Sustainable Development (109934)

William Clark

2017 Fall (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Explores contemporary understandings and practical implications of the idea of sustainable development. Investigates the meanings and measures that different groups have given to "sustainable development;" scientific understanding of the complex social-environmental systems we seek to develop sustainably; and lessons on how societies have avoided the "tragedy of the commons" while instituting practical action that advances sustainable development effectively and equitably. Employs case studies in development to meet needs for energy, food, water and health.

Our interactions with the natural world are increasingly mediated through changes in technology. Technologies create risks, generate solutions, reshape the environment, and alter our perception of the boundaries between nature and artifice. This course draws on major theories of technology and society to inform and deepen our understanding of environmental problems and policy options.

Course Notes: Offered in alternate years. This course, when taken for a letter grade, meets the General Education requirement for United States in the World.

Planetary Health: Understanding the Human Health Impacts of Accelerating Environmental Change (203664)

Samuel Myers

Christopher Golden

2018 Spring (4 Credits)

Schedule:

W 0300 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Rapid human population growth and even more rapid growth in consumption are driving a transformation of most of Earth's natural systems including its climate system, its oceans, land cover, biogeochemical cycles, biodiversity, and coastal and fresh water systems. These systems underpin global food production, our exposure to infectious disease and natural hazards, even the habitability of the places where we live. We will explore the global human health impacts of this transformation of natural systems.

Course Notes:

Enrollment in this course will be limited, and students interested in enrolling are requested to submit a statement describing their interest and/or experience in planetary health related topics. Statements should be sent to the instructors: golden@hsph.harvard.edu and smyers@hsph.harvard.edu.

Conservation Biology (119814)

Aaron Hartmann

2018 Spring (4 Credits)

Schedule:

W 0245 PM - 0515 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The major goal of conservation biology is to preserve and recover populations and ecosystems through evidence-based assessment, analysis, and management. This course will integrate ecological and evolutionary theory into resource management, economics, sociology, and political science to explore conservation strategies, the value of ecosystem services, and the challenge of decision-making under conflicting interests. Case studies will include major contemporary issues such as the preservation of foundational taxa (e.g., corals on tropical reefs, trees in rainforests), management of genetic diversity, defining recovery targets, and ecosystem-based management. A local field trip within New England will be arranged.

The Technology, Economics, and Public Policy of Renewable Energy (127572)

George Baker

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

50

Energy is the lifeblood of economic activity, and there is little prospect of this changing. However, the planet's stores of easily accessed fossil fuels are limited, and the climatological cost of continuing to rely on fossil fuels is high. This course examines the long run and short run prospects for renewable energy. We start by understanding the technology of hydro, solar, wind, and biomass. We then examine the economics of these technologies, and how subsidies and taxes affect their viability. Special attention will be paid to the interaction of technology, economics, and public policy.

Course Notes: This course will be offered in a seminar format with an enrollment limit of 50.

Recommended Prep: Economics 10a.

This seminar examines the world's systems for the production and distribution of food as they relate to the earth's physical, chemical, and biological systems. Using scientific readings, papers about economics and politics, and cases about firms, we consider agriculture and food from scientific, public policy, and business strategy perspectives and in relation to environmental issues such as greenhouse gas emissions, carbon and nitrogen cycles, water and soil conservation (including erosion, pollution, and salinization), and the use of genetically modified organisms. Geographic and topical coverage will be broad: the Americas, Europe, Asia, and Africa; as well as water, seeds, fertilizers, animal protein, trade and development. We expect to have numerous guests from the scientific community, government, and business. Some background in biology, government or economics is useful, but not required.

Ethnicity, Migration, Rights 121

Native Americans in the 21st Century: Nation Building II (160752)

Dennis Norman

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This field-based research course focuses on some of the major issues Native American Indian tribes and nations face as the 21st century begins. It provides in-depth, hands-on exposure to native development issues, including: sovereignty, economic development, constitutional reform, leadership, health and social welfare, land and water rights, culture and language, religious freedom, and education. In particular, the course emphasizes problem definition, client relationships, and designing and completing a research project. The course is devoted primarily to preparation and presentation of a comprehensive research paper based on a field investigation. In addition to interdisciplinary faculty presentations on topics such as field research methods and problem definition, students will make presentations on their work in progress and findings. Recommended course: PED-501M. Enrollment limited to 24 students. Permission of instructor required. Must contact instructor prior to enrolling by email, dennis_norman@harvard.edu. Jointly offered at Harvard Kennedy School as DEV 502 and Harvard Graduate School of Education as A102.

Course Notes: The course requires instructor consent.

Class Notes: Contact dennis_norman@harvard.edu by email with information about the current program that you are enrolled in, year of expected graduation, and why you are interested in this course. Professor Norman grants final approval for enrollment. The class will be held at 14 Story Street, Conference Room 4th floor.

Ethnicity, Migration, Rights 127

Cultural Explanations for Ethnic and Racial Inequality in Education (203918)

Janine de Novais

2018 Spring (4 Credits)

Schedule:

R 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Scholars, educators, and journalists often use culture to explain differences in academic achievement by race--sometimes insightfully and other times more clumsily. However, the evidence for cultural explanations is thin and difficult to assess. Cultural explanations for low achievement have sometimes been criticized as blaming children for their own low achievement, and for offering little to practitioners and policymakers on ways to reduce educational inequality. On the other hand, cultural explanations for high achievement frequently assume a model minority myth. This course addresses how and when culture can lead to ethnic and racial inequality in education, in order to facilitate a better understanding of how to reduce educational inequality. We will analyze differences between and within ethnic and racial groups. In addition to ethnic and racial cultures, the course addresses school culture, youth culture, popular culture, and cultural identities. Discussing solutions for reducing inequality will be an important component of this course. The course will be run as a seminar.

Class Notes: This course is jointly offered in the Graduate School of Education as EDU A133. The class will be held at Larsen G01 (HGSE). The course will be run as a seminar. Permission of instructor required. Enrollment limited to 25.

Education in Armed Conflict (205500)

Sarah Dryden Peterson

2017 Fall (4 Credits)

Schedule:

W 1000 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course examines the multidimensional and multidirectional relationships between armed conflict and education. How can education contribute to the work of building "lasting peace" in settings of armed conflict globally? How does education reflect inequalities and reinforce social tensions? How does it

contribute to stability and reconciliation? What role does it play in shaping individual and collective imaginings of a post-conflict future? Through critical reading of theoretical texts and case studies, engagement with guest speakers, simulations, and other learning tools, we will adopt an action-oriented approach to investigation of these and other questions. We will look beyond the provision of schooling to the learning and teaching that takes place in schools and community settings, and examine the relationships that are at the core of these educational interactions. Central to discussions will be connections between public policy, daily experiences, and social justice. The course includes a semester-long project through which students will deepen their research, writing, and policy analysis skills, and explore the intellectual and practical dimensions of connecting research, policy, and practice.

Open to all students with an interest in settings of armed conflict or comparative education generally.

Course Notes: Required, weekly, one-hour section.

Offered jointly with HGSE as EDU A816. Harvard College students can enroll with instructor consent.

Phuong Pham

Jennifer Leaning

2017 Fall (2.5 Credits)

Schedule:

M 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

2

The course will provide an introduction to frameworks and constructs that form the foundation for understanding and engaging in humanitarian and human rights research and action. The course will also examine emerging critical challenges to Humanitarian Response and Human Rights Protection that have multi-dimensional global impacts. These issues include armed conflict, social oppression, climate change, famine, migration, ethnic and other forms of discrimination, and gender-based violence. The major options of protection and support, including early warning and prevention and mitigation strategies, will be analyzed through case studies and discussion of current research findings, through the various lenses of the norms, actors and processes of international humanitarian and human rights law, operations and policy.

Class Notes: This course is offered jointly at the Harvard T.H. Chan School of Public Health as GHP 262. Harvard College students can enroll with instructor consent.

Expository Writing 10 Section: 108

Introduction to Expository Writing (118262)

Jonah Johnson

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Department**Enrollment Cap:**

10

A rigorous, intensive elective that helps students prepare for the demands of college writing. In small classes, students work closely with instructors on developing and organizing ideas, analyzing sources, and drafting and revising clear, engaging essays. Students meet frequently in individual conferences with instructors to discuss their work, and the class also emphasizes collaborative work among students. Assignments are based on sources from a range of disciplines and genres.

Topic: Expos Studio 10: Introduction

Course Notes: After taking Expos Studio 10, a student must pass Expository Writing 20 or Expos Studio 20 to meet the College's Expository Writing requirement.

Class Notes: In order to enroll in Expos Studio 10, you must have had an Expos Studio 10 advising session at the Writing Program.

Expository Writing 20 Section: 201

Expository Writing 20 (116353)

Jerusha Achterberg

2018 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Department Enrollment Cap: 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Paradox in Public Health

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What happens when public health efforts to improve the wellbeing of a population undermine the wellbeing of individuals in that population? Can this outcome be avoided? Public health is characterized by the implications of this fundamental paradox: the health needs of a population are often at odds with the health needs of the very individuals who comprise that population. How does this larger paradox play out across various public health campaigns? In this class, we will use scientific articles to consider potential paradoxes in public health, both historical and contemporary. In Unit 1, we will wrestle with issues of current vaccination requirements, and consider the intersection of personal choice versus societal responsibility using current MMR (measles, mumps and rubella) vaccines. In Unit 2, students will debate the nature of public health motivation and practice—who decides what existing public health needs are? Two case studies will guide this discussion: goiter—a successfully eliminated (but now reemerging!) disease of micronutrient deficiency—and ongoing tobacco-control efforts. In Unit 3, students will conduct their own research on a controversial modern public health issue of their choice, and consider how the larger tension between the individual and the population is manifested in the student's particular selected public health controversy.

Topic: Wizards and Wild Things

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Once upon a time, there was no Harry Potter. Once upon a time, there was no such thing as children's literature. When and if children learned to read, they read what grown-ups read. How then did writing for children as we now know it come of age? Why does the genre have such an enduring hold on our cultural imagination, even as it continues to provoke sharp debate over its greater purpose and value? Are classic children's books like *The Wizard of Oz*, *The Wind in the*

Willows, and *The Cat in the Hat* instructive or subversive, didactic or liberating? In this course we'll examine selections from three centuries of popular prose and verse written expressly for and about children as we investigate how this eclectic canon reflects evolving ideas about childhood, changing views about educating and enchanting young readers, and persistent disputes over what and how children should learn from books. In Unit 1 we'll survey landmark works in English for children from the Puritan through the Victorian eras, including *The New England Primer*, *Grimms' Tales*, and *Alice in Wonderland*, as we consider what these texts tell us about the origin and evolution of the genre. In Unit 2 we'll examine works by touchstone authors for younger readers including Mark Twain, Louisa May Alcott, Rudyard Kipling, E. B. White, C. S. Lewis, Maurice Sendak, and others, drawing on the critical perspectives of thinkers such as John Locke, Bruno Bettelheim, Alison Lurie, and Marina Warner to assess arguments about the essential function of imaginative literature from infancy through adolescence. In the final unit, students will conduct their own research to place a major children's author of their choice in a relevant cultural and historical context.

Topic: Religious Pluralism

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and behavior. And despite predictions to the contrary, levels of devout religious belief remain high, evidenced by recent controversies over a proposed Islamic community center in Lower Manhattan, as well as Supreme Court rulings on female access to contraception and same-sex marriage. How do people—including nonbelievers—experience

this religious multiplicity? How are these vast religious differences negotiated socially, culturally, politically, and legally? Moving beyond theology, this course will explore the broad concept of lived religion in the United States. Through readings in fiction, law, history, and sociology, we'll tackle these fundamental issues. In Unit One, we'll read Ayad Akhtar's 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars' arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

Topic: Religious Pluralism

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and behavior. And despite predictions to the contrary, levels of devout religious belief remain high, evidenced by recent controversies over a proposed Islamic community center in Lower Manhattan, as well as Supreme Court rulings on female access to contraception and same-sex marriage. How do people—including nonbelievers—experience this religious multiplicity? How are these vast religious differences negotiated socially, culturally, politically, and legally? Moving beyond theology, this course will explore the broad concept of lived religion in the United States. Through readings in fiction, law, history, and

sociology, we'll tackle these fundamental issues. In Unit One, we'll read Ayad Akhtar's 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars' arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

Expository Writing 20 Section: 205

Expository Writing 20 (116353)

Jacob Betz

2017 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Wastelands

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The impenetrable wilderness of *The Revenant*, the diseased streets of *Children of Men*, the trash heap cities of *Wall-E*—these are the wastelands that fascinate our pop culture. On the screen, they come to life as horrifying alternate universes and dead civilizations—the very fates we must avoid at all costs. And yet wastelands are not exclusively the stuff of science fiction. In this course, we will grapple with both imaginary and actual wastelands. We will begin with short stories by Jack London, Thomas King, and Octavia Butler. From the icy wilds of the Yukon to the borderlands of Native American exile, these writers question the way wastelands have been imagined, especially in North America, over the past century. Next, we will turn to real wastelands—to the garbage dumps and arid landscapes where nothing grows. We will ask what these places reveal about their inhabitants, their struggles, and their achievements. Finally, students will research a wasteland of their own choosing—anything from the

mega slums of Mumbai to the sprawl of Boston's unused rooftops. Along the way, we will investigate how wastelands form and evolve, and how people adapt to them. Are wastelands actually the places we should avoid at all costs, or are they the places we can no longer afford to ignore?

Topic: Respectable Ladies, Rebellious

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Modern Americans typically view the idea of being "ladylike"—a notion of womanhood as bound up in respectability—as something restrictive, even demeaning. For a woman to be "ladylike," after all, often means she is relegated to a corner where she will not be assertive and empowered. But for centuries, women fought and died to be allowed that reputation. While modern feminism fights against restrictive stereotypes, why did some women fight to keep them? How can we snap out of our modern frameworks and try to fully understand the past? This course will examine the curious history of "respectable" womanhood focusing on three moments in American history. We will begin with women who lost their lives when their neighbors began to question whether they really were "women" at all – the Salem witches. Using close reading skills we will sift through historical documents to understand just how the people of Salem were willing to decide some of their own daughters were not really human after all. A field trip to Salem on February 3rd will give us a chance to try to understand what the 17th century felt like, and why women might have had different priorities then. Next we will move forward two centuries to read the fascinating memoir of anti-lynching crusader Ida B Wells, a woman whose entire career depended on navigating the line between respectability and defiance. We will learn about race and womanhood in the late 19th century to understand why in order to be a reformer, Wells had to be a lady first. Finally, we will take on a research project on iconic 20th-century figures from Civil Rights lawyer Pauli Murray to poet Barbara Deming, women who found themselves caught between being ladies and being leaders. Throughout we will examine how racial and sexual stereotypes posed not only challenges but also unexpected opportunities for rebels and reformers. What power does being a lady hold, and what boundaries does it create? What does it mean, both yesterday and today, to be not just female, but a woman?

Topic: Inventing the Wild West

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: A bow-legged cowboy, a man in a black hat, a quick gunfight, and frontier justice: we all think we know what the Wild West was. But what was the American West actually like, and how did we get these ideas? The cowboy has occupied a central place in the American imagination for three centuries, but the truth of the West has often been at odds with its written history. Chinese massacres, Indian boarding schools, and struggling homesteaders were as much a part of the historical West as horses and cattle. We will begin the course by lifting the veil of myth about the West: we will read first-hand accounts of the 19th century West from the people who lived there, focusing on those who are often left out of Wild West stories. With a better grasp of the historical West, we will try to untangle the roots of the American fascination with cowboy stories. At the turn of the 20th century, Americans built a powerful mythology around Western life. Looking to 19th century ideas of manhood, race and urban living, we will ask why the Wild West was invented, and for whom? Who read and spread stories of the cowboy? Finally, we will investigate the cowboy's legacy by analyzing Western films. Cowboy myths cast a long shadow over the 20th and 21st centuries, but their interpretation has changed over time. By watching classic and modern Westerns, we will explore why Americans, when looking for answer to difficult questions, still go West.

Topic: Respectable Ladies, Rebellious

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Modern Americans typically view the idea of being "ladylike"—a notion of womanhood as bound up in respectability—as something restrictive, even demeaning. For a woman to be "ladylike," after all, often means she is relegated to a corner where she will not be assertive and empowered. But for centuries, women fought and died to be allowed that reputation. Being a "respectable" woman meant being fully human – and fully protected—and then over time that identity became a shackle to break free of. This course will examine the curious history of "respectable" womanhood to see what happened to those women who battled to be valued, sometimes for the most fundamental human status, and sometimes for the right to cross the bounds of propriety. What were the real risks of walking the line of respectable and unladylike and the dangers of stepping outside the lines? While modern feminism fights against restrictive stereotypes, why did some women fight to keep them? This course consists of three units, each focusing on a different moment in American history. We will begin with women who lost their lives when their neighbors began to question whether they really were "women" at all – the Salem witches. Using close reading skills we will sift through historical documents to understand just how the people of Salem were willing to decide some of their own daughters were not really human after all. Next we will move forward two centuries to read the fascinating memoir of anti-lynching crusader Ida B Wells, a woman who once travelled for two days to protect her reputation against slander. We will learn about race and womanhood in the late 19th century to understand why in order to be a reformer, Wells had to be a lady first. Finally, we will take on a research project on iconic 20th-century figures from Civil Rights lawyer Pauli Murray to Hillary Clinton, women who found themselves caught between being ladies and being leaders. Topic: The Art of Shock

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: From Michelangelo's fleshly angels on the ceiling of the Sistine Chapel through to Andres Serrano's *Piss Christ* (1987), art has never shied away from representing difficult subject matter – or from courting controversy. In the twentieth century, some critics even argued that art is *only* effective when it jolts us out of our customary ways of relating to the world, or when it makes explicit the structures of violence and oppression that operate invisibly. This course will begin by exploring works of art and literature by Michelangelo, Edouard Manet, and Charles Baudelaire that were considered transgressive in their time but which have since been incorporated into the canon of art history. Is an artwork deemed shocking because of its own intrinsic qualities, or because of the norms and values of its viewing culture? How did these creations and their controversies shape or redirect the course of art history? In our second unit, we will study some contemporary artists who understand "shock" to be an integral part of their aesthetic projects. In looking at Damien Hirst's pickled animal installations, or Tracey Emin's own stained mattress set in the middle of the Tate Gallery, or Kara Walker's provocative 75-foot-long sphinx made out of sugar, why do these artists want their audience to feel such alarm and unease? We will consider these artworks alongside readings by feminist critics, philosophers, and art theorists who defend art even at its most outrageous extremes. Can shock motivate moral or ethical reasoning? Is shock a particularly political feeling? And why are images or representations of the body so central to this genre of art? The third unit will investigate how institutions – like museums, the media, and even universities like Harvard – play a role in either canonizing transgressive art or else fanning the flames of public

outrage. Students will have the opportunity to visit the Harvard Art Museum as they work on their final, individual research papers.

MW 1000 AM - 1059 AM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Art of Shock

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: From Michelangelo's fleshly angels on the ceiling of the Sistine Chapel through to Andres Serrano's *Piss Christ* (1987), art has never shied away from representing difficult subject matter – or from courting controversy. In the twentieth century, some critics even argued that art is *only* effective when it jolts us out of our customary ways of relating to the world, or when it makes explicit the structures of violence and oppression that operate invisibly. This course will begin by exploring works of art and literature by Michelangelo, Edouard Manet, and Charles Baudelaire that were considered transgressive in their time but which have since been incorporated into the canon of art history. Is an artwork deemed shocking because of its own intrinsic qualities, or because of the norms and values of its viewing culture? How did these creations and their controversies shape or redirect the course of art history? In our second unit, we will study some contemporary artists who understand "shock" to be an integral part of their aesthetic projects. In looking at Damien Hirst's pickled animal installations, or Tracey Emin's own stained mattress set in the middle of the Tate Gallery, or Kara Walker's provocative 75-foot-long sphinx made out of

sugar, why do these artists want their audience to feel such alarm and unease? We will consider these artworks alongside readings by feminist critics, philosophers, and art theorists who defend art even at its most outrageous extremes. Can shock motivate moral or ethical reasoning? Is shock a particularly political feeling? And why are images or representations of the body so central to this genre of art? The third unit will investigate how institutions – like museums, the media, and even universities like Harvard – play a role in either canonizing transgressive art or else fanning the flames of public outrage. Students will have the opportunity to visit the Harvard Art Museum as they work on their final, individual research papers.

Topic:

Who's Got The Power?

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Our news feeds today present a panorama of struggles over power, from elections and peaceful protests to riots, revolutions, and civil wars. In each case, those who hold power cling to it at all costs, while those who feel oppressed or excluded fight to attain some power of their own. In most societies, power is concentrated in the hands of a select few, and even in the world's democracies, many citizens continue to feel powerless—the playthings of some distant and shadowy elite, or of grand political and economic forces beyond their control. In this course, we will consider some of the fundamental questions regarding the nature of power: Does power always have to be "power-over," with one group dominating the rest? Or is it possible for groups of people to generate "power-with," empowering themselves to act in pursuit of shared goals? Is power ultimately synonymous with violence, or wealth, or political authority? Is it possible to exercise power over culture and ideas in addition to people

and resources? As the course progresses, we will converse with the dissident writers who confronted the totalitarian regimes of the 20th century, examine the student-led movements that toppled dictatorships in the 21st, and consider what these episodes can teach us about the techniques of domination and resistance in democratic societies like our own. To that end, we'll conclude the course by testing our theories of power against some recent and acclaimed documentaries, from films like Jehane Noujaim's *The Square* and Laura Poitras' *Citizenfour*, which give us front row seats to history-making acts of revolution and civil disobedience, to polemical works like Ava DuVernay's *13th* and Craig Ferguson's *Inside Job*, which aim to expose the workings of power in relation to racial and economic inequality.

Topic: Eating Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresciewicz, in an opinion piece for the *New York Times*, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring

contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresciewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call "foodways"—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, "food is good to think," as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food "disgusting" or "natural." How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, *Top Chef*, *Iron Chef*, and *The Great British Bake Off*. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

Topic: Social Worlds of Friendship at

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: *Note: This Expos course requires participation in several activities scheduled outside of normal class hours.*

Social science research has traditionally suggested that we tend to seek out friends who are similar to ourselves. But is this always true? What factors inspire people to venture outside of their comfort zones through friendship – especially at Harvard? In collaboration with the Learning Lab at Harvard's Bok Center for Teaching and Learning, this course explores the formation of social networks on our campus and investigates how meanings of identity and difference are constructed through the experience of friendship. In Unit 1, we examine Emerson's renowned essay, "Friendship" (1841), working with his handwritten manuscripts at the Houghton Library to search for clues that illuminate Emerson's often paradoxical thinking about the significance of friendship. We then carry forward the complexities of relationships that Emerson reveals into an interview-based research project that explores friendship and social life at Harvard. In Unit 2 we will read Harvard's important Report of the College Working Group on Diversity and Inclusion (2015) as well as theories of "social capital" (the networks and support systems that promote health and happiness) as we analyze the delicate interplay between the processes of how people "bridge" across boundaries of their identities, and how they "bond" within particular friendship groups. We will also explore how meanings of difference and belonging play out across specific contexts of the College (e.g., Annenberg, blocking, extracurriculars, and student organizations). In small teams, students will design individual research projects through proposals that involve both writing and on-camera speaking at the Bok Center's Learning Lab. In the third unit, students will carry out their individual research in close connection with their teams. Towards the end of the semester, we will publicly share our research findings through a class capstone project. For this class, students should be interested in working on visual presentations as well as written papers. This course is hands-on and heavily collaborative, modeling that which it studies – namely, a spirit of engagement, dialogue, and community.

Topic: The Psychology of Success and

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Who gets ahead in America? Why do some succeed while others fail? Given knowledge of someone's background or personal characteristics, can we predict if she will become successful? How do we account for the influence of various complex factors, including personality, family, and community? In this course, we will examine questions of success, failure, achievement, and identity viewed through the lens of current theories in psychology. We will begin by examining individual-level, person-centered theories of success with readings on grit, the growth mindset, and multipotentiality. Next, we will read Malcolm Gladwell's *Outliers: The Story of Success* alongside a longitudinal, ethnographic study of 12 American children and a seminal treatise on the role of race in the American classroom. As part of our broader inquiry into the environmental factors that impact success, we will explore how race, class, and familial wealth and resources affect children's lived experiences of childhood and, later, their chances of successfully getting into college. In the final unit of the course, students will answer the question, "What does it take to be successful at Harvard?" Students will select their own pop-science book on a self-help topic like willpower, motivation, happiness, or creativity, research the relevant academic literature, and create a written proposal with an accompanying short presentation to disseminate their findings. Throughout the course, we will use psychological theory to motivate questions and answers about human behavior in a society where the demand for success can be tantalizingly high and the fear of failure devastatingly relentless.

Topic: Humans, Nature, and the Enviro

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: "to imagine that which we know." How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson's *Silent Spring* (1962), and James Lovelock's *The Revenge of Gaia* (2006). Through shocking critiques that draw upon the power of the imagination, both writers, in different ways, have tried to inform the public of the harm being done to nature in the hope that this harm can be averted. And in the final unit we will examine the techniques of documentary movies about

relationships between humans and animals – Werner Herzog's *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

2018 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Eating Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresciewicz, in an opinion piece for the *New York Times*, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresciewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call "foodways"—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, "food is good to think," as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food "disgusting" or "natural." How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful

cooking shows produced in different countries, for instance, *Top Chef*, *Iron Chef*, and *The Great British Bake Off*. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

Topic: Humans, Nature, and the Enviro

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: "to imagine

that which we know." How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. Topic: The Psychology of Success and

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Who gets ahead in America? Why do some succeed while others fail? Given knowledge of someone's background or personal characteristics, can we predict if she will become successful? How do

we account for the influence of various complex factors, including personality, family, and community? In this course, we will examine questions of success, failure, achievement, and identity viewed through the lens of current theories in psychology. We will begin by examining individual-level, person-centered theories of success with readings on grit, the growth mindset, and multipotentiality. Next, we will read Malcolm Gladwell's *Outliers: The Story of Success* alongside a longitudinal, ethnographic study of 12 American children and a seminal treatise on the role of race in the American classroom. As part of our broader inquiry into the environmental factors that impact success, we will explore how race, class, and familial wealth and resources affect children's lived experiences of childhood and, later, their chances of successfully getting into college. In the final unit of the course, students will answer the question, "What does it take to be successful at Harvard?" Students will select their own pop-science book on a self-help topic like willpower, motivation, happiness, or creativity, research the relevant academic literature, and create a written proposal with an accompanying short presentation to disseminate their findings. Throughout the course, we will use psychological theory to motivate questions and answers about human behavior in a society where the demand for success can be tantalizingly high and the fear of failure devastatingly relentless.

Topic: Documenting Lives

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In a long-forgotten short story published in 1958, an unloved businessman takes up photography as a hobby only to find himself obsessed by the nature of the medium. He comes to believe that the camera alone can capture and preserve the reality of things and

people. "In order to really live," he tells his friends, "you must photograph as much as you can, but to photograph as much as you can you must either live in the most photographable way possible, or else consider photographic every moment of your life." The story writer was inspired by a new fad in the postwar decades: middle-class amateurs taking candid snapshots of everyday life on portable cameras. More than a half-century later, in an age of Instagram and Snapchat, our networked devices go everywhere our bodies go, and we are accustomed to taking and sharing pictures of ourselves and others throughout the day. But what does it mean to document our lives and those of others through photographs? What kind of truth or reality can photographs reveal about ourselves and the world in which we live? And what about our ethical obligations? Do we have a moral responsibility as producers and viewers of photographs? Finally, given the rise of Photoshop and the digital image, how can we even trust what we see?

We will pursue these questions through three case studies, beginning with controversy over Sally Mann's family photographs, which set off a firestorm of criticism when they were exhibited in 1992. Through a close reading of Mann's memoir, we will try to understand how and why her photographs tested the boundary between private life and public art. In the second unit, we will turn from photography-as-art to the rise of photojournalism, and in particular, to a ground-breaking series of photo-essays from *Life* magazine on racial segregation in the South. In our final unit, we will grapple with the problem of proof and deception in the digital age by exploring the critical response to the JPEG files shared among soldiers inside the Abu Ghraib prison at the height of the Iraq war.

Topic: Faking It to Make It

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Between 2002 and 2005, serial impostor Esther Reed took classes in the Harvard Extension School and participated in the university's debate team under the name Natalie Bowman. She later posed as an honors student at Columbia University. A similar deception took place at Princeton in the early 1990s when Alexi Indris-Santana, track team and Ivy Club member, was revealed to be a 31-year-old impostor named James Hogue. Reed's and Hogue's ability to pass as students at prestigious universities raises questions about the relationship between lying, success, and cultural standards. How do lies inform the ways we think about ourselves? What is the appeal of living one's life as a masquerade or performance? In a world where technology increasingly blurs the lines between life and fiction, is deception ever justified? This course examines the ways deception impacts our lives and shapes our sense of self at a time when notions of what is real and what is fake are increasingly being called into question. We begin by analyzing the role of rumors and storytelling in *The Great Gatsby*, where F. Scott Fitzgerald reshapes our understanding of the confidence man by turning him into a cultural icon. Then, we examine the ethics and morality of deception by testing Friedrich Nietzsche's and Sigmund Freud's notions of truth against films such as *Chicago*, *Quiz Show*, and *The Prestige*. In our final unit, students will have the opportunity to research an instance of imposture in contemporary culture or fiction and make an argument that interprets and assesses its significance. Sample topics include hoaxes such as Orson Welles' *The War of the Worlds* broadcast, the creation of fake online identities for "catfishing" the unsuspecting, and race, class, and gender passing.

Expository Writing 20 Section: 224

Expository Writing 20 (116353)

Ariane Mary Liazos

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Class, Race, and Space in Bost

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: This course explores the interplay between the physical spaces of American cities and the class and racial identities of urban residents. We ask how spaces, from sidewalks to public housing to university campuses, shape residents' images of themselves and their neighbors. Course readings and assignments emphasize the contested nature of political decision-making processes, focusing on debates among politicians, courts, university officials, and neighborhood groups. We begin by examining a pioneering work in the field of urban studies: Jane Jacobs's *The Death and Life of Great American Cities* (1961). Jacobs vehemently critiqued programs for urban renewal and instead celebrated the vitality of social spaces found in older urban neighborhoods such as Boston's North End and New York's Greenwich Village. In the second unit, we compare academic and popular discussions of the role of the government in promoting residential segregation, examining portions of Richard Rothstein's bestselling *The Color of Law: A Forgotten History of How Our Government Segregated America* (2017). We consider style and the use of evidence in different forms of non-fiction writing as we explore this controversial topic. We build on the skills developed in the first two units in a final research paper that considers Harvard's own history of class, race, and space. Students first explore scholarship regarding "town-gown" relations more generally and then conduct original research regarding a key episode in Harvard's interactions with neighboring residents in Boston or Cambridge.

Topic: Documenting Lives

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In a long-forgotten short story published in 1958, an unloved businessman takes up photography as a hobby only to find himself obsessed by the nature of the medium. He comes to believe that the camera alone can capture and preserve the reality of things and people. "In order to really live," he tells his friends, "you must photograph as much as you can, but to photograph as much as you can you must either live in the most photographable way possible, or else consider photographic every moment of your life." The story writer was inspired by a new fad in the postwar decades: middle-class amateurs taking candid snapshots of everyday life on portable cameras. More than a half-century later, in an age of Instagram and Snapchat, our networked devices go everywhere our bodies go, and we are accustomed to taking and sharing pictures of ourselves and others throughout the day. But what does it mean to document our lives and those of others through photographs? What kind of truth or reality can photographs reveal about ourselves and the world in which we live? And what about our ethical obligations? Do we have a moral responsibility as producers and viewers of photographs? Finally, given the rise of Photoshop and the digital image, how can we even trust what we see?

We will pursue these questions through three case studies, beginning with controversy over Sally Mann's family photographs, which set off a firestorm of criticism when they were exhibited in 1992. Through a close reading of Mann's memoir, we will try to understand how and why her photographs tested the boundary between private life and public art. In the second unit, we will turn from photography-as-art to the rise of photojournalism, and in particular, to a ground-breaking series of photo-essays from *Life* magazine on racial segregation in the South. In our final unit, we will grapple with the problem of proof and deception in the digital age by exploring the critical response to the JPEG files shared among soldiers inside the Abu Ghraib prison at the height of the Iraq war.

Topic: Society and the Witch

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we analyze the film *Harry Potter and the Chamber of Secrets* and the television sitcom *Bewitched*, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on *Purity and Danger* and Pierre Bourdieu's critique of *Masculine Domination*. These theories help us examine, for example, how fictional representations of witches speak to political struggles over class and gender. For the research paper, each student chooses an example of witchcraft on which to conduct independent research. Sample topics include fairy tales, the Salem witch trials, neo-paganism, and the Broadway musical *Wicked*. What will unite our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Faking It to Make It**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Between 2002 and 2005, serial impostor Esther Reed took classes in the Harvard Extension School and participated in the university's debate team under the name Natalie Bowman. She later posed as an honors student at Columbia University. A similar deception took place at Princeton in the early 1990s when Alexi Indris-Santana, track team and Ivy Club member, was revealed to be a 31-year-old impostor named James Hogue. Reed's and Hogue's ability to pass as students at prestigious universities raises questions about the relationship between lying, success, and cultural standards. How do lies inform the ways we think about ourselves? What is the appeal of living one's life as a masquerade or performance? In a world where technology increasingly blurs the lines between life and fiction, is deception ever justified? This course examines the ways deception impacts our lives and shapes our sense of self at a time when notions of what is real and what is fake are increasingly being called into question. We begin by analyzing the role of rumors and storytelling in *The Great Gatsby*, where F. Scott Fitzgerald reshapes our understanding of the confidence man by turning him into a cultural icon. Then, we examine the ethics and morality of deception by testing Friedrich Nietzsche's and Sigmund Freud's notions of truth against films such as *Chicago*, *Quiz Show*, and *The Prestige*. In our final unit, students will have the opportunity to research an instance of imposture in contemporary culture or fiction and make an argument that interprets and assesses its significance. Sample topics include hoaxes such as Orson Welles' *The War of the Worlds* broadcast, the creation of fake online identities for "catfishing" the unsuspecting, and race, class, and gender passing.

Topic: The Femme Fatale

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The femme fatale--the attractive, seductive woman who brings about the downfall of any man she encounters—has fascinated us through the ages, from Biblical figures like Eve, Delilah, and Salome and Ancient Egypt's Cleopatra to Catwoman, or even Nicki Minaj's media persona. In most stories, the femme fatale's dangerous actions empower her, but she ultimately must also submit to the idea that her empowerment renders her a villain. How does this contradiction in the femme fatale's character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real gender problems that modern women and men face? This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we'll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain's noir novella *Double Indemnity*. In our second unit, we'll move to a fictional account of a more powerful femme fatale published in the 1970's post-feminist movement, and examine Stephen King's novel *Carrie* alongside the updated film adaptation, Brian de Palma's eponymous cult classic. Finally, in our third unit, students will research a modern day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of what makes some modern women seem so dangerous.

Topic: Human Rights as History

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The U.N.'s Universal Declaration of Human Rights has thirty articles, among them the more familiar — "life, liberty, and security of person" — and the less familiar — the right to a family, to cultural life, to rest and leisure. We often presume that human rights need no justification or explanation. But what are human rights? Are they really universal? We begin our course by looking at the "strange triumph of human rights" in the aftermath of the violence of the Second World War. After analyzing the development of this idea over time, we'll think about how human rights are (or are not) protected. We'll draw on *A Problem from Hell*, the Pulitzer Prize-winning book by former U.S. Ambassador to the U.N. Samantha Power, who argues that powerful countries have a moral responsibility to prevent genocide. Power addresses examples such as the Rwandan genocide (where the U.S. failed to intervene) and the Balkan Wars (where NATO did intervene). But other experts say that intervention just makes suffering worse. How do we understand this debate in a historical context? In the final unit, we will dig into several ongoing and highly contested issues in human rights, like the "right to be forgotten," which would force Google to erase certain unwelcome search results; the race-, religion-, and gender-infused debate over whether Muslim women should be allowed to wear headscarves in public spaces in France; Ta-Nehisi Coates's argument in *The Atlantic* for reparations to the descendants of black American slaves; the growing debates over transgender rights and restroom access; the role of the Nuremberg legacy in the success (or failure) of trying war crimes today; and even Harvard's own complicated relationship to slavery in the United States.

Topic: Segregation and Boston Schools

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: *Note: This Expos course requires participation in several activities scheduled outside of normal class hours. Please see the meeting details following the course description.*

Over sixty years after the Supreme Court ruled that "separate but equal" schools are unconstitutional, segregation is on the rise. Today, despite widespread evidence that integrated education increases student learning and reduces prejudice, American public schools are increasingly divided by class and race. In this course, we investigate attempts to achieve educational equality in Boston, focusing on the decision to use busing to desegregate the public schools in the 1970s and the wave of violent opposition that followed. Throughout the semester, we undertake "engaged scholarship," combining academic learning and community engagement by collaborating with Bostonians directly affected by these historical events—we partner with history teachers and students at a neighborhood high school in the Boston Public Schools (BPS) system—and by focusing on communication with diverse audiences through writing, speaking, and visual presentation.

To ground our understanding of the complex issues we will wrestle with, we begin with a journalist's Pulitzer Prize-winning account of school integration in the 1970s, contrasting the perspectives of black and white families. We next examine historical debates on the causes of the "antibusing" movement and pedagogical debates about how to teach controversial and contested historical topics. For the final project, we have the opportunity to further investigate these topics and other current challenges around educational equity facing BPS. In thoughtful collaboration with our community partners and through research, we design lesson plans for a high school course on desegregation and prepare arguments for why the various plans might be effective. We not only delve into the remarkable written and visual materials in Harvard's libraries but also conduct conversations with teachers and students at Brighton High. The class culminates in a "Civics Fair" (held at Harvard's Education Portal serving residents of the Allston and Brighton neighborhoods) in which students present their lesson plans and engage with our partners at Brighton High and other community members.

Required Additional Meeting Times (tentative dates)

The "Engaged Scholarship" components of this course include three required meetings outside class time (tentative dates that will be finalized before classes begin):

--Panel discussion held on Harvard's campus with a teacher from the Snowden School and a representative from Facing History and Ourselves (March 6 from 7-8:30 p.m.)

--Visit to Snowden (select ONE of the following three options: April 5 7-9:15 a.m.; April 6 10 a.m.–12:15 p.m.; OR April 6 11:30 a.m.-1:45 p.m.);
 --The "Civics Fair" on May 1 or 2 from 10:30 a.m.-1:30 p.m.

The "Engaged Scholarship" components of this course include three required meetings outside class time (tentative dates that will be finalized before classes begin):

- Panel discussion held on Harvard's campus with a teacher from the Snowden School and a representative from Facing History and Ourselves (March 6 from 7-8:30 p.m.)
- Visit to Snowden (select ONE of the following three options: April 5 7-9:15 a.m.; April 6 10 a.m.–12:15 p.m.; OR April 6 11:30 a.m.-1:45 p.m.);
- The "Civics Fair" on May 1 or 2 from 10:30 a.m.-1:30 p.m.

Expository Writing 20 Section: 231

Expository Writing 20 (116353)

Margaret Rennix

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Breaking the Rules

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Everyone lives by rules, no matter how free they may feel. Some of

these rules are written; others are unspoken. While we typically associate political rights with what it means to be "free," the seemingly small social conventions of everyday life can limit our real or perceived liberties in powerful ways, too. The codes of conduct we follow when, for example, we use social media, when we go on dates, or when we work for a company all have the capacity to rein us in, and if we knowingly or unknowingly violate those norms, our freedom may be at the price of our membership in a community. This course will use literature and film to interrogate the relationship between social rules and individual freedom while considering the following questions: What does it really mean to be "free"? How does social obligation impact our access to personal freedom? Are we even aware of the ways that society controls our behavior, or are rules of social conduct largely invisible? As we seek the answers to these questions, we'll start Unit 1 by performing close analysis of several short stories from both American and international authors—including Willa Cather, Flannery O'Connor and National Book Award winner Ha Jin—and discuss how they negotiate the relationship between individual desire and social expectation. In Unit 2, we'll turn to films like *Mean Girls*, *The Social Network*, and *The Graduate* as we read theories of individual and collective freedom, questioning how the socially constrained environments of high school and college impact individuals' behavior and choices. Finally, we will conclude with a culminating research paper in which students will choose from novels, movies, or television series like *Mad Men* and *Downton Abbey*, in order to deconstruct the social pressures that impinge on us today. We will ask why these texts—produced in the last few years and yet rooted in historically constrained societies—have become popular ways of thinking through contemporary social predicaments.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed

evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Society and the Witch

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we analyze the film *Harry Potter and the Chamber of Secrets* and the television sitcom *Bewitched*, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on *Purity and Danger* and Pierre Bourdieu's critique of *Masculine Domination*. These theories help us examine, for example, how fictional representations of witches speak to political struggles over class and gender. For the research paper, each student chooses an example of witchcraft on which to conduct independent research. Sample topics include fairy tales, the Salem witch trials, neo-paganism, and the Broadway musical *Wicked*. What will unite our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

Topic:

God and Government

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

The separation of church and state is often considered to be a cornerstone of modern democracy, but this idea has nevertheless been a difficult concept to put into practice. Must the state completely

avoid any entanglement with religious groups, or merely act in a non-preferential manner toward them? How does a state determine whether a given belief or practice is religious (and thus deserving of legal protection) or simply ethical or cultural in nature? Is the ideal of a neutral political secularism even possible or desirable? And what should we think of the many global actors, from Latin America to the Middle East to Sub-Saharan Africa, who reject this ideal entirely? This course will consider the many questions and challenges raised by religious diversity for the modern state. We begin in the first unit by considering two influential early accounts of the proper relationship of governments to religiously diverse populations, James Madison's *Memorial and Remonstrance* and Jean-Jacques Rousseau's *On Civil Religion*. In the second unit, we will consider several judicial decisions from the U.S. Supreme Court and the European Court of Human Rights, which highlight the contentious legal landscape over the concept of "religious freedom." Our final unit turns to the international stage to examine several case studies from Brazil, Palestine, Nigeria, and India, to see how religious diversity is shaping contemporary global conflict.

All sections emphasize revision.

Topic: The Femme Fatale

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The femme fatale--the attractive, seductive woman who brings about the downfall of any man she encounters--has fascinated us through the ages, from Biblical figures like Eve, Delilah, and Salome and Ancient Egypt's Cleopatra to Catwoman, or even Nicki Minaj's media persona. In most stories, the femme fatale's dangerous actions empower her, but she ultimately must also submit to the idea that her empowerment renders her a villain. How does this contradiction in the

femme fatale's character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real gender problems that modern women and men face? This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we'll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain's noir novella *Double Indemnity*. In our second unit, we'll move to a fictional account of a more powerful femme fatale published in the 1970's post-feminist movement, and examine Stephen King's novel *Carrie* alongside the updated film adaptation, Brian de Palma's eponymous cult classic. Finally, in our third unit, students will research a modern day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of what makes some modern women seem so dangerous.

Topic: Journey to Mars

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Evoking President Kennedy's famous speech to put a man on the moon by the end of the 1960s, on October 11, 2016, President Obama called for the United States to launch humans to Mars by 2030 and to one day settle there. The quest to achieve this goal has dominated recent headlines from NASA's landing of the Curiosity Rover to Hollywood's renewed fascination with the red planet. Mars has become the next great frontier in human conquest and exploration. Why Mars? What is at stake in our efforts to reach Mars? What does it say about life here on Earth? Over the semester, we will look at a range of scholarly literature on Mars as well as films, science fiction, and virtual reality simulations to examine some possible futures in which humans have colonized outer space and become a multi-planetary species. Our

launch will be a close analysis of the film *The Martian* to discover key themes and topics in media representations of Mars. We will next chart a path through Ray Bradbury's *The Martian Chronicles* to explore connections between science, technology, and art in our imagination of human life and the experience of difference on Mars. The course will conclude with a broader inquiry of Mars as the next frontier of human entrepreneurship that critically engages with the science and ethics of proposed future Mars missions (Mars One, SpaceX, UAE's Mars 2117, among others). Students will write a final research paper on a topic of their choice that builds on course readings, activities, and discussion.

Topic: Human Rights as History

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The U.N.'s Universal Declaration of Human Rights has thirty articles, among them the more familiar — "life, liberty, and security of person" — and the less familiar — the right to a family, to cultural life, to rest and leisure. We often presume that human rights need no justification or explanation. But what are human rights? Are they really universal? We begin our course by looking at the "strange triumph of human rights" in the aftermath of the violence of the Second World War. After analyzing the development of this idea over time, we'll think about how human rights are (or are not) protected. We'll draw on *A Problem from Hell*, the Pulitzer Prize-winning book by former U.S. Ambassador to the U.N. Samantha Power, who argues that powerful countries have a moral responsibility to prevent genocide. Power addresses examples such as the Rwandan genocide (where the U.S. failed to intervene) and the Balkan Wars (where NATO did intervene). But other experts say that intervention just makes suffering worse. How do we understand this debate in a historical context? In the final unit, we will dig into several ongoing and highly contested issues in human rights, like the "right to be forgotten," which would force Google to erase certain unwelcome search results; the race-, religion-, and gender-infused debate over whether Muslim women should be allowed to wear headscarves in public spaces in France; Ta-Nehisi Coates's argument

in *The Atlantic* for reparations to the descendants of black American slaves; the growing debates over transgender rights and restroom access; the role of the Nuremberg legacy in the success (or failure) of trying war crimes today; and even Harvard's own complicated relationship to slavery in the United States.

Topic: Existentialism

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Existence precedes essence." According to Jean-Paul Sartre's slogan, we are not born with a purpose given to us by god, human nature, or society, but are instead "condemned to freedom," to create ourselves through the choices we make. In our first unit, we will grapple with the idea that we create our own values, reading Sartre's lecture "Existentialism Is a Humanism," and consider a recent philosopher's attempt to understand what it means to describe life as absurd. Concerned as they were with concrete situations, existentialists also produced a great deal of literature in addition to philosophy. In our second unit, we will look at the concept of being-for-others—the idea that we never exist as pure individuals—in Sartre's play "No Exit" (bearer of the famous line "hell is other people") and a short story by his lifelong intellectual partner Simone de Beauvoir. Finally, at the end of the course, students will write a research paper about an existentialist novel of their choice, examining themes like bad faith, dread, freedom, and authenticity in a classic text by Sartre, De Beauvoir, or Albert Camus, or in a more recent one influenced by that tradition, such as Richard Wright's *Black Boy*, Walker Percy's *The Moviegoer*, Kobo Abe's *The Face of Another*, Tom McCarthy's *Remainder*, or Kamel Daoud's *The Meursault Investigation*, among other possibilities.

Expository Writing 20 Section: 238

Expository Writing 20 (116353)

Ben Roth

2017 Fall (4 Credits)

Schedule:

TR 0200 PM - 0259 PM

Instructor Permissions: Department**Enrollment Cap:**

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Existentialism

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Existence precedes essence." According to Jean-Paul Sartre's slogan, we are not born with a purpose given to us by god, human nature, or society, but are instead "condemned to freedom," to create ourselves through the choices we make. In our first unit, we will grapple with the idea that we create our own values, reading Sartre's lecture "Existentialism Is a Humanism," and consider a recent philosopher's attempt to understand what it means to describe life as absurd. Concerned as they were with concrete situations, existentialists also produced a great deal of literature in addition to philosophy. In our second unit, we will look at the concept of being-for-others—the idea that we never exist as pure individuals—in Sartre's play "No Exit" (bearer of the famous line "hell is other people") and a short story by his lifelong intellectual partner Simone de Beauvoir. Finally, at the end of the course, students will write a research paper about an existentialist novel of their choice, examining themes like bad faith, dread, freedom, and authenticity in a classic text by Sartre, De Beauvoir, or Albert Camus, or in a more recent one influenced by that tradition, such as Richard Wright's *Black Boy*, Walker Percy's *The Moviegoer*, Kobo Abe's *The Face of Another*, Tom McCarthy's *Remainder*, or Kamel Daoud's *The Meursault Investigation*, among other possibilities.

14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Terrorism or Freedom Fighter

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The saying "One man's terrorist is another man's freedom fighter" long ago entered the realm of cliché, but given that it persists, what does it really mean? How does the international community define terrorism? Does everyone agree on a definition? What causes terrorism? Is religion to blame? How can terrorism be successfully addressed via policy? This course will investigate terrorism through a variety of quantitative and qualitative methods and social science fields. We will begin by discussing the case of the Vietnam War to see how it affects our thinking about one definition of terrorism in circulation today from a recent UN Security Council Resolution. We'll consider the complex evidence of primary sources from the era, including a speech by Martin Luther King Jr. and a documentary from the 1960s with original war footage. Then, we will compare various theories that seek to explain the motivations of terrorists and terrorist organizations. Drawing on ideas from leading scholars in political science, sociology, and psychology, we will weigh in on the debate over whether terrorists are motivated by their "hearts" versus their "brains" as we examine the case of the Islamic State (ISIS). Finally, students will apply what they have learned in the previous units to a specific case that students choose to make an argument about the motivations of, the international response to, and the categorization of a violent political organization. Students will have an opportunity to derive specific policy recommendations based on their argument and findings, thinking through precisely how their research might impact the world around them.

Topic: Breaking the Rules**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Everyone lives by rules, no matter how free they may feel. Some of these rules are written; others are unspoken. While we typically associate political rights with what it means to be "free," the seemingly small social conventions of everyday life can limit our real or perceived liberties in powerful ways, too. The codes of conduct we follow when, for example, we use social media, when we go on dates, or when we work for a company all have the capacity to rein us in, and if we knowingly or unknowingly violate those norms, our freedom may be at the price of our membership in a community. This course will use literature and film to interrogate the relationship between social rules and individual freedom while considering the following questions: What does it really mean to be "free"? How does social obligation impact our access to personal freedom? Are we even aware of the ways that society controls our behavior, or are rules of social conduct largely invisible? As we seek the answers to these questions, we'll start Unit 1 by performing close analysis of several short stories from both American and international authors—including Willa Cather, Flannery O'Connor and National Book Award winner Ha Jin—and discuss how they negotiate the relationship between individual desire and social expectation. In Unit 2, we'll turn to films like *Mean Girls*, *The Social Network*, and *The Graduate* as we read theories of individual and collective freedom, questioning how the socially constrained environments of high school and college impact individuals' behavior and choices. Finally, we will conclude with a culminating research paper in which students will choose from novels, movies, or television series like *Mad Men* and *Downton Abbey*, in order to deconstruct the social pressures that impinge on us today. We will ask why these texts—produced in the last few years and yet rooted in historically constrained societies—have become popular ways of thinking through contemporary social predicaments.

Topic: The Underworld

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Hell is popular. In fact, it's been doing much better than heaven. It's practically a literary consensus that Dante's best book is his *Inferno* not *Purgatorio* or *Paradiso*, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being "of the Devil's party without knowing it" (Blake). And the world today may be more secular than in past generations, but hell is doing just fine. Harvard presents its own interesting case: Currier House's annual "Heaven and Hell" party has situated "Hell" in a room that can hold about 500 people whereas "Heaven" can fit only about 50. (This past year heaven was eliminated entirely.) But what are the components of hell – what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in *secular* culture? Why do those people who don't believe that hell is real want to keep imagining it again and again (in *Supernatural*, in *South Park*, in *Buffy the Vampire Slayer*, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from *Gilgamesh*, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we'll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film *Pan's Labyrinth*, and a *New Yorker* article by Harvard Professor Danielle Allen about her cousin's experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to better understand the curious attraction of hell, and why its 4,000-year-old story shows no sign of ending.

Topic: God and Government

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The separation of church and state is often considered to be a cornerstone of modern democracy, but this idea has nevertheless been a difficult concept to put into practice. Must the state completely avoid any entanglement with religious groups, or merely act in a non-preferential manner toward them? How does a state determine whether a given belief or practice is religious (and thus deserving of legal protection) or simply ethical or cultural in nature? Is the ideal of a neutral political secularism even possible or desirable? And what should we think of the many global actors, from Latin America to the Middle East to Sub-Saharan Africa, who reject this ideal entirely? This course will consider the many questions and challenges raised by religious diversity for the modern state. We begin in the first unit by considering two influential early accounts of the proper relationship of governments to religiously diverse populations, James Madison's *Memorial and Remonstrance* and Jean-Jacques Rousseau's *On Civil Religion*. In the second unit, we will consider several judicial decisions from the U.S. Supreme Court and the European Court of Human Rights, which highlight the contentious legal landscape over the concept of "religious freedom." Our final unit turns to the international stage to examine several case studies from Brazil, Palestine, Nigeria, and India, to see how religious diversity is shaping contemporary global conflict.

Topic: Privacy and Surveillance

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to some of our communications in the name of national security. It is easy to decry this state of affairs as Orwellian, or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice. In the first unit, we will explore the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? In the second unit, we will consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Do these non-citizens have any privacy rights vis-à-vis the U.S. government? Are there adequate legal protections for American citizens whose communications—both dangerous and innocent—are swept up in surveillance that is targeted at foreigners? In the final unit we will turn to the issue of privacy rights against corporations. Do we have a right to be forgotten online, or should truthful information about private citizens be available via internet search engines indefinitely? Can internet users be regarded as having given meaningful consent to privacy agreements that they have not read and would in any case likely not fully understand? For this unit, students will write a research paper about the appropriate limits on the power that private entities have over our online lives.

Topic: Journey to Mars

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Evoking President Kennedy's famous speech to put a man on the moon by the end of the 1960s, on October 11, 2016, President Obama called for the United States to launch humans to Mars by 2030 and to one day settle there. The quest to achieve this goal has dominated recent headlines from NASA's landing of the Curiosity Rover to Hollywood's renewed fascination with the red planet. Mars has become the next great frontier in human conquest and exploration. Why Mars? What is at stake in our efforts to reach Mars? What does it say about life here on Earth? Over the semester, we will look at a range of scholarly literature on Mars as well as films, science fiction, and virtual reality simulations to examine some possible futures in which humans have colonized outer space and become a multi-planetary species. Our launch will be a close analysis of the film *The Martian* to discover key themes and topics in media representations of Mars. We will next chart a path through Ray Bradbury's *The Martian Chronicles* to explore connections between science, technology, and art in our imagination of human life and the experience of difference on Mars. The course will conclude with a broader inquiry of Mars as the next frontier of human entrepreneurship that critically engages with the science and ethics of proposed future Mars missions (Mars One, SpaceX, UAE's Mars 2117, among others). Students will write a final research paper on a topic of their choice that builds on course readings, activities, and discussion.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Drugs, Mind, and War in the Am

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Psychoactive substances have played an outsized role in the modern history of the Americas. As marijuana is being decriminalized, our class will ask how the Americas have been embroiled in a war on the habits of its peoples. In our first unit, we will consider how the coca leaf, one of the defining symbols of indigenous culture in the Andes, has been transformed into cocaine, an international villain. In the second unit, we will look at the ways in which traffickers adapted to the growing appetites of American consumers in the 1980s and 1990s. Using *Bandits*, a book by the great 20th century historian, Eric Hobsbawm, we will analyze the social role that drug traffickers have played in their societies. In our final unit, we will ask how the "War on Drugs" has changed the U.S. and Latin America, and consider whether we are currently at a historical watershed in the world's relationship with drugs. As we refine our analytical and writing skills, we will also spend some time on meditation, with the goal of better understanding our own minds, and cultivating concentration and equanimity.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Journey to Mars

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Evoking President Kennedy's famous speech to put a man on the moon by the end of the 1960s, on October 11, 2016, President Obama called for the United States to launch humans to Mars by 2030 and to one day settle there. The quest to achieve this goal has dominated recent headlines from NASA's landing of the Curiosity Rover to Hollywood's renewed fascination with the red planet. Mars has become the next great frontier in human conquest and exploration. Why Mars? What is at stake in our efforts to reach Mars? What does it say about life here on Earth? Over the semester, we will look at a range of scholarly literature on Mars as well as films, science fiction, and virtual reality simulations to examine some possible futures in which humans have colonized outer space and become a multi-planetary species. Our launch will be a close analysis of the film *The Martian* to discover key themes and topics in media representations of Mars. We will next chart a path through Ray Bradbury's *The Martian Chronicles* to explore connections between science, technology, and art in our imagination of human life and the experience of difference on Mars. The course will conclude with a broader inquiry of Mars as the next frontier of human entrepreneurship that critically engages with the science and ethics of proposed future Mars missions (Mars One, SpaceX, UAE's Mars 2117, among others). Students will write a final research paper on a topic of their choice that builds on course readings, activities, and discussion.

All sections emphasize revision.

Topic: Existentialism

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Existence precedes essence." According to Jean-Paul Sartre's slogan, we are not born with a purpose given to us by god, human nature, or society, but are instead "condemned to freedom," to create ourselves through the choices we make. In our first unit, we will grapple with the idea that we create our own values, reading Sartre's lecture "Existentialism Is a Humanism," and consider a recent philosopher's attempt to understand what it means to describe life as absurd. Concerned as they were with concrete situations, existentialists also produced a great deal of literature in addition to philosophy. In our second unit, we will look at the concept of being-

for-others—the idea that we never exist as pure individuals—in Sartre's play "No Exit" (bearer of the famous line "hell is other people") and a short story by his lifelong intellectual partner Simone de Beauvoir. Finally, at the end of the course, students will write a research paper about an existentialist novel of their choice, examining themes like bad faith, dread, freedom, and authenticity in a classic text by Sartre, De Beauvoir, or Albert Camus, or in a more recent one influenced by that tradition, such as Richard Wright's *Black Boy*, Walker Percy's *The Moviegoer*, Kobo Abe's *The Face of Another*, Tom McCarthy's *Remainder*, or Kamel Daoud's *The Meursault Investigation*, among other possibilities.

Topic: Terrorism or Freedom Fighter

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The saying "One man's terrorist is another man's freedom fighter" long ago entered the realm of cliché, but given that it persists, what does it really mean? How does the international community define terrorism? Does everyone agree on a definition? What causes terrorism? Is religion to blame? How can terrorism be successfully addressed via policy? This course will investigate terrorism through a variety of quantitative and qualitative methods and social science fields. We will begin by discussing the case of the Vietnam War to see how it affects our thinking about one definition of terrorism in circulation today from a recent UN Security Council Resolution. We'll consider the complex evidence of primary sources from the era, including a speech by Martin Luther King Jr. and a documentary from the 1960s with original war footage. Then, we will compare various theories that seek to explain the motivations of terrorists and terrorist organizations. Drawing on ideas from leading scholars in political science, sociology, and psychology, we will weigh in on the debate over whether terrorists are motivated by their "hearts" versus their "brains" as we examine the case of the Islamic State (ISIS). Finally, students will apply what they have learned in the previous units to a specific case that students choose to make an argument about the motivations of, the

international response to, and the categorization of a violent political organization. Students will have an opportunity to derive specific policy recommendations based on their argument and findings, thinking through precisely how their research might impact the world around them.

Topic: Why Shakespeare?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay \$2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve all this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We'll begin with a reading of the most famous artwork of the past millennium, *Hamlet*, a play about a bad philosopher trying to avenge his father's murder. Then we'll read one of Shakespeare's least popular plays, *Henry VI* (about feuding English families during a bloody civil war), alongside one of the most popular TV shows right now, *Game of Thrones* (which, like *Henry VI*, was based on the Wars of the Roses). We'll also read *Henry VI* in light of some controversial recent computer-based scholarship arguing that Shakespeare actually didn't write much of the play. Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the cynical (Shakespeare is a dead, white male that other dead, white males have

used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Topic: The Underworld

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Hell is popular. In fact, it's been doing much better than heaven. It's practically a literary consensus that Dante's best book is his *Inferno* not *Purgatorio* or *Paradiso*, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being "of the Devil's party without knowing it" (Blake). And the world today may be more secular than in past generations, but hell is doing just fine. Harvard presents its own interesting case: Currier House's annual "Heaven and Hell" party has situated "Hell" in a room that can hold about 500 people whereas "Heaven" can fit only about 50. (This past year heaven was eliminated entirely.) But what are the components of hell – what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in secular culture? Why do those people who don't believe that hell is real want to keep imagining it again and again (in *Supernatural*, in *South Park*, in *Buffy the Vampire Slayer*, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from *Gilgamesh*, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we'll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film *Pan's Labyrinth*, and a *New Yorker* article by Harvard Professor Danielle Allen about her cousin's experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to

better understand the curious attraction of hell, and why its 4,000-year-old story shows no sign of ending.

Topic: Gothic Fiction

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Horror, madness, monstrosity, death, disease, terror, evil, and weird sexuality: these preoccupations, according to a recent critic, have animated Gothic fiction ever since it emerged in the mid-1700s. We will contemplate these preoccupations as we examine a range of Gothic texts from eighteenth-century Gothic fragments to stories by Edgar Allan Poe and Isabel Allende. And we will ask these questions about those texts: What makes Gothic fiction "Gothic"? How do we account for its immense popularity? Why have high-minded readers and writers always tended to scorn it? (What are they so worried about?) And what have modern Gothic writers and readers made of the genre they've inherited? We'll develop a working definition of the Gothic in our first segment, which will take a group of short stories—of various centuries and nations—as its primary texts. Next, we'll read Jane Austen's Gothic spoof, *Northanger Abbey*, in the context of both the popular fiction Austen parodies and the heated eighteenth-century debates about what young women should read. Our third segment will focus on Edgar Allan Poe and his tales of paranoia, insanity, and incest. This segment will extend the course's focus from the Gothic mansion (and the Gothic monster) to the Gothic mind.

Topic: Privacy and Surveillance**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to some of our communications in the name of national security. It is easy to decry this state of affairs as Orwellian, or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice. In the first unit, we will explore the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? In the second unit, we will consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Do these non-citizens have any privacy rights vis-à-vis the U.S. government? Are there adequate legal protections for American citizens whose communications—both dangerous and innocent—are swept up in surveillance that is targeted at foreigners? In the final unit we will turn to the issue of privacy rights against corporations. Do we have a right to be forgotten online, or should truthful information about private citizens be available via internet search engines indefinitely? Can internet users be regarded as having given meaningful consent to privacy agreements that they have not read and would in any case likely not fully understand? For this unit,

students will write a research paper about the appropriate limits on the power that private entities have over our online lives.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Privacy and Surveillance

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to some of our communications in the name of national security. It is easy to decry this state of affairs as Orwellian, or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice. In the first unit, we will explore the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? In the second unit, we will consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Do these non-citizens have any privacy rights vis-à-vis the U.S. government? Are there adequate legal protections for American citizens whose communications—both dangerous and innocent—are swept up in surveillance that is targeted at foreigners? In the final unit we will turn to the issue of privacy rights against corporations. Do we have a right to be forgotten online, or should truthful information about private citizens be available via internet

search engines indefinitely? Can internet users be regarded as having given meaningful consent to privacy agreements that they have not read and would in any case likely not fully understand? For this unit, students will write a research paper about the appropriate limits on the power that private entities have over our online lives.

All sections emphasize revision.

Topic: The Knife's Edge

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: For most of human history, surgery has been a brutal, terrifying affair. Operations were carried out as quickly as possible to the sound of blood-curdling screams, and often ended in the patient's death. Historian of medicine Martin Pernick observed of surgeons before the advent of anesthesia that "the emotional ability to inflict vast suffering was perhaps the most basic of all professional prerequisites." To say the state of the art has advanced since then is an understatement—incidentally, it is now even possible for complex surgeries to be carried out by robot, directed remotely by surgeons hundreds of miles away. Yet whether the scalpel is wielded by robotic arms or flesh-and-blood hands, it remains the case that operations are performed by human beings who are fallible, on bodies that are mortal, and there is still no way to wholly eliminate risk. As the surgeon and writer Atul Gawande has put it, when you are sick, "it's not science you call upon but a doctor." It is this fundamentally human endeavor of surgery, always rooted in specific social and historical contexts, that is the subject of this course. We begin the semester with historical and present-day accounts of surgical success and failure to explore what surgery has demanded from practitioners and patients over time. We next examine a major bioethical debate in one of the fields of surgery that has generated the most controversy and soul-searching throughout its

history in societies around the world: organ transplantation. Lastly we consider an array of very different types of surgery that can significantly affect one's identity, self-presentation, and social position, such as cosmetic, bariatric, gender reassignment, and cochlear implant surgeries. Through independent research projects on related surgical phenomena of their choice, students will explore how the advent and availability of certain types of surgery in particular contexts has shaped social norms, concepts of the normal and the pathological, prevailing principles of medical ethics, and individual experience and self-understanding. What constitutes necessity, medical or otherwise? What should we be empowered to choose—and how far should we be allowed to go? What are the implications of responding to social problems not with social action, but with a surgeon's knife?

All sections emphasize revision.

Topic: The Science of Emotion

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Reason has been routinely championed as the epitome of human achievement and framed as profoundly at odds with emotion. For much of the 20th century, scientists had even characterized emotion

as unimportant. However, after the past 30 years of research, we now understand emotion to be a crucial factor in human behavior, including reasoning. This class will focus on the science of emotion. In Unit 1, we'll explore what emotion is as we read several scientists' divergent theories, including Joseph LeDoux and Antonio Damasio, who disagree on whether love is an emotion. To help us evaluate their conclusions, we will consider a crucial theory offered by Paul Ekman, whose research on facial expressions of emotion was largely responsible for the modern field of emotion science. In Unit 2, we'll explore the conundrum that emotions are at the heart of individual—and thus seemingly subjective—experience and yet have so many elements that seem to be universal among humans of all cultures. We'll read sources that outline the "laws of emotion" that differentiate between emotion and feelings, and that present interesting data on emotion in children living in poverty. Our final unit will take up the matter of how cognition and emotion interact and give students an opportunity to research one of many perplexing questions in this subfield of emotion science: What, for example, is the role of emotion in decision-making? How does emotion interact with learning or moral judgments? How does emotion operate in adolescence or in various pathologies?

Topic:

The Voice of Authority

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

NOTE: THERE IS A REQUIRED EXTRA MEETING OF THIS CLASS: Thursday, March 23rd from 6:00 - 7:30 p.m.

Can writing truly be a way to change the world? In this class we will explore the relation between authority and the acts of writing and speaking. How do we recognize and evaluate authority? Are we doing

all that we can to earn our audience's attention and get the results we want? What does it mean to write with authority? You will spend much of your time learning how to build effective arguments: translating your claims (arrived at through close reading, analysis, research, and devotion to technique) into essays that will captivate and illuminate. You may be surprised as you begin to discover what makes you a unique presence on the page and how much authority you already command. While some writing goals will shift, as you practice three distinct and important versions of the academic essay, others will remain central. Thus, the three essays that you will write and revise will build off of each other, and all essay assignments will connect to other writing assignments that you are likely to encounter at Harvard, at the same time preparing you to respond eloquently and effectively to worthy calls to action assigned by circumstances and events in the non-academic, or "real," world in which we live. In Unit 1 you will develop close-reading skills to argue for an original analysis-based interpretation of authority in Ken Kesey's controversial and groundbreaking *One Flew Over the Cuckoo's Nest*. In Unit 2, to approach building a sophisticated and complex comparative analysis, you will engage with works of poetry and fiction written by internationally acclaimed writers who have sacrificed immeasurably in the name of free expression. You will meet these writers, analyze their work, consider what it reveals about authority, and learn firsthand what can happen when a writer challenges governmental, religious, cultural, etc. authority. This ongoing inquiry into the nature of authority will shape our explorations in the third unit, when you will investigate and theorize answers to questions arising out of research into authority's intersection with education, politics, language and rhetorical strategy, human rights, and art. Here, you will work independently, in small groups, and with Harvard librarians to stake out a position and a strategy for arguing persuasively. You will develop and hone skills such as researching and building a scholarly conversation; working with an annotated bibliography; structuring an argument from a variety of sources; targeting an audience; using sources correctly, strategically, and effectively; and writing with authority.

Topic: Buddhism, Mindfulness, and the

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Course Title: *Buddhism, Mindfulness, and the Practical Mind*

Today, mindfulness is touted as a panacea, the secret to happiness and health, superb sex and unparalleled productivity. The hype is not entirely new, however. For decades, ostensibly Buddhist ideas have been tossed around in the West as recipes for success in just about any art or craft. But what hides behind this craze? Can Buddhist teachings offer us tools with which to achieve our goals, or are we corrupting Buddhism by applying it in such a way? What have artists and practitioners thought of the use of meditative tools, and how have they integrated Buddhist terms like "bare awareness" and "emptiness" into their work?

In order to answer such questions, we will start the course with a reading of the *Satipatthāna Sutta*, the Buddha's instructions on mindfulness meditation. A close reading the text in our first unit will give us a glimpse of the ancient Buddhist practice, its complexity and richness. As we move into our second unit, we will read the text that first gave the West the idea that Buddhism can allow us to "hit the mark" without trying to do so, Eugen Herrigel's bestselling 1948 book, *Zen in the Art of Archery*. Using Edward Said's classic work, *Orientalism*, we will ask if Herrigel was romanticizing Zen Buddhism, and if he was, what the consequences of such a romanticization have for Japan and the West. In our last unit, we will read the work of Chögyam Trungpa, one of the most charismatic masters to have taught in the West. His lectures in *Dharma Art* will provide us a glimpse into the way Buddhist religious-artistic practices have influenced contemporary artists in the West. By looking at Trungpa's Tibetan "crazy wisdom," we will try to understand what Buddhist ideas of self/not-self mean, and why artists have taken such avid interest in them.

As we read these texts, we will also practice mindfulness meditation, as well as various other forms of Buddhist meditation. In doing so, we will think about these meditations both practically and critically, at the same time as we refine our analytical understanding of Buddhist ideas.

Topic: Drugs, Mind, and War in the Am

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Psychoactive substances have played an outsized role in the modern history of the Americas. As marijuana is being decriminalized around the region, our class will ask how the Americas came to be embroiled in a war on the habits of its peoples. To provide background for our first unit, we will consider how the coca leaf, one of the defining symbols of indigenous culture in the Andes, has been transformed into cocaine, an international villain. We will then turn to analyzing a scene from Arthur Conan Doyle's *The Sign of the Four* to understand an influential way in which psychoactive drug use has been imagined in Western culture. In the second unit, we will examine the stereotypical images of the psychoactive drug user in classic texts from Sigmund Freud, Aldous Huxley, and others. To do so, we will draw on Edward Said's notion of "orientalism"—the long-running colonialist representation of non-European peoples as passive, irrational, part of nature, and in need of Western control. In our final unit, we will turn to investigating how the "War on Drugs" has changed the U.S. and Latin America, and consider whether we are currently at a historical watershed in the world's relationship with drugs. Throughout the course, we will also explore the practice of meditation, both to consider what has become a powerful alternative in our culture to psychoactive substance use and to better understand our own minds and cultivate concentration and equanimity.

Topic:	Black Autobiography
Course Notes:	Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.
Class Notes:	Why is autobiography so key to the black literary tradition on both sides of the Atlantic? In this course we will search for answers by working our way through black autobiographies from a number of different genres. We will begin in the United States by reading excerpts from the "narratives" of former slaves, including Frederick Douglass, Harriet Jacobs, and Solomon Northrup, whose memoir was the basis for the award-winning film <i>Twelve Years A Slave</i> . What did the autobiographical truthfulness of these accounts accomplish? Why were they so important for the abolitionist movement? What do their popularity and political importance say about the nature of black suffering and its consumption as literature? We will then broaden the scope of our inquiry to consider narratives of blackness and suffering from elsewhere in the African diaspora. Our touchstone will be the Martinique-born philosopher Frantz Fanon, whose autobiographical engagement with racial trauma in <i>Black Skin, White Masks</i> remains one of the most important critical texts on blackness in the modern world. We will grapple with Fanon's account of realizing – quite late in life – that he was black and what that meant. This will help illuminate the broader world of postcolonial African and Caribbean politics and literature, including the poetry of Aimé Césaire and the fiction of Ama Ata Aidoo. In the final section of the course, we will return to the United States to engage with the #blacklivesmatter movement and some of the provocative music, film, and prose in dialogue with it: Beyoncé's <i>Lemonade</i> , Ryan Coogler's <i>Fruitvale Station</i> , and Ta-Nehisi Coates' <i>Between the World and Me</i> . What do these new black autobiographies have in common with their antecedents? How has the conversation about black life and black suffering changed? Or, has it changed at all?

Topic: Why Shakespeare?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay \$2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve all this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We'll begin with a reading of the most famous artwork of the past millennium, *Hamlet*, a play about a bad philosopher trying to avenge his father's murder. Then we'll read one of Shakespeare's least popular plays, *Henry VI* (about feuding English families during a bloody civil war), alongside one of the most popular TV shows right now, *Game of Thrones* (which, like *Henry VI*, was based on the Wars of the Roses). We'll also read *Henry VI* in light of some controversial recent computer-based scholarship arguing that Shakespeare actually didn't write much of the play. Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the cynical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Topic: Expos Studio 20: The Successfu

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What does the successful life consist of? Do we base our notions of success on careers and paychecks? On the impact we have on others? On where we go to college, or on the happiness we achieve? In this course, we will investigate the different definitions and assumptions we might hold about success. First, we will examine accounts of working in a variety of professions. What makes the work in that career meaningful? How do people measure success in these occupations? And what do people sacrifice for their success? Next, students will conduct original research to answer a question about success they're interested in, whether happening right here at Harvard or elsewhere. What, for example, predicts success in school, or in athletics and other extracurricular activities? What difference does a person's race, socioeconomic background, gender identity, culture, or religion make to their attaining success? What power do media images of success and failure have on people? What are potential barriers to success in a college or high school environment? When we look back at Harvard's own history, who fought to change institutional barriers to success and how, and what barriers might still remain? The course will also give students the opportunity to become more confident and skilled oral presenters; to create a final capstone project about their research; and to learn the art of writing an effective personal statement commonly required by fellowship, grant, and award applications.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Expos Studio 20: The Successfu

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What does the successful life consist of? Do we base our notions of success on careers and paychecks? On the impact we have on others? On where we go to college, or on the happiness we achieve? In this course, we will investigate the different definitions and assumptions we might hold about success. First, we will examine accounts of working in a variety of professions. What makes the work in that career meaningful? How do people measure success in these occupations? And what do people sacrifice for their success? Next, students will conduct original research to answer a question about success they're interested in, whether happening right here at Harvard or elsewhere. What, for example, predicts success in school, or in athletics and other extracurricular activities? What difference does a person's race, socioeconomic background, gender identity, culture, or religion make to their attaining success? What power do media images of success and failure have on people? What are potential barriers to success in a college or high school environment? When we look back at Harvard's own history, who fought to change institutional barriers to success and how, and what barriers might still remain? The course will also give students the opportunity to become more confident and skilled oral presenters; to create a final capstone project about their research; and to learn the art of writing an effective personal statement commonly required by fellowship, grant, and award applications.

Public Speaking Practicum (125227)

David Carter

2018 Spring (4 Credits)

Schedule:

TR 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

Expos 40 is an elective within the Writing Program, and focuses on developing and strengthening the skills necessary for successful public speaking. Students learn strategies for impromptu speaking, preparing and delivering presentations, formulating and organizing persuasive arguments, cultivating critical thinking, engaging with an audience, using the voice and body, and building confidence in oral expression.

Admission is by application only. Limited to 15 students per section (75 total).

Course Notes: Please visit the Expos 40 Canvas site for application information.

Class Notes: For all questions related to Expos 40, please contact Margie Zohn at margie@zohncoaching.com.

Folklore & Mythology 128

Fairy Tale, Myth, and Fantasy Literature (122553)

Maria Tatar

2017 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

Traces the migration of traditional tales from communal storytelling circles into the literary culture of childhood and into new media. How are powerful cultural myths about innocence and seduction, monstrosity and alterity, or hospitality and hostility recycled in fairy-tale fashion? How do fantasy worlds - both utopian and dystopic - provide children with portals for exploring counterfactuals and worst-case scenarios? Authors include the Brothers Grimm, H.C. Andersen, Lewis Carroll, J.M. Barrie, and J.K. Rowling.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for either Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Folklore & Mythology 146

Body Burdens: Toxic Tales and Politics of Environmental Racism (205308)

Ruth Goldstein

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Mercury, Hermes, or quicksilver has seeped into the psyches of philosophers and emperors, mad-hatters, sushi-eaters and cavity-fillers. It can "move" through the body, passing the blood-brain barrier, swim through amniotic fluid, and change the body chemistry of all living organisms. Concentrating on mercury and environmental contaminants, this course places a particular focus on the effects of heavy metals on climate change, environmental racism, and human health. With global contamination levels rising, the United Nations Environment Programme convened the 2013 Minamata Convention. The subsequent treaty aims to reduce human and environmental exposure, by eliminating the heavy metal from pesticides, gold mining, pharmaceuticals, and factory emissions. Some regions of the world lend themselves to specific kinds of analysis and interventions. From the Amazon to the Arctic and Antarctic, mercury pollution in particular has alarmed environmental engineers and social scientists. While quicksilver's effects on the landscape have marked visibility, its impact on human health is not always so easily detected, except in fetal development. Through the figures of the mother-and-child and of nature's body - often gendered female, public health officials and environmental scientists, call for eliminating the mercurial "body burden" placed on human and nonhuman bodies, for a less toxic future.

Folklore & Mythology 156

On the Road: Traffic, Migrations, and Other Sorts of (Im)Mobilities (203876)

Ruth Goldstein

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

The current global moment carries the mark of border-crossings and transgressions where not only people are on the move, but also ideas and images about them. The refugee, the migrant, and the terrorist - while itinerant figures of different orders - they all inspire particular narratives about what constitutes "human nature" and inhumane practices. This course explores the multiple meanings of mobility and stasis by examining the (dis)placement and circulation of people and things along with the (folk)tales that accompany "being on the road." New roads through rainforests can bring improved economic conditions to rural areas; they can also bring disease and environmental destruction. So-called "uncontacted" tribes still inhabit in parts of the Amazon rainforest and Bedouin tribes continue to trouble Middle Eastern states. These nomadic populations present a challenge to state politicians, in theory because they represent a nomadic legacy and the possibility of insurrection, along with the belief that they cannot coexist with the modern, fixed, nation-state. French thinkers Deleuze & Guattari write that "[h]istory is always written from the sedentary point of view and in the name of a unitary State apparatus, at least a possible one, even when the topic is nomads. What is lacking is a Nomadology, the opposite of a history." So what does a mobile history or global outlook sound like if not told from the sedentary point of view? How do our perspectives

on movement inform notions (or realizations) of peace, war, progress, and development? And what does it mean to tell a tale in motion? From the side of the road and on the highway, who and what can move or stay -- as well as who can tell the tale -- has defined those people and things gain and maintain social value. Among the diverse array of authors and central figures for this course are: Gilles Deleuze and Felix Guattari, Miriam Camitta, Roxanne Dunbar-Ortiz, Jodi Byrd, as well as historically heroic actors such as Harriet Tubman, Frederick Douglass. We will also honor the thousands of unnamed refugees crossing state borders via land, air, and water every day. While the course has a focus on the Americas, Africa, (some readings on South East Asia) and European colonialism, the class discussions, presentations, and certainly the assignments provide space to examine migrations and mobilities on the global scale.

Readings and discussions will engage the topics of: spatial productions of power and knowledge-making; movement that occurs through terrestrial, aquatic, cyber and outer-space, border-crossings; disability studies; trans-national development projects and environmental disasters; nomads and refugees.

Course Notes: This course fulfills the Ethnicity, Migration, and Rights requirements for a secondary field.

Class Notes: This course will be taught by Harvard College Fellow Ruth Goldstein.

Folklore & Mythology 160

Scandinavian Folklore: Trolls, Trolldom and the Uses of Tradition (205673)

Stephen Mitchell

2018 Spring (4 Credits)

Schedule:

T 0600 PM - 0759 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Examines Nordic folklore and folklife, with an emphasis on narratives, supernatural beliefs, and material culture from the 17th to the early 20th centuries, interpreted against additional sources of information drawn from the archaeological and historical records. Key strategies used in the fields of folklore, literature, and cultural history to interpret such texts discussed in detail, and applied in analyzing our materials. Also carefully considered, the history and development of folklore studies in Scandinavia and the role of folklore (and folklore studies) as, and in, anti-colonial and nation-building movements.

Course Notes: This course is equivalent to and also listed as Scandinavian 102. Credit may be earned for Scand 102 or FOLKMYTH 160, but not both.

Quilts and Quiltmaking (127859)

Felicity Lufkin

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Are quilts the great American (folk) art? From intricately stitched whole-cloth quilts, to the improvisational patchworks of Gee's Bend; from the graphic simplicity of Amish quilts to the cozy pastels of depression-era quilts; from the Aids Quilt to art quilts; quilts have taken on extraordinary significance in American culture. This class surveys the evolution of quilt-making as a social practice, considering the role of quilts in articulations of gender, ethnic, class and religious identities, and their positions within discourses of domesticity, technology, consumerism, and cultural hierarchy.

Assertive Stitches: Domestic Arts and Public Conflict (205309)

Felicity Lufkin

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

In January 2017, the Pussy Hat Project turned the Women's March on Washington into an eye-catching "sea of pink," but this is not the first time that needlework has played an important role in a political demonstration. Needlework's traditional associations with femininity and domesticity have made it a potent symbol in protests that are critical of traditional gender roles, or that evoke domestic morality to challenge public policy, or in some cases, both. In addition to the 2017 Pussy Hat project, we will look at cases like the ongoing NAMES Project AIDS memorial quilt, and the anti-nuclear-arms Piece Ribbon project of the mid-1980s within broader historical and theoretical contexts of needlework, of protest and demonstration, and of collective and/or community-building artistic practices.

First Stars and Life in the Cosmos (108389)

Abraham Loeb

2018 Spring (4 Credits)

Schedule:

M 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Since the Universe is expanding, it must have been denser in the past. But even before we get all the way back to the Big Bang, there must have been a time when stars like our Sun did not exist because the Universe was denser than they are. Since stars are needed to keep us warm, we face the important question about our origins: how and when did the first stars form? Primitive versions of this question were considered by humans in religious and philosophical texts for thousands of years. The Seminar will summarize the fundamental principles and scientific ideas that are being used to address this question in modern cosmology. Eventually, the formation of stars like the Sun was accompanied by planets like the Earth on which life has emerged. When did life start in the cosmos and when will it all end? The Seminar will describe current plans to search for extraterrestrial life, including project "Starshot" which aims to visit the nearest stars within our lifetime and send close-up photos of their planets.

Modern Civilization and the Rise of Heart Disease (159722)

Richard Lee

2017 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Heart diseases have plagued humans since ancient times, but only in the past century has heart disease become epidemic throughout the world. Despite great progress in prevention and therapy, heart diseases will be major causes of death and disability throughout the next century. Modernization of civilization has played a major role in the rise of heart disease. Conversely, advances in heart disease have powerfully changed society and our personal daily behavior. In this seminar, we will examine some of the major intersection events between heart disease and modern society over the past century and consider how this could change the next century in America and throughout the world. The topics include dramatic events like a young physician inserting a urinary drainage tube into his heart—ultimately generating the modern life-saving treatment for heart attacks. We will explore how major lifestyle factors such as tobacco, alcohol, exercise and diet affect health, and how economics and politics often play a role in the complex relationship of health and society. In addition, we will visit a high technology modern cardiology facility and watch some technology in action.

Freshman Seminar 21I

Evolution, Buddhism, and Ethics (109916)

John Wakeley

2017 Fall (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Evolutionary genetics traces back to Darwin's (1859) idea of natural selection. Darwin provided a compelling theory about how species change due to competition in reproducing populations, yet it remains difficult to understand, particularly when applied to ourselves. To enable critical evaluation and discussion of ethical questions and to illustrate connections between science and Buddhism, about one third of this course will cover select details of evolutionary genetics. The focus will be on understanding human genetic variation. Buddhism originated with Siddhartha Gautama's enlightenment around 500 BCE, achieved after six years of intense devotion to the problem of human suffering. He emerged as the Buddha, or the Enlightened One, making the bold statement that suffering within each person results from misunderstanding the nature of one's self and its relationship to the ever-changing world. He outlined a program of analytical introspection and meditation, aimed at solving this problem. As with evolutionary genetics, critical evaluation and discussion of Buddhist ideas in this course will be fostered by learning the details of what the Buddha taught. Major points of overlap between evolutionary genetics and Buddhism emerge in the ways they undermine appearances, deconstructing phenomena which at first appear wholly unbreakable. We will bring our knowledge of Buddhism to bear on ethical questions arising from genetic testing, the use of human embryos in research, and the prospects for human genetic engineering.

Course Notes: Open to Freshmen only.

Freshman Seminar 21V

Black Holes, String Theory and the Fundamental Laws of Nature (109627)

Andrew Strominger

2018 Spring (4 Credits)

Schedule: T 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

The quest to understand the fundamental laws of nature has been ongoing for centuries. This seminar will

assess the current status of this quest. In the first five weeks we will cover the basic pillars of our understanding: Einstein's theory of general relativity, quantum mechanics and the Standard Model of particle physics. We will then examine the inadequacies and inconsistencies in our current picture, including for example the problem of quantum gravity, the lack of a unified theory of forces, Dirac's large numbers problem, the cosmological constant problem, Hawking's black hole information paradox, and the absence of a theory for the origin of the universe. Attempts to address these issues and move beyond our current understanding involve a network of intertwined investigations in string theory, M theory, inflation and non-abelian gauge theories and have drawn inspiration from the study and observation of black holes, gravitational waves and developments in modern mathematics. These forays beyond the edge of our current knowledge will be reviewed and assessed.

Recommended Prep: **Prerequisites:** High school level calculus and physics.

Requirements: **Course open to Freshman Students Only**

Research at the Harvard Forest: Global Change Ecology-Forests, Ecosystem Function, the Future (112349)

David Foster

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor **Enrollment Cap:** 11

Global change ecology is the line of scientific inquiry that integrates the responses of organisms, ecosystems, and their environments with changes in human activity and climate. This seminar will focus on state-of-the-art research, tools, and measurements used in evaluating and anticipating global change through ongoing studies at the Harvard Forest's 3,500-acre outdoor laboratory in Petersham, MA. Students will explore the key role that forests play in climate control and develop the necessary skills to present and discuss the ecological evidence for past and future global change. The seminar consists of four weekend-long field trips (Friday evening-Sunday) to the Harvard Forest, where students will visit various long-term ecological experiments, use long-term and real-time datasets to understand biosphere-atmosphere interactions, and discuss key scientific findings. The course will highlight integrated faculty studies of land-use history, forest dynamics, atmospheric exchange of carbon and water, plant phenology, invasive plants and pests, and the impacts of climatic warming on complex ecosystems. Transportation, accommodations, and meals at the Harvard Forest will be provided. A final, on-campus mini-symposium will give students an opportunity to present what they have learned in a public forum.

Course Notes: The seminar consists of four weekend-long field trips (Friday evening-Sunday) to the Harvard Forest, dates TBA. Transportation, accommodations, and meals at the Harvard Forest will be provided at no cost to the student.

Class Notes: Open to Freshmen only. Four weekends at the Harvard Forest in Petersham, MA (Fri, 3pm-Sun, late afternoon) dates TBA. Transportation, accommodations, and meals at the Harvard Forest will be provided.

Requirements: Course open to Freshman Students Only

Freshman Seminar 22C

Psychoactive Molecules from Babylon to Breaking Bad (159838)

Jon Clardy

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Psychoactive molecules change brain function in ways that result in altered perception, mood, or consciousness, and while 'psychoactive' hints at something illicit, examples range from caffeine to cocaine. And psychoactive molecules are also the basis for many useful or potentially useful therapeutic agents: opioids for pain and XTC (MDMA) for posttraumatic stress disorder (PTSD). After an introductory session, the seminar begins with two meetings focused on foundational principles of brain chemistry: synapses and molecular structure. Subsequent meetings begin with molecules that indirectly influence important neurotransmitters—opioids and cannabinoids—with case studies involving heroin, heroin derivatives like Oxycontin, and synthetic opioids like fentanyl. The cannabinoid meetings will deal with THC (tetrahydrocannabinol) and anandamide (our body's own cannabinoid). The next few meetings will focus on 'monoamines', especially the naturally occurring monoamines dopamine, serotonin, and norepinephrine and the synthetic mimics like amphetamine and methamphetamine. The final meetings will focus on psychedelics (mescaline, LSD, and psilocybin) and designer drugs. The seminars are discussion based and cover wide-ranging issues. For example the seminars on opioids also explore our brain's reward system; the nature of addiction; the connection between opioids, alcohol abuse, and genes; and the connection between opioid sensitivity and human bonding.

Recommended Prep:

A familiarity with some basic concepts in biology and chemistry will be helpful but by no means necessary.

Freshman Seminar 22D

Time for Sleep: Impact of sleep deficiency and circadian disruption in our 24/7 Culture (159839)

Charles Czeisler

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

America is a sleep-starved nation. The Institute of Medicine estimates that between 50 and 70 million

Americans are suffering from chronic sleep deficiency or sleep disorders, increasing their risk of weight gain, heart ailments, mood disorders, errors and catastrophic road accidents that kill more than 7,000 and maim more than 50,000 Americans annually. Children of all ages are sleeping about two hours less per night than they did in prior generations, rendering them hyperactive and irritable and compromising their ability to sustain attention and learn in school. This hyperactivity leads many sleep-deprived children to be misdiagnosed with ADHD and treated for years with amphetamines and other stimulants that further disrupt sleep. Yet, prevailing cultural attitudes lead us all to undervalue sleep and lionize all-nighters, such that most patients with sleep disorders remain undiagnosed and untreated. This seminar will explore the function of sleep, the physiologic factors that regulate sleep and circadian rhythms, the impact of exposure to artificial light on sleep and circadian rhythms, historical and cultural differences in sleep habits, and the consequences of sleep deficiency, circadian disruption and sleep disorders on both the brain and the body. Public policy issues, such as school start times, limits on resident physician work hours, drowsy driving laws, and proposed regulations to screen transportation workers for sleep disorders will be debated. Students will be encouraged to track their own sleep patterns throughout the semester, identify the personal, structural and cultural barriers to maintaining healthy sleep while in college, and propose strategies to improve sleep health at Harvard College, the local community and the nation.

Requirements: Course open to Freshman Students Only

Freshman Seminar 22H

My Genes and Cancer (159990)

Giovanni Parmigiani

2018 Spring (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The role of a person's genetic background in determining whether he or she will develop cancer, and when, is at the center of public discussions and active scientific investigations. Already, one's genetic background is used in making making life-altering health decision aimed at preventing the occurrence of cancer, as was recently the case with actor Angelina Jolie. This seminar will explore the extent to which current scientific knowledge can inform this type of decisions. The goals is to gain enough understanding of the scientific background to critically evaluate the discourse of a genetic counseling session. The course will proceed at first by laying essential foundations of genetic inheritance in humans; cancer evolutionary theories; statistical risk; and decision-making in health care. Subsequently student will read articles from the scientific and popular press, and listen to podcasts. In class we will discuss the readings. There are no strict prerequisites, though some familiarity with the basic concepts of probability and genetics will be very helpful. There is a good deal of reading and listening, which everyone is expected to do ahead of class. Students can expect readings in genetics and statistics that will stretch them, though it will not always be necessary to understand all the technical details of every paper. Students can also expect to read opinion pieces with which they (as well as I) may disagree. Students will be required to write two 5-page double spaced essays (midterm and final) and to lead a class discussion on the topic of one of their two papers. A typical paper is the critique of a scientific or popular press article, chosen from a list of suggested options or identified independently by the student, with my approval, during the first seven weeks of classes. Attendance is essential, not only for the students' education, but for the benefit their contributions provide to the others.

Freshman Seminar 22M Section: 1

The Amazing Brain (123659)

John Dowling

2018 Spring (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Clinical cases have told us much about human brain function. This seminar will examine some of the famous neurological cases, what we have learned from them, and explore brain mechanisms. Included will be Broca's patient "Tan" whose case led to the identification of one of the brain's language areas; Phineas Gage, whose injury to a specific brain region changed his personality dramatically; and patient HM, who after brain surgery, no longer could remember things for more than a few minutes. We will expand on the cases by reading from my book *Creating Mind* which is an introduction to brain and mind mechanisms in language accessible to anyone who has had elementary high school science. Many of the chapters describe other medical cases, not as well-known as the classic cases described above, but instructive nevertheless.

Course Notes: I especially invite those students who are not planning to concentrate in neurobiology or a natural science to join the seminar.

Recommended Prep: High school science

Freshman Seminar 22R

Introduction to Technology and Society (160118)

Venkatesh Narayanamurti

2017 Fall (4 Credits)

Schedule: T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

From the digital revolution to social media, from global warming to sustainability, and from national security to renewable energy, technology plays a critical role in shaping our lives. This course explores concepts in physical sciences that span disciplines and examines broadly how technology shapes society and vice versa. Through case studies, students will be exposed to the importance of a conceptual

understanding of science (including social science) underpinning technology and the tradeoffs necessary in tackling the great challenges facing a global society. The course has a foundation of both physical and social science concepts, sparking interest and encouraging future investigation into how technology and society are interwoven and mutually dependent. Each class will start with a discussion of blog posts of current news related to technology followed by selected areas of deeper engagement and discussion. Students will be involved through individual reflection and small team assignments to address specific problems in, for example, the case of "wiki leaks" and its implications for issues of privacy and diplomacy and open government. The course is designed for physical science students to appreciate not only 'how things work' but 'how the world works' and for social science, arts and humanities students on not thinking of technology as a 'black box'.

Course Notes: There are no prerequisites, but an interview may be required to have a balanced distribution of students spanning interests in the natural sciences, arts and humanities and social sciences.

Requirements: Course open to Freshman Students Only

Quantum Mechanics Face to Face (160193)

Melissa Franklin

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course is for students who would like to be introduced to the ideas of quantum mechanics without the rigor of mathematics but who would be interested in learning by demonstration as well as spoken word and picture. We will be guided by a non-mathematical text *Introducing Quantum Theory*, read short pieces by the creators of quantum theory, including Bohr, Einstein, Heisenberg and Schrodinger, and each week watch and play with physics demonstrations of wave and particle physics. This course requires reading, watching short films, watching demonstrations in the lab and visiting places at the university where quantum mechanics is used on a daily basis.

Course Notes: Open to Freshmen only.

Requirements: Course open to Freshman Students Only

Freshman Seminar 22T

Why We Animals Sing (108564)

Brian Farrell

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

11

We do not sing alone. On land, four kinds of animals produce songs or calls: birds, frogs, mammals, and insects. Some of these (and fish) also do so underwater. The principal sounds such animal species make are signaling behaviors directly related to mating success. They are of individuals, usually males, marking territories, and wooing mates. However, in any one location, species may also compete with one another for occupation of acoustic space (that is, for bandwidth) and otherwise optimize their sound signals to features of their environment. We will explore these topics and others as we listen to and read about each of the various kinds of singers on earth, the biology of their sound production and reception, and the ways they attract mates while avoiding becoming meals for eavesdropping predators. We will listen to many different kinds of acoustic signalers across a wide array of acoustic communities in tropical and temperate settings, both terrestrial and aquatic, and we will examine sound spectra on a large screen as we listen and slow down and isolate sounds to help distinguish their parts. Finally, we will consider the biology and evolution of music in humans, considering evidence from brain studies, archaeology and anthropology, and the music of indigenous peoples. We will look at music parallels in different kinds in animals of other species. There will be field trips to listen to and record assemblages of local species. The overall objective is to awaken the students' sense, understanding, and appreciation of the acoustic environment from which we come, and the role of this environment in shaping human biology and culture. There is a fair bit of reading required in preparation for weekly discussions. Accordingly, participation will be expected for discussion of the readings and listening experiences.

Freshman Seminar 23C

Exploring the Infinite (160198)

Peter Koellner

W. Hugh Woodin

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Infinity captivates the imagination. A child stands between two mirrors and sees herself reflected over and over again, smaller and smaller, trailing off to infinity. Does it go on forever? ... Does anything go on forever? Does life go on forever? Does time go on forever? Does the universe go on forever? Is there anything that we can be certain goes on forever? ... It would seem that the counting numbers go on forever, since given any number one can always add one. But is that the extent of forever? Or are there numbers that go beyond that? Are there higher and higher levels of infinity? And, if so, does the totality of all of these levels of infinity itself constitute the highest, most ultimate, level of infinity, the absolutely infinite? In this seminar we will focus on the mathematical infinite. We will start with the so-called "paradoxes of the infinite", paradoxes that have led some to the conclusion that the concept of infinity is incoherent. We will see, however, that what these paradoxes ultimately show is that the infinite is just quite different than the finite and that by being very careful we can sharpen the concept of infinity so that these paradoxes are transformed into surprising discoveries. We will follow the historical development, starting with the work of Cantor at the end of the nineteenth century, and proceeding up to the present. The study of the infinite has blossomed into a beautiful branch of mathematics. We will get a glimpse of this subject, and the many levels of infinity, and we will see that the infinite is even more magnificent than one might ever have imagined.

Freshman Seminar 23H

Anatomy and Ethical Transgressions in National Socialism (160215)

Sabine Hildebrandt

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course introduces students to the history and ethics of anatomy, and their relevance for current questions in medicine concerning the human body in life and death. The story of anatomy in National Socialist (NS or Nazi) Germany is an example of ethical transgressions in the anatomical sciences and reveals the complex relationship between anatomists and the Nazi regime. The historic causes of this development will be explored by examining the roots of the biologicistic NS ideology in the connections between anatomy, physical anthropology, the global eugenics movement and German racial hygiene. Many anatomists became members of the NS party, while others were persecuted for so-called "racial" and political reasons. An examination of the history of anatomical body procurement from ancient Greece to the 21st century demonstrates the changes of the traditional sources of bodies for anatomical dissection under NS rule, resulting in the use of many bodies of NS victims for anatomical purposes. Anatomical research changed with the exploitation of the rising number of bodies of executed men and women. Case studies of the work of individual anatomists reveal a gradual shift in the paradigm of anatomy. A few anatomists left the traditional paradigm- i.e. the gain of anatomical knowledge through work with the dead- in favor of a new paradigm- i.e. work with the "future dead"- in human experiments on prisoners who were subsequently murdered. Ultimately, anatomists became complicit with the government through their role in the complete destruction of the perceived "enemies" of the NS regime.

GeoSciFi Movies: Real vs. Fiction (160219)

Miaki Ishii

2017 Fall (4 Credits)

Schedule:

R 0230 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Natural disasters such as earthquakes, tsunamis, hurricanes, and volcanic eruptions have major impact on society and cause great tragedies. The participants in this seminar will examine one Earth-science related science fiction movie each week and discusses features that are real and fictitious based upon our current understanding of the science of disastrous events. Simple math and science concepts are used to test how likely some effects are (e.g., is magnitude 11 earthquake possible and why?), and to understand the underlying science behind these features (e.g., what are the factors that control the size of an earthquake?). If applicable, we discuss how these scientific ideas are exaggerated to dramatize the effects.

Course Notes: Students will be required to watch the assigned movie prior to class.

Recommended Prep: Students must be comfortable with high-school level math and

science.

Freshman Seminar 23K

Insights from Narratives of Illness (117969)

Jerome Groopman

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

A physician occupies a unique perch, regularly witnessing life's great mysteries: the miracle of birth, the perplexing moment of death, and the struggle to find meaning in suffering. It is no wonder that narratives of illness have been of interest to both physician and non-physician writers. This seminar will examine and interrogate both literary and journalistic dimensions of medical writing. The investigation will be chronological, beginning with "classic" narratives by Tolstoy, Chekhov, and Kafka, and then moving on to more contemporary authors such as William Carlos Williams, Richard Selzer, Oliver Sacks, Susan Sontag, and Philip Roth. Controversial and contentious subjects are sought in these writings: the imbalance of power between physician and patient; how different religions frame the genesis and outcome of disease; the role of quackery, avarice, and ego in molding doctors' behavior; whether character changes for better or worse when people face their mortality; what is normal and what is abnormal behavior based on culture, neuroscience, and individual versus group norms. The presentation of illness in journalism will be studied in selected readings from the New York Times' and Boston Globe's Science sections, as well as periodicals like the New Yorker, The New York Review of Books, Harper's, and The Atlantic. The members of the seminar will analyze how the media accurately present the science of medicine or play to "pop culture." The seminar will study not only mainstream medical journalists, but so called alternative medical writers such as Andrew Weil also. Patients with different diseases will be invited to speak to the members of the seminar about their experiences. Students will try their hands at different forms of medical writing, such as an editorial on physician-assisted suicide that would appear in a newspaper and a short story that describes a personal or family experience with illness and the medical system.

Physics, Math and Puzzles (109319)

C. Vafa

2017 Fall (4 Credits) **Schedule:** R 0600 PM - 0759 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Physics is a highly developed branch of science with a broad range of applications. Despite the complexity of the universe the fundamental laws of physics are rather simple, if viewed properly. This seminar will focus on intuitive as well as mathematical underpinnings of some of the fundamental laws of nature. The seminars will use mathematical puzzles to introduce the basic features of physical laws. Main aspects discussed include the role of symmetries as well as the power of modern math, including abstract ideas in topology, in unraveling the mysteries of the universe. Examples are drawn from diverse areas of physics including string theory. The issue of why the universe is so big, as well as its potential explanation is also discussed.

Class Notes: Section I: W., 4:30–6:30; Section II: F., 4-6

Recommended Prep: This seminar is recommended for students with a strong background in both math and physics and with keen interest in the relation between the two subjects.

Requirements: Course open to Freshman Students Only

Freshman Seminar 23R

Asteroids and Comets (161261)

Charles Alcock

2018 Spring (4 Credits)

Schedule:

M 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Comets have been seen regularly since before the beginning of recorded history. They have often been regarded as disturbing portents. Asteroids, on the other hand, were not discovered until the 19th century, with the advent of astronomy with telescopes. Today we know of many more asteroids than comets, but we believe that there are vastly more comets than asteroids in the solar system.

This seminar will start with the history of the study of comets and asteroids, including the "Great March Comet of 1843", observations of which led to the establishment of the Harvard College Observatory and its Great Refractor, at that time the largest telescope in the Americas. Our understanding of comets advanced dramatically in 1950 with the publication of two extraordinary papers: Whipple (then at Harvard) described the mixture of dust and ice that comprises the nuclei of comets, and Oort (Leiden University) showed that new comets enter the inner solar system from a vast, diffuse cloud surrounding the planetary system. Modern telescopes and spacecraft encounters provide us today with a wealth of information about comets and asteroids. We will examine these observations and learn what is known and what is inferred about the origin and structure of asteroids and comets. The students will observe with the Astronomy Laboratory's Clay Telescope on the roof of the Science Center. Students will take on projects, which may involve their own observing program, or which exploit existing data.

Course Notes:

The seminar will make use of the Clay Telescope on the roof of the Science Center. There may also be a trip to the Observatory at 60 Garden Street to visit the Great Refractor.

Requirements:

Course open to Freshman Students Only

Freshman Seminar 23S

The Seven Sins of Memory (117972)

Daniel Schacter

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

How do we remember and why do we forget? Can we trust our memories? How is memory affected by misinformation such as "fake news"? Do smartphones and the Internet help our memories or hurt them? Are traumatic experiences especially well remembered or are they poorly remembered? What are the best ways to study for exams? This seminar will address these and other questions related to the fallibility of memory by considering evidence from studies of healthy people with normal memories, brain-damaged patients who show dramatic forgetting or striking memory distortions, and neuroimaging studies that reveal brain regions and networks that are linked to memory. The framework for the seminar is provided by the idea that the misdeeds of memory can be classified into seven basic "sins". Three of the memory sins refer to different kinds of forgetting (transience, absent-mindedness, and blocking), three refer to different

kinds of distortions or false memories (misattribution, suggestibility, and bias) and the final sin refers to intrusive recollections (persistence). We will consider how the memory sins impact everyday life and discuss the possibility that they can be conceptualized as by-products of adaptive features of memory, rather than as flaws in the system or blunders made by Mother Nature during evolution. Relatedly, we will also discuss the interplay between remembering past experiences and imagining future experiences, which provides clues regarding the nature and fallibility of memory.

All Physics in 13 Days (109575)

John Doyle

2017 Fall (4 Credits)

Schedule: W 0715 PM - 0914 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

Some claim that there are 13 ideas or principles that can form the bedrock for a pretty good understanding of our physical and technological world. These are:

1) Boltzmann factor and thermal equilibrium, 2) Turbulence, 3) Reaction rates, 4) Indistinguishable particles, 5) Quantum waves, 6) Linearity, 7) Entropy and information, 8) Discharges, ionization, 9) Relativity, 10) Nuclear binding energies, 11) Photon modes, 12) Diffraction, 13) Resonance. Each week we will discuss one of these principles and see how they explain certain things about the physical world. We will discuss these and connections with other principles, as well as how the principle shows up in technology and, more broadly, in our technological society.

Recommended Prep: Please note that this seminar will be geared to students likely to go on in physics or related areas, such as chem/phys or engineering. The introduction to certain principles is done with the expectation that students will return to a more formal course on the subject in the future. This course acts as a kind of road map for further studies in physics. Topics may change.

2017 Fall (4 Credits)

Schedule:

WF 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This year's Freshman Seminar will enable students with musical training to bridge this knowledge with Physics, Mathematics, software and hardware via experimentation with sound and music. Teams will be guided by faculty, staff and a practicing software entrepreneur. The course will be accessible to students with an interest in science/engineering and who currently play a musical instrument, at least at an elementary level.

Course Notes:

The instructor will contact selected students for an interview by phone or Harvard email so remember to check your Harvard email. Please make sure your application is final and complete when you submit it so that the instructor may review it before the application deadline to consider you for a possible interview.

The 1st class on Fri, Sept 1 meets in Lyman 228. Thereafter the seminar will be held at the Rowland Institute at Harvard, 100 Edwin Land Blvd, Cambridge.

Recommended Prep:

The course will be accessible to students with an interest in science/engineering AND who currently play a musical instrument, at least at an elementary level.

Freshman Seminar 24G

A Brief History of Surgery (127976)

Frederick Millham

2017 Fall (4 Credits)

Schedule:

R 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The history of surgery begins with the Hippocratic physicians whose principles were based, at least partly, on observation and measurement. However, surgical thinking for first three quarters of the "modern era" was dominated by Galen of Pergamum who, "fooled by his monkeys," established a school thought as false as it was tightly held. The exposure of Galen's errors by Vesalius in 1543 and Harvey in 1628 began a Medical Enlightenment. It would take until the 19th century for the next era of discovery to begin. During this time, the pace and significance of medical discovery increase, yet adoption of good ideas, like antisepsis, seems to take much too long, while bad ideas find adherents in spite of poor or no supporting evidence. Throughout this period, the ghost of Galen continues to haunt hospitals and battlefields. It will not be until the 1930's that Galenism is banished from the wards. Our study will track this history and conclude with a consideration of the management of combat casualties from the time of the first "modern" surgeon, Ambrose Pare, to that of contemporary forward surgical teams in Afghanistan and Iraq. The seminar will consist of weekly discussion, informed by assigned reading and independent inquiry. We will visit the site of the first use of ether anesthesia, and duplicate William Harvey's experiments in the anatomy lab. From time to time we will be joined by other doctors with expertise in specific areas such as infectious

disease, combat surgery and anatomy.

Freshman Seminar 24K

The Surprising Science of Happiness (128118)

Nancy Etcoff

2018 Spring (4 Credits)

Schedule:

F 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

After a century of studying how to cure mental illness, scientists have started to explore what makes us happy. What have they discovered? In this course, we will critically examine the findings from the new science of happiness, including research in cognitive science, evolutionary biology, psychology, and neuroscience and reveal how this work alters our understanding of what happiness is, the optimal ways to achieve and increase it, the role of circumstance in its occurrence, its effect on our physical health, and its place in human nature. We will consider the notion of a biologically determined "hedonic set point," and question whether there are people who "have started in life with a bottle or two of champagne inscribed to their credit; whilst others seem to have been born close to the pain threshold," as William James noted over a century ago. We will examine how the brain's reward circuitry generates feelings of pleasure, desire, comfort and craving, and the ways it propels us to achieve biologically significant goals. Among the questions we will consider are: What is happiness for? Can one make oneself happier by conscious effort? What are some of the myths about happiness? Finally, is happiness a worthy goal for one's life? Highlighting the most rigorous and promising work in this field, we will attempt to construct a "happiness toolkit." The course will be didactic, interactive and experiential and provide an introduction to a burgeoning field of scientific inquiry.

Freshman Seminar 24N

Child Health in America (119619)

Judith Palfrey

2017 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

How can American health care be improved for children? How a nation cares for its children's health is often considered a measure of its commitment to the general citizenry and to its future. The members of the seminar will review together the history of children's health and health care in the United States, exploring the impact of geography, environment, nutrition, clean water, as well as of the scientific discoveries of the late 19th century and the early 20th century and the emergence of the high technology care of the middle and late 20th century. Then they will pose the question, "Does America provide children and youth the best possible health care available in the 21st century?" To approach this question, students will analyze the current causes of illness, disability and death among U.S. children and youth and compare United States epidemiology with that of other developed and developing nations. Students will also explore how child health delivery is financed.

Freshman Seminar 24P

Getting to Know Charles Darwin (128119)

William Friedman

2017 Fall (4 Credits)

Schedule: M 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Do you think you know who Charles Darwin was? The legend and sober-looking bearded scholar behind the most important paradigm shift in human history? In this seminar, we will read a selection of Darwin's publications (including parts of Darwin's seminal work, *On the Origin of Species*), as well as his private correspondence, paying close attention to the man behind the science as revealed by his writings. We will get to know Charles Darwin—the avid breeder of pigeons, lover of barnacles, devoted father and husband, gifted correspondent and tactician, and remarkable backyard scientist. In this latter vein, we will reproduce ten of Charles Darwin's classic Down House experiments that were central to making his case for natural selection and evolution in *On the Origin of Species*, as well as his many other books on natural history. Field trips to the Arnold Arboretum of Harvard University, the Museum of Comparative Zoology, and a local pigeon fancier will provide the setting for recreating a selection of the myriad observations of organisms and their interactions with the environment and each other that made Darwin the master of minutia and provided the foundation for his grand synthesis of evolutionary pattern and process. Each week, we will also read, react to (through writing), and discuss Darwin's published writings and letters.

Course Notes: Required field trips to the Arnold Arboretum of Harvard University, the Museum of Comparative Zoology, and a local pigeon fancier will be included. Transportation will be provided.

Freshman Seminar 24Q

Biology of Symbiosis: Living Together Can Be Fun! (110305)

Colleen Cavanaugh

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course examines the remarkable diversity of symbiotic associations on Earth, their ecology and evolution, and their roles in human health and disease, agriculture, and biotechnology. Symbioses - "living together" - with microbes are ubiquitous in nature, ranging from lichens to the human microbiome. Symbiosis drives evolution, resulting in "new organisms" and charges us to think about biodiversity on a new level. In this freshman seminar, microbial symbioses with animals (including humans), plants, fungi, protists will be discussed, complemented by microscopy and field trips to local environs including Boston Harbor Islands, the New England Aquarium, and your own microbiome.

Class Notes:

W., 2–4 with occasional meetings until 5 pm for trips or projects

Freshman Seminar 24U

How Did I Get Here? Appreciating "Normal" Child Development (128122)

Laura Prager

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Understanding "normal" growth and development may seem like a relatively easy task at first. We take the nuances of developmental differences for granted because we're so accustomed to experiencing them. Nevertheless, defining normal (versus abnormal) development is a complex and controversial task. Development involves a tricky intermingling of environmental stimuli, cultural and social expectations, rapid and not always intuitive changes in brain development, temperamental differences, genetic inheritance, and mind-boggling brain plasticity. The course will start with a consideration of general themes and then move to a chronologic perspective. First, we approach child development as a dynamic force, one which simultaneously engages multiple domains: social/relational, cognitive, physical, moral. We will then switch to examine stages of development in sequence, using our understanding of neurobiological, physical, cultural, and psychological factors to inform our assessment of how children change over time. Readings will include classic papers on development, textbook chapters that provide overviews of specific developmental stages, recently published research articles on genetic inheritance, selected contemporary children's and young adult literature, personal memoirs, and short stories written about childhood.

Freshman Seminar 25N

Finding Connections: Perspectives on Psychological Development and Mental Illness (122458)

Nancy Rappaport

2017 Fall (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

The seminar's challenge will be to deepen our understanding of human development and how individuals cope with serious emotional or social difficulties (neglect, bipolar disorder, autism, depression, schizophrenia). We will use multiple perspectives: medical observations and texts that provide practical knowledge (e.g. The New England Journal of Medicine review articles), narrative readings to understand how patients experience the meaning of illness from the inside out (e.g. The Center Cannot Hold), visitors who will discuss their experience with mental illness, and how development-related mental illness is portrayed in the press (e.g. The New Yorker articles). We will start with the mental life of babies and how scientists interpret infants' nonverbal ways of finding safety and security. This begins the journey of our understanding fundamental needs for tenderness, holding, and making meaning. Understanding how conditions such as autism, depression, and schizophrenia are described in clinical research and literature will help us to appreciate the biological vulnerabilities and relational patterns that may disrupt the human connection. We will examine the resourcefulness required for both fragility and resiliency. Throughout the seminar, the instructor, as a practicing child and adolescent psychiatrist, will bridge the gap between research findings, clinical applications, and everyday insight.

The Universe's Hidden Dimensions (121549)

Lisa Randall

2017 Fall (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This seminar will give an overview and introduction to modern physics. As with the book, *Warped Passages*, on which it will be loosely based, the seminar will first consider the revolutionary developments of the early twentieth century: quantum mechanics and general relativity; and then it will investigate the key concepts which separated these developments from the physical theories which previously existed. We will then delve into modern particle physics and how theory and experiment culminated in the "Standard Model of particle physics" which physicists use today. Then we will move beyond the Standard

Model into more speculative arenas, including supersymmetry, string theory, and theories of extra dimensions of space. We will consider the motivations underlying these theories, their current status, and how we might hope to test some of the underlying ideas in the near future.

Prediction: From Ancient Omens to Modern Computer Simulations (156929)

Alyssa Goodman

2017 Fall (4 Credits)

Schedule: W 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

We will discuss the variety of approaches humans have taken to predicting their own future. Early weeks will focus on Omens, Oracles, Religion and Prophecy. Next, we will move on to the so-called Scientific Revolution, exemplified by the work of Galileo, and the Age of Exploration, enabled by John Harrison's solution to finding longitude at sea. The last several weeks of the seminar will focus on predictive work in epidemiology, finance, and climate, and ultimately on work about the Universe's future. Students will conclude with a discussion of how computer models of health/wealth/climate combine to predict our future.

Freshman Seminar 27K

Energy: Be the Change (159950)

Mara Prentiss

2017 Fall (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

In the US, energy use creates large political and social tensions and much emphasis is placed on climate change. In China, health issues surrounding energy use are emerging as a critical issue. Importantly, there are many areas where the role of energy is often overlooked. A large fraction of current geopolitical tensions arise from issues originating in energy consumption, and that fraction may increase as water use and energy use become more closely tied. Too many discussions of energy focus on one feature of the problem, without considering how a change in one area will inevitably ripple out with the power to transform our relationships with each other and with the physical world. Some of those ripple effects are

enormously positive, others are not. The goal of the course will be to choose energy changes that we would like to happen and to form a realistic plan for making that change occur. An important feature of the discussion will be considerations about what is physically possible; however, the major emphasis will be on trying to understand the connections that will be altered by that change. Any change, however laudable, inevitably creates both winners and losers. For change to happen, losers must at least be brought to accept the change. One goal of the course will be to establish local and global forums that allow us to learn more about people's reactions to proposals for energy change so that our proposals for change have a real possibility of coming to pass.

Death and Immortality (110425)

Cheryl Chen

2017 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

In this seminar, we will discuss philosophical questions about death and immortality. What is death? Is there a moral difference between "brain death" and the irreversible loss of consciousness? Is the classification of a person as dead a moral judgment, or is it an entirely scientific matter? Is death a misfortune to the person who dies? How can death be a misfortune if you are no longer around to experience that misfortune? Is it possible to survive after death? What does it mean for you to survive after your death? Is there such a thing as an immaterial soul distinct from your body? Is immortality something you should want in the first place? Even if you do not live forever, is it nevertheless important that humanity continues to exist after your death? By discussing these questions about death, we will hopefully gain insight about the importance and meaning of life.

Freshman Seminar 30V

Mexico: Revolution, Authoritarianism and Democracy: 100 Years (156163)

Jorge Domínguez

2017 Fall (4 Credits)

Schedule: M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Mexico, a U.S. neighbor, over the past century experienced a prolonged violent revolutionary war and subsequent transformation, established one of the world's longest-lived authoritarian regimes, and has been building a robust democratic political system. The combination of these three dramatic moments is rare worldwide. Most countries in the past century have had only one or two such moments, not all three. Why did Mexicans kill each other so relentlessly for so long? Why did they build, from the rulers' perspective, perhaps the world's most effective authoritarian regime? Why was democratic transition so slow-moving and what forms has it taken? What has been the role of statesmen and scoundrels, business executives and indigenous movements, political parties and the experience of existing on the U.S. border? Examine why Mexico had no Lenin, no Adenauer, and no Mandela. Ponder why some Bishops in the 1920s ordered priests to refuse the sacraments, and why such an ethnically heterogeneous country lacks ethnic-based political parties. The seminar will also examine the deliberate collective wisdom of democratic politics, steering a successful transition since the late 1990s.

Recommended Prep: Please check the Canvas website, <https://canvas.harvard.edu/courses/27313>, for reading materials for the 1st class on August 30th.

Nietzsche (159736)

2017 Fall (4 Credits)

Schedule:

W 0700 PM - 0859 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Friedrich Nietzsche addresses some of the big questions of human existence in a profoundly searching but often disturbing manner that continues to resonate with many. Hardly any philosopher (except Karl Marx) has exercised such a far-reaching and penetrating impact on intellectual life in the last 150 years or so. He has influenced thinkers and activists across the political spectrum. Nietzsche has always been of special interest to young people who have often appreciated the irreverence and freshness of his thought, as well as the often very high literary quality of his writing. In this course, we explore Nietzsche's moral and political philosophy with emphasis on the themes he develops in his best-known and most accessible work, *The Genealogy of Morality*. The best-known themes from this book include the slave rebellion in morality, resentment, bad conscience, and ascetic ideals. However, we also read several other of Nietzsche's works, and do so chronologically (except that we begin with his auto-biography, *Ecce Homo*, which Nietzsche wrote briefly before his mental collapse in 1889). The others works include *The Birth of Tragedy*, *The Gay Science*, *Beyond Good and Evil*, and *The Antichrist*. We do not read any secondary literature, though the instructor will recommend such literature as appropriate. The point is to become familiar with Nietzsche's writings themselves and to engage with his thought.

Freshman Seminar 31N

Beauty and Christianity (121903)

Robert Kiely

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In Book X of *The Confessions* Augustine wrote, "I have learned to love you late, Beauty at once so ancient and so new!" In addressing God as source and model of beauty, Augustine joins theology and aesthetics in one sentiment that has informed and sometimes troubled Christianity throughout its history. There is no doubt that the life and teachings of Jesus have inspired some of the greatest works of art, literature, and music in Western culture, but it is also true that Christians have not always agreed on the definition and function of beauty. The seminar will consider certain key Christian aesthetic theories, including those of Augustine, Gregory the Great, Aquinas, and Calvin. But the focus will be on the analysis of particular works, selections from Dante's *Paradiso*, poems of Herbert, Donne, and G.M. Hopkins, *The Little Flowers* of St. Francis, Bunyan's *Pilgrim's Progress*, Hawthorne's *Scarlet Letter*, Melville's *Billy Budd*, works of C.S. Lewis, and the short stories of Flannery O'Connor. Included as well will be paintings (eg Italian Renaissance depictions of Jesus, Mary, Mary Magdalene, John the Baptist, and St. Sebastian) and choral music (eg Bach's *Saint Mathew Passion* and selected African-American spirituals). The abiding question will be: In what ways does aesthetic form—beauty—enhance, qualify, complicate, or obscure the gospel?

The Art of Storytelling (122447)

Deborah Foster

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Throughout the centuries and across all continents, men and women have told stories to express the values they find in their common experiences of everyday life. While the multiple storytelling traditions of the teller influence the content and form of the emergent tale, each narrator shapes the story to reflect his or her own intentions, making it personally expressive as well as publicly meaningful to a particular audience in a specific place and time. Drawing on scholarship of oral storytelling traditions and reading (in translation) myths, tales, legends, plays and other forms from several traditions, this seminar will examine the nature of storytelling, its enduring appeal, and its ability to adapt to multiple new platforms (stage, print, film, internet). Participants will engage in the storytelling process itself in order to understand better the interrelationship of structure, plot, character, imagery, rhythm, voice and gesture to the story as a whole in a variety of media, ranging from mime to video.

Requirements:

Course open to Freshman Students Only

Freshman Seminar 33X

Complexity in Works of Art: Ulysses and Hamlet (116807)

Philip Fisher

2017 Fall (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Is the complexity, the imperfection, the difficulty of interpretation, the unresolved meaning found in certain great and lasting works of literary art a result of technical experimentation? Or is the source extreme complexity—psychological, metaphysical, or spiritual? Does it result from limits within language, or from language's fit to thought and perception? Do the inherited forms found in literature permit only certain variations within experience to reach lucidity? Is there a distinction in literature between what can be said and what can be read? The members of the seminar will investigate the limits literature faces in giving an account of mind, everyday experience, thought, memory, full character, and situation in time. The seminar will make use of a classic case of difficulty, Shakespeare's Hamlet, and a modern work of unusual complexity and resistance to both interpretation and to simple comfortable reading, Joyce's Ulysses. Reading in exhaustive depth these two works will suggest the range of meanings for terms like complexity, resistance, openness of meaning, and experimentation within form.

Course Notes: There may be interviews for selected applicants during Opening Days week.

Requirements: Course open to Freshman Students Only

Freshman Seminar 34O

You and Your Camera (108513)

Peter S. Pershan

2017 Fall (4 Credits)

Schedule: T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Although 2-dimensional images of the 3-dimensional world have been created for well over 30,000 years, up until the 19th century the skills for making these pictures were limited to relatively few people. Photography has changed this. Some estimates assert that there are now of the order of 1,000,000,000,000 (one trillion) pictures taken each year. You might ask yourselves why people take all these pictures. Another question you might ask is what characterizes a good picture. More to the point how do the pictures that each of us take compare with those of famous photographers.

The seminar will start with a historical review of art and photography in order to develop appreciation for both, the various reasons that we want images and the hallmarks of the best images. Certainly the art of taking good pictures can be empirically learned without understanding the technical aspects of photography. On the other hand, the seminar will discuss aspects of the scientific basis behind the empirical practices in the hope that this will enhance your flexibility in applying the practices. Topics to be covered include both the physical optics of simple and compound lenses as well as the quantum physics that is the basis of the electronic devices that are fundamental to digital photography. The differences between the RAW, JPEG and TIFF methods for storing digital photographs will be discussed along with artifacts that can arise in the digitization of images. One issue that arises in color photography is the manner in which the human visual system transforms the wavelength information in the light entering the eye into perceptions of color. The seminar will explain the trichromatic theory of color vision and then discuss the color management systems for display and printing. Finally, the seminar will discuss methods for editing pictures. Software that may be discussed include the open source (free) GIMP and RawTherapee and/or Adobe Lightroom and Photoshop.

Course Notes: Arrangements for loaned cameras will be made for those that do not own one.

Recommended Prep: Ideally students should have a good high school physics course; however, individuals who are motivated to understand the science of photography should not have a problem with the material taught in the seminar. Similarly students should feel comfortable with high school algebra and trigonometry.

Broadway Musicals: History and Performance (156241)

Carol Oja

2018 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This seminar will explore a core group of Broadway musicals. Historical, musical, and theatrical discussions will be paired with student performances and staging of individual scenes (done under the guidance of Allegra Libonati from the A.R.T. Institute). The seminar will touch on signal moments over the course of the "Golden Age" of the musical, stretching up to the present day: *Oklahoma!* (1943), *South Pacific* (1949), *West Side Story* (1957), *A Chorus Line* (1975), *Wicked* (2003), and *In the Heights* (2008). The class will attend a performance of Stephen Sondheim's *A Little Night Music* at Boston's Huntington Theatre. Blending historical study and hands-on practice, this seminar aims to offer a wide range of perspectives on the interpretation and performance of Broadway musicals.

Course Notes: Student musicians and actors are welcome in the course, as are students who love to watch shows but not necessarily perform in them. Ability to read music is desirable but not required.

Language and Prehistory (117406)

Jay Jasanoff

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

It was discovered around 1800 that the major languages of Europe, along with the ancient languages of India and Iran, were descended from an unattested parent, formerly known as "Aryan" or "Indo-Germanic," but today usually called Proto-Indo-European. The identification of the Indo-European family raised many questions, some purely linguistic (e.g., what was Proto-Indo-European like; was it grammatically complex or "primitive"?), and some more far-reaching (e.g., who were the speakers of Proto-Indo-European; why did Indo-European languages spread so widely?). Questions of the first type eventually led to the birth of the new academic field of linguistics. Questions of the second type, however, misled some nineteenth- and early twentieth-century intellectuals to posit a genetically and culturally superior Aryan "race." Although this idea is now universally rejected, linguistic evidence still plays an important role in studies of the past. Recent debates about the origins of "Western civilization," for example, center on the alleged presence of borrowed Egyptian words in Greek, while theories about the settlement of the Americas depend on supposed linguistic connections between the New World and other continents. This seminar will explore the use and misuse of such methods. What, if anything, does the fact that languages are related tell us about their speakers? How can we distinguish genuine cases of linguistic borrowing or "influence" from the kinds of resemblances that come about through pure chance? Answers to these and similar questions will be sought through case studies, with readings chosen to illustrate and contrast scholarly and unscholarly approaches. The work for the course will consist of readings, four or five short problem sets, and a final project with both written and oral components.

The Art and Craft of Acting (126838)

Remo Airaldi

2017 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

We've all watched a great performance and wondered, "How did that actor do that?" Acting is undoubtedly the most popular, most widely experienced of the performing arts and yet, in many ways, it remains a mystery. This seminar will give students an opportunity to demystify the art of acting by introducing them to the basic tools of the trade; they will learn about the craft of acting by actually "doing" it. It will provide an introduction to acting by combining elements of a discussion seminar with exercises, improvisations and performance activities. Improvisation will be used to improve group/ensemble dynamics minimize habitual behaviors and to develop characters. Students will explore a range of acting techniques designed to give students greater access to their creativity, imagination and emotional life. The aim will be to improve skills that are essential to the acting process, like concentration, focus, relaxation, observation, listening, etc. In the later part of the term students will work on monologues. Students will also attend and critique productions at the Loeb Drama Center and other theaters in the Boston area.

Course Notes: Students will be required to attend theater performances (dates TBD) during the course of the term. There will be no charge to the student.

Requirements: Course open to Freshman Students Only

The Creative Work of Translating (128124)

Stephanie Sandler

2017 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Translation makes culture possible. Individual writers and thinkers draw sustenance and stimulation from works created outside their own cultures, and artists working in one format get ideas from those working in entirely different media. Translation between languages and between art forms will center our seminar's work. Taking a broad view of translation as a mental activity, we will study poems, fiction, film, photography, and music. We will stretch our own imaginative capacities by transposing material across media and genres, creating homophonic translations, and translating between languages. We will work individually as well as collaboratively. We will read a small amount translation theory, and some reflections by working translators. We will invite into our classroom a few practicing poets, artists, and translators and attend poetry readings and lectures at Harvard. The only requirement is some knowledge of a language besides English – and a readiness to play with languages, art forms, and texts. Readings from Kazim Ali, Walter Benjamin, Jorge Luis Borges, Joseph Brodsky, Anne Carson, Emily Dickinson, Forrest Gander, Susan Howe, Sor Juana Inés de la Cruz, Velimir Khlebnikov, Vladimir Nabokov, Sappho, W. G. Sebald, Tracy K. Smith, Marina Tsvetaeva, Wang Wei, and the Bible; music by John Adams, David Grubbs, and others; artwork by Peter Sacks. Films to include *Despair* and *The Golem*.

Recommended Prep: Requires knowledge of one language besides English.

Requirements: Course open to Freshman Students Only

Folklore and the Culture of Childhood (128140)

Maria Tatar

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course begins by examining the stories of Charles Perrault, the Brothers Grimm, and Hans Christian Andersen and explores the migration of fairy tales into literary and cinematic cultures for adults and for children. From fairy tales we turn to fantasy literature and to the great counterfactuals in Other Worlds constructed for children. Lewis Carroll's *Alice in Wonderland*, J.M. Barrie's *Peter Pan*, J.K. Rowling's *Harry Potter and the Deathly Hallows*, and Neil Gaiman's *Ocean at the End of the Lane* will guide us through our investigation of what Graham Greene called the "excitement and revelation" of books read in childhood.

Course Notes: Open to Freshmen only.

To Far Places: Literature of Journey and Quest (126907)

William A. Graham

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this course, we read a highly diverse group of engaging texts in English translation. Most are fictional, mythic, or epic texts. All engage the theme of journey, quest, pilgrimage, passage, or sojourning. We will be attentive to enduring themes and basic questions associated with this varied literature, including parting and return, separation and reintegration, homelessness and homecoming, epic adventure and exploration, trial and suffering, loss and recovery, heroic action, tragedy, pathos, orientation and disorientation, internal and external travel, faith and courage, aesthetic vision, heightened perception, self-discovery and growth, companionship, loneliness, risk, and death. Readings will be selected from among the following: Gilgamesh, J.R.R. Tolkien's *Hobbit*, Homer's *Odyssey*, Virgil's *Aeneid*, Matsuo Basho's *Narrow Road to Oku*, Hermann Hesse's *Siddhartha*, Thomas Mann's *Death in Venice*, Rudyard Kipling's *The Man Who Would be King*, Ashvagosha's *Life of the Buddha*, Shusaku Endo's *Deep River*, Annie Dillard's *Pilgrim at Tinker Creek*, John Hersey's *A Single Pebble*, Charles Frazier's *Cold Mountain*, Fariduddin Attar's *Conference of the Birds*, Naguib Mahfouz's *Journey of Ibn Fattouma*, Cormac McCarthy's *The Road*, Rachel Joyce's *The Unlikely Pilgrimage of Harold Fry*, and Italo Calvino's *Invisible Cities*.

Freshman Seminar 36S

Comparative Historical Mythology (109498)

Michael Witzel

2017 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

This seminar will deal with an innovative approach to comparative Mythology, detailed in my 700 pp. book on the topic (OUP, Dec. 2012). Comparative mythology has been a well-trodden but controversial field since at least 1800. The proposed seminar will discuss the matter in a new way by incorporating an historical approach, which has so far been lacking. The two most prominent explanations for the wide-spread, worldwide similarities in myths have been archetypes (C.G. Jung) and diffusion (L. Frobenius / H. Baumann). Both approaches are inadequate to explain these similarities. Approaching myths historically, and working backwards from our earliest written sources (Egypt, Mesopotamia, Levant, India, China, Maya, etc.), earlier stages in the development of mythologies can be detected through successive reconstructions. These are supported by the additional testimony of oral texts found across the globe. Further, recent developments in human population genetics as well as in archaeology, anthropology and comparative linguistics sustain the proposed historical model, which ultimately, but rather tentatively, reaches back to the time of the "African Eve." This seminar will investigate the ways myths have been compared in the past; further, the underlying assumptions about human spirituality and religion, as well as available scientific evidence for such models. The new historical and comparative proposal will be tested against this evidence. All of this offers a wide scope for students' class room intervention and individual research in a multitude of ancient and oral texts (in translations) from a variety of languages as well as in the sciences.

Freshman Seminar 36X

Money Matters (108768)

Evridiki Georganteli

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0329 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Money matters aims to engage first-year students with the economics, politics and aesthetics of one of the most fascinating and enduring aspects in human history. The seminar is a study of money in all its manifestations from the early agrarian societies to the first financial crisis of the 21st-century global

market. How have individuals and societies reacted to and used money in business, politics and religion? What are the factors that shaped the metallic content and iconography of coins from the 7th-century BC to the end of the Gold Standard in the 20th century? Why are early modern American and European banknotes so important for the study of social history? What are the links between art, literature, theatre, cinema and money? Seminars will take place at the Harvard College, the Harvard Carpenter Center for the Visual Arts and the Harvard Art Museums, introducing students to the world-class Harvard Coin Collection and offering them the opportunity to handle, research and discuss priceless artefacts. Money matters is intended for students with an interest in history, art history, archaeology, political science, economics and the study of world religions. Handling sessions, group discussions and a short essay on a choice coin from the Harvard Coin Collections will offer students a sense of immediacy and accessibility of Harvard's splendid numismatic holdings and the opportunity to understand why money makes indeed the world go round.

Muslim Voices in Contemporary World Literatures (119569)

Ali S. Asani

2017 Fall (4 Credits)

Schedule:

T 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What do Muslims think of acts of terrorism committed in the name of Islam, the mixing of religion with politics, the rights of women, the "West"? This seminar investigates the viewpoints of prominent Muslim writers on these and other "hot button" issues as reflected in novels, short stories and poetry from different parts of the world. Explores a range of issues facing Muslim communities in various parts of the world by examining the impact of colonialism, nationalism, globalization and politicization of Islam on the search for a modern Islamic identity. Readings of Muslim authors from the Middle East, sub-Saharan Africa, South Asia, Europe and America.

Course Notes: No prior knowledge of Islam required. Assignments include compiling a portfolio of creative responses to the weekly readings using different media.

Freshman Seminar 38T

Beethoven's String Quartets (119923)

Anne Shreffler

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Since the late eighteenth century, composers have often reserved their most ambitious and complex thoughts for their string quartets. The ensemble of two violins, viola and cello can create a homogeneous sound but also has an enormous potential for sonic variety. Beethoven's sixteen quartets span almost his entire creative output, ranging from the classical Six Quartets, Op. 18 of 1800, to the transcendent, pioneering late quartets, the last completed in 1826, the year before his death in 1827. These works contain the full range of Beethoven's musical expression. The seminar will work from scores, selected recordings, and live performances connected to the Parker Quartet's Harvard residency. Seminar members will play excerpts from the quartets in class. Everyone shall prepare individual projects. We will also go on a field trip to hear a professional string quartet. Although the primary focus will be on the participants' interpretations of the works, the seminar will also read and discuss texts by Lewis Lockwood, Joseph Kerman, Robert Winter, and others. Our goals are to get to know one of the great collections of works in Western music; to improve listening and score-reading skills; to learn to talk about and write about music.

Course Notes: The seminar includes required attendance at one live performance outside of the regular class time.

Recommended Prep: Participants should be able to read music (at least treble and bass clef).

Requirements: Course open to Freshman Students Only

Freshman Seminar 40D

The Transformation of Marketing (160713)

Elie Ofek

2018 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Marketing, as you will find in this seminar, refers to the set of activities needed to form and sustain a healthy business by fostering meaningful exchanges between the organization and its chosen customers. Marketing helps create value for consumers and extract a share of that value for the organization. We will spend time understanding the fundamentals of marketing management and examine how recent economic, technological, cultural, and societal developments have affected the marketing field. We will first cover the central themes of customer behavior, strategic marketing analysis, innovation forecasting, and brand management. Then we will explore how marketing has dramatically evolved in recent years due to: the digital and social-media revolution; firms' desire to globalize and the cross-cultural challenges this entails; the increasingly consumer-oriented healthcare setting; and societal trends calling on companies to exhibit greater social responsibility. We will close the seminar by examining issues of marketing leadership. In

examining these themes, we will draw upon research from the domains of psychology, sociology and economics. Each session will have assigned pre-readings that may include book chapters, articles, case studies, and exercises. The discussion and material covered in class will rely upon these readings. During the term each student will identify a marketing phenomenon they find intriguing and that reflects concepts covered in class. Students will prepare a one-page summary of this business phenomenon and communicate it in a short presentation. The final paper for the course requires students to analyze a case study and turn in a short write up.

Freshman Seminar 40E

Law and Society through the Cinematic Frame (160785)

Ofrit Liviatan

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this seminar we will explore the interaction of law and society using the lens of film. The cinematic experience has become a key site through which the public understanding of law is produced, debated and influenced. Driven first and foremost by market and audience considerations, law related films often inject drama, contentious dimensions and even misrepresentations into the portrayal of real events. Nonetheless, by raising awareness about legal themes that pervade the plot, these films offer valuable insights toward discovering social scientific perspectives on the manner in which law functions in everyday life. Hence, the seminar will not focus on legal doctrine or teach you the fundamentals of the legal profession. Rather, using films as a framework for discussion, we will study law's working in relations to the social, political, economic and cultural environments in which it operates. Central thematic topics to be discussed include: the relationship between law, justice and morality; how does law intervenes in social relations and whether it is over-utilized as part of these relations; the dynamics between law and social change; is access to the legal process equal to everyone; and the function of law in deeply divided societies. Throughout the semester film viewing will occur outside class as part of your weekly preparation for the seminar. However, we will dedicate one class as a field trip to watch a law-related film together and analyze its themes through the sociolegal perspective.

Free Speech (110427)

Sanford Ungar

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this age of rapid globalization and heightened cross-cultural contacts, nations struggle to reaffirm their identities and values. In the United States, one of the most precious values is free speech, embedded in the First Amendment to the Constitution and regarded as a keystone of American democracy. But arguments over the boundaries of free speech have become intense, especially in the era of electronic communication. This seminar will examine the dialogue taking place within the United States and around the world on free speech issues – sometimes civil, but often a political or cultural confrontation that turns violent. We will discuss international and domestic protests over politically sensitive cartoons, controversies over Holocaust denial, whether hate speech should be banned on campuses, whether the domestic media can ever be legitimately constrained on national security grounds, whether anti-gay religious activists have a right to disrupt military funerals, whether pornography and violent music lyrics should be regulated, and what constitutes free speech on the Internet or cell phones. Through Supreme Court decisions and by other means, we will examine the debate over what it means to be patriotic and whether patriotism requires Americans to say, or prohibits them from saying, certain things – and examine how standards have changed over the years. We will ask whether other countries' attitudes toward free speech and the other First Amendment freedoms should influence US foreign policy toward those countries. Examples of constraints on free speech in our daily lives and work, unwitting or not, will also be considered.

Making the Grade? Middle and High School Math Education in the U.S. (109469)

Robin Gottlieb

2017 Fall (4 Credits)

Schedule:

W 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What are the goals of mathematics education at the middle and high school level, and how do these goals impact our evaluation of the success or failure of math education in America? Why does math education at these levels matter? What societal structures (historic, economic, political, cultural) impact mathematics education? How does math education in turn impact societal structures? As the world changes, how do the goals of mathematics education change, and in what ways? We will explore these issues to become more educated participants in this ongoing discussion.

Course Notes:

This is not a mathematics course and has no prerequisites. A special invitation is extended to students not planning to concentrate in math.

Sick and Tired of being Sick and Tired: Health Disparities and African Americans (159832)

Evelynn Hammonds

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Since the arrival of Africans from Africa to America, their health and health care has been a critical issue for the nation. From the era of slavery to the present, African Americans have been disproportionately burdened by disease and ill health. Health disparities are the "inequalities that occur in the provision of healthcare and access to healthcare across different racial, ethnic and socioeconomic groups." This course examines this issue over the long time frame from the 17th century to the present. Currently, compared to the white population, African Americans are at an overall greater risk for many serious and life threatening diseases. This course will examine how these disparities emerged over time. It will explore the strategies and practices that African Americans employed to improve their health care. It will also examine, the ways that cities, states and the federal government supported or ignored the health of African Americans.

The American Death Penalty: Morality, Law, and Politics (109475)

Carol Steiker

2017 Fall (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

This seminar will address the controversies that swirl around the American death penalty in the distinct but related contexts of morality, law, and politics. At the level of moral theory, we will consider whether the death penalty is ever justified as a state practice, both in the abstract and in application, given concerns about its fairness and efficacy in deterring crime. We will explore the U.S. Supreme Court's "constitutionalization" of capital punishment starting with its landmark decision in 1972 in the case of *Furman v. Georgia*. We will trace the Court's attempt to deal with issues of fair process, proportionality, cruelty, reliability, and racial discrimination. Close readings of key opinions will show how the Court's interpretations of the majestic generalities of the Constitution—the guarantees of "due process", "equal protection," and protection from "cruel and unusual punishments"—have been informed by moral theory. Finally, we will consider the American death penalty in political context, both nationally and internationally. We will assess explanations for the anomaly of American retention of capital punishment, alone among Western democracies. We will consider how moral philosophy and legal regulation have affected the course of the American death penalty in the political sphere and contemplate the legal and political future of the institution. Will (or can) the death penalty be reformed? What are the prospects for nationwide abolition (or large-scale resurgence)? Will (or should) the death penalty's future lie in the hands of the courts or the political branches of government?

Economic Development (156421)

Michael Kremer

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Understanding the determinants of the wealth of nations has long motivated the study of economics and it is arguably the most important problem in the field for human welfare. This seminar will examine economic development, looking both at historical experience and at contemporary issues in developing countries. It will focus on writing in economics, but will also draw on other disciplines, including political science and sociology. The course will start with readings of Adam Smith, Karl Marx, and Max Weber. Participants will then read works illustrating some of the techniques and modes of reasoning associated with contemporary microeconomics and statistical analysis. Finally, it will conclude with contemporary writing on development, including work that addresses big-picture political economy models of the role of institutions in development and more microeconomic approaches.

Recommended Prep:

Students are expected to have had some background in economics, such as an AP economics course in high school, or simultaneous enrollment in Ec 10a or Social Analysis 10.

Freshman Seminar 41K

Human Rights, Law and Advocacy (156502)

Susan Farbstein

2017 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Human rights practitioners confront numerous ethical, strategic, and legal dilemmas in their struggles for social justice. This freshman seminar explores the underlying legal framework in which human rights advocates operate, and then uses specific case studies to consider the various challenges they must grapple with in their work. The seminar is designed to encourage students to critically evaluate the human rights movement while offering an introduction to some of the essential tools and strategies used by human rights advocates, including advocacy, litigation, documentation, and report writing. Students will be asked to grapple with tough questions, such as: How can human rights be harnessed to successfully

influence and change behavior? What does responsible, effective human rights advocacy look like? How do we engage without perpetuating power differentials along geopolitical, class, race, gender, and other lines? How do we find ways to work in collaboration with directly affected communities? What does it mean to be a human rights advocate working on abuses affecting individuals and communities remote from yourself? How do you balance broader advocacy goals with the needs of individual survivors or clients? How do you determine when to intervene and devote limited resources to a given issue? Students will also consider a series of dynamics (e.g., north/south, insider/outsider, donor/donee, lawyer/non-lawyer) that influence how and why advocacy is formulated and received. Finally, the seminar considers the limits of the human rights paradigm and established methodologies, such as litigation and "naming and shaming," and explores alternative sources and forms of advocacy, including the role of community lawyering in the human rights context.

American Presidential Campaigns and Elections 1960-2016 (124777)

Maxine Isaacs

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

For two hours each week, students will work to understand the history, forces and politics of American presidential campaigns and elections. Each student will be "responsible" for one presidential election between 1960 and 2016, and, together, members of the seminar will develop some perspective on dramatic changes as well as enduring factors that have shaped our own times, issues and society. With the help of some guests – practitioners including political leaders, public opinion analysts and journalists – students will develop a deeper understanding of contemporary politics; the impact of demographic patterns and changes; public opinion and polling; and political communication. Students will learn about the relationship among politics, news and public opinion, and who influences whom. Participants will be introduced to excellent contemporary studies about modern presidential campaigns and elections. At the end of the term, students will make oral reports to the class on lessons learned from a past election which can help all of us better understand this one.

From the Arab Spring to ISIS: National Security Challenges in the Mideast (124885)

Charles Freilich

2018 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The Middle East is home to many diverse peoples, with ancient and proud cultures, in varying stages of political and socio-economic development, often times in conflict. Now in a state of historic flux, the Arab Spring and subsequent regional tumult have transformed the Middle Eastern landscape, with great consequences for the national security strategies of the countries of the region. The primary source of the world's energy resources, the Middle East remains the locus of the terror-WMD-fundamentalist nexus, which poses a significant threat to regional and international security, as does the rise of ISIS. The course surveys the national security challenges facing the region's primary players (Egypt, Saudi Arabia, Iran, Iraq, Syria, Lebanon, Israel, the Palestinians, Jordan, and Turkey) and how the recent upheaval has affected them. Unlike many Middle East courses, which focus on US policy in the region, the course concentrates on the regional players' perceptions of the threats and opportunities they face and on the strategies they have adopted to deal with them. Students play the role of senior advisers to the actual regional leaders in power and write "real world" policy papers for them, from their perspective and given the strategic, political and personal constraints they face. The course provides an essential vantage point for all those interested in gaining a deeper understanding of the region, especially those with an interest in "real world" international relations and national security.

Human Rights and the Global South (160211)

Jacqueline Bhabha

Caroline Elkins

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Human rights have become a global lingua franca, invoked by leaders and movements across the political, religious and cultural spectrum. Because they can come into conflict with each other, human rights can serve to justify wars (to combat terrorists), religious intolerance (to counter fundamentalists), gender discrimination (to support religious tenets), refusal of safe haven to refugees (to promote domestic human security). Despite over half a century of international law making and domestic enactment of human rights treaties, and despite a vibrant civil society that has embraced human rights principles world-wide, remedies for violations such as torture, rape, genocide, political or economic persecution, and crippling destitution, remain elusive. This dilemma is particularly clear in situations of forced migration, when vulnerable populations are separated from individuals and institutions that traditionally provide support. This seminar will focus on the Global South and address key issues in contemporary human rights theory and practice through the lens of displaced, disenfranchised, and threatened individuals and groups. Members of the seminar will first study the philosophical and political traditions that led to codification of human rights. The seminar will then cover the legal frameworks of contemporary international human rights and humanitarian law and examine how they affect some of the most egregious human rights violations of the current period. Case studies of pivotal controversies and decisions will be examined to explore such questions as who is a refugee or an internally displaced person (IDP), what is trafficking, when is deportation justified, what protections do civilians have in conflict settings, and what are major crimes of atrocity and war.

Freshman Seminar 43H

White Collar Blues?: Work in the Age of Flexible Capitalism (160231)

Rachel Meyer

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Does flexible work lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? This course will examine the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory, and we will critically engage in the debate about the social and personal consequences of such "flexible" labor. We will investigate what flexibility means in a variety of economic sectors and occupations, exploring the experience of work in the contemporary political economy with an

eye toward both its liberating and oppressive potential. How do different forms of work affect our personalities, life circumstances, and connections to each other? What is meaningful work? Our approach will be rooted in the crucial question of workers' control over their own labor and we will explore this through case studies. What does flexibility mean for tech workers in Silicon Valley and bankers on Wall Street? Throughout the course we will pay particular attention to occupations where social class is ambiguous or problematic, leading us to the question: what does it mean to be a worker versus a professional? In examining the labor process under modern capitalism we will focus on both its structural aspects as well as on culture, ideology, and identity. And we will examine how the workplace intersects with gender, the family, and one's experience outside of the factory gate or office cubicle. We will read prominent social theorists along with a variety of ethnographic accounts which in different ways seek to elucidate the conditions of work under modern capitalism.

Freshman Seminar 43J

The Economist's View of the World (108562)

N. Mankiw

2017 Fall (4 Credits)

Schedule:

T 0900 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar probes how economic thinkers from the right and left view human behavior and the proper role of government in society. Each week, seminar participants read and discuss a brief, nontechnical, policy-oriented book by a prominent economist. There will also be required writing assignments. Students must have some background in economics, such as an AP economics course in high school or simultaneous enrollment in Economics 10.

Recommended Prep: Students are expected to have had some background in economics, such as an AP economics course in high school or simultaneous enrollment in Economics 10a.

Requirements: Course open to Freshman Students Only

Freshman Seminar 43W

History, Nationalism, and the World: the Case of Korea (108515)

Sun Joo Kim

2017 Fall (4 Credits)

Schedule:

M 0300 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The colonialism and postcolonial division of Korea into North and South thrust the memory of past events into current political discussions as well as scholarly debates. This seminar investigates selected events in Korean history to map the interaction between historical writing and politics and to address questions such as why historians have emphasized certain periods and aspects of Korean history while ignoring others.

Course Notes: All readings will be in English.

Requirements: Course open to Freshman Students Only

Freshman Seminar 44G

Public Policy Approaches to Global Climate Change (115417)

Richard Cooper

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

After a review of what is currently known about greenhouse gas emissions' possible impact on climate and of how such knowledge is acquired, the seminar will explore the possible impact of climate change on social and economic conditions over the next century. Participants will investigate possible public policy responses to these developments, including actions both to adapt to and to mitigate climate change. What would be the costs of adaptation? Would an investment in mitigating the changes be worthwhile? The seminar will also address the requirements and possibilities for international cooperation in dealing with the problem of global climate change, the solution to which transcends national boundaries and competence. Throughout, the seminar will emphasize the analysis of complex problems in public policy. Members of the seminar will be exposed to concepts of cost-benefit analysis and considerations of uncertainty in decision-making. The seminar will rely on student research.

Course Notes: Open to Freshmen only.

Requirements: Course open to Freshman Students Only

Freshman Seminar 44J

Clash of Titans, Seats of Empire: The Aztecs, Toltecs, and Race of Giants in Ancient Mexico (116506)

William Fash

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The film "Clash of Titans" was a British extravaganza dedicated to exploring the ancient Greeks' concepts of the interactions between humans and their gods. In Ancient Mexico, the tale of Topiltzin Quetzalcóatl, Toltec Prince of Tula, is the best-known example of the intervention of rival gods, in the affairs of kingdoms and empires, and serves as the point of departure for our seminar. Just as the Greeks countenanced sacrifices and political assassinations, in Ancient Mexico the three great empires practiced human sacrifice, regicide, and engaged heavily in warfare which was vital in their statecraft and economy. We will explore how these central components were explained and justified in their mythology, why reciprocity with the gods was so vital, and how and why each empire came to a violent end. We begin with the first-person description of the Aztec Empire and its violent conquest, penned by a foot soldier in Hernán Cortés's army, Bernal Díaz del Castillo. In the following weeks we will explore the environmental basis, religious dimensions, and social and political development of civilization, cities, at the three seats of empire in ancient Mexico. We will make extensive use of Peabody Museum collections, archaeological studies, historical accounts, and recent films and other media to critically examine ancient practices and current perceptions of the Aztec empire (1428-1519 CE); its predecessor the legendary Toltec empire of Tula (850-1100 CE); and the foundational Teotihuacan empire (100-550 CE), known as "The City of the Gods" to people throughout the region. The Aztecs and Toltecs went to Teotihuacan on pilgrimage every 20 days, because the scale of that ancient city was so massive, the architecture so impressive, and the religious art and historical lore so compelling, that the Aztecs had a legend that it was built in an earlier creation, by a race of giants. Seminar participants will explore how the biases of the observer play a role in describing and explaining "the Other." Students will analyze the ways in which religion and the quest for power fueled the genesis, expansion and demise of all three empires. First-years in this seminar will also explore the ways in which the living descendants of the Aztecs are reviving their traditional culture and how the Pre-Columbian civilizations are integral to the national identity of Mexico and Chicanos in this country, vs. the way they are portrayed in Hollywood and U.S. popular culture, through films and other media in the U.S. and Mexico.

Course Notes:

No background or previous experience, on or in Mexico is required, only an open mind.

Freshman Seminar 48E

Health and Mental Health in Everyday Life (128123)

Mary Ruggie

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Why do students feel ill before an exam? Why do women seem to suffer more than men from depression and eating disorders, whereas men use and abuse substances more than women? Why do some race/ethnic groups have better or worse health and mental health outcomes than others? These are some of the questions this course addresses. Using interdisciplinary perspectives we will investigate how such social and personal characteristics as gender, race/ethnicity, family background, and self-esteem impact

health and mental health behaviors and outcomes. We will also examine how specific configurations of circumstances and contexts contribute to health and mental health problems. For instance, college students, regardless of gender, race/ethnicity, etc., are increasingly experiencing stress and turning to amphetamines at higher rates than young adults who are not in college. One goal in these classes will be to explore causes and consequences. Another will be to understand the role of individuals themselves, their personal and social support networks, and health care professionals in developing and guiding positive strategies for coping and healing. Throughout, we traverse the boundary between health and illness in order to understand the complex web of factors that create and jeopardize well-being. Students will present analyses of the readings in class and write short papers based on class readings and discussions, as well as additional research. Students will also give two brief presentations: a team project and a representation of health and/or mental health in the arts.

Freshman Seminar 49G

The Holocaust in History, Literature, and Film (119999)

Kevin Madigan

2017 Fall (4 Credits)

Schedule: W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce freshmen to the use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. Here the seminar will use literary and cinematic resources as well as discursive theological ones. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude with an assessment of the role played by the Holocaust in today's world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

Freshman Seminar 49Y

Amateur Athletics (120400)

Harry Lewis

2018 Spring (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 13

The study of sports as a lens through which to explore social and ethical paradoxes of American life. Where did the amateur ideal come from, and does it make sense today? The history of athletics in ancient Greece, Victorian England, and America. College, Olympic, and professional athletics. Athletic competition as a social, spiritual, educational, and commercial institution. The relation to the amateur ideal of recent trends in higher education, including democratization, internationalization, and rising cost. **Requirements:** Presentations in class based on weekly reading and current events; 10-page research paper due at the end of the course, with a draft due earlier. The research project will be on a topic of the student's choosing related to the history and development of college sports. Students will learn to use the Harvard Archives, where in past years students in this seminar have uncovered fascinating, untold stories about Harvard's place in sports history.

Course Notes:

Requirements: Short papers based on weekly readings and targeted questions, and one 10-page research paper due at the end of the course, with a draft due earlier. The research project will be on a topic of the student's choosing related to the history and development of college sports. Students will learn to use the Harvard Archives, where in previous years students in this seminar have uncovered fascinating, untold stories about Harvard's place in sports history. Students should also expect to be active discussants and engaged followers of current events, calling relevant news stories to the attention of their fellow students.

Freshman Seminar 50C

The Art, Science and Technology of Glass (202997)

David Clarke

2017 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Glass is ubiquitous in our daily lives so it may be easy to forget what a remarkable material it is. It allows the passage of light and yet sequesters heat. Able to be colored and shaped, glass has been used for millennia as an aesthetic medium, whether in jewelry, stained glass windows, such as in Memorial Hall, and in the modern glass sculpture of artists such as Dale Chihuly. Glass has transformed the way we can view the world, through microscopes, telescopes or eye-glasses. Glass formed into fibers serves as the basis for modern telecommunications and glass can play a role in solar energy engineering. At a larger scale, glass is now also a substance for architectural expression. Glass is a material for all ages and all seasons, a material that can be plastic as well as brittle, a material that can be manufactured at the nanoscale and yet cast in sheets. Using a combination of readings, experimental exploration and discovery, students will have the opportunity to learn why glass is so unusual and how it has profoundly changed Society in many ways. The basis for many of its unusual properties, as well as its ability to be formed into complex shapes, will be illustrated by experimenting on the origins of color, the dichotomy between its plasticity and brittleness, its optical properties as well as its crystallization behavior. Many of these experiments also illustrate some of the essential elements of modern materials science and engineering. Each class will include readings describing the historical, artistic or scientific basis for the individual topics. Students will also undertake a research project culminating in a final, preferably video presentation.

Freshman Seminar 50D

"Where are you from?" Ancestry in the age of genomics (202998)

David Haig

2018 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

A human interest in ancestry and kinship is found in most cultures. This interest is not a construct of the

modern age, but recent advances in genetics can now provide a wealth of previously unavailable information about our genetic descent. The seminar will discuss examples of what genetics can tell us about where we are from and address the kinds of questions genetics can answer and the kinds it cannot answer. What should we conclude when cultural tradition and genetics tell different stories? Are genetic answers relevant or irrelevant to competing cultural narratives of identity? Is the question "Where are you from?" an invitation to explore our common humanity amid diversity or is it a microaggression that constructs barriers between us?

Freshman Seminar 50F

Artificial and Natural Intelligence (203000)

Venkatesh Murthy

2018 Spring (4 Credits)

Schedule: R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

What is intelligence? An inquiry into the nature of intelligence can take different forms – philosophical, biological, mathematical or technological. In this Freshman Seminar, we will use machine intelligence (everything from voice recognizing smartphones to Jeopardy-playing computers) as a handle to think about natural intelligence (brains and behavior of animals). Although we will start with big, general questions, we will quickly move to concrete queries about brains and computers. This approach, rather than just starting with brains of animals, may be useful in framing more universal questions independent of the specific architecture of brains of animals.

Recommended Prep: This Seminar targets students that are interested in brains and computers in equal measure, and are comfortable with analytical thinking. Some basic programming skills in Python, Matlab or equivalent is required to complete assignments—you will receive help with a remedial programming boot camp in the first two weeks.

Requirements: Course open to Freshman Students Only

Freshman Seminar 50I

The Temporal Universe (203269)

Jonathan Grindlay

2017 Fall (4 Credits)

Schedule:

T 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The Universe is not static, but rather stars and entire galaxies are evolving as revealed by their variability on timescales ranging from milliseconds for collapsed stars (neutron stars and black holes) to gigayears for stars and galaxies. In this seminar we shall explore stars and nuclei of galaxies through variability – from how brightness variability of stars with binary companions measured with small telescopes measures star masses and radii, to the extremes of variability of stars that undergo repeated huge flares, to enormously luminous variations from accretion onto gargantuan black holes in the nuclei of "Active Galaxies" (Blazars and Quasars). We shall use the Clay Telescope on the Science Center roof to make some repeated observations (from the 8th floor Astronomy Lab) of several types of variable stars and accretion-powered binaries and deduce what life would be like if either were our Sun. From a Blazar, we shall observe historical outbursts that occasionally change brightness to exceed its host galaxy by a factor of ~100, by using the digitized brightness measures on thousands of glass plate images taken by Harvard telescopes from 1885 – 1992 and now digitized and on line from our Digital Access to a Sky Century @ Harvard (DASCH) project. The seminar will include readings from an introductory Astronomy text as well as both popular and journal articles and the short books Black Hole (Bartusiak) and Black Hole Blues (Levin). Students will use astronomical software to measure stellar brightness and variability from telescope images as well as learn temporal analysis techniques with applications to other disciplines. Students discuss in class readings and observations conducted and write short papers on their observations and deductions.

Course Notes:

This seminar is open to all but may be of particular interest to those considering Astronomy, Physics or Engineering concentrations.

Requirements:

Course open to Freshman Students Only

Freshman Seminar 50M

How Stuff Works (203400)

Richard McCullough

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The rise of electronics-based technology has completely revolutionized the world over the last thirty years giving rise to new ways to be entertained, to communicate, and to work. Advancements in electronics have been primarily based on the chemistry and physics of new and improved electronic, magnetic, and optical properties of the underlying materials. This course will focus on discussing and understanding how stuff works with a particular focus on electronic and optical devices. In addition, we will learn about how magnetic stuff works, where color comes from, about modern fabrics, and other topics that students would find interesting. The course will also have the students read, research, and discuss what future innovations and technologies might be possible. Students will be encouraged to be active participants in prognostication. Students will have to write a paper on a future technology or innovation that they predict will be commonplace in the future or on the topic of how XXXX works.

Course Notes:

There are no prerequisites for this course and it does not require any

scientific background and is open to all.

Requirements: Course open to Freshman Students Only

Freshman Seminar 50N

What Is the Internet, and What Will It Become? (203428)

Michael Smith

James Waldo

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The internet has become a central part of our everyday life, a conduit for commerce, and part of the connecting tissue of our social networks— from email to the World Wide Web to the way we get entertainment, run video-conferences, shop, or find information. But what, exactly, is the Internet? Who runs it, how did it happen, and what is its future? How does it change our way of finding information, of working, or of seeing the world? What are the trends, in technology, policy, and law that will form the internet and, by extension, or lives going forward? This seminar will look at all these questions, and some others. We will start by looking at the history of the internet— how it happened, what design choices informed its construction, and how the various standards that define this network of networks were decided, adopted, and enforced. We will then look at various controversies that center on the current internet, including issues like who should govern it, what influence national laws should have on this seemingly borderless entity, and the role of encryption in communication, security, and privacy. We will then turn to some possible futures, and the implications of these futures on the way we live our networked lives. Will the internet change the way we work? The way we vote? The way we think? This course does not pre-suppose any knowledge of how the internet works or how it is governed. While there will be some discussion of the technical aspects of networking, computer hardware, and computer software, all that will be needed to understand the issues will be presented as part of the seminar.

Freshman Seminar 50Q

Gut Reactions: Discovering Chemistry from the Human Microbiota (203461)

Emily Balskus

2018 Spring (4 Credits)

Schedule:

R 0230 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The human gut is colonized by trillions of microorganisms that exert a profound influence on our health. Notably, the chemical capabilities of gut microbes extend beyond those found in our own cells, playing roles in nutrition, directing immune system development, and protecting against pathogens. However, we still do not understand how the vast majority of this microbial chemistry actually takes place, which stands in stark contrast to our knowledge of human physiology. The aim of this laboratory-based seminar is to expose students to a cutting-edge area of research at the interface of chemistry and microbiology. Over the course of a semester, students will work as a team to design and implement an experimental approach for discovering new enzymes from human gut microbes. Potential targets include enzymes involved in antibiotic resistance, metabolism of dietary components and pharmaceuticals, and modification of host metabolites. Students will pursue these goals in a fully equipped laboratory dedicated to undergraduate research. Course meetings will combine time in the lab with discussion of research literature and experimental techniques. Students will also have flexible access to the teaching laboratory to continue their experiments outside of the hours scheduled for the seminar. By having the opportunity to both explore a timely scientific problem and to drive the direction of their own research at a very early stage in their academic experience, students in this seminar will be extremely well prepared to seek out further undergraduate research opportunities and to pursue scientific career paths.

Freshman Seminar 50R

What Do You See in the Night Sky? (204926)

Roger Fu

2017 Fall (4 Credits)

Schedule:

R 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

People around the world observe the same basic celestial phenomena- the rise and set of stars, the changing phases of the moon, the occasional bewildering eclipse. But cultures have come to interpret these signs very differently, giving rise to diverse calendar systems and mythological frameworks. For instance, the position of the sun, the visibility of star formations, and the lunar cycle have all been used to define the concept of the year, sometimes with more than one definition operating in a single culture. We will perform a survey of traditional astronomical systems, highlighting the original aspects of each and trying to understand the origin of differences. Why were some observations considered more significant than others (Which is more important, the shape of the moon or the identity of stars around it)? How did mundane pressures, such as the need to sow and reap, influence how cultures tracked celestial motion? We will end with a more detailed exploration of the early Western and Arab astronomy. What specific advancements and conditions allowed them ultimately to "get it right?"

Course Notes:

A five-hour field trip to observe the sky away from city lights is required. No previous knowledge of astronomy or celestial mechanics is required.

Freshman Seminar 50S

From Galileo to the Big Bang Theory: Conflict and Dialogue between Religion and Science (204929)

Karin Oberg

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

It is easy to find controversies at the intersection of science and religion, from the time of Galileo, to Darwin and the emergence of modern cosmology. Yet many scientists throughout the ages have been devoutly religious, challenging claims of an intrinsic enmity between science and religion. This seminar treats a number of historical conflicts between religious beliefs and scientific theories, among them the Galileo affair, the clockwork universe, evolution, and the Big Bang theory. The seminar will introduce students to the main protagonists through their own words, and through contemporary and modern-day commentaries. We will explore why these conflicts arose and, based on these historical lessons, what we can expect the future relationship between science and religion to be. The ultimate aim of this seminar is for students to form their own opinion of which kind of conflicts between science and religion are inevitable and which are accidents of time and place, and under which conditions, if any, interactions between science and religion can be mutually beneficial. Most of the course will focus on Christianity and the natural sciences, with emphasis on astronomy and cosmology, but the relationship between other ancient and contemporary religions and other sciences will be discussed as well to provide a broader context.

Recommended Prep:

There are no pre-requisites. The course will include scientific concepts and their empirical and theoretical foundations, but no scientific preparation beyond high school physics is required.

Requirements:

Course open to Freshman Students Only

Freshman Seminar 50T

Altruism and Aggression, Love and War: Biology of Social Behaviors (205002)

Mark Fishman

2017 Fall (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Geese migrate and sticklebacks school. Termites build air-conditioned castles and bees geometrically precise hives. What properties of the individual allow emergence of such ornate and coordinated activities from the group? Which elements are innate and which learned during development? And do these

"primitive" social behaviors speak to how humans behave, in groups or one-on-one? Are there specific genes that control social behavior throughout evolution, and, if so, are they conserved in humans and responsible for altruism, aggression, love, and loneliness? Does their perturbation give rise to disorders such as autism or schizophrenia? This seminar will explore such questions of social behavior, beginning with an appreciation for the variety of approaches that have found success in evolution. We will discuss, and visit labs using, new scientific tools that permit dissection of complex social interactions into underlying motifs exhibited by individuals, in order to find how these are controlled by specific genes and what brain circuits are responsible. We will discuss both classical and new discoveries. Expectations are class participation, and writing one paper (max. 15 pages) and leading a brief (10 minute) class discussion on one specific social behavior in an animal, with musings on how it might apply to humans.

Requirements: Course open to Freshman Students Only

Freshman Seminar 50U

Bio-Inspiration and Innovation (205173)

Joanna Aizenberg

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In the course of evolution, Nature has developed strategies that endow biological processes and materials with exquisite selectivity, specificity, and adaptability to a constantly changing environment. Learning from and mastering Nature's concepts not only satisfies humankind's insatiable curiosity for understanding the world around us, but also promises to drive a paradigm shift in modern materials science and technology. This seminar will explore some of the basic principles of biological architectures and the economy with which biology solves complex problems in the design of novel materials. It will give us a taste of how the inspiration from nature teaches us to break barriers in technology and disruptively innovate. Often nature's solutions to engineering problems are so different from our conventional ways of thinking that the most fruitful way to investigate them is not immediately obvious. We will be therefore engaged in a continuous dialogue: we study the biological material itself to begin to understand its underlying principles, adapt these concepts to design a bio-inspired architecture, and then apply insights from the designed system to guide further investigation of the biological system. The goal is to use biological principles as guidance in developing new, bio-inspired materials and devices, with broad implications in fields ranging from architecture to energy efficiency to medicine.

Course Notes: Background in natural sciences is preferred, but not required; students in social sciences and humanities are welcome: just be bioinspired!

Requirements: Course open to Freshman Students Only

Freshman Seminar 50V

Sea Monsters (205177)

Peter Girguis

2018 Spring (4 Credits)

Schedule:

W 0230 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

There have always been tales of sea monsters. For as long as we humans have ventured into the ocean, our imaginations have conjured images of serpents, krakens, leviathans, and other creatures, all of whom seem bent on the destruction of those who dare set foot into the sea. Humankind's conviction that sea monsters are real is so powerful that -even today- rumors abound of sea monsters lurking in the depths. Indeed, every major religion -eastern and western- features sea monsters. Are these declarations true? Do giants roam the deep sea? Did the explorers of centuries ago see creatures from their small wooden boats that we do not see today? During this course we will explore sea monsters through a social, spiritual, literary, and scientific "lens". We will study the sea monsters that flourish on ancient maps to understand the minds of 16th century scholars. We will examine the bodies of real sea monsters, and consider the world in which such grotesque creatures might evolve. We will busy ourselves with tales of creatures from classic and contemporary literature. Most importantly, we will develop a better understanding of how humans perceive the world, and how our consciousness can simultaneously embrace our wildest dreams and cower from our greatest fears. Sea monsters, both real and imagined, tell us much about life in the deep sea, and even more about humankind.

Course Notes:

Required field trips related to the sea are included. There will be no cost to the student.

Freshman Seminar 50W

Can Chemistry Solve the Antibiotics Crisis? (205176)

Andrew Myers

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

13

The dearth of effective antibiotics for modern bacterial pathogens, and "superbugs" in particular, presents a crisis that has been likened to terrorism in its potential consequences to human society. The basis and context of the problem will be discussed in detail, with a special emphasis on the history of antibiotics discovery and development. We will explore the molecular properties of antibiotics, their bacterial targets, and the chemistry behind the inhibition and engagement of these targets. The evolution of bacterial resistance mechanisms and strategies to overcome these through chemical innovations will be presented using specific case studies. We will focus on the role chemistry has played in the development of new antibiotics, the molecular evolutionary paths engineered by humans over decades to develop new, more effective drugs, and how modern chemistry might be used to discover and manufacture future medicines for the treatment of human infectious diseases.

Course Notes: Students are expected to have a good working knowledge of high school chemistry. A basic familiarity with chemical structures and their depictions is desirable, but not required. There will be required visits to two state-of-the-art research facilities currently focused on the discovery of new antibiotics.

Freshman Seminar 50Y

A Sense of Space (and Time) (205339)

John Huth

2017 Fall (4 Credits)

Schedule: T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

What is space? What is time? How have humans viewed these over the years? How are the views of these shaped by our environments and cultures? We often employ spatial metaphors for social situations – e.g. "they're very close," or "they split apart." It seems that as concepts of space change, and our horizons are broadened, these changes are reflected in a shift in cultural awareness. In this seminar, we explore concepts of space in a number of cultures: Pacific Islanders, Western Apache, Brazilian Rain forest, to name a few. The human mechanism of spatial cognition is examined, along with the reuse of these parts of the mind in future planning, memory, and imagination. As the seminar progresses, we focus in on the shifts of the concepts of space in Western culture – starting with ancient Greeks and Egyptians. We examine the period when astronomy and astrology were practiced side-by-side, and then turn to the world of Dante Alighieri, where space was married to concepts of morality and culture. Finally, the development of physics and astronomy from Galileo to the present has seen seismic shifts in the concept of space-time. These in turn were reflected in broader cultural shifts.

Word–Sound–Image: Poetry as a Language Laboratory (203004)

Aleksandra Kremer

2017 Fall (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Typical means of everyday communication, such as speaking, writing, or printing, can be taken to extremes in poetry. What sounds and images can we find in poetic texts? What materials and tools have been used to create poems? What happens on the borderlines between poetry and other arts? In our seminar we will study poems from different times and regions, with a special emphasis on the twentieth-century European and American experimental literature. We will discuss visual poetry from Ancient Greece and Renaissance England, poems about paintings by Rilke and Auden, avant-garde texts and performances of Futurist and Dadaist artists, postwar French sound poetry, international concrete poetry movement, contemporary artists' books, as well as recordings and readings of major poets. We will look for poetry in Harvard Art Museums and listen to recordings in the Woodberry Poetry Room. We will examine artists' books from Harvard libraries, attend a poetry reading in Cambridge, view electronic archives of poetry, analyze voices of poets performing their texts, and study poems which are barely legible. We will confront these poetic experiments with scholarly texts from such disciplines as sound studies, art history, acoustic phonetics, graphic design, and literary studies. Finally, we will ask what are the gains and challenges of using innovative techniques and technologies in poetry and art.

Faith and Fiction in American History (203005)

David Holland

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar uses key literary works to explore some of the most difficult and demanding questions in the religious history of the United States: Does God have a special relationship with the United States? Is sin an individual responsibility or a social flaw? Why has American religion been so frequently concerned with sexuality? How has religion shaped racial identities and tensions? How does it inform domestic relationships? How do non-Christian immigrants find a place and a voice in a nation with deeply entrenched Christian traditions? To explore these and other areas of concern, we bore into the faith-inflected cultures of American history through the imagined narratives of some of its most celebrated writers, including the likes of Catharine Sedgwick, Harriet Wilson, Flannery O'Connor, James Baldwin, Rudolfo Anaya, Pearl Abraham, Ayad Akhtar, and Marilynne Robinson. I will offer mini-lectures to contextualize these works in their historical moment. We will read some scholarly work to sharpen our tools of analysis, but mostly we will read and talk about the novels themselves. The seminar aims to be both analytically rigorous and aesthetically rewarding.

Thinking about the Unthinkable: Love, Emotion and Hard Times in Literature (203267)

Rita Goldberg

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course is about the struggle to express and respond to complicated, often painful experiences. We describe some of these as unspeakable or unthinkable, but somehow they must be expressed in language, because language of one kind or another is all we have. The source of what is unspeakable can vary, from forbidden love and the suppressed feeling to situations of oppression, trauma and violence. Do not expect an atmosphere of constant gloom (in fact we laugh quite a bit in this class), but do expect to look closely at texts and other examples of art to help us figure out how writers and artists manage at the edges of what can be expressed. We'll explore some moments in world literature centered largely on young people in difficult situations, starting in the mid-eighteenth century, when writers became obsessed with the feeling response as a measure of virtue (often manifested in tears) and continuing with Goethe, Blake and others. Oddly enough, earthquakes figure prominently in some of the works of this period, shaking not only the ground but also ideas about the world. In the second half of the course, we'll turn to the form of the memoir. What can we decide about inexpressibility and memory, the recollection of experience? We'll start with Frederick Douglass's memoir of slavery, supplemented by excerpts from other works. We will spend another few weeks on memoirs of the Holocaust by people who were young in those years, and we'll look at more recent writers on trauma and memory. Some of the supplementary readings will come from today's headlines. Again, all will not be darkness and gloom. Hovering over the course is the spirit of Anne Frank and the sense that even in the darkest narratives, the flame of life can continue to burn, and that words can recover their power, especially for the young.

Freshman Seminar 60Z

Go Rococo! Techniques in Digital Design (203405)

Andrew Holder

2017 Fall (4 Credits)

Schedule:

W 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

At the beginning of the 18th century, baroque architecture and art in Western Europe entered a new phase called the rococo, characterized by extreme visual complexity, ornamentation, and the collapse of compositional and political hierarchy. Architectural interiors became excessive (or at least no longer classically ordered) during this period, filled almost to the point of overflowing with painting, sculpture, and decoration, much of it depicting characters in mischievous and compromising postures. This course will examine the rococo as a precedent for reflection on problems in contemporary design and as a provocation to create new work using digital design tools. Coursework will be founded on two related propositions: first, that the architecture and art of the Rococo are remarkably similar to the visual and material culture of the present day; and second, that contemporary design stands to benefit from a close examination of its

predecessor. Activities will be divided between reading, writing, and making. Each week, students will examine a rococo building precedent, reading the architecture against a series of texts on contemporary design issues. In addition, each student will undertake a semester-long design project using digital design tools to create and animate an architectural interior in the manner of the rococo. Software tutorials on the Adobe Creative Cloud software suite will be provided in class. Readings and tutorials will be supplemented with field trips to the Houghton Library and Fogg Museum to experience rococo artifacts first-hand.

Course Notes: This course is a hybrid design workshop and seminar in the history of 18th century architecture. Students will learn to use state-of-the-art digital design tools while critically examining canonical examples of late baroque and rococo buildings. Design skill, artistic ability, and prior exposure to digital modeling software are NOT required for this course, nor is any prior knowledge of architecture. Absolute neophytes are welcome. Students do not need to purchase software or any computer equipment in order to participate.

Freshman Seminar 61D

Trying Socrates in the Age of Trump (205065)

Russell Jones

2018 Spring (4 Credits)

Schedule: R 0200 PM - 0359 PM

We find ourselves in the middle of fierce political debates. Should the common folk have political power, or should it be concentrated in the hands of an elite? Is our national interest best served by looking inward and directing our resources toward local concerns, or by thinking globally about both threats and opportunities? How do we balance concerns for economic growth, humanistic understanding, religious freedom, and scientific advancement? Our answers to such questions are enormously consequential, and even people of good will can find themselves in heated disagreement, labeling opponents as the enemy and striving to drive them and their ideas from the public square. The Athenians of 2400 years ago didn't conduct their political battles with tweets and hacks and super PACs, but they would easily recognize our battles as versions of their own, fought over much the same ground. At a particularly heated time, they used the lethal power of the courts to silence Socrates, one of their own. Our task is forensic. We'll assemble the available evidence to determine why the Athenians killed Socrates. His views were complex – certainly he doesn't align neatly with any of our own major political parties, and he's difficult to categorize even in the context of ancient Athens. So what was so offensive or threatening about him as to provoke such extreme measures? Once we've assembled our evidence, we'll formally try Socrates in absentia for ourselves. Was he guilty? And what should be done with people who spread dangerous ideas?

Ghosts: How we have Summoned, Repelled, and Represented Intrusions from the Afterlife (204927)

Deidre Lynch

2017 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The living grieve for their lost dead, and world religions uniformly promise that this separation will be temporary and encourage us to anticipate happy reunions in the afterlife. But the ghost stories that theologians, philosophers, poets, dramatists, and novelists have recounted over the last two millennia suggest that the prospect that the restless dead might return to our world and to their former haunts in fact occasions rather more mixed feelings. We love and dread the dead. We need them (more than they need us), and so we preserve their memories, sometimes their remains, in graveyards, museums, and our photograph albums. At the same time, we fear their malevolence.

In this class you'll investigate such mixed feelings in various ways: for instance, by visiting cemeteries and considering how burial practices ease the dead out of the world of the living; by exploring religious accounts of the relationship between body and spirit; by learning about the modern sciences' commitment to making rational sense of the occult; and above all by reading and viewing stories of hauntings and spirit possession, from *Hamlet* to *Beloved* to *Birth*. The class will exploit, as well, our location in the Boston area: a setting where the past often refuses to stay put and stay dead, and which, since the era of the Massachusetts Bay Colony, has been haunted by disquieting histories of violence, usurpation, and vengeance. Nineteenth-century Boston and Cambridge, we'll find, each have a claim to be considered ground zero for modernity's characteristic projects of soul searching and ghostbusting.

Cartoons, Folklore, and Mythology (204928)

Joseph Nagy

2017 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

The creators of cinematic (and later TV) animation have perennially turned to traditional oral and literary tales about fantastic heroes, villains, tricksters, and settings for their story material. In the world of the animated "short" and feature-length film, myths, epics, legends, and folktales could come to life in a highly stylized, kinetic, and visually arresting way. Cartooning created a pathway for traditional stories to live on in the consciousness of twentieth-century viewers, and also for these old tales to be adapted to changing times. Hence animation offers not only an influential modern commentary on the folklore and mythology of the past but also a contemporary mythology of its own, deeply meaningful to adults and children alike. In this freshman seminar, students are invited to take what might be considered mere entertainment very seriously, closely reading texts of traditional stories in tandem with critically viewing animation that draws its inspiration from those stories. For a final assignment, each student will be called upon to choose some animation (a short or a clip from a feature-length film) to share with the rest of the seminar, to provide some background for it, and to lead a discussion of the animation in light of what else we will have seen, learned, and said. While the instructor's contribution to the seminar will primarily focus on animation from 1900 to 1960, students when choosing which sample of animation to share will be welcome to present later or contemporary examples of the cartooning art—including perhaps even their own.

Musics in Motion (204930)

Kay Shelemay

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Music is on the move, traveling across geographical boundaries to reach new and broader audiences. As a result, most locales today support a broad array of musics with different histories and styles. This seminar will take a comparative approach to the sounds, settings, and significances of a cross-section of music traditions and their interactions. Along the way, we will play the Senegalese sabar drums, dance the tango, and attend two world music concerts. We will discuss music's mobility through human migration and

virtual channels; the transformative role of musical performance in ritual, politics, and the marketplace; and the many ways in which music shapes individual and collective memory and identity. If music is a medium of expression through which we pray, protest, remember, and relax, it can also provide a lens through which we can understand the most deeply felt aspects of human experience and mark changes in the world around us.

Recommended Prep: The class will include two hands-on music sessions and also attend two world music concerts. This seminar does not require a knowledge of Western musical notation. But it is hoped that each participant will bring to the class some knowledge of and experience with at least one musical tradition they have experienced and found meaningful in their own life, whether they are an expert participant or a casual listener.

Jefferson and Hamilton: Dueling American Visions (204932)

Annette Gordon-Reed

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

It is often said that the United States is a country based upon ideas, rather than blood ties. Shortly after the end of the American Revolution, and during the ratification of the Constitution, it became apparent that the people who had helped to make the Revolution differed about exactly what ideas would define America's experiment in self-government. Two men, Thomas Jefferson and Alexander Hamilton, symbolized the conflicting visions that emerged once the revolutionaries began the business of running a new country. Jefferson was Secretary of State and Hamilton was Secretary of Treasury in Washington's cabinet. They started cordially enough, but their contrasting views about politics and government quickly hardened into personal enmity. Much to President Washington's chagrin, they battled in cabinet meetings and-- through surrogates and pseudonyms--in newspapers. Their clash helped create two-party politics in America, as each man attracted adherents to their respective visions of the future of the United States. Jefferson was the rural "man of the people", anti-British to his core, and supporter of the French Revolution. Hamilton was the urban friend of the elites in society, admirer of the British government, and opponent of the French Revolution. Their arguments about the true nature of American society continue today. This seminar will examine Jefferson and Hamilton as men, the way they fought their battle, and the nature of Jeffersonian and Hamiltonian visions. What did the men and their visions mean at the time, and what do they mean to us today?

Heretics, Gangsters, Writers (204931)

Saul Zaritt

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Prophets gone rogue, rabbis trained as thieves, false messiahs, condemned heretics, synagogue-going gangsters, and writers lost between languages and cultures—these are only a handful of the sinful yet compelling characters that appear in texts written by Jews over the past three millennia. This seminar examines the ways in which such figures challenged the norms of collective Jewish practice by walking the boundaries between Jewish and non-Jewish worlds. We will read famous scenes of transgression in the Bible—from Eve in the garden of Eden to the "heresy" of Jesus—and continue on to stories of rabbis gone mad, early modern false messiahs, and excommunicated philosophers. Works to be discussed include the writings of Sholem Aleichem, Franz Kafka, Philip Roth, and Art Spiegelman, films by the Coen Brothers, and music by Bob Dylan and Leonard Cohen. We will talk about how these artists struggled to simultaneously embody and escape their Jewishness, often by viewing this lost, rejected, and regained tradition in radical terms. This often meant that these sinners and saints would ask troubling questions that challenged stable Jewish communal narratives while also imagining the possibility of new utopias and dystopias. What was the goal of such boundary-crossing? Did they simply want to sin for sinning's sake? Why is it that, paradoxically, the words of these sinners—however embedded in the dark pessimism of transgression—often appear to open the door to salvation?

Course Notes:

The course will include a required trip to the Yiddish Book Center in Amherst, MA and a special meeting with Art Spiegelman (the creator of Maus) during his visit to campus in the fall.

No Fear, No Hate, No Pain? Questioning Identity and its Others in Modern Literature about Spain (205025)

Daniel Aguirre-Oteiza

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What's the connection between fear, hate, pain and identity? To what extent are our personal and collective identities shaped by received ideas of "others"? Does questioning "others" help us understand our ideas of culture, nation, and polity? How do these questions help us understand our position in current political debates? What's the value of asking these questions when we read modern literature about Spain? Najat El Hachmi will guide us in her turn-of-the-century journey of emancipation between Morocco and Barcelona. A journalist going by the same name as novelist Javier Cercas will rely on fiction to tell the truth of an anonymous hero of the Spanish Civil War. Juan José Saer, an Argentine writer living in France, will tell us

an unsettling narrative of survival set in the 16th century about a 15-year-old cabin boy who was captured en route from Spain to the New World, and lived among cannibals for a decade. Carmen Laforet and Leopoldo Alas will spin tales of grit and self-reliance about a Catalan teenager and a Galician spinster in times of socio-political repression. Federico García Lorca's poems will show us a kaleidoscopic view of Depression-era New York. Among the aims of this seminar is to discuss how autobiography, fiction and poetry may challenge and entice readers to consent to or dissent from such representations. That is why this seminar also introduces students to different literary traditions while providing them with essential skills of literary analysis such as close reading and conceptual and historical framing.

Life Lessons from Professional Killers: What We Can Learn from the Samurai (205026)

David Atherton

2017 Fall (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Is it possible to fail successfully? Should we be more beholden to the needs of others or to our own ambitions? Is there a set moral standard by which we should live our lives? What should we be prepared to sacrifice for higher goals—and what if pursuing those goals causes suffering to others? When should we take a risk? Is there such a thing as an ideal human being? Questions such as these have animated the figure of the samurai for nearly a millennium, captivating imaginations both in Japan and around the globe. What is it about this figure that speaks to some of our deepest questions about how to live a model human life? In this seminar, we will explore together the many meanings people have invested in the Japanese warrior, from medieval epics to kabuki plays, modern novels to propaganda, manga and anime to global cinematic blockbusters. (Tom Cruise, anyone?) Our focus will be less on the historical realities of the samurai than on the ways people have chosen to imagine them—and to what ends. In the process, we will consider what we ourselves might learn from this complex, fraught, appealing, and possibly dangerous figure. Our "life lessons" from the samurai will include (among others), "How to be a spectacular failure," "How to face the consequences of your actions," "How to justify your existence," "How to get revenge," and "How to make your brand go global."

Recommended Prep: No prior knowledge of Japan is required, and all readings will be in English.

"Get Out of My Space!" Making Sense of Our Built Environment (204979)

Patricio del Real

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Today space is at a premium. We all want space, but what sort of space do we want? We have social space, virtual space, personal space, safe space, collective space. How much space is there? Can we run out of it? How much do you need when you tell me: "Get out of my space!" What makes it "yours?" How do we make space? Who controls it? Architecture helps us define space. We live, study, work and play in buildings and cities that have become the stages for our everyday lives, helping us do what we do and live our present. But architecture has another much more important function: It helps us imagine other possible ways of living. Architecture helps us envision the spaces we want to live in. In this seminar, we will explore the different ways in which we have created, claimed, fought over, shared and continue to imagine space. Our discussions will put a premium on the way architects, artists and social actors have produced space, and how their ideas and projects guide the way we understand our constructions of space. We will make space through hands-on projects such as mapping social networks and transforming your space through the technique of collage. These projects will challenge and help you record, transform and produce space. This seminar is designed to enrich your knowledge of space so that you may take a position on contemporary social questions, debate the nature of our built environment, and claim space for yourself.

Language and Politics; Ideology and Society (205066)

Mark Richard

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

We will apply tools and techniques from philosophy to analyze the use and abuse of speech in politics and social interactions. Some of the work we will do involves analysis (what, exactly, is the difference between lying to someone and simply misleading her?), work that is worth doing in part because it will help us in thinking about normative questions (is lying worse than merely misleading in some morally significant way?) Some of the work we will do involves recovering and analyzing arguments in philosophy and elsewhere about issues concerning speech—for example, arguments for and against the claim that certain sorts of speech (hate speech, pornography) ought to be restricted because of various harms. And some of the work we'll do will require that we engage important but fairly hairy philosophical questions whether—for example, the (putative) fact that we see the world through one or another ideology makes knowledge impossible, or whether there are (interesting) absolute normative truths. The course as a whole is an introduction to philosophy that emphasizes philosophy's ability to help us understand and criticize our social situation.

Global Crime Fiction: Tackling Crime, Corruption, and Social Disintegration (205067)

Karen Thornber

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Crime fiction is one of literature's most popular genres, with hundreds of millions of fans across the globe. Both local and foreign crime fiction, the latter often in translation, flies off bookshelves from Boston to Barcelona to Beijing and beyond, regardless of whether the novel takes place in a small Swedish village or in multiple cosmopolitan megacities. Why is this? Part of it is in the storytelling. Who can resist a gripping whodunit with unexpected twists and turns and often with an appealing investigator or detective (professional or amateur), particularly if everything is resolved at the end, and often in ways we least expect? But part of the appeal of crime fiction is also the insights this genre can offer into some of the most significant challenges facing societies globally. In this course we will read a selection of bestselling crime fiction from the Americas, Africa, Asia, Europe, and the Middle East. We will be most concerned with what this literature tells us about investigating, exposing, and potentially ameliorating historical crimes, environmental crimes, corruption in criminal justice, and social disintegration, particularly as these involve injustices inflicted on marginalized and otherwise vulnerable individuals and communities, people targeted on account of their class, ethnicity, gender, race, religion, sexuality and other factors. Secondary readings and class discussion will provide the necessary cultural and literary contexts for these readings.

Freshman Seminar 61P

Fighting Monsters: Gothic Fiction as Social Critique (205069)

Nicole Suetterlin

2017 Fall (4 Credits)

Schedule:

R 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this seminar we explore how Gothic fiction makes use of the figure of the monster to question social norms. What do vampires, zombies and cyborgs tell us about ourselves and our culture? We begin in the 18th-century, when Enlightened Europe witnessed an unprecedented vampire epidemic. Modern monsters such as the vampire entered the cultural stage at the same time as the core values that have defined

Western democracies ever since were taking off: free will, free press, religious tolerance and human equality. What role did literary monsters play in the definition of these ideas? What role do they play today, when these freedoms are in jeopardy? Chasing various monster figures into the 21st century, we explore how their stories reflect the social conflicts of their time and ours. Texts from canonical American, British, French and German authors invite us to understand the perspective of those whom society excludes because they don't fit its norms or they voice dissent. While we will encounter plenty of "classic" monsters, we will investigate the roles of all kinds of societal "others," from madmen, trauma victims, and minorities, to death row inmates. Topics include: media revolutions, use and abuse of technological progress, revolution of sexuality, trauma theory, race, migration, prison politics, surveillance. Materials include film, visual arts, and the natural sciences. Excerpts from select texts by influential cultural theorists will help us to develop the analytical skills necessary to uncover the social critique hidden beneath Gothic fiction's entertaining "chill and thrill" surface.

Course Notes: This course will include the following required events and features: a workshop with civil rights leader Bryan Stevenson; a workshop with Boston Mobilization, a local non-profit on social justice; a skype interview with a representative of the Center for Genetics and Society, the only U.S. non-profit on genetic manipulation; visits to the Harvard Art Museums and the Houghton Library; and a Halloween trip to Salem!

Freshman Seminar 61Q

Language: The Origins of Meaning (205082)

Gennaro Chierchia

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

How do languages work? Why are they so distinctly human in the natural world? Is language a creation of our intelligence, i.e. we speak, because we are smart, or the other way around? Birds produce sophisticated songs. Do bird songs mean anything? They do, in some way. They serve, for example, as predator warnings or mating calls. Humans too, like birds, can produce music. But for effective day to day communication (or, say, to develop a scientific theory, etc.), we need languages with words and sentences, i.e. the kind of languages which is unique to our species. Do all languages, in spite of looking so diverse, share a common structure? For example, in English words fall into categories: cat is a noun, meow is a verb. Do all languages have nouns and verbs? A fairly recent turning point in addressing these fundamental questions has been to view language as a computational device. This is enabling us to build effective models of how languages are structured so as to empower us with the ability to create meaning; which, in turn, is shedding light, more and more, on who we are. The seminar will explore how natural languages come to create meaning and invite participants to develop their own linguistic analyses through modern logical and computational tools.

Course Notes: An interest in language and mind, and no fear of formal methods or the desire to overcome such fear.

Shape Shifting Your Reality (205094)

Nora Schultz

2017 Fall (4 Credits)

Schedule: W 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This seminar investigates various forms of art making in order to answer one central question: how to process the experiences of daily life by expressing them in a work of art. The creative parts of the course will take place inside the sculpture studio of VES, but collecting the materials to use will happen outside it, as we gather "found objects" at places like the Harvard Recycling Center, which will in turn offer us new perspectives on the use of materials in our everyday life at Harvard and beyond. On a field trip to New York City we will visit different locations where an artwork and its urban environment have influenced one another. The seminar includes a broad introduction to various methodologies of artistic creation, not only tangible but also intangible (e.g., sound recordings). Weekly practical and reading assignments are required. By end of the semester, we will present our works in an informal exhibition/intervention/happening.

Course Notes: There will be a required trip to New York City. All trip expenses will be covered by the program.

Freshman Seminar 61S

Baseball as Philosophy: God, Beauty, and Morality (205095)

Jeffrey Behrends

2017 Fall (4 Credits)

Schedule: W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Even seemingly commonplace features of the world offer us a route to inquiring into complex ideas and phenomena. You can think of this seminar as, in part, a sort of existence proof of that claim. Using baseball as a focusing lens, we will endeavor to cover a fairly large swath of philosophical terrain, including a more focused investigation of issues in ethics. We will consider, among other things, how baseball can help us understand: God's relationship to morality; why a loving God would allow evil; indeterminate concepts;

what makes something beautiful, or aesthetically valuable; social justice and income distributions; the moral permissibility of violating rules within a game; and the moral permissibility of biomedical enhancements to humans. Our investigation will put us in close contact with both contemporary scholarly writing on baseball, and canonical philosophical thinkers, starting with Plato. In addition to being the greatest game ever created, baseball offers surprisingly fertile ground for thinking about some of the deepest issues across philosophy.

Course Notes: There will be a required trip to New York City. All trip expenses will be covered by the program.

Freshman Seminar 61T

Emptiness, Non-attachment, and the Problem of Suffering (205096)

Andrew Graham

2018 Spring (4 Credits)

Schedule:

W 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Some philosophers, considering the suffering that we all naturally face, have recommended non-attachment as a way of overcoming that suffering and living a better life. Often they defend this stance by appealing to ideas concerning the nature of the world, the nature of ourselves, and the relationship between ourselves and the world. In particular, they emphasize the "emptiness" of these phenomena, and argue that grasping this emptiness can help us eliminate attachments and understand why such elimination is sensible. In this seminar, we explore these themes, drawing on perspectives found in both the Eastern philosophical tradition and the Western philosophical tradition. We will begin with a general overview of ideas along these lines from the Eastern tradition, starting with ancient Buddhist philosophy and some of its later developments, including work by Nāgārjuna and other Eastern philosophers. We will then shift to the Western tradition and consider points of contact with the ideas already discussed. In particular, we will look at philosophical work on the nature of the ordinary objects that make up the world around us, work on what we can know and should believe about that world, and finally work on our selves, our agency, and our freedom to act in that world. Our aim in these explorations will be to understand these philosophical notions of emptiness and non-attachment and their application to the problem of suffering.

Freshman Seminar 61U

Reading the Novella: Form and Suspense in Short Fiction (205181)

Jonathan Bolton

2017 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Short enough to read in a single sitting, but more complex and absorbing than short stories, novellas give us some of our most intense reading experiences. Indeed, many of the enduring classics of world literature, from Melville's *Benito Cereno* to Chekhov's *The Duel*, take advantage of the novella's compression and acceleration of plot—features that are also suited to horror, mystery, and other forms of "genre" fiction. In this seminar, we will read some of the great masters of the novella form, including Anton Chekhov, Henry James, Leo Tolstoy, Alice Munro, and Katherine Anne Porter, as well as other examples from around the world, including Eastern Europe, China, and Japan.

Readings of 50-125 pages a week (all of it in English) will allow us to work closely with some classics of modern fiction, going down to the level of word choice and sentence structure, but we'll also consider the way authors build and sustain suspense, the different forms of narrative resolution, and other questions of plotting and structure. We will also talk about how to get the most out of your weekly reading experiences — I'll ask you to set aside solitary time for your reading each week and, as far as possible, to read each novella in just one or two sittings. You'll keep a reading journal, including 2-3 pages of unstructured writing each week; a number of creative assignments and a final paper will help you understand the choices made by authors as they shape their stories for this most demanding and exciting of fictional forms.

Freshman Seminar 61V

Dada and Bauhaus: 100 Years (205174)

Benjamin Buchloh

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar takes its departure from the fact that Dada and Bauhaus, two of the most important artistic movements of the twentieth century, have been recently celebrated and rediscovered, and newly researched by a number of scholars and curators, partially in response to their respective centennial. Dada was founded in Zürich in 1916, the Bauhaus in Weimar in 1919, and both formations were intensely international from the very beginning, unifying artists from many different European countries (Austria, France, Germany, Hungary, Rumania, Russia, Switzerland), to engender two astonishingly complex group formations. All the more amazing is the fact that these two groups were pursuing utterly opposite goals in their practices, in fact one could consider them the extreme poles of the twentieth century. Dada's goals were primarily anarchist and anti-aesthetic, yet politically often radical and progressive, and Dada was not accidentally the first avant-garde movement to include a large number of female artists in its midst. The Bauhaus, by contrast, while having its own political perspectives ranging from Social Democratic and Socialist positions to a more affirmative production-oriented liberal democratic orientation, aimed for the

improvement of everyday life for the social collective as a result of design and production of consumer goods and transformed architectural conditions. The course will focus on individual practices as much as it will develop a critical comparative reading of the various features of the group identities. Throughout the semester, we will be reading original documents and manifestoes, as much as the writings of the artists, complemented obviously with key critical essays that make up the most important recent art historical literature on both subjects. The final two meetings of the course will also address the tremendous impact that both formations had on American art of the 1950s and 1960s, ranging from the foundation of the Chicago Bauhaus / Institute of Design, and Black Mountain College both institutions which explicitly modelled themselves on the Bauhaus and brought former faculty members from the Bauhaus to the United States, as much as we will trace the enormously important influence that the rediscovery of the Dada legacies had on the development of artistic practices after Abstract Expressionism such as Pop Art and Fluxus in the United States in the late 1950s and early 1960s.

Course Notes: There will be required trips to area museums.

Freshman Seminar 61W

This is the End of the World (205196)

Giovanni Bazzana

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

For millennia the end of the world has been feared, imagined, and exorcized by gifted writers, religious leaders, and intellectuals from the most diverse cultural backgrounds. Scholars have even suggested that – over the last few decades – such a worldview centered around an imminent end has become hegemonic by appearing in an almost endless number of very popular media stretching from blockbuster movies to comic books. This seminar will explore the cultural reasons behind this paradoxical attraction of humans towards fantasies detailing the end of the known world in catastrophic and often terrorizing colors. Imaginations of the end seem to have begun with the birth of the "apocalypse" as a literary genre in ancient Judaism and Christianity. The seminar will follow some trajectories of these fantasies by comparing and contrasting exoteric ancient and medieval religious texts with modern and contemporary novels and movies. The ultimate goal will be to see how the rupture of social bonds, zombie or demonic attacks, and natural disasters are preferential occasions to reflect on the relationship of humans with nature, with the supernatural, and with each other. A few scholarly essays will be assigned, but the largest part of the course will be occupied by the direct reading, viewing, and discussion of primary materials (with the final opportunity to write your own tale of "the end of the world").

Soft Power: The 21st Century Art Museum (205215)

Ethan Lasser

Rachel Saunders

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What are museums good for in the twenty-first century? Should they be temples of scholarship or purveyors of popular entertainment? Are they places in which we seek contemplative refuge in the experience of "beauty," or are they viable sites in which to work for social justice? Should we be investing public funds in museums, or are they a luxury best supported by private sources? To whom do museum collections "belong?" Art museums today are thriving, yet they have never faced so many contentious questions about their role and responsibilities. Co-led by two curators at the Harvard Art Museums, this seminar will consider the big issues facing art museums across the globe today. The course is intended for both long-time museum goers, as well as those who have never set foot in an art gallery. We begin with a primer on museum basics—the work of collecting, conservation, display, and research—and an introduction to the many resources of the Harvard Art Museums. In the second half of the seminar, we consider the challenges that face both august, traditional institutions—like the Metropolitan Museum of Art in New York—as well as younger, start-up museums like the private/ public collections being established across Asia.

Course Notes:

The course will take place at the Harvard Art Museums and includes required field trips to local institutions and multiple meetings with museum leaders in Boston.

Aristotle's Heirs: Greek and Roman Culture in Christianity and Islam (205218)

Julian Yolles

2018 Spring (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Who owns the Greeks and Romans? For centuries, civilizations in regions as diverse as Iraq and Iberia, northern Europe and North Africa, have laid claim to the cultural and intellectual heritage of Ancient Greece and Rome. Christians and Muslims in Baghdad, Palermo, and Toledo translated philosophical, scientific, and literary works into Arabic and Latin. Why did they devote so much time and money to studying and teaching Plato, Aristotle, and Vergil? This freshman seminar follows the story of how ancient Greek and Roman thought was transmitted and transformed in the Christian and Muslim intellectual traditions. Students will read seminal works by Plato, Augustine, al-Farabi, and Dante, and engage critically with

modern depictions of the recovery of ancient thought in literature (Borges) and film (The Name of the Rose).

Course Notes: All readings are in translation. The course will include required visits to the Harvard University Art Museums and to Houghton Library.

A Call to Adventure: Photography and American National Parks (205238)

Sharon Harper

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Both photography and the American National Park system were conceived in the 19th century, and have grown up alongside each other. This studio photography class will look at the National Parks as sites of artistic production that have shaped our cultural imagination for the last 100 years. The purpose of this seminar is to familiarize you with the role of artistic inspiration in the formation of the park system, and to critically analyze the ways in which geological, political and social conditions give rise to modes of artistic production. The class will familiarize you with photographic strategies that have evolved alongside the Parks—starting with 19th Century Geological Photographic Surveys of the West, to upheaval in the 1970s that gave rise to New Topographics, New Social Documentary Photography and ecological art—in order for you to shape your own photographic exploration of place. We will also explore the cache of clichéd imagery that Parks generate in order to ask the question, "How can one generate a meaningful visual response to iconic and mythic collective experiences?" You will learn to use a camera in order to strategize your own approach to place. Students will choose local sites and will generate an artistic response to that place throughout the course of the semester. This photographic exploration will be supported conceptually by readings, slide lectures, field trips, technical instruction, and group critiques of student work.

The Revolution Will Not Be Televised (Russian Revolution Imagined, Documented, Advertised) (205532)

Vera Koshkina

2017 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Political change takes place in images and on screens as much as on the streets. Activists, artists and politicians have long understood that pictures speak to global audiences beyond spoken language. However images serve to expose and document as much as to mask and suppress other realities. This seminar examines the role images played in the Russian Revolution of 1917 in its attempts to fundamentally transform existing social order. The 100th anniversary of the Russian Revolution in the fall of 2017 serves as an occasion to explore it as one of the first political uprisings in which modern media – photography, poster art, moving images – were used to imagine, document, represent and suppress revolutionary change.

Even before 1917, Russian artists ignited revolutionary imagination in breaking with representational conventions and bringing new media into their creative work. The Soviet State subsequently adapted their representational strategies and new technologies. In 1918, the so-called Soviet agitation trains traveled to remote villages bringing documentary footage of the Russian Revolution to mostly illiterate peasant audiences, spreading the visual story of revolution before the coming of television. We will consider the legacy of the imaginings, transmissions and visual manipulations of history, looking at photography, visual art, documentary and feature film, folk art, children's drawings, propaganda posters, and public spectacles and festivals. We will also read theoretical texts by artists, writers, filmmakers and politicians who imagined the new world and the role of visual art and new media in its transformation. What kind of social conditions made the new aesthetic choices relevant? Who is doing the depicting and what is and is not shown? What does it mean to visualize politics more broadly?

Course Notes: The seminar includes required trips: a visit to the Harvard Art Museum to examine original artwork, special screenings of 35mm films at the Harvard Film Archive, and a visit to view the rare books collection at the Houghton Library.

Climate Change Economics: Analysis and Decisions (203008)

Martin Weitzman

2018 Spring (4 Credits)

Schedule:

R 0230 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Climate change is one of the most difficult problems facing humanity. A small sample of questions to be asked and answers attempted in this seminar includes the following. How do we analyze and decide what to "do" about climate change? What are the basic "models" combining economics with climate science, what are these models telling us, and how do we choose among their varying messages? How are risk and uncertainty incorporated? How do we estimate future costs of carbon-light technologies? How do we quantify damages, including ecosystem damages? Who pays for what? Why are discounting and the choice of discount rate so critical to the analysis and what discount rate should we use? What is the "social cost of carbon" and how is it used? Which instruments (prices, quantities, standards, etc.) are available to control greenhouse gas emissions and what are the strengths and weaknesses of each? What is "climate

sensitivity" and why is it, and the feedbacks it incorporates, so important? How should the possibility of catastrophic climate change be evaluated and incorporated? What are costs and benefits of geoengineering the planet to counter global warming? Why has climate change been characterized as "the biggest international market failure of all time" and how might the world resolve the associated free-rider problem?

Freshman Seminar 70G

Entrepreneurship and Venture Capital in the Global Economy (203010)

Paul Gompers

2018 Spring (4 Credits)

Schedule: W 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Entrepreneurial activity has been a potent source of innovation and job generation in the global economy. In the U.S., the majority of new jobs are generated by new entrepreneurial firms. Entrepreneurship has had many definitions over the past two and one half centuries since Richard Cantillon first used the term in the early 18th century. Some have focused on the risk-bearing nature of entrepreneurship, while others have focused on the innovations that entrepreneurs create. Both are important elements of what entrepreneurs do, but neither is a complete definition of entrepreneurship. This seminar will examine the role that entrepreneurship and venture capital plays in economic development and innovation. Academics and policy makers have long highlighted the critical role that these sectors play in promoting a dynamic economy and opportunities for sustained competitive advantage. In particular, venture capitalists have been the source of financing for most of the major technology leaders including Microsoft, Apple, Google, Amgen, and Facebook. Numerous countries have sought to grow their domestic venture capital industry. This seminar will explore the phenomenon through the lenses of economics, history, and psychology. Entrepreneurial and venture capital markets in the US, Israel, and China will be examined in depth through academic articles, books, and Harvard Business School case studies. In addition to traditional class sessions, the seminar will incorporate field trips to the Harvard Innovation Lab and startup companies.

Landmark Cases in American Constitutional History (203011)

2017 Fall (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

This freshman seminar will cover landmark Supreme Court decisions in American history: *Marbury v. Madison* (1803) (origins of judicial review); *Plessy v. Ferguson* (1896) (racial segregation in railroad transportation); *Korematsu v. United States* (1944) (Japanese-American internment); *Brown v. Board of Education* (1954) (school segregation); *Brown II* (1955) (Brown's remedial order); *Engel v. Vitale* (1962) (school prayer); *Reynolds v. Sims* (1964) (legislative malapportionment); *Miranda v. Arizona* (1966) (right against self-incrimination); *Furman v. Georgia* (1972) (death penalty); *Roe v. Wade* (1973) (abortion); *Bakke v. Board of Regents* (1978) (affirmative action); and *Obergefell v. Hodges* (2015) (gay marriage). Each session will discuss one case or one issue involving a couple of related cases. The seminar's aim is to elucidate how the Supreme Court functions as a political institution—that is, to see how the Court's decisions reflect the broader social and political context, and to consider the consequences of its rulings. The readings aim to present enough different angles from which to view the Court's rulings to enable discussion of how a particular issue—such as the death penalty—became a topic of social controversy and of constitutional law, why Justices' opinions were written as they were, and an evaluation of the decision's reasoning and its consequences. Readings for each session will average about two hours. In addition to discussing the readings, students will be required to write three papers reacting to the readings, each of about four or five pages. Students will be afforded some degree of choice in the weeks for which they write papers.

Morality, Leadership, and Gray Area Decisions (203014)

Joseph Badaracco

2017 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Everyone with serious responsibilities, at work and throughout their lives, faces gray area decisions. In organizations, these highly uncertain, high stakes decisions are delegated upward, to men and women in leadership positions. They have to make final decisions on these problems, despite the gray, and these decisions test their competence and their humanity. This seminar offers a variety of important perspectives on gray area problems and on ways to resolve them, responsibly and effectively. The seminar begins by examining gray area problems in various professions and lines of work. Subsequent sessions focus on three different ways of resolving gray area problems – in terms of accountability, character, and action. A typical session of the seminar will draw upon classic works of fiction, basic ideas in moral philosophy, and contemporary situations. These situations are typically described in short case studies involving men and women early in their careers, and they give students in the seminar the opportunity to grapple with these problems in personal terms – by discussing what they would do in these situations. From time to time, students will write short papers, which will be discussed in the seminar.

Finding Your Inner Neanderthal (203388)

Christian Tryon

2017 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Much of our history is written in our genes, and analyses of ancient and modern DNA have revealed that many living humans retain a genetic signature from our extinct evolutionary cousins, the Neanderthals. In this course, we will work together to help you find your inner Neanderthal. Our understanding of the past begins as you learn to make your own stone tools, a unique window to interpret the Paleolithic record. This experience guides your examination and analysis of real artifacts made and used by Neanderthals >50,000 years ago, drawn from the extensive collections of Harvard's Peabody Museum. The ability to create and interpret the archaeological record provides unparalleled insight to explore what the Neanderthals did and thought, and how they lived, loved, and died in Ice Age Eurasia. In addition to artifact manufacture, analysis, and weekly readings, there will be a field trip to the American Museum of Natural History in New York City to examine how Neanderthals and other early humans are represented in public displays of the past, and the course will culminate in the student design of a museum exhibit to be displayed on the Harvard campus. This freshman seminar will draw on perspectives from archaeology, paleontology, the history of science, and museum studies to study the Paleolithic, will provide the ability to think critically about how we interpret the past, and will explore how a study of our extinct relatives reveals the biases inherent in our perceptions of the world around us.

12

"We shape our buildings, and afterwards, our buildings shape us." ~ Winston Churchill

The built environment has profound effects on both our daily lives and the human condition at large. It determines where and how we live, work, play, and dream. The built environment embodies concrete

stances on a wide variety of material, spatial, and cultural issues within a society. The quality and availability of affordable housing, for instance, is not merely an economic concern, but also a value judgment about the obligations of a society to its citizens. Underlying the practical aspects of the built environment—can this be built?—are cultural and societal considerations. By examining these issues on a variety of scales, ranging from the single-family home to the megacity, this seminar investigates how the built environment is the fingerprint of societal values and how it can be a vehicle for both positive and negative change.

This seminar weaves together the practical aspects and social factors that make up the built environment. Each week, students will take on the role of decision-makers and engage with a wide variety of ethical, aesthetic, political, environmental, and social considerations. We will discuss how issues such as climate change, rapid urbanization, resource scarcity, economic inequality, and geopolitical conflicts, affect us as both inhabitants and constructors of the built environment. At the end of the seminar, students will bring together both ideological and practical considerations to design a new city from scratch à la Sim City.

Course Notes: As part of this dual process of investigation and application, students will have the opportunity to meet with world-renowned architects, urban planners, and developers, while also taking excursions into Cambridge and Boston.

Keeping It Simple: Consumer Financial Protection in a Complex World (205027)

John Campbell

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

People face a daunting array of problems in managing their financial lives. Taking out student loans, managing bank accounts and credit cards, financing a home purchase with a mortgage, and saving for retirement are all major challenges. There is evidence that many people lack the skills they need to meet these challenges. This seminar has three goals. The first objective is to give participants a basic grounding in financial literacy: principles of finance that we can use in our own lives. The second objective is to introduce research on the ways in which households use the financial system, emphasizing common financial mistakes and financial products that seem prone to misuse. We will learn to read papers from the academic economics literature, focusing on the papers' central ideas and empirical findings. The third objective is to explore ways in which the financial system can be improved to make it easier and safer to use. We will discuss the role of financial advisers, technological solutions ("fintech"), and public policy interventions including required disclosures, default choices ("nudges"), and regulations restricting access to financial products. We will monitor the political debate over the role of the Consumer Financial Protection Bureau, the agency created in 2010 to coordinate federal consumer financial regulation.

Beachhead for Radicalism or Bastion of the Elite Establishment? Politics and History of American Higher Education

When colleges and universities are in the news, it's often related to politics. Headlines feature students who shout down controversial speakers or professors who only present liberal ideas in their classrooms or universities that fire professors whose tweets anger donors. The public is interested in these stories because the stakes are high. Colleges and universities teach the people who are going to be the next generation of leaders. What if those people are indoctrinated with bad ideas or are not taught to how to behave in democracy? Faculty members are the country's experts. What if they do not provide reliable information? As experts should their views count more those of average citizens? Colleges and universities are supported with tax dollars and private donations and tuition payments. Who are they accountable to? Higher education is inextricably linked to politics but we do not have consensus about key questions such as: Should colleges and universities take positions on political issues? Can faculty advocate for political causes in their scholarship, public appearances and classrooms? Do students have political rights? This seminar will explore how these questions have been debated and resolved over time. We will be examine three periods in which national crises raised these questions with particular urgency: the 1830s-1850s (slavery and anti-slavery), the 1910s (World War I) and the 1960s (Vietnam War, Racial Equality, Student's rights). These historical cases will help us think more clearly about the present, another period of political strife effecting American higher education.

Sex, Money, and Power in the Postcolonial World (205048)

George Paul Meiu

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

With globalization, sex—everywhere—has become more central to who we are as citizens and consumers, how we gain rights and resources, and how we relate to others, as members of a specific race, ethnicity,

region, or culture. Worldwide, states invest or disinvest in people according to how they have sex, adopt gender identities, or sustain sexual morality. Terrorist organizations claim to use violence to reestablish bastions of piety and sexual propriety; various populist movements imagine immigrants and refugees to threaten their societies, in part, by failing to uphold the sexual norms of adopting countries; and transnational NGOs and activists seek to rescue and rehabilitate sex workers, gays, lesbians, transsexuals, and other people who are vulnerable because of their sexualities. The growing importance of sex to a global consumer culture only heightens the rush to secure societies from the so-called "perversions of globalization." Tourists now travel for sex to various destinations in Africa, Asia, Latin America, and the Caribbean; poor, unemployed men and women, in former colonies, sometimes use sex as a means of enrichment and empowerment; and amidst the rise of religious fundamentalisms, commodity ads incite youths to consume sex along other goods to build authentic selves. In this seminar, we ask: Why does sexuality become so central to how we imagine our world and futures? Why is sex so important in defining us, as subjects and populations? And how do older colonial stereotypes of race, ethnicity, and culture shape sexuality politics in the new global order? To address these questions, we read about how sex relates to politics and the economy in countries such as Brazil, Kenya, Namibia, Nigeria, and New Guinea; watch documentaries about prostitution and sex tourism in Africa and the Caribbean; and jointly curate a small museum exhibit about sexuality in the postcolonial world.

Mixing Religion and Politics? (205074)

Harvey Cox

2018 Spring (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Some of the best known religious personalities in the last one hundred years have had a notable impact on the political sphere. What was the nature of their spiritual basis and how did they translate their various faith traditions into the coinage of public life? Who were their religious and political opponents? In this course we will examine a number of figures including Mahatma Gandhi, a Hindu who led the non-violent struggle against British imperial rule in India; Dietrich Bonhoeffer, the Lutheran pastor who was killed by the Nazis for his involvement in the plot to assassinate Hitler; Martin Luther King, Jr., a Baptist pastor who inspired both civil rights and peace movement in America; Dorothy Day, founder of Catholic Worker movement; and Malcolm X, an American Black Muslim who drew on that tradition to attack racial and economic inequality.

Conservatism and its Critics (205070)

Eric Nelson

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What is conservatism? Is it merely a temperament or sensibility? Or is it a coherent approach to political theory and practice? Should conservatives defend free markets? Must they reject the discourse of natural rights? Can a liberal be conservative? Can a socialist? This course will explore such questions and others like them through a close reading of conservative writers and their critics. We will begin with the rise of conservatism as a political force in the wake of the French Revolution and follow its fortunes across the next two centuries, in works of political theory as well as literature. Authors will include Edmund Burke, Mary Wollstonecraft, Samuel Taylor Coleridge, Ford Madox Ford, Friedrich Hayek, Michael Oakshott, Robert Nozick, and Tom Stoppard. We will be interested throughout in asking what, if anything, is conservative about the Conservative Movement in contemporary American politics.

Law at Work: Employment Rights in the Age of Uber (205071)

Benjamin Sachs

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Work is what most of us do with most of our time. Even before we start a career, we invest our energy in preparing for work and in imagining what work life will be. In this seminar, we explore the multiple ways that *law* defines what work is like in the contemporary United States. We start with the question of how much power an employer should have over employee: should it really be legal to fire someone for wearing the wrong tie or having the wrong spouse? We then debate the issue of appearance codes, asking whether an employer should be able to require women to wear makeup or to ban employees from having dreadlocks. We will explore the ways in which sexual orientation, gender identity, and immigration status impact employees' rights at work. And we will ask whether it ever should be legal for an employer to hire employees of only one gender: should Hooters Restaurant, for example, be permitted to hire only women as waiters or should those jobs be equally available to men? The seminar also will examine the way law polices the line between work and "life" by looking at the emerging right-to-disconnect. And the seminar will address the fundamental question of *who* exactly is an employee: do Uber drivers or college football players count? The seminar concludes with a discussion of the ways technological changes are transforming work and, with it, the law that governs this central feature of our lives.

Contemporary Issues in American Higher Education (205072)

Robert Iuliano

2017 Fall (4 Credits)

Schedule:

R 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Issues fundamental to society regularly play out on the campuses of America's colleges and universities. For example, how should a community react to speech that some members may find offensive? To symbols or traditions that speak to the institution's past but may be alienating to parts of its current student body? Is a college or university justified in considering race in admissions, or is that unfair discrimination? Should institutions invest their endowments to serve specific public policy goals, such as divestment from fossil fuel companies as a statement about climate change, or does that convert them into political actors inconsistent with their mission and obligation to create vibrant space for academic discourse? As you join the Harvard academic community, this seminar is designed to orient you to higher education and issues that often arise on and about college and university campuses. We will look at topics normatively, asking less what the rules are and more what they ought to be. The seminar's ultimate goal is to introduce you to the nature and values of the peculiar institutions that are America's college and universities and to begin to help you understand more fully the world that will help shape your lives over the next four years.

Freshman Seminar 70X

Decision Theory and Game Theory in the Real World (205178)

Christopher Avery

Richard Zeckhauser

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The goal of this seminar is to provide students with building blocks for understanding how to make better decisions. Decision theory, which focuses on how to assess uncertainties and to define preferences across outcomes, is explicitly prescriptive, i.e., explaining what one should do. Game theory engages more complex situations where the choices of other individuals come into play. Nevertheless, acquaintance with the central tools of game theory should enable students to behave more effectively in interactive situations. It should also help them structure interactive situations in ways that produce collectively superior results.

The seminar will present some technical material from these two disciplines, but seminar meetings will focus on discussion and applications of those technical results. The only mathematical prerequisite is high school algebra and some knowledge of elementary statistics. However, conceptual thinking will be stressed.

Course Notes: Students will be required to complete answers to three discussion questions during the semester. These questions are designed to prompt detailed reflection about the subject of the readings for a particular topic as well as to promote incisive conversations during the relevant session of the course. We will ask students to submit preferences for these Discussion Questions during the first course meeting and will assign a set of students to each of the subsequent Discussion Questions based on these preferences. Each written answer to a Discussion Question should be on the order of 3 or 4 paragraphs (1-2 double-spaced pages), and should be submitted to the course website by 8 pm the day before the relevant lecture. Students will also be required to complete a 15 to 20 page research paper applying the techniques of the course to a policy application of their choosing.

Recommended Prep: The only mathematical prerequisite is high school algebra and some knowledge of elementary statistics.

Regulating Online Conduct: Speech, Privacy, and the Use and Sharing of Content (205179)

Christopher Bavitz

2017 Fall (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In the course of a few short decades, the Internet has become integral to significant swaths of human experience. It has radically altered modes of interpersonal engagement, democratized access to tools of mass communication, and changed the role of gatekeepers that traditionally controlled access to music, video, and other media. Given the breadth of its impact, it is not surprising that the Internet has pushed the bounds of legal doctrines that govern speech, privacy, and the creation and exploitation of content. Mass-scale online distribution of copyrighted works tests the limits of legal doctrines developed in an era of physical copies. Age-old tensions between privacy and the right to free expression have been exacerbated in cases where one's right to speak bumps up against the desire of another to keep information private. And, the ability to share—and, thus, to consume—extraordinary amounts of personal data has impacted government (which collects and uses data for purposes of law enforcement) and private companies (which collect and use data for purposes of advertising and monetization). This seminar will provide an overview of legal doctrines that govern the online conduct of individuals and institutional actors. It will address the rights and responsibilities of the intermediaries that mediate many of our online activities – social networks, cloud-based storage services, email providers, and the like. Students will consider old and new

legal frameworks and the ways in which the law informs strategic decisions for those that operate online. The seminar will address some of the most important and complex policy debates of our day—regarding the proper scope of intellectual property protection; the balance between a robust environment for online free expression and a desire to protect against harmful speech; and the ways in which the law addresses privacy vis-à-vis both government and private actors. Readings and in-class conversations will cover legal cases and case studies, offering students a high-level view of the technical, legal, and business landscape and allowing them to delve deeply into particularly difficult sets of problems concerning the regulation of online conduct.

Freshman Seminar 71C

The Supreme Court and Social Change: Lessons from Landmark Cases and Key Reform Movements (205180)

Tomiko Brown-Nagin

2018 Spring (4 Credits)

Schedule: R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Justice Oliver Wendell Holmes famously wrote: "The life of the law has not been logic; it has been experience." This seminar considers the idea of experience—including events external to legal doctrine—affecting the law. It discusses how social movements—groups of citizens mobilized in support of a cause—deploy the Constitution and other types of rights talk to "frame" disputes and move forward their agendas. Seminar participants will discuss how movements crystallize grievances, mobilize supporters, demobilize antagonists and attract bystander support by referencing constitutional rights and other ideas about law. It also considers the effectiveness of movements' legal strategies. The seminar considers these questions in relation to the abolitionist, woman suffrage, civil rights, women's rights, anti-poverty, same-sex marriage and Tea Party movements, among other recent reform efforts.

Zen and the Art of Living: Making the Ordinary Extraordinary (205217)

James Robson

2017 Fall (4 Credits)

Schedule: R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This seminar explores the rich history, philosophy and practices of Zen Buddhism as it developed in China, Korea, and Japan. We will first consider the emergence of the Zen tradition out of the Buddhist tradition and then explore the full range of its most distinctive features (Zen monastic meditation), cultural practices (painting, calligraphy, and poetry), and radical—even iconoclastic—innovations (such as the use of kōans, which are seemingly nonsensical sayings that defy rationality). We will also critically evaluate some less well-known facets of the Zen tradition, such as gender issues, the veneration of mummified masters, and the question of how Zen was implicated in modern nationalistic movements in Japan during World War II. During the mid-20th century, Zen became a global phenomenon as Zen masters began to move around the world and introduce the practice of Zen meditation to those in search of religious alternatives to Western organized religions, rationalism, and materialism. Zen attracted the attention of writers, musicians, artists, and athletes. Why did Zen develop such a trans-cultural appeal at that moment in history? Why are there so many books with the title: "Zen and the Art of...."? Why do so many computer and tech companies have Zen in their names? How has Zen meditation fed into the current "meditation/mindfulness" boom? These are some of the questions we will explore in this seminar through readings, film screenings, museum viewings, and a visit to a Zen meditation center.

Course Notes: This course will also include required film screenings, visits to the Harvard Art Museums and Boston, Museum of Fine Arts, and to the Cambridge Zen Center.

Freshman Seminar 71F

The Origins of the Human Mind (205222)

Susan Carey

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The adult human mind is a unique phenomenon on earth. Only people can ponder the causes of and cures for global warming or pancreatic cancer, and can think thoughts about molecules, genes, democracy... Animals, and human infants, do not have most of the 500,000 concepts expressed by words in English. How does the human mind work, and how can we understand how it came to be, with its vast repertoire of concepts from which we routinely compose thoughts? In this seminar, we will explore together the origins and development of human knowledge in the individual child, in relation to two larger time scales: biological evolution and historical/cultural development. We will begin with several case studies, including case studies of the origin of the concepts *natural number* and *living being*. Each case study illustrates how all of the disciplines within the cognitive sciences, as well as anthropological, archeological and historical disciplines, shed light on these issues. The main focus will be on experimental work from psychology. We will then turn to case studies chosen by the participants in the seminar. By the end, seminar students will have a grasp of the theoretical debates about the nature of the human mind that have animated philosophy since the time of the Greek philosophers, as well as why considerations of the origins of the mind were always seen as central to these debates. Students taking this seminar should have an interest in learning about the cognitive sciences, which draw primarily from linguistics, analytic philosophy, computer science, and experimental psychology.

Performance, Tradition and Cultural Studies: An Introduction to Folklore and Mythology (125216)

Stephen Mitchell

2017 Fall (4 Credits)

Schedule:

TR 0900 AM - 0959 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Examines major forms of folklore (e.g., myths, legends, epics, beliefs, rituals, festivals) and the theoretical approaches used in their study. Analyzes how folklore shapes national, regional, and ethnic identities, as well as daily life; considers the function of folklore within the groups that perform and use it, employing materials drawn from a wide range of areas (e.g., South Slavic oral epics, American occupational lore, Northern European ballads, witchcraft in Africa and America, Cajun Mardi Gras, Sub-Saharan African oral traditions).

Course Notes:

Required of Concentrators and for the Secondary Field in Folklore and Mythology. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

Occasional Fridays are required. Please check course website for details.

The Ancient Greek Hero: Mythology and Facing Death (113501)

Gregory Nagy

2017 Fall (4 Credits)

Schedule:

MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores some of the greatest works of ancient Greek literature in English translation, while concentrating on a central problem for humanity: how to face death? For the Greeks, a special way to address this problem was to think long and hard about what they called "heroes" in their myths. The purpose of the course is to extend that kind of thinking to the present. There are no examinations, and assignments are limited to a series of five short pieces of creative writing. Each assignment invites students to engage in personal reflections on the meaning of life and death in the light of what we read in Greek literature about the ordeals of becoming a hero.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

East Asian Religions: Traditions and Transformations (126199)

James Robson

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course provides an introduction to the study of East Asian religions. It covers the development of Buddhism, Daoism, Confucianism and Shinto. It is not a comprehensive survey, but is designed around major conceptual themes, such as ritual, image veneration, mysticism, meditation, death, and category formation in the study of religion. The emphasis throughout the course is on the hermeneutic difficulties attendant upon the study of religion in general, and East Asian religions in particular.

Course Notes: Offered jointly with the Divinity School as 3010. This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Societies of the World, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Classical Mythology (126004)

Brigitte Libby

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

120

Incest and parricide, cannibalism and self-blinding: classical mythology has fascinated artists, writers, and thinkers throughout western civilization, and this course will serve as an introduction to this strange and brilliant world. We will move from the very first works of Greek literature through to the classic Greek tragedies and the Roman tales in Ovid's *Metamorphoses*. Along the way, we will confront the question of what "mythology" is and how it works, and we will discuss how these traditional stories changed over time to fit different cultural circumstances. We will also consider ancient rationalizations of myth, the relationship of myth and politics, and the reception of classical myth in the modern world.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Apocalypse Then! Forging the Culture of Medieval Rus' (111958)

Michael Flier

2017 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

When the natives of Medieval Rus (later Russians, Ukrainians, and Belarusians) accepted Orthodox Christianity in the 10th century, their nature-based paganism gave way to a powerfully sensual belief system that made good use of the visual and the verbal to prepare these newest Christians for the coming Apocalypse and Last Judgment. We investigate this transformation from the conversion of Saint Vladimir and the excesses of Ivan the Terrible through the Time of Troubles and the modern turn of Peter the Great. The class features close analysis of architecture, icons and frescoes, ritual, folklore, literature, and history to understand this shift in worldview, including the role of women. Special attention is devoted to the ways

in which Medieval Rus is portrayed in film, opera, and ballet.

Course Notes: All readings in English. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Disease and healing pose pragmatic and moral challenges for individuals and societies. Artists and writers have struggled to make sense of these tragic and transcendent experiences through fiction, poetry, art, and music. Scholars can explore these archives of the illness experience to understand not just disease and medicine but also what it means to be human. This interdisciplinary course examines how the medical humanities can change how we think about suffering, resilience, and caregiving. We will consider caregiving at different scales, from the traditional focus on patient-doctor relationships to emerging concerns with climate change and planetary health.

Gender and Science (156924)

Sarah Richardson

2018 Spring (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

120

Why are women well represented in some fields of scientific study but not others? Do gender beliefs influence the content of scientific knowledge? How is gender encoded in the practices and norms of science? This course explores the intersection of gender and science from Bacon's seventeenth century call to raise a "masculine" science to the present. Topics include: girls, boys, and science education; gender and technology; women in the science professions; bias and objectivity in science; and gender and science in literature, film, and popular culture.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Language and Culture (112218)

Nicholas Harkness

2017 Fall (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This is a course in linguistic anthropology. We explore key theoretical issues in the semiotic anthropology of language use, focusing on communication, social (inter)action, representation, cultural conceptualization, and language ideology. By presenting many of the most influential and innovative contributions to the study of language in culture and society—both recent and classic—the course aims to guide students in asking fundamental questions about language and communication more broadly as facts of everyday sociocultural experience.

Course Notes: No previous knowledge of linguistics or of anthropology is required. This course may fulfill the Entry Course requirement for Social Anthropology.

Poetry in America (125187)

Elisa New

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

54

Surveying 300+ years of poetry in America, the course covers individual figures (Wheatley, Poe, Whitman, Dickinson, Frost, Millay, Williams, Hughes, Bishop) as well as major poetic movements (Firesides, Modernist, New York, Confessional). Emphasis is given to the changing function of poetry in American culture. Offered in a blended format, the course meets in seminar with course staff once per week, with all required lecture content available online.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Rx: Arts for Global Health (123834)

Doris Sommer

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Technical remedies alone seldom address the complex challenges of global health. Fear or humiliation may interfere with diagnosis and available treatments. Stigma or ignorance of causes and cures can create escalating epidemics. So innovative health providers have learned to rely on creative interventions through the arts and, by extension, through creative education.

Inspired by The Global Health Education and Learning Incubator at Harvard University, our course considers the dynamic between health conditions and conditions for health, as well as responses to those conditions, both medical and non-medical. Resources for significant non-medical responses often come from cultural interventions, including traditional and contemporary arts. The interconnectedness of conditions and the far-reaching effects of creative responses are explored through cases of arts intervention in health care and through theories of why art works. What is therapeutic about making art and about thinking through the process? Readings and discussion engage a tradition of aesthetic philosophy that begins in the European Enlightenment to promote broad-based art-making as a response to conflict (Schiller) and to stimulate freedom of thought by starting with beauty (Kant). Surprising expectations and inviting us to think about the effects, "Rx: Arts for Global Health" offers basic training in the enlightened tradition of aesthetic judgment while it tracks some cases of arts that support global health.

In lectures by instructors and guest speakers, the course considers how change and growth in global health can benefit from an aesthetic approach to technical and social challenges. Theoretical readings

(Plato, Aristotle, Kant, Arendt, Schiller, Dewey, Freire, Gramsci, Rancière, Mockus, Boal, Nussbaum, inter alia) accompany concrete cases of treating malaria, tuberculosis, HIV, depression. The final project will be a "case study," of a particular health challenge, including a proposal for a creative intervention.

Race, Gender, and Performance (122277)

Robin Bernstein

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

100

Performance surrounds us. We see performances online, in movies and on TV, on the sports field, in the theatre, in activism, and in everyday life. How do these performance produce or disrupt race and gender? This class provides analytical tools by which to answer this question. Texts include works by Anna Deavere Smith, David Henry Hwang, Bertolt Brecht, Guillermo Gómez-Peña, and Judith Butler; topics include AIDS activism, politics of public bathrooms, and weddings.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. Visual Culture of the Ottoman Empire Between East and West (15th-17th Centuries) (109449)

Gulru Necipoglu-Kafadar

2017 Fall (4 Credits)

Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Examines the visual culture of the Ottoman Empire straddling three continents (Asia, Europe, Africa), together with cross-cultural artistic interactions with Western and Asian Islamic courts (Safavid Iran, Mughal India). Ottoman urbanism, architecture, miniature painting and decorative arts studied in their socio-political contexts that informed their production and reception. The selective fusion of Ottoman-Islamic, Byzantine and Italian Renaissance elements in the codification of a distinctive visual tradition that helped processes of multicultural empire building and identity formation is analyzed. Earliest representations of the East by European artists working in the "Orientalist" mode are also considered.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Cosmos of the Divine Comedy (127022)

Lino Pertile

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Studies *Dante's Comedy* as an enduring work of poetry, a major text of the European literary tradition, and the most comprehensive synthesis of medieval culture.

Primarily based on textual analysis, the course looks at how literature works in relation to, on the one hand, the language and rhetorical tradition in which it is expressed and, on the other, the culture which it expresses and interprets. Particular attention is paid to the poem's central philosophical concerns, from the role of the individual in history and society to the relationship between progress and happiness, and between religion and morality.

Course Notes:

Conducted in English. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

For the Love of God and His Prophet: Religion, Literature, and the Arts in Muslim Cultures (125190)

Ali S. Asani

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course surveys the literary and artistic dimensions of the devotional life of the world's Muslim communities, focusing on the role of literature and the arts (poetry, music, architecture, calligraphy, etc.) as expressions of piety and socio-political critique. An important aim of the course is to explore the relationships between religion, literature, and the arts in a variety of historical and cultural contexts in the Middle East, sub-Saharan Africa, South Asia, Europe, and America.

Course Notes:

No prior knowledge of Islam required. You do not need to be "artistically" talented to do well in this course -- just willing to think "out of the box." Offered jointly with the Divinity School as 3627. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

American Dreams from Scarface to Easy Rider (109501)

Eric Rentschler

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

218

This class familiarizes students with popular films produced during crucial junctures in the modern history of the United States, from the Great Depression and World War II through the Cold War, McCarthy era, and the 1960s. More specifically, we will study how Hollywood's dream factory responded to dramatic challenges that states of crisis and emergency posed to the founding ideals of our democracy. We will look at the wide range of functions that commercial fantasy productions assumed, how they at times legitimated and bolstered the status quo, but at others also interrogated, exposed, and even indicted social inequity. Course films provide a representative sampling of classical American features from 1932 to 1969, including *Scarface*, *It Happened One Night*, *The Wizard of Oz*, *Gone with the Wind*, *Citizen Kane*, *Casablanca*, *High Noon*, *The Invasion of the Body Snatchers*, *The Manchurian Candidate*, and *Easy Rider*.

Course Notes:

See syllabus for information on film screenings. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

East Asian Cinema (110464)

Jie Li

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

98

This course introduces major works, genres, and waves of East Asian cinema from the silent era to the present, including films from Mainland China, Japan, Korea, Taiwan, and Hong Kong. We will discuss issues ranging from formal aesthetics to historical representation, from local film industries to transnational audience reception. This course does not assume prior knowledge of East Asian culture or of film studies, but rather seeks to provide students with a basic understanding of modern East Asian cultural history through cinema, and with an essential toolkit for analyzing film and media, including narrative, cinematography, editing and sound. In addition to critical approaches, students are strongly encouraged to creatively respond to course materials by collaborating on their own short films, beginning with the illustration of film terms in the first two weeks and culminating in the Oscar-like "Golden Monkey Awards."

Course Notes: All films subtitled in English. No prior knowledge of East Asian history or film studies necessary.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Subject: United States in the World

United States in the World 15

Race, Ethnicity, and Immigration: From Obama to Trump (116248)

Jennifer Hochschild

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The American racial, ethnic, and immigration orders have been changing at a dizzying pace over the past decade, from the extraordinary election of a liberal African American president in 2008 to the very different, but equally extraordinary, election of a conservative populist president in 2016. These changes emerged from a broad and deep set of transformations in American group dynamics over the past half-century. This course examines what has gotten better, and worse, in the ways that the United States engages with group hierarchy, discrimination, incorporation, and political activity since the civil rights movement of the 1960s. It also examines why these changes have occurred, and how we might predict, and affect, how race, ethnicity, and migration will be further transformed in the foreseeable future.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Reinventing (and Reimagining) Boston: The Changing American City (122320)

Robert Sampson

David Luberoff

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In the last half of the 20th century, there was gloom about urban life and many cities were projected to decay. Although some did, others became models of urban renaissance. Using Boston as a case study of urban change, this course examines key issues such as economic inequality, political governance, crime and criminal justice institutions (e.g, policing, incarceration), racial segregation, immigration, and gentrification. We draw on a wide range of reading and data sources, as well as presentations by notable local practitioners, student visits to different parts of Boston, and a variety of writing assignments designed to help students better appreciate, understand, and participate in contemporary urban life.

Course Notes:

This course, when taken for a letter grade, may be counted for introductory Sociology concentration requirement.

Sex and the Citizen: Race, Gender, and Belonging in the United States (126319)

Caroline Light

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

105

Sex and citizenship are two concepts that are not often brought into conversation, as one is thought to be a private, deeply individual matter, while the other concerns the relationship of the individual to a system of governing structures and the wider public in which they are embedded. And yet, when we look at our contemporary world's most divisive public debates – over reproductive rights, immigration, marriage equality, and even people's access to public restrooms – we can't help but notice that sex comprises a vital part of public discourse informing the regulation of people's access to the rights, privileges, and protections of citizenship. This course looks back in time at the ways in which assumptions about so-called "natural" human difference – including but not limited to sex and race – have helped justify regimes of exclusion and control by which some people enjoy full citizenship while others stand outside the boundaries of belonging.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Designing the American City: Civic Aspirations and Urban Form (116243)

Alex Krieger

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An interpretive look at the American city in terms of changing attitudes toward urban life. City and suburb are experienced as the product of design and planning decisions informed by cultural and economic forces, and in relationship to utopian and pragmatic efforts to reinterpret urban traditions in search of contemporary alternatives. Topics include: persistent ideals such as the single-family home, attitudes toward public and private space, the rise of suburbs and suburban sprawl, cycles of disinvestment and renewed interest in urban centers, and impacts of mobility and technology on settlement patterns.

Course Notes:

Offered jointly with the Graduate School of Design as DES 0330200. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

People make history through the things they make, collect, exhibit, exchange, throw away, or ignore. Over four centuries, Harvard has not only amassed books and manuscripts but art works, scientific instruments and specimens, ethnographic objects, and historical relics of all sorts. By learning how and why particular things arrived in Cambridge and what happened to them when they got here, students will discover how material objects have shaped academic disciplines, reinforced or challenged social boundaries, and defined America's place in the world. This is an interactive course, with weekly visits to museums and close-up investigation of specimens and artifacts.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The World's Religions in Multicultural America: Case Studies in Religious Pluralism (118775)

Diana Eck

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

An exploration of the dynamic religious landscape of the US with special focus on Muslim, Hindu, Buddhist, and Sikh traditions in the most recent period of post-1965 immigration. How are faith and freedom negotiated in a more complex society? In what contexts do minority religious communities encounter long-dominant Christian and Jewish communities? How is America changing as religious communities struggle with civic, constitutional, ethical, and theological issues, especially in the post-9/11 period? Readings, films, discussion, and class projects will focus on particular cases and controversies.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for United States in the World or Culture and Belief, but not both.

The Civil War from Nat Turner to Birth of a Nation (128327)

John Stauffer

2018 Spring (4 Credits)

Schedule:

MW 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This interdisciplinary course reframes traditional understandings of the Civil War in three ways. First, by showing that civil conflict in the United States began well before 1861 and ended well after 1865, taking the form of slave uprisings and Klan terrorism, as well as conventional war. Second, by showing that the former Confederacy won this longer Civil War by establishing a new order of black unfreedom. And third, by placing this war in the context of international politics and trade. "Readings" range from fiction, film, letters, and speeches to poetry, pamphlets, prints and photographs, songs, and history.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Dilemmas of Equity and Excellence in American K-12 Education (107341)

Katherine K. Merseth

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

80

Events such as Teach for America's 20th anniversary and films like Waiting for Superman highlight urgent concerns about the quality and reach of American schooling in the 21st century. Against this backdrop, the

course grapples with several dilemmas that have defined American K-12 education throughout history. What constitutes educational excellence? Can excellence be achieved for everyone? Why do we have schools and what is their purpose? Given that families, politicians, and the courts often disagree vehemently about the answers to these questions, the course considers who and what will define the future of American education and its role in society.

Class Notes: US-WORLD 35 will be offered twice in Fall 2017 (Tu,Th 10:00- 11:30 and Tu,Th 11:30-1:00). Students must register for and attend only one of the two offerings.

See the course website for more details about the lottery process for this course.

Power and Protest: The United States in the World of the 1960s (125516)

Lisa McGirr

2017 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course charts the key events, actors, ideas and strategies of collective movements for social change during the "long 1960s." It situates these mobilizations within the key economic, social and political developments in the post-World War II period in the United States and the world. Topics include Cold War politics from Eisenhower to Nixon, the civil rights movement, the new left, the women's movement, the war in Vietnam, black power, as well as the emergence of a revitalized political Right. The legacies of these movements and the more recent economic and political shifts that have challenged some of their core assumptions are also considered.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Democracy Project (203045)

Jill Lepore

2018 Spring (4 Credits)

Schedule:

T 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

84

A fast-paced and sweeping introduction to American political history, from past to present, structured around one of the most important democratic institutions: debate. Class debates wrestle with questions like citizenship, rights, and race, using readings from primary documents chronicling pivotal struggles over ongoing issues. No formal debating experience required or expected!

Course Notes:

Section meetings will require intensive written and oral preparation. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. This course was previously offered with the course title, "The Great Experiment."

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the

course website for more details.

Subject: Science of Physical Universe

Science of Physical Universe 12

Natural Disasters (112430)

Brendan Meade

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

70

Natural disasters, such as earthquakes, hurricanes, and floods, claim thousands of lives and cause tens of billions of dollars in damage each year. Moreover, changes in Earth's climate are raising sea level, changing precipitation patterns, and likely causing an increase in the occurrence of damaging storms, putting more of our increasing exposed global population at risk. In this course we develop an understanding of these natural hazards from an earth science perspective, and examine several case studies to assess their catastrophic impacts. Given our scientific understanding of these phenomena, we examine ways to assess and forecast future natural disasters, and to mitigate the adverse impacts to our societies. Sections will emphasize the use of GIS technology to measure the impacts of natural hazards.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Why You Hear What You Hear: The Science of Music and Sound (114922)

Eric Heller

2018 Spring (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

Sound and music are integral parts of all human cultures, and play critical roles in communications and social interactions. In this course, we study the production, transmission, and perception of sound, with the aim of expanding communication, musical, and artistic horizons. The course includes many class demos and hands on tools for students to explore. Psychoacoustics (the study of how we perceive and interpret sound) is a central theme of the course, providing a lens through which we can better understand the generation, propagation, and analysis of sound. Student-selected projects (with staff consultation) are an important part of the course.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Science of Physical Universe 14

How to Build a Habitable Planet (118517)

Charles Langmuir

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The story of Earth from the inception of the universe at the Big Bang to the revolution in planetary function and capability associated with the rise of human civilization. The aim of the course is to place human beings in a universal and planetary context, and to see the steps in planetary evolution as an essential perspective on how we relate to Earth today. Topics covered include the Big Bang, origin of the elements, formation of minerals, origin of the solar system, formation of planets, climate regulation, origin of life, co-evolution of ocean, atmosphere, solid earth and biosphere, development of plate tectonics, the modern Earth as an interconnected system, and the human era and its consequences for the planet. Current environmental problems can then be considered in a planetary context. Finally we consider whether Earth may be a microcosm reflecting laws of planetary evolution that may be common to a class of planets throughout the universe, or alternatively may be a low probability accident.

Science of Physical Universe 20

What is Life? From Quarks to Consciousness (126148)

Andrew Berry

Logan S. McCarty

2017 Fall (4 Credits)

Schedule:

MWF 0930 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

60

This course views life through multiple lenses. Quantum physics involves uncertainty and randomness, and yet paradoxically it explains the stability of molecules, such as DNA, that encode information and are critical to life. Thermodynamics is about the universe's ever increasing disorder, and yet living systems remain ordered and intact. This course will examine how these physical laws underpin life and how life itself has diversified since originating 3.5 billion years ago.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Science of Living Systems, but not both.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. See the course website for more details.

The Unity of Science: From the Big Bang to the Brontosaurus and Beyond (126149)

Irwin Shapiro

2018 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Science is like well-woven, ever-expanding fabric, designed to (un)cover Nature's secrets. This course emphasizes the strong connections between subfields of science, showing it as the never-ending and greatest detective story ever told, with evidence always the arbiter. These characteristics are exhibited in the semi-historical treatment of three themes: unveiling the universe, the earth and its fossils, and the story of life.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Science of Living Systems, but not both.

Science of Physical Universe 25

Energy and Climate: Vision for the Future (120031)

Michael McElroy

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0229 PM

Instructor Permissions: Instructor**Enrollment Cap:**

105

The climate of our planet is changing at a rate unprecedented in human history. Primarily responsible is the build-up of heat-trapping gases in the atmosphere, most notably carbon dioxide emitted in conjunction with the combustion of coal, oil and natural gas. Concentrations in the atmosphere of CO₂ are higher now than at any time over at least the past 850,000 years, higher arguably than at any time since dinosaurs roamed the planet 50 million years ago. The course will provide a perspective on what we may expect in the way of future climate change if we fail to take action – more violent storms, extremes of precipitation, heat waves, pressures on food production, and an inexorable rise in sea level. It will survey the energy choices available should we elect to take action to minimize future damage to the climate system. Special attention will be directed to the challenges and opportunities confronting China and the US, the world's two largest current emitters. The overall goal will be to develop a vision for a more sustainable environmental future, one in which energy is supplied not by climate-altering fossil fuels but rather by zero carbon alternatives such as wind, solar, hydro, geothermal, tidal and nuclear.

Course Notes: Students who have taken Science A-52 may not take this course for credit.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Recommended Prep: Students are expected to have a background of high school algebra and trigonometry.

Finding Our Way (126603)

John Huth

2017 Fall (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

165

We use the theme of primitive navigation to open the eyes of students to the physical world in a direct and palpable manner. Basic principles include human cognition of physical and mental maps, dead reckoning, direction finding from nature. The course includes the basics of astronomy, including planetary orbits, meteorology, thermodynamics, bird behavior, electromagnetic radiation, optics, waves, tides, ocean currents, and fluid dynamics. Navigational practices of Pacific Islanders, Norse, medieval Arabs, and early western Europeans provide a focus. Some facility with algebra and trigonometry is useful. A series of hands-on projects are employed to understand navigational practices discussed in lecture.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of the Physical Universe or Empirical and Mathematical Reasoning, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. Science and Cooking: From Haute Cuisine to Soft Matter Science (126638)

David Weitz

Pia Sorensen

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a collaboration between world-class chefs and Harvard professors. Each week, a chef will lecture about some aspect of gastronomy. This lecture will introduce and motivate a lecture about the

science of soft materials by a Harvard professor. The course will cover the basic concepts in the science of soft materials, providing a solid understanding of their properties and behavior. All food is made of soft materials, and cooking relies on many of their fundamental properties. The course will also include laboratory work that uses concepts of cooking to understand and motivate experimental measurements on soft materials.

Course Notes: Occasionally there will be an optional 15-30 minute question and answer session with visiting chefs.

The Climate-Energy Challenge (126633)

Daniel Schrag

2017 Fall (4 Credits)

Schedule: MW 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap: 75

This course will examine future climate change in the context of Earth history, and then consider various strategies for what might be done to deal with it. The likely impacts of continued greenhouse gas emissions will be explored, emphasizing the scientific uncertainties associated with various predictions, and how this can be understood in the context of risk. In the latter third of the class, the question of how to mitigate climate change will be discussed, including an examination of various options for advanced energy systems.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. See the course website for more details.

Science of Physical Universe 30

Life as a Planetary Phenomenon (120881)

Dimitar Sasselov

2018 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 130

This course considers the relationship between life and the planet on which it resides. It examines the scientific quest to understand where life might thrive beyond Earth. On Earth, life was born of planetary processes and has been sustained by plate tectonics and other physical processes. Through evolution, life has in fact emerged as major influence on our planet's surface. Fundamental features of terrestrial life and evolution are addressed in the context of astronomy, planetary physics and chemistry. These, in turn, provide a basis for the exploration for other habitable planets, both within our solar system and in the greater universe.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Science of Physical Universe 31

Energy Resources and the Environment (156316)

John Shaw

2018 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 105

The course provides an overview of the energy resources that we use to sustain our global economies, and explores the impact of these activities on our environment. We address the full life cycle of each energy resource, including its origins, methods used to explore for and exploit it, how it is used in our economies, and the environmental impacts of these activities. Topics include coal, petroleum (conventional and unconventional), nuclear power, geothermal systems, and renewable energy options (hydro, tidal, solar, wind power). Lectures and labs will introduce students to data and methods used in these energy and environmental sectors.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Modern China presents a dual image: a society transforming itself through economic development and infrastructure investment that aspires to global leadership; and the world's largest and oldest bureaucratic state, with multiple traditions in its cultural, economic, and political life. The modern society and state that is emerging in China will bear the indelible imprint of China's historical experience, of its patterns of philosophy and religion, and of its social and political thought. These themes are discussed in order to understand China in the 21st century and as a great world civilization that developed along lines different from those of the Mediterranean. This year the course introduces a variety of new online learning features.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

This course will occasionally meet on Thursdays throughout the semester. Please check the syllabus on the course website for more details.

Japan is a collection of islands, but its past and present unfolds through continuous interaction with wider worlds. This course places Japan in contexts of Asian and global history. It begins with the people, institutions, and ideas of premodern Japan, from the emergence of a court-centered state 1500 years ago to

a warrior-dominated society centuries later. We then examine the tumultuous process of change from the 19th century through the present and explore how people in Japan have dealt with the dilemmas of modernity that challenge us all.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Enrollment Cap:

75

This course seeks to provide a broad historical context in which to understand the contemporary political division on the Korean peninsula. It examines key historical forces that have created and shaped the two Koreas before, during, and after the actual partition of the country in 1945. Topics include nascent nation-building efforts between 1876 and 1910, the impact of Japanese colonialism and the Cold War, and North/South development and interaction after 1948. The course interweaves political, socioeconomic, and cultural themes within an historical framework centered on nation-building while also highlighting a number of major historiographical issues in modern Korean history.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. Political Economy After The Crisis (126203)

*Roberto Mangabeira Unger**Dani Rodrik*

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

The world's economic and political order reels under mounting challenges: the global financial crisis, the austerity debacle, a slowdown in economic growth and productivity, the aggravation of inequality and the inadequacy of conventional responses to it, the discrediting of the Washington Consensus, the globalization backlash, the re-emergence of nationalist politics in Europe and the United States, and a contest over the meaning, value, and requirements of democracy. We examine connections among these phenomena and explore alternative ways of thinking about contemporary market economies and their reconstruction. We organize the course around four related themes: the worldwide financial and economic crisis of the recent past and its management; the effort to promote socially inclusive economic growth in richer as well as in poorer countries; the nature, fate, and dissemination of the new knowledge-intensive style of production; and the past, present, and future of globalization.

Course Notes:

Students should have some previous acquaintance with economics but no advanced economic training is required. The course is open to undergraduate and graduate students outside as well as within economics. Readings will be drawn from the classic and contemporary literatures of economics, political science, philosophy, and social theory.

Extended take-home examination/writing assignments. Jointly offered with the Law School.

The Caribbean: Globalization, Socio-Economic Development & Cultural Adaptation (118290)

Orlando Patterson

2017 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Caribbean societies are largely the economic and political creations of Western imperial powers and are among the earliest products of globalization. Though *in the West*, they are only partly *of it*, and their popular cultures are highly original blends of African, European and Asian forms. The course examines the area as a system emerging through genocide, piracy, plantation slavery, colonialism and globalization, from a situation of great social and cultural diversity to the present tendency toward socio-economic and cultural convergence. Patterns of underdevelopment and government are explored through national case studies (Puerto Rico, Cuba, Jamaica & Haiti) and selected, region-wide modern issues (hurricanes, earthquakes and other natural disasters; migration & transnationalism; crime & drug trafficking), as are cultural adaptations through studies of Afro-Caribbean religions, folkways, and music. America's special role in the region is emphasized.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Modern India and South Asia (116237)

Sugata Bose

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course provides the historical depth and the comparative context in which to understand modern and contemporary South Asia. It explores the history, culture, and political economy of the subcontinent which provides a fascinating laboratory to study such themes as colonialism, nationalism, partition, the modern state, democracy development, religious identities, and relations between Asia and the West. Significant use of primary written sources (in English) and multi-media presentations.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Pyramid Schemes: The Archaeological History of Ancient Egypt (126641)

Peter Der Manuelian

2018 Spring (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Surveys ancient Egyptian pharaonic civilization. Emphasizes Egyptian material culture: pyramids, temples, tombs, settlements, and artifacts. Explores major developmental themes that defined the Egyptian state: the geographical landscape, kingship, social stratification, and religion. Follows a chronological path with excursions into Egyptian art, history, politics, religion, literature, and language (hieroglyphs). Also touches on contemporary issues of object repatriation, archaeology and cultural nationalism, and the evolution of modern Egyptology. Includes field trips to the Egyptian collections of the Peabody Museum and the Museum of Fine Arts, Boston, along with immersive 3D computer models in Harvard's Visualization Center. No prior experience in Egyptology expected.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Incas: The Last Great Empire of Pre-Columbian South America (117137)

Gary Urton

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course guides students on an exploration of the largest and most complex civilization of Pre-Columbian America - the Inca Empire of Andean South America. We will address such questions as how did a civilization emerge and thrive at 12,000 feet above sea level? How could a state-level society exist without markets, the wheel, or writing? In addition to lectures and discussions, students will experience the products of Inca civilization through hands-on study of artifacts in the Peabody Museum of Archaeology and Ethnology.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Medieval Europe: History, Archaeology, and Archaeoscience (113789)

Michael McCormick

2017 Fall (4 Credits)

Schedule:

MW 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

From the ruins of the ancient world, women and men created a new civilization: Europe. Combining history, archaeology and science, this course examines the extraordinary transformations of belief systems, warfare, technology, law and government, business practices, food production, disease, environments, and climate in the Middle Ages, between the fall of Rome and the Italian Renaissance. Well-coached analysis of primary sources in translation and of your writing feature prominently. Themes include the spread of Christianity, the challenge of Islam, the Vikings, Crusades, feudalism, Europe's economic rise and the Black Death, and the new knowledge stemming from paleoclimate science and archaeogenetics.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Societies of the World or Culture and Belief, but not both. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

This class will hold additional optional meetings on 2-3 Fridays throughout the semester. Please check the syllabus on the course website for details.

Human Trafficking, Slavery and Abolition in the Modern World (127538)

Orlando Patterson

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course surveys the nature, types and extent of modern servitude, distinguishing broadly between those resulting from international trafficking such as trans-national prostitution, human smuggling into bonded labor, child soldiering and organ trafficking, and more intra-national forms such as debt-bondage and the domestic exploitation of women and other vulnerable groups. Examines the conceptual and theoretical issues raised in attempts to distinguish among these types of differential power relations; the empirical difficulties of estimating the magnitude of what are inherently secretive processes; and the ideological controversies surrounding the subject. Explores ethical, socio- political and practical issues raised by these trends.

Contemporary Developing Countries: Entrepreneurial Solutions to Intractable Problems (107464)

2017 Fall (4 Credits)

Schedule:

MW 0330 PM - 0459 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course will provide a framework (and multiple lenses) through which to think about the salient economic and social problems of the five billion people of the developing world, and to work in a team setting toward identifying entrepreneurial solutions to such problems. Case study discussions will cover challenges and solutions in fields as diverse as health, education, technology, urban planning, and arts and the humanities. The modules themselves will be team-taught by faculty from engineering, the arts, urban design, healthcare and business. The course will embrace a bias toward action by enabling students to understand the potential of individual agency in addressing these problems. All students will participate in the development of a business plan or grant proposal to tackle their chosen problem in a specific developing country/region, emphasizing the importance of contextualizing the entrepreneurial intervention. The student-team will ideally be comprised of students with diverse backgrounds from across the University.

Course Notes:

Offered jointly with the Business School as 1266, the School of Public Health as GHP 568, the Kennedy School as DEV-338, the Law School as HLS 2543, the Graduate School of Education as A-819, the Graduate School of Design as SES 5375, and the Medical School as IND520.

Class Notes:

If student interest exceeds the course limit, a lottery will be conducted. Please attend class and visit the course website for more details.

The Worlds of Business in Modern China (108854)

William Kirby

2018 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: Instructor**Enrollment Cap:**

60

China was home to the world's largest economy two centuries ago. Within two decades it will be the world's largest economy again. This course uses business as a lens through which to study modern China. Using new Harvard Business School cases, we explore traditional family firms and internet startups; state-owned enterprises and their private-sector challengers; and the catalytic role of Hong Kong, Taiwan, and foreign enterprise in shaping contemporary China. Case studies cast light on larger themes: the role of party and government (national and local) in business and society; the legal environment; and the global impact of China's development.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted

by the lottery; all students will be notified of their results. See the course website for more details.

Politics of Nature (122012)

Ajantha Subramanian

2017 Fall (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course examines the historical, social, and political life of nature in its many manifestations--as a source of life and livelihood, as a resource for exploitation, as a heritage to be protected, and as a post-industrial hybrid--in order to understand the variety of human interactions with the natural environment. Through a focus on property relations, imperialism, development, and science, students will be exposed to the intimate connection between social inequality and ecological degradation, and encouraged to envision possibilities for a future of greater equality and sustainability.

Ethical Reasoning 18

Classical Chinese Ethical and Political Theory (121778)

Michael J. Puett

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

What is the best way to live a fuller and more ethical life? Concretely what should we do to begin to live in a more flourishing and inspiring way? Questions such as these were at the heart of philosophical debates in China. The answers that classical Chinese thinkers developed in response to these questions are among the most powerful in human history. Regardless of whether one agrees with them or not, they should be studied and taken seriously by anyone who cares about ethics, politics, and the ways to live life more fully.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Conduct of Life in Western and Eastern Philosophy (122544)

*Roberto Mangabeira Unger**Michael J. Puett**Cornel West*

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

A study of approaches in the philosophical traditions of the West and the East to the conduct of life. Philosophical ethics has often been understood as meta-ethics: the development of a method of moral inquiry or justification. Here we focus instead on what philosophy has to tell us about the first-order question: How should we live our lives?

Course Notes:

No prerequisites other than a willingness to consider a wide range of

problems and materials. Extended take-home examination.

Offered jointly with the Law School as 2392 and the Divinity School as 2313. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Additional Course Attributes:

The Meaning of Life (110453)

Mathias Risse

2018 Spring (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Is there a point to life as a whole? That is the question about the "meaning of life," a question that is notoriously hard to make precise but has animated much literature, art and philosophy. Philosophers have provided both very disheartening answers and more uplifting ones. Serious scrutiny of such answers should be of interest to anybody who wishes to make reflection on her/his life as a whole part of her/his education. This class is wide-ranging, but its main focus is on contributions by relatively recent thinkers in the Anglo-American analytical tradition of philosophy.

Ethical Reasoning 43

Ignorance, Lies, Hogwash, and Humbug (204966)

Christopher Robichaud

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

180

Is truth dead? We find that "alternative" facts regularly compete on equal footing with actual facts, fake news beats out mainstream news, and expert knowledge is sidelined for gut hunches and whatever feels correct. Such is the so-called post-truth age. Contrary to what many of you may think, it's not obvious that our democracy can survive it. Perhaps even more surprising, if it can survive, it may only be by way of the much-maligned practice of politics.

In this course, you'll interrogate the post-truth age, primarily as it is unfolding within the United States, through an interdisciplinary engagement with epistemology, political philosophy, media studies, and the behavioral and social sciences. You will come away with i) a richer set of conceptual tools to use in examining lies, spin, truthiness, hogwash, and hate speech, ii) an appreciation of how public ignorance can be manufactured through propaganda, ideology, and government secrecy, iii) a better understanding of the cognitive limitations we face in consuming information, iv) a buffet of potential interventions that may help us promote truth and knowledge, and v) a deeper knowledge of the philosophical challenges to democracy that the post-truth age presents.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

The Theory and Practice of Republican Government (120049)

Daniel Carpenter

2017 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A theoretical and historical survey of the evolution of republican (representative) government, with a particular focus upon European and American institutions. We will alternate between philosophical treatments and empirical studies of republican regimes. Questions include: How did republican government evolve (in England and France) centuries before mass elections? What institutions besides elections keep the ruled attuned to the people? Did arguments for legislative supremacy prefigure the rise of parliamentary authority? If so, how? How did modern republics co-evolve with institutions of slavery? What is the role of virtue in a democratic republic? How can government ensure the "rule of the wise" without fostering autocratic power? What critique might republican theory advance of populist and libertarian arrangements, and how populist and libertarian critics respond?

Course Notes:

Human Evolution and Human Health (112339)

Daniel Lieberman

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How and why did humans evolve to be the way we are, and what are the implications of our evolved anatomy and physiology for human health in a post-industrial world? Why do we get sick, and how can we use principles of evolution to improve health and wellbeing? To address these questions, this course reviews the major transitions that occurred in human evolution, from the divergence of the ape and human lineages to the origins of modern humans. Also considered are the many effects of recent cultural and technological shifts such as agriculture and industrialization on human health.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The course introduces students to the functioning of the human body in health and disease. Students will examine determinants of their own health (genetics, diet, environment, sleep, exercise, stress, social interactions) and consider how these and other factors impact the health of diverse communities around the world. Emphasis will be placed on how the human body responds to physiologic challenges, such as psychological stress and environmental exposures, and on topics with high public health impact (obesity, smoking, mental health and addiction). Activities include lectures, 2 guided laboratories/demonstrations, structured weekly sections that focus on scientific literacy, and a directed term project.

Class Notes:

Nutrition and Global Health (126200)

Christopher Duggan

2018 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

250

This course will introduce students to nutrition and global health problems through exploration of demographic, epidemiological, biological, social, political, and economic determinants of nutritional status. Emphasis will be placed on the role of nutritional status and dietary intake, both as a determinant and as a consequence, of these health problems. Students will be encouraged to think critically about the major

challenges to improve nutrition and health at a global level, with a focus on nutrition and infectious diseases, maternal and child health, and chronic diseases. Nutritional assessment, study design, and efficacy of nutrition interventions, will be explored in detail.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Global Infectious Diseases and Social Justice: Lessons from Science, History, & Humanities (110382)

Donald Goldmann

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

This course will review the devastating impact of infectious diseases on wars, politics, economics, religion, public health, and society as reflected in history, literature, and the arts. We will study how infections spawned revolutionary epidemiologic and scientific advances in detection, treatment, and prevention. We will address the gaps between discovery and implementation, including ethical, social, economic, and health systems barriers to progress, as well as challenges posed by microbial adaptation to the immune defenses and antibiotics. The disparate impact of infections on underserved and minority populations, and approaches to addressing such inequities, will be emphasized. By weaving together knowledge from science and the humanities, students will learn to address current and emerging global infectious disease threats and the social justice challenges they pose. Classes and sections will be highly interactive, including case studies, games, advocacy "pitches," a mock trial, debates, role playing, and collaborative learning.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Scandinavian 55 Section: 1

One Hundred Years of Scandinavian Cinema (159715)

Agnes Broome

2018 Spring (4 Credits)

Schedule: W 1200 PM - 1259 PM
M 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

This course explores Scandinavian cinema from the pioneers of the silent era to the globally successful hit films of the present day. Students will trace the development of Scandinavian cinema through the films of directors such as Viktor Sjöström, Carl Th. Dreyer, Lars von Trier, Ingmar Bergman and Lukas Moodysson and discover the profound influence the region's films have had, and continue to have, on filmmaking in America and the world.

Course Notes: Conducted in English.

Scandinavian 102 Section: 1

Scandinavian Folklore: Trolls, Trolldom and the Uses of Tradition (127810)

Stephen Mitchell

2018 Spring (4 Credits)

Schedule: F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

Examines Nordic folklore and folklife, with an emphasis on narratives, supernatural beliefs, and material culture from the 17th to the early 20th centuries, interpreted against additional sources of information drawn from the archaeological and historical records. Key strategies used in the fields of folklore, literature, and cultural history to interpret such texts discussed in detail, and applied in analyzing our materials. Also carefully considered, the history and development of folklore studies in Scandinavia and the role of folklore (and folklore studies) as, and in, anti-colonial and nation-building movements.

Course Notes: This course is equivalent to and also listed as FolkMyth 160. Credit may be earned for Scand 102 or FOLKMYTH 160, but not both.

Enrollment limited to 12. Preference given to concentrators in F&M and GLL.

Crossing Borders in 20th and 21st Century German Culture (203481)

Anna Horakova

2017 Fall (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

This course examines geographical, political and literary border-crossings within German-speaking Europe. We will explore how the notion of border crossings has been articulated in the small form, including poetry, the short story, the newspaper article, film, and visual art. Topics include literary projections of America (Kafka, Kracauer), exile communities before and during the Second World War (Zweig, Sebald), the Berlin Wall and German division (Grass, Schlöndorff, Schneider), multiculturalism in contemporary Germany, Austria, and Switzerland (Özdamar, Zaimoğlu), the current refugee crisis (Erpenbeck), and multilingual experimentation (Herta Müller, Pastior, Tawada).

Course Notes: Conducted in German.

German Literature, Culture, and Society (159603)

Anna Horakova

2017 Fall (4 Credits)

Schedule: MW 1000 AM - 1059 AM**Instructor Permissions:** Instructor**Enrollment Cap:** 30

This course examines the major social-political trends and tensions that have informed literature and culture in the German-speaking countries. Students will develop the language skills to discuss, analyze, and interpret a variety of texts and cultural phenomena from the 18th to the 21st centuries, with special attention to social theory and political critique. Our readings and discussions are organized around pairs of thinkers who address the same issues from a different time, place, angle, or genre. Further emphasis is placed on the history of ideas and how it contributes to current issues and debates. Paired readings may include Kant and Kleist, Freud and Kafka, Benjamin and Brecht, Böll and Celan, Seghers and Wolf.

Course Notes: Readings and discussion in German.**Additional Course Attributes:**

Social Dynamics in Twentieth-Century Modernism (159712)

Judith Ryan

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

The course explores the relationship between experimental German modernist texts and their representations of social dynamics. Why do these texts tend to focus on madmen, criminals, fanatics, outsiders, alongside various types of intellectuals? Texts are predominantly short, but one novel and a drama are also included. Authors treated: Schnitzler, Hofmannsthal, Carl Einstein, Rilke, Kafka, Thomas Mann, Döblin, Benn, and Musil. Theorists include Freud, Bahr, Weber, Simmel, Mannheim, Broch, Canetti and others.

Readings and discussion in German.

This course examines the history of Germans in Europe and elsewhere, starting with the revolutions of 1848 and ending with the separation of Austria, West Germany, and East Germany following the Second World War. We will consider multiple different visions of what "Germany" should be, what borders it should have, and who should be considered "German."

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. This course is also offered through the History Department as History 1265. Credit may be earned for either History 1265 or German 143, but not both.

Repression and Expression: Sexuality, Gender, and Language in Fin-de-siècle Literature and Art (116496)

Peter Burgard

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Examines German and Austrian art and literature of the Turn-of-the-Century (c. 1880-1920) with a focus on the dominant topics of sexuality, gender, and language that are articulated theoretically in the work of Nietzsche and Freud and insistently exemplified thematically and formally in both the art and literature of the age.

Course Notes: Conducted entirely in English. For concentration credit, German concentrators and Secondary Field students read the texts in German.

Class Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding as well as the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: Not open to auditors.

German 146 Section: 1

The Ethics of Atheism: Marx, Nietzsche, Freud (126632)

Peter Burgard

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Examines the Western secular tradition through the work of three seminal figures whose critiques of religion -- in social and political theory, philosophy, and psychoanalysis and anthropology -- are motivated by ethical concerns. Introductory readings of Kant and Feuerbach ground analysis of Marx's, Nietzsche's, and Freud's ethical atheism. Students do not develop or debate formulae for behavior, but rather become critically aware of ethical considerations that underlie actions and that are negotiated vis-à-vis prevailing moral codes. Readings include (some selections and some complete works): Kant, *Prefaces to Religion within the Limits of Reason Alone*; Feuerbach, *The Essence of Christianity*; Marx, *Critique of Hegel's Philosophy in General*, Introduction to *Critique of Hegel's Philosophy of Right*, *On the Jewish Question*, *Theses on Feuerbach*, *Communist Manifesto*; Nietzsche, *On Truth and Lie in the Extra-Moral Sense*, *The Gay Science*, *On the Genealogy of Morals*, *The Antichrist*; Freud, *Three Essays on the Theory of Sexuality*, *Totem and Taboo*, *The Future of an Illusion*. The course is conducted as a large seminar with preparatory section meetings the afternoon or evening before the full seminar meeting.

Course Notes: Conducted entirely in English. German concentrators and Secondary Field students read the texts in German.

Class Notes: This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Ethical Reasoning, but not both.

Class Notes: Not open to auditors.

Additional Course Attributes:

Körper, Kommunikation, Medien: Literatur im 21. Jahrhundert (205274)

Nicole Suetterlin

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

In this course we explore German literature from the Weimarerzeit to the present. We investigate the central cultural, political and technological developments that have shaped the millennial consciousness since 1989/1990, focusing particularly on the question of how literary texts navigate the increasing tension between real and virtual worlds, or between bodies and media. Topics include: Weimarerliteratur, dystopia, 9/11, terrorism, populism, immunity, body poetics, medicine/anatomy, intermediality, interculturality, virtuality, Popliteratur. We read canonical contemporary authors such as Draesner, Grünbein, Kracht, Jelinek, and Tawada. But we also read young authors whose role in contemporary literature is not as clearly defined yet. We thus take an active role in the canon-making process, discussing what incites readers and makes any particular text popular in the 21st century.

Readings and discussions in German. Open to graduate students.

Course Notes: Readings and discussions in German. Open to graduate students.

Carmen and the Art of Seduction (205143)

John T. Hamilton

Federico Cortese

2018 Spring (4 Credits)

Schedule:

R 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

The seminar centers on Bizet's *Carmen*, the opera that shocked 19th-century Europe for its bold expression of seduction and sexuality. Further consideration is given to historical precedents and consequences, from Mozart's *Don Giovanni* to Strauss's *Salomé*, including Wagner's *Tristan und Isolde* and *Parsifal* as counter-examples of non-seduction. Discussions of literary, historical, and theoretical materials complement musical analyses and rehearsals of selected pieces, with a public performance at the end of the semester. Open to performers and non-performers.

Course Notes:

German 173 is also listed as and equivalent to Comp.Lit 173 and Music 175r. Credit may be earned for only one of these courses.

Bargaining with the Devil: the Faust Legend (205080)

John T. Hamilton

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Seduction and transgression, forbidden knowledge and the insatiable lust for learning, the limits of cognition, human will, and the problem of evil – these are the central themes that circulate through the legend of Faust, who is said to have exchanged his immortal soul for infinite wisdom and power. The seminar examines the elaboration and complication of this legend across the centuries and its formative role in the development of European literature and philosophy. In addition to studying Goethe's masterwork, the seminar includes analyses of related works in European literature, music, and the visual arts, all with reference to shifting historical contexts and philosophical reflections.

Course Notes:

All readings are available in English.
Offered jointly with the Comparative Literature Department as Comp. Lit. 180. Credit may be earned for Comp. Lit. 180 or German 180, but not both.

Engineering Texts: Avantgardes in Twentieth-Century Germany (203511)

Anna Horakova

2018 Spring (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

This seminar explores the intersections among art, science, and industry as they were thematized by innovative strands of twentieth-century German culture. Topics will include the fascination of artists with the machine and the artificial human being at the dawn of the twentieth-century; the literary responses to the mechanized warfare of the First World War; the modern metropolis; media and politics in interwar Berlin; the architectural projects of the Third Reich; and the literature and culture of the divided Germany. The seminar will conclude by examining new possibilities afforded to German-speaking cultures with the arrival of cybernetics and the internet. Our readings and viewings will include Benjamin, Brecht, Kittler, Lang, Riefenstahl, Vostell, and others.

Pathologies of Description: Adalbert Stifter (205059)

John T. Hamilton

2018 Spring (4 Credits)

Schedule: F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

The seminar engages in a close and critical reading of the major prose works of Adalbert Stifter within the broader context of Nineteenth-Century Literary Realism. Themes and tensions include: description and narration; verbal surface and depth; realism and allegory; convention and transgression; figuration and symptom.

Course Notes: Readings in German, discussion in English.

Questions of Theory (203281)

John T. Hamilton

Jeffrey Schnapp

2017 Fall (4 Credits)

Schedule:

F 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

The seminar is built around a sequence of fundamental questions regarding the literary disciplines, their history and epistemology. Discussions are instigated by readings in philology, stylistics, the history of ideas, semiotics, structuralism, psychoanalysis, post-structuralism, film theory, genetic criticism, literary sociology, cultural studies, and digital humanities.

Course Notes:

Conducted in English. This course is also offered as Romance Studies 201. Credit may be earned for either Romance Studies 201 or German 291, but not both.

Sweden and Swedish Finland have produced some of the most translated and beloved works of children's fiction in the world. In this intermediate Swedish language course, we will review the essentials of Swedish grammar and vocabulary as we explore some of these classic works of children's fiction, film, and comic books and the aspects of Swedish culture they illuminate. The final project for this class involves producing your own work of children's fiction or film.

Course Notes: Conducted in Swedish. Not open to auditors.

Prerequisite: Swedish Ab or equivalent.

Special Topics in Swedish Literature and Culture: Migration and Identity (203488)

Agnes Broome

2018 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

30

The second term of intermediate Swedish takes as its theme migration and identity from a Swedish perspective. Through literature, film and media, students will explore how emigration and immigration has helped shape Swedish identity and culture, both historically and in our own times. Particular emphasis will be placed on gaining a deeper understanding of today's diverse, multi-ethnic Sweden and the debates, growth and challenges to which immigration has given rise in recent years.

Course Notes: Conducted in Swedish. Prerequisite: Swedish Ba or equivalent.

Negotiation and Conflict Management: From the Interpersonal to the International (107669)

Daniel Shapiro

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

34

How can you best negotiate conflict in your own life? How should policymakers negotiate global conflict? Around the world, conflict imposes profound direct and indirect costs on global health and individual well-being, ranging from death and injury to trauma, the loss of social networks, and destabilization of political systems. Rather than focusing on how to address the aftermath of conflict and violence, this course examines theory and practical methods to prevent destructive conflict. Explores theory, frameworks, and tools developed to negotiate the substantive, emotional, and identity-based dimensions of conflict. Applies the theory to a diversity of real-life negotiations, ranging from interpersonal disputes between friends to international conflicts in the Middle East and elsewhere.

This highly interactive course aims to improve students' skill in resolving conflicts, and draws on a variety of learning methodologies, including lecture, case simulations, self-reflection exercises, and application of negotiation frameworks to conflicts depicted in movies. Students will have the opportunity to analyze firsthand case narratives of senior-level global leaders who have negotiated serious conflicts; these cases are part of an emerging Global Curriculum on Conflict Management spearheaded by the instructor, the Harvard International Negotiation Program, and the World Economic Forum.

Course Notes: Lotteried course, enrollment limited to 34.

Climate change, urbanization, and conflict mean that global disasters are on the rise. How should the world respond when disasters force people from their homes? How can we better help the world's refugees? This course examines the past, present, and future of the international humanitarian response system. We will explore how Doctors Without Borders, the United Nations, the Red Cross, and other aid agencies came to be and how global response standards, international humanitarian law, and new technologies are shaping worldwide disaster relief.

Through interactive discussions and case studies, students will learn how aid workers interact with governments, militaries, and civil society to provide refugee aid. At the end of the course, students can choose to live the refugee experience during a large-scale, weekend outdoor simulated humanitarian response training program together with other students and professional aid workers from around the world.

Course Notes: Lotteried course, enrollment limited to 25.

David Cutler

2018 Spring (4 Credits)

Schedule: W 0330 PM - 0529 PM**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

Explores research topics and methods that are critical to evaluating current issues in national and global health care policy. Students will develop and execute an original research project that utilizes quantitative or qualitative research approaches to studying a domestic and global health policy topic of their interest. Such topics may include: the elements of health care reform, cost containment, quality measurement and improvement, racial and ethnic disparities in care, politics of health care, comparative health systems, global health, and organizational influences on quality.

Course Notes:

This course fulfills the research requirement of the Secondary Field in Global Health and Health Policy and enrollment is ordinarily limited to seniors in the GHHP Secondary Field. Underclass GHHP students may petition to take the course if all other Secondary Field requirements have been met. Course is primarily taught by graduate students in the PhD in Health Policy program and guest lecturers. May not be taken pass/fail.

Foundations of Political Theory (124414)

Danielle Allen

2018 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course investigates the central problems of political theory that concern the justification of democracy. Is democratic rule the uniquely just form of collective decision-making? What political institutions best express the democratic values of equality, deliberation, and participation? What are the moral responsibilities of citizens - whose representatives exercise political power in their name? Is democracy a human right? Readings integrate contemporary work in political philosophy with canonical thinkers, including Plato, Aristotle, Rousseau, and J.S. Mill.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Provides an overview of contemporary American politics. It analyses the way in which recent changes in elections and media coverage have helped shape key aspects of American government, including the courts, Congress, and the Presidency, the workings of interest groups and political parties, and, also, the making of public policy. Permanent political campaigns have altered governmental institutions and processes. The course explains how and why.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for United States in the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

International Conflict and Cooperation (126258)

Dustin Tingley

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: Instructor**Enrollment Cap:**

60

This course is an introduction to the analysis of the causes and character of international conflict and cooperation. The course begins with a foundational review of the different levels at which states interact and the primary theoretical paradigms in the field. It then addresses how states achieve cooperation in the face of international anarchy. The course next addresses basic bargaining theory, which uses insights from

economics to explore how bargaining breakdowns, commitment problems, and incomplete information can lead to war. Thereafter we examine three popular topics in contemporary international relations research: the roles that psychology, leaders, and domestic politics play in explaining international conflict and cooperation. We will also look at international organizations/law, terrorism, trade, foreign aid, international development, and climate change.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

This class will introduce students to techniques used for research in the study of politics. Students will learn to think systematically about research design and causality, how data and theory fit together, and how to measure the quantities we care about. Students will learn a 'toolbox' of methods---including statistical software---that enable them to execute their research plans. This class is highly recommended for those planning to write a senior thesis.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course must be taken for letter grade.

Research Practice in Quantitative Methods (108286)

Jefferson Gill

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This class introduces students to a variety of statistical methods used to investigate political phenomena. We will address the principles behind these methods, their application, and their limitations. The course will be useful to those undertaking a quantitative methods thesis in Government, but not solely. Indeed, the course aims to provide anyone interested in political science with a proficient understanding of the intuitions behind several of the methods used to analyze political data and identify causal paths. By the end of the course, students will have acquired important analytical and practical skills and will be able to evaluate the quality and reliability of scholarly and journalistic work done using quantitative methods. Students will learn statistical software skills (STATA). For the course's final assignment, students will be given the choice between writing a research paper using data and writing a different kind of project more suitable to those who are not interested in writing a quantitative research paper.

This course introduces students to philosophical and historical approaches used by contemporary political theorists. In particular, we will examine theories of political dissent, from disobedience to revolution. We then turn to other topics reflecting the interests of those who enroll. Designed to help participants make the transition from being critical readers of political thought to being independent contributors to debate, the course will be especially useful for those considering writing a thesis in political theory

How to Write About Politics: A Practicum (203655)

Yascha Mounk

2018 Spring (4 Credits)

Schedule: M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

How can you convey insights from political science to a wider audience? In this course, we explore how to use both analytical and narrative techniques to animate an important topic; to convey a scientific finding;

or to express a considered opinion. To this end, we discuss the core components of excellent political writing and workshop ideas and drafts for op-eds, long-form narratives, policy analyses as well as works of data and explainer journalism by members of the class. Readings include Jamelle Bouie, Ta-Nehisi Coates, Jeffrey Goldberg, Jill Lepore, George Orwell, Anne-Marie Slaughter, E. H. Smith, and David Foster Wallace.

Political Economy (109742)

Torben Iversen

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Examines modern theories of political economy and their applications to macro problems in advanced democracies. Why do some governments and countries generate better economic performance than others? Why are some economies more egalitarian than others? How do politicians manipulate the economy for partisan gain, and how are politicians constrained by institutions and the global economy? We seek to answer these questions using the most promising theories in political science and economics.

The Politics of Citizenship and Naturalization (203859)

Colin Brown

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This course seeks to examine the very different conceptions of citizenship in different states and at different times, particularly through the lens of migration. What does being a citizen of a state mean in a modern sense, and why is it the focus of so much of the current European and American debate over migration? How are policies about who belongs and who becomes a citizen determined? How has naturalization policy changed over time, and how have debates over citizenship and migration changed the overall political system? Multiculturalism and its effects on the citizenship debate are also examined, and the course ends with a look at transnationalism and other phenomenon that may continue to change the nature of migration and citizenship.

Comparing India and China: An Examination of State-Society Relations (160335)

Nara Dillon

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

In the late 1940s, India witnessed a peaceful transition to democracy, while China experienced a Communist revolution. After this divergence, both countries began pursuing market reforms in the effort to accelerate economic growth in the 1980s and 1990s. We will explore the ways in which power has been consolidated and distributed under these very different regimes and the implications this has had for a range of socio-political and economic outcomes, including famine, economic development, and urbanization. Throughout the course we will place India and China in the context of comparative debates about other parts of the developing world.

International Law and International Organizations (205268)

Christoph Mikulaschek

2018 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This seminar is an introduction to international law and international organizations for students of international relations. Why do states conclude treaties and establish international organizations - and what determines their institutional design? When and how do international institutions promote cooperation between states? What is their effect on domestic politics? We survey recent international relations scholarship on these and similar questions and conduct case studies in the security, economic, and environmental policy areas.

New European democracies: the 2016 Spanish democratic revolution in a comparative perspective (156725)

Jose Martinez sierra

2018 Spring (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This seminar aims to develop an in-depth understanding of modern Democracy's discontent through the Spanish case study in a comparative perspective. In 40 years Spain has turned from being an exemplary model of transition to democracy to a leading example of disaffection with political and economic elites. The Indignados movement and two new political parties (Podemos and Ciudadanos) unexpectedly emerged and within two years have come to govern the largest cities (Barcelona, Madrid, and Valencia) and are becoming the most influential political parties in the most important regional governments (Andalucia, Madrid, and Valencia). Is this a model for democratic transformation in Europe? Can citizens really change traditional political party agendas or replace them?

Course Notes: This course will be conducted in Spanish.

Liberalism and Empire (109875)

Cheryl Brown Welch

2017 Fall (4 Credits)

Schedule: R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

Can theories grounded in moral universalism and democratic principles legitimate imperial domination and intervention? Modern liberal political thought emerged in tandem with European expansion into the "new world" and then into Asia and Africa, generating both critics and supporters of imperialism. Focusing on the imperial impulse in Britain, France, and the United States, this seminar examines the conceptual connections between liberal democracy and empire in political thinkers from John Locke to Niall Ferguson.

From Ford to Zuckerberg: Philanthropy and the Politics of Education (205261)

Leslie Finger

2017 Fall (4 Credits)

Schedule: M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

In recent years, foundations like the Gates Foundation and wealthy individuals like Mark Zuckerberg have become heavily involved in funding K-12 education, giving large sums of money to urban school districts, charter schools, and other education entities. This course will examine foundation involvement in education policy, with a focus on current education reform efforts. We will first track the evolution of

foundation giving to education causes in the United States. We will then train our focus on current education reform efforts and foundation involvement, addressing philanthropy and school choice, foundations and federal education reform efforts, and how foundations have shaped education in big cities.

Political Parties in Developed Democracies (156448)

Colin Brown

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This seminar will prepare students to think about political parties as institutional actors in political science, in the context of developed democracies. The first part of this course will focus on the origins of parties, using the American case to think more broadly about how parties form. The second part of the course will expand to cover different party systems in depth (the UK and the Netherlands) and different party families more broadly (social democrats, Christian democrats, green and radical right parties). Students will get a better understanding of what types of parties can and have existed, how parties are born, change and die, and how to use some of the more theoretical tools of political science in understanding party politics.

This course examines the political challenges posed by global warming from both an empirical and a normative perspective. Drawing on a broad array of readings, we investigate why the global community has done so little to combat climate change; what kinds of domestic and international institutions we need to coordinate our response to global warming; whether we should prioritize mitigation or adaptation; and what a just response to climate change might look like.

Class Notes: Undergraduate seminar. Enrollment by lottery. Please see Gov Dept undergraduate website for details.

Tutorial - Sophomore Year (113504)

Ryan Enos

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This one-semester course provides all Government Department concentrators with a unified and challenging intellectual experience in the study of politics and its applicability to current issues. The course covers a selection of timely topics, including populism, inequality, and identity. It emphasizes how political science can answer the urgent questions we face, while teaching students how to intelligently consume research. Materials range from classics in political theory to cutting edge research in the discipline today.

Educational Justice (204038)

Meira Levinson

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Educators and educational policy makers regularly face challenging ethical decisions. For example, what should be done about a student with diagnosed emotional issues who frequently disrupts class, but who benefits from being mainstreamed? Should teachers resist grade inflation even if it helps their students in the college and labor market? Is it just to expand a charter school that achieves outstanding academic outcomes at the cost of high attrition rates? When school closure or teacher evaluation policies disproportionately impact low-income communities of color, is that in itself evidence of an injustice that must be addressed? These kinds of questions are often addressed as technocratic challenges of leadership, legal compliance, or accountability. This course, by contrast, addresses the ethical dimensions of educational practice and policy, with justice as our primary focus. We will engage with philosophical, theoretical, and empirical readings from a wide variety of disciplines. We will also grapple with case studies of dilemmas of educational justice from classrooms, schools, districts, and organizations in the United States and abroad. Our goals will be to deepen our own understandings of educational justice, to engage with others about complex ethical judgments across multiple lines of difference, and to learn how to enhance educators' and policymakers' capacities to make ethical decisions under challenging conditions.

Progressive Alternatives: Institutional Reconstruction Today (125860)

Roberto Mangabeira Unger

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An exploration of the past and future agenda of progressives, whether self-described as liberals or as leftists. A wide range of problems in contemporary societies require innovation in the institutional arrangements of the market economy and of democratic politics. But the theory and practice of progressives has long been deficient in the imagination of institutional alternatives. They have wanted to humanize the market order by means of redistributive taxation and social spending; they have not known how to reshape it. Here we search for the structural vision and the alternative forms of economic and political organization that have remained beyond the horizon of contemporary politics and policy. Law and legal thought have special pertinence to this inquiry. Because they deal with institutional details, they speak to institutional possibilities.

A major focus for our discussion this year will be the future of the knowledge economy. The most advanced, knowledge-intensive practice of production remains confined to vanguards of the economy, excluding the vast majority of the labor force. That confinement has become a powerful cause of economic stagnation and inequality. How can we overcome it and use its overcoming as an opportunity to democratize the market and to deepen democracy?

Open to graduate and undergraduate students alike. Extended take-home examination.

Course Notes: Offered jointly with the Law School as 2391. Meets at the Law School.

Improving Governance in Developing Countries: What can We Learn from Experiments? (207164)

Horacio Larreguy

2018 Spring (4 Credits)

Schedule:

MW 0100 PM - 0159 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Experimental research is an exciting new part of the political science toolkit. This course will introduce students to a number of field and natural experiments that have been conducted in developing countries to study governance failures. Can such experiments help us to understand how social and ethnic divisions prevent cooperation on problems affecting the common good? how corruption, vote-buying, and diversion of public funds can be overcome? how elites might become more accountable to voters? how opposition parties can be made more effective? how the capacity to deliver public goods might be created in places where it appears that the state has failed? Students will get the chance to collaborate on designing their own experiments to generate insight into these and other urgent issues facing developing countries.

Central Challenges of American National Security, Strategy, and the Press (113210)

Graham Allison

2017 Fall (4 Credits)

Schedule:

M 0415 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Using a series of case studies from the front page, and from the most urgent issues on the U.S. national security agenda, this course will engage students in grappling with the hardest American national security challenges of the decade ahead. Issues range from the Arab Awakening and intervention in civil wars to combating Iran's nuclear ambitions and dealing with the economic and military rise of China. Assignments require strategic thinking: analyzing dynamics of issues and developing strategies in a government whose deliberations are discombobulated by leaks, reports about internal differences among policymakers, and press analyses. Students will learn to devise strategies and write strategic options memos as participants in the policymaking process. Strategic options memos combine careful analysis and strategic imagination, on the one hand, with the necessity to communicate to major constituencies in order to sustain public support, on the other. A subtheme of the course explores coping with a world where a pervasive press makes secrecy more often the exception than the rule. In each case, there will be exploration of how media coverage affects decision making, with an examination of WikiLeaks, the revelations about drones and secret, American-led cyberattacks, and other examples of the publication of classified information. Because of time constraints, Mr. Sanger will be joining a limited number of class sessions, and will join some remotely.

Course Notes: Offered jointly with the Kennedy School as IGA-211.

Alastair Johnston

2018 Spring (4 Credits)

Schedule: MW 0100 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: 50

Introduction to the descriptive history of China's international relations with special focus on different theoretical explanations for changes in foreign policy behavior (e.g. polarity, history, ideology, leadership, bureaucracy, among others).

Course Notes: No prior background in China or international relations theory required.

Class Notes: IR_subfield

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Social Sciences

Government 2000

Introduction to Quantitative Methods I (118414)

Xiang Zhou

2017 Fall (4 Credits)

Schedule:

M 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Graduate-level version of Government 1000. Meets with Government 1000, an introduction to statistical research in political science with a focus on applied linear regression. Will require extra homework and examination problems in addition to those for Government 1000.

Recommended Prep:

Permission of the instructor for anyone other than Government Department graduate students.

Requirements:

Course open to Doctoral Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Social Sciences
FAS: Course Level	Primarily for Graduate Students

Government 2000E

Introduction to Quantitative Methods I (127497)

Xiang Zhou

2017 Fall (4 Credits)

Schedule:

M 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Essential elements of Gov. 2000. Meets with Government 2000 and provides an introduction to statistical research in political science with a focus on applied linear regression. Some of the statistical computing from Government 2000 will not be required.

Recommended Prep:

Permission of the instructor required for anyone other than Government Department graduate students.

Requirements:

Course open to Doctoral Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Social Sciences
All: Cross Reg Availability	Available for Harvard Cross Registration

Government 2001

Advanced Quantitative Research Methodology (124780)

Gary King

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Graduate-level version of Gov. 1002. Meets with Gov. 1002, introduces theories of inference underlying most statistical methods and how new approaches are developed. Examples include discrete choice, event counts, durations, missing data, ecological inference, time-series cross sectional analysis, compositional data, causal inference, and others. Will require extra homework and examination problems in addition to those for Gov. 1002.

Requirements:

Prerequisite: Government 2000 OR for Doctoral Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Social Sciences

Government 2002

Causal Inference (111530)

Xiang Zhou

2017 Fall (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Substantive questions in empirical social science research are often causal. Does voter outreach increase turnout? Do political institutions affect economic development? Are job training programs effective? This class will introduce students to both the statistical theory and practice behind making these kinds of causal inferences. We will cover causal identification, potential outcomes, experiments, matching, regression, difference-in-differences, instrumental variables estimation, regression discontinuity designs, sensitivity analysis, dynamic causal inference, and more. The course will draw upon examples from political science, economics, sociology, law, public health, and public policy.

Requirements:

Prerequisite: Government 2000 AND Government 2001

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Social Sciences
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Government 2003

Topics in Quantitative Methods (160566)

Jefferson Gill

2018 Spring (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Will cover topics of general interest to political methodology: causal inference, graphical models, mixed methods, contest modeling, text-as-data, item response. Illustrates how ideas and methods from these areas can be applied to substantive questions.

Recommended Prep: Gov 2000, 2001, and 2002, or the equivalent, or permission of the instructor

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Social Sciences

Government 2005

Formal Political Theory I (110953)

Tommaso Nannicini

2017 Fall (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A graduate seminar on microeconomic modeling, covering price theory, decision theory, social choice theory, and game theory.

Requirements: Course open to Doctoral Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Social Sciences
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Graduate Students

Government 2006

Formal Models of Domestic Politics (116295)

Horacio Larreguy

2018 Spring (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An understanding of introductory game theory and basic mathematical tools is required. Topics covered include some combination of the following: electoral competition under certainty and uncertainty, special interest politics, veto players, coalitions, delegation, political agency, and regime change.

Requirements: Prerequisite: Government 2005 AND for Doctoral Students only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Social Sciences
FAS: Final Assessment Category	Three-hour Exam

Government 2009

Methods of Political Analysis (115860)

Peter Hall

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Covers the issues and techniques central to designing and researching a good dissertation, whether quantitative or qualitative, including principles of research design, case selection, comparison, measurement, and causal relations, with many practical examples.

Additional Course Attributes:

Attribute	Value(s)

American Immigration (203429)

Shaun Nichols

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Immigration has emerged as one of the most vexing and stubborn political debates in America today. Through readings and discussions of key works spanning the American immigrant experience since the late-nineteenth century, this seminar introduces students to the main themes and debates surrounding American immigration: the catalysts of migration and return migration, xenophobia, race, assimilation, labor, as well as the legislative history of border-making and immigration control. The seminar will finish with an analysis of immigration today, looking to the ways in which an understanding of the history of immigration might help shape how we think about current policies.

When the Bottom Falls Out: The History of Economic Crisis in America (203430)

Shaun Nichols

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course engages in an interdisciplinary inquiry into the checkered history of economic crisis in America, spending each week analyzing the circumstances surrounding (and consequences arising from) twelve of the most spectacular economic catastrophes in American history: the panics/depressions/recessions of 1785, 1792, 1819, 1837, 1857, 1873, 1893, 1907, 1929, 1938, 1973, and 2008. Assigned readings will span both philosophical and theoretical works on economic crisis; monographs in business, economic, and labor history; primary sources in art, literature, music, and oral history; and recent work in contemporary economics, political science, and legal studies.

Secrets and Lies in European History (204983)

Mary Lewis

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

How should one distinguish what is "true" or "real" from what is "false" or "fake"? What is the difference between concealing the truth (secrecy) and lying? Is falsehood ever justifiable? These questions are newly important but not novel. This course will draw on "case histories" that lie at the source of some of Europe's most infamous economic and political scandals, examining themes such as forgery, sensationalism, conspiracy, espionage and false evidence. While studying falsehood and fakery, the course will endeavor to teach students to be "true" to their sources: to conduct research, build an evidentiary base, and make verifiable arguments.

The Medieval Mediterranean: Conflict and Unity, Tradition and Innovation (205249)

Rodrigo Adem

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This undergraduate seminar treats the medieval Mediterranean as a matrix of civilizational confluence, conflict, and transformation. Emphasis will be given to four main themes that highlight the dynamism of

the region in this period and its significance for the shift from late Antiquity towards the formation of the modern world: 1) Byzantine and Islamic societies as contested contributors to a collective Western past 2) The role of the Crusades in the construction of a civilizational "other" between motives religious and political 3) The practice of philosophy in Mediterranean societies as indicative of cultural exchange and mediation between tradition and innovation 4) The medieval Mediterranean economy and its relationship to emergent political configurations, the Atlantic slave trade, and the Age of Exploration.

Plague, Fire & Apocalypse: Mentalities of Disaster from Genesis to Global Warming (205252)

2017 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Few things have continuously evoked as much terror, public discussion and controversy as disasters. This seminar examines historical disasters from the ancient world to the present day, with a focus on the knowledge, beliefs and attitudes of past people about disastrous phenomena. Weekly readings consider the influences of religion, science, philosophy, ecological activism, journalism and fiction on disaster mentalities. The course as a whole invites students to think critically about the respective roles of 'nature', morality and expert authority in disasters. Students will compose an original research paper on a topic of their choice related to themes of the course.

Tell Old Pharaoh: Histories of "Contraband Camps" and Self-Emancipation in the Civil War Era (205431)

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar examines the Civil War and Reconstruction as experienced by the people who fled from slavery during the war, whom Gen. Benjamin Butler labeled "contraband of war." It interprets "contraband camps" as stages of confrontation and battlefields in their own right, which illuminate consequential struggles for and against slavery and freedom. It investigates the connections between the experiences within camps and experiences beyond them (on plantations, battlefields, halls of governance, and elsewhere), transformations underway in the eastern and western theaters, and what the ordeal reveals about the next worlds made by the freedpeople—women and men, old and young.

From the Belle Époque to the Third Reich: Culture and Aesthetics in France and Germany, c. 1880–1945 (205253)

Carla Heelan

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar explores French and German culture in comparative perspective, from the last two decades of the nineteenth century through the end of World War II. In this course we will consider culture and aesthetics broadly conceived, from formal artistic and intellectual movements, to institutions, and customs. We will examine a range of primary sources in historical context in order to ask why French and Germans believed that culture was vital to understanding the transformative era in which they lived. Students should expect vigorous discussions that question the historical and ongoing dynamic between culture and power.

The Cold War in the Global South (205258)

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

In most of the world, the Cold War burned hot. This seminar explores how Soviet and American interventions, as well as their competing models of modernity and "development," overlapped with local concerns to determine the fate of societies in Asia, Africa, and Latin America. Simultaneously, we will analyze how the emergence of the so-called Third World – through decolonization and post-colonial revolutionary movements – challenged Western dominance in international politics. Eschewing the narrow, Moscow vs. Washington lens of Cold War history, we will put the Global South at the center and gain a fuller perspective on the origins of the 21st century.

Cities and Urban Life in Latin American History (205271)

Marcio Siwi

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This undergraduate seminar examines the city in Latin American history from the colonial period to the present. Topics include the organization of pre-Columbian cities, the role of cities in the establishment and subversion of colonial authority, urban slavery, efforts to impose discipline on the city and the response of urban dwellers, planned and unplanned urban spaces, criminality, and the formation of urban identities. This seminar also analyzes the role of cities in the construction of rights and explores the city as a site of creativity. A wide range of educational materials will be covered including maps, photographs, paintings, and films.

Race and Nation in Latin America (205272)

Marcio Siwi

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This undergraduate seminar explores the history of race and nation in Latin America, from the wars of independence in the 19th century to the present. Drawing on a range of educational material, this seminar promotes a critical understanding of how the idea of race operates throughout Latin America and the ways in which race intersects with nation building and the concept of national identity. Themes covered include: the tension between "nation" and "state"; mestizaje and other national mythologies of inclusion and exclusion; scientific racism; identity politics; the intersection of race, class and gender; and the rise of transnational racial identities.

U.S. History: Major Themes in the Twentieth Century (125517)

Lisa McGirr

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The twentieth-century United States is a vibrant and flourishing field of historical study. The goal of this seminar is to introduce students to the central questions, problems and debates in the history of the "American century." Students will learn how the literature of history has developed through reading both older and newer approaches. Readings focus on questions of politics, political culture, the state and social life. The course is both thematic and chronological (as well as necessarily selective). Students are expected to prepare well for seminar and to participate actively in discussion. Each class will begin with a brief introduction to the readings (no more than five minutes) by a member of the seminar. The idea here is for one student to take special responsibility for leading discussion, raising questions and problems posed by the reading.

"What is Intellectual History?" (109927)

James Kloppenberg

2018 Spring (4 Credits)

Schedule:

R 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Intellectual historians study almost every period, place, and theme in human history: from classical times to the present, from Asia to the Americas, by examining philosophy and religion, social and political thought, literature and art, and other expressions of human agency and intention that range from ancient epics to graphic novels. This section will draw examples from a wide range of moments and regions to ask how intellectual history has developed as a field, what methods it uses, and how it can be distinguished from other forms of history even as it informs debates of interest to all historians.

"What is Urban History?" (110445)

Elizabeth Hinton

2018 Spring (4 Credits)

Schedule:

T 1200 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This section will explore the methods historians have used to understand the political, economic, and social development of cities and urban life over the past four centuries. How have historians approached the study of metropolitan regions and their inhabitants? What methods have they used to examine the ways in which social and spatial forms differ by time and place? How does urban history provide a unique vantage to analyze issues of class, ethnicity, migration, race, and gender? Readings and discussions will give special attention to cities and transformations in the United States, but we will draw comparative examples from the histories of urban centers across the globe.

"What is Family History?" (160421)

Jane Kamensky

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Every family has a history; every past actor had a family. This section investigates the practices and purposes of family history. We will explore primary sources such as diaries, child-rearing manuals, and portraits, and survey methods ranging from demography to cultural history to biography. Our topics will include the "invention" of childhood, the meanings of marriage, and the relationship between the household and the state. In addition to tracing the contours of family life across a wide array of times and places, we will investigate the ebbs and flows of family history itself, including the worldwide boom in amateur genealogy today.

"What is Social History?" (203047)

Sidney Chalhoub

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

For a long time, the writing of history focused mainly on kings, politicians, landlords, slave owners, capitalists –that is, on those with the means to write letters, autobiographies, official documents. In the past decades, historians have increasingly studied the lives of people not apparently entitled to have their histories told: peasants, slaves, women, industrial workers. Social History is the study of the experiences of those who lived most or all of their lives submitted to the power and the oppression of others. What did these people do with what was done to them? What sources are there to investigate this question and how should historians analyze them?

"What is Atlantic History?" (204987)

Mary Lewis

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

We live in a world of intense exchange across borders and seas, yet most history is still taught from a national or regional perspective. By studying inter-regional developments of societies around the Atlantic Ocean, we will examine how the histories of Europe, North America, Latin America and Africa are intertwined. What methods have historians used to study the trade, migration, inter-imperial competition and revolutionary upheaval that together have helped create an "Atlantic World"? Topics include trade in commodities and slaves, the Atlantic and Haitian Revolutions, and the ecological impact of exchange, among other themes.

The War in Vietnam (205257)

Fredrik Logevall

2017 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The struggle for Vietnam occupies a central place in the history of the 20th century. How did it happen? Why did first France and then the United States wage large-scale war there, and why did both powers fail in their effort to subdue the revolutionary Vietnamese forces? And what is the legacy of the struggle for our world and for U.S. foreign policy today? This course examines these and related questions, with particular attention to the long period of direct American involvement. The events will be considered in their relationship to Vietnam's history, to American politics and society, and to the concurrent Cold War.

War, State, and Society (204990)

Derek Penslar

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course surveys the relationship between warfare, the military, politics, and society from the 18th century to the present. Combining methodologies from History and International Relations, we will examine the distinction between war and other kinds of inter-human conflict; the origins and effects of conscription; the relationship between modern nationalism and military service; gendered and minority perspectives on combat; and the impact of 20th- and 21st-century global wars on combatants and civilians. The course is divided into halves. The first half deals with our main themes via a broad, comparative approach that encompasses world history over the past 250 years. The second half applies general concepts to two case studies: the First World War and the Middle East War of 1948.

The State of Israel in Comparative Perspective (203044)

Derek Penslar

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course addresses controversies surrounding the history of Zionism and the state of Israel. Central to these controversies are questions of comparison. Is Zionism a movement for collective liberation, like national movements of stateless or colonized peoples, or a variety of western colonialism? Does Israeli statecraft operate within a normal geopolitical spectrum, or is it unusually expansionist and aggressive? This course seeks to answer such questions through a broad and deep analysis that spans the 19th and 20th centuries, pays close attention to Israel's social and cultural history as well as high politics and military affairs, and imbeds modern Israel into multiple global contexts.

Studying Twentieth-Century American History: An Introduction (110490)

Brett Flehinger

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduces students to historical study by focusing on selected topics in Twentieth-Century American history. The course teaches students how to use the systematic patterns of thought that historians use to recreate and analyze the past. These are patterns of thought common among all historians and the skills and experiences gained will provide students a way to enter historical study across time and geography. Topics include, the history of race-based disfranchisement, the Dust Bowl, the history of birth control, Thoreau's influence on twentieth-century reform movements, and others.

Modern Latin America, 1800-present (205273)

Marcio Siwi

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course surveys the history of Latin America from the 19th century until the present. Drawing on diverse scholarly materials, this course explores different independence movements across the region, processes of state-formation, and how social and racial hierarchies that emerged out of the region's colonial past continue to shape Latin American societies. We will examine the rise of populism, the history of the U.S. in Latin America, the politics and culture of the tumultuous 1960s, and struggles for democracy and citizenship. The course concludes with the experience of Latinos in the U.S. and Latin America's place in a globalized world.

Debating Capitalism: The History of American Economic Thought (205301)

Shaun Nichols

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How does capitalism work? Does it work? Could it work better? Ultimately, what sort of economy should the United States be pursuing? This course wrestles with how American thinkers—both popular and academic—have answered these questions since the founding of the nation. From the (neo) classical conception of political economy, progressive reform, and feminist economics to Keynesianism, African American economic thought, and the rise of laissez-faire, "Debating Capitalism" gives students the opportunity to engage in the swirling varieties of economic ideologies and political programs that have taken root in America over the past two centuries.

Gabriel Pizzorno

2018 Spring (4 Credits)

Schedule:

TR 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course traces the continuum of socio-political and cultural developments in the Near East that led, over the course of three millennia, from stateless societies to the emergence of Assyria as the first empire in history. The class focuses on the long-term history of power centralisation, and the role of ideology and propaganda in overcoming resistance to this concentration of authority. The course material covers a broad evidentiary and chronological range. We will employ textual, visual, and archaeological sources to explore the evolution of the political and cultural landscape in the Near East and the Mediterranean, from the emergence of the first city-states in the late fourth millennium BCE to the early development of Roman imperial ideology around the start of the Common Era.

This course surveys the history of societies where Islam was culturally dominant from the 7th to the 15th century. Contextualizing the genesis of Islam and Islamicate societies between world religions and empires in late Antiquity, this class goes on to cover the formative period of Islamicate political and institutional history in a geographical expanse spanning Central Asia to Iberia. This class likewise incorporates historical approaches to the study of Islamic law, philosophy, and mysticism, and addresses the topics of

gender and religious minorities in Islamic societies.

Transcending disciplinary boundaries, "Deep History" brings the entirety of the human past together into a single historical narrative. Lectures and discussions enable students to anchor their understanding of the human past in tangible remains—a tool, a piece of ceramic or rock art, a shell-bead. These, in turn, provide models for students as they research objects of their own choosing. Spanning the world and traveling from the deep past to the present, this course offers students a chance to engage with a new kind of historical identity and provides a counterbalance to the short-termism common in our public sphere.

The future is not what it used to be. Nowhere is this more evident than in the natural world, where climate change and fading biodiversity, energy anxieties and environmental disasters have undermined the bedrock of history: the assumption of a stable continuity between past, present, and future. This class visits East Asia—China, Japan, and the Koreas, vibrant economies and agents of historical change, to explore the transformation of the natural world in modern times. We will analyze nuclear power plants and

cruise rivers, explore industrial ruins and debate public policy as we define Asia's role in the global environmental future.

Class Notes: Tuesday class meetings from 11:00-12:00 will be held in CGIS, S001.
 Thursday class meetings from 11:00-12:00 will be held in CGIS, S354.

West Africa from 1800 to the Present (140979)

Emmanuel Akyeampong

2017 Fall (4 Credits) **Schedule:** TR 1100 AM - 1159 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The course explores the internal dynamics of West African states from 1800, and West Africa's relations with the wider world. Innovations in science, technology and finance made the 19th century an era of social and economic opportunity and of political experimentation; a phase curtailed by European imperialism. The course examines African perspectives on colonialism, the two world wars, nationalism, and the transfer of political power. We will review post-colonial political economies and the search for workable political and economic models.

Feminisms and Pornography, c 1975-1995 (205054)

Jane Kamensky

Janet Halley

2017 Fall (4 Credits)

Schedule:

MT 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

This course focuses on the conflict among US feminists over pornography, a legal and cultural struggle that continues to inform feminist thought. Students will write article-length original essays based on archival research in the collections of the Schlesinger Library. The class meets twice weekly, once in traditional seminar format and the other time in laboratory format at the Schlesinger. In addition to their individual research and collaborative work with the class as a whole, students will participate in planning a daylong workshop on our topic, to be held the following semester, on Friday March 23, 2018.

Course Notes:

This course is jointly-offered with the Law School as 2010. This course involves research into written and visual material the very existence of which has been and continues to be controversial. Students, faculty, and Schlesinger Library staff will form an agreement at the beginning of the term about how to view, handle, discuss, and distribute these materials respectfully. This course will meet for a total of three hours weekly, within the Law School's e-block: M, Tu 1pm-3pm. The enrollment limit for FAS students is 8.

Class Notes:

Enrollment is by permission of the instructors. Please submit your resume or cv, along with a statement of no more than 250 words about your interest in the course, to Terry Cyr, tcyr@law.harvard.edu.

Germans and Jews (204992)

Derek Penslar

2018 Spring (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course provides offers an intensive examination of the history of Jews in the modern German Kulturbereich – that swath of Europe where German was the sole, or a primary, language of political administration, education, communication, and high culture. Covering the period from the eighteenth through mid-twentieth centuries, we will explore the meaning of Germanness to Jews and of Jews to German Christians. Among the topics to be explored are debates over Jewish emancipation, Jewish struggles with religious and secular identities, processes of acculturation and integration, antisemitism and Jewish responses, economic and family life, Jewish culture in the German empire and Dual Monarchy and in the post-1918 German and Austrian republics, and the fate of the Jews in Nazi Germany and its annexed territories.

Class Notes:

This course will be held at CES, 27 Kirkland Street, Giedrojc Gallery.

Racial Capitalism and the Black Radical Tradition (205076)

Vincent Brown

Walter Johnson

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course explores a history of radical responses to a world system dependent on war, empire, enslavement, and genocide. Guided by the writings of such scholars as W.E.B. Du Bois, C.L.R. James, Eric Williams, Walter Rodney, and Cedric Robinson, among others, students will examine the history of racial capitalism through the rebellions it has inspired, considering them as crucial occasions in the making of a black radical tradition.

Course Notes:

Students in the course will be required to write weekly responses, and a twenty-page final paper.

The History of Energy (205112)

Ian J. Miller

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The history of energy is the history of modern political economy. The history of energy is the history of a scientific concept and its technological application. The history of energy is the history of climate change and environmental catastrophe. The history of energy is the history of life, the universe, and everything. All of these statements are true. This seminar is a critical introduction to the roles that energy has played in history and historiography. Using this ubiquitous and fundamental concept, we will explore questions ranging from climate change and capitalism to causality and colonialism in diverse places and times.

Pacific History (107925)

David Armitage

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The Pacific Ocean covers a third of the Earth's surface and one-third of humanity lives on its shores and islands, from Russia to New Zealand and from Southeast Asia to South America. This seminar introduces students to oceanic and global history via works in Pacific history by scholars of the Pacific Islands, Asia, Australasia, Europe, and the Americas. Themes covered include cultural encounters, exploration, migration, history of science, geopolitics, and economic history.

Course Notes:

Students can count the course towards the fulfillment of an Ethnic Studies Secondary Field.

The History of Evidence (110442)

Jill Lepore

2018 Spring (4 Credits)

Schedule:

R 0500 PM - 0659 PM

Instructor Permissions: Instructor

Enrollment Cap:

22

This course will examine the rules and standards of evidence in law, history, science, and journalism. What counts as proof in these fields varies and has changed over time, often wildly. Emphasis will be on the histories of Western Europe and the United States, from the middle ages to the present, with an eye toward understanding how ideas about evidence shape criminal law and with special attention to the rise of empiricism in the nineteenth century, the questioning of truth in the twentieth, and the consequences of the digital revolution in the twenty-first. Topics will include the histories of trial by ordeal, trial by jury, "spectral evidence," "negro evidence," case law, scientific testimony, footnotes, the polygraph, statistics, anonymous sources, fact checking, and big data.

Course Notes: Offered jointly with the Law School as 2694. Open to advanced undergraduates. This course will meet at the Harvard Law School.

History 1917

Are You Now or Have You Ever Been an Android?: The New Materialism (204981)

Joyce Chaplin

2017 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Many historians now believe that the material and nonhuman elements of human life and experience should be foreground, not background. Humans and their histories exist, after all, within and in relation to nonhuman material entities and forces: animals, climate, androids, food, computer code, commodities, inanimate things, entire landscapes, and every other kind of stuff. Several fields from the human sciences and natural sciences have been important in establishing how our material worlds are fundamental to our identities, roles, beliefs, and futures. This course will explore dimensions of the new materialism, as it is playing out in interpretations of the past.

Course Notes: This course is also offered through the American Studies Department as AMSTDIES 201. Credit may be earned for either History 1917 or AMSTDIES 201, but not both.

History 1931

Slavery, Disease and Race: A View from Brazil (159657)

Sidney Chalhouh

2018 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Slavery and emancipation were major issues in nineteenth-century Brazilian history. In the 1870's and 1880's, with the drama of emancipation unfolding, yellow fever meant death to European immigrants and a major obstacle to achieving a social configuration that valued the whitening ideal and excluded people of African descent from social and economic opportunities. Although the primary focus of this course is Brazil, students may opt to write a final paper that compares an aspect of the social history of slavery and/or race and/or disease in Brazil and another nation or region. Class materials will include a range of primary sources.

From Wounded Knee to Standing Rock: Indigenous Political Struggle since 1890 (204978)

Christopher Clements

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines Native American history in the twentieth century. We will adopt broad definitions of "political" and "struggle" as we grapple with the history of people whose continued presence in the Americas constitutes a form of political struggle in its own right. The course focuses on key aspects of modern indigenous politics—sovereignty, territory, and decolonization—while also considering broader conceptual questions. What, for example, is the relationship between indigeneity and modernity? Does the twentieth century mark a distinct break from the first four hundred years of Native-settler history? And, how does settler colonialism intersect with other forms of oppression?

U.S. military involvement in Asia and the Pacific has impacted the history and experiences of Asian and Pacific Islander communities and their diaspora since the early twentieth century. This seminar aims to familiarize students with the historiography of the Asia/Pacific wars and encourages them to investigate the social, cultural, and political history of U.S. militarization, empire, and settler colonialism in Asia and the Pacific Islands via individual research projects. The course brings together primary source material and scholarly work from the fields of U.S. History, Asian American Studies, Pacific Islander American Studies, and East Asian Studies.

This conference course takes the history of Syria over the *longue durée* as its object of study. Spanning Syria's political history from the genesis of Islam to the foundation of Syria as a modern nation state, the course additionally focuses on four broader themes: 1) Umayyad Syria at the genesis of Islamic and Arabic historical memory 2) Medieval Syria's role in the formulation of paradigmatic forms of Muslim traditionalism 3) Syria as influential site of Arab nationalism and Islamic reformism under Ottoman and French Mandate rule 4) The political ascent of the Assad regime in light of the complex layers of political and cultural history which characterize Syrian society.

Mapping History (203235)

Kelly A. O'Neill

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The history of maps and mapping from the age of Enlightenment to the era of GIS and GeoJSON. We will examine the way states and individuals have used maps to create ideas, shape policies, and generate political and cultural capital. We will also study the production of maps – both print-based and digital – by historians themselves. What new insights about the past can we gain by mapping it? How are innovations in cartographic technology changing the way historians think and write? In today's interactive digital environments, where does the map end and history begin?

Readings in Native American and Indigenous Studies: Seminar (206979)

Philip Deloria

2018 Spring (4 Credits)

Schedule:

W 0900 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course offers a survey of the historiography of Native American and Indigenous Studies. Centered on

six themes—Power and the Middle Ground, Borderlands, Settler Colonialism and Sovereignty, Race and Slavery, Modernity and Futurity, and Global and Comparative Indigeneity—the course is designed to allow explorations into additional terrain, including gender and sexuality, law and policy, and comparative ethnic studies, among others. Core readings will focus on recently published scholarship. To explore field trajectories, scholarly exchange, and indigenous politics, members of the class will research and write historiographical essays that will be shared collectively, and form the basis for seminar discussion.

Deep History: A Graduate Seminar in Undergraduate Education (205087)

Daniel Smail

Matt Liebmann

2017 Fall (4 Credits)

Schedule:

R 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The goal of this graduate seminar is to develop an introductory undergraduate lecture course on "deep history," an approach that combines findings drawn from archaeology, anthropology, and history into a single historical narrative spanning the entirety of the human past. The seminar will have two main elements. The first features readings in the historical, archaeological, and anthropological literature that offer devices for framing the deep human past (e.g. universal history, four-field anthropology, and "Big History"). The second is dedicated to developing and work shopping graduate-student-designed teaching modules that will form the core of a spring 2018 course taught by Prof. Smail.

Course Notes:

This course is also offered through the Anthropology Department as Anthropology 2059. Credit may be earned for either History 2059 or Anthropology 2059, but not both.

History & Literature 90AN

God Save the Queen! Ruling Women from Rome to the Renaissance (127654)

Sean Gilsdorf

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar will explore female rulership in Europe from the late Roman empire to the age of Elizabeth I. Discussion of varied texts and images (most of them primary sources in translation) will reveal the role of queens within their societies, their relationship to broader social and cultural institutions such as the Christian Church, and the ways in which queens were celebrated, criticized, and imagined by writers and artists of their time.

The Postwar American Road Narrative (108091)

David Alworth

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines a vibrant subgenre of post-World War II American literature. We will read major novels by Kerouac, Nabokov, and Didion as well as less familiar (yet still fascinating) writings by Hunter S. Thompson, Tom Wolfe, Patricia Highsmith, Ralph Ellison, and others. In addition, students can expect to analyze both primary and secondary historical sources, while giving some attention to visual art (e.g. John Chamberlain) and to film (e.g. Bonnie and Clyde).

England After Empire (109958)

Duncan White

2017 Fall (4 Credits)

Schedule:

M 1100 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This course considers the way England was transformed through the demise of its Empire after the Second World War through to the present day. From the birth of the welfare state to the rise of Thatcherism, from post-colonial migration to multicultural Britain, from the Swinging Sixties to punk rock and riots, we will track these radical political, social and cultural changes through novels, poetry, theater, film, pop music, photography, fashion, food and sport. We will explore the way Britain sought to retain its influence in the world, through its involvement in the Cold War, its relations with the Commonwealth, and its continuing 'special relationship' with the United States, even as what being English or British began to change in meaning. As well as reading literary works by Philip Larkin, Jean Rhys, JG Ballard, Salman Rushdie, China Miéville, and Zadie Smith, we will consider the nation's popular culture, from The Beatles to The Sex Pistols, from James Bond to J.K. Rowling.

Sports and Empire (159790)

Daniel Loss

2018 Spring (4 Credits)

Schedule: F 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

One of the enduring legacies of modern imperialism has been the spread of British and American sports around the globe. This seminar takes the connection between sports and imperialism as a starting point to explore questions about the nature of imperialism, the response of colonized peoples to imperial projects, and the persistent connections between imperialism and globalization. The British Empire and British sports (cricket, rugby, soccer, etc.) will be our main focus, though we will also consider the U.S. as an imperial power.

As a History & Literature seminar, this course is focused primarily (though not exclusively) on the analysis of primary sources, both historical and literary. Course materials include novels, poems, memoirs, rulebooks, and essays. Over the course of the semester, students will develop their research, close reading, and writing skills, culminating in a final research paper. Regular participation in class discussions is expected from all students.

Environmental Change in American History and Literature (160732)

Lynne Feeley

2017 Fall (4 Credits)

Schedule: W 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

This course examines American environmental literature from the period of colonization through the era of climate change. Our focus will be on how people from an array of different backgrounds experienced and inscribed North American environments. We will pay particular attention to issues of race, class, and gender in the history and literature of environmental change.

Latin American Cultural Criticism (203879)

Rene Carrasco

2017 Fall (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will examine the world of ideas that has shaped Latin America. It is designed to provide students with the necessary tools to think critically about topics such as nationalism, capitalism, literary criticism, historiography, political and economic theory, identity politics, modernity, colonialism/postcolonialism, gender, and many other topics that have shaped intellectual debates in Latin America and all over the world. We will labor at the intersection where literature, history, politics, theories and practices meet. This course will examine ideas and the practices they inform, as well as practices and the ideas that sustain them, as products of human culture that can be contested and changed.

Boston and the World, 1600–1850 (205568)

Alan Niles

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course studies Boston's early history and literary culture. Our readings will feature prominent and influential authors such as John Winthrop, Anne Bradstreet, Samuel Adams, Henry Wadsworth Longfellow, and Ralph Waldo Emerson. Our class activities and assignments will involve travel around Cambridge and Boston to explore sites, museums, and archives. Throughout this course we will seek to understand how the Boston area's distinct local culture has been shaped by global migration and exchange, from transatlantic Puritanism and Native American trade to the slave trade and Irish immigration.

Afro-Latin American Cultures: Race, Religion, Music, and Literature (205569)

Rebecca Kennedy de Lorenzini

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will explore the history of Afro-Latin American culture as expressed through literature, music, dance, and religious and spiritual practices. Beginning with an analysis of the theoretical framework of the African diaspora, we will ask central questions around how and why African heritage has been celebrated or rendered invisible in Latin America. We will also consider where ideas of homeland and displacement shift with experiences of migration and in borderland regions. Themes of racialized and gendered experience will be discussed as well as systems of racism, oppression, cultural imperialism, and individual and collective agency within this history. The rich diversity of Afro-Latin American cultures will be highlighted in both the Caribbean and South America, as well as in sites of connection and convergence such as New York City, Havana, and Panamá.

Narratives of Global Inequality (205570)

Paul Adler

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The course is divided into three thematic sections: first, we will examine how individuals and institutions in the United States perceived the "Third World" and attempted to spur development. We will then move our perspective to the Global South and examine a number of themes that confronted "Third World" states regarding development. Finally, we will turn to recent decades and debates over whether the mechanics of the current global economy generate inequality and whether they could be changed to reduce social, ecological, and economic inequities. We will explore these themes using a mix of texts from memoirs to graphic novels to films to speeches produced by everyone from sweatshop workers to heads of major financial institutions.

The Cultural Criticism of the Frankfurt School (205572)

Ryan Acton

2017 Fall (4 Credits)

Schedule:

TR 0500 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course focuses on some of the most important if also polarizing European intellectuals of the twentieth century. Writing from roughly the 1920s to the 1960s, the Frankfurt School theorized and critiqued the tumultuous times that they lived through. Fascism, the Holocaust, and capitalist domination, they held, had given the lie to the prevalent myth that the arc of history bent ever toward progress. Progress, Theodore Adorno wrote, was the development of the slingshot to the atom bomb. Yet even during the Third Reich and the Holocaust, the Frankfurt School often held onto the dim hope for a world without domination. This course introduces you to the wide scope of the school's cultural criticism. Unlike most of their Marxist predecessors, the Frankfurt School emphasized the role of culture in perpetuating and resisting domination. The study of mundane objects and great art alike, they believed, reveals the nature of domination and hints at the possibility of a world free of it. Course readings will focus on their theorizing of topics such as urban modernity, mass culture, aesthetics, sexuality, individual subjectivity, and the purpose of critique.

This course assumes no background in cultural criticism, critical theory, or literary theory.

Deportation and the Policing of Migration in U.S. History (205573)

Emily Pope-Obeda

2017 Fall (4 Credits)

Schedule:

R 1100 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines the history of deportation in American society, and considers how the policing, exclusion, and expulsion of immigrant populations has shaped the nation. Through historical texts, primary sources, literature, and popular culture, we will cover a wide range of topics including racial quotas, guestworker expulsions, labor control, racialized health panics, national security scares, the disproportionate removal of black immigrants, the growth of immigrant detention, the criminalization of immigrant communities, and immigrant rights activism. Although mass deportation is often understood as a recent phenomenon, this course will demonstrate the ways that immigration control stretches as far back as creation of the United States. We will trace shifting opinions about immigration, the meaning of citizenship, statelessness, and national belonging.

Fashion and Slavery (205574)

Jonathan Square

2017 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines the politics of fashion among people of African descent during slavery and the period immediately followed emancipation. Fashion is generative, yet underutilized analytic to explore the experience of the enslaved and their descendants. Geographical breadth is crucial to examining the African Diaspora in its full complexity; therefore, course material will cover the United States, Caribbean, Latin America, and Africa. We will examine in particular the relationship between slave consumerism and the development of modern capitalism in the Atlantic World. Other topics of the course will include: sumptuary law, wealth accumulation among the enslaved and formally enslaved, honor and respectability politics, commodification of the enslaved, gendered sartorial expression, etc.

Contemporary American Literature and Popular Music (205575)

Alex Corey

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This class examines the relationship between popular music, American literature, and the power structures that organize life in the United States. We will study the ways that music constructs social identities by considering how popular music—in performance, on record, and in written representation—can both reinforce and challenge hierarchies of gender, race, region, sexuality, class, and citizenship. Listening to recording artists such as Johnny Cash, Frank Ocean, Beyoncé, and Kendrick Lamar, we will learn how music plays a critical role in producing the social distinctions that popular culture is often presumed simply to reflect. Moreover, our study of literature by Alice Walker, Mary Gaitskill, Essex Hemphill, and others will show how the literary representation of sound can both articulate the pleasures and resist the injustices of an often-inadequate present moment. As part of this course, you will learn to design, record, and produce your own podcast episodes.

Great Migrations: Black Atlantic Travel Narratives (205576)

Marina Magloire

2017 Fall (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The story of the African diaspora begins with, and continues to be shaped by, travel. If, as Angela Davis posits, the ability to travel was one of the most significant ways that "emancipation radically transformed personal lives" of formerly enslaved people, this seminar seeks to consider all of the ways that black people in the Americas exercised this newfound freedom in the twentieth century. This course begins with the narratives of enslaved Africans detailing their forced migration to the New World, and ends with the speculative black narratives of space travel and future utopias in which "walking while black" is no longer a crime. From the world travels of Harlem Renaissance intellectuals like Langston Hughes and Claude McKay, to the waves of decolonization that pushed black migrants to leave their homes in Africa and the Caribbean, this course explores the tensions between a fraught history of coerced migration and a tempting possibility of leisured wandering. Through autobiographies, novels, and poetry, we will map the global tides that pushed black people to travel the world as sailors, soldiers, nurses, dancers, students, and exiles.

Stop Making Sense: America in the 1980s (205577)

Angela Allan

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The 1980s saw the convergence of American politics and economics to strengthen US interests abroad, but the decade was also a moment of enormous social, political, and economic divergence at home. How compatible—or causal—was the end of the cold war with the end of the American cultural consensus? Did such a consensus ever exist, or was it a mere illusion and nostalgia for a "simpler time"? Three decades later, these questions remain essential to understanding the history surrounding the cold war and the culture wars. This course will look at how culture—including novels, films, plays, music, and more—both shapes and is shaped by social and political attitudes. As the 1980s experiences a pop culture comeback in the 2010s, how do we begin to critically make sense of a decade of contradictions?

Watergate: Conspiracy, Paranoia, and the Abuse of Power (205578)

Steven Biel

2017 Fall (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Russiagate, Emailgate, BenghaziGate: these are the latest in a series of scandals and pseudo-scandals bearing the suffix that originates in the name of the Washington hotel where, in the summer of 1972, burglars associated with the Committee to Re-Elect the President (sometimes abbreviated as "CREEP") broke into the Democratic National Committee headquarters. The subsequent cover-up and revelations of a myriad of crimes and abuses of power by the Nixon White House and previous administrations, abbreviated as "Watergate," reshaped U.S. political culture in the 1970s and resonate into our own time. In this course, we will explore how Watergate figured into canonical works of popular culture, especially Hollywood movies, in the first half of the 1970s. Corrupt power, secrecy, surveillance, and paranoia suffuse these works. They speak to a pervasive distrust of American institutions—especially government—that extended across the political spectrum. Watergate will be our entry point into a wide-ranging engagement with the cultural history of the 1970s and its legacies in the present. Filmmakers and authors include Francis Ford Coppola, Sidney Lumet, Barbara Kopple, Alan J. Pakula, Ivan Dixon, Robert Altman, Roman Polanski, Martin Scorsese, Mary McCarthy, Elizabeth Drew, Kurt Vonnegut, Ursula K. LeGuin, Gore Vidal, Carl Bernstein, and Bob Woodward.

Middle Eastern Displacements: From Ottoman Migrants to Syrian Refugees (205579)

Ugur Pece

2017 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The current humanitarian disasters in the Middle East and North Africa have brought the plight of refugees in the region to the fore. Taking a long-term historical perspective, this course explores the centrality of migrants and refugees to the formation of the modern Middle East. Drawing on multiple cases of migration and displacement from the mid-nineteenth century to the present, we will investigate historical processes that resulted in the uprooting of diverse populations throughout the broader Middle East. Topics include war (inter-state and civil), population transfers and exchanges, voluntary and forced migration, assimilation and integration, and exile and memory. We will explore these themes by drawing on diverse primary sources such as fiction, poetry, memoirs, music, photography, and film.

From Rock and Roll to Rap en Espanol: Urban Youth Cultures in America (205580)

Melissa Castillo-Garsow

2018 Spring (4 Credits)

Schedule:

M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course explores the history of race relations, civil rights, and youth cultures post WWII through the lens of music history. Although overtime, African American contributions to American Music have become more and more recognized (though still not enough especially in terms of Rock & Roll), Latino contributions to popular music in the United States have mostly been relegated to the margins of a narrative dominated by an overly black and white view of musical history. Latin music is often portrayed as an exotic resource for "American" musicians, as suggested by pianist Jelly Roll Morton's reference to "the Latin Tinge." Often seen as purely foreign music, this course turns that perspective on its head. We will document the roles of U.S. Latino musicians as interpreters of Latin American genres, as well as their roles as innovators within genres normally considered non-Latino music: R&B, jazz, Rock & Roll, country/western, punk and hip hop. For example, while African-American artists moved into niches in the music market where a modified urban sensibility still prevailed- funk, disco, soul, and pop; Puerto Ricans created their own labels and markets in New York for a mainland Spanish-speaking salsa following large enough to fill Yankee Stadium in 1973. In the course that follows, we examine how the sensibility and musical creativity of urban youth, in very different historical periods, inspired musical revolutions which transformed the tastes of entire generations, crossing boundaries of race, gender, nation and social class. Of course, we end with hip hop, reggaeton and their global implications.

Museums in America (205588)

Reed Gochberg

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

In this course, we will consider the literary and cultural history of American museums from the eighteenth century to the present. Throughout the semester, we will discuss how museums have functioned as both centers for research and as public spaces for education and entertainment, and how such priorities have evolved over the past few centuries, shaped by new ideas about conservation, education, and access. How do we determine the authenticity and value of art objects and natural specimens? How have museums informed debates over national politics and cultural authority? And how do museum collections create narratives about national and natural history? We will explore these and other questions through a range of sources, including fiction and poetry, visual and material culture, and periodicals and museum guidebooks, as well as visits to Harvard's own varied museum collections and the Isabella Stewart Gardner Museum.

Colonialism as Madness (205589)

Anouska Bhattacharyya

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Why do we take the history of Euro-American psychiatry as the barometer against which we understand all other histories of madness? Is there a larger narrative of insanity that doesn't use the Greenwich Meridian as the centre of the world? To give students the tools to answer these questions, this course uses underutilized literature from South Africa, the Pacific Islands, and South Asia as the roots of a new kind of canon. Students will grapple with the history of madness in three registers -- individual, community, and transnational. Within these registers lies a more pressing issue: can we consider colonialism itself a form of madness? Students will unpack a historical and literary madness that removes the centrality of the Euro-American story and creates a global story where the 'mad' are not simply a racial 'other'.

Women at War in France and in the Colonies (205590)

Stefanie Sevcik

2018 Spring (4 Credits)

Schedule:

T 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar explores roles women have played in wars for independence across the French-speaking world. As the Italian director Gillo Pontecorvo depicts in his iconic film, *The Battle of Algiers* (1966), some women fought alongside men carrying bombs in the fight for freedom from the French in Algeria. However, more often, women have forged their own paths parallel to men enacting complex forms of resistance through art, mobilizing domesticity, and protest. Using women in the French Revolution as our starting point, we will engage with women who resist the reductive fantasy of the female freedom fighter throughout the French-speaking world with an emphasis on the case of Algeria. Figures under our investigative lens include Olympe de Gouges who proclaimed a "Declaration of the Rights of Women" in France, Assia Djebar who depicted women playing new roles outside of the home in Algeria, and Lina Mhenni who used social media in Tunisia to show the world injustice taking place under a repressive regime in 2010. Alongside these memoirs, literary texts, historical documents, and films by and about women at war, we will develop a critical vocabulary of women at work reading theorists that include Karl Marx, Michel Foucault, Gayatri Spivak, and Judith Butler. Over the course of the semester, we will put these voices in conversation with one another in order to reconstruct alternative histories of resisting oppression in the francophone world and beyond.

After Affirmative Action: Race, Justice, and Inequality in America since the 1990s (205921)

Patricia Chu

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

In this course our exploration surrounds four contemporary novels by African American and Asian American authors with the theory and history of the new political, economic and social context these authors were confronting while writing political literature. We examine the roots of changes in American racial politics while also studying how minority artists urgently seek new ways to represent injustice and imagine new strategies of fighting it. We will discuss the juridical, administrative and cultural repudiation of civil rights-era understandings of and remedies for racial inequality that form the backdrop of these novels. Many of these trends began to take hold in the 1990s. Affirmative action was replaced by "diversity." "Reverse discrimination" lawsuits were on the rise and turned white people into victims of racial remedies, making Proposition 187 and Proposition 209 possible. White identity politics was reconfigured to make it acceptable in the mainstream. The war on poverty became the war on drugs, and thus a war on poor communities and families. Public education was resegregated and privatized, and the school to prison pipeline was established. Criminal law and immigration law, once firmly separated, converged. Homeland Security took priority over civil rights. "Value" could only mean monetary value, and justice had to make financial sense rather than moral sense. The post-Katrina era is one in which these trends created the conditions for first, the racist emergency response launched in the immediate wake of the storm and second, the less-publicized but even more consequential "restructuring" of the region along lines of race, class and corporate profit. Our work in this course, guided by historians, legal scholars, creative writers, and political theorists, is to understand both how we got here and how we might imagine and engender a new destination.

Stories of Slavery and Freedom (156003)

Timothy McCarthy

2018 Spring (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In the last generation, scholars have revolutionized our understanding of slavery and freedom in the modern Atlantic world. This sea-change has been the result of a major methodological shift: to view this history through the eyes of slaves rather than the eyes of masters. This course will examine the history of the "black Atlantic" through a diverse range of cultural texts--poetry, pamphlets, court cases, petitions, autobiographies, novels, speeches, and sermons--produced by slaves, free blacks, and abolitionists from the Age of Revolution to emancipation.

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The history of western art, like any story, has a plot (Antiquity, Middle Ages, Renaissance, Baroque, etc.), protagonists (Michelangelo, Picasso, Pollock), and a climax (Modern Art). By looking backward instead of forward, beginning with contemporary works and ending in the Middle Ages, this introduction to western art considers how the past continuously informs an ever-changing present. Combining the canonical with the critical, this course introduces both the western tradition and the practice of art history itself.

A painting attributed to Leonardo da Vinci recently fetched the highest price on record for a work of art, a staggering 450 million dollars. The price speaks to the tremendous fascination certain Italian Renaissance

figures still hold, 500 years after the fact. The Renaissance had many protagonists, but few loom as large as the three contemporaries and rivals who will form the focus of the course. In many regards, they shaped the notion of "genius" that we have inherited around themselves. The course builds out from these specific figures to a broader understanding of the Renaissance as an artistic and cultural phenomenon.

China is grasped through twelve artworks, spanning three millennia from the Bronze Age to the twentieth century. These artworks form both a timeline and a jigsaw puzzle with recurrent themes, e.g., the correlation between cosmos, body, and mind. The course consists of case studies, revealing both larger intellectual trends and the nuanced way artworks engage established formal conventions. Students learn about China through art and acquire visual literacy that takes art on its own terms.

Architecture Studio I: Transformations (109375)

Megan Panzano

2018 Spring (4 Credits)

Schedule: WF 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Architecture assembles multiple models, surfaces, and materials; it is not a single monolithic thing, rather it is comprised of disparate parts and organizational systems operating at different scales. Design, the bringing together of these elements, requires sensitivity, registers scale, and renders perceptual effect. This course is an introductory architectural design studio focused on building foundational architectural concepts and design methodologies studied through a process of making. A series of physical modeling/fabrication assignments explore spatial and organizational transformations as a consequence of the changing interactions among material, fabrication technique, and form. Resultant expressions of space, scale, and perceptual effects are discussed and evaluated in relation to a series of course readings that frame the intentions of each assignment within architectural theory and history discourse.

Both studios in the Architecture Studies Track (Transformations HAA 96A and Connections HAA 96B) explore architectural means and methods of design. Each begins from a different scale of inquiry, but converges at a similar end. This studio originates at the scale of material - focusing on specific capacities and effects thereof as well as the details of assembly - and expands from this to an investigation of an occupiable architectural scale in relation to a dynamic site.

The course emphasizes fluency in the visual and spatial communication of ideas through instruction in 2D drawing and 3D modeling techniques. Technical workshops are provided in choreography with serial assignments encompassing drafting and 3D modeling (AutoCAD + Rhino), techniques of fabrication (Rhino to various outputs), 3D printing, and representational processing (Adobe Creative Suite). The studio exposes students to critical architectural thinking and design methods for more broad disciplinary application following. No particular skill set, technical or otherwise, is a required prerequisite for this course; students from all backgrounds are welcome.

Architecture Studio II: Connections (110362)

Lisa Haber-Thomson

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

The practice of architecture fundamentally asks us to continuously engage with, and re-conceptualize, the world for which we are designing. As such, architecture as a discipline is not only about designing buildings, but also about challenging us to imagine new ways of seeing the world. This studio takes on the challenge through a series of design exercises focused on understanding, engaging with, and reimagining the urban condition. Throughout the course, we will approach architectural design as both a method of producing urban environments, and also as an avenue through which to understand our cities. We will be directly confronting the social, political, and environmental contexts that are necessarily implicated in any design process.

Both studios in the Architecture Studies Track (Transformations HAA 96A and Connections HAA 96B) explore architectural means and methods of design. Each begins from a different scale of inquiry, but converges towards a similar end. This studio originates at the scale of the urban site, and begins with a set of design research assignments that ask students to imagine the city from the perspective of a non-human agent. Extrapolating abstract principles from these agents, we will be mobilizing the possibilities of architectural representation to reimagine the city through mapping, diagraming, and collage.

The studio culminates in a design proposal for a site in Harvard Square. Students will be given an architectural brief, and will produce projects that address existing site conditions, programmatic space requirements, and projected users of the site. Technical workshops will provide all the necessary skills required for the course, and will allow students to develop aptitude in architectural drawing, mapping, rendering, and simple animation. No existing expertise or technical proficiency is necessary for this course. Students from all backgrounds are welcome; we will be encouraging interdisciplinary thinking throughout the design research process.

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course explores the extraordinary cultural transformation Europe, the Mediterranean and the Middle East underwent from Diocletian's reorganization of the Roman Empire in the late third century to the Islamic conquest of the Iberian Peninsula in the eighth century. Monuments and sites, sculpture, mosaics, frescoes and ceramics, icons and relics, textiles, coins and seals chart the movement of people, commodities and ideas along routes of warfare, pilgrimage, trade and diplomacy. Was the world of late antiquity still bearing the hallmarks of Roman connectivity, administration and culture? Were Ireland and Anglo-Saxon England really the edge of the known world? What was the extent of the Eastern Roman Empire's cultural power in late antique Europe, Africa and the Middle East? How did religious changes influence urban topographies, geographies of power and artistic choices?

Close-up inspection of works of art in the Harvard Art Museums, the Harvard Business School and the Boston Fine Arts Museum; art making in the Harvard Art Museum Materials Lab and the Harvard Ceramics Studios; and study of archaeological records of the Archaeological Exploration of Sardis offer participants a rare insight into one of the most fascinating chapters in the history of art and architecture.

The Art of Death: Funerary Monuments in the Mediterranean (205402)

Felipe Pereda

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Funerary art is a type of monumental sculpture that was systematically produced around the Mediterranean since Antiquity, through the Middle Ages and into the Early Modern –Renaissance and Baroque—period. From medieval royal tombs to the Escorial, this is a story about some of its most spectacular creations. This seminar will look into the continuities and discontinuities of this "long story" within the geographical frame of the Mediterranean, but focusing on some particular examples, mostly from the Iberian Peninsula. The seminar will explore the relation of art history to memory, and the ways the artistic imagination both reflected and also articulated ideas of the afterlife.

Modern Art in Revolution: From the 1871 Paris Commune to October 1917 (205114)

Maria Gough

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar examines the relationship between art and activism during two major popular uprisings against the state: the Paris Commune of 1871 and the October Revolution of 1917. What was the role of modern and avant-garde artists in these revolutionary events? What new forms of production and distribution did they invent, and how did their work engender, rather than simply reflect, processes of emancipation and social transformation? How, in other words, was the utopian imagination made into spatial and pictorial form? The first half of the course addresses Courbet's activism, the use and abuse of photography for partisan purposes, Manet's depiction of state violence, and the flowering of Impressionism in the wake of the Commune's suppression. We then analyze the participation of Russian and Soviet avant-garde artists in the building of the first socialist society in the 1920s, considering the politics of abstraction, the turn to experimental and factographic models of photography, the fine artist's transformation into media-worker, and the radicalization of exhibition practices. Weekly meetings will be organized around first-hand study of original works of art in the Harvard Art Museums, and photographic albums and artists' books in Houghton and the Fine Arts Library. Note seminar location: Study Center of the Harvard Art Museums (show your ID at the desk on the 4th-floor). Requirements: seminar attendance and participation, weekly readings, and the preparation of a research paper based on original works and/or historical materials in Harvard collections. Open to undergraduates. Limit: 12.

Architecture and Authoritarianism in the 20th Century (205403)

Patricio del Real

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In this pro-seminar, we will explore architecture in totalitarian regimes, paying particular attention to fascism as a political ideology and historical frame. The course will examine how architecture in its expanded field produced the ideological apparatus of fascist and totalitarian dictatorships, and shaped its systems of thought and forms of social organization in Europe, Africa and the Americas. We will focus on architectural case studies to examine contexts where dictatorships have toppled democratic forms of government. We will explore material, spatial and intellectual connections between political power and architecture; examine material techniques, aesthetics and organizational strategies through which architecture has established its authority in totalitarian regimes; uncover the ways architects have engaged the sphere of politics, government and national sovereignty in the 20th Century. Our aim is to go beyond the notion of an architecture in the service of the state, and to understand it as a tool of power and a technique of authoritarian rule.

History of Art & Architecture 176E

Vision and Justice: The Art of Citizenship (203077)

Sarah Lewis

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0159 PM

Instructor Permissions: Instructor**Enrollment Cap:**

95

This course is organized around a guiding question: How has visual representation both limited and liberated our definition of American citizenship and belonging? Today, as we are awash with images, and as social media has allowed us to witness racially motivated injustices with a speed unimaginable until recently, we have had to call upon skills of visual literacy to remain engaged global citizens. This course will allow us to understand the understudied historic roots and contemporary outgrowth of this crucial function of visual literacy for justice in American civic life.

Sequenced chronologically, the lectures are organized into three parts, examining the role of visual representation as Civic Evidence, as Civic Critique, and as Civic Engagement (i.e. movement building and solidarity). Exploring these three categories in turn, topics include: the role of aesthetics for the invention of race, narratives supporting and critiquing Native American "removal," the abolition of transatlantic slavery, immigration, the creation of and destabilization of U.S. segregation, the New Negro Movement, Japanese Internment, and the long Civil Rights movement. Each lecture centers on case studies to show the historic roots of the contemporary interplay between visual representation and justice at these inflection points in the contestation for citizenship in America.

We are fortunate to have invaluable holdings at the Harvard Art Museums and at the Peabody Museum and via Cooper Gallery exhibitions that vividly showcase this contested relationship between art, justice, race, and culture over the course of the nineteenth, twentieth, and twenty-first centuries. Lectures will incorporate material from these holdings and sections will meet at these locations to facilitate object-based study. This course will also include guest lectures from architect Michael Murphy and artist Theaster Gates. Students will leave the course having developed rigorous skills of visual literacy and critical analysis foundational to be engaged global citizens regardless of their concentration or future field of study.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or United States in the World, but not both.

Tectonics Lab: Conference Course (110270)

Mark Mulligan

2017 Fall (4 Credits)

Schedule:

F 0200 PM - 0459 PM

M 0900 AM - 0959 AM

Instructor Permissions: Instructor

Enrollment Cap:

18

Tectonics Lab introduces students to material properties, structural behavior, and fabrication-and-assembly issues in architecture through a combination of lectures, workshops, and design-build projects. The course emphasizes two modes of architectural experimentation: analytical and intuitive. Abstract and architectonic exercises involving these modes of experimentation will take place in a workshop format, with students working in teams of varying sizes. Weekly lectures provide a theoretical basis for the design-build projects, with topics including fundamental, non-quantitative statics (e.g., free-body diagrams, types of forces and reactions) and generic structural approaches; material properties and fabrication; joinery and assembly; scalar transformation; modular construction; kinetic structures; and more. Design-build projects challenge students to engage lecture material in a hands-on manner; these projects focus on the construction of full-scale artifacts that may be tested against a range of performance criteria. In each project, students will explore the role of material expression, figuration, and formal gesture in communicating their ideas. Project documentation through drawing, photography, and video is an essential component of coursework, and a comprehensive course portfolio will be due at the end of term.

The principal objective of Tectonics Lab is to extend our shared knowledge of material properties, structural behavior, and construction techniques by testing new ideas. Our research model is a hybrid: equal parts scientific laboratory (where narrowly defined hypotheses are tested and evaluated) and artist's atelier (where expression of ideas, both articulated and ineffable, is the goal).

Recommended Prep: HAA 96a is useful, but not mandatory

Women in South Asian Art (205117)

Jinah Kim

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course aims to provide a historical perspective for understanding the contemporary politics of body and gender representation by exploring historical examples of female patronage of art and by attending to the development of goddess cults through archaeological and art historical evidence. By scrutinizing visual representations of female body in South Asia and by locating them in the context of aesthetic theories and erotic science, we will also problematize exoticizing views of "erotica Indica", including the prevalent use of erotic imagery from medieval temples for illustrating the Kamasutra in the West. The readings for this course are interdisciplinary, and we will cover a broad range of materials from medieval sculptures, to miniature paintings, and to an interpretive animated cartoon of the Hindu epic, Rāmāyana

Cuzco, 1650 - 1700: Lima, Quito, and Mexico City in Comparison (205405)

Thomas Cummins

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Cuzco, once the center of the Inca Empire, became a major colonial Peruvian city unlike any other in which the royal descendants of the Inca lived and ruled along with Spaniards. In 1650 an earthquake destroyed most of the city's buildings. Between 1650 and 1700 most of the city and the surrounding pueblos were re-built. This is in part due to the remarkable efforts of the bishop of Cuzco Mollinedo. At the same time, conflicts between the bishop and the cabildo of the cathedral, and between the bishop and the Jesuits focused upon power and authority as the re-building took place. Still more surprising, perhaps, most of the architects and painters for this renewal were Indians. This pro-seminar will examine both the architectural campaigns and the various genres of paintings that came to fruition within the complex political and cultural struggles over power and its representation. Cuzco will be the focus of this course, but we will put its painting, sculpture and architecture into comparison with other 17th century cities such as Lima, Quito, and Mexico City.

Movable type and the discovery of the New World occur almost simultaneously. It is perhaps no surprise that one of the first international businesses was the printing press in Mexico. This course will therefore study the impact of the book, and the various relationships between the printed book and the manuscripts and their critical place in the creation of a colonial culture and the European knowledge of that culture. At the same time we shall study how the book/manuscript is both an object of desire and commerce and of fear and loathing. How are book and manuscript illustrations a critical element in the development of colonial visual culture?

The course will focus on the private and public life and world of everyday Byzantine society. Although most of the surviving material evidence originates from court and religious environments, the course will attempt to study Byzantine society as a whole. Course topics will examine the private as well as public life of the individual from childhood to adult life through artifacts from the household, work and other social environments. Emphasis will be on the early and middle Byzantine periods (5th – 12th c.).

Illustrating the Word: Images from the Byzantine religious and secular world (205409)

Ioli Kalavrezou

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The seminar will study illustrated manuscripts that were produced in the Byzantine world from the 9th to the 15th century. Most of them are books, which contain religious texts: Old Testament, Gospels, Psalters etc. Several are treatises on a variety of subjects as well as of a historical nature. Some were produced at the imperial court workshops, many at monastic foundations and others in artists' ateliers. Many were however for personal use. The type or choice of illustration varied according to period, function and patron. All these questions will be addressed during the course of the semester.

The Reformation, in 2017 500 years old, marks a caesura in the history of European religious art. Between the late Middle Ages and the Counter-Reformation, however, there are also important continuities. The course will pay special attention to the construction of religious experience through a series of comparative case studies.

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Why and when did broken things come to be valued as objects of aesthetic appreciation? The seminar begins with Petrarch and his idea of fragments, and follows the trail through the fifteenth and sixteenth century, when artists, sculptors, architects and humanists took a passionate interest in fragments and ruins of all kinds. They fix them, they draw them, they depict them, they reuse them, and they learn from them. The course considers and interrogates each of these manifestations of interest. While the idea of the classicism we have inherited from the 18th century suggests a static and authoritative past, in the Renaissance the interpretation of antiquity was a topic of great contention. As we delve into these debates, we explore what counted as ancient, how artists imitated and competed with the past, and how they remade it.

What images have had agency and persuasive efficacy in the contestation of racial inequality and social justice in the United States? This course, open to graduate students as well as undergraduates, examines the way that photography has both solidified and challenged the construction of racial categories and contributed to the work in the long civil rights movement in America. The course will focus have a heavy emphasis on both film photography, closely examining the work of artists including Edward Curtis, LaToya Ruby Frazier, Lewis Hine, Deana Lawson, Charles Moore, Gordon Parks, Bradford Young, Carrie Mae Weems, and Joseph T. Zealy.

Classes will include a trip to the Gordon Parks archive and the Smithsonian Museum of African American History and Culture. The course will also have guest visits from cinematographer Bradford Young and photographer Deana Lawson.

Russian and Soviet Avant-Gardes (126185)

Maria Gough

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

On the centenary of the 1917 Revolutions, this seminar offers a major test case for assessing the

relationship between aesthetics and politics by returning to the pioneering example of Russian and Soviet avant-garde artists, photographers, designers, and architects who participated in, or otherwise responded to, the building of the first socialist society. The key issue on the table is the avant-garde's problematization and ultimate rejection of the modernist principle of the autonomy of the work of art. The significant role of women in this major shift within the history of modernism, as well as the work of non-architects in the field of architecture, is discussed.

We begin with the pre-revolutionary embrace of the autonomy principle in the differentiation of poetic vs. everyday language, Suprematist nonobjectivity, and the understanding of *faktura* (facture, texture) as materiological determination. We then turn to the troubling of that principle in the wake of 1917, in both Lissitzky's art of the *proun*, which ranged across media from painting to architecture, and also laboratory Constructivism, which, following Picasso's example, advanced constructed sculpture as a major new procedure. The rejection of autonomy altogether is found in the Productivists' subsequent call for artists to enter into industrial production and the design of every day life. Major examples for discussion include: the reinvention of textile and clothing design; the advent of new typologies for interior and urban space; the recourse to experimental and factographic modes of photographic practice; and the radicalization of graphic design and exhibition design.

The seminar is supported by a dedicated exhibition in the Harvard Art Museums, "What about Revolution? Aesthetic Practices after 1917," and a weekend study trip to the centennial exhibition, "Revoliutsiia! Demonstratsiia! Soviet Art Put to the Test," at the Art Institute of Chicago.

Requirements: seminar attendance and participation, weekly readings, and the preparation of a research paper based on original works of art. Open to graduate students. Limit: 12.

If the artisanal and technical skills behind artmaking are forms of knowledge, how can (or should) that knowledge be integrated into the analytical methods of art history? This seminar will provide a wide-ranging exploration of this question, examining theories of craftsmanship, fabrication, and material reciprocity, debates over the concept of "tacit intelligence" and the value of making or remaking as historical method, issues of skill and deskilling on the part of both artists and art historians, and the challenge of exhibiting making in an art museum context. We will explore the transformative possibilities of rigorous attention to making, such as its potential to create forms of interpretation that cut across the fine, decorative, and industrial arts. The course will include close looking sessions in the Harvard Art Museums, hands-on making exercises, and visits from guest artisans.

Buddhist Cave Visualization (205600)

Eugene Wang

2018 Spring (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The caves at Dunhuang are among the largest Buddhist cave complexes in the world, spanning the fourth to the fourteenth century. With 492 caves decorated with murals and sculptures, Dunhuang is the largest art gallery in situ in the world. The course explores the visual programs of Dunhuang caves. The disparate textual sources on which the murals are based do not explain their convergence in the same cave. A deep logic of world-making binds them together. Using available digital reconstructions that proffer spatial experience of the Dunhuang caves, we address some key questions: how do disparate murals add up? How does the cave visualize and stage the Buddhist mental cosmos?

Constructing Latin America (205121)

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In the 20th Century, architects, designers and urban planners in Latin America realized and projected visions of modernity through buildings and ideas that established the canonic works of modern architecture in the region. How do these buildings, forms and ideas engage the intellectual milieu produced by artists, writers and intellectuals in Latin America? What is the relationship between the notion of mestizaje debated by José Vasconcelos and Manuel Gámio, and Mexico's University City? How did the idea of acomodação advanced by Gilberto Freyre impact the forms of Brazilian modernism? In this seminar, we will explore how architecture in Mexico and Brazil was mobilized to imagine and construct modern nations. We will engage in a close analysis of key works of architecture and examine the interactions between ideas and forms, texts and buildings, writers and architects. Our aim is to examine architecture in its expanded field and to study the multiple sites and strategies of constructing and imagining Latin America.

"Something New, Something Old: A Marriage Made in Hell"

This seminar will examine how the new is rendered as something known. This conundrum is, in and of itself, an unprecedented problem. As such, the seminar will examine the relationship between differing theoretical approaches to urban spaces, architecture, pictorial production and consumption, and the historical investigation of colonial Latin American art and architecture in the 16th and 17th centuries. Some questions to be explored through specific readings and works are:

What is the intersection between formal studies of colonial objects and images with the questions formed to interpret them? Is it the same as in the study of European studies, or are there differences? Is pictorial perspective a visual imperative once it is introduced? What is the nature of hybridity/syncretism, emulation, copying and materiality? How does one study synesthetics in the colonial period? Do the differences between European and American languages affect space, vision and object? How do text and image operate in the various publics of Mexico and Peru?

Tutorial - Sophomore Year (115419)

2018 Spring (4 Credits)

Schedule: M 1200 PM - 0129 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Sophomore tutorial is a hands-on course that introduces students to some of the most exciting and productive questions in the history of science, technology and medicine, while developing critical reading, presentation and discussion skills. Small groups of students will tackle different aspects of a larger theme each week and share discoveries in sessions led by the faculty instructor. The course will be further enhanced by a series of supervised individual projects.

Course Notes: Required for undergraduate concentration in History and Science. Students must register for the plenary class session that meets on Mondays from 12:00-1:30 or 3:00-4:30, as well as a weekly section to be arranged.

Knowing the World: An Introduction to the History of Science (123398)

Alex Csiszar

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What are the origins of modern science and of the scientific method? Have the ways of knowing the world of different cultures and societies changed over time? How has scientific knowledge been related to other enterprises such as art, religion, literature, and commerce? We will ask these questions and more through a broad survey of many of the crucial moments in the development of science from the Scientific Revolution of the 17th century to the present day. Topics and figures will include Galileo, evolution, eugenics, the atomic bomb, and the human genome project.

How Science Is Made (205219)

Jean-Francois Gauvin

2017 Fall (4 Credits)

Schedule:

W 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Science is not just a history of ideas, and it is not just made by scientists. It is also made by technicians, assistants and others, and it is a product of craft traditions, tools and instruments, cultures of laboratory life, concerns about openness and secrecy, concerns about intellectual property, and more. Spanning some 400 years, this course will thus explore how science is actually "made," using case studies from the fields of astronomy, physics, microbiology, technology, and engineering. We will be interested, not only in the nitty-gritty practices and "stuff" of science, but also in all the people, visible and less visible, who are

variously involved in making it. Particular attention will be paid to the ways in which different roles in the making of science are influenced by social status, race and gender.

Inventing Science: Stars, Bodies, Books, and Beasts, 1500-1700 (205189)

Hannah Marcus

2018 Spring (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Between 1500 and 1700, a number of hugely consequential things happened in Europe that have traditionally and collectively been called revolutionary – the Scientific Revolution. Copernicus and Galileo reconfigured the cosmos, Vesalius exposed the inner workings of the human body, Bacon and Descartes debated the fundamentals of scientific truth, and Newton reformulated the mathematical and physical world. But how should we understand events like these? Was there really a Scientific Revolution and did it really invent science? In this course, we will relate the classical moments associated with the early modern history of science to new scholarship that will allow us to ask questions about this so-called revolution's relationship to ancient and medieval science, the development of the arts in the Renaissance, the impact of print, the politics of European imperial projects, early tensions between science and religion, and the growth of new traditions of observation, empiricism, and rationalism in fields such as astronomy, medicine, and natural history.

The Century of Physics (205259)

Benjamin Wilson

2017 Fall (4 Credits)

Schedule:

MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The 20th century was a momentous period in the history of physics. It witnessed the collapse of the classical certainties of the past and the emergence of startling new ideas about the nature of physical reality, from the special and general theories of relativity to quantum mechanics, the physics of subatomic particles, and cosmological theories of the structure and development of the universe. These new understandings helped give rise to remarkable technological applications, from nuclear weapons to lasers. In this course, we will study the ideas, events, and personalities that shaped physics in the 20th century. Of particular interest are the entanglements between physics and the social and political currents of modern history—from the maintenance of empire to the rise of totalitarianism, from world wars to the Cold War.

Environments in Crisis (205220)

Evan Hepler-Smith

2017 Fall (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

18

Our understanding of the relationship between humans and the environment has been forged in moments of crisis: natural and human-made disasters, technological failures, political disputes, scientific controversies. This course will address science, technology, and the environment in historical perspective through focused studies of environments in crisis, involving issues such as the pesticide DDT (the subject of Rachel Carson's *Silent Spring*), nuclear fallout, coal mining, extinction and endangered species, climate change, and toxic chemical leaks in India and the US. We will learn to sort out the complex dynamics of nature, knowledge, ethics, and power wrapped up in environmental crises, and how understandings of environmental crisis both shape and are shaped by specific social, cultural, and political contexts (including our own).

Race, Heredity, and Crime, 1800-1940 (205372)

Pietro Corsi

2018 Spring (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

Is the moral and intellectual weakness of some races and social classes inscribed in their skulls and faces? Is crime a natural phenomenon for which there is no cure? Are some crimes truly "savage"; some behaviors literally "bestial"? In a world dominated by unstable power relationships shaped by colonialism and social inequity, discussions about the meanings of race, heredity and crime often intermingled in troubling yet politically potent ways. In particular, with the rise of Darwinism in the 1860s, more and more people looked to the authority of nature to argue for the political necessity of controlling reproduction (so-called eugenics) through policies ranging from involuntary incarceration, forced castration and sterilization and, in the case of National Socialist Germany, medicalized murder of the "unfit." In the course, we will explore the roots of all these policies, beginning in the late 18th-century. We will end by asking: have the tragic lessons from this dark period in the history of science been learnt? A final section will be devoted to the periodic resurgence of efforts to appeal to the authority of nature to explain complex social and historical phenomena, from difference in scores on intelligence tests to the use of science to dictate social norms. The instructor for this course will be Visiting Professor Pietro Corsi.

The Border: Race, Politics, and Health in Modern Mexico (204416)

Gabriela Soto Laveaga

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Why does the Mexico-U.S. border continue to be a space for debate and controversy? This course examines how the creation of the U.S.-Mexico border in 1848 shaped modern Mexican society from the nineteenth century to our present. For many, the border served (and serves) as a protective barrier from poverty, violence, and, especially, disease. By the early twentieth century many Mexican bodies were perceived as "alien," "illegal," and in need of patrolling. Yet these descriptions were also used by Mexican politicians to describe and isolate groups such as Indigenous and Chinese within Mexico. By examining, for example, Mexican public health campaigns, response to epidemics, and how Mexican ideas of race and health played out within Mexico we can better understand the U.S.-Mexico border today.

Bodies in Flux: Medicine, Gender, and Sexuality in the Modern Middle East (156290)

Soha Bayoumi

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines how bodies, genders and sexualities in the modern Middle East, from the nineteenth century to the Arab revolts, have been shaped and represented via changing and competing discourses. Through a variety of historical, ethnographic, media and literary readings, the course studies multiple and dynamic representations of bodies in flux: medicalized bodies, gendered bodies, sexualized bodies, (re) productive bodies, aging bodies and bodies in revolt. The course pays special attention to medicine and science in their interaction with laws, traditions and religious practices. Some of the topics covered include analyzing histories of and discourses on slavery, femininity and masculinity, homosexuality, health, reproduction, disabilities, circumcision and genital cutting/mutilation and gender-based violence.

Graphic! Visualizing Medicine from Textbooks to Comics (205361)

Soha Bayoumi

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Visuals play an important role in the history and practice of medicine, from medical textbooks to medical imaging, and from hospital signage and public health posters to comics and graphic novels. This course will examine the use of visuals in medicine, but will place particular emphasis on a new academic and creative field known as "graphic medicine"—medical comics and graphic novels. Over the course of the semester, we will ask questions about how attending to the visual allows us to think in new ways about diagnostic practices, therapeutics, medical consumerism, doctor-patient communication, and ways in which patients and caregivers narrate their personal experiences of disease. We will pay careful attention to questions of class, race and gender, and to larger ethical and political issues raised by our materials.

The History and Culture of Stigma (110099)

Allan Brandt

2018 Spring (4 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course will investigate the history of a number of stigmatized conditions and diseases including, for example, cancer, mental illness, addiction, obesity, AIDS, and disability. A central goal will be to understand the stigmatization of disease and its effects in diverse historical and cultural contexts. The course will evaluate both the impact of stigmatization on health disparities and outcomes, as well as attempts to de-stigmatize conditions that are subject to discrimination, prejudice, and isolation.

A History of Global Health and/in Latin America (205385)

Marcos Cueto Caballero

2018 Spring (4 Credits)

Schedule:

W 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This discussion-based class will introduce students to debates about the meaning of global health in a key region of the Global South: Latin America. We will concentrate on the reception and recreation of disease-eradication campaigns, as well as broad prevention programs and neoliberal public health reforms in Latin America and the Caribbean during the 20th and turn of the 21st centuries. We will devote particular attention to Brazil and its creative responses to its public health challenges, its fight against AIDS and its relationship with African countries. Finally, we will look at ways in which international health organizations and Latin American actors have interacted during and after the Cold War. The instructor for this course will be Visiting Professor Marcos Cueto.

Measuring the Mind: How Psychological Tests Are Used to Sort Americans and Why It Matters (205429)

Marla Eby

2017 Fall (4 Credits)

Schedule:

R 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

For well over a century, psychologists have worked with schools, corporations, immigration officers, the military, and psychiatrists to sort the American population into groups in order to make a number of key judgments. Special tests -- designed to measure everything from intelligence to vocational aptitudes to personality -- have been at the center of that effort. In this course, we will explore the sometimes controversial story of psychological testing, and its larger implications. We will pay attention to the creativity within psychology in the making of such tests, and examine their potential benefits, as well as the drawbacks and dangers of the misuses of these instruments -- particularly as tools of social control. Topics covered will include the use of tests in the eugenics movement, testing of immigrants at Ellis Island, academic and military sorting through cognitive tests, the use of personality tests in psychiatric and forensic settings, and the cross-cultural use of personality tests by anthropologists. Finally, because Harvard psychologists have made significant contributions to the history of psychological testing, we will use materials uniquely available on this campus in the course of our work together.

Traumatic Histories (205441)

Leena Akhtar

2018 Spring (4 Credits)

Schedule:

T 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar is aimed at advanced undergraduates interested in the history of psychiatry, trauma studies, and the traumatized subject as a recognizable clinical and social category. The course explores the troubled history of trauma psychiatry, focusing on the debates over the legitimization of various forms of suffering (in psychiatric terms) in different time periods. Our goals while exploring this history will be twofold: first, to understand how trauma as a precursor to mental pathology emerged as a way of understanding not only the survivor but also different kinds of disasters; and secondly, to understand the major moves and developments in trauma theory. Topics will include wartime trauma, the Holocaust, accidents, natural and human-caused disasters, sexual and gender based violence, abuse, the memory wars, and the extension of trauma theory to poverty and other forms of social vulnerability.

History of the Psychotherapies (156325)

Elizabeth Lunbeck

2017 Fall (4 Credits)

Schedule:

TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Examines the history of the current psychotherapeutic landscape, looking at the development, methods, aims, efficacy, and limitations of a range of psychotherapeutic modalities from Freud's time to our own, among them psychoanalytic, psychodynamic, cognitive, behavioral, manualized, and evidence-based treatments; individual, play, family, and group therapies. Explores tensions between therapy as a quest for self-improvement and a means of relieving symptoms, between focusing on cognition and on behavior, and between mind and brain. Looks at providers and patients, at the testimonies of writers and poets, and at office-based, hospital, and computer therapies. The question of the relationship between professional practices and the rise of a popular therapeutic sensibility is central to the course.

This course examines the history and cultures of digital computing technologies. In the first half of the semester, students will learn to approach computers as artifacts that embed the social orders and cultural practices that produce them. Students explore the history of automation; cybernetics and World War II; the Cold War and the Closed World; artificial intelligence and gendered subjectivity; the growth of the Internet as a military and commercial project. The second half of the course explores how digital computing shapes our contemporary world: topics include big data, surveillance, computer graphics, and video games. Emphasis is placed on how ideas about gender, privacy, and democracy shape labor practices, models of cognition, and material and symbolic practices of networking in an increasingly online world.

Transformative Technologies: From Washing Machines to Virtual Reality (205423)

Alma Steingart

2017 Fall (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines the relationship between technology, culture, and politics in the United States since the end of the nineteenth century. How have technological changes shaped American society from the end of the nineteenth century to the present day? How, in turn, have technological innovations been impacted by cultural and social trends and contexts? This course, which serves as an introduction to the history of technology, is organized into three cross-cutting themes: (1) labor, (2) gender and identity, and (3) infrastructure. Within each unit, each week will be dedicated to a single technological artifact. By tracing the design, use, and effects of that technology, students will learn how to analyze the social, economic, and political factors that fashion and impact technological innovation. For their final projects, students will choose a technological artifact not included on the syllabus and apply the theories and methods learned

throughout the semester in order to write a cultural history of that object.

15

This course examines the use of imagining techniques from the Scientific Revolution to the present day. How has visual imagery affected the construction of scientific knowledge across varying fields? How did new technologies shape the types of images scientists produce? What is the relation between image-making, scientific research, and formal scientific theories? And how have new technologies impacted theories of physiology, astronomy, and mathematics? By following a different technology each week and drawing upon a rich array of cases from the history of science and medicine, the course examines the epistemological status of images and the how those images shape scientific representation, realism, and objectivity.

2018 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Digital technologies shape – in ways both visible and obscure – many aspects of contemporary governance and democracy. As citizens, it is imperative that we understand how legislative and juridical concepts are built into these technologies, as well as how these technologies in turn impact contemporary uses and abuses of justice, privacy, surveillance, and representation. Beginning with the use of punch-cards to manage census data, this course tours the intersections of digital technology and American politics. Topics will include voting machines, hacktivism, the Snowden Affair, redistricting and Congressional apportionment, statistical uses of polling data, the relation of national security to information privacy, as well as CCTV cameras, social networking, and algorithmic thinking.

Course Notes: Enrollment limited to 15.

Science and Religion in America (203705)

Naomi Oreskes

2018 Spring (4 Credits)

Schedule:

M 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course examines the history of science and religion, with a focus on the United States. Science and religion are often viewed as intrinsically at odds with each other, but are they?? Or have we over-emphasized a small number of conspicuous conflicts? And why have certain controversies loomed so large in U.S. historiography? Topic will include the founding father's views of science and religion; the 19th century creation of government-based scientific agencies; the development of research universities as an alternative to denominationally-based higher education; Andrew Dickson White and the "warfare of science and religion" thesis, the trial of Tennessee school teacher John Scopes for teaching evolution and the popular interpretation of that trial; creationism in the mid-late 20th century, and religious-based opposition to climate science. We will pay particular attention to the question of how the relationship between science and religion has changed over the course of U.S. history, and the drivers of those changes.

Course Notes: Open to advanced undergraduates with a background in history and/or history of science. Enrollment limited to 20.

Climate change threatens severe dislocation of our environment, culture and infrastructure, as well as substantial losses to biodiversity and natural beauty. Virtually all experts agree that to avoid extensive disruptive climate change, we must transform our energy system from one based on burning carbon-based fuels to renewables or other energy sources that are net carbon-neutral. This will require a technological transformation. This course examines that challenge in light of past and present transforming technologies. In the first part of the class, we examine past examples of technological transformation, and consider what we might learn from them. In particular, we consider the questions: where do new technologies come from? What has been the role of the free market v. the role of conscious planning? Does technology drive social change or does social change drive technological innovation? Above all, how do we get the technologies we need? Do we get the technologies we need? In the second part we examine the required energy transition to prevent anthropogenic climate change, and the obstacles to it.

History of Science 233V

Evolution, 1800-1900: Writers and Readers (205388)

Pietro Corsi

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

On the Origin of Species had just appeared, in November 1859, and already commentators throughout Europe pointed out that what Darwin had said was not that new. Scholars now agree that, in the course of often unproductive arguments on this front, "forerunners" were often made to say things they never meant. Nevertheless, it is the case, that from the last decades of the Eighteenth Century, throughout Europe and the United States, a variety of authors – philosophers, naturalists, printers and publishers, journalists, clergymen – engaged in debates on life, its origin and possible changes or transformations. The class will put the so-called Darwinian revolution in context by examining and discussing the larger conversations of the time on this issue, examining both well-known thinkers (Lamarck, Darwin, Haeckel), and ones who are currently less-known. In the course of our work, we will challenge in particular the view that educated and popular opinion had to wait for the big men of science for enlightenment on nature's processes.

Science and New Technologies in South Asia, Latin America, and Africa (205434)

Gabriela Soto Laveaga

2018 Spring (4 Credits)

Schedule:

T 0600 PM - 0759 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This seminar uses examples from Latin America, South Asia, and Africa to explore key ideas in STS and history of science. Students will understand how concepts such as citizenship, race, class and poverty influence and reshape the practice of science on the ground. Co-taught with Professors Clapperton Mavhunga and Dwai Banerjee (MIT Program in Science, Technology, and Society); the class will meet at Harvard.

Course Notes: This jointly-offered Harvard-MIT course will meet for the first time on Tuesday, January 30, 2018.

25

How and to what extent is knowledge shaped by the forms and genres through which it has been produced? Bringing history of science and technology together with media studies, book history, and cultural theory, we will consider histories and theories of representation, textuality, authorship, reading, illustration, translation, and the archive. Readings will include Foucault, Chartier, Latour, Kittler, Daston, Biagioli, Gitelman, Elshakry, and Kirschenbaum.

All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	Social Sciences
FAS: Course Level	Graduate Course

History of Science 300 Section: 024

Direction of Doctoral Dissertations (112941)

Benjamin Wilson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Under special circumstances arrangements may be made for other instruction in guidance for doctoral dissertations.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Social Sciences
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

History of Science 301

Reading and Research (116549)

Allan Brandt

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual work in preparation for the General Examination for the PhD degree.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Social Sciences
FAS: Course Level	Graduate Course

History of Science 301

Reading and Research (116549)

Allan Brandt

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual work in preparation for the General Examination for the PhD degree.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	Social Sciences

History of Science 301 Section: 002

Reading and Research (116549)

Janet Browne

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual work in preparation for the General Examination for the PhD degree.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Social Sciences

History of Science 301 Section: 002

Reading and Research (116549)

Janet Browne

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual work in preparation for the General Examination for the PhD degree.

Additional Course Attributes:

House Seminars

Subject: Leverett House Seminar

Leverett House Seminar 75

(Mis)Understanding Islam Today (161256)

Bilal Malik

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course grapples with key controversies – suicide bombings, blasphemy, gender, Muslim minorities, Islamism—as a point of entry into understanding Muslim cultures and societies. Drawing on insights from Cultural Anthropology and related fields (Religious Studies, History, Government, Philosophy, Law), the course also encourages self-reflection on our own assumptions regarding religion, secularism, freedom, tolerance and violence. Finally, by dwelling on the case of cross-cultural (mis)understandings related to Islam, the course underscores that no matter what our personal objectives—social theorizing, developing policy, or being an engaged global citizen—there is value in understanding how historical and cultural contexts shape us all.

Course Notes:

Q-scores listed at <http://goo.gl/yKXrHE> and <https://goo.gl/vidcam>. No prior familiarity with Islam is required or assumed. This class is also offered as ANTHRO 1661. Students may not take both classes for credit. Eligible for GenEd (under new policies) and Anthro/ NELC/ Hist&Lit credit. Open to all concentrations/years. Meeting time to be finalized on enrolled students' preference. See course site for details, or email bmalik@fas.

Human Evolutionary Biology 97

Sophomore Tutorial in Human Evolutionary Biology (122625)

Bridget Alex

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

An introduction to the issues and methods of human evolutionary biology, focusing on evolutionary theory, the concept of adaptation, and their application to human evolution. Weekly readings and discussions, with biweekly writing assignments that integrate major course themes.

Course Notes: Required of and limited to Human Evolutionary Biology concentrators.

Requirements: Course open to Undergraduate Students Only

Human Evolutionary Biology 1210

Research in Human Biomechanics and Physiology (127206)

Katherine D. Zink

Nicholas Holowka

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 8

Introduces students to experimental techniques used to investigate the musculoskeletal structure and physiology of humans. Students undertake a supervised research project in the Skeletal Biology and Biomechanics Laboratory. Students meet to introduce their project, discuss their work and progress, and to present their final results, as well as for several lectures on writing and presenting research findings. An extensive commitment of time in the laboratory is required. Grades are based on the work completed, the oral presentation, and a short research paper.

Course Notes: This course fulfills the research seminar concentration requirement for Human Evolutionary Biology

Recommended Prep: Recommended: Life Sciences 2 or Human Evolutionary Biology 1420

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1212

Climate Change and Human Evolution (205546)

Daniel Green

2018 Spring (4 Credits)

Schedule: T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

This course will explore the relationship between climate, environment and human evolution. How did

hominins and other mammals adapt to global cooling and grassland expansion? Is there any correlation between climate and the adaptive radiation that produced multiple Australopithecine lineages and the genus Homo? How might the environments of Eurasia have influenced the dispersal of Homo sapiens out of Africa? And how are anthropogenic climate change and environmental degradation affecting human health, subsistence and conflict today? What is the future of our species?

Course Notes: This course counts as an HEB elective for HEB concentrators.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1250

Genetics and Human Evolution (202993)

Amanda Lobell

2017 Fall (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

This course will explore major questions in human evolution from a genetic perspective. Students will learn how genetic data are used to reconstruct the past, to identify unique human adaptations and to understand relationships among living and archaic hominin species.

Course Notes: For this course students are not expected to have an extensive background in genetics beyond Life Sciences 1b.

Preference will be given to HEB concentrators.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Human Evolutionary Biology 1285

Why are we Different? Human Biological Diversity (205496)

Lara Durgavich

2017 Fall (4 Credits)

Schedule:

R 1000 AM - 1229 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This research seminar will use an evolutionary and biocultural framework to examine the history and differentiation of human populations. We will explore how ecological pressures and other evolutionary forces have shaped biological and behavioral variation within and between human groups, and will consider (and in some cases question) the adaptive significance of such diversity. We will also reflect on how culture can influence our understanding of human biology, and discuss how studies of different aspects of human variation, such as 'race', have and continue to impact society.

Course Notes: This course fulfills the junior research seminar requirement for HEB concentrators.

Preference for enrollment given to HEB concentrators.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1310

Hormones and Behavior (112219)

Carole Hooven

2017 Fall (4 Credits)

Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to the interaction between hormones and behavior, emphasizing research in humans. General principles of endocrine physiology are presented. The course then focuses on how hormones affect the brain and body in early development and later in adulthood, and the relationship of hormones to sex and gender. We will explore human reproduction, energy metabolism, mating and sexuality, parental behavior, stress, and dominance interactions.

Course Notes: For Fall 2017 ONLY, this course fulfills either the HEB "Behavior" distribution requirement or the "Anatomy and Physiology" requirement.

****The course typically only fulfills A&P.**

Human Sexuality (122589)

Judith Flynn

2018 Spring (4 Credits)

Schedule: R 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

An examination of human sexuality from a scientific perspective. Students will read and present primary scientific literature that highlights current research on a variety of topics including: sexual development, gender identity, sexual orientation, cross cultural variations in mating systems, promiscuity, the evolution of monogamy, sexual attraction, sexual communication, including an exploration of the existence of human pheromones, libido and sexual dysfunction.

Additional Course Attributes:

FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1313

Stress (127757)

Judith Flynn

2017 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

A writing and speaking intensive seminar that will explore the basics of the stress response, physiological effects of the stress and factors that affect individuals' stress responses. Popular science writing as well as primary academic scientific research studies will be read and discussed and activities designed to illicit and calm stress responses will be explored. Each student will write a literature review and present a primary scientific finding that highlights current research on stress. Development of and feedback on communication skills will be a primary focus of the course

Additional Course Attributes:

FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1323

The Science and History of Alcohol (205495)

*Noreen Tuross**Linda M. Reynard*

2017 Fall (4 Credits)

Schedule:

MW 1100 AM - 1229 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

The course is an introduction to the chemistry, biochemistry and physiological impacts of alcohol use. We will explore the use of alcohol by other animals, including nonhuman primates and rodents. A historical perspective on human alcohol use will be woven into the scientific aspects.

Recommended Prep: LS1b or permission of instructor required for enrollment.**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1328

Evolutionary Medicine: Comparative Perspectives on Medical, Surgical and Psychiatric Illness (205490)

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Heart attacks, breast cancer, anxiety and eating disorders occur across the animal kingdom. Taught by a physician, the course explores the species-spanning and evolutionary origins of medical, surgical, and psychiatric illnesses. A 'mini-medical school' format will be used to introduce students to ten forms of human pathology emphasizing the typical mechanistic explanations of disease causation offered by physicians followed by in depth evolutionary analyses. Both physical and mental illnesses will be explored across the animal kingdom with a special focus on how emerging awareness of psychopathology in animals can alter the perception (stigma) and treatment of mental illness in human beings.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Human Evolutionary Biology 1330

Primate Social Behavior (113837)

*Richard Wrangham**Vivek Venkataraman*

2018 Spring (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

A review of the behavioral interactions in natural primate populations, drawing on experimental, observational, and theoretical studies. Discussion of ecological, physiological, and developmental bases of primate social behavior, with special attention to the evolution of patterns of behavioral interactions among individuals of different age, sex, relatedness, and status. Topics include sexual conflict, sexual selection, and mating systems; care of offspring and other aid-giving; manipulative and cooperative aspects of communication; competition, dominance, and territoriality; and the evolution of social relationships.

Course Notes: This course fulfills the behavior concentration requirement for Human Evolutionary Biology.

Class Notes: This course will include a mandatory field trip to the Franklin Park Zoo at a date to be determined.

Recommended Prep: HEB 1280 or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1361

Hormones and Life History Physiology (203615)

Peter Ellison

Susan Lipson

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0229 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

A survey of human life history physiology and the role of hormones in the orchestration of key transitions, the allocation of energy to optimize fitness, and the consequences for human health and disease. Although the focus will be on humans, relevant comparisons with non-human primates and other vertebrates will also be made.

Lectures will be supplemented by reading and discussion of primary literature.

Course Notes:

Prerequisite for enrollment: Human Evolutionary Biology 1310, "Hormones and Behavior," or Human Evolutionary Biology 1418, "Research Methods in Endocrinology," or with permission of instructor.

Credit for this course will not be given to students who completed Human Evolutionary Biology 1351, "Reproductive Ecology".

Class Notes:

Enrollment in Human Evolutionary Biology 1361 includes a required discussion section meeting on Wednesdays from 1-2:29 p.m.

Requirements:

Anti-req: Cannot be taken for credit if HEB 1351 already complete

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1362

Hunter-Gatherers (204530)

Vivek Venkataraman

2018 Spring (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Modern industrialized life is highly unusual from an evolutionary perspective. For the vast majority of our species' history, we lived in small, mobile, social groups and subsisted on non-domesticated foods. This hunting and gathering way of life has profoundly influenced our evolved physiology, life history, psychology, and social behavior. In this seminar, we examine recent human evolution and adaptation through the lens of the food quest: the goal of acquiring adequate energy to stay alive and reproduce. After establishing fundamental ecological and evolutionary principles, we then survey hunter-gatherer populations around the globe. We focus on cross-cultural variation in foraging and subsistence, technology, life history, co-residence patterns, and social behavior. The course highlights the strengths and weaknesses of using modern hunter-gatherers as models for the past.

Course Notes:

Enrollment preference given to HEB concentrators. This course fulfills the research seminar requirement for HEB concentrators.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Human Evolutionary Biology 1385

Evolution of Human Cooperation (127722)

Giuseppe Ugazio

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0329 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Cooperation in human societies is highly unusual. All known human societies, from hunter-gatherer groups to modern nations, use social norms to peacefully regulate group interactions. In this seminar, we examine two evolutionary explanations of human cooperation: cultural group selection and partner selection. We analyze a range of economic games involving property rights, collective actions, mutual help, and punishment that explain how and why fairness evolved in human societies. This course highlights the mental and social mechanisms that produce human cooperation and the fitness consequences that explain why human are a highly cooperative animal.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1389

Coming of Age on Planet Earth (205493)

Barbara Natterson-Horowitz

2018 Spring (4 Credits)

Schedule:

T 0400 PM - 0629 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

The challenges of adult maturation are not unique to our species. Some young adult animals take risks and lose their lives, others respond to stress with eating problems or to traumatic first sexual encounters with subsequent dysfunction. The course will use a comparative approach to explore how young adult animals learn to be safe, how they acquire or lose status and rank, how they come of age sexually, and how they learn to survive and thrive on their own. The course will combine analysis of literature from scientific fields (behavioral ecology, endocrinology and evolutionary biology) and the humanities (coming of age short stories and novels) for a comparative analysis of the common challenges of maturation across the animal kingdom and in human life.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Human Evolutionary Biology 1410

Gut Microbiome and Human Health (204010)

Rachel Carmody

2017 Fall (4 Credits)

Schedule:

R 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

8

Microorganisms residing in the human gastrointestinal tract outnumber our own cells and together encode at least 100 times as many unique genes. In this research seminar, we explore gut microbial contributions to human physiology in states of health and disease. We consider the pivotal roles of the gut microbiota in digestion, detoxification, energy regulation, and immunity, and discuss emerging evidence for the microbial modulation of risks and/or treatment of metabolic syndrome, cardiovascular disease, cancer, and behavioral disorders. Students will be introduced to bench and bioinformatics techniques used to investigate gut microbial communities, allowing students to pilot projects that dovetail with topics discussed in seminar.

Course Notes: This course fulfills the research seminar requirement for Human Evolutionary Biology.

Preference will be given to Human Evolutionary Biology concentrators fulfilling a research seminar requirement and Human Evolutionary Biology graduate students.

Recommended Prep: Life Sciences 2 or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1412

Human Energetics (205492)

2018 Spring (4 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap:

10

In this course we will study human energy intake and expenditure, with a focus on sports. The course will also feature case studies of extreme endurance feats and modern-day and historical explorers/adventurers. Course activities will include lab or field-based measurements and seminar-style discussions

Course Notes: This seminar will count towards the HEB junior research seminar requirement.

Recommended Prep: An introductory level LS or Chemistry course are recommended for students interested in this course.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Human Evolutionary Biology 1417

Diet and Exercise (205638)

Rachel Carmody

Daniel Lieberman

Aaron Baggish

2018 Spring (4 Credits)

Schedule:

W 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

How do diet and exercise —both past and present— affect human health? How does an evolutionary medical perspective help make sense of the confusing, often contradictory literature on how factors like sugar, salt, fat, obesity, physical inactivity, high intensity exercise and shoes affect the human body? In this seminar, weekly readings and discussion will be used to explore how ancestral diets and forms of physical activity have shaped human anatomy and physiology, and how differences between past and present diets and forms of exercise may contribute to illness, mortality, and variations in reproductive success. In doing so, we challenge popular conceptions of what it means to be "healthy."

Course Notes:

Preference will be given to advanced Harvard undergraduates and FAS graduate students. Enrollment for this course will be capped at 15 students.

Recommended Prep:

This course assumes basic knowledge of human evolutionary physiology. LS2 (or equivalent training) is a pre-requisite.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1418

Research Methods in Endocrinology (110741)

Susan Lipson

2017 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

8

An introduction to research in behavioral endocrinology (the study of how hormones and behavior are related), focusing on: 1) laboratory techniques (immunoassay) for the measurement of hormone levels (cortisol, and C-peptide) in saliva and urine and 2) study design strategies and data analysis methods.

Students complete original research projects, collecting samples, analyzing data on hormone levels and how they are related to various aspects of behavior and/or physiology, and presenting their results orally to the class, and in written reports.

Course Notes:

This course includes a mandatory two-hour laboratory section per week (days/times to be arranged).

Lab safety training required (after enrollment).

This course fulfills the research seminar requirement for Human

Evolutionary Biology.

Preference is given to junior HEB concentrators.

Recommended Prep: Human Evolutionary Biology 1310 or Life Sciences 2 or with permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1420

Human Evolutionary Anatomy (116069)

Neil Roach

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How does the human body function? How do our organs develop and grow? Why did we evolve this strange bipedal form? This course explores human anatomy, with an emphasis on the function, structure and evolution of the muscular, skeletal, nervous, circulatory, digestive and reproductive systems. Lectures are combined with small laboratory learning experiences and visits to the Harvard Medical School to study human cadavers.

Course Notes: This course fulfills the anatomy/physiology concentration requirement for Human Evolutionary Biology

Recommended Prep: Life Sciences 2 recommended, but not required

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Human Evolutionary Biology 1426

Becoming Human: New Techniques to Investigate an Ancient Story (205499)

Kate Carter

2017 Fall (4 Credits)

Schedule:

TR 0300 PM - 0429 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this class we will take an in-depth look at the human evolutionary story. In addition to the typical "stones and bones" approach to our origin, you'll use game theory, evolutionary modeling, and participant observation to analyze how evolution made humans the way they are. Particular emphasis will be placed on understanding major ongoing debates in human origins and why these debates exist. Students will complete in-class lab and discussion activities to enhance their understanding, but there is no additional course component.

Course Notes: This course fulfills the evolution course requirement for HEB concentrators.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Human Evolutionary Biology 1451

Primate Functional Genetics and Genomics (109815)

2018 Spring (4 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap: 12

Recent advances in genetics, genomics, and developmental biology are improving our understanding of human and non-human primate biological traits. These disciplines, when incorporated into a multi-faceted context, can reveal the mechanistic basis of evolutionary adaptations. This seminar is designed to investigate and critically evaluate foundational and novel research in primates (and other organisms) that employs the tools of these trades. In doing so, students are exposed to an integrative perspective upon which to explore classic and modern questions in functional biology.

Course Notes: This course fulfills the research seminar concentration requirement for Human Evolutionary Biology

Recommended Prep: Life Sciences 1b or equivalent genetics/genomics course.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1480

Building the Human Body (156174)

Terence Capellini

Neil Roach

2017 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

Humans and our primate relatives display marked variation in biological traits. This variation results from natural selection operating on pre- and post-natal developmental mechanisms. While these mechanisms remain mostly unknown, recent advances in genetics, genomics, and developmental biology now allow us to begin to understand how evolutionary processes influence and are influenced by underlying developmental and genetic organization. This course explores these inter-relationships in the context of the primate paleontological record. We focus on the evolution of the post-cranial skeleton (i.e., the axial skeleton, girdles, and limbs) and craniofacial skeletons, and present studies that cast light on the mechanisms that underlie major transitions in human evolution.

Course Notes: This course fulfills the research seminar requirement for Human Evolutionary Biology and includes a mandatory laboratory section.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1600

Evolutionary Genetics of Complex Human Traits (161269)

Maryellen Ruvolo

2017 Fall (4 Credits)

Schedule:

W 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

An advanced seminar on complex human traits with a special focus on neurodevelopmental and other behavioral disorders. Topics will include schizophrenia, autism spectrum disorder, and Williams syndrome; links between genotype and phenotype; whether natural selection acts on underlying genetic loci; the role of gene-by-environment interactions; what we can learn about humans from model organisms; complicating factors in the analysis of complex traits; societal reactions to neural diversity; and prospects for the reconstruction of past human behavior from genomic evidence.

Course Notes: Auditing is not available for this course.

Recommended Prep: REQUIRED prerequisites: An A or B grade in Life Sciences 1b or a passing score on a pre-course quiz to assess mastery of genetics to be administered by the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

Human Evolutionary Biology 1610

Genes and Human Adaptations (203909)

Maryellen Ruvolo

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

Natural selection produces genetic changes that make a population better able to reproduce and survive in an ever-changing environment, a process known as adaptation. This course examines adaptations common to all humans (since divergence from our closest primate relatives) and those that have occurred in particular populations as humans dispersed around the globe and responded to the challenges of novel environments, diets, and diseases. We will focus on the genetic evidence for adaptations as detected from the signals left by natural selection on the genome. Evidence for potentially adaptive alleles having been introduced into some human genomes from hominin relatives, the Neandertals and Denisovans, will be considered. To place human adaptations in broader evolutionary perspective, we will investigate adaptations in diverse non-human species where the genetic and genomic bases of adaptation are often

known more completely.

Class Notes: Pre-requisites LS1b with an A or B, or can take a quiz to demonstrate knowledge of complex trait genetics.

Permission of the instructor required. Class size limited to 8.

Recommended Prep: REQUIRED prerequisites: An A or B grade in Life Sciences 1b

Requirements: Prerequisite: Life Sciences 1b with an A or B grade

Additional Course Attributes:

Attribute	Value(s)

Human Evolutionary Biology 1700

Human Evolutionary Biology in Society (207101)

Bridget Alex

2018 Spring (4 Credits)

Schedule:

T 0700 PM - 0859 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What are the key concepts of Human Evolutionary Biology? Why and how should these concepts be shared with society and other fields like medicine, global health, law, and education? This course will explore challenges, methods, and impacts of outreach in Human Evolutionary Biology. In the first unit we will identify fundamental concepts of HEB and discuss barriers to public understanding and acceptance of science. Then we will survey outreach methods by reading studies, critiquing examples, and meeting professionals who work in science communication and education. We will discuss how scientists engage with different communities, from K-12 students to government agencies, and through different outlets, such as public lectures, museums, pop-science writing and film, and online platforms. In the final unit we will analyze case studies in which HEB concepts are presented in public discourse, policy, and other fields. Throughout the semester, students will design, conduct, and evaluate an outreach project in collaboration with community partners. Possible projects include teaching a lesson to K-12 students, designing an activity at a museum, or evaluating audience responses to a live science show. Students will produce final reports, which summarize their project, its predicted and observed outcomes, and recommendations for future iterations.

For HEB Concentrators, HEB 1700 counts as Junior Research Seminar or upper-level HEB elective.

All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3000 Section: 009

Reading and Research (126279)

Noreen Tuross

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3000 Section: 010

Reading and Research (126279)

Richard Wrangham

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3000 Section: 010

Reading and Research (126279)

Richard Wrangham

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Human Evolutionary Biology 3001

Reading for General Examination (126280)

Terence Capellini

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those

who have completed at least one year in residence.

Class Notes: Members of the Department

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3001

Reading for General Examination (126280)

Terence Capellini

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Class Notes: Members of the Department

Requirements: Course open to Graduate Students Only

Human Evolutionary Biology 3200

Graduate Seminar in Human Evolutionary Biology (126919)

David Pilbeam

Bridget Alex

2017 Fall (4 Credits)

Schedule: T 0100 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Proseminar for Human Evolutionary Biology graduate students. Discussion of adaptations and the process of adaptation using examples from various areas of human evolutionary biology.

Course Notes: Required for first year graduate students in Human Evolutionary Biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 3310

Experimental Methods in Human Evolutionary Biology (117873)

Terence Capellini

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3310

Experimental Methods in Human Evolutionary Biology (117873)

Terence Capellini

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3310 Section: 002

Experimental Methods in Human Evolutionary Biology (117873)

Rachel Carmody

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3337

Advanced Laboratory Methods in Human Endocrinology (116541)

Susan Lipson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Intended for Human Evolutionary Biology graduate students engaged in laboratory research on human endocrinology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3337

Advanced Laboratory Methods in Human Endocrinology (116541)

Susan Lipson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Intended for Human Evolutionary Biology graduate students engaged in laboratory research on human endocrinology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3350

Laboratory Methods in Primate and Human Nutrition (126406)

Rachel Carmody

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3350

Laboratory Methods in Primate and Human Nutrition (126406)

Rachel Carmody

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Humanities

Subject: Humanities

Humanities 10A

A Humanities Colloquium: From Homer to Garcia Marquez (110440)

Louis Menand

Stephen Greenblatt

Jill Lepore

Davíd L. Carrasco

Jay Harris

Alison Simmons

2017 Fall (4 Credits)

Schedule:

T 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

90

2,500 years of essential works, taught by six professors. Humanities 10a includes works by Homer, Plato, Aristotle, Sophocles, Dante, Shakespeare, Descartes, Austen, Douglass, and Garcia Marquez, as well as the Hebrew Bible, the New Testament, and the Declaration of Independence. One 90-minute lecture plus a 90-minute discussion seminar led by the professors every week. Students also receive instruction in critical writing one hour a week, in writing labs and individual conferences. Students also have opportunities to visit cultural venues and attend musical and theatrical events in Cambridge or Boston.

Course Notes:

The course is open only to freshmen. Students who complete Humanities 10a meet the General Education requirement in Aesthetic and Interpretive Understanding. Students who take both Humanities 10a and Humanities 10b fulfill the General Education requirements for Aesthetic and Interpretive Understanding and Culture and Belief as well as the College Writing requirement. This is the only course outside of Expository Writing that satisfies the College Writing requirement. No auditors. The course may not be taken Pass/Fail.

Class Notes:

The course has a two-step lottery and application process. This includes a mandatory first meeting for all interested students on Thursday, August 31, from 10:00-11:29am, location TBA. See the course website for full details: <https://canvas.harvard.edu/courses/26951>

Additional Course Attributes:

Attribute	Value(s)

Humanities 10B

A Humanities Colloquium: From Joyce to Homer (110441)

Stephen Greenblatt
Louis Menand
Melissa M. McCormick
Jay Harris
Racha Kirakosian
David Armitage

2018 Spring (4 Credits)

Schedule:

T 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

2,500 years of essential works, taught by six professors. Humanities 10b is open only to students who completed Humanities 10a in Fall 2017. Humanities 10b includes works by Joyce, Nietzsche, Shelley, Rousseau, More, Machiavelli, Murasaki, Bai Juyi, Augustine, Plato, Sophocles, and Homer. One 90-minute lecture plus a 90-minute discussion seminar led by the professors every week. Students continue to receive instruction in critical writing one hour a week, in writing labs and individual conferences. Students also have opportunities to visit cultural venues and attend musical and theatrical events in Cambridge or Boston.

Course Notes:

The course is open only to freshmen who have completed Humanities 10a. Students who take both semesters of Humanities 10 fulfill the College Writing Requirement. This is the only course outside of Expository Writing that satisfies that requirement. Students who take Humanities 10b also meet the General Education divisional requirement in Arts and Humanities. No auditors. The course may not be taken Pass/Fail.

Class Notes:

Only students who have satisfactorily completed the Fall 2017 term of Hum 10a are eligible to enroll in Hum 10b.

Humanities 11A

The Art of Looking (109854)

Jennifer L. Roberts

2017 Fall (4 Credits)

Schedule:

T 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap:

90

Visual information today is superabundant thanks to our smartphones, tablets, and other screen-based gadgets. But few of us recognize how thoroughly our habits and experiences of looking have been conditioned by interfaces with long and complex histories. Participants in this course, developed as part of the Humanities Project at Harvard, will approach looking through a consideration of key technologies from its history, such as the telescope, the cinema, and the easel painting. Students will learn about the hidden intricacies of looking and hone skills of visual, material, and spatial analysis through encounters with aesthetic objects from Harvard's collections.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past. Students are expected to attend a weekly two-hour section.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Linguistics

Subject: Linguistics

Linguistics 73A

Beginning American Sign Language I (203507)

Kathryn Davidson

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course is an introduction to the language and linguistic structure of American Sign Language and to Deaf culture for students with no prior experience. Focus will be on gaining a foundation for later fluency and understanding the role of ASL in Deaf history, current culture, education, bilingualism, and research.

Course Notes: This course is limited to 15 students.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

Linguistics 73B

Beginning American Sign Language II (203513)

Kathryn Davidson

2018 Spring (4 Credits)

Schedule:

TR 1100 AM - 1229 PM

Instructor Permissions: Instructor

Enrollment Cap:

17

This course is the second part of the beginning sequence of American Sign Language, an introduction to the language and linguistic structure of American Sign Language and to Deaf culture for students with no prior experience. Focus will be on gaining a foundation for later fluency and understanding the role of ASL in Deaf history, current culture, education, bilingualism, and research.

Course Notes: This course is limited to 15 students.

Recommended Prep: Linguistics 73A, Beginning American Sign Language I

Additional Course Attributes:

FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 73C

Beginning ASL III (205111)

Kathryn Davidson

2017 Fall (4 Credits)

Schedule:

TR 0400 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

ASL III is designed for students who have completed ASL levels I and II. Students come to ASL III with an understanding of the fundamentals of ASL comprehension and production. These foundational courses (ASL I and II) introduce students to the language using a natural acquisition approach without explicit focus on grammatical rules. ASL III has an increased focus on the appropriate ways to converse with members the Deaf community. In this class, students will learn how to tell stories that adhere to the pragmatic and linguistic standards of the Deaf community with a focus on stylistically appropriate production. In this class, students will learn how to engage with members of the Deaf community in respectful and culturally appropriate ways. In addition to fostering language development, we will discuss the history and culture of the Deaf community.

Course Notes: This course is limited to 15 students.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 73D

Beginning ASL IV (205124)

Kathryn Davidson

2018 Spring (4 Credits)

Schedule:

TR 0900 AM - 1029 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

ASL IV course will build on the foundation set in the first three levels of ASL and will focus on expressive language at a more advanced level. Students will have an opportunity to play with the language and explore different literary genres including: classifier stories, narratives of personal experience, visual vernacular and ASL poetry. Given that language learning doesn't happen in isolation, we will continue our exploration of Deaf culture and norms in order to develop a deeper understanding of the Deaf community. Growing out of this discussion, students will learn what it means to work as an ally to the Deaf community and avoid oppressive behavior. Other issues to be discussed include recognizing audism in oneself and others and how to appropriately respond.

Course Notes: This course is limited to 15 students.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 83

Language, Structure, and Cognition (122514)

Kathryn Davidson

2017 Fall (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What do the world's almost 7,000 languages have in common? Why do they show recurrent commonalities and principled differences? What do they reveal about the human ability for speaking and thinking? How do languages develop? How do they die? This course addresses these and related questions while introducing the languages of the world; their distribution, recurrent structural properties, and genetic classification; processes of language contact; and the relationship between language and the brain.

Linguistics 101

The Science of Language: An Introduction (110785)

Diti Bhadra

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course introduces components of study of language: phonology, morphology, syntax, and semantics. It presents the view that knowledge of language is best characterized as an unconsciously internalized set of abstract rules and principles. Evidence is drawn from a variety of signed and spoken languages, language universals, child language acquisition, language change, language games, and language disorders. **SPRING TERM** Instructor will be Diti Bhadra

Additional Course Attributes:

Attribute	Value(s)

Linguistics 102

Sentence Structure (121089)

Saurov Syed

2017 Fall (4 Credits)

Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

What determines how the words in a sentence are put together in a given language? This course introduces the field of syntax, and the study of order and structure among words. Students will learn to construct and evaluate syntactic analyses and argumentation and will be exposed to variation and universals in the syntactic patterns found in natural languages. The course will also provide an introductory survey of syntactic phenomena, including question formation, the passive, anaphora, and agreement.

Course will be taught by Lecturer, Saurov Syed, Fall Term 2017

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities

All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 104

Word Structure (125790)

Stefan Hoefler

2017 Fall (4 Credits)

Schedule:

TR 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course investigates the nature and structure of words through the lens of contemporary morphological theory. What's in a word? Topics include the place of word formation in relation to phonological and syntactic phenomena, morphological processes, and the nature of the lexicon. Emphasis on the analysis of morphological phenomena in a range of typologically diverse languages.

Course will be taught by Stefan Hoefler, in Fall 2017

Additional Course Attributes:

Attribute	Value(s)

Linguistics 105

Sounds of Language (111954)

Kevin Ryan

2018 Spring (4 Credits)

Schedule:

MW 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What are the sounds of the world languages, and how are they organized to make words and sentences? Why are some sounds hard to hear or make? Is there a 'universal inventory' of sounds? This class introduces students to the sounds of the world's languages, and provides tools for studying them systematically. We will study the setup to transfer thoughts from one brain to another.

Linguistics 106

Knowledge of Meaning (117788)

Gennaro Chierchia

2018 Spring (4 Credits)

Schedule: TR 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introductory course on semantic interpretation in natural language. What does it mean to "know the meaning" of an utterance? This course provides the tools to characterize and study the meanings of sentences. Topics covered include the relation between form and meaning, ambiguity, reference, context dependency, and the role of logic vs. pragmatics in communication.

Linguistics 108

Introduction to Historical Linguistics (123850)

Jeremy Rau

2017 Fall (4 Credits)

Schedule: MW 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Methods and goals of linguistic reconstruction. Topics include the regularity of sound change, types of linguistic change, the relationship between linguistic reconstruction and synchronic analysis, language contact and borrowing, and mechanisms of linguistic change, including recent theories.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 112

Syntactic Theory I (114153)

2017 Fall (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course provides an intensive introduction to generative syntactic theory. Emphasis on syntactic argumentation. Topics center on foundational problems in the theory of syntax, including phrase structure

of nominals and clauses, varieties of movement, locality, argument structure, ellipsis case agreement, and the syntax-semantics interface.

Recommended Prep: Linguistics 102, equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 115

Phonological Theory I (123439)

Kevin Ryan

2017 Fall (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is an intensive introduction to phonological theory and experimental work in phonology. This includes rule-based and constraint-based approaches, the typology of phonological processes (vowel and consonant harmony, assimilation and dissimilation, lenition and fortition, etc.), and phonological acquisition. Experimental approaches will deal with gradience, exceptionality, and productivity with an introduction to the quantitative methodologies that these phenomena require.

Recommended Prep: Linguistics 105, equivalent, or permission of the instructor

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 116

Semantic Theory I (122515)

Kathryn Davidson

2017 Fall (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introductory course on semantics in generative grammar. This course provides the formal tools to investigate the truth-conditional meanings of sentences. Topics covered include: compositionality, type theory and the fundamentals of clause structure, quantifier scope, and variable-binding.

Recommended Prep: Linguistics 106, equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 117R

Linguistic Field Methods (123611)

Diti Bhadra

2018 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In our study of human language we rely on data from different, sometimes underdescribed, languages. But how do we obtain reliable data? This course provides tools for the elicitation of phonological, morphological, and syntactic information, working with a native speaker of an unfamiliar language. We focus on the practical methodology and discuss problems of data collection and grammatical description in the field, with the aim to prepare students for their own potential fieldwork. **SPRING TERM** instructor will be Diti Bhadra

Linguistics 118

Historical and Comparative Linguistics (112099)

Stefan Hoefler

2018 Spring (4 Credits)

Schedule:

M 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to diachronic linguistics at the graduate level. Theory of language change: sound change and analogy, syntactic and semantic change, change in progress. The comparative method: proving genetic relationship, reconstruction, and subgrouping.

NOTE: NOT OPEN TO STUDENTS WHO HAVE TAKEN LING 108

Course Notes:

NOTES:

NOT OPEN TO STUDENTS WHO HAVE TAKEN LING 108.

UNDERGRADUATES MUST HAVE INSTRUCTOR CONSENT.

Linguistics 207R

Topics in Semantics (128096)

Kathryn Davidson

2018 Spring (4 Credits)

Schedule:

T 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Current issues in semantics. Topics to possibly include: Scope and anaphoric properties of indefinites, quantificational variability and generic uses, long distance indefinites.

The topic for Spring 2018 will be semantics of sign languages. Prerequisites are either (a) Ling 216 or (b) Ling 73c or their equivalents.

Course Notes:

The topic for Spring 2018 will be semantics of sign languages.

Prerequisites are either (a) Ling 216 or (b) Ling 73c or their equivalents.

Probabilistic Understanding of Language (205142)

Gennaro Chierchia

2017 Fall (4 Credits)

Schedule:

R 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Much work in formal, compositional semantics follows the tradition of positing systematic but inflexible theories of meaning. However, in practice, the meaning we derive from language is heavily dependent on nearly all aspects of context, both linguistic and situational. To formally explain these nuanced aspects of meaning and better understand the compositional mechanism that delivers them, recent work in formal pragmatics recognizes semantics not as one of the final steps in meaning calculation, but rather as one of the first. The probabilistic pragmatics approach leverages the tools of structured probabilistic models formalized in a stochastic calculus to develop and refine a general theory of communication. By subjecting the heretofore off-limits land of pragmatics to articulated formal models, the rapidly growing body of research both informs pragmatic phenomena and enriches theories of semantics. The present course serves as a practical introduction to this modeling framework. Little is presupposed beyond a willingness to explore recent progress in formal, implementable models of language understanding.

Mathematics

Subject: Mathematics

Mathematics ESPA

Emerging Scholars: Problem Solving Exploration (204095)

Dusty Grundmeier

2017 Fall (2 Credits)

Schedule:

TR 0900 AM - 0959 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In his seminal work from 1945, *How to Solve It*, George Polya introduced principles of mathematical problem solving that are widely applicable to problems in science and engineering. This year-long class focuses on building a powerful and portable problem-solving and modeling tool kit while bridging the divide between mathematics and science courses. The second semester will be organized around projects in areas of student interest. Both Math ESPA and Math ESPB must be taken in the same academic year to receive credit.

Mathematics MA Section: 01

Introduction to Functions and Calculus I (111161)

Brendan Kelly

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

The study of functions and their rates of change. Fundamental ideas of calculus are introduced early and used to provide a framework for the study of mathematical modeling involving algebraic, exponential, and logarithmic functions. Thorough understanding of differential calculus promoted by year long reinforcement. Applications to biology and economics emphasized according to the interests of our students.

Course Notes:

This is a lecture course taught in small sections. In addition, participation in two one-hour workshops is required each week. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course, when taken together with Mathematics Mb, can be followed by Mathematics 1b. Mathematics Ma and Mb together cover all the material in Mathematics 1a (and more).

Class Notes:

Fall Section Times: M.W.F at 10; M.W.F. at 11; M.W.F. at 12; and a twice weekly lab section to be arranged.

Brendan Kelly, Emily Braley, Janet Chen, Katherine Penner, Rosalie Belanger-Rioux, Karen Edwards, Caroline Junkins, and members of the Department.

FAS: Final Assessment Category	Three-hour Exam

Mathematics MB

Introduction to Functions and Calculus II (113464)

Brendan Kelly

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Continued investigation of functions and differential calculus through modeling; an introduction to integration with applications; an introduction to differential equations. Solid preparation for Mathematics 1b.

Course Notes:

This is a lecture course taught in small sections. In addition,

participation in two one-hour workshops is required each week. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course, when taken together with Mathematics Ma, can be followed by Mathematics 1b. Mathematics Ma and Mathematics Mb together cover all the material in Mathematics 1a (and more).

Class Notes:

Required first meeting in Spring: Monday, January 22, 8:30 am, Science Center E

Spring Section Times: M., W., F., at 10; M. W., F., at 11; M., W., F., at 12 (with sufficient enrollment); and a twice weekly lab session to be arranged.

Brendan Kelly, Sarah Chisholm, Karen Edwards, Stepan Paul, Caroline Junkins, Matthew Demers, and members of the Department.

Requirements:

Prerequisite: Mathematics MA

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Final Assessment Category	Three-hour Exam
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Quantitative Reasoning
FAS: Course Level	Primarily for Undergraduate Students

Mathematics 1A

Introduction to Calculus (123680)

Emily Braley

2018 Spring (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The development of calculus by Newton and Leibniz ranks among the greatest achievements of the past millennium. This course will help you see why by introducing: how differential calculus treats rates of change; how integral calculus treats accumulation; and how the fundamental theorem of calculus links the two. These ideas will be applied to problems from many other disciplines.

Course Notes:

In the fall, Math 1a is taught in sections of 20-30 students. In the spring, Math 1a is taught in a larger lecture format. Participation in a weekly 90-minute workshop is required. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. Mathematics Ma and Mb together cover all of the material in Mathematics 1a (and more).

Class Notes:

Spring section time: M.W.F. at 10 and weekly lab section to be arranged.

Emily Braley

Recommended Prep:

A solid background in precalculus.

Additional Course Attributes:

Attribute	Value(s)
FAS: Core Curriculum	Quantitative Reasoning
FAS: General Education	Empirical and Mathematical Reasoning
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Mathematics 1A

Introduction to Calculus (123680)

Neha Gupta

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

The development of calculus by Newton and Leibniz ranks among the greatest achievements of the past millennium. This course will help you see why by introducing: how differential calculus treats rates of change; how integral calculus treats accumulation; and how the fundamental theorem of calculus links the two. These ideas will be applied to problems from many other disciplines.

Course Notes:

In the fall, Math 1a is taught in sections of 20-30 students. In the spring, Math 1a is taught in a larger lecture format. Participation in a weekly 90-minute workshop is required. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. Mathematics Ma and Mb together cover all of the material in Mathematics 1a (and more).

Class Notes:

Required first meeting in fall: Wednesday, August 30, 8:00 am, Science Center D.

Fall section times: M.W.F.at 9 (with sufficient enrollment); M.W.F.at 10, M.W.F. at 11; M.W.F.at 12 (with sufficient enrollment); Tu.Th. 10-11:30; Tu Th 11:30-1, and a weekly lab section to be arranged.

Neha Gupta, Emily Braley, Hakim Walker, Matthew Demers, and members of the Department.

Recommended Prep:

A solid background in precalculus.

Mathematics 1B

Calculus, Series, and Differential Equations (111010)

Robin Gottlieb

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Speaking the language of modern mathematics requires fluency with the topics of this course: infinite series, integration, and differential equations. Model practical situations using integrals and differential equations. Learn how to represent interesting functions using series and find qualitative, numerical, and analytic ways of studying differential equations. Develop both conceptual understanding and the ability to apply it.

Course Notes: This is a lecture taught in small sections. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: Required first meeting in Spring: Monday, January 22, 8:30 am, Science Center D
Spring section times: M.W.F. at 10; M.W.F. at 11; M.W.F. at 12; Tu.Th. 10-11:30 (with sufficient enrollment); Tu Th 11:30-1 (with sufficient enrollment).
Robin Gottlieb, Neha Gupta, Jameel Al-Aidroos, Hakim Walker, Emily Braley, Hiro Tanaka, and members of the Department.

Recommended Prep: Mathematics 1a or Ma and Mb; or 5 on the AB advanced placement test; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS: Core Curriculum	Quantitative Reasoning

Mathematics 18

Multivariable Calculus for Social Sciences (125396)

Yu-Wen Hsu

2017 Fall (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Focus on concepts and techniques of multivariable calculus most useful to those studying the social sciences, particularly economics: functions of several variables; partial derivatives; directional derivatives and the gradient; constrained and unconstrained optimization, including the method of Lagrange multipliers. Covers linear and polynomial approximation and integrals for single variable and multivariable functions; modeling with derivatives. Covers topics from Math 21a most useful to social sciences.

Course Notes: Mathematics 21b can be taken before or after Mathematics 18. Examples draw primarily from economics and the social sciences, though Mathematics 18 may be useful to students in certain natural sciences. Students whose main interests lie in the physical sciences, mathematics, or engineering should consider Math or Applied Math 21a. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: Mathematics 1b or equivalent, or a 5 on the BC Advanced Placement Examination in Mathematics.

Requirements: **Anti-Requisite:** Not to be taken in addition to Mathematics 21a or Applied Mathematics 21a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Core Curriculum	Quantitative Reasoning
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS: Course Level	Primarily for Undergraduate Students

Mathematics 19A

Modeling and Differential Equations for the Life Sciences (110596)

John Cain

2017 Fall (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Considers the construction and analysis of mathematical models that arise in the life sciences, ecology and environmental life science. Introduces mathematics that include multivariable calculus, differential equations in one or more variables, vectors, matrices, and linear and non-linear dynamical systems. Taught via examples from current literature (both good and bad).

Course Notes:

This course is recommended over Math 21a for those planning to concentrate in the life sciences and ESPP. Can be taken with or without Mathematics 21a,b. Students with interests in the social sciences and economics might consider Mathematics 18. This course can be taken before or after Mathematics 18. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep:

A course in one variable calculus preferably at the level of Mathematics 1b.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Quantitative Reasoning
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 19B

Linear Algebra, Probability, and Statistics for the Life Sciences (122219)

Rosalie Belanger-Rioux

2018 Spring (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Probability, statistics and linear algebra with applications to life sciences, chemistry, and environmental life sciences. Linear algebra includes matrices, eigenvalues, eigenvectors, determinants, and applications to probability, statistics, dynamical systems. Basic probability and statistics are introduced, as are standard models, techniques, and their uses including the central limit theorem, Markov chains, curve fitting, regression, and pattern analysis.

Course Notes:

This course is recommended over Math 21b for those planning to concentrate in the life sciences and ESPP. Can be taken with Mathematics 21a. Students who have seen some multivariable calculus can take Math 19b before Math 19a. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: A course in one variable calculus preferably at the level of Mathematics 1b.

Requirements: Not to be taken in addition to Mathematics 21b or Applied Mathematics 21b.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Quantitative Reasoning
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 21A

Multivariable Calculus (119196)

John Cain

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

To see how calculus applies in practical situations described by more than one variable, we study: Vectors, lines, planes, parameterization of curves and surfaces, partial derivatives, directional derivatives and the gradient, optimization and critical point analysis, including constrained optimization and the Method of Lagrange Multipliers, integration over curves, surfaces and solid regions using Cartesian, polar, cylindrical, and spherical coordinates, divergence and curl of vector fields, and the Green's, Stokes's, and Divergence Theorems.

Course Notes: This is a lecture taught in small sections. May not be taken for credit by students who have passed Applied Mathematics 21a. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. Activities using computers to calculate and visualize applications of these ideas will not require programming experience.

Class Notes: Required first meeting in Spring: Monday, January 22, 8:30 am, Science Center C
Spring section times: M.W.F. at 9 (with sufficient enrollment); M.W.F. at 10; M.W.F. at 11; M.W.F. at 12 (with sufficient enrollment). Tu.Th 10-11:30; Tu.Th. 11:30-1 (with sufficient enrollment).
John Cain, Kate Penner, Brendan Kelly, Yu-Wen Hsu, Rosalie Belanger-Rioux, Neha Gupta, and members of the Department.

Recommended Prep: Mathematics 1b or an equivalent background in mathematics.

Requirements: Anti-requisite: Not to be taken in addition to AM21a.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS: Course Level	Primarily for Undergraduate Students

Mathematics 21B

Linear Algebra and Differential Equations (110989)

Oliver Knill

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Matrices provide the algebraic structure for solving myriad problems across the sciences. We study matrices and related topics such as linear transformations and linear spaces, determinants, eigenvalues, and eigenvectors. Applications include dynamical systems, ordinary and partial differential equations, and an introduction to Fourier series.

Course Notes: This is a lecture taught in small sections. May not be taken by students who have passed Applied Mathematics 21b. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: Required first meeting in Spring: Monday, January 22, 8:30 am, Science Center B

Spring section times: M.W.F. at 9 (with sufficient enrollment), M.W.F. at 10, M.W.F. at 11, M.W.F. at 12, Tu.Th. 10-11:30, Tu.Th. 11:30-1.

Oliver Knill, Yu-Wen Hsu, Hakim Walker, Stepan Paul, Caroline Junkins, Matthew Demers, Ben Knudsen, Philip Engle, Ana Balibanu, Sander Kupers, and members of the Department.

Recommended Prep: Mathematics 1b or an equivalent background in mathematics. Mathematics 21a is commonly taken before Mathematics 21b, but is not a prerequisite, although familiarity with partial derivatives is useful.

Requirements: Anti-requisite: Not to be taken in addition to Math 19b or AM 21b.

Mathematics 23A

Linear Algebra and Real Analysis I (111695)

Paul Bamberg

2017 Fall (4 Credits)

Schedule: R 0300 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 45

Linear algebra: vectors, linear transformations and matrices, scalar and vector products, basis and dimension, eigenvectors and eigenvalues, including an introduction to the R scripting language. **Single-variable real analysis:** sequences and series, limits and continuity, derivatives, inverse functions, power series and Taylor series. **Multivariable real analysis and calculus:** topology of Euclidean space, limits, continuity, and differentiation in n dimensions, inverse and implicit functions, manifolds, Lagrange multipliers, path integrals, div, grad, and curl. Emphasis on topics that are applicable to fields such as physics, economics, and computer science, but students are also expected to learn how to prove key results.

Course Notes: Students are expected to watch videos of the lectures from Fall 2015 before attending class. Weekly two-hour classes will consist of a one-hour seminar in which students present key definitions and proofs and a one-hour activity-based session in which students work in small

groups to solve problems. Students are expected to continue in either Mathematics 23b (recommended for students who are thinking of concentrating in mathematics, the physical sciences, or engineering) or Mathematics 23c (recommended for students who are not sure of their concentration, or who are thinking about a concentration in the social sciences, economics, computer science, life sciences or data science). Either alternative will provide a solid foundation for a concentration in mathematics or any field that uses mathematics. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: Mathematics 1b or a grade of 4 or 5 on the Calculus BC Advanced Placement Examination, plus an interest both in proving mathematical results and in using them. No background in linear algebra, real analysis, or multivariable calculus is assumed.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Core Curriculum	Quantitative Reasoning
FAS: Final Assessment Category	Three-hour Exam

Mathematics 23B

Linear Algebra and Real Analysis II (145010)

Paul Bamberg

2018 Spring (4 Credits)

Schedule:

F 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A rigorous, integrated treatment of linear algebra and multivariable calculus. Topics: Riemann and Lebesgue integration, determinants, change of variables, volume of manifolds, differential forms, and exterior derivative. Stokes's theorem is presented both in the language of vector analysis (div, grad, and curl) and in the language of differential forms.

Course Notes:

Mathematics 23b is a sequel to Mathematics 23a, recommended for students who are thinking of concentrating in mathematics, the physical sciences, or engineering. Students are expected to watch videos of the lectures from spring 2016 before attending class. Weekly two-hour classes will consist of a one-hour seminar in which students present key definitions and proofs and a one-hour activity-based session in which students work in small groups to solve problems. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes:

Section times: Friday 12-2, Friday 1-3

Students should, if possible, attend the first meeting of Mathematics 23c at 2:30 PM on Tuesday, January 23 and watch the first two lecture videos before the first class on Friday, January 26.

Recommended Prep:

Mathematics 23a.

Requirements:

Prerequisite: MATH 23A OR (MATH 21A AND MATH 21B) AND (Not to be taken in addition to MATH 23C)

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam

Mathematics 23C

Mathematics for Computation, Statistics, and Data Science (205386)

Paul Bamberg

2018 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Proof strategies and logic. Sets, countability, sigma fields, and axiomatic foundations of probability. Summation of series and evaluation of multiple integrals, with emphasis on calculation of expectation and variance. Abstract vector spaces and inner product spaces, with applications to analysis of large datasets. Key functions and theorems of mathematical statistics. A brief introduction to classical vector calculus as used in electromagnetic theory. Students will learn to use some of the statistical and graphical display tools in the R script language.

Course Notes:

This course is a sequel to Mathematics 23a, recommended for students who are not sure of their concentration or who are thinking about a concentration in the social sciences, economics, computer science, life sciences or data science. Graduate students wishing to take this course for credit should speak with Dr. Bamberg to arrange enrollment in Mathematics 370 instead.

Recommended Prep:

Mathematics 23a or Mathematics 21a and 21b. The latter option is for seniors who are preparing for graduate programs in statistics, computer science, or data science.

Requirements:

Prerequisite: MATH 23A OR (MATH 21A AND MATH 21B) AND (Not to be taken in addition to MATH 23B)

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 25A

Honors Linear Algebra and Real Analysis I (110808)

Bena Tshishiku

2017 Fall (4 Credits)

Schedule:

MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A rigorous treatment of linear algebra. Topics include: Construction of number systems; fields, vector spaces and linear transformations; eigenvalues and eigenvectors, determinants and inner products. Metric spaces, compactness and connectedness.

Course Notes: For students with a strong interest and background in mathematics. Expect to spend a lot of time doing mathematics. May not be taken for credit after Mathematics 23. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: Only for students with a strong interest and background in mathematics. There will be a heavy workload. May not be taken for credit after Mathematics 23.

Recommended Prep: 5 on the Calculus BC Advanced Placement Examination and some familiarity with writing proofs, or the equivalent as determined by the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Core Curriculum	Quantitative Reasoning

FAS: Final Assessment Category	Three-hour Exam

Mathematics 25B

Honors Linear Algebra and Real Analysis II (110855)

Bena Tshishiku

2018 Spring (4 Credits)

Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

A rigorous treatment of basic analysis. Topics include: convergence, continuity, differentiation, the Riemann integral, uniform convergence, the Stone-Weierstrass theorem, Fourier series, differentiation in several variables. Additional topics, including the classical results of vector calculus in two and three dimensions, as time allows.

Course Notes: Expect to spend a lot time doing mathematics. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes: There will be a heavy workload.

Requirements: Prerequisite: Mathematics 25A OR Mathematics 55A

Additional Course Attributes:

Mathematics 55A

Honors Abstract Algebra (113627)

Noam D. Elkies

2017 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

A rigorous introduction to abstract algebra, including group theory and linear algebra. This course covers the equivalent of Mathematics 25a and Mathematics 122, and prepares students for Mathematics 123 and other advanced courses in number theory and algebra. (A course in analysis such as Mathematics 25b or 55b is recommended for Spring semester.)

Course Notes:

Mathematics 55a is an intensive course for students having significant experience with abstract mathematics. Every effort will be made to accommodate students uncertain of whether the course is appropriate for them; in particular, Mathematics 55a and 25a will be closely coordinated for the first three weeks of instruction. Students can switch between the two courses during the first three weeks without penalty. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep:

Commitment to a demanding course, strong interest in mathematics, and familiarity with proofs and abstract reasoning.

Additional Course Attributes:

Attribute	Value(s)
FAS: Core Curriculum	Quantitative Reasoning
FAS: Course Level	Primarily for Undergraduate Students

Mathematics 55B

Honors Real and Complex Analysis (112871)

Noam D. Elkies

2018 Spring (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

A rigorous introduction to real and complex analysis. This course covers the equivalent of Mathematics 25b and Mathematics 113, and prepares students for Mathematics 114 and other advanced courses in analysis.

Course Notes:

Mathematics 55b is an intensive course for students having significant experience with abstract mathematics. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Requirements:

Prerequisite: Mathematics 55A

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
FAS: Core Curriculum	Quantitative Reasoning
FAS: General Education	Empirical and Mathematical Reasoning
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 60R

Reading Course for Senior Honors Candidates (123883)

Jacob Lurie

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Advanced reading in topics not covered in courses.

Course Notes:

Limited to candidates for honors in Mathematics who obtain the permission of both the faculty member under whom they want to work and the Director of Undergraduate Studies. May not count for concentration in Mathematics without special permission from the Director of Undergraduate Studies. Graded Sat/Unsat only.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 60R

Reading Course for Senior Honors Candidates (123883)

Jacob Lurie

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Advanced reading in topics not covered in courses.

Mathematics 101

Sets, Groups and Topology (122943)

Janet Chen

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to rigorous mathematics, axioms, and proofs, via topics including set theory, symmetry groups, and low-dimensional topology.

Course Notes: Familiarity with algebra, geometry and/or calculus is desirable. Students who have already taken Mathematics 23a,b, 25a,b or 55a,b should not take this course for credit. This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning. This course given fall term and repeated spring term.

Recommended Prep: An interest in mathematical reasoning. Acquaintance with algebra, geometry and/or calculus is desirable. Students who have already taken Math 25a,b or 55a,b should not take this course for credit.

Requirements: Anti-Req: Not to be taken in addition to Mathematics 23a,b or 25a,b or 55a,b.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Core Curriculum	Quantitative Reasoning
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 101

Sets, Groups and Topology (122943)

Brooke Ullery

2017 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Mathematics 110

Vector Space Methods for Differential Equations (126610)

Dusty Grundmeier

2018 Spring (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Develops the theory of inner product spaces, both finite-dimensional and infinite-dimensional, and applies it to a variety of ordinary and partial differential equations. Topics: existence and uniqueness theorems, Sturm-Liouville systems, orthogonal polynomials, Fourier series, Fourier and Laplace transforms, eigenvalue problems, and solutions of Laplace's equation and the wave equation in the various coordinate systems.

Recommended Prep: Mathematics 23a,b or 25a,b or Mathematics 19a,b or 21a,b plus any Mathematics course at the 100 level; or an equivalent background in Mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 112

Introductory Real Analysis (109817)

William Boney

2018 Spring (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to mathematical analysis and the theory behind calculus. An emphasis on learning to understand and construct proofs. Covers limits and continuity in metric spaces, uniform convergence and spaces of functions, the Riemann integral.

Recommended Prep:

Mathematics 19a,b or 21a,b and either an ability to write proofs or concurrent enrollment in Mathematics 101; or an equivalent background in mathematics.

Requirements:

Anti-Req: Not to be taken in addition to Mathematics 23a,b or 25a,b or 55a,b.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam

Mathematics 113

Analysis I: Complex Function Theory (113608)

William Boney

2018 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Analytic functions of one complex variable: power series expansions, contour integrals, Cauchy's theorem, Laurent series and the residue theorem. Some applications to real analysis, including the evaluation of indefinite integrals. An introduction to some special functions.

Recommended Prep:

Mathematics 23a,b or 25a,b or 112, or an equivalent background in mathematics.

Requirements:

Anti-Req: Not to be taken in addition to Mathematics 55b.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 114

Analysis II: Measure, Integration and Banach Spaces (123227)

Hong-Tzer Yau

2017 Fall (4 Credits) **Schedule:** TR 1000 AM - 1129 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Lebesgue measure and integration; general topology; introduction to L^p spaces, Banach and Hilbert spaces, and duality.

Recommended Prep: Mathematics 23a,b or 25a,b or 55a,b or 112; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 115

Methods of Analysis (111065)

Hansol Hong

2017 Fall (4 Credits) **Schedule:** TR 1000 AM - 1129 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Complex functions; Fourier analysis; Hilbert spaces and operators; Laplace's equations; Bessel and Legendre functions; symmetries; Sturm-Liouville theory.

Course Notes: Mathematics 115 is especially for students interested in physics.

Recommended Prep: Mathematics 23a,b or 25a,b or 55a,b or 112; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 116

Real Analysis, Convexity, and Optimization (118302)

Paul Bamberg

2018 Spring (4 Credits) **Schedule:** M 0200 PM - 0359 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Develops the theory of convex sets, normed infinite-dimensional vector spaces, and convex functionals and applies it as a unifying principle to a variety of optimization problems such as resource allocation, production planning, and optimal control. Topics include Hilbert space, dual spaces, the Hahn-Banach theorem, the Riesz representation theorem, calculus of variations, and Fenchel duality. Students will be expected to understand and invent proofs of theorems in real and functional analysis. This course will not be offered in 2018-19.

Recommended Prep: Mathematics 23a,b or 25a,b or 55a,b; or Mathematics 21a,b plus at least one other more advanced course in mathematics; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam

Mathematics 118R

Dynamical Systems (118429)

John Cain

2018 Spring (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to dynamical systems theory with a view toward applications. Topics include existence and uniqueness theorems for flows, qualitative study of equilibria and attractors, iterated maps, and bifurcation theory.

Recommended Prep: Mathematics 19a,b or 21a,b or Math 23a,b or Math 25a,b or Math 55a,b; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 121

Linear Algebra and Applications (120228)

Fabian Haiden

2017 Fall (4 Credits)

Schedule:

MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Real and complex vector spaces, linear transformations, determinants, inner products, dual spaces, and eigenvalue problems. Applications to geometry, systems of linear differential equations, optimization, and Markov processes.

Recommended Prep: Mathematics 19b or 21b or an equivalent background in mathematics.

Requirements: Anti-Req: Not to be taken in addition to Mathematics 23a or 25a or 55a.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 122

Algebra I: Theory of Groups and Vector Spaces (122603)

Hiro Tanaka

2017 Fall (4 Credits)

Schedule:

MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Groups and group actions, vector spaces and their linear transformations, bilinear forms and linear representations of finite groups.

Recommended Prep: Mathematics 23a or 25a or 101 or 121; or an equivalent background in mathematics.

Requirements: Anti-Req: Not to be taken in addition to Mathematics 55a.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 123

Algebra II: Theory of Rings and Fields (116503)

Mark Kisin

2018 Spring (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Rings and modules. Polynomial rings. Field extensions and the basic theorems of Galois theory. Structure theorems for modules.

Requirements: Prerequisite: Mathematics 122 or Mathematics 55a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 124

Number Theory (111533)

Ana Balibanu

2017 Fall (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

Factorization and the primes; congruences; quadratic residues and reciprocity; continued fractions and approximations; Pell's equation; selected Diophantine equations; theory of integral quadratic forms.

Recommended Prep: Mathematics 101 or 122; or 55a which can be taken concurrently; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 129

Number Fields (115734)

Barry Mazur

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

Algebraic number theory: number fields, unique factorization of ideals, finiteness of class group, structure of unit group, Frobenius elements, local fields, ramification, weak approximation, adeles, and ideles.

Recommended Prep: Knowledge of the material in Mathematics 123.

Requirements: Prerequisite: Mathematics 123

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 130

Classical Geometry (123211)

Man-Wai Cheung

2018 Spring (4 Credits)

Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

Presents several classical geometries, these being the affine, projective, Euclidean, spherical and hyperbolic geometries. They are viewed from many different perspectives, some historical and some very topical. Emphasis on reading and writing proofs.

Recommended Prep: Mathematics 19a,b or 21a,b or 23a or 25a or 55a which may be taken concurrently; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 131

Topology I: Topological Spaces and the Fundamental Group (111458)

Dennis Gaitsgory

2017 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

First, an introduction to abstract topological spaces and their properties; and then, an introduction to algebraic topology and in particular homotopy theory, fundamental groups and covering spaces.

Recommended Prep: Some acquaintance with metric space topology as taught in Mathematics 23a,b, 25a,b, 55a,b, 101, or 112; and with groups as taught in Mathematics 101, 122 or 55a.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 132

Topology II: Smooth Manifolds (123212)

Michael Hopkins

2018 Spring (4 Credits)

Schedule: MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Differential manifolds, smooth maps and transversality. Winding numbers, vector fields, index and degree. Differential forms, Stokes' theorem, introduction to cohomology.

Recommended Prep: Mathematics 23a,b or 25a,b or 55a,b or 112; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 136

Differential Geometry (111133)

Tristan Collins

2017 Fall (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course is an introduction to Riemannian geometry with the focus (for the most part) being the Riemannian geometry of curves and surfaces in space where the fundamental notions can be visualized.

Recommended Prep: Mathematics 19a,b or 21a,b or 23a or 25a or 55a (may be taken concurrently); or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 137

Algebraic Geometry (116452)

Brooke Ullery

2018 Spring (4 Credits)

Schedule:

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Affine and projective spaces, plane curves, Bezout's theorem, singularities and genus of a plane curve, Riemann-Roch theorem.

Recommended Prep: Knowledge of the material in Mathematics 123.

Requirements: Prerequisite: Mathematics 123

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 143R

Set Theory (117626)

Peter Koellner

2017 Fall (4 Credits)

Schedule:

WF 1200 PM - 0129 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to descriptive set theory and the study of definable sets of reals. In the context of *definable* sets of reals it is natural to replace the axiom of choice (AC) with the axiom of determinacy (AD)- the assertion that all infinite, two players perfect information games on integers are determined. Begins with basic framework: Polish spaces, hierarchy of Borel sets, hierarchy of projective sets. Consequences of AD: measurability, perfect set theorem, Baire category. Proof of Borel determinacy. If time permits, relationship with large cardinals: analytic determinacy and measurable cardinals.

Recommended Prep: Mathematics 25 or 101.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 145B

Set Theory II (156120)

W. Hugh Woodin

2018 Spring (4 Credits)

Schedule:

W 0100 PM - 0159 PM

M 1100 AM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

An introduction to large cardinals and their inner models, with special emphasis on Woodin's recent advances toward finding an ultimate version of Godel's L. Topics include: Weak extender models, the HOD Dichotomy Theorem, and the HOD Conjecture.

Requirements:**Prerequisite:** Mathematics 145A**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 152

Discrete Mathematics (116191)

Paul Bamberg

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

An introduction to sets, logic, finite groups, finite fields, finite geometry, finite topology, combinatorics and graph theory. A recurring theme of the course is the symmetry group of the regular icosahedron. Elementary category theory will be introduced as a unifying principle. Taught in a seminar format: students will gain experience in presenting proofs at the blackboard.

Course Notes:

Covers material used in Computer Science 121 and Computer Science 124. Enrollment limited to 16.

Recommended Prep:

Mathematics 19b or 21b or 23a or 25a or 55a (may be taken concurrently) or an equivalent background in mathematics. Previous experience with proofs is not required.

Requirements:

Not to be taken in addition to Computer Science 20, Mathematics 55a/b or Mathematics 122.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 153

Mathematical Biology-Evolutionary Dynamics (119502)

Martin Nowak

2017 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Introduces basic concepts of mathematical biology and evolutionary dynamics: evolution of genomes, quasi-species, finite and infinite population dynamics, chaos, game dynamics, evolution of cooperation and language, spatial models, evolutionary graph theory, infection dynamics, somatic evolution of cancer.

Recommended Prep: Mathematics 19a,b or 21a,b or 23a,b or 25a,b or 55a,b; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 154

Probability Theory (113811)

Sebastien Vasey

2018 Spring (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

An introduction to probability theory. Discrete and continuous random variables; distribution and density functions for one and two random variables; conditional probability. Generating functions, weak and strong laws of large numbers, and the central limit theorem. Geometrical probability, random walks, and Markov processes.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Recommended Prep: A previous mathematics course at the level of Mathematics 19ab, 21ab, or a higher number. For students from 19ab or 21ab, previous or concurrent enrollment in Math 101 or 112 may be helpful. Freshmen who did well in Math 23a, 25a or 55a fall term are also welcome to take the course.

Additional Course Attributes:

FAS: Core Curriculum	Quantitative Reasoning

Mathematics 155R

Combinatorics (116196)

Hector Pasten Vasquez

2018 Spring (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to counting techniques and other methods in finite mathematics. Possible topics include: the inclusion-exclusion principle and Mobius inversion, graph theory, generating functions, Ramsey's theorem and its variants, probabilistic methods.

Recommended Prep: The ability to write proofs and some knowledge of linear algebra will be needed.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 157

Mathematics in the World (159763)

Joseph D. Harris

2018 Spring (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

An interactive introduction to problem solving with an emphasis on subjects with comprehensive applications. Each class will be focused around a group of questions with a common topic: logic, information, number theory, probability, and algorithms.

Recommended Prep: Mathematics 19b or 21b or 23a; or an equivalent background in mathematics. More importantly, students should have a broad mathematical curiosity and be eager to brainstorm during in-class problem solving sessions.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 162

Introduction to the Mathematics of Quantum Computing (204980)

Cliff Taubes

2018 Spring (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will introduce the mathematics for quantum computation. This includes basic notions from quantum mechanics, linear algebra, probability theory and number theory. No a priori knowledge of linear algebra is required except for a familiarity with basic facts about complex numbers and 2x2 matrices; in particular, what is taught in Mathematics 21b suffices. No a priori knowledge of either number theory or probability is needed.

Additional Course Attributes:

Attribute	Value(s)

FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 212A

Real Analysis (116137)

Yum Tong Siu

2017 Fall (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Measure theory, functional analysis, Sobolev spaces and introduction to harmonic analysis.

Recommended Prep: Knowledge of the material in Mathematics 114.

Requirements: Prerequisite: Mathematics 114

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 212BR

Advanced Real Analysis (120929)

Yum Tong Siu

2018 Spring (4 Credits)

Schedule:

TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Continuation of topics in real analysis, Fourier analysis, and functional analysis from Mathematics 212a. Harmonic analysis. Singular and oscillatory integrals. Partial differential equations. Hypocoellipticity. H. Lewy's example of nonsolvable partial differential equation. Brownian motion and its application to solution

of Dirichlet's problem. Nash's implicit function theorem and its applications to the embedding problem of Riemannian manifolds and the theory of Kolmogorov, Arnold and Moser.

Recommended Prep: Knowledge of the material in Mathematics 212a.

Requirements: Prerequisite: Undergrads Require Mathematics 212A

Additional Course Attributes:

Mathematics 213A

Advanced Complex Analysis (110880)

Curtis McMullen

2017 Fall (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

Fundamentals of complex analysis, and further topics such as elliptic functions, canonical products, conformal mapping, harmonic measure and capacity.

Prerequisites: Basic complex analysis, topology of covering spaces, differential forms.

Recommended Prep: Basic complex analysis, topology of covering spaces, differential forms.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 213BR Section: LEC

Riemann Surfaces (111824)

Shing-Tung Yau

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap: n/a

Fundamentals of Riemann surfaces. Topics may include sheaves and cohomology, potential theory, uniformization, and moduli.

Recommended Prep: Knowledge of the material in Mathematics 213a.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 221

Algebra (123232)

Hiro Tanaka

2017 Fall (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A first course in Algebra: Noetherian rings and modules, Hilbert basis theorem, Cayley-Hamilton theorem, integral dependence, Galois theory, Noether normalization, the Nullstellensatz, localization, primary decomposition. Representation theory of finite groups. Introduction to Lie groups and Lie algebras: definitions, the exponential maps, semi-simple Lie algebras, examples.

Recommended Prep: Mathematics 123.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Mathematics 223A Section: LECT

Algebraic Number Theory (123239)

Alison Miller

2017 Fall (4 Credits)

Schedule:

TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A graduate introduction to algebraic number theory. Topics: the structure of ideal class groups, groups of units, a study of zeta functions and L-functions, local fields, Galois cohomology, local class field theory, and local duality.

Recommended Prep: Knowledge of the material in Mathematics 129.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Mathematics 223B Section: LECT

Algebraic Number Theory (123240)

Alison Miller

2018 Spring (4 Credits)

Schedule:

MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Continuation of Mathematics 223a. Topics: adeles, global class field theory, duality, cyclotomic fields. Other topics may include: Tate's thesis or Euler systems.

Recommended Prep: Knowledge of the material in Mathematics 223a.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 224 Section: LECT

Representations of Reductive Lie Groups (125563)

Dennis Gaitsgory

2018 Spring (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course will introduce algebraic groups, along with some necessary tools from algebraic geometry. The goal of the course is to arrive at the classification of reductive groups in terms of root data.

Class Notes: This course is suitable for undergraduates.

Prerequisite: Mathematics 232a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 229X Section: LECT

Introduction to Analytic Number Theory (123242)

Hector Pasten Vasquez

2017 Fall (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Fundamental methods, results, and problems of analytic number theory. Riemann zeta function and the Prime Number Theorem; Dirichlet's theorem on primes in arithmetic progressions; lower bounds on discriminants from functional equations; sieve methods, analytic estimates on exponential sums, and their applications.

Recommended Prep: Knowledge of the material in Mathematics 113 and 123.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Mathematics 230A

Differential Geometry (113369)

Tristan Collins

2017 Fall (4 Credits)

Schedule: MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap: n/a

Smooth manifolds (vector fields, differential forms, and their algebraic structures; Frobenius theorem), Riemannian geometry (metrics, connections, curvatures, geodesics, flatness, and manifolds of constant curvature), symplectic geometry, Lie groups, principal bundles.

Recommended Prep: Knowledge of the material in Mathematics 132 and 136.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 230BR

Advanced Differential Geometry (115039)

Karsten Gimre

2018 Spring (4 Credits)

Schedule: TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap: n/a

A continuation of Mathematics 230a. Topics in differential geometry: Analysis on manifolds. Laplacians. Hodge theory. Spin structures. Clifford algebras. Dirac operators. Index theorems. Applications.

Recommended Prep: Knowledge of the material in Mathematics 230a.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 231A

Algebraic Topology (123243)

Joseph D. Harris

2017 Fall (4 Credits)

Schedule: MWF 1000 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

Covering spaces and fibrations. Simplicial and CW complexes, Homology and cohomology, universal coefficients and Künneth formulas. Hurewicz theorem. Manifolds and Poincaré duality.

Recommended Prep: Knowledge of the material in Mathematics 131 and 132.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 231BR

Advanced Algebraic Topology (123433)

Alexander Kupers

2018 Spring (4 Credits)

Schedule: TR 1000 AM - 1129 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

Continuation of Mathematics 231a. Vector bundles and characteristic classes. Bott periodicity. K-theory, cobordism and stable cohomotopy as examples of cohomology theories.

Recommended Prep: Knowledge of the material in Mathematics 231a.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 252X

Configuration Spaces in Algebraic Topology (204921)

Benjamin Knudsen

2017 Fall (4 Credits)

Schedule:

MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to configuration spaces emphasizing both their intrinsic geometric interest and their connections to other areas. Possible topics: computations of (co)homology and homotopy groups, cell decompositions, homological stability, failure of homotopy invariance, and stable splittings of mapping spaces.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 255

Classification Theory for Tame Abstract Elementary Classes (204946)

William Boney

2017 Fall (4 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Starting from the definition of Abstract Elementary Classes (AECs), we will develop nonforking and classification theory for tame AECs. These classes are general enough to encompass interesting examples of nonelementary classes, but have enough structure to develop a reasonable classification theory. We will cover the construction of good frames and other nonforking notions in tame AECs; examples of tame AECs; and the impact of set theory and large cardinals.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 268X

Hodge Theory (204947)

Wilfried Schmid

2017 Fall (4 Credits)

Schedule: TR 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

"Classical Hodge theory, including the "Kahler package"; mixed Hodge structures on singular and incomplete varieties; geometric and abstract variations of Hodge structure; the orbit theorems of Variation of Hodge structure; an introduction to Mixed Hodge Modules.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 269X

Model Theory for Abstract Elementary Classes (204948)

Sebastien Vasey

2018 Spring (4 Credits)

Schedule: MWF 1100 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

Abstract elementary classes are a kind of concrete categories with all directed colimits whose morphisms are monomorphisms. They generalize the model theory of classes axiomatized by a first-order theory or certain infinitary logics, and encompass many algebraic classes of objects such as valued fields or locally finite groups. A presentation of both basic model-theoretic results (the presentation theorem, model-homogeneous is saturated, closure under infinitary elementary equivalence) and generalizations of stability theory to this setup, with a focus on free (nonforking) amalgamation (generalizing linear independence of vector spaces and algebraic independence in fields).

Additional Course Attributes:

FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Mathematics 270

Isometric Embedding and Geometric Analysis (204949)

Karsten Gimre

2017 Fall (4 Credits)

Schedule: MWF 1200 PM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

The course will cover the isometric embedding problem in all its forms, including the contributions of Weyl, Cartan, Nash, Kuiper, Nirenberg, and Gromov. This will include lengthy digressions into some of the pieces of mathematics originally inspired by isometric embedding, including the Nash-Moser implicit function theorem, convex integration, and pseudoholomorphic curves. We will also cover the modern application of isometric embedding to measuring gravitational energy in general relativity.

Additional Course Attributes:

FAS: Course Level	Primarily for Graduate Students

Mathematics 272X

Diffeomorphisms of Disks (204950)

Alexander Kupers

2017 Fall (4 Credits)

Schedule:

MWF 0100 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A discussion of classical results and recent advances in the study of groups of diffeomorphisms of disks.

Topics: the results of Smale and Hatcher, the relation to exotic spheres and smoothing theory, the relation to cobordism categories and the relation to algebraic K-theory. If time permits, a discussion of the relation to configuration space integrals.

Mathematics 278X

Categorical Logic (204951)

Jacob Lurie

2018 Spring (4 Credits)

Schedule:

MWF 0200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In the early 1960's, Grothendieck introduced the notion of a topos (a category satisfying certain properties). Topos theory can be regarded as a simultaneous generalization of point-set topology and first-order logic, and has been applied with spectacular success to problems in algebraic geometry. This course will be an introduction to topos theory which emphasizes its connections to mathematical logic (particularly model theory).

FAS: Course Level	Primarily for Graduate Students

Mathematics 285

Combinatorial Methods in Algebraic Geometry (204943)

Philip Engel

2017 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM**Instructor Permissions:** None**Enrollment Cap:** n/a

This course gives examples of two central ways in which combinatorial structures arise in algebraic geometry. The first is via "tropicalization"- replacing a variety of dimension n with a real manifold of dimension n that encodes a stratification into subvarieties. For instance, we discuss how to encode toric varieties by lattice polyhedra, nodal curves by graphs, degenerations of abelian varieties and K3 surfaces by polyhedral decompositions of tori and spheres. Then we use combinatorial techniques to extract information about the original object. The second way is via representation theory. For instance, the representation theory of the symmetric group, and thus partitions, play a fundamental role in Hurwitz theory. We will give a gentle introduction to the tools involved, such as Fock space. These ideas have particularly beautiful application in the enumeration of covers of P^1 or an elliptic curve.

Medical Sciences

Subject: Human Bio & Translational Med

Human Bio & Translational Med 200

Pathology of Human Disease (107843)

Scott Lovitch

2018 Spring (4 Credits)

Schedule:

R 0900 AM - 1259 PM

T 0900 AM - 1059 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course provides a comprehensive overview of human pathology with emphasis on mechanisms of disease and modern diagnostic technologies. Topics include (1) general mechanisms of disease (inflammation, infection, immune injury, host response to foreign materials, transplantation, genetic disorders and neoplasia), (2) pathology of major organ systems, and (3) review of diagnostic tools from invasive surgical pathology to non-invasive techniques such as diagnostic imaging and molecular pathology. The objectives of this course are achieved through a set of integrated lectures and laboratories, as well as a student-driven term project leading to a formal presentation on a medical, socioeconomic, or technological issue in human pathology.

Course Notes: Enrollment may be limited. Jointly offered with HMS as HT035.0

Class Notes: Classes begin January 30, 2018 through May 10, 2018

Recommended Prep: General biology.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 201

Tumor Pathophysiology and Transport Phenomena - A Systems Biology Approach (143057)

Rakesh Jain

2017 Fall (4 Credits)

Schedule:

M 0500 PM - 0659 PM

Instructor Permissions: None

Enrollment Cap: n/a

Tumor pathophysiology plays a central role in the growth, metastasis, detection, and treatment of solid tumors. Principles of transport phenomena are applied to develop a quantitative understanding of tumor biology and treatment.

Course Notes: Given in alternate years. Offered jointly with the Medical School as PA 712.0. Classes held at MIT.

Class Notes: Course will be held in MIT E25-117

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 235

Principles of Human Disease: Physiology and Pathology (109394)

Connie Cepko

Scott Lovitch

2017 Fall (4 Credits)

Schedule:

MWF 0900 AM - 1029 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course covers the normal physiology and pathophysiology of selected organs, through lectures, readings, tutorials based on clinical cases, and patient presentations. Human biology is emphasized, with some examples also drawn from model organisms. Recent therapeutic approaches, including RNAi, gene therapy, and genome editing will be covered.

Course Notes: Course enrollment is open to graduate students from any program as well as undergraduates.

Class Notes: Students will have tutorial sessions once a week.

Recommended Prep: Knowledge of introductory biochemistry, molecular biology, and cell biology required (MCB52 and MCB54 or equivalent and one year of organic chemistry for undergraduates is recommended).

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course provides an introduction to the visual system and its assessment. In general, we will consider vision as a system rather than its low-level components. Each two-hour session consists of two lectures provided by faculty with expertise in that area. Topics will include basic science and clinical topics, normal vision and abnormal vision, methods of assessment of animals and humans, clinical and laboratory measures.

Class Notes:

Classes begin on September 13, 2017 through November 15, 2017.
Classes will be held on the 2nd floor conference room, Schepens Eye
Research Institute.

Instructor Permissions: None

Enrollment Cap: n/a

This course provides an overview of the pathogenic process of prevalent ocular diseases. The goals of the course are: (i) to explore the structural and functional aspects of the eye relevant to understanding the pathology, (ii) to review the manifestations of the disease and its effects on vision, (iii) to discuss current views and research in the pathophysiology, and strategies for therapeutic intervention. For most sessions, the basic science and clinical topics will be presented by two faculty lecturers.

Class Notes: Class start January 22, 2018 through April 30, 2018. Location is 2nd floor conference room, Schepens Eye Research Institute.

This course will be a series of workshops in which the design and analysis of experiments conducted within vision and eye research will be considered. At each session, a faculty member will provide and introduce data from a real study that they have conducted as an example. Issues around experimental design will be discussed. Then, using the participant's own software on their computer, we will work through analyses of that data, guided by two faculty members. Thus, participants will handle real data and address real experimental design and data issues.

Course Notes:

Participants must bring a laptop computer with a statistical analysis

package with which they are familiar. Data will be available for download in advance of each session.
Class begins February 6, 2018 through April 17, 2018 and will be held at 2W Common Room, Schepens Eye Research Institute, 20 Staniford Street, Boston

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 320

Endothelial Progenitors in Health Disease (125270)

Joyce Bischoff

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 320

Endothelial Progenitors in Health Disease (125270)

Joyce Bischoff

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 321

Regenerative Biology (110151)

Richard Lee

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 321

Regenerative Biology (110151)

Richard Lee

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 322

Cardiac Repair and Regeneration (125284)

Ronglih Liao

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 322

Cardiac Repair and Regeneration (125284)

Ronglih Liao

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 323

Developmental Biology and Disease in Human and Zebrafish (125272)

Calum MacRae

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 323

Developmental Biology and Disease in Human and Zebrafish (125272)

Calum MacRae

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 324

Principles/Practices of Developing Human Antibody Therapies (125273)

Wayne Marasco

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 324

Principles/Practices of Developing Human Antibody Therapies (125273)

Wayne Marasco

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 326

Human Genetics of Neuroinflammatory and Neurodegenerative Disorders (125390)

Philip De Jager

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 326

Human Genetics of Neuroinflammatory and Neurodegenerative Disorders (125390)

Philip De Jager

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 327

Translational Research on Kinase Inhibitors (125398)

Pasi Janne

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 327

Translational Research on Kinase Inhibitors (125398)

Pasi Janne

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 331

Tumor Microenvironment, Angiogenesis and Metastasis: from Bench-to-Bedside-to-Biomarkers (125405)

Rakesh Jain

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 331

Tumor Microenvironment, Angiogenesis and Metastasis: from Bench-to-Bedside-to-Biomarkers (125405)

Rakesh Jain

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 332

Brain tumors biology, focus epigenetics and heterogeneity (160768)

Mario Suva

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 332

Brain tumors biology, focus epigenetics and heterogeneity (160768)

Mario Suva

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 334

Response and resistance to cancer therapies (160773)

Peter Hammerman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 334

Response and resistance to cancer therapies (160773)

Peter Hammerman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 335

Molecular Genetics, Cell, Gene Therapy, & Retinal Disease (160774)

Neena Haider

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 335

Molecular Genetics, Cell, Gene Therapy, & Retinal Disease (160774)

Neena Haider

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 336

Cellular and molecular basis of vascular integrity in adult retina and brain (160776)

Joseph Arboleda-Velasquez

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 336

Cellular and molecular basis of vascular integrity in adult retina and brain (160776)

Joseph Arboleda-Velasquez

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 340

(LHB). Disease-Centered Tutorial Clinics (125582)

Jordan Kreidberg

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 340

(LHB). Disease-Centered Tutorial Clinics (125582)

Jordan Kreidberg

2017 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 341

Gene Regulation of Metabolism in Cardiovascular Health and Disease (126373)

Zoltan Arany

2018 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 341

Gene Regulation of Metabolism in Cardiovascular Health and Disease (126373)

Zoltan Arany

2017 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 342

Research in Hematology and Oncology (126374)

Benjamin Ebert

2018 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 342

Research in Hematology and Oncology (126374)

Benjamin Ebert

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 343

Genetics of hypertension, arrhythmias and heart failure (126375)

Christopher Newton-Cheh

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 343

Genetics of hypertension, arrhythmias and heart failure (126375)

Christopher Newton-Cheh

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 345

Tuberous Sclerosis and LAM: Pathogenic Mechanisms (126949)

Elizabeth Henske

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 345

Tuberous Sclerosis and LAM: Pathogenic Mechanisms (126949)

Elizabeth Henske

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 346

Bioimaging and Optical Spectroscopy: Detection of Early Disease with Light (127053)

Lev Perelman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 346

Bioimaging and Optical Spectroscopy: Detection of Early Disease with Light (127053)

Lev Perelman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 347

Effects of Diabetes, Exercise, and Skeletal Muscle Metabolism (127377)

Laurie Goodyear

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 347

Effects of Diabetes, Exercise, and Skeletal Muscle Metabolism (127377)

Laurie Goodyear

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 348

Molecular Pathogenesis of the Metabolic Syndrome (107631)

Sudha Biddinger

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 348

Molecular Pathogenesis of the Metabolic Syndrome (107631)

Sudha Biddinger

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 350

Molecular basis of hematologic and solid cancers (109090)

Roberto Chiarle

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 350

Molecular basis of hematologic and solid cancers (109090)

Roberto Chiarle

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 351

Biology and Immunotherapy of Chronic Lymphocytic Leukemia (109091)

Cathy Wu

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 351

Biology and Immunotherapy of Chronic Lymphocytic Leukemia (109091)

Cathy Wu

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 352

Regulation of Vascular Development and Pathology (109122)

Patricia D'Amore

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 352

Regulation of Vascular Development and Pathology (109122)

Patricia D'Amore

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 353

Mechanobiology and Developmental Control (109123)

Donald Ingber

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 353

Mechanobiology and Developmental Control (109123)

Donald Ingber

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 354

Epithelial:stromal Interactions in the Formation and Progression of Carcinomas (109124)

Antoine Karnoub

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 354

Epithelial:stromal Interactions in the Formation and Progression of Carcinomas (109124)

Antoine Karnoub

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 355

Epigenetic Mechanisms in Mammalian Development (109125)

Bradley Bernstein

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 355

Epigenetic Mechanisms in Mammalian Development (109125)

Bradley Bernstein

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 356

Genetic Models of Leukemogenesis (109139)

A. Look

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 356

Genetic Models of Leukemogenesis (109139)

A. Look

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 358

Control of Cell Proliferation by RB/E2F (109126)

Nicholas Dyson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 358

Control of Cell Proliferation by RB/E2F (109126)

Nicholas Dyson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 359

Genetics of Neurodegenerative Disease (109127)

Mel Feany

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 359

Genetics of Neurodegenerative Disease (109127)

Mel Feany

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 360

Molecular characterization of circulating tumor cells (109128)

Daniel Haber

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 360

Molecular characterization of circulating tumor cells (109128)

Daniel Haber

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 361

Molecular Approaches to Cell Immortalization and Transformation (109129)

William Hahn

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 361

Molecular Approaches to Cell Immortalization and Transformation (109129)

William Hahn

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 363

Recombination Functions of the BRCA Genes (109131)

Ralph Scully

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 363

Recombination Functions of the BRCA Genes (109131)

Ralph Scully

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 365

Biology and Genetics of Human Cancers (109133)

Matthew Meyerson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 365

Biology and Genetics of Human Cancers (109133)

Matthew Meyerson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 366

Molecular Genetics of Erythroid Iron Metabolism (109134)

Mark Fleming

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 366

Molecular Genetics of Erythroid Iron Metabolism (109134)

Mark Fleming

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 367

Control of Endothelial Cell Fate and Vascular Development by Fluid Mechanical Forces (109135)

Guillermo Garcia-Cardena

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 367

Control of Endothelial Cell Fate and Vascular Development by Fluid Mechanical Forces (109135)

Guillermo Garcia-Cardena

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 369

DNA Damage Responses and Genomic Stability (109136)

Lee Zou

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 369

DNA Damage Responses and Genomic Stability (109136)

Lee Zou

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 370

Integration of Metabolism and Stress Pathways (109137)

Nika Danial

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 370

Integration of Metabolism and Stress Pathways (109137)

Nika Danial

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 373

Subject: Immunology

Immunology 201

Principles of Immunology (148547)

Thorsten Mempel

Stephanie Dougan

2017 Fall (4 Credits)

Schedule: TR 0130 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 50

Comprehensive core course in basic immunology, providing an intensive and in-depth examination of the cells and molecules of the immune system. Special attention is given to the experimental approaches that

led to the discovery of the general principles of immunology.

Course Notes: Intended for students who have had prior exposure to immunology on the undergraduate level. In the absence of such exposure, students must obtain the permission of the Course Director. Offered jointly with the Medical School as IM 702.0.

Class Notes: Classes begin on August 30, 2017 through November 30, 2017. First Class on August 30 will be held at 1:30pm in 100A Modell.

Recommended Prep: A background in genetics and biochemistry strongly recommended.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 202

Immune and Inflammatory Diseases (148503)

Filip Swirski

Mikael Pittet

2018 Spring (4 Credits)

Schedule: TR 0130 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap: n/a

IMM202 builds on IMM201 and explores fundamental principles of immunology in the context of immune and inflammatory diseases. Through a series of lectures and discussion, students will survey a broad range of diseases in which the immune system is essential. Topics will include not only diseases that mobilize classical immunity but also conditions to which we now know the immune systems contributes. Students will use oral and written exercises to learn how to evaluate and synthesize major concepts and tools germane to immunology's relationship to bioscience.

Course Notes: Offered jointly with the Medical School as IM 712.0.

Recommended Prep: Immunology 201 or its equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Immunology 204

Critical Readings for Immunology (143254)

Duane Wesemann

2018 Spring (4 Credits)

Schedule: R 1000 AM - 1259 PM

Instructor Permissions: None

Enrollment Cap: n/a

Original research articles from fields including immunology, biochemistry, genetics, and cell and developmental biology will be critically analyzed in an intensive small group format. Grading will be based on class participation and oral presentations.

Course Notes: Required for first-year immunology students, open to second-year immunology students. No auditors. Offered jointly with the Medical School as IM 703.0.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 300

Advanced Topics in Immunology (141598)

David Cardozo

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Reading and discussion seminars each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit. Topics include the role of intracellular and transmembrane protein phosphates in signal transduction.

Course Notes: Intended for first- and second-year Immunology graduate students. Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Call 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Immunology 301

Immunology Seminar (142204)

Shiv Pillai

Galit Alter

2018 Spring (4 Credits)

Schedule:

W 0330 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Gives students exposure to research topics in Immunology. Students prepare for the weekly seminar through readings, discussions, and preparing brief write-ups. These discussions are facilitated by members of the Committee on Immunology.

Course Notes:

Required for, and limited to, first-year Immunology graduate students. All others will be evaluated for enrollment on a case by case basis.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course

Immunology 301QC

Autoimmunity (146257)

Francisco Quintana

2018 Spring (2 Credits)

Schedule:

M -

Instructor Permissions: None

Enrollment Cap:

n/a

This course will focus on basic immunological mechanisms of autoimmune diseases, with an emphasis on recent advances in the field. At each session, we will focus on a particular topic and discuss three important publications.

Course Notes: Offered in alternate years. Expected to be given in the first quarter of the spring term in academic year 2014-2015

Class Notes: Class start February 6, 2017 through May, 22, 2017

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 305QC

Neuro-Immunology in Development, Regeneration and Disease (130342)

Isaac Chiu

Beth Stevens

Michael Carroll

2018 Spring (2 Credits)

Schedule:

R 0400 PM - 0629 PM

Instructor Permissions: None

Enrollment Cap:

n/a

It is increasingly clear that the nervous system and immune system share parallel molecular pathways, and communication between neurons and immune cells play significant roles in homeostasis and disease. This course will investigate current topics in neuro-immunology: CNS development, chronic pain, neuro-degeneration, aging, axon regeneration, auto-immunity and infection. We will focus our discussions on molecular mechanisms shared by the immune and nervous systems and the molecular cross-talk between these two systems.

Course Notes:

Each class will cover a specific topic in neuro-immunology. Students should be prepared to lead discussions on pre-selected papers for each session.

Class Notes:

Class starts on April 13, 2017 through June 1, 2017

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None

2017 Fall (2 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

There have been many exciting recent developments in the cancer immunology field, and multiple therapeutic approaches have shown efficacy against diverse types of cancer. This course will emphasize new mechanistic insights, in particular on the following topics: Mechanisms of spontaneous protective anti-tumor immunity; Key effector cell populations of anti-tumor immunity; Inflammation and tumor microenvironment; Immunosuppressive mechanisms in tumor immunity; Targeting of inhibitory receptors;

Cancer vaccines; New approaches for delivery of immunotherapies into tumors.

Course Notes: Must be PhD student at Harvard or postdoctoral fellow. This class will be taking place in the Modell Center 2nd Floor conference room

Class Notes: Course meets November 6, 2017 through December 18, 2017.

FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 316

Molecular Basis of Immunologic Recognition and Communication (131598)

Harvey Cantor

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 317

Molecular Biology of Receptor Transduction in the Immune System (148052)

Brian Seed

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 317

Molecular Biology of Receptor Transduction in the Immune System (148052)

Brian Seed

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 318

Mechanisms of Antigen Presentation and Cellular Immunology (130017)

Florian Winau

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 318

Mechanisms of Antigen Presentation and Cellular Immunology (130017)

Florian Winau

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 319

Molecular Basis of Cell Adhesion and Migration (131509)

Timothy Springer

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 319

Molecular Basis of Cell Adhesion and Migration (131509)

Timothy Springer

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 320

Cell Adhesion in Vascular Biology and Innate Immunity (146636)

Denisa Wagner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 320

Cell Adhesion in Vascular Biology and Innate Immunity (146636)

Denisa Wagner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 320L

The Study of Human Tissue Resident T Cells (130340)

Rachael Clark

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 320L

The Study of Human Tissue Resident T Cells (130340)

Rachael Clark

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 321

Functional Memory T Cells (146443)

William Haining

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Why functional memory T cells are formed, and why protective T cell immunity fails to develop agains

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 321

Functional Memory T Cells (146443)

William Haining

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Why functional memory T cells are formed, and why protective T cell immunity fails to develop agains

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 321L

Molecular Mechanism of Immunity to Fungal Pathogens (146650)

Jatin Vyas

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 321L

Molecular Mechanism of Immunity to Fungal Pathogens (146650)

Jatin Vyas

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 322

Systems Approaches to Innate and Adaptive Immunity; Functional Genomics of Complex Disease Genetics (146251)

Ramnik Xavier

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 322

Systems Approaches to Innate and Adaptive Immunity; Functional Genomics of Complex Disease Genetics (146251)

Ramnik Xavier

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 322L

Molecular and Cellular Analysis of Primary Immunodeficiencies (130341)

Luigi Notarangelo

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 322L

Molecular and Cellular Analysis of Primary Immunodeficiencies (130341)

Luigi Notarangelo

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 323L

Immunity to Bacterial Enteropathogens: Modulation by Host and Microbial Factors (146651)

Bobby Cherayil

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 323L

Immunity to Bacterial Enteropathogens: Modulation by Host and Microbial Factors (146651)

Bobby Cherayil

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 324

Systems Immunology of Tolerance and Autoimmunity (142667)

Christophe Benoist

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 324

Systems Immunology of Tolerance and Autoimmunity (142667)

Christophe Benoist

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 324L

T-cell Sensitization and Immunoregulation in Ocular Allo- and Autoimmunity (130344)

Reza Dana

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 324L

T-cell Sensitization and Immunoregulation in Ocular Allo- and Autoimmunity (130344)

Reza Dana

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 325

Immune Cell Interactions Controlling T Cell Effector Function (145418)

Thorsten Mempel

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 325

Immune Cell Interactions Controlling T Cell Effector Function (145418)

Thorsten Mempel

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 325L

Mechanisms of Peripheral Tolerance and their Breakdown in Allergic and Autoimmune Diseases (146652)

Talal Chatila

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 325L

Mechanisms of Peripheral Tolerance and their Breakdown in Allergic and Autoimmune Diseases (146652)

Talal Chatila

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 326

Human T-cell Antigen Receptor; Human Lymphocyte Differentiation Antigens; TCR; Thymic Development; P (143671)

Ellis Reinherz

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 326

Human T-cell Antigen Receptor; Human Lymphocyte Differentiation Antigens; TCR; Thymic Development; P (143671)

Ellis Reinherz

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 326L

Mechanistic Elucidation of Immune Signaling (130345)

Hao Wu

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 326L

Mechanistic Elucidation of Immune Signaling (130345)

Hao Wu

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 327

Chemical Cell Biology (144904)

Stuart Schreiber

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 327

Chemical Cell Biology (144904)

Stuart Schreiber

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 327L

Phagocyte-endothelial Cell Responses in Inflammation (130343)

Tanya Mayadas

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 327L

Phagocyte-endothelial Cell Responses in Inflammation (130343)

Tanya Mayadas

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 328R

Introduction to Research (142714)

Shiv Pillai

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 328R

Introduction to Research (142714)

Shiv Pillai

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 329

Basic and Clinical Mechanisms of Autoimmunity (133227)

Howard Weiner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 329

Basic and Clinical Mechanisms of Autoimmunity (133227)

Howard Weiner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 329L

Examining the Interplay of Inflammation and Glycosylation (130457)

Robert Anthony

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 329L

Examining the Interplay of Inflammation and Glycosylation (130457)

Robert Anthony

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 330

Molecular Aspects of Mast Cells - Mediated Immune Responses (148215)

Richard Stevens

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 330

Molecular Aspects of Mast Cells - Mediated Immune Responses (148215)

Richard Stevens

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 330L

CD4+ T Cell Tolerance (130514)

James Moon

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 330L

CD4+ T Cell Tolerance (130514)

James Moon

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 331

Lymphoid Organs (143527)

Joan Stein-Streilein

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 331

Lymphoid Organs (143527)

Joan Stein-Streilein

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 331L

Immune Regulation of Cancer (160772)

Shadmehr Demehri

2018 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 331L

Immune Regulation of Cancer (160772)

Shadmehr Demehri

2017 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 332

The Role of Cysteinyl Leukotrienes and their Receptors in Pulmonary Inflammation and Fibrosis (144366)

Yoshihide Kanaoka

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 332

The Role of Cysteinyl Leukotrienes and their Receptors in Pulmonary Inflammation and Fibrosis (144366)

Yoshihide Kanaoka

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 332L

Genetic dissection of neural circuits that control stress-induced behavioral states (160778)

Todd Anthony

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 332L

Genetic dissection of neural circuits that control stress-induced behavioral states (160778)

Todd Anthony

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 334

Understanding the Mechanisms of Pathogen-sensing by the Innate Immune System (146383)

Terry Means

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 334

Understanding the Mechanisms of Pathogen-sensing by the Innate Immune System (146383)

Terry Means

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 334L

Function of Genes Associated with Autoimmune Disease (160972)

Stephan Kissler

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 334L

Function of Genes Associated with Autoimmune Disease (160972)

Stephan Kissler

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 335

Neuro-immunology of Pain and Host Defense (160760)

Isaac Chiu

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 335

Neuro-immunology of Pain and Host Defense (160760)

Isaac Chiu

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 336

T-Lymphocyte Recognition (144165)

Michael Brenner

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 336

T-Lymphocyte Recognition (144165)

Michael Brenner

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 337

Influence of Initial Bacterial Colonization on the Development of the Mucosal Immune Systems (131243)

W. Allan Walker

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 337

Influence of Initial Bacterial Colonization on the Development of the Mucosal Immune Systems (131243)

W. Allan Walker

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 337L

Vascular and Cell Biology of Inflammation and Wound Healing (146665)

Christopher Carman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 337L

Vascular and Cell Biology of Inflammation and Wound Healing (146665)

Christopher Carman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 339

Function and Regulation of Cellular Adhesion Mechanisms (144591)

Martin Hemler

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 339

Function and Regulation of Cellular Adhesion Mechanisms (144591)

Martin Hemler

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 340

The Human Major Histocompatibility Complex, Immune Function, and Disease (143640)

Chester Alper

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 340

The Human Major Histocompatibility Complex, Immune Function, and Disease (143640)

Chester Alper

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 341

Gene Regulation in Normal and Leukemic Stem Cells (144368)

Daniel Tenen

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 341

Gene Regulation in Normal and Leukemic Stem Cells (144368)

Daniel Tenen

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 342

Immune Cell Signaling, Gene Transcription and Tissue Injury in Lupus (145026)

George Tsokos

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 342

Immune Cell Signaling, Gene Transcription and Tissue Injury in Lupus (145026)

George Tsokos

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 343

The Regulation of Eicosanoid Generation (148188)

Jonathan Arm

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 343

The Regulation of Eicosanoid Generation (148188)

Jonathan Arm

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 344

Genetic Analysis of Lymphocyte Development and Nuclear Oncogene Function (143482)

Frederick Alt

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 344

Genetic Analysis of Lymphocyte Development and Nuclear Oncogene Function (143482)

Frederick Alt

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 345

Assembly and Function of pre-B Cell-fate and B Lymphocyte Antigen Receptors (145022)

Shiv Pillai

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 345

Assembly and Function of pre-B Cell-fate and B Lymphocyte Antigen Receptors (145022)

Shiv Pillai

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 346

Trafficking of Antigen in Lymph Nodes (131316)

Michael Carroll

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 346

Trafficking of Antigen in Lymph Nodes (131316)

Michael Carroll

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 347

Lymphocyte development, antibody diversity and host - microbe interactions (161335)

Duane Wesemann

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 347

Lymphocyte development, antibody diversity and host - microbe interactions (161335)

Duane Wesemann

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 30

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 348

Cell Biology, Biochemistry, and Immunology of Leukocyte-endothelial Adhesion (142207)

Francis Luscinskas

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 348

Cell Biology, Biochemistry, and Immunology of Leukocyte-endothelial Adhesion (142207)

Francis Luscinskas

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 348L

Epigenomic regulation of innate immunity (205903)

Kate Jeffrey

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 348L

Epigenomic regulation of innate immunity (205903)

Kate Jeffrey

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 349L

Cell death, cytopenia and immunosuppression triggered by pathogen recognition (203783)

Ben Croker

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 349L

Cell death, cytopenia and immunosuppression triggered by pathogen recognition (203783)

Ben Croker

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 350

Regulation of Autoimmune T Cell Responses (131343)

Vijay Kuchroo

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 350

Regulation of Autoimmune T Cell Responses (131343)

Vijay Kuchroo

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 351

Studies on Glycosylation and Adaptive Immunity (144582)

Charles Dimitroff

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 351

Studies on Glycosylation and Adaptive Immunity (144582)

Charles Dimitroff

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 352

Understanding of how immune cells perform systems-level functions in health and disease. (207243)

Alexander Shalek

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Development and application of new technologies that facilitate understanding of how immune cells collectively perform systems-level functions in health and disease.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 353

Innate and Adaptive Immune Responses in HIV-1 Infection (144750)

Marcus Altfeld

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 353

Innate and Adaptive Immune Responses in HIV-1 Infection (144750)

Marcus Altfeld

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 354

Topics in Transplantation Biology (146705)

David Sachs

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 354

Topics in Transplantation Biology (146705)

David Sachs

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 355

Molecular Mechanisms of Antigen Presentation (130016)

Edda Fiebig

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 355

Molecular Mechanisms of Antigen Presentation (130016)

Edda Fiebiger

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 356

Cytotoxic T Lymphocytes (144903)

Judy Lieberman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 356

Cytotoxic T Lymphocytes (144903)

Judy Lieberman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 357

Microbial-epithelial-immune Cell Interactions in Mucosal Tissues (146787)

Richard Blumberg

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 357

Microbial-epithelial-immune Cell Interactions in Mucosal Tissues (146787)

Richard Blumberg

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 359

Immunoregulatory Mechanisms at Mucosal Surfaces, Including the Lung and Gut, Affecting the Developme (148219)

Dale Umetsu

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 359

Immunoregulatory Mechanisms at Mucosal Surfaces, Including the Lung and Gut, Affecting the Developme (148219)

Dale Umetsu

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 360

Hematopoietic Stem Cells and their Niche (131562)

David Scadden

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 360

Hematopoietic Stem Cells and their Niche (131562)

David Scadden

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 360L

Understanding the Immune Microenvironment (204568)

Stephanie Dougan

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 360L

Understanding the Immune Microenvironment (204568)

Stephanie Dougan

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 361

Induction and Regulation of Antigen-specific T Cell Responses (146786)

Gilles Benichou

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 361

Induction and Regulation of Antigen-specific T Cell Responses (146786)

Gilles Benichou

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 362

Chemokine and Lipid Chemoattractants in Immune Cell Trafficking in Normal Physiology and Disease (131559)

Andrew Luster

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 362

Chemokine and Lipid Chemoattractants in Immune Cell Trafficking in Normal Physiology and Disease (131559)

Andrew Luster

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 363

Regulation of Immune and Inflammatory Responses by the Leukocyte Immunoglobulin-like Receptor Family (131556)

Howard Katz

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 363

Regulation of Immune and Inflammatory Responses by the Leukocyte Immunoglobulin-like Receptor Family (131556)

Howard Katz

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 364

T-cell Differentiation, Tolerance and Autoimmunity (131766)

Diane Mathis

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 364

T-cell Differentiation, Tolerance and Autoimmunity (131766)

Diane Mathis

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 365L

Macrophage biology in multiple contexts, including IBD and metabolism. (203786)

Tiffany Horng

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 365L

Macrophage biology in multiple contexts, including IBD and metabolism. (203786)

Tiffany Horng

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 366

Immune Mechanisms in Cardiovascular Disease (131558)

Andrew Lichtman

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 366

Immune Mechanisms in Cardiovascular Disease (131558)

Andrew Lichtman

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 367

Biology and Chemistry of Complement Problems (131561)

Anne Nicholson-Weller

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 367

Biology and Chemistry of Complement Problems (131561)

Anne Nicholson-Weller

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 368

RNA Granules (131552)

Paul Anderson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 368

RNA Granules (131552)

Paul Anderson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 369

Mechanisms of Autoimmune Disease (146788)

Vicki Kelley

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 369

Mechanisms of Autoimmune Disease (146788)

Vicki Kelley

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 371

Cellular and Molecular Mechanisms of Eosinophil and Other Leukocyte Involvement in Allergic Inflammation (131563)

Peter Weller

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 371

Cellular and Molecular Mechanisms of Eosinophil and Other Leukocyte Involvement in Allergic Inflammation (131563)

Peter Weller

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 372

Immunopathogenesis & Regulation of Immune Response in EAE (148335)

Samia Khoury

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 372

Immunopathogenesis & Regulation of Immune Response in EAE (148335)

Samia Khoury

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 373

Biology of Histocompatibility Systems in Man and Experimental Animals; Immunology of Aging (146791)

Edmond Yunis

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 373

Biology of Histocompatibility Systems in Man and Experimental Animals; Immunology of Aging (146791)

Edmond Yunis

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 374

Tumor Necrosis Factor-Alpha Gene Regulation in the Immunopathogenesis of AIDS and TB (131555)

Anne Goldfeld

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 374

Tumor Necrosis Factor-Alpha Gene Regulation in the Immunopathogenesis of AIDS and TB (131555)

Anne Goldfeld

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 375

Biology and Function of Immunoreceptors (131557)

Jean-Pierre Kinet

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 375

Biology and Function of Immunoreceptors (131557)

Jean-Pierre Kinet

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 376

Molecular Basis of Immunodeficiencies; Immunological and Molecular Basis of Atopic Dermatitis (131564)

Raif Geha

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 376

Molecular Basis of Immunodeficiencies; Immunological and Molecular Basis of Atopic Dermatitis (131564)

Raif Geha

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 377 Section: 01

lymphocyte activation and immune response (207228)

Facundo Batista

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 378

T cell Biology and Cancer Immunology (131566)

Kai Wucherpennig

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 378

T cell Biology and Cancer Immunology (131566)

Kai Wucherpennig

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 379

Molecular determinants of T cell phenotypes in cancer (207239)

Ana Anderson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 380

Control of Leukocyte Trafficking and the Immune Response By Chemokines and Other Cytokines (142208)

Barrett Rollins

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 380

Control of Leukocyte Trafficking and the Immune Response By Chemokines and Other Cytokines (142208)

Barrett Rollins

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 381

The application of new technologies to the study of immune responses against HIV at mucosal surfaces (161338)

Douglas Kwon

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 381

The application of new technologies to the study of immune responses against HIV at mucosal surfaces (161338)

Douglas Kwon

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 382

AIDS Immunopathogenesis and Immune Reconstitution (142209)

R. Paul Johnson

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 382

AIDS Immunopathogenesis and Immune Reconstitution (142209)

R. Paul Johnson

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 383

Signal Transduction, Host-Microbial Interactions and Immunology (161316)

Scott Snapper

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 383

Signal Transduction, Host-Microbial Interactions and Immunology (120012)

Scott Snapper

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 384

The Role of Cysteinyl Leukotrienes & Nucleotide Receptors in Control of Pulmonary Allergic Immunity (145431)

Joshua Boyce

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 384

The Role of Cysteinyl Leukotrienes & Nucleotide Receptors in Control of Pulmonary Allergic Immunity (145431)

Joshua Boyce

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 385

Regulation of T Lymphocyte Activation and Differentiation (148076)

I-Cheng Ho

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 385

Regulation of T Lymphocyte Activation and Differentiation (148076)

I-Cheng Ho

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 386

Molecular and Signaling Pathways Regulating T-cell Immunity and T-cell Anergy (146252)

Vassiliki Boussiotis

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 386

Molecular and Signaling Pathways Regulating T-cell Immunity and T-cell Anergy (146252)

Vassiliki Boussiotis

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 387

Genetically-modified T cells as immunotherapy for cancer (202986)

Marcela Maus

2018 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 387

Genetically-modified T cells as immunotherapy for cancer (202986)

Marcela Maus

2017 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:
