Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 306

Invertebrate Paleobiology and Evolution (212593)

Javier Ortega-Hernandez

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 306

Invertebrate Paleobiology and Evolution (212593)

Javier Ortega-Hernandez

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll

Organismic & Evolutionary Biol 307

Biomechanics, Physiology and Musculoskeletal Biology (146785)

Andrew Biewener

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll

Organismic & Evolutionary Biol 307

Biomechanics, Physiology and Musculoskeletal Biology (146785)

Andrew Biewener

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt

Organismic & Evolutionary Biol 308

Evolution of Floral Developmental Mechanisms (142234)

Elena Kramer

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 308

Evolution of Floral Developmental Mechanisms (142234)

Elena Kramer

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt

Organismic & Evolutionary Biol 309

Evolution, Genomics, and Speciation (156737)

James Mallet

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 309

Evolution, Genomics, and Speciation (156737)

James Mallet

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 310

Metazoan Systematics (148072)

Gonzalo Giribet

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 310

Metazoan Systematics (148072)

Gonzalo Giribet

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 311

Ecosystem Ecology (143020)

Paul Moorcroft

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 311

Ecosystem Ecology (143020)

Paul Moorcroft

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 314

Landscape Ecology (213667)

Andrew Davies

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 314

Landscape Ecology (213667)

Andrew Davies

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 320

Biomechanics and Evolution of Vertebrates (131538)

George Lauder

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt

Organismic & Evolutionary Biol 320

Biomechanics and Evolution of Vertebrates (131538)

George Lauder

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 321

Evolution of Regeneration and Development (204093)

Mansi Srivastava

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll

Organismic & Evolutionary Biol 321

Evolution of Regeneration and Development (204093)

Mansi Srivastava

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 323

Advanced Vertebrate Anatomy (144847)

Stephanie Pierce

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 323

Advanced Vertebrate Anatomy (144847)

Stephanie Pierce

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt

FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 324

Molecular Evolution (131405)

Daniel Hartl

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll

Organismic & Evolutionary Biol 324

Molecular Evolution (131405)

Daniel Hartl

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 334

Behavioral Ecology (144912)

Naomi Pierce

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll

Organismic & Evolutionary Biol 334

Behavioral Ecology (144912)

Naomi Pierce

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 339

Whole-Plant Physiology (142435)

Noel Holbrook

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 339

Whole-Plant Physiology (142435)

Noel Holbrook

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO

FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 341

Coevolution (131524)

Brian Farrell

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 341

Coevolution (131524)

Brian Farrell

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 343

Microbial Ecology and Symbiosis (131235)

Colleen Cavanaugh

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 343

Microbial Ecology and Symbiosis (131235)

Colleen Cavanaugh

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll

Organismic & Evolutionary Biol 355

Evolutionary Developmental Biology (146798)

James Hanken

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 355

Evolutionary Developmental Biology (146798)

James Hanken

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 362

Research in Molecular Evolution (148190)

Scott Edwards

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 362

Research in Molecular Evolution (148190)

Scott Edwards

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt

Organismic & Evolutionary Biol 363

Plant Diversity and Evolution (148213)

Charles Davis

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 363

Plant Diversity and Evolution (148213)

Charles Davis

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 364

Ecological Physiology of Microbes (144166)

Peter Girguis

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 364

Ecological Physiology of Microbes (144166)

Peter Girguis

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 369

Molecular Genetics of Neuroscience (145004)

Yun Zhang

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt

Organismic & Evolutionary Biol 369

Molecular Genetics of Neuroscience (145004)

Yun Zhang

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO

Course Evaluation	Course Evaluation Exempt

Organismic & Evolutionary Biol 370

Mammalian Evolutionary Genetics (145035)

Hopi Hoekstra

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll

Organismic & Evolutionary Biol 370

Mammalian Evolutionary Genetics (145035)

Hopi Hoekstra

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 371

Comparative and Evolutionary Invertebrate Developmental Biology (148304)

Cassandra Extavour

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 371

Comparative and Evolutionary Invertebrate Developmental Biology (148304)

Cassandra Extavour

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 372

Neural Basis of Learned Motor Behaviors (145451)

Bence Olveczky

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 372

Neural Basis of Learned Motor Behaviors (145451)

Bence Olveczky

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll

Organismic & Evolutionary Biol 375

Evolutionary Dynamics and Population Genetics (146222)

Michael Desai

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Divisional Distribution	None

Organismic & Evolutionary Biol 375

Evolutionary Dynamics and Population Genetics (146222)

Michael Desai

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 380

Neurobiological Basis of Behavior (130822)

Benjamin de Bivort

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll

Organismic & Evolutionary Biol 380

Neurobiological Basis of Behavior (130822)

Benjamin de Bivort

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 383

Terrestrial Global Change Ecology - Biotic and Abiotic Biosphere Processes in a Changing World (217388)

Benton Taylor

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 383

Terrestrial Global Change Ecology - Biotic and Abiotic Biosphere Processes in a Changing World (217388)

Benton Taylor

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 385

Natural Selection in Humans and Pathogens (146224)

Pardis Sabeti

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt

Organismic & Evolutionary Biol 385

Natural Selection in Humans and Pathogens (146224)

Pardis Sabeti

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO

Organismic & Evolutionary Biol 386

Organismic and Evolutionary Plant Biology (148330)

William Friedman

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Organismic & Evolutionary Biol 386

Organismic and Evolutionary Plant Biology (148330)

William Friedman

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Organismic & Evolutionary Biol 387

Plant Evolution and Speciation (159947)

Robin Hopkins

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Divisional Distribution	None

Evolutionary Human Physiology and Anatomy (123674)

Daniel Lieberman

George Lauder

Andrew Biewener

Joanne Clark Matott

2021 Fall (4 Credits) **Schedule:** MWF 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 192

Why is the human body the way that it is? This course explores human anatomy and physiology from an integrated framework, combining functional, comparative, and evolutionary perspectives on how organisms work. Major topics, which follow a life-course framework, include embryogenesis, metabolism and energetics, growth and development, movement and locomotion, food and digestion, stress and disease, and reproduction. Also considered is the relevance of human biology to contemporary issues in human health and biology.

Course Notes:

This course includes a weekly 3-hour lab. This course may not be taken Pass/Fail.

Ancient Ethics and Modern Morality (133181)

James Doyle

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An historical introduction to ethics, from the Greeks to, roughly, now. We begin with the concept of virtue in Homer and trace its development through Socrates, Plato, Aristotle, the Stoics and Aquinas. In the modern period we look, in a somewhat skeptical spirit, at the rise of the 'moral' as a supposedly *sui generis* category of reasons, traits, obligations etc., as this is found in Hume, Kant, Mill and others.

Philosophy 11

Philosophy of Law (156186)

Emilio Mora

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Is there a standing duty to obey the law? How should judges interpret the constitution? Does the practice of judicial review compromise democratic values? When and in what manner may the state interfere with the conduct of its citizens? We will discuss these and other questions in this survey course on the philosophy of law. Significant attention will be devoted to questions that lie at the intersection of legal and political philosophy. The final part of the course will be determined in consultation with course participants and will be devoted to philosophical puzzles arising in the law.

Morality and the Good Life: An Introduction to Ethics (132738)

Jeffrey Behrends

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

You probably want to live the best life for yourself. But what would that look like? Feeling pleasure, and avoiding pain? Having your desires satisfied? Maybe achieving knowledge, or securing fulfilling relationships? You might also care about living a moral life. But what would that look like? What actions are morally right or wrong, and what makes them that way? In this introduction to ethics, we'll begin by looking at three important theories of the good life: the pleasure theory, the desire-satisfaction theory, and the pluralist theory. We'll then turn to moral theories, investigating the relative strengths and weaknesses of those views that focus only on our actions' consequences, and those that reject this approach. In closing, we'll consider questions about the status of morality. What kind of judgment are we making when we say, for example, that something is morally wrong? Are there moral facts awaiting our discovery? If there are, how did they come to be - are they determined by humans and varying across cultures, like facts about the law or etiquette? Or perhaps determined by God? Or could they somehow have not been determined by anyone, standing as fundamental facts about reality?

Human Ethics: A Brief History (141608)

Seth Robertson

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Does might make right? Should a person focus on achieving immortality or on living a simple, happy mortal life? Is morality simply a matter of convention? Why be moral when being immoral could provide access to more wealth, fame, and power? What is the relationship between etiquette and morality? What do people owe a society that has failed in its obligations to its people? How can we identify and resist oppression, marginalization, and injustice? Human beings all over the world have been thinking about, discussing, and debating questions like these for thousands of years. This course aims to look at this history of ethics and moral philosophy from a genuinely inclusive perspective by focusing on ethical thought both from all over the world, with special emphasis on that of members of traditionally marginalized groups and from areas of the world that typically receive much less attention in academic philosophy and ethics.

God, Perfection, and Evil (108031)

Cheryl Chen

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Several religions understand God to be a maximally perfect being: an omnipotent, omniscient, and benevolent creator of the universe. In this course, we will consider some traditional arguments for the existence of such a god, and whether arguments are in fact required in order for one's belief in God to count as rational. We will also examine the coherence of the concept of a perfect being, and whether the existence of an omnipotent and benevolent God is compatible with the evil and suffering we encounter in the world. Readings will include some historical, but mostly contemporary, works in the Western philosophical tradition.

Philosophy 96

Preparation for the Senior Thesis (218313)

Seth Robertson

2022 Spring (2 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

PHIL 96 is an optional tutorial for philosophy concentrators who are planning to pursue the honors track, and for joint concentrators for whom philosophy will be their "primary field." It is designed for juniors, but is open to interested sophomores if space allows. The purpose of PHIL 96 is to help students make the transition from writing shorter papers in the context of a class to developing their own research project, in particular, a senior honors thesis. Students will receive guidance for conducting preliminary background research, selecting thesis topics, staying motivated and continuing to make progress in large projects, developing good, personalized writing habits, conducting deep research dives into the literature on a thesis topic, organizing a thesis, revising it and incorporating feedback from advisors and peers, and avoiding common pitfalls for thesis writers.

Class Notes: **PHIL 96 is not a requirement for writing a thesis. The department is offering it as an additional resource. This is a 2 credit course that**

meets during the "Spring 2" term.

Aristotle's Nicomachean Ethics (121759)

James Doyle

2021 Fall (4 Credits) **Schedule:** F 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

An examination of Aristotle's main treatise on ethics. We will read roughly one of the ten books per week, as well as some passages from the *Eudemian Ethics* and the *Magna Moralia*. We will also consult some (not very much) of the recent secondary literature. Overarching issues will include the Greek concepts of virtue and well-being (*eudaimonia*) and Aristotle's accounts of them, and the extent, if there is any, to which the concept of *morality* can be found in Aristotle's ethical thought.

Early Chinese Ethics (213581)

Seth Robertson

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Early (Pre-Qin era) China was a hotbed of philosophical activity: scholars developed careful and fascinating ethical views in the context of serious philosophical debates between major schools of thought. This course focuses on some of these ethical debates between Confucian, Mohist, Daoist, and Legalist philosophers in early China. We'll read both classical texts such as the Analects of Confucius, Mengzi, Xunzi, Mozi, and Zhuangzi and important contemporary scholarship on these texts. Several moral questions will be of particular importance: What is the relationship between etiquette and morality? What are the most important virtues to acquire? Should we think of morality and moral development as something natural or artificial? Are we justified in caring more about some people (our closest friends and family) than others? We will have a special focus on three important interpretive themes for the course: (1) How can understanding the particular contours of the debates each scholar is engaged in help us understand their overall views? (2) How does each philosopher's view of human psychology and epistemology constrain, guide, and support their moral theorizing? (3) How can an understanding of early Chinese ethical thought, theory, and debate help enrich contemporary discussions in ethics and moral philosophy? No previous experience or coursework in Chinese philosophy is required for this course.

Philosophy 117

Medieval Philosophy (156021)

Jeffrey McDonough

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Notoriously dismissed by Petrarch as the "Dark Ages," the medieval era is one of the most profound and least understood periods in the history of Western philosophy. Among the most prominent philosophers working in that period, Augustine, Aquinas and Ockham stand out as representatives of three of the period' s major philosophical traditions, Platonism, Scholastic-Aristotelianism, and Nominalism. This undergraduate level course aims to provide an overview of the development of medieval philosophy while exploring in detail a number of central issues, arguments and controversies. Optional readings will place our three central figures in the larger context of philosophical developments in the medieval era. Topics will include skepticism, knowledge, human nature, divine nature, language, realism, conceptualism, and happiness.

The Philosophy of Mary Shepherd (218627)

Jeffrey McDonough

Alison Simmons

2022 Spring (4 Credits) **Schedule:** T 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 25

Neither rationalist nor empiricist, Scottish philosopher Mary Shepherd (1777-1847) forges her own systematic metaphysics and epistemology (sharply criticizing Berkeley and Hume along the way). She treats the nature of causation, the nature of the external world and our knowledge of it, mind and body, perception, personal identity, and more. In this proseminar we will explore her two chief works and engage with recent scholarship.

Kants Critique of Pure Reason (117823)

Samantha Matherne

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In this course, we will work through Immanuel Kant's *Critique of Pure Reason* (1781/87). In analyzing this text, we will explore the account of metaphysics, epistemology, and philosophy of mind that Kant defends. More specifically, we will address the negative aspects of his project, including his criticisms of rationalism and empiricism. We will also examine his positive views regarding the nature of the mind, the nature of experience, the metaphysics of transcendental idealism, and the foundations of mathematics and natural science. At the end of the course we will consider the limits and prospects of Kant's critical project. In the former vein, we will discuss concerns pertaining to Kant's view on race. In the latter vein, we will address Kant's hope of building a system of nature and freedom.

Philosophy 137

Later Wittgenstein (113573)

Richard Moran

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The course is an introduction to the later philosophy of Ludwig Wittgenstein (1889 - 1951), primarily as expressed in his masterwork *Philosophical Investigations*. We will also spend several weeks on an important preliminary study of his, the so-called *Blue Book*. The main focus will be on Wittgenstein's conception of philosophy of mind and philosophical psychology. Topics will include: meaning and understanding, the nature of psychological concepts, the nature of the self and subjectivity; states of consciousness, mental processes, sensations; privacy and incommunicability; other minds and skepticism about them; the 'inner and the outer'.

Heidegger's Being and Time (000138)

Sean Kelly

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

A close reading of Martin Heidegger's *Being and Time*. Topics from Division I of the book include: In what sense, and on the basis of what, is the world we inhabit intelligible? In what sense do we inhabit such an intelligible world? And what, after all, is the relation between what is and what we understand there to be? Division II of the book addresses existential issues such as: death, guilt, authenticity, history, and temporality. We aim to read the entire book.

Epistemic Injustice (218324)

Seth Robertson

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

Who do we believe, and who do we dismiss? Who tend to get treated as trustworthy, credible sources of information, and who tend not to? Whose voices get amplified and whose get silenced? Whose ideas are taken up and whose are ignored? Whose problems get studied, and who lacks the educational, financial, personal, emotional, or political resources and opportunities to adequately study theirs? Who gets to be ignorant?

These are all central questions in the study of epistemic injustice. The growing realization that injustice, marginalization, oppression, and violence can take distinctly epistemic forms and lead to distinctly epistemic wrongs has quickly become one of the most important discussions in epistemology – the study of knowledge and related topics such as learning, understanding, justification, evidence, trustworthiness, and ignorance. In this course, we will look at some of the most influential research on epistemic injustice, including special attention to Miranda Fricker's seminal work *Epistemic Injustice: Power and the Ethics of Knowing*, important historical precursors to it, criticisms of it, and recent literature expanding on our understanding of ways that epistemic injustice can affect us.

Theories of Criminal Justice: Criminalization, Policing, and Punishment (112463)

Vincent Chiao

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

The last half-century witnessed an unprecedented explosion in the scale of American criminal justice, both in terms of the size of the American prison population and in terms of the scope of the criminal law. In more recent years, how the police enforce the criminal law has again become a focal point for public controversy. As a result, the philosophical foundations of criminal justice, including its purposes, its institutions and processes, and the outcomes it produces, have come in for renewed scrutiny. The aim of this course is to provide students with a working familiarity of some of the major theoretical approaches to criminal justice in political and social theory. In this course, we will examine a range of historical and contemporary writings on crime, punishment and policing, with readings drawn from philosophy, social theory and law.

Class Notes: **Professor Vincent Chiao will be teaching this class in Fall 2021.**

Groups and Political Philosophy (000176)

Emilio Mora

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

In this course we will be examining the role and significance of groups (social, cultural, and institutional) in various areas of political philosophy. Although we will consider a variety of issues we will concentrate on two principal topics. Firstly, we will consider the significance of groups in relation to the claims and demands of social and political justice. Should social groups be thought to have a fundamental normative significance in political philosophy or must we reduce all political claims and interests to the claims and interests of individuals? What is the significance of social groups to questions of distributive justice? What sort of social groups are relevant to questions of distributive justice and why are they relevant? Are there group membership rights? What is the nature and foundation of these rights, and do these rights conflict with liberal political thought? The second dimension of the course concerns the significance of groups as subjects to the demands of justice. Is it only the political community, taken as a group, that is answerable to fundamental principles of social justice, or do these principles also govern the individual conduct of a political community's members? Do national groups bear responsibility as a group for what the group does? Can social groups in a society be deemed collectively responsible for certain social and political outcomes? What is the nature and mechanism of this group responsibility? Finally, we will consider the moral status and responsibilities of corporate 'group agents'.

Philosophy 177I

Historical Injustice (116996)

Emilio Mora

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

What is the moral and political significance of past injustice in the history of a political community? In a variety of national contexts, the redress of historical injustice has struck many as both a legitimate and urgent political cause. Others argue that, since both the original victims and perpetrators of historical injustices are dead, there are no persons who have valid claims against these historical episodes nor, at any rate, are there any individuals who can be rightly held responsible for injustices that predate their existence. This course examines the underlying philosophical questions that underpin and sustain these disagreements, focusing on the issues of Injury, Responsibility, and Justice. In the first topic, we examine a number of accounts characterizing the nature, and defending the legitimacy, of historical injustice claimants as well as the main lines of objection to these claims. In the second topic we examine questions of responsibility. Which contemporary parties, if any, can be held responsible for the effects of historical injustice, and what is the basis and nature of their responsibility? In the final topic, we examine some of the questions and difficulties regarding the administration of a scheme of historical rectification, and we will seek to understand the relation of historical rectification to the project of social justice more generally. Would historical injustice claims be made redundant or otherwise be addressed by the implementation of an egalitarian scheme of distributive justice for all? Conversely, do historical injustices give rise to social and political complaints that must be specifically addressed by a scheme of historical rectification?

Philosophy 180

Justice and the Politics of Cultural Memory and Representation (110657)

Emilio Mora

2022 Spring (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

In this course we will examine a range of issues which we might, very loosely, term ethical questions of social, cultural, and artistic representation. We will be examining three principal issues. Our focus will begin with questions of historical representation. In a range of national and social contexts questions of historical representation have become increasingly prominent and divisive political issues. How should a national community regard, relate to, and represent histories and historical figures implicated in past injustice? What are the ethical constraints and imperatives relating to the representation of these national histories? How do these injunctions relate to present political norms of equality and inclusivity and the demands of social cohesion? We will examine these questions in relation to some of the recent political controversies that have arisen over these issues, particularly in the American debate over confederate monuments. Secondly, we will examine questions regarding cultural appropriation. What is cultural appropriation, and what, if anything, is wrong with cultural appropriation? What are the ethical norms and constraints regarding cultural appropriation? Our treatment of this topic will range from discussions of particular controversial cases of cultural appropriation to an examination of the philosophical questions regarding the nature of culture and identity that lie at the heart of these practical controversies. Finally, we will consider ethical controversies relating to our engagement with (construed broadly) artistic representations. How can we ethically enjoy tragedy? On the face of things it would appear paradoxical or else the mark of a sadist. Are pornographic representations of immoral acts wrong to consume and enjoy? Can we continue to consume and enjoy the products of artists who have engaged in grossly immoral actions? Although we should not expect a set of master principles to govern this range of topics, we might realistically hope that the answers we give, and the philosophical difficulties we encounter in any one topic will help illuminate our treatment and investigation of the others.

Buddhist Philosophy (159688)

Parimal Patil

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

In this course, we will discuss topics in Indian Buddhist epistemology, ethics, metaphysics, philosophy of action, and philosophy of mind. We will pay particular attention to the arguments that Buddhist philosophers used to defend their views and respond to their critics. In addition to understanding these arguments in their historical contexts, we will ask what we can learn from then today and, when relevant, assess how they are being used in contemporary philosophy.

Philosophy 217

Medieval Philosophy (218333)

Jeffrey McDonough

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Notoriously dismissed by Petrarch as the "Dark Ages," the medieval era is one of the most profound and least understood periods in the history of Western philosophy. Among the most prominent philosophers working in that period, Augustine, Aquinas and Ockham stand out as representatives of three of the period' s major philosophical traditions, Platonism, Scholastic-Aristotelianism, and Nominalism. This graduate level course aims to provide an overview of the development of medieval philosophy while exploring in detail a number of central issues, arguments and controversies. Optional readings will place our three central figures in the larger context of philosophical developments in the medieval era. Topics will include skepticism, knowledge, human nature, divine nature, language, realism, conceptualism, and happiness.

Special Topics in Post-Kantian European Philosophy (213403)

Sean Kelly

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

A close reading of some parts of the four volumes of Heidegger's lectures on Nietzsche. Given mostly between 1936 and 1944 these lectures are, in effect, a reading of the entire history of the West. We will pay attention to thinkers from Protagoras, Plato, and Aristotle to Descartes, Kant, Nietzsche, and beyond, focusing both on what they say and what Heidegger says about them. But we will also discuss Heidegger's attempt in these lectures to re-interpret modernity during one of its most tumultuous periods, and what this attempt says about the relation between philosophy and politics.

Course Notes:

Prerequisites: Previous background in post-Kantian European Philosophy required. Phil 138, 139, or similar are especially appropriate.

Embedded EthiCS Teaching Lab (213558)

Jeffrey Behrends

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

The Embedded EthiCS Teaching Lab is a forum for advancing work related to the creation, implementation, revision, and distribution of ethics modules to be used in Computer Science courses and shared on the Embedded EthiCS website. Graduate Fellows workshop their modules in development with all members of the lab, and also consult directly with Postdoctoral Fellows and faculty in philosophy and computer science.

Course Notes:

The teaching lab will be scheduled based on availability of its participants.

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll

Philosophy 317

Time Management and Writing Workshop (218811)

Susanna Rinard

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

A weekly workshop to help graduate students manage their time effectively, along with other suggestions for how to approach writing.

Course Notes:

Open to graduate students in the philosophy department.

Physics

Subject: Physics

Physics 15A

Introductory Mechanics and Relativity (111164)

Julia Mundy

Amir Yacoby

Kathryn Ledbetter

James Mitchell

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Newtonian mechanics and special relativity. Topics include vectors; kinematics in three dimensions; Newton's laws; force, work, power; conservative forces, potential energy; momentum, collisions; rotational motion, angular momentum, torque; static equilibrium, simple harmonic motion, damped and driven oscillations; gravitation; fictitious forces; fluids; special relativity.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15a. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester.

Recommended Prep:

Mathematics preparation at least at the level of Mathematics 1b concurrently is required. However, some elementary ideas from multivariable calculus may be used and students are encouraged to take Mathematics 21a concurrently.

Additional Course Attributes:

Physics 15B

Introductory Electromagnetism (111896)

Carlos Arguelles Delgado

Amir Yacoby

James Mitchell

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Electricity and magnetism. Topics include electrostatics, electric currents, magnetic field, electromagnetic induction, Maxwell's equations, electromagnetic radiation, magnetic fields in materials, and some basic notions in kinetic theory, entropy, temperature, and phase transition associated with electricity and magnetism.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15b. The labs are designed to enhance your understanding of material presented in lectures. They also present applications of electricity and magnetism, as well as offering opportunities to build simple circuits and develop experience using measuring instruments, including oscilloscopes.

Recommended Prep:

Physics 15a, Physics 16, or written permission of the Head Tutor in Physics. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Vector calculus, (div, grad and curl)

are used extensively--in principle, this is taught in the course. Students taking Mathematics 21a concurrently will likely find that some concepts are introduced in Physics 15b before they have seen them in Mathematics 21a. Some students may wish to postpone Physics 15b until they have completed Mathematics 21a.

Mechanics and Special Relativity (111197)

Howard Georgi

Amir Yacoby

Kathryn Ledbetter

Timothy Milbourne

James Mitchell

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Newtonian mechanics and special relativity for students with good preparation in physics and mathematics at the level of the advanced placement curriculum. Topics include oscillators damped and driven and resonance (how to rock your car out of a snow bank or use a swing), an introduction to Lagrangian mechanics and optimization, symmetries and Noether's theorem, special relativity, collisions and scattering, rotational motion, angular momentum, torque, the inertia tensor (dynamic balance), gravitation, planetary motion and a little glimpse of quantum mechanics.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 16. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. Emphasis is placed on collaborative teaching and learning. Many class materials are Mathematics notebooks.

Recommended Prep:

Score of 5 on the mechanics section of the Physics C Advanced Placement exam, or equivalent. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Thorough

knowledge of calculus of one variable and vectors plus some mathematical sophistication. The mathematical level will be significantly higher than that of Physics 15a. If in doubt, check the Canvas site ahead of time, or email the professor at hgeorgi@fas.harvard.edu, or just shop.

Physics 19

Introduction to Theoretical Physics (207005)

Jacob Barandes

2021 Fall (4 Credits) **Schedule:** MWF 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A comprehensive introduction to the foundations of theoretical physics, with a first-principles approach to its five main areas: analytical dynamics, fields, statistical mechanics, relativity, and quantum theory. Specific topics and examples include Newtonian mechanics, chaos, celestial mechanics, electromagnetism, the Lagrangian and Hamiltonian formulations, the connection between symmetries and conservation laws, relativistic gravitation, black holes, and quantum information. In-class discussions regularly addresses relevant issues in the history and philosophy of physics, as well as the conceptual implications of our modern physical theories for making sense of the world around us.

Course Notes:

This course is intended for students from a variety of backgrounds, especially newcomers to physics who are considering further study in the subject. The course is also meant for undergraduate and graduate students in other disciplines—such as math, philosophy, astronomy, biology, chemistry, computer science, and engineering—who are interested in developing a better understanding of theoretical physics either to serve the needs of their academic work or as a first step toward switching their area of study to physics. Cooperation and diversity strengthen our academic community, so the course will prioritize collaboration and aim to provide a welcoming and inclusive environment for students with diverse identities and backgrounds. The instructor will help students form study groups as needed.

Recommended Prep:

This course will assume a working knowledge of single-variable differential and integral calculus at least at the level of Mathematics 1A, as well as a high comfort level with abstract concepts, but will not assume previous coursework in physics or multivariable calculus. Mathematics 1A is not a strict requirement, and students who are unsure whether they have adequate background should contact the instructor. The course will cover relevant topics from vector calculus, complex analysis, linear algebra, and other areas of mathematics as needed, so a prior familiarity with these subjects, while helpful, will not be required.

Physics 90R

Supervised Research (111672)

David Morin

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Primarily for selected concentrators in Physics, or in Chemistry and Physics, who have obtained honor grades in Physics 15 and a number of intermediate-level courses. The student must be accepted by some member of the faculty doing research in the student's field of interest. The form of the research depends on the student's interest and experience, the nature of the particular field of physics, and facilities and support available. Students wishing to write a senior thesis can do so by arranging for a sponsor and enrolling in this course.

Course Notes:

A list of possible faculty sponsors and their fields is available in Lyman 238 and on the Physics Department Web page. Course enrollment forms may be obtained from Lyman 238.

Topics in Current Research (111967)

Robert Westervelt

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0415 PM
W 0730 PM - 0845 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This tutorial is based on the Wednesday Night Seminars. Each Wednesday, two Harvard faculty members introduce their research to interested students, including undergraduates enrolled in the course, as well as graduate students who would like to learn about the topics investigated. The talks illustrate how research is done, and provide examples of projects graduate students might study if they join the group. Before each seminar, the enrolled students read examples of previous work, and they present and discuss the concepts. In the course, students learn how to express scientific concepts verbally, and in writing for their final report. The course is aimed at juniors and seniors who are familiar with the basics in classical mechanics, electricity and magnetism, and quantum mechanics.

Course Notes:

Primarily for junior and senior concentrators, however interested sophomores are welcome.

Electronics for Physicists (216641)

Masahiro Morii

Kathryn Ledbetter

2022 Spring (4 Credits) **Schedule:** WF 0130 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Introduction to electronics tailored for students studying Physics. The course focuses on skills that are applicable to physics laboratory work, including passive filters, op-amp circuits, and analog-to-digital interfaces. Emphasis is placed on safe and effective use of lab equipment and on the ability to read schematics and realize it quickly. The class will meet twice a week, each meeting starting with a 45-

minute lecture followed by a 2-hour lab.

Recommended Prep:

Familiarity with resistance, capacitance, and inductance as taught in Physics 15B and Physical Science 12B. No prior experience with electronics is required.

Physics 123A

Laboratory Electronics – Analog Circuits (218166)

David Abrams

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

A lab-intensive introduction to analog electronic circuit design. Develops circuit intuition and debugging skills through daily hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. Moves quickly from passive circuits, to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters.

Course Notes:

Physics 123a is the same course as Physics 223a; if you are a graduate student, please enroll in 223a. Limited to 20 students. The digital portion of the course, 123b/223b is offered in the spring semester.

Physics 123B

Laboratory Electronics - Digital Circuits (124108)

David Abrams

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

A lab-intensive introduction to digital electronic circuit design. Develops circuit intuition and debugging

skills through hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. After a short introduction to the basics of electronic circuits and MOSFET switches, we move onto digital devices including logic families, Boolean arithmetic, combinatorial and sequential circuits including finite state machines. We continue with analog-digital interfacing, the use of microcontrollers in embedded systems and programmable logic devices (FPGAs). We will also discuss data conversion techniques.

Course Notes:

Physics 123b is the same course as Physics 223b; students may not take both for credit. If you are a graduate student, please enroll in 223b. Limited to 10 students. The analog portion of the course, 123a/223a is offered as a separate course in the fall semester.

Recommended Prep:

Some prior experience with computer programming, especially C or Arduino is helpful.

Widely Applied Physics (120167)

David Morin

2022 Spring (4 Credits) **Schedule:** WF 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Uses physics to analyze important technologies and real-world systems. Stresses estimation and "back of the envelope" calculations, as are commonly used by research physicists. New physical concepts are introduced as necessary. Example topics: energy production and storage, nuclear physics, nuclear power and weapons, health effects of radiation, risk analysis, airplanes, spy satellites, rockets, fluids, water waves, mechanical design and failure, global warming, and cosmology. Emphasis is on developing physical intuition and the ability to do order-of-magnitude calculations.

Recommended Prep:

Physics 15a, b, c, and mathematics at the level of Mathematics 21a. Physics 143a and 181 are very helpful, and may be taken concurrently.

Physics 137

Conceptual Foundations of Quantum Mechanics (218289)

Jacob Barandes

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Quantum theory is our best-tested and most predictive scientific theory by many quantitative measures. The theory reliably accounts for the measurement results of atomic clocks and particle accelerators to many decimal places, and much of our modern technology relies on it. However, the theory's standard textbook postulates are controversial, and there is still no consensus over what precisely the theory entails about the world. This course will cover the century-long effort to resolve these mysteries and others, a story that features fantastical notions like parallel universes, pilot waves, quasi-probabilities, alive-and-dead cats, and spooky action at a distance.

Topics: In the first part of the course, we will review some history, lay out the textbook postulates of quantum theory, and cover how to use the theory in practice. In the second part of the course, we will examine the internal logic of the theory, ultimately explaining why the theory's traditional axioms are not universally regarded as internally consistent or complete. In the third part of the course, we will examine various attempts to patch up and re-interpret the theory to solve these consistency problems. As we proceed, we will continually refer back to relevant questions in philosophy, including debates over metaphysics, instrumentalism, scientific realism, determinism, epistemology, and the meaning of probability.

Recommended Prep:

This course is intended for both science and philosophy students. The course will assume a working knowledge of single-variable differential and integral calculus, as well as a high comfort level with abstract

concepts, but will not assume previous coursework in physics or multivariable calculus. The course will cover relevant topics from vector calculus, complex analysis, linear algebra, and other areas of mathematics as needed, so a prior familiarity with these subjects, while helpful, will not be required.

Physics 141

The Physics of Sensory Systems in Biology (121885)

Aravinthan Samuel

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Living organisms use sensory systems to inform themselves of the sights, sounds, and smells of their surrounding environments. Sensory systems are physical measuring devices, and are therefore subject to certain limits imposed by physics. Here we will consider the physics of sensory measurement and perception, and study ways that biological systems have solved their underlying physical problems. We will discuss specific cases in vision, olfaction, and hearing from a physicist's point of view.

Recommended Prep:

Math 21a,b, Physics 15, or by permission of the instructor.

Requirements: **Anti-Requisite: Cannot be taken for credit if NEURO 141 already complete.**

Elementary Particle Physics (117719)

Carlos Arguelles Delgado

2021 Fall (4 Credits) **Schedule:** WF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to elementary particle physics. Emphasis on concepts and phenomenology rather than on detailed calculational development of theories. Starts with the discovery of the electron in 1897 and ends with the theoretical motivations for the Higgs boson, and attempts to cover everything important in between. Students will also have a brief experience of particle physics research using Atlas experiment open data.

Recommended Prep:

Physics 143a. Physics 143b or equivalent is useful.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
Quantitative Reasoning with Data	Yes

Physics 151

Mechanics (111231)

Arthur Jaffe

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

One can consider this course as a general introduction and overview to theoretical physics, even though it centers on the theoretical aspects of classical mechanics. We will study problems in the mechanics of particle motion and also problems in continuum mechanics, including classical field theory. We will consider linear systems and non-linear ones. We stress the role of conserved quantities in studying the laws of physics, and emphasize the relation between conserved quantities and symmetry. We study Langrangian and Hamiltonian mechanics from the point of view of their relation to different fields of physics, including quantum theory. We discuss soliton solutions to some non-linear classical equations. Time permitting, we will discuss other non-linear phenomena that are important in physics.

Recommended Prep:

Physics 15a, 15b or written permission of the Head Tutor; Mathematics

21a, b or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 153

Electrodynamics (111822)

Philip Kim

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Aimed at advanced undergraduates. Emphasis on the properties and sources of the electromagnetic fields and on the wave aspects of the fields. Course starts with electrostatics and subsequently develops the Maxwell equations. Topics: electrostatics, dielectrics, magnetostatics, electrodynamics, radiation, wave propagation in various media, wave optics, diffraction and interference. A number of applications of electrodynamics and optics in modern physics are discussed.

Recommended Prep:

Physics 15a, b, and c, or written permission of the Head Tutor; Mathematics 21a, b or equivalent.

Laser Physics and Modern Optical Physics (121941)

Markus Greiner

2022 Spring (4 Credits) **Schedule:** WF 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to laser physics and modern optical physics aimed at advanced undergraduates. Review of electromagnetic theory and relevant aspects of quantum mechanics. Wave nature of light. Physics of basic optical elements. Propagation of focused beams, optical resonators, dielectric waveguides. Interaction of light with matter, introduction to quantum optics. Lasers. Physics of specific laser systems. Introduction to nonlinear optics. Modern applications.

Recommended Prep:

Physics 15b, 15c, 143a, or permission of the instructor.

Physics 181

Statistical Mechanics and Thermodynamics (143450)

Susanne Yelin

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course provides an introduction to statistical mechanics and thermal physics. It surveys the fundamental elements of classical and quantum statistical mechanics (ensembles and partition functions) and thermodynamics (temperature, heat, work, free energy) and their application to a variety of physical systems. Topics covered may include heat engines, solid-state physics, blackbody radiation, phase transitions, physical chemistry, stellar physics, quantum information, Bose-Einstein condensation, and transport phenomena.

Course Notes:

May not be taken for credit in addition to Engineering Sciences 181.

Recommended Prep:

Physics 143a or equivalent.

Physics 191

Advanced Laboratory (121993)

Jenny Hoffman

Matteo Mitrano

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Students will engage in the practice and discussion of experimental science by completing three projects, drawn from the fields of condensed matter, atomic, optical, nuclear, and/or particle physics. Laboratory techniques, theoretical understanding, data analysis methods, and scientific reading and writing skills are developed in collaboration with a lab partner, and with guidance from a team of experimental physics faculty and staff. Students will learn to write the results of each project in a format that is appropriate for a peer-reviewed journal. Available experiments range from classics of the twentieth century such as relativistic mass of the electron, lifetime of the muon, superfluid helium, and the quantum Hall effect, to topics of current interest such as slow light, nitrogen-vacancy centers in diamond and optical tweezers.

Course Notes:

A substantial amount of outside reading is expected. Physics 191 is the same course as Physics 247; if you are a graduate students, please enroll in 247.

Recommended Prep:

Physics 15a or 16, 15b, 15c. Physics 143a is highly recommended; 181 is also useful.

Additional Course Attributes:

Physics 195A

Introduction to Solid State Physics (112107)

Julia Mundy

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The physics of crystalline solids and their electric, magnetic, optical, and thermal properties. Designed as a first course in solid-state physics. Topics: free electron model; Drude model; the physics of crystal binding; crystal structure and vibration (phonons); x-ray diffraction; electrons in solids (Bloch theorem) and electronic band structures; metals and insulators; semiconductors (and their applications in pn junctions and transistors); magnetism; superconductivity.

Course Notes:

Physics 195a is also offered as Applied Physics 195a. Students may not take both for credit.

Recommended Prep:

Physics 15a, 15b and 15c or the equivalent. Physics 143a. Physics 181 and Physics 143b (taken concurrently) helpful but not required.

Physics 195B

Introduction to Quantum Materials and Devices (218288)

Robert Westervelt

2022 Spring (4 Credits) **Schedule:** MWF 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course provides an introduction to quantum materials and devices, including low-dimensional

materials, single and double quantum dots, Josephson junctions, and graphene. Their behavior is explained using quantum and semiclassical transport, the Coulomb blockade, and superconductivity. Quantum devices offer new approaches for electronics and photonics.

Course Notes:

Formerly ENGSCI 171. Physics 195b is also offered as Applied Physics 195b. Students may not take both for credit.

Recommended Prep:

Applied Physics 195A or Physics 195A, and Physics 143A or ES 170.

Additional Course Attributes:

Physics 201

Data Analysis for Physicists (161201)

Vinothan Manoharan

2022 Spring (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course covers methods for analyzing experimental data. Students will learn a Bayesian framework for statistical inference, modern computational methods such as Markov-chain Monte Carlo techniques, and the application to problems in particle physics, biophysics, condensed matter, applied physics, astrophysics, and other fields. The course emphasizes an intuitive, principled approach to data analysis and will involve discussions of ethics and reproducible research.

Course Notes:

This course is suitable for students with limited or rusty programming skills. Students with more advanced programming skills may wish to take APMTH 207 or ENG-SCI 255.

Recommended Prep:

Research experience commensurate with that of a first-year (or higher) PhD student in experimental physics. Students without such experimental experience must have taken Physics 191 or Physics 247 (or equivalent) first.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
Quantitative Reasoning with Data	Yes

Physics 218

Quantum Chaos and Localization (110678)

Eric Heller

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The important subject of quantum ergodicity and thermalization is under active investigation. This course is designed to address the questions that arise, developing the fundament tools right up to the research frontier. Chaos theory, Anderson localization, scarring, random matrix theory, decoherence, entanglement, and measurement theory are considered. As much as possible, this course will adopt a seminar format, with student discussion and presentations becoming more important as the term progresses.

Physics 223A

Laboratory Electronics – Analog Circuits (218167)

David Abrams

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

A lab-intensive introduction to analog electronic circuit design. Develops circuit intuition and debugging skills through daily hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. Moves quickly from passive circuits, to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters.

Course Notes:

Physics 223a is the same course as Physics 123a; if you are an undergraduate student, please enroll in 123a. Limited to 20 students. The digital portion of the course, 123b/223b is offered in the spring semester.

Additional Course Attributes:

Physics 223B

Laboratory Electronics - Digital Circuits (109346)

David Abrams

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

A lab-intensive introduction to digital electronic circuit design. Develops circuit intuition and debugging skills through hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. After a short introduction to the basics of electronic circuits and MOSFET

switches, we move onto digital devices including logic families, Boolean arithmetic, combinatorial and sequential circuits including finite state machines. We continue with analog-digital interfacing, the use of microcontrollers in embedded systems and programmable logic devices (FPGAs). We will also discuss data conversion techniques.

Course Notes:

Physics 223b is the same course as Physics 123b; students may not take both for credit. If you are a graduate student, please enroll in 223b. Limited to 10 students. The analog material will be offered as a separate course at a later date.

Recommended Prep:

Some prior experience with computer programming, especially C or Arduino is helpful.

Additional Course Attributes:

Physics 231

Computational Neuroscience (217838)

Haim Sompolinsky

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Follows trends in modern brain theory, focusing on local neuronal circuits as basic computational modules. Explores the relation between network architecture, dynamics, and function. Introduces tools from information theory, statistical inference, and the learning theory for the study of experience-dependent neural codes. Specific topics: computational principles of early sensory systems; adaptation and gain control in vision, dynamics of recurrent networks; feature selectivity in cortical circuits; memory; learning and synaptic plasticity; noise and chaos in neuronal systems.

Course Notes:

Also offered as Neuro 231 and MCB 231. Cannot be taken for credit as Physics 231 if Neuro 231 or MCB 231 is already complete.

Recommended Prep:

Basic knowledge of multivariate calculus, differential equations, linear algebra, and elementary probability theory.

Requirements: **Anti-Requisite: Cannot be taken for credit if MCB 131 or Neuro 131 already complete.**

Physics 247

Laboratory Course in Contemporary Physics (145024)

Jenny Hoffman

Matteo Mitrano

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Students will engage in the practice and discussion of experimental science by completing three projects, drawn from the fields of condensed matter, atomic, optical, nuclear, and/or particle physics. Laboratory techniques, theoretical understanding, data analysis methods, and scientific reading and writing skills are developed in collaboration with a lab partner, and with guidance from a team of experimental physics faculty and staff. Students will learn to write the results of each project in a format that is appropriate for a peer-reviewed journal. Available experiments range from classics of the twentieth century such as relativistic mass of the electron, lifetime of the muon, superfluid helium, and the quantum Hall effect, to topics of current interest such as slow light, nitrogen-vacancy centers in diamond and optical tweezers.

Course Notes:

A substantial amount of outside reading is expected. Physics 247 is the same course as Physics 191; if you are an undergraduate, please enroll in 191.

Additional Course Attributes:

Physics 268AR

Special Topics in Quantum Matter (122818)

Ashvin Vishwanath

2021 Fall (4 Credits) **Schedule:** F 1200 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This is a special topics course on quantum systems of many particles. Two criteria are applied when selecting topics. First, experimental relevance and second, that they illustrate a central concept of quantum many body physics such as: (i) the importance of locality (ii) symmetry and its spontaneous breaking, (iii) gauge theories, deconfinement and higher form symmetries (iv) anomalies and their role in condensed matter, (v) topological stability, (vi) quantum information and the phases of matter. These foundational physical concepts which will be developed in the context of well-defined microscopic models, of quantum spins, electrons in solids or atoms in optical lattices. Where appropriate, we will introduce relevant mathematical tools and quantum field

theory (QFT) to describe some of these phenomena, which will also help demystify QFT in a physical setting free from 'infinities'. This course will make contact with recent research directions such as topological phases, quantum criticality and dualities.

Planned Topics:
1.The 1+1D transverse field Ising model - duality, fermionization, chiral symmetry and anomaly. Experimental realization of "E8" in CoNb2O6.
2. Continuous symmetry breaking in 2+1D. Goldstone modes and the Anderson Tower. The Mott-superfluid transition. Boson-Vortex Duality.
3. Non-perturbative tools such as large-N approach, matrix product states, anomalies and bosonization.
4. Symmetry and Topological Phases . - Integer quantum Hall effect and Chern insulators. The periodic table of topological insulators and superconductors. Anomalies and edge states.
5. Emergent Gauge Theories and topological order. Chern Simons theories. Fractional quantum Hall states and gapped quantum spin liquids. Topological quantum entanglement. Emergent electromagnetism in quantum magnets and "Spin-ice".
6. Special Topics (if time permits): Conformal invariance.

Evaluation:
(a) Assignments (3-4 in total)
(b) work in groups of 2-3 on (b1) research project with individual written report due at the end of the course and (b2) short presentation on a course topic during class. There will be no examinations.

Suggested Text Books:
1. Gauge Fields and Strings: A. Polyakov
2. Quantum Field Theory of Many Body Systems: X. G. Wen
3. Quantum Information Meets Quantum Matter: Bei Zeng et al.
4. Geometry, Topology and Physics: M. Nakahara

Recommended Prep:

Graduate courses in quantum mechanics and statistical mechanics, including familiarity with second quantization and path integrals.

Additional Course Attributes:

Physics 268BR

Renormalization Group Methods in Condensed Matter Physics (160744)

David R. Nelson

2022 Spring (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Renormalization group ideas have had a major impact on condensed matter physics. We plan to develop and illustrate the theory by studying at least three of the following topics: (1) critical phenomena near four dimensions; (2) quantum critical points in Heisenberg spins; (3) flexural phonons in free-standing graphene; and (4) the fluid dynamics of the forced Navier-Stokes equations.

Recommended Prep:

One semester graduate course in statistical mechanics, such as Physics 262 or Applied Physics 284.

Physics 285B

Modern Atomic and Optical Physics II (118509)

Mikhail Lukin

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to quantum optics and modern atomic physics. The basic concepts and theoretical tools will be introduced. Topics will include coherence phenomena, non-classical states of light and matter, atom cooling and trapping and atom optics. The second of a two-term subject sequence that provides the foundations for contemporary research.

Recommended Prep:

A course in electromagnetic theory (Physics 232a or equivalent); one half-course in intermediate or advanced quantum mechanics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 287A

Introduction to String Theory (111191)

Xi Yin

2021 Fall (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to the perturbative formulation of string theories and dualities. Quantization of bosonic and superstrings, perturbative aspects of scattering amplitudes, supergravity, D-branes, T-duality and mirror symmetry. Also a brief overview of recent developments in string theory.

Recommended Prep:

Physics 253a, b or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Physics 287BR

The String Landscape and the String Swampland (114008)

C. Vafa

2022 Spring (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A selection of topics from current areas of research on string theory with focus on String Landscape constructions and restrictions on effective field theories for consistency of quantum gravity (the Swampland program).

Recommended Prep:

Physics 287a.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Physics 289R

Topics in Mathematical Physics (118733)

Arthur Jaffe

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Over the past few years, the development of new mathematical picture languages led to insights in several fields, including quantum information, entanglement, entropy, error correction, uncertainty principles, Fourier analysis, and fusion algebras. This course will overview a number of these directions and develop several of these topics from scratch and in depth, relating them to statistical mechanics models and to quantum field theory.

Recommended Prep:

Physics 253a.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Course Roll	FAS Course Roll

FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 295A

Introduction to Quantum Theory of Solids (127980)

David R. Nelson

2021 Fall (4 Credits) **Schedule:** MWF 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This is an introductory graduate level course in solid-state physics. Lattices and symmetries. Phonons. Electronic Structure of Crystals. Metals, semiconductors, and insulators will be covered. Electrical, optical, and thermal properties of solids will be treated based on an atomic scale picture and using the independent electron approximation. Additional topics from the theory of interacting electrons, including introduction to magnetism and superconductivity, and an introduction to topological insulators.

Recommended Prep:

Physics 181 or equivalent, Applied Physics 195 or equivalent, and a graduate level quantum mechanics course similar to Physics 251a. (Physics 251b would be helpful and may be taken concurrently.)

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Physics 295B

Quantum Theory of Solids (127979)

Ashvin Vishwanath

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A course on the application of the principles of many-particle quantum mechanics to the properties of solids. The objective is to make students familiar with the tools of second quantization and diagrammatic perturbation theory, while describing the theory of the electron liquid, the BCS theory of superconductivity, and theory of magnetism in metals and insulators. Modern topics on correlated electron systems will occupy the latter part of the course.

Course Notes:

Physics 295b is also offered as Applied Physics 295b. Students may not take both for credit.

Recommended Prep:

Physics 251a,b, an introductory course in solid state physics, or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Course Roll	FAS Course Roll

Physics 297

Professional Writing for Scientists and Engineers (217830)

Daniel Needleman

Suzanne Smith

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This class leads students to develop their skills in the critical reading and writing of science and engineering. Genres will include research articles, grant proposals, school/fellowship/job applications, or lay abstracts & press releases for the non-scientific public. Crucially, students will be empowered not only to achieve their own writing goals, but also to break down these learned skills and impart them to others, as effective collaborators and mentors of younger students.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 297

Professional Writing for Scientists and Engineers (217830)

Jenny Hoffman

Suzanne Smith

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This class leads students to develop their skills in the critical reading and writing of science and engineering. Genres will include research articles, grant proposals, school/fellowship/job applications, or lay abstracts & press releases for the non-scientific public. Crucially, students will be empowered not only to achieve their own writing goals, but also to break down these learned skills and impart them to others, as effective collaborators and mentors of younger students.

Class Notes: **Also offered as Eng-Sci 297. We welcome graduate students and senior undergraduates. Course is limited to 18 enrolled students, no auditors.**

FAS: Course Level	Graduate Course

Physics 311A

Experimental Atomic, Molecular, and Low-Energy Particle Physics (148189)

John Doyle

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 311A

Experimental Atomic, Molecular, and Low-Energy Particle Physics (148189)

John Doyle

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 311B

Experimental Atomic, Molecular, and Low-Energy Particle Physics (143819)

John Doyle

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt

Physics 311B

Experimental Atomic, Molecular, and Low-Energy Particle Physics (143819)

John Doyle

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 312A

Topics in Statistical Physics (215749)

Michael P. Brenner

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt

Physics 312A

Topics in Statistical Physics (215749)

Michael P. Brenner

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None

Physics 312B

Topics in Statistical Physics (215750)

Michael P. Brenner

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course

Physics 312B

Topics in Statistical Physics (215750)

Michael P. Brenner

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 313A

Experimental Condensed Matter Physics (122839)

Amir Yacoby

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 313A

Experimental Condensed Matter Physics (122839)

Amir Yacoby

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course

Physics 313B

Experimental Condensed Matter Physics (122840)

Amir Yacoby

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 313B

Experimental Condensed Matter Physics (122840)

Amir Yacoby

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt

FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 314A

Ultrafast dynamics of quantum materials (216655)

Matteo Mitrano

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 314A

Ultrafast dynamics of quantum materials (216655)

Matteo Mitrano

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 314B

Ultrafast dynamics of quantum materials (216656)

Matteo Mitrano

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 314B

Ultrafast dynamics of quantum materials (216656)

Matteo Mitrano

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt

Physics 315A

Topics in Theoretical Atomic, Molecular, and Condensed Matter Physics (121332)

Eric Heller

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 315A

Topics in Theoretical Atomic, Molecular, and Condensed Matter Physics (121332)

Eric Heller

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 315B

Topics in Theoretical Atomic, Molecular, and Condensed Matter Physics (145282)

Eric Heller

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 315B

Topics in Theoretical Atomic, Molecular, and Condensed Matter Physics (145282)

Eric Heller

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 316A

Topics in biophysics and physical chemistry (215741)

Adam Cohen

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None

Physics 316A

Topics in biophysics and physical chemistry (215741)

Adam Cohen

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 316B

Topics in biophysics and physical chemistry (215742)

Adam Cohen

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt

Physics 316B

Topics in biophysics and physical chemistry (215742)

Adam Cohen

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll

Physics 317A

Topics in Biophysics (119763)

Xiaowei Zhuang

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 317A

Topics in Biophysics (119763)

Xiaowei Zhuang

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 317B

Topics in Biophysics (119764)

Xiaowei Zhuang

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 317B

Topics in Biophysics (119764)

Xiaowei Zhuang

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 318A

High-Energy Neutrino Physics (216657)

Carlos Arguelles Delgado

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO

FAS Divisional Distribution	None
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course

Physics 318A

High-Energy Neutrino Physics (216657)

Carlos Arguelles Delgado

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt

Physics 318B

High-Energy Neutrino Physics (216658)

Carlos Arguelles Delgado

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 318B

High-Energy Neutrino Physics (216658)

Carlos Arguelles Delgado

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course

Physics 319A

Topics in Experimental High Energy Physics (113986)

melissa franklin

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 319B

Topics in Experimental High Energy Physics (113987)

melissa franklin

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll

Physics 320A

Topics in Theoretical AMO / Quantum Optics (217917)

Susanne Yelin

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Reading and research. Not a lecture or seminar course.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll

Physics 320A

Topics in Theoretical AMO / Quantum Optics (217917)

Susanne Yelin

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Reading and research. Not a lecture or seminar course.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 320A Section: 01

Topics in Theoretical AMO / Quantum Optics (217917)

Susanne Yelin

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Reading and research. Not a lecture or seminar course.

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course

Physics 320B Section: 01

Topics in theoretical AMO/Quantum Optics (217918)

Susanne Yelin

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Dissertation research. Not a lecture or seminar course.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt

Physics 321A

Experimental Soft Condensed Matter Physics (112282)

David Weitz

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt

No FAINFO	300 or 3000 level class, do not generate FAINFO
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll

Physics 327B

Topics in Condensed Matter Physics (118814)

David R. Nelson

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
Course Evaluation	Course Evaluation Exempt
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 327B

Topics in Condensed Matter Physics (118814)

David R. Nelson

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll

Physics 331A

Topics in String Theory (125320)

Xi Yin

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll

Physics 331A

Topics in String Theory (125320)

Xi Yin

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 331B

Topics in String Theory (125321)

Xi Yin

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration

Course Evaluation	Course Evaluation Exempt

Physics 331B

Topics in String Theory (125321)

Xi Yin

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 333A

Experimental Atomic Physics (112040)

Mara Prentiss

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None

Physics 333A

Experimental Atomic Physics (112040)

Mara Prentiss

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Reading and research. Not a lecture or seminar course.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt

FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll

Physics 333B

Experimental Atomic Physics (112042)

Mara Prentiss

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Dissertation research. Not a lecture or seminar course.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 333B

Experimental Atomic Physics (112042)

Mara Prentiss

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course

Physics 334A

Theoretical and Experimental Evolutionary Dynamics (219976)

Michael Desai

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Reading and research. Not a lecture or seminar course.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 334B

Theoretical and Experimental Evolutionary Dynamics (219977)

Michael Desai

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Dissertation research. Not a lecture or seminar course.

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO

Physics 337A

Topics in Experimental High Energy Physics (114834)

Masahiro Morii

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll

Physics 337A

Topics in Experimental High Energy Physics (114834)

Masahiro Morii

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation Exempt
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 337B

Topics in Experimental High Energy Physics (114835)

Masahiro Morii

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO

Subject: Physical Sciences

Physical Sciences 2

Mechanics, Elasticity, Fluids, and Diffusion (122575)

Gregory Kestin

Timothy Milbourne

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

An introduction to classical mechanics, with special emphasis on the motion of organisms in fluids. Topics covered include: kinematics, Newton's laws of motion, oscillations, elasticity, random walks, diffusion, and fluids. Examples and problem set questions will be drawn from the life sciences and medicine.

Recommended Prep:

Physical Sciences 1 (or Chemistry 7), Mathematics 1b, or the equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Final Assessment Category	Three-hour Exam
FAS Course Roll	FAS Course Roll
FAS: Course Level	Primarily for Undergraduate Students

Physical Sciences 3

Electromagnetism, Circuits, Waves, Optics, and Imaging (122576)

melissa franklin

Gregory Kestin

Timothy Milbourne

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is an introduction to electromagnetism, digital information, waves, optics and sound. Topics covered include: electric and magnetic fields, electrical potential, circuits, simple digital circuits, wave

propagation in various media, microscopy, sound and hearing. The course will draw upon a variety of applications to the biological sciences and will use real-world examples to illustrate many of the physical principles described. There are six laboratories.

Course Notes:

This course is part of an integrated introduction to the physical sciences intended for students who plan to pursue a concentration in the life sciences and/or satisfy pre-medical requirements in Physics. May not ordinarily be taken for credit in addition to Physics 15b.

Recommended Prep:

Physical Sciences 2, Mathematics 1b, or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Mechanics and Statistical Physics from an Analytic, Numerical and Experimental Perspective (109274)

Efthimios Kaxiras

Anna Klales

2022 Spring (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This is the first term of a two-semester introductory course in physics. The focus is on quantitative scientific reasoning, with the first term exploring Newtonian mechanics. Topics include kinematics, linear and rotational motion, forces, energy, momentum, collisions, gravitation, oscillations, waves, and a brief introduction to statistical physics. Examples are drawn from across the physical sciences and engineering.

Students will gain competence in both analytic (using pencil, paper, and single-variable calculus) and numerical methods (using the python programming language) to model simple physical systems and to analyze experimental data.

The course is aimed at first year students who have an interest in pursuing a concentration in the sciences or engineering. The course includes lecture, laboratory, and discussion components.

Course Notes:

Physical Sciences 12a may not be taken for credit by students who have passed Physics 15a or 16.

Recommended Prep:

This course presumes no prior experience with calculus-based physics. Students should be fluent in single-variable calculus at the level of Mathematics 1b.

This course presumes no prior experience with programming; however, we do expect students will regularly attend our Friday seminars to become proficient in Python, which will be used extensively throughout the course.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students

Physical Sciences 12B

Electromagnetism and Quantum Physics from an Analytic, Numerical and Experimental Perspective (109457)

Camille Gomez-Laberge

Susanne Yelin

2021 Fall (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This is the second term of a two-semester course sequence of introductory physical science and engineering. The focus is on quantitative scientific reasoning, with the second term exploring classical electricity and magnetism. Topics include electrostatics and magnetostatics, analog circuits, electromagnetic fields, optics, and a brief introduction to quantum physics and its applications. Examples are drawn from across the physical sciences and engineering.

The course assumes familiarity with mechanics, statistical physics, and computational techniques covered in Physical Sciences 12a offered during Spring Term (see course description). Students will further develop competence in both analytic (using pencil, paper, and multi-variable calculus) and numerical methods (using the Python programming language) to model simple physical systems and to analyze experimental data.

The course is aimed at second year students who have an interest in pursuing a concentration in the sciences or engineering. The course includes lecture, laboratory, and discussion components.

Course Notes:

May not be taken for credit by students who have passed Physics 15b or Physics 15c.

Requirements: **Pre-Req: PS12A OR APMTH 10 OR Co-Req: APMATH 10**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
Quantitative Reasoning with Data	Yes

Physical Sciences 70

Introduction to Digital Fabrication (215717)

Nathan Melenbrink

2022 Spring (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

A hands-on introduction to rapid prototyping, integrating physics and engineering, design, computer science and art. Students will learn to safely use software and hardware to fabricate programmable projects. Tools and topics will include electronic circuit design, 3D CAD, programmable microcontrollers, and wireless networking (Internet of Things). Additionally, students will learn operational principles for techniques such as laser cutting, 3D printing, and computer-controlled milling. Students will work with course staff to prepare their design files and remotely operate machines, after which the fabricated components will be mailed to them. Applications may include personal fabrication, product prototyping, fine arts and the creation of scientific research tools. The course will culminate with an individual final project, integrating as many of the weekly topics as possible. Each student will document work on each weekly topic in a personal website, thereby finishing the course with an online portfolio that not only illustrates their new skill sets, but also contributes to a collective repository of knowledge that serves as a foundation for continued learning.

Course website: https://tinyurl.com/tasr7b6

Related Sections: In addition to class times, the course staff will be available for lab sections scheduled throughout the week. Students are required to attend at least one lab section per week to check in with course staff on their progress, and are otherwise free to attend as many additional sections as they like.

Course Notes:

Attendance is mandatory since safety training will occur during class times. Class will meet twice each week. The first meeting will consist of a brief review of the previous week's assignment, followed by a short introduction to the current week's topic and assignment. The second meeting will primarily focus on a hands-on training session for the accompanying assignment. Meetings may also include appearances by guest presenters or experts on a particular topic.

Recommended Prep:

There are no formal prerequisites for this course. Students are expected to provide their own laptop computer (tablets and Chromebooks are not sufficient for some of the software required for this course, but workarounds may be available -- please contact course staff with concerns). This course is accessible to those with no prior experience. For students already familiar with some of the topics, it will be an opportunity to explore further.

Population Health Sciences 2000A

Quantitative Research Methods in Population Health Sciences I (203329)

Jarvis Chen

Issa Dahabreh

2021 Fall (4 Credits) **Schedule:** TR 1130 AM - 0100 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

This is part one of a two part core year-long quantitative methods course for the Population Health Science PhD students at the School of Public Health. The course integrates methods and concepts from the various disciplines represented by Population Health Sciences to equip students with the methodological tools to conduct their own research as well as collaborate across fields of study and areas of specialization. PHS2000A covers foundational statistical methods including linear and logistic regression, generalized linear models, survival analysis, longitudinal data analysis, and multilevel modeling. Discussion will be given to important concepts including sampling, measurement, model specification, interpretation, estimation, and diagnostics. Coursework will consist of two weekly lectures and a weekly lab session, problem sets, and exams. R is the main statistical computing software that will be used in the course.

Course Notes:

This course is reserved for first-year PhD students in Population Health Sciences. Population Health Sciences PhD students are required to register for both semesters of this course and to achieve a final average grade of B or higher.

Requirements: **Requisite: Course open to First Year GSAS (G1) Students Only**

Additional Course Attributes:

David Canning

2022 Spring (4 Credits) **Schedule:** TR 1130 AM - 0100 PM

Instructor Permissions: None **Enrollment Cap:** 50

This is part two of a two part core year-long quantitative methods course for the Population Health Science PhD students at the School of Public Health. The course integrates methods and concepts from the various disciplines represented by Population Health Sciences to equip students with the methodological tools to conduct their own research as well as collaborate across fields of study and areas of specialization. Part two of the course focuses on scientific inference and causal reasoning in the population health sciences and will provide an overview of methods for sensitivity analysis, interaction, mediation, propensity scores, time-varying exposures, measurement and correction for measurement error, instrumental variables, regression discontinuity designs, difference-in-difference methods, time series, missing data, multiple testing, replication, and meta-analysis. Emphasis will be placed on understanding the basic definitions, assumptions, and methodology. Students will be referred to further readings and courses to gain more detailed understanding. Coursework will consist of two weekly lectures and a weekly lab session, problem sets, and exams. Various software resources will be used throughout the course, with R being the main statistical computing platform used. The course will prepare students to critically read through the empirical population health science literature, and to implement a number of different methods in their own research.

Course Notes:

This course is reserved for first-year PhD students in Population Health Sciences. Population Health Sciences PhD students are required to register for both semesters of this course and to achieve a final average grade of B or higher.

Psychology

Subject: Psychology

Psychology 1

Introduction to Psychological Science (123941)

Jason Mitchell

2022 Spring (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Psychology 1 is not just an introduction to the field of psychology but an owner's manual for the human mind — and an opportunity to explore some of the most fascinating issues in intellectual life. After laying a foundation in concepts about the brain, evolution, information, nature and nurture, and scientific approaches to psychology, the course covers specific topics including perception, cognition, attention, learning, memory, emotion, decision making, consciousness, development, language, personality, individual differences, psychopathology, social cognition, cooperation and conflict, and love and sex.

Requirements: **Anti-Req: Cannot be taken for credit if SLS 20 already complete.**

Cognitive Neuroscience (126551)

Daniel Schacter

Elizabeth Phelps

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

How do our brains give rise to our minds? Specifically, how are mental processes related to neural activity? This course will explore these questions, as well as the methods by which cognitive neuroscience seeks to answer them. We will focus on processes within perception, attention, memory, language, action, emotion, and social cognition, and methods including neuroimaging, neuropsychology, and electrophysiology.

Course Notes:

This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Requirements: **SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1**

Psychology 15

Social Psychology (114178)

Fiery Cushman

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An introduction to social psychological research and theory regarding everyday behavior, incorporating methods from the life sciences (neuroscience, genetics, evolutionary biology). Topics include: attitudes and social influence; obedience to authority; stereotyping, prejudice, and intergroup relations; emotion; interpersonal attraction; morality and prosocial behavior; and errors of everyday human judgment

Course Notes:

This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or 1B=7 or Psyc S-1) before enrolling in this course for all freshmen and sophomores and for all students completing a concentration or secondary field in psychology.

Psychology 971

Contemporary Issues in Psychology: Intensive Cross-level Analyses (113094)

Jill Hooley

Katherine Powers

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Examines selected issues and phenomena in contemporary psychological research. Special attention to examining topics from a variety of perspectives, to reading primary sources in the field, and to developing thinking, writing, research, and discussion skills. This tutorial, or Psychology 975, is required of concentrators upon entering the concentration, normally in the sophomore year. Letter graded.

Course Notes:

Students may take this course before formally declaring Psychology as their concentration. PSY 971 and PSY 975 are interchangeable for Psychology requirements.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.**

Mood Disorders (212742)

Jill Hooley

Katherine Powers

2021 Fall (4 Credits) **Schedule:** F 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Most of us feel sad or down from time to time, yet some of us experience clinical depression that can last months or years. Why are some people more vulnerable to developing depression than others? This course will draw on classic and cutting-edge empirical research to examine the etiology, symptom presentation, course, and treatment of mood disorders including depression, bipolar and related disorders.

Course Notes:

Students who have taken PSY 1855/PSY 980JK Mood Disorders cannot enroll in this course.

Class Notes: **The instructor is Stephanie Roberts, drstephanieroberts@gmail.com.**

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.**

Psychopathology and the Family (212743)

Jill Hooley

Katherine Powers

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

In this course, we will explore how the family impacts psychopathology, including relapse, recovery, and resilience, for a member with a mental disorder. We will examine the relationship between the family and mental health conditions like anxiety, autism, depression, personality disorders, and schizophrenia from a life course and a family systems perspective. We will also examine these relationships by discussing the biopsychosocial features of the family that impact child and adolescent psychopathology. The course will focus on contemporary approaches to family life (e.g., dual-earner families, gender equality, LGBTQ+ families, etc.), and the role these approaches play in family functioning. The course will also examine the impact the current COVID-19 pandemic is having on family systems, as well as the increased need for telehealth services.

Class Notes: **The instructor is John Knutsen, john_knutsen@g.harvard.edu.**

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.**

Intergroup Conflict (212744)

Jill Hooley

Katherine Powers

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This course will review the psychological theories and research regarding intergroup conflict, ranging from the thought processes that contribute to prejudice and discrimination, to interpersonal processes that occur within a group to encourage conflict with other groups, to behavioral manifestations of bias and prejudice. Students will read original research on concepts such as implicit bias, obedience, and conformity and apply these concepts to real-world conflicts, including those centered on sex, race, ethnicity, religion, and sexual orientation. While social psychological theories are the focus of this course, implications for clinical, forensic, organizational, political, and peace psychology will be explored. Students will be encouraged to consider how the research can be applied to reduce intergroup conflict.

Course Notes:

The instructor is Lindsey Davis, Lindsey_Davis@williamjames.edu.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 980AH

Psychology of Cults (214498)

Jill Hooley

Katherine Powers

2022 Spring (4 Credits) **Schedule:** F 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

In November of 1978, 909 members of The People's Temple perished in Jonestown, Guyana after drinking Kool Aid laced with cyanide. David Berg of the Children of God convinced his followers to abandon their monogamous marriages, encourage pedophilia, and allow their children to be sex trafficked. How do certain groups convince people to harm and even kill themselves and their children? This course will

explore the psychological mechanisms that enable cults to form and to take human belief and behavior to such extremes. What do cults share with other groups (mainstream religions, nations, everyday social interactions, etc.), and what makes them stand apart? In what ways are cults an environment in which many of our psychological tendencies (toward ingroup conformity, heuristic decision making, rationalization, etc.) are magnified? And what do cults reveal about the profound power of our social environment? We will examine case studies through the lens of empirical psychological science to uncover how psychological research can shed light on cult behavior, and how cult behavior can shed light on our everyday psychology.

Course Notes: **The instructor is Bethany Burum, bethanyburum@gmail.com.**

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or PSY 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB=7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.**

Psychology of Humor (218334)

Jill Hooley

Katherine Powers

2021 Fall (4 Credits) **Schedule:** MW 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This is an intensive, half-term seminar that runs during the first 7 weeks of the semester (from September 1 - October 15). What makes some jokes funny but others dull? Why does the act of laughing feel good? From an evolutionary perspective, if seeking food, finding mates, and detecting predators served a clear purpose, what could be gained by mirthful laughter? What benefits could justify the energy cost of laughing? The answers to these questions are deeply rooted in ancient neurocognitive mechanisms that evolved over long periods of time. In this course, we will critically evaluate scientific perspectives on humor from different subfields of psychology including clinical psychology, social psychology, and cognitive neuroscience. Covered topics will include different styles of humor, why some jokes are funnier when we laugh with friends, why it feels hurtful when others laugh at us, and how humor and laughter are affected across certain mental health disorders.

Course Notes: **This is a full credit, half-term course.**

Class Notes: **The instructor is Arkadiy Maksimovskiy, amaksimovskiy@mclean.harvard.edu.**

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Clinical Psychology in Everyday Life (207581)

Jill Hooley

Katherine Powers

2021 Fall (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

The goal of this course is to give you exposure to the types of evidence-based psychological interventions available for many clinical and non-clinical conditions, such as sadness, anxiety, substance use, and arguments with your significant other, with an emphasis this year on taking effective action in times of stress. Through this seminar, you will learn to notice and apply principles of psychological intervention to the world around you, not only in theory but also in practice. The seminar is not a self-help program or a training program for providing therapeutic services to others. Instead, the weekly discussions, exercises, and assignments will help you view the world through the lens of a scientist-practitioner – and apply those insights to everyday life in a scientific manner.

Course Notes:

This is the same course as PSY 1852 Clinical Psychology in Everyday Life, which has been offered previously. Students who have taken 1852 cannot enroll in this course.

Class Notes: **The instructor is Lauren Santucci, lsantucci@fas.harvard.edu.**

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Understanding Autism (207681)

Jill Hooley

Katherine Powers

2022 Spring (4 Credits) **Schedule:** F 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Roughly 1 in 44 children has been identified with autism spectrum disorder (ASD), yet we still do not know what causes it, or how best to provide services and support for it. This course provides students with a broad, interdisciplinary exploration of ASD from infancy through adulthood. We explore three major themes: 1) the psychological and neurological drivers of ASD, including deficits in social cognition, executive function, and perception; 2) the epidemiology and clinical practice of ASD, including diagnosis and treatment modalities, and individual and sex/gender differences; and 3) the personal and societal impact of ASD, including discussion of quality of life, neurodiversity, policy, and advocacy. We will also explore the impact of the current COVID-19 pandemic for individuals with ASD and their families.

Course Notes:

The instructor is John Knutsen, john_knutsen@g.harvard.edu.

But Why?: Ultimate Explanations for the Quirks of the Mind (203917)

Jill Hooley

Katherine Powers

2021 Fall (4 Credits) **Schedule:** W 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Social psychology has documented many surprising features of the human mind, providing robust evidence that people deceive themselves, are systematically overconfident, believe implausible things to avoid inconsistency, and so on. Explanations often focus on proximate psychological mechanisms (e.g., we avoid inconsistency because we find it uncomfortable). But behind every proximate mechanism is an

ultimate explanation (why is inconsistency uncomfortable?)—why did evolution or learning lead us to be this way? This course will examine proximate and ultimate explanations for classic social psychological phenomena and the insight that ultimate level explanations add, with a focus on how to test ultimate explanations convincingly.

Course Notes:

This is the same course as PSY 1576 But Why? Ultimate Explanations for the Quirks of the Mind, which has been offered previously. Students who have taken 1576 cannot enroll in this course.

Class Notes: **The instructor is Bethany Burum, burum@wjh.harvard.edu.**

How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies (207824)

Jill Hooley

Katherine Powers

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Why do our ideologies change when we are put in positions of power (e.g., victim dehumanization), or subordination (e.g., Stockholm Syndrome), or with peers with a different opinion (e.g., conformity)? Why are our moral and political ideologies so different across time and culture (e.g., the ideologies of ISIS members compared to Americans)? Why do we claim that our morals are logically justifiable when we cannot justify them (e.g., moral dumbfounding)? This course will explore the hidden incentives that can explain these and many other puzzling features of our beliefs and ideologies. Evidence from psychology, as well as philosophy, economics, history, and current events (including the election cycle), will demonstrate the crucial way that incentives outside of our awareness shape our beliefs and ideologies.

Course Notes:

The instructor is Bethany Burum, bethanyburum@gmail.com.

This is the same course as PSY 1575 How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies, which has been offered previously. Students who have taken 1575 cannot enroll in this course.

Recommended Prep:

The Psychology Department requires completion of Science of Living

Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

How to Reason Better (218330)

Jill Hooley

Katherine Powers

2021 Fall (4 Credits) **Schedule:** F 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Psychology has documented numerous ways in which people reason suboptimally and make poor decisions. But how can we use this research—along with research from philosophy, economics, and statistics—to correct these mistakes and improve inference? This course will introduce students to a framework for avoiding the most well-known pitfalls of thought and for properly updating beliefs on the basis of evidence. Special emphasis will be placed on applications in everyday life. Students will come away from the course with a new toolkit for spotting flawed arguments in media, politics, law, and business interactions; and for better evaluating their own patterns of reasoning.

Class Notes: **The instructor is Adam Bear, adambear@fas.harvard.edu.**

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Health: A Positive Psychology Perspective (126556)

Ellen Langer

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Why does it seem that some people are so resilient and content? This course looks at psychological and physical health from the perspective of Positive Psychology. The major focus will be on mindfulness theory and its relationship to stress/coping; illness/wellness; decision-making; and placebos. The medical model, the biosocial model, and a unified mind-body model will be compared to examine their role in becoming mindful and thus healthier, happier and less stressed.

Class Notes: **There will be a course preview event for this course on August 23rd at 10:00am. A Zoom link will be available on the canvas course site.**

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology of Women (110216)

Nicole Noll

2022 Spring (4 Credits) **Schedule:** TR 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

How does being a woman affect our behavior, our evaluations of ourselves, and our interactions with others? This course examines psychological science on women and girls in western industrialized societies, addressing such topics as gender stereotypes, girlhood, women and work, relationships, pregnancy and motherhood, mental health, violence against women, and women in later adulthood. We will consider these topics through an understanding of gender as a social construction, being mindful of the intersections of gender, sexuality, class, and race. Although focused on women's lives and experiences, this course is highly relevant to people of all genders.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.**

Psychology of Sleep (216078)

Garth Coombs

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Sleep is arguably one of the most evolutionarily conserved behaviors across the animal kingdom. The average human will spend one third of their life sleeping (not to mention an average of 7 years spent in bed just trying to get to sleep). We all sleep, but what exactly is sleep and why do we spend so much time asleep? What happens when we don't get enough sleep? What factors influence quality of sleep? Scientific evidence increasingly indicates the importance of sleep for cognitive performance and physical and mental

health, and points to disrupted sleep as both a cause and consequence of mental illness. This course will delve into these scientific findings to address the "what" and "why" of sleep by drawing on key advances from psychological and neuroscientific perspectives.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.**

Psychology 1017

Nature Can Nurture: Fostering an Ecological Worldview (217526)

Jacob Rode

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

Ever wonder why taking a walk on the beach, or in a park, or through trees, makes you feel restored and renewed? Does a short trip outside improve your mood? Although popular media encourages people to get outside and explore nature, it is unclear how many of these claims about nature are actually backed by research. Students taking this course will review research on these topics through the lens of conservation psychology, a field that focuses on the relationship between humans and nature and applies traditional psychological principles to issues of environmental degradation. Students will explore the history of conservation psychology as well as its various subfields and current approaches within the field. Additionally, students will apply principles of conservation psychology to their everyday lives and engage with emerging research in the field to find ways of improving and pushing the field forward. From recycling to energy efficiency to habitat preservation, conservation will be a key theme in this course. As climate change continues to threaten ecological health, we will explore how to leverage psychological insights to enrich the human-nature relationship.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.**

The Science and Psychology of Music (218517)

Mayron Pereira Piccolo Ribeiro

2022 Spring (4 Credits) **Schedule:** TR 0430 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 35

Music is an important ally when we feel like celebrating and when we are feeling down. It can distract us, make us forget or remember things more easily. Why do songs like "The Scientist" give us a sad vibe while songs like "I Got a Feeling" set the stage for a fun night ahead? Is music training like CrossFit for the brain? How can music engagement (i.e., passive listening or active making of music) support well-being? In this course, we will explore how music modulates our thoughts, feelings, and behaviors through the lens of psychological science. We will look at how the brain experiences music and the impact of music and musical training on brain plasticity throughout different stages of development. Finally, using empirical research and case studies, we will discuss how music is applied to daily life and how it has benefited premature babies, individuals with mental disorders (such as depression), as well as conditions such as Alzheimer's disease and Parkinson's disease.

Class Notes: **Section pending enrollment.**

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Your Brain on Drugs: Psychopharmacology (122224)

Scott Lukas

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An introduction to how drugs affect mood, sensation, consciousness, and other psychological and behavioral functions in both healthy and disease states. Introduces concepts in neuroscience and pharmacology to understand how drugs are used to treat drug abuse, psychiatric disorders and why individuals use recreational drugs. Covers all CNS drugs, including antidepressants, antipsychotics, alcohol, and both licit and illicit drugs of abuse. Debates controversial topics such as research with psychiatric populations, diagnosing ADHD, teenage suicide, marijuana legalization, and needle exchange programs.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 18, MCB/NEURO 80, MCB 81 or Psyc S-1240 before enrolling in this course; or permission of instructor.

Modern Neuroanatomy (203208)

Randy Buckner

2021 Fall (4 Credits) **Schedule:** M 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

How does the global architecture and local organization of brain systems support behavioral and cognitive functions? In this class, classical and newer neuroanatomical discoveries will be discussed that cover what defines brain areas; how areas are organized into parallel, distributed circuits; how distinct areas and systems are organized; and how anatomical form relates to function. Anatomy in the human brain and from model systems (worm, mouse, barn owl, and monkey) will be used to illustrate principles. Newer techniques and analytical approaches will be discussed including micro-scale and macro-scale connectomics. The goal of this class is to survey examples of how emerging understanding of neuroanatomy provides insight into function. Each class will consist of lecture and discussion.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 18, or MCB/NEURO 80 before enrolling in this course, or permission of instructor.

Requirements: **Pre-Requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY18 or MCB80 or NEURO80**

Anti-Req: Cannot be taken for credit if NEURO 1202 already complete.

Brain Damage as a Window into the Mind: Cognitive Neuropsychology (116622)

Alfonso Caramazza

2021 Fall (4 Credits) **Schedule:** T 0900 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Examines the patterns of perceptual, motor, cognitive, and linguistic impairments resulting from brain damage. The focus is on the implications of the various types of neuropsychological deficits (such as visual neglect, dyslexia, and aphasia) for theories of the mind and the functional organization of the brain.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, MCB 80, or MCB 81 before enrolling in this course; or permission of instructor.

Requirements: **Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or MCB80 or NEURO80 or MCB81**

Psychology 1309

Essentials of fMRI for Cognitive Neuroscientists (207573)

Talia Konkle

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0530 PM

Instructor Permissions: None **Enrollment Cap:** n/a

With functional magnetic resonance imaging (fMRI), we can now see into the human brain and map activity across different regions. If you are using fMRI in your research, or think you may want to in the future, this course will cover the critical aspects of neuroimaging with the goal of making you an informed practitioner. In the first part of the course, we will cover content including signal acquisition, experimental protocol design and power, and the general linear modeling framework for data analysis. In the second part of the course, we will survey the recent advances in fMRI data analysis, e.g. multivariate analyses, voxel-wise encoding models, functional connectivity analyses. Depending on your level of experience, you will complete a project that employs one of these techniques, either on your own dataset, or from datasets available online.

Course Notes:

This course is intended for both advanced undergraduates and graduate students.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, MCB/NEURO 80, or MCB 81 before enrolling in this course; or permission of instructor.

Requirements: **Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or MCB80 or NEURO80 or MCB81**

Additional Course Attributes:

Psychology 1311

Precision Cognitive Neuroscience: Opportunities Afforded by Deep, Intensive Study Within Individuals (217604)

Randy Buckner

2022 Spring (4 Credits) **Schedule:** M 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

What are the opportunities afforded by doing experimental work fully within an individual rather than the more traditional approach of seeking central tendencies in groups? The field of cognitive neuroscience, like many others, confronts a tension between questions and experimental approaches that seek to generalize across individuals versus those that seek to describe detailed characterization within the individual. In this seminar historical perspectives and recent technological advances will be surveyed to showcase the opportunities, limitations, and unmet challenges of precision exploration within the individual. Discussions will begin from a historical perspective, then survey examples where breakthroughs were made from case studies (neuropsychology) and small N samples (neurophysiology), and then progress into approaches that allow precision neuroscientific exploration (including intensive repeat scanning as in the MyConnectome project) and dynamic behavioral phenotyping using wearables and new remote testing technologies. Challenges including how to frame hypotheses, considerations of the goals toward generalization, and discussion of new statistical approaches will be included in the readings. At the end of this seminar students will achieve practical knowledge of how within-individual experimental designs can complement the more commonly implemented group-based studies and ways to think about combining the strengths of both approaches.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Requirements: **Pre-Req: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18**

Decisions Big and Small: The Cognitive Science of Making Up Your Mind (212749)

Tomer Ullman

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Life is full of decisions, but not all decisions are made equal. Choices can be big and consequential (should I focus on my success, family, or passion), or small and everyday (going out, or staying in). This course will introduce you to the cognitive science of judging and choosing. You will learn about 1) Rational planning, the kind a perfect intelligence might carry out 2) Common simplifications and shortcuts that non-perfect humans use, and how these may actually be appealing approximations for any decision-making system 3) Regret over choices taken and not taken 4) Making decisions with others 5) Transformative decisions, the ones that change who you are as a person. As we cover these topics, we will consider how to apply the insights from the psychology of decision making to your own ordinary and extraordinary choices.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.**

The Emotional, Social Brain (216792)

Elizabeth Phelps

2022 Spring (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Emotions color our lives, and even everyday variation in emotional experience can influence how we think, perceive and decide. Many of our emotions stem from our experiences with others. In this seminar we will examine the science behind the influence of emotion and social interaction on human brain function and behavior. We will examine questions such as: How does the brain process threats, and how do we learn about potential threats from others? How, and why, do our memories for emotional events differ from memories for mundane events? How does the brain process rewards, and respond to social rewards such as trust? What can we learn about implicit social biases from understanding their representation in the brain? What can we learn about the brain systems of human emotion and social interactions from studying other animals? Building on this foundational knowledge, we will explore how advances in human brain science might inform larger societal issues, including legal decisions, clinical interventions for the treatment of anxiety, and racial bias.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.**

Imagination, Pretense, and Make-Believe Worlds (216126)

Tomer Ullman

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 18

People spend much of their time in make-believe worlds: children pretend, adults daydream, and both immerse themselves in movies and novels. The imagination plays a large role in our mental lives, different from perception and memory. This seminar will examine imagination, simulation, and pretense from the perspective of modern psychology and cognitive science. We will consider imagination from its infancy in children's play, through its use and abuse in adulthood, up to recent attempts to give machines the ability to imagine and dream.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.**

Psychology 1401

Computational Cognitive Neuroscience: Building Models of the Brain (160656)

Samuel Gershman

2022 Spring (4 Credits) **Schedule:** WF 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 48

"What I cannot create, I do not understand." This course applies Richard Feynman's dictum to the brain, by teaching students how to simulate brain function with computer programs. Special emphasis will be placed on how neurobiological mechanisms give rise to cognitive processes like learning, memory, attention, decision-making, and object perception. Students will learn how to understand experimental data through the lens of computational models, and ultimately how to build their own models.

Course Notes:

Anti-Requisite: Cannot be taken for credit if Neuro 1401 already complete.

Recommended Prep:

Students be comfortable with a numerical programming language (e.g., Python, Matlab, R). Psychology concentrators should have taken Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, MCB/NEURO 80 or MCB 81 before enrolling in this course; or permission of instructor.

Requirements:

Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18 or MCB80 or NEURO80 or MCB81

Anti-requisite: Cannot be taken for credit if NEURO 1401 already completed

Psychology 1406

Biological and Artificial Visual Systems: How Humans and Machines Represent the Visual World (212748)

George Alvarez

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Someday, perhaps very soon, artificial intelligence will enable machines to perceive the world around us better than humans do. Whether AI systems will do so by emulating human perception, or by becoming supra-human and circumventing biological constraints entirely, is yet unknown. In this course, we will survey research on human and machine perception, with an emphasis on vision: How do humans and machines represent the visual world? What does human vision do that artificial neural networks don't (yet)? How can we understand human perception better by focusing on artificial neural networks, and vice versa? By focusing on this intersection between biological and artificial visual systems, we will learn what makes humans fundamentally unique and special, while simultaneously learning about cutting edge discoveries in both fields.

Class Notes: **Section pending enrollment.**

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1503

Psychology of Close Relationships (107602)

Holly Parker

2022 Spring (4 Credits) **Schedule:** W 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 150

This course is an in-depth exploration of close relationships. Examples of topics to be covered include the biological bases of attraction; relationship formation; the end of relationships through break-up, divorce, or death; relationship satisfaction; deception; gender roles; same-sex relationships; loneliness; relationships and well-being; and public perceptions about relationships. You will have an opportunity to explore these topics primarily through critical examination of the empirical literature as well as through popular press.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Political Polarization and Misinformation (216446)

Jacob Rode

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Uncertain times call for trusted facts. How can facts be verified? What happens when scientific information becomes politicized? Are some people especially susceptible to believing fake news? Bringing together perspectives from political psychology, social psychology, moral psychology, and intergroup relations, this course will explore the psychology behind political polarization, especially in relation to facts and the public understanding of scientific information. We will consider the role of individual psychology (e.g., conspiratorial thinking) and group processes (e.g., partisan bias) in delivering and perpetuating the politicization of facts. There will be particular focus on the politicization of facts within current events such as COVID19, climate change, vaccines, and elections. Students will have the opportunity to evaluate and design evidence-based interventions for bridging polarization and combating misinformation.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.**

Psychology of Social Media and the Virtual World (218502)

Keri Carvalho

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** 40

How does social media simultaneously connect us and create polarization? Why are we enticed by the endless scrolling of a newsfeed? This course addresses the positive and problematic uses and impacts of digital technologies, exploring psychological implications of the internet and social media for the ways in

which we think, relate, connect, learn, and work. We will examine how social media has changed daily behavior, social norms, and communication patterns, including communications related to political elections, social justice, and other cultural shifts. Other topics explored will include the curated self on social media, the effects of the internet on friendships and romantic relationships, contagion, conformity, sleep, cyberbullying, and tactics for user engagement.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.**

Is Persistence a Panacea? Contextualizing Human Motivation (218515)

Timothy Valshtein

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

From self-help books to the latest task-tracking app, it can seem as though ample motivation is all that stands in the way of life's successes. But is it really that simple? In this course, we will explore this dilemma and more by diving into the major theories of motivation and self-regulation. Taking an empirical approach, we will explore how we set goals, effortfully pursue them, resist temptations, break bad habits, and develop new ones. However, this isn't the whole story. In the second half of the course, we will examine key drawbacks and limitations of human motivation, such as whether it is possible to have "too much" motivation, what happens when we give up on our goals, and the role of self-regulation in psychopathology. This course will outline the development, interrelations, and contradictions of the different approaches to understanding motivation and self-regulation, ultimately challenging and refining our understandings of human agency, self-directed behavior, and beyond.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.**

Psychology for a Sustainable Future (216386)

Jacob Rode

2021 Fall (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

The ongoing rise of the average global temperature has led to—and will continue to lead to—more frequent and severe flooding, droughts, habitat loss, and societal impacts such as wars, famine, and clean water scarcity. How did this happen? What can we do? This course focuses on the role that human psychology has played in ecological destruction and, in turn, highlights how psychological science can help solve the global environmental crisis. We will combine research from social, behavioral, and personality psychology to understand the individual and group-level psychological processes that hinder or bolster green behaviors. A central goal of this course is to equip students with the tools and scientific expertise to increase their own sustainable behaviors and to evaluate and promote sustainability efforts in society at large.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Power and Society in Romantic Relationships (218516)

Timothy Valshtein

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Groan-worthy rom-coms, cheesy pick-up lines, and bad dates ranging from hilarious to perilous—navigating romantic relationships can be treacherous. This course critically examines how romantic

relationships are affected by the social world. Drawing on diverse perspectives across psychology, sociology, feminist scholarship, and queer theory, we will investigate how relationships in contemporary western society are formed, maintained, and dissolved, as well as the ways in which relationship dynamics can become unhealthy or dangerous. We will place special focus on examining the ways in which society writ large (e.g., scripts, identities), interpersonal interactions (e.g., status, power), and psychological factors (e.g., self-regulation, self-concept) shape constructions of sexuality and romance. Ultimately, our collective goals are to interrogate how public discourse and mainstream culture shape understandings of intimate partner violence, to consider how we can all be agentic in challenging the systems of inequality embedded in romantic relationships, and maybe even to improve how we manage our own romantic endeavors.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Blindspot: Hidden Biases of Good People (219648)

Mahzarin Banaji

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

We coined the term implicit bias in 1995 to capture the idea that bias, i.e., a deviation from accuracy or values can be implicit, i.e., operate without conscious awareness or conscious control. The idea emerged from basic research on implicit social cognition (ISC), an area of scientific psychology that explores the hidden aspects of mental representations of self, other, and social groups. Today, 25 years later, the term implicit bias has transcended academic psychology and permeated contemporary culture where it is used and contested every day in every domain of life and living: healthcare, finance, employment, housing, education, law and law enforcement. In this course, we will study the science of implicit bias, with a focus on disparities that emerge along the lines of social categories of age, gender, sexuality, race, ethnicity, socioeconomic class, physical attributes, religion, politics, language and culture, geographic region and nationality.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Inequality and Intergroup Relations (216447)

Jennifer Perry

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

What happens in the shift from a self-identity to a collective identity? In this course we will discuss the psychological processes that affect how thinking in terms of "us and them" gives rise to and perpetuates systems of power and inequality in our society, with special focus on current events and social movements (e.g., Black Lives Matter). We will take an interdisciplinary approach to studying these topics, drawing from literature in psychology, sociology, and political science. Students will be challenged to design an applied intervention to reduce societal inequality in their own communities, and in a relevant domain of interest (e. g., criminal justice, voting, education, or healthcare).

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Self, Identity, and Physical Space (218489)

Jennifer Perry

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Humans are inseparable from their physical environments. We develop spatial awareness the moment we are born, and our perceptions of the physical space affect our emotions, decisions, and relationships on a daily basis. Countries start wars over space. Societies use physical space as barriers, punishments, and rewards, and the concept of space is intertwined with the ideas of power, threat, intimacy, and acceptance.

In this course, we will explore how cultures, societies, and people structure their environments, taking a special focus on the intersection on physical space and identity. How does physical space drive how we see ourselves and others? How does social identity affect how we understand, label, and navigate physical spaces? How is physical space represented in language and memory? Assignments will involve stepping outside of the classroom to explore the intersection of space and identity around campus and the Boston community.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.**

Psychology of Social Connection and Belonging (216434)

Jennifer Perry

2022 Spring (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 35

We are living under extraordinary psychological circumstances. As we fumble through Zoom goodbyes, we are constantly reminded that human interaction informs much of how we think, feel, and behave. In this course, we will discuss humans' fundamental drive to form social connections, ranging from casual interactions, to building and maintaining relationships, to the loss or total absence of social contact. In doing so, we'll identify factors that can facilitate or challenge the ability to form social connections and will explore parallels and differences in online interactions. This course will incorporate weekly practicum activities rooted in psychological science that encourage students to build strong social connections through direct experience.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.**

Selva Lewin-Bizan

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

Why are low-income children affected more severely by the same health conditions than those from higher-income families? What obstacles do single fathers with low socioeconomic status face to becoming and staying involved in the lives of their children? Why are racial/ethnic minority parents more likely to have their children removed and placed in foster care than white parents? Which immigrants are more likely to suffer from unequal access to educational resources? Why are LGB adolescents more likely to engage in risky behavior than their heterosexual peers? Using theory, research findings and other data sources, and current news, this course focuses on the complex social issues that America's children and adolescents face both in their immediate settings of family and school, and in broader societal values, customs, and laws, and the effects of these issues on their psychological development and well-being.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Requirements: **Pre-Req: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14**
or PSY15 or PSY16 or PSY18

Psychology 1651R

Language Development: Undergraduate Laboratory Course: Research Seminar (123244)

Jesse Snedeker

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Students participate in research on language acquisition, language comprehension, and language production. Each student has responsibility for a project. Weekly meeting to discuss student projects and readings that are relevant to them. Ten hours a week commitment (includes lab meeting).

Course Notes:

For undergraduates seeking research experience, especially in preparation for undergraduate theses.

Recommended Prep:

Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) plus either Science of Living Systems 15 or PSY 16

Requirements: **SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND SLS15 or PSY16**

What Infants Know, How Children Learn (125979)

Elizabeth Spelke

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Despite recent advances in computer science and machine learning, human infants remain the most prodigious learners on the planet. This seminar considers the origins and nature of human cognitive development in four broad domains: knowledge of objects and their physical relationships, knowledge of people and social relationships, knowledge of geometry and the larger spatial layout, and knowledge of numbers and mathematics. We will discuss how these foundational cognitive building blocks support humans' ability to explain, understand, and generalize, skills that are critical for successfully navigating our surroundings. Understanding these core psychological competencies has become essential to progress in many areas of society, including efforts to improve education, to create digital "cognitive assistants" who help us navigate, plan, and remember things, and to develop human-like artificial intelligence. Building on findings from basic research, we will consider how each of these efforts can be advanced.

The Emotional Mind (108490)

Leah Somerville

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Not only do emotions permeate our everyday lives, they have aided in the survival of the human species. But what are emotions, and what are they good for? What causes us to experience an emotion? And how do emotional responses, in turn, influence our perception, memory, decision-making, and psychological well-being? This course will address these questions by drawing on key advances from historical, philosophical, psychological, and neuroscientific perspectives.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from MCB/NEURO 80, MCB 81, PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Controlling the Uncontrollable? Emotion Regulation and Well-Being (218508)

Jessica Jones

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

We are at their mercy. We can't control them. We may even do their bidding. But are these assumptions about our emotions accurate? By examining when, how, and why we might change (or maintain) our emotions, this course will explore the ways in which the field of emotion regulation has both challenged and upheld these beliefs. We will examine how emotion regulation has been defined and assessed and evaluate methodologies commonly used to measure regulation-induced changes in day-to-day experiences, the body, and the brain. We will also discuss how emotion regulation develops and changes as we age, and address its shared foundations with other regulatory systems (e.g., executive function, self-regulation). Finally, we will consider individual differences in emotion regulation, with a particular focus on pandemic-related stressors, psychopathology, and the importance of regulation tactics for health and well-being.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Psychology of Personality (218509)

Jessica Jones

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

While one person prefers a large social gathering, another favors coffee with a friend. Where one person completes tasks a week in advance, another waits until the last minute. Simply put, no two people are exactly alike. To understand the many ways in which we differ as individuals, this course will survey contemporary empirical research in personality psychology. With an emphasis on deepening our own self-knowledge, we will discuss how psychologists study and differentiate stable traits from more transitory states and how personality develops and changes across the lifespan (e.g., temperament, attachment, etc.). We will incorporate perspectives from work on motivation, culture, cognition, and psychopathology to broaden our understanding of individual differences. Throughout this course, we will evaluate theoretical perspectives in the context of current empirical data and take deep dives into methodology to expand our understanding of how individual differences are assessed and quantified.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Gender and Psychopathology (218511)

Kelsey Quigley

2021 Fall (4 Credits) **Schedule:** TR 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

This course will consider the complex questions that emerge where gender and psychopathology meet. We will take an interdisciplinary approach to tackling these questions, drawing on empirical, conceptual, and clinical work in clinical psychology, philosophy, social theory, feminist and historical analyses of clinical science, and primary source historical documents. We will begin by developing a foundational understanding of the constructs of gender and psychopathology. In the central part of the course, we will examine their intersection, asking questions such as: How do gender-based inequities (e.g., structural inequities; gender-based stress and trauma; and circumscription of behavior based on gender) contribute to psychopathology? Where have gender biases in psychology harmed rather than helped individuals in assessment and treatment? We will end by seeking to understand what history can teach us about conducting clinical science in a patriarchal but post-binary world. We will consider, for example, how historical treatment of women's trauma informs the #MeToo movement and how clinical science and practice might adjust to better study and serve gender non-conforming individuals.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Intercultural Perspectives on Trauma (218518)

Mayron Pereira Piccolo Ribeiro

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Traumatic experiences vary in part due to the different adversities and experiences people from diverse cultures throughout the world face. And even though most of our understanding of psychological trauma is built on samples found in Western, Educated, Industrialized, Rich, and Democratic (WEIRD) countries, many researchers generalize these findings to non-WEIRD populations. In this course, we will look at

psychological trauma and post-traumatic stress through a multicultural lens, beyond the Western perspective. Can a global model of trauma fit all cultures? If not, how should we properly assess trauma using culturally valid methods? What is the impact of the cultural experience on perceiving an event as traumatic? After answering these questions, we will apply the foundational knowledge acquired during the course to establish a deeper understanding of cross-cultural trauma in veterans, refugees, and women who experience female genital excision.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.**

Broken Brains: Mechanisms and Markers of Mental Illness (218525)

Mayron Pereira Piccolo Ribeiro

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This course will integrate clinical psychology and cognitive neuroscience to explore the biological underpinnings of mental illness. We will adopt a systems-level approach, examining the relationship between function and dysfunction of specific brain circuits and networks and mental health disorders. For example, addiction, disordered eating, depression, and psychosis have all been linked to the brain's reward system. What does this common neural foundation indicate and how has this discovery advanced treatment options? Throughout the course, we will draw on findings from traditional and cutting-edge methodologies that have produced critical insights and key breakthroughs. We will also discuss how large-scale neuroimaging studies, like the Human Connectome Project, can be used to trace disordered behaviors such as criminality, depression, and hallucinations to specific brain networks. As we explore these topics, we will discuss how these research findings inform mental health treatment and potentially complement discussions around important societal issues such as racial bias and criminal responsibility.

Recommended Prep: **The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.**

Stigma, Discrimination, and Health (216272)

Mark Hatzenbuehler

2022 Spring (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

What is stigma? How do stigmatized identities and conditions differ from each other? Why do we stigmatize? What are the consequences of stigma for cognitions and emotions, for social relationships, and for health? Through what mechanisms—individual, interpersonal, and structural—does stigma operate to produce adverse health outcomes? How do stigmatized individuals cope with and resist stigma? How can we reduce stigma and its negative effects? In this course we will consider stigma as a fundamental cause of health inequalities across a broad range of phenomena, including (but not limited to) mental illness, sexual and gender diversity, weight, disability, aging, poverty, and immigration status. Students can expect to examine stigma as a predicament that affects nearly all individuals at some point in the life course, and to develop expertise in an individual stigma that is relevant to their personal, academic, and professional interests through a series of focused course assignments.

Methods of Behavioral Research (127078)

Leslie Rith-Najarian

2022 Spring (4 Credits) **Schedule:** R 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This is a lecture course with a laboratory component. Our goal is for you to master the essentials of behavioral experimentation through a succession of projects, starting with a small number of fundamental paradigms that can be used in many areas of psychology, culminating with a larger final project. Emphasis will be on understanding causal inference and acquiring practical laboratory skills and more abstract conceptual tools. Basic aspects of data exploration and analysis will be covered. A high value will be placed on discussion participation and the communication of results through effective visual graphics in oral and written reports.

Course Notes:

There will be a required lab session in addition to lecture (there is typically an afternoon and evening option). Students must be able to attend the lab session in order to enroll in the course.

Class Notes: **Students must be able to attend one of the following lab sessions in order to enroll in the course: Mondays 10:30-11:45am or Mondays 7:30-8:45pm.**

Recommended Prep:

Intermediate Statistical Analysis in Psychology (121738)

Patrick Mair

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 24

The primary goal of this course is to offer intense, foundational exposure to psychological statistics, focusing heavily on applications and computation using the R environment for statistical computing. The methodological core of the first part of the course is the linear model which includes methods such as regression, t-test, analysis of variance (ANOVA), and others. The second part of the course focuses on extensions in terms of linear mixed-effects models (aka multilevel models) and generalized linear mixed-effects models for modeling longitudinal and hierarchical data structures. Students will be exposed to the Frequentist as well as the Bayesian inferential framework.

Course Notes: **Required of doctoral students in Psychology.**

Recommended Prep: **One of Psychology 1900, Statistics 100, 101, 102, 104, or the equivalent.**

Psychology 1952

Multivariate Analysis in Psychology (117879)

Patrick Mair

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This PSY 1950 follow-up course continues with the exposure to state-of-the-art Bayesian and Frequentist statistical modeling techniques. We extend the GLMM framework in a nonlinear manner leading to the class of generalized additive (mixed) models (GAMM). We introduce path models which allow us to model complex variable associations.

Prominent models within this context are multivariate regression, moderation-mediation models, and latent growth models as an alternative to mixed models. We also cover missing value analysis (mechanisms for missingness, imputation), and power simulations. This is followed by a thorough treatment of Bayesian inference including probability and distribution theory, prior specifications, and advanced modeling.

Finally, we introduce causal inference techniques based on Rubin's potential outcomes framework.

Recommended Prep:

The Psychology Department requires completion of PSY 1950 or equivalent.

Requirements: **Prerequisite: PSY 1950 or equivalent**

Psychology 2030

Bayesian Data Analysis (160667)

Patrick Mair

2021 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 24

Bayesian statistics is becoming more and more popular in psychology. This class covers basic and advanced topics of Bayesian statistics with a strong focus on applications in Psychology. Formulas and technical details are kept on a minimum — it is all about how to integrate Bayesian concepts into your everyday research. The first part of the course introduces students to the Bayesian paradigm of inferential statistics (as opposed to the Frequentist approach everyone should be familiar with). To have a good understanding of this idea, we need to elaborate on various concepts of probability theory (e.g., Bayes' theorem) and statistical distributions. We then introduce the key components of Bayesian inference (prior, likelihood, posterior), and discuss Bayesian hypothesis testing (Bayes factors). Subsequent units focus on Bayesian regression (including model checks and model comparison) and mixed-effects models which, within a Bayesian context, belong to the family of Bayesian hierarchical models. There we also elaborate on modern approaches like integrated nested Laplace approximation (INLA) that allow us to efficiently estimate complex nonlinear, spatio-temporal models. Finally, we introduce Stan, a probabilistic programming language for describing models in a Bayesian fashion. This way of overarching Bayesian thinking unifies approaches ranging from classical regression models to Bayesian cognitive models. All

topics covered will be supported by corresponding computations and illustrations in R.

Recommended Prep:

This course is intended for Harvard doctoral candidates in Psychology. It is required that students both Harvard graduate and undergraduate students have completed Psych 1950 (or an equivalent course). That said, other students (e.g. Harvard undergraduates, Harvard graduate students from other fields, MIT graduate students) may obtain permission from the instructor to take the course. It helps if students have at least basic R knowledge. If someone is new to R, two introductory R units will be given right at the beginning of the semester.

Theories of Learning (207497)

Samuel Gershman

2021 Fall (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This course provides a tour of foundational topics in learning from a theoretical perspective. It covers a diversity of learning processes, aiming for breadth over depth (although it inevitably neglects several important forms of learning). Each meeting will consist of student-led presentations of two papers. Experience with computational modeling is not required, but students should have some familiarity with basic math (algebra and probability).

Recommended Prep:

For undergraduates, the Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or 1B=7 or Psych S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Rebecca Shingleton

2022 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In this course, we will focus on basic clinical and diagnostic interviewing skills. Particular attention will be devoted to the Structured Clinical Interview for DSM (SCID-5) with some exposure to other structured interviews (e.g. ADIS, K-SADS). The aim of the course is to provide students with the skills needed to make reliable diagnostic assessments for research and clinical purposes.

Course Notes:

Must be a Harvard graduate student in the clinical psychology program.

Additional Course Attributes:

Psychology 2461R

Laboratory for Clinical and Developmental Research (119124)

Matthew Nock

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 30

Provides instruction and experience in conducting clinical research in laboratory and clinical settings, with a special focus on developmental psychopathology.

Class Notes: **This course is designed to give undergraduate students hands-on experience conducting research in clinical psychology. Through attending weekly lab meetings and working on one of several research teams, students learn how research ideas are generated and specific hypotheses formed, research studies are designed to test these hypotheses, various research methods are used depending on the question addressed, data are collected and analyzed, and results are presented at meetings and in scientific publications. This course is expected to be especially useful for students planning on pursuing a career in clinical psychology and research, but the skills such as critical thinking, research design, statistical analyses, and science writing will be useful more generally.**

All students interested in Psych 2461r are required to submit an online APPLICATION to obtain permission before enrolling in the course.

Psychology 2464R

Research Methods in Child & Adolescent Clinical Psychology (124970)

John Weisz

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 30

This course is designed to give you exposure to the concepts, as well as the nuts and bolts, of research in clinical psychology of childhood and adolescence. There is a special emphasis in this course (as in the lab) on intervention research addressing youth depression, anxiety, and conduct-related problems and disorders. If you are a psychology concentrator at Harvard, you may have already taken classroom-based courses covering theories and methods that guide research in clinical psychology, such as Abnormal Psychology and Developmental Psychopathology. You may also have taken courses that introduced you to the types of statistical analyses (Psych 1900) and research methods (Psych 1901) used in psychological research. In this course, we will build on the foundation you received in such courses by applying what you have learned to the conduct of specific research projects.

In this class, you will participate in several aspects of the clinical research process via your active involvement in the research of our psychology laboratory. More specifically, through attending weekly class/lab meetings and participating in one or more research projects, you will learn how specific research ideas take shape; how research questions and hypotheses are generated; how studies are designed to address these research questions and hypotheses; how data are collected, cleaned, entered into study datasets, then analyzed; and how findings are interpreted and organized for presentation at professional meetings and in scientific publications.

The main goals of research in our lab are to build an understanding of which interventions for child and adolescent mental health problems are effective, and to promote use of the best evidence-based assessment and intervention in everyday clinical practice for youths and families. In pursuing these goals, we and our colleagues develop ways of structuring evidence-based practices to make them user-friendly and tailored to the settings in which youngsters typically receive mental health care—e.g., community mental health clinics and schools. Much of our work focuses on developing and testing these tailored approaches. We also conduct meta-analyses of the youth psychotherapy research literature, to sum up what has been learned from all the treatment studies with children and adolescents.

This course is designed to be useful to students who plan to pursue a career in child and adolescent mental health, particularly those with an interest in psychological research. However, the skills conveyed (e.g., critical thinking, research design, science writing) may be useful in a variety of ways and relevant to a number of different career paths.

Class Notes: **To be scheduled based on enrolled student availability.**

Laboratory on Complex Thought and Cooperation (123308)

Joshua Greene

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

In this hands-on lab course, students have the opportunity to participate in all aspects of psychological research, including experimental design, data collection, and data analysis. Each student will work closely with a graduate student or post-doctoral mentor. Topics of research are divided across cognitive and social psychology. Cognitive projects focus on the neuroscience of complex thought: Humans can understand and reason about an effectively infinite number of different ideas. How do our brains accomplish this? Social projects are applied work focused on promoting cooperation, conflict resolution, and improved social decision-making. Methods include fMRI, neural network modeling, and online and in-lab behavioral experiments.

Class Notes: **This lab meets Thursdays 1:30-2:45pm in WJH 1465.**

Lab in Intergroup Neuroscience (156624)

Mina Cikara

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Year-long lab course exploring how cognition, affect, neural responses, and behavior change when social relations shift from "me and you" to "us and them." Students will participate in experiment development and data collection employing methods ranging from standard laboratory experiments, implicit and explicit self-reports, and behavioral measures, to fMRI and psychophysiology. Students will also read and discuss papers on intergroup relations in our weekly meetings.

Recommended Prep:

For undergraduates, Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from MCB/NEURO 80, MCB 81, PSY 14, PSY 15, PSY 16, or PSY 18.

Requirements: **SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND MCB80 or NEURO80 or MCB81 or PSY14 or PSY15 or PSY16 or PSY18**

Writing Workshop (216439)

Susan Carey

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 15

The Writing Workshop is the ultimate professional development course. It was developed by Barbara Sarnecka at UC Irvine, and involves working through her witty, moving, and extremely effective book. Basically, if one cannot write effectively, and publish, one cannot succeed in academia. As Sarnecka puts in in the opening paragraph of the book, "Research is writing. No one gets a fellowship, a PhD, a postdoc, a job, a grant, or a promotion except by writing, which means that professional researchers are by definition professional writers." Sarnecka has run writing workshops as graduate classes with great success for several years now and the book distills what she has found to work. She documents increased productivity and happiness among the workshop participants. Classes will each involve some time doing actual writing, in parallel, but all at once, a feedback forum where at least once a semester a participant gets feedback on a page or two of writing, and in class exercises and discussion about the mechanics of writing, managing time, dealing with anxiety and rejections, among many other topics.

What's required: Participation in one 2 hour 50 minute seminar meeting a week which will be a workshop on academic writing. One semester commitment, but option to continue in the workshop for a second semester, and perhaps beyond. There will be a small amount of reading in advance of each class, mainly from Barbara Sarnecka's book, *The Writing Workshop: Write More, Write Better, Be Happier in Academia*, sometimes supplemented by readings from other books, such as Pinker's *The Sense of Style*.

Course Notes:

Open to G3+ graduate students and postdocs in Psychology.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None

Religion 16 Section: 01

Religious Dimensions in Human Experience (116585)

Davíd L. Carrasco

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

What is Religion? Why does it show up everywhere? Using archaeology, religious studies and social thought, this course will study the major themes in the history of religions including 'encountering the holy', sports and ritual', 'crossing borders', 'sacrifice as creation', 'pilgrimage and sacred place', 'suffering and quest for wisdom', 'music and social change', 'violence and cosmic law'. Readings from Native American, African American, Latinx/+, Jewish, Buddhist, Christian, Hindu traditions. Focus on the tension between individual encounters with the holy and the social construction of religion. Readings from Gloria Anzaldua, Toni Morrison, Judith Sherman, Arthur Kleinman, Popul Vuj, Mircea Eliade, Michael D. Jackson. Jointly offered in Harvard Divinity School as HDS3160.

Course Notes:

Offered jointly with the Divinity School as 3160.

Incarnation and Desire (107859)

Courtney Lamberth

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The course offers an introduction to Christian thought by considering major texts, figures and ideas from the first century to the present in their changing cultural contexts. Central themes include the categories of body, flesh and soul; free will, desire and sin in relation to divine grace; and the meaning of incarnation. Texts include canonical and non-canonical early Christian literatures, Patristic and medieval texts, Reformation theologies, as well as modern and contemporary authors. Students will develop a sense of the distinguishing features of the Christian world view, while gaining an appreciation for the significant diversity across the tradition

Christian Ethics and Modern Society (156433)

Charles Lockwood

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course provides an introduction to Christian conceptions of conduct, character, and community, as well as contemporary disputes over their interpretation and application. What do Christian ideals imply for issues related to race, gender, religious pluralism, and secularism? How are Christian principles related to the ethos of liberal democracy and modern ideals of rights, equality, and autonomy? Readings and discussions will highlight a variety of contemporary perspectives and approaches to Christian ethics, and special emphasis will be given to moral and political concerns including race and racism; love, sexuality, and marriage; the environment; capitalism and consumption; abortion and euthanasia; and war and peace.

Denying and Defending God: Classic Texts of Modern Western Religious Thought (125125)

Charles Lockwood

2021 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Drawing on thinkers from the nineteenth and twentieth centuries, this course considers questions that continue to shape modern Western religious reflection: Is religion a liberating force or one of oppression? Is religion rational or the antithesis of reason? What is the relationship between religion and morality? Can all human beings be called religious? Texts are drawn from Kant, Schleiermacher, Feuerbach, Marx, Kierkegaard, Nietzsche, Barth, Tillich, King, Cone, Gutiérrez, Daly, and Williams. Special attention will be given to the rise of the modern category of religion, especially in relation to Christian theology; modern suspicion and critique of religion; and the transformation of European theological frameworks by liberation theologians in North and South America.

Topics in Religion and Literature: Narratives of Religious Conversion in American Literatures (216414)

Courtney Lamberth

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Narratives of grace, lament, and conversion appear in multiple forms of American literature rooted in Christianity including fiction, sermons, first-person accounts, poetry, autobiography, and essays. Violence and suffering are often central to depicting, describing, and imagining experiences of divine grace and conversion. Through close reading of text in several genres, this course addresses these issues and considers, among other questions, the ambivalent and often paradoxical relationship between freedom and slavery in relation to divine agency and community in accounts of religious transformation. Authors will include Jonathan Edwards, Emily Dickinson, Herman Melville, William James, W. E. B. DuBois, Howard Thurman, Flannery O'Connor, Dorothy Day, Toni Morrison, and Annie Dillard, as well as selected ancient and secondary sources.

Religion 97

Tutorial - Sophomore Year (117043)

David Lamberth

2022 Spring (4 Credits) **Schedule:** F 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The course introduces students to theories and methods in the academic study of religion, including significant themes and arguments that have defined the field over time. Students will examine some key works that helped to shape the discipline as it emerged in the nineteenth and twentieth centuries, and also consider recent work drawing on various disciplines that scholars have used in the study of religion, including philosophy, psychology, sociology, anthropology, and history. The course will take up questions such as these: What does it mean to call something "religious"? Is the category of "religion" a universal feature in human life, or more historically specific? What is at stake in defining this category in one way or another? How do claims about religion relate to claims about politics, economics, culture, and society? The course will also enable students to evaluate the choices that scholars make about what to privilege in their investigations. The course emphasizes critical reading and thinking skills, as well as thoughtful participation in discussion and the refinement of students' academic writing.

Course Notes:

Required of all concentrators, and recommended for Secondary Field students. Enrollment open to other students with instructors' permission.

Weeping in the Religious Imagination: Seminar (117093)

Kimberley Patton

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

A comparative course on the theme of weeping and lamentation in religious experience. One of the earliest

human expressions of distress, tears remain a profound existential signifier at all stages of life, especially in response to fear, loss, frustration, or despair, as well to joy, triumph, or relief. Ritual often centers collective tears as a response to what has impacted a religious community in the distant past; myth shows how tears of surrender to what seems inexorable can effect its transformation. Emblems of powerlessness, tears paradoxically conjure power, productive fertility, and wholeness, "softening" the harsh decrees of God or the gods by "watering" them. Traditions studied will include ancient and modern Greek, classical Aztec, Islamic, Yoruba, early and medieval Japanese, Hindu, Hassidic, and Eastern Christian. We will also read selected theological and theoretical works on weeping.

Limited to 15 students, by application and with permission of the instructor.

Course Notes:

Application for enrollment must be completed at first class meeting.
Offered jointly with the Divinity School as 3821.

Icon or Idol? Attitudes to the Sacred Image (116467)

Kimberley Patton

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

The study of iconography, literally "writing in images," is a revealing lens through which to view the religious traditions of the world. Through a historically informed, comparative approach, this course considers the challenge of representing the sacred. We will consider differing attitudes toward the physical embodiment of divinity, the question of symbolic versus "real" presence in religious art, as well as negative attitudes towards images—iconoclastic movements, the transcendence of physical and verbal images, and abstract or aniconic views of the divine.

Limited to 30 students, with the consent of the instructor.

Interreligious Theology in a Post-Post-Modern Era (218583)

Francis Clooney

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Theology is grounded in belief in God, or some Transcendent Reality that engages normatively our minds, hearts, bodies, lives. It is the practice of faith seeking understanding, attentive to the canonical scriptures and traditions, yet also to ritual, ethical and experiential learning. Today theology must be purified by contemporary critical questions, as honest theologians expose biases and systemic injustice, learn to be more suspicious of elite power structures and exclusions and, in our interreligious world, hesitant about overdependence on the ideas, words, and methods of the Christian West. Theology is also committed to learning from the past, even after legitimate critiques. This new course aims at a critical but still faithful theology that seeks to be post-post-modern: defending belief in God (the immanent transcendent, divine power/s); refusing to reduce spiritual realities to ordinary experience and values; honoring truth, beauty, and goodness as inklings of the divine; being grounded in some home tradition, however large or personalized; confessional, of a tradition, yet deeply interreligious; and reading religious classics slowly and deeply. This course experiments with the retrieval of theology by taking seriously three classics of three normative traditions: the prose part of Sankara's Thousand Teachings (8th century CE, orthodox Hindu), part of Augustine's Instructing Beginners in Faith (4th century CE, North African Christian), and Confucius's Great Learning (6th century BCE, Chinese) — considering each in terms of its portrayal of the human, the transcendent (absolute, God), the nature of learning, and, indeed, Truth. Each text is taken seriously, and each is comprehended in light of the other two. The course also importantly includes readings that challenge the very idea of learning from such texts, plus readings that argue that such reading is still crucial, despite the many ways in which we must be sadder but wiser theologians in the 21st century.

Religion, Values, and the Future of Democracy (216807)

E. J. Dionne

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Liberal democracy finds itself under stress and its core values are being challenged by nationalism, authoritarian forms of populism, and a backlash against rising economic inequality. Embedded racism has come under renewed and widespread challenge, and longstanding economic arrangements are under increasing scrutiny in the wake of a deep economic downturn set off by the pandemic. And while G. K. Chesterton had a point when he described the United States as "a nation with the soul of a church," growing religious pluralism and the rise of the religiously unaffiliated has altered the landscape of faith. This course will explore the religious and secular values that undergird democracy. It will examine both political and religious institutions, and explore the thinking of theologians, philosophers, political leaders and activists on the challenges of self-rule. Jointly offered with the Harvard Kennedy School as DPI-227 and Harvard Divinity School as HDS 2042.

Religion and Family (208128)

Todne Thomas

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Religion and family are contested concepts that become politicized as they are mobilized and debated in the public sphere. Religion and family are also often depicted as separate forms of social organization. This course explores the ways in which religious and familial concepts, institutions, and relationships intersect to shape the lived experiences of religious participants who create and imbue their relationships with social and sacred significance. In particular, we will examine how rituals, practices, and meanings surrounding sexuality, marriage, parenthood, siblinghood, and genealogy become important signifiers of religious identity and membership. Our discussion of these case studies will also open up broader conversations about the politics ethnicity/race, gender, sexuality, fundamentalism, and trans/nationalism and their imprint on modes of religious and spiritual belonging. Jointly offered with the Divinity School as HDS 2126.

Students are required to submit a 100 word statement of interest by January 23rd to the instructor. Students will be informed of their approval by January 27th. Priority will be given to students who have submitted their statement of interest by the deadline.

Gender and Judaism in Modern America (214625)

Ann Braude

2022 Spring (4 Credits) **Schedule:** W 0400 PM - 0630 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Contemporary Jews are as likely to view their tradition as a source of oppressive gender roles as they are to see it as an inspiration to activism for feminism or as a resource for queer identities. This course follows the construction of Jewish gender beyond the stereotypes, sometimes in collision with modern gender norms, sometimes in accommodation, and sometimes in open rebellion. It considers challenges to both demographic and cultural reproduction that place pressure on personal decisions, group dynamics, identity, and intergroup relations for members of minority religions. By juxtaposing modern scholarship with religious texts addressing gender in Judaism, the course incorporates historical accounts of the anxieties and opportunities that accompanied the construction of modern Jewish gender identities as well as textual traditions opening alternative possibilities.

Gender as a key marker of group identity forms a central axis of inquiry through three case studies:

Jewish masculinities, from ideals of Talmud study and military service to comic book superheroes

Ultra-orthodox communities, in which the rejection of modern gender roles is a defining tenet

Jews as critics of gender and sexuality, including feminist and trans engagement with Jewish tradition

Pedagogically, the course draws on historical approaches and on developments in non-halachic Torah study closely tied to changing conceptions of gender in Judaism. Rather than assuming a fixed set of Jewish teachings about gender that confronted non-Jewish gender systems with the advent of modernity and Americanization, it invites students to participate in the ongoing process of questioning the meaning of religious texts in relation to human experience. Guest interlocutor, Yakir Englander, will visit the class twice to introduce the project of reading classical Jewish texts in modern perspectives and the practice of havruta (text study in pairs or groups). A product of both a traditional yeshivah education and a doctorate in feminist theory, Englander combines these approaches to open the topic of gender and Judaism beyond Western academic approaches. Teaching Fellow Emily Rogal, HDS alum and Rabbinical student at Hebrew College, will also lead text study throughout the term. Jointly offered with Harvard Divinity School as HDS 2050.

To enroll send a paragraph to Tracy_Wall@harvard.edu expressing your reasons for interest in the course and any relevant background. HDS students should apply as soon as possible but no later than Thursday, Jan. 20 and will be notified whether they have been admitted no later than Friday, Jan. 21. FAS students should apply by Jan. 18 and will be notified by Jan. 19.

Ancient Greek Sanctuaries: Healing and Medicine (205392)

Kimberley Patton

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

How was disease understood and healing sought in ancient Greek religion? What was the relationship of religious healing to the practice of medicine in Mediterranean antiquity? What light does this history shed on contemporary ideologies and practices of health care? Exploring three prominent sanctuaries of the physician-god Asklepios that were sites of pilgrimage and religious healing through the Roman period (Epidauros, Kos, and Pergamon), and two smaller urban ones (Athens and Corinth), the seminar will consider a range of archaeological and literary evidence, as well as read secondary scholarship in classics, anthropology, and the study of religion.

Enrollment limited to 15

Women, Sex, and Gender in Ancient Christianity (123203)

Karen King

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0400 PM
R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 5

Examination of the literature of ancient Christianity in all its diversity opens doors to understanding how this tradition shaped and was shaped by sex/gender protocols, practices and discourses of the ancient Mediterranean world. To understand these negotiations, appropriations, and contestations we will take up a variety of topics and figures, such as images of the divine; medical, mythical, and cosmic bodies; sexualities and social structures; passion and dress; rape and martyrdom; stories of Mary Magdalene; images of Jesus. We will ask: What resources does this material offer for your own reflections?Jointly offered in the Faculty of Arts and Sciences as Religion 1410.
NB: This is a limited enrollment course. To apply, send a statement to kking@hds.harvard.edu (selection process will begin Thurs. Jan. 20) with the following information: your name, degree program, year of study, school or university, previous relevant academic background, and a brief statement of your goals for the course.

Doing things with Latin: Syntax and Stylistics (126321)

Irene Peirano Garrison

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This is a rigorous introduction to Latin syntax, to the styles of Latin prose, and to the practice, history, and ideology of stylistic analysis and Latin composition. Students will contribute to a creative history of written Latin at Harvard, engaging in translation, transcription, and creative response to 300+ years of doing things with Latin on campus. This component of the course will culminate in a final online class project, The history and politics of Latin composition: 300 years of Latin at Harvard. We will explore together the pedagogical value of written Latin including, but not limited to, the purely linguistic aspect. Together we will study how and why Latin composition has been a conduit for socialization, induction, contestation, and redemption, as well as (in some instances) marginalization or irreverence.

For Students in the Study of Religion:

Students in Religion will have the option of focusing their class projects on the intersection of religion, ethics, and pedagogy, exploring the ways in which the Latin language curriculum, designed to advance linguistic competence, furthered concurrently the ethical, and specifically Christian, formation of students, ministers, and scholars of Scripture. Topics include, but are not limited to, teaching and learning Latin along Hebrew and Ancient Greek, Latinitas and Christianity, the relation between Latin pedagogy and the development of the biblical Hebrew curriculum, textbooks, and Christian ethics.

Course Notes:

An additional discussion session to be scheduled based on student availability.

Mystical Theology (156030)

Amy Hollywood

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will examine the history of mystical theology in early and medieval traditions of Christianity. Through a close reading of primary texts in translation students will engage questions of divine mystery, transcendence, and hiddenness; the practice of affirmation (kataphasis) and negation (apophasis); mystical union; and the limits of language. Jointly offered in the Divinity School as HDS 2003.

Cities on a Hill: Images of America as a Redeemer Nation, 1630-present (156249)

Catherine Brekus

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Beginning with John Winthrop's 1630 speech, "A Model of Christian Charity," and ending with the 2012 presidential election, we will examine images of America as a city on a hill. We will ask several questions: How and why have Americans conceived of the nation in sacred terms? How have religious images of the nation developed and changed over time? What are the implications of America's "civil religion"? We will discuss the Puritan idea of a national covenant, the millennial rhetoric of the American Revolution, defenses of manifest destiny, the sacrificial theology of the Civil War, religious and political rationales for global missions, the rise of the Christian Right, and presidential invocations of America as a city on a hill. We will also examine how women's rights leaders, abolitionists, and civil rights activists both critiqued and appropriated the image of America as a city on a hill. Jointly offered with the Divinity School as HDS 2180.

The Holocaust and the Churches, 1933-45 (124910)

Kevin Madigan

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce students to the critical use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude with an assessment of the role played by the Holocaust in today's world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

Enrollment limited to 15 with the permission of the instructor, by application at the first course meeting.

Recommended Prep:

Some familiarity with the general shape of modern European history is desirable but not required.

Nineteenth Century Religious Thought: Theology and the Critique of Religion (109865)

David Lamberth

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The nineteenth century formulated many of the questions and frameworks that continue to dominate theology and religious reflection in the West. This course considers the developing interplay between modern Christian theology (primarily continental) and the principal philosophical and social critiques of religion in the nineteenth century. Topics include human nature, religion, the divine-human relationship, religious knowledge, the social, and historicity. Readings from Lessing, Kant, Schleiermacher, Hegel, Marx, Feuerbach, Kierkegaard, Nietzsche, Harnack, and Troeltsch. Jointly offered with the Divinity School as HDS 2431.

Suffering and Evil in Western Thought (218693)

David Lamberth

2021 Fall (4 Credits) **Schedule:** F 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

We often look upon the modern world and characterize it in naturalistic and secular terms. But at the extremities of human suffering, whether individual or social, in the West we often still call people, groups, and situations evil. What do we mean by this? What is the difference between something being evil, or just wrong? What is the relation between suffering and evil? What typifies actions we deem evil, and what should we do about them? What does our appeal to evil say about our sense of humanity, religion, God? This course takes up these questions through a variety of Western lenses: religious, philosophical, theological, and ethical. Readings include Jewish and Christian scriptures (Genesis, Job, Paul), classic theologians and philosophers (Augustine, Kant, Leibniz, Plato, Rousseau, Kant, Voltaire), dramatists and non-fiction writers (Dillard, Dostoevsky, Sophocles), and contemporary critics (Arendt, Bernstein, Gouri, Nieman). The last portion of the course turns from ideas to cases, looking at the Eichmann trial, the use of evil in American politics, humanity relative to nature, and a parent's experience of the murder of a child to query our contemporary understanding of experiences of suffering and appeals to evil. Jointly offered with Harvard Divinity School as HDS 2420.

Pragmatism and Religion (156099)

David Lamberth

2022 Spring (4 Credits) **Schedule:** R 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course surveys the American pragmatic tradition, attending in particular to views of religion. The first part takes up the classical pragmatic period, reading Emerson, then Peirce, James, Dewey, Jane Addams and Alain Locke. Topics include belief, experience, truth, pluralism, ethics, society, and the nature and role of religion. The latter half considers late 20th century neo-pragmatism, reading Rorty, Putnam, West, Chopp and Glaude. Prior work in theology or philosophy is recommended. Jointly offered in the Harvard Divinity School as HDS 2671.

Enrollment is limited to 15. Applications for enrollment will be available on the Canvas site, and should be completed at least one week before the first class meeting; petitions should also be registered in my. harvard.

Course Notes:

Offered jointly with the Divinity School as 2671.

Spiritual Paths to Abstract Art (119908)

Ann Braude

2021 Fall (4 Credits) **Schedule:** F 1000 AM - 1200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Approaching 20th-century abstract art through the lens of religious studies, this course explores alternatives to twentieth-century narratives of modern art centered on the existential crisis of a heroic--usually male, Caucasian and secular—individual. In contrast, we will center paths to abstraction in which a departure from or repurposing of the figure emanates from spiritual sources not usually associated with modernity. Locating the artists' work within their biographies and their communities, the course focuses on abstraction as a vehicle for delving intersections of spirituality with history, race, ethnicity, class, gender and sexuality. Religious movements and experiences that led to abstraction, rather than the artistic styles that resulted, serve as the organizing principle for the syllabus. We will attend to the outsize interest of abstract artists in Theosophy, as well as to paths to abstraction originating outside of Europe, and/or grounded in Indigeneity, Judaism, Christian Science, and the Occult. Artists treated include Hilma af Klint, Wassily Kandinsky, Mary Sully, Hyman Bloom and Betye Saar, among others.

Black Church Burning (219631)

Todne Thomas

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Black churches are vital institutions that have contributed to the spiritual and physical survival of African-descended communities in North America. Nonetheless, the very centrality of black churches to black survival, refuge, development, and flourishing has made them targets for white supremacist and other modalities of violence. This course compels us to turn our attention to the troubling archive of anti-black religious violence manifested in black church bombings, burnings, and shootings in the United States from the antebellum period to the present. More than a survey of the ravages of anti-black religious violence, this course also challenges us to consider the spiritual, experiential, and prophetic significance of fire within the Black Christian tradition. Black Church Burning, then, references the spiritual, symbolic, and material destruction of fire and how it is wielded by black Christian practitioners in relation to regenerative rebukes and potentialities. Course participants will survey foundational texts about the significance of African American churches. They will also contemplate the offerings and shortcomings of historical, social scientific, theological, and artistic depictions of black church arson and black Christian pneumatic concepts, as well as their moral and material implications. Jointly offered in the Divinity School as HDS 2475.

Students are required to submit a 100 word statement of interest by January 23rd to the instructor. Students will be informed of their approval by January 27th. Priority will be given to students who have submitted their statement of interest by the deadline.

Religion and Race in the United States (207215)

Todne Thomas

2021 Fall (4 Credits) **Schedule:** W 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 25

Religion and race mediate contested social memberships. Religious imaginaries often possess power through their association with eternal and transcendent truths. Racial identities have existed as powerful social taxonomies because they are believed to be fixed, innate, and biologically-determined. Thus, religious and racial phenomena are powerfully imagined as somehow existing beyond the realm of the social. When set in the context of the United States—a society that is self-referentially exceptional and multicultural but that is informed by hegemonic and colonial white Anglo-Saxon Protestant cultural norms—the critical, deconstructive study of religion and race emerges as a complex yet significant intellectual project. This new intermediate class examines how religion and race intersect in the United States from the nineteenth century until the present. Through our shared analysis of texts that straddle a number of disciplines and genres, we will explore how religion and race mutually inform shared understandings of socio-political belonging, hierarchy and boundaries, recuperative institutional projects, and structural and personal identities. Jointly offered with the Divinity School as HDS 2127.

Asian American Religion (219726)

Diana Eck

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

How "Asian" is America today? This seminar explores the Asian dimensions of American history, immigration, religion, and culture as immigrants have come from India, China, Southeast Asia, Korea, and Japan. When and why did they come to the U.S.? What forms of religious and cultural life did they bring to the U.S. in the 19th and 20th centuries? What opportunities and obstacles did they find here? How do Hindus, Muslims, and Sikhs, Buddhists of many lineages, as well as Asian Christian communities contribute to the religious landscape of American cities and towns today? How has Asia reshaped the collective identity of the United States from the first encounters of Thoreau and Emerson with texts and ideas of the "Orient" to the saturation of modern America with the holistic cultures of yoga, tai chi, and mind-body medicine?

Finding God in a Lovely Place: Comparative Theology in a South Indian Context (218584)

Francis Clooney

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course in Hindu-Christian comparative theology is situated in India, with a difference. It steers away from Sanskrit philosophical, theological texts, learning instead from a vernacular tradition, the 2000-year-old literary archive of Tamil south India, so rich in lovely poems, dramas, proverbs, epics and devotional hymns, Jain and Hindu and more, vividly alive in an ancient land blessed with a non-Indo-European language and culture that flourish even today. This experimental course is guided by two questions: How can 21st century spiritual and religious people in the West learn from a culture that is brilliant not because it is universal, but because it is local, particular, immediate? How might Tamil literature change how we think of God, the human, the world? After a first look at ancient Tamil love poetry , we turn to selections from several premodern classics: The Ankle Bracelet (Cilappatikaram), a drama in which a tragic heroine suffers, then takes revenge and becomes a goddess; the proverbial wisdom of the Tiru Kural; the Civakacintamani (Splendor of Jivaka), a Jain hero's epic journey through pleasure to renunciation; the Ramayana tale of the forest exile of the princely and divine Rama and Sita and her kidnapping, retold by Kampan; mystical poetry for the beloved Krsna in the Holy Vow (Tiruppavai) of Antal, the famed woman poet of Vaisnava Hinduism. Each will be paired with a short excerpt from a Biblical or Christian classic, to showcase similarities and differences. The course is in translation and has no prerequisites, but some knowledge of south India, Tamil, theology, or comparative studies would of course be useful.

The Brhadaranyaka Upanisad with Sankara's Commentary in Translation (125635)

Francis Clooney

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0530 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This seminar offers a close reading of just one big book, the Brhadaranyaka (Great Forest) Upanisad, possibly the oldest (c 700 BCE) and greatest of Vedic Hinduism's Upanisads — that is, ancient Vedic and Hindu teachings grounded in ritual and debate, philosophy and mysticism. The Brhadaranyaka offers a powerful exposition of sacrifice and creation; the identity of self and Self; Brahman as the Reality beyond words yet powerfully hinted at in words; world renunciation as ideal and temptation. At its core is the drama, rhetoric and teachings of Yajnavalkya, one of the most intriguing sages of ancient India. We read it

on its own, then with the classic commentary of Sankara, the 8th century Nondualist Vedanta theologian. Though meant for students interested in learning Indian/Hindu classics, all serious readers can benefit. We read in translation, but Sanskrit can be helpful.

Course Notes:

Offered jointly with the Divinity School as HDS 3928.

Recommended Prep:

No language or course prerequisites, but students who know Sanskrit will be encouraged to make use of their expertise. It is part of a series, but not necessary to have taken prior seminars.

Tibetan Buddhism (117097)

Janet Gyatso

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will explore a diversity of perspectives on Buddhism in Tibet, primarily through the reading of autobiographies written by women and men from various classes, social positions, and historical contexts.

Through these and other writings, we will explore some of the distinctive Buddhist meditative practices and experiences, rituals, monasticisms, teacher-student relationships, life styles, religion and state issues, lay-monastic relationships, aesthetics, human-animal-spirit relationships, human values, and reckonings with death as these have evolved under the umbrella of Tibetan Buddhism. This will include a look at Tibetan Buddhism today too, both inside Chinese Tibet and in exile, as well as in convert communities. No previous background in Buddhism is required; both advanced and introductory students will be accomodated. Jointly offered in the Divinity School as HDS 3563.

Animal Ethics: Buddhist Resources for a Post-Human World (205390)

Janet Gyatso

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is coming out of a Buddhist ethics of effective compassion. It is aimed at the global horrors of contemporary animal life. Its aspiration is to contribute to what some of us are envisioning as a posthuman

world. Its presumption is that by deepening and diversifying our sensibilities to animal lives and worlds we will become committed to making changes, and better equipped to know how to do so in light of the entire animal world, rather than in a human-centric manner. The course will explore what it means to cultivate these new sensibilities. We will adapt Buddhist practices of perception, attention and movement in conjunction with their intersectionalities with western analytical philosophical ethics and phenomenological method. We will draw as well on masterful writing emerging out of African-diasporic critical thought, along with animal ethology and posthuman theology. Most of all, the basis of our discussions will be our repeated and close observation of animals whom we will watch in amazing videos throughout the semester. The larger backdrop of our focus on animals will be the disasters of climate change, racism, patriarchy, and global inequities. The varying assignments will encourage work in both analytic and creative modes.

Additional hour to be arranged.

Exploring the Quran (124063)

Mohsen Goudarzi

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0600 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores the contents of the Quran and probes its place in the history of human civilization. Students will learn about and critically reflect on the following subjects: 1) the Quran's core ideas, stories, laws, parables, and arguments; 2) the historical context in which the Quran was first promulgated and codified; 3) the relationship between the Quran and the preceding literary traditions of the ancient world, in particular the Bible and post-biblical Jewish and Christian writings; and 4) Muslim utilization of the Quran towards religious, intellectual, social, and cultural ends. To meet these goals, we will read a substantial portion of the Quran in translation and draw extensively on modern academic scholarship on the Quran. In addition, lectures will contextualize and complement our encounter with the Quranic text and secondary scholarship. By the end of the semester, students should have the ability to utilize various resources and concordances in order to independently conduct further investigations and critically evaluate claims made about the Quran. Jointly offered in the Harvard Divinity School as HDS 3339.

What is (Lived) Islam? (218823)

Teren Sevea

2021 Fall (4 Credits) **Schedule:** W 0600 PM - 0830 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

What are the anthropological and historical approaches to studying Islam? How do our academic approaches help us engage the question: what is lived Islam? This course begins by considering how 'Islam' is an object of academic inquiry but remains primarily concerned with the most prominent elements of Islam and being Islamic that have been marginalized within Islamic studies. It acknowledges the methodological difficulties involved in pursuing research on the phenomenon and practice of Islam across social contexts of the past and the present, while discussing possible methods of studying Islam as the everyday religion lived by Muslims and even non-Muslims. Students will be introduced to academic and religious sources that encourage us to (re)approach Islam as the everyday experience of believers, the multiverse of rituals and exercises of knowledge acquisition, as well as contests over moral authority. Students will, moreover, be encouraged to consider if a focus on lived Islam encourages us to discard regnant dichotomies of 'textual' and 'popular' religion, along with imagined divisions of the Islamic world into a center and peripheries.

Devotional Literatures of South Asia: Qawwalis, Sufiana Kalam (Sufi Poetry) and the Ginans (161217)

Ali Asani

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores traditions of devotional poetry in South Asia through the lens of three genres: the qawwali, concerts of mystical poetry; sufiana kalam, Sufi romantic epics and folk poems; and the ginans, songs of wisdom. In addition to playing a central role in traditions of worship, these genres, through the poetic knowledge they convey, have shaped the worldviews and the personal and communal norms of millions in South Asia and beyond. Frequently subverting constructions of power, knowledge and authority, they have fostered communal harmony by promoting common frameworks for moral, cultural and aesthetic understandings. Since these genres share language, music, symbols and styles of worship with other Indic traditions, we will also examine their relationships with the so-called sant and bhakti traditions. Special attention will be given to the impact of contemporary ideologies of nationalism, globalization and the revolution in media technology on the form and function of these genres and their relationship with contemporary communities of faith.

Indian Ocean Islam (218822)

Teren Sevea

Ali Asani

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Does thinking oceanically influence the study of Islam? Can we remember a people's history of the Indian Ocean world? This course considers these questions and others as it focuses on religious worlds within port cities and the networks of Indian Ocean Islam. The course examines how religion in port cities and islands was centered upon a plethora of saints, missionaries, divinities and other agents of Islam, who have been marginalized in academic literature on the Indian Ocean. It simultaneously examines how oceanic religion was intimately connected to economic, political and technological developments. Students will be introduced to scholarship on oceanic Islam and monsoon Islam, before they are introduced to a variety of sources on transregional Islamic networks and agents of Islam, including biographies, hagiographies, travelogues, novels, poems and ethnographic accounts. Students will, moreover, be encouraged to consider ways in which approaches to studying Islam could be enhanced by a focus on religious economies and networks, as well as the lives of 'subalterns' who crossed the porous borders of the Indian Ocean world and shaped its religious worlds.

The History of the Study of Religion (118557)

Michelle Sanchez

2021 Fall (4 Credits) **Schedule:** M 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

An examination of the study of religion from early modernity to the present, with attention to key thinkers, methods, and theories. Required common doctoral seminar for first-year PhD candidates in the Study of Religion or an affiliated department (in the latter case, must have express permission of the Instructor.)

Contemporary Conversations in the Study of Religion: Seminar (122916)

Helen Hardacre

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

An engagement with the theoretical and methodological issues that scholars of religion across the various research areas deem to be the most urgent and compelling in the discipline today, accompanied by sustained consideration of the major stages in graduate students' progress to the Ph.D.

Course Notes:

Limited to second-year doctoral students in the Study of Religion.

Religion and Neoliberalism (208110)

Todne Thomas

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

As it is popularly conceptualized, neoliberalism is a political and economic system that calls for the deregulation of capitalist enterprises, the increasing privatization of government services, and the application of market rationalities in the operation of social institutions. Yet, how does neoliberalism interface with religion? What religious sensibilities are encoded in and spread amidst neoliberal formations? Through our review of theoretical texts and anthropological monographs, this course investigates religion and neoliberalism around some of the following loci: Christian temporal reckonings that shape renditions of millennial capitalism and late liberalism, moral orders, co-constitutive discourses and institutions of prosperity and accumulation, and conflicting paradigms of selfhood and belonging. Offered jointly with the Divinity School as HDS 2125.

Neoplatonism 1: Plotinus (109900)

Charles Stang

2021 Fall (4 Credits) **Schedule:** F 1200 PM - 0300 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

A close reading of the *Enneads* of Plotinus, the 3rd century Greek philosopher widely regarded as the founder of "Neoplatonism." Attention will be given to the development of his views over time, based largely on the composition chronology given by his student Porphyry.

Course Notes:

Offered jointly with the Divinity School as 1757.

The Body in American Religious History (117443)

David Holland

2022 Spring (4 Credits) **Schedule:** W 0100 PM - 0300 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Three decades ago, Ramon Gutierrez studied the embodied ceremonies of the sixteenth-century Pueblo to identify crucial cosmological distinctions between their culture and that of the Spanish colonialists. For Gutierrez, differing conceptions of "the body" held the key to understanding so much else. Twenty years later, Judith Weisenfeld looked to the religious lives of African American women to construct "a compelling set of questions about the body as a site of religious experience and expression that would open up avenues for scholarship beyond the traditional focus on institutions." Today, studies of "the body"--both as object and agent--form a central pillar in the field of American religious history. This course seeks to chart that historiographical development, engage the most recent conversations on the theme, and consider its protentional future developments. Students will both consider the field's existing treatments of the body within the field and chart new possibilities for engagement. Jointly offered in Harvard Divinity School as HDS3085.

Narratives of American Religion: The Canon and Its Revisions (156251)

Catherine Brekus

David Holland

2021 Fall (4 Credits) **Schedule:** W 0100 PM - 0400 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course will examine the writing of American religious history from the nineteenth century until the present. In the first part of the course, we will trace the creation of an American religious historical "canon." Readings will include Robert Baird's Religion in America (1844), William Warren Sweet's The Story of Religions in America (1930) and Sydney E. Ahlstrom's A Religious History of the American People (1972). In the second part of the course, we will explore the transformation of the field of American religious history since the 1970s. In addition to reading textbooks such as Catherine Albanese's America: Religion and Religions (1981) and George Marsden's Religion and American Culture (1990), we will read case studies of new approaches and methodologies. Our goal is to assess the strengths and weaknesses of both the canon and the new religious history that has taken its place. Jointly offered with the Divinity School as HDS 2185.

Course Notes:

Offered jointly with the Divinity School as HDS 2185.

Coloniality, Race and Catastrophe (213294)

Mayra Rivera

2022 Spring (4 Credits) **Schedule:** T 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 18

This course explores the relationship between coloniality, race and ecology through the lens of "catastrophe." We will examine a variety of theoretical sources that deploy or refute tropes of the "end of the world". We will study different uses of "catastrophe"—to denounce the destruction of a particular world, re-imagine the past, or proclaim the impossibilities of the present. Through the readings and discussions, we will analyze the aims, effectiveness and limitations of talk of catastrophe in the contemporary context.

Permission to enroll in the course will be granted as petitions are received.

Decolonial Theory (219669)

Mayra Rivera

2022 Spring (4 Credits) **Schedule:** W 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 18

This course is an exploration of key texts in decolonial theory, including its relationship with postcolonial theory, main themes and debates and its relevance for the study of religion. Readings include Eduard Said, Gayatri Spivak, Walter Mignolo, María Lugones, and others. Jointly offered in Harvard Divinity School as HDS2543.

Students are required to submit a 1-page statement of interest by January 27. For further details and posting instructions visit the Canvas site for the course. Students will be informed if they are approved for the course by January 28. Priority will be given to those students that have submitted a statement of interest by the deadline.

Writing about Revelation: Scholarly Approaches to Religious Experience (219667)

David Holland

2022 Spring (4 Credits) **Schedule:** M 0900 AM - 1100 AM

Instructor Permissions: None **Enrollment Cap:** n/a

When someone says they have spoken with God, what is a scholar to do? This course considers a range of scholarly approaches to such claims, from the sympathetic to the skeptically reductive. Focusing primarily on American religious history--and covering a diverse array of figures and time periods, including Anne Hutchinson, Handsome Lake, Nat Turner, Ellen White and Sojourner Truth--the course will give students a chance to grapple with the words of these remarkable figures and analyze the ways that scholars have sought to make sense of them. The first half of the course will review the secondary literature and critically engage the theories and methods that have been brought to bear on these accounts; the second half of the course will give students a chance to develop their own informed approaches as they write about revelation. Jointly offered in Harvard Divinity School as HDS2321.

The Emergence of Islam: Contours and Controversies (127673)

Mohsen Goudarzi

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The birth of Islam in the seventh century C.E. was a momentous historical turning point, but many aspects of this crucial process remain vigorously contested in modern scholarship. Was the Prophet Muhammad a local preacher of righteousness or the conscious creator of a religion with global ambitions? Is the Qur' anic text a record of Muhammad's own preaching or the result of a collective effort that continued after Muhammad (and perhaps had begun before him)? Did the early Muslims believe in the imminent end of the world or not? Was Islam originally an ecumenical monotheistic movement open to Jews and Christians, or did Islam's earliest adherents consider it a new and exclusive religion separate from Judaism and Christianity? Did Arabian tribes have a shared sense of belonging to a unified "Arab" ethnos before Islam, or did this sense of identity grow after disparate Arabian peoples conquered the Near East together?

This course is dedicated to an in-depth discussion of such fundamental historiographic questions. In the process, we will delve into some of the earliest literary and documentary witnesses to early Islamic history and read from seminal works of scholarship on Islam's origins.

Pedagogy in the Study of Religion (219979)

Mohsen Goudarzi

2022 Spring (2 Credits) **Schedule:** M 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course is designed for graduate students in the Committee on the Study of Religion, and is open to students in related fields who teach courses pertaining to religion. The course aims to equip students with skills to be effective Teaching Fellows at Harvard and to develop their own approaches to pedagogy as

independent instructors in the field of religion.

Classes will be workshop-style and will cover various teaching methods, course design, and professional development topics. They will also provide a space to discuss day-to-day success stories and challenges in the classroom.

Course Notes:

This course must be taken Sat/Unsat and is designed to minimize work outside class time. Classes will take place on the following six Mondays: 1/24, 2/14, 3/7, 3/21, 4/11, 4/25.

Colloquium in Islamic Studies (218764)

Mohsen Goudarzi

2021 Fall (2 Credits) **Schedule:** F 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course is a forum for graduate students of Islamic Studies to 1) share and receive feedback on their works in progress (theses, paper drafts, dissertation chapters) from peers; and 2) discuss major recent publications that explore diverse aspects of Islamic history – different eras, geographies, and confessional identities – from a variety of methodological perspectives. This is a full-year course meeting on a bi-weekly basis. Students must complete both terms of this course (parts A and B, Fall 2021 and Spring 2022) within the same academic year to receive credit.

Course Notes:

Course meets bi-weekly.

Seminar for Adv New Testament and Religions of the Ancient Mediterranean (213513)

Giovanni Bazzana

Gojko Barjamovic

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This graduate seminar will focus on the economies and management of ancient religious institutions as well as the transferral of economic images and concepts in religious discourse. It deals with texts and material artifacts selected from a broad range of epochs and regions across the ancient world—from Mexico to China, but with focus on the Mediterranean and West Asia. We address the subject matter with an explicitly comparative approach through four thematic units that cut across geography and chronology: the political and cultural centrality of religious institutions though time and space, their deeply rooted economic functions in social life, the influence of these functions on sacred practices, and the intersection of social and economic obligations (value, debt, servitude) with ethical and religious thinking. This is an interdisciplinary course that focuses on developing research and communication skills across historical, literary and religious studies.

This graduate seminar will focus on oracles and divination in the ancient world in their capacity as a widespread phenomenon. The course will deal with texts and material artifacts pulled from a broad range of epochs and regions across the ancient Mediterranean. We will explore the historical, literary, and artistic significance of this evidence in order to understand more adequately, for example, ancient concepts of divine-human communication, integration of divinatory practices into literatures, and authorization in religious and political discourses. This is an interdisciplinary course that focuses on developing research and communication skills across classics, religious studies, and ancient history.

Participation in the seminar is encouraged for those thinking about academic work and for those interested in deepening their familiarity with the fields of New Testament studies and/or Religions of the Ancient Mediterranean. A basic acquaintance with the fields is required. Jointly offered as Ancient Studies 201 and with Harvard Divinity School as HDS 1981.

Romance Languages and Literatures

Subject: French

French 10

Beginning French I: Cross-Cultural Encounters in French (126933)

Nicole Mills

2022 Spring (4 Credits) **Schedule:** MTWR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This beginning French course addresses the theme of cross-cultural encounters in French through engagement in the discussion and interpretation of texts, art, images, and film. You will gain an introduction to the French language with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. You will engage in interactive communicative activities that provide rich exposure to the French language and francophone culture(s). Class sessions will be filled with ample opportunities for interaction and communication and online assignments will develop your interpretive and presentational skills in French on various platforms.

Course Notes:

French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students may take the course SAT/UNSAT with permission of course head. French 10 is taught by members of the Department.

Beginning French II: Paris in Virtual Reality (126935)

Nicole Mills

2022 Spring (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This second course in the Beginning French sequence will immerse you in the French language and Parisian life. You will discuss what it means to be Parisian from the point of view of diverse Parisians and compare real versus imagined perceptions of Paris through immersive virtual reality experiences and interactive discussions with native French speakers. Through the exploration of various course themes centered around Parisian culture, you will begin to be able to speak and write in the past, present, and future tenses, make suggestions, express emotions, express opinions, extend, accept, and refuse invitations, give advice, and express hypothetical situations. Class sessions will be filled with ample opportunities for interaction and communication and online assignments will develop your interpretive and presentational skills in French.

Course Notes:

French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students may take the course Sat/Unsat with the permission of course head. This course is taught by members of the Department.

Recommended Prep:

Completion of French 10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.

Beginning French II: Paris in Virtual Reality (126935)

Nicole Mills

2022 Spring (4 Credits) **Schedule:** MWF 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

This second course in the Beginning French sequence will immerse you in the French language and Parisian life. You will discuss what it means to be Parisian from the point of view of diverse Parisians and compare real versus imagined perceptions of Paris through immersive virtual reality experiences and interactive discussions with native French speakers. Through the exploration of various course themes centered around Parisian culture, you will begin to be able to speak and write in the past, present, and future tenses, make suggestions, express emotions, express opinions, extend, accept, and refuse invitations, give advice, and express hypothetical situations. Class sessions will be filled with ample opportunities for interaction and communication and online assignments will develop your interpretive and presentational skills in French.

Course Notes:

French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students may take the course Sat/Unsat with the permission of course head. This course is taught by members of the Department.

Recommended Prep:

Completion of French 10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.

Intensive Beginning French: Parisian Culture & Life (124332)

Nicole Mills

2022 Spring (8 Credits) **Schedule:** MTWRF 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This intensive Beginning French course provides an accelerated introduction to Beginning French with intensive work on interpersonal communication and interpreting and producing language in written and oral forms. Students explore diverse facets of Parisian life through the interpretation and exploration of photos, art, and film and through interactions with native French speakers. Students learn to speak and write in the past, present, and future, make descriptions, ask questions, make comparisons, accept and refuse invitations, give advice, and express hypothetical situations, emotions, and opinions.

Course Notes:

May not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the French 15 course

head and receive permission to enroll in the course.

This course is taught by members of the Department.

Recommended Prep:

An advanced knowledge of at least one foreign language, preferably a modern Romance language, but no previous study of French.

French 16

Reading, Understanding and Translating Written French for Research (111933)

Nicole Mills

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

French 16 offers an introduction to reading and translating academic French texts for students who require a basic knowledge of French for research purposes. The course presents vocabulary and the principal structures of French grammar in a systematic and coherent order. The course begins with simple texts and advertisements, then moves to academic texts with more complex structures, and ends with the translation and analysis of literary works and philosophical texts. The assignments are discipline-specific to accommodate students' research needs.

Course Notes:

Conducted in English. Not open to students with a score of 500 or above on the Harvard Placement Test or the SAT II French test, to those with more than one year of undergraduate French, or to auditors. May not be used to fulfill the language requirement and may not be taken Pass/Fail, but may be taken Sat/Unsat by graduate students with permission from the course head. This course is taught by members of the Department.

Recommended Prep:

Some previous study of a Romance language helpful but not necessary. Fluency in English required.

Intermediate French: Francophone Culture in Local Communities (126938)

Karen Turman

2021 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In this intermediate-level language course we will explore cultural topics such as music, dance, and cuisine in French-speaking countries around the world. We will in turn expand our discovery of Francophone cultures through conversations with online language partners, interactive discussions with French-speaking guests, and exploration of local Francophone communities. Themes such as family life in West Africa, sustainability in the French-speaking Pacific, and First Nation dancers in Quebec will be broached through communicative activities in order to build on oral, written, and intercultural competences. Using various texts, films, and multimedia resources as a basis for discussion, we will also build vocabulary and review and refine various grammatical structures. This course will also include online partner conversations through the Talk Abroad platform.

Course Notes:

Conducted in French. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of

the Department.

In order to accommodate the shift to the online course format, the four contact hours per week that were previously required will now be a combination of online synchronous Zoom sessions with the full class and/ or small groups in addition to asynchronous Voice Thread activities and online partner conversations through the Talk Abroad platform. To this end, students will be required to purchase an access code for Talk Abroad ($40-50) as part of the course materials. PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep:

A score no lower than 451 and no higher than 600 on the SAT II test or the Harvard Placement Test; 3 years of French in high school; French 11 or 15; or permission of course head.

Additional Course Attributes:

French 30

Upper level French : Current Events and Media in the Francophone World (126942)

Claire-Marie Brisson

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In this advanced intermediate course, you will explore current events in French-speaking countries through a variety of media. Engaging in interactive communicative activities, you will cover topics associated with politics, art, sports, literature, and scandal. From the written press to social media, you will interpret and analyze authentic texts, including newspaper articles, music, images, film, and advertisements. You will also refine your speaking skills through class

discussion as well as in conversations with native speakers abroad. Class sessions will provide opportunities for interaction and communication together as a class, in small groups and with online guest speakers. Online activities will develop your interpretive and presentational skills in French on various platforms. Course assignments include a collectively developed online newspaper and a news broadcast or cultural program. This course will be conducted entirely in French.

Course Notes:

Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details on the French 30 Canvas site. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week. To this end, students will be required to purchase an access code for the online conversation program, Boomalang ($30).

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep:

A score no lower than 601 and no higher than 680 on the SAT II test or the Harvard Placement test; French 20; or permission of course head.

Advanced French I: The Contemporary Francophone World Through Cinema (126997)

Claire-Marie Brisson

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

In this advanced French language and culture course, you will explore francophone culture(s) through contemporary films. The course is designed to strengthen language proficiency, explore different registers of language, and further refine your grammatical understanding while offering an introduction to film analysis. You will engage in interactive communicative activities exploring themes such as regional differences, Paris and the banlieue, immigration, post-colonialism, cinematic self-portraits, and gender through readings such as film reviews, interviews with directors, and script excerpts. Class sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class and in small groups. Online assignments will develop your interpretive and presentational skills in French on various platforms. Course work also includes creative interactive writing assignments, short compositions, scripts, and a short film. No previous familiarity with film study is necessary. This course is conducted entirely in French.

Course Notes:

Conducted in French. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week.

French 40 Section: 002

Advanced French I: The Contemporary Francophone World Through Cinema (126997)

Claire-Marie Brisson

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

In this advanced French language and culture course, you will explore francophone culture(s) through contemporary films. The course is designed to strengthen language proficiency, explore different registers of language, and further refine your grammatical understanding while offering an introduction to film analysis. You will engage in interactive communicative activities exploring themes such as regional differences, Paris and the banlieue, immigration, post-colonialism, cinematic self-portraits, and gender through readings such as film reviews, interviews with directors, and script excerpts. Class sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class and in small groups. Online assignments will develop your interpretive and presentational skills in French on various platforms. Course work also includes creative interactive writing assignments, short compositions, scripts, and a short film. No previous familiarity with film study is necessary. This course is conducted entirely in French.

Course Notes:

Karen Turman

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Through the lens of social justice issues in France and the Francophone world, this class will focus on writing as a means of civic engagement. You will interrogate topics such as colonialism, islamophobia, immigration, and sexism by studying a range of creative, analytical, and polemical texts, images, and film. This course builds on the communicative competence acquired in French 40, with a particular emphasis on developing your writing proficiency through creative and analytical writing projects such as description, portrait, film review, and polemical essays. This course will also include an intercultural exchange with the local Francophone community partner conversations with students at the Kedge Business school in France.

Course Notes:

Conducted in French. Students must complete online information survey on Canvas before registering for the course. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

Exploring French Language and Culture Through Industry: Fashion, Cuisine, and Cabarets (217619)

Karen Turman

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In this advanced French language and culture course we will interrogate themes such as class, space, and cultural appropriation through the lens of marketing, sustainability, and business ethics in France. By contextualizing examples ranging from the department stores on Boulevard Haussmann to the commercialization of the arts in Paris during the 19th century, we will explore the evolution of major French industries and their cultural legacy today. To this end, we will analyze videos, articles, literary texts, and images as well as engage with guest speakers from France and the Harvard community. In addition to participating in a conversation exchange with university students in French studying Business English, course work will include daily readings and exercises, in-class and online written and oral assessments, compositions, a video presentation, and a final written project.

Course Notes:

Conducted in French. Students must complete online information survey on Canvas before registering for the course. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

French 70A

Inventions of Space: French Literature from Origins to the Enlightenment (112005)

Tom Conley

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course studies inventions of literary space from La Chanson de Roland (1100) to Cyrano de Bergerac, Les Empires de la lune (1658). Corrlating literature with geography and cartography, it engages close readings of (generally short) selections from founding works of an enduring canon. (I) In the Middle Ages: Marie de France (1170), Lais; Chrétien de Troyes (1180), Yvain, ou le chevalier au lion; François Villon, Le Testament (1460/1489). (II) For the early modern age: François Rabelais, Pantagruel (1532/42); Clément Marot, Poésies (1536); Joachim Du Bellay, Les Regrets (1558); Pierre de Ronsard, Les Amours (1552-1584); Michel de Montaigne, Essais (1580-92). (III) The classical age: Pierre Corneille L'Illusion comique (1638); Molière (Jean-Baptiste Poquelin), Les Précieuses ridicules (1657) and Le Misanthrope (1666); Blaise Pascal, Pensées (ca 1650); Jean Racine, Phèdre (1675); Cyrano, Les Empires…. The aim is to take pleasure in study of rich and complex works defining a legacy. Requirements: two papers and a take-home final exam.

Course Notes:

The course will be taught in French.

Recommended Prep:

A 50- or 60-level course in French; a score above 780 on the SAT II test or the Harvard Placement test; equivalent preparation; or permission of course head.

Introduction to Francophone Literature (118532)

Matthew Rodriguez

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course offers a survey of the vast landscape of literary production of the French-speaking world. We will read and examine works by writers from the Maghreb, West Africa, the Caribbean, the Indian Ocean, and Québec, as we consider how literature nuances historical narratives, maps individual and collective experiences, and grapples with the legacies of colonialism, slavery, and empire. Attending closely to works of literature as both aesthetic forms and historical, cultural objects, we will see how the contributions and innovations of Francophone writers intervene in contemporary discussions in literary studies (and beyond) on race, gender and sexuality, memory, identity, and justice. Periodic viewing and analysis of films will complement the readings. Readings may include works by Maryse Condé, Abdellah Taïa, Assia Djebar, Nathacha Appanah, and Mariama Bâ.

Course Notes:

Conducted in French.

Recommended Prep:

A 50- or 60-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.

French Theater and Performance (109826)

Matthew Rodriguez

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In this course, we will trace the history of French theater from the early twentieth-century to the present: its major trends, figures, and forms as well as its intellectual, historical, and political contexts. As we read and interpret texts that were written with performance in mind, we will consider how theater has served as a unique representational mode through which to engage with history, politics, and philosophy in ways that are immediate, relational, and collective. We will approach theater and performance primarily through reading and thinking about plays, but the idea of theater as embodied expression, spectacle, and production will be central to our discussions and reflections. Readings may include works by Jean Genet, Marie NDiaye, Hélène Cixous, Jean-Luc Lagarce, and Wajdi Mouawad, among others.

Course Notes:

Conducted in French.

Recommended Prep:

A 60- or 70-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.

French 83

Photography and Literature (218540)

Matthew Rodriguez

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Since its invention, photography has inspired and provoked writers. In this course, we will consider how the histories of photography and literature are intertwined in the twentieth century, with a particular focus

on how photography has served many modern and contemporary French writers as an important point of reference in their investigations of self and identity. How do we define ourselves in relation to images? How can literature help us understand and read photography as we make our way through our own image-saturated realities? How has photography influenced literary form and practice? As we ponder these questions, we will study a variety of genres, including the novel, the essay, and the memoir, as well as works that blur the boundaries between traditional generic classifications. Readings may include works by Hervé Guibert, Annie Ernaux, Marie NDiaye, and Roland Barthes.

Course Notes:

Conducted in French.

Comic Relief: The Power of Humor in Social Fiction (207932)

Kathy Richman

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

***Comic Relief* focuses on fictional works in French which use humor to *dorer la pilule*, or make more palatable, the social ills and political dangers they reveal. With naïfs and rebellious women as protagonists, these coming-of-age stories raise questions about the relationship between social critique and self-discovery. We will explore nuances of irony, parody, satire, and slapstick in works by Voltaire, Vargaftig, Chraïbi, and Queneau.**

Course Notes:

Conducted in French. Counts toward Citation, Secondary, and Concentration in French or Romance Studies.

Lyric Poetry in Medieval and Renaissance France (12th to 16th century) (119220)

Virginie Greene

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Medieval and Renaissance poets created both new poetic forms and new figures of poets. Singers, writers, composers, lovers, dreamers, rhetoricians, moralists, and preachers: poets could be all of those. This course studies how their poetry grew from and elaborated upon the impulse "I have to sing" *(chanter m'estuet)* to become a highly self-conscious art of writing.

The Politics and Aesthetics of Mourning (218542)

Matthew Rodriguez

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In this course, we will study literary responses to and representations of loss, both public and private, in twentieth- and twenty-first-century French literature. We will investigate how mourning intersects with various theoretical and historical topics including gender and sexuality, the memory of war, and the AIDS epidemic. We will discuss how the particular intellectual contexts and historical events of the twentieth century brought about shifts in the way that individuals and communities experienced loss and worked through grief. We will consider how the work of mourning generates political as well as aesthetic questions, and we will ask how literature helps us to think about loss and to propose alternative models of mourning. Readings may include literary works by Marcel Proust, Simone de Beauvoir, Hervé Guibert, and Patrick Modiano. We will also look at theoretical writings on loss from a variety of perspectives, from psychoanalysis to deconstruction and queer theory.

Voyages and Voyageurs in Early Modern France (219714)

Tom Conley

2022 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Juxtaposing cartography with travel literature of in the wake of the Columbian discoveries, this course studies how new and other worlds take shape in 16th century France. If the Renaissance is marked by (1) the advent of Albertian perspective; (2) the invention and implementation of the printing press; (3) the effects of oceanic travel, then: displacement, estrangement, conflict, and adventure (in an economic and colonial sense) become keynote. In our time, what we make of them in their time bears how we consider space, travel and subjectivity in ours. Readings include Jean Parmentier, Rabelais, Pléiade poets Ronsard and Du Bellay, André Thevet, Pierre Belon, Jean de Léry, Montaigne, Marc Lescarbot, Samuel de Champlain, etc. Among cartographers and cosmographers we will study Ptolemy, Pieter Apian, Oronce Fine, Jean Jolivet, Nicolas de Nicolaï, Maurice Bouguereau, Jean de la Guillotière.

Course Notes:

Visits will be made to the Houghton and Pusey Map Librairies. Pending consensus among participants, the course will be taught in French.

"The Words to Say It": 20th-century Women Writing in French, From Colette to Satrapi (126038)

Alice Jardine

2021 Fall (4 Credits) **Schedule:** M 1200 PM - 0200 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Motherhood, romantic love, independence, sexuality, citizenship, fantasy, death: these are just some of the themes explored in women's novels, written in French, during the twentieth century. Students will read four exemplary novels, exploring how they have finally become classics, even given what they say about life and what it means for women to write about it. At the same time, the advent and development of feminist and/or queer literary criticism over the course of the 20th century will be explored. Finally, we will consider what this 20th-century trajectory means for women writers today, culminating our study in a discussion of a 2016 novel that took the Francophone world by storm.

Urban Cannibals: Les Mystères de Paris (205163)

Janet Beizer

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Les Mystères de Paris, Eugène Sue's serialized novel of 1842-43, was one of the earliest French novels to focus on the working classes, and became an instant cross-cultural and international hit. It has not ceased to generate debate: around its project (simple potboiler or serious social reform?), its narrative aesthetics (crazy criss-crossed plotlines or proto-modernist collage?) and its ambiguous discursive strategies (populist and elitist, reformist and nationalist, abolitionist and racist, progressive and eugenic). We'll explore both the internal microcosm of the novel and the radiating external worlds it pulls into its pages from France in the world, circa 1840. Each student will choose a research project spinning out from the novel (prisons, markets, hunger, cannibalism, social services, journalism, poverty, criminality, crowds, slavery, reform, revolution, class conflict, imperialism, charity, urban/pastoral, etc.)

Selected readings from Saint-Simon, Fourier, Le Bon, Nordau, Charcot, Lombroso, Marx, and Sue's own maritime tales, from the nineteenth century, and the more recent work of Louis Chevalier, Dominic Kalifa, Kaja Silverman, Alex Woloch, and others.

Course Notes:

Graduate Seminar: undergraduates admitted only with consent of instructor.

Sophomore Tutorial: Poetics, Practice, and Politics in Romance Societies (114941)

Kathy Richman

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course introduces students to a range of analytical and theoretical approaches to "reading" fiction, poetry, film, and essays. We will pair critical writings and creative texts of importance to the Romance world to help students develop their own voice and analytical stance. Prepares students for advanced work in literary and cultural studies in Romance Languages and Literatures and related fields.

Course Notes:

Language of instruction to be decided upon by student in consultation with the Undergraduate Adviser in Romance Studies. Successful completion of one term of Romance Studies 97 (or equivalent) is required of all concentrators in their sophomore year.

Ecology as Non-Human Sociology. A Critical Counter-History (219757)

Emanuele Coccia

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This seminar aims to critically retrace the history of the concepts and ideas that have guided ecological research from its foundation in 18th century Europe to the present day. The point of arrival will be the definition of a new perspective that goes beyond the notion of species. Among the authors to be read: Isaac Biberg, Daniel Wilcke, Christopher Gedner, Alexander von Humboldt, August Grisebach, Hewett Watson, Karl Moebius, Frederic Clements, Arthur Tansley, Henry Gleason, Charles Elton, Raymond Lindeman, Karl von Frisch.

Class Notes: **This course will be taught by Prof. Emanuele Coccia.**

The Ego in things: fashion as a moral laboratory (219758)

Emanuele Coccia

2022 Spring (4 Credits) **Schedule:** W 0600 PM - 0815 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

More than any other design discipline, fashion is the domain in which all the arts commingle in order to transfigure human bodies and experiences. Clothing is immersive art that shapes every aspect of our interaction with the world, which is why fashion looms at the center of a new system of morality. The seminar will trace the history and structure of the contemporary fashion system with a particular focus on a recent protagonist: Alessandro Michele. By analyzing some of the iconic collections that have defined the past century's fashion system in dialogue with Michele's work, the seminar will examine fashion's function as a moral laboratory.

Class Notes: **This course will be taught by Prof. Emanuele Coccia.**

Questions of Theory (205260)

Nicole Suetterlin

Doris Sommer

2021 Fall (4 Credits) **Schedule:** F 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

To explore key literary, cultural and critical theories, we pose questions through readings of classic and contemporary theorists, from Aristotle to Kant, Schiller, Arendt, Barthes, Foucault, Glissant, Ortiz, Kittler, and Butler, among others. Their approaches include aesthetics, (post)structuralism, (post)colonialism, media theory, gender theory, ecocriticism. Each seminar addresses a core reading and a cluster of variations. Weekly writing assignments will formulate a question that addresses the core texts to prepare for in-class discussions and interpretive activities.

Course Notes: **Conducted in English. This course is also offered as Romance Studies 201 and German 291. Credit may be earned for Romance Studies 201 or German 291, but not both.**

Class Notes: **Please note, this course will meet on the Allston campus.**

Graduate Seminar: Transatlantic Poetics (156631)

Josiah Blackmore

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The seminar studies transatlantic enterprises of Spain and Portugal through their prolific cultures of textuality. Epic, chronicles, lyric and other 15th to 17th-century genres will be scrutinized for influences of Atlantic itineraries, real and imagined, on projects of poetic "making". Authors include Garcilaso, Caminha, Ercilla, Camões, Góngora, Cervantes, Lope, Alarcón, Quevedo, Zurara, and others.

Course Notes: **Class discussions will be in English, with primary sources available in the original languages and in English translation.**

Subject: Spanish

Spanish 10

Beginning Spanish I (124982)

Maria Parra-Velasco

2022 Spring (4 Credits) **Schedule:** MTWR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Spanish 10 is the first course in the Beginning Spanish sequence (SPAN 10-SPAN 11). This course is designed for students with little or no previous experience in Spanish. Through interactions with peers, instructors, and native Spanish-speakers around the world, students in this class discuss and analyze authentic multimodal texts (e.g., written, audio, audiovisual, visual) from various sources (e.g., social media, newspapers, museums). Through these interactions and analyses, students learn frequent vocabulary and develop a wide array of linguistic functions, such as the ability to make basic descriptions or to narrate in the present tense. By the end of the semester, students: a) will have developed basic linguistic competence in Spanish, and b) will have gained some understanding of the cultures and worldviews of Spanish-speaking communities in the United States, Latin America, and Spain.

Course Notes:

Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher.

This course is taught by members of the Department.

Beginning Spanish I (124982)

Maria Parra-Velasco

2021 Fall (4 Credits) **Schedule:** MTWR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Spanish 10 is the first course in the Beginning Spanish sequence (SPAN 10-SPAN 11). This course is designed for students with little or no previous experience in Spanish. Through interactions with peers, instructors, and native Spanish-speakers around the world, students in this class discuss and analyze authentic multimodal texts (e.g., written, audio, audiovisual, visual) from various sources (e.g., social media, newspapers, museums). Through these interactions and analyses, students learn frequent vocabulary and develop a wide array of linguistic functions, such as the ability to make basic descriptions or to narrate in the present tense. By the end of the semester, students: a) will have developed basic linguistic competence in Spanish, and b) will have gained some understanding of the cultures and worldviews of Spanish-speaking communities in the United States, Latin America, and Spain.

Course Notes:

Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher.

This course is taught by members of the Department.

Jorge Mendez Seijas

2022 Spring (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Spanish 11 is the second course in the Beginning Spanish sequence (SPAN 10-SPAN 11). In this course, students explore a host of social, cultural, and environmental sustainability issues that have historically impacted the lives and livelihoods of local and foreign Spanish-speaking communities. Throughout the semester, students interact constantly with instructors, peers, and native Spanish speakers around the world as they explore culturally and linguistically rich content. Through discussions and critical analyses of authentic multimodal texts (e.g., written, audiovisual, visual) from many different sources (e.g., social media, newspapers), students develop a wide array of linguistic functions, such as the ability to make detailed descriptions or to narrate in different time frames. By the end of this class, students a) will have further advanced their linguistic competence, and b) will have deepened their understanding of the cultures and worldviews of Spanish-speaking communities in the United States, Latin America, and Spain.

Course Notes:

Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department.

Recommended Prep:

A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

In this course, students explore a host of social, cultural, and environmental sustainability issues that have historically impacted the lives and livelihoods of local and foreign Spanish-speaking communities. Throughout the semester, students interact constantly with instructors, peers, and native Spanish speakers around the world as they explore culturally and linguistically rich content. Through discussions and critical analyses of authentic multimodal texts (e.g., written, audiovisual, visual) from many different sources (e.g., social media, newspapers), students develop a wide array of linguistic functions, such as the ability to make detailed descriptions or to narrate in different time frames. By the end of this class, students a) will have further advanced their linguistic competence, and b) will have deepened their understanding of the cultures and worldviews of Spanish-speaking communities in the United States, Latin America, and Spain.

Course Notes:

Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department.

Recommended Prep:

A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

2021 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

An advanced language and culture class that further develops linguistic competence using a region or regions of the Hispanic world as a focus for class discussion, grammar review, and an introduction to Hispanic social contexts and texts. Course materials may also include films, interviews, paintings, photography, music, selections from the press, as well as literary or historical readings. Frequent written and oral assignments, and a thorough review of grammar. Consult course website for current semester topics.

Course Notes:

Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department.

Recommended Prep:

A score between 681-720 on the SAT II test or on the Harvard

Placement Test, AP 5, Spanish 30, or permission of course head.

Additional Course Attributes:

Spanish 49H

Languaging and the Latinx identities (109820)

Maria Parra-Velasco

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course builds on students' knowledge of Spanish to explore the relationship between their languaging practices and their Latinx identities. Understanding languages as a way of knowing and meaning making, we use a variety of texts, genres, music, videos, films and visual arts to engage in discussions about family heritage, migration, and Latinx cultural and linguistic traditions and innovations. Students will strengthen their oral and written abilities, expand their interpersonal, interpretive and performative resources for languaging in informal and academic contexts.

Course Notes:

Spanish 49h was formerly Spanish 35; therefore, students cannot take 49h if they've already taken 35. Spanish 49h should be a prerequisite for 59h (or permission of the instructor).

Additional Course Attributes:

Attribute	Value(s)
FAS: Meets Foreign Lang Req	Spanish

Advanced Spanish II: Creative Writing and Performance (115920)

Adriana Gutierrez

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

An advanced language course designed to strengthen and develop competence in written expression. Close reading of texts in literary and non-literary genres will help students refine personal style. The performance of short excerpts of plays, combined with advanced work on oral expression and phonetics, will help students increase their fluency and ease of expression.

Course Notes:

Conducted in Spanish. Recommended for concentrators. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep:

A score between 721-750 on the SAT II test or on the Harvard Placement Test, Spanish 40, or permission of course head.

Spanish for Latino Students II: Connecting with Communities (159938)

Maria Parra-Velasco

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An advanced language course for Spanish heritage learners that aims to strengthen students' Spanish oral and written capabilities through civic engagement with Latinx communities; and to further develop students' critical language and social awareness around important issues for Latinos in our globalized era: U.S-Latin American relations, migration, bilingualism and education, ethnic studies and social justice and health disparities. Students explore these topics through various genres (newspapers and academic articles, debates, literary essays, short novels, poetry, visual art, film and music) and through 3 hours a week of community service.

Discussing the Spanish Civil War (109772)

Daniel Aguirre-Oteiza

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Examines the Spanish Civil War (1936-39) as a key event for understanding the "causes" that have shaped 20th- and 21st-century Spanish culture and society within the context of recent Western history. Focus on the relation between memory, history, and representation in cultural works ranging from the years prior to the conflict up to the present (narrative, poetry, testimonies, memoirs, film, visual arts, etc.).

Course Notes:

Conducted in Spanish.

Class Notes: **This course is for undergraduate students only.**

Class Notes: **Students who have taken SPANSH 112 will not be approved to register for this course.**

Recommended Prep:

A previous course in Spanish at the 60- or 70-level; 800 on the SAT II test or on the Harvard Placement test; or permission of the course head.

Spanish Film from Buñuel to Almodóvar (141012)

Raquel Vega-Duran

2021 Fall (4 Credits) **Schedule:** M 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course will examine a wide range of core Spanish films from directors such as Almodóvar, Amenábar, Berlanga, Bollaín, Buñuel, Coixet, Erice, and León de Aranoa, among others. It will include analyses of prominent genres (drama, comedy, terror, fantasy, meta-cinema, sci-fi, noir) and will pay particular attention to key historical and cultural moments (the Spanish Civil War, film under dictatorship and democracy, censorship, "La movida," the economic crisis, the rise of immigration, etc.) from the 1940s to the present. Films with subtitles.

Course Notes:

Course will be conducted in Spanish.

Culture and Development in Reciprocity (217638)

Doris Sommer

2021 Fall (4 Credits) **Schedule:** F 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This seminar is an interdisciplinary approach to research about Latin America that takes Reciprocity, a core regional ethic, as the pedagogical structure. Harvard students will work in reciprocal collaboration with students in Latin America.

The first half of the semester will introduce a range of topics that include arts, social mobilization, ways of learning, environment, and public policy. By mid-semester students form pairs based on shared interests and choose a question to develop together. Harvard offers important resources for the team and Latin American countries offer other important resources. Student-to-student interchanges will allow for ongoing and reciprocal social and scholarly development.

The seminar has two fundamental objectives: 1) to foster intercultural research through collaborations that combine perspectives on readings and inquiries; and 2) enhance capacity in English and in Spanish, reciprocally, as students read closely together and write persuasively. Pre-Texts will be the pedagogy for achieving language proficiency. Our institutional partners include Instituto Desarrollo in Paraguay, Universidad Mayor in Chile, Universidad de Buenos Aires, Argentina, among others. Partners will serve as co-mentors for the student teams and will provide guidance for accessing resources and convening relevant scholars in the region.

The co-written final paper for the course will be a "Case for Culture." This is a hybrid essay that combines humanities with social and/or natural sciences to develop the kinds of interdisciplinary collaborations made possible by reciprocity.

Course Notes:

This course in Spanish with readings and advising in both languages.

Class Notes: **This course is co-taught with José Molinas, Instituto Desarrollo, Paraguay.**

Decolonial Views, Decolonial Practices: Indigeneity and Protest in Latin America and the Caribbean (218536)

Jorge Sanchez Cruz

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The resignation of Ricardo Rosselló—former governor of Puerto Rico— in 2019 was in due in part, but not exclusively, to the Colectivo Feminista en Construcción and its tactics of Black feminist decolonial methodologies. This course investigates the ruptures and interruptions of decoloniality, as theory and as praxis, deployed by non-indigenous and indigenous peoples. We aim to understand the nuances and problematizations that contour the decolonial *from* and *within*; that is, what other modalities of living persist and permeate *within* indigenous and afro-indigenous communities and what forms of critique emanate *from*indigenous territories and subjectivities. The latter has the potentiality to become protest and revolt, against colonialism and new forms of coloniality, as seen in the Puerto Rican decolonial gestures against oppression and debt. This course moves *within* indigenous community-making and thought production and through its waves of change that mobilize acts of contestation. From the Colectiva Feminista en Construcción's decolonial methodology, the Zapatista movement, the Oaxaca Commune, the Bolivian collective Mujeres Creando, to indigenous revolts in Venezuela and protests in Colombia, this course unpacks the relationship between aesthetic practices—indigenous video, art, and literary production—, (non)indigenous thought, like of Cusicanqui and Maldonado-Torres, and practices of decoloniality found in the everyday and in momentum of the multitudes.

Course Notes:

Conducted in Spanish.

Migration and Border-Crossing in Film and Photography (207679)

Raquel Vega-Duran

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

From an interdisciplinary perspective, this course explores the ways in which film and photography recount past and present human migrations, and how they contribute to and question the construction of the social imaginary of the migrant. Focusing on migrations particularly related to Spanish-speaking countries, we will examine themes such as "global" vs. "local"; conceptions of hybridity, otherness, belonging, border, assimilation, and neo-racism; the paradoxical nature of the "migrant"; the role of history, language, religion, and culture in the acceptance and rejection of foreigners; the relationship between border and identity; the feminization of migrations; the use of the term "illegal" in relation to migrations; and the emergence of "new" identities; among others. We will learn how to analyze the complexities of film and photography, considering movies, documentaries, photographs, and other visual materials which cover past and present migrations from Africa, America, Asia, and Europe. We will also study the history of migrations, and will examine the intricacies of the concept of migrant (as both emigrant and immigrant), paying particular attention to the different stages of migrants' journeys (the departure from the home

country; the crossing of transit countries and borders; the arrival; and the settlement or forced deportation). No previous knowledge of film or photography required.

Course Notes:

The course will be conducted in Spanish.

Trans* Literary and Cultural Production in the Americas (218537)

Jorge Sanchez Cruz

2021 Fall (4 Credits) **Schedule:** TR 0430 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores 20th and 21st century manifestations of trans* and travesti subjects in literature, visual culture, and society. What does trans* has to say about modernity, citizenship, and neoliberalism, and what are the strategies and gestures of resistance, mobilization, and survivability? We will explore

these critical interrogations while also touch on the complexities of terminologies—trans*, trans-, trans, and travesti, for instance—(de)attached to structures of sex, gender, race, and power. We will situate how transness not only reflects on mechanisms of subjectivation, exclusion, and aberration, but also enacts other worldbuilding possibilities through care, kinship, intimacy, and revolt. Students will be introduced to the intersection of transness with blackness, indigeneity, queerness, and feminism, and its frictions with coloniality, normativity, patriarchy, violence, abjection, and monstrosity. As such, this course is designed to provide an analytic lens—modes of reading—that brushes with critical race studies, sexuality studies, *cuirl*queer studies, trans* and travesti theories, feminist studies, affect theory, and Latin American literary and cultural perspectives to gender and sex. This class will expose students to prose, poetry, manifestoes, film and the documentary form, performance, photography, installation and experimental art, and chronicles from Argentina, Brazil, Chile, Mexico, Peru, Puerto Rico, Venezuela, and more.

Course Notes:

Conducted in Spanish.

Barcelona and the Catalan Culture (109775)

Aina Obis Monne

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The course offers an interdisciplinary approach to Barcelona, a multilayered space furnished by Roman, French, Muslim, and Spanish legacies that shaped a singular culture and language. Developing from periods of egalitarian social and political institutions in the Middle Ages to strong socioeconomic industrial development in the 19th century and later tourism, Spain's most European city is inscribed by a deep sense of civic and industrious society permanently seeking innovation and modernity, yet facing the consequences of its complex past. Through readings of historians, art critics, urban designers, and writers, and supported by visual materials, the course offers an integrated perspective which opens questions in every field of the Humanities and the Social Sciences on Catalan and Hispanic Cultures.

Course Notes:

The course will be conducted in Spanish. The readings will be in English & Spanish.

Queer Latinidad: Race, Sex, and Power in the U.S. (218538)

Jorge Sanchez Cruz

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0200 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course investigates the slippages between queerness and Latinidad. We will explore the contested terrain of the X—a colonial wound, a trace of enslavement, and a condition of crossing the borderlands—and, at the same time, engage with literary, cultural, and theoretical interventions that contour the fields of Latinx studies and queer studies.

Course Notes:

This course will be taught in English.

AIDS, Aesthetics, & Politics in Latin America (218539)

Jorge Sanchez Cruz

2022 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How does HIV/AIDS reconfigure norms of embodiment, artistic and literary practices, and the political? And how does the arrival of a new virus provide a different lens on the production of space, time, and death? This course situates the ethical-political dimensions of HIV/AIDS and its intersections with aesthetics—literary, cultural, artistic, and visual—, as well as alternative worldbuilding strategies fueled by the search of prolonging life.

Course Notes:

This course will be taught in Spanish.

Subject: Italian

Italian 10

Beginning Italian I - Parliamo Italiano! Pathways to Italy (113814)

Chiara Trebaiocchi

2022 Spring (4 Credits) **Schedule:** MTWR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This is a first semester beginning course designed for students with little or no knowledge of Italian. Through the explorations of six targeted urban areas and various aspects of Italian daily life (the university, home environments, currency, shopping habits, pop songs, and regional cuisines), this course will give you the language you need to communicate simply, but effectively in Italian and to get ready for future adventures in il bel paese. You will learn to talk about personal preferences and daily life; handle basic social exchanges; plan events; and engage in pleasantries, information-sharing, and personal storytelling (about present and past events). Assignments include the exploration of cultural texts (poems, songs, commercials, graffiti), visual tasks (both online and at the Harvard Art Museum), short creative writing assignments (postcards, brief personal essays) and oral projects.

Course Notes:

Conducted in Italian. Students whose placement score does not entitle them to enter a more advanced course are assigned to Italian 10. Students who have studied Italian for two years or more in secondary school must begin at Italian 11 or higher. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Additional Course Attributes:

Beginning Italian II - Parliamo Italiano! The Art & Craft of Italy (125061)

Chiara Trebaiocchi

2021 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This second semester beginning-level Italian course will engage you in interactive communicative activities that provide rich exposure to the Italian language and culture(s). In this class, you will continue to develop and strengthen oral and written competence, as well as reading and comprehension skills, building your vocabulary and learning the grammar points necessary for more analytical conversations (using hypotheticals, the conditional, the subjunctive, and indirect discourse). Specifically, you will be able to: describe and narrate simple events in the past and in the future, make comparisons, express opinions and possibilities, and engage in discussions. You will explore six targeted urban areas in Italy while discussing cultural topics, telling stories about travel, and engaging with Italian literature, cinema, music, and pop culture. In the second half of the semester, you will watch an award-winning movie, La meglio gioventù, that will provide ample opportunities to discuss the history of modern Italy and to learn more about Italian

politics and contemporary issues. Course work will include individual and in group presentations and short creative writing and oral assignments, based on authentic texts and artifacts. In-class assignments will be supplemented with individualized conversations with native speakers of Italian to further enhance your understanding of the diversity of cultural perspectives within Italian communities.

Course Notes:

May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep:

Italian 10, or a score of 301-450 on the SAT II test or the Harvard Placement test, or a score below 3 on the Italian AP exam, or two years of high school Italian, or permission of course head.

Italian 15

Intensive Beginning Italian: Gateway to Italy (112340)

Chiara Trebaiocchi

2022 Spring (8 Credits) **Schedule:** MTWRF 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This is an intensive and complete first-year course in one term for students with no knowledge of Italian, focused on developing all four communicative skills. You will learn how to talk about personal topics, likes and dislikes, and your immediate environment (such as family, school, friends, daily routine); handle basic social exchanges (such as eating out or planning events); describe and narrate simple events in the present, past, and future; make comparisons; express possibility; present your point of view; and engage in discussions. By the end of this course, you will have the linguistic and cultural foundations necessary for your adventures all'italiana. You will be introduced to contemporary Italian culture through a variety of topics from everyday life (family, shopping, food, fashion) to the arts (music, literature, cinema). Materials include films such as La meglio gioventù and cultural readings that explore the history of modern Italy (i.e., 1968, Italian Terrorism, the mafia, etc.). Assignments include short creative writing and oral projects, cooking activities, and multimedia presentations. In-class assignments will be supplemented with individualized conversations with native speakers of Italian to further enhance your understanding of the diversity of cultural perspectives within Italian communities.

Course Notes:

Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Recommended Prep:

An advanced knowledge of at least one foreign language, preferably a modern Romance language, but no previous study of Italian.

Reading, Understanding and Translating Written Italian for Research (113582)

Chiara Trebaiocchi

2021 Fall (4 Credits) **Schedule:** MF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This beginning level Italian course, for undergraduate and graduate students, will prepare you to read, understand, and translate academic and literary Italian texts for research. Materials will be selected in accordance with the needs and interests of enrolled students. You will develop individualized reading/research goals in your academic field of interest, such as translating a 16th-century Italian treatise on architecture or reading a novel in Italian by Elena Ferrante. Group discussion sessions will facilitate discussion of targeted reading strategies and individualized meetings will be regularly scheduled to respond to your personal translation needs.

Course Notes:

Taught in English. Not open to auditors. May not be used to fulfill the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Recommended Prep:

Some previous study of a Romance language helpful but not necessary. Fluency in English required.

Intermediate Italian: The Colors of Italian Pop Lit (128265)

Chiara Trebaiocchi

2022 Spring (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In this intermediate Italian course, inspired by the "colors" of Italian pop literature and culture, you will strengthen previously learned grammatical structures and master more challenging ones that will allow you to handle various communicative tasks, both in writing and in spontaneous conversation, such as: expressing and comparing preferences and experiences on various topics; narrating stories; presenting opinions and debating the opinions of others; formulating hypotheses; comparing situations. Through the exploration of a variety of authentic Italian materials (from romance to crime stories to graphic novels and even the Spaghetti Westerns movies) and a structured review of grammar, you will increase your language proficiency and broaden your vocabulary in a communicative and meaningful context. Targeted assignments throughout the semester will give you ample opportunities to practice your written Italian (letters, short essays, brief film reviews, summaries) as well your oral competence (recordings, in group discussions). In-class assignments will be supplemented with individualized conversations with native speakers of Italian to further expand your cultural awareness of il bel paese and to explore the diversity of cultural perspectives within Italian communities.

Course Notes:

Conducted in Italian. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep:

A score of 451-600 on the SAT II test or the Harvard Placement test, or a score of 3 on the Italian AP Exam; Italian 11 or 15; or permission of course head.

Additional Course Attributes:

Attribute	Value(s)

Italian 30

Upper-Level Italian: Italiano in Verde: Sustainability Issues in the Italian Classroom (128266)

Chiara Trebaiocchi

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course revisits structures, refines speaking and writing skills, and advances critical linguistic exchanges through the discussion of environmental, cultural, economic, and social issues of sustainability. Through the interpretation of films, novels, short stories, newspaper articles, podcasts, maps, and comics, you will be empowered to discuss such topics, relevant both for the Italian discourse and on a global scale, while revisiting and expanding vocabulary and reviewing grammar in context. Class discussions will encourage the interpretation, analysis, and discussion of current media (advertisements, documentaries, social media, and articles) on climate change, the slow food movement, environmental justice, sustainable tourism, migration and activism. Assignments (oral presentations, weekly written essays, short video recordings) are designed to advance discussions of Italian culture, introduce you to contemporary spoken and written Italian language (i.e., colloquial language), and refine fluency and pronunciation.

Course Notes:

Conducted in Italian. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep:

Italian 20; a score of 601-680 on the SAT II test or the Harvard Placement test, or a score of 4 on the Italian AP exam; or permission of course head.

Advanced Italian I: Italian Through Cinema: Oral Expression and Performance (116233)

Chiara Trebaiocchi

2022 Spring (4 Credits) **Schedule:** WF 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Through the exploration of both old and contemporary Italian movies in comparison, you will explore themes such as: immigration, family and stereotypes, regional difference between the North and the South, and the cinematic representation of mafie, among others. Course work – which include analysis of scripts excerpts and film reviews, creative writing assignments, presentations, and a group final project – is designed to advance language proficiency, explore different dialects and registers of language (formal and colloquial expressions), and review advanced grammatical structures in context. You will gain confidence expressing opinions on a variety of topics and in different registers; and deepen your understanding of the multifaceted nature of Italian culture(s). No previous knowledge of Italian movies or film studies is required.

Course Notes:

Conducted in Italian. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Appropriate for concentrators electing the Italian Studies or Romance Studies track. Not open to auditors. This course is taught by members of the Department.

Recommended Prep:

A score of 681-720 on the SAT II or the Harvard Placement Test, or a score of 5 on the Italian AP exam; Italian 30; equivalent preparation; or permission of course head.

Advanced Italian II: Written Expression. Italy in Other Words (127889)

Chiara Trebaiocchi

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This theme-based course is designed to develop advanced competence in written expression through guided examination of stylistics and pragmatics. The course includes the exploration of both literary and non-literary genres and authentic texts (films, novels, newspaper articles) that will help you perfect your personal style in Italian. By the end of the course, you will be able to: recognize and produce different genres of written and spoken Italian; identify features of language including differences in register; and write more confidently in academic Italian. You will enhance your writing proficiency and develop your academic language by practicing different types of creative and analytical writing assignments (movie and book reviews, social media posts, subjective and objective descriptions, argumentative essays, among others). Consult the course website for the current semester's theme and topics (Spring 2021: Scrivere per descrivere, raccontare, argomentare e riflettere).

Course Notes:

Conducted in Italian. Appropriate for concentrators electing the Italian Studies or Romance Studies track. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

Recommended Prep:

A score between 721-750 on the SAT II or on the Harvard Placement Test; Italian 40; or permission of course head.

The Cosmos of the Divine Comedy (207950)

Ambrogio Camozzi Pistoja

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Dante's *Commedia* is the story of a journey back from personal and societal Hell, through self-knowledge and friendship. The book itself is an act of friendship. It never disappoints. It teaches itself. It has been engineered to improve design thinking and emotional intelligence in its readers in proportion to their commitment. It prompts readers to experience knowledge as a communal and continual endeavor. Its metaphors are accessible irrespective of time, linguistic or socio-cultural barriers. Its characters and their voices brought solace into the darkest corners of modern history. The book is human craft and ingenuity at their best. The ways in which notions and ideas are encoded in Dante's *Commedia* are testimony to the capabilities of the human mind at investigating and preserving the diversity of the world, and the interconnectedness of all matter.

This introductory course has been designed to make Dante's masterpiece accessible and relevant to students interested in a variety of disciplines and bodies of knowledge. The readings and lectures are intended to provoke free inquiry and critical thinking into a highly complex linguistic object, and the information contained therein.

The course has two principal aims. First, through guided and independent 'reverse engineering' - by exploring the text piece by piece - and by working closely with the professor, students will gain an understanding of the mechanisms and potentialities of verbal language and of poetry in particular, as the conjunction of verbal language and music. This will help you to become a better writer and a better reader: more sophisticated, less credulous, more perceptive. Second, the course will introduce you to a key period of world's history, the European Middle Ages, its practical realities and its key spiritual, scientific, political, and artistic dilemmas. This is the time that saw the emergence and flourishing of new languages over Latin; of academic communities; that established the separation of religious and secular power; that saw the first monastic rule written by a woman.

Subject: Portuguese

Portuguese 10

Beginning Portuguese I: From Cambridge to Copacabana (120398)

Cristiane Soares

2021 Fall (4 Credits) **Schedule:** MTWR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Intended for those with no prior experience in the target language, this course emphasizes interpersonal communication as well as the interpretation and production of written and spoken language. Students take their first steps on the journey from speaking English to carrying conversations with Portuguese speakers over the course of one semester, thanks to immersion activities and dynamic, interactive learning. Students will experience contextualized Luso-Afro-Brazilian culture through music, film, and social media.

Course Notes:

Conducted in Portuguese. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have previously studied Portuguese must take a placement exam. Students with a solid knowledge of Spanish should enroll in PORTUG 10s instead of PORTUG 10. This course is taught by members of the Department.

Portuguese 10S

Beginning Portuguese for Spanish Speakers: Português Beyond Portuñol (113806)

Cristiane Soares

2021 Fall (4 Credits) **Schedule:** MWF 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Designed specifically for students with a sound knowledge of Spanish. This course presents linguistic and cultural structures necessary for basic communication, emphasizing the features of Portuguese most challenging for Spanish Speakers: pronunciation, idioms, and grammatical structures peculiar to Brazilian Portuguese. Over the course of the semester, students learn to express themselves effectively using their Brazilian voice, distinct from their Spanish voice. Students experience contextualized Lusophone culture through music, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes:

Conducted entirely in Portuguese. Requires a solid knowledge of but not necessarily native proficiency in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep:

Prerequisite: 720 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; a 30s level Spanish course; or permission of Course Head.

Portuguese 10S Section: 002

Beginning Portuguese for Spanish Speakers: Português Beyond Portuñol (113806)

Cristiane Soares

2022 Spring (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

PORTUG 10S is the first course in the Beginning Portuguese sequence for students with a strong background in Spanish, with the goal of establishing a solid foundation in Portuguese. This class offers the

linguistic and cultural structures necessary for basic communication in Portuguese, with emphasis on the features of Portuguese that are most challenging for Spanish Speakers: pronunciation, idioms, and grammatical structures peculiar to Brazilian Portuguese. Over the course of the semester, students will learn to express themselves effectively in Portuguese. Students will be exposed to contextualized Luso-Afro-Brazilian culture through music, film, literature, and social media, as well as via Teletandem, an interactive online exchange with learners of English in Brazil. By the end of the semester, students will have developed linguistic and cultural competence sufficient to expresses themselves, participate in conversations on familiar topics, and handle short social interactions in Portuguese.

Course Notes:

PORTUG 10s requires a solid knowledge of but not necessarily native proficiency in Spanish. Conducted entirely in Portuguese. May not be taken Pass/Fail, but may be taken Sat/ Unsat by GSAS students. Not open to auditors.

Recommended Prep:

Prerequisite: 750 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; a 40s level Spanish course; or permission of Course Head.

Cristiane Soares

2022 Spring (4 Credits) **Schedule:** MWF 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

PORTUG 11S is a continuation of PORTUG 10S. This course guides students to continue the work of confronting features of the Portuguese semantics and phonological system that are most challenging for Spanish speakers. It helps solidify student's foundation in Brazilian Portuguese, and pushes them to go deeper by engaging with literary readings, examining unique cultural aspects in addition to practical points of the language. Students will continue to experience contextualized Afro-Luso-Brazilian culture through music, film, literature, social media, and Teletandem, a weekly online interaction with Brazilian students at the Language Center.

Course Notes:

Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Advanced Portuguese I: Images of Brazil through Contemporary Cinema (124524)

Cristiane Soares

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In this advanced Portuguese language and culture course, you will explore Brazilian culture(s) through contemporary films. The course examines major Brazilian films in their historical, political, and social context. You will become familiar with relevant concepts in cultural studies and explore different modalities of Brazilian film in relation to the already established tradition of the 1960s "Cinema Novo". Students will have various opportunities to engage in interactive communicative activities, participate in discussions, develop their interpretive and presentational skills in Portuguese and participate in creative assignments, including a short film by the end of the semester. No previous experience with film study is necessary. This course is conducted entirely in Portuguese and films are shown in Portuguese with English subtitles.

Course Notes:

This course meets regularly on Tuesdays and Thursdays, with additional asynchronous components. Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Sounds of Brazil: Portuguese Language and Brazilian Culture Through Music (203375)

Cristiane Soares

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

PORTUG 70 presents an overview of the Brazilian Popular Music (MPB) from the late nineteenth century to the present day. The course explores rhythms, musical styles and movements developed in Brazil such as Samba, Baião, Sertanejo, Bossa Nova, Tropicalismo, Brazilian Funk and Rap, among others. Seeking to highlight the role of music as an element of strong expression in the Brazilian experience, this course also devotes special attention to the analysis of song lyrics in connection with the social and historical aspects of each period. A variety of readings, films, and playlists will serve as the basis for weekly discussions. The course is conducted in Portuguese. Previous musical training is NOT required.

Course Notes:

The course is conducted in Portuguese. Previous musical training is NOT required.

Tutorial - Senior Year (124308)

Josiah Blackmore

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

For honors seniors writing a thesis. Part one of a two part series.

Course Notes:

For honors seniors writing a thesis. Successful completion of two terms of Portuguese 99 is required of all thesis-track honors concentrators. Students who do not complete a thesis are required to submit a substantial paper in order to receive either half course or full course credit.

This course is taught by members of the Department.

Recommended Prep:

Satisfactory completion of a junior tutorial and prior faculty approval of proposed thesis topic. Successful completion of one term of Portuguese 99 is required of all honors concentrators. To enroll, see course head.

Requirements: **Prerequisite: French 98 OR Italian 98 OR Portuguese 98 OR Spanish 98 OR Romance Studies 98 OR Latin American Studies 98**

Additional Course Attributes:

Subject: Catalan

Catalan 10

Introduction to Catalan (114279)

2021 Fall (4 Credits) **Schedule:** TR 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Catalan is the language spoken in a large area in the east of Spain, including the cities of Barcelona, Valencia, and Mallorca (in the Balearic Islands). It is also the national and official language of Andorra and it is spoken in the Italian island of Sardinia and the historic Roussillon, a region of southern France. Catalan 10 is for beginners as well as for those who already know some Catalan expressions and phrases. Through a set of units that introduce critical topics of contemporary social, political, territorial, and artistic debates, this course teaches the basics of Catalan language and culture. The class activities will focus on listening,

speaking and the exploration of culture and will work with grammar and vocabulary from different authentic oral and written texts. Students will engage in interactive and communicative activities and practice their interpretive and presentational skills. By the end of the course students will be able to interact in daily situations with native speakers, read and write messages about themselves and other topics, and interpret cultural expressions and products.

Course Notes:

Conducted in Catalan. Knowledge of another Romance language is useful but not essential. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.

Additional Course Attributes:

Attribute	Value(s)

Catalan 11

Catalan Language and Culture: a Multimedia Approach (122352)

2022 Spring (4 Credits) **Schedule:** TR 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This intermediate-level language course aims to consolidate and further develop proficiency in listening comprehension, speaking, reading, and writing in Catalan by exploring cultural topics related to history, art, music, dance, literature, and sociolinguistics in Catalan-speaking communities. The class activities include a comprehensive review of the grammar and vocabulary, the learning of new specific structures, and reinforces linguistic acquisition through texts, movies, art, and multi-media projects to acquaint students with cultural issues relevant to the Catalan-speaking world. Students will discover the Catalan cultures and their relations with the American continent through conversations with online language partners abroad and guest visitors in order to increase their ease of expression. The course will continue to promote cross-cultural understanding by introducing learners to different textual genres such as debates, critical review as well as a selection of literary work.

Course Notes:

Conducted in Catalan. Not open to auditors. May not be taken Pass/Fail by undergraduates, but may be taken Sat/Unsat by GSAS students.

Requirements: **Prerequisite: Catalan 10**

Romance Languages 210A

Language Pedagogy: Theories, Approaches, and Practices (219640)

Nicole Mills

2021 Fall (2 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course is designed for TFs and TAs in the department of Romance Languages and Literatures who are teaching a Romance language at Harvard for the first time, or those who are interested in foreign language learning and teaching. It introduces TAs and TFs to theories of second language acquisition (SLA) and explores their implications for the teaching of foreign language, culture, and literature. The course provides opportunities for students to learn to enact the specific pedagogical practices deemed essential to foreign language teaching. The intensive week before the start of classes includes reports on and discussion of general SLA theories and demonstrations and analysis of varied instructional approaches.

Part one of a two-part series. The curriculum for this course builds throughout the academic year. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Additional Course Attributes:

Teaching Languages, Cultures and Literatures (216381)

Virginie Greene

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is addressed to experienced TFs and TAs who are currently teaching foreign languages, literatures and cultures at Harvard. It will present and use theories coming from the disciplines of language pedagogy, relevant applied linguistic research, socio-linguistics, anthropology, and literary criticism, applied to classroom experience whether online or in situ.

The course is conceived as a space of open and structured discussion among humanists and social scientists specializing in different fields, teachers at different stages of their careers, and individuals coming from diverse linguistic, cultural and social backgrounds. We will learn from each other through comparing theories, practices, and stories.

Course Notes:

This course fulfills one of the requirements of the Bok Certificate in Teaching Language and Culture (in collaboration with the Bok Center for Teaching and Learning).

Tutorial - Sophomore Year (121681)

Jonathan Bolton

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

The sophomore tutorial in Slavic Languages and Literatures will introduce you to some of the great authors in the Slavic literary traditions, including Russian, Czech, and Polish works, as well as works by exile and emigré authors in the United States. We will focus on novellas and short stories, paying special attention to the relationship between fictional, historical, and journalistic narratives, and trying to understand literature both as an "autonomous" world of the imagination and as a social practice closely connected to its political and historical context. Authors will include Tolstoy, Dostoevsky, Chekhov, Nabokov, Kundera, Kapuściński, Alexievich, Ulitskaia, Petrushevskaia, and others.

Course Notes:

This course is required for concentrators in Slavic Languages and Literatures. Other students are welcome and should contact the instructor before the start of the semester.

Squaring the Circle: Russia, Art, Revolution (208135)

Daria Khitrova

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes:

No prerequisites. All readings in English.

This course is cross-listed as SLAVIC 114 and TDM 114K.

War and Peace (218532)

Julie A. Buckler

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Leo Tolstoy's War and Peace (1865-69) is a magnificent work of art by a world-class writer tackling life's "big questions" and it is also a pleasure to read. We will go through War and Peace closely together, savoring the details, while exploring Tolstoy's artistic biography and the larger cultural and historical contexts for classic Russian novels. We will also consider the significance of the Napoleonic Wars (1803-1815) in Russian history. How many different ways are there to interpret Tolstoy's work? What issues arise in translation? How does the pacing of the novel relate to nineteenth-century conceptions of time, space, narrative, and genre? What are the problematic distinctions between history and literature that the novel raises?

Course Notes: **No knowledge of Russian required.**

Class Notes: **There will be a weekly discussion section in addition to the regular 2-hour class session on Mondays.**

Ballet, Past and Present (215995)

Daria Khitrova

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores the history of ballet, classical and beyond. We will view and discuss ballets to help us think about what ballet is, and why it has been such an enduring art form in different eras and cultures. Why is it mute and does it have to be? What kind of stories can it tell and how should we read them? How do ballets survive and how do they change in the process? Who makes a ballet: a choreographer or dancers? Or is it, perhaps, a composer, designer, or story writer? Does ballet technique confine the body, as the pioneers of modern dance used to assert, or is it a form of idealist philosophy, the ultimate expression of human freedom, as twentieth-century theorists of ballet have suggested? The works to be studied include Giselle, Sleeping Beauty, Swan Lake, Rite of Spring, Les Noces, Apollo, and others. The course is classroom-only (no dancing component; only watching, reading, and discussing) but, if pandemics permit, will also include a visit to the theater as well as to a ballet class and, possibly, rehearsals. No pre-requisites.

Hacking Russia: Technological Dreams and Nightmares of Russian Culture (216025)

Nariman Skakov

2022 Spring (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The course explores the role of technology in constructing the social and ideological fabric, as well as the material reality, of Soviet and Russian society. From the early Soviet period, when technological progress was linked to humanistic utopia, through dystopian critiques of a totalitarian machine of conformity and constraint, we proceed along the assembly line of communist production, avant-garde and constructivist artistic utopia, socialist realism, the space race, and information technology, using examples from Russian literature, film, art, visual arts, performance, and current events. With the media's concern for fake news and Russian hacking today, it is our course's goal to "hack Russia": to understand the politics and technology shaping Russia, and the creative responses that have made its society a site of both dreamlike promise and nightmarish threat, through its history and today.

Russia's Golden Age: Literature, Arts, and Culture (207566)

Julie A. Buckler

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Explores major works of imperial Russian culture (1703-1917), including literature, drama, opera, ballet, music, visual arts, and architecture. At the center of this course stand the works themselves, their original historical and cultural contexts, the intentions of their creators, and the responses of their initial audiences. What mythologies of national identity did these works propose and why were they so compelling to their first audiences? In what ways were these works radical: formally, aesthetically, ideologically? How have these masterworks been variously renewed and reinterpreted since their initial reception, up to the present day? Includes works by Pushkin, Gogol, Dostoevsky, Tolstoy, Turgenev, Chekhov, Musorgsky, Tchaikovsky, and others.

Course Notes:

All readings in English. Students who wish to read Russian texts in the original may arrange for a special weekly section with the instructor.

Apocalypse Then! Forging the Culture of Medieval Rus' (213422)

Michael Flier

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

When the natives of Medieval Rus' (later Russians, Ukrainians, and Belarusians) accepted Orthodox Christianity in the 10th century, their nature-based paganism gave way to a powerfully sensual belief system that made good use of the visual and the verbal to prepare these newest Christians for the coming Apocalypse and Last Judgment. We investigate this transformation from the conversion of Saint Vladimir and the excesses of Ivan the Terrible through the Time of Troubles and the modern turn of Peter the Great. The class features close analysis of architecture, icons and frescoes, ritual, folklore, literature, and history to understand this shift in worldview, including the role of women. Special attention is devoted to the ways in which Medieval Rus' is portrayed in film, opera, and ballet.

Course Notes:

All readings in English.
This course will include a field trip to the Museum of Russian Icons in Clinton, Massachusetts.

Slavic 143

Eastern European Modernism, 1918-1939 (219651)

Iaroslava Strikha

2022 Spring (4 Credits) **Schedule:** R 1200 PM - 0200 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Although European modernism is often seen as setting up a strict hierarchy between high and low art, the most interesting experiments were happening, as they always do, on the margins, in the shifting borderlands between cultures, languages and ideologies. This course will introduce students to the styles and themes of literary modernism based on novels, short stories, film, and graphic art from the interwar period in Eastern Europe. Bringing together works written in Polish (Bruno Schulz, Witold Gombrowicz), Ukrainian (Oleksandr Dovzhenko), Yiddish (Dovid Bergelson, Moshe Kulbak), Czech (Karel Čapek), Russian (Vladimir Nabokov) and German (Joseph Roth, Franz Kafka) – all read in English translation – we will address the key aspects of literary modernism, including its main movements, thematic preoccupations and stylistic experiments, with special attention paid to historical and cultural contexts. We will explore the new, vibrant and often violent cultural landscapes emerging in the wake of World War I and the Russian

Revolution, asking how artists engaged with changing political regimes, national borders and competing ideologies. Looking at how artists expressed their growing premonitions of the oncoming storm, we will discover that margins, contact zones and borderlands were the most dangerous place to be, but also, inevitably, the most interesting.

Communism and the Politics of Culture: Czechoslovakia and the Cold War in Eastern Europe (218574)

Jonathan Bolton

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

We will examine the literature and film of Czechoslovakia within the larger context of European history during the Cold War, with a focus on how the intense political pressures of revolution, invasion, and occupation can shape a country's literature, drama, art, and music. Starting from the 1948 Communist takeover in Prague, we will learn about the show trials of the 1950s, the Prague Spring and the Soviet invasion of 1968, the rise of the music underground and dissident movement in the 1970s, and the 1989 Velvet Revolution, a hallmark of the peaceful overthrow of Communism in Europe. This course will introduce you to the history of Eastern Europe during the Cold War, with special attention to key problems in the study of ideology, aesthetics, and politics (including censorship, samizdat, "underground" culture, dissident movements, and the "New Wave" in Czech film). Readings from Milan Kundera, Bohumil Hrabal, Václav Havel, Heda Kovaly, Eva Kantůrková, and others; films from Miloš Forman, Věra Chytilová, Agnieszka Holland and others; music from the Plastic People of the Universe.

Course Notes:

Down with Lenin! Ukrainian Culture from the Fall of Communism to the War with Russia (219643)

Iaroslava Strikha

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

There is a time to erect statues, and a time to topple them. Since the fall of the Soviet Union in 1991, the toppling of Soviet monuments – initially as a nation-wide grassroots initiative and subsequently as state policy – has become emblematic of the political, social, and cultural tensions in contemporary Ukraine. In this course, we will explore the dramatic transformations in Ukrainian culture from the collapse of the Soviet Union in 1991 through the Euromaidan protests of 2013-2014 and into the Russo-Ukrainian hybrid war that began in 2014 and continues to this day. We will investigate art and literature as mediums of the nation's attempts to define its identity, and look at how culture can serve as a vehicle for protest while still preserving its aesthetic autonomy. We will pay special attention to how ethnic minorities have defined their place in the nation's political culture. Our discussions will cover a wide range of genres, from graphic art to cinema and literature. By the end of the course, we will have discussed various strategies for dealing with uneasy pasts. We will have learned to interpret the ever chaotic news from this region, and will have discovered some hidden gems of European literature along the way.

The Other Russia: Twenty-First Century Films, Fictions, States of Mind (205015)

Stephanie Sandler

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Russia is in the news these days for its politics, protests, and foreign misadventures, but what about the daily lives of Russian people? Nothing gets at that daily reality in all its struggle and grandeur better than Russian literature and cinema. The stories, poems, plays, movies, memoirs, and documentaries of the last thirty years are the subject of this course. We will trace the chaotic transitions of the 1990s, the disparities of wealth and polarized politics of the 2000s, the rise of religious thinking (Orthodox, Islam, Jewish), and the several conflicts at Russia's borders. Travel, diaspora, and the internet broke down old walls that once isolated the USSR, but the COVID pandemic and recent acts of authoritarianism and repression have brought some of those walls back. The different fates of former Soviet republics will be compared, with examples from Ukraine, the Caucasus, and Belarus, as we ask questions about how we, from our Western vantage point, can understand Russia today.

Writings by Svetlana Aleksievich, Joseph Brodsky, Keti Chukhrov, Elena Fanailova, Linor Goralik, Alisa Ganieva, Boris Khersonsky, Vladimir Sorokin, Maria Stepanova, and others. Films to include Leviathan, Four, Alexandra, My Joy, and Pussy Riot: A Punk Prayer. Students will also have the opportunity to conduct online oral history interviews with current Moscow-based college students to gain an understanding of how they think about contemporary Russian literature and culture, and how they understand the society in which they are living. These conversations will be the basis for the course's final project.

Course Notes:

What is to be Done? The Future of the 19th Century (218533)

Julie A. Buckler

2021 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

How should we read and teach classic nineteenth-century Russian literature for the twenty-first century? This course revisits major authors and Russian literary works, as well as their interpretive histories. We will explore the ways in which the classic Russian literary tradition remains relevant and appealing, but also confront cultural and historical legacies and literary ideologies that can be challenging to treat in today's classroom. How does recent scholarship approach these issues? How can we develop creative and ethical strategies for our own scholarship and teaching going forward?

Course Notes:

Reading knowledge of Russian (equivalent to three or more years of study) is required.

Bakhtin (218541)

Nariman Skakov

2021 Fall (4 Credits) **Schedule:** F 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

'Quests for my own word are in fact quests for a word that is not my own, a word that is more than myself,' writes Mikhail Bakhtin (1895-1975) towards the end of his life. In this ceaseless pursuit of 'another' word, Bakhtin, one of the most distinguished literary critics of the twentieth century, helped reorient literary studies around ideas of unfinalizability, dialogic imagination, chronotope, and carnival. The seminar explores these core concepts through close reading, in English, of Bakhtin's key texts, including Author and Hero in Aesthetic Activity, Rabelais and His World, Problems of Dostoevsky's Poetics, 'Epic and Novel,' 'Forms of Time and of the Chronotope in the Novel,' 'Discourse in the Novel,' as well as a consideration of his influence on later theorists.

Course Notes:

All readings in English. Primarily for graduate students but open to qualified undergraduates with permission of the instructor.

Subject: Russian

Russian AA

Elementary Russian I (122907)

Steven Clancy

Natalia Chirkov

2021 Fall (4 Credits) **Schedule:** MWF 0945 AM - 1045 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Part one of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Course Notes:

Part one of a two-part series. Students are strongly encouraged to enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Russian AA together with Russian AB or Russian ATB (Elementary Russian through Authentic Texts II) satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A, AAB, and AT) prepare students for continued study of Russian in intermediate (B-level) courses (B, BAB, or BTA) and for study or travel abroad in Russian-speaking countries.

Recommended Prep:

No prior knowledge of Russian is required.

Additional Course Attributes:

Attribute	Value(s)
Full Year Course	Divisible Course
FAS: Meets Foreign Lang Req	Russian
FAS: Final Assessment Category	Three-hour Exam
HCOL: Foreign Lang Citation	Russian
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	None

Russian BA

Intermediate Russian I (112823)

Steven Clancy

Veronika Egorova

2021 Fall (4 Credits) **Schedule:** MWF 1200 PM - 0100 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family, education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social situations (sociolinguistic competence). Computer exercises on selected topics.

Course Notes:

Interested students should contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions regarding scheduling conflicts. With sufficient enrollments it is possible that this course will be offered in an additional section on MWF in a different time slot. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Russian BA in the fall and Russian BB in the spring within the same academic year. - - -

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes. - - -

Any full course in Russian at the B-level (Russian Ba-Bb, Russian BTA-BTB, or Intensive Russian BAB) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Recommended Prep:

Russian AA-AB, AAB, ATA-ATB, AH, or placement at the B-level. Familiarity with fundamentals of Russian grammar, particularly case endings, verb conjugation, and elementary competence in spoken Russian.

Additional Course Attributes:

Natalia Chirkov

2022 Spring (8 Credits) **Schedule:** MWF 0900 AM - 1000 AM
TR 1030 AM - 1130 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

An intensive version of Russian Ba and Russian Bb, covering the same material in a single semester. Class meets five days per week with five hours of the main section and three hours of small group speaking practice each week. Readings may vary.

Course Notes:

This course will meet five days a week from 9:00am to 10:00am on MWF and from 10:30am to 11:30am on TuTh. In addition, students will be required to attend three additional one-hour speaking practice sections each week on Mondays, Wednesdays, and Fridays. Meeting times for the small group sections will be determined at the start of term based on students' availability.

Any full course in Russian at the B-level (Russian Ba-Bb, Russian BTA-BTB, or Intensive Russian BAB) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Subject: Bosnian, Croatian & Serbian

Bosnian, Croatian & Serbian AA

Elementary Bosnian, Croatian, and Serbian I (110073)

Tatiana Kuzmic

2021 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1130 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Part one of a two-part introductory course in modern Bosnian, Croatian, and Serbian (BCS) language and culture, designed for students without previous knowledge who would like to speak BCS or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed.Students are exposed to BCS culture through excerpts from poetry, prose, and newspaper articles, as well as video and popular music clips as they learn to use the language both as a means of communication and as a tool for reading and research.

BCS AA: Elementary BCS I (in the fall) and BCS AB: Elementary BCS II (in the spring) satisfy the foreign language requirement and prepare students for continued study of BCS in intermediate-level courses and for study or travel abroad.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in BCS AA in the fall and BCS AB in the spring within the same academic year. - - -

Czech AA

Elementary Czech I (111301)

Veronika Tuckerova

2021 Fall (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Part one of a two part introductory course in modern Czech language and culture, designed for students without previous knowledge who would like to speak Czech or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Czech culture through work with film and literature and gain some familiarity with the major differences between literary and spoken Czech as they learn to use the language both as a means of communication and as a tool for reading and research.

Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Czech AA in the fall and Czech AB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Czech BA

Intermediate Czech I (121469)

Veronika Tuckerova

2021 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Part one of a two part intermediate course in modern Czech language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Czech grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms.

The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Czech BA in the fall and Czech BB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Recommended Prep:

Completed Czech AB, or placement at the B-level. Familiarity with fundamentals of Czech grammar, particularly case endings and elementary competence in spoken Czech.

Introduction to Social Studies (115470)

David Armitage

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course offers an introduction to the foundations of modern social theory from the seventeenth to the nineteenth century. Our focus will be on the rise of democratic, capitalist societies and the concomitant development of modern moral, political, and economic ideas, with special emphasis on empire, race, and inequality. Authors we will examine include among others, Thomas Hobbes, Jean-Jacques Rousseau, Adam Smith, Mary Wollstonecraft, Alexis de Tocqueville, Frederick Douglass, Charles Darwin, and Karl Marx.

Course Notes:

Social Studies 10B

Introduction to Social Studies (123964)

Jonathan Hansen

2022 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This class continues the introduction to the classic texts of social theory begun in Social Studies 10a through the twentieth century. Authors include Friedrich Nietzsche, Max Weber, Emile Durkheim, W.E.B. Du Bois, Sigmund Freud, Simone de Beauvoir, Frantz Fanon, and Michel Foucault.

Course Notes:

This course is limited to sophomores and Social Studies concentrators. This course is a prerequisite for sophomores applying to Social Studies. Students planning to take this class must attend the first lecture to be admitted.

Foundations of Social Science Research (213384)

Andrew Brandel

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 50

This course has two goals. First, to introduce students to the diversity of methods that social scientists use to answer questions about the social world. Second, to prepare thesis writers to conduct original research. We will survey both qualitative and quantitative approaches, reading a combination of methodological texts and exemplary empirical work. For their final project, students will write a research proposal that will anchor their future thesis work.

Methods Training for Social and Political Theorists (213383)

Don Tontiplaphol

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Is social-scientific knowledge possible? How does empirical research depend on conceptual analysis? What is the relationship between normative theory and empirical reality? This course investigates different modes of theorizing and integrates them into the philosophical foundations of the social sciences. Units include "Epistemology and Social Explanation"; "Conceptual Analysis and the Human Sciences"; "Political Theory and Historiography"; "Normativity, Critique, and Political Realism." Recommended preparation for senior-thesis research in social and political theory, including the epistemology of social science. Continuation of the methodological themes of Social Studies 10b; intended for first-term juniors and first-term seniors.

Course Notes:

This course will be lotteried.

Social Studies 68RJ

Restorative and Transformative Justice (218582)

Bonnie Talbert

2021 Fall (4 Credits) **Schedule:** F 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Restorative justice (RJ) is a quickly growing field, and has become central to discussions of harm, crime, punishment, and power. Yet it is not obvious what the core ideas and practices of RJ are. This class will center on an examination of the rich diversity of understandings, practices, histories, and activist causes that are part of the multiplicity of RJ movements. Are there foundational ideas and practices that unite RJ programs? What inspires people to turn to RJ? What is the nature of the disagreements and conflicts that have emerged within the movement? How are we to understand the overlap and tensions between the agendas of restorative and transformative justice (TJ)?

One thing that has become clear is that RJ is not merely about a set of circle or conference practices. It is also a set of beliefs and teachings concerning how we relate to ourselves and our communities. These teachings do not merely lie behind the practices of RJ and TJ, they are an integral part of those practices. In trying to transform our patterns of responding to harm, these movements also seek to transform our ideas about how to conduct our daily lives. Just as we will critically assess the conferencing and circle practices of RJ and TJ we will likewise examine the everyday teachings of restorative living that are central to these movements.

This is an engaged scholarship course, and a guiding assumption is that students will be interested in applying RJ practices in a particular setting, organization, or group they are involved in. Resources and opportunities to practice RJ skills will be provided for students who want assistance in finding a context to practice RJ outside of class. In addition to discussing academic literature, case studies, interviews, etc., each class meeting will devote time to RJ practice. The first half of the course will focus our practice time on building circle fluency, while the later weeks will be focused on providing support as students take their practices to their communities.

The Future of American Political Parties in Historical and Comparative Perspective (218231)

E. J. Dionne

Theda Skocpol

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 35

What is the state of the American political party system? Is it working? Is it in crisis? Are those even the right questions? This class will examine the current state of American political parties in historical and comparative perspective. It will deal with issues such as representation, organization, the role of parties in governance, and polarization around race, class, ethnicity, and immigration. We will examine stability, fragmentation, and realignment by bringing in lessons from party systems in other democratic nations.

Course Notes:

This course is also offered through the Government Department as GOV 1316. Credit may be earned for either SOC-STD 96AP or GOV 1316.

Development and Modernization: A Critical Perspective (116329)

Stephen Marglin

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0215 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

What assumptions about human beings underlie the conviction that development and modernization constitute progress, that the developed West points the way for the rest of the world? Does economic growth involve a package that necessarily changes the society, the polity, and the culture along with the economy? This tutorial provides a framework for thinking about these questions, both in the context of the West, and in non-Western contexts. This is a junior tutorial.

Law and American Society (121345)

Terry Aladjem

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The course examines law as a vehicle of political conflict and a defining force in American society in four dimensions: 1.) as it establishes individual rights, liberties, and limits of toleration; 2.) as it attempts to resolve differences among competing constituencies; 3.) as it sets out terms of punishment and social control having effects on race and class, and 4.) as a source of informing images and ideological meaning. We will examine these themes from their historical roots and their constitutional and theoretical origins, to their manifestations in our current political debates. We will take up issues at the level of jurisprudence or political theory, but also as they arise or are settled in legal cases by the courts—cases in which racial or gender equality are at stake, religious or sexual freedom, cases in which the nature and content of political speech are questioned, cases in which the claims of religious communities seem irreconcilable, cases in which the nature and extent of punishment have been debated and the question of who deserves to be

punished decided, and notorious public trials in which the national self-understanding has been shaped. Our aim is to bring theory to bear, and down to earth, in each consideration, (we will read Foucault and also examine prisons and mass incarceration) and since this is an inaugural presidential year in which the constitutional framework for our democracy has been tested, the issues being raised accordingly will be much on our minds. This is a junior tutorial.

Topics in Feminist Political Thought (115179)

Katrina Forrester

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course examines key currents in feminist political thought. It introduces students to classic texts of late twentieth-century feminist theory, explores the key arguments that have preoccupied radical, socialist, liberal, Black, postcolonial and queer feminists, and examines how these arguments have changed over time. We will critically evaluate, assess, and critique a range of feminist authors and explore key feminist approaches to a range of problems in politics and social theory, including the nature of capitalism, sexuality, work, gender, race, class, technology, and decolonization. This is a junior tutorial.

Art, Political Culture, and Civic Life (116288)

Kiku Adatto

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The seminar explores the interplay of the arts, political culture, and civic life. It will draw on studies in art, history, political philosophy, literature, sociology, and photography. Among the questions we will address

are: How is historical memory constructed, and what are the competing forces that shape it? What is the significance of public apologies, and does solidarity create moral responsibilities for historical injustices? How is cultural domination exerted, and how is it resisted? In what ways does rhetoric shape politics, and what role does it play in national narratives? Why does the contest to control images loom so large in politics, the media, and in our everyday lives? This is a junior tutorial.

Globalization and the Nation State (125982)

Nicolas Prevelakis

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Despite globalization, the nation is still a major actor in today's world. This course tries to understand why this is so by examining the role that nationalism plays in peoples' identities and the effects of globalization on nations and nation-states. It includes theoretical texts, but also case studies from the recent pandemic, the rise of populism and authoritarianism, the challenges of supranational entities such as the European Union, and the urgency of global issues such as climate change, inequality, and migration. Examples from the United States, Europe, Latin America, China, and the Middle East. This is a junior tutorial.

Inequality and Social Mobility in America (127817)

Anya Bassett

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Income and wealth inequality in America are at their highest levels in a century. Historically, one reason Americans have been thought to tolerate inequality is that we tend to believe that our society is a mobile one, where people can easily move from one social class to another. But in recent years, inequality and stagnant social mobility have been associated with increasing social and political distrust and unrest. In this course, we will examine the factors that have led to this historical moment, learn about how Americans experience living in an unequal society, and consider the future of equality and mobility in the United States. How should our society be shaped, and what are our own roles as members of that society? This is a junior tutorial.

The Critical Theory of the Frankfurt School (156263)

Charles Clavey

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course examines the distinctive critical theory created by members of the Institute for Social Research—better known as the Frankfurt School—from its origins in the interwar era to the present day. Over these decades, critical theory has used tools from philosophy, psychology, and sociology to grasp the pathologies of the present and to chart a path towards emancipation in the future. We will reconstruct the Frankfurt School's evolving theory through its connections to the most important themes of twentieth-century thought: capitalism, authoritarianism, individuality, bureaucracy, and alienation. Our goal is not only to gain a deep understanding of critical theory but also to assess its continued relevance to modern social and political thought. This is a junior tutorial.

Language, Culture, Power and the Making of Europe (207902)

Andrew Brandel

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

How do the languages we use shape our thinking? And how do our ideas about how language works intersect with issues of race, gender, and class? This course is an introduction to key debates in the social scientific study of language as a social, cultural, and political phenomenon.

Our readings focus on a range of contexts and issues unfolding across Europe – from colonial practices of language documentation and translation to discourses of bilingualism and code-switching, from "migrant" literature to public debates about the roots of national identity. At the same time, we will explore how the study of language itself has historically contributed to the creation and maintenance of the idea of "Europe" in the first place, both in the way it narrates the history of and relationships between languages, and in describing their differing capacities. Tracing this story will in turn require that we ask how European ideas about language have been naturalized in the social sciences, and what kinds of alternatives have emerged to challenge this hegemony. Instead of treating language as a separate domain of research, therefore, we will see how language helps constitute the social and political worlds in which we live, as well as how our ideas about language reflect and produce a variety of normative assumptions. This is a junior tutorial.

Race and Ethnicity in the United States (213256)

Sarah James

2022 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The United States is more racially and ethnically diverse than at any point in its history. Yet racial and ethnic social categories remain persistent sources of inequality in American society. This tutorial will interrogate the relationships between race, ethnicity, and inequality, examining theoretical and empirical approaches across multiple social domains. Part I of the course will focus on the historical role of race in American political development. In the second half, we will shift to consider how these origins play out in several key areas of public policy, including housing, education, and climate policy. This is a junior tutorial.

Identity and Protest in Modern America (213296)

Abigail Modaff

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

What kind of politics does identity create? How can protest define who we are? Is all politics identity politics, or can—should?—our differences be overcome? This course will explore how identity and American belonging fuel protest and shape the realm of political possibility. Using historical study, theory, and analysis of present-day events, we will investigate how different ways of understanding ourselves and our communities have shaped the past century. The first half of the course considers the "Progressive Era," a time of continent-wide activism and reform at the turn of the twentieth century. Between Reconstruction and the Great Depression, democratic dreams clashed with suspicion and fear: of labor revolution, of racial degeneration, of unwomanly women and incendiary ideas. The first half of the course traces different identities that emerged during the Progressive Era, such as class, sexuality, ability status, race, and gender. The course's second half will trace the themes we identify in the Progressive Era forward into the twenty-first century. Which assumptions about identity do we want to keep? What new ways of thinking about identity and politics might emerge from the past? And what can studying identity before identity politics tell us about the future of protest? This is a junior tutorial.

The Many Faces of Tyranny (213280)

Rosemarie Wagner

2021 Fall (4 Credits) **Schedule:** F 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course explores the way tyranny has been presented in different times and places and the many ways tyranny can create unfreedom. From a wild man out of control, to a carefully orchestrated system of control, tyranny wears many faces. This course begins with Plato's tyrant who rises from the rubble of a failed democracy, through early modern defenses of Regicide, to modern accounts of the tyranny of the majority, empire, and structural oppression. Through this course we will examine what a tyrannical nature is, what makes it rise to power, and what can be done to stop it. This is a junior tutorial.

Capitalism, Time, and Value (213266)

Tracey Rosen

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

College students are often counseled to "make the most valuable use of their time." The "budgeting" of hours, days, and weeks of a semester often rests on an evaluation of how much time an activity is worth. In this tutorial we will explore how capitalism might shape the way we perceive, understand, and value time. We start from the premise that economic systems do more than organize the production and distribution of goods; they also help organize how we experience the world as well as the meanings and values that shape our actions within it. In order to ground the dynamics of time and value within capitalism, we begin by drawing from anthropological and historical examples to consider the relationship of time and value in a variety of pre-capitalist contexts. The course then considers the way in which capitalist transformations coordinate new forms of value and perceptions of time. We end with an examination of our everyday, contemporary experience of time against the backdrop of "neoliberal" capitalism and the rise of "futures" markets. This is a junior tutorial.

What's the Matter with Inequality? Normative and Empirical Perspectives (216070)

Glory Liu

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course investigates the diverse ways in which we theorize, study, and talk about economic inequality today. Is inequality wrong because some people have too much, or because others have too little? Or is it wrong simply because some people have more than others? To answer these questions, this course explores prominent social science explanations of the nature, causes, and consequences of economic inequality in the United States alongside normative theories of equality and inequality. We will also investigate the theory and practice of different "solutions" to inequality such as redistribution and "predistribution", philanthropy, and universal basic income. This is a junior tutorial.

The Theory and Practice of Democracy in Developing Countries (216073)

Julie Weaver

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

What does the practice of democracy look like in low- and middle-income countries today? How does that practice map on to democratic ideals like representation, participation and accountability? What are developing countries' major democratic challenges and successes? The course will explore these questions through both theoretical and empirical social science research, with cases drawn primarily from Latin America, Sub-Saharan Africa and South Asia. Topics will include political accountability, state and institutional strength, corruption and clientelism, participatory democracy, managing diversity, and activism and civil society engagement. This is a junior tutorial.

Democracy and Education in America (216172)

Rob Willison

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course is organized around three crucial questions: (1) What does a truly democratic society require of its educational institutions? (2) How well do our current educational institutions—especially our K-12 schools—live up to the standard set by question 1? (3) What approaches, at the level of both pedagogy and policy, should we take to make our school system more democratic? We'll address these questions in conversation with philosophers (like John Dewey, Paolo Freire, and Danielle Allen), cognitive psychologists (like Susan Carey), jurists (like Earl Warren and Thurgood Marshall), and social scientists (like Raj Chetty and Daniel Koretz). This is a junior tutorial.

Innovating Democracy: Designing Public Engagement for the 21st Century (216173)

Sean Gray

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course explores the exciting field of participatory innovations in democratic governance and public policy. Our goal will be to identify proposals that generate effective citizen participation and engagement while addressing pressing public problems. A number of challenges for democracy reform will be considered, including the role of expertise, inattention and misinformation, the tyranny of powerful minorities, political polarization, and rising public distrust and disaffection. Throughout, our discussions will be grounded in an analysis of real-world cases, from elections and criminal justice, to international development and urban planning. This is a junior tutorial.

Race and Ethnicity in Comparative Perspective (218303)

Amy Alemu

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course examines constructions of race, ethnicity, class, and caste in historical and global comparison, with attention to contexts outside of the United States. We will read historical works investigating racialization from as early as the 11th century, as well as more contemporary ethnography and sociology from African, South Asian, Native, and Pacific studies, among others. Our goal is both to nuance our understanding of the material, social, and political conditions that have linked identity with inequality, and to gain a comparative perspective toward researching race and ethnicity from and beyond the United States. This is a junior tutorial.

Terror and Terrorism in Global History (218304)

William Whitham

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Violence to achieve political goals, whether used by state or non-state actors, is ancient, universal, and consequential. This course analyzes political violence by drawing on ethics, psychology, political science, sociology, and communications. We will study terrorist regimes, organizations, and networks across five continents, from the Jacobins to today's jihadis and white supremacists. Rather than pathologize terrorists, we will place political violence at the center of a modern story about agency, structure, and power. This is a junior tutorial.

Course Notes:

This course will be lotteried.

Colonialism and Postcoloniality (218478)

Ruodi Duan

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

By 1914, European rule extended over 85% of the land surface on Earth. In the colonized world, a multiplicity of ideologies and movements sought political self-determination and an end to imperialism in all of its forms. Anti-colonial nationalism in the twentieth century collided with the course of the World Wars and the Global Cold War, giving rise to fierce debates about the relationship between race, nationhood, and the international order. With a focus on Asia and Africa, we will consider the emergence of postcolonial thought and its central concerns related to knowledge, culture, and sovereignty in formerly colonized societies. Thematically, we will discuss the legacies of imperial violence and scientific racism, the impact of Marxism-Leninism, war and revolution, and the diverse trans-regional connections that linked the states and activists of the decolonizing world. This is a junior tutorial.

Course Notes:

This course will be lotteried.

Critical Theory of Knowledge, Technology and Power (218523)

Bo-Mi Choi

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This tutorial explores the role and impact of science and technology on society, culture and politics from the perspective of critical theory. Building on the foundations of 20th-century critical theory by thinkers such as Benjamin, Heidegger and Foucault, the course provides an intellectual bridge to recent theoretic contributions in the field of science and technology studies (STS). Questions we'll address along the way include: how do science and technology shape our experience and knowledge of the world and ourselves? how do they co-produce our political and social order? what impact do they have on democratic processes and on regulating human behavior? what are the legal ramifications of new technologies? and what kinds of ethical implications do we need to consider as we adopt them?

While the tutorial is largely designed as a theory course, we will also apply the theoretical components to concrete material case studies such as artificial intelligence and ethics, gender in science, privacy and big data, or racial bias in algorithmic systems. In addition to "classic" critical theory, readings are drawn from disciplines across the social sciences, including anthropology and newer fields such as AI studies. Rather

than conceptualizing science and technology in Promethean terms as mere "tools" of progress, we will closely examine how they are intrinsically constitutive of the ways we experience, order and govern the world, for better or worse. The aim of this tutorial is to collaboratively arrive at an amplified social theoretical framework that enables us to critically engage and normatively evaluate scientific and technological innovations from the standpoint of social justice, democratic freedom, and human emancipation. This is a junior tutorial.

Sociology

Subject: Sociology

Sociology 90I Section: SEM

Research Lab: Immigration (207118)

Leah Muse-Orlinoff

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 5

What does it mean to be a "good" immigrant? Is current media attention on immigration perpetuating an image of "deserving" and "undeserving" immigrants? How is coverage of immigrants' race, gender and sexuality, and human capital evolving in the current political context? And what implications for immigrant integration – the two-way process by which immigrants and their communities of settlement interact and adjust to one another – might be emerging from the media's depiction of immigrants and immigration policy?

In this research lab students will learn data collection and analysis skills that will help them answer these and related questions. Course content will include a robust research design and methodology component through its focus on media coverage of immigration and integration in mainstream and ethnic media. Course participants will develop qualitative research projects that analyze key sociological themes including race and ethnicity, gender and sexuality, and human capital. Students will learn how to formulate sociological research questions and hypotheses, collect and analyze data, and articulate findings in a formal academic proposal. This course is limited to sociology concentrators; bilingual students are encouraged to enroll.

Course Notes:

Limited to Sociology concentrators. Preference given to those who have taken Sociology 128.

Faculty Research Assistant (160534)

Danilo Mandic

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Students gain research skills along with an understanding of the production of sociological knowledge through work on faculty research projects. Work is arranged and directed by faculty members, who supervise and meet with students regularly (every 1-2 weeks). The specifics of the intellectual goals for the student and the research tasks involved will vary. The student and faculty member will consult on this in advance and will outline the following on the 92r Registration Form: 1) the specific skills to be learned, 2) how the course will engage students with the discipline, and 3) the specific work product. What students produce will depend on the kind of research involved. It is expected that students will work 8 to 10 hours per week on the course. Students may engage with data collection, data analysis, literature reviews, or other aspects of a faculty project.

Tutorial in Sociological Theory (115130)

Robert Sampson

2022 Spring (4 Credits) **Schedule:** M 0600 PM - 0800 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces students to the complicated, conflictual, and often contradictory theoretical origins of sociology as a discipline. We begin by reading the standard sociological "canon"—Marx, Weber, and Durkheim—and interrogating why their ideas were canonized over others. We then read scholars who have been historically "written out" of the social sciences to evaluate their important, yet historically underappreciated, contributions. By the end of the course, students should (1) master key concepts in classical sociological thought, (2) understand what it means to theorize, and what makes for good theory, and (3) learn to critically interrogate the relationship between power, standpoint, and the production of knowledge.

Course Notes: **Required of concentrators, ordinarily sophomores, and secondary concentrators.**

Class Notes: **The first mandatory meeting meets the first day of classes, Monday January 24th 6-8pm**

Junior Tutorial: The Future of Work (215924)

Jocelyn Viterna

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The 21st century has brought dramatic changes to the world of work. The traditional, full-time employment relationship is in decline. New ways of organizing work are on the rise, with more people working as independent contractors or using gigs to get by. Technology is changing the nature of jobs, as workers can collaborate remotely and delegate complex tasks to computers. And employers face growing demand for diversity, inclusion, and accountability when it comes to discrimination and harassment. In the midst of the major transitions already taking place, Covid-19 has forced organizations—from corporations to schools to healthcare providers—to radically rethink when, where, and how work is performed.

These changes bring new challenges, both for individual workers and for social policy. How does a single mother manage childcare when an algorithm assigns her to shifts that change weekly? How do gig workers juggle multiple jobs across digital platforms to make ends meet? How can we provide benefits to people who work 40 hours a week but do not have a regular employer? How can employers control their workers from a distance—and should they?

The tutorial will guide students in the development of an empirical research paper on a topic of their choosing that addresses the changing world of work. Topics may include gender and race in the workplace, automation and the machine-human interface, experiences of empowerment or precarity in gig work, new labor movements, and policy responses such as universal basic income. Through in-class workshops, we will develop research questions and formulate practical research designs. We will explore qualitative research methods, including interviews and observation, and learn to conduct online survey experiments. Throughout, we will refine our understanding of the world of work and how workers, employers, social movements, and policymakers are responding to new challenges.

Course Notes: **Required of and limited to Sociology concentrators.**

Sociology 98DA

Junior Tutorial: Collective Identity (205091)

Shai Dromi

2021 Fall (4 Credits) **Schedule:** R 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Blue collar and middle class, Blacks and Latinx, Christians and Muslims, Americans and French, Harvardians and Yalies –groups have, by their very definition, some criteria to discern those who belong from those who do not, whether they are as large as whole nations, or as small as a group of friends. But what does it mean for a group to have a collective identity? This course will examine what collective identity is and how we can study it sociologically. It will ask questions such as Does a collective identity rely on group members sharing the same past experiences, or does it rely on them facing similar present circumstances? To what extent do group members have to agree on what their collective identity is, and how are disagreement and conflicts managed? How do group members engage in identity politics, and how do they compare their groups to others?

The course will begin with a review of sociological literature that addresses some of the key debates on this topic. Moving forward, students will design and complete their own research projects. Each student will choose a group in the Boston area or on campus, formulate a research question, and conduct participant observations and / or interviews. The course will cover the various steps of the research process, from formulating a research question through collecting and analyzing data and reviewing existing literature, to constructing the final paper.

Course Notes:

Required of and limited to Sociology concentrators. Junior tutorials are by lottery only.

Sociology 98M

Junior Tutorial: Social Class (126248)

Rachel Meyer

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Class, one of the most basic analytical concepts in sociology, structures our social world in fundamental ways. Nevertheless, the extent to which social class is salient to people, and the specific content of class-based identities and class cultures, varies widely. This course is rooted in a comparison of the working class versus professionals and the upper middle class. The focus is on the United States while maintaining a comparative perspective on other national, historical, and cultural contexts. Reviewing a variety of contemporary studies and theoretical perspectives, we will pursue the following questions, among others: How do class-based identities relate to class structure? How are boundaries drawn between classes and among people of the same social class? What might undermine—or bolster—class consciousness in different contexts? And how is social class reproduced? In the U.S. case, how does class intersect with other aspects of American culture? Are class-based identities racialized? Throughout the course we will be attentive to the variety of research agendas on the topic and the various kinds of data that are brought to bear on these questions. After reviewing the relevant literature students will then design and execute their own original research projects that seek to elucidate some aspect of class identity or class culture. Students will have the opportunity to engage in each step of the research process, from question formulation and data collection to analysis and write-up. Along the way we will have workshops on the process of conducting primary research and on each student's project. The methodological focus will be on interviewing, with an attention to how ethnographic data and surveys might also shed light on the subject.

Junior Tutorial: Inequality in the United States (218949)

Jocelyn Viterna

2022 Spring (4 Credits) **Schedule:** W 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course introduces students to qualitative research methods and explores recent research about poverty and affluence in the United States. To examine how our society's staggering inequality is produced and perpetuated, the course takes an up-close look at the daily lives of poor Americans and affluent Americans, identifying structured processes that reinforce their class positions. Students will read research about billionaires building tax shelter ski chalets in Wyoming, young parents in Tennessee so desperate to feed their children that they sell their own blood plasma, families in public housing sold mortgages designed to fail, and more. During the semester, students will also undertake their own extended qualitative research project about some aspect of poverty or affluence in the United States.

Models of Social Science Research (117560)

Paul Chang

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces students to core methodological concepts and strategies used in social science research including: research design, sampling and measurement, experiments, survey analysis, content analysis, network analysis, ethnography, and interviewing. Throughout the course we will develop the analytical skills necessary to interrogate epistemological assumptions in published social science research specifically and truth-claims generally. In addition to critically evaluating previous research, students will collect and analyze data using the different methods discussed in class. By the end of the course, students should have acquired valuable research skills widely applicable in academic and professional settings.

Political Sociology (159779)

Danilo Mandic

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Politics is about power and authority. But the production, conservation and distribution of power and authority occur far beyond Capitol Hill: in family dynamics, neighborhoods, schools, welfare policies, social movements, nation-states and the globalized economy. In this course, we will examine such areas using the theoretical framework and analytic tools of political sociology. We will ask such questions as: What is power exactly, and how can we measure it empirically? How do class, race and gender affect

power relations? Where did the nation-state, as we know it, come from? What kinds of social movements are there, and how do they produce change? How does capitalism relate to the state and civil society? Where did the welfare state come from, and what kinds are there? Who are the "elites" and "rulers," and how would we know? What are some forces of exclusion/discrimination in democratic society? What is "globalization," and how do we best explain it? The course is divided into five parts according to major themes: (1) Foundations; (2) the Nation-State; (3) Capitalism; (4) Democracy; (5) the Big Picture: Global Processes.

Life and Death by Design (212727)

Jason Beckfield

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In this course, we will study health differences between social groups. We will begin by examining the extent to which health is unevenly distributed across groups defined by nationality, neighborhood, race, gender, and class - differences highlighted in stark terms by the COVID-19 pandemic. We will then seek to pinpoint the reasons for these disparities with a detailed analysis of the pathways through which these factors are linked to health status. Finally, we will discuss new research on the sociology of population health that shows how health disparities depend on meso- and macro-scale causes like neighborhoods, social policy arrangements, global organizations, and climate change.

Sociology of Higher Education (203333)

Manja Klemencic

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This undergraduate seminar explores modern higher education systems, institutions and student experiences of higher education through sociological lenses. We read the seminal works and concepts from the seven domains of inquiry in sociology of higher education: college impact, study of inequalities, universities and colleges as organizations, academic profession, higher education politics, higher education culture and student agency and impact in higher education. We analyze some of the major questions and controversies in contemporary higher education – What are the implications of COVID-19 pandemic for higher education? Is college worth the cost? Why does higher education cost so much? How is higher education industry changing globally? Is higher education the Great Equalizer? We also look backstage to student experiences at Harvard. This is a research-intensive seminar. With personalized advising from the instructor each student conducts independent (conceptual or empirical) research leading to a capstone paper. This course offers opportunities to gain perspectives into established and emerging areas of research into higher education and insights into today's changing higher education landscape at Harvard, in the United States and across the world.

Humanitarian Activism and Civil Society (203440)

Shai Dromi

2022 Spring (4 Credits) **Schedule:** MW 0600 PM - 0715 PM

Instructor Permissions: None **Enrollment Cap:** n/a

When global crises strike, humanitarian nongovernmental organizations – NGOs – spring to action, offering emergency medical services, basic necessities, expertise, and innovation to affected communities around

the world. Yet COVID-19 brings unprecedented challenges—and unprecedented opportunities—to humanitarian endeavors. Humanitarian workers are now working globally to distribute personal protection equipment in disadvantaged communities, trace the spread of coronavirus in countries with sparse public health resources, support countries with weakened hospital systems, and advocate for equitable vaccine distribution.

This course provides a comprehensive view of humanitarian organizations and activism from a sociological perspective. We will examine the origins of organized humanitarian activism and the dilemmas and challenges that NGOs face. We will investigate the consequences, justifications, and limitations of humanitarian work. COVID-19 will be a central study case for us, and we will also look at case studies from the Kosovo War, the Nigerian Civil War, and the 2004 Indian Ocean Tsunami. Students will be assigned specific regions to research over the course and will create visual representations of the conditions and humanitarian activities in their assigned region. The course will include a visit to the Harvard Art Museums to explore the ethics of representing humanitarian needs, along with several guest speakers who will explore different career paths in the humanitarian sector.

Consumption, Health, and the Environment (219526)

Monique Ouimette

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

There are many health and environmental impacts associated with consumption activities, yet such impacts often remain hidden or obscured in the course of everyday life. In this applied course, students will examine health and environmental issues associated with consumption activities. Over the course of the semester, students will learn concepts from environmental health, environmental sociology, the sociology of consumption, and public policy. Each student will engage in an original preliminary research project on a contemporary issue related to consumption and environmental health. Students will develop an understanding of the power dynamics and inequalities associated with identifying, defining, managing, and mitigating the health and environmental impacts of consumption activities. Skills, perspectives, and analytic frameworks learned in this course will be useful for students in their roles as individual consumers, citizens, and professionals.

Sociology 1110

Public Health and Environmental Injustice (219763)

Monique Ouimette

2022 Spring (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course focuses on health in the United States and across the world through a lens of environmental injustice. There is strong evidence that exposure to environmental pollution contributes to the onset and severity of illness in humans, yet many medical and public health approaches to health and illness ignore environmental factors. The lack of focus on environmental contributors to illness helps to reinforce existing disparities associated with living in contaminated communities.

Through readings, lectures, class discussions, and written assignments, students in this class will explore the connections between environmental exposures and human health outcomes. Students will learn about the environmental factors that contribute to the onset of common non-communicable diseases, including asthma, cancer, and diabetes, as well as exacerbate the severity of infectious diseases such as COVID-19. Students will explore cultural, economic, regulatory, medical, and scientific factors that contribute to current health disparities in relation to environmental injustice. Students will also examine efforts to incorporate environmental justice considerations into health care and public policy reforms.

Men, Women, and Work (141657)

Mary Brinton

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 30

Why do men and women tend to cluster into different occupations? Why do they earn different wages? Is there a certain path that all countries follow as they become more economically prosperous, or do issues concerning men's and women's work differ dramatically across countries because of cultural reasons? This course provides an overview of key issues and perspectives in the study of men, women, and work in contemporary society.

The Internet, Social Media, and Society (109705)

Gregory Narr

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This class considers how the internet and social media alter social life. Seminal theoretical approaches to understand the connection between media and social forces – from Mcluhan to Kittler to Keeling – will be covered, as well as empirical studies – from Noble to Couldry and Mejias to Zuboff. Through these readings we will hone conceptual tools for uncovering ideological constructs embedded in material hardware, interface design, and code. Key critical frameworks used in this class include queer theory, intersectionality, and critical race theory. We will also develop methodological tools for interrogating, disrupting, and harnessing social media to effect social change. These tools will be developed through assignments – from semester-long collaborative interventions to short interpretations of media artifacts (tweets, Tik Tok videos, etc.). Classes will incorporate student contributions into lectures, as well as short group exercises.

Sociology in the Age of Big Data (207631)

Joscha Legewie

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces students to how "big data" transforms our understanding of the social world. Focusing on topics like racial bias, partner & friendship choice, public opinion and polarization, and urban inequality, we explore how the digital age changes sociological research. We discuss transformative contributions to classical sociological questions based on the "new" science of networks, web-based social research, administrative data, and the traces of our digital lives. We explore important advances, the challenges facing the social sciences and consider ethical and privacy concerns raised by "big" data and analytics.

Student Leadership and Service in Higher Education (205039)

Manja Klemencic

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

This Undergraduate Engaged Scholarship Course specifically targets students in service and leadership roles at Harvard (e.g. student leaders in student organizations, students serving on University committees or as interns in University offices or programs, PAFs, HOCOs, UC members, Crimson, etc.). To these students it offers an opportunity to engage with scholarship from sociology of higher education to better understand and explore student agency in college contexts. Through hands-on student leadership development workshops built into the course, students will also develop skills that will help them in their roles. Students' grasp of concepts, such as university citizenship, mattering, belonging, community-building, and self-formation, is reinforced through their experiential learning in existing service and leadership roles on campus. Based on their campus role, students work on participatory action research and develop blueprint to change practice or policy. This course challenges the traditional line of inquiry in sociology of higher education which focuses primarily on the effects of college on students. Instead, student action research projects demonstrate student agency and the impact students have on higher education communities.

Philanthropy and the Nonprofit Sector (203368)

Shai Dromi

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

When crises strike, nonprofit organizations spring to action, offering their resources, expertise, and innovation to affected communities. Yet COVID-19 brings unprecedented challenges—and unprecedented opportunities—to philanthropic endeavors. Indeed, aside from supporting medical research on COVID-19, nonprofit organizations have been providing medical care, distributing personal protective equipment (PPE), helping address loss of employment and food insecurity, and advocating for global equity in vaccine distribution, among other tasks.

This course partners with the Lemann Program on Creativity and Entrepreneurship (LPCE) in order to provide students with a unique opportunity to experience first-hand how philanthropists and nonprofit organizations are helping address the global effects of this global pandemic. On the theoretical side, the course will examine the workings of philanthropy and of nonprofit organizations, using different sociological perspectives and a series of case studies. Alongside the theoretical content, students will form groups and will develop their own nonprofit ventures to address the social impact of COVID-19. Student ventures will receive startup seed funding and, at the end of the course, will compete over additional seed money. The course will include a series of guest lectures and workshops on entrepreneurship to support student venture development.

Work and Culture (218200)

Rachel Meyer

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course looks at work and culture from both the bottom-up and the top-down. What does work mean from the perspective of workers versus employers—and when do these perspectives align or diverge? Under what circumstances are work cultures a source of identity, meaning, and fulfillment? In what contexts are they used for control and domination? We will examine the varieties of culture at work by comparing corporate culture, craft culture, and caring labor. The course will then turn to contemporary forms of work, which are often characterized by flexibility, contingency, and insecurity. We will examine flexibility in working-class jobs and gig work alongside parallel developments among high-tech engineers and investment bankers. How does flexible labor shape workers' identities? What does it mean to be an independent contractor or "entrepreneur" in finance versus trucking? How is joblessness and unemployment experienced in different contexts? Lastly, we will examine workplace collectivities and how they relate to conflict on the job. How do cultures of solidarity compare among factory workers, gig workers, tech workers, and teachers? The course will focus mainly on work in American culture with some attention to comparative context. Throughout the course we will explore class-based differences in work cultures, which at times are significant and salient and at other times seem to disappear.

Sociology 1144

Economic Sociology (204172)

Leah Muse-Orlinoff

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The field of economic sociology brings our attention to ways that economic priorities and processes reflect social dynamics. From ceremonial exchanges of goods in the South Pacific, to the development of modern capitalism, and from interlocking relationships between large corporations to wages, remittances, and social networks, economic sociology considers the social contexts that influence how individuals,

communities, and societies organize their resources and how these processes in turn impact our lives. This course offers an overview of economic sociology's major theories and findings across several major themes. The first part of the course focuses on the theoretical underpinnings of economic sociology, and what characterizes a sociological view of the economy. In the second part of the course, we explore some of the social and cultural forces that have shaped key economic institutions such as corporations, insurance, wages and benefits, and marketplaces. The third part of the course considers the impact that these economic institutions have on the quality of life for individuals, communities, and societies. We conclude by asking how the field of economic sociology approaches issues of inequality and social mobility in the United States and globally.

Race and Ethnicity in Global and Comparative Perspective (207630)

Ellis Monk

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course provides an introduction to the comparative study of "race and ethnicity" around the world. We focus here not on particular "ethnic" or "racial" groups, but rather, on particular cases which illustrate how "race" is used as a way in which to divide, sort, and rank human beings (i.e. a principle of social vision and division). In particular, we compare and contrast how different societies have constructed ethnoracial boundaries by focusing on several key forms of ethnoracial domination: categorization, discrimination, segregation, ghettoization, and exclusionary violence. Readings include sociological, historical, and anthropological studies of ethnoracial dynamics primarily in the U.S. and Brazil, but also South Africa, Asia, Western Europe, and Latin America.

Conflict, Justice, and Healing (212659)

Matthew Lee

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Serious crime and other forms of conflict are experienced as a traumatic violation. This is to be avoided at all costs. And yet… some survivors experience surprising levels of resilience, a renewed sense of meaning

and purpose, empowerment, and post-traumatic growth. Some offenders turn towards a deeper sense of truth and existential responsibility. Some communities transcend institutionalized patterns of dehumanization and violence to embrace the challenging path of forgiveness, reconciliation, healing, and inclusive flourishing. When and how do individuals and communities heal after conflict? We engage with these issues through a series of diverse case studies, including contemporary examples drawn from the international Black Lives Matter movement, prisoner reintegration efforts in the U.S., victim/offender dialog in the Middle East, and embodied emancipation in post-apartheid South Africa, as well as classic cases such as the Cuban Missile Crisis. A critical engagement with the emerging fields of conflict transformation and positive criminology reveals potential restorative pathways to individual and communal well-being, and ultimately harm prevention. A growing body of empirical research on the social conditions and processes that give rise to these outcomes will also help us explore such timeless questions as: What is justice? How can "enemies" reconcile? What is the good life?

Public Opinion Formation and Change in the United States and Abroad (218260)

Yuval Feinstein

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In the past several decades, public opinion about governmental policies and political leaders has turned from a topic that was initially of interest primarily to pundits, politicians, and political strategists, into an integral topic of public conversation. This course examines core issues in public opinion research in the United States and other countries. In addition to reading and discussing prominent theories and research findings, students will engage in a "hands-on" exploration of public opinion data. We begin the course by asking what public opinion is, how it is measured, and whether it influences policy-making. Next, we examine the factors that shape public opinion on various issues, including the role of the media and political leaders, social divisions (for example, by party, ideology, gender, and ethnicity/race), and cognitive and affective mechanisms that impact opinion formation at the individual level. The last part of the course shifts the focus from the individual to society: we examine long-term trends of changes in public opinion in the United States and other countries and short-term shifts in public opinion in response to crises.

Grading in this course has three components. (1) Six "hands-on" individual and group exercises (a typical exercise includes a brief exploration of public opinion data on a topic and a short presentation of the findings in class). (2) A short midterm paper (2-3 pages). (3) A slightly longer final paper (5 pages).

Qualitative Methods in Sociology (205205)

Danilo Mandic

2021 Fall (4 Credits) **Schedule:** T 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

What does it mean to "sample"? What is a good research question, and how can you go about answering it? What do we do about bias in our research designs? This seminar offers an introductory overview of qualitative research methods in sociology. Through a series of hands-on, applied exercises and practical case-studies, students will learn what qualitative research looks like in the real world. Students will receive training in the basic instruments, sampling strategies, data collections, practical dilemmas, and common problems of different methodological approaches. We will learn about the advantages and limitations of interview-based, survey, ethnographic, and archival research. Throughout the semester, students will have weekly applications of methods, including with programs such as Atlas.ti and Nvivo. We will learn how to formulate research questions, conceptualize social phenomena, create research designs, code and operationalize, collect data, and interpret and present findings for different purposes.

Ethnic Division and Segregation: Causes, Expressions, and Consequences (218204)

Yuval Feinstein

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Ethnicity divides society into groups based on the belief that members of each group share a common origin and a unique culture. It is one of the oldest social phenomena with various consequences, some of which this course addresses. These are some of the core questions in sociological research of ethnicity that we will discuss in this course: How are the boundaries that separate ethnic groups created, maintained, or change? How do democratic regimes manage ethnic diversity and potential tensions between ethnic groups? How does economic inequality between ethnic groups maintain or change? Under which conditions do migrant ethnic minorities assimilate into other ethnic groups or become more segregated from them? What role do ethnic identities play in people's everyday lives? When does ethnicity get politicized? What causes ethnic violence? And, what motivates (some) ordinary people to participate in ethnic violence? When discussing each of these questions, we will apply a comparative perspective, in which the United States will be one of several focal cases. Grading in this course will have five components: (1) Attendance and participation, (2) six short written reactions on required readings, (3) article presentation, (4) a short midterm written assignment, (5) a slightly longer final paper, and (6) a short mandatory meeting with the instructor or TF to prepare for the final paper.

Nationalism and Political Attitudes in the US and Israel (205275)

Yuval Feinstein

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Nationalism remains one of the most powerful forces that drive people's opinion on issues such as foreign affairs, military policy, immigration, welfare, and healthcare. This seminar offers students the opportunity to have a "hands-on" experience of investigating how national identities and beliefs impact political attitudes and policy preferences, using the United States and Israel as case studies. The seminar has two parts. The first part (meetings 1-5) will lay necessary conceptual, theoretical, and methodological foundations for research on the topic. We will carefully review published articles to detect significant conceptual and theoretical developments in research on nationalism's impact on political attitudes and policy preferences, and learn about tools for collecting and analyzing data on this topic. In the second part (meetings 6-13), students will develop mini-research projects under the instructor's supervision. Each student will examine a particular question of her/his choice. The proposed focal countries in this seminar are the United States or Israel, but students can choose other countries for their projects. The development of the seminar project will be done step-by-step through weekly assignments and feedback from the instructor and classmates. By the last meeting, each student should have most of the materials needed for writing a successful seminar paper.

Grading in this seminar has three components. (1) Attendance and participation. (2) Short research proposal. (3) Final paper.

Sociology 1163

Pursuing Truth and Justice: Principles and Methods of Equity through Inquiry (218199)

Flavia Perea

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

This course will explore the principles and methodologies of equity-centered approaches for knowledge generation, meaning making, and social transformation through inquiry and the research process. We will examine community-based, participatory, action, and decolonizing approaches to inquiry, and engage with various perspectives on the process, practice, and applications of liberatory inquiry methodologies. We will discuss epistemology and research paradigms; explore a variety of approaches and methodologies, including Participatory Action Research/PAR, Community Based Participatory Research/CBPR, citizen science, and indigenous approaches to research; how different approaches for asking questions, methods for gathering and analyzing information, and sharing knowledge, as well as the principles, truths, and

worldviews that undergird different approaches, can be applied in diverse contexts; pragmatic approaches for moving from theory to practice; power and privilege in the context of research; perspectives on investigator identity and location; the promise and limitations of engaged inquiry to help advance social change; and the ethics of inquiry with historically and systemically oppressed people and communities. Engaging with voices, perspectives, sources, and materials from beyond the academy will be central to our work. Through this course, students will learn to apply course concepts to both their academic and civic work, as well as community-based initiatives to advance justice in society. Ultimately, we will critically examine how inquiry that emphasizes equity, collaboration, and reciprocity in the uncovering, integration, application, and dissemination of knowledge can be a tool of liberation and certain methods a strategy for responding to oppression, colonization, and systems of domination.

Online Dating and the Transformation of Intimacy (122318)

Gregory Narr

2022 Spring (4 Credits) **Schedule:** R 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

- **Over the past twenty years, online dating has become the go-to way for people to seek intimacy. This has exacerbated problematic social forces such as sexism and racism. But many forms of attraction have also found expression as online dating has risen to prominence – with dozens of genders, sexualities, and relationship styles offered on OkCupid; platforms for threesomes, S&M enthusiasts, and gay men that like beards; and connections formed by many forms of mediation, from swiping to mutual disclosure of intimate questions to webcamming. This class considers these simultaneously problematic and liberatory possibilities that exist within the rapidly evolving ecology of dating platforms. Critical frameworks for interpreting the material hardware, interface design, and algorithmic governance of dating platforms will be discussed, including queer theory, intersectionality, and critical race theory. Methodological tools for interrogating social forces on dating platforms will also be honed during class and through semester-long projects.**

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Over the four hundred years that have encompassed the experience of Africans and their offspring in the United States they have encountered pervasive oppression and hardship to which they have responded with unrelenting struggle. While enormous progress has been made, African Americans still encounter very substantial barriers in many areas of life. This seminar surveys the sociological impact of oppression and struggle in numerous aspects of life in the black community, examining the realities of residential segregation, social protest movements, educational inequality, the double burden of black women and other features. Concepts such as white supremacy, the achievement gap, and the racial wealth gap are studied. Developments such as the Obama presidency and the Black Lives Matter movement will be discussed.

Sociology of Development (218202)

Benjamin Bradlow

2021 Fall (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

"Development" is not only a socioeconomic trajectory but also a category of conflicts. Many groupings and actors try to access the returns to "growth," often by struggling to determine the basic logic by which growth occurs. So what are the terms of struggle over this logic? Why do some groups flourish while others suffer? We begin by understanding why some countries are poor and others are rich, with a particularly focus on the political and economic processes of industrialization. We then focus on the different institutional scales that matter for these processes, with emphasis on national states, global institutions, and transnational supply chains. Finally, we consider the actors on historical shifts in the past few decades that have changed the sociology of development: new types of social movements, the nature of globalization — often described as "neoliberalism — and the role individuals like bureaucrats, planners, and other forms of development practitioners

Nationalism and the Nation State (218203)

Yuval Feinstein

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Nationalism remains a powerful force in politics, even in democratic countries with long traditions of commitment to liberalism and republicanism, such as the United States. This course takes a comparative and historical look at nationalism and related social and political phenomena in settled and unsettled times. The course is structured around several core questions: Is nationalism an ancient phenomenon or relatively new? What is a nation-state, and how has it become the dominant form of political organization globally? What is the relationship between nationalism and war? How does nationalism impact the allocation of citizenship and civil rights? What is national identity? How do national identities impact people's political attitudes? How national identities are relate to other identities such as religion, gender, and ethnicity/race? How has globalization affected nations and nationalist ideologies? In what sense is current populist politics nationalist, and in what sense is it not? Grading in this course will have six components: (1) Attendance and participation, (2) five short written reactions on required readings, (3) an

article presentation (4) midterm exam (5) a slightly longer final paper, and (6) a short mandatory meeting with the instructor or TF to prepare for the final paper.

Social Change in Modern Korea (109680)

Paul Chang

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores the incredible transformation of Korean society in the modern period. We begin with the demise of the Choson Dynasty at the end of the 19th century before covering the Japanese colonial period (1910-1945), the emergence of two Korean nation-states (1945-1948), the Korean War (1950-53), and the contemporary period (1960-present). The course is divided into two sections: in the first part of the course we will discuss Korea's political and economic transformation, and in the second part we will cover social and cultural change. Upon completion of the course students should have a thorough grasp of the vast social changes Korea underwent in the 20th century.

Climate Change, Power, and Global Inequality (218264)

Benjamin Bradlow

2022 Spring (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The course begins by considering the social basis for the production and distribution of carbon emissions. Which people, companies, and countries are responsible? On whom do the effects fall? We then examine the institutions that try to govern the production of carbon emissions. These exist at different scales — global bodies, nations, and cities. And we investigate who is trying to change these institutions, with a particular focus on different types of social movements, governments, and private firms. We consider how these actors are both similar and different across rich and poor countries. Since the age of the Anthropocene has been accompanied by the mass migration of humans to cities, we look at the role of urban sociology and politics in shaping carbon emissions. And finally, we debate recent proposed solutions that rely on many of the analyses and evidence that we have studied earlier in the course.

Refugees in Global Perspective (203272)

Danilo Mandic

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The recent arrival of refugees at the U.S.'s southern border and into Europe has caught citizens and policy-makers off guard. Yet such forced migration will continue to rock our globalized world in coming decades. Why are there so many refugees? How are they displaced? Where do they travel, and why? This course will inquire into the nature, causes and consequences of contemporary refugee waves. Students will survey regional dynamics in the Middle East, Africa, Southeast Asia, Eastern Europe and North America. We will examine the particularities of refugees (compared to other migrants) and the changing nature of forced migration since the Second World War. Students will explore historical precedents to contemporary waves, learn about different host society approaches to asylum, compare government and criminal mechanisms of forced migration, and examine the reasons refugees are the object of increasing suspicion and hostility around the world. Particular attention will be paid to Central American migration into the U.S., the recent EU crisis, the role of refugee camps in the 21st century, and alternative strategies for global asylum management by bridge and destination countries.

Sociology 1190

Culture and Inclusion in a More Unequal America (218291)

Michele Lamont

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

The United States is facing significant challenges at a time when historically stigmatized groups are making claims for greater social justice. How can we fashion a more inclusive American society in a neoliberal context of growing inequality aggravated by the pandemic? We will explore the current context to understand 1) how people find hope when the future is particularly uncertain; 2) how Gen Zs are dealing with the decline of American dream and engaging in the production of alternative collective myths; 3) how social movements and other agents of change contribute to transforming the cultural landscape; 4) how is the hybrid public sphere evolving as social media are gaining in influence; 5) how class cultures are changing and how elite reproduction persists through cosmopolitanism and omnivorousness. Finally, we

will consider the United States in comparative perspective to understand how to better create greater equality, solidarity and justice.

Sociology 2202

Intermediate Quantitative Research Methods (119985)

Peter Marsden

2021 Fall (4 Credits) **Schedule:** TR 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Descriptive and inferential techniques used in quantitative sociological research. Emphasis is on the fundamentals of the linear regression model for continuous response variables, focusing on assumptions and interpretation. Motivation, application, and presentation are stressed; topics include categorical covariates, interactions, and diagnostics. Because the linear regression model is the foundation for more specialized models that are often applied in sociological research, the aim of this course is to develop the skills necessary to (a) understand quantitative sociological research, (b) produce convincing analysis, (c) evaluate quantitative analysis, and (d) learn more specialized techniques as needed.

Class Notes: **Undergraduates who would like to take Soc 2202 must have successfully completed Soc 156 or its equivalent.**

Recommended Prep:

This course is required of and limited to first-year students in Sociology or in the joint Ph.D. programs between Sociology and other departments

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

Sociology 2203

Advanced Quantitative Research Methods (112874)

Christopher Winship

2021 Fall (4 Credits) **Schedule:** TR 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Matrix approach to regression analysis with an emphasis on the assumptions behind OLS. Instrumental variables, generalized least squares, probit and logit models, survival analysis, hierarchical linear models, and systems of equations are studied.

Course Notes:

This course is required of and limited to second-year graduate students in Sociology or in the joint Ph.D. programs between Sociology and other departments

Recommended Prep:

Sociology 2202 or basic course in regression analysis.

Sociology 2204

Classical Social Theory (117877)

Frank Dobbin

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Introduction to the formative ideas and socio-intellectual contexts of 19th and early 20th century sociological theory. Course will explore social thought from the perspective provided by the problem of social order - and the roles different thinkers attributed to such factors as solidarity, power, and meaning as solutions to this problem. Consideration of the continuing significance of these ideas for contemporary social thought.

Course Notes:

This course is required of and limited to first-year students in Sociology or in the joint Ph.D. programs between Sociology and other departments

Sociological Research Design (125089)

Frank Dobbin

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course covers the fundamentals of sociological research design. Emphasis is placed on principles that are applicable in all kinds of sociological research, including surveys, participant observation, comparative historical study, interviews, and quantitative analysis of existing data. The course also delves into current methodological controversies in several arenas.

Course Notes:

Required of, and ordinarily limited to, first-year graduate students in Sociology.

Analysis of Longitudinal Data: Seminar (131333)

Alexandra Killewald

2022 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course takes an applied approach to the analysis of longitudinal data. Lectures will provide an overview of a variety of techniques, including fixed effects models, multilevel models, and duration models. Students will develop their own empirical projects and receive support as they begin to work with longitudinal datasets.

The Sociology of Climate Change (218268)

Jason Beckfield

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Climate change is the global social problem of our times, and yet sociological analysis of climate change is just now starting to build momentum. In this graduate-level elective seminar, we consider foundational concepts and measures from fields both central and peripheral to climate change, with the goal of developing our own distinctively sociological approaches to the problem. We will engage classical and contemporary work that articulates how the social relates to the environmental, as well as new and forthcoming research on the social causes and effects of climate change. We will also familiarize ourselves with the data and methods used by climate scholars, including those whose work currently informs global climate policy and politics. Assignments include close reading, engaged in-class discussion, regular response-writing, and the capstone exercise: an empirical research paper illustrating the fast-growing sociology of climate change.

Criminal Justice and Social Inequality (218279)

Robert Sampson

2021 Fall (4 Credits) **Schedule:** M 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar will examine inequalities in crime and justice, focusing on developments during the past quarter-century. We will give special attention to racial and class inequalities; the relationship between crime and criminal justice involvement; social change and life-course inequalities; the perils of prediction; and sociological strategies to mitigate inequalities in both crime and criminal legal processing. Students will examine promising new lines of inquiry.

Sociology 2285

Inequality at Work: Contemporary Problems and Policy Solutions (219957)

Daniel Schneider

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Work is at the core of daily life for most American adults. But the experience of work, of having a good job or a bad job, is starkly unequal and by many accounts work has become more precarious and more polarized over the past several decades. We begin with a broad overview of shifts in American society and the economy that are both backdrop and cause of these changes in work - the transformation of the American labor market by the forces of financialization and de-unionization alongside changes in American families in terms of family structure, women's labor force participation, and care giving obligations. We then define a set of contemporary problems at work, including insufficient and unequal wages, unstable and unpredictable work schedules, and a lack of paid sick and paid family and medical leave. For each, we explore the scope of the problem and then policy solutions, with a focus on the "new federalism" of labor regulation at the state and local level. We end by taking up the challenge of effective labor regulation, discussing COVID-19 and work, and by grappling with the likely scope and severity of the challenges posed by new technologies to the future of work in the United States including new surveillance technology and the deployment of automation and AI at work.

Course Notes: **Course also offered as SUP 325**

Class Notes: **Taught at HKS; offered jointly as SUP 325; Sociology students will be limited to 15.**

Teaching Practicum (111781)

Jocelyn Viterna

2021 Fall (4 Credits) **Schedule:** F 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course is intended to enhance the teaching skills of graduate students in the Sociology Department. Through a combination of classroom discussions and teaching simulations, the seminar challenges students to discover and hone their teaching styles, to develop a personal philosophy about teaching and learning, to develop self-confidence leading and facilitating small and large group discussions, to learn about the teaching resources that are available to them throughout the university, to experiment with designing engaging courses of study, and to discover that teaching can be a rewarding and stimulating element of an academic career.

Course Notes:

Required of and limited to graduate students in Sociology. Attendance at first meeting is required. Not repeatable for credit.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Sociology 3307

Proseminar on Inequality and Social Policy III (112355)

Deirdre Bloome

2022 Spring (4 Credits) **Schedule:** M 0130 PM - 0330 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

Students develop previously completed papers from Proseminar I and II into professional presentations and publishable articles, critique peer papers across disciplines, and discuss presentations of national experts.

Course Notes:

Offered jointly with the Kennedy School as SUP-923.

Recommended Prep:

Open to doctoral students in the Multidisciplinary Program in Inequality and Social Policy or the joint PhD Program in Social Policy. Prerequisites: Sociology 296a/Gov 2340a and Government 2340b/Soc 296b (or SUP-921 and SUP-922 at the Kennedy School).

Culture, History and Society (128274)

Orlando Patterson

2022 Spring (4 Credits) **Schedule:** F 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

The Workshop in History, Culture, and Society is a forum for the exploration of new developments in historical social science, especially in the fields of Anthropology, Economics, History, Political Science, Psychology, and Sociology. The workshop's primary methodological goal is to initiate a discussion of what

constitutes acceptable historical evidence in each of the social sciences. Its main substantive goal is to understand how the past influences the present.

Contemporary Studies of Race & Ethnicity Workshop (204977)

Ellis Monk

2021 Fall (4 Credits) **Schedule:** F 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

The Contemporary Studies of Race & Ethnicity (CSRE) workshop's purpose is to provide a forum to disseminate knowledge and facilitate dialogue among graduate students, faculty, and visiting scholars working on or interested in research about contemporary studies related to race & ethnicity. Though the Sociology department hosts the workshop, we seek to bring scholars together across disciplines to explore topics such as ethno-racial hierarchies, racial attitudes, and intergroup relations, as well as the role of race in institutions, politics, and everyday life. The workshop will foster both a learning and collaborative space in which participants can circulate and garner feedback on works in progress, including dissertation

chapters, proposals, journal article submissions, conference papers, and practice job talks.

Class Notes: **First workshop held Friday, September 24, 2021.**

Hindi-Urdu 101A

Introductory Hindi-Urdu (113639)

Richard Delacy

2021 Fall (4 Credits) **Schedule:** MTWR 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An Introduction to the modern standard form of the most widely spoken language in South Asia, Hindi-Urdu. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film, in particular recent Bollywood songs, to reinforce structures and vocabulary. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

Not open to auditors.

An Introduction to the modern standard form of the most widely spoken language in South Asia, Hindi-Urdu. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film, in particular recent Bollywood songs, to reinforce structures and vocabulary. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

Not open to auditors.

Hindi-Urdu 108

Iqbal's Urdu Poetry (219723)

Hajnalka Kovacs

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Iqbal's Urdu Poetry is a comprehensive introduction to Sir Muhammad Iqbal's (1877–1938) Urdu poetry. Along with reading and translating selected poems from Iqbal's collections Bāng-e Darā, Bāl-e Jibrīl, Zarb-e Kalīm, and Armaghān-e Hijāz, we will discuss the grammatical, stylistic, and poetic features in his language as well the religious and political ideas expressed in the poems. The primary texts will be supplemented, whenever possible, with secondary readings in Urdu and English and relevant audio-visual material.

Prerequisites:

- **High degree of reading and writing proficiency in Urdu is strongly preferred**
- **Familiarity with Islamic thought and the history of Islam in the Indian subcontinent is preferred**
- **While knowledge of Arabic and/or Persian is not required, it is helpful**

Subject: Nepali

Nepali 101A

Introductory Nepali (118665)

Parimal Patil

2021 Fall (4 Credits) **Schedule:** T 0600 PM - 0845 PM

Instructor Permissions: Department **Enrollment Cap:** n/a

This course introduces the basic grammatical structures of modern Nepali, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Nepali is taught with a concern for the cultural context in which this language is spoken and written.

Course Notes:

Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

Elementary Sanskrit (123045)

Nell Hawley

2021 Fall (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Students learn fundamental skills in classical Sanskrit, the language that was, for many hundreds of years, the most prestigious and broadly-deployed medium of intellectual and literary expression across South Asia. In the first year of study, students develop capabilities in analytical reading (and, secondarily, in writing, speaking, and listening) that will enable them to interpret Sanskrit texts on a foundational level. Participation in this course lays a solid groundwork for students to engage with Sanskrit texts in a wide array of styles and genres-—poetic, narrative, philosophical, scholastic-—as their studies progress. Most lessons involve students collaborating with their peers.

No auditors will be permitted. Enrolled students must take the course for a letter grade.

Please note that this course includes a required weekly review session with the Teaching Fellow at a time to be determined within the first two weeks of the semester.

Additional Course Attributes:

Sanskrit 102AR

Intermediate Sanskrit I (114270)

Nell Hawley

2021 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The intermediate-level Sanskrit course enables students to interpret Sanskrit texts in three major genres: epic, poetry, and scholarly prose. Students expand and strengthen the skills in reading comprehension, grammatical analysis, and vocabulary retention that they developed during the first year of study. Students will be able to dissect and describe nominal compounds, verbal forms, poetic meters, and morphological and syntactical features of Sanskrit words, sentences, and verses in greater detail. As a whole, the course prepares students to participate in Sanskrit language and reading courses at the advanced level. Most lessons involve students collaborating with their peers.

Students achieve these objectives through focused study of three different Sanskrit texts. We begin with the story of the encounter between Arjuna and Śiva in book 3 of the Sanskrit epic *Mahābhārata*. Then we

study Bhāravi's *Kirātārjunīya*, a sixth-century *kāvya* (poetic) composition based on that epic story. In the second half of the course, students learn how to interpret expository and commentarial prose. We practice those skills by interpreting select portions of Mallinātha's fourteenth-century commentary on the *Kirātārjunīya*.

No auditors will be permitted. Enrolled students must take the course for a letter grade.

Please note that this course includes a required weekly review session with the Teaching Fellow at a time to be determined within the first two weeks of the semester.

Advanced Poetic Sanskrit (113324)

Nell Hawley

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The central objective of this course is to enable students to analyze and interpret poetry (*k*ā*vya*) in classical Sanskrit. Whether this is your first encounter with *k*ā*vya* or the most recent of many, this course is here to help you practice and grow your skills as a reader. Most lessons involve students collaborating with their peers.

What does it mean to "read" Sanskrit poetry? Depending on your experience with the language and the genre, these skills may involve: determining the grammatical and syntactic structures of a given verse; identifying the meter; noticing ambiguities in the text; registering new vocabulary; discussing themes and imagery; and considering technical aspects of literary ornamentation such as similes, metaphors, and other figures of speech. The course may involve some (limited, and supported) engagement with commentaries.

Just as important, students will practice literary appreciation and criticism. We will discuss what makes a given composition beautiful, effective, insightful, and/or resonant.

No auditors will be permitted. Enrolled students must take the course for a letter grade.

Advanced Philosophical Sanskrit (121484)

Nell Hawley

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The central objective of this course is to enable students to analyze and interpret scholarly prose (ś**ā**stra**) in commentarial and expository styles.**

On a sentence- or paragraph level, students will explain the basic syntactical constructions and grammatical features of the (quite challenging!) texts they read. Along the way, students will develop the ability to recognize many of the conventions of scholastic Sanskrit. No matter which texts we decide to read, it's safe to say that students will have a good deal of practice working with abstract noun

constructions. Students will strengthen their scholastic vocabularies in general; in addition to that, students will develop technical vocabularies related to the texts they read and the specific intellectual discipline(s) in which those texts are situated. On the level of the longer passage or indeed the text as a whole, students will be able to (at different points) summarize, describe in detail, and critique the ideas that are being communicated in the text.

Many lessons will involve students collaborating with their peers. No auditors will be permitted. Enrolled students must take the course for a letter grade.

Readings in Thai I (121497)

Parimal Patil

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Department **Enrollment Cap:** n/a

This course is designed to focus on reading and comprehension. Selected readings will be both for academic purposes and for pleasure. Students will read newspaper and magazine articles; short stories; and passages covering topics such as history, science, politics, medicine, technology and more. This reading course will help students become more proficient with nuanced/implied meanings, bolster vocabulary and acquire familiarity with various professional jargon.

Course Notes:

Not open to auditors.

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

Hindu Queenship (219893)

Caley Smith

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course looks at the rich and complex traditions surrounding queenship in South Asia (the cultural area we will call jambudvīpa). We will look at the ways that queens have appeared in literature, inscriptions, and historical narratives, and at the ways the idea of queenship intersects with the categories of woman, wife, sovereign, and goddess. We will look at three millennia of queens, asking how South Asian queens have been thought about and written about, and how that changed over time. We will primarily look at Hindu traditions of queenship, but also engage Buddhist, Jain, and Muslim sources as well. We will gain insight into the ways political realities shape religious traditions, and the ways religious traditions shape political realities.

Dealing with the Divine: Religion and Reciprocity (219894)

Caley Smith

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Reciprocity is an important part of human life both at the level of the social collective and between individuals. You will examine the kinds of relationships people make and how they are conceptualized within traditions and mediated through praxis. An important theme of this course is how sacred texts recapitulate systems of reciprocity by borrowing the language of mutuality in relationships, by conceiving of divine relationships through human relationships of exchange, and by themselves becoming objects of exchange.

Subject: Indo-Persian

Indo-Persian 101

Readings in Indo-Persian Literature I (207944)

Hajnalka Kovacs

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

The course introduces students to Persian literature composed in the Indian Subcontinent from the 11th through the 20th century. We will combine close reading of texts in the original Persian with a discussion of grammar and prosody as well as secondary readings in English. Texts include excerpts from chronicles, discourses and letters of Sufis, hagiographies, biographical dictionaries, travelogues, collections of tales, as well as epic, lyric, and panegyric poetry.

Recommended Prep:

Two years of Persian or equivalent; one year experience with Classical Persian preferred.

Introduction to Statistics and Data Science (113431)

Kelly McConville

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

An application-oriented introduction to statistics and data science where students develop their data acumen and learn exploratory and inferential techniques for analyzing and modeling data. The course covers the entire data analysis process and includes topics such as data collection, data wrangling, exploratory data analysis, visualization, simple/multiple linear regression, sampling distributions, hypothesis testing, confidence intervals, data ethics, statistical communication, and reproducibility. Students develop a reproducible workflow for analyzing data in R and learn several tidyverse R packages. No prior statistics or computing knowledge is expected.

Course Notes:

Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.

Additional Course Attributes:

Statistics 104

Introduction to Quantitative Methods for Economics (114027)

Kevin A. Rader

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In a world where data is growing larger and more complex, it can be a challenge to turn an abundance of information into the knowledge from which sound decisions can be made. As a discipline, statistics aims to bridge the gap between knowledge and information. This course will motivate statistical methods through data analysis and visualization, in addition to discussing the underlying theory. We will discuss topics such as study design, descriptive statistics, probability, sampling distributions, hypothesis testing, linear regression, and Bayesian inference. A wide variety of applications from the economic and social sciences will be highlighted along with examples from biology, sports, politics, and more. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques. This course makes use of the statistical programming language R, but no prior knowledge of computer science is required.

Course Notes:

Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.

Requirements: **Anti-Req: may not be taken for credit if STAT 109 or STAT 139 already complete.**

Introduction to Probability (110766)

Joseph Blitzstein

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A comprehensive introduction to probability. Basics: sample spaces and events, conditional probability, and Bayes' Theorem. Univariate distributions: density functions, expectation and variance, Normal, t, Binomial, Negative Binomial, Poisson, Beta, and Gamma distributions. Multivariate distributions: joint and conditional distributions, independence, transformations, and Multivariate Normal. Limit laws: law of large numbers, central limit theorem. Markov chains: transition probabilities, stationary distributions, convergence.

Class Notes: **This course has been approved to allow for simultaneous enrollment.**

Data Analysis in Modern Biostatistics (203104)

Giovanni Parmigiani

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

An Introduction to applied biostatistics via case studies. The course is based on four practical problems, and methodology relevant for each. Students will apply the concepts from the methodology to the data analysis or modeling task, and carry out four mini projects, with ample opportunities for peer-to-peer discussion.

Course Notes:

There is a cap of 30 students for this course. Preference is given to Statistics concentrators; all other students wishing to take the course must send a request along with a list of statistics/computer science courses already completed to the professor at gp@jimmy.harvard.edu. Please put Stat 117 in the subject line of the email.

Recommended Prep:

Prerequisites: Stat 110 and (AP Stat or 102 or 104) and 111 and 139. Recommended: 115

Introduction to Bayesian Inference and Applications (156425)

S. C. Samuel Kou

2021 Fall (4 Credits) **Schedule:** MF 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Provides students a comprehensive understanding to the questions as of what is, how and why Bayesian. Introduction to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various domain fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students' hands-on skills in statistical computation (mostly with R) and data analysis.

Recommended Prep:

STAT110, STAT111 and basics of R programming are required.

Data Science 1: Introduction to Data Science (203101)

Pavlos Protopapas

Natesh Pillai

2021 Fall (4 Credits) **Schedule:** F 0945 AM - 1100 AM
MW 0945 AM - 1100 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Data Science 1 is the first half of a one-year introduction to data science. The course will focus on the analysis of messy, real life data to perform predictions using statistical and machine learning methods. Material covered will integrate the five key facets of an investigation using data: (1) data collection - data wrangling, cleaning, and sampling to get a suitable data set; (2) data management - accessing data quickly and reliably; (3) exploratory data analysis – generating hypotheses and building intuition; (4) prediction or statistical learning; and (5) communication – summarizing results through visualization, stories, and interpretable summaries. Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes:

Only one of CS 109a, AC 209a, or Stat 121a can be taken for credit. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109a, AC 209a, or Stat 121a for credit.

Recommended Prep:

Programming knowledge at the level of CS 50 or above, and statistics knowledge at the level of Stat 100 or above (Stat 110 recommended).

Requirements: **Not to be taken in addition to Computer Science 109 or Computer Science 109A, or Applied Computation 209, or Applied Computation 209A.**

Quantitative Finance (126048)

Stephen Blyth

2022 Spring (4 Credits) **Schedule:** WF 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to financial derivatives and the probabilistic techniques used to analyze them. Topics include: forwards, swaps and options; replication, no-arbitrage and risk-neutrality; martingales, numeraires and the fundamental theorem of asset pricing; and an introduction to interest-rate derivatives and their valuation. Provides a rigorous but accessible treatment of the elegant theory underpinning quantitative finance, motivated by real problems from the financial industry.

Course Notes:

Designed for those seeking an understanding of the quantitative challenges on Wall Street and the probabilistic tool-kit developed to address them.

Recommended Prep:

Statistics 110 or equivalent.

Linear Models (110751)

Kevin A. Rader

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An in-depth introduction to statistical methods with linear models and related methods. Topics include group comparisons (t-based methods, non-parametric methods, bootstrapping, analysis of variance), linear regression models and their extensions (ordinary least squares, ridge, LASSO, weighted least squares, multi-level models), model checking and refinement, model selection, cross-validation. The probabilistic basis of all methods will be emphasized.

Recommended Prep:

Statistics 110 and Math 21a and 21b or equivalent

Generalized Linear Models (118974)

Mark Glickman

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Sequel to Statistics 139, emphasizing common methods for analyzing continuous non-normal and categorical data. Topics include logistic regression, log-linear models, multinomial logit models, proportional odds models for ordinal data, Gamma and inverse-Gaussian models, over-dispersion, analysis of deviance, model selection and criticism, model diagnostics, and an introduction to non-parametric regression methods.

Course Notes:

Examples will be drawn from several fields, particularly from biology and social sciences.

Recommended Prep:

Statistics 139 or with permission of instructor.

Additional Course Attributes:

Multilevel and Longitudinal Models (160736)

Luke Miratrix

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Data often have structure that needs to be modeled explicitly. For example, when investigating students' outcomes we need to account for the fact that students are nested inside classes that are in turn nested inside schools. If we are watching students develop over time, we need to account for the dependence of measurements across time. If we do not, our inferences will tend to be overly optimistic and wrong. The course provides an overall framework, the multilevel and generalized multilevel (hierarchical) model, for thinking about and analyzing these forms of data. We will focus on specific versions of these tools for the most common forms of longitudinal and clustered data. This course will focus on applied work, using real data sets and the statistical software R. R will be specifically taught and supported. While the primary focus will be on the linear model with continuous outcomes (i.e., the classic regression framework) we will also discuss binary, categorical, and ordinal outcomes. We will emphasize how to think about the applicability of these methods, how they might fail, and what one might do to protect oneself in such circumstances. Applications of hierarchical (multi-level) models will include the canonical specific cases of random-slope, random-intercept, mixed effect, crossed effect, marginal, and growth-curve models.

Class Notes: **Please note that this course will be offered virtually for the Fall 2021 term. Please see the course site for more details.**

Recommended Prep:

Permission of instructor required. Prerequisite: S-052, Stat 139, or an equivalent. Jointly-offered in the Graduate School of Education.

Introduction to Unsupervised Learning (213478)

Alex Young

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An introductory course in unsupervised learning with an emphasis on dimensionality reduction and clustering. Topics include principal component analysis, nonnegative matrix factorization, and spectral clustering. In this course we will study these techniques and others with a focus on high-dimensional geometry and insights provided by linear algebra. Numerous data example will be included throughout the course.

Requirements: **Prerequisite: STAT 110 AND MATH 21A AND MATH 21B**

Introduction to Causal Inference (110022)

Susan Murphy

2022 Spring (4 Credits) **Schedule:** MW 0430 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

Causal inference concerns the very difficult, challenging problem of addressing questions such as, "Would vaccinating children 16 and younger against COVID 19 lead to fewer deaths among public school teachers?" and "Would providing Harvard students access to a mobile health application designed to help

them manage school stress, lead to improved school performance?" This class will include 4 modules. The first module introduces the nuanced world of causal inference along with a fundamental tool: the language of potential outcomes. The second module covers randomized experiments and how data from randomized experiments can be used to make causal statements. The third module introduces the rather tricky problem of using observational (non-randomized) data to attempt to make causal statements. The final module introduces a new and challenging area in which the goal is to make causal inference about the effect of sequences of treatments.

Recommended Prep:

NOTE: the ONLY prerequisites are Stat 110 AND Stat 111 AND Stat 139. Gov 2000 and 2001 are no longer prerequisites.

Probability and statistical inference is needed extensively, and statistical linear models are needed occasionally.

Requirements: **Prerequisite: STAT 110 AND STAT 111 AND STAT 139 or Gov 2000 AND Gov 2001**

Introduction to Supervised Learning (207703)

Pragya Sur

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is designed to follow CS 181 and will dive deeper into the statistical properties of various machine learning methods. The goal of the course is to introduce and prepare students for theoretical and methodological research in statistical machine learning. Methods include linear methods for regression and classification, splines, kernel smoothing, additive models, trees, boosting, bagging, and random forests. Statistical principles covered include no-free-lunch theorems, generalization error, degrees of freedom, shrinkage, smoothing, and model selection. The latter part of the course will be devoted to introducing some emerging statistical topics at the cutting edge of statistical machine learning such as using machine learning for statistical inference, conformal inference, using machine learning for causal inference, implicit regularization, algorithmic fairness, differentially-private machine learning, and transfer learning. In addition to problem sets but instead of exams or a course project, students will work in groups to synthesize and give short presentations on recent applied and theoretical machine learning papers.

Course Notes:

Textbook Information: Elements of Statistical Learning by Hastie, Tibshirani, and Friedman is a required text and is available for free at https://web.stanford. edu/~hastie/ElemStatLearn/printings/ESLII_print12.pdf

Statistics 234

Sequential Decision Making (205213)

Susan Murphy

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

This graduate course will focus on reinforcement learning algorithms and sequential decision making methods with special attention to how these methods can be used in mobile health. Reinforcement learning is the area of machine learning which is concerned with sequential decision making. We will focus on the areas of sequential decision making that concern both how to select optimal actions as well as how to evaluate the impact of these actions. The choice of action is operationalized via a policy. A policy is a (stochastic) deterministic mapping from the available data at each time t into (a probability space over) the set of actions. We will consider both off-line and on-line methods for learning good policies.

Mobile health is an area that lies within multiple scientific disciplines including: statistical science, computer science, behavioral science and cognitive neuroscience. This makes for very exciting interdisciplinary science! Smartphones and wearable devices have remarkable sensing capabilities allowing us to understand the context in which a person is at a given moment. These devices also have the ability to deliver treatment actions tailored to the specific needs of users in a given location at a given time. Figuring out when and in which context, which treatment actions to deliver can assist people in achieving their longer term health goals. In the last 15-20 minutes of many of the classes we will brainstorm about how the methods we discussed during that class might be useful in mobile health.

This course will cover the following topics: Markov Decision Processes, on-policy and off-policy RL, least

squares methods in RL and Bayesian RL, namely posterior sampling. Most of the course will focus on Bayesian RL via posterior sampling. This is particularly useful in mobile health as posterior sampling facilitates off-policy and continual learning. Also the Bayesian paradigm facilitates use of prior data in initializing an RL algorithm. Other topics from statistics, machine learning and RL that I think are potentially important in mobile health but that we won't cover are (you could consider in your class project) include: 1) transfer learning (using data on other similar users to enable faster learning); 2) non-stationarity (dealing with slowly changing or abrupt changes in user behavior); 3) interpretability of policies (enabling communication with behavioral scientists by making connections to behavioral theories); 4) using approximate system dynamic models to speed up learning, 5) hierarchical RL, 6) experience replay and 7) multi-task learning.

Recommended Prep:

Recommended prerequisites are the equivalent of Stat 210, Stat 211, and Compsci 181

Deep Statistics: AI and Earth Observations for Sustainable Development (219700)

Xiao-Li Meng

Adel Daoud

2022 Spring (4 Credits) **Schedule:** T 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 25

Deep statistics refers to statistical endeavors that go deeper than developing methods and applying them to solve problems in data science. It explores and develops statistical theory and insights to contribute to the building of foundations for data science. This year's course will start a deep dive into statistical foundations and insights for multi-source, multi-phase, and multi-resolution learning, interwoven with case studies on using AI and Earth Observations (EO) for sustainable developments (e.g., global poverty). Foundational issues are framed as inevitable trade-offs for data science: between data quality and quantity, between statistical and computational efficiencies, and between robustness and relevance of learning methods and findings. Practical questions examined include handling messy and private data, drawing causal conclusions from AI-EO data, and translating scientific insights into polices.

Recommended Prep:

A student should preferably have at least one of the following background:
- Foundational and theoretical proficiency: at the level of STATS 210, 211. (Strong interest in statistical theory and foundational issues.)
- Data analytical and computational skills: basic data science skills and being able use image data. (Strong skills in working with real data, data management, and computational. Preferably having skills in Python.)

Statistics 364

Scalable Statistical Inference for Big Data with Applications (214539)

Xihong Lin

2022 Spring (4 Credits) **Schedule:** M 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Unprecedented advances in digital technology have produced a revolution that is transforming science and society. Big data have been rapidly generated in many disciplines, such as genomics, health, physical and social sciences. The value of big data lies in effective analysis using statistical inference and machine learning methods that are computationally scalable and efficient. In this course, we will discuss several ongoing research areas on scalable statistical inference for big data, including several current research activities, challenges and open problems. Examples include dense and sparse signal detection, feature selection, boosting, high-dimensional prediction and testing, sparse and low-rank matrix estimation, general tensor methods, fast PCA, post PC inference and eigenvector theory, efficient concave and non-concave penalized likelihood maximization and inference, nonparametric function estimation, network analysis, convolutional neural networks, random projection, sketching, distributed computing, cloud computing, variational Bayesian methods, and estimating (possibly) low dimensional functionals in high dimensional models (e.g. average treatment effects in the presence of high dimensional covariates, signal to noise ratio, genetic relatedness). Applications of these methods in various areas will be discussed.

Building a Human Body: From Gene to Cell to Organism (212882)

Amie Holmes

Fei Chen

Richard Lee

Jessica Whited

Jason Buenrostro

Paola Arlotta

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 60

Through a series of lectures, application exercises and laboratory experiments, we will explore how the human body develops on a molecular level from gene to cell to organ. Ever wonder how you can make heart cells beat in a dish? Why can axolotls regenerate their limbs but humans cannot? How do neurites grow? Can we grow a brain in a cell culture dish? Come join us to discover the answers to these questions and more.

Regeneration: Phenomena to Mechanisms (212688)

Jessica Whited

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How can some animals regenerate large pieces of their bodies following injury? This course will use both classical and current primary literature to explore the fascinating process of regeneration across phyla, covering both invertebrates and vertebrates. Through a combination of minimalist lectures, robust

discussion, and student-led presentations, students will learn to distill questions into specific, key experiments; to design experiments with meaningful controls; and to use data to refine, reformulate, and develop new hypotheses.

Course Notes:

Students will be engaged in group work throughout the semester. They will develop new Wikipedia pages about specific topics related to regeneration. As a final project, they will write and produce short videos centered on student-selected topics, and the course will culminate with a class-wide viewing event.

Additional Course Attributes:

Stem Cell & Regenerative Biol 140

Developmental and Molecular Basis of Growth and Regeneration (126744)

Fernando Camargo

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will focus on the biology of organ growth and regeneration from a developmental perspective.

How is the size and symmetry of our organs set? How does a regenerating animal sense that something is missing and eventually stop the regenerative process when tissues reform? We will learn about conserved developmental pathways that are necessary for adult regeneration and discuss how the aberrant activation of these pathways can lead to overgrowth disorders such as cancer.

Recommended Prep:

Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or permission of the instructor.

From Cells to Tissues, in Sickness and in Health (161207)

Ya-chieh Hsu

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Every cell is a part of a larger "community", working together to enable tissue function. This course will explore the principles of building complex tissues from cells. How do cells know what tissues to make and when to make them? How do cells communicate with one another? What diseases can arise when these principles go awry? How can we build tissues in the lab? In addition to lectures, students will engage deeply in primary literature.

Stem Cell & Regenerative Biol 155 Section: 01

Epigenetics and Gene Regulation of Human Development and Disease (215900)

Jason Buenrostro

2022 Spring (4 Credits) **Schedule:** MWF 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Are we destined to be our parents? In this course we will study topics in epigenetics and gene regulation to challenge some of Mendel's ideas on genetic inheritance. To do this, we will learn about the biochemical processes that control the expression of genes as cells change across human development, aging and disease. Together with genetics, we'll use science to discuss whether "nature or nurture" defines who we are. Finally, the human genome is huge, employing diverse mechanisms of epigenetic regulation, we'll learn about data rich experimental tools and work together to use computational methods to study

epigenetic processes within cells.

Recommended Prep:

LS1a or LPSA, LS1b, and SCRB 10.

Stem Cell & Regenerative Biol 195

The Translational Science of Stem Cells (204006)

Lee Rubin

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Stem cell biology has gone mainstream, having become essential for both understanding and treating human disease. In this seminar/lecture course, students will learn about using functional human cells (such as pancreatic beta cells or dopaminergic neurons) to treat disease. They will also learn about using these cells to model diseases, such as ALS and Parkinson's disease, with the goal of identifying more effective, possibly patient-specific, therapeutics. Finally, students will learn about agents, including small molecules, whose therapeutic potential can be attributed to the activation or inhibition of adult, tissue-specific, stem cells that continue to reside in key adult tissues. They will also be exposed to exciting new work that demonstrates the potential for creating new cells from old by using reprogramming methods (not unlike those used to make induced pluripotent stem cells) to switch cell identities. A typical type of question that we will debate is: When should Parkinson's disease patients be treated with a drug to slow death of residual neurons, with new dopaminergic neurons made from pluripotent cells (cell transplantation) or with a viral vector that produces new neurons from existing glial cells in the brain?

Given the seismic change that has occurred in the pharmaceutical industry in the past few years, we will feature a course module on human disease genetics and rare diseases. In particular, we will discuss the development of therapies for Spinal Muscular Atrophy, a life-threatening monogenic childhood disease. How were three different therapies developed by three biotechnology/pharmaceutical companies? Why did this make financial sense? How will this change the decision stream in industry?

Course lecturers include industry and academic leaders who will explore these topics and describe the impact of rare disease research on current drug discovery efforts. An accompanying module will introduce the ways in which stem cells can be applied to the study of rare Mendelian-type diseases, as well as to more genetically complex disorders.

This course will highlight the theoretical, as well as the practical, aspects of drug development. How are therapies progressed from conception to patient (bench to bedside)? Why do stem cell-based approaches potentially occupy a special "niche" in this type of work? We will learn about how academic investigators commercialize research and will hear the perspective of a prominent venture capitalist. We anticipate that students with different backgrounds (biology, engineering, business) and at different levels (undergraduate, graduate) will benefit from taking the course and will help enrich the discussions by providing different perspectives on the topics that we'll cover.

We expect that the course will be hybrid. The students, as well as most of the instructors, whether Harvard-based or not, should be present in the classroom. However, some of the speakers are located overseas or on the west coast and will lecture and interact with the students by Zoom.

Course Notes:

Permission of the instructor required to enroll. Ability to work in a less structured environment will be essential.

Recommended Prep:

Life Sciences 1a or Life and Physical Sciences A, Life Sciences 1b, and preferably SCRB 10.

Frontiers in Therapeutics (218466)

Mark Fishman

2021 Fall (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

How realistic are promises to "eliminate" diseases and to "personalize" medicine? This course looks at biological principles underlying therapeutics, ranging from those described first in Egyptian papyri to those under development today (using chemicals, proteins, cells, and genetic manipulations) and based on traditional philosophies and on science. As part of the class, students will have the opportunity to design novel approaches to diseases today without cure.

Course Notes:

Only for graduate students enrolled in the MS/MBA program in Biotechnology at the Harvard Business School. All undergraduates should register for SCRB 197.

Class Notes: **Only for graduate students enrolled in the MS/MBA Program in Biotechnology at the Harvard Business School. Undergraduates should register for SCRB 197.**

Systems Biology

Subject: Systems Biology

Systems Biology 220 Section: 1

Analysis foundations for quantitative biologists (204480)

Andrew Murray

Allon Klein

2022 Spring (4 Credits) **Schedule:** TR 0445 PM - 0600 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

The bedrock foundation of quantitative biology is controlling assumptions and errors in empirical measurement. This course focuses on developing "street-fighting" capabilities in quantitative analysis: statistical concepts that every biologist needs to ensure that they can interpret their data correctly. The course introduces estimators, the origin and consequences of key distributions in biology, error propagation, hypothesis testing, multiple hypothesis correction and the perils of p-hacking. Concepts are reinforced through problem sets, and team-based analysis of new experimental methods.

Class Notes: **Class enrollment is limited to students in the Systems, Synthetic, and Quantitative Biology PhD program.**

Recommended Prep: **This course is required for all Systems, Synthetic, and Quantitative Biology students. Knowledge of programming, statistics, physics and chemistry.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 221QC

Analysis foundations for quantitative biologists (part 2) (214495)

Elizabeth Pomerantz

2022 Spring (2 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 40

(Part 2 of the SB220qc / SB221qcseries) New experimental techniques are changing the nature of data sets in biology. For example, high throughput methods routinely measure expression levels of thousands of genes in individual cells across tens of thousands of cells. Imaging methods record 3-dimensional movies of developmental processes, generating terabytes of data in a single run. How do we make sense of these data sets? This course will begin with "street-fighting" statistics: tools that every biologist needs to ensure that they can interpret their data correctly. We will then study the fascinating world of high-dimensional spaces and build the intuition required for interpreting data that

live in these spaces. We will cover linear and non-linear dimensionality reduction, statistical learning and inference in high-dimensional spaces, and relevant machine learning tools such as autoencoders. Finally, we ask how biological systems themselves solve high-dimensional inference problems, subject to severe measurement constraints in the form of thermal noise and limited energy resources. We will cover relevant ideas from statistical physics such as kinetic proof reading. To join the first five weeks of this course (on "street-fighting" statistics) enroll in SB220qc.

Additional Course Attributes:

FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 232

Developing and communicating scientific investigations (216826)

Ashwini Jambhekar

Timothy Mitchison

2021 Fall (4 Credits) **Schedule:** WF 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course will cover the principles of selecting a topic and hypothesis for scientific investigation, developing a research plan to address the hypothesis, and communicating the significance and details of the research plan to other scientists. The course will cover writing different types of project proposals. Students will learn about project development and presentation in various areas of systems, molecular, and cellular biology. They will practice developing and writing their own project proposals, and giving and receiving peer feedback.

Course Notes:

This course is required for all Systems, Synthetic, and Quantitative Biolgy PhD first year students.

Systems Biology 350 Section: 033

Systems Biology Research (121507)

Daniel Needleman

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
Course Evaluation	Course Evaluation Exempt
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 034

Systems Biology Research (121507)

David R. Nelson

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
No FAINFO	300 or 3000 level class, do not generate FAINFO
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation Exempt
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

The Lemann Program on Creativity and Entrepreneurs

Subject: Lemann Program on Creativity

Lemann Program on Creativity 101

StudioLab on Creativity and Entrepreneurship (218290)

Alain Viel

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 40

Will our new normal be a diminished or unimproved version of reality that simply happens to us, or can we enact change to create a "better normal"?

LPCE 101 pursues the creation of a "better normal." Using an interdisciplinary exploration of the liberal arts, you will develop and apply transformative ideas to tackle today's societal challenges, such as racial injustice, climate change, and strained health and wellbeing. You will work to develop actionable solutions to pressing issues, using the starting framework of the UN Sustainable Development Goals. You will learn to identify and properly analyze a problem; work collaboratively to ideate and create an actionable approach; build an organizational strategy and business plan; network with expertise to pressure-test your ideas; and persuasively communicate your ideas to build the requisite human capital and funding relationships to launch a venture.

This class will take advantage of activity-based learning, digital assets on LabXchange, guest speakers, and an active council of expert mentors to guide you through the design of your venture.

The term will culminate in a Festival of Ideas, where individuals and teams will have opportunities to seek support to move their projects along. Through your efforts, you will imagine a better normal for society and take meaningful action to make it a reality.

Lemann Program on Creativity 102

StudioLab on Creativity and Entrepreneurship (219653)

Alain Viel

2022 Spring (4 Credits) **Schedule:** W 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 36

LPCE102 is a 4 credit StudioLab designed for students with existing ventures in the early stages of

development with the goal of launching the venture by term's end. The target student will have conceived and prototyped a solution to an intractable problem in an effort to create a "better normal."

Using an interdisciplinary exploration of the liberal arts, you will develop and apply transformative ideas to tackle today's societal challenges such as racial injustice, climate change, and strained health and wellbeing. You will work to execute your actionable solutions to pressing issues. You will learn to properly analyze your identified problem; work to collaboratively ideate and create an actionable plan of execution; build a scaling strategy and marketing plan; network with experts for fundraising advice; and persuasively communicate your venture to build the requisite human capital and funding relationships to launch your venture.

This class will take advantage of activity-based learning, guest speakers, and an active council of expert mentors to guide you through the launch of your venture. The term will culminate in a Festival of Ideas at the end of the semester where individuals and teams will have opportunities to seek support to move their projects along.

In addition to the weekly 3-hour studio workshop sessions, we will have screenings and talks from visitors who are working in the intersection of art and entrepreneurship. These may be synchronous or asynchronous, in-person or virtual. You will also need to allocate at least 3 hours a week to complete the assignments.

LPCE102 will help you imagine a better normal for society and take meaningful action to make it a reality.

Theater, Dance, and Media

Subject: Theater, Dance & Media

Theater, Dance & Media CAMR

Advanced Playwriting: Workshop (203500)

Sam Marks

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This workshop is a continued exploration of writing for the stage. Students will be encouraged to excavate their own voice in playwriting. They will examine and attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Ibsen and Beckett as well as contemporary dramatists such as Annie Baker, Caryl Churchill and Sam Shepard.

Course Notes:

TDM CAMR is the same course as ENGLISH CAMR. Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Class Notes:

DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Students will be notified of admissions decisions by 4: 00pm on Wednesday, January 19. Workshops will meet the first week of classes.

Theater, Dance & Media CKR

Introduction to Playwriting: Workshop (205632)

Sam Marks

2021 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Clare Barron, Aleshea Harris, Jeremy O. Harris, Taylor Mac, Suzan Lori-Parks, as well as work from Edward Albee, Caryl Churchill, and Harold Pinter.

Course Notes:

TDM CKR is the same course as ENGLISH CKR. Admission is based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Theater, Dance & Media 90AR

Production Studio: Theatre Making through Relationship and Contemplation (205023)

Mei Ann Teo

Troy Anthony

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Mei Ann Teo is a genderqueer immigrant - fully Chinese Singaporean and Asian American - who experiences how a 24 hour flight away, their relative position of privilege and safety dramatically shifts. They spent 5 months of 2020 living with their Seventh Day Adventist parents in Singapore (first time in 20 years) while racial uprising happened in the US - unearthing many strange connections of American imperialism and white supremacy to Colonial legacies and Global Anti Blackness, all while missing their friend Troy. They talk to him daily - he calls them while he was on the streets protesting the death of George Floyd.
Troy Anthony is a Black queer theater maker with roots in the American south where he was taught by his Adventist family to dream to the farthest reaches of his imagination. Uprooted after losing his apartment, he spent the quarantine living alone for the first time in his life, bouncing from place to place in search of a new home while also navigating his own relationship to rage, anti-Blackness and taking action after learning about the deaths of George Floyd and Breonna Taylor. There wasn't much that he could depend on during this time, but his phone calls with his friend Mei Ann were consistent, despite their 12 hour time zone difference.

This course integrates the understanding and excavation of personal and collective history as a central practice of creating performance for changemaking and collective liberation. Through the practice of their friendship, Troy and Mei Ann lead methods of storytelling and constructing narratives from personal history - and invites making processes for gathering collective history and rituals for healing historical and social racial trauma. Particularly wrestling with Anti blackness within POC communities and the global ramifications of colonization across the world, Troy and Mei Ann are committed to making a space for vulnerability that allows for open-hearted learning. They will use the technologies of choral singing, meditation, ritual and movement to build a contemplative community and fertile environment for contemporary theater-making that heals personal and collective wounds.

Course Notes:

TDM production studios (TDM 90AR/BR/CR/DR) frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar

discussions and studio work at designated times (TBD) to examine the entire performance process through a creative lens. Additional rehearsal dates and times are TBD.

Class Notes:

TDM 90AR is taught by Mei Ann Teo and Troy Anthony.

Course Shopping: Mon 10-11am.
Please visit Canvas course website for more info.

This course welcomes those interested in Anti-Blackness, anti-racism, Choir, friendship, ritual, new forms in theatre making, directing, designing, projection, sound, music, technology and art.

Theater, Dance & Media 90BR

How To Make My Fantasies Come True or Making a Show Where No One Stoops and None Are Conquered (205031)

Stevie Walker-Webb

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Department **Enrollment Cap:** 15

Two Restoration Comedies (The Rover and She Stoops to Conquer) and a Jacobean Revenge Tragedy ('Tis Pity She's A Whore) walk into a rehearsal room. They've been produced for centuries because of their riveting outsized characters, witty repartee, critique of the salacious lives of the British upper classes, extreme displays of emotions, swordfights, and appearances of hearts that bleed (quite literally). How can we use and decolonize these plays, drawing lines of connection between the dramas of the Jacobean and Restoration period that have been so deeply tied to the values espoused by the Anglo/European dramatic cannon and current forms of popular culture? Lead Production Studio artist Stevie Walker-Web in collaboration with student participant/performers will stage a new comedic play using a pastiche of these three dramas and enliven them with current pop cultural dramas that play on many of the same dramatic tropes (Revenge! Gossip! Incest! Housewives!)

The guiding principle for director Stevie-Walker Webb, the course instructor, is Audre Lorde's proposition, "If I didn't define myself for myself, I would be crunched into other people's fantasies for me and eaten alive."

Walker-Web uses Lorde's critical observation to decolonize canonical white texts both on the page and in our bodies. By adapting canonical texts and borrowing from pop cultural genres, Walker-Web's intention is to generate a performance process and production that reclaims black joy. That reclamation attends to the impact on people of color, those who are gender non-conforming and queer when they are asked to embody identities that erase them. The goal of this Production Studio is to revisit "taken for granted texts" and redefining them by imagining ways that so many who have been excluded for centuries can appear in contemporary productions of these works.

Course Notes:

TDM 90BR is required of concentrators and open to other students involved in the TDM spring production (as actors or apprentices on the

production team). Participation is limited to students involved with the production, either as performers or as members of the production team. Students who wish to be part of the production team should contact Artistic Producer James Stanley, jamesstanley@fas.harvard.edu

Class Notes: **This Production Studio Course will be taught by TDM Visiting Lecturer Stevie Walker-Webb.**

Harvard Dance Project (160653)

L ROD

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The Harvard Dance Project is a production-based course focusing on professional movement exploration, choreography, and process. For the Spring 2022 season, Aysha Upchurch, Jeffrey Page, and LROD will be in choreographic residence with the enrolled company at the Harvard Dance Center. The Harvard Dance Project offers the enrolled company an in-depth experience working closely with choreographers' diverse methods and practices in the dance production universe while simultaneously examining the intersections of dance and performance studies, choreographic processes, and intermedia. The Harvard Dance Project culminates in an end-of term performance and production experience at Farkas Hall. In addition, each enrolled company member will simultaneously cultivate a short dance studies article relevant to their research over the course of the semester. LROD will facilitate the course using co-creative, adaptive, and liberatory methods with a decolonial approach.

Course Notes:

Some dance, interdisciplinary, and collaborative experience is required. Students concentrating in Theater, Dance & Media or interested in developing a performance practice encouraged to enroll. Fulfills a TDM Production Studio requirement.
Come speak with LROD about your experience and interest in the course.

Recommended Prep:

Previous dance experience required.

Foundational Concepts in Theater, Dance & Media (160648)

Debra Levine

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

This course will introduce students to the fundamental issues in and methods of theatre and dance studies. We will engage a number of plays, essays, videos, and live performances to explore the potential of expressive forms, and ask, what can be experienced and known through performance and performing? In doing so, we will address key questions:

What constitutes a theatrical event? What are its component parts? What is the relationship between written dramas, scripts, scores, and embodied performance on the stage and in everyday life? What responsibilities do the actors, dancers, directors, choreographers, designers and other members of the production team have to previous incarnation or to an author's expressed intentions? How does the spectator co-create the meaning of a given production? How does one situate performance historically and from a theoretical perspective? And how can performance become a critical tool to engage cultural, political, and philosophical issues?

You will be encouraged to develop your ability to think about performance from many different perspectives and to defend your individual ideas with strong critical skills. Additionally, throughout the course of the semester we will define and demystify the complex terms that operate within this field. This course aims to give students a solid foundation to see, experience and think as performers, as artists, and as scholars of expressive behavior.

Course Notes:

Required of all, and limited to, concentrators.

Theater, Dance & Media 98

Junior Tutorial (160647)

James Stanley

2022 Spring (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course serves as a transition between the survey nature of the sophomore tutorial and the independent senior thesis in Theater, Dance & Media at Harvard. We engage with methods and forms of theater, dance and media which may provide inspiration for your future artistic and scholarly work. Our strategy is to identify a number of contemporary and historical performances and performance archives and critically consider how they might influence your evolving identity as an artist working in live media, dance, and performance. We will delve deeply into genres of arts practices that could help you to imagine a way forward in your own work. In doing so, the goal is to advance your transition into a professional life in theater, dance, and media, and the identify your key concerns (both artistic and pragmatic) regarding a professional practice. Throughout the semester we will discuss how your personal goals and concerns intersect with political, social, and individual contemporary preoccupations in those fields.

This junior tutorial is designed to organize participants into a community of singular artist interlocutors who can also supportively engage with one another's projects. You will develop methods to articulate your own intentions and impulses with great specificity, offer appropriate feedback for the stage of development for your peer's projects, and acquire facility with terms of art in theater, dance & media.

Our semester is oriented to gaining autonomy and independence in relation to your interests. For the first seven weeks of the semester, we will read and explore a number of topics and ideas regarding the development of a sustainable arts practice, all the while, developing a specific set of questions pertinent to each class member's interests in the concentration. At the end of the seven weeks, students will present (both in person and online) on a company or artist whose work you have been researching in depth (the

options are outlined in week 7 of the syllabus). We then pivot to your topics brought up during the first half of the semester – in essence the class will be building and completing the syllabus for the last half of October and November and December, while discussing and workshopping the development of their thesis ideas.

Course Notes:

Required of all, and limited to, concentrators.

Beginning Acting Through Scene Study and Monologue Work (207571)

Marcus Stern

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 6

This is a beginning acting class designed both for students who have no previous acting, performance, or arts class experience, as well as for students who have had a fair amount of acting experience and are interested in honing their work in pursuit of a career in acting. The focus is on scene and monologue work using contemporary texts from theater, television and film. Core components of the class include the idea of simply working from yourself, "action-based acting" (how one person is trying to change/affect another person in a scene), and how to read a scene or monologue to figure out what your character might want from that situation. We've designed the class around very tangible and concrete ideas and techniques, so that those who might be intimidated by the idea of an acting class, or an arts class in general, will feel exceedingly comfortable. It is important to note that while the class is intentionally designed to be as un-intimidating and accessible as possible, the class does require a great deal of outside work. Students should expect to spend 4-6 hours per week on class work, including time for analyzing texts and rehearsal time for the scenes and monologues.

Class Notes:

Course Preview Session: Tuesday, August 24 at 12-1pm ET. Please check Canvas course page for more information.

Enrollment will be determined by submitted audition videos: Please prepare a 1-2 minute contemporary monologue. Choose any piece of text (1990's to the present) from any theater, television or film script. Choose a text you can relate to in some way, that feels comfortable and real to you when you say the words out loud. Please memorize the text and practice saying those lines until they feel natural to say. Then, please record your monologue (using your phone, or whatever device you want) and email the actual recording (preferred method) or a link to the video to both marcus_stern[at]harvard.edu and ashleigh.d.reade [at]gmail.com no later than 5pm ET, Tuesday August 24th. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access. Please feel free to email us if you have any questions about the class, or about preparing and sending in an audition monologue --- we're always happy to address any questions about the class.

The Actor in Rehearsal: Practical Techniques (117461)

Karen MacDonald

2021 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 14

An expansion of basic acting techniques, with an emphasis on the actor's work done during rehearsal: creating a character, building a role and finding one's own way of preparing for and making the most of rehearsal time. This work is an important part of the actor's" toolbox" Actors will use exercises and improvisations to help explore character and sharpen instincts.This work will continue by concentrating on contemporary texts both comic and dramatic. With guidance, students will bring in their own ideas/scripts for monologue and scene work - material or characters that interest them, challenge them, excite them.

Class Notes: **Course Preview Session: Mon 8/23 at 12-2:45pm.**
Please visit Canvas Course Website for more information.

Advanced Acting: Contemporary Texts (122906)

Marcus Stern

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Using contemporary text from TV, film, and theater, this course introduces advanced acting techniques through scene and monologue work. Core components of the class include the idea of "simply working from yourself" and action-based acting, which explores how one person is trying to change/affect another person in a scene or monologue. In addition, students will learn how to read a scene or monologue to figure out what your character might want from that situation, audition techniques, how to choose material that best suits the individual actor for auditions and scene work, text analysis, and personalization of a character. All the concepts are aimed at the creation and refinement of an acting process that can be specifically tailored to the individual actor. The class is designed around very tangible and concrete ideas and techniques, so that those who might be intimidated by the idea of an acting class, or an arts class in general, feel exceedingly comfortable. It is important to note that while the class is intentionally designed to be as unintimidating, supportive and accessible as possible, the class does require a great deal of outside work. Students should expect to spend 4-6 hours per week on class work, including time for analyzing texts and rehearsal time for the scenes and monologues.

Class Notes: **There will be an information session on Zoom during shopping week, Sunday, January 16th, from 12pm-1:30pm ET. Visit Canvas course website for link.**

Please feel free to come in at any time during the session, and you do not need to attend the session to submit an audition monologue for the class.
Enrollment will be determined by submitted audition videos. Please prepare a 1-2 minute contemporary monologue. Choose any piece of text (1990's to the present) from any theater, television or film script. Choose a text you can relate to in some way, that feels comfortable and real to you when you say the words out loud. Please memorize the text and practice saying those lines until they feel natural to say. Then, please record your monologue (using your phone, or whatever device you want) and email the recording or a link to the video to both marcus_stern@harvard.edu and ashleigh.d.reade@gmail.com no later than 5pm ET, Monday, January 17th. If videos are sent by Google Drive link, please make sure your permissions are set such that we can immediately watch the video without requesting access. Please feel free to email us if you have any questions about the class, or about preparing and sending in an audition monologue. Enrollment determined by audition.

Squaring the Circle: Russia, Art, Revolution (208135)

Daria Khitrova

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes:

No prerequisites. All readings in English.

This course is cross-listed as SLAVIC 114 and TDM 114K.

Acting Alone: The Monologue (108799)

Remo Airaldi

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 9

This course will focus on the selection, rehearsal and performance of monologues. The ability to work on a monologue--whether in the context of a play, film or as an audition piece-- is a foundational skill for all actors. We will explore various techniques to allow greater emotional, vocal and physical expressiveness in both classical and contemporary material. We'll study specific approaches to help students "act alone" creatively, honestly, and spontaneously. Students will also work on the presentation of a monologue in the context of an audition and will learn to create an effective self-tape.

Course Notes:

Enrollment determined by short interview/audition.

Class Notes: **Short auditions/interviews for the class will be held:**

Fri 1/14 from 2 to 4PM
Tues 1/18 from 3 to 5PM

Vocal Production for the Stage (118497)

Erika Bailey

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Whether one is performing in a play, pitching an idea, presenting research, or leading a group, the ability to use one's voice effectively is vital to the success of the performance. A resonant and varied voice enriches communication whether in person, in a recorded video, or a zoom interview. Using several major techniques of voice training from the field of acting, students will learn the possibilities, nuances and power of the human voice. We will explore ideas around voice and identity, discussing accents, gender and voice, and code shifting. Preference is given to Theater, Dance, and Media concentrators, but students with no previous voice or theater experience are welcome in this class.

Class Notes: **To be considered for the class, please attend one of the course preview info sessions:**

Monday, August 23 from 9:30-10:30am
Tuesday, August 24 at 10-11:30am

Please visit the Canvas course page for more info.

What's so Funny?: Introduction to Improvisational Comedy (160654)

Remo Airaldi

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Comedy has often been thought of as the poor relation to Drama but, as Lenny Bruce said, "the only honest art form is comedy because you can't fake it." We will attempt to take comedy seriously by engaging in committed, creative and collaborative "play" that will tap into each student's personal, individual sense of humor. The class will focus on the basics of improvisation: group games, narrative skills, object work, offers, spontaneity, agreement, using the space around you, building on-stage relationships and, eventually, scene work.

Class Notes:

Audition/Interview sessions will be held:

Monday, August 23 from 1-2:30pm ET and

Tuesday, August 24 from 3-6pm ET

Please check the Canvas Course Website for more information.

Ballet, Past and Present (215995)

Daria Khitrova

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores the history of ballet, classical and beyond. We will view and discuss ballets to help us

think about what ballet is, and why it has been such an enduring art form in different eras and cultures. Why is it mute and does it have to be? What kind of stories can it tell and how should we read them? How do ballets survive and how do they change in the process? Who makes a ballet: a choreographer or dancers? Or is it, perhaps, a composer, designer, or story writer? Does ballet technique confine the body, as the pioneers of modern dance used to assert, or is it a form of idealist philosophy, the ultimate expression of human freedom, as twentieth-century theorists of ballet have suggested? The works to be studied include Giselle, Sleeping Beauty, Swan Lake, Rite of Spring, Les Noces, Apollo, and others. The course is classroom-only (no dancing component; only watching, reading, and discussing) but, if pandemics permit, will also include a visit to the theater as well as to a ballet class and, possibly, rehearsals. No pre-requisites.

Theater, Dance & Media 130R

Directing (123080)

Marcus Stern

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 9

This is a directing class with an emphasis on personal story telling, and how to create those stories with clarity and visceral impact. This course is designed both for students who have had no previous directing, acting, theater, film, or any arts class experience at all, while also providing a rigorous directorial workspace for advanced directors who are interested in a career of directing in theater and/or film. The emphasis is on telling stories that are of personal interest to you, and helping you define for yourself the specific story points necessary to clearly convey the story, and directorial techniques that can help you vivify the visceral impact of that story (working with music, lights, staging, etc.). Each student directs 5 very short pieces (1-3 minutes) and then 3 longer pieces (5-8 minutes) over the course of the semester. Students may direct their own writing, and/or direct themselves as actors, if either of those are of interest to them. Each student will be required to make at least one of the five very short pieces as a live theater event, and at least one of the five very short pieces as a recorded and edited video, so that everyone has a chance to experience both formats. After that, students may stick with one format (live or video) for the rest of the semester if they want, they can continue to go back and forth between the two mediums, and/or they can combine the two creating stories that that use pre-recorded video material during live performance. Absolutely no previous video experience is needed for this course. Students will use free video editing software to create their video work, and we'll provide each student with links that help each student get a quick handle on basic video editing techniques. For the video work, while we'll look at how the camera and editing are used in the storytelling, this is not a technical filmmaking class – no instructions on how to use a camera is offered. Most students have used their phones to record their videos, but each student is welcome to use any video recording device that they may have access to. It's a fast-paced class in a very safe and warm environment, simultaneously we push each student to be very rigorous in their story making. The class does require a great deal of outside work. Students should expect to spend 4-6 hours per week on their story making. Students' grades are only based on effort, not on a comparison of work between each other.

Class Notes: **Course Preview Session: Monday, August 23 at 12-1pm ET. Please check Canvas course page for more information.**

Enrollment determined by the instructor after viewing student Introduction Videos. For those interested in taking the course, please submit a short 2–3-minute (approximately) Introduction Video. Please include the following:

1) Your name, year, and concentration if you have one.

2) Why you're interested in taking the course. What do you hope to get out of this course?

3) Please tell us two things that feel personally important to you in life – as the class encourages students to make work on issues and topics that they feel personally connected to.

Please email the Introduction Video as an attachment (preferred method) or a link to the video to BOTH marcus_stern[at]harvard.edu and emma_watt[at]harvard.edu no later than 5pm ET, Tuesday, August 24th. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access.

Directing Lab (126812)

Shira Milikowsky

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This class is designed for students interested in expanding and exploding their understanding of theater and performance studies. Directing lab is actually a laboratory: a place for hypothesis, experimentation, and practice. Over the course of American theater history thus far, who have been the great experimenters? Which directors have broken the rules and re-defined the game? Does innovation come from a single auteur, a tightly woven ensemble, a well-funded institution, or a band of rogue outsiders? This class will tackle these and other questions, weaving together theory and practice to provide students with a holistic understanding of the American avant-garde and a set of practical tools with which they can tackle their own burning artistic questions.

At the root of experimentation are questions of power and oppression. As we examine the innovators of American theater in the 20th and 21st century, course materials inherently probe questions of access and inclusion. Who is invited in? Who is left out? Which creators truly held the tools to challenge the status quo? Was their work allowed to be seen, heard, and felt? In this course students will engage in these questions not only by reading the history, but by creating and directing their own work, inspired by the artists and productions studied.

Convention tells us that 'you have to know the rules to break them,' but Directing Lab isn't a course about convention. This class is open to students with all ranges of directing experience - including none. The only pre-requisite is curiosity.

Class Notes: **Course Preview Sessions:**

1. Friday, 1/14 @ 1pm ET
2. Sunday, 1/16 @ 4pm ET

Preview sessions will last 30 minutes, including time for questions. Please come at the start time, but you do not need to stay through the end. Please see the Canvas course page for preview session Zoom Links.

You do not need to come to a preview session to enroll in the course. Please see the course canvas for enrollment requirements.

Puppet Theater (218607)

Kate Brehm

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Uniquely, the puppeteer often occupies multiple roles in a production simultaneously: playwright, designer, director, and performer. This laboratory course studies that fusion while students create original works of puppet theater.

Contemporary puppet theater approaches design and devising from a wholistic perspective. All objects onstage contribute to a total performing world. Characters, scenery, and even the stage itself may all be manipulated by hand to become animate, performing beings. Through the lens of puppetry, students are invited to consider how all theater might use visual design elements as active storytellers.

Students are guided through the creation and performance of two puppet shows, each in a different style. The first project examines the possibilities of toy theater. Originally a nineteenth century European tradition, it includes a focus on the design of the theater itself (in miniature), and historically, all scenery and characters are flat. In contemporary toy theater, size and dimensionality vary, but a focus on performing scenery and stage effects is retained. The second project explores shadow puppetry. With ancient Asian roots, shadow puppetry exists across the world today in a multitude of forms. This class utilizes a combination of overhead projectors, paper cut outs, printed images, live drawing, mobile projection screens, and handheld light sources.

Projects are informed by examples of contemporary puppet theater as well as theories of art and visual perception, theater scenography, cinema and comics. Classes are divided into varied length segments of discussion, puppet theater construction, play and performance. The class explores devising theater with music, text, or image as core inspiration and alternative models of story structure. Projects investigate different modes of collaboration and varied approaches to the performing puppeteer.

After completing this course students will have gained valuable skills for devising theater and performance without a script, incorporating the storytelling capacity of inanimate objects and scenery, utilizing the metaphors inherent to the actor-puppeteer character, and generating strong visual imagery that truly performs onstage.

Course Notes:

This course is taught by Visiting Lecturer Kate Brehm.

Class Notes: **Course Preview Sessions: Mon Aug 23 at 3pm ET and Tues Aug 24 at 3pm ET. Please visti the Canvas page for more info.**

Movement Lab (161233)

L ROD

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Movement Lab is a dynamic research studio exploring the intersection of dance, architecture, and anatomy. Individuals enrolled will learn interdisciplinary tools for curating motion and design for the stage, screen, or site-specific work. The movement lab focuses on rigorous movement practices each week to investigate individual tasks for constructing movement. These labs are informed by anatomical studies for motion and HTL from architecture, dance, and theater. Over the semester, we will view and analyze structure, dramaturgy, sets, digital design, and lighting design in seminal dance, theater, and site-specific works worldwide. The course aims to co-creatively understand how bodies in motion move, the importance of the places they move with, and the in-process method of movement research. Course facilitated with radical tenderness by Professor LROD and Teaching Fellow Lisa Kostur, using adaptive, liberatory, and decolonial approaches.

The Processes of Inter-Media and Choreographic Exchange (218801)

L ROD

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This experimental laboratory supports interdisciplinary intersections with choreography, dance, and media. The purpose of Inter-Media and Choreographic Exchange provides each enrolled participant with a research laboratory to deepen new and established ways of artmaking/artivism through the lens of choreography. The course surveys the history of these intersections and the relationship of the moving body to unlock diverse projects related to, but not limited to, movement, filmmaking, lighting and projection design, performance art, visual art, sound design, and immersive installation design. Concepts of play, daydreaming, and spaciousness will be engaged in an adaptive and liberatory environment facilitated by

LROD.

Course Notes:

This course supports all stages of research, current projects, and some experience in the fields is recommended but not required.

Embodied Intelligences: Koteba, Lindy Hop, Hip Hop, Philosophies & Culture (217582)

Jeffrey Page

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 24

The origin of blues music—and therefore gospel, jazz, and hip-hop—has been traced directly to Mali, West Africa. Within Malian ideology, dance is a culture and there is no separation between dance and theatrical practice. Koteba is a masquerade performance tradition that utilizes the theatrical elements of satire to comment on and confront civic injustices within the Bamana ethnic society. Koteba is a word that means "big snail" in the Bamana language, and like the snail, it carries the ideologies and cosmologies of the Bamana people on its back. There are nearly 20 rhythm and movement stylings situated within Koteba. In a multiday festival, these dances are traditionally performed in succession, and often executed with the dancers forming concentric circles, which gives this theater tradition its snail-like name. Traces of this masquerade tradition can be found throughout the Caribbean and the United States in the form of Carnival and Mardi Gras.

This class will focus on unpacking four of the dance and rhythm stylings over the course of 12 weeks: (1) Forokotoba, (2) Tansole, and (3) Bara/Baradong. The traditions of Noh drama, Sanskrit theater, and Greek tragedy have informed the development of American dance and theatrical forms, and similarly, a deep investigation of Koteba masquerade performance traditions will offer students of theater and dance informative tools as theorists, practitioners and historians.

Latinx Movement: Embodied Intersections of Latin Dance, Music, and Communal Practice (217446)

L ROD

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

A warm invitation to get up, connect with our bodies, and move together after a long day of zooming. Latinx Movement Practice rigorously explores the social and communal Latin Diaspora of movement, migration, and music from Mexico, the Caribbean, South America, and the United States. The course is taught with a blend of English, Spanish, and Spanglish.

Together we will investigate and deepen our use of horizontal and vertical weight, isolations, polycentric movements, and hip whining techniques. We will weave a survey of the history, art, and literature from the Latinx experience through an embodied experience while fostering our virtual community. LROD (el rod) will facilitate Latinx Movement Practice with radical tenderness to embrace deeper states of power, awareness, and energetic alignment during movement rituals for heightened connectivity, and restorative power. ¡Vamos a Bailar!

Key Questions:
How do we foster a sense of community in movement during the era of zoom and isolation?
Can we deepen our movement intentions and embrace our artistic voices, while simultaneously creating space for joy and empowerment?
What are the ways we share and celebrate each other's movement investigations each week.

Course Notes: **No previous Latin movement experience is needed to enroll.**

Class Notes: **Course Preview Session: Tuesday, 8/24/21 10:30-11:45 AM. If you can't make it and want to know more, office hours by email: lrodriguez1[at] fas.harvard.edu. Please visit Canvas for more information.**

Theater, Dance & Media 149UB

Performing Culture: Exploring Identity and Power Through Hip Hop Dance (215727)

Aysha Upchurch

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

Hip Hop is music, is dance, is commentary, is revolution, is a way of being, is culture. The roots of Hip Hop are steeped in the traditions of the African Diaspora. So what of these roots remain as Hip Hop dance simultaneously allows itself to push across borders with other genres and is pulled into spaces for commercial and popular appeal? What does it mean to perform Hip Hop dance as an expression of culture that one may or may not be a part of? How is Hip Hop dance an embodied social critique on power? How does Hip Hop dance embrace diverse identities while also asserting and preserving its own?

In this new course, students will have an opportunity to engage these questions as they study and explore Hip Hop dance technique and history. Through a mix of learning activities that allow for skill development, dialogue, and engagement with artists/practitioners, students will investigate what it means to participate in

or perform Hip Hop dance with an intentional eye on how it defines and intersects with various cultures, empowers identities, and interrogates power dynamic. Students will track their own progress with skills through a Movement Diary, while conditioning and flexing critical analysis muscles through group discussions, film assignments, and choreography projects. The course promises to be a boat load of "conscious fun."This course is a 70-30 split on time moving versus time in discussion.

Course Notes:

No dance experience required. Students who took TDM149U are eligible to enroll. Students concentrating in Theater, Dance & Media or interested in developing a movement practice encouraged to enroll.

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

What are the similarities between Las Vegas pop diva concert design and performances at the Theater of Dionysus in 5th Century BCE Athens? How do theater architecture and design reflect changes in society? What is the process of designing an opera or a musical? This course will introduce students to some of the most influential 20th and 21st-century directors, designers, and performance artists. We will explore a range of artistic movements that cross-pollinated the visual arts and theater over the past century, and trace the artistic heritage of current theatrical experiments to their avant-garde roots. Examining how meaning in the theater is derived not only from text but also from spatial composition, light, and overall design concept, we will study a variety of approaches to storytelling in theater, dance, and opera. Working with primary sources in the Harvard Theatre Collection, students will develop and present short creative projects based on a wide range of theatrical texts. Students will also meet with guest artists to engage in a dialogue about contemporary design practices.

Foundations in Design: Scenography 1 (109545)

Dede Ayite

2021 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Great design for live performance requires synergy between all the key elements to unlock the visual power of a play. This course explores the fundamentals of set, costume, lighting and sound through critical texts and applied projects.

Students will be taught the fundamentals of design with an emphasis on script analysis, research and the articulation of a design concept through rendering, collage, model building with an introduction to basic drafting principles. The goal is for students to develop key skills for conceiving and designing visual elements for live performance. Students should not expect a technical survey, but rather an exploration of how visual elements shape a given performance.

Class Notes: **Course Preview Info Session: Thurs, Aug 26 at 10-10:30am.**

Please visit the Canvas course website for more information.

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Building on principles studied in Scenography I, this course continues the exploration of fundamentals of set, costume, lighting, and sound. Students will apply and build upon techniques and concepts learnt in Scenography I. The goal of this course is, through practice and feedback, for students to further their ability to design visual elements pertaining to live performance. This course provides the creative space to sharpen one's skills at script analysis, research, and model building. While prior attendance of Scenography I is not required in order to take this class, it is encouraged.

Live Art from Archival Subjects: Devised Theater Workshop (203537)

James Stanley

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

How can vinyl records, legal transcripts, classic movies, home recordings, 19th century burlesque routines, or old photographs become the raw materials for some of today's most compelling theater? And how do these works ask audiences to reconsider our inheritance of the past, creating a dialogue between the past and the present? This course focuses on theater-makers and processes of production that turn objects, archives and cultural data from the past into vibrant forms of contemporary performance. In the first half of the course, we will explore works by Tina Satter, Alison S. M. Kobayashi, Normandy Raven Sherwood, and Object Collection (among others), meet with these artists to discuss their processes, and take a deep dive into our own archives at the Harvard Libraries. Moving from theory to practice, we will then devise our own solo and collaborative works based on objects and artifacts of our choosing. This course is for writers, directors, designers and performers willing to work across disciplines.

Class Notes: **INFORMATION SESSIONS WILL BE HELD:**
Monday, August 23 @ 4pm (ET)
Thursday, August 26 @ 12pm (ET)
And by appointment: contact me at jamesstanley[at]fas.harvard.edu.

Playwriting: Ritual Practice and Curious Worlds (207819)

Phillip Howze

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

A play is a new world in and of itself. What sorts of strange, curious worlds are theater makers crafting today? What approaches are they taking to create these worlds?

In this new playwriting course we will explore both text and non-texts, the wild (as well as the conventional) to discover what drives contemporary plays, devised works, and performance today.

We will discuss the practices employed by various playwrights and directors—particularly women and artists of color—and try our own hand at some of these approaches. In addition, we will see live performances in realtime; engage special guest/visiting artists; collaborate with fellow classmates; and expand our curiosities.

Most importantly, we will write. This is an exploratory writing workshop with a focus on generating new material. By the end of the semester, you will have created a portfolio of new works, ideas, processes and rituals.

Class Notes: **Course Preview Period:**

Tues 8/24 at 10-11am

Wed 8/26 at 12-1pm

Playwriting: Intersecting Americas (211184)

Phillip Howze

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

"Look around, look around at how lucky we are to be alive right now!", exclaim The Schuyler Sisters in Lin-Manuel Miranda's HAMILTON. History is happening. This new writing workshop will engage what is happening and what has happened by examining texts, theater-making and live arts through the lens of singular periods in America's modern social history. We will explore form in frames of the twentieth century (for example, early AIDS-era) as well as in the contemporary moment (Black Lives Matter).

We will look primarily at writers of the Americas, but also beyond. We will write collisions and collusions, interrogating spaces across discipline and tradition. In addition to expanding our writing and reflective practice, we will undertake experiments in participation, spectatorship, and collaboration to question: how have theater makers been in conversation with their time and times?

Course Notes:

Though there is no prerequisite for this course, this is a complementary class that can be taken along with Playwriting: Ritual Practice and Curious Worlds (offered in the fall).

Performing for the Internet (219692)

Tania Bruguera

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 6

From the contemporary origins of the Internet in the 1960s, when government researchers created a way to share information between computers, to today's alternative digital life much has changed. While we

depend and obsess over a project developed originally by the Defense Department we are able to push and even change the culture around boundaries that were fought for decades with one self-made video. On January 1 of 1983 TCP/IP became a standard and with it a universal language was born. Has that language made us all generic subjects? Is the overload of information we are surrounded by erasing other spaces? are collective political projects displaced onto images? Are we avatars of our own consciousness? What is the state of truth in times when we have intimate relationship with technology? or is the internet dead?

Nah; or, gestures of resistance: Performance, Technology, and Refusal (216782)

chukwumaa --

E. Jane

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

With a focus on opacity, refusal, and other gestures of resistance, this studio course will be an experimental testing ground for performance art using new media. We will study performances that refuse, subvert, and question oppressive structures often using new media and technology and the strategies these performances deploy. Students will work intensively to create performance works using sound, video, installation, and networked media (including the internet). Students should be prepared to think critically about the works they produce and be able to articulate their goals for their work. This course will include readings, class dialogue, lectures, screenings, critiques, and performances. This course is being offered by the sound and performance art duo SCRAAATCH.

Recommended Prep:

Previous AFVS or TDM course experience helpful, but not required.

Theater 000 (216730)

Lex Brown

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 8

Theater 000 considers dramatic performance an essential human activity: an interpretive skill that can serve as entertainment, information sharing, or escape strategy. Under the continuously unusual circumstances of ambient disaster, we will delve into the creative process with a search for raw, poetic, and comedic experiences, to "touch reality" at a time when we need it the most. This course will help students unthink what they know about theatrical performance and strip it down to its most mobile and visceral parts.

Using a variety of techniques and prompts, we will devise theater from its most elemental parts – vocalization, light, and movement. Beginning with a piece made completely in darkness, students will progressively build toward a piece with light, sound, movement, music, set, etc. Our goal is to find the impact of the subtle gesture; develop specificity in word choice, movement, and timing; develop the storytelling voice; and build basic skills in performance documentation.

Preference will be given to students with performance/writing background who are looking for an opportunity to reconfigure their toolbag. All students must be ready to be open-minded and find the goodies that are just beyond their comfort zone.

PLEASE NOTE: Students must read Canvas site for Course Admission Instructions

Course Notes: **An additional individual/group working time will be determined after enrollment is determined.**

This course is taught by Harvard College Media Fellow Lex Brown.

Sonic Solos (219968)

Brian Quijada

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This class will explore how a range of sonic registers, including songs, music, and sound effects, can play a role in performance storytelling. Sonic Solos could be for the singer who wants to create a piece to match their unique voice, the spoken word artist who wants to work with sound, the composer with a sonic vision who would like to collaborate with a performer, or anyone interested in the relationship between sound and storytelling. We will use the fundamentals of looping technique and technology to understand the basic components of musical composition and sound design. In studying song structure in musical theater and pop music, we will learn how chords, melody, pitch, tempo, dynamic, and texture help support narrative. This class will culminate in a solo "sonic performance" project for which students will develop texts through mostly autobiographical prompts. No prior musical experience is required.

Class Notes: **This course will be taught by TDM Lecturer Brian Quijada**

Singer + Song = Story (215988)

Stew Stewart

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

COURSE DESCRIPTION(S)

1. Singer + Song = Story invites students to a new approach to musical theater making, one existing at the nexus of song, autobiography & myth.

2. Students will become acquainted with Stew's Tin Canon Alley, a "songbook of the streets", as touchstone for your songwriting work in the class. Blues, Punk, Hip-Hop and German Cabaret are just a few of the genres to be explored.

3. This course strives to inject a rough, personal intensity into ye olde show-tune. Students will learn how to build songs using gestures as well as chords, blurry images as well as beautiful melodies, while casting aside the pressures of proficiency, perfection and "how it's usually done."

4. The practice of pulling the bells & whistles of musical-theater down into the messy realm of the club stage will be taught and encouraged. Student lyrics drenched in doggerel or dream-logic can stand proudly alongside valiant efforts at Sondheimian "clarity."

5. This course seeks to physically connect musical theater to its creator in the way songs & paintings are inextricably linked to theirs. Students who prefer "their story" to "a story" and who desire to share the fire of that discovery, in song, should have a look in.

By examining the creative path of Stew's own autobiographically fictional theater work, along with his albums & lyrics, the student will learn methods designed to unlock the inner-voice, locate the songs within, and allow that which we shall call "theater" (or myth) to emerge.

Whether via the poetic panorama of spotty memory, the documentary facts of one's upbringing, or the schtick of having to lie a bit to tell the truth, this course believes that, through the careful balance of emotional & aesthetic truths, we can sing a myth more true than the truth.

Course Notes:

No musical experience is required for this course, however, a cheeky attitude towards the idea of proficiency will keep the downer of unhelpful self-criticism at bay. Also, I'll be cheering you on!

This is a show tune, but the show hasn't been written for it yet. (217583)

chukwumaa --

E. Jane

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course is a sound studio/workshop exploring the way sound communicates narrative, examining the way sound aids narrative in drama and beyond as well instances where artists and musicians have created music for imagined dramas or conceptualized a song or album as a drama, which is what Nina Simone is describing in the line from the song "Mississippi Goddam" from which the course title is derived. Students will listen to Orson Welles' 1938 radio drama "The War of the Worlds", watch films, listen to songs, albums and soundtracks, and create stand-alone compositions that function or are conceptualized as radio dramas and soundtracks. Students should be prepared to think critically and experimentally about sound and the work they produce and be able to articulate their process and goals for their work. This class will include projects, readings, screenings, listening sessions, discussions, and workshops.

Acting and Authenticity (156461)

David Levine

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 14

This studio-based seminar examines the concept of "building a character" and pushes it to its limits. While acquiring Stanislavski- and Method-based acting techniques, students will also consider psychological realism in light of philosophical, psychological, sociological and scientific notions of authenticity and falsehood, presence, mimesis, identity, and empathy. What does it mean to be "authentic?" Can you ever truly understand another person, or turn into one? What does "realist acting" mean in an age of AI, social media, motion capture, cultural appropriation, and fluid identities? Whose realism are we talking about?

The seminar involves readings, films, and intensive acting work, and culminates in a final project where participants turn into each other.

Theater, Dance & Media 180B

Art for the not yet and the yet to be (218946)

Tania Bruguera

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Recent events have brought some doubt on concepts of conviviality and community we've taken for granted. Imagining the future has become a harder task and, planning for it an unpredictable road. We will be looking for a critical methodology of hope to question the present and open up to a future. This studio class focus on non-western conceptions of society, from Latin American tradition, Afrofuturism and Aboriginal critical theory. We will use digital, analog and live art formats to extract ways to generate social involvement and commitment to living together.

Conceived as a prefgurative social space, Art will be giving us tools not only to imagine but to temporarily enact a concept of "togetherness" we would like to live in. Proposed actions will be guided by values rather than instrumental efficiency with the aim to develop counterhegemonic spaces and modes of interaction that embody the desired transformation we seek. We will try the relationship between technologies and narration.

Socially engaged art as well as political art is mostly seeing as a reactive activity, one where you respond rather than prevent. Art for the not yet and the yet to come, tries to understand the system that generates that which is socially inadequate for us. Predicting what would be the next logical step of such system will give us the context for the artwork we will create.

Theater, Dance & Media 181B

Street Dance Activism: Co-choreographic Praxis as Activism (217409)

Shamell Bell

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

In this participatory hybrid course, we explore the creation and implementation of *Street Dance Activism* as a *Co-choreographic* somatic[1] healing modality, and form of spiritual transcendence, through participating in the *Global Dance Meditation for Black Liberation* and deeply engaging with *The Ritual of Breath is the Rite to Resist*[2]. Street Dance Activism's *28 Day Global Dance Meditation* features embodied meditation &

movement sessions led by Black, Indigenous, People of Color + Queer guides from multiple wisdom traditions and healing practices. It takes 28 days to change a habit, so imagine if we took 28 days to focus on our liberation. Liberation not only as a single entity, but as a global, collective consciousness. Black liberation is your liberation, and your liberation is Black liberation.

This interdisciplinary course uses somatic practices to engage with the historical context and legacy of public rituals of extreme violence against Black people as both sites of anti-Black state, and non-state sanctioned disciplinary projects, as well as time-spaces of radical resistance. At the center of these forms of violence are the control of *breath* as life force, and as a sign of freedom. We discuss the past, present, and future all occurring in the now as we examine the murder of George Floyd in May 2020 as an officer pressed his knee against Floyd's neck for nearly eight minutes as Floyd repeatedly lamented that he could not *breathe.*

We explore theories of ritual and performance to understand how artists and communities come together as collectives to contextualize and re-present impossible terrors. Artists and grassroots organizers use aesthetics and collective action to transform the horror of being subject to violence at any moment into rituals of *breath* and potential social transformation. This course then teaches students theories of ritual and performance as ways that communities have historically engaged and confronted histories of anti-Black violence in order to conceive of new future possibilities to embody liberation in the face of disciplinary actions meant to contain and choke Black people. It is my intent for us to become guides to bring social activists into the classroom and the pedagogy out into the streets.

Black Arts Movement to #blacklivesmatter (217585)

Shamell Bell

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course situates the "Black Arts Movement"(1965-1975) in its historical context, but also places our explorations in this present moment where artists continue to light the torch of art reflecting the times, as our ancestor Nina Simone so eloquently asserts as "our duty". Scholar Larry Neal writes in his seminal piece:

> **" The Black Arts Movement is radically opposed to any concept of the artist that alienates him from his community. This movement is the aesthetic and spiritual sister of the Black Power concept. As such, it envisions an art that speaks directly to the needs and aspirations of Black America."**

As this course begins during the celebration of Dr. Martin Luther King Jr.'s birthday, let's place MLK in the context of the material conditions in Black communities during the Black Arts Movement, which Larry Neal coined as the "aesthetic and spiritual sister of Black Power." This act is often seen as the starting point of

the Black Arts Movement. In a Time article, "A Riot Started in Newark 50 Years Ago. It Shouldn't Have Been a Surprise," Arica L. Coleman writes, "Martin Luther King Jr. aptly predicted just such a riot in a speech titled "The Other America," which he delivered at Stanford University on April 14, 1967, three months prior to the unrest. "All of our cities are potentially powder kegs," he said. While King maintained his commitment to nonviolent civil disobedience, he also recognized the psychology of oppression.

In this course, we will explore the legacy of the Black Arts Movement and its manifestations in today's Black liberation movement. In addition to required and suggested readings, we will supplement course lectures with selected films and musical selections. This course takes an ethnographic and interdisciplinary approach to mapping the historical, geographical, and socio-political trajectory of the Black Arts Movement to #blacklivesmatter by highlighting the motivations, strategies, and experiences of community organizers on the ground. The narratives of grassroots organizers from groups such as Justice 4 Trayvon Martin and those organizing for #blacklivesmatter across the United States, will provide nuance to our understanding of an international movement that we now know as Black Lives Matter. Students will be encouraged to explore their own foundations and personal stories connecting them to the Black liberation struggle past, present, and future. The course culminates with a "Community Gathering" that will feature short student documentaries of their group projects. The gathering will include a collaboration with Dartmouth Students, activists on the ground, and community members to continue to move the work of the people on the ground forward, and the work of the students outside of the classroom, and into the community.

The School of Arte Útil (218947)

Tania Bruguera

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Arte Útil is an ongoing project since 2013. Whether through self-organized groups, individual initiatives, or the rise of user-generated content, people are developing new methods and social formations to deal with issues that were once the domain of the state. These initiatives are not isolated incidents, but also part of an art history that has been neglected, yet shapes our contemporary world. This class will introduce the concept of Arte Útil, which roughly translates into English as "useful art" while also suggesting that art can be a tool or device. Studying the shifting roles of contemporary art, the class will consider factors of the practice of Arte Útil such as institutional self-criticism, active hyperrealism, a-legality, reforming capital, beneficial outcomes, sustainability, intersection with other disciplines, and modes of creative collaboration. The course will include case study presentations drawn from the Arte Útil archive and lexicon, and fieldwork to connect with relevant projects and sites in the area (this TBD).

Students will be expected to participate in classroom discussions and critiques, do the required readings, and generate a new project proposal during the final weeks of the course. Every student is expected to propose a final project.

Protocols as Performance (219748)

Tania Bruguera

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 6

Socially Engaged Art is a practice coming from performance, installation, theater, and social theory. In it, one can find an environment where different interests coincide, from art to activism, from public policy to urban planning, from political agendas to healing activities, from institutional critique to community art, from identity politics to social architecture. While the community working on this practice has agreed over the years on several ethical guidelines, each case needs to be analyzed in relationship with the cultural and political context where it is developed. Its creation is shaped by its reception.

Does Socially Engaged Art propose new systems of cooperation? The generation of an alternative social production? A scored collective performance? Is it created by working about, with or for a specific constituency? Are audiences transformed into participants, members, or active citizens? Does this practice seek to change reality or show it? What is the right scale for such a project? Are these projects taken from or given to the communities? How are they started and how do they come to an end? What is their appropriate duration? Can a project mutate, be replicated, or appropriated by others?

This genre not only puts into question several assertions overlooked in the conventional practice of Art but also puts the role of the artist into question. What is assumed as proprietary in art, theater and social science in Socially Engaged Art is owed by all. Often, the artist's presence, even when it may create the first intervention, weakens over time in a direct relationship with the growth of the new community that the project enhances. Coauthored aesthetic experiences help us rethink the idea of collective creativity and what is the pertinence of the performative. It is also conceptually important to consider what channels are going to be built to collaborate with institutions. While Socially Engaged Art is created in the public sphere it is not necessarily Public Art as monuments and cultural entertainment are. The allies in each project are not defined by automatic assumptions but by building mutual trust whether at an institutional or personal level.

The Power and Relevance of the American Musical: 1776 and Other Musicals (205365)

Ryan McKittrick

Diane Paulus

Jeffrey Page

2022 Spring (4 Credits)		**Schedule:**	W 1200 PM - 0245 PM
Instructor Permissions:	Instructor	**Enrollment Cap:**	20

With a focus on the American Repertory Theater's upcoming revival production of the musical *1776* co-directed by Jeffrey Page and Diane Paulus, this course examines how the musical theater can uniquely and powerfully inspire audiences to reflect on history, politics, race, and identity.

Analyzing scenes and songs from 1776 and other musicals including *West Side Story*, *Cabaret*, *Hair*, *The Wiz*, *Dreamgirls*, *Hamilton*, and *Jagged Little Pill*, students will explore the multiple layers of meaning created by the combination of music, lyrics, choreography, staging, book scenes and design.

Students will read works by theorists, historians and practitioners, examining the cultural significance of these shows in the years they opened on Broadway, how they have evolved in revivals and adaptations over time, and how they resonate today. In addition, students will travel to New York City to attend a rehearsal of *1776* and see *Jagged Little Pill*.

Course Notes:

This course will take place from 12-2pm ET.

Ukrainian Studies 200B

Ukrainian Studies: Seminar (159859)

Serhii Plokhii

Michael Flier

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Interdisciplinary seminar in Ukrainian studies with broad regional and comparative perspective. Faculty and invited scholars discuss a variety of topics in the humanities and social sciences. Background readings and follow-up discussions help students put the specific lectures in broader context. Students also conduct an individually tailored reading and research project under the guidance of a faculty advisor and in consultation with other resident specialists. Part two of a two part series.

Women, Gender & Sexuality 98S

Tutorial - Junior Year: Research and Methods (122980)

Durba Mitra

2022 Spring (4 Credits) **Schedule:** M 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

In Junior Tutorial, students develop key research and writing skills necessary to write a junior research paper. We will read a range of texts that engage diverse methods in the fields of women's, gender, and sexuality studies. Together, we will learn about methods and questions that form feminist engagements with archival research, literary and cultural studies, ethnography, quantitative and survey-based social science, and the sciences. Students will learn and engage with key methods across the humanities and social sciences through readings and engage practice in the classroom. Students will meet in small groups with their designated tutor who will guide them through research and writing on the particular topic of their interest. Over the course the semester, students will develop a research project in a focused area based in a clear and concise research question. Students will develop research projects, produce an annotated bibliography with primary and secondary sources, and will produce a final polished research paper by the end of the semester. This course is required of all Honors concentrators in WGS in their junior year.

Beyond the Sound Bite: Women, Gender, and Sexuality in The Daily News (108619)

Alice Jardine

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

We are bombarded by sound bites from all over the globe, moving at disorienting speeds, reorganizing our relationship to time and space with increasingly dystopic results. This course will focus on selected televisual and digital events in "real time" from September-December 2021. We will analyze the embedded bits of gender and sexuality always at work in the representations of those events. Topics include: politics, the environment, military adventures, and popular revolt in dialogue with important texts in WGS Studies.

Course Notes:

Weekly lecture and a one hour section to be arranged.

Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)

Eleanor Craig

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we ask, the information that counts as data, and the genres of work that we recognize as 'academic'?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with ethnic studies, it aims to serve as a 'Theories and Methods' course, providing tools and strategies for refining one's own interdisciplinary inquiries.

Course Notes:

Weekly lectures and a one hour section to be arranged.

Synchronous attendance is expected. The class will not be recorded.

Sex, Gender, and Afrofuturism (212895)

Robert Reid-Pharr

2022 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The explosion of interest in Afrofuturism in the last two decades speaks to an ever more urgent desire to understand how people of color project themselves into narratives of both the future—and the past. Moreover, the work of Afrofuturist intellectuals has been profoundly concerned with matters of gender and sexuality. Indeed, examinations of inter-racial and inter-species "mixing," alternative family and community structure, and disruptions of gender binaries have been central to Afrofuturist thought. In this course we will examine these ideas both historically and aesthetically, asking how the large interest in Afrofuturism developed from the early part of the twentieth century until now. Focusing primarily on science fiction and fantasy literature, the course will treat a broad range of artists including, W.E.B. DuBois, George Schulyer, Marlon James, Octavia Butler, Andrea Hairston; Nalo Hopkinson; N.K. Jemisin, Nnedi Okorafor, and others.

Women, Gender & Sexuality 1209

Dangerous Words: Feminist Debates on Speech, Harm, and Representation (218527)

C. Wells (they/she)

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

What does it mean to strike a balance between the democratic foundations of freedom of speech and rights of marginalized peoples to resist the subordinating words of the privileged? This course examines key debates in feminism, speech, and representation. Topics include pornography, cancel culture, trigger warnings, hate speech, slurs, and cultural appropriation. We will begin by orienting ourselves to the legal frameworks in the North America and Europe context around freedom of speech before turning to intersectional feminist, philosophical and critical theories analyzing the impacts of linguistic violence on our democratic ideals and political discourse. Our goal is to use an interdisciplinary feminist lens to unpack the civic foundations of our democracy and interrogate the ethical obligations we have to resist the subordinating normative forces producing inequality in our society. No philosophical or legal background is assumed prior to enrollment.

Feminist Theory as Critique (142819)

Afsaneh Najmabadi

2021 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course begins with feminist critical engagements with other theories and practices, including Marxism, psychoanalysis, and Foucault. It will then move on to debates and discussions within feminism, as well as intersections of feminist theory with other theories including sexualities studies, post-colonial/trans-national studies, transgender studies. One of the major concerns of the course is the relationship between feminism, theory, and politics. Throughout the course, we will discuss the contemporaneous movements that intersected with emergence of these theoretical concerns.

Course Notes:

Synchronous attendance is required; class meetings will not be recorded.

This course fulfills the theory requirement for the undergraduate concentration in Studies of Women, Gender, and Sexuality.

Psychology of the Gendered Body (205489)

Nicole Noll

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 14

Our perceptions of gender—our own and others'— shape our embodied experiences and behaviors. This course examines the embodiment of gender via the lens of psychological science. We will begin by exploring recent research related to gender and the body, and then study the underlying psychological mechanisms that influence our self-perceptions about gender. Our disciplinary foundation in psychological science will allow us to complicate current understandings of gender and embodiment by considering factors such as sex, race, sexuality, experience, intention, and awareness.

Course Notes:

Synchronous attendance required. Class meetings will not be recorded.

Leaning In, Hooking Up: Visions of Feminism and Femininity in the 21st Century (159887)

Phyllis Thompson

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 60

What does it mean to "do" feminism, or to "be" a feminist in the 21st-century United States? What can we make of the dominant social expectations for a woman's life? This course explores contemporary ideals of feminine success, including their physical, familial, professional, and political manifestations. We will engage with highly-contested topics—including sexual violence and Title 9; work-life balance; the imperatives of self-care and presentation; and new models for sexuality, reproduction, family, motherhood, and domestic life—using the tools of theory and cultural studies to interrogate their framing within popular discourse. Throughout, we will critique ideological formations of gender, particularly as bounded by race, class, and sexuality.

Course Notes:

Weekly lecture plus an additional one hour section to be arranged.

Gender, Race, and Poverty in the United States (207786)

Marya Mtshali

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course investigates the realities of poverty through an intersectional lens, meaning that we will consider the simultaneous impact of race, gender, sexuality (and other identities) on economic insecurity. In what ways are conversations about poverty and its causes infused with assumptions and stereotypes related to gender, race, and sexuality? We hear so much in the media about what causes poverty – what is reality and what is myth? How do these myths operate to reinforce and sustain economic inequality? Who and what gets left out of the conversation about poverty? Topics in the course include historical understandings of poverty; intergenerational class mobility; depictions of poverty in pop culture; and bringing attention to populations that often get left out of mainstream conversations about poverty.

Course Notes:

Weekly lecture plus an additional one hour section to be arranged.

Synchronous attendance required. Class meetings will not be recorded.

Love's Labors Found: Uncovering Histories of Emotional Labor (207804)

Caroline Light

2021 Fall (4 Credits) **Schedule:** R 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

How do love, care, and desire influence the value of work, and why is emotional labor – which is vital to child or elder care, domestic labor, nursing, teaching, and sex work – often considered to be something other than work? How and why do the racial and gender identities of workers affect the economic, social, and emotional value of their labor? How do political and social arrangements of labor help produce and reinforce racial categories while solidifying the boundaries separating masculinity and femininity? Through a mix of primary and secondary sources, this seminar explores histories of emotional labor and the power structures that give meaning to often taken-for-granted categories of work. These sometimes hidden

histories are key to untangling the gender, sexual, and racial implications of the "intimate industries" that populate today's transnational labor economies.

Course Notes:

This course, when taken for a letter grade, counts as a portal course for the secondary field in Ethnicity, Migration, Rights (EMR).

Synchronous attendance required. Class meetings will not be recorded.

Indigenous Feminisms: Environmental Justice and Resistance (219674)

Rebecca Hogue

2022 Spring (4 Credits) **Schedule:** R 1200 PM - 0230 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course will introduce key concepts, methodologies, and arts from Indigenous feminist perspectives on environmental justice. To do this, we will examine five 21st century Indigenous environmental justice case studies from Turtle Island (North America) and Oceania: Idle No More, Mauna Kea, Sogorea Te', Standing Rock, and the Pacific Climate Warriors. Together we will explore critical theorizations that attend to a range of contemporary issues influencing Indigenous feminist thought today: land, water, and ecology; ceremony and genealogy; healing and care work; science and medicine; reparations and justice. Course texts will include film, podcasts, poetry, visual arts, essays, and more from Indigenous womxn and Two-spirit scholars, artists, and activists.

Friendship as Way of Life (212892)

Afsaneh Najmabadi

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course will begin with Foucault's essay, "Friendship as a Way of Life." It will discuss the contemporary context of new engagements with and interests in friendship. We will then look at differing concepts and practices of friendship, and their work in shaping social sentiments and political affects in Euro-American

context. Readings will include Plato, Montaigne, Bray, Marcus, Foucault, and Miller.

Medical Management of the Female Body (126957)

Sarah Richardson

2021 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course examines how Western medical knowledge, practices, and institutions define female health and normality and manage diseased and gender-variant female bodies. How, for instance, does medicine conceive of the female body as a medical problem or mystery and how do race, class, and sexuality inflect these conceptions? Topics include: "female maladies," medicalization of childbirth and the pregnant body, medical management of transgender and intersexed bodies, ideals of fitness, cosmetic surgery, disability, and pharmaceutical marketing.

Feminist Ecologies and Economies (219675)

Katherine Gibson

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Why is it easier to imagine the end of the world than the end of capitalism? As we witness the effects of global warming, species loss, economic inequality, and gendered and racialized violence, it is indeed hard to imagine that other worlds are possible. There is no better time to focus on the generative impacts of feminist praxis. This course examines the work of feminist scientists and indigenous elders who have reshaped approaches to environmental toxicity, climate change, and ecological degradation. We will study the work of feminists who have put domestic labor, reproduction, and care on the national policy agenda while challenging economic frameworks that privilege markets and growth. We will use feminist and decolonial tools to destabilize patriarchal notions of "mastery" and "domination" over the natural and social world. We will explore the strategies that working class women, diasporic Black communities and

rural women all over the world have used to build dignified livelihoods. Finally, we will identify what can be done in our own lives to repair ecologies and build ethical economies centered on care.

Women, Gender & Sexuality 3010A

Supervised Reading and Research-GenderSci Lab. Part one of a two-part series. (213359)

Sarah Richardson

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 20

The GenderSci Lab supports graduate students working at the intersection of the sciences and gender studies. The lab offers interdisciplinary training in theories and methods for the critical intersectional study of sex/gender in biology, medicine, public health, and the social sciences. Students participate in collaborative research, contribute to peer-reviewed publications, and engage in public outreach.

Course Notes:

Contact the WGS Director of Graduate Studies for application information. Approval is required prior to registration.

The GenderSci Lab is a year-long commitment. Students are expected to enroll in 3010a and 3010b in the same academic year.

Additional Course Attributes:

Attribute	Value(s)
FAS Course Roll	FAS Course Roll
FAS Divisional Distribution	Social Sciences
Full Year Course	Divisible Course
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO

Women, Gender & Sexuality 3010B

Supervised Reading and Research-GenderSci Lab. Part two of a two-part series. (213360)
