate a discussion of what constitutes acceptable historical evidence in each of the social sciences. Its main substantive goal is to understand how the past influences the present.

Course Notes: First Fall meeting Friday, September 11th; First Spring meeting Friday, February 5th.

Class Notes: First meeting Friday, February 5, 2016.

Lawrence Bobo

2018 Spring (4 Credits)

Schedule:

F 1200 PM - 0159 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

The Contemporary Studies of Race & Ethnicity (CSRE) workshop's purpose is to provide a forum to disseminate knowledge and facilitate dialogue among graduate students, faculty, and visiting scholars working on or interested in research about contemporary studies related to race & ethnicity. Though the Sociology department hosts the workshop, we seek to bring scholars together across disciplines to explore topics such as ethno-racial hierarchies, racial attitudes, and intergroup relations, as well as the role of race in institutions, politics, and everyday life. The workshop will foster both a learning and collaborative space in which participants can circulate and garner feedback on works in progress, including dissertation chapters, proposals, journal article submissions, conference papers, and practice job talks.

South Asian Studies

Subject: Thai

Thai 101A

Introductory Thai I (107892)

Richard Delacy

2017 Fall (4 Credits)

Schedule:

T 0900 AM - 1029 AM

W 0615 PM - 0745 PM

Instructor Permissions: Department

Enrollment Cap:

n/a

This course introduces the basic grammatical structures of modern Thai, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Thai is taught with a concern for the cultural context in which this language is spoken and written.

Course Notes:

Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

Additional Course Attributes:

Richard Delacy

2017 Fall (4 Credits)

Schedule:

TR 0615 PM - 0745 PM

Instructor Permissions: Department

Enrollment Cap:

n/a

A two-term continuation of the study of Thai at the intermediate level. Students build on acquired proficiency at the elementary level (or its equivalent) towards achieving more fluency in reading, speaking, writing, and listening comprehension of standard Thai, as well as in cultural-social skills. Introduces new vocabulary and grammar through communicative tasks and text readings, mainly using the situational-communicative methodology.

Course Notes:

Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

Schedule: MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Introduction to Classical Sanskrit, the translocal language of intellectual life in South Asia for much of the last two millennia. This course provides the essential grammar and reading proficiency necessary to take up the language's many rich literary traditions: scripture (*Upaniṣad*), epic (*Rāmāyaṇa* and *Mahābhārata*), poetry, Hindu and Buddhist philosophy, etc. After completing the textbook, we will read a narrative (*Hitopadeśa*) drawn from one of the most popular literary works in the pre-modern world.

A reading course designed to give students the tools necessary for advanced study in Classical Sanskrit. Readings in epic (*itihāsa*) or narrative (*kathā*), poetry (*kāvya*) or systematic thought (*śāstra*) will introduce students to a variety of important genres and their distinctive conventions. A focus upon the Sanskrit tradition's categories of analysis - grammatical, commentarial and prosodic - will enable students to begin to make sense of original Sanskrit texts as generations of the tradition's own readers have.

Additional Course Attributes:

Enrollment Cap: n/a

An advanced Sanskrit reading course focusing on the development of skills in either classical belles lettres (kāvyā) or scholastic, commentarial prose (śāstra). In the former, emphasis is on the ability to re-arrange complex poetic forms into digestible prose word order. In the latter, students learn both the stylistic conventions of scholastic Sanskrit and the technical vocabulary of the relevant intellectual discipline.

Sanskrit 201BR is a continuation of Sanskrit 201AR

Hindi-Urdu 101A

Introductory Hindi-Urdu (113639)

Richard Delacy

2017 Fall (4 Credits)

Schedule:

MTWR 0300 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An Introduction to the modern standard form of the most widely spoken language in South Asia, Hindi-Urdu. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film, in particular recent Bollywood songs, to reinforce structures and vocabulary. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Not open to auditors.

Religion & Politics: India, 1800-2010 (205456)

Mou Banerjee

2018 Spring (4 Credits)

Schedule:

T 1130 AM - 0129 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a historical introduction to the role of religious faith in shaping political identity and political consciousness in the public sphere in modern South Asia. We shall study the evolution of South Asia's intricate relationship to religion and secularism, through close readings of primary sources and relevant historiographical literature. By exploring the interactions between Christianity, Hinduism and Islam, we shall examine how such encounters and debates, in relation to the realities of colonial rule, shaped a modern discourse on personal identity which has had a lasting impact on legal and political practice in the South Asian subcontinent.

Subject: Nepali

Nepali 101A

Introductory Nepali (118665)

Richard Delacy

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Department

Enrollment Cap: n/a

This course introduces the basic grammatical structures of modern Nepali, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Nepali is taught with a concern for the cultural context in which this language is spoken and written.

Course Notes: Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

Continuation of Tamil 101. Focus will be on further developing reading, writing, and speaking skills. Students will read fables, newspapers, short stories, and other genres of literature including poetry. Tamil cinema and audiovisual materials presenting contemporary and traditional Tamil culture will be used as supplementary class material.

Course Notes: Not open to auditors.

Additional Course Attributes:

Attribute	Value(s)
HCOL: Foreign Lang Citation	Tamil
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Meets Foreign Lang Req	Tamil
FAS Divisional Distribution	None

Introduction to Quantitative Methods for the Social Sciences and Humanities (113431)

Kerrie Nelson

2017 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

"Introduction to key ideas underlying statistical and quantitative reasoning. Topics covered: methods for organizing, summarizing and displaying data; elements of sample surveys, experimental design and observational studies; methods of parameter estimation and hypothesis testing in one- and two-sample problems; regression with one or more predictors; correlation; and analysis of variance. Explores applications in a wide range of fields, including the social and political sciences, medical research, and

business and economics."

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Additional Course Attributes:

Introduction to Quantitative Methods for Economics (114027)

Michael Parzen

2018 Spring (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

A rigorous introduction to statistics for students intending to study economics. Examples drawn from

finance, decision analysis and economic decision-making. In addition to descriptive statistics, probability, inference and regression modeling, also covers portfolio optimization, decision analysis, and time series analysis. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques.

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Statistics 109

Intro to Statistical Modelling (205028)

Michael Parzen

2018 Spring (4 Credits)

Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

Stat 109 is a second course in statistical inference and is a further examination of statistics and data analysis beyond the introductory course. Topics include t-tools and permutation-based alternatives including bootstrapping, multiple-group comparisons, analysis of variance, linear regression, model checking and refinement. Statistical computing and simulation based emphasis will also be covered as well as basic programming in the R statistical package. Emphasis is made on thinking statistically, evaluating assumptions, and developing tools for real-life applications.

Course Notes: Note that Stat 109 cannot be taken for credit if Stat 139 has already been taken.

Requirements: Anti-req: Cannot be taken for credit if STAT 139 already complete

Additional Course Attributes:

Statistics 110

Introduction to Probability (110766)

Joseph Blitzstein

2017 Fall (4 Credits)

Schedule: TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

A comprehensive introduction to probability. Basics: sample spaces and events, conditional probability, and Bayes' Theorem. Univariate distributions: density functions, expectation and variance, Normal, t, Binomial, Negative Binomial, Poisson, Beta, and Gamma distributions. Multivariate distributions: joint and conditional distributions, independence, transformations, and Multivariate Normal. Limit laws: law of large numbers, central limit theorem. Markov chains: transition probabilities, stationary distributions, convergence.

Recommended Prep: Mathematics 18, 21a, or above (may be taken concurrently).

Additional Course Attributes:

Attribute	Value(s)

Introduction to Statistical Inference (111036)

Susan Murphy

Neil Shephard

2018 Spring (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

The course is designed for undergraduates as their first introduction to rigorous statistical inference. Understanding the foundations will allow you to see more deeply into individual methods and applications, placing them in context and able to learn new ones (and invent new ones!) much faster having understood broad principles of inference.

Class Notes:

Tu., Th., 1–2:30, and weekly sections to be arranged.

Recommended Prep: Mathematics 19a and 19b or equivalent and Statistics 110.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Statistics 115

Introduction to Computational Biology and Bioinformatics (122304)

Xiaole (Shirley) Liu

2018 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

The course will cover basic technology platforms, data analysis problems and algorithms in computational biology. Topics include sequence alignment and search, high throughput experiments for gene expression, transcription factor binding and epigenetic profiling, motif finding, RNA/protein structure prediction, proteomics and genome-wide association studies. Computational algorithms covered include hidden Markov model, Gibbs sampler, clustering and classification methods.

Recommended Prep: Good quantitative skills, strong interest in biology, willingness and diligence to learn programming.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Data Science 1: Introduction to Data Science (203101)

Kevin A. Rader

Pavlos Protopapas

Margo Levine

2017 Fall (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Data Science 1 is the first half of a one-year introduction to data science. The course will focus on the analysis of messy, real life data to perform predictions using statistical and machine learning methods. Material covered will integrate the five key facets of an investigation using data: (1) data collection - data wrangling, cleaning, and sampling to get a suitable data set; (2) data management - accessing data quickly and reliably; (3) exploratory data analysis – generating hypotheses and building intuition; (4) prediction or statistical learning; and (5) communication – summarizing results through visualization, stories, and interpretable summaries. Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Only one of CS 109a, AC 209a, or Stat 121a can be taken for credit. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109a, AC 209a, or Stat 121a for credit.

Recommended Prep: Programming knowledge at the level of CS 50 or above, and statistics knowledge at the level of Stat 100 or above (Stat 110 recommended).

Requirements: Not to be taken in addition to Computer Science 109 or Computer Science 109A, or Applied Computation 209, or Applied Computation 209A.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Data Science 2: Advanced Topics in Data Science (203102)

Mark Glickman

Pavlos Protopapas

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Data Science 2 is the second half of a one-year introduction to data science. Building upon the material in Data Science 1, the course introduces advanced methods for data wrangling, data visualization, and statistical modeling and prediction. Topics include big data and database management, interactive visualizations, nonlinear statistical models, and deep learning. Part two of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Can only be taken after successful completion of CS 109a, AC 209a, Stat 121a, or equivalent. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109b, AC 209b, or Stat 121b for credit.

Recommended Prep: : CS 109a, AC 209a, or Stat 121a required.

Requirements: Requisite: (Must take CS 109A OR APCOMP 209A OR STAT 121A before taking STAT 121B) AND (Cannot take STAT 121B, if already taken STAT 121 OR CS 109 OR CS 109B OR APCOMP 209 OR APCOMP 209B)

Statistics 123

Quantitative Finance (126048)

Stephen Blyth

2018 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to financial derivatives and the probabilistic techniques used to analyze them. Topics include: forwards, swaps and options; replication, no-arbitrage and risk-neutrality; martingales, numeraires and the fundamental theorem of asset pricing; and an introduction to interest-rate derivatives and their valuation. Provides a rigorous but accessible treatment of the elegant theory underpinning quantitative finance, motivated by real problems from the financial industry.

Course Notes:

Designed for those seeking an understanding of the quantitative challenges on Wall Street and the probabilistic tool-kit developed to address them.

Recommended Prep:

Statistics 110 or equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science

Statistics 139

Linear Models (110751)

Kevin A. Rader

2017 Fall (4 Credits)

Schedule:

MW 0930 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An in-depth introduction to statistical methods with linear models and related methods. Topics include group comparisons (t-based methods, non-parametric methods, bootstrapping, analysis of variance), linear regression models and their extensions (ordinary least squares, ridge, LASSO, weighted least squares, multi-level models), model checking and refinement, model selection, cross-validation. The probabilistic basis of all methods will be emphasized.

Class Notes:

Fall: M., W., 9:30-11, and a weekly section to be arranged.

Recommended Prep:

Statistics 110 and Math 21a and 21b or equivalent

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Design and Analysis of Sample Surveys (112121)

Alan Zaslavsky

2017 Fall (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

Methods for design and analysis of sample surveys. The toolkit of sample design features and their use in optimal design strategies. Sampling weights and variance estimation methods, including resampling methods. Brief overview of nonstatistical aspects of survey methodology such as survey administration and questionnaire design and validation (quantitative and qualitative). Additional topics: calibration estimators, variance estimation for complex surveys and estimators, nonresponse, missing data, hierarchical models, and small-area estimation.

Course Notes: The regular classroom hours of Stat 160 are 2:30 - 4:00. The extra hour is for extra discussion for 260.

Recommended Prep: Statistics 111 or 139 or with permission of instructor.

Additional Course Attributes:

Statistics 211

Statistical Inference I (111130)

Lucas Janson

2017 Fall (4 Credits) **Schedule:** WF 0230 PM - 0359 PM
Instructor Permissions: None **Enrollment Cap:** n/a

Inference: frequency, Bayes, decision analysis, foundations. **Likelihood,** sufficiency, and information measures. **Models:** Normal, exponential families, multilevel, and non-parametric. **Point,** interval and set estimation; hypothesis tests. **Computational strategies,** large and moderate sample approximations.

Course Notes: Formerly Stat 211a.
Recommended Prep: Statistics 111 and 210 or equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Statistics 212

Probability II (156452)

Daniel Stroock

2018 Spring (4 Credits) **Schedule:** TR 0230 PM - 0359 PM
Instructor Permissions: None **Enrollment Cap:** n/a

A graduate introduction to advanced probability. Foundations of probability: exchangeability and de Finetti's type theorem. **Martingales:** convergence theorems, optional stopping, Polya urn schemes and applications to statistics. **Poisson processes:** general spaces, marked processes, applications to Bayesian nonparametrics. **Gaussian processes:** existence theorem, Brownian bridges, meanders and excursions. **Empirical processes:** inequalities, central limit theorems and the bootstrap. **Markov Chains:** ergodicity, convergence and MCMC algorithms. **Stochastic calculus:** Ito's formula.

Course Notes: Please refer to this page for the course site: <http://www-math.mit.edu/~dws/212/>

Statistics 213

Statistical Inference II (159802)

Pierre Jacob

2018 Spring (4 Credits)

Schedule:

MW 1100 AM - 1229 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Stat 213 will build upon Stat 211 and give some tools to study and validate statistical methods (asymptotic statistics, well-specified and mis-specified models, model comparison, cross-validation, bootstrap). These concepts will be discussed in the context of advanced statistical models: non-parametric regression, regularized regression, latent variable and hidden Markov models. Numerical methods required to put such models into practice will be discussed.

Recommended Prep: Stat 210, 211, 212(stat 210b)**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Final Assessment Category	Three-hour Exam

Statistics 215

Introduction to Computational Biology and Bioinformatics (126060)

Xiaole (Shirley) Liu

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Meets with Statistics 115, but graduate students are required to do more coding, complete a research project and submit a written report during reading period in addition to completing all work assigned for Statistics 115.

Recommended Prep: Good quantitative skills, strong interest in biology, good programming skills in C/C++, Java, Perl or Python.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Statistics 220

Bayesian Data Analysis (118016)

Jun Liu

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Basic Bayesian models, followed by more complicated hierarchical and mixture models with nonstandard solutions. Includes methods for monitoring adequacy of models and examining sensitivity of models.

Course Notes: Emphasis throughout term on drawing inferences via computer simulation rather than mathematical analysis.

Recommended Prep: Statistics 110 and 111.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Statistics 234

Sequential Decision Making (205213)

Susan Murphy

2018 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Course Notes: (New Course)

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Statistics 244

Linear and Generalized Linear Models (127856)

Mark Glickman

2017 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The theory and application of linear and generalized linear models, including linear models for normal responses, logistic models for binary and multinomial data, log-linear models for count data, overdispersion and quasi-likelihood methods, regularization, and computational issues. An introduction to smoothers, additive models and generalized additive models

Recommended Prep: Strong statistics background required (at the second-year graduate level), Statistics 210 may be taken concurrently, Statistics 211 desirable.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Statistics 260

Design and Analysis of Sample Surveys (126393)

Alan Zaslavsky

2017 Fall (4 Credits)

Schedule:

W 0230 PM - 0459 PM

M 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Meets with Statistics 160, but graduate students will have an extended class period and complete additional assignments for a more theoretical, in-depth treatment of topics.

Course Notes:

The regular classroom hours of Stat 160 are 2:30 - 4:00. The extra hour is for extra discussion for 260.

Recommended Prep:

Statistics 110, 111, and 139 or with permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Statistics 286

Causal Inference & Program Evaluation (156925)

Fabrizia Mealli

2017 Fall (4 Credits)

Schedule:

W 0900 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The course will introduce students to the basic concepts of Causal Inference primarily under the Potential Outcome approach. It will then guide students through recent advances in causal inference for the analysis of both experimental and observational studies. Topics will include: dealing with various "selection" problems or post-treatment complications, such as censoring due to death, noncompliance, missing outcomes, mediation analysis, through principal stratification; dealing with interference and estimation of spillover effects; sensitivity analysis to various identifying assumptions; different modes of inference for causal effects (moment-based, randomization-based, likelihood-based and Bayesian).

The course will blend theory and application. Recent papers will be discussed, and participants will be encouraged to develop their own research problems in this active area. After finishing the course, students should have a solid understanding of the philosophy behind causal inference, the ability to analyze experimental and observational data; the ability to design and implement a data analysis plan for a given

scenario.

Recommended Prep: **Statistics 186 or equivalent recommended.**

Modern high-dimensional inference (156490)

Lucas Janson

2018 Spring (4 Credits)

Schedule: R 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Certain diseases have a genetic basis, and an important biological problem is to understand the contributions of specific genetic features (e.g., gene expressions or single nucleotide polymorphisms). In health care, researchers often want to know the relationship between electronic medical records and future medical costs. Political scientists study how demographic or socioeconomic variables determine political opinions. Economists are interested in the effect of the same demographic/socioeconomic variables but on future income. Data scientists in the technology industry seek out software characteristics they can change to increase user engagement. Problems of a similar nature abound in the current era of data-driven science and engineering. What they have in common is a deluge of explanatory variables, often many more than the number of observations (the high-dimensional regime), and the goal of making statistical inferences about the relationship between those explanatory variables and a response variable. This reading/research class will cover recent but foundational papers in the field of high-dimensional inference, with a focus on methodology and theory.

Recommended Prep: Stat 210, Stat 211

Big data statistics in genomic and genetic research (204455)

Xiaole (Shirley) Liu

Jun Liu

2018 Spring (4 Credits)

Schedule:

R 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

As biomedical research community generates more and more high throughput genomic profiles, the need for careful statistical analyses also increases. In this weekly course, we will first introduce the main statistical challenges and basic solutions to big data in genomic and genetic research. We will also ask students to read a selection of methodology and data analysis papers for biomedical big data, and debate about their statistical and computational merits and drawbacks.

Recommended Prep: Students taking the course should have a reasonable background and knowledge in statistical (e.g. STAT111/139), genomics and bioinformatics (e.g. STAT115/215).

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Kevin Eggan

2018 Spring (4 Credits)

Schedule:

TR 0900 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This year-long hands-on laboratory course hones skills essential for researchers in developmental biology. Students will learn genome editing tools, cell culture techniques, and phenotypic analyses in both cell lines and model systems while addressing unknown questions in the field. SCRB 15 is designed to complement material found in SCRB 10, and is best taken during the sophomore year.

Requirements:

Prerequisite SCRB 15A

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
Full Year Course	Indivisible Course
Course Search Attributes	Display Only in Course Search
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 91R

Introduction to Research (125804)

William J. Anderson

2018 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Laboratory research in topics related to the Human Developmental and Regenerative Biology Concentration under the direction of, or approved by, members of the Department of Stem Cell and Regenerative Biology, Principal Faculty of the Harvard Stem Cell Institute, or others with permission. A paper must be submitted to the laboratory sponsor and to the HDRB Concentration Office for review by the Course Director and Head Tutors.

Course Notes:

Limited to Human Developmental and Regenerative Biology Concentrators; written permission of the laboratory sponsor must be submitted to the HDRB Concentration Office prior to enrolling in the course. This introductory research course is intended to prepare students for SCRB 99 and may ordinarily be repeated no more than once. Ordinarily may not be taken as a fifth course. Laboratory safety session required.

Class Notes: William J. Anderson and members of the Department

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 91R

Introduction to Research (125804)

William J. Anderson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Stem Cell & Regenerative Biol 99A

Laboratory Research for Honors Thesis (125805)

William J. Anderson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

For honors candidates writing a thesis in Human Developmental and Regenerative Biology. Students must complete both terms of this course (A and B) in order to receive credit.

Course Notes:

Ordinarily may not be taken as a fifth course. Laboratory safety session required.

Recommended Prep:

Students intending to enroll in the fall are required to submit a written

proposal to the Course Director. Students may enter the course at midyear only with the permission of the Course Director. The thesis proposal must be approved by the Course Director and Head Tutors prior to enrolling in SCRB 99.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students

Stem Cell & Regenerative Biol 140

Developmental and Molecular Basis of Growth and Regeneration (126744)

Fernando Camargo

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course will focus on the biology of organ growth and regeneration from a developmental perspective. How is the size and symmetry of our organs set? How does a regenerating animal sense that something is missing and eventually stop the regenerative process when tissues reform? We will learn about conserved developmental pathways that are necessary for adult regeneration and discuss how the aberrant activation of these pathways can lead to overgrowth disorders such as cancer.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 145

From Cells to Tissues, in Sickness and in Health (161207)

Ya-chieh Hsu

David Scadden

2018 Spring (4 Credits)

Schedule: MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

Every cell is a part of a larger "community", working together to enable tissue function. This course will explore the principles of building complex tissues from cells. How do cells know what tissues to make and when to make them? How do cells communicate with one another? What diseases can arise when these principles go awry? How can we build tissues in the lab? In addition to lectures, students will engage deeply in primary literature.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Stem Cell & Regenerative Biol 167

Stem Cells and Regeneration in the Pathobiology and Treatment of Human Disease (125200)

Leonard Zon

2018 Spring (4 Credits)

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Stem cells are the basis for tissue maintenance and repair, thus, are essential elements of normal organ and tissue physiology. Stem cells are also targets for disease processes and through transplantation are important therapeutic agents. This course will allow advanced undergraduates to explore how stem cells and tissue regeneration impact human disease pathogenesis and how stem cells might be exploited to advance new therapies for disease.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10; MCB 52 or MCB 54.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Stem Cell & Regenerative Biol 175

Glucose: From Molecule to Society (128041)

Richard Lee

2017 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

We will explore the biochemistry, cell biology, and physiology that make glucose our main source of energy. How did humans depend on and crave this molecule? What consequences does it hold for normal metabolism and disease? Students will integrate evolution, endocrinology, biostatistics, bioengineering, and regenerative biology approaches in considering sugar and all its consequences. Finally, we will evaluate legal and business issues necessary to move scientific and technical innovations from the laboratory to the patient.

Class Notes:

M., W., at 11, and a lab component to be arranged

Recommended Prep:

Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54; MCB 52 or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 178

Immunology: New Tracks and Greatest Hits (111316)

Jonathan Hoggatt

2018 Spring (4 Credits)

Schedule:

MW 0400 PM - 0529 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will explore cutting edge immunology topics with student presentations of recently published papers discussing topics ranging from hematopoietic stem cells, HIV, gluten, cancer and others. The class will also discuss the classic immunology papers that have shaped the field today, with discussions on the next steps for the future. Course work: Reading of papers, seminar presentations, and class participation.

Recommended Prep:

MCB 169 or permission of instructor recommended, but not required.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 187

Brains, Identity, and Moral Agency (109360)

Steven Hyman

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

100

Human beings experience a sense of self that provides a stable foundation from which to understand personal experience, consciously formulate goals, and initiate actions. The view that people act in accordance with freely formed intentions underlies important concepts of moral agency and culpability, yet evidence from neuroscience questions this assumption. This course will examine competing views of human agency grounded in concrete scientific examples to encourage reflection on the implications for identity and moral agency.

Course Notes:

For students who have taken MCB 80, it is contemplated that there will be a section that incorporates more advanced concepts from neurobiology. This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Recommended Prep:

LPS A or LS 1a (or equivalent - permission of instructor required).

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS: General Education	Ethical Reasoning
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 190

Understanding Aging: Degeneration, Regeneration, and the Scientific Search for the Fountain of Youth (125185)

Amy Wagers

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

26

This lecture and discussion course will explore the fundamental molecular and cellular mechanisms that govern organismal aging and contemporary strategies to delay or reverse this process.

Recommended Prep:

Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b;
SCRB 10 or MCB 54.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Stem Cell & Regenerative Biol 197

Frontiers in Therapeutics (204358)

Mark Fishman

Douglas Melton

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How realistic are promises to "eliminate" diseases and to "personalize" medicine? This course looks at biological principles underlying therapeutics, ranging from those described first in Egyptian papyri to those under development today (using chemicals, proteins, cells, and genetic manipulations) and based on traditional philosophies and on science. As part of the class, students will have the opportunity to design novel approaches to diseases today without cure.

Course Notes:

Prerequisites are Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; MCB 60 or SCRB 20, or permission of the instructor

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Systems Biology 305QC

Practical Synthetic Biology (109345)

Jeffrey Way

2018 Spring (2 Credits)

Schedule: MTWRF 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 75

Synthetic biology is a new discipline that seeks to enable the predictable engineering of biological systems. According to one conception of synthetic biology, proteins and genetic regulatory elements are modular and can be combined in a predictable manner. In practice however, assembled genetic devices do not function as expected. The purpose of the course is to go beyond the textbook, first-pass description of molecular mechanisms and focus on details that are specifically relevant and useful in engineering microbial and mammalian biological systems.

"Practical Synthetic Biology" is a January course that will meet in the Harvard Medical Area (Warren Alpert Building, 5th floor seminar room) from Jan. 12-26 (excluding Martin Luther King Day) from 3-5 PM, with additional discussion sections. The course is aimed at graduate students and advanced undergraduates, and requires familiarity with transcription, translation, the genetic code, plasmid construction, gene regulation, protein structure, mutation mechanisms, and calculus. The course will present readings from the literature including recent papers in synthetic biology, relevant papers from the basic research literature, and readings on biological warfare defense that relate to the early history and motivation for synthetic biology.

The course will include 10 lectures (1.5 hours each), optional discussion sections (1 hour each), and a 30-minute quiz. Grades will be based on the quiz and class participation. There is no limit on class size.

Class Notes: COURSE MEETING DATES (3pm-5pm):

January 12 (Friday)
January 16-19 (Tues-Fri)
January 22-26 (Mon-Fri)

Class will be held in Warren Alpert 563, HMS. To register for this course, please contact the Systems Biology Department. Course website: <http://isites.harvard.edu/k100763>.

Systems Biology 320

Quantitative Measurement and Analysis (204480)

Allon Klein

2018 Spring (4 Credits)

Schedule:

WF 1030 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

The mission of the course is to impart students with a strong intuition for designing quantitative assays and performing data analysis in biology. The course will extract general principles through a set of lectures and workshops, focusing on some of the major techniques used in biology today. We will discuss the physicochemical basis of major measurement techniques in biology, and we will explore how this basis leads to particular errors, and what types of statistical pitfalls might be encountered in data analysis.

Recommended Prep: Knowledge of programming, statistics, physics and chemistry.

Systems Biology Research (121507)

George Church

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 007

Systems Biology Research (121507)

Stirling Churchman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 007

Systems Biology Research (121507)

Stirling Churchman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 008

Systems Biology Research (121507)

Philippe Cluzel

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 008

Systems Biology Research (121507)

Philippe Cluzel

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 009

Systems Biology Research (121507)

Adam Cohen

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 009

Systems Biology Research (121507)

Adam Cohen

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 010

Systems Biology Research (121507)

Vladimir Denic

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 010

Systems Biology Research (121507)

Vladimir Denic

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 011

Systems Biology Research (121507)

Angela Depace

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 011

Systems Biology Research (121507)

Angela Depace

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 012

Systems Biology Research (121507)

Michael Desai

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 012

Systems Biology Research (121507)

Michael Desai

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 013

Systems Biology Research (121507)

Francis Doyle

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 013

Systems Biology Research (121507)

Francis Doyle

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 014

Systems Biology Research (121507)

Catherine Dulac

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 014

Systems Biology Research (121507)

Catherine Dulac

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 015

Systems Biology Research (121507)

Sean Eddy

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 015

Systems Biology Research (121507)

Sean Eddy

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 016

Systems Biology Research (121507)

Walter Fontana

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 016

Systems Biology Research (121507)

Walter Fontana

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 017

Systems Biology Research (121507)

Ethan Garner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 017

Systems Biology Research (121507)

Ethan Garner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 018

Systems Biology Research (121507)

Yonatan Grad

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 018

Systems Biology Research (121507)

Yonatan Grad

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 019

Systems Biology Research (121507)

Jesse Gray

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 019

Systems Biology Research (121507)

Jesse Gray

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 020

Systems Biology Research (121507)

Jeremy Gunawardena

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 020

Systems Biology Research (121507)

Jeremy Gunawardena

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 021

Systems Biology Research (121507)

John Higgins

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 021

Systems Biology Research (121507)

John Higgins

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 022

Systems Biology Research (121507)

Curtis Huttenhower

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 022

Systems Biology Research (121507)

Curtis Huttenhower

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 023

Systems Biology Research (121507)

Marc Kirschner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 023

Systems Biology Research (121507)

Marc Kirschner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 024

Systems Biology Research (121507)

Allon Klein

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 024

Systems Biology Research (121507)

Allon Klein

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 025

Systems Biology Research (121507)

Galit Lahav

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 025

Systems Biology Research (121507)

Galit Lahav

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 026

Systems Biology Research (121507)

Erel Levine

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 026

Systems Biology Research (121507)

Erel Levine

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 027

Systems Biology Research (121507)

Richard Losick

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 027

Systems Biology Research (121507)

Richard Losick

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 028

Systems Biology Research (121507)

Debora Marks

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 028

Systems Biology Research (121507)

Debora Marks

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 029

Systems Biology Research (121507)

Sean Megason

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 029

Systems Biology Research (121507)

Sean Megason

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 030

Systems Biology Research (121507)

Timothy Mitchison

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Theater, Dance, and Media

Subject: Theater, Dance & Media

Theater, Dance & Media CAMR

Advanced Playwriting: Workshop (203500)

Sam Marks

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This workshop is a continued exploration of writing for the stage. Students will be encouraged to excavate their own voice in playwriting. They will examine and attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Ibsen and Beckett as well as contemporary dramatists such as Annie Baker, Caryl Churchill and Sam Shepard.

Course Notes:

TDM CAMR is the same course as ENGLISH CAMR. Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Theater, Dance & Media CKR

Introduction to Playwriting: Workshop (205632)

Sam Marks

2017 Fall (4 Credits)

Schedule:

M 0400 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Kenneth Lonergan, Martin McDonagh, Suzan Lori-Parks, and Sarah Ruhl as well established work from Anton Chekhov, Sarah Kane, and Harold Pinter.

Course Notes:

TDM CKR is the same course as ENGLISH CKR. Admission is based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Theater, Dance & Media 90AR

Production Studio (205023)

Deborah Foster

2017 Fall (4 Credits)

Schedule:

M 0300 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

TDM production studios frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The fall 2017 production will be The Owl Answers, by Adrienne Kennedy, directed by [David Gammons](#). The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions at designated times (TBD) to examine the entire performance process through an ethnographic lens.

- Rehearsals will begin Monday, September 11 and will run regularly Monday - Thursday 7-11 pm (tentative time); Saturdays 12-6 pm. (Not everyone will be called for all rehearsals.)
- Tech rehearsals begin Thursday, October 5, and the production is scheduled to open Thursday, October 12.
- There are 4.5 weeks of rehearsal and 2 weekends of performances (closing Saturday, October 21).

Course Notes:

TDM 90a is required of concentrators and open to other students involved in the TDM fall production (as actors or assistants to the production team). Participation is limited to students involved with the production, either as performers or as members of the production team. Performers will be cast by audition during Common Casting: <http://hrdctheater.com/common-casting/>. Students who wish to be part of the production team should contact production coordinator, Dana Knox: danaknox@fas.harvard.edu.

Class Notes:

The first class meeting for TDM 90AR will be Monday, September 11, 2017.

TDM production studios frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The spring 2018 production will be Mac Wellman's Three

Americanisms, directed by Paul Lazar. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions at designated times (TBD) to examine the entire performance process through a dramaturgical and an ethnographic lens.

Course Notes: TDM 90BR is required of concentrators and open to other students involved in the TDM spring production (as actors or assistants to the production team). Participation is limited to students involved with the production, either as performers or as members of the production team. Students who wish to be part of the production team should contact production coordinator, Dana Knox: danaknox@fas.harvard.edu.

Harvard Dance Project (160653)

Jill Johnson

2018 Spring (4 Credits)

Schedule: R 0600 PM - 0959 PM
W 0630 PM - 1030 PM
T 0500 PM - 0759 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The Harvard Dance Project cultivates invention and fosters the courage of artistry. This faculty-led, performance ensemble gives students the opportunity to be original cast members and collaborators in wide-ranging dance works created by preeminent professional choreographers. The project focuses on performance research, collaboration, choreographic composition, and links choreographic thinking to other fields. It is a studio-based course which includes performances at major venues on campus. Spring 2018: World premiere works created for HDP students by Peter Chu, Chanel DaSilva, and Shamel Pitts.

Course Notes: Formerly MUSIC 12B.

Dinner provided T/W/TH. Students will meet T/W/TH only during 2-3 week intensive creative processes with guest artists, and in April tech/performance weeks. Otherwise, 2 times a week and on T, W or TH. Specific schedule will be distributed first week of classes. Any questions contact course TF Whitney Cover: wmc142@mail.harvard.edu

Recommended Prep: Previous dance experience required.

Theater, Dance & Media: What It Is and How to Do It (160648)

Derek Miller

2018 Spring (4 Credits)

Schedule: M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

What are theater and dance? What is at stake when a performance is live or recorded? How do performers use space, time, and bodies to make meaning? What is the relationship between a performance and a script? Why do performers and audiences gravitate to live arts? How do economic and political circumstances shape live performances? This sophomore tutorial in Theater, Dance & Media provides students with an intellectual and practical foundation to the concentration by exploring these questions and more. Readings will include theoretical texts from Schechner, Phelan, and Chaudhuri, alongside scripts and other performance materials by Kennedy, Bausch, Kaprow, and Smith. Assessments emphasize how to

write about performance and how performance serves as a form of criticism.

Course Notes: Required of all, and limited to, concentrators.

Theater, Dance & Media 110

Foundations in Acting: Viewpoints (112880)

John Kuntz

2018 Spring (4 Credits)

Schedule: MW 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

An exploration of the basic techniques of acting, beginning with exercises that flex the imagination and heighten observation; the course will then move towards work on rhythm, an actor's instincts, focus, concentration, and character with an ongoing emphasis in improvisation. The play "Waiting for Godot" by Samuel Beckett will be used as a point of reference for the work. The latter part of the course will concentrate on selected scenes from that play. Especially suitable for first-year and sophomore students.

Course Notes: Enrollment determined by audition. Students will audition for the course with a short improvisation described by the professor at the first class meeting.

Advanced Acting: Contemporary Texts (122906)

Marcus Stern

2018 Spring (4 Credits)

Schedule: T 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

For actors interested in working in television, film and theater, this is a course of advanced acting techniques using contemporary dramatic texts for scene work. The emphasis is on action based acting and the creation of an acting process that can be specifically tailored to the individual actor. In addition to extensive scene work, the course includes audition techniques, choosing material for auditions, character work (making physical and vocal changes so a character can be different from your regular persona), text analysis, and how to "work from yourself " for more believable acting.

Course Notes: Enrollment determined by audition on the first day of class. Please bring in a memorized and rehearsed contemporary monologue no longer than 2 minutes to audition with on the first day.

Theater, Dance & Media 114

Foundations in Acting: Practical Aesthetics (123901)

Scott Zigler

2017 Fall (4 Credits) **Schedule:** TR 1130 AM - 1259 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Practical Aesthetics Acting Technique was developed by playwright David Mamet and actor William H. Macy, based on the work of the American acting teacher Sanford Meisner and the Russian acting teacher Konstantin Stanislavski. In this course, students will focus on rigorous text analysis combined with emphasis on enhancing the actor's spontaneity through training in Meisner's "Repetition Exercise." Students will do scene work drawn from a wide selection of plays.

Course Notes: Enrollment will be determined by lottery at the first class meeting.

Recommended Prep: Theater, Dance & Media course in Acting, previous study in Practical Aesthetics, or undergraduate performance experience.

Acting Shakespeare (119020)

Remo Airaldi

2018 Spring (4 Credits) **Schedule:** M 0300 PM - 0459 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course is an intensive study of Shakespeare's dramatic works from the point of view of the actor. It is important to remember that Shakespeare's verse dramas were written to be performed and that only when

they are approached this way - as playable, theatrical texts - that they have their maximum impact. Through text analysis, scene study, vocal work, and acting exercises we attempt to find not only the meaning, but the music and theatrical power of Shakespeare's words.

Course Notes: Enrollment will be determined by an audition during the first class meeting.

Theater, Dance & Media 116

Acting Workshop: Comedy (117460)

Scott Zigler

2017 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: 16

A course developing the actor's approach to and playing of comedy and humor. The class will focus on marrying comedy's need for technical precision with a truthful and spontaneous approach to acting based on the methodology of Konstantin Stanislavski. Specific comic skills studied will include timing, focus, choreography, and the mechanics of how a joke builds from set up to punchline. Acting skills will focus on moment to moment pursuit of objective and creation of character. Styles of comedy will include farce, drawing room/comedy of manners and contemporary comic playwriting such as David Lindsay-Abaire, Nicky Silver, Christopher Durang and Sarah Ruhl.

Course Notes: Enrollment determined by audition on the first day of class. Students are asked to prepare a 30 second comic monologue, classical or contemporary, for the audition.

What's so Funny?: Introduction to Improvisational Comedy (160654)

Remo Airaldi

2017 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Comedy has often been thought of as the poor relation to Drama but, as Lenny Bruce said, "the only honest art form is comedy because you can't fake it." We will attempt to take comedy seriously by studying its component parts and engaging in committed, creative and collaborative "play" that will tap into each student's personal, individual sense of humor. The class will focus on the basics of improvisation: group games, narrative skills, patterns, offers, spontaneity, agreement, using the space around you, building on-stage relationships and, eventually, scene work.

Acting, Theory, and Public Speech (206861)

David Levine

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

This practice-based class treats works of art criticism and theory as dramatic texts, monologues to be analyzed, learned, invested with desire, and performed. Over the course of the term, students will examine a set of key texts in 20th century art history and criticism, from Greenberg to Benjamin to Krauss. Each will select a text to learn, prepare and perform, culminating in a final, site-specific, roaming performance at Harvard Art Museums. Open to concentrators and non-concentrators, visual and performance artists, art historians, actors, and students of literature, theory, and public speaking.

Directing (123080)

Marcus Stern

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

9

A directing class for directors interested in theater, television and film, as well as for actors, dramaturgs, and designers investigating all aspects of theater. The class accommodates beginning to advanced levels of directorial work. Live video camera work for the stage will also be part of the course. Through constant scene work, the course examines the directorial tools of text analysis, staging, design, and working with actors. The central focus is on how to tell a story clearly, effectively, and how a director's personal experiences or passions can creatively shape their work. Students may bring in video or film scenes as part of the class work.

Course Notes: Enrollment determined by short interviews to be conducted on the first day of class.

Directing Lab (126812)

Shira Milikowsky

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This class is designed for students interested in expanding their understanding of directing for theater. The course will focus on the work of American experimental theater artists from the 1960's to the present, examining the various ways avant-garde directors and ensembles have experimented with form to seek out radical new modes of storytelling. Students will create work inspired by the artists and productions studied, applying theory to practice in rehearsals and presentations.

Course Notes: Previous coursework in directing is preferred. Enrollment determined by short interview on the first day of class.

Fundamentals of Improvisation and Composition: Dance (107422)

Jill Johnson

2017 Fall (4 Credits)

Schedule:

WF 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course explores the fundamental skills of improvisation and composition. Using wide-ranging music, experimentation, problem solving, and an equal curiosity about both success and failure — this course investigates the processes of analytical and intuitive decision making in the dancing body. Students will learn a series of specific physical tasks, tools, and systems taught through intensive exercises, guided improvisations and rigorous real-time composition. Physical research and written work in the course connect dance to architecture, the visual arts, mathematics, philosophy, science, theater, and literature in ways which link the mind and body to innovation. Fall 2017 will focus on site-specific research.

Course Notes:

Enrollment determined by interview during the first week of class.
Minimal dance experience required.

The Art of Scenography: 20th and 21st Century Directorial Concepts and Set Design (110319)

Julia Smeliansky

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

In this course, students will study the work of the great 20th and 21st century auteur directors and set designers. Students will explore a range of artistic movements including Constructivism, Futurism and Dada, and discuss how the theater became a place to experiment with the concepts and discoveries of these movements. Examining primary source materials in the Harvard Theatre Collection, students will research the work of artists including Gordon Craig, Richard Wagner, Leon Bakst, Pablo Picasso, Konstantin Stanislavsky and Vsevolod Meyerhold. The course will also focus on the work of such contemporary directors and designers as Robert Wilson, George Tsypin, and Robert Lepage.

Sara Brown

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores the foundational tools and concepts for set, light, and costume design. Students will be introduced to the foundational skills of scenography through a series of design projects that employ a variety of strategies for communicating designs including manual (drawing, painting, model making) and digital media (image manipulation, CAD). Students should not expect a technical survey, but rather an exploration of how visual elements shape a given performance. The Projects are based on the writings of Italo Calvino, Octavia Butler, and Sarah Ruhl. Projects will be complimented by study of theories and practices of Richard Kelly, Adolph Appia, Bertolt Brecht, and others.

Performing the Archives: American Melodrama (203537)

James Stanley

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Mining the archives of Harvard's Houghton Theater Collection, this class explores the ways in which contemporary artists interrogate and reanimate of what are often considered to be archaic theatrical genres. This fall, our focus will be 19th Century Melodrama, a popular theatrical genre that traded in stock characters, bombastic performance styles, pedantic moralizing and thrilling special effects.

Following a period of reading and discussion about melodramatic form we will conduct case studies on contemporary projects that mine this history in order to address contemporary cultural concerns. Moving from theory to practice, we will then collaboratively devise a performance project of our own based on our original archival research. This course is for writers, directors, designers and performers willing to work across disciplines.

Where Stage Meets Screen: The Merging of Living Theater and Moving Images (205034)

Johnathan Carr

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

9

Media and Projection Design has empowered theater makers to immerse their audience more deeply into story worlds, advancing the art toward that which legendary production designer Robert Edmond Jones called the "new synthesis of actuality and dream."

This production course will explore the practice, theory and history of using media in theater, and theater in media. An array of creative assignments and two class-wide projects will demonstrate essential skills of visual media production (filmmaking, graphics, etc.), live media design with projection hardware and software, as well as some aspects of lighting, scenery and sound. In addition to the technical emphasis the class will delve into design philosophy, critical script reading, theories of visual art and storytelling, and creative collaboration.

Course Notes: Course will split meeting locations between Hilles P-02 and the Northwest Labs MAC computer lab. Class will meet in Hilles P-02 during the first week of class.

Acting and Authenticity (156461)

David Levine

2017 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This studio-based seminar examines the concept of "building a character" and pushes it towards performance art. While acquiring Stanislavski- and Method-based acting techniques, students will also consider psychological realism in light of philosophical, psychological, sociological and scientific notions of authenticity and falsehood, presence, mimesis, identity, and empathy. What does it mean to turn into someone else? How total is the transformation? What are the implications for our understanding of the individual? What does "realist acting" mean in an era of AI, social media, and motion capture? The seminar involves both readings and exercises, and culminates in a final project where participants turn into each other.

Performance Activism (205032)

Daniel Friedman

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course investigates the use of performance as a creative response to local and global social problems. We will learn about the theatrical precursors to performance activism (experimental, political and educational theatre), as well as the influence of performative psychology and philosophy on its development, and look at contemporary examples from all over the world. Performance activism is an emergent phenomenon that draws from the humanities and social science, including anthropology, performance studies and performative psychology.

Performance activism embodies a fundamental shift in the way (some) people are working to bring about social change. In the modern era, the dominant modality of social change was confrontation, demonstration and protest. The assumption behind this modality is that conflicting interests can only be overcome by antagonistic struggle. Performance activism embodies a new modality that draws upon the human capacity to play, create and perform. The premise is that people—even if and when their economic, social and/or political interests are in conflict—are capable of creating new relationships, new activities and new ways of moving forward together.

The course will examine the growing movement of political and social activists, community and youth organizers, progressive and critical educators and therapists, social workers, medical doctors, organizational consultants and others around the globe who have been turning to performance as a way of engaging social problems, activating communities, and experimenting with new social and political possibilities. The instructor is in contact with scores of performance activists on every continent, some of who will be involved directly, via Skype, in live interviews and conversations with the class. Integrated throughout the course will be performatory exercises and experiments taking place both in class and out, and the students will work with the instructor to create a final performance-based activist project in the community.

Theater, Dance & Media 192

Total Theater (203544)

James Stanley

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

This class will take a space-specific and deeply collaborative approach to theater making. Our goal will be to interrogate, through readings (in history, theory and critique) and through practice (by making our own piece of theater) the contemporary drift toward immersive theatrical forms. Starting with Wagner's articulation of *gesamkunstwerk* – as theater as the Total Work of Art – and Adorno's blistering critique of it, we will trace thinking on immersive art and cultural forms and responses to them throughout the modern and postmodern periods. Concurrent with our readings, we will discuss contemporary immersive works, including Jim Findlay's *Dream of the Red Chamber*, Michael Counts' escape room *Paradiso*, and Punch Drunk's immersive juggernaut *Sleep No More*.

Meanwhile, employing all of the theatrical tools at our disposal (light, sound, space, song, movement, dance, language) we will come together as a company to create a site specific immersive theater piece of our own. This is a class for performers, directors, designers, dancers, choreographers and media artists who are game to participate across disciplines. Our class will culminate in a public performance of the piece we create.

Theater, Dance & Media 193

Choreographing Theatre (205033)

Paul Lazar

2018 Spring (4 Credits)

Schedule:

R 0100 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

This course explores the syntheses of choreographic and directorial practices in theater making. It is a hands on investigation -- via directing, acting and dance assignments -- of the myriad ways that heightened movement draws out aspects of texts, which cannot be approached via Realism or Naturalism. (No prior dance training required). The content to be explored will include texts by John Cage, Gertrude Stein, Anton Chekhov, Tristan Tzara as well as "found material" derived from literature, documentary film, critical writing and daily conversation. The emphasis of the course will be on practice but there will be a research component as well.

The research component will entail a detailed investigation of the avant-garde theatre movement in post World War II America. The course will combine theory and practice, as students will experience the interplay of historical research and contemporary practice.

This course will be taught by TDM Visiting Lecturer [Paul Lazar](#).

The Making of a Musical: The Creative Process (205365)

*Ryan McKittrick**Diane Paulus*

2017 Fall (4 Credits)

Schedule:

W 1200 PM - 0159 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

This course introduces students to the collaborative process of creating a new musical by analyzing the real time development of two world premiere musicals ([Jagged Little Pill](#) and *American Music*) at the American Repertory Theater. In addition to these case studies, the course will examine other existing American musicals including *West Side Story*, *Assassins*, *Pippin* and [Waitress](#). Through readings by historians, theorists and practitioners and visits from artists and professionals across the field, students will learn about the key components of a musical including: book and adaptation; music and lyrics; choreography; and visual design. There will also be a class devoted to the art of producing and the business of musical theater.

Over the course of the semester, students will develop a vision and "pitch" for their own musical project.

As a final assignment, the class will collaborate on creative presentations drawn from the proposed musical projects.

As part of this course, students will attend a workshop rehearsal of *Jagged Little Pill* in New York City and see the A.R.T. production of *Waitress* on Broadway.

Drawing 1: Anyone Can Learn to Draw (203312)

Katarina Burin

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

A studio course to build the skills of drawing incrementally and expand students' visual vocabulary. Drawings will be made from life, photographs and invention. Emphasis will be placed on enhancing our observational sensibilities through life drawing and the figure, focusing on all aspects of technical development, particularly the importance of line. The aim of this course is to expand drawing skills with intention and purpose.

Course Notes: This class is for beginners or anyone furthering their skill level.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Enrollment Cap:

12

The pursuit of and response to the horizontal in art will be the focus of this studio class. To cite a few examples, abstract expressionist painting, cartography, earthworks, landscape photography, 19th century German Romantic landscape painting, and Rayograms will provide models of the horizontal that will be points of departure for studio projects, the forms of which will be determined by what the investigation provides. Students will shift medium from project to project.

Course Notes: No previous studio experience necessary.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

On Objects: A Studio Course in Sculpture, Video and Performance (205410)

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This introductory course will investigate the contemporary status of the object through studio projects in sculpture, video and performance. Students will make things, make moving images that represent these things and make language and movement around these things in an exploration of medium, materiality and artistic persona. Work by artists such as Hollis Frampton, David Hammons, Hito Steyerl, Richard Tuttle, Lee Lozano and Mark Leckey will help introduce and guide our projects.

Course Notes: Interested students must attend first meeting of class during shopping week to talk with teaching staff about enrollment procedure.

First year students and students who have not taken any VES courses are encouraged to apply.

Class Notes: The first meeting of this course on Thursday, August 31 will take place on the 2nd floor sculpture studio of the Carpenter Center.

The Art of Film (115688)

Laura Frahm

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introductory course that focuses on the language of film and moving image media. It will provide the students with the analytical tools to respond both critically and creatively to moving image media, with an emphasis on close formal analysis. In the interest of exploring the vast possibilities of the moving image, we will watch a broad selection of narrative and non-narrative works from around the globe alongside canonical feature films.

Course Notes: No background in film history or theory necessary. Required for all undergraduates concentrating in Film and Visual Studies. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Class Notes: This course has a mandatory weekly film screening on Tuesdays from 7-10 pm, and a weekly section to be arranged.

Class Notes: **SHOPPING WEEK NOTE:** This class will meet on Tuesday, January 23 at 10AM. The introductory lecture will be repeated on Thursday, January 25.

The Devil, Probably x 8 + 1: A Studio-based Seminar (108844)

Stephen Prina

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Part 1 is a weekly studio session during which participants will create 3 projects in any medium or discipline during the term. Part 2 is a screening of the film "The Devil, Probably," 1977 by Robert Bresson for 10 consecutive weeks, interrupted by the 3 project class presentations. Different readings will accompany each screening. The final screening--1--is "The Third Generation," 1979 by Rainer Werner Fassbinder.

Course Notes:

The studio projects do not need to pertain to the Bresson/Fassbinder screenings.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Recommended Prep:

There are no prerequisites for the class. First year participants are encouraged to apply.

Drawing 2: Expanded Visual Thinking (203313)

Katarina Burin

2018 Spring (4 Credits)

Schedule:

TR 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Drawing from life, image and imagination, this studio art course will focus on the medium of drawing and its many potentials. Drawing will be considered as installation, process and contemporary practice. Conceptual, technical and artistic visual skills will be explored and developed. Students will create a comprehensive body of work investigating personal interests based on ideas and concepts covered in class following each topic and assignment.

Course Notes:

This course is open to anyone who has some experience with creative visual work.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Principles and Plasticity: Intermediate Painting Course (203413)

Kianja Strobert

2017 Fall (4 Credits)

Schedule:

M 0130 PM - 0429 PM

M 0900 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

This studio course explores abstraction through the principles of two-dimensional design, from the Gestalt theories of perception to the teachings of Hans Hofmann and additional artists working within this tradition. Employing discussion, text, film, music and in-class lab assignments, we will attempt a 360-degree examination of the visual and philosophical foundations of expressionist mark making. The in-class lab emphasizes the role of composition, form and color in abstraction.

Course Notes:

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes:

FIRST MEETING NOTE for Shopping Week Fall 2017:

First meeting is Weds., Aug 30 at 9:30am-10:30am, and there will be a second session from 12:30pm-1:30pm on the same day.

This course meets from for 6 hours on Mondays from 9am to 12pm, and then resumes at 1:30pm to 4:30pm.

Recommended Prep:

At least one VES studio course or permission of instructor.

Invented Mediums: Painting Course (205210)

Kenneth Okiishi

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0359 PM

M 0600 PM - 0859 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Existing materials and modes of working sometimes feel inadequate, rehearsing and remaking the same subjectivities and forms. The artwork produces the artist as much as the other way around. This course takes this crisis of being as an opportunity for experimentation. The painting studio classroom will be inhabited in zones of parallel activities that array, find affinities and antagonisms, chunk, realign, re-fracture--activating the dynamics for inventing new mediums. Exercises in form and technique will be generated as needed.

Course Notes: Interested students must attend first meeting of class to speak with teaching staff about enrollment procedures.

Class Notes: This course meets for 6 hours on Mondays: from 1pm to 4pm and then from 6pm to 9pm.

Recommended Prep: Prerequisite: At least one VES studio course or the permission of the instructor.

Making Mischief: Using Photography to Upset Expectations (205346)

Sharon Harper

2017 Fall (4 Credits)

Schedule:

MW 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This class uses photography to explore our expectations of the medium and to expand its possible applications. Students develop an independent work practice that is an extension of their own interests. Students will develop ideas for a project proposal at the outset of the semester and build a group of related photographs throughout the semester. The class will be organized around class discussions, critiques and individual meetings with the instructor. Slide presentations and readings will be given to deepen your understanding of the history of photography and contemporary art practices.

Course Notes:

Interested students must attend first meeting of class to speak with

teaching staff about enrollment procedures.

Recommended Prep: At least one previous photography course in VES or the permission of the instructor.

Where the Wild Things Are: Intermediate Photography Course (205211)

Richard Renaldi

2018 Spring (4 Credits)

Schedule:

T 0900 AM - 1159 AM

M 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Students will develop a cohesive, long-term photographic project originating from their own experience. They will be challenged to approach difficult themes, interior emotional content, or imbalances they perceive in the world around them. Subjects may include, but are not limited to, significant events, upheaval, or desire. The course will address the uses of allegory and metaphor in image-making, as well as the mechanics of editing, sequencing, and essay-writing in support of a body of work that conveys an original point of view.

Course Notes:

Interested students must attend first meeting of class to speak with teaching staff about enrollment procedures.

Class Notes:

First meeting is Monday January 22; there will be no meeting on Tuesday, January 23.

Recommended Prep:

Pre-req: VES Introduction to Still Photography course or the permission of the instructor.

Kinochemical Reactions: Studio Course (113516)

Guy Maddin

2018 Spring (4 Credits) **Schedule:** TR 0100 PM - 0359 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course is essentially the continuation of 150A. Students will re-write, produce, and direct the scripts that were developed during the fall term. Emphasis will be given to directing actors, spatial reconnaissance of shooting locations, production design, sound design, and re-making/re-mapping through editing. Completed films (edited, mixed, color graded) are required by the end of the term. Collaboration between students, and crew rotation is a must. Occasional in-class workshops by film professionals and artists.

Course Notes: Students seeking to enroll should come to the first class meeting with a developed short narrative screenplay.

Recommended Prep: VES 150A or two courses in video production, one of which must be VES 60x or VES 59.

The Essay Film (205136)

Alfred Guzzetti

2018 Spring (4 Credits)

Schedule: F 0100 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

The essay film is a loosely defined, wide-ranging genre of nonfiction. Students in the course will divide their time between studying and making works in this genre. We will see and discuss well known works, such as *Man with the Movie Camera* and *Sans Soleil*, as well as a variety of lesser known films, including those that test the limits of the genre. The practical assignments will center on using digital video to explore the possibilities of creating an essay using the motion picture medium.

Course Notes: Interested students must attend first meeting of class to speak with teaching staff about enrollment procedures.

Class Notes: NOTE: SPECIAL FIRST MEETING: The first meeting of VES 152x will be Friday, Jan 26 from 10-11am in Sever B10.

Recommended Prep: Prerequisite: one VES course in video or film production.

Documentary Fictions (205241)

Joana Pimenta

2017 Fall (4 Credits) **Schedule:** TR 0100 PM - 0359 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

In this film production course, students will make short films that explore the fluid boundaries between documentary and fiction. We will discuss the generative possibilities of the real in the production of fiction works, and fictional strategies for working in documentary film. Assignments will encompass video and

sound recording and editing, cinematography and montage. Class time will include technical workshops, film screenings, discussions of student work and occasional visiting filmmakers.

Course Notes: Interested students must attend first meeting of class to speak with teaching staff about enrollment procedures.

Recommended Prep: At least one previous VES film/video course and/or experience in film/video and sound recording and editing is recommended, but not required.

Vertical Cinema (205411)

Karthik Pandian

2018 Spring (4 Credits) **Schedule:** TR 0100 PM - 0359 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The ever-increasing flexibility of video presentation technology creates the opportunity to reconsider cinema's most deeply rooted conventions. In this course, students will create vertical videos. Drawing on a history of artists who have investigated aspect ratio, portraiture and the creation of new contexts for moving image, we will pursue a phenomenology of format through the creation of 9:16 work. The course

will culminate in the erection of a temporary cinema house dedicated to vertical videos.

Course Notes: Interested students must attend the first meeting of the class during shopping week to speak with teaching staff about enrollment procedure.

Class Notes: The first meeting of this class on Tuesday, January 23 will be in the 2nd floor sculpture studio of the Carpenter Center.

Recommended Prep: At least one previous VES film production or studio course, or permission of the instructor.

Film Theory, Visual Thinking (114647)

Giuliana Bruno

2018 Spring (4 Credits)

Schedule: R 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

How do moving images transform the way we think? Introduction to film theory aimed at interpreting the visual world, and developing skills to analyze films and media images. Survey of classical and contemporary film theory goes from turn-of-the-century scientific motion studies to the virtual movements of today. Considers theories of space, time, and motion, including Eisenstein's theory of montage and architecture. Treats visual technology and sensate space, the cultural history of the cinematic apparatus, the body and physical existence, affect and gender, and screen theory. Different theoretical positions guide us in understanding and reading films.

Course Notes:

Offered jointly with the Graduate School of Design as HIS 4132. This course has an additional weekly film screening, Wednesday, 7 pm-9pm in the Carpenter Center Lecture Hall.

Film Experiments and Artistic Practices from the 1920s to the Present (205312)

Philippe-Alain Michaud

2018 Spring (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

This course is an overview of the procedures invented by the artists-filmmakers from the *avant garde* of the 1920s to the expanded cinema of the 1960s up to the present :

- to deconstruct the cinematographic apparatus and reconsider the film in its materiality
- to transform a high-tech medium into an object hand-made
- to break with the authoritarian model of the screen projection as experienced in the movie theaters.

Course Notes: This course has weekly screenings on Fridays from 1pm to 3pm.

Graduate Seminar in Curricular Development: What is Media? (205203)

Laura Frahm

2017 Fall (4 Credits)

Schedule: M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

A graduate seminar in curriculum development that explores the theoretical and historical underpinnings of media studies with an emphasis on media in art and visual culture. Graduate students will be collaborators in proposing and composing course syllabi for a new introductory lecture course "Introduction to Media Theory" to be offered within VES in the coming years. This course will be constructed around novel media-based assignments, and curricular preparation will include research and resource development on media-based scholarship.

Class Notes: FIRST MEETING NOTE FOR FALL 2017: The first meeting is Weds, Aug. 30 at 2pm in Sever 411.

Critical Printing (205183)

Matt Saunders

Jennifer L. Roberts

2018 Spring (4 Credits)

Schedule: T 1000 AM - 1259 PM
R 1100 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Incorporating both studio and seminar instruction, this intensive course will explore printmaking's history, trace its particular forms of intelligence, and test its future potential. The class will meet for three hours of studio and two hours of seminar/discussion per week. Assignments will include weekly readings, a short scholarly paper, and two studio projects. For the first half of the semester, students will pursue a rigorous grounding in a particular historical technique (etching/intaglio); in the second half students will translate what they have learned to another medium, thus exploring printmaking as an expanded field of practice.

Course Notes: The course is designed for graduate students and advanced undergraduates in any related department.

Interested students must attend the first meeting of the class during shopping week.

Class Notes: This class will meet for the first time on Thursday, January 25 at 11am

in Harvard Art Museum Study Room 4550; there is no meeting on Tuesday, January 23.

The Work of Art in the Age of Its Remediation (205313)

Philippe-Alain Michaud

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Since the dawn of the 21st century, we are witnessing a massive migration of images in motion from screening rooms to exhibition spaces, a migration borne along by the digital revolution. This makes it possible, or even necessary, to redefine the cinema beyond the conditions which governed it in the 20th century, that is to say, over and above the restricted spectrum of its history, from a viewpoint expanded to encompass a general history of representations.

New Media Theory (110046)

Laura Frahm

2017 Fall (4 Credits)

Schedule:

W 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

A graduate course that surveys new developments in media theory and provides an overview of advanced approaches to the study of media. We will look at different schools and streams of thought that productively expand and transform the established corpus of media theory, ranging from cultural technologies, media archaeology, and object studies to non-representational theory, actor network theory, and process philosophy. Two research projects will further advance our critical survey of new media theory.

Course Notes:

This course has mandatory weekly screenings on Tuesdays from 12pm to 2pm.

Class Notes:

FIRST MEETING NOTE FOR FALL 2017: The first meeting will be Tuesday, Sept. 5 from 12pm to 1pm in Sever 416.

Visual & Environmental Studies 261 Section: 1

Ecocritique and Popular Cinema (205289)

Sean Cubitt

2017 Fall (4 Credits)

Schedule:

F 1100 AM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

Taking a broad view of the terms 'cinema' and 'popular', this course proposes methods for ecocritical research, implications of those methods, and hypotheses derivable from them. It develops advanced tools for criticism based on the principle that textual encounters are a privileged instrument of humanities research revealing unique constellations of ecocide, debt, digitisation and obligation. It seeks expression of environmental responsibility in blockbusters and animations amid the challenges of anthropocentrism, melancholia and socio-technical change.

Class Notes:

There will be mandatory weekly film screenings for this class on Thursdays from 10am-12pm in the Carpenter Center Lecture Hall beginning on Thursday, September 14, 2017.

Materiality, Visual Culture, and Media (203315)

Giuliana Bruno

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What is the place of materiality in our visual age of rapidly changing materials and media? How is it fashioned in the arts, architecture and media? This seminar investigates a "material turn" in philosophy, art, media, visual and spatial culture. Topics include: actor-network theory, thing theory, the life of objects, the archive, the haptic and the affect, vibrant materialism, elemental philosophy, light and projection, and the immateriality of atmosphere.

Course Notes: Interested students must attend the first meeting of the class during shopping week.

This course is jointly offered at the Graduate School of Design as HIS 4451; GSD students should enroll in the course via the GSD.

Class Notes: This course has occasional weekly film screenings on Tuesdays from 7pm to 9pm in Carpenter Center B04.

"Who Run the World?" Feminism in the Age of Empire (123545)

Durba Mitra

2017 Fall (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This course explores the intimate relationship between colonialism, racism, and feminism from the eighteenth century until today. We will study the emergence of feminism across British imperial spaces, including America and Britain, India, and Sub-saharan Africa. The central problematic of the course is the concept of liberation. We will critically engage how the idea of "liberation" organizes global feminist thought: liberation from what, by whom, and to what end? Readings and assignments focus on primary historical sources that explore colonial power, racial difference, religious emancipation, and social and sexual revolution.

Feminist and Queer Theories of Difference (142819)

Durba Mitra

2018 Spring (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This course explores the idea of difference in feminist and queer theory. What ways of life, types of bodies, social practices, and cultural norms are produced as *different* in the modern world? How do these ideas of difference produce systems of inclusion and exclusion? How do theorists utilize ideas of sex, gender, and sexuality to understand these hierarchies of difference? In this course, we will study feminist and queer

perspectives on structures of difference that organize our contemporary world — race and racism, gender norms, sexuality and queerness, colonialism, religion, as well as nationalism and state exclusion. Each theoretical text will be paired with primary material to animate the many ways in which people enact difference in modern societies.

Course Notes: This course fulfills the theory requirement for the undergraduate concentration in Studies of Women, Gender, and Sexuality.

Psychology of the Gendered Body (205489)

Nicole Noll

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Our perceptions of gender—our own and others'—powerfully shapes our embodied experiences and behaviors. This course examines the embodiment of gender via the lens of psychological science. We will begin by exploring recent research related to gender and the body, and then study the underlying psychological mechanisms that influence our self-perceptions about gender. Our disciplinary foundation in psychological science will allow us to complicate current understandings of gender and embodiment by considering factors such as sex, race, sexuality, experience, intention, and awareness.

Makeover Nation: Gender, Body, and Self in the US (159786)

Karen Flood

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Reinventing the self is a long-standing American tradition, but over the past century the focus of making over the self has increasingly been on the body. Reality TV shows, magazines, and personal testimonials celebrate the power of transforming the self through one's appearance. This course investigates the historical roots and contemporary manifestations of the makeover phenomenon with a focus on the race, class, and gender politics of bodily modifications. At the same time that we will be considering the cultural power of the "after" bodies in the before-and-after motif, we will be examining the meaning behind bodies that are considered "outlaw" in American culture—fat bodies, aging bodies, and bodies that subvert gender norms.

Keridwen Luis

2017 Fall (4 Credits)

Schedule:

TR 1200 PM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course examines the gendered experiences of those who identify as "fans" through the lens of anthropology, sociology, and gender studies. We will examine a wide variety of fandoms and ask questions such as, how does fandom shape gender expression? How does gender shape fandom? How are class, race, and cultural background implicated in fan expressions? How do fans create community? Who is welcomed and who is excluded from fan communities? We will examine particular fandoms, including online fandoms, sports fandoms, and sci-fi/fantasy fandoms, among others, and read works by sociologists, anthropologists, and the fans themselves.

Phyllis Thompson

2018 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

What does it mean to "do" feminism, or to "be" a feminist in the 21st-century United States? What can we make of the dominant social expectations for a woman's life? This course explores contemporary ideals of feminine success, including their physical, familial, professional, and political manifestations. We will engage with highly-contested topics—including sexual violence and Title 9; work-life balance; the imperatives of self-care and presentation; and new models for sexuality, reproduction, family, motherhood, and domestic life—using the tools of theory and cultural studies to interrogate their framing within popular discourse. Throughout, we will critique ideological formations of gender, particularly as bounded by race, class, and sexuality.

A Voice of One's Own: Creative Writing in Women, Gender, and Sexuality (108569)

Linda Schlossberg

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

How does one balance the demands of "politics" with the subtleties of "artistry?" In this course, we'll write and analyze short stories, paying close attention to key writing concepts such as characterization, voice, point of view, dialogue, and setting, while also investigating thematic issues related to women, gender, and sexuality studies. In addition, we'll read secondary readings by authors such as Audre Lorde, Dorothy Allison, and Adrienne Rich that illuminate the ways in which issues of power, agency, and voice have emerged as key themes in feminist writing. Frequent writing assignments, including written evaluations of peers' stories.

Men to Boys: Masculinities in Postwar Hollywood Film (109610)

Michael Bronski

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This survey course examines the changing images of masculinity in Hollywood films from 1950 to the present. We will use the films, critical readings, feminist theory, film theory and primary source materials to chart the enormous changes in how postwar culture conceptualized "manhood" and "masculinity." Beginning with post-World War II films such as "The Men," and then covering Vietnam films and sports films such as "Rocky" and "Raging Bull" we will end with popular comedies celebrating male immaturity of Judd Apatow. We will be analyzing the films in the economic, political, sociological, and psychological context in which they were made and to which they were responding.

Can We Talk? Jewish Women and Humor (205197)

Michael Bronski

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will examine the traditions of humor in Jewish women's writing and performance. We will be looking at questions such as: What is Jewish humor? What is feminist humor? How have Jewish women influenced American popular culture? What is the relationship between Jewish male humor and Jewish female humor? How do cultural stereotypes function? What is the role of anger in humor – especially women's humor? We will examine how Jewish humor, and specifically, Jewish women's humor, is the basis for much of what we call "American humor" today.

We will be reading, listening to, and watching a wide range of materials. Readings will include performance theory, humor theory, sociology of American popular culture, Jewish American history, the sociology of immigration and gender roles, essays on Jewish humor, feminist humor, as well as writings by Dorothy Parker, Gertrude Berg, Grace Paley, Bel Kaufman, Roseanne Barr, Fran Lebowitz among others. Films and television shows screened will range from classics of the Yiddish cinema such as "Yidl mitn Fiddl" (with Molly Picon) to early 20th century films such as "Be Yourself" (with Fanny Brice) to contemporary film such as "Outrageous Fortune," "Jesus is Magic," and television shows from the 1950s "The Goldbergs, to "The Nanny." We will also be listening to a variety of women standup comics such as Joan Rivers, Tottie Fields, Betty Walker, Belle Barth, Pearl Williams, Rita Rudner, and Sarah Silverman.

Women, Gender & Sexuality 1267

Transforming Scientific Knowledge: Science and Feminism (205291)

Heather Shattuck-Heidorn

2018 Spring (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

How have feminism and gender theory influenced the practice of science? What are feminist methodologies, and how do they shape research agendas in fields such as genetics, human biology, biotechnology, and medicine? How do ethical questions intersect with the research process, including questions of who conducts research and who participates? We will explore how working scientists use gender analysis to shape research choices, frame hypotheses, and re-imagine the structure of scientific inquiry. Assignments will allow students to explore areas of interest in depth, with the final project including an option to design and outline their own research project.

Gender, Violence, and Power (205297)

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This seminar will explore understandings of gender-based violence through the lenses of feminist and trauma theory. Topics include intimate partner violence, sexual assault, child abuse, workplace harassment, Title IX, and street harassment. We will examine the evolution across time of cultural and medico-legal understandings of the problem, important developments in policy, medicine, and law in the last 40 years, and how violence looks outside of the male-female binary through which it is often understood.

Women, Gender & Sexuality 1275

Disability and Sexuality (205057)

Aubry Threlkeld

2017 Fall (4 Credits)

Schedule: T 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course will examine the complex disconnections and intersections between studies of race, gender, sexuality and disability. Why are disabled people so often represented in the popular media as sexless, innocent, and childlike? Why are the few portrayals we do see of disabled people in relationships heterosexual, white, and cis-gendered?. Topics include: shifting definitions of disability and mental illness in relation to sexuality; fetish and desire; vulnerability and violence; the role of technology as cure; neurodiversity; disability art; the media's role in shaping cultural perceptions of disabled people's desires and pleasures; Mad pride and LGBT pride; queer and crip theory; politics and liberation.

Hysterical Women: A History (205341)

Anouska Bhattacharyya

2017 Fall (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

What does it mean when contemporary media sources characterize celebrity figures, or frenzied consumers, as 'hysterical'? How are "hysteria" and "insanity" related, and what are the historical roots of these loaded concepts? This seminar addresses the complex history of hysteria by asking how this medicalized affliction has assumed a multiplicity of forms, especially on feminized and non-white bodies. As depicted through newspapers, multimedia sources, medical literature, sociological articles, and psychoanalytic texts, 'hysteria' affords a unique lens onto the social, cultural and medical history of mental and physical suffering. In a postcolonial world, the term has taken on even more complexity. As we

compose a 'history of hysteria,' we will reflect on who gets to record history and whose narratives get left out.

Exploring Race, Gender, and Sexuality in Historical Art and Visual Culture (205198)

Charmaine Nelson

2017 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This issue-driven course introduces students to historical art and visual culture of various styles, genres, and media and the pressing political, social, and cultural debates which inform Art History. Eschewing assumed universal consensus, students will engage with the intersection of national, racial, gender, sexual, and cultural identity and create a more inclusive narrative by examining the possibilities and limits of sex, gender, and racial identities for artistic production, representation, and exhibition. Decentering dominant US centric histories of art, we will use Canadian art as a case study, paying special attention to the experiences and production of Canadian women artists and the representation of female subjects in Canadian art. We will work to uncover legacies of cultural and racial diversity which are often suppressed by Eurocentric, romanticized narratives of British and French nation-building, and which obscure the artistic contributions of Indigenous peoples, women, and people of color.

Feminist Theory: The Body As Archive (205058)

Durba Mitra

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The body is a site for producing difference, desire, and history: it is a foundational archive for feminist theory. This course examines key theoretical texts in feminist and queer theory through the concept of the body. We will study how bodies, sexualities, and desires have come to be archived, and how ideas of the body have shaped feminist and queer theories, trans studies, and dis/ability studies. Through the concept of the body, we will explore theories that link gender and sexuality to racial, religious, and class difference.

Course Notes:

This course is primarily for graduate students and fulfills the theory requirement for the graduate secondary field in WGS.

Women, Gender & Sexuality 1490

A Comparative Analysis of Sex, Gender, and Racial Identities in the Transatlantic World (205199)

Charmaine Nelson

2018 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course acknowledges the centuries-long presence of Africans in North America and centers the comparative study of slavery through an analysis of the ways that identity politics (sex, gender, and racial) facilitated the creation of hierarchies while rationalizing the expropriation of millions of enslaved Africans, the violent confiscation of land, and the enfranchisement and indigenization of white settlers. Although drawing upon scholarship from a variety of disciplines, this course centers an examination of the under-explored role of art and visual culture ("high," "low," and popular) within the histories of Transatlantic Slavery and the Black Diaspora. Of particular importance is an analysis of the roles, experiences, and artistic representation of enslaved females and female slave owners. The course will examine various types, styles, genres, and media of art produced in the context of transatlantic slavery across several European empires, paying particular attention to the case of Canada. Although Canada obviously has a deep and complex colonial history, it has "gone missing" from the international dialogue and scholarship which critically examines and challenges these legacies. This course poses the critical question: How did Canada write itself out of the histories of the Black Diaspora and the Transatlantic Slavery of which is was so centrally a part? The machinery of denial is vast and results in the prolific shuttling of Canada's colonial baggage onto other nations (mainly the USA) while generating mythologies of a racially-tolerant, multicultural society.
