Engineering Sciences 100HFA

Engineering Design Projects (144350)

Frank Keutsch

2021 Fall (2 Credits) **Schedule:** R 0345 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Individual engineering design projects which demonstrate mastery of engineering knowledge and techniques. Each student will pursue an appropriate capstone project which involves both engineering design and quantitative analysis. This culminates in a final oral presentation and final report/thesis. Students must complete both parts of this course, fall and spring, in order to receive credit.

Course Notes:

Ordinarily taken in the senior year. Students are expected to have an approved project submitted to the course before May 1 in the spring semester preceding actual enrollment. Formal project approval rests with the project advisor and the ES100 teaching staff. The course includes weekly required lectures at the time listed above (fall only) and weekly section (fall and spring).

Requirements: **Pre-Requisite: ENG-SCI 96 OR ENG-SCI 227**

Additional Course Attributes:

Engineering Sciences 111

Introduction to Scientific Computing (156287)

Dina Obeid

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Many science and engineering problems don't have simple analytical solutions or even accurate analytical approximations. Scientific computing can address certain of these problems successfully, providing unique insight. This course introduces some of the widely used techniques in scientific computing through examples chosen from physics, chemistry, biology, computer science and other fields. The purpose of the course is to introduce methods that are useful in applications and research and to give the students hands-on experience with these methods. The main programming language will be Python.

Course Notes:

Engineering Sciences 111 is also offered as Applied Mathematics 111. Students may not take both for credit. Undergraduate Engineering Students should enroll in Engineering Sciences 111.

Recommended Prep:

Applied Mathematics 21a and 21b, or Mathematics 21a and 21b, or permission of instructor.

Engineering Sciences 112

Thermodynamics by Case Study (160454)

Scot Martin

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0100 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

Fundamental concepts and formalisms of conservation of energy and increase of entropy as applied to natural and engineered environmental and biological systems. Pedagogical approach is to start with real-world observations and applications, extracting the underlying fundamentals of thermodynamics from these.

Course Notes:

ES 112 is also offered as EPS 112. Students may not take both for credit. Undergraduate engineering students should enroll in ES 112. Total class capacity of 18 includes students in both ES 112 and EPS 112.

Class Notes:

Meets on Monday and Wednesday from 12pm to 12:50pm for all 18 students. Also meets on Friday in one of two separate 50-min blocks of 9 students for discussion. Friday meeting times will be determined according to enrolled students' availability. Please see course page for lottery instructions.

Engineering Sciences 115

Mathematical Modeling (156427)

Zhiming Kuang

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

Abstracting the essential components and mechanisms from a natural system to produce a mathematical model, which can be analyzed with a variety of formal mathematical methods, is perhaps the most important, but least understood, task in applied mathematics. This course approaches a number of problems without the prejudice of trying to apply a particular method of solution. Topics drawn from biology, economics, engineering, physical and social sciences.

Course Notes:

Engineering Sciences 115 is also offered as Applied Mathematics 115. Students may not take both for credit. Undergraduate Engineering Students should enroll in Engineering Sciences 115.

Recommended Prep:

Prerequisite: Applied Mathematics 21a and 21b, or Mathematics 21a and 21b or permission of instructor. Taking APMTH 105 OR APMTH 108 OR APMTH 104 OR MATH 112 OR STAT 110 before taking APMTH 115 is recommended but not required.

Engineering Sciences 120

Introduction to the Mechanics of Solids (131270)

Buse Aktas

2022 Spring (4 Credits) **Schedule:** TR 0215 PM - 0330 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A first course in the mechanical sciences which introduces elements of continuum mechanics and explains how materials and structures stretch, bend, twist, shake, buckle, and break. Stress-strain behavior of materials. Statically determinate and indeterminate structures. Stress and strain, equations of motion or equilibrium, strain-displacement relations. Torsion. Beam theory with applications to beam deflections, vibrations, and buckling. Three laboratory sessions required.

Recommended Prep:

Applied Physics 50a, Physical Sciences 12a, or 15a and Applied

Mathematics 21a or Mathematics 21a (previously) and Applied Mathematics 21b or Mathematics 21b (previously or concurrently).

Requirements: **Prerequisite: Math 21a (or equivalent); and Physical Sciences 12a, Physics 15a, or Applied Physics 50a; AND Co-requisite: Math 21b (or equivalent)**

Additional Course Attributes:

Attribute	Value(s)

Engineering Sciences 121

Introduction to Optimization: Models and Methods (156288)

Margo Levine

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to basic mathematical ideas and computational methods for solving deterministic optimization problems. Topics covered: linear programming, integer programming, branch-and-bound, branch-and-cut. Emphasis on modeling. Examples from business, society, engineering, sports, e-commerce. Exercises in AMPL, complemented by Mathematica or Matlab.

Course Notes:

Engineering Sciences 121 is also offered as Applied Mathematics 121. Students may not take both for credit. Undergraduate Engineering Students should enroll in Engineering Sciences 121.

Recommended Prep:

Applied Mathematics 21b or Mathematics 21b (linear algebra) or equivalent preparation in linear algebra.

Engineering Sciences 125

Mechanical Systems (144157)

Boris Kozinsky

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Modeling and analysis of mechanical systems. Topics include 3D rigid body dynamics, resonance, damping, frequency response, Laplace transform methods, Lagrange's equations, multiple degree-of-freedom systems and an introduction to control and continuous systems. Analytical modeling will be supplemented with numerical simulations and lab experiments. Laboratory exercises will explore vibration, and stabilization using data acquisition systems.

Requirements: **Prerequisite: Math 21a and 21b (or equivalents); and Physical Sciences 12a (or equivalent)**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Final Assessment Category	Three-hour Exam

Engineering Sciences 139

Innovation in Science and Engineering: Conference Course (118939)

David Weitz

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Explores factors and conditions contributing to innovation in science and engineering; how important problems are found, defined, and solved; roles of teamwork and creativity; and applications of these methods to other endeavors. Students receive practical and professional training in techniques to define and solve problems, and in brainstorming and other individual and team approaches.

Course Notes:

Offered jointly with the Design School as SCI-6272. Taught through a combination of lectures, discussions, and exercises led by innovators in science, engineering, arts, and business.

Requirements: **Anti-Req: May not be taken for credit if ENG-SCI 239 already complete**

Additional Course Attributes:

Engineering Sciences 152

Circuits, Devices, and Transduction (207597)

Gage Hills

Woodward Yang

2021 Fall (4 Credits) **Schedule:** MW 0215 PM - 0330 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces the fundamentals of circuit theory for the analysis of electrical circuits and the fundamentals of semiconductor devices for the understanding of transistors circuits and other useful actuators and sensors (i.e., transducers). Building on the principles from these two core fundamental areas of electrical engineering, the analog behavior of electronic circuits and physical devices will be modelled, analyzed, and applied. Lab assignments will focus on the design, implementation, and measurement of analog electronic circuits using real electrical components which interface to the physical world. This course complements and forms the basis for many of the abstractions that are used in digital computing systems such as in COMPSCI 141, COMPSCI 146, and COMPSCI 148.

Requirements: **Prerequisite: Math 1a and 1b; AND Co-requisite: Physical Sciences 12b or Physics15b or Applied Physics 50b**

Additional Course Attributes:

Engineering Sciences 155

Systems and Control (207626)

Yue Lu

2021 Fall (4 Credits) **Schedule:** MW 1245 PM - 0200 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course and its follow-on course ENG-SCI 156 concern the fundamentals of information systems in the real world. Together they provide a comprehensive foundation in signal processing, systems design and analysis, control, and communications, while also introducing key linear-algebraic concepts in the context of authentic applications. The first course, ENG-SCI 155, focuses on the basic principles of feedback and its use as a tool for inferring and/or altering the dynamics of systems under uncertainty. Topics include linear algebra, the elemental representations of dynamic systems, stability analysis, the design of estimators (e. g., Kalman Filter) and feedback controllers (e.g., PID and Optimal Controller). The class includes both the practical and theoretical aspects of the topic.

Recommended Prep:

Applied math 21a, b or Math 21a, b or equivalent are encouraged to be taken concurrently but not required. Additional sections and materials of linear algebra will be provided in the course.

Requirements: **Prerequisite: Math 1a and Math 1b**

Additional Course Attributes:

Attribute	Value(s)

Engineering Sciences 156

Signals and Communications (148148)

Todd Zickler

2022 Spring (4 Credits) **Schedule:** TR 1115 AM - 1230 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is a follow-on to ENG-SCI 155 and continues to develop the fundamentals of information systems in the real world. It focuses on the analysis and manipulation of signals in the time and frequency domains in the context of authentic applications. Topics include: the sampling theorem, convolution, and linear input-output systems in continuous and discrete time. Further, students are introduced to transforms—including Fourier, discrete cosine, wavelet, and PCA / SVD 'transforms'—that map between vector spaces via matrix multiplication as a method to ease analysis provided conditionalized knowledge. Randomness, noise, and filtering. Waves and interference in the context of communications; antennae, phasors, modulation, multiplexing. Applications in communications and data science.

Recommended Prep: **Applied Mathematics 21b or Mathematics 21b.**

Requirements: **Prerequisite: Math 21a and Math 21b (or equivalents), or Applied Math 22a**

Additional Course Attributes:

Engineering Sciences 157

Biological Signal Processing (109358)

Demba Ba

2021 Fall (4 Credits) **Schedule:** TR 1115 AM - 1230 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This is the first course on Biological Signal Processing, the science of collection, representation, manipulation, transformation, storing of biological signals, and the use of modern scientific computing tools (Python, Jupyter notebooks) to interpret biological signals and tell engaging and informative stories using biological data. The signals of interest can be deterministic, semi-periodic, transient, random, stationary, non-stationary, etc., depending on their source and generation mechanism. We will use EEG, EKG, temperature data, neural spiking data, and data from Covid-19 as examples. Our focus will be on foundational signal processing concepts that can be applied in a variety of biological applications. Examples include the Fourier Transform, Principal Component Analysis, Clustering, etc. Applications include those to patient monitoring, diagnostics, patient prognostics, online monitoring, and the computation of wellness measures. For many of us, one frustrating aspect of Covid-19 is our inability to understand figures that are reported, such as infection rates and numbers. We will introduce you to a powerful suite of mathematical and scientific computing tools will enable you to evaluate and make decisions based on evidence and data.

Recommended Prep:

It is helpful, but not necessary, for students to have taken Engineering Sciences 150 or 156 prior to Engineering Sciences 157.

Requirements: **Prerequisite: Math 21a and Math 21b (or equivalents)**

Additional Course Attributes:

Engineering Sciences 159

Introduction to Robotics (131554)

Justin Werfel

2021 Fall (4 Credits) **Schedule:** MW 0345 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to computer-controlled robotic manipulators. Topics include coordinate frames and transformations, forward and inverse kinematic solutions to open-chain manipulators, the Jacobian, dynamics and control, and motion planning. In addition, special topics will be introduced such as computer vision, soft robotics, surgical robots, MEMS and microrobotics, and biomimetic systems. Laboratory exercises will provide experience with industrial robot programming and robot simulation and control.

Course Notes:

Eng-Sci 159 is also listed as Eng-Sci 259. Students may not take both for credit. Graduate students must enroll in 259. The material in 259 is the same as in 159, but with additional problems on the problem sets and a final project.

Recommended Prep:

Engineering Sciences 125; MATLAB experience.

Requirements: **Prerequisite: Either PHYSCI 12a, or both Physics 15a and CS 50**

Engineering Sciences 177

Microfabrication Laboratory (109356)

Marko Loncar

Evelyn Hu

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 20

The course provides introduction to micro- and nano-fabrication processes used to realize photonic, electronic and mechanical devices. Lectures will introduce the state-of-the-art semiconductor fabrication processes, including lithography, deposition of metals and dielectrics, etching, oxidation, implantation, and diffusion of dopants. The fabrication component of the course will be carried out in a state-of-the-art cleanroom in the Center for Nanoscale Systems, where students will fabricate several electronic and photonic devices, including transistors, light-emitting diodes (LEDs), lasers and optical resonators. Device characterization will be performed in a state-of-the-art teaching labs in SEC in Allston.

Course Notes:

Course also includes a 4-hour lab session each week.

Class Notes: **ES 177/277 is a laboratory course that emphasizes hands-on device fabrication and testing. In this "transition year", we will be depending on the facilities of the Center for Nanoscale Systems (CNS), which also serves as a Research "Cleanroom". Because of the limitations of access to CNS, working under conditions that hope to avoid spread of COVID, the course this semester is subject to a CAP OF 20 STUDENTS.**

Your answers to the questionnaire will help us to make the fairest selection possible, in case there are more than 20 students who wish to take the course this spring. Please submit your questionnaire to us before January 19th, so we can inform you about acceptance to the course in a timely way.

Recommended Prep:

(Applied Physics 50a or Physical Sciences 12a or Physics 15a) AND (Applied Physics 50b OR Physical Sciences 12b OR Physics 15b)

Engineering Thermodynamics (135598)

Aidin Panahi

2021 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to classical engineering thermodynamics. Topics: Zeroth Law and temperature. Properties of single-component gases, liquids, and solids. Equations of state for ideal and simple nonideal substances. First Law, heat and heat transfer, work, internal energy, enthalpy. Second Law, Third Law, entropy, free energy, exergy. Heat engines and important engineering applications such as refrigerators, power cycles. Properties and simple models of solutions. Phase and chemical equilibrium in multicomponent systems; chemical potential. Electrochemistry, batteries, fuel cells. Laboratory included.

Recommended Prep: **High School AP Chemistry or higher**

Requirements: **Prerequisite: Physical Sciences 12a, Physics 15a, or Applied Physics 50a**

Engineering Sciences 183

Introduction to Heat Transfer (108871)

Frans Spaepen

2022 Spring (4 Credits) **Schedule:** TR 1115 AM - 1230 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The macroscopic description of the fundamentals of heat transfer and their application to practical problems in energy conversion, electronics and living systems with an emphasis on developing a physical and analytical understanding of conductive, convective and radiative heat transfer. Emphasis will be given to problem solving skills based on applying governing principles, mathematical models and physical

intuition.

Topics include: steady state heat conduction in 1, 2 and 3D; transient heat conduction in 1D and 3D; introduction to convective heat transfer, forced convection as well as free convection; heat exchange analysis and design; elements of radiative heat transfer. There will be an emphasis on physical basis of heat transfer with mathematical description where appropriate, as well as using commercially available computer COMSOL software. Course includes (i) classes and problem sets, (ii) COMSOL simulations and (iii) a semester-long, multi-disciplinary team project.

Requirements: **Prerequisite: (Applied Math 21a or Math 21a or equivalent) AND (Applied Math 21b or Math 21b or equivalent) AND (APPHY 50a or PHYSCI 12a or Physics 15a)**

Materials Selection and Design (216405)

David Clarke

2021 Fall (4 Credits) **Schedule:** TR 1245 PM - 0200 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The repertory of materials available to engineers today and embodied in engineering systems includes tens of thousands of different materials, as well as naturally occurring ones. This course addresses why specific materials are selected for particular applications and the rational basis for their selection. The course is intended to serve as an introduction to the principles and methodology of selecting materials for engineering components based on the functionality and purpose of the component in different system applications and operating environments. The selection specification includes satisfying a variety of objectives, such as minimizing weight, cost (financial as well as environmental), end of life recycling and material scarcity.

Interplay between Control and Learning (143872)

Na Li

2022 Spring (4 Credits) **Schedule:** MW 0945 AM - 1100 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This advanced graduate course will provide students with an introduction to current areas of research at the intersection of control and machine learning. The course will firstly focus on tailoring control tools to study algorithms in large-scale optimization and machine learning. Then students will study how to combine reinforcement learning and model-based control methods for control design problems. Examples of topics include: first-order and zeroth-order optimization; dissipation inequality; stability of dynamical systems and Lyapunov functions; LMI (Linear Matrix Inequality); robust control; model predictive control, adaptive control; MDP and reinforcement learning; control-oriented analysis tools for temporal difference learning and Q-learning; sample complexity; policy gradient and policy optimization; uncertainty quantification and safe learning; iterative learning control; regularization of model-free control via prior model-based design; and multiagent reinforcement learning.

Course Notes: **This is an advanced theory-intensive course. Open to advanced undergraduate students with permission of the instructor. Engineering Sciences 203 is also offered as Applied Mathematics 233. Students may not take both for credit.**

Recommended Prep: **Optimization (AM/ES 121 or more advanced courses) and probability (ES 150 or Stat 110 or more advanced) are required. ES 202/AM 232 or equivalent is strongly recommended.**

Requirements: **Graduate Students Only (Undergraduates can submit a request to enroll)**

Advanced Cellular Engineering (114808)

Kit Parker

2021 Fall (4 Credits) **Schedule:** TR 1115 AM - 1230 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This is a combined introductory graduate/upper-level undergraduate course that focuses on examining modern techniques for manipulating cellular behavior and the application of these techniques to problems in the biomedical and biotechnological arenas. Applications in drug discovery, regenerative medicine, and cellular agriculture will be discussed. Topics will include controlling behavior of cells through cell-matrix interactions, cytoskeletal architecture, and cell behavior in processes such as angiogenesis and wound healing. Lectures will review fundamental concepts in cell biology before delving into topical examples from current literature. Students will work weekly in the lab learning cell culture techniques, soft lithography, microscopy, and classical in vitro assays measuring cell behavior.

Course Notes:

BE121 and ES222 are the same course. This course has a mandatory laboratory section that will require hands-on work outside of scheduled lecture times.

Recommended Prep:

Inorganic chemistry, cell biology, physics, and mathematics at the level of Applied Mathematics 21 or Mathematics 21. Suggested courses include organic chemistry and molecular biology.

Engineering Sciences 229

Survey of Energy Technology (109282)

Michael Aziz

2022 Spring (4 Credits) **Schedule:** WF 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Principles governing energy generation and interconversion. Current and projected world energy use. Selected important current and anticipated future technologies for energy generation, interconversion, storage, and end usage.

Course Notes:

This course must be taken Sat/Unsat. Cannot be used for SEAS concentration credit. Students may not take both Engineering Sciences 229 and Engineering Sciences 231 for credit.

Recommended Prep:

Calculus of a single variable, one semester of college-level physics, and familiarity with chemistry at the high school advanced placement level.

Technology Venture Immersion (211051)

Conor Walsh

Thomas Eisenmann

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 30

Using a learning-by-doing approach, student teams will work on their own venture concepts in this intensive immersion course. The course will convey concepts and builds skills required in early stage technology ventures, including problem finding (human-centered design, customer discovery), solution finding (ideation methods, prototyping, user testing), business model validation (hypothesis generation, minimum viable products, lean experimentation), sales and marketing methods, venture financing, and team building and leadership skills. Enrollment limited to first-year MS/MBA: Engineering Sciences students only.

Course Notes:

This course is limited to first-year MS/MBA: Engineering Sciences

students only.

Technological Innovation and Entrepreneurship (219760)

Woodward Yang

2022 Spring (4 Credits) **Schedule:** R 0645 PM - 0845 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will explore the complex relationships between scientific advances, technological innovations, manufacturing technologies, and the development and evolution of an industry. While many students may already be familiar with scientific research and technological innovations, this course will explore how advances in science and technology impact manufacturing, industry architecture, and business. Some basic background in business management and government will be reviewed including manufacturing processes, business strategy, disruptive innovation, intellectual property, industry standards, and political economy to provide proper context for understanding the practical implications of technological innovations. We will review and investigate the basic scientific phenomena and technological innovations that underpin some major industries such as Steel, Automobiles, Semiconductors and Personal Computers. By reviewing the historical evolution of these technologies and the corresponding economic, political, legal, and sociological circumstances, we will develop a framework for understanding the strategic forces that disrupt businesses and create entrepreneurial opportunities and reshape industry structures. Working together in small groups, students will be assigned a term project to research and analyze the strategic forces that shaped other major industries such as Energy, Pharmaceuticals, Communications, and Textile/Clothing.

Course Notes: **Open to advanced undergraduate students with permission of the instructor.**

Recommended Prep: **Background in undergraduate-level physics, chemistry, and/or engineering; and economics.**

Requirements: **Graduate Students Only (Undergraduates can submit a request to enroll)**

Engineering Sciences 239

Advanced Innovation in Science and Engineering: Conference Course (118942)

David Weitz

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Explores factors and conditions contributing to innovation in science and engineering; how important problems are found, defined, and solved; roles of teamwork and creativity; and applications of these methods to other endeavors. Students receive practical and professional training in techniques to define and solve problems, and in brainstorming and other individual and team approaches.

Students are expected to meet all the requirements of Engineering Sciences 139 and in addition are required to prepare an individual term project with significant analytic emphasis in an area of scientific or technological innovation.

Course Notes:

May not be taken for credit if ENG-SCI 139 already complete. Offered jointly with the Design School as SCI-6272.

Engineering Sciences 258

Introduction to Bioelectronics (215116)

Jia Liu

2022 Spring (4 Credits) **Schedule:** TR 1115 AM - 1230 PM

Instructor Permissions: None **Enrollment Cap:** 20

This course introduces bioelectronics and its applications in neuroscience, neuroengineering, cardiology, wearable technology, and so on. The focus is on the basic principles of bioelectricity, biochemistry, and physiological behaviors of biological systems and how to design electronic tools to precisely measure and control them. Key themes throughout the course will include bioelectricity, biochemistry, cellular and tissue physiological behavior, optogenetics, sensors, stimulators, circuits, signal processing, electronics-biology interface, and applications. This includes both the practical and theoretical aspects of the topic. Three experimental demonstrations will be included as part of the normal class meeting time. Given its broad coverage, students who enroll in this course are expected to have a substantial background in chemistry, biology, and electrical engineering (see recommended prep and course requirements). The contents and course requirements are similar to those of Biomedical Engineering 129 (BE 129), with the exception that students enrolled in Engineering Sciences 258 (ENG-SCI 258) are expected to undertake a substantial course project.

Class Notes: **The combined enrollment for BE 129 and ES 258 is 20 students.**

Recommended Prep:

LS1a or LPSa; AP 50b or PS 12b or Physics 15b; Math 1b or equivalent. Some background in chemistry and biology at the level of ES 53, and a strong background in electrical engineering at ES52, ES 50 or ES 152 is required.

Requirements: **Prerequisite: ENG-SCI 50, ENG-SCI 52, or ENG-SCI 152**

Additional Course Attributes:

Engineering Sciences 259

Advanced Introduction to Robotics (134052)

Justin Werfel

2021 Fall (4 Credits) **Schedule:** MW 0345 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to computer-controlled robotic manipulators. Topics include coordinate frames and transformations, forward and inverse kinematic solutions to open-chain manipulators, the Jacobian, dynamics and control, and motion planning. In addition, special topics will be introduced such as computer vision, soft robotics, surgical robots, MEMS and microrobotics, and biomimetic systems. Laboratory exercises will provide experience with industrial robot programming and robot simulation and control.

Course Notes:

Eng-Sci 259 is also listed as Eng-Sci 159. Students may not take both for credit. Graduate students must enroll in 259. The material in 259 is the same as in 159, but with additional problems on the problem sets and a final project.

Recommended Prep:

Engineering Sciences 125; MATLAB experience.

Requirements: **Prerequisite: Either PHYSCI 12a, or both Physics 15a and CS 50**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Engineering Sciences 273

Optics and Photonics (123351)

Federico Capasso

Marko Loncar

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The focus is on the foundations of optics/photonics and on some of its most important modern developments and applications. Powerful and widely used computational tools will be developed in the sections. Topics to be covered: Maxwell's equations, Free space optics. Reflection, refraction, polarization (Jones Calculus and Stokes parameters); interference and diffraction. Light-matter interaction, dispersion and absorption. Guided wave optics (including optical fibers). Perturbation and couple mode theory, transfer matrix methods; numerical methods. Optical resonators. Photonic crystals. Near-field optics. Metal optics and Plasmonics. Metamaterials and Metasurfaces.

Course Notes:

Open to graduate students and advanced undergraduates.

Recommended Prep:

Elements of Electromagnetism, such as taught in Applied Physics 50b, Physics 15b, Physical Sciences 12b, Engineering Sciences 151 or equivalent.

Additional Course Attributes:

Engineering Sciences 274

Quantum Devices (118028)

Marko Loncar

Federico Capasso

2021 Fall (4 Credits) **Schedule:** WF 0430 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The focus of this course are quantum devices that have revolutionized the field of information science and technology. Particular emphasis this year will be on optical devices and communication technology. First, quantum devices that have enabled development of internet will be discussed, including semiconductor

lasers, modulators and photo-detectors. Next, emerging quantum devices that will lead to so-called "second quantum revolution" and development of quantum internet and quantum computers will be introduced. These include single-photon sources and detectors, quantum memories, physical implementations of quantum gates, etc.. Topics that will be covered include quantum dots, color centers in solids, trapped ions and atoms, photon pair generation, quantum teleportation, quantum cryptography and quantum repeaters. The course is a mixture of quantum mechanics, semiconductor device physics, nanophotonics, quantum electronics and quantum optics.

Recommended Prep:

Undergraduate level quantum mechanics such as Physics 143a or equivalent.

Engineering Sciences 277

Microfabrication Laboratory (109357)

Marko Loncar

Evelyn Hu

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 20

The course provides introduction to micro- and nano-fabrication processes used to realize photonic, electronic and mechanical devices. Lectures will introduce the state-of-the-art semiconductor fabrication processes, including lithography, deposition of metals and dielectrics, etching, oxidation, implantation, and diffusion of dopants. The fabrication component of the course will be carried out in a state-of-the-art cleanroom in the Center for Nanoscale Systems, where students will fabricate several electronic and photonic devices, including transistors, light-emitting diodes (LEDs), lasers and optical resonators. Device characterization will be performed in a state-of-the-art teaching labs in SEC in Allston.

Course Notes:

Course also includes a 4-hour lab session each week. Content and requirements are similar to Engineering Sciences 177, with the addition that students enrolled in Engineering Sciences 277 are given an additional project.

Class Notes:

ES 177/277 is a laboratory course that emphasizes hands-on device fabrication and testing. In this "transition year", we will be depending on the facilities of the Center for Nanoscale Systems (CNS), which also serves as a Research "Cleanroom". Because of the limitations of access to CNS, working under conditions that hope to avoid spread of COVID, the course this semester is subject to a CAP OF 20 STUDENTS.

Your answers to the questionnaire will help us to make the fairest selection possible, in case there are more than 20 students who wish to take the course this spring. Please submit your questionnaire to us before January 19th, so we can inform you about acceptance to the course in a timely way.

Recommended Prep: **(Applied Physics 50a OR Physical Sciences 12a OR Physics 15a) AND (Applied Physics 50b OR Physical Sciences 12b OR Physics 15b) or equivalent.**

Requirements: **Prerequisite: (Applied Physics 50a OR Physical Sciences 12a OR Physics 15a) AND (Applied Physics 50b OR Physical Sciences 12b OR Physics 15b)**

Engineering Sciences 285

Design Theory and Practice (212920)

Elizabeth Christoforetti

Roberto Verganti

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 35

Any organization, business or venture grounds its value on how "meaningful" are its products (functionally, symbolically and emotionally). Design Theory and Practice (DTP) empowers students to create products that are meaningful, to people who use them and to society at large. The course has three purposes:
1. To inspire students about the power of design in new business creation. We will address questions such as: Why is design relevant in tech ventures? How does it create value? And, most of all, why is it fundamental for a technology entrepreneur/leader?
2. To enable them to move into action, by learning the theories and practice (mindsets, processes, methods) of design: Where do ideas come from? How to frame (and especially re-frame) a problem? How to understand what is meaningful to users? How to make a product desirable (functionally, emotionally and symbolically)? How to design and build the user interface of a product? How to test it? How to narrate and visualize a novel idea?
3. To co-explore, with the class and the instructor, the use of design as a leadership practice: How does a leader who masters design can better contribute to creation of value? How can we forge a new manifesto for leadership, inspired by design?
The course is intensively project-based. Students will work in teams on a complex innovation challenge proposed by a real corporation. They will suggest a more effective framing of the problem, and create a novel meaningful solution, with a special focus on the user interface.

Course Notes: **This course is limited to MS/MBA: Engineering Sciences students only. Requires instructor consent.**

Nano Micro Macro: Adaptive Material Laboratory (156219)

Joanna Aizenberg

Jonathan Grinham

2021 Fall (4 Credits) **Schedule:** T 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 13

This course is an interdisciplinary platform for designers, engineers, and scientists to interact and develop innovative new products. The course introduces ideas-to-innovation processes in a hands-on, project/product focused manner that balance design and engineering concepts with promising, real-world opportunities. Switching back and forth between guided discovery and focused development, between bottom-up and top-down thinking, and market analyses, the course helps students establish generalizable frameworks as researchers and innovators with a focus on new and emerging technologies. There are no prerequisites.

Course Notes:

Open to upper-level undergraduates.

This course is offered by the Harvard Graduate School of Design as SCI 6477. Note to MDE students: This course can satisfy a GSD course requirement by enrolling in SCI 6477 or a SEAS course requirement by enrolling in ES 291, but it cannot simultaneously satisfy both requirements.

Engineering Sciences 292A

Launch Lab/Capstone 1 (214579)

Russell J Wilcox

Alan Maccormack

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 35

The MS/MBA Capstone is an intensive project that requires teams of students to apply and integrate the skills they have learned across core disciplines developed in the program curriculum. Specifically, teams will be expected to design, build and launch a new technology-based product/service venture, and thereby to demonstrate mastery with respect to three areas of knowledge: Design Knowledge: The use of human-centered design methods to understand users, identify solutions to their needs, and gather feedback via rapid, iterative prototyping. Technical Knowledge: The use of rigorous system engineering methods to plan, design, develop, build, and test a complex technology-based product/service, integrating knowledge across multiple engineering disciplines. Business Knowledge: The use of business model analysis and lean experimentation methods to develop and test a set of hypotheses that capture how the new

product/service will create value, including business model design, pricing, sales and marketing, operating model and profit formula.

The Capstone is divided into two parts, the first of which is an immersive course completed during the January term of the G2 year (Capstone I). The subsequent spring course (Capstone II) follows on from and builds upon work completed in January. Given students prior coursework, a working knowledge of human-centered design methods, systems engineering techniques, and business modeling and lean experimentation is assumed. Launch Lab therefore focuses on the practical application of these skills to team projects, supplemented by content in three areas: i) seminars on advanced methods and techniques, ii) workshops that demonstrate how to put these skills and tools into practice, and iii) guest speakers who share their experience in the areas of design, technology and business.

Course Notes:

Open to MS/MBA: Engineering Sciences students only, or to others by permission of the instructor.

Solving Tech's Public Dilemmas (107995)

Ash Carter

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course identifies and analyzes alternative solutions to the dilemmas that disruptive technology is posing to public good in the digital, biotech, and jobs and training domains. The objective is for students to craft technologically-informed practical public-private approaches to some of the key policy issues of our time. It begins with a brief history of successful and unsuccessful governance of far-reaching technological changes in the past. The first part of the course treats the ongoing digital revolution, crafting solutions to issues of social media responsibility, cybersecurity, and artificial intelligence (AI). It then turns to the biotech revolution that is gathering momentum, addressing genome editing, bioweapons and bioterror, and the role of venture capital in biotech. The third segment of the course addresses the ways that technology is disrupting the nature of work and lifelong training. The example of driverless cars will be used to illustrate the challenges and opportunities that technology provides to sustain cohesive and prosperous societies in the era of tech "disruption". Assignments stress the development of key writing and speaking skills.

Course Notes:

Also offered by Harvard Kennedy School as IGA 505.

Class Notes: **Check the HKS listing for the classroom assignment.**

This course is graded and is ordinarily taken with the approval of the Committee on Higher Degrees. Applicants must file a project sheet approved by the advisor before the course registration deadline; contact gradprograms@seas.harvard.edu if you have any questions. Project sheets may be obtained at https://www.seas.harvard.edu/office-academic-programs/graduate-policies-procedures-and-forms/graduate-student-forms.

Additional Course Attributes:

FAS Divisional Distribution	None

Engineering Sciences 301

SEAS Teaching Practicum (125374)

John Girash

2022 Spring (4 Credits) **Schedule:** R 0345 PM - 0630 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Practicum emphasizing an active but reflective approach to teaching applied sciences and engineering; designed for graduate students in any SEAS area, not specifically Engineering Sciences. Topics: presentation and communication; in-class teaching and interaction; developing, grading and giving feedback on assignments; course head / TF relations and expectations; cognition and learning. Seminar style with an emphasis on observation, practice, feedback, and reflection. While the primary context of the course is classroom-style teaching, those interested in developing instructional communication skills in other contexts within science and engineering -- labs/studios, presentations, etc. -- are quite welcome, and course tasks can be adjusted for such.

Class Notes: **We will aim to end by 6pm most weeks. Postdocs and motivated undergraduates may audit (doing the same work as enrolled graduate students) and receive a certificate of completion.**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
No FAINFO	300 or 3000 level class, do not generate FAINFO
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course

Engineering Sciences 399-TIME

Academic-Related Work for SEAS Graduate Students (208271)

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Enrollment in ES 399-TIME is open to any SEAS Ph.D., M.E., or S.M. student who holds a SEAS or FAS Teaching Fellow (TF) appointment and is engaged in teaching a course. Once hired to teach in a specific course, whether within or outside SEAS, the student must complete the online form at http://tinyurl.com/seastfform.

SEAS Ph.D. students who are required to enroll in the Bok Center's non-credit *Communicating Science* seminar in order to meet the GSAS English Language Proficiency requirement may also enroll in 4 units of ES 399-TIME.

Course Notes:

Teaching Fellows may enroll in 4 units of ES 399-TIME for a .25 FTE TF appointment, or up to 8 units of ES 399-TIME for a .5 FTE TF appointment. TFs should not enroll in the course in which they are teaching.

Any enrollment in ES 399-TIME other than as described here is disallowed by SEAS policy, with exceptions requiring prior approval of the Director of Graduate Studies. ES 399-TIME cannot be used to satisfy any degree requirements.

Additional Course Attributes:

Attribute	Value(s)

Get Real: The Art of Community-Based Film (216411)

Musa Syeed

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

"I've often noticed that we are not able to look at what we have in front of us," the Iranian director Abbas Kiarostami said, "unless it's inside a frame." For our communities confronting invisibility and erasure, there's an urgent need for new frames. In this workshop, we'll explore a community-engaged approach to documentary and fiction filmmaking, as we seek to see our world more deeply. We'll begin with screenings, craft exercises, and discussions around authorship and social impact. Then we each will write, develop, and shoot a short film over the rest of the semester, building off of intentional community engagement. Students will end the class with written and recorded materials for a rough cut. Basic equipment and technical training will be provided.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2021 workshops, applications will open August 6 and are due via Submittable by 11: 59pm EDT on Sunday, August 22. Students will be notified of admissions decisions by 4:00pm EDT on Wednesday, August 25. Workshops will meet the first week of classes.

English CAFR

CAFR: Advanced Fiction Workshop: Writing this Present Life (160953)

Claire Messud

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Intended for students with prior fiction-writing and workshop experience, this course will concentrate on structure, execution and revision. Exploring various strands of contemporary and recent literary fiction – writers such as Karl Ove Knausgaard, Rachel Cusk, Chimamanda Adichie, Valeria Luiselli, etc – we will consider how fiction works in our present moment, with emphasis on a craft perspective. Each student will present to the class a published fiction that has influenced them. The course is primarily focused on the discussion of original student work, with the aim of improving both writerly skills and critical analysis.

Revision is an important component of this class: students will workshop two stories and a revision of one of these.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2021 workshops, applications will open August 6 and are due via Submittable by 11: 59pm EDT on Sunday, August 22. Students will be notified of admissions decisions by 4:00pm EDT on Wednesday, August 25. Workshops will meet the first week of classes.

Investigations: Journalism and Social Justice (205147)

Jill Abramson

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This advanced seminar focuses on investigative reporting about social justice issues and cases. Readings will cover school resegregation, housing and homelessness, health care and economic inequities, among other subjects. Class members will learn how to use documents, transcripts and other materials in their reporting.

The emphasis of the course is on investigative writing techniques, story ideas, voice and narrative framing.

Students will be required to write two investigative articles, one involving a group reporting project and another on an original subject chosen by each student. There will be intermittent, shorter writing assignments. Grades are based on written work and class participation. Guest speakers will include many of the journalists whose articles are included in class reading assignments.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Students will be notified of admissions decisions by 4:00pm on Wednesday, January 19. Workshops will meet the first week of classes.

Advanced Screenwriting: Workshop (123934)

Musa Syeed

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The feature-length script is an opportunity to tell a story on a larger scale, and, therefore, requires additional preparation. In this class, we will move from writing a pitch, to a synopsis, to a treatment/outline, to the first 10 pages, to the first act of a feature screenplay. We will analyze produced scripts and discuss various elements of craft, including research, writing layered dialogue, world-building, creating an engaging cast of characters. As an advanced class, we will also look at ways both mainstream and independent films attempt to subvert genre and structure.
Students will end the semester with a first act (20-30 pages) of their feature, an outline, and strategy to complete the full script.

Course Notes:

Admission by application only. For information on specific application

requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Students will be notified of admissions decisions by 4:00pm on Wednesday, January 19. Workshops will meet the first week of classes.

Advanced Playwriting: Workshop (145402)

Sam Marks

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This workshop is a continued exploration of writing for the stage, with an eye towards presentation. The semester will culminate in a staged reading of each student's work for the Harvard Playwrights Festival. Each reading will be directed by a professional director. Students will be encouraged to excavate their own voice in playwriting and learn from the final presentation. The class will examine the design of the stage, the playworld, and the page. Students will attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Caryl Churchill and Samuel Beckett as well as contemporary dramatists such as Annie Baker, Jackie Sibbles Drury, Branden Jacobs Jenkins, and Jeremy O. Harris.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Intermediate Poetry: Workshop (146632)

Joshua Bell

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Initially, students can expect to read, discuss, and imitate the strategies of a wide range of poets writing in English; to investigate and reproduce prescribed forms and poetic structures; and to engage in writing exercises meant to expand the conception of what a poem is and can be. As the course progresses, reading assignments will be tailored on an individual basis, and an increasing amount of time will be spent in discussion of student work.

Course Notes:

Creative Nonfiction: Before and Beyond the (Imaginary White) Reader (216639)

Joan Kane

2022 Spring (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Writers of literary, lyrical nonfiction negotiate complex power dynamics with their selves, communities, subjects, and readers. In this workshop we will conduct an intensive study of the craft techniques writing of creative nonfiction, focusing on the balance between the politicization of witness, descriptive detail, and narrative voice. Given that one of the great imaginative allures of lyric prose is that it can invent its audience as much as it can invent its speaker, how do writers of creative nonfiction contend with social context? What are the ways in which we can write and revise lyrically that can allow our work to depart from, evade and amplify the experiential in its collaborations with language, history, and place? We will do some generative exercises and workshopping (each writer will be workshopped at least twice per semester) as well as discussion, of course. Participants will generate drafts, revise new work, and investigate the fundamentals of the genre of creative nonfiction.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. Found Poems, Erasures and Other Adventures in Documentary Poetry (218757)

Tracy K. Smith

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In their quest for clarity, revelation and consolation, poets engage with, reflect upon and speak back to the world in a range of ways. In pursuit of these very same aims, poets also listen closely to what has already been said by others at registers spanning intimate exchange, public discourse and sacred utterance. In this poetry workshop, we'll engage in an exploration of found materials—letters, news articles, historical texts, police reports, instruction manuals and more—to see what new forms of dialogue they might invite, and what light they might shed upon the questions, concerns and apprehensions of our current time. With readings by Muriel Rukeyser, Robin Coste Lewis, Nicole Sealey, Michael Kleber-Diggs and others.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. Poetry Workshop: Form & Content (218756)

Tracy K. Smith

2021 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In this workshop, we'll look closely at the craft-based choices poets make, and track the effects they have upon what we as readers are made to think and feel. How can implementing similar strategies better prepare us to engage the questions making up our own poetic material? We'll also talk about content. What can poetry reveal about the ways our interior selves are shaped by public realities like race, class, sexuality, injustice and more?

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. Devotional Poetry (160743)

Joshua Bell

2022 Spring (4 Credits) **Schedule:** T 0600 PM - 0845 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In this workshop we will focus on the devotional poetry of John Donne, George Herbert, Henry Vaughan, and GM Hopkins, looking first into certain texts of the Old Testament—Psalms, Song of Solomon, Book of Job—from which so much of devotional poetry extends. In conversation with these four poets, students can expect to build and execute their own plaintive lyric "I," design new ecstatic/meditative soundscape, and plan and deliver the imagistic configurations that will best give them direct-line access to the God (or gods) of their own choice or invention. As this is a poetry workshop, all assignments will be creative.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. Advanced Fiction Writing (216215)

Indraneel Mukherjee

2021 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The course will consist of two halves. In the first hour of each class, we will be doing close readings of an assigned text (TBA), with the aim of isolating some aspect of the craft of writing in order to take bearings for your own. In the second half of the class, divided into two equal segments of an hour each, we will be workshopping the writing of two students. Our goal is for each of you to have two turns, and approximately 5-10,000 words of your work critiqued, by the time semester ends. The final project involves significant redrafting of a story or a portion of a novel

Course Notes:

From Fact to Fiction: Finding & Shaping a Story: Workshop (216347)

Claire Messud

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In this course, we will explore the evolution of a story from a factual anecdote or incident to a fictional creation. The aims of the semester are to learn to listen to someone else's story in interviews, and to endeavor to find, from there, the necessary bones for a fictional narrative. What is most urgent? What is most emotionally affecting? What are the details from an interview that stay with you? And from there: what, from a broader account, is the story you are moved to relate? Once you make that choice, how do you do further research, if necessary? How do you select the point of view, the frame, the characters for your fiction? What are the ethics and responsibilities of these choices?

In these riven and challenging times, storytelling is vital: learning to listen, to engage, and responsibly to relay what we discover. Each person we encounter is a bearer of wisdom and vast experience; so many urgent stories remain untold. How might we, as fiction writers, address reality, without simply writing about

ourselves?

Several published writers will visit the class to share their experiences of research, and of the relation in their work of fact to invention. We will read published examples of fact-based fiction, and discuss the authors' choices.

The first third of the class will involve preparing and conducting interviews with a chosen subject, and sharing those interviews with the class. The second third will involve refining the story's arc, research and formal decision-making, and writing a first draft. Finally, we will workshop the revised stories that have emerged from this process.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. Genre Fiction Workshop: Sci-Fi, Fantasy, Speculative Fiction, Horror, The Ghost Story, The New Weird (213327)

Indraneel Mukherjee

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The course will consist of two halves. In the first hour of each class, we will be doing close readings of an assigned text (please see 'Syllabus'), with the aim of isolating some concept or aspect of the genre under discussion in order to take bearings for your own. The assigned reading is obligatory. We will be looking at questions of genre, and at the reasons for the quotation marks bracketing the word genre in the heading. We will also look at the convergences and divergences in the various kinds and modes mentioned in the title of the course. We will be thinking of generic *topoi*, conceptual underpinnings, imagination, style, world-building, storytelling, resolution, among other things.

In the second half of the class, divided into two equal segments of 50 minutes each, we will be workshopping the writing of two students. Our goal is for each of you to have two turns, and approximately 5-10,000 words of your work critiqued, by the time semester ends. The final project involves significant redrafting of a story or a portion of a novel.

Introduction to Screenwriting: Workshop (116874)

Musa Syeed

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The short film, with its relatively lower costs and expanded distribution opportunities, has become one of the most disruptive, innovative modes of storytelling--and is often an emerging filmmaker's first step into the industry. This course will introduce students to the basics of short form screenwriting, including narrative theory/structure, character design, and dialogue/voice. In the first quarter of the semester, we will hone dramatic techniques through several craft exercise assignments and in-class writing. In the following weeks, students will write two short screenplays. Throughout the semester, we will be workshopping and doing table reads of student work, discussing screenplays and craft texts, and screening a wide array of short films. The emphasis will be on discovering a sense of personal voice and completing two short screenplays (under 20 pages) that the student can produce in the future, if they choose.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via

Submittable by 11:59pm on Saturday, January 15. Students will be notified of admissions decisions by 4:00pm on Wednesday, January 19. Workshops will meet the first week of classes.

Introduction to Fiction Writing: Workshop (214529)

Molly Antopol Johnson

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course will introduce you to the fundamental elements of fiction writing. We will read a variety of work, including pieces by Alice Munro, Edward P. Jones, Joy Williams, James Baldwin, Bohumil Hrabal, Deborah Eisenberg, Yiyun Li and Ben Okri, using each text as a template for examining such aspects in fiction as tension, dialogue, point of view, arc and character. Through class discussions and a series of writing exercises, we will also pay close attention to the ways in which conventions of craft are applied and understood—and sometimes re-interpreted or subverted. As the semester progresses, the focus of the class will shift to your own work, which we will critique and discuss as a group in a workshop setting, with an eye toward drawing connections between craft principles and your own writing practice. You will later significantly revise your piece.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. 2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course will introduce you to the fundamental elements of fiction writing. We will read a variety of work, including pieces by Alice Munro, Edward P. Jones, Joy Williams, James Baldwin, Bohumil Hrabal, Deborah Eisenberg, Yiyun Li and Ben Okri, using each text as a template for examining such aspects in fiction as tension, dialogue, point of view, arc and character. Through class discussions and a series of writing exercises, we will also pay close attention to the ways in which conventions of craft are applied and understood—and sometimes re-interpreted or subverted. As the semester progresses, the focus of the class will shift to your own work, which we will critique and discuss as a group in a workshop setting, with an eye toward drawing connections between craft principles and your own writing practice. You will later significantly revise your piece.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Students will be notified of admissions decisions by 4:00pm on Wednesday, January

19. Workshops will meet the first week of classes.

Class Notes: **This course will be taught by Molly Antopol, Visiting Lecturer, Spring 2022.**

Introductory Fiction Workshop: Writers' Voices (218759)

Allegra Goodman

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Some say that to write well, you need to find your authentic voice. In this workshop we will explore a different proposition—that a writer can adopt many voices, depending on the situation and the story. We will experiment with different kinds of narrators, and we will practice writing dialogue as we study the structure and craft of the short story. The syllabus will include stories by writers such as Franz Kafka, Anton Chekhov, D.H. Lawrence, James Joyce, Eudora Welty, Tillie Olsen, Raymond Carver, Jamaica Kincaid, Lydia Davis, Gish Jen, T.C. Boyle, Zadie Smith, and Helen Oyeyemi. In the first weeks of the course, you will write short sketches. You will then write two short stories which we will workshop in class. At the end of the semester, you will choose one of these stories to revise and submit as your final project.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2021 workshops, applications will open August 6 and are due via Submittable by 11: 59pm EDT on Sunday, August 22. Students will be notified of admissions decisions by 4:00pm EDT on Wednesday, August 25. Workshops will meet the first week of classes.

Advanced Fiction: The Good Stuff (218853)

Meng Jin

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course is a workshop in pleasure and delight. And wonder and joy and laughter, and rule-breaking, and everything that makes literature lively and alive and worthwhile. We will discover (or rediscover) what it means to truly read for pleasure, probing for all this good stuff in works by writers such as Natalia Ginzburg, Ross Gay, Deesha Philyaw, Shruti Swamy, Naomi Shihab Nye, and more—works that are not merely hedonistic or escapist, but attempt to maintain a modest humanism in spite of humanity's sins, and to insist on cheerfulness and loving in the face of catastrophe and personal tragedy. We will try to cultivate these instincts in our own writing practice.

This will be primarily a fiction workshop, though we will occasionally read some joyous and delightful poetry and nonfiction. Student writing will be workshopped as fiction, but we will conceive of fiction in the widest sense, as any prose work whose value is not derived from its basis in fact. This is an advanced workshop, intended for students with some creative writing experience, because the good stuff is hard, and because you will be expected to read and write deeply, and a lot.

Class Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Fiction Workshop: Forms and Styles (218852)

Meng Jin

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

What gives a fictional work life and meaning and originality? In this workshop, students will be exposed to and try on a wide range of forms and styles in fiction to discover what suits and excites them. We'll sample a variety of sensibilities, approaches, and aesthetic possibilities, reading writers working in various traditions -- from Toni Morrison to Ted Chiang to Grace Paley – exploring the many ways fiction can come alive by following what is mysterious and inimitable in each work. Students will read a writer (sometimes two) a week and write a creative response inspired by some element of the assigned reading, which we will workshop in an effort to discover and nurture the mysterious and inimitable in our own work. One or more of these responses will be developed into a longer, complete piece.

Class Notes: **Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Fiction Workshop (218130)

Namwali Serpell

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This workshop is designed to explore and hone the writing of fiction. We will read and respond to some exceptional published stories in a variety of genres, and each other's works in progress. We will compose and revise at least thirty pages of fiction—in whatever number, size, and form suit the writer—over the course of the semester. We will also discuss and practice some of the pragmatic matters of a fiction writing career, including giving readings, editorial engagement, and submitting work for publication.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2021 workshops, applications will open August 6 and are due via Submittable by 11: 59pm EDT on Sunday, August 22. Narrative Science Journalism: Workshop (207633)

Michael Pollan

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The arc of this workshop will trace the process of researching and writing a single long piece of science journalism: finding and pitching story ideas; reporting in depth and at length; outlining and structuring your story; choosing a narrative voice and strategy, crafting leads and "overtures," and making connections between your story and its larger contexts. As a group, we'll also work as editors on one another's ideas and pieces. And since reading good prose is the best way to learn to write it, we'll be closely reading an exemplary piece of narrative science journalism each week. Students will be expected to complete a draft and revision of a substantial piece by the end of the term.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2021 workshops, applications will open August 6 and are due via Submittable by 11: 59pm EDT on Sunday, August 22. Advanced Fiction Workshop: What's So Western About the Western Story (218806)

Gish Jen

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Is there an identifiably "Western" story? Where did it come from? Would some of our most celebrated authors survive an MFA program today? Are there alternative ways of thinking about fiction? And —most importantly—what can we take away from them? In the first half of each class we will discuss such matters, placing mainstream fictional tenets in cultural context via stories from Alice Munro to Leo Tolstoy to Zadie Smith. In the second half of class we will turn to student work, with each student given three opportunities to share a piece with the class.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Writing for Television: Developing the Pilot: Workshop (203266)

Sam Marks

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This workshop introduces the television pilot with a focus on prestige drama and serialized comedy. Students will excavate their own voice and explore the structure and execution of pilot writing through a first draft of their own original script. With intensive reading and discussion of student work we will examine elements of TV writing, such as treatments and outlines as well as character, dialogue, tone, plot, and, most importantly, vision. Over the semester, we'll turn ideas into worlds and worlds into scripts.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Fall 2021 workshops, applications will open August 6 and are due via Submittable by 11: 59pm EDT on Sunday, August 22. Words & Photographs: Workshop (218124)

Teju Cole

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

For almost two centuries now, words have accompanied photographs, sometimes to sublime effect. In this writing-intensive workshop, we will model our work on the various ways writers have responded to photographs: through captions, criticism, fiction, and experiments. Assigned readings will range from William Henry Fox Talbot's *The Pencil of Nature* (1844–46) to Zadie Smith's "Through the Portal" (2018). Students will learn close-looking, research, and editing, and will be expected to complete a "words and photographs" project using their own photographs or photographs made by others.

Supplemental application information: please submit a photograph and up to a page of text responding (or perhaps not responding) to it, as well as a cover letter saying what you hope to get out of the workshop, and mentioning three books in any genre that have been helpful to your writerly development.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January TBA and are due via Submittable by 11:59pm EST on TBA. Students will be notified of admissions decisions by 4:00pm EST on TBA. Workshops will meet the first week of classes.

Fiction by Other Means: Workshop (218763)

Russell Rymer

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This is a short-story writing workshop that uses other creative genres – music, poetry, painting, film and photography – to advance students' fiction-writing abilities. Students will consider techniques and principles essential to other arts and apply them to their writing, enhancing in the process their comprehension of literary forms. Readings will include such modern short story masters as Helen Oyeyemi, Mavis Gallant, Angela Carter, and Edward P. Jones. Students will take some photographs, but the aim of the course isn't to improve graphic skills or art criticism abilities (no prior experience with photography or music or movies is required). The aim is to write great short fiction, using other mediums as muse and guide for inspiring, analyzing, and improving original prose. Final product is a publishable short story.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Students will be notified of admissions decisions by 4:00pm on Wednesday, January 19. Workshops will meet the first week of classes.

The Art of Writing about Science and the Environment: Workshop (207988)

Russell Rymer

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This is a seminar in creative nonfiction writing that will take science and the environment as its subject matter. Students will research and write a series of magazine-style articles about science or scientists, intended for a general readership. Along the way, they will hone their interviewing and research skills and expressive capabilities, while contending with issues of factual accuracy, creative license, authority, and responsibility, along with the basic tenets of longform nonfiction. Ultimately students will explore the ways that hard science and subjective prose are interrelated forms. No prior experience with science is required.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via

Submittable by 11:59pm on Saturday, January 15. Students will be notified of admissions decisions by 4:00pm on Wednesday, January 19. Workshops will meet the first week of classes.

Narrative Nonfiction. Writing Wrongs: Women, Gender and Journalism: Workshop (207987)

Susan Faludi

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This is a workshop class where students will learn the art of literary longform journalism and compose stories that take on questions of gender, feminism, sexuality and power, while simultaneously exploring how the media represents gender and learning the history of women in journalism. No profession has been as important to feminists in challenging society than journalism — even as journalism has been historically resistant to a feminist vision. Students will master the fundaments of great reporting and writing — interviewing, structure, voice, style, and ethics — while crafting their own magazine-style stories that grapple with ground-level gender dramas.

Supplemental Application Information: Please submit a writing sample of about 1,000 words in any genre that showcases your creative abilities, along with a note about why you want to take the class and what your writing interests are. If you have previous journalism/literary writing experience, please include that, too.

Course Notes:

Admission by application only. For information on specific application requirements and instructions, please see the full course listing on the English Department website. DEADLINE: for all Spring 2022 workshops, applications will open January 7 and are due via Submittable by 11:59pm on Saturday, January 15. Literature Today (132844)

Kelly Rich

Teju Cole

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

All literature was contemporary at some point, but the literature that is contemporary now provides special opportunities for enjoying, questioning, and understanding the world. Literature Today focuses on works written since 2000—since most of you were born. It explores how writers from around the world speak to and from their personal and cultural situations, addressing current problems of economic inequality, technological change, structural prejudice, and divisive politics. We will encounter a range of genres, media, and histories to study contemporary literature as a living, evolving system. The course uniquely blends literary study and creative writing—students will analyze literature and make literature. The conviction that these practices are complementary will inform our approach to readings and course assignments.

Class Notes: **English 10 is one of the required Common Courses for the English concentrators in the Classes of 2023, 2024, and 2025. The course is designed as a "gateway" course for first and second year students, but it is open to all undergraduates.**

English 20

Literary Forms (216063)

James Simpson

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This foundational course for English concentrators examines literary form and genre. We explore some of the many kinds of literature as they have changed over time, along with the shapes and forms that writers create, critics describe, and readers learn to recognize. The body of the course looks to the great literary types, or modes, such as epic, tragedy, and lyric, as well as to the workings of literary style in moments of historical change, producing the transformation, recycling, and sometimes the mocking of past forms. While each version of English 20 includes a different array of genres and texts from multiple periods, those texts will always include five major works from across literary history: *Beowulf* (epic), *King Lear* (tragedy), *Persuasion* (comic novel), *The Souls of Black Folk* (essays; expository prose), and Elizabeth Bishop's poems (lyric). The course integrates creative writing with critical attention: assignments will take creative as well as expository and analytical forms.

Class Notes: **English 20 is one of the required Common Courses for English concentrators and Secondaries in the Classes of 2023, 2024, and 2025 and is a limited enrollment course which will prioritize sophomores and first-years; juniors and seniors who want to take it as an elective will be considered for any remaining spots. Enrollment priority exceptions may be made for people changing concentrations or presenting other notable reasons.**

James / Baldwin (207741)

Jesse McCarthy

2022 Spring (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

At first glance Henry James and James Baldwin may seem worlds apart. Yet these two enormously influential writers share much in common. Both are New Yorkers; both spent a good deal of their lives as expatriates; both are celebrated for their queerness, a feature of their style as much as their sexuality. Both were serious, moralizing, and passionate observers of the "American Scene"; both writers are deeply committed to investigating and exploring the privacy of consciousness and the currency of experience. Henry James was James Baldwin's favorite writer. Colm Tóibín has called Baldwin, "the Henry James of Harlem." What attracted Baldwin to James across their vast racial and class differences? What lessons about the art of fiction can we learn by reading each in the light of the other? Not only the Jamesian influence on Baldwin—but what Baldwin allows us to see might be missing or muted in James. We will think very closely about the subject that deeply occupied both of them: America. And what America means from perspectives acquired from outside of America, looking back in. We will also investigate the expression and communication of sexuality, gender, race, class, money, politics and taste alongside assorted criticism, reviews, and other essays of interest.

Conrad, Naipaul, Coetzee: Genealogies of the Global Imagination (204047)

Homi Bhabha

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The novels of Conrad, Naipaul, and Coetzee have a particular value to contemporary discourses on global culture. Writing from specific historical and cultural contexts, all three writers are profoundly concerned with the ethical and aesthetic projects connected to economic and political forms of governance. Our study will focus on the problematic nature of intercultural relations as they are constituted in global networks. The meticulous reading of primary texts is an essential requirement of the seminar, which will focus on figurative language and fictional forms as they are used to imagine community and communication on a global scale. Critical and theoretical writings will be introduced to further the discussion of questions and topics raised by seminar participants.

Five Shakespeare Plays (146586)

Marc Shell

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

We'll be reading *Hamlet*, *King Lear*, *The Merchant of Venice, Henry V,* and *The Tempest.* Special attention to dramatically motivating issues involving familial kinship, racial and linguistic difference, and national and religious conflict. Philosophical and historical issues include Shakespeare's unique use of language, the ambiguous authorship of the plays, gender issues informing stage production, the sense of place in Shakespeare's Globe Theatre, and the influence of the Shakespearean canon in the various arts and media.

Course Notes: **This course, when taken for letter grade, meets the Department of English Shakespeare requirement. This class will run for two hours.**

Class Notes: **This course satisfies the English Concentration "Shakespeare" requirement for the Class of 2022.**

Class Notes: **This course will be held remotely.**

Harvard and the Puritans in Native America (218159)

Alan Niles

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Harvard's still governing 1650 charter states the institution's mission is "the education of English and Indian youth." What were the ideas about race, culture, and colonialism that made such an idea possible? What was life like for the early Native American students who studied at Harvard, and what happened to the founding idea of a multiracial intellectual space in Harvard Yard over time? This course studies the Harvard Indian College and early Harvard history in the context of broader relationships between New England colonists and Dawnlands Native peoples. We will focus in detail on the surviving early writings of Caleb Cheeshateamuck, Benjamin Larnell, and Eleazar alongside colonial writings by John Winthrop, John Cotton, Anne Bradstreet, and others. We will learn about the catastrophic violence of King Philip's War and the ways that conflict changed ideas about race and community in the seventeenth century. We will learn about Harvard's continuing role throughout the eighteenth and nineteenth centuries in organizing relations with New England Indian communities, and the forms, genres, and rhetorics Indian activists and protesters developed in response. Throughout our course, we will bring Native American voices from Massachusetts, Wampanoag, Nipmuc, and other communities to the fore, in the past and in the present day.

Class Notes: **This course satisfies the English Concentration "Migrations" requirement for the Class of 2022.**

Poems of Seamus Heaney and Thomas Hardy (146185)

Elaine Scarry

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Written a century apart, the poems of Seamus Heaney and Thomas Hardy create an urgent call and response between earth and under-earth. The poets share metrical virtuosity, compressed lyric forms, the unfolding of personal history within public crisis and transformation, and the recognition that the acuity of sentience — the daily practice of exquisitely precise perceptual acts — is the ethical center of our brief stay above ground.

Law and Literature (203067)

Kelly Rich

2021 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course will explore the complex relationship between literature and law, focusing on how each represents and responds to violence and its aftermath. As we survey a series of twentieth-century juridical paradigms (trials, rights, reparations, and reconciliation), our goal will not be to judge the efficacy of literary and legal projects, but rather to study how they imagine issues of guilt, responsibility, testimony, commemoration, apology and forgiveness. Our readings will include novels, short stories, poetry, legal theory, documentaries, and key documents of international law: authors will most likely include Hannah Arendt, J.M. Coetzee, Jacques Derrida, Franz Kafka, Michael Ondaatje, Julie Otsuka, and M. NourbeSe Philip.

Literacy Stories (216201)

Deidre Lynch

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course investigates literacy, literacy instruction, and literacy movements past and present, in theory and practice. Engaging with recent fictions and memoirs by authors such as Elena Ferrante and Ocean Vuong, with African-American slave narratives, laboring-class autobiographies, and other texts from the 19th-century, and with materials from the history of alphabet books and children's literature, "Literacy Stories" investigates the rich, ambivalent ways in which literature has depicted the literacy needed to consume it. Given under the auspices of the English Department and Harvard's Mindich Program for Engaged Scholarship, "Literacy Stories" also involves collaborations with, and volunteer work for, various community organizations devoted to literacy advocacy and instruction.

This class will give us the opportunity to reflect—something we'll do in part by learning from our community partners about the many ways of relating to texts that flourish beyond campus—on the contradictory ways in which we value reading. We'll consider, for example, the friction between solitary and social reading: how the pleasures of this activity lie sometimes with how it separates us from others and sometimes with how it connects us. We will be thinking about literacy's long-standing association with individual self-determination and thinking about how that association is put into question whenever people' s reading matter gets weaponized as an instrument of their domination. Literacy, the literary and theoretical texts on the syllabus will alike remind us, has a politics. Learning to be literate often involves experiences of unequal power relations and exclusion. Reading with (rather than "to" or "at") others is an ethical challenge—one that humanities concentrators especially ought to explore.

The writing assignments you will do for "Literacy Stories" will join together academic analysis with personal narrative and social reflection. They will likely encompass regular short responses to the assigned texts, journal entries that reflect critically on what you have been learning from your volunteer work beyond Harvard, and interviews with literacy advocates and community organizers. The capstone project for the seminar will be a memoir—your own literacy story-- reflecting on your own memories of reading instruction and integrating those memories with your experiences in the community over the course of the semester.

Course Notes:

Note: this course can be credited toward the Graduate School Education's secondary field in Educational Studies.

Theory Matters: Problems in Contemporary Literary and Cultural Theory (218142)

Homi Bhabha

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Why study literary theory? Is theory a conceptual framework or a tool-kit? Is theory a companion to literary study or is it crucial for literary interpretation? These are some of the questions I propose to address in this seminar which will address literary and cultural problems that have been shaped by theoretical concerns and concepts. This course will not adopt a historical approach nor will it be a survey of "schools" of literary theory. The syllabus will focus on topics such as Power, Race, Identity, Sexuality, Environmentalism, Postcolonialism, Inequality, Poverty etc. etc. and trace theoretical contributions that have been formative in shaping the diverse discourses around these issues. . Aesthetic, political and ethical approaches will be knotted together in our conversations. The seminar will be concerned with the relation between cultural form and cultural value. Literary texts will be used in conjunction with theoretical works.

Consciousness from Austen to Woolf (118850)

James Wood

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

A look at the complex ways in which writers represent their characters' thought in texts by Austen, Flaubert, James, Tolstoy, Chekhov, Giovanni Verga, and Woolf. More broadly, traces the development of stream-of-consciousness, from Austen's incipient mastery of free indirect style, through Flaubert's more sophisticated use of it, to Woolf's full-blown inner monologues, seeing this development as not merely a fact of English and American literature, but as a phenomenon of world literature and an element of our modernity.

Every Play Ever Written (218141)

Derek Miller

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course explores the history of dramatic writing and publishing in the US and Europe by studying every play ever written. Of course, we cannot actually study *all* those plays—that's the point. When we learn cultural history, we necessarily encounter only a small fragment of all cultural artifacts, whether they be paintings, novels, or plays. What does it mean that we learn cultural history in this piecemeal fashion? That we study drama and yet know nothing, *nothing* of *most* dramatic writing? How should we, as people invested in the theater and its history, think about our unfathomable ignorance? And what is the relationship between those plays we do see, act in, or read, and the vastly larger number of plays we will never encounter?

This seminar puts theatrical texts in perspective by focusing on the relationship between the exemplary texts that we anthologize and the forgotten archive of, well, everything else. We will approach this problem by comparing selected exemplary texts to lists of plays and by situating both our examples and our lists within their theatrical contexts. We will worry particularly about the relationship between the examples and the lists, hypothesizing about what we can and cannot truly know about all the plays we have not read.

This course, in short, explores the limits of our knowledge of cultural history. We seek not to answer questions definitively so much as to understand better those things we do not and *cannot* know about theater. We will learn, in other words, what we can never learn.

The Future of World Literature (218137)

Martin Puchner

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The course serves as an introduction to world literature and aims to ask big-picture questions: when and under what circumstances did written stories first emerge? How were they stored? And how will they be transmitted to the future?

The first part is exploratory and is based on working with the *Norton Anthology of World Literature*. We'll read widely across 4000 years of literature, and, using the Norton introductions and headnotes for guidance, assemble the big picture of literary evolution. Topics of discussion will include the dynamics of writing technologies from Mesopotamian clay tablet to the internet; the emergence of new genres; the increasing differentiation of literature into religious, historical, political, and fictional stories; and the changing marketplace of world literature. Readings include the *Epic of Gilgamesh*, the *Analects of Confucius*, the *Arabian Nights*, The *Tale of Genji*, the *Popol Vuh*, and the *Epic of Sunjata*.

The second part is a laboratory. Working individually and in groups, we'll devise strategies for preserving literature for the future. Which texts and types of literature should we select? How should we store them to assure their survival? And how can we communicate the significance of these texts to humans living in the distant future? This laboratory workshop will give us a chance to challenge existing canons and to envision the literature of the future. Readings and selections for the second part to be chosen by students.

Sophomore Tutorial: Literary Methods (216074)

Beth Blum

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

This course, taught in small groups and required for concentrators, introduces theories, interpretive frameworks, and central questions about literature and literary media. What do we do when we read? What is an author? What do we mean by "literature" itself? How might we compare and evaluate interpretations? How do the historical, social, cultural, and legal frameworks around a text shape its meanings and its effects? Combining major critical and theoretical writings with primary works, the course investigates how literary production and interpretation are informed by philosophical and aesthetic traditions, gender and sexuality, race and ethnicity, national and post-colonial identities, and the material forms in which literature circulates, from parchment books to the internet. Students will also practice fundamental literary research

methods through close engagement with Harvard libraries.

English 102E

Introduction to Old English: Landscape, Seascape, and Early Ecologies (121946)

Daniel Donoghue

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

How did people inhabit and view their physical environment in early medieval England? Was it life-sustaining or threatening? What was the balance between managing resources and exploiting them? How did poets and farmers, kings and saints invoke images of land and sea as meaningful symbols? The Old English literature on such questions, which is diverse and engaging, will form the basis of our in-class translations. Other assigned readings will survey environmental criticism and allow us to compare today's perceptions with those from a distant past.

This course combines language study with the investigation of a critical theme. The narratives set for translation provide a thematic coherence as we dig into the language of Old English, which is the vernacular used in England from the sixth century until about 1100. Although some of its features remain recognizable today, Old English needs to be learned as a foreign language with its own spelling, pronunciation, syntax, and so on. The term begins with an emphasis on grammar, which will be covered in graduated steps until midterm, after which the readings and translation will take up more of our class time.

The promise of this course: you will gain the skills to translate any text in Old English; you will learn a great deal about contemporary English including weird facts your inner word-geek will love; you will expand your knowledge of environmental criticism as we examine its deep history.

Class Notes: **Fulfills the College language requirement and the English Department's Foreign Literature requirement (c/o '22) if its continuation, English 103, is also completed.**

Advanced Old English: Wisdom Poetry (218753)

Kristen Carella

2022 Spring (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Old English poems love to recycle age-old wisdom in what are called "gnomic" verses. Usually expressed in laconic language and embedded in various genres of poems, the meaning of these passages can be unclear: *Soð bið swicolost* could be translated as "Truth is complicated." Their prevalence, however, suggests that the wisdom they conveyed was held in universal esteem. This course will examine the structure, content, and context of gnomic verses from multiple angles. In addition to our daily translations, we will pursue questions such as: What are the sources of these passages? What ideological/religious beliefs do they reflect? How do they function within the various literary genres where they occur? What is the importance of these passages in *Beowulf*? We will also compare Old Norse/Icelandic and Old Irish

wisdom literature (in translation) as we attempt to understand this fascinating and challenging aspect of Old English literature. Prerequisite: one term of Old English or the equivalent.

Course Notes: **Students who complete both English 102 and 103 with honors grades will fulfill the College language requirement and the English Department's Foreign Language Literature requirement.**

Class Notes: **English 102 is a prerequisite for English 103.**

Class Notes: **This course will be taught by Kristen Carella, Visiting Professor, Spring 2022.**

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Epic is one of the most enduring and far-reaching forms of artistic expression. From the heroic poems of the ancient Near East to modern films of quest and adventure, epic speaks to the shared values and collective aspirations of cultures, peoples, and communities. But if its formal conventions and thematic interests endure, epic changes over time. In this course, you will study the historical and literary evolution of epic as it moves from oral verse into new genres and media, reading texts from the ancient Mediterranean alongside works of poetry, fiction, and cinema from early modern Britain, twentieth-century America, and the contemporary Global South. We will look at some texts in their entirety and others in extracts, focusing on Homer's Iliad and Odyssey, Vergil's Aeneid, Milton's Paradise Lost, Derek Walcott' s Omeros, The Mahabharata (in prose and film versions), and George Lucas' Star Wars, with detailed analysis of Gwendolyn Brooks's American epics on Black life, Annie Allen and In the Mecca. If issues of identity, belonging, and community have always been explored in epic, what is the place of epic in a pluralist multi-culture? What are our contemporary epics today?

English Literature: The First 1000 Years (218158)

Alan Niles

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is an introduction to the different voices, cultures, and traditions that made the first 1000 years of English literature, from *Beowulf* to Aphra Behn. We will study major and influential writings alongside lesser-known interlocutors—works by Marie de France, Geoffrey Chaucer, Margery Kempe, Edmund Spenser, William Shakespeare, Mary Sidney, John Milton, Alexander Pope, and more. We will engage with the (often contested) social, political, and religious contexts that gave rise to creative work. We will pay particular attention to the historical transformations of romance, epic, drama, fable, and lyric, and the ways these forms were embedded in the social worlds of their time.

Class Notes: **This course satisfies the English Concentration "Arrivals" requirement for the Class of 2022.**

Imagining the World in Medieval and Renaissance Literature (218160)

Alan Niles

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How did writers and audiences imagine the world before modernity? This course offers an introduction to the first 1000 years of English literature (roughly 700-1700) and the shifting terms through which writers were able to imagine the world beyond their borders. We will encounter hardy seafarers, fantastical monsters, and real and imagined peoples at the margins of Europe and beyond. We will study the genres of travel narrative, romance, epic, drama, and lyric, and the different ways these forms registered global connections, ideas of race, and cultural and religious difference. We will pay particular attention to the accelerated pace of global encounters and connections starting in the Renaissance, and the ways that English literature was able (or not) to register new peoples and places, new forms of economic connectivity, and the violence of colonialism and empire.

Sex, Gender, and Shakespeare (218754)

Alan Niles

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This class is an introduction to Shakespeare's writings and their representations of sex, gender, romance, love, and queerness. We will study poems about erotic and queer desire, plays that stage ideas about gender and gender fluidity, and film adaptations that bring modern perspectives to race and sexuality. Readings will include such plays as *Twelfth Night*, *Romeo and Juliet*, *A Midsummer Night's Dream*, *Titus Andronicus*, *Macbeth*, and *Measure for Measure*; Shakespeare's *Sonnets*; and films by Derek Jarman, Baz Luhrmann, and Julie Taymor. Throughout our course, we will ask: how are the forms of gender identity and sexual expression we encounter in Shakespeare's works familiar, or different? How might they challenge, inspire, or disturb us today?

Class Notes: **This course satisfies the English Concentration "Shakespeare" requirement for the Class of 2022.**

Jane Austen's Fiction and Fans (146676)

Deidre Lynch

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In this class we'll read at least five of Austen's novels and study the contribution they made to the remaking of modern fiction. Though our emphasis will fall on these works' place in the literary culture of Austen's day and on their historical contexts in an era of revolution, we'll also acknowledge the strong and ardent feelings that Austen's oeuvre continues to arouse today. To that end, we'll do some investigating of the frequently wild world of contemporary Austen fandom and the Austenian tourism, shopping, adaptations, and sequels that nurture it. At the same time, we'll remember that Austen knew fandom from both sides; part of our work will be to learn about the early-nineteenth-century culture of literary appreciation in which Austen enrolled the heroines of her novels and enrolled herself.

The Age of the Novel (218128)

Tara Menon

2022 Spring (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

What does the novel still have to offer? As newer genres—movies, television, Youtube, TikTok—compete for our attention, why do people still immerse themselves long works of prose fiction? And why do certain nineteenth-century British novels continue to captivate so many readers to this day? In this course, we will read five nineteenth-century novels by five authors that many consider to be the greatest writers that have ever lived: Jane Austen's Pride and Prejudice, Mary Shelley's Frankenstein, Charles Dickens's Little Dorrit, George Eliot's Middlemarch, and Thomas Hardy's Tess of the D'Urbervilles. We will pay close attention to technique: how do these novels work? And we will also explore social and political themes: what are these novels about? At every stage, we will consider the unique capacities of narrative fiction: what can the novel do that other genres can't? Implicitly and explicitly, this course will argue first, that these superlative nineteenth-century novels let us see the world (not only then but also now) in new ways, and second, that the novel is a tool for thinking that beats all others. Alongside these texts, we will watch film adaptations and read excerpts of contemporary criticism and fiction to better understand the enduring legacy of these canonical works.

Keats Isn't Dead: How We Live Romanticism (214513)

Vidyan Ravinthiran

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Our thoughts and feelings about identity, self-expression, and the power of the imagination draw on the British Romantic poetry of the Long Eighteenth Century—whether we've read any or not. Focusing on John Keats (his key poems, and his key ideas, about "negative capability", the "camelion poet", and so on), this course makes unconventional connections into the twentieth, and twenty-first century. Tracking issues of race, class, gender and sexuality, we'll bounce from Keats into war verse; African-American poetries; world/postcolonial writing; the literature of social class; feminist experimentalism; and constructions of masculinity. Concentrators will learn how to analyze poetry in both closed and open forms.

Broadway Bodies, or Representation on the Great White Way (212758)

Derek Miller

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

To many of its fans, *Hamilton* poses a problem. How can a show that *presents* so many talented artists of color still represent a white-washed American history? And how should we evaluate the show's impact when sky-high ticket prices make it accessible primarily to a wealthy (read: white) audience? In its aspirational embrace of a multi-ethnic America and its failure fully to realize that promise itself, *Hamilton* embodies the paradox of Broadway.

This course examines that paradox since World War II, particularly as it pertains to multiple aspects of identity including race, gender, sexuality, disability, and age. We will examine how shows such as South Pacific, with its famous anti-racist anthem, and *M. Butterfly*, which explores the intersections of Orientalism, gender, and sexuality, temper their inclusive representations to appeal to a wide commercial audience. Broadway is a particularly fertile ground for exploring these issues because theatrical performances always call attention to the performative nature of subjectivity: you are what you do. As we shall see, though, theatrical performatives, instead of affirming the subjects they represent, threaten to turn those subjects into mere theater.

Our starting assumption is that many Broadway stake-holders genuinely desire broader representation in and for their work, but that the structure of the industry constrains how these shows challenge the status quo. By understanding those constraints, we will be able to critique and, perhaps, change what stories Broadway tells, who sees them, how they are marketed and, of course, "who tells your story."

Who is a Poem? (219965)

Stephanie Burt

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

We'll look at poems, poets, kinds of poems, and their histories by thinking about the people the poems project: how does a piece of writing in verse (or in lyrical prose) work to let us imagine a person behind it, either its author or its character? When does the poem, instead, imagine you? How do poems entice us to care about them, and about the people they project? We'll look at historically major authors, likely with a special focus on Donne, Pope, Hughes, Bishop and Moore, along with contemporary poets including Estes, Hayes and Youn.

The Black Lyric (218755)

Tracy K. Smith

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

African American poets have long embraced the private freedoms of the lyric poem—freedom to claim the authority of an uncontested first person "I"; freedom to wrangle language into new and startling forms; freedom to depart as needed from the strictures of linear reality. And yet, from its earliest iterations, African American poetry has also concerned itself with correcting and complicating the official narrative of Black life and Black subjectivity in America. This course will explore the means by which Black poets have innovated upon the lyric tradition to accommodate a sense of allegiance to a collective. In this tradition, the lyric poem has become a powerful tool with which to ponder the dynamics of self and other, intimate and political—and justice and injustice. Course readings will include work by seminal 20th Century American figures such as Langston Hughes, Gwendolyn Brooks, Robert Hayden and Lucille Clifton, as well as contemporary voices like Jericho Brown, Tyehimba Jess, Morgan Parker, Eve L. Ewing and others. We will also devote attention to lyric corollaries in film, music, visual art and performance. Students will be encouraged to respond to course themes and texts in both critical and creative form.

Toni Morrison (218129)

Namwali Serpell

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is a survey of the work of Nobel Laureate Toni Morrison from 1970 to 2012, including most of her novels, a few nonfiction essays, a short story, and a play. We will consider her literary antecedents;

follow her influence on contemporaries and future writers; trace the social, historical, and political contexts and implications of her work; and explore the critical interventions she made in historiography and literary criticism. Throughout, we will focus on Morrison's rich and complex aesthetic project: how it came into being; how it resonates with a great range of philosophical questions from epistemology to ethics; and how it changed over time.

American Horrors (130968)

Ju Yon Kim

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will examine horror—defined expansively to include the uncanny, the abject, the monstrous, and the ghostly—in American literature, considering its formal and aesthetic implications and its relationship to major cultural and social issues. What are the methods and theories that critics have used to study horror in literature? How and to what effect have works of American literature used horror to reflect on contemporary social concerns or to depict historical events? We will explore a range of literary works from the nineteenth century to the present next to critical and theoretical studies of horror and the Gothic.

The Harvard Novel (218126)

Beth Blum

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces the genre of the "Harvard novel," from W.E.B. Du Bois's notes toward his fictional work "A Fellow of Harvard" to Elif Batuman's *The Idiot* and Zadie Smith's *On Beauty,* in order to examine Harvard's cultural meaning and significance. It brings together novels (and films) where Harvard offers the narrative setting, supplies a character's backstory, or even serves as a character in its own right. We will address themes of tradition, access, privilege, race, anxiety, competition, and canonicity.

Introduction to Asian American Literature: What Is Asian American Literature? (146590)

Ju Yon Kim

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Aiiieeeee! An Anthology of Asian-American Writers **(1974) was one of the earliest attempts to collect writings that were, to quote the editors, "exclusively Asian-American." Yet as their lengthy—and controversial—explanation of the selection process makes clear, Asian American literature defies neat categorization. This course is both a survey of Asian American literature and an introduction to ongoing debates about what constitutes Asian American literature. We will study a variety of literary genres and ask how formal and stylistic conventions, as well as shifting sociohistorical circumstances, have shaped conceptions of Asian American literature.**

Black Science Fiction (218131)

Namwali Serpell

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course addresses two genres—black fiction and science fiction—at their point of intersection, which is sometimes called Afrofuturism. Our term "black fiction" includes texts that issue out of and speculate about the African-American experience. Our term "science fiction" comprises texts that speculate about alternative, cosmic, dystopian, utopian, and future worlds. Overlapping and mutually transforming concepts include: genetics, race, diaspora, miscegenation, double consciousness, technology, ecology, biology, language, history, futurity, space (inner and outer), and the alien. We will consider the short stories, novels, comics, film, television, and music of black science fiction.

City Fictions (218127)

Tara Menon

2021 Fall (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Cities are composed of contradictions: playgrounds for the rich and sites of concentrated poverty, highly organised and totally chaotic, an endless party and the loneliest places on earth. How do we write about them? In this course, we will examine how a range of writers represent city life in four major metropolises: London, Bombay, New York, and Tokyo. We will focus primarily on one book set in each of these cities—Charles Dickens' Bleak House, Suketu Mehta's Maximum City, Teju Cole's Open City, and Yu Miri's Tokyo Ueno Station—and supplement our reading with short stories, journalism, sociology, and movies by writers including: Zadie Smith, Edith Wharton, James Baldwin, Katherine Boo, Spike Lee, and more.

What techniques do fiction writers, journalists, and filmmakers use to capture the constituent features of life in urban environments? How do these narratives represent social interactions? How do they depict interiority and consciousness? What kinds of characters are included in the field of vision? What kind of

labour, if any, is represented? How, if at all, does the identity of the writer shape the stories they are telling? Other topics under consideration: class, race, gender, industrialisation, finance, greed, alienation, strangers, estrangement, economic inequality, cosmopolitanism, crime, immigration.

The Essay: History and Practice (207555)

James Wood

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Matthew Arnold famously said that poetry is, at bottom, "a criticism of life." But if any literary form is truly a criticism of life, it is the essay. And yet despite the fact that all students write essays, most students rarely study them; bookshops and libraries categorize such work only negatively, by what it is not: "non-fiction." At the same time, the essay is at present one of the most productive and fertile of literary forms. It is practiced as memoir, reportage, diary, criticism, and sometimes all four at once. Novels are becoming more essayistic, while essays are borrowing conventions and prestige from fiction. This class will disinter the essay from its comparative academic neglect, and examine the vibrant contemporary borderland between the reported and the invented. We will study the history of the essay, from Montaigne to the present day. Rather than study that history purely chronologically, each class will group several essays from different decades and centuries around common themes: death, detail, sentiment, race, gender, photography, the city, witness, and so on. In addition to writing about essays – writing critical essays about essays – students will also be encouraged to write their own creative essays: we will study the history of the form, and practice the form itself. Essayists likely to be studied: Plutarch, Montaigne, Hazlitt, De Quincey, Woolf, Benjamin, Orwell, Camus, Primo Levi, Barthes, Baldwin, Sontag, Dyer, Didion, Leslie Jamison, Knausgaard, Ta-Nehisi Coates.

Voices of Environmental Justice (216068)

Sarah Dimick

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course considers the relationships between systems of human injustice and environmental issues—including industrial disasters, ocean acidification, and resource extraction. We examine environmental justice writing and artwork with a transnational, interconnected approach. For example, we ask how Imbolo Mbue's depiction of pipeline spills in the fictional town of Kosawa connects to Native American resistance to the Dakota Access Pipeline. We link a poem documenting silicosis in the lungs of West Virginian coal miners to a novel portraying the aftermath of the Union Carbide gas leak in Bhopal. We compare a nonfiction account of Kenyan women resisting deforestation and an iPhone app reclaiming public access along the Malibu coast. We explore questions of voice, genre, and narrative, cataloguing the strategies writers and artists use to reach a global audience.

Gender and Representation (204999)

Glenda Carpio

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Margaret Atwood is often asked if the *The Handmaid's Tale* is a "feminist" novel. Her response: "If you mean an ideological tract in which all women are angels and/or so victimized they are incapable of moral choice, no. If you mean a novel in which women are human beings — with all the variety of character and behavior that implies — and are also interesting and important, and what happens to them is crucial to the theme, structure and plot of the book, then yes. In that sense, many books are 'feminist.'" This course focuses on such feminist books. It explores issues of perspective: what happens when an author writes from the perspective of a woman? Since taking this perspective does not depend on biology, we will explore authors from a variety of backgrounds, especially those whose class, race, and/or ethnicity add another dimension. We'll focus on contemporary Anglophone novels and drama.

Images, Idolatry and Iconoclasm: Late Medieval to Early Modern (120430)

James Simpson

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Fear of idolatry is a recurrent feature of Western culture. The Christian image threatens to short-circuit the flow of spirituality between humans and God, just as images of the ancient, pagan gods threaten dangerously to preserve the energies of those lascivious and vengeful deities. And images, whether secular or religious, are always potentially threatening to literate culture: they compete with words, and seem to possess a much more immediate power to mesmerize the imagination. The Protestant Reformation in particular targeted images as the enemy to a true religion of the Word. Legislation in England determined the wholesale destruction of religious images (iconoclasm) between 1538 and 1644. On the other hand, many writers and artists, both secular and religious, look to the image for salvation of sorts. Guided by these perceptions, we will be looking to a range of pre- and post-Reformation texts and contexts. The course will be equally divided between late medieval and early modern texts. Students without Middle English should feel entirely at ease to take this course: all texts will be presented in reader-friendly editions.

Teaching the Humanities with New Media: A Poetry In America Practicum (214358)

Elisa New

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 15

Humanists of the 21st century are looking at a changed professional landscape. Major shifts in higher education, and in the college and university job market for humanists, predate the COVID-19 pandemic, but the pandemic has brought these shifts into starker relief--even as it has revealed new opportunities for humanists in the fields of digital learning and educational media production, K-12 education, higher education administration, education policy, and more.

Teaching the Humanities with New Media: A Poetry in America Practicum will enable students to experience some of these newer career opportunities by "embedding" as Research and Pedagogy Associates in a for-credit Poetry in America course being offered to high-school students--most of them from Title I and Title I-eligible schools--across the US and around the world. This semester's practicum will provide students an opportunity to gain exposure to, and to build skills in, the world of online education, broadly defined. The Poetry in America for High Schools dual enrollment program is offered in partnership with the National Education Equity Lab and with Arizona State University.

Students enrolled in the practicum will have titled roles within the ASU dual enrollment course that may provide them useful credentials for the future. Visit poetryinamerica.org to learn more about Poetry in America and its programs.

Class Notes: **Jointly offered with Harvard Kennedy School (as SUP-472 Education Equity Through A Solutions-Targeted Lens) and Harvard Graduate School of Education.**

Teaching the Humanities with New Media: A Poetry In America Practicum (214358)

Elisa New

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 15

Humanists of the 21st century are looking at a changed professional landscape. Major shifts in higher education, and in the college and university job market for humanists, predate the COVID-19 pandemic, but the pandemic has brought these shifts into starker relief--even as it has revealed new opportunities for humanists in the fields of digital learning and educational media production, K-12 education, higher education administration, education policy, and more.

Teaching the Humanities with New Media: A Poetry in America Practicum will enable students to experience some of these newer career opportunities by "embedding" as Research and Pedagogy Associates in a for-credit Poetry in America course being offered to high-school students--most of them from Title I and Title I-eligible schools--across the US and around the world. This semester's practicum will provide students an opportunity to gain exposure to, and to build skills in, the world of online education, broadly defined. The Poetry in America for High Schools dual enrollment program is offered in partnership with the National Education Equity Lab and with Arizona State University.

Students enrolled in the practicum will have titled roles within the ASU dual enrollment course that may provide them useful credentials for the future. Visit poetryinamerica.org to learn more about Poetry in America and its programs.

Class Notes: **Jointly offered with Harvard Kennedy School (as SUP-472 Education Equity Through A Solutions-Targeted Lens) and Harvard Graduate School of Education.**

Black Literary Avant-Gardes (218148)

Jesse McCarthy

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

In his classic manifesto "The Negro Artist and the Racial Mountain," Langston Hughes declared that his generation of artists and poets—upstarts coming of age in the roaring twenties—was determined to build what he called "temples for tomorrow." How should we read that phrase today? Recent debates in Black Studies and in African American Literature over temporality, periodization, affect, and antagonism, suggest that we may not have an adequate theory of the avant-garde, or at least we may need to update the one we inherit from Poggioli (1968). By revisiting the avant-garde, we renew a concept that touches on a wealth of topics of interest to contemporary theoretical and methodological debates: taste, politics, publics and counter-publics, signifying, archives, transnationalism, translation, incompleteness, failure, and the circulation and manipulation of new medias. There are also the classic questions: Who gets to decide what constitutes an "avant-garde" or avant-gardes? What is the relationship between avant-garde artistic movements and political or militant ones? This course will explore all of these themes comparatively, with readings drawn from poems, plays, novels, and films, and we will range widely across the African diaspora, without neglecting important formations in Europe, Asia, the Caribbean, and Latin America.

The Environmental Humanities (218136)

Sarah Dimick

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This graduate seminar explores core concepts, questions, and methodologies within the environmental humanities. Rather than reading environmental literature and scholarship in isolation, we will trace their entanglements in environmental history, anthropology, philosophy, geography, and other adjacent disciplines.

The syllabus will be tailored to support the particular interests and pursuits of students in the course, but topics may include animal studies, capitalism and consumption, climate writing, disability and environment, disaster studies, environmental justice literature, environmental racism, extinction discourses, extraction narratives, feminist environmental practices, food sovereignty, hope and pleasure, indigenous environmentalisms, land access, militarized and nuclear environments, natural histories and collections, public health, queer environmentalisms, speculative futures, toxicity, urban environmental life, water rights, or the problematic idea of wilderness.

As a course designed to advance graduate research and increase fluency in an emerging field of study, assignments in this class will include a conference paper and a review of a book published in the last two years.

Migration and the Humanities (205269)

Homi Bhabha

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

By focusing on literary narratives, cultural representations, and critical theories, this course explores ways in which issues related to migration create rich and complex interdisciplinary conversations. How do humanistic disciplines address these issues—human rights, cultural translation, global justice, security, citizenship, social discrimination, biopolitics—and what contributions do they make to the "home" disciplines of migration studies such as law, political science, and sociology? How do migration narratives compel us to revise our concepts of culture, polity, neighborliness, and community? We will explore diverse aspects of migration from existential, ethical, and philosophical perspectives while engaging with specific regional and political histories.

Disfluency and Style (203053)

Marc Shell

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar focuses on works, including *Hamlet* and *Billy Budd*, where an inability to speak provides a motivating formal element as well as a substantial theme. The seminar considers such literary authors as Henry James and Lewis Carroll for whom their own more or less involuntary ways of stuttering becomes a style of writing or a larger philosophy. Theoretical issues include the historical link between the terminology of linguistic neurology and classical rhetoric; aesthetic issues involve problems of rhythm, metrics, and silence in poetry.

Class Notes: **This course will be taught remotely Spring Term 2022.**

Everybody Loves Roland (218132)

Namwali Serpell

2022 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course is a survey of the work of the literary theorist Roland Barthes. We will read a selection of his eclectic, rangy, and influential writing, alongside responses to it by authors from Derrida to Sontag to Eugenides. We will use this corpus of writing to explore crucial currents in theory, criticism, and fiction from the sixties to today, including authorship, reader response, phenomenology, structuralism and its aftermaths, cultural studies, queer studies, media studies, affect theory, postcritique, and the theory novel.

Experimental Criticism (216101)

Beth Blum

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

During a time of rampant, albeit necessary, pre-professionalization, this graduate seminar is meant to both model and inspire academic risk-taking. It offers a selective overview of recent literary criticism that productively transgresses formal, conceptual, and disciplinary norms. Readings may include: Brent Hayes Edwards, Susan Stanford Friedman, Sianne Ngai, Saidiya Hartman, Eric Hayot, Paul Saint-Amour, Paul Stephens & Robert Hardwick Weston, and Wai Chee Dimock, among others.

G1 Proseminar (217789)

Nicholas Watson

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The first-year proseminar (taken in the spring semester of the first year) introduces students to the theories, methods, and history of English as a discipline, and contemporary debates in English studies. The readings feature classic texts in all fields, drawn from the General Exam list. This first-year proseminar helps students prepare for the General Exam (taken at the beginning of their second year); it gives them a broad knowledge for teaching and writing outside their specialty; and it builds an intellectual and cultural community among first-year students.

Course Notes: **This is only for first year graduate students in the English Department.**

G2 Proseminar (217790)

Kelly Rich

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This second-year proseminar has a two-part focus: it introduces students to the craft of scholarly publishing by helping them revise a research paper for publication in a peer-reviewed journal by the end of the course. It thus gives students the tools to begin publishing early in their career. It also introduces students to the growing array of alternative careers in the humanities by exposing them to the work of scholars who are leaders in fields such as editing, curating, and digital humanities.

Placement Seminar (207884)

Sarah Dimick

Tara Menon

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0459 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The job placement seminar will meet during the Fall semester to help students prepare dossiers of their work for the academic job market and facilitate explorations of careers beyond the academy. The class will meet roughly every two weeks, providing a supportive structure for participants to produce, workshop, and revise application materials. We will also arrange mock interviews and practice teaching demonstrations. The placement officers provide one-on-one support with editing/proofing materials and guidance in navigating the applications process. This seminar is restricted to students in the English department. We welcome students who are intending to actively apply for postdocs or jobs this year to enroll; some seminar sessions suitable for those interested in thinking about the market or their career options but not actively applying this year will be advertised more widely and open to all graduate students in the department.

Environmental Science and Public Policy

Subject: Environmental Sci & Public Pol

Environmental Sci & Public Pol 77 Section: 999

Technology, Environment, and Society (109882)

Sheila Jasanoff

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Our interactions with the natural world are increasingly mediated through changes in technology. Technologies create risks, generate solutions, reshape the environment, and alter our perception of the boundaries between nature and artifice. This course draws on major theories of technology and society to inform and deepen our understanding of environmental crises, problems, possible fixes, and policy options.

Marine Conservation Biology (119814)

Alan Hoelzel

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Conservation Biology promotes the documentation, understanding and preservation of biodiversity in natural ecosystems. It depends on the integration of diverse disciplines ranging from evolutionary biology and ecology to economics and social sciences. In 1985 Michael Soulé defined conservation biology as driven by crisis, and the relationship between ecology and conservation biology as analogous to the relationship between physiology and surgery. In this course we will focus on the marine environment, and consider the nature and diversity of the habitat, the units of conservation ranging from genetic diversity to whole ecosystems, conservation issues, and potential solutions. We will consider a series of case studies, one of which will be complemented by a field trip within New England to be arranged.

The Law and Policy of Climate Change: Influencing Decision Makers (208113)

Aladdine Joroff

2021 Fall (4 Credits) **Schedule:** W 0600 PM - 0830 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

Empirical data demonstrate that the climate is changing and that these changes could produce increasingly serious consequences over the course of this century. Governments and private actors around the world are strategizing, debating, lobbying, implementing, and defending mechanisms to both mitigate and adapt to the impacts of climate change. This course will explore (i) the legal framework in which climate change action occurs in the United States, (ii) policy tools available to regulators, (iii) impacts on regulated entities and individuals and (iv) opportunities for private stakeholders to participate in and influence climate change decisions.

Applied Environmental Policy Analysis: Air Pollution, Solar Geoengineering and Environmental Justice (218597)

David Keith

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0515 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

What makes good public policy analysis? Can analytic tools such as cost-benefit analysis help resolve environmental policy disputes? What are the limits to such tools? This seminar aims to teach the basics of public policy analysis applied to environmental problems through two case studies: air pollution and solar geoengineering research. The impacts of air pollution and climate change are unequally distributed, with the worst harms often falling on the poor and powerless. Environmental advocates, often conflate air pollution and greenhouse gases into an overarching concern for environmental justice. Yet practical policymaking must face tradeoffs between air quality, climate, and social justice. Students will work in pairs to explore these tradeoffs in policies such as solar subsidies for low-income residents. Solar geoengineering is fiercely disputed. It might reduce climate risks, yet it entails novel risks and raises concerns about environmental justice. Students will explore the establishment and governance of a solar geoengineering research program and asses the limits of policy analytic tools when applied to transformative technologies with deep uncertainty and global reach.

Course Notes:

While there will be some lectures, this class is seminar format with a strong emphasis on in-class interactive engagement. First year students should consult instructor.

Addressing the Global Climate Crisis: Challenges for Both Developed and Developing Economies (123858)

Michael McElroy

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

The seminar will discuss the nature of the climate challenge and the implications it poses for different communities and different parts of the world. Mitigating negative impacts of human induced climate change will require an urgent transition from the current global fossil fuel-based energy economy to one based on renewable alternatives. Possibilities include wind, solar, hydro, biomass and potentially nuclear. The seminar will review options with specific attention to differences in the challenges faced by developed economies such as the US and Europe and large developing economies such as China, India and parts of Africa. Can we chart a feasible path to net zero global carbon emissions by 2050?

Climate (In)Justice (219960)

Daniel Schrag

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

"Climate justice" is an emerging mode for thinking about climate change, focusing on the ways that climate impacts and responsibilities are unevenly imposed on certain populations. In this seminar, we will examine the concept of climate justice from a variety of perspectives. We will start by focusing on international and economic dimensions, based on the simple truth that many people and nations will suffer damages despite their minimal contributions to global emissions. We will then look at intergenerational justice, exploring the question of what ethical responsibilities exist to provide similar opportunities to future generations that we now enjoy. We will also consider domestic aspects of climate justice, examining historical examples of racial and socioeconomic discrimination related to climate change. Finally, we will consider the policy responses to climate injustice, exploring the different pathways for ensuring a more just and equitable future.

The Technology, Economics, and Public Policy of Renewable Energy (127572)

George Baker

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Energy is the lifeblood of economic activity, indeed of human society. However, the planet's stores of easily accessed fossil fuels are limited, and the climatological cost of continuing to rely on fossil fuels is high. This course examines the long run and short run prospects for renewable energy. We start by understanding the technology of various renewables, including hydro, solar, wind, biomass, etc. We then examine the economics of these technologies, and how policies (subsidies, taxes, regulations) affect their viability. Special attention will be paid to the interaction of technology, economics, and public policy.

Recommended Prep:

Economics 10a.

Supervised Reading and Research (110943)

Noel Holbrook

2022 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Supervised reading and research on topics not covered by regular courses of instruction. Students must complete a registration form, including permission from their faculty sponsor, with the concentration office before course enrollment. A final paper describing the research/reading completed during the term is due in duplicate to the Head Tutor on the first day of reading period.

Course Notes:

Intended for junior and senior concentrators in Environmental Science and Public Policy; open to sophomore concentrators only under exceptional circumstances. Permission of the Head Tutor is required for enrollment. May be counted for concentration only with the special permission of the Head Tutor.

Water Resources in Developing Countries (219916)

Ken Thomas

2022 Spring (4 Credits) **Schedule:** MWF 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will examine major issues of water resources (i.e. water sources, supply, quality, treatment, use, distribution and storage, policy) in the developing world at various geographic locations and scales. Specific water resources issues will be highlighted through in-depth case studies from Africa, Asia, and Small Island Developing States. Analysis of the hydrological, technological, legal, and geopolitical factors that affect the availability of water for human consumption and agriculture will be explored in all cases. To understand fundamentals in the developing world context, the course will compare how water resources are managed in the developed and developing world. Fundamentals cut across water-related policies, water flows, water sources, water supply, water and wastewater treatment, water distribution, and water storage. The course will emphasize – both quantitatively and qualitatively – the real-world challenges and systemic issues of the developing world that make water resources planning and management complicated.

Class Notes: **Lectures Mondays/Wednesdays. Section meeting on Fridays.**

Environ Science & Engineering 6

Introduction to Environmental Science and Engineering (116362)

Steven Wofsy

Bryan Yoon

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will provide students with an introduction to environmental science and engineering by providing an overview of current environmental issues, including climate change, air pollution, and water pollution. Students critically evaluate underlying science and knowledge limitations, and explore the nexus between scientific knowledge, regulatory frameworks, and engineering solutions to some of the world's most pressing environmental problems. The course will emphasize the interconnected biological, geological, and chemical cycles of the earth system including the multi-dimensional impacts of human activity.

Course Notes:

ESE 6 is also offered as EPS 6. Students may not take both for credit.

Recommended Prep:

The course presumes basic knowledge in chemistry, physics, and mathematics at the high school level. Students will acquire additional skills and knowledge in these areas, as applied to environmental problems, as well as learning basic data analysis and coding skills.

The Fluid Earth: Oceans, Atmosphere, Climate, and Environment (218887)

Ann Pearson

Marianna Linz

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces students to the fluid Earth, emphasizing Earth's weather and climate, the carbon cycle, and global environmental change. The physical concepts necessary for understanding the structure, motion and energy balance of the atmosphere, ocean, and cryosphere are covered first, and then these concepts are applied in exploring major earth processes. Examples from Earth's past history, on-going

changes in the climate, and implications for the future are highlighted.

Course Notes:

Course includes lectures twice a week, a one hour section, and lab. ESE 50 is also offered as EPS 50. Students may not take both for credit. This course fulfills the EPS sub-discipline requirement of Atmosphere(s) and Oceans.

Global Warming Science 101 (214500)

Eli Tziperman

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An introduction to the science of global warming/ climate change, meant to assist students to understand issues that often appear in the news and public debates. The course is meant for any STEM student with a basic math preparation, not assuming prior science courses. Topics include: the greenhouse effect, and consequences of the rise of greenhouse gasses including sea level rise, ocean acidification, heat waves, droughts, glacier melting, hurricanes, forest fires and more. Throughout, an ability to critically evaluate observations, predictions and risk will be emphasized. The students will be involved in in-class quantitative analysis of climate observations, feedbacks and models via python Jupyter notebooks that will be provided.

Course Notes:

This course fulfills the E-PSCI sub-discipline requirement of Atmosphere(s) and Oceans. E-PSCI 101 is also offered as ESE 101. Students may not take both for credit. For SB students: this course can only count as a science elective in the concentration requirements, and SB students must enroll in E-PSCI 101. AB students may enroll in either E-PSCI 101 or ESE 101 to meet their concentration requirements.

Recommended Prep:

Basic calculus and ordinary differential equations, as covered for example by Math 1b, Math 19a, Math 21b. A minimal previous expoure to programming in any programing language is sufficient, python will be introduced a part of the course.

Introduction to Physical Oceanography and Climate (156500)

Eli Tziperman

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Observations and fundamentals of ocean dynamics, from the role of the oceans in global climate and climate change to beach waves. Topics include the greenhouse effect, oceans and global warming; El Niño events in the equatorial Pacific Ocean; currents: the wind driven ocean circulation and the Gulf stream; coastal upwelling and fisheries; temperature, salinity, the overturning circulation and its effect on global climate stability and variability; wave motions: surface ocean waves, internal waves, tsunamis and tides; ocean observations by ships, satellites, moorings, floats and more.

A field trip to the Woods Hole Oceanographic Institution on Cape Cod will be held during the course, which will be an opportunity to learn about sea-going oceanography. Software for scientific computation and graphics will be introduced (students may choose either Matlab or python), which will be used for some homework assignments.

Course Notes:

EPS 131 is also offered as ESE 131. Students may not take both for credit. This course fulfills the EPS sub-discipline requirement of Atmosphere(s) and Oceans. Given in alternate years.

Recommended Prep:

Mathematics 21a and 21b; and Physical Sciences 12a, Physics 15a or

Environ Science & Engineering 137

Energy within Environmental Constraints (156215)

David Keith

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course provides a systematic introduction to the energy system for students in engineering and applied sciences. Students should gain a working understanding of the some of the most important energy technologies, from prime movers--gas turbines, steam cycles, and reciprocating engines--to secondary energies including fuel production and refining technologies and the electricity transmission and

distribution system. The course aims at a systematic understanding of the energy system's environmental footprint as a tool to help students who will work to reduce it. Energy is a commodity. One cannot hope to re-shape the energy system to meet environmental constrains without a rough working understanding of energy markets--costs, prices and elasticities of supply and demand. So the course will integrate engineering economics and other applied social sciences into the treatment of energy technologies to enable a system's view of energy.

Recommended Prep:

This course requires a solid foundation in high school level math, chemistry, and physics. Please contact the instructor for permission if you do not have formal prerequisites yet are keen to take the course and do have foundational skills.

Requirements: **Prerequisites: Math 1a; and Physical Sciences 11 (or equivalents).**

State-of-the-art Instrumentation in Environmental Sciences (161263)

Frank Keutsch

2022 Spring (4 Credits) **Schedule:** MWF 0945 AM - 1100 AM

Instructor Permissions: None **Enrollment Cap:** 30

This course will showcase how novel technologies have allowed fascinating new insights into key aspects of our environment that are of high societal importance. Students will gain both an understanding of topics such as climate change and air pollution as well as detailed knowledge of the design and underlying principles of environmental instrumentation, especially via the hands-on laboratory sessions.

The development of novel instrumentation, driven by technological advances, is transforming observations and revolutionizing the environmental sciences. For example, they introduce new observables and extend the spatial and temporal coverage and resolution of (Earth) observations. This course will highlight how state-of-the-art instrument design has enabled these fascinating advances by focusing on the engineering as well as physics and chemistry principles that are central to this success. A central component of the course consists of laboratory sessions that provide hands-on experience on important aspects of instrumentation, ranging from data acquisition, instrument control software, basic electronic filtering all the way to learning design concepts and operation of spectroscopic, mass-spectrometric and separations instrumentation. There will also be a tour of some of the laboratories using state-of-the-art environmental instrumentation at Harvard. The course and especially the laboratory experiments contain aspects from various engineering disciplines including environmental, electronic and mechanical engineering.

Recommended Prep: **Math 1a, b; PS 11 or equivalent; PS 12a, b (or Physics 15a, b or AP 50a, b).**

Requirements: **Prerequisite: Math 1b; Physical Sciences 1 or 11; and Physical Sciences 12a and 12b (or equivalents)**

Environ Science & Engineering 168

Human Environmental Data Science: Agriculture, Conflict, and Health (216460)

Peter Huybers

2021 Fall (4 Credits) **Schedule:** T 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

The purpose of this course is to develop understanding and guide student research of human and environmental systems. In class we will explore agriculture, conflict, and transmissible disease. Study of each topic will involve introduction data, mathematical models, and analysis techniques that build toward addressing a major question at each interface: Have agricultural systems been adapted to climate change? Has drought caused conflict? And does the environment influence the spread of COVID-19? These questions are diverse, but are addressed using common analytical frameworks. Analytical approaches include simple mathematical models of feedback systems, crop development, and population disease dynamics; frequentist statistical techniques including linear, multiple linear, and panel regression models;

and Bayesian methods including empirical, full, and hierarchical approaches. You will be provided with sufficient data, example code, and context to come to your own informed conclusions regarding each of these questions. Furthermore, topics covered in class will pro-vide a template for undertaking independent research projects in small teams. Research will either extend on topics presented in class or address other human-environmental questions. Historically, such student projects have sometimes led to senior theses or publication in professional journals.

Course Notes:

ESE 168 is also offered as E-PSCI 168. Students may not take both for credit. Undergraduate Engineering Students should enroll in ESE 168. Enrollment is by instructor permission.

Class Notes: **EPS/ESE168 Course Preview, Tuesday, Aug 24th 3:45-4:45pm.**

Ethnicity, Migration, Rights 121

Native Americans in the 21st Century: Nation Building II (160752)

Eric Henson

2022 Spring (4 Credits) **Schedule:** F 1030 AM - 1230 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This community based research course focuses on some of the major issues Native American Indian tribes and nations face in the 21st century. It provides in-depth, hands-on exposure to native development issues, including: sovereignty, economic development, constitutional reform, leadership, health and social welfare, tribal finances, land and water rights, culture and language, religious freedom, and education. In particular, the course emphasizes problem definition, client relationships, and designing and completing a research project for a tribe, tribal department, or those active in Indian Country. The course is devoted primarily to preparation and presentation of a comprehensive research paper based on work with a tribal community. In addition to faculty presentations on topics such as field research methods and problem definition, students will make presentations on their work in progress and ultimate findings.

Love's Labors Found: Uncovering Histories of Emotional Labor (207804)

Caroline Light

2021 Fall (4 Credits) **Schedule:** R 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 30

How do love, care, and desire influence the value of work, and why is emotional labor – which is vital to child or elder care, domestic labor, nursing, teaching, and sex work – often considered to be something other than work? How and why do the racial and gender identities of workers affect the economic, social, and emotional value of their labor? How do political and social arrangements of labor help produce and reinforce racial categories while solidifying the boundaries separating masculinity and femininity? Through a mix of primary and secondary sources, this seminar explores histories of emotional labor and the power structures that give meaning to often taken-for-granted categories of work. These sometimes hidden histories are key to untangling the gender, sexual, and racial implications of the "intimate industries" that populate today's transnational labor economies.

Course Notes:

This course, when taken for a letter grade, counts as a portal course for the secondary field in Ethnicity, Migration, Rights (EMR).

Synchronous attendance required. Class meetings will not be recorded.

Ethnicity, Migration, Rights 133

Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)

Eleanor Craig

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we ask, the information that counts as data, and the genres of work that we recognize as 'academic'?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with ethnic studies, it aims to serve as a 'Theories and Methods' course, providing tools and strategies for refining one's own interdisciplinary inquiries.

Course Notes:

Weekly lectures and a one hour section to be arranged.

Synchronous attendance is expected. The class will not be recorded.

Coloniality, Race and Catastrophe (213559)

Mayra Rivera

2022 Spring (4 Credits) **Schedule:** T 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 18

This course explores the relationship between coloniality, race and ecology through the lens of "catastrophe." We will examine a variety of theoretical and literary sources that deploy or refute tropes of the "end of the world." We will study different uses of "catastrophe" to denounce the destruction of a particular world, re-imagine the past, or proclaim the impossibilities of the present. Through the readings and discussions, we will analyze the aims, effectiveness and limitations of talk of catastrophe in the

contemporary context. Jointly offered as HDS 2432.

Race, Solidarity, and the Carceral State (216400)

Sara Awartani

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar surveys how U.S. social and racial justice movements have encountered and interacted with the rise of the carceral state. Using case studies from Black, Arab American, Latinx, and other New Left and progressive movements, we will ask: what possibilities of resistance are imagined under conditions of repression? And how have these possibilities of resistance and conditions of repression changed over time? Together we will consider how imprisonment, surveillance, and political repression have shaped social movements, racial formations, and U.S. politics since the late 1960s, with attention to the following topics: COINTELPRO & the civil rights movement; Operation Boulder and federal surveillance; Reagan, counterterrorism, and the New Left; prisons and policing; and the militarization of borders.

Migration and U.S. Empire (218535)

Evan Taparata

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar explores the role that migration and borders have played in shaping U.S. empire from the late 18th century into the present. By recognizing settler colonialism, slavery, and immigrant gatekeeping as foundational formations of United States imperialism, this course encourages students to analyze the many ways that borders have been used throughout U.S. history to shape the ability of people to move and to stay in order to control land, labor, and resources within and beyond North America. Topics include racialized citizenship; Indian removal; the global slave trade; continental and international expansion; immigration restriction and border policing; militarism and humanitarianism; sanctuary and asylum; and the war on terror. In addition to drawing on an interdisciplinary slate of readings, "Migration and U.S. Empire" will feature a series of collaborative and individual assignments in which students will explore and engage directly with the many ways migrants, people in motion, and their allies have challenged and defied

border imperialism in the past and in the present.

Ethnicity, Migration, Rights 147

COVID-19, inequality and the Latinx community (218601)

Americo Mendoza-Mori

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

When the coronavirus pandemic started to hit the world in 2020, it gave the wrong impression that it would affect everyone the same way, acting as a 'great equalizer'. However, the effects of COVID-19 exacerbated structural injustices and the impact varied dramatically different depending on race, gender, class. According to data from the Centers for Disease Control and Prevention (CDC) in May 2021, Hispanics/Latinos were twice as likely to get the virus in comparison to white adults, and 2.3 times more likely to die from it. Even as vaccines have become available, their distribution has also been affected by disparities of access.

For this class we will analyze discursivities that have been exposed by the pandemic and have since become topics of ethical and social reevaluation: health disparities, the distribution of labor, housing and transportation, language access, environmental racism (including activism against anti-Asian and anti-Black violence). At the same time, we will explore public policy and solidarity grassroot initiatives that have provided community support and programmatic responses on healthcare, social and racial justice, and climate issues to the future of US society.

Community testimonies and guest speakers, multimedia content, interdisciplinary readings, and class debates are intended to encourage reflection and to learn from underrepresented voices of the pandemic. This is a speaking seminar, open to all students, that will promote oral communication and critical thinking skills through discussions, projects, and prepared presentations.

Ethnicity, Migration, Rights 148

Indigeneity and Latinidad (218826)

Americo Mendoza-Mori

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

As the original inhabitants of the Americas, Indigenous communities resist and thrive across the hemisphere, despite the dynamics of colonization that still affect their existence and way of living. Many prejudices affect these communities, sometimes perceived as 'timeless' and 'pure' subjects, when in reality adaptation and migration have been a constant characteristic for many of these groups. The course offers an exploration of the diversity of Indigenous Latinx communities across the United States and their migration processes and current enclaves in urban and rural areas: OaxaCalifornia, the Mixtec/Zapotec community in Los Angeles County; Quechua/Kichwa-language speaking groups of Andean heritage in the Washington DC and New York metro areas; Guatemalan-Maya neighborhoods in South Florida and California; transnational communities in what is now the US-México border, among others.

Additionally, this seminar will facilitate a platform to discuss expanding notions of Latinidad, mestizaje and Indigeneity, drawing on how current conversations, education and social movements are re-imagining identity. Throughout the class, students will be exposed to frameworks of decolonial history and knowledge, participation and agency, migration, notions of border thinking, and the current state of Indigenous rights movements.

Community testimonies and guest speakers, multimedia content, interdisciplinary readings, and class debates will be part of the dynamics of this course. This is a speaking seminar, open to all students, that will promote oral communication and critical thinking skills through discussions, projects, and prepared presentations.

Ethnicity, Migration, Rights 149

Latinx Representation in Media, Films, and Pop Culture (218827)

Americo Mendoza-Mori

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 25

Latinos have made significant contributions to film and television productions, and now they are avidly creating content for digital platforms. Furthermore, they are important media consumers in U.S. society despite having a limited presence in the industry: in 2019 Latinos/as/es accounted only for 4,6 % of the acting roles in Hollywood while being 23% of the total movie theater audience in the United States. Public debates on diversity have acknowledged that media representation matters due its power on shaping ideas; these media representations can either reinforce or demystify racial and cultural stereotypes.

For this interdisciplinary introductory level course we will examine, from a critical perspective, the production of representations on Latinx cultures in media, film and pop culture. Students will be able to get a general sense of the state of the Latino media landscape in the U.S. and understand the contexts in which these industries were developed, and how different Latinx cultural agents are trying to close the representation gap by generating support and advocacy networks. Students will also be able to assess strengths, weaknesses and future challenges for Latinx media representation.

Readings, cultural products and discussions for this class will include literature, music, media (films,

TV shows and digital content), and bibliography on ethnicity, creative economy, cultural policy, bilingualism. This is a broad-based course open and accessible to all students.

Ethnicity, Migration, Rights 150

Meeting Asian/Arab American Studies (218588)

Ida Yalzadeh

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

In this course, we will explore, expand, and question the disciplinary boundaries between Asian American and Arab American Studies. Grounded in converging critiques of US empire, we will ask: what are the possibilities and limitations of linking these two fields in shared struggle and solidarity? What can each field give to and take from the other, and how are they already intersecting? The course is organized around major topics in Asian American and Arab American studies—such as questions of the refugee, war & violence, surveillance, and the model minority myth/Good Muslim trope—as a way of uncovering the overlapping nature of these two sub-fields within the interdisciplinary field of Ethnic Studies.

Ethnicity, Migration, Rights 1010

Topics in Latinx Studies: Imagining Latinidad (218600)

Americo Mendoza-Mori

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is intended to provide hands-on practice toward doing research on Latinx issues, with an approach grounded in the understanding that terms 'Hispanic' and 'Latinidad' are not static concepts and, at the same time, not a homogeneous mix. We will examine culture, intellectual production, languages, economics, and political thought, as well as the dynamics of Latino/a/e people in the United States. Throughout the class, students will become familiar with a wide range of thinkers, currents, concepts, topics, and they will be exposed to frameworks of decolonial history and knowledge. The class will also facilitate conversations about the current place of Latinx cultures within the U.S. imaginary, including the immigrant groups from Mexico, Central and South America, the Caribbean, as well Indigenous and Afro-diasporic communities.

Readings, cultural products and discussions for this class will include literature, music, traditional and social media, and bibliography on history, linguistics, ethnic and social studies. Special attention will be paid to issues of race, ethnicity, gender, class. This is a broad-based course open and accessible to all students.

Topics in Asian American and Pacific Islander (AAPI) Studies (218825)

Eleanor Craig

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 25

Topics in AAPI Studies is an interdisciplinary introductory level course. It will focus on converging and diverging aspects of Asian American and Pacific Islander histories and experiences through historical, theoretical, and cultural lenses. Units of study will focus on coloniality and ecology, anticolonial and antiracist solidarities, and formations of desire/ability. In addition to academic texts, course materials will include poetry, music, film, and other media.

Expository Writing

Subject: Expository Writing

Expository Writing 10 Section: 102

Introduction to Expository Writing (118262)

Tad Davies

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Department **Enrollment Cap:** 10

In Expos Studio 10, students practice analyzing sources, developing and organizing their ideas, and making arguments as they become familiar with the expectations of college writing. In small classes taking a hands-on approach, students work closely with instructors to learn strategies for drafting and revising clear, engaging essays. Students meet frequently in individual conferences with instructors to discuss their work, and the class also emphasizes collaborative work among students. In a small community of writers, students participate in workshops to discuss each other's work, thereby becoming more skillful at reading and revising their own writing. Assignments are based on sources from a range of disciplines and genres, and build in complexity so that students can master essential skills at each step. Expos Studio 10 focuses on academic essays as well as the personal statement required for fellowship or internship applications. Following Expos Studio 10, students take either Expos Studio 20 or an Expos 20 course to meet the writing requirement. All students meet with an Expos faculty member to discuss their course placement before enrolling.

Topic: **Expos Studio 10: Introduction**

Course Notes:

After taking Expos Studio 10, a student must pass Expository Writing 20 or Expos Studio 20 to meet the College's Expository Writing requirement.

Students meet frequently in individual conferences with instructors to discuss their work, and the class also emphasizes collaborative work among students. In a small community of writers, students participate in workshops to discuss each other's work, thereby becoming more skillful at reading and revising their own writing. Assignments are based on sources from a range of disciplines and genres, and build in complexity so that students can master essential skills at each step. Expos Studio 10 focuses on academic essays as well as the personal statement required for fellowship or internship applications. Following Expos Studio 10, students take either Expos Studio 20 or an Expos 20 course to meet the writing requirement. All students meet with an Expos faculty member to discuss their course placement before enrolling.

Topic: **Expos Studio 10: Introduction**

Course Notes:

After taking Expos Studio 10, a student must pass Expository Writing 20 or Expos Studio 20 to meet the College's Expository Writing requirement.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **From Homer to Jay-Z: Craft an**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **From Homer to Jay-Z: Craft and Complexity in Verbal Art and Oral Traditions**

From ancient Greece to modern rap battles, we have gathered to hear and create stories that reflect the way we define ourselves and our communities. What accounts for the persistence – and complexity – of the oral tradition? How are the performances of artists such as Homer and Jay-Z uniquely characterized through the verbal art form? In this course we will attempt to answer these questions by studying oral storytelling in ancient and modern contexts. In Unit I, we will look at historically oral traditions and delve into the paradox of studying verbal art that has been passed down to us through written texts and material effects? We will study one of the oldest and most famous of oral epics - Homer's Iliad - along with ancient Greek artifacts at the Harvard Art Museum and Boston Museum of Fine Arts. In Unit II, we shall ask what correctly categorizes something as verbal art. We will apply theories of oral epic to more recent verbal traditions by listening to the freestyle rap of Eminem, and watching performances of TikTok artist, Ayanna Albertson. Finally, in our third unit, we will take a step back to consider how oral tradition functions in opposition or subversion to dominant culture by researching different contemporary sources. We will consider the modern podcast as exemplified by 'The Joe Rogan Experience,' multimedia exhibits in museums such as Harvard's Peabody, and BiPOC rap artists such as Tupac and Nicki Minaj, among other subjects. Throughout the course, we will consider together what orality and verbal art communicate that writing cannot, what we mean by "literacy," and if we can ever even clearly distinguish the "oral" from the "written."

Topic: **Republic or Empire? Debating I**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Republic or Empire? Debating Imperialism in American History**

Can a nation be both a republic and an empire? Americans have debated this question for over a century. Today, many believe that the United States has never been an empire, arguing that American influence abroad differed from European colonialism, focusing on extending democracy rather than creating colonies. Others disagree, countering that the United States has long maintained an invisible empire through its territories and spheres of informal control. In this seminar, we explore a pivotal period in American expansion: the Spanish American and Philippine American Wars of 1898-1902. For the first essay, students will analyze William Jennings Bryan's famous speech against what he described as America's imperialist policies in 1900. Next, we shift to historical scholarship that explores questions of race and gender in understanding the actions and views of diverse Americans during these wars. For the final essay, students engage in independent research regarding the ways that Americans - particularly Harvard faculty and alumni - responded to these wars and American foreign policy. Students select an individual of their choice and research his or her views regarding American expansion and democracy.

Topic: **Wastelands**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Wastelands**

The impenetrable wilderness of *The Revenant*, the diseased streets of *Children of Men*, the trash heap cities of *Wall-E*—these are the wastelands that fascinate our pop culture. On the screen, they come to life as horrifying alternate universes and dead civilizations—the very fates we must avoid at all costs. And yet wastelands are not exclusively the stuff of science fiction. In this course, we will grapple with both imaginary and actual wastelands. We will begin with short stories by Jack London, Thomas King, and Octavia Butler. From the icy wilds of the Yukon to the borderlands of Native American exile, these writers question the way wastelands have been imagined, especially in North America, over the past century. Next, we will turn to real wastelands—to the garbage dumps and arid landscapes where nothing grows. We will ask what these places reveal about their inhabitants, their struggles, and their achievements. Finally, students will research a wasteland of their own choosing—anything from the mega slums of Mumbai to the sprawl of Boston's unused rooftops. Along the way, we will investigate how wastelands form and evolve, and how people adapt to them. Are wastelands actually the places we should avoid at all costs, or are they the places we can no longer afford to ignore?

Topic: **Reading Museums**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Reading Museums**

As a repository of treasured cultural objects or a labyrinth of imposing masterpieces, museums can loom large in the public's imagination. Because they often command reverence as hallowed institutions of culture and education, it can be difficult to decode museums beyond the authoritative guides and scripted tours. Sometimes, as art historian Svetlana Alpers notes, "[m]useums can make it hard to see." In this course we will learn to "see" museums for ourselves – as cultural critics and personal stakeholders, examining the museum as a vital mode of cultural representation. We will analyze its visual language (e. g. its architectural design and layout, the curation and staging of its collections, its use of lighting, installations, and multimedia) as well as its written one (e.g. wall text, signage, and catalogue). Moreover, we will explore different genres of museums (e.g. large public art museum, private house museum, local gallery, natural history museum, etc.). We will investigate how these categorical differences can affect the way museums tackle the following questions: How do museums attempt to represent a nation's collective past, its singularity and diversity, and what do they reveal about our present values? How do museums grapple with the haunting legacies of historical atrocities in the case of slavery and colonialism? How do museums open themselves up to diverse (and sometimes contradicting) perspectives of race, class, and gender? Those questions allow us to examine how museums communicate and mediate our most cherished and contested values about who we are as individuals, as a society, and as a nation.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Remembering the Civil War**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Remembering the Civil War**

In the summer of 2020, cities across America exploded into protest. As the weeks dragged on, civil unrest that began with the murder of George Floyd shifted focus. Protesters across the US, and then across the globe, began to tear down statues. And not just any statues – memorials to Civil War generals. Since the violent protests in Charlottesville four years ago to the banning of Confederate flags at NASCAR, from Plantation weddings to drama on The Bachelor, the Civil War is at the center of American conversations. How did we get here? How is it that in 2020 symbols and flags of a war a century-and-a-half old still dominate our political landscape?

This class will examine the fine line history and memory, and explore the history *of* memory. Using pop culture, guest speakers, walking tours, and scholarly studies we will explore where the mythologies around the War came from and try to understand how they affect our current understandings of politics and identity. In Unit One we will begin by looking at Harvard's own Memorial Hall. Then, in Unit 2, the class will turn a critical eye on one of the most iconic films of all time: *Gone with the Wind*. Finally, students will pick their own piece of memory – be it a country music star, an HBO special, reenactors or a statue, to research. At the end, we will engage in the public, political conversation with a capstone Op-Ed.

Topic: **Slave Narratives**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Slave Narratives**

Written from the late 18th to the late 19th century in the United States, slave narratives recounted the harrowing story from slavery to freedom, the escape from the South to the North, and the intellectual journey towards literacy and public speaking. This course examines some famous representatives of this genre as well as post-Civil Rights modifications of such narratives. In the first weeks, we will analyze what roles literacy and rhetoric played in the popular *Narrative of the Life of Frederick Douglass* (1845) and Harriet Jacobs' *Incidents in the Life of a Slave Girl* (1861). We will hone in on the complex relationship between black American writers of slave narratives and their white editors, who oversaw what was published, edited the narratives, vouched for their truth-value, and appended them with documents. In our second unit, as a point of comparison and continuing dialogue, we will examine the neo-slave narrative, a modification and updating of the genre after the Civil Rights Movement of the 1960s. In particular, we will look carefully at one of its most famous examples, Toni Morrison's *Beloved* (1987), and address the following questions: How do African American authors rewrite the slave narratives and their conventions? How does their language of slavery differ from their predecessors? How do they understand the lasting legacy of slavery and trauma, seeking to make sense of past injustice and atrocity? Finally, this course will examine a contemporary iteration of the neo-slave narrative, Colson Whitehead's *The Underground Railroad* (2016). Specifically, we will examine how this next generation of African American writers experiments with the genre. What role does fantasy play in the representation of slavery and its history? And, in light of recent cinematic adaptations of slave narratives, how may the market influence these texts? Our primary readings will be accompanied by seminal essays on the literary genres of the slave and neo-slave narratives, their historical development, and their high political and cultural stakes.

Topic: **1984: Orwell's World and Ours**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **1984: Orwell's World and Ours**

When George Orwell wrote *1984*, the year that gave the book its title and setting lay 35 years ahead. Today, it is more than 35 years in the past, and yet Orwell's prophecies are as relevant as ever. *1984* has surged to the top of the best-sellers chart three times in the last decade, always at moments when Orwell's fiction and our reality seemed eerily similar: in 2013, after Edward Snowden blew the whistle on the NSA's secret mass surveillance program; in 2017, when a Trump spokesperson debuted the concept of "alternative facts" to an incredulous public; and in 2021, following the insurrection at the US Capitol and then-President Trump's suspension from Facebook and Twitter. Even if you've never read the book yourself, you've probably heard – maybe even used – some of its iconic phrases: Big Brother, Thought Police, doublethink, thoughtcrime, Newspeak, or 2+2=5. Orwell invented all of this because he wanted to give his readers a handle on what was happening in the world. Much has changed since then, including the fall of the totalitarian regimes that inspired the

novel, and yet it seems we still cannot put Orwell's premonitions behind us.

In this course, we examine the enduring significance of 1984 from three different angles. In the first unit, we'll grapple with the text itself, close-reading key passages from the novel and using them to explore the underappreciated nuances of Orwell's masterpiece. In the second unit, we'll consider the text in its historical context, drawing evidence from Orwell's non-fiction writing to add depth and sophistication to our analysis. In the third unit, we'll consider whether and how Orwell's novel illuminates *our* future. You'll have the opportunity to pursue independent research on key Orwellian themes such as authoritarianism, post-truth, censorship, and surveillance, in order to see how the arguments of contemporary scholars and thought leaders have updated Orwell's insights for the twenty-first century.

Topic: **Religious Pluralism**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Religious Pluralism in the United States**

The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and behavior. And despite predictions to the contrary, levels of devout religious belief remain high, evidenced by recent controversies over a proposed Islamic community center in Lower Manhattan, as well as Supreme Court rulings on female access to contraception and same-sex marriage. How do people—including nonbelievers—experience this religious multiplicity? How are these vast religious differences negotiated socially, culturally, politically, and legally? Moving beyond

theology, this course will explore the broad concept of lived religion in the United States. Through readings in fiction, law, history, and sociology, we'll tackle these fundamental issues. In Unit One, we'll read Ayad Akhtar's 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars' arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

Topic: **Wastelands**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Wastelands**

The impenetrable wilderness of *The Revenant*, the diseased streets of

***Children of Men*, the trash heap cities of *Wall-E*—these are the wastelands that fascinate our pop culture. On the screen, they come to life as horrifying alternate universes and dead civilizations—the very fates we must avoid at all costs. And yet wastelands are not exclusively the stuff of science fiction. In this course, we will grapple with both imaginary and actual wastelands. We will begin with short stories by Jack London, Thomas King, and Octavia Butler. From the icy wilds of the Yukon to the borderlands of Native American exile, these writers question the way wastelands have been imagined, especially in North America, over the past century. Next, we will turn to real wastelands—to the garbage dumps and arid landscapes where nothing grows. We will ask what these places reveal about their inhabitants, their struggles, and their achievements. Finally, students will research a wasteland of their own choosing—anything from the mega slums of Mumbai to the sprawl of Boston's unused rooftops. Along the way, we will investigate how wastelands form and evolve, and how people adapt to them. Are wastelands actually the places we should avoid at all costs, or are they the places we can no longer afford to ignore?**

Topic: **Domestic Labor**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Domestic Labor**

Domestic work, according to labor activist Ai-jen Poo, is "the work that makes all other work possible," yet the people who clean, cook, and care are so often invisible and undervalued. Because domestic labor takes place within the home rather than the factory or other industrial

sites of labor, what are the consequences of the erasure of boundaries between home and work, for both the employer and the employee? To what extent do domestic workers possess agency when their very occupation is to serve their employer? In addition to physical and mental labor required, what forms of emotional labor are also expected? What are the individual and societal ramifications of this labor force being largely unregulated, underpaid, and unappreciated? This course considers the complex forces of classism, racism, and sexism that have contributed to the subjugation of domestic workers and the labor they perform. In the first unit, students will closely read the popular British television series *Downton Abbey*, Zora Neale Hurston's short story "Sweat," and Maya Angelou's biographical fiction "What's Your Name, Girl?" to consider how the text illustrates servants possessing or lacking agency. In unit two, students will use sociologist Arlie Hochschild's theory of emotional labor as a lens through which to examine Alfonso Cuarón's film *Roma*, which features the perspective of an indigenous housekeeper and the blurry boundaries between work and family. In the final unit, students will focus on a text of their choosing, situating their work alongside the scholarly work of others. By thinking about how domestic labor is imagined in literature, television, and film, students will investigate the dynamics of privilege and power, exploitation and identity, and the care economy.

Topic: **Gender & Mental Health**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Gender & Mental Health**

This course will consider the complex questions that emerge where gender and mental health meet. We will take an interdisciplinary approach to tackling these questions, drawing on work in clinical psychology, social theory, feminist and historical analyses of clinical science, and primary source historical documents. After developing a foundational understanding of the constructs of gender and mental health, we will consider their intersection, asking *how* gender leads to illness. We will read and evaluate competing theories about the relative import of biological sex differences; gender norms and socialization; gender-based inequities, stressors, and trauma; and over-pathologizing women and gender-expansive individuals. In the second unit, we will investigate clinicians' past and current methods of *assessing* patient distress and impairment and *explaining* how that distress or impairment developed and what maintains it. To inform our investigation, we will pair historical records of female patients who reported abuse, focusing on Freud's case studies of hysteria, with more current theoretical frameworks for understanding similar symptoms and experiences. Throughout this unit, we will think about how our ideas about assessment, patient credibility, clinician expertise, and case conceptualization have endured or evolved since the establishment of the field of psychology. We will end by asking what history can teach us about conducting clinical science in a patriarchal but post-binary world. We will consider, for example, how historical treatment of women's trauma informs the #MeToo movement and how clinical science and practice might adjust to better study and serve gender-expansive individuals.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Telling Her Story: Narrative,**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Telling Her Story: Narrative, Media, and #MeToo**

In a powerful essay, the late writer and activist Audre Lorde suggested, "Where the words of women are crying to be heard we must each of us recognize our responsibility to seek those words out, to read them and share them and examine them in their pertinence to our lives." Lorde is not alone in asking us to pay attention to and take responsibility for women's stories; for centuries scholars and activists alike have championed the words of women, including women of color and queer women, whose stories have routinely gone untold or unheard. Yet if this issue has always been pressing, the call to heed women's stories seems especially urgent at a moment when such stories have come to dominate the cultural landscape and public consciousness – from news accounts to popular shows, literature to social media. This course responds to this moment by examining how women's stories are narrated across a variety of media and exploring what impact the sharing of them can have. Our first unit focuses on short stories by contemporary authors Roxane Gay, Carmen Maria Machado, and Jenny Zhang that raise questions about the body, family, love, and intersectionality. Our second unit engages visual and performance art alongside "hashtag activism" movements like #MeToo and #SayHerName. We'll probe the relationship between art and activism, considering how - and whether - art and social media can achieve what Sarah Lewis has termed "representational justice." Students develop independent research papers surrounding these topics. The semester ends with a capstone project that asks students to "curate" an online, public-facing exhibit related to their research.

Topic: **1984: Orwell's World and Ours**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **1984: Orwell's World and Ours**

When George Orwell wrote *1984*, the year that gave the book its title and setting lay 35 years ahead. Today, it is more than 35 years in the past, and yet Orwell's prophecies are as relevant as ever. *1984* has surged to the top of the best-sellers chart three times in the last decade, always at moments when Orwell's fiction and our reality seemed eerily similar: in 2013, after Edward Snowden blew the whistle on the NSA's secret mass surveillance program; in 2017, when a Trump spokesperson debuted the concept of "alternative facts" to an incredulous public; and in 2021, following the insurrection at the US Capitol and then-President Trump's suspension from Facebook and Twitter. Even if you've never read the book yourself, you've probably heard – maybe even used – some of its iconic phrases: Big Brother, Thought Police, doublethink, thoughtcrime, Newspeak, or 2+2=5. Orwell invented all of this because he wanted to give his readers a handle on what was happening in the world. Much has changed since then, including the fall of the totalitarian regimes that inspired the novel, and yet it seems we still cannot put Orwell's premonitions behind us.

In this course, we examine the enduring significance of *1984* from three different angles. In the first unit, we'll grapple with the text itself, close-reading key passages from the novel and using them to explore the underappreciated nuances of Orwell's masterpiece. In the second unit, we'll consider the text in its historical context, drawing evidence from Orwell's non-fiction writing to add depth and sophistication to our analysis. In the third unit, we'll consider whether and how Orwell's novel illuminates *our* future. You'll have the opportunity to pursue independent research on key Orwellian themes such as authoritarianism, post-truth, censorship, and surveillance, in order to see how the arguments of contemporary scholars and thought leaders have updated Orwell's insights for the twenty-first century.

Topic: **Culture and Politics of Inequa**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Culture and Politics of Inequality**

The 21st century bears witness to alarming trends in social and economic inequality. Major disparities in income, wealth, and opportunity underlie our anxieties about structural violence and anthropogenic climate change, which disproportionately affects the global south. Inequality as an analytical topic permeates academic discourses and underscores the growing public urgency for action. Continual reports on the United States' racial wealth gap, coupled with the recent Black Lives Matter protests, beg the question: How long can we settle for incremental solutions to such alarmingly imminent problems? We will begin by interrogating the Enlightenment philosophy of Rousseau in *Discourse on the Origins of Inequality*, which attempts to understand how inequality manifests from the moral complications and social conflicts of civil society. Next, we will examine *The Wretched of the Earth*, a landmark work of political philosophy by the psychiatrist and revolutionary Frantz Fanon. We will also explore how mass incarceration and contemporary forms of structural violence stem from colonialism and what one historian of the Black Radical tradition, Cedric J. Robinson, calls racial capitalism. In our final unit, we will read literature from the natural and social sciences to enter a debate about how global capital stokes the kind of human activity that has led to a troubling new geological epoch, the anthropocene. Throughout the course, we will pursue rigorous answers to the following questions, among others: What responsibilities do we share for increasingly fragmented social and economic spheres when many forms of inequality are at a century high? To what extent is the violence waged by states and private interests endurable or unacceptable? In what ways has the pandemic affected inequality? What must we do if climate change continues to outpace our timelines for environmental solutions?

Topic: **Society and the Witch**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Society and the Witch**

Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand others' beliefs in the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we closely analyze the film *Harry Potter and the*

Chamber of Secrets **and the television sitcom** ***Bewitched*****, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on** ***Purity and Danger*** **and Pierre Bourdieu's critique of** ***Masculine Domination*****. Using these theories, we examine the aesthetic and cultural significance of imaginative representations of witches. For the research paper, each student chooses their own example of witchcraft on which to conduct independent research. Sample topics include postmodern fairy tales like** ***Frozen*** **and** ***Maleficent*****, Broadway musicals like** ***Into the Woods*** **and** ***Wicked*****, historical witch-hunts and contemporary occult practices. What unites our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.**

Topic: **What Do We Talk About When We**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **What Do We Talk About When We Talk About Climate Change?**

This class will explore how to write, think, and talk about the complexities of global climate change. We are living in a moment where the reality of massive, human-made global climate change has become unavoidable. In the face of our changing plane--the loss of ordinary seasons, bugs, expected weather, known landmarks--language can seem hard to find. While fires burn in California and coastlines disappear, artists, politicians, business owners, and citizens seem to still be casting about for a way to comprehend and talk about the changes that are already taking place, and the ones that are coming. The negative effects of climate change are inflicted unevenly. How do we create narratives about environmental loss and the

injustice of this loss? How do we write about a world in flux? In order to begin to answer these questions we will read scientific articles and works in the environmental humanities, become familiar with climate change related newsletters and organizations, read realist and sci-fi responses to the crisis, and watch news specials and films. In unit one, we will investigate how different experts describe the current effects of the climate crisis. We will read the newest IPCC report on the climate crisis and use it to analyze two projects written and designed by scientists and journalists alongside a series of green or eco advertisements considering this scientific and international understanding of the crisis. In the second unit, we will turn to competing stories about the origins of the climate crisis. Some scientists and historians claim that the Anthropocene, a name for this geological era of human-made change, begins with the start of agriculture or the beginning of the nuclear age; others place the beginning in the rise of the plantation system in the Americas. Reading poetry by Tommy Pico, fiction by Patricia Lockwood, and watching the film *Daughters of the Dust*, alongside selections from the scientific journal *Nature* and Kyle Whyte's "Indigenous Climate Change Studies," we will compare how each starting point tells a different story about the cause, and the continuing effects, of climate change. In unit three, we will turn to the future, asking why so many of our climate crisis narratives, often found in films, imagine the end of the world and asking what it means to imagine the future in the moment of crisis. Final research papers will evaluate visions of the future, with such examples as seed-saving projects, Octavia Butler's novel *The Parable of the Sower*, the student-lead climate change movement "Fridays for the Future," and the Green New Deal.

In Expos 20 we will be focusing on writing. This is a class built around the elements of the academic essay: you will be learning how to build an argument, analyze primary and secondary sources, supporting your argument with detailed evidence, and writing engaging and thoughtful essays. The focus of this class is the practice of writing, and our primary concern will be learning how to write clearly and well. The climate crisis is a crisis, as many have said, of storytelling and knowledge: what stories do we tell about the origins, and current effects, of the rising global temperatures? The answers to these question shape perception, action and policy (for example: for years journalists and scientists have stated that we could not attribute extreme weather to climate change, in the past years, this has dramatically changed). As we read, analyze, and question government reports, newspaper articles, poems, films, and stories, we will be asking not only what stories about the climate are present in these sources, but also what arguments, and stories, we are building and writing ourselves.

Topic: **Work: Culture, Power, and Cont**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Work: Culture, Power, and Control**

This course explores the structure and experience of work in the contemporary political economy with an eye toward both its liberating and oppressive potential. We will take up enduring sociological questions with respect to power, control, autonomy, surveillance and self-determination on the job. How do different forms of work affect our life circumstances, personalities, and connections to each other? In the first unit we will examine corporate culture and how it affects the experience of professional work. Does a strong corporate culture enhance professional autonomy or management's power? Does it facilitate or undermine community? In unit two we explore the crucial issue of workers' control over their own labor and the concept of alienation. We examine accounts of deskilling, the separation of mental and manual labor, and the consequences of these processes for workers' experience on the job. To what extent does alienation occur in offices versus factories versus service counters? For the final unit we will critically engage in a debate about the development of "flexible" labor and the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory. We will explore what flexibility means in a variety of contexts and ask: does flexibility lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? What does flexibility mean for tech workers in Silicon Valley, bankers on Wall Street, and gig workers? Our texts consist of case studies and ethnographic accounts representing a variety of workplaces along with readings from prominent social theorists who in different ways seek to elucidate the conditions of work under modern capitalism.

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **The Politics of Nostalgia**

In 1688, a Swiss medical student coined a new word to describe the painful symptoms suffered by people displaced from their native lands: "nostalgia." Today, most of us have experienced this intense form of longing for places and times past. But what happens when this unattainable personal desire affects whole communities? What are the social, artistic, and political consequences of wanting to return to the past? And what does it mean to long for a time you never actually experienced? In this course, we will explore the enduring power of nostalgia not only as a lived experience, but also as a social phenomenon. In our first unit, we will closely examine nostalgic rhetoric in both presidential speeches and memoirs written by first- and second-generation immigrants (including Eva Hoffman and Audre Lorde). In our second unit, we will use the work of leading nostalgia theorists to interpret the representation of mid-century America in recent movies and television series, including *Mad Men* and *Carol*. Finally, in our third unit, students will make research a nostalgic artifact, practice, or movement of their own choosing. Possible topics include the aesthetics of Instagram, the music of Lana Del Rey, plantation weddings, or political movements that promise to restore the past.

Expository Writing 20 Section: 218

Expository Writing 20 (116353)

Richard Martin

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Society and the Witch**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Society and the Witch**

Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated

through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand others' beliefs in the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we closely analyze the film *Harry Potter and the Chamber of Secrets* and the television sitcom *Bewitched*, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on *Purity and Danger* and Pierre Bourdieu's critique of *Masculine Domination*. Using these theories, we examine the aesthetic and cultural significance of imaginative representations of witches. For the research paper, each student chooses their own example of witchcraft on which to conduct independent research. Sample topics include postmodern fairy tales like *Frozen* and *Maleficent*, Broadway musicals like *Into the Woods* and *Wicked*, historical witch-hunts and contemporary occult practices. What unites our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

Topic: **Personhood in U.S. Constitutio**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Personhood in U.S. Constitutional Law**

According to philosopher Thomas Hobbes, the world—including human selfishness—is violent, immoral, and ultimately unjust. Therefore, societies establish supreme laws to uphold contracts, preserve property, serve the general welfare, and secure peace. However, a problem arises from Hobbes' standpoint: if societies thrive

upon arbitrary authority, it is only insofar as beneficiaries are able and willing to abide by the law. But given that humans are naturally uncooperative in the Hobbesian worldview, societies must invent something that recognizes and is in turn recognized by the law: a "person." As a result, humans, non-human entities, and corporations can be "personated." Jurisprudence consequently grapples with criteria whereby persons are defined. While Hobbes is not the architect of the U.S. Constitution, his influence on the issue of personhood is most apparent when we ask, "who are the 'we' in 'we the people?'" What counts as a person? No question is more urgent in the course of U.S. events than when personhood is defined by the Supreme Court. From *Dred Scott v. Sandford* to *Brown v. Board of Education*, from *Roe v. Wade* to *Citizens United v. FEC*, this course explores numerous landmark decisions that have made and unmade people.

We begin in the first unit by focusing on race and citizenship, asking questions about how personhood figures into the history of U.S. slavery and segregation. In the second unit, we move to Supreme Court decisions on the topics of gender and civil liberty. Finally, in Unit Three we examine some of the most contentious cases within the Supreme Court's purview in recent decades, highlighting a range of controversial topics, including abortion and *Citizens United*. While we will read scientific and sociological articles in addition to reading cases as a group, assignments in preparation for your independent Research Essay welcome various interdisciplinary approaches as opportunities to cultivate your own investments which, in turn, makes for better writing.

Topic: **The Art of the Con**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the

College's Expository Writing requirement.

Class Notes: **The Art of the Con**

Scammers, flimflammers, snake oil salesmen: no matter what you call them, con artists have long haunted the American imagination—from the pages of *The Great Gatsby* to the boardrooms of Silicon Valley. And with good reason. "The con," writes critic and journalist Jia Tolentino, "is in the DNA of this country." In this course, we will study con artists both real and invented, exploring what these larger-than-life characters—and our culture's boundless fascination with them—reveal about American notions of ambition, opportunity, and success. In unit one, we will begin by familiarizing ourselves with some of the ways that contemporary writers and thinkers have tried to define the con artist, and then apply these ideas to the story of Anna Sorokin—a self-styled "wealthy German heiress" who famously defrauded a long line of banks, hotels, and wealthy New York acquaintances between 2013 and 2017 with little more than empty IOUs. Next, we will consider the role of the con artist in popular media, both as a literary archetype and a target of cultural commentary. Texts will include the novel and film adaptation of Patricia Highsmith's *The Talented Mr. Ripley* as well as recent coverage of the Fyre Festival debacle from Hulu, Netflix, and *Vanity Fair*. Finally, in unit three, students will research a con or a popular portrayal of a con—a book, a documentary, a movie—and make an argument about what it helps us understand about one or more facets of American life.

Topic: **More Than a Game**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **More Than a Game**

"Shut up and dribble," snarled a broadcaster when basketball star LeBron James voiced concerns about the competence of then-President Trump in 2018. The message was clear: sports and politics don't mix. In fact, as we will find across various media this semester, few things in the past century have been as closely intertwined. At the same time, the relationship often appears lopsided. Politicians show little hesitation to wade into issues pertaining to athletics, but athletes—like LeBron James himself—are discouraged from anything resembling an opinion on matters with a wider societal bearing. Through units navigating the NFL's suppression of concussion science, the complex relationship of race to American sports culture, and the political dynamics of consequential events within the sporting world, we will consider the following questions: what makes the world of sports such a significant setting for political activism? What authority lies in the manipulation of athletic culture by politicians? In what ways do athletes become avatars of their cultural moment, and can they ever really exist "above the fray"?

Topic: **Engineering Life**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Engineering Life**

Biology traditionally has encompassed the study of organisms and living systems, and as evidenced by the myriad tomes, articles, and symposia devoted to subjects as diverse as microbiology, physiology, and genetics, our knowledge of these and other areas is vast. However, some have predicted that the emerging field of synthetic biology will require us to develop new ways of thinking about, researching, and regulating the science of life. With synthetic biology, a field that uses approaches from genetic, molecular, and computer engineering to construct and redesign "biological parts, devices, and systems," scientists not only can—but have—reconfigured existing biological components for specific purposes. Currently, for example, researchers are able to create synthetic proteins that destroy cancer cells, are able to extract portions of DNA to provide diagnostics for Zika and Ebola, and are able to engineer microbes to create fuel. One scientist has suggested as a motto for this new field: "Life is what we make it."

But while the potential benefits of synthetic biology are impressive, the field unsurprisingly has attracted controversy. Scholars have raised such questions as whether synthetic biologists are desecrating the "natural," and if so, whether this is necessarily harmful. We will explore these queries in our first essay unit, using the following sources to guide our discussion: "The Case Against Perfection" by political philosopher Michael Sandel, "A Bias for the Natural?" by psychologists Kristi Lockhart, Frank C. Keil, and Justine Aw, and "Choosing Disabilities and Enhancements in Children: A Choice Too Far?" by Timothy F. Murphy, whose research focuses on bioethics. For the second essay unit, we will examine scientists' efforts to resurrect extinct species, a subject that helps us think through the broader critique that synthetic biology is diverting resources from more pressing areas of research. We will draw from a range of sources: *The Rise of the Necrofauna* by science writer Britt Wray, *Nature's Ghosts* by historian Mark Barrow, and *De-Extinction and the Genomics Revolution: Life on Demand* by Amy Lynn Fletcher, whose most recent research focuses on biotechnology. For the third and final unit, students will devise a research project about the ethics of synthetic biology and will deliver a short presentation about their research to the class.

Topic: **Work: Culture, Power, and Cont**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Work: Culture, Power, and Control**

This course explores the structure and experience of work in the contemporary political economy with an eye toward both its liberating and oppressive potential. We will take up enduring sociological questions with respect to power, control, autonomy, surveillance and self-determination on the job. How do different forms of work affect our life circumstances, personalities, and connections to each other? In the first unit we will examine corporate culture and how it affects the experience of professional work. Does a strong corporate culture enhance professional autonomy or management's power? Does it facilitate or undermine community? In unit two we explore the crucial issue of workers' control over their own labor and the concept of alienation. We examine accounts of deskilling, the separation of mental and manual labor, and the consequences of these processes for workers' experience on the job. To what extent does alienation occur in offices versus factories versus service counters? For the final unit we will critically engage in a debate about the development of "flexible" labor and the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory. We will explore what flexibility means in a variety of contexts and ask: does flexibility lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? What does flexibility mean for tech workers in Silicon Valley, bankers on Wall Street, and gig workers? Our texts consist of case studies and ethnographic accounts representing a variety of workplaces along with readings from prominent social theorists who in different ways seek to elucidate the conditions of work under modern capitalism.

Topic: **Slave Narratives**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Slave Narratives**

Written from the late 18th to the late 19th century in the United States, slave narratives recounted the harrowing story from slavery to freedom, the escape from the South to the North, and the intellectual journey towards literacy and public speaking. This course examines some famous representatives of this genre as well as post-Civil Rights modifications of such narratives. In the first weeks, we will analyze what roles literacy and rhetoric played in the popular *Narrative of the Life of Frederick Douglass* (1845) and Harriet Jacobs' *Incidents in the Life of a Slave Girl* (1861). We will hone in on the complex relationship between black American writers of slave narratives and their white editors, who oversaw what was published, edited the narratives, vouched for their truth-value, and appended them with documents. In our second unit, as a point of comparison and continuing dialogue, we will examine the neo-slave narrative, a modification and updating of the genre after the Civil Rights Movement of the 1960s. In particular, we will look carefully at one of its most famous examples, Toni Morrison's *Beloved* (1987), and address the following questions: How do African American authors rewrite the slave narratives and their conventions? How does their language of slavery differ from their predecessors? How do they understand the lasting legacy of slavery and trauma, seeking to make sense of past injustice and atrocity? Finally, this course will examine a contemporary iteration of the neo-slave narrative, Colson Whitehead's *The Underground Railroad* (2016). Specifically, we will examine how this next generation of African American writers experiments with the genre. What role does fantasy play in the representation of slavery and its history? And, in light of recent cinematic adaptations of slave narratives, how may the market influence these texts? Our primary readings will be accompanied by

seminal essays on the literary genres of the slave and neo-slave narratives, their historical development, and their high political and cultural stakes.

Expository Writing 20 Section: 224

Expository Writing 20 (116353)

Courtney Miller

2022 Spring (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Domestic Labor**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Domestic Labor**

Domestic work, according to labor activist Ai-jen Poo, is "the work that makes all other work possible," yet the people who clean, cook, and care are so often invisible and undervalued. Because domestic labor takes place within the home rather than the factory or other industrial sites of labor, what are the consequences of the erasure of boundaries between home and work, for both the employer and the employee? To what extent do domestic workers possess agency when their very occupation is to serve their employer? In addition to physical and mental labor required, what forms of emotional labor are also expected? What are the individual and societal ramifications of this labor force being largely unregulated, underpaid, and unappreciated? This course considers the complex forces of classism, racism, and sexism that have contributed to the subjugation of domestic workers and the labor they perform. In the first unit, students will closely read the popular British television series *Downton Abbey*, Zora Neale Hurston's short story "Sweat," and Maya Angelou's biographical fiction "What's Your Name, Girl?" to consider how the text illustrates servants possessing or lacking agency. In unit two, students will use sociologist Arlie Hochschild's theory of emotional labor as a lens through which to examine Alfonso Cuarón's film *Roma*, which features

the perspective of an indigenous housekeeper and the blurry boundaries between work and family. In the final unit, students will focus on a text of their choosing, situating their work alongside the scholarly work of others. By thinking about how domestic labor is imagined in literature, television, and film, students will investigate the dynamics of privilege and power, exploitation and identity, and the care economy.

Expository Writing 20 Section: 224

Expository Writing 20 (116353)

Peter Becker

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Slave Narratives**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Slave Narratives**

Written from the late 18th to the late 19th century in the United States, slave narratives recounted the harrowing story from slavery to freedom, the escape from the South to the North, and the intellectual journey towards literacy and public speaking. This course examines some famous representatives of this genre as well as post-Civil Rights modifications of such narratives. In the first weeks, we will analyze what roles literacy and rhetoric played in the popular *Narrative of the Life of Frederick Douglass* (1845) and Harriet Jacobs' Incidents in the *Life of a Slave Girl* (1861). We will hone in on the complex relationship between black American writers of slave narratives and their white editors, who oversaw what was published, edited the narratives, vouched for their truth-value, and appended them with documents. In our second unit, as a point of comparison and continuing dialogue, we will examine the neo-slave narrative, a modification and updating of the genre after the Civil Rights Movement of the 1960s. In particular, we will look carefully at one of its most famous examples, Toni

Morrison's *Beloved* (1987), and address the following questions: How do African American authors rewrite the slave narratives and their conventions? How does their language of slavery differ from their predecessors? How do they understand the lasting legacy of slavery and trauma, seeking to make sense of past injustice and atrocity? Finally, this course will examine a contemporary iteration of the neo-slave narrative, Colson Whitehead's *The Underground Railroad* (2016). Specifically, we will examine how this next generation of African American writers experiments with the genre. What role does fantasy play in the representation of slavery and its history? And, in light of recent cinematic adaptations of slave narratives, how may the market influence these texts? Our primary readings will be accompanied by seminal essays on the literary genres of the slave and neo-slave narratives, their historical development, and their high political and cultural stakes.

All sections emphasize revision.

Topic: **American Money**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **American Money**

Money is famously difficult to talk about: too awkward, too divisive, too complicated, too abstract, too personal. In this course, we look at how contemporary American writers, philosophers and filmmakers have chosen to talk about money, and how these conversations involve

questions of class, justice, work, race and gender. In the first unit of the course, students will watch the 2015 film The Big Short and read a sociological analysis of Wall Street culture in order to explore how the film portrays the values and practices of the financial industry. Unit Two focuses on arguments made by contemporary philosophers and journalists about how individuals and governments should spend their money in order to reflect their values and create a just and healthy world: readings will include Ta-Nehisi Coates's article "The Case for Reparations", Silvia Federici's manifesto "Wages Against Housework" and excerpts from Michael Sandel's What Money Can't Buy. We will ask questions such as: What is money? How do we decide what monetary value to place upon love, or a nation's racist history, or body parts—and is there anything that should not have a price put on it? How does money interact with race, class and gender in the United States, and how does it mediate our personal relationships? The final unit of the course presents students with a selection of recent films that raise questions about the relationship between money, work and gender. Focusing on one of the suggested films, students will undertake their own research to make an original argument in conversation with the work of other scholars.

Topic: **Family Trees and Family Sagas**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Family Trees and Family Sagas**

The age of Ancestry.com and 23andMe has given people instant access to a wealth of information about their family histories. Census data, birth and death records, and other sources essential to

genealogical research have become vastly more accessible. At the same time, genetic testing continues to open up radically new ways to learn about one's ancestry—though scientists are still debating what exactly DNA evidence can tell us about our distant forebears. Yet all this information newly at our fingertips means little until shaped into a story of some kind. So how do the facts of ancestry combine with the art of narrative? How do stories about our ancestors affect our sense of who we are as individuals? What happens when newly discovered information about a person's ancestry disrupts the story they previously told themselves? And how do family histories intertwine with the great events of history itself, with wars and revolutions, religious persecutions, mass migrations, and legacies of enslavement and colonization?

This course is about ancestral stories, and how those stories contribute to our sense of self. We begin by interpreting a classic example of family history raised to the level of art: *The Saga of the People of Laxardal*, one of the so-called "family sagas" composed by Viking Age Icelanders. In our second unit, we shift focus to modern America, to ask how Americans' sense of racial identity is shaped by knowledge of their family histories. Readings will include W. E. B. Du Bois's essay "The Concept of Race," an episode of the PBS series *Finding Your Roots*, hosted by Harvard scholar Henry Louis Gates, Jr., and recent articles from sociology and cultural studies on the contemporary phenomena of ancestry tests and "genealogy TV." Finally, in the third unit, students craft an argument about what a selected work of art reveals about the significance of ancestral stories in contemporary society, choosing a modern "family saga" to write about from a list that includes *The Godfather Part II*, Octavia Butler's novel *Kindred*, and the HBO series *Succession*.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Immigration and Incarceration**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Immigration and Incarceration**

The course aims to answer a series of questions fundamental to an understanding of the nation: What role have the fences and bars of carceral facilities—including jails, prisons, detention centers, and concentration camps—played in American immigration? Furthermore, what role do such places play in the stories Americans tell themselves about immigration? This course examines both the historical and contemporary significance of migrant incarceration, broadly construed, in the U.S.: from the 'processing' and interrogation of new migrants at Ellis Island and Angel Island to forced encampment of primarily Japanese Americans during World War II to the present-day detention of undocumented migrants and asylum-seekers. Throughout the course, students will consider larger questions about American immigration and traditions of incarceration: In speaking about these subjects, how, and why, do words matter? How does one shed light on experiences and spaces that are intentionally obscured? And finally, is the incarceration of migrants in America an exceptional practice, or is it the norm? In responding to these questions, we will look at a variety of representations, from poetry to the graphic memoirs of Miné Okubo and George Takei to the federally-impounded photography of Dorothea Lange and ethnographic observations of contemporary detention.

Topic: **Friendship**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Friendship**

Would a real friend help you hide a body? Is our natural tendency to trust our friends based on good evidence that they are trustworthy or on our natural need to confide in another person? What makes someone a friend in the first place? Philosophers since Aristotle (circa 384-322 B.C.E.) have been wrestling with these questions and in doing so, they have added crucial details, distinctions and depth to our understanding of friendship. In this class, we will join this conversation by considering several key claims that philosophers have made about friendship. We will begin our journey by studying Aristotle' s foundational question of what makes someone a friend. Next, we will visit early modern Europe to investigate the bright side of friendship by considering philosophers Mary Astell (circa 1666-1731) and Michel Montaigne's (circa 1533-1592) views. In the final unit of the course, we will consider the dark side of friendship as we research contemporary issues about the dangers of friendship. Students will have the opportunity to choose their own cases as they attempt to answer whether friendship can be harmful.

Topic: **Civil and Uncivil Disobedience**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Civil and Uncivil Disobedience**

Recent years have seen a renewal of protest in the United States: against racism, police brutality, inaction on climate change, and much more. Notably new is the way in which conservatives have taken up the banner of resistance: a county clerk in Kentucky refused to sign marriage certificates for same-sex couples, huge numbers of people have rejected public health mandates, and many have retroactively described the events of January 6 at the Capitol in minimizing or even positive terms. When, if ever, is it justifiable to break the law for moral reasons? How can we fairly assess acts of civil disobedience by those of different political views? To begin the course we will read influential selections, spanning the political spectrum, from thinkers such as Plato, Kant, Gandhi, and John Rawls about these questions and their intertwinement with issues of free speech, non-violence, and our obligations in society, with students writing a paper evaluating one of their arguments. Next, we will turn to a number of concrete historical cases. These might include: Thoreau, who was jailed for refusing to pay his poll tax out of protest against slavery and imperialism; Hannah Arendt's coverage of the trial of Adolf Eichmann, one of the main architects of the Holocaust, who defended his actions by claiming that his obedience, a virtue, had been taken advantage of by his superiors; or Martin Luther King's and Malcolm X's different visions of the struggle for civil rights. Students will write a paper putting one of these examples in conversation with a bit of theory, testing its claims, or using them to deepen their analysis. Finally, at the end of the course, we will consider selections from a range of different approaches and methodologies about whether uncivil or even violent resistance is ever justifiable as students develop final research topics of their choosing, which might examine a philosophical argument, a particular protest movement or action, or a film or other work of art about civil disobedience.

Topic: **Animals and Politics**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Animals and Politics**

Nonhuman animals play a major role in the lives of human animals. Yet, their contribution and impact is often ignored or understudied due to anthropocentric norms that are embedded in human systems and institutions. This course is an introduction to animals and politics through an interdisciplinary lens, drawing on political science, psychology, philosophy, sociology, and environmental science. In the course, we ask several questions. Why should humans care about animals and their wellbeing? How are (prejudicial) attitudes toward animals related to prejudicial attitudes toward humans (racism, sexism, homophobia…etc.,)? What is animal agriculture's impact on the environment, and why have politicians failed to put this issue on the agenda? How is our relationship to animals central to understanding the causes and likelihood of pandemics like COVID-19? Is there an alternative to anthropocentrism in politics and society? In Unit 1, we begin by thinking through several prominent theorists' arguments about how and when humans should care about the wellbeing of animals. Should animals have rights? In this unit, you will also have a chance to interview friends and family members to gain an understanding of different perspectives on this question in your immediate and nearest 'community.' In the next unit, we turn our attention to four different areas that intersect with animals: the environment, health and pandemics, prejudicial attitudes (racism, sexism, homophobia…etc.,), and political candidate evaluations. Students will have the opportunity to write an original research paper based on their own interests. Since even most disciplines and subfields are anthropocentric, there are many research questions that might benefit from 'bringing the animal in.' The semester will wrap up with a team-based capstone project that is presented to our community partner for the course. Based on your individual work in your research papers, the capstone project asks you to synthesize that work (within your team) to unlock your team's message to the world within a medium that YOU define (poster, art, social movement, website…etc.,). What do you want the world to know about the collective research your team has done? You will also write a blog (500 words or 1000 words depending on whether you opt to write this as a team or individually) that you will pitch to an online journal or informational website of your choice.

Topic: **The Politics of Nostalgia**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **The Politics of Nostalgia**

In 1688, a Swiss medical student coined a new word to describe the painful symptoms suffered by people displaced from their native lands: "nostalgia." Today, most of us have experienced this intense form of longing for places and times past. But what happens when this unattainable personal desire affects whole communities? What are the social, artistic, and political consequences of wanting to return to the past? And what does it mean to long for a time you never actually experienced? In this course, we will explore the enduring power of nostalgia not only as a lived experience, but also as a social phenomenon. In our first unit, we will closely examine nostalgic rhetoric in both presidential speeches and memoirs written by first- and second-generation immigrants (including Eva Hoffman and Audre Lorde). In our second unit, we will use the work of leading nostalgia theorists to interpret the representation of mid-century America in recent movies and television series, including *Mad Men* and *Carol*. Finally, in our third unit, students will make research a nostalgic artifact, practice, or movement of their own choosing. Possible topics include the aesthetics of Instagram, the music of Lana Del Rey, plantation weddings, or political movements that promise to restore the past.

Sparsha Saha

2021 Fall (4 Credits)		**Schedule:**	TR 0300 PM - 0415 PM
Instructor Permissions:	Department	**Enrollment Cap:**	15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:	**Animals and Politics**
Course Notes:	**Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.**
Class Notes:	**Animals and Politics** **Nonhuman animals play a major role in the lives of human animals. Yet, their contribution and impact is often ignored or understudied due to anthropocentric norms that are embedded in human systems and institutions. This course is an introduction to animals and politics through an interdisciplinary lens, drawing on political science, psychology, philosophy, sociology, and environmental science. In the course, we ask several questions. Why should humans care about animals and their wellbeing? How are (prejudicial) attitudes toward animals related to prejudicial attitudes toward humans (racism, sexism, homophobia…etc.,)? What is animal agriculture's impact on the environment, and why have politicians failed to put this issue on the agenda? How is our relationship to animals central to understanding the causes and likelihood of pandemics like COVID-19? Is there an alternative to anthropocentrism in politics and society? In Unit 1, we begin by thinking through several prominent theorists' arguments about how and when humans should care about the wellbeing of animals. Should animals have rights? In this unit, you will also have a chance to interview friends and family members to gain an understanding of different perspectives on this question in your immediate and nearest 'community.' In the next unit, we turn our attention to four different areas that intersect with animals: the environment, health and pandemics, prejudicial attitudes (racism, sexism, homophobia…etc.,), and political candidate evaluations. Students will have the opportunity to write an original research paper based on their own interests. Since even most disciplines and subfields are anthropocentric, there are many research questions that might benefit from 'bringing the animal in.' The semester will wrap up with a team-based capstone project that is presented to our community partner for the course. Based on your individual work in your research papers, the capstone project asks you to synthesize that work (within your team) to unlock your team's message to the world within a medium that YOU define (poster, art, social movement, website…etc.,). What do you want the world to know about the collective research your team has done? You will also write a blog (500 words or 1000 words depending on whether you opt to write this as a team or individually) that you will pitch to an online journal or informational website of your choice.**

Topic: **The Underworld**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **The Underworld**

Hell is popular. In fact, it's been doing much better than heaven. It's practically a literary consensus that Dante's best book is his *Inferno* not *Purgatorio* or *Paradiso*, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being "of the Devil's party without knowing it" (Blake). And the world today may be more secular than in past generations, but hell is doing just fine. Harvard presents its own interesting case: Currier House's annual "Heaven and Hell" party has situated "Hell" in a room that can hold about 500 people whereas "Heaven" can fit only about 50. (In recent years heaven has been eliminated entirely.) But what are the components of hell – what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in secular culture? Why do those people who don't believe that hell is real want to keep imagining it again and again (in *Lucifer*, in *Good Omens*, in *The Good Place*, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from *Gilgamesh*, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we'll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film *Pan's Labyrinth*, and a *New Yorker* article by Harvard Professor Danielle Allen about her cousin's experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to better understand the curious attraction of hell, and why its 4,000-year-

old story shows no sign of ending.

Topic: **Engineering Life**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Engineering Life**

Biology traditionally has encompassed the study of organisms and living systems, and as evidenced by the myriad tomes, articles, and symposia devoted to subjects as diverse as microbiology, physiology, and genetics, our knowledge of these and other areas is vast. However, some have predicted that the emerging field of synthetic biology will require us to develop new ways of thinking about, researching, and regulating the science of life. With synthetic biology, a field that uses approaches from genetic, molecular, and computer engineering to construct and redesign "biological parts, devices, and systems," scientists not only can—but have—reconfigured existing biological components for specific purposes. Currently, for example, researchers are able to create synthetic proteins that destroy cancer cells, are able to extract portions of DNA to provide diagnostics for Zika and Ebola, and are able to engineer microbes to create fuel. One scientist has suggested as a motto for this new field: "Life is what we make it."

But while the potential benefits of synthetic biology are impressive, the field unsurprisingly has attracted controversy. For our first essay unit, we will explore the claim that scientists are desecrating the "natural," and we will use the following sources to guide our discussion: "The Case Against Perfection" by political philosopher Michael Sandel, "A Bias for the Natural?" by psychologists Kristi Lockhart, Frank C. Keil,

and Justine Aw, and "Choosing Disabilities and Enhancements in Children: A Choice Too Far?" by Timothy F. Murphy, whose research focuses on bioethics. For the second essay unit, we will examine scientists' efforts to resurrect extinct species, a subject that helps us think through the broader critique that synthetic biology is diverting resources from more pressing areas of research. We will draw from a range of sources: *The Rise of the Necrofaun*a by science writer Britt Wray, *Nature's Ghosts* by historian Mark Barrow, and *De-Extinction and the Genomics Revolution: Life on Demand* by Amy Lynn Fletcher, whose most recent research focuses on biotechnology. For the third and final unit, students will devise a research project about the ethics of synthetic biology and will deliver a short presentation about their research to the class.

Topic: **From Homer to Jay-Z: Craft an**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **From Homer to Jay-Z: Craft and Complexity in Verbal Art and Oral Traditions**

From ancient Greece to modern rap battles, we have gathered to hear and create stories that reflect the way we define ourselves and our communities. What accounts for the persistence – and complexity – of the oral tradition? How are the performances of artists such as Homer and Jay-Z uniquely characterized through the verbal art form? In this course we will attempt to answer these questions by studying oral storytelling in ancient and modern contexts. In Unit I, we will look at historically oral traditions and delve into the paradox of studying verbal art that has been passed down to us through written texts and

material effects? We will study one of the oldest and most famous of oral epics - Homer's Iliad - along with ancient Greek artifacts at the Harvard Art Museum and Boston Museum of Fine Arts. In Unit II, we shall ask what correctly categorizes something as verbal art. We will apply theories of oral epic to more recent verbal traditions by listening to the freestyle rap of Eminem, and watching performances of TikTok artist, Ayanna Albertson. Finally, in our third unit, we will take a step back to consider how oral tradition functions in opposition or subversion to dominant culture by researching different contemporary sources. We will consider the modern podcast as exemplified by 'The Joe Rogan Experience,' multimedia exhibits in museums such as Harvard's Peabody, and BiPOC rap artists such as Tupac and Nicki Minaj, among other subjects. Throughout the course, we will consider together what orality and verbal art communicate that writing cannot, what we mean by "literacy," and if we can ever even clearly distinguish the "oral" from the "written."

Topic: **American Money**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **American Money**

Money is famously difficult to talk about: too awkward, too divisive, too complicated, too abstract, too personal. In this course, we look at how contemporary American writers, philosophers and filmmakers have chosen to talk about money, and how these conversations involve questions of class, justice, work, race and gender. In the first unit of the course, students will watch the 2015 film *The Big Short* and read a sociological analysis of Wall Street culture in order to explore how the film portrays the values and practices of the financial industry. Unit Two focuses on arguments made by contemporary philosophers and journalists about how individuals and governments should spend their money in order to reflect their values and create a just and healthy world: readings will include Ta-Nehisi Coates's article "The Case for Reparations", Silvia Federici's manifesto "Wages Against Housework" and Michael Sandel's "What Money Shouldn't Buy". We will ask questions such as: What is money? How do we decide what monetary value to place upon love, or a nation's racist history, or body parts—and is there anything that should not have a price put on it? How does money interact with race, class and gender in the United States, and how does it mediate our personal relationships? The final unit of the course presents students with a selection of recent films that raise questions about the relationship between money, work and gender. Focusing on one of the suggested films, students will undertake their own research to make an original argument in conversation with the work of other scholars.

Topic: **Civil and Uncivil Disobedience**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Civil and Uncivil Disobedience**

Recent years have seen a renewal of protest in the United States: against racism, police brutality, inaction on climate change, and much more. Notably new is the way in which conservatives have taken up the banner of resistance: a county clerk in Kentucky refused to sign marriage certificates for same-sex couples, huge numbers of people have rejected public health mandates, and many have retroactively described the events of January 6 at the Capitol in minimizing or even positive terms. When, if ever, is it justifiable to break the law for moral reasons? How can we fairly assess acts of civil disobedience by those of different political views? To begin the course we will read influential selections, spanning the political spectrum, from thinkers such as Plato, Kant, Gandhi, and John Rawls about these questions and their intertwinement with issues of free speech, non-violence, and our obligations in society, with students writing a paper evaluating one of their arguments. Next, we will turn to a number of concrete historical cases. These might include: Thoreau, who was jailed for refusing to pay his poll tax out of protest against slavery and imperialism; Hannah Arendt's coverage of the trial of Adolf Eichmann, one of the main architects of the Holocaust, who defended his actions by claiming that his obedience, a virtue, had been taken advantage of by his superiors; or Martin Luther King's and Malcolm X's different visions of the struggle for civil rights. Students will write a paper putting one of these examples in conversation with a bit of theory, testing its claims, or using them to deepen their analysis. Finally, at the end of the course, we will consider selections from a range of different approaches and methodologies about whether uncivil or even violent resistance is ever justifiable as students develop final research topics of their choosing, which might examine a philosophical argument, a particular protest movement or action, or a film or other work of art about civil disobedience.

Topic: **Immigration and Incarceration**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Immigration and Incarceration**

The course aims to answer a series of questions fundamental to an understanding of the nation: What role have the fences and bars of carceral facilities—including jails, prisons, detention centers, and concentration camps—played in American immigration? Furthermore, what role do such places play in the stories Americans tell themselves about immigration? This course examines both the historical and contemporary significance of migrant incarceration, broadly construed, in the U.S.: from the 'processing' and interrogation of new migrants at Ellis Island and Angel Island to forced encampment of primarily Japanese Americans during World War II to the present-day detention of undocumented migrants and asylum-seekers. Throughout the course, students will consider larger questions about American immigration and traditions of incarceration: In speaking about these subjects, how, and why, do words matter? How does one shed light on experiences and spaces that are intentionally obscured? And finally, is the incarceration of migrants in America an exceptional practice, or is it the norm? In responding to these questions, we will look at a variety of representations, from poetry to the graphic memoirs of Miné Okubo and George Takei to the federally-impounded photography of Dorothea Lange and ethnographic observations of contemporary detention.

Topic: **Truth Claims in a Post-Truth W**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Truth Claims in a Post-Truth World**

We often describe an idea or phrase as having "the ring of truth," but what does truth *sound* like? And what happens when politicians, news organizations, and advertising agencies learn to reproduce or mimic that sound? This course addresses recent claims that we are living in a "post-truth world," and considers the fate of argument in a world in which truth is subjective, and fact divided into mainstream and alternative forms. Is it possible to draw clear lines between fact and fiction, truth and lies? In Unit 1, we'll consider the methods we use to distinguish fact from fiction, truth from lies, as we examine fictional texts that blur these lines, philosophical texts that seek to define them, and non-fictional texts that explore the real-world stakes of these distinctions. In Unit 2, we'll focus on subjective truths (or truths that differ for each individual) and examine the challenges these truths pose. We'll also explore podcasts, social media platforms, and interviews to explore how the internet has shaped our relationship to truth and argument. Unit 3 will take us where the quest for truth reaches its extremes: the conspiracy theory. We'll look at the complex anatomy of conspiracy, and students will have an opportunity to design original research projects that fit their interests.

Throughout the course, students will consider larger questions about American immigration and traditions of incarceration: In speaking about these subjects, how, and why, do words matter? How does one shed light on experiences and spaces that are intentionally obscured? And finally, is the incarceration of migrants in America an exceptional practice, or is it the norm? In responding to these questions, we will look at a variety of representations, from poetry to the graphic memoirs of Miné Okubo and George Takei to the federally-impounded photography of Dorothea Lange and ethnographic observations of contemporary detention.

Expository Writing 20 Section: 237

Expository Writing 20 (116353)

Keating McKeon

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **More Than a Game**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **More Than a Game**

"Shut up and dribble," snarled a broadcaster when basketball star LeBron James voiced concerns about the competence of then-President Trump in 2018. The message was clear: sports and politics don't mix. In fact, as we will find across various media this semester, few things in the past century have been as closely intertwined. At the same time, the relationship often appears lopsided. Politicians show little hesitation to wade into issues pertaining to athletics, but athletes—like LeBron James himself—are discouraged from anything resembling an opinion on matters with a wider societal bearing. Through units navigating the NFL's suppression of concussion science, the complex relationship of race to American sports culture, and the political dynamics of consequential events within the sporting world, we will consider the following questions: what makes the world of sports such a significant setting for political activism? What authority lies in the manipulation of athletic culture by politicians? In what ways do athletes become avatars of their cultural moment, and can they ever really exist "above the fray"?

Expository Writing 20 (116353)

Sparsha Saha

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Animals and Politics**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Animals and Politics**

Nonhuman animals play a major role in the lives of human animals. Yet, their contribution and impact is often ignored or understudied due to anthropocentric norms that are embedded in human systems and institutions. This course is an introduction to animals and politics through an interdisciplinary lens, drawing on political science,

psychology, philosophy, sociology, and environmental science. In the course, we ask several questions. Why should humans care about animals and their wellbeing? How are (prejudicial) attitudes toward animals related to prejudicial attitudes toward humans (racism, sexism, homophobia…etc.,)? What is animal agriculture's impact on the environment, and why have politicians failed to put this issue on the agenda? How is our relationship to animals central to understanding the causes and likelihood of pandemics like COVID-19? Is there an alternative to anthropocentrism in politics and society? In Unit 1, we begin by thinking through several prominent theorists' arguments about how and when humans should care about the wellbeing of animals. Should animals have rights? In this unit, you will also have a chance to interview friends and family members to gain an understanding of different perspectives on this question in your immediate and nearest 'community.' In the next unit, we turn our attention to four different areas that intersect with animals: the environment, health and pandemics, prejudicial attitudes (racism, sexism, homophobia…etc.,), and political candidate evaluations. Students will have the opportunity to write an original research paper based on their own interests. Since even most disciplines and subfields are anthropocentric, there are many research questions that might benefit from 'bringing the animal in.' The semester will wrap up with a team-based capstone project that is presented to our community partner for the course. Based on your individual work in your research papers, the capstone project asks you to synthesize that work (within your team) to unlock your team's message to the world within a medium that YOU define (poster, art, social movement, website…etc.,). What do you want the world to know about the collective research your team has done? You will also write a blog (500 words or 1000 words depending on whether you opt to write this as a team or individually) that you will pitch to an online journal or informational website of your choice.

Topic: **The Underworld**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the

College's Expository Writing requirement.

Class Notes: **The Underworld**

Hell is popular. In fact, it's been doing much better than heaven. It's practically a literary consensus that Dante's best book is his *Inferno* not *Purgatorio* or *Paradiso*, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being "of the Devil's party without knowing it" (Blake). And the world today may be more secular than in past generations, but hell is doing just fine. Harvard presents its own interesting case: Currier House's annual "Heaven and Hell" party has situated "Hell" in a room that can hold about 500 people whereas "Heaven" can fit only about 50. (In recent years heaven has been eliminated entirely.) But what are the components of hell – what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in secular culture? Why do those people who don't believe that hell is real want to keep imagining it again and again (in *Lucifer*, in *Good Omens*, in *The Good Place*, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from *Gilgamesh*, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we'll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film *Pan's Labyrinth*, and a *New Yorker* article by Harvard Professor Danielle Allen about her cousin's experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to better understand the curious attraction of hell, and why its 4,000-year-old story shows no sign of ending.

Topic: **Are Prisons Obsolete?**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Are Prisons Obsolete?**

With 1.8 million Americans currently locked behind bars, the United States imprisons its citizens at a higher rate than any other country in the world. But calls to reimagine our country's carceral system are on the rise. Black Lives Matter and other movements are asking urgent questions: why are Black Americans imprisoned five times more than white ones? Should there be for-profit prisons? What crimes merit confinement? What is the purpose of prisons? And do we even need them? In this course, we will grapple with these questions by examining a variety of scholarly perspectives on the United States prison system. We will begin by analyzing the arguments for prison abolition versus reform in Angela Davis's *Are Prisons Obsolete?* (2003). To situate ourselves within a broad debate over the history of mass incarceration in the United States, we will then compare recent scholarship on the subject by Michelle Alexander, James Forman Jr., and Elizabeth Hinton. We will also read first-hand accounts of prisons in Reginald Dwayne Betts's memoir and poetry. Over the course of the semester, we will receive visits from prison abolitionists, civil rights attorneys, and formerly incarcerated people, who will help us understand the movement to end mass incarceration in the United States.

Topic: **The Art of the Con**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **The Art of the Con**

Scammers, flimflammers, snake oil salesmen: no matter what you call them, con artists have long haunted the American imagination—from the pages of *The Great Gatsby* to the boardrooms of Silicon Valley. And with good reason. "The con," writes critic and journalist Jia Tolentino, "is in the DNA of this country." In this course, we will study con artists both real and invented, exploring what these larger-than-life characters—and our culture's boundless fascination with them—reveal about American notions of ambition, opportunity, and success. In unit one, we will begin by familiarizing ourselves with some of the ways that contemporary writers and thinkers have tried to define the con artist, and then apply these ideas to the story of Anna Delvey—a self-styled "wealthy German heiress" who spent her early twenties defrauding a series of banks, hotels, and wealthy New York acquaintances with little more than empty IOUs. Next, we will consider the role of the con artist in popular media, both as a literary archetype and a target of cultural commentary. Texts will include Patricia Highsmith's *The Talented Mr. Ripley*, its film adaptation, and coverage of the now-infamous Fyre Festival from Hulu, Netflix, and *Vanity Fair*. Finally, in unit three, students will research a con or a popular portrayal of a con of their choosing and make an argument about what it reveals about one or more facets of American life.

Topic: **Why Shakespeare?**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Why Shakespeare?**

Shakespeare, we have been told, is extremely important. You may agree or disagree, but do you know why Shakespeare matters to so many people? Why did England choose Shakespeare as its literary figurehead? Why does every high school in the US assign Shakespeare? Why did the British government decide to pay £1.5 million to have his works translated into Mandarin? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We'll track the playwright's afterlives throughout time, around the world, across the academic disciplines, into new artistic forms from painting and music to film and social media, from colonizers and NAZIs to civil rights movements and prison theater, and in light of identity categories such as gender, race, sexuality, class, religion, disability, and the intersections among them. We'll practice thinking and writing in different academic disciplines—from literary studies and sociology to economics and computer science—by asking how and why Shakespeare shows up across the concerns and cultures of modern life. We'll begin with the most famous artwork of the past millennium, *Hamlet*, about a young scholar (like you) who finds the injustice of the world overwhelming (like you?). Then we'll turn to *Macbeth*—a play about the quest for self-determination when society has told you to stay put—in conversation with two recent texts: business journalist Rachel Bridge's *Ambition: Why It's Good to Want More and How to Get It* (2016) and Whitney White's *Macbeth In Stride*, a play about being an ambitious Black woman in the twenty-first century (which, if COVID safety protocols allow, we'll get to see in its world premiere at the American Repertory Theater in Cambridge in October). Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the skeptical (Shakespeare is a dead white male that other dead white males have used to promote the values of dead white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Topic: **Privacy and Surveillance**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Privacy and Surveillance**

Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to our communications in the name of national security. It is easy to decry this state of affairs as Orwellian or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice.

We will begin by exploring the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? We will then consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Finally, we will examine what privacy rights we have with respect to private entities such as corporations, universities and charities.

Topic: **Religious Pluralism**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Religious Pluralism in the United States**

The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and behavior. And despite predictions to the contrary, levels of devout religious belief remain high, evidenced by recent controversies over a proposed Islamic community center in Lower Manhattan, as well as Supreme Court rulings on female access to contraception and same-sex marriage. How do people—including nonbelievers—experience this religious multiplicity? How are these vast religious differences negotiated socially, culturally, politically, and legally? Moving beyond theology, this course will explore the broad concept of lived religion in the United States. Through readings in fiction, law, history, and sociology, we'll tackle these fundamental issues. In Unit One, we'll read Ayad Akhtar's 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars' arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

Expository Writing 20 Section: 244

Expository Writing 20 (116353)

Gillian Sinnott

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Privacy and Surveillance**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Privacy and Surveillance**

Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to our communications in the name of national security. It is easy to decry this state of affairs as Orwellian or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice.

We will begin by exploring the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? We will then consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Finally, we will examine what privacy rights we have with respect to private entities such as corporations, universities and charities.

Topic: **Loyalty & Betrayal**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Loyalty & Betrayal**

If you heard that someone protected their family members faithfully, you would probably consider that person to be acting in a loyal and virtuous manner, but if you then learned that this person was a member of the Soprano crime family, you might feel a bit differently. Likewise, it's hard to know how to act if an institution to which we have historically been loyal comes under morally bankrupt leadership or if someone close to us holds beliefs we disagree with—especially if we risk being considered guilty by association in the public eye. Clearly, then, it matters to whom or what we are loyal, under what circumstances, why, and at what cost. Perhaps it's not all that surprising, then, that some philosophers have gone so far as to argue that loyalty and morality are fundamentally incompatible. In this course, we will explore some of the big questions about loyalty and its counterpart, betrayal, that have occupied humans for millennia: what role, if any, should our personal history and identity play in our loyalties? How can we act ethically when two loyalties come into conflict? Can betrayal ever be virtuous? Can we exit a group but still be loyal to it? And must loyalty entail personal cost to be meaningful?

In Unit 1 we will read short stories from Edith Wharton, Alice Munro, and Lesley Nneka Arimah, which provide rich material for thinking about the ties that bind us and what happens when they are tested. In Unit 2, we will shift our gaze to politics. We will deepen our understanding of the contemporary American political landscape as we grapple with fundamental questions of the role that loyalty plays in partisanship: what is the promise and peril of party loyalty? Should we remain loyal to our party even if (or especially when) we see its flaws? How do we decide what is worthy of loyalty to begin with, and can we be loyal to a cause but maintain independence of thought? Finally, in our third unit, students will have the opportunity to choose their own example of loyalty or betrayal (or a loyalist or traitor) to explore in a research paper.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Truth Claims in a Post-Truth W**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Truth Claims in a Post-Truth World**

We often describe an idea or phrase as having "the ring of truth," but what does truth sound like? And what happens when politicians, news organizations, and advertising agencies learn to reproduce or mimic that sound? This course addresses recent claims that we are living in a "post-truth world," and considers the fate of argument in a world in which truth is subjective, and fact divided into mainstream and alternative forms. Is it possible to draw clear lines between fact and fiction, truth and lies? In Unit 1, we'll consider the methods we use to distinguish fact from fiction, truth from lies, as we examine fictional texts that blur these lines, philosophical texts that seek to define them, and non-fictional texts that explore the real-world stakes of these distinctions. In Unit 2, we'll focus on subjective truths (or truths that differ for each individual) and examine the challenges these truths pose. We'll also explore podcasts, social media platforms, and interviews to explore how the internet has shaped our relationship to truth and argument. Unit 3 will take us where the quest for truth reaches its extremes: the conspiracy theory. We'll look at the complex anatomy of conspiracy, and students will have an opportunity to design original research projects that fit their interests.

Topic: **Personhood in U.S. Constitutio**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Personhood in U.S. Constitutional Law**

According to philosopher Thomas Hobbes, the world—including human selfishness—is violent, immoral, and ultimately unjust. Therefore, societies establish supreme laws to uphold contracts, preserve property, serve the general welfare, and secure peace. However, a problem arises from Hobbes' standpoint: if societies thrive upon arbitrary authority, it is only insofar as beneficiaries are able and willing to abide by the law. But given that humans are naturally uncooperative in the Hobbesian worldview, societies must invent something that recognizes and is in turn recognized by the law: a "person." As a result, humans, non-human entities, and corporations can be "personated." Jurisprudence consequently grapples with criteria whereby persons are defined. While Hobbes is not the architect of the U.S. Constitution, his influence on the issue of personhood is most apparent when we ask, "who are the 'we' in 'we the people?'" What counts as a person? No question is more urgent in the course of U.S. events than when personhood is defined by the Supreme Court. From *Dred Scott v. Sandford* to *Brown v. Board of Education*, from *Roe v. Wade* to *Citizens United v. FEC*, this course explores numerous landmark decisions that have made and unmade people.

We begin in the first unit by focusing on race and citizenship, asking questions about how personhood figures into the history of U.S. slavery and segregation. In the second unit, we move to Supreme Court decisions on the topics of gender and civil liberty. Finally, in Unit Three we examine some of the most contentious cases within the Supreme Court's purview in recent decades, highlighting a range of controversial topics, including abortion and *Citizens United*. While we will read scientific and sociological articles in addition to reading cases as a group, assignments in preparation for your independent Research Essay welcome various interdisciplinary approaches as opportunities to cultivate your own investments which, in turn, makes for better writing.

Topic: **Are Prisons Obsolete?**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Are Prisons Obsolete?**

This is an Engaged Scholarship course.

With 1.8 million Americans currently locked behind bars, the United States imprisons its citizens at a higher rate than any other country in the world. But calls to reimagine our country's carceral system are on the rise. Black Lives Matter and other movements are asking urgent questions: why are Black Americans imprisoned five times more than white ones? Should there be for-profit prisons? What crimes merit confinement? What is the purpose of prisons? And do we even need them? In this course, we will grapple with these questions by examining a variety of scholarly perspectives on the United States prison system. We will begin by analyzing the arguments for prison abolition versus reform in Angela Davis's *Are Prisons Obsolete?* (2003). To situate ourselves within a broad debate over the history of mass incarceration in the United States, we will then compare recent scholarship on the subject by Michelle Alexander, James Forman Jr., and Elizabeth Hinton. We will also read first-hand accounts of prisons in Reginald Dwayne Betts's memoir and poetry. Over the course of the semester, we will receive visits from prison abolitionists, civil rights attorneys, and formerly incarcerated people, who will help us understand the movement to end mass incarceration in the United States.

Topic: **Family Trees and Family Sagas**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Family Trees and Family Sagas**

The age of Ancestry.com and 23andMe has given people instant access to a wealth of information about their family histories. Census data, birth and death records, and other sources essential to genealogical research have become vastly more accessible. At the same time, genetic testing continues to open up radically new ways to learn about one's ancestry—though scientists are still debating what exactly DNA evidence can tell us about our distant forebears. Yet all this information newly at our fingertips means little until shaped into a story of some kind. So how do the facts of ancestry combine with the art of narrative? How do stories about our ancestors affect our sense of who we are as individuals? What happens when newly discovered information about a person's ancestry disrupts the story they previously told themselves? And how do family histories intertwine with the great events of history itself, with wars and revolutions, religious persecutions, mass migrations, and legacies of enslavement and colonization?

This course is about ancestral stories, and how those stories contribute to our sense of self. We begin by interpreting a classic

example of family history raised to the level of art: *The Saga of the People of Laxardal*, one of the so-called "family sagas" composed by Viking Age Icelanders. In our second unit, we shift focus to modern America, to ask how Americans' sense of racial identity is shaped by knowledge of their family histories. Readings will include W. E. B. Du Bois's essay "The Concept of Race," an episode of the PBS series *Finding Your Roots*, hosted by Harvard scholar Henry Louis Gates, Jr., and recent articles from sociology and cultural studies on the contemporary phenomena of ancestry tests and "genealogy TV." Finally, in the third unit, students craft an argument about what a selected work of art reveals about the significance of ancestral stories in contemporary society, choosing a modern "family saga" to write about from a list that includes *The Godfather Part II*, Octavia Butler's novel *Kindred*, and the HBO series *Succession*.

Topic: **Why Shakespeare?**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Why Shakespeare?**

Shakespeare, we have been told, is extremely important. You may agree or disagree, but do you know why Shakespeare matters to so many people? Why did England choose Shakespeare as its literary figurehead? Why does every high school in the US assign Shakespeare? Why did the British government decide to pay £1.5 million to have his works translated into Mandarin? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern

world. We'll track the playwright's afterlives throughout time, around the world, across the academic disciplines, into new artistic forms from painting and music to film and social media, from colonizers and NAZIs to civil rights movements and prison theater, and in light of identity categories such as gender, race, sexuality, class, religion, disability, and the intersections among them. We'll practice thinking and writing in different academic disciplines—from literary studies and sociology to economics and computer science—by asking how and why Shakespeare shows up across the concerns and cultures of modern life. We'll begin with the most famous artwork of the past millennium, *Hamlet*, about a young scholar (like you) who finds the injustice of the world overwhelming (like you?). Then we'll turn to *Macbeth*—a play about the quest for self-determination when society has told you to stay put—in conversation with two recent texts: business journalist Rachel Bridge's *Ambition: Why It's Good to Want More and How to Get It* (2016) and Whitney White's *Macbeth In Stride*, a play about being an ambitious Black woman in the twenty-first century. Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the skeptical (Shakespeare is a dead white male that other dead white males have used to promote the values of dead white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Topic: **Culture and Politics of Inequa**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Culture and Politics of Inequality**

The 21st century bears witness to alarming trends in social and economic inequality. Major disparities in income, wealth, and opportunity underlie our anxieties about structural violence and climate change, which disproportionately affects the global south. Continual reports on the United States' racial wealth gap coupled with the recent Black Live Matter protests beg the question: How long can we settle for incremental solutions to such alarmingly imminent problems? We will begin by interrogating the Enlightenment philosophy of Rousseau in *Discourse on the Origins of Inequality*, which attempts to understand how inequality manifests from the moral complications and social conflicts of civil society. Next, we will examine *The Wretched of the Earth*, a landmark work of political philosophy by the psychiatrist and revolutionary fighter Frantz Fanon, and we will explore how mass incarceration and contemporary forms of structural violence stem from colonialism and what one historian of the Black Radical tradition, Cedric J. Robinson, calls racial capitalism. In our final unit, we will read literature from the natural and social sciences to enter a debate about how global capital stokes the kind of human activity that has led to a troubling new geological epoch, the anthropocene. Throughout the course, we will pursue rigorous answers to the following questions, among others: What responsibilities do we share for increasingly fragmented social and economic spheres when many forms of inequality are at a century high? To what extent is the violence waged by states and private interests endurable or unacceptable? In what ways has the pandemic affected inequality? What must we do if climate change continues to outpace our timelines for environmental solutions?

Expository Writing 20 (116353)

Lusia Zaitseva

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Loyalty & Betrayal**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Loyalty & Betrayal**

If you heard that someone protected their family members faithfully, you would probably consider that person to be acting in a loyal and virtuous manner, but if you then learned that this person was a member of the Soprano crime family, you might feel a bit differently. Likewise, it's hard to know how to act if an institution to which we have historically been loyal comes under morally bankrupt leadership or if someone close to us holds beliefs we disagree with—especially if we risk being considered guilty by association in the public eye. Clearly, then, it matters to whom or what we are loyal, under what circumstances, why, and at what cost. Perhaps it's not all that surprising, then, that some philosophers have gone so far as to argue that loyalty and morality are fundamentally incompatible. In this course, we will explore some of the big questions about loyalty and its counterpart, betrayal, that have occupied humans for millennia: what role, if any, should our personal history and identity play in our loyalties? How can we act ethically when two loyalties come into conflict? Can betrayal ever be virtuous? Can we exit a group but still be loyal to it? And must loyalty entail personal cost to be meaningful?

In Unit 1 we will read short stories from Edith Wharton, Alice Munro, and Lesley Nneka Arimah, which provide rich material for thinking about the ties that bind us and what happens when they are tested. In Unit 2, we will shift our gaze to politics. We will deepen our understanding of the contemporary American political landscape as we grapple with fundamental questions of the role that loyalty plays in partisanship: what is the promise and peril of party loyalty? Should we remain loyal to our party even if (or especially when) we see its flaws? How do we decide what is worthy of loyalty to begin with, and can we be loyal to a cause but maintain independence of thought? Finally, in our third unit, students will have the opportunity to choose their own example of loyalty or betrayal (or a loyalist or traitor) to explore in a research paper.

Topic: **Retelling Boston's History**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Retelling Boston's History**

This is an Engaged Scholarship course.

The Cradle of Freedom, The City on a Hill, The Hub of the Universe: Even Boston's nicknames point to its illustrious history, a history Boston has used to its advantage: over sixteen million tourists visit Massachusetts annually, driving an industry valued at over 10 billion dollars, and a huge part of that is historic tourism. Almost a quarter of them walk through Boston, doggedly following a narrow red line to experience that history: The Freedom Trail. Over 3 miles connecting 16 sites, the Freedom Trail tells the story of Boston history as historians of the 1940s and 1950s imagined it: triumphant, patriotic, and very narrow. It is a story that involves a couple hundred men, not the vibrant city of 12,000 men and women, over 1,000 of them enslaved Native Americans and Africans, who lived here in 1776.

For the past five years, and with new vigor since the summer of 2020, Americans have been forced to reckon with their history in new ways: what should be taught? Who should be venerated? As our interpretation and understanding of our history changes, how do we change its presentation? So far, most of the discussion around history and inclusivity has focused on removal—taking down statues, taking

away names. But what if, instead of removing, we learned how to work with what we have: we can't tear up the red bricks–the Freedom Trail exists, and entices tourists every year. How do we instead *use* it?

This course, which by its nature will be only offered once, will first work with local nonprofit Boston By Foot, carrying out a careful review of their existing "Road to the Revolution" tour. Using the same tour-guiding principles as the National Parks System, you will travel out of the Yard and into Boston to examine the arguments made by buildings, tour guides, and the city itself. where the tour has opportunities for a broader history, and where there are themes that emphasize a "bottom up" approach to history. You will then present these findings to Boston by Foot's Guide Committee. In the second half of the course you will make your own best effort at re-presenting this history. You will receive training as guides in order to learn how to assess the performance of public history. Finally, you will each research a site along the Freedom Trail, and working collaboratively as a class, create your own tour to be presented to the public on April 30.

Topic: **What Do We Talk About When We**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **What Do We Talk About When We Talk About Climate Change?**

This class will explore how to write, think, and talk about the complexities of global climate change. We are living in a moment where the reality of massive, human-made global climate change has become unavoidable. In the face of our changing plane--the loss of

ordinary seasons, bugs, expected weather, known landmarks--language can seem hard to find. While fires burn in California and coastlines disappear, artists, politicians, business owners, and citizens seem to still be casting about for a way to comprehend and talk about the changes that are already taking place, and the ones that are coming. How can we write about a world in flux? How does the effect of environmental disaster change depending on our class, or race, or gender, or location? How do we create narratives about environmental loss?

In unit one, we will investigate how different experts describe the current effects of the climate crisis. We will read the newest IPCC report on the climate crisis, and use it to analyze a series of green or eco advertisements in light of this scientific and international understanding of the crisis. In the second unit, we will turn to competing stories about the origins of the climate crisis. Some scientists and historians claim that the Anthropocene, a name for this geological era of human-made change, begins with the start of agriculture or the beginning of the nuclear age; others place the beginning in the rise of the plantation system in the Americas. Reading poetry by Tommy Pico, fiction by Karen Tai Yamashita, and watching the film *Daughters of the Dust*, alongside selections from the scientific journal *Nature* and excerpts from work by ecofeminist Donna Haraway, we will compare how each starting point tells a different story about the cause, and the continuing effects, of climate change. In unit three, we will turn to the future, asking why so many of our climate crisis narratives imagine the end of the world and asking what it means to imagine the future in the moment of crisis. Final research papers will evaluate visions of the future, with such examples as seed-saving projects, Octavia Butler's novel *The Parable of the Sower*, the student-lead climate change movement "Fridays for the Future," and the Green New Deal.

Topic: **"The Game's Afoot!" English De**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **"The Game's Afoot!" English Detective Fiction**

What are the staple elements of classic detective fiction? What happens when authors break the rules to shock their readers? Does a story's narrative style conceal or reveal important clues? How does the constraint of a "locked room" setting lead a writer to create new effects and what other innovative narrative devices should we note? Are victims and culprits sometimes difficult to distinguish from one another? Might a work of fiction be classified as a mystery story, a Gothic ghost story, or a tale of psychological horror all at the same time?

We begin with classic "tales of ratiocination" and sleuth out the rise of the detective figure, starting with Edgar Allan Poe's Dupin and Arthur Conan Doyle's private consulting detective Sherlock Holmes, the most famous "man who never lived and will never die." Then we turn to the "clue puzzles" and "whodunnits" from the Golden Age of English mystery fiction, from Hercule Poirot's novel attention to the psychology of suspects in notorious page-turners such as Agatha Christie's *Murder on the Orient Express*, and, in later weeks, to stories focused on more non-traditional detective characters, ranging from female sleuth/village spinster Miss Marple and the troubled governess in Henry James' *The Turn of the Screw* to the barrister/lawyer Mr. Mayherne and the full cast of investigators in *And Then There Were None*. Critical readings paired with our tales frame our discussions of a literary genre, extending our analysis to detective fiction's commentary on social class, colonialism, real crime, and gender and ageism, to name a few.

Over the semester, we also explore some important subgenres of mystery detective fiction—gothic, revenge, and "fantastic" tales—as well as consider how our literary narratives shift when they are translated visually, reworked for contemporary film and televised series (e.g.,the BBC's *Sherlock*, etc.). As we seek to define the conventions and innovations of the mystery fiction genre, we also examine what constitutes the "perfect crime" and fitting punishment according to our detective characters and whether readers agree that appropriate justice has been rendered—or ever can be.

Topic: **Friendship**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Friendship**

Would a real friend help you hide a body? Is our natural tendency to look at our friends under the best possible light an admirable act of kindness or a pernicious form of partiality? What makes someone a friend in the first place? Philosophers since Aristotle (circa 384-322 B. C.E.) have been wrestling with these questions and in doing so, they have added crucial details, distinctions and depth to our understanding of friendship. In this class, we will join this conversation by considering several key claims that philosophers have made about friendship. We will begin our journey by studying Aristotle' s foundational question of what makes someone a friend. Next, we will

visit early modern England to investigate the rewards of friendship by considering philosopher Mary Astell's (circa 1666-1731) argument that friendship can solve social problems and promote social justice. In the final unit of the course, we will consider the dark side of friendship as we research contemporary cases where friends have led each other astray. Students will have the opportunity to choose their own cases as they attempt to answer the question of whether friendship can be dangerous.

Topic: **Privacy and Surveillance**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Privacy and Surveillance**

Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to our communications in the name of national security. It is easy to decry this state of affairs as Orwellian or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice.

We will begin by exploring the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? We will then consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Finally, we will examine what privacy rights we have with respect to private entities such as corporations, universities and charities.

Topic: **Place-Making: Self-Discovery i**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Place-Making: Self-Discovery in a Modern World**

In this course we will consider significant questions surrounding self-discovery in modern American life, film, and literature. How do we each arrive at a sense of who we are, both as individuals and as members of a group? How does the institution, city, or natural environment we are in affect that sense of self? In what ways do our home identities—including race, gender, sexual orientation, and class— necessarily change as we encounter new places in our lives? The writers and directors we will study provide tentative answers and new complications to these central questions.

We'll begin by closely reading a tale of one woman's experience with self-discovery while in the hospital for mental health issues: Susana Kaysen's memoir *Girl, Interrupted*. In the second unit, we'll move on to examining a personal essay about the AIDS crisis in San Francisco, "Late Victorians" by Richard Rodriguez, bringing it into conversation with other sources that present different questions of identity. Finally in the third unit, we'll turn to films that explore the trope of a journey of self-discovery; we'll view *The Motorcycle Diaries* (2004), *Into the Wild* (2007), and *Alice Doesn't Live Here Anymore* (1974). You will then gather sources that show how these narratives have been received by scholars and mainstream media, as well as sources that help examine how these journeys impact both the individual and greater American culture.

Class Notes: **Privacy and Surveillance**

Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to our communications in the name of national security. It is easy to decry this state of affairs as Orwellian or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice.

We will begin by exploring the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? We will then consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Finally, we will examine what privacy rights we have with respect to private entities such as corporations, universities and charities.

Expository Writing 20 Section: 257

Expository Writing 20 (116353)

Christina Becker

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Reading Museums**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Reading Museums**

As a repository of treasured cultural objects or a labyrinth of imposing masterpieces, museums can loom large in the public's imagination. Because they often command reverence as hallowed institutions of culture and education, it can be difficult to decode museums beyond the authoritative guides and scripted tours. Sometimes, as art historian Svetlana Alpers notes, "[m]useums can make it hard to see." In this course we will learn to "see" museums for ourselves – as cultural critics and personal stakeholders, examining the museum as a vital mode of cultural representation. We will analyze its visual language (e. g. its architectural design and layout, the curation and staging of its collections, its use of lighting, installations, and multimedia) as well as its written one (e.g. wall text, signage, and catalogue). Moreover, we will explore different genres of museums (e.g. large public art museum, private house museum, local gallery, natural history museum, etc.). We will investigate how these categorical differences can affect the way museums tackle the following questions: How do museums attempt to represent a nation's collective past, its singularity and diversity, and what do they reveal about our present values? How do museums grapple with the haunting legacies of historical atrocities in the case of slavery and colonialism? How do museums open themselves up to diverse (and sometimes contradicting) perspectives of race, class, and gender? Those questions allow us to examine how museums communicate and mediate our most cherished and contested values about who we are as individuals, as a society, and as a nation.

Topic: **The Uses of Horror**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **The Uses of Horror**

In a conversation with Stephen Colbert, comedian and filmmaker Jordan Peele referred to his 2017 horror film, *Get Out*, as a "historical biopic." His claim that "the movie is truth" invites us to reflect on the relationship between horror and history – between fictional and filmic fantasies that terrify us and our own lived realities. In this course, we'll think about what makes horror cohere as a genre, how its aesthetic qualities operate on the mind of the observer or reader, and what kinds of social and cultural commentary might we discover in a genre that's often been dismissed as frivolous. The readings for this course – and our responses to them – will help us think through some key questions: How do we explain our cultural preoccupation with the macabre? How might our engagement with terrifying works of the imagination help us think in new ways about the world in which we live? While these questions are relevant to (and potentially answered within) a range of disciplines – from sociology to psychology to neuroscience, and beyond – our primary sources in this course will be works of fiction and film.

In our first unit, we'll read a range of short stories (by Edgar Allan Poe, Nathaniel Hawthorne, Joyce Carol Oates, Carmen Maria Machado, Mariana Enriquez, and others), paying particular attention to how they express anxieties about the unknown and the irrational and how they serve as allegories for psychic and social realities. We'll also think about how the 20th- and 21st-century authors riff on and subvert the conventions of their 19th-century predecessors. In the second unit, we'll examine the role that paranoia plays in the horror genre by way of another classic-contemporary pairing: Henry James's novella *The Turn of the Screw* and Peele's *Get Out*. We'll read several theoretical

sources that will help you think (and write) about how novella and film operate as allegories. For the third unit, you'll have the opportunity to write a research paper about a primary source (or sources) of your choice: horror film, Gothic novel, short story, etc. Our shared sources for the unit will provide a broader sense of the genre and some of its key questions and concerns. These sources will serve as springboards for your independent research.

Topic: **Religious Pluralism**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Religious Pluralism in the United States**

The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and

behavior. And despite predictions to the contrary, levels of devout religious belief remain high, evidenced by recent controversies over a proposed Islamic community center in Lower Manhattan, as well as Supreme Court rulings on female access to contraception and same-sex marriage. How do people—including nonbelievers—experience this religious multiplicity? How are these vast religious differences negotiated socially, culturally, politically, and legally? Moving beyond theology, this course will explore the broad concept of lived religion in the United States. Through readings in fiction, law, history, and sociology, we'll tackle these fundamental issues. In Unit One, we'll read Ayad Akhtar's 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars' arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

Topic: **Is It O.K. To Be A Luddite?**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Is It O.K. To Be A Luddite?**

"Is it o.k. to be a luddite?" This is the question that writer Thomas

Pynchon asks us in a 1984 essay of the same name. "And come to think of it, what is a Luddite, anyway?" The *Oxford English Dictionary* tells us that the word has at least two meanings:

1. A member of an organized band of English mechanics and their friends, who (1811–16) set themselves to destroy manufacturing machinery in the midlands and north of England.

2. One who opposes the introduction of new technology, esp. into a place of work.

As the second definition suggests but doesn't outright say, "luddite" is typically an *uncomplimentary* term for someone who is suspicious of technology and, by extension, progress. This course will ask us to really consider the question Pynchon poses: is it okay to resist (or outright reject) technology? And what would it mean for us to do so? We will approach these questions (and many more!) from the perspective of cultural analysis, looking at how literature, film, and visual media reflect humanity's ongoing relationship with—and struggles against—technology. We will read and write about world-altering technologies that are difficult to ignore, but we will also explore the quotidian, the utopian, the obsolete, and the downright absurd—from Google Earth and cloud seeding to VHS tapes and big balls of garbage—all the while looking for ways to understand technologies through the stories we tell about them.

Topic: **Journeys of Self-Discovery**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Journeys of Self-Discovery**

"Who am I?" Our sense of self imbues every aspect of our daily lives. Yet how do we come to know who we are, both as individuals and as members of a group? On our journey of self-discovery, how do we each arrive at a sense of who we are, both as individuals and as members of a group? What life events, desires, values, belief systems, emotional or cognitive biases, and cultural or societal structures shape our development and our ultimate sense of our self? In this course, we will consider several complex pathways to self-discovery depicted in a wide range of literary works. The writers we study investigate answers, propose complications, and spur debates about the central questions of this course: How do we discover, claim, and represent a sense of identity? What are the bases by which we measure and define the self? How can we go about cultivating an expression of the self through our own unique voice? Is the self ultimately knowable—or not? We will explore these questions in three distinct units. We will begin with a psychological portrait of the self in *Girl, Interrupted*, Susanna Kaysen's memoir of her adolescent years in a psychiatric hospital located near Harvard University. In the process of narrating her experiences there, Kaysen questions our fundamental notions of and assumptions about selfhood and sanity. Next, we will read a diverse set of voices, including short nonfiction works by James Baldwin, Langston Hughes, Tim O'Brien, Gary Soto, and Amy Tan, who speak of life events in which complexities, contradictions, conflicts, and paradoxes weigh in on decisions to conform to or defy expectations that are imposed upon shaping or reshaping the self. Finally, we will explore the self in cinema, debating how questions of the self and self-discovery inform films of various genres.

Topic: **"A Pirate's Life for Me": Lege**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **"A Pirate's Life for Me": Legends of Buccaneers at Sea**

In this course, we will read (and watch!) some of the best-known stories about pirates in the age of sail. We'll explore both the myths and realities of these infamous outlaws, and ask why their crimes were treated so uniquely: sometimes the stateless "villains of all nations," society's most wanted criminals; sometimes celebrated for their daring, or even seen as patriotic heroes. We'll also consider what kind of "work" stories about pirates do in our culture: what ideas, institutions, and systems do they question or defend? The "wooden world" of the ship's decks, after all, offers a space for thinking about how communities are made. It is a space where state violence is enacted and ideas of criminality are formed. It is also a space where norms and perceptions about gender, sexuality, race, and class can be re-imagined in new ways. But does this translate into subversive potential? Or are tales of life at sea just places where society can make castaways of its own inner demons? And, perhaps most strangely of all, how do the murderous escapades of society's villains become the stuff of Disney rides and cartoons for children? In other words: why are pirates fun?

We'll begin the class with some stories of real-life pirates, both men and women, from the Golden Age of Caribbean piracy that were collected by the pilloried, exiled, and nine-times-imprisoned opposition journalist Nathaniel Mist in his bestselling *General History of the Pyrates*. We'll examine the rhetoric of these tales and think about the way they are told and the political and social work they do. Then, in the second unit of the class, we'll read the most famous fictional tale of piracy, Robert Louis Stevenson's *Treasure Island*, and think about the role it (and stories like it) played in reshaping the pirate's modern myth as one of boyhood and masculinity. In the class's final weeks, we'll look at some film and popular culture and consider the ongoing life of the legends of piracy today.

Topic: **Literary Translations and the**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Literary Translations and the Stories They Tell Us**

When Amanda Gorman (Class of 2020) read "The Hill We Climb" at President Biden's inauguration, she inspired audiences worldwide and sent international publishers clamoring to release her poetry in translation. Soon, a Twitterstorm erupted over the suitability of the Dutch and Catalan translators, resulting in their removal from the projects. Undoubtedly, The question of what constitutes a "faithful translation" is as salient now as it was in AD 395, when Saint Jerome was forced to write a defense of his innovative translation of *The New Testament*, which rendered ancient Greek to the Latin vernacular "not word for word, but sense for sense." What beliefs about translations — and fears about the power translators wield — sparked these controversies? As we will learn, the task of translation is complex. Just one word can affect the story a translation tells us. We'll begin to explore the power of translation by studying two English versions of a famous poem by Chilean Nobel laureate Pablo Neruda, paying close attention to how each translator's choices determine what the poem tells the reader about romantic love. From there, we'll analyze fictional accounts of contentious relationships between authors and translators in the novella *Translator, Translated* by Indian writer Anita Desai and the short story "The Case of the Unfaithful Translator" by Spanish author José María Merino. Lastly, we'll delve into influential English writer Angela Carter's groundbreaking 1977 translation of Charles Perrault's 1697 version of "Little Red Riding Hood," and the story it inspired, "In the Company of Wolves" (1979). You'll conduct your own research to place the texts in the context of the UK in the 1970s, analyzing Carter's "Little Red"s as artifacts that tell us something about the time and place in which they were produced. A decade between the "swinging 60s" and the political and economic austerity of the 80s, the 1970s was rife with turmoil and change. In your essay, you will research one salient feature of these turbulent times — such as second wave feminism, the founding of the Gay Liberation Front, burgeoning environmental activism, labor strikes, or political violence — and identity the subtle and not-so-subtle ways they make their mark on Carter's pages.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **The Social Construction of Gen**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **The Social Construction of Gender**

Gender is one of the most important characteristics determining a person's place in society. Gender organizes our expectations for others as well as for ourselves, and can either enable or inhibit an individual's possibilities. While gender is a dominant feature of social life, it is a complex concept that is undergoing constant modification and reinterpretation. In this course we will grapple with the meaning of gender as a social construct and investigate the ways gender influences individuals' daily lives. In Unit 1, we examine one of the most influential texts in gender studies, Judith Butler's *Gender Trouble* . We work to parse, interpret, and ultimately evaluate the central idea in Butler's notoriously difficult text. In Unit 2, we engage with two sociological articles that theorize the ways gender organizes social life. We will apply ideas from the theoretical texts to analyze the ways gender—as both a macro-level social institution as well as a individual-level frame of perception—influenced the 2016 sexual harassment scandal at Fox News depicted in the film *Bombshell*. In Unit 3, we engage with four sociological research papers that examine the ways gender affects social life in discrete contexts: (1) workplace experiences of trans people who have presented as both women and men, (2) the relationship between gender norms and the egg/sperm markets, (3) variation in gender-role attitudes across Europe, and (4) the paradoxical positioning of young straight men incorporating elements of "gayness" into their identities. In this final unit, students design their own research question investigating the meaning of gender and its effects in a specific context.

Expository Writing 20 Section: 268

Expository Writing 20 (116353)

Jessie Schwab (she/her)

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Language, Identity, and Power**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Language, Identity, and Power**

While a variety of animal species can communicate, humans are unique in their use of language. Language enables us to talk about the future and the past, express complicated thoughts, and develop new technologies. But to what extent does the language we use also make us who we are? How do our social and cultural backgrounds inform our use of language, and how does our use of language influence our social relationships? In this course, we will explore the intersections of language, identity, and power from an interdisciplinary perspective. In our first unit, we will test a classic theoretical claim regarding gender differences in communicative interactions by analyzing conversations from the reality television show *Married at First Sight*. In our second unit, we will collect our own data (in the form of conversation recordings or interviews) to further examine the complex interactions between language, identity, and power dynamics. Here you will form an argument regarding the extent to which elements of our daily language use help to reinforce or subvert existing power structures or markers of identity. In our final unit, you will work to communicate your research-based argument to a wider audience by planning and producing a 10-minute podcast, in which you will distill your research findings and weave in additional evidence. Throughout the course, you will also be encouraged to reflect on your own experiences with language, including the ways in which your native language/s, accent/s, and communication style/s influence your identity and relationships.

Topic: **Gothic Fiction**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Gothic Fiction**

Horror, madness, monstrosity, death, disease, terror, evil, and weird sexuality": these preoccupations, according to a recent critic, have animated the Gothic genre ever since it emerged in the mid-1700s. We will contemplate these preoccupations as we examine a range of Gothic texts, from eighteenth-century Gothic fragments to stories by Edgar Allan Poe and Isabel Allende. And we will ask these questions about those texts: What makes the Gothic "Gothic"? How are we to understand its recurring motifs--its crumbling old houses, fragmented texts, prematurely buried women, incestuous siblings, and mad narrators? And what have modern Gothic writers and readers made of the genre they've inherited? We'll develop a working definition of the Gothic in our first segment, which will take a group of short stories, from various centuries and countries, as its primary texts. Next, we'll consider several of Edgar Allan Poe's stories (including "The Fall of the House of Usher," "The Tell-Tale Heart," "The Cask of Amontillado," and "Ligeia") in relation to each other and in the context of what a handful of critics have argued about them. Our third segment will focus on "the new Gothic": your final project, a research essay, will require you to identify a modern Gothic work in any medium—the possibilities include fiction, film, television, music, and visual media--and to develop your own argument about it in the context of contemporary critics' ideas.

All sections emphasize revision.

Topic: **Austen and Us**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: **Austen and Us**

In this class, we'll look at the work of Jane Austen and its afterlives. Relatively obscure in her lifetime, Austen wrote about a narrow subject: marriage and manners in provincial England at the turn of the nineteenth century. Two hundred years after her death, however, Austen's novels are read and discussed by millions across the globe, adapted for film and television, and obsessed over by fans. Though much has changed since Austen's time, her work remains relevant: we reimagine her stories in present-day settings and debate whether she was a radical or a conservative, a champion of feminism or a defender of patriarchy, a critic of colonialism or an apologist for empire. Why does Austen still speak to us? What makes her work endure, and what happens when we adapt it? What can her novels tell us about the issues—such as inequality and gender—that shape our world?

We'll explore these questions while reading and writing about literature, film, and criticism. We'll begin with one of Austen's masterpieces, *Emma*, a brilliant comedy of misunderstandings that features some of Austen's most interesting uses of irony and perspective and asks fundamental questions about love, class, and women's roles. Next, we'll turn to two contemporary adaptations of *Emma*—1995's *Clueless*, which transplants Austen's novel to Beverly Hills, and 2020's stylish *Emma*—to think about how filmmakers transform literature into a visual medium and adjust their source

material for a modern audience. To conclude, you'll have the chance to identify an Austen-related topic that interests you and explore it in a research essay.

Expository Writing 20 Section: ES22

Expository Writing 20 (116353)

Peter Vilbig

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Department **Enrollment Cap:** 10

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the Expos Website. All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: **Expos Studio 20: The Successfu**

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Folklore & Mythology 97

Fieldwork and Ethnography in Folklore: A Tutorial in Cultural Documentation and Community Engagement (134893)

Lowell Brower

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0459 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This tutorial introduces students to the study of cultural traditions, beliefs, and artistic expressions—their performance, collection, representation and interpretation—through the practice of ethnography. Both ethnographic and theoretical readings serve as the material for class discussion and the foundation for ethnographic fieldwork.

At once a crash course in ethnographic theory and ethics, and a practicum in qualitative methods, FM97 weds scholarly inquiry and academic study to practical experience in cultural documentation and personal involvement with local tradition bearers and folk communities. Guided by an interdisciplinary collection of texts, students will have the opportunity to study folklore from the ground up, not only through an academic lens, but through personal relationships, cultural participation, and inquisitive explorations of local communities. Throughout the semester you will be invited to develop skills in qualitative research, cultural documentation, proposal design, interviewing, and the arts of interpretation as you try your hand at fieldwork and ethnography. By examining folkways, expressive culture, traditions, and performances, and interrogating their import in the daily lives of individual and groups, we will aim to bridge the divide between grand theories and everyday practices, between intellectual debates and lived experiences, between the academic institution and the vernacular world. Ultimately, this course aims to bring "the folks" themselves into the center of the academic study, discussion, and debate. And it aims to give you the tools to help amplify and illuminate their voices, traditions, practices, and lore.

Course Notes:

Required of all concentrators, but open to all.

Folklore & Mythology 98A

History and Theory of Folklore and Mythology (115032)

Stephen Mitchell

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Examines the development of folklore and mythology as fields of study, with particular attention to the methodological approaches suited to their areas of enquiry. Considers the study of folklore and mythology in the 19th and early 20th centuries, but focuses especially on theoretical contributions to the study of folklore, mythology, and oral literature in recent decades.

Folklore & Mythology 111

Folklore of Food (218266)

Joseph Nagy

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A comparative study of what and how food and activities related to food "mean" in a variety of cultures, as reflected in folklore and oral tradition. Lectures, discussion, and readings will address issues such as: the ritualization of food and cooking in both sacred and secular settings; the symbolic prominence of food -- its preparation, distribution, and consumption -- in mythologies; fears and anxieties related to food as reflected in "urban legends"; food taboos and superstitions, eating preferences, magical properties of food, and notions of "comfort foods," all both culturally and individually determined; and the alternation of traditional "feast" and "fast" in the rhythm of social life.

Supernatural Storytelling: Ghost-lore, Occult Legends, and the Politics of the Paranormal (218914)

Lowell Brower

2021 Fall (4 Credits) **Schedule:** W 0700 PM - 0859 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

What do our ghost stories say about us, what do our beasts betray about us? Which witches bewitch us, which rumors consume us, and what sense can be made of what haunts us?

Restless spirits, alien invaders, wicked witches, bloodthirsty vampires, legendary cryptids, murderous ogres, Illuminati satanists, memetic online menaces: our contemporary bestiary is overflowing with meaningful monsters. Our spine-tingling intellectual task in this course will be to analyze the roles that these malevolent entities and the supernatural narratives we tell about them play in our everyday lives, our historical memories, our communities, our politics, our psychologies, and in the crises we confront as individuals and groups. Are our occult stories allegories of our modern discontents, or simply holdovers from our childhood nightmares? Are they symptoms of specific societal emergencies, or representations of

timeless pan-human fears? How has the witch hunt, the rumor panic, the "standardized nightmare of the group" transformed in this meme-ified age of online participatory culture, global interconnection, ecological catastrophe, and fake-news-driven conspiracy thinking? What can we learn about ourselves, our pasts, and our futures by thinking deeply about what scares us the most? And how frightened should we be of what we might find if we dig too deeply into that question?

Because nowhere is safe from the things that go bump in the night, our interdisciplinary journey will take us across time and space into the bellies of various beasts, from the gates of Harvard Yard, to the hills of Rwanda, to the message boards of 4chan, to the proms of rural Pennsylvania, to the ships of the Middle Passage, to the villages of medieval Europe, to the halls of the White House, to your creepy neighbor's basement, to the deep dark woods. Our abominable assignments will include creative reading responses, the documentation and analysis of frightful folklore, a fearsome final project, and a co-created Haunted Harvard tour. Course activities may include local excursions, storytelling sessions, and paranormal experimentation. Enroll if you dare.

Folklore & Mythology 150

Internet Folklore, Online Communities, and Digital Storytelling (217642)

Lowell Brower

2022 Spring (4 Credits) **Schedule:** F 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 100

That that conspiracy theory you read while scrolling through your Twitter feed last week...that subversive meme just posted to Harvard Memes for Elitist 1% Tweens...that spooky contemporary legend circulating on Creepypasta...that hilarious prank you just saw on TikTok...that infuriating "fake news" your uncle keeps amplifying on Facebook...that 4-Chan board that you wish you hadn't read...your frenemy's latest Instagram post: all of these and more comprise our consequential objects of study in this course. Exploring the wild world- wide-web of "informal vernacular culture" being created, transmitted, and adapted by deterritorialized online communities of 21st century folk, we'll think through the powers, potentials, and peculiarities of online storytelling in relationship to community- building, political engagement, social change, and everyday negotiations of individual and group identity. Investigating online discourses is especially important in a "post truth" age, in whose popular discourse "witch hunts," "internet trolls, "deep state cabals," "occult economies," "fake news", ethno-nationalist myths, and salacious sex rumors, regularly collide with international politics, climate catastrophes, violent conflicts, economic crises, mass migrations, social justice movements, and everyday life in villages and cities across the globe.

Our journey to the depths and heights of the contemporary online world will introduce us to viral videos, dank memes, contemporary legends, fantastical folk beliefs, conspiracy theories, and a whole host of folk-communities-in-the-making, allowing us to think though the relationship of everyday online culture to ancient storytelling traditions, folkloric motifs, and pre-internet ways of knowing, being, and interacting. What new folk groups, storytelling genres, intersubjective possibilities, and political potentialities are arising as a result of online engagement? What kinds of connections are people seeking, and what kinds of meaning are they making through memes, TikToks, "Finstas", Facebook posts, Twitter DMs, Slack channels, Snapchats, and other forms of digital storytelling? What are the powers and potentials of online communities and internet folklore and how are they being harnessed in projects of future-making? This course invites students to research, analyze, and participate in digital storytelling in an attempt to better

understand ourselves and our historical moment through folkloristic engagement. Course texts include ancient myths, Twitter threads, trickster tales, ethnographic essays, dank memes, theoretical articles, YouTube videos, your friends' folkloric repertoires, and your own wild imaginings. Course work will include discussion posts, training in online ethnographic methods, a folklore collection and documentation project, and an analytic essay with a creative option.

Quilts and Quiltmaking (127859)

Felicity Lufkin

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Are quilts the great American (folk) art? From intricately stitched whole-cloth quilts, to the improvisational patchworks of Gee's Bend; from the graphic simplicity of Amish quilts to the cozy pastels of depression-era quilts; from the Aids Quilt to art quilts; quilts have taken on extraordinary significance in American culture. This class surveys the evolution of quilt-making as a social practice, considering the role of quilts in articulations of gender, ethnic, class and religious identities, and their positions within discourses of domesticity, technology, consumerism, and cultural hierarchy.

Class Notes: **Course requires a 1-hour lab section on Thursdays; time to be determined after enrollment is final.**

Tattoo: Histories and Practices (161297)

Felicity Lufkin

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0459 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Tattooing has been practiced in many different social and cultural settings, in many different time periods, to different ends. In the United States, tattooing was long associated with marginalized and stigmatized groups, but since the 1970s, has become increasingly popular and even mainstream. This seminar style class will explore distinct regional histories of tattoo, the development of tattooing in the US, and the different ways that contemporary tattoo practitioners situate themselves historically and negotiate

boundaries of race, class and gender. We will also consider tattoo as an art form that both invites and resists aesthetic judgments.

Freshman Seminar 21I

Evolution, Buddhism, and Ethics (109916)

John Wakeley

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Evolutionary genetics traces back to Darwin's (1859) idea of natural selection. Darwin provided a compelling theory about how species change due to competition in reproducing populations, yet it remains difficult to understand, particularly when applied to ourselves. To enable critical evaluation and discussion of ethical questions and to illustrate connections between science and Buddhism, about one third of this seminar will cover select details of evolutionary genetics. The focus will be on understanding human genetic variation. Buddhism originated with Siddhartha Gautama's enlightenment around 500 BCE, achieved after six years of intense devotion to the problem of human suffering. He emerged as the Buddha, or the Enlightened One, making the bold statement that suffering within each person results from misunderstanding the nature of one's self and its relationship to the ever-changing world. He outlined a program of analytical introspection, morality, and meditation, aimed at solving this problem. As with evolutionary genetics, critical evaluation and discussion of Buddhist ideas in this seminar will be fostered by learning the details of what the Buddha taught. Points of overlap between evolutionary genetics and Buddhism emerge in the ways they undermine appearances, deconstructing phenomena which at first appear wholly unbreakable. We will bring our knowledge of Buddhism to bear on end-of-life issues, the use of human embryos in research, and the prospects for human genetic engineering.

Freshman Seminar 21W

Research at the Harvard Forest: Global Change Ecology-Forests, Ecosystem Function, the Future (112349)

David Foster

David Orwig

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 11

The seminar will consist of weekly discussions led jointly by the instructors and students concerning global change impacts on the New England landscape as explored through diverse studies by Harvard Forest researchers. The readings and discussions will acquaint students with our current knowledge of forest ecosystem structure, function and dynamics, drawing upon state-of-the-art tools, measurements, and studies across New England, including the 4000-acre Harvard Forest. Through discussions, virtual field excursions, and presentations students will become versed in approaches to global change ecology and conservation, the science behind predictions for future conditions, and approaches to utilize natural solutions to mitigate and adapt to these changes. We will broadly address the critical role that forests play in a changing climate, with in-depth discussion on such topics as the history and dynamics of forests due to natural and human processes including the introduction of non-native organisms, the benefits of forests to society across rural to urban settings, and approaches to forest management and conservation. Virtual visits to long-term ecological experiments will help to introduce approaches and infrastructure employed in studying long-term changes in climate and forest ecosystems. Through comparative discussion with

leading scientists of findings in the established 15-year-old synthesis volume on the Harvard Forest Long Term Ecological Research program with new research, the students will help to guide directions for a new synthetic book on New England forests and global change.

Student responsibilities will include: completing the wide-ranging background reading; participating in and leading occasional weekly discussions; writing brief perspectives on topics discussed; and preparing a final paper that will be shared with the class and Harvard Forest community through a mini-symposium on the last day of class.

Course Notes: **This format is intended to immerse students into an active field research setting and allow extended small group interaction with leading global change scientists. Students will emerge with an understanding and ability to explain to a broad audience the major scientific methods and findings used in evaluating global change.**

The Science of Sailing (123658)

Jeremy Bloxham

2021 Fall (4 Credits) **Schedule:** M 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Explores the application of simple physics to various natural phenomena associated with sailing. Topics addressed range from hydrostatics (e.g. why do boats float?) to meteorology (e.g. why do sea breezes veer during the afternoon?). Explores in depth the generation of lift and drag by the flow of air over sails and the flow of water over keels and rudders, examining critically the numerous incorrect explanations in the popular literature.

Recommended Prep: **Participants in this seminar should have a good high school physics background and have some knowledge of sailing.**

Freshman Seminar 22T

Why We Animals Sing (108564)

Brian Farrell

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

We do not sing alone. On land, four kinds of animals produce songs or calls: birds, frogs, mammals, and insects. Some of these (and fish) also do so underwater. The principal sounds such animal species make are signaling behaviors directly related to mating success. They are of individuals, usually males, marking territories, and wooing mates. However, in any one location, species may also compete with one another for occupation of acoustic space (that is, for bandwidth) and otherwise optimize their sound signals to features of their environment. We will explore these topics and others as we listen to and read about each of the various kinds of singers on earth, the biology of their sound production and reception, and the ways they attract mates while avoiding becoming meals for eavesdropping predators. We will listen to many different kinds of acoustic signalers across a wide array of acoustic communities in tropical and temperate settings, both terrestrial and aquatic, and we will examine sound spectra on a large screen as we listen and slow down and isolate sounds to help distinguish their parts. Finally, we will consider the biology and evolution of music in humans, considering evidence from brain studies, archaeology and anthropology, and the music of indigenous peoples. We will look at music parallels in different kinds in animals of other species. There will be field trips to listen to and record assemblages of local species. The overall objective is to awaken the students' sense, understanding, and appreciation of the acoustic environment from which we come, and the role of this environment in shaping human biology and culture. There is a fair bit of reading required in preparation for weekly discussions. Accordingly, participation will be expected for discussion of the readings and listening experiences.

Freshman Seminar 23C

Exploring the Infinite (160198)

W. Hugh Woodin

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Infinity captivates the imagination. A child stands between two mirrors and sees herself reflected over and over again, smaller and smaller, trailing off to infinity. Does it go on forever? … Does anything go on forever? Does life go on forever? Does time go on forever? Does the universe go on forever? Is there anything that we can be certain goes on forever? ... It would seem that the counting numbers go on forever, since given any number on can always add one. But is that the extent of forever? Or are there numbers that go beyond that? Are there higher and higher levels of infinity? And, if so, does the totality of all of these levels of infinity itself constitute the highest, most ultimate, level of infinity, the absolutely infinite? In this seminar we will focus on the mathematical infinite. We will start with the so-called "paradoxes of the infinite", paradoxes that have led some to the conclusion that the concept of infinity is incoherent. We will see, however, that what these paradoxes ultimately show is that the infinite is just quite different than the

finite and that by being very careful we can sharpen the concept of infinity so that these paradoxes are transformed into surprising discoveries. We will follow the historical development, starting with the work of Cantor at the end of the nineteenth century, and proceeding up to the present. The study of the infinite has blossomed into a beautiful branch of mathematics. We will get a glimpse of this subject, and the many levels of infinity, and we will see that the infinite is even more magnificent than one might ever have imagined.

GeoSciFi Movies: Real vs. Fiction (160219)

Miaki Ishii

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Natural disasters such as earthquakes, tsunamis, tornadoes, hurricanes, and volcanic eruptions can have devastating effects on society, but are often over-exaggerated for the silver screen. How can we tell what is believable and what is not? Participants in this seminar will watch one Earth-science related movie each week, will learn background about the science and physics behind the natural disasters portrayed on film, and then will apply a "back-of-the-envelope" calculation to assess realism. Students will be exposed to a wide variety of Earth-science topics and should walk away not only with the ability to point out flaws on-screen, but also the ability to explain natural phenomena in the world around them.

Course Notes:

Students will be required to watch the assigned movie prior to class.

Recommended Prep:

Students must be comfortable with high-school level math and science.

Insights from Narratives of Illness (117969)

Jerome Groopman

2022 Spring (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

A physician occupies a unique perch, regularly witnessing life's great mysteries: the miracle of birth, the perplexing moment of death, and the struggle to find meaning in suffering. It is no wonder that narratives of illness have been of interest to both physician and non-physician writers. This seminar will examine and interrogate both literary and journalistic dimensions of medical writing. The investigation will be chronological, beginning with "classic" narratives by Tolstoy, Chekhov, and Kafka, and then moving on to more contemporary authors such as William Carlos Williams, Richard Selzer, Oliver Sacks, Susan Sontag, and Philip Roth. Controversial and contentious subjects are sought in these writings: the imbalance of power between physician and patient; how different religions frame the genesis and outcome of disease; the role of quackery, avarice, and ego in molding doctors' behavior; whether character changes for better or worse when people face their mortality; what is normal and what is abnormal behavior based on culture, neuroscience, and individual versus group norms. The presentation of illness in journalism will be studied in selected readings from the *New York Times'* and *Boston Globe*'s Science sections, as well as periodicals like the *New Yorker, The New York Review of Books, Harper's,* and the *Atlantic Monthly*. The members of the seminar will analyze how the media accurately present the science of medicine or play to "pop culture." The seminar will study not only mainstream medical journalists, but so called alternative medical writers such as Andrew Weil and celebrity health voices like Gwyneth Paltrow. Patients with different diseases will be invited to speak to the members of the seminar about their experiences. Students will try their hands at different forms of medical writing, such as an editorial on physician-assisted suicide that would appear in a newspaper and a short story that describes a personal or family experience with illness and the medical system.

Physics, Math and Puzzles (109319)

C. Vafa

2022 Spring (4 Credits) **Schedule:** R 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Physics is a highly developed branch of science with a broad range of applications. Despite the complexity of the universe the fundamental laws of physics are rather simple, if viewed properly. This seminar will focus on intuitive as well as mathematical underpinnings of some of the fundamental laws of nature. The seminars will use mathematical puzzles to introduce the basic features of physical laws. Main aspects discussed include the role of symmetries as well as the power of modern math, including abstract ideas in topology, in unraveling the mysteries of the universe. Examples are drawn from diverse areas of physics including string theory. The issue of why the universe is so big, as well as its potential explanation is also discussed.

Recommended Prep:

This seminar is recommended for students with a strong background in both math and physics and with keen interest in the relation between the two subjects.

The Seven Sins of Memory (117972)

Daniel Schacter

2022 Spring (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

How do we remember and why do we forget? Can we trust our memories? How is memory affected by misinformation such as "fake news"? Do smartphones and the Internet help our memories or hurt them? Are traumatic experiences especially well remembered or are they poorly remembered? What are the best ways to study for exams? This seminar will address these and other questions related to the fallibility of memory by considering evidence from studies of healthy people with normal memories, brain-damaged patients who show dramatic forgetting or striking memory distortions, and neuroimaging studies that reveal brain regions and networks that are linked to memory. The framework for the seminar is provided by the idea that the misdeeds of memory can be classified into seven basic "sins". Three of the memory sins refer to different kinds of forgetting (transience, absent-mindedness, and blocking), three refer to different kinds of distortions or false memories (misattribution, suggestibility, and bias) and the final sin refers to intrusive recollections (persistence). We will consider how the memory sins impact everyday life and discuss the possibility that they can be conceptualized as by-products of adaptive features of memory, rather than as flaws in the system or blunders made by Mother Nature during evolution. Relatedly, we will also discuss the interplay between remembering past experiences and imagining future experiences, which provides clues regarding the nature and fallibility of memory.

All Physics in 13 Days (109575)

John Doyle

2021 Fall (4 Credits) **Schedule:** R 0645 PM - 0845 PM

Instructor Permissions: Instructor **Enrollment Cap:** 8

Some claim that there are 13 ideas or principles that can form the bedrock for a pretty good understanding of our physical and technological world. These are:
1) Boltzmann factor and thermal equilibrium, 2) Turbulence, 3) Reaction rates, 4) Indistinguishable particles, 5) Quantum waves, 6) Linearity, 7) Entropy and information, 8) Discharges, ionization, 9) Relativity, 10)

Nuclear binding energies, 11) Photon modes, 12) Diffraction, 13) Resonance. Each week we will discuss one of these principles and see how they explain certain things about the physical world. We will discuss these and connections with other principles, as well as how the principle shows up in technology and, more broadly, in our technological society.

Course Notes:

The meeting time will be determined according to enrolled students' availability.

Recommended Prep:

Also, the recommended prep should be changed to:
This seminar is restricted to students that very likely will major in physics or chem/physics. In their application, students should provide their planned courses for the fall semester. This course will treat several key principles with the expectation that students will encounter them in a more extensive, more formal way in an advanced physics course. Topics may change.

A Brief History of Surgery (127976)

Frederick Millham

2021 Fall (4 Credits) **Schedule:** R 0600 PM - 0845 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The history of surgery begins with the Hippocratic physicians whose principles were based, at least partly, on observation and measurement. However, surgical thinking for first three quarters of the "modern era" was dominated by Galen of Pergamum who, "fooled by his monkeys," established a school thought as false as it was tightly held. The exposure of Galen's errors by Vesalius in 1543 and Harvey in 1628 began a Medical Enlightenment. It would take until the 19th century for the next era of discovery to begin. During this time, the pace and significance of medical discovery increase, yet adoption of good ideas, like antisepsis, seems to take much too long, while bad ideas find adherents in spite of poor or no supporting evidence. Throughout this period, the ghost of Galen continues to haunt hospitals and battlefields. It will not be until the 1930's that Galenism is banished from the wards. Our study will track this history and conclude with a consideration of the management of combat casualties from the time of the first "modern" surgeon, Ambrose Pare, to that of contemporary forward surgical teams in Afghanistan and Iraq. The seminar will consist of weekly discussion, informed by assigned reading and independent inquiry. We will visit the site of the first use of ether anesthesia, and duplicate William Harvey's experiments in the anatomy lab. From time to time we will be joined by other doctors with expertise in specific areas such as infectious disease, combat surgery and anatomy.

Freshman Seminar 24K

The Surprising Science of Happiness (128118)

Nancy Etcoff

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

After a century of studying how to cure mental illness, scientists have started to explore what makes us happy. What have they discovered? In this course, we will critically examine the findings from the new science of happiness, including research in cognitive science, evolutionary biology, psychology, and neuroscience and reveal how this work alters our understanding of what happiness is, the optimal ways to achieve and increase it, the role of circumstance in its occurrence, its effect on our physical health, and its place in human nature. We will consider the notion of a biologically determined "hedonic set point," and question whether there are people who "have started in life with a bottle or two of champagne inscribed to their credit; whilst others seem to have been born close to the pain threshold," as William James noted over a century ago. We will examine how the brain's reward circuitry generates feelings of pleasure, desire, comfort and craving, and the ways it propels us to achieve biologically significant goals. Among the questions we will consider are: What is happiness for? Can one make oneself happier by conscious effort? What are some of the myths about happiness? Finally, is happiness a worthy goal for one's life? Highlighting the most rigorous and promising work in this field, we will attempt to construct a "happiness toolkit." The course will be didactic, interactive and experiential and provide an introduction to a burgeoning field of scientific inquiry.

Freshman Seminar 24Q

Microbial Symbioses: From the Deep-Sea to the Human Microbiome (110305)

Colleen Cavanaugh

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0515 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar examines the remarkable diversity of microbial symbioses, ranging from giant tubeworms and lichens to the human microbiome, exploring their ecology,

evolution, and roles in human health and disease, agriculture, and biotechnology. Microbial associations with animals (including humans), plants, fungi, and protists will be discussed, complemented by microscopy and field trips to local environs including Harvard Yard, the New England Aquarium, and your own microbiome.

Course Notes:

The first meeting of this seminar will be held in Biological lab 2033.

Finding Connections: Perspectives on Psychological Development and Mental Illness (122458)

Nancy Rappaport

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The seminar's challenge will be to deepen our understanding of human development and how individuals cope with serious emotional or social difficulties (neglect, bipolar disorder, autism, depression, schizophrenia). We will use multiple perspectives: medical observations and texts that provide practical knowledge (e.g. The New England Journal of Medicine review articles), narrative readings to understand how patients experience the meaning of illness from the inside out (e.g. The Center Cannot Hold), visitors who will discuss their experience with mental illness, and how development-related mental illness is portrayed in the press (e.g. The New Yorker articles). We will start with the mental life of babies and how scientists interpret infants' nonverbal ways of finding safety and security. This begins the journey of our understanding fundamental needs for tenderness, holding, and making meaning. Understanding how conditions such as autism, depression, and schizophrenia are described in clinical research and literature will help us to appreciate the biological vulnerabilities and relational patterns that may disrupt the human connection. We will examine the resourcefulness required for both fragility and resiliency. Throughout the seminar, the instructor, as a practicing child and adolescent psychiatrist, will bridge the gap between research findings, clinical applications, and everyday insight.

How the Brain Becomes the Mind: A Bottoms-up and Top-Down Perspective (108257)

Thomas Byrne

2021 Fall (4 Credits) **Schedule:** W 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Is the human mind an "emergent" property of the brain? How might that occur? We study how structure and properties of the brain and mind are shaped by biology, chemistry, experience and disease. Experiences during "critical periods" modify brain anatomy/function resulting in learning a foreign language before or after puberty is revealed by a native or foreign accent. Mirror neurons play a role in motor skills, emotion, and empathy: Examples include "contagious" happiness or sadness and theory of mind; their dysfunction may cause autism. Beyond these "bottoms up" explanations, we will also consider a "top down" approach, in which the intention or purpose of a behavior or idea can "pull" our behavior or state of mind, what Aristotle termed "Final Cause." The human brain/mind is a pattern-seeking organ that uses logical patterns to predict the future. From infancy we make sense of the world by using the logic which is embedded as "core knowledge". We then use these patterns to look into the future, to anticipate where a given pattern will lead; we may choose to be "pulled" to that goal; thus, the goal often determines behavior and worldview. We read Victor Frankl's *Man's Search for Meaning* which explores human thought, behavior and purpose. This seminar straddles the realms of science, which asks "how?", and the humanities, which traditionally asks "why?" and strives to reconcile these two approaches to understanding the world and our place in it.

Recommended Prep: **The course is intended for those who have scored -5- on AP Biology, Chemistry, Physics or Calculus**

Dreams: Our Mind by Night (107340)

Deirdre Barrett

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar examines dreams with an emphasis on their relation to the creative process. It draws on psychology, neurophysiology, history, literature, film and other visual arts. We go on 3 field trips: to a dream artist's studio, a Harvard Medical school traditional sleep laboratory, and an MIT lab specializing in portable home sleep monitoring equipment. The Fall 2021 seminar will include a special section on how the COVID-19 pandemic has affected our dreams.

You will keep a general dream journal and also record specific dream-related exercises such as dream

incubation and lucidity practices through the first two-thirds of the seminar. You'll choose a specialty topic of your choice in consultation with me and either 1) write an approximately 10 page term paper combining scholarly research with your own opinions and observations, or 2) propose a project of any other modality—examples have included making a film from a series of dreams, making a documentary about nightmares, writing a computer program which produced a simulated dream account for any topic it was given, painting a series of hypnagogic images with very short gallery-style paper on hypnagogic imagery. For either approach, you will also summarize your project orally in one of the last two class sessions.

Course Notes: **The class will normally meet for 2 hours once a week. The time will be a half-hour longer in the weeks with field trips, film screenings, and final student presentations.**

Requirements: **Course open to Freshman Students Only**

The Universe's Hidden Dimensions (121549)

Lisa Randall

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar will give an overview and introduction to modern physics and cosmology. As with the books, *Warped Passages*, *Knocking on Heaven's Door*, *Higgs Discovery*, and *Dark Matter and the Dinosaurs*, on which it will be loosely based, the seminar will consider important developments in physics today and in the last century. We will consider the revolutionary developments of quantum mechanics and general relativity; and will investigate the key concepts which separated these developments from the physical theories which previously existed. We will then delve into modern particle physics and cosmology and how theory and experiment culminated in the "Standard Model of particle physics" which physicists use today as well as the current cosmological model based on the Big Bang theory and inflation. We will also move beyond the standard theories into more speculative arenas, including supersymmetry, string theory, and theories of extra dimensions of space, as well as ideas about the nature of dark matter and black holes. We will consider the motivations underlying these theories, their current status, and how we might hope to test some of the underlying ideas in the near future.

Transformative Ideas in Brain Science: War, technology, and disease pioneered discovery (156450)

Jeffrey Macklis

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar will offer an integrated historical-neurobiological-neurological introduction to foundational and transformative ideas in the ~3,700 year history of brain science, neuroscience, and "lay" neurology—all accessible to freshmen with interests from neuroscience and (molecular, developmental, organismic, evolutionary, or regenerative) biology to history and philosophy of science to neuroeconomics and medicine. No background will be assumed. Rather, a series of historical vignettes and sources will be tied to modern understanding of core elements of the nervous system, its organization, function, and modes of investigation and manipulation. Selected historical contexts, often involving war, disease, serendipity, and technology advancement, will be highlighted as advancing knowledge in surprising ways. An inter-disciplinary approach will benefit from each student bringing insights from their own reading of primary source and history of science texts, to be added to in-session discussion, with moderation and direction from me (JDM). We will visit a number of the Harvard Collections and museums, including the Museum of Comparative Zoology, Harvard Herbaria, Houghton Rare Books Library, History of Science Collections, the HMS Warren Anatomical Museum collection (Phineas Gage's skull and railroad tamping rod, among much more), the Harvard collection of historical scientific instruments (advances in microscopy, electrical measurement, e.g.), and the state-of-the-art Center for Brain Science human functional brain imaging facility, with each visit providing context for the week.

Recommended Prep:

No background will be assumed.

Changing Our Mind: Evolving Thoughts on Brain Regeneration (156449)

Paola Arlotta

2021 Fall (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

We will discuss current theories on brain regeneration in a dynamic setting that combines brainstorming of the literature with experiences in the laboratory. Students will learn experiments that have shaped the field of brain repair and consider the newest theories on ways to regenerate the nervous system. We will also visit the laboratory to investigate the regenerative capabilities of different organisms. Experimental results will be used to consider, contrast and evaluate how regenerative capacities have changed during evolution and to brainstorm paths forward towards new solutions for brain regeneration in species, like humans, that have not mastered this art.

The Biology and Science of Cancer and Its Treatments: From Empiric to Scientific to Humanistic (125960)

George Demetri

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

"Cancer" represents hundreds of different diseases with a wide variety of causative mechanisms, as well as enormous social impact. This seminar aims to provide an introduction to the biology of cancer and what makes a normal cell become a cancerous one, delving into acquired and inherited genetic abnormalities and effects of environmental factors, such as nutrition, radiation, and tobacco. Current approaches to cancer will be discussed from prevention and early detection to treatment and survivorship. Treatment modalities continue to evolve—no longer just surgery, chemotherapy and radiotherapy, but development of targeted therapies such as monoclonal antibodies, signal transduction inhibitors, vaccines, and angiogenesis inhibitors, which are rationally aimed at biological mechanisms uniquely important to the cancer cells themselves with the goal of reducing side effects of therapy and improving outcomes. Although cancer incidence continues to increase, mortality is decreasing, resulting in many more cancer survivors and a need to care for the secondary effects of the treatment and the societal impact of this disease. We will discus the field of Integrative Oncology, an evolving discipline that teats the patient as a whole and combines the best of eastern and western medicine. As successful cancer management becomes more targeted with the newer therapies, there needs to be an integrative approach which focuses on clinical outcomes for patients, personalized approaches to individual cancers, yet which takes into account the financial impact of new therapies at a global level and allows development of wise public policy decisions.

Digging Egypt's Past: Harvard and Egyptian Archaeology (108261)

Peter Manuelian

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Mysterious pyramids, colossal royal statues, tiny gold jewelry, decorated tomb chapels, temples, settlements, fortresses, and hieroglyphic inscriptions. This was the excavation legacy in Egypt and Sudan of Egyptologist George Reisner (1867–1942). His remarkable career revolutionized archaeological method, as he directed the Harvard University–Boston Museum of Fine Arts (MFA) Expedition, putting Harvard Egyptology on the world stage, amidst British control of Egyptian politics, French control of Egyptian antiquities, and Egyptian yearning for independence. This course explores modern archaeology and Egyptology, colonialism, Harvard and MFA history, and artifact repatriation. In addition, Reisner failed to escape some of the racist impulses of his era, and we must assess those too. Students will access unpublished archival documents at Harvard and elsewhere, and will research important expedition sites, staff members and momentous discoveries.

Course Notes:

Circumstances permitting, field trips to the Peabody Museum, the MFA, Harvard's Visualization Center (Giza Pyramids in 3D), and the Harvard Museum of the Ancient Near East, will bring the HU–MFA Expedition to life.

Freshman Seminar 31P

Trials from Classical Athens and Modern Legal Debates (109474)

Adriaan Lanni

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In classical Athens, litigants represented themselves before hundreds of jurors who rendered verdicts without instruction from a judge. We will evaluate Athens' distinctively amateur legal system by reading surviving court speeches involving homicide, assault, adultery, international law, and commerce as well as Plato's account of Socrates' defense speech. We will analyze the speeches as pieces of legal rhetoric and for the insight they offer into ancient approaches to crime and punishment, the regulation of sexuality, the trial jury, and court procedure. Taught by a law professor, the focus will be on comparing ancient and modern approaches to problems faced by all legal systems. We will use the ancient material as a jumping off point to debate modern legal topics such as the role of victims in the criminal process, jury nullification, the proper exercise of discretion in prosecution and sentencing, the provocation doctrine in modern homicide law, transitional justice institutions (human rights prosecutions, amnesties, truth commissions); theories of punishment, the use of collective sanctions in international law, free speech and the protection of dissent in a democratic society, and direct vs. representative models of democracy. Approximately half of each class session will be devoted to discussing the Athenian cases, the other half to discussing analogs in modern legal debates.

Recommended Prep:

Prior knowledge of ancient history or ancient languages is not required; all readings are in translation and the seminar is designed to be of interest to those without a background in the ancient world.

Freshman Seminar 32M

Food for Thought: Culinary Culture in Spain and Beyond (109626)

Johanna Damgaard Liander

2022 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The French have said that the history of a nation depends on what they eat. Yet in the case of Spain, it's clearly the reverse. What Spain has eaten has been a consequence of the country's vast -and often turbulent- history. Invasions, expansions, exile and immigration have created and continue to create the cuisine and culture, which will be our focus in this seminar. Likewise, we will consider Spain's culinary exchange with Latin America, with specific reference to Argentina, Peru and the Caribbean. From don Quijote's rudimentary repas, to Almodóvar's gazpacho, we'll conclude at the tables of the globalized metropolis. We will first consider food and identity, then food, its rituals and traditions. We will examine Spain from the Middle Ages until the present, the history and regions of the peninsula, and the culinary consequences of transatlantic voyages. We will also consider the repercussions of Europeans arriving in the 19th century, and those of the many closer, traumatic events of the 20th century, and beyond. The readings, all in English, are by novelists, historians, chefs, food critics, sociologists, poets, cartoonists and travel writers over the span of ten centuries. The films and videos are more recent, and will have subtitles. No previous knowledge of Spanish language, or travel to any of the countries mentioned, is required. Neither do prospective students need extensive cooking skills. The only pre-requisite is curiosity about

what, why, and how the people of Spain and Latin America have eaten throughout their history, and how this reflects identity and culture of these lands.

Course Notes:
The class will engage in hands-on sessions in the kitchen.

Recommended Prep:
No previous knowledge of Spanish language, travel to any of the countries mentioned, or extensive cooking skills are required.

Freshman Seminar 33X

Complexity in Works of Art: Ulysses and Hamlet (116807)

Philip Fisher

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Is the complexity, the imperfection, the difficulty of interpretation, the unresolved meaning found in certain great and lasting works of literary art a result of technical experimentation? Or is the source extreme complexity—psychological, metaphysical, or spiritual? Does it result from limits within language, or from language's fit to thought and perception? Do the inherited forms found in literature permit only certain variations within experience to reach lucidity? Is there a distinction in literature between what can be said and what can be read? The members of the seminar will investigate the limits literature faces in giving an account of mind, everyday experience, thought, memory, full character, and situation in time. The seminar will make use of a classic case of difficulty, Shakespeare's Hamlet, and a modern work of unusual complexity and resistance to both interpretation and to simple comfortable reading, Joyce's Ulysses. Reading in exhaustive depth these two works will suggest the range of meanings for terms like complexity, resistance, openness of meaning, and experimentation within form.

The Art and Craft of Acting (126838)

Remo Airaldi

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

We've all watched a great performance and wondered, "How did that actor do that?" Acting is undoubtedly the most popular, most widely experienced of the performing arts, and yet, in many ways, it remains a mystery. This seminar will give students an opportunity to demystify the art of acting by introducing them to the basic tools of the trade—they will learn about the craft of acting by actually "doing" it. It will provide an introduction to acting by combining elements of a discussion seminar with exercises, improvisations and performance activities. Improvisation will be used to improve group/ensemble dynamics, to minimize habitual behaviors, and to develop characters. Students will explore a range of acting techniques designed to give students greater access to their creativity, imagination and emotional life. The aim will be to improve skills that are essential to the acting process, like concentration, focus, relaxation, observation, listening, collaboration and so on. Students will attend and critique theatrical productions on ZOOM. Material from these productions will be used by students in in-class performance activities.

Course Notes:

Please note that there will be a required alternate reality game team event online, Fri, Sept 10, 7-9pm. Please keep this evening time free to participate.

Students will be required to attend or watch theater performances during the course of the term. There will be no charge to the student.

Muslim Voices in Contemporary World Literatures (119569)

Ali Asani

2021 Fall (4 Credits) **Schedule:** W 0645 PM - 0845 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

What do Muslims think of acts of terrorism committed in the name of Islam, the mixing of religion with politics, the rights of women, the ``West''? This seminar investigates the viewpoints of prominent Muslim writers on these and other ``hot button'' issues as reflected in novels, short stories and poetry from different parts of the world. Explores a range of issues facing Muslim communities in various parts of the world by examining the impact of colonialism, nationalism, globalization and politicization of Islam on the search for a modern Islamic identity. Readings of Muslim authors from the Middle East, sub-Saharan Africa, South Asia, Europe and America.

Course Notes:

The seminar will meet for only 2 hours within the time block. No prior knowledge of Islam required. Assignments include compiling a portfolio of creative responses to the weekly readings using different media.

The Transformation of Marketing (160713)

Elie Ofek

2022 Spring (4 Credits) **Schedule:** M 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Marketing, as you will find in this seminar, refers to the set of activities needed to form and sustain a healthy business by fostering meaningful exchanges between the organization and its chosen customers. Marketing helps create value for consumers and extract a share of that value for the organization. We will spend time understanding the fundamentals of marketing management and examine how recent economic, technological, cultural, and societal developments have affected the marketing field. We will first cover the central themes of customer behavior, strategic marketing analysis, innovation forecasting, and brand management. Then we will explore how marketing has dramatically evolved in recent years due to: the digital and social-media revolution; the increasing shift from human-based to technology-based interactions with customers; firms' desire to globalize; societal trends affecting consumer preferences; and the call for companies to exhibit greater social responsibility. In examining these themes, we will also draw upon research from the domains of psychology, sociology and economics. Each session will have assigned pre-readings that may include case studies, book chapters, and articles. The discussion and material covered in class will rely upon these readings. During the term each student will identify a marketing phenomenon they find intriguing and that reflects concepts covered in class. Students will prepare a one-page summary of this business phenomenon and communicate it in a short presentation. The final paper for the seminar requires students to analyze a case study and turn in a short write up.

Freshman Seminar 40E

Law and Society through the Cinematic Frame (160785)

Ofrit Liviatan

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In this seminar, we will explore the interaction of law and society using the lens of film. The cinematic experience has become a key site through which the public understanding of law is produced, debated, and influenced. Driven first and foremost by market and audience considerations, law-related films often inject drama, contentious dimensions, and even misrepresentations into the portrayal of real events. Nonetheless, by raising awareness about legal themes that pervade the plot, these films offer valuable insights toward discovering social scientific perspectives on the manner in which law functions in everyday life. Hence, the seminar will not focus on legal doctrine or teach you the fundamentals of the legal profession. Rather, using films and socio-legal scholarship as frameworks for discussion, we will study law's working in relation to the social, political, economic, and cultural environments in which it operates. Central thematic topics to be discussed include: the relationship between law, justice, and morality; how does law intervene in social relations and whether it is over-utilized as part of these relations; the dynamics between law and social change; is access to the legal process equal to everyone; and the function of law in deeply divided societies.

Course Notes: **Film viewing will occur outside class as part of your weekly preparation for the seminar.**

Advice to Young Leaders (127970)

David Armitage

2021 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The recent crisis starkly exposed the strengths and weaknesses of leaders around the world and in local communities. What makes a good leader has been subject to debate for at least two thousand years, especially in the many classic works of political and ethical theory in the western tradition that were written for young people about to enter public service or positions of authority. This Freshman Seminar introduces students to a selection of these texts of advice and encouragement, among them texts by Cicero, Machiavelli, William James, Max Weber, Virginia Woolf, W. E. B. Du Bois, and Maya Angelou, that might speak to their own ambitions and interests. It will show how to treat such works historically, in their own terms and their own contexts, while also applying them to contemporary concerns and dilemmas. The overarching aim of the class is for students to think rigorously about their own imminent responsibilities as citizens and as leaders by reflecting on arguments addressed to similar rising generations in the past, from Rome in the 1st century BCE to recent Harvard Commencement addresses.

Freshman Seminar 40K

America's $4 Trillion Challenge: Boosting Health Care Productivity and Broadening Access (109334)

Alan Garber

2022 Spring (4 Credits) **Schedule:** W 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

"Why does health care cost so much, and why aren't Americans healthier?" Policymakers, employers, and the public share deep frustration at high health expenditures, which are blamed for rising federal deficits, the declining competitiveness of US businesses, and the risk of financial ruin for anyone unfortunate enough to suffer a costly illness or injury. Unless health expenditures can be controlled, universal access to care will remain an unattainable goal. Since it began in 2020, the COVID-19 pandemic has raised additional questions about the cost and effectiveness of both medical care and the public health system in the U.S.

In this seminar, we will explore the causes and consequences of the high costs of health care and a range of approaches to increasing the productivity of public health and medical care. We will examine these issues in part through the lens of health reform, emphasizing the Affordable Care Act ("Obamacare") as well reactions to the Act, such as proposals for its modification or repeal. Students will be exposed to techniques for measuring the effectiveness and value of health care and will become familiar with economic and clinical studies. Course requirements include a mid-term outline and final paper on either micro or macro solutions for improving health care productivity in the US.

Course Notes: **ON WEDS, FEBRUARY 2ND ONLY: the seminar will need to meet at 6: 45-8:45PM. Please keep this meeting time available for this one class date.**

Recommended Prep: **Background in microeconomics at the level of first-semester Economics 10 is required. Knowledge of AP-level statistics is desirable. The seminar is relevant to anyone with an interest in applied economics, public policy, health care, or public health.**

Requirements: **Course open to Freshman Students Only**

Freshman Seminar 40P

Appraising and Reimagining Middle and High School Math Education (109469)

Robin Gottlieb

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0515 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

What are the goals of mathematics education at the middle and high school level, and how do these goals impact our evaluation of the success or failure of math education in America? Why does math education at these levels matter? What societal structures (historic, economic, political, cultural) impact mathematics education? How does math education in turn impact societal structures? We will also investigate differences in math education across different venues, both in the U.S. and internationally. As the world changes, how do the goals of mathematics education change, and in what ways? Readings in preparation for weekly discussions will include a combination of newspaper articles, articles by experts in the field and findings of large-scale national and international studies. This will help us make sense of the debate in the press, inside the mathematics and math education communities, and amongst policymakers about the state of mathematics education and what should be done about it. All students are expected to be active participants in seminar discussions. In pairs or small clusters, students will take ownership of class discussions.

Course Notes:

This seminar has no prerequisites. An invitation is extended to all students whether or not they are thinking about studying mathematics.

Requirements: **Course open to Freshman Students Only**

Freshman Seminar 41K

Human Rights, Law and Advocacy (156502)

Susan Farbstein

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Human rights practitioners confront numerous ethical, strategic, and legal dilemmas in their struggles for social justice. This freshman seminar explores the underlying legal framework in which human rights advocates operate, and then uses specific case studies to consider the various challenges they must grapple with in their work. The seminar is designed to encourage students to critically evaluate the human rights movement while offering an introduction to some of the essential tools and strategies used by human rights advocates, including advocacy, litigation, documentation, and report writing. Students will be asked to grapple with tough questions, such as: How can human rights be harnessed to successfully influence and change behavior? What does responsible, effective human rights advocacy look like? How do we engage without perpetuating power differentials along geopolitical, class, race, gender, and other lines? How do we find ways to work in collaboration with directly affected communities? What does it mean to be a human rights advocate working on abuses affecting individuals and communities remote from yourself? How do you balance broader advocacy goals with the needs of individual survivors or clients? How do you determine when to intervene and devote limited resources to a given issue? Students will also consider a series of dynamics (e.g., north/south, insider/outsider, donor/donee, lawyer/non-lawyer) that influence how and why advocacy is formulated and received. Finally, the seminar considers the limits of the human rights paradigm and established methodologies, such as litigation and "naming and shaming,"

and explores alternative sources and forms of advocacy, including the role of community lawyering in the human rights context.

American Presidential Campaigns and Elections 1960-2020 (124777)

Maxine Isaacs

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

For two hours each week, students will work to understand the history, forces and politics of American presidential campaigns and elections. Each student will be "responsible" for one presidential election between 1960 and 2016, and, together, members of the seminar will develop some perspective on dramatic changes as well as enduring factors that have shaped our own times, issues and society. With the help of some guests – practitioners including political leaders, public opinion analysts and journalists – students will develop a deeper understanding of contemporary politics; the impact of demographic patterns and changes; public opinion and polling; and political communication. Students will learn about the relationship among politics, news and public opinion, and who influences whom. Participants will be introduced to excellent contemporary studies about modern presidential campaigns and elections. At the end of the term, students will make oral reports to the class on lessons learned from a past election which can help all of us better understand this one.

Media in American Politics (159837)

Matthew Baum

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0230 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar considers the degree to which Americans' political opinions and actions are influenced by the media as well as the role of the media in contemporary politics and public policy. Topics to be covered include the role of the media in society, recent trends in the media, the question of how much influence the media "should" or "does" have on

individuals and politics, the implications for politics and democracy of developments like the rise of fragmentation in the media, social media and partisan media, the ways in which the news shapes the public's perceptions of the political world, campaign communication, how the media affect the manner in which public officials govern, the problem of misinformation, and the general role of the media in the democratic process.

Freshman Seminar 42H

U.S. Energy Policy and Climate Change (160203)

James H. Stock

2021 Fall (4 Credits) **Schedule:** M 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Burning fossil fuels powered 150 years of unprecedented economic growth but left a legacy of ever-increasing concentrations of carbon dioxide and other greenhouse gases. Those gases are changing our climate and thereby endangering human health, human welfare, and the earth's ecosystems. To avoid the worst of those consequences requires rapidly decarbonizing the energy sector, but that task is massive. In the United States, there is increasing public support for strong action on climate change – thanks in large part to the youth climate movement of the last few years – and the Biden administration has set ambitious goals for reducing emissions. But whether the US achieves those goals hinges on the policies it adopts. This seminar examines U.S. climate and energy policy from both economic and technological perspectives. The seminar starts with a review of the U.S. energy sector, climate science, and climate economics. The seminar then dives into current policy issues, including carbon pricing and Clean Electricity Standards, policies for expediting the transition to electric vehicles, the keep-it-in-the-ground movement, and policies to promote new green technologies. The course is open to students of all backgrounds in climate change, ranging to those broadly interested in the economics, legal, and engineering aspects of climate change policy and green technologies to climate change activists who want to advance their understanding of climate policy details.

Recommended Prep:

The seminar uses a mix of economic, legal, and technological/engineering tools, and the mix of students would ideally reflect this mix of backgrounds.

Freshman Seminar 43C

Human Rights and the Global South (160211)

Caroline Elkins

Jacqueline Bhabha

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

The disparate impact of the COVID-19 pandemic and the global impact of the Black Lives Matter protests following the murder of George Floyd have highlighted for all to see the dramatic inequities and entrenched human rights violations that continue to plague human societies. Extreme poverty, especially among communities of color, is sky rocketing, refugees and other forced migrants are blocked from seeking life-saving protection, domestic violence is soaring, evidence of structural racism and its enduring legacy is present on every continent. Despite over half a century of international law making and domestic enactment of human rights treaties, and despite a vibrant civil society that has embraced human rights principles world-wide, class privilege, post-colonial power structures, gender and caste differences, xenophobia and skewed trading and taxation policies persist. They militate against a level playing field when it comes to access to fundamental human rights such as the rights to non-discrimination, to life, to education and to health.

Thus, though human rights have become a global lingua franca, invoked by leaders and movements across the political, religious and cultural spectrum, their efficacy is at best partial and flawed in most countries, including throughout what is commonly referred to as the Global South. Remedies for violations such as deprivation of an adequate standard of living and the extreme poverty that accompanies it, slavery and colonization and their enduring 21st century legacy, and racialized and gendered forms of structural violence have proven elusive. This seminar will focus on the Global South (a concept we will interrogate), including populations from the global South seeking protection elsewhere, to address key issues in contemporary human rights theory and practice, and historical analysis. Members of the seminar will first study the philosophical and political traditions that led to codification of human rights and their historical context. The seminar will then cover the legal and conceptual frameworks of contemporary international human rights law and examine their relevance to some of the most egregious human rights violations of the current period. Case studies of pivotal controversies, including the failure to address extreme poverty, the question of reparations for slavery or colonization, solutions to forced (including climate-induced) migration and gender-based violence will be explored and discussed.

This seminar is intentionally conceptualized to optimize small and large-group discussions with the goal of both delivering a unique teaching and learning environment while also building class community.

Freshman Seminar 43F

When Bad Things Happen Early in Life: Effects of Early Adversity on Brain and Behavioral Development (160221)

Charles Nelson

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Decades of research tell us that the foundations of healthy development are built early in life. Genes provide the basic blueprint for brain architecture, but experiences shape the activity of the genome and thus determine how the circuitry is wired. Significant adversity can derail developmental processes and distort brain maturation, leading to limited economic and social mobility. Exposure to significant adversity early in life, particularly during critical periods of brain development, may increase risk for a host of chronic physical health problems, including cardiovascular disease, hypertension, diabetes, and addictive behavior; it can also lead to a variety of mental health problems, including depression and anxiety and characterological problems. Science clearly indicates that the longer we wait to intervene on behalf of such children, the more difficult it becomes to achieve healthy outcomes. This constraint is particularly true for children who sustain the wear and tear of early exposure to so-called "toxic stress". In this seminar we will critically examine the range of adverse early experiences that impact children growing up in both low and high resource countries. Key themes include a) the nature of the adversity children are exposed to, b) the timing of the adversity c) the chronicity of the adversity, and d) individual differences (including genetic and environmental factors that may confer protection on children exposed to early adversity). We will pay particular attention to the short- and long-term outcomes on physical, neurological and psychological health.

Freshman Seminar 44J

Clash of Titans, Seats of Empire: The Aztecs, Toltecs, and Race of Giants in Ancient Mexico (116506)

William Fash

2022 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The film "Clash of Titans" was a British extravaganza dedicated to exploring the ancient Greeks' concepts of the interactions between humans and their gods. In Ancient Mexico, the tale of Topiltzin Quetzalcóatl, Toltec Prince of Tula is the best-known example of the intervention of rival gods in the affairs of kingdoms and empires. His tale and what was made of it by the Aztecs, and Spaniards, serves as the point of departure for our seminar. Just as the Greeks countenanced sacrifices and political assassinations, in Ancient Mexico the three great empires practiced human sacrifice, regicide, and warfare which was vital in their statecraft and economy. We will explore how these central components were explained and justified in their mythology, why reciprocity with the gods was so vital, and how and why each empire came to a violent end. A particular focus this year will be on the legend of Topiltzin Quetzalcoatl ("Our Prince, the Feathered Serpent") because the Feathered Serpent loomed very large in later Aztec mythology, and in the very founding of the earliest megalopolis of Teotihucan. To do so we begin with the riveting first-person descriptions of the Aztec Empire and its violent conquest penned by a foot solider in Hernán Cortés's army, Bernal Díaz del Castillo. In the following weeks we will explore the environmental basis, religious dimensions, and social and political development of civilization, cities, at the three seats of empire in ancient Mexico: the Aztecs, Toltecs, and Teotihuacanos. You will be engaged in answering the age-old (but never fully resolved) question as to why the Cult of the Feathered Serpent resulted in empires in Highland Mexico, but the Maya of Chichen Itza (who made more images of the deity than any other kingdom in Mexico) chose--or were unable--to create an empire on the scale of the Aztecs, Toltecs, or Teotihuacanos. We will make use of 3D models of Peabody Museum collections, archaeological studies, historical accounts, and recent films and other media to critically examine ancient practices and current perceptions of the Aztec empire (1428-1519 CE); its predecessor the legendary Toltec empire of Tula (850-1100 CE); and the foundational Teotihuacan empire (100-550 CE), known as "The City of the Gods" since it

was built. The Aztecs and Toltecs went to Teotihuacan on pilgrimage every 20 days to make offerings because the scale of that ancient city was so massive, the architecture so impressive, and the religious art and historical lore so compelling, that the Aztecs had a legend that it was built in an earlier creation, by a race of giants. Seminar participants will use critical thinking to explore how the biases of the observer play a role in describing and explaining "the Other." Students will analyze the ways that religion and the quest for power fueled the genesis, expansion and demise of all three empires and the great Maya kingdoms as well. First-years in this seminar will also explore the ways the living descendants of the Aztecs are reviving their traditional culture and how the Pre-Columbian civilizations are integral to the national identity of Mexico and Latinx people in this country, vs. the way they are portrayed in Hollywood and U.S. popular culture, through films and other media in the U.S. and Mexico.

Course Notes:

No background or previous experience, on or in Mexico is required, only an open mind.

Measurements of the Mind: The Creation and Critique of the Psychological Test (121907)

Marla Eby

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar will introduce students to the history of psychological tests, both from the point of view of the psychologists using them and the people tested. We will examine the creativity within psychology in the making of such tests, as well as the drawbacks and dangers of the (mis)uses of these instruments. The seminar will explore tests in current use, as well as tests contained in various Harvard archives of psychological tests. We will discuss the issue of how psychological tests are perceived by and presented to the public, paying particular attention to recent museum exhibitions and films in this area. Students will also engage in a project of designing their own psychological tests.

Freshman Seminar 50Q

Gut Reactions: Discovering Chemistry from the Human Microbiota (203461)

Emily Balskus

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The human gut is colonized by trillions of microorganisms that exert a profound influence on our health. Notably, the chemical capabilities of gut microbes extend beyond those found in our own cells, playing roles in nutrition, directing immune system development, and protecting against pathogens. However, we still do not understand how the vast majority of this microbial chemistry actually takes place, which stands in stark contrast to our knowledge of human physiology. The aim of this laboratory-based seminar is to expose students to a cutting-edge area of research at the interface of chemistry and microbiology. Over the course of a semester, students will work as a team to design and implement an experimental approach for discovering new enzymes from human gut microbes. Potential targets include enzymes involved in antibiotic resistance, metabolism of dietary components and pharmaceuticals, and modification of host metabolites. Students will pursue these goals in a fully equipped laboratory dedicated to undergraduate research. Course meetings will combine time in the lab with discussion of research literature and experimental techniques. Students will also have flexible access to the teaching laboratory to continue their experiments outside of the hours scheduled for the seminar. By having the opportunity to both explore a timely scientific problem and to drive the direction of their own research at a very early stage in their academic experience, students in this seminar will be extremely well prepared to seek out further undergraduate research opportunities and to pursue scientific career paths.

What Do You See in the Night Sky? (204926)

Roger Fu

2021 Fall (4 Credits) **Schedule:** M 0600 PM - 0845 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

People around the world observe the same basic celestial phenomena- the rise and set of stars, the changing phases of the moon, the occasional bewildering eclipse. But cultures have come to interpret these signs very differently, giving rise to diverse calendar systems and mythological frameworks. For instance, the position of the sun, the visibility of star formations, and the lunar cycle have all been used to define the concept of the year, sometimes with more than one definition operating in a single culture. We will perform a survey of traditional astronomical systems, highlighting the original aspects of each and trying to understand the origin of differences. Why were some observations considered more significant than others (Which is more important, the shape of the moon or the identity of stars around it?)? How did mundane pressures, such as the need to sow and reap, influence how cultures tracked celestial motion? We will end with a more detailed exploration of the early Western and Arab astronomy. What specific advancements and conditions allowed them ultimately to "get it right?"

Course Notes:

A five-hour field trip to observe the sky away from city lights is required. No previous knowledge of astronomy or celestial mechanics is required.

Requirements: **Course open to Freshman Students Only**

Freshman Seminar 50S

From Galileo to the Big Bang Theory: Conflict and Dialogue between Religion and Science (204929)

Karin Oberg

2021 Fall (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

It is easy to find controversies at the intersection of science and religion, from the time of Galileo, to Darwin and the emergence of modern cosmology. Yet many scientists throughout the ages have been devoutly religious, challenging claims of an intrinsic enmity between science and religion. This seminar treats a number of historical conflicts between religious beliefs and scientific theories, among them the Galileo

affair, the clockwork universe, evolution, and the Big Bang theory. The seminar will introduce students to the main protagonists through their own words, and through contemporary and modern-day commentaries. We will explore why these conflicts arose and, based on these historical lessons, what we can expect the future relationship between science and religion to be. The ultimate aim of this seminar is for students to form their own opinion of which kind of conflicts between science and religion are inevitable and which are accidents of time and place, and under which conditions, if any, interactions between science and religion can be mutually beneficial. Most of the course will focus on Christianity and the natural sciences, with emphasis on astronomy and cosmology, but the relationship between other ancient and contemporary religions and other sciences will be discussed as well to provide a broader context.

Recommended Prep: **There are no pre-requisites. The course will include scientific concepts and their empirical and theoretical foundations, but no scientific preparation beyond high school physics is required.**

Requirements: **Course open to Freshman Students Only**

Sea Monsters (205177)

Peter Girguis

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

There have always been tales of sea monsters. For as long as we humans have ventured into the ocean, our imaginations have conjured images of serpents, krakens, leviathans, and other creatures, all of whom seem bent on the destruction of those who dare set foot into the sea. Humankind's conviction that sea monsters are real is so powerful that—even today—rumors abound of sea monsters lurking in the depths. Indeed, every major religion—Eastern and Western—features sea monsters. Are these declarations true? Do giants roam the deep sea? Did the explorers of centuries ago see creatures from their small wooden boats that we do not see today? During this seminar we will explore sea monsters through a social, spiritual, literary, and scientific "lens". We will study the sea monsters that flourish on ancient maps to understand the minds of 16th-century scholars. We will examine the bodies of real sea monsters, and consider the world in which such grotesque creatures might evolve. We will busy ourselves with tales of creatures from classic and contemporary literature. Most importantly, we will develop a better understanding of how humans perceive the world, and how our consciousness can simultaneously embrace our wildest dreams and cower from our greatest fears. Sea monsters, both real and imagined, tell us much about life in the deep sea, and even more about humankind.

Course Notes: **Required field trips related to the sea may be included. There will be no cost to the student.**

Freshman Seminar 50Y

A Sense of Space (and Time) (205339)

John Huth

2021 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

What is space? What is time? How have humans viewed these over the years? How are the views of these shaped by our environments and cultures? We often employ spatial metaphors for social situations – e.g. "they're very close," or "they split apart." It seems that as concepts of space change, and our horizons are broadened, these changes are reflected in a shift in cultural awareness. In this seminar, we explore concepts of space in a number of cultures: Pacific Islanders, Western Apache, Brazilian Rain forest, to name a few. The human mechanism of spatial cognition is examined, along with the reuse of these parts of the mind in future planning, memory, and imagination. As the seminar progresses, we focus in on the shifts of the concepts of space in Western culture – starting with ancient Greeks and Egyptians. We examine the period when astronomy and astrology were practiced side-by-side, and then turn to the world of Dante Alighieri, where space was married to concepts of morality and culture. Finally, the development of physics and astronomy from Galileo to the present has seen seismic shifts in the concept of space-time. These in turn were reflected in broader cultural shifts.

Science in the Age of Artificial Intelligence (207514)

Brendan Meade

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Science is focused on discovering and explaining the world around and within us. This has been its goal for hundreds of years and has produced astonishing breakthroughs from population genetics, to general relativity, to plate tectonics. Artificial intelligence is touted as a tool for learning about a complex systems in ways that humans can't and has seen exceptional progress in natural language processing and image identification. In this class we explore the emerging linkages between scientific inquiry and artificial

intelligence. The central goal of this class is to question the classical role of the scientist as a creator of theories and consider how scientists may become interpreters of theories developed by AI. We do this by developing an understanding of how AI systems actually work (they're astonishingly simple), explain recent success cases, and then consider how we may (or may) not rebuild science in an AI-first manner. Examples with be drawn from the earth and planetary sciences as well as the life sciences.

Recommended Prep:

High school calculus and/or computer programming would be extremely useful.

The Story of the Alternating Sign Matrix Conjecture (207517)

Lauren Williams

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar is intended to illustrate how research in mathematics actually progresses, using recent examples from the field of algebraic combinatorics. We will learn about the story of the search for and discovery of a proof of a formula conjectured by Mills-Robbins- Rumsey in the early 1980's: the number of *n x n* alternating sign matrices. Alternating sign matrices are a curious family of mathematical objects, generalizing permutation matrices, which arise from an algorithm for evaluating determinants discovered by Charles Dodgson (better known as Lewis Carroll). They also have an interpretation as two-dimensional arrangements of water molecules, and are known in statistical physics as square ice. Although it was soon widely believed that the Mills-Robbins-Rumsey conjecture was true, the proof was elusive. Researchers working on this problem made connections to invariant theory, partitions, symmetric functions, and the six-vertex model of statistical mechanics. Finally in 1995, all these ingredients were brought together when Zeilberger and subsequently Kuperberg gave two proofs of the conjecture. In this course we will survey the story of the alternating sign matrix conjecture, building up to Kuperberg's proof. If time permits, we will also get a glimpse of very recent activity in the field, for example the Razumov-Stroganov conjecture.

Recommended Prep:

This seminar is recommended for students with a strong background in mathematics, including some familiarity with proofs. It would be helpful to have some exposure to combinatorics (permutations, binomial coefficients) and linear algebra (matrix multiplication and determinants of n by n matrices).

Understanding the Seemingly Impossible: A Revolution in Biology (207834)

Craig Hunter

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Occasionally a scientific discovery is so unexpected that it is seemingly unexplainable. This seminar will revisit one such event, the discovery of RNA interference and how modern experimental molecular genetics cracked this "problem" and started a billion-dollar industry. Rare unexpected discoveries in biology, for example catalytic RNAs, instantly extend and broaden our understanding of the world, while the impact of other discoveries (split genes, hopping genes) are more gradual. However, some discoveries challenge firmly supported ideas. The initial description of RNA interference (RNAi) was seemingly magical—the introduction of a RNA molecule matching the sequence of any gene, results in the effective silencing (turning off) of the gene. Further, the silencing signal(s) were extremely potent and mobile, moving between cells, tissues, and generations. A series of seminal discoveries during an amazing four-year period revealed the previously unimagined process. We will read and talk about how these discoveries were made and how this unexpected new biology launched new therapeutic companies and is informing developing ideas about heritability, adaptation, and evolution.

Skin, Our Largest, Hottest, and Coolest Organ: From Cancer to Cosmetics (207776)

David Fisher

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Skin provides a protective barrier that is vital to survival of all multicellular organisms. Its physical properties have been exploited for centuries, from clothing to footballs, and yet skin is a vibrant and dynamic organ that responds to environmental signals in myriad ways. Skin protects humans from toxic exposures, but can also be an intrinsic source of dangerous diseases. While its defects only rarely kill humans, its imperfections can cause misery and discomfort, ranging from subtle annoyances to depression and loss of self-esteem. It is a source of immense pleasure or excruciating pain. This seminar will provide a series of exposures at an introductory level, to distinct topics in skin biology. They will exemplify the diverse and vibrant nature of cutaneous networks and signals, through the lens of commonly recognized topics such as tanning, hair, sweat, cancer, cosmetics, cancer, and infections.

Recommended Prep:

None. Prior AP-Biology may be helpful but not required.

Freshman Seminar 51P

What is a Species, and How Do Species Evolve? (212771)

James Mallet

2021 Fall (4 Credits) **Schedule:** M 0900 AM - 1130 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

One hundred and fifty years after Darwin wrote *On the Origin of Species*..., you would think that scientists already have a good definition of species. In fact, a major debate still rages among biologists as to what species are, and how they evolve from other species. This seminar will cover these issues. Darwin used impeccable logic and convinced his readership by the 1860s that the entire diversity of life could be explained by means of evolution. Yet it's possible that prior creationist notions of species still prevented even most biologists from accepting Darwin's ideas about the nature of species. We needed a solid theory of heredity to understand what species are and how they evolve, and indeed it was this problem for evolution that led scientists to seek for and ultimately achieve the discovery of DNA. How has genetics and genome science changed our view of species? From 45,000 years ago, Neanderthals coexisted in Eurasia with modern humans for about 3,000-5,000 years. The latest genomic data show that some admixture took place. So, were we the same species? Or two different species? Does it matter? This seminar provides you with tools to make up your own mind on this. Course topics range over history, philosophy, and genetics; we explore the uses of species in classifying branches in the tree of life, and in conservation and laws about endangered species.

Course Notes: **There will be a required trip to the Harvard, Museum of Comparative Zoology for the purpose of identifying real species. No background in biology is required. All first-year students are encouraged to apply.**

Requirements: **Course open to Freshman Students Only**

Freshman Seminar 51S

Natural History Museums and the Anthropocene (216084)

Charles Davis

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Natural history museums have inspired us for centuries and represent our best resources for understanding nature. They have been central to the development of countless scientific principles, including the theory of evolution itself. Yet the more inward facing missions of a museum are unfamiliar and the collections that sustain these efforts are vast and remain largely invisible. These institutions, however, have assumed a renewed relevance in the modern era of global change, especially as millions of artifacts are being mobilized online and facilitating a revolution in museum-based science. Here, we take a behind-the-scenes look into natural history museums over the course of the semester, including their organization, care, public outreach, and centrality to science. We will then explore the variety of ways in which new life is being breathed into museums to understand the geological era of the Anthropocene. Central to our learning will be weekly exploration and engagement with the vast collections of Harvard's Natural History Museums. Students will also engage directly with this subject through outdoor exploration of nature guided by cutting-edge resources and tools developed for this purpose. The capstone project will be a collaborative effort to devise a museum exhibit that unites major themes of the term.

The Universe: Its Origin, Evolution, and Major Puzzles (216086)

Cora Dvorkin

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar will lead you on a tour of Cosmology and its open questions: how were the first structures of the universe seeded? What is dark matter? What is dark energy? We will study the universe since the very first tiny fraction of a second after the Big Bang and its subsequent evolution. We will delve into its composition at large scales, and existing theories explaining its main components: dark matter and dark energy. We will learn about a wide variety of observations that are obtained and analyzed by different experiments around the world in order to make progress in our understanding of the cosmos. We will also study how these data sets are currently analyzed and debate about possible ways of moving forward in the times of "Big Data". Finally, we will discuss how the scientific method is used in cosmology, where we only have one experiment: our universe.

Recommended Prep:

High school level math and physics. Non-scientists are welcome.

Freshman Seminar 51U

Insurrection in a Little Kingdom—The Real Story of the Standard Model of Particle Physics (216087)

Howard Georgi

2022 Spring (4 Credits) **Schedule:** W 0600 PM - 0845 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

I first encountered the proverb "Truth is the Daughter of Time" in Josephine Tey's novel about Richard III (Links to an external site.). The history of the Standard Model of Particle Physics is another good example. Conventional history dates the birth of the standard model to the publication of Steven Weinberg's "A Model of Leptons" (links to an external site.) in 1967. But in fact, particle physics at the end of the 1960s was in a very chaotic state. There were experiments producing apparently conflicting data that were as confusing to the theorists as they were to the experimenters themselves. There were dramatically di□erent theoretical approaches, none of which were convincing or even thoroughly understood. By the end of the '70s, we could put the standard model on a t-shirt and we had a very plausible guess for how the pieces fit together into a unified theory of particle interactions. I had the great good fortune to participate in the remarkable decade of particle physics in the '70s and I got to know and often collaborate with many of the giants of late-twentieth-century physics. The people watching was almost as much fun as the physics. My hope for this seminar is three-fold: to explain what happened and why; to look at some of the attempts by physicists at the time to explain what they were doing; and perhaps most importantly to try to illustrate the amazing diversity of thought that went into this mini-revolution.

Course Notes:

Have questions? Zoom office hours on Fri, Jan 14 and Tues, Jan 18 at 10-11am.
direct zoom link:
https://harvard.zoom.us/j/94474909771?pwd=TE90cW5DdE5maW0wRmNKNHNoSnU2dz09
meeting id - 944 7490 9771 - passcode LesPhys
Additional hours may be scheduled and students should check here, https://www.people.fas.harvard.edu/~hgeorgi/

Recommended Prep:

Background in physics is not required, but curiosity about physics and physicists is important! The assignments will be mostly short essays and/or chapters from the two "text books", possibly along with a few (algebra level) calculational problems. In class we will have discussions on the readings led by student groups.

Freshman Seminar 51V

Physics of Measurements: Experimental Science (215847)

Philip Kim

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Measurement, a procedure to acquire a quantitative description of our surroundings, has been an essential part of scientific and engineering research. Often, new scientific breakthroughs rely on the development of new measurement methodology. A notable example in the recent development of quantum computing relies on the uncertainty of the measurement procedure in quantum systems. Conversely, new ideas and applications can be formulated by the precise and accurate measurement of physical quantities. In this seminar, we will discuss various aspects of physics-related measurement procedures, focusing on several key elements of measurement, such as quantification, accuracy, precision, units, estimation, and error evaluation. We will discuss key concepts behind measurement procedures, including Einstein's relativity, quantum physics, and statistical physics. Examples are drawn from historical, scientific events, our daily life, and current topics of research.

Recommended Prep:

This seminar will target to students who are interested in quantitative science or engineering. We assume a high school level of mathematics and physics knowledge

Freshman Seminar 51X

Changing Perspectives: the Science of Optics in the Visual Arts (215849)

Aravinthan Samuel

2022 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Renaissance artists began to create stunningly realistic representations of their world. Paintings started to resemble photographs, suggesting that artists had solved technical problems that escaped their forebears. Our brains effortlessly deduce three-dimensional scenes from two-dimensional images. But faithfully transferring spatial information to a flat canvas -- a sense of depth, surface and shadow, geometrical accuracy -- is hard to do. Here, we will discuss how artists including van Eyck, da Vinci, Vermeer, and Ingres might have used science to make art. We will ask how devices like pinhole cameras, mirrors, and lenses might help artists see more deeply and create images more faithfully. We will use Home Lab Kits and experiment for ourselves with optical devices. We will try to use devices to create our own work using Home Art Kits. We will use online platforms to look closely at selected masterpieces to assess their optical qualities. We will use online learning to Zoom beyond Harvard to visit museums where selected masterpieces are located. We will Zoom to the homes of artists and scientists who think about art and optics from many different perspectives. Our seminar is a synthesis of art history, studio art, and optical science.

Course Notes:

This seminar is recommended for students with interests in science and art. There will be an exhibition of the works created by the students at the end of the term.

Recommended Prep:

No prior training in art or optics. We will learn how to draw in our own workshop with provided tools. We will learn optics with practical exercises, not with math or physics.

Freshman Seminar 52C

Tree (216102)

William Friedman

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 14

***Have you hugged a tree lately? How about grown one? Photographed one? Drawn one? Written about one?* Imagine a semester devoted to connecting two organisms: a person (you) and a tree (not you). Interacting with a single tree, you will explore its individual history, evolutionary history, life cycle, leaves, bark, roots, flowers, cones, and architecture.**

In an age of environmental destruction and outright murder of our biological brethren, there is something deeply troubling about humanity's relationship with nature. Technology has left us with mere facsimiles of nature - pixilated abstractions of biodiversity through satellite imagery, decoded strings of DNA – and we, as a species, have become fundamentally disconnected from actual nature and the magnificent organisms with which we share the earth. In this seminar, we will work to understand and give agency to trees as individual organisms, literally rooted in the ground, and evolutionarily rooted in deep time. Topics to be covered include the evolutionary origin of arborescence, human relationships with non-sentient organisms, the case for legal rights for natural objects, reading a twig, the unseen world of roots, and finding human meaning in the longevity in trees. Each student will also work with an individual tree in the living collections of the Arnold Arboretum of Harvard University and observe (*see*) this organism throughout the entire semester through the creation of images (photography, drawing), journaling, and other forms of representation. The goal of this freshman seminar will be to initiate a personal and lifelong connection with the "other," the vast and variant organisms with which we share the planet.

Science and Technology Primer for Future Leaders (216105)

Hongkun Park

2022 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

We live in a world that is shaped by science and technology. As a modern citizen who will lead the U.S. and the world in the coming generation, we should be aware of the rapidly changing landscape of science and technology and be ready to participate in the decision-making processes for deploying these life-changing developments to the masses. In this freshman seminar, we will learn and debate contemporary topics that we encounter every day and use them as motivating examples to explore the underlying science, math, and engineering principles. Some of the issues that we will discuss include, but are not limited to, COVID-19 pandemic, the prosecutor's fallacy, coronavirus pandemic, climate change, information technology, quantum technology, genomics revolution, and brain-machine interfaces. We will learn basic concepts in statistics, thermodynamics, quantum mechanics, information science, biomedical engineering, and nano-bio interfaces through these discussions. In this seminar course, the students will be asked to give presentations and participate in discussions and debates.

Course Notes:

The seminar is geared toward first-year students who plan to concentrate on humanities and social sciences.

Freshman Seminar 52F

Parts Unknown: The Dark Matter of the Genome (216113)

Amanda Whipple

2021 Fall (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Did you know that genes, traditionally defined as DNA encoding protein, only account for two percent of the entire human genome? What is the purpose of the remaining 98% of the genome? Is it simply "junk DNA"? This seminar will explore the large portion of our genome that has been neglected by scientists for many years because its purpose was not known. We will examine research findings which demonstrate non-coding sequences, previously assigned as "junk DNA", play crucial roles in the development and maintenance of a healthy organism. We will further discuss how these non-coding sequences are promising targets for drug design and disease diagnosis. We will then visit a local research laboratory (either virtually or in person as deemed appropriate) and engage with active scientists regarding the scientific research enterprise.

A thorough understanding of the human genome not only provides a foundation for any student interested in the life sciences, it enables one to engage more deeply in related political and societal debates, which is expected to become even more central as scientists further uncover the dark matter of our genomes.

Course Notes:

Circumstances permitting, there will be a required trip to tour an active research laboratory with no cost to the student.

Recommended Prep:

This seminar is recommended for students with a basic background in biology and genetics (high school equivalent), but more importantly, with a keen interest in learning about how our genome works and the consequences of it not working correctly.

Freshman Seminar 52J

Is There Cancer on Mars? (218492)

Giovanni Parmigiani

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In 2021, a special committee of the National Academies of Sciences, Engineering, and Medicine (NASEM) convened to "review and assess NASA's processes for long-term risk assessment and management for currently anticipated crewed missions with respect to cancer due to exposure to space radiation". This is timely for two reasons: first, NASA is studying a manned mission to planet Mars; second, several initiatives are competing to launch civilian space travel, for which NASA's standards may be relevant guidelines.

This seminar will mimic, using the committee's report and the extensive public documents available, the task of the NASEM committee. Students will review relevant evidence and then debate controversial topics including how to convert scientific evidence into risk management strategies, approaches for managing and communicating knowledge gaps, and equity issues related to potential sex differences in the effects of radiation.

Each student will 1) individually, contribute one review including an oral presentation, and a one-page executive summary that will serve as a reference for the class' subsequent work; 2) in pairs, prepare and lead a debate session and write a brief two-page report summarizing the points raised.

Freshman Seminar 52K

Knots, Braids and Colorings (218493)

Peter Kronheimer

2021 Fall (4 Credits) **Schedule:** R 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Beyond their practical use in fastening ropes, knots have appeared frequently in the decorative arts and (somewhat less frequently) in the physical and life sciences. This freshman seminar will explore the world of knots in all its aspects, but our focus will be on a non-technical introduction to knots from the viewpoint of the mathematician, for whom knot theory is an active and ever-expanding field of research.

The basic mathematical questions about knots center around classification. What does it mean to classify knots? How can we understand that an overhand knot and a figure-eight knot are really different?

Alongside these questions, we will touch on other topics in the mathematical sciences that have connections to particular scientists and mathematicians who have made important contributions to knot theory. In particular, we will be motivated by the work of Peter Guthrie Tait, Max Dehn, and Joan Birman, and through their work we will be led to examine colorings of maps, dissections of polyhedra, and the knots that arise from the chaotic dynamics of the atmosphere.

Course Notes:

No background in mathematics is expected or required, and enrollees who are not intending to concentrate in mathematics will be particularly welcome.

Additional Course Attributes:

Life and Death Lessons from the Fossil Record (218480)

Javier Ortega-Hernandez

2021 Fall (4 Credits) **Schedule:** R 0900 AM - 1115 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

The fossil record offers a unique perspective on the history of Life on Earth. Although *palaeontology* might remind us of grotesque bones, dusty museum cabinets, and quirky scientists who relish both of those things—or God forbid, Ross Geller from *Friends*-—the knowledge derived from the fossil record affects our daily lives in ways that are not immediately apparent. From its natural history origins during the 19th century, paleontology has become a cornerstone of neo-Darwinian evolutionary thought, produced a detailed log of climate change, and sits at the center of a multi-billion-dollar business consumed by millions of people around the world, most likely yourself included. This seminar will explore the rich world of paleontology and its bearing on human activities. You will learn how cutting-edge scientific research informs our understanding of the main processes that have influenced the evolution of Life on Earth for approximately four billion years, including episodes of global warming/cooling and mass extinction events. You will also gain insights into the socioeconomic impact of fossils, ranging from the seamless integration of charismatic extinct animals into culture and entertainment, to ethical and political quandaries resulting from the unregulated exploitation of these natural resources in conflict zones. Finally, we will explore how technological advances blur the lines between science fiction and reality, allowing us to visualize diminutive, fossilized animal-like embryos from 600 million years ago, to the potential (and controversial)

applications of gene editing to resuscitate extinct species such as the wooly mammoth and Tasmanian tiger.

Course Notes:

This seminar will run for 2 hours only within the time block.

Freshman Seminar 52M

Cosmic Variability: From Nearby Eclipsing Binaries to Black Hole Outbursts from the Very First Stars (218497)

Josh Grindlay

2021 Fall (4 Credits) **Schedule:** W 0700 PM - 0900 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar teaches students how to measure the variability of stars (and black holes in cores of galaxies) to derive fundamental astrophysical quantities (masses, luminosities, temperatures and composition). The seminar includes 4 key observations: 1) eclipsing binary star measure of stellar radii, 2) pulsating star measures of *changing* stellar radii, 3) accretion onto white dwarfs from a lower mass binary companion, and 4) accretion onto black holes from the strong stellar wind of a massive star companion. The students then learn about the most energetic point sources in the Universe (!): the emission from the collapse of a rapidly rotating massive star core to a stellar black hole that launches a relativistic jet detected as a Gamma Ray Burst. These will enable future direct observations of the demise of the very first stars created after the Big Bang.

Course Notes:

This seminar will run for 2 hours only, beginning at 7:00pm and ending at 9:00pm. The seminar will be very interactive and include both direct observations with the Clay Telescope on the Science Center as well as data reduction done in class, and in small groups.

Recommended Prep:

High school algebra competence and some familiarity with calculus (though we will not require this). Familiarity and comfort with using Excel which will be used for data analysis of the observations of brightness vs. time that will be done with the rooftop Clay Telescope. We will walk you through the handout(s) that will use Excel but you will do the actual analysis in small groups.

Misinformation, Disinformation, and BS in Science Communication (219762)

Daniel Hartl

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

It's a jungle out there. The world is awash in hucksters, tricksters, frauds, scammers, grifters, and thieves. And there's no shortage of easy marks, suckers, dupes, and fools. Classic cons like the pigeon drop and three-card monte aimed to heist a bundle from a few. The internet and cable TV have changed the game. Now the goal is to nick a bit from a crowd. You're one of the suckers, so are your friends, so am I, so is everybody. We don't notice we're being scammed because what is being stolen is not our money. What's being stolen is our attention and our time. We're all suckers for clickbait. What's wrong with clickbait is that it leads you down a rabbit hole of misinformation, disinformation, and conspiracy theories that have created and sustained widespread skepticism and mistrust of science and scientists resulting in covid-19 conspiracy theories, vaccine hesitancy, bogus drug treatments, climate change denial, anti-evolution, and so forth. Even the most educated and savvy consumer of information is easily misled in today's complex information ecosystem. This seminar is clickbait vaccine to boost your critical thinking. It is designed to help you identify and refute misinformation, disinformation, and BS rampant on the internet. It will help you recognize sensationalism when science is communicated in the press. It will familiarize you with the main logical fallacies that students and scientists themselves are prone to. As a framework for discussion, we use Bergstrom and West's book "Calling Bullshit" along with supplemental readings.

Faith and Fiction in American History (203005)

David Holland

2021 Fall (4 Credits) **Schedule:** T 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar uses key literary works to explore some of the most difficult and demanding questions in the religious history of the United States: Does God have a special relationship with the United States? Is sin an individual responsibility or a social flaw? Why has American religion been so frequently concerned with sexuality? How has religion shaped racial identities and tensions? How does it inform domestic relationships? How do non-Christian immigrants find a place and a voice in a nation with deeply entrenched Christian traditions? To explore these and other areas of concern, we bore into the faith-inflected cultures of American history through the imagined narratives of some of its most celebrated writers, including the likes of Catharine Sedgwick, Harriet Wilson, Flannery O'Connor, James Baldwin, Rudolfo Anaya, Pearl Abraham, Ayad Akhtar, and Marilynne Robinson. I will offer mini-lectures to contextualize these works in their historical moment. We will read some scholarly work to sharpen our tools of analysis, but mostly we will read and talk about the novels themselves. The seminar aims to be both analytically rigorous and aesthetically rewarding.

Language: The Origins of Meaning (205082)

Gennaro Chierchia

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

How do languages work? Why are they so distinctly human in the natural world? Is language a creation of our intelligence, i.e. we speak, because we are smart, or the other way around? Birds produce sophisticated songs. Do bird songs mean anything? They do, in some way. They serve, for example, as predator warnings or mating calls. Humans too, like birds, can produce music. But for effective day to day communication (or, say, to develop a scientific theory, etc.), we need languages with words and sentences, i.e. the kind of languages which is unique to our species. Do all languages, in spite of looking so diverse, share a common structure? For example, in English words fall into categories: cat is a noun, meow is a verb. Do all languages have nouns and verbs? A fairly recent turning point in addressing these fundamental questions has been to view language as a computational device. This is enabling us to build effective models of how languages are structured so as to empower us with the ability to create meaning; which, in turn, is shedding light, more and more, on who we are. The seminar will explore how natural languages come to create meaning and invite participants to develop their own linguistic analyses through modern logical and computational tools.

Recommended Prep: **An interest in language and mind, and no fear of formal methods or the desire to overcome such fear.**

Requirements: **Course open to Freshman Students Only**

Major English and American Poets: Human Predicaments and Resolutions (207763)

Neil Rudenstine

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar will concentrate on poems that reveal or dramatize difficult human predicaments and individual responses to them. In the first week, for instance, we will discuss Hamlet's "To be

or not to be"; John Donne's "Canonization"; Tennyson's "Ulysses": and T.S. Eliot's "Love Song of J. Alfred Prufrock".

In each case, the goal will be to characterize the nature of the speaker's dilemma, and the complex process of reaching a response to it.

During the first few weeks, we will concentrate on this theme in the work of five important 20th and 21st century poets: W. B. Yeats, Elizabeth Bishop, Robert Lowell, Robert Frost, and Sylvia Plath. Afterward, we will reach into the past to study grouped poems (one set of 5-7 per week) by writers from the 16th century to the present: Thomas Wyatt; Shakespeare; John Donne; Milton; John Keats; Emily Dickinson; Matthew Arnold; Wallace Stevens; W.H. Auden; Philip Larkin; Jorie Graham, and Louise Gluck.

Full class discussion will be the heart of this seminar. Writing: three papers (about 6-8 pages each) during the course of the term.

Harvard's Greatest Hits: The Most Important, Rarest, and Most Valuable Books in Houghton Library (207807)

David Stern

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Have you ever fantasized of turning the pages of a Gutenberg Bible with your own fingers? Or a medieval illustrated Book of Hours? Or touching a papyrus fragment of Homer? Or a First Folio edition of Shakespeare? Or seeing close-up Copernicus' diagram of the heliocentric universe? The Houghton Library of Harvard University is one of the world's greatest repositories of ancient scrolls, papyrus codices, illuminated manuscripts on parchment and paper, early printed books, rare books published since the sixteenth century down until today, and stunning prints and other types of graphic art. In this freshman seminar, we will utilize Houghton's extraordinary holdings to study first-hand the history of the book in the West as a material artifact from its beginnings in the ancient Near East down to the present day. Each week we will focus upon a cluster of books. Before class, students will be asked to examine selected books in Houghton's Reading Room as well as online. During class-time, we will study the books again as a group. Visiting experts will demonstrate how to unroll a papyrus codex, the technology involved in creating a codex and printing on a hand-pulled press, and the techniques modern conservators use to preserve manuscripts and books. You will emerge from this seminar with a heightened understanding of what a rich thing a book is, and so much more than just a text. And you will have seen and studied close-up some of the most visually spectacular and culturally significant books in all Western history.

Freshman Seminar 62O

Who is a Fascist? Culture and Politics on the Radical Right (207789)

Jeffrey Schnapp

2021 Fall (4 Credits) **Schedule:** R 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar provides an in-depth introduction to fascism, its intellectual and political roots, its critique of liberal democracy and socialism, and the traces fascism has left on the contemporary cultural-political scene from Marine Le Pen's Rassemblement National to the American alt-right to populist insurgencies like Trumpism. It begins with readings from key fascist thinkers and theorists, before surveying a series of domains where artists, writers, architects, film-makers, and engineers sought to interpret and embody the "fascist revolution" not just in Italy but worldwide. Among the figures considered are mystical nationalists like Gabriele D'Annunzio; Filippo Tommaso Marinetti, founder and leader of the Futurist movement; the American poet Ezra Pound, author of the Cantos, one of the masterpieces of 20th century American poetry; Leni Riefenstahl, the film director of classic documentaries such as Olympia and Triumph of the Will; the architects Marcello Piacentini and Adolf Speer, the former Italy's leading designer of public monuments and buildings during the Mussolini era, the latter Hitler's preferred architect; and the engineer Gaetano Ciocca, creator of everything from Corporativist pig farms to mass-produced worker housing to mass sports stadia. Seminar themes will include: fascism vs. nazism; collectivism vs. individualism; radical right attitudes towards technology and industrialization; and examinations of the convergences and divergences between mid-20th century fascisms and the sub-cultures of today's alt-right. The capstone project for the semester will involve an original research project focused on a contemporary alt-right group.

Zombies and Spirits, Ghosts and Ghouls: Interactions between the Living and the Dead (212697)

Shaye Cohen

2021 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Virtually all the cultures and religions of the world, from ancient to contemporary times, have teachings and rituals about death. In this seminar we will deal with a subset of this very large topic, namely, the relationship of the living and the dead. The dead are often depicted as still-living in some way and still in communication with us and our world. Are they friendly or hostile? Beneficent or malevolent? Think "undead" and "zombie" versus "saint" and "angel." In this course we will look at some of the myriad ways that religions and cultures conceive of the relationship of the living with the dead. We the living care for the dying and the dead, and hope that the dead will care for us, but how this works exactly is the subject

of much speculation. American secular culture, at least in its cinematic expression, has a vigorous belief in the afterlife, especially in having denizens of the afterlife, in the form of zombies, ghosts, and poltergeists, intrude on the world of the living. In our seminar we will survey this rich set of themes as expressed in literature, art, music, cinema, and philosophy.

Freshman Seminar 63C

The Symphonies of Dmitri Shostakovich (212779)

Anne Shreffler

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** 12

The symphonies of Dmitri Shostakovich (1906-75) are just as relevant and controversial today as they were during the composer's lifetime. Shostakovich's fifteen symphonies span his entire creative life; starting with his First Symphony, which made the 19-year old composer famous overnight, and ending with his Fifteenth, completed four years before his death. As a public genre, the symphony was the perfect vehicle for Shostakovich to react to his tumultuous times and explore the human psyche. The ups and downs of Soviet politics and culture indelibly shaped Shostakovich's career: the innovative fervor after the Russian Revolution, Stalinism ("Socialist Realism" and the Terror), the Second World War, the post-Stalin "Thaw" after 1956, all the way to the height of the Cold War. Shostakovich was at times encouraged and supported by the Soviet regime, and at other times, reprimanded and punished severely. But Soviet audiences always treasured his work because they heard in it deeply felt emotions that could not be publicly acknowledged. Today's audiences react just as strongly, for different reasons. In the seminar, we will listen closely to all fifteen of Shostakovich's symphonies, learning about their musical features and the political contexts in which they were born and received. We will focus on three main themes: 1) composing in a totalitarian state, 2) how music can be said to "narrate," and 3) the orchestra as sound world.

Course Notes:

The seminar will only meet for 2 hours within the time block.
We will work from scores and selected recordings, and, if possible, will attend a live performance of the Boston Symphony Orchestra.

Freshman Seminar 63E

Religion, Neuroscience, and the Human Mind (212784)

David Lamberth

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

More than 150 years after Darwin's epochal account of evolution, over 85% of the world's 7 billion people are still religious, and the percentage is growing. What does religion do for human beings? What does an evolutionary and biologically informed understanding of the mind and brain lead us to think about where religion fits in human life? Harvard's first psychologist, William James, engaged these questions in the late nineteenth century, bringing the cutting edge of empirical psychology to the philosophy of religion. Today these same questions animate the field of neuroscience, where researchers are showing how affectivity, emotions, and our evolutionary past come together to form the "self" philosophers have long thought to be primarily "rational." This seminar brings together the thought of James, writing at the turn of the twentieth century, with the work of contemporary neuroscientist Antonio Damasio to ask what kinds of beings we are, how our minds function, and what religion contributes to human individual and societal experience? The seminar takes up the philosophy of belief, affect, and emotion, and touches on the biology of the brain and homeostasis. We conclude by assessing contemporary views of religion from evolutionary psychology (Boyer, Atran) and cultural anthropology (Geertz, Luhrmann, Asad) in light of James's and Damasio's models of the human mind.

Aliens, Artificial Intelligence, and Apocalypse: Ancient Mythology and Contemporary Film (212786)

Charles Stang

2021 Fall (4 Credits) **Schedule:** T 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Are you anxious about the dangers of technological innovation, especially artificial intelligence, the possibility of alien life and its intentions, the threat of environmental devastation, and other apocalyptic futures? You're not alone: contemporary filmmakers are constantly exploring these themes. What may surprise you, however, is that these filmmakers are increasingly turning to ancient mythology as a resource for thinking through these anxieties. From *Bladerunner* to *Westworld*, from *The Matrix* to the *Alien* franchise, we see more and more films picking up one particular ancient mythology from the ancient Mediterranean world and adapting it to contemporary anxieties about aliens, artificial intelligence, and the apocalypse. According to this mythology, the world we inhabit is believed to have been created by a malevolent or ignorant god, and governed by its deputies. This mythology emerges, then, as a critique of the created order and the powers that be, and imagines forms of resistance and liberation, including how to seek out the true god, who is higher than the creator and its deputies. This seminar examines this distinctive mythology's sudden resurgence in the world of film (and increasingly, in television), especially in science fiction and fantasy. The aim of this seminar is to equip students with the texts and tools to see this ancient mythology at work in our contemporary culture.

Freshman Seminar 63J

Islam vs. Image?: Visual Representations in Islamic Art (213252)

David Roxburgh

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Is Islam against images? For reasons that are perplexing and hard to pinpoint, this notion appears to have been promoted by ideas about Islamic doctrine and an endemic hostility toward images which has only been magnified after recent years of religious extremism and terrorism. These include the Taliban's destruction of the Bamiyan Buddhas in Afghanistan in 2001, and the Charlie Hebdo mass shooting in Paris 2015 over the cartoons representing the Prophet Muhammad. And yet there is ample evidence of making and using images across the time and space of Islam. The stereotype of Islam's antipathy toward paintings and drawings, etc., has fostered the understanding that calligraphy and geometry flourished because of figuration's illicitness. These ideas and assertions are misleading and incomplete. The Seminar is an opportunity for personal reflection and to study the issues at stake in questions about the values, forms, and functions of images and examines a broad variety of images produced throughout the Islamic lands from 600–1900. Each week focuses on a selected case study that together span diverse subject matters, mediums, functions, and contexts, and invite thought about a spectrum of modes of representation. We will learn that the condition of images in Islam is as diverse and complex as the religion itself which cannot be reduced to a unified or monolithic expression, to a singular system of belief.

Course Notes:

Each weekly meeting is held in the Art Study Center of the Harvard Art Museums with selected works of art.

Memory Wars: Cultural Trauma and the Power of Literature (215850)

Nicole Suetterlin

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

How do we respond to a traumatic event? Denial, acceptance, blame, reconciliation… there are many stances we can take toward a harmful act we have experienced or committed in the past. When entire populations have suffered or perpetrated crimes against humanity, the question of how to deal with this traumatic past can spark a full-blown memory war – such as the one currently raging in the U.S. over Confederate monuments. In this seminar, we explore how the catastrophic events of the Holocaust, slavery, and apartheid affect the way we think and act as individuals, groups and citizens today. What power do literature and the arts have in bringing peace to a society at war with its past? Materials include acclaimed American, German, and South African writers such as Toni Morrison, Paul Celan, and Sindiwe Magona; human rights philosopher Hannah Arendt; comedian Trevor Noah; and civil rights lawyer and Harvard Law School graduate Bryan Stevenson, who has been fighting racial bias in the U.S. criminal justice system for the past three decades. Topics include literature about the Holocaust, slavery, and apartheid; Germany's and South Africa's recent "ethical turn" in memory culture; reconciliation and reparation; mass incarceration; punitive vs. restorative justice; social justice.

Course Notes:

This seminar includes a movie night, an excursion to downtown Boston to visit the New England Holocaust Memorial and murals by Boston artist Rob "ProBlak" Gibbs, and a visit to the Harvard Art Museums (subject to covid restrictions).

Narrative Negotiations: How do Readers and Writers Decide (216104)

Homi Bhabha

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Narrative Negotiations: How do Readers and Writers Decide on What are the Most Important Voices and Values Represented in a Narrative?

***Narrative Negotiations* explores narrative "voice" in a wide range of literary and cultural texts. Narrative voice is a lively dialogue between the author and the reader as they engage in the experience of determining the value and veracity of the narrative: whose story is it anyway? The writer creates the imaginative universe of character, plot, emotions and ideas—she seems to be holding all the cards; but it is the reader who rolls the dice as she draws on her human experience and moral values to question the principles and priorities of the storyteller. The game of narrative becomes deadly serious when storytelling confronts issues of colonialism, slavery, racial profiling and gender discrimination. Is the right to narrative restricted to those who have suffered the injustices of exclusion? What is my responsibility as a storyteller—or a reader—if I am a witness to violence, or an advocate against injustice, but my life-story is one of privilege, protection and security? What is the role of the politics of identity or cultural appropriation in determining whose story is it anyway? Throughout the seminar students will be encouraged to draw on their own histories, memories and literary experiences as the enter into the world of the prescribed readings. For the final assessment I hope students will choose critical and creative ways of telling their own stories, or the stories of others who have captured their imaginations. Seminar participants will be required to come to each class with two questions that pose issues or problems based on the texts that are important for them, and may prove to be significant for their colleagues. I will invite members of the group**

to pose their questions and start a discussion.

Music and Community (216119)

Claire Chase

2021 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Why do people come together to make new music? How does the act of making music build community and engender positive, even transformative, social change? How have musicians adapted and responded to the new realities of remote creation and collaboration in the era of COVID-19, and how have musical communities come together to fight for social justice during this time? How might societies of the future be impacted by these new modes of gathering, sounding, organizing and making music? And how might we as a musical community be of service to a changing world? We will explore these questions in a hands-on, exploratory environment by becoming our own musical community as a class over the course of the semester. We will study graphic and open-form scores and varied types of musical notation (written and oral), and we will build our own musical instruments (electronic and acoustic). We will also invite members of our growing Harvard community to join us in music-making events in a variety of venues online and offline. Small group work as well as collaborations that extend beyond our unit will be explored, including the collective creation of a sound art piece called Digital Sanctuaries, developed through weekly sound walks on campus. We will experiment with a wide range of pieces designed for musicians and non-musicians alike by 20th and 21st century composers, including several new works written expressly for our class, and we will learn about the intersection of music and community from guest lecturers in the fields of social justice, visual art, literature and integrated technologies.

Recommended Prep:

While no prior specific musical experience is required for the seminar or for our various community participants, what is required is curiosity, openness and enthusiasm about how and why music brings people together.

Freshman Seminar 63T

What Is Avant-Garde? (216112)

Nariman Skakov

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Avant-garde art sometimes seems to make a complete break from the art that precedes it. The very name, 'avant-garde' (from French, literally 'advance guard') carries military connotations that suggest a total, violent break with the past. Our seminar will look at another side of this radical change, asking whether the avant-garde might also be playful, rather than violent, making possible an interplay between invention and convention? And what is the afterlife of the avant-garde? How did its legacy inform aesthetic innovation in a later period? We will try to answer these questions by studying a small set of textual and visual artifacts from the long twentieth century, cutting across different continents and political formations. We will begin with Italian and Russian Futurism and their convoluted relationship with Fascist and Communist ideologies. We contrast these historical examples with later work, like that of Samuel Beckett and Andy Warhol. We will consider films by Sergei Eisenstein and Jean-Luc Godard, ending with David Lynch's radical displacement of the reigning ideology of Hollywood in his 2001 masterpiece *Mulholland Drive*. This nearly century-long framework will allow us to investigate a range of artistic, social, and political mobilizations of the term 'avant-garde'. We will be doing short readings and working through them together in class, helping students learn how to read theoretical texts as well as read novellas and watch films in the light of theory.

Drawing Lessons (218375)

Margaret Grasselli

2022 Spring (4 Credits) **Schedule:** F 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar, taught directly from original drawings in the collections of the Harvard Art Museums, explores a broad range of topics associated with the materials, functions, preservation, collecting, exhibiting, and cataloguing of European and American drawings from the fifteenth century through the nineteenth century. Emphasis will be placed on close, in-person examination of the drawings, supplemented by pertinent reading assignments. Discussions will encompass a number of subjects associated with the study and understanding of drawings as creative tools, cultural and social records, means of personal expression, and finished art objects. Assignments involve reading, writing, and working directly with the drawings. Both oral and written work will center on the creation of a virtual exhibition of drawings from the Harvard collections, with each student responsible for selecting, researching, and writing catalog entries and exhibition labels for three drawings.

Recommended Prep:

No knowledge of the history of art is required; of greater importance are enthusiasm, curiosity, and commitment, coupled with a strong desire to engage closely with fascinating works of art by a wide range of artists, both famous and less well known.

Our Borders, Our Lives: Creating, Dismantling, Rebuilding Borders through Art, Literature, and Film (218369)

Katie Daily

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Our Borders, Our Lives: Creating, Dismantling, and Rebuilding Borders through Art, Literature, and Film

We are surrounded by borders, and to understand them is to explore how they're drawn, why they're constructed (and deconstructed), and who can pass through them. This seminar will invite you to open up our ordinary understanding of borders to discover an extraordinary variety of perspectives and media.

This semester, we will think deeply and critically about borders and movement in order to better understand our individual positions as global citizens. We'll consider borders in our personal lives through social media and how people curate their online worlds. We will briefly study maps so that you can construct your own, considering your own borders. We'll visit a Harvard museum to discover how frames are both constraining and liberating. We'll examine fiction and film, attuning to the conditions of border migration and how people move. We'll sightsee in our lives and the spaces around us to begin understanding borders and movement in twenty-first century America. Through all of this exploration, we will discover the many lenses that can be used in order to grapple with the complicated nature of American borders while working to understand our own positionality in the world around us.

Looking for Clues. Ancient and Medieval Art @ Harvard (218370)

Evridiki Georganteli

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Objects are essential primary sources for the study of the past. They are imbued with tales of their makers, of societies in which they took shape, of customs and beliefs that lent them meaning, and of routes that facilitated their dissemination. In this interdisciplinary and highly interactive Freshman Seminar, participants will hone the art of looking through the close-up study and discussion of ancient and medieval ceramics, textiles, and metalwork from the world-class collections of the Harvard Art Museums, the Harvard Museum of the Ancient Near East, and the Boston Museum of Fine Arts. Art-making at the Harvard Ceramics Program will further help us associate these museum objects, detached from their geographical, historical, and archaeological context, with imagery, feelings, and the life of ancient and medieval craftsmen.

Ceramics, textiles, and metalwork circulated throughout millennia along routes of trade, warfare, diplomacy, and pilgrimage, transcending linguistic, religious, and cultural borders. The materials and the

techniques used in their creation reveal the economic resources, technological know-how, and political agendas of their makers. The reception, appreciation, life and afterlife of these objects shed light on the societies that consumed and treasured them. Looking for Clues. Ancient and Medieval Art @ Harvard is intended for students interested in Classics, History, Art History, Archaeology, Folklore and Mythology, Comparative Literature, Political Science, Economics, and the Study of World Religions. Handling sessions, group discussions, art-making, and a research paper on a choice object or a group of objects from the Harvard Collections offer students a sense of immediacy and appreciation of world cultures.

Troy: From Homer to Hollywood (218379)

Margaret Andrews

2021 Fall (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

What really happened when Helen ran off, Achilles got angry, and the Greeks came bearing gifts? This course will explore the Trojan War through the archaeology, art, and mythology of the site of Troy itself, as well as through popular imaginings of the Trojan War made by cultures ever since. The first half of the course will focus on the historical events surrounding the "Trojan War" at the end of the second millennium B.C.E. We will study the site of Troy and the cities of the opposing Greeks, as well as the evidence for contact, cooperation, and conflict between the Greeks and Trojans. We will also delve into the mysterious character of Troy's original excavator and see how archaeology at Troy has progressed from using mining carts then to ground-penetrating radar now. In the second half of the course, we will see how the narrative and mythology of the "Trojan War" were adapted and used by later civilizations—from Classical Greece to 21st-century America. As a part of our studies in these weeks, the class will visit the new Homer gallery in Boston's Museum of Fine Arts and examine actual ancient objects. Over the course of the entire semester, students will learn to evaluate the expression and reception of origin narratives through different media and within different cultures and to appreciate how ideas and memories are altered and reshaped within varying political and cultural contexts.

The Migrant Experience: Migration Through Visual Culture (218482)

Raquel Vega-Duran

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Humans have been on the move since the beginnings of their existence, and their migrations have been sparked by curiosity, the search for food, imperial desires, hopes of economic betterment, flight from natural disasters, wars, and more. If migration has always been part of human life, why have countries perceived migration as something new and threatening for centuries? Images of emigrants departing their homelands; large numbers of suitcases arranged in line or piles to be transported to boats and trains; migrants crossing borders—from rivers and deserts, to fences and customs; immigrants arrested in detention centers; and neighborhoods with names of emigrants' countries of origin, have been documented with images for decades. This seminar will focus on the ways visual culture helps us to understand the complexity of migration in the world today. Students will learn how to "read" a wide variety of media forms and spaces—films, documentaries, photographs, graphic novels, graffiti, maps, installations, and museums—and will get a comprehensive understanding of major issues in contemporary global migration. We will look at how visual culture follows the stages of a diversity of migrants' journeys from different angles; and we will examine concepts such as belonging, hospitality, home, otherness, identity, identification, citizenship, border and borderland, difference, hybridity, third space, cultural translation, race, biopolitics, globalization, and more.

Freshman Seminar 64L

The Juggler of Notre Dame (218483)

Jan Ziolkowski

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In the thirteenth century a French poet composed a remarkable poem about a professional performer who suffered multiple bouts of deep despair before achieving miraculous redemption. The story, after modest success in the European Middle Ages, disappeared until the end of the nineteenth century. Then it scored a hit when adapted by a French Nobel prizewinner as a short story. In the early twentieth century it enjoyed a second vogue worldwide as a smash opera. A media-savvy Scottish-American diva propelled this musical form to even greater fame in the US than it had achieved in Europe. It became a staple of highbrow culture, before passing into radio, television, and film. But later it vanished, except in children's literature.

This seminar follows all the main stages in the life (and death?) of this narrative. Doing so will enable consideration of the nature of story. Did an actual person and event lie behind the verse? How do the surviving medieval texts relate to lost oral versions? Why did the tale fade away in the early modern period? Why did it attract so much attention for nearly a hundred years before slipping again into obscurity?

Students will engage with manuscripts and books, poetry and prose, music and art, radio and television, and elite and mass culture, while grappling not only with the European Middle Ages but also with what was made of them in the nineteenth and twentieth centuries, particularly in the US.

Freshman Seminar 64M

What's Wrong with American Journalism? (218485)

Morgan Day Frank

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

"You furnish the pictures and I'll furnish the war," media baron William Randolph Hearst supposedly declared in 1897, pushing America towards war with Spain. Although in many respects Hearst's infamous "yellow journalism" can be understood to anticipate the media's worst present-day excesses -- an early example of "fake news" -- in other respects Hearst's grand proclamations can be seen as an expression of the media's most noble ambition: its desire to shape public opinion. This seminar will explore key moments in the history of American journalism to better understand the role journalism plays in the contemporary US. For instance, we will compare political discourse in colonial America to political discourse as it's currently practiced on Twitter. We will read abolitionist newspapers before the Civil War and investigative "muckraking" reporting at the turn of the twentieth century and consider how political and exposé journalism function today. Across these case studies students will learn about American journalism's greatest ideals, as well as its persistent failure to live up to these ideals. When did newspapers become objective? Have newspapers ever been objective? Should newspapers even aspire to objectivity? What's wrong with American journalism? Assignments for the class include weekly responses, a presentation, and two papers.

Freshman Seminar 64N

Who Will Write Our History? Truth, Justice, and Public Memorials (218484)

Kathryn Brackney

2022 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

When protesters in support of Black Lives Matter toppled a statue of slave trader Edward Colston and threw it into Bristol Harbour in the summer of 2020, their actions represented the latest move in a remarkable shift in global memory culture: For nearly a century, victims and opponents of genocide, political persecution, and imperial exploitation have made increasingly successful demands for space in the public sphere to tell their stories. Our seminar will explore how various stakeholders have reshaped the ways that communities

encounter histories of violence in public space. We'll track how the definition of what counts as a monument and which groups are worthy of remembrance are changing around the globe. In each seminar meeting, students will compare primary materials that raise foundational questions about history and its memorialization, including monument designs, personal testimonies, trial transcripts, photography, and museum collections.

Migratory Identities (218501)

David Damrosch

2022 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The world is being reshaped by waves of migration, as millions of people seek new social and economic opportunities, often fleeing war, political or religious oppression, or environmental degradation. Writers and filmmakers too have often migrated or gone into exile, and a wide range of modern and contemporary writing probes the losses and gains that minority populations have experienced after arriving as "strangers in a strange land." This seminar will take up a series of compelling works by migrant artists who take migrancy as their theme, from Derek Walcott and James Baldwin in the 1940s and 1950s to Salman Rushdie, Marjane Satrapi and Chimamanda Ngozi Adichie in the 1990s and 2000s. Each week's primary works are paired with an interview or essay by or about the writer or film maker. We begin with writers who look back at colonial situations in the Caribbean, Africa, and Indochina; then we'll look at immigrants' experience within metropolitan centers, and we'll end with works that probe the ongoing connection of people to the places they've never really left behind.

Course Notes:

NOTE: THIS SEMINAR HAS BEEN MOVED TO THE SPRING 2022.

Fun With Writing (218680)

Phillip Howze

2022 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Writing can be fun. By "writing", we don't only mean the act of putting pen to paper, or fingers to computer

keys to type. Writing is the ancient, conscious act of choosing words or texts or images and composing them in such a way to create an intended effect. Yes, writing is an intentional process… but not one which has to be necessarily painstaking. What if, first and foremost, writing was fun? This is the question we'll explore and enact, while also getting to know our fellow classmates, in this generative, art-making seminar. Weekly, we'll create both individually and together, engaging writing across a variety of forms-----—from gaming to publicity to food—to reacquaint ourselves with the joys of what it might mean to craft words creatively, theatrically, and collaboratively.

Landmark Cases in American Constitutional History (203011)

Michael Klarman

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This freshman seminar will cover landmark Supreme Court decisions in American history: Marbury v. Madison (1803) (origins of judicial review); Plessy v. Ferguson (1896) (racial segregation in railroad transportation); Korematsu v. United States (1944) (Japanese-American internment); Brown v. Board of Education (1954) (school segregation); Brown II (1955) (Brown's remedial order); Engel v. Vitale (1962) (school prayer); Reynolds v. Sims (1964) (legislative malapportionment); Miranda v. Arizona (1966) (right against self-incrimination); Furman v. Georgia (1972) (death penalty); Roe v. Wade (1973) (abortion); Bakke v. Board of Regents (1978) (affirmative action); and Obergefell v. Hodges (2015) (gay marriage). Each session will discuss one case or one issue involving a couple of related cases. The seminar's aim is to elucidate how the Supreme Court functions as a political institution—that is, to see how the Court's decisions reflect the broader social and political context, and to consider the consequences of its rulings. The readings aim to present enough different angles from which to view the Court's rulings to enable discussion of how a particular issue—such as the death penalty—became a topic of social controversy and of constitutional law, why Justices' opinions were written as they were, and an evaluation of the decision's reasoning and its consequences. Readings for each session will average about two hours. In addition to discussing the readings, students will be required to write three papers reacting to the readings, each of about four or five pages. Students will be afforded some degree of choice in the weeks for which they write papers.

Social Science and American Social Problems (203013)

Mary Waters

2021 Fall (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course will examine nine major social problems facing the United States today—income inequality, political polarization, race, immigration, poverty, education, incarceration, work and family, and climate change. We will read leading social science books and articles that define the problems, discuss their causes and consequences, and propose solutions. We will focus on how social science research from the disciplines of sociology, political science, economics and psychology measure and track changes in these areas. The class will collectively decide on three other problems we should learn about and three teams of four students each will prepare a presentation and paper on the topic.

Freshman Seminar 70K

Morality, Leadership, and Gray-Area Decisions (203014)

Joseph Badaracco

2021 Fall (4 Credits) **Schedule:** T 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 14

Everyone with serious responsibilities, at work and throughout their lives, faces gray area decisions. In organizations, these highly uncertain, high-stakes decisions are delegated upward, to men and women in leadership positions. They have to make final decisions on these problems, despite the gray, and these decisions test their competence and their humanity. This seminar offers a variety of important perspectives on gray-area problems and on ways to resolve them, responsibly and effectively. The seminar begins by examining gray area problems in various professions and lines of work. Subsequent sessions focus on three different ways of resolving gray area problems – in terms of accountability, character, and action. A typical session of the seminar will draw upon classic works of fiction, basic ideas in moral philosophy, and contemporary situations. These situations are typically described in short case studies involving men and women early in their careers, and they give students in the seminar the opportunity to grapple with these problems in personal terms – by discussing what they would do in these situations. From time to time, students will write short papers, which will be discussed in the seminar.

Class Notes: **Please Note: the seminar will be held in Allston.**

Freshman Seminar 71C

Law and Social Change: How Reform Movements Leverage the Law (205180)

Tomiko Brown-Nagin

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Legal realists and critical theorists have long argued that the law is a byproduct of society. "The life of the law has not been logic; it has been experience," Justice Oliver Wendell Holmes famously wrote. Focusing on the prospect of achieving racial justice through law, political science warned that law would never hover like a "protecting angel" over oppressed racial minorities. For it would always reflect the dominant social order and sympathy for outsiders should never be assumed. On the other hand, proponents of a Dynamic View of the U.S. Supreme Court argue that it has repeatedly been a catalyst of social change in the United States. Still others, asserting that the law is "everywhere," decenter the Court and focus on the myriad ways, direct and indirect, that law, broadly defined, can be a tool of change.

This seminar defines law broadly; and it considers the idea of experience—including events and people external to the legal system—affecting the law and creating social change. It discusses how social movements—groups of citizens mobilized in support of a cause—deploy the Constitution and other types of rights talk to "frame" disputes and move forward their agendas. Seminar participants will discuss how movements crystallize grievances, mobilize supporters, demobilize antagonists, and attract bystander support by referencing constitutional rights and other ideas about law. It also considers the effectiveness of movements' legal strategies. The seminar considers these questions in relation to several well-known social reform movements—including abolitionism, the civil rights movement, the women's liberation movement, 20th century populism, MeToo, and Black Lives Matter—as points of departure for discussion.

Freshman Seminar 71D

Zen and the Art of Living: Making the Ordinary Extraordinary (205217)

James Robson

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This seminar explores the rich history, philosophy and practices of Zen Buddhism as it developed in China, Korea, and Japan. We will first consider the emergence of the Zen tradition out of the Buddhist tradition and then explore the full range of its most distinctive features (Zen monastic meditation), cultural practices (painting, calligraphy, and poetry), and radical—even iconoclastic—innovations (such as the use of kōans, which are seemingly nonsensical sayings that defy rationality). We will also critically evaluate some less well-known facets of the Zen tradition, such as gender issues, the veneration of mummified masters, and the question of how Zen was implicated in modern nationalistic movements in Japan during World War II.

During the mid-20th century, Zen became a global phenomenon as Zen masters began to move around the world and introduce the practice of Zen meditation to those in search of religious alternatives to Western organized religions, rationalism, and materialism. Zen attracted the attention of writers, musicians, artists, and athletes. Why did Zen develop such a trans-cultural appeal at that moment in history? Why are there so many books with the title: "Zen and the Art of…."? Why do so many computer and tech companies have Zen in their names? How has Zen meditation fed into the current "meditation/mindfulness" boom? These are some of the questions we will explore in this seminar through readings, film screenings, museum viewings, and a visit to a Zen meditation center.

Course Notes: **This course will also include required film screenings, visits to the Harvard Art Museums and Boston's Museum of Fine Arts, and to the Cambridge Zen Center.**

Americans at Work in the Age of Robots and Artificial Intelligence (207507)

Benjamin Friedman

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Where will the coming generation of Americans (say, today's 18-year-olds) find jobs? And will the jobs be worth having? People have worried about losing their jobs to technology at least since the Luddites 200 years ago. In the aggregate, they have been wrong. The automobile put lots of stable boys and saddle makers out of work, but it created vastly more jobs making cars, and fueling them and repairing them, and it opened the way for whole new industries like roadside motels and restaurants. With robots increasingly performing the tasks once done by blue-collar labor, however, and computers and artificial intelligence now eliminating the need for many workers once thought to be immune because of their cognitive skills, today's technological threat seems different. It is no longer just the unskilled and undereducated whose jobs are at risk. Moreover, the challenge may be especially acute in America, where wages are far higher than in many other countries and an ever greater share of what we consume and invest not only can be provided from overseas but often is. Does the next generation of Americans, then, face a genuine threat from advancing workplace technology? If so, what are the dangers – not just economic, but social, political, even moral – to the country as a whole? Most important, what can we do about it?

Global Capitalism: Past, Present, Future (207817)

Sophus Reinert

2022 Spring (4 Credits) **Schedule:** W 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Capitalism has powerfully shaped human history, and continues to shape the world we live in. The opinions of its defenders and defamers saturate our media landscape. But what do we mean by "capitalism"? Since their historical origins, "capitalist" values and practices have been the principal drivers of a process today known as "globalization," unfolding through both peaceful and violent means, which has brought disparate parts of the world together in a network of politically independent yet economically interdependent states and non-state actors. But how did capitalism come about? How is wealth created, why do we inhabit a world of "developed" and "emerging" markets, and what are the origins of economic inequality within and between nations? What futures might await what we call global capitalism? This seminar introduces students to the Socratic teaching method used in the Harvard Business School and is based on case studies covering the vast epic of capitalism. Where some cases are historical, considering topics such as the Great Divergence and the consequences of colonialism, others turn to contemporary conditions in the world's major regions and, ultimately, to the great transformations now underway and lying ahead. In addition to discussing the past, present, and future of capitalism, the seminar will familiarize students with basic concepts of macroeconomics as well as tools, such as balance of payments analysis and national economic accounting to prepare them for lives of active global citizenship.

Freshman Seminar 71O

The Heart of Medicine: Patients & Physicians & Experience of Serious Illness in the Age of COVID-19 (207777)

Susan Block

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Sickness and death are universal human experiences. Although the COVID-19 pandemic has brought this reality home, in many difficult ways, to all of us over the past 2 years, thinking about our own losses and vulnerability and that of people we love is often uncomfortable. This terrible year has also created many opportunities for us to grow, as individuals and as a society. Building on our collective experiences of the past year, we will explore our own perspectives and experiences with serious illness and death; examine the vulnerabilities in our health system and our society that also contribute to the challenges in dealing with serious illness and death, and seek to process these perspectives and experiences as a way of learning to live a more meaningful life, strengthening relationships, helping us be better caretakers of people we love, and of people whom we serve in a professional role. We will use our experiences and observations during the COVID-19 pandemic as one source of data to inform a larger understanding of how

humans deal with loss and vulnerability by examining, from multiple perspectives, the social, cultural, psychological, economic, and spiritual factors that influence the experience of serious illness. The seminar will draw on core readings from the humanities, social sciences, and medicine, including numerous readings related to COVID-19 to deepen understandings of how people experience and live and die with a serious illness. Opportunities for discussion, reflection, live interviews, case analysis, and experiential exercises will take place in class.

Course Notes:

If circumstances permit, additional field learning opportunities (e.g., participation in hospital-based teaching rounds) will also be available outside of class.

Dilemmas in the World's Economy (212698)

Elhanan Helpman

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Standards of living vary greatly across countries, they rise fast in some and slowly in other. Economic growth has historically been related to the expansion of international commerce as well as industrialization and institutional reforms. How does a country's well-being and growth depend on its trade partners? Is globalization in the form of international integration desirable? Do all income classes benefit from globalization? What role do trade policies play in shaping the benefits and costs of globalization? We will discuss the historical evidence on economic growth, the expansion of commerce, and the evolution of trade policies. We will also discuss the nature of these processes and the interdependence between them. Using this knowledge, we shall discuss the pros and cons of globalization and the tradeoffs faced by policy makers. These tradeoffs will be illustrated with contemporary policy debates concerning tariffs and free trade agreements. Finally, we will discuss the impact of globalization on inequality within countries and in the world economy.

Course Notes:

This seminar will meet for only 2 hours within the time block.

Rituals, and Living the Good Life (212785)

Michael Norton

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Why do we knock on wood for good luck? Why do we put birthday candles on cakes? Why do some cultures use black at funerals while others use only white? Why do teams perform team cheers before games? This class will explore the psychology of rituals – those odd, seemingly meaningless behaviors that research shows influence our psychology in profound ways, making the mundane meaningful: dull morning routines can instead get us "ready for our day" and rote work meetings can instead improve team cohesion and performance. We will explore rituals in domains ranging from performance anxiety to team effectiveness, from enhancing consumption to improving health—in our daily lives, our work lives, and even when trying to cope with family during the holidays.

Freshman Seminar 72D

Democracy and Education in America (216285)

Rob Willison

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Cheerful illusions and wish fulfillment have dominated both popular and scholarly thought about democracy for two centuries. Democratic theory has sailed along as if no iceberg had struck and the engine room were not taking on water…Our view is that conventional thinking about democracy has collapsed in the face of modern social-scientific research.

(Achen and Bartels, *Democracy for Realists*, 2010)

Democracy is in crisis. The problems we face—pandemic, environmental destruction, economic and technological upheaval, global migration—are far too complex for the average citizen to grasp in detail. Meanwhile, the tools of disinformation and manipulation are more powerful than ever. Set aside, for a moment, any default faith in democracy you've grown up with: do you really believe you can trust your fellow citizens to make wise decisions about how to approach these issues? In this seminar, we'll put to the test the most powerful answer to such worries that democracy's defenders can offer: education. If we are not now the well-informed, open-minded, scientifically literate, engaged citizens that a healthy democracy requires, can our educational institutions be designed to bring us sufficiently close to that ideal? Or, as so often seems to be the case in contemporary America, are our schools doomed to reproduce the divisions and inequalities that they inherit? To address these guiding questions, we'll attack philosophical questions

about the very nature of democracy and human cognition, and draw on the best research contemporary social science has to offer. Our companions in inquiry will be some of history's greatest theorists of education—Plato, Dewey, Freire—but also leading thinkers of today (many of whom are members of Harvard's faculty): Susan Carey, Danielle Allen, Daniel Koretz. By the seminar's end you'll make your own original contribution to this collective intellectual effort by completing, in collaboration with your classmates, a project of your own design.

Freshman Seminar 72M

Implicit Bias: Science and Society (218479)

Mahzarin Banaji

2021 Fall (4 Credits) **Schedule:** M 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

We coined the term *implicit bias* in 1995 to capture the idea that *bias*, i.e., a deviation from accuracy or values can be *implicit,* i.e., operate without conscious awareness or conscious control. The idea emerged from basic research on *implicit social cognition* (ISC), an area of scientific psychology that explores the hidden aspects of mental representations of self, other, and social groups. Today, 25 years later, the term *implicit bias* has transcended academic psychology and permeated contemporary culture where it is used and contested every day. In this seminar, we will study the science of implicit bias, with a focus on disparities that emerge along the lines of social categories of age, gender, sexuality, race, ethnicity, socioeconomic class, physical attributes, religion, politics, language and culture, geographic region and nationality. The seminar will provide an introduction to the science of implicit bias: origin and break from orthodoxy, basic theoretical concepts, dominant methods, noteworthy discoveries, criticisms (by experts), implications for policy and law. Additionally, the seminar will provide an opportunity to explore the societal impact of implicit bias in domains such as employment, healthcare, education, and law. Beyond these content-specific goals, the seminar is designed to (a) sharpen analytic and ethical thinking, and (b) develop the capacity to build educational materials that can render the science accessible to policy makers and the public (see, www.outsmartinghumanminds.org).

Freshman Seminar 72N

Portraying Activism: Lessons from Social Movement History (218504)

Amy Alemu

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Activists and historians both ask of the world, "how is history made?" This seminar will be examining accounts of social movements, investigating both the content of the history and the method by which it is presented. In addition to discussing histories of social, political, and cultural activism—from Harvard's movement for Afro-American Studies, to Berlin 1989, to Stonewall, to the Walter Rodney Riots, among many others—we will take several field trips to Harvard archives and exhibitions, making extensive use of on-campus and online collections to learn about forms of historical evidence and methods of analysis. By the end of the seminar, students will have created final projects, "Portraits of Activists," using the skills they have learned, with an opportunity to exhibit their work as an exercise in public scholarship.

Our purpose is to understand some of the available tools to explore and narrate movements for social change, and to hone our critical eye toward discerning the ways stories of activism are constructed, and what those framings can tell us. Along the way, we will learn lessons about the dilemmas faced by movement makers and storytellers alike in an effort to understand and portray human struggles to change the world.

Freshman Seminar 72O

Political Violence and Power (218503)

William Whitham

2021 Fall (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

You were likely born after September 11th, 2001, the day of one of the most deadly terrorist attacks in world history. Since then, western media have often depicted terrorists as shadowy jihadis striking across state borders, armed with high-tech weapons and encrypted messaging apps. Yet political violence, practiced by the Zealots in the Holy Land two millennia ago as well as by white supremacists and incels in contemporary America, is older and more ubiquitous than this image suggests. What is political violence or "terrorism"? Why do people choose to use violence in pursuit of political change—and when, if ever, is their choice rational or justifiable? Are terrorists indeed "freedom fighters" from another point of view? How do they maintain organizations, forge transnational networks, and exploit media attention? And how do societies and states prevent political violence, rather than foster it or even participate in it? In this seminar, we'll explore the ethics, psychology, and sociology of political violence over the past 150 years. We'll dive into the history of European anarchism, the Algerian anti-colonial struggle, the Irish Republican Army, the Palestine Liberation Organization, and today's jihadis and far-right networks. Students will practice using theory, evidence, and empathy to construct arguments. They'll debate contentious topics, watch The Battle

of Algiers, and analyze a terrorist network or group of their choosing—putting themselves in the shoes of a terrorist. Above all, they'll learn about the nature of power.

Freshman Seminar 72P

Corporate Power & Human Rights—Community Resistance and Social Movements (218514)

Tyler Giannini

2021 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

How do the seemingly most marginalized take on the most powerful corporations in the world and win? In this seminar, we will delve into this question and what drives community resistance and social movements in the face of frequently daunting odds. We will zero in on community resistance in its many forms when confronting abusive corporations and authoritarian governments often supporting them. Through case studies involving natural gas in Myanmar, gold mining in Papua New Guinea, and chocolate in West Africa, we will discuss both the harms communities experience and how communities can have a seat at the table to demand their rights and take on oppressive systems. We will also look at how North America is implicated in these cases and consider the power dynamics between communities, advocates, businesses, and states that span borders and different cultures. We will also look at ways that communities can build their own power through the solidarity economy and how advocates cannot only combat economic injustice but build their visions of economic justice for the future.

Stories from the End of the World (212765)

Giovanni Bazzana

2021 Fall (4 Credits)		**Schedule:**	TR 0900 AM - 1015 AM
Instructor Permissions:	Instructor	**Enrollment Cap:**	200

Humans seem to have always imagined the end of their world order. It appears that, without the "sense of an ending," not only artistic production, but also individual and social lives cannot be made coherent and effective. Fantasizing about the apocalypse is something that many people in the US and almost everywhere else in the world used to do on a daily basis either by watching their favorite shows on TV, by playing videogames, or by listening to political speeches. Of course, in 2020 all this has become not only fictional anymore due to the tragedies and disruptions brought about in our daily life by the Covid-19 pandemic: we truly live in a post-apocalyptic world. But it is worth remembering that many experienced such a condition even before 2020 and we can learn from their reflections and imaginations how to live the apocalypse.

This course will start from these observations to ask why imagining the end is so pervasive in contemporary cultures, what ethical choices are put in front of us "at the end of the world as we know it", and how we can analyze critically where apocalyptic images are coming from and how they are used in contemporary conversations.

Imaginations of the end have their roots in a literary genre that is often called "apocalyptic" and has been alive and productive since antiquity. The course will look at this historical trajectory, but most of the work will be focused on contemporary cultural products, such as movies, short stories, songs, art, comic books, videogames, and so on. The products of writers, filmmakers, and artists will be analyzed and observed as thought experiments and "revelations" about the incoming end and its aftermath. Much of this work will be carried out in collaboration with the Harvard Art Museum and through the participation of writers and artists as guest lecturers and interviewees.

Thus, students will be asked to observe how thinking about a catastrophic future is actually a means to reflect about the present, by identifying whether humans are doing something wrong, whether they have any chance to correct their mistakes, or what strategies can be deployed to face with resilience the aftermath of the end. In this perspective, for instance, God, aliens, or meteorites are metaphors representing our powerlessness, while sins, zombies, or climate change are wake up calls for humankind. "Prophets of doom" can be channels of liberating and progressive energy, but can also become instruments to set up for destruction people who look and act differently. Apocalyptic scenarios almost always distinguish humankind in the two opposed camps of those who are saved and those who are condemned, but in more modern apocalypses the Enemy (like the biblical Antichrist) looks more and more undistinguishable from our own selves.

Ultimately, the course will ask you to reflect about your own fantasy of the end and write (or photograph, or sing) it.

The Democracy Project (203045)

Jill Lepore

2021 Fall (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The United States is founded on the idea of equality but equality has always been elusive and has only ever been achieved through struggle, argument, and action. This course examines American history--especially the history of race, immigration, and constitutional justice--through historical analysis, democratic deliberation, and public-minded projects. It's a history course—but a history of the present.

Class Notes: **This course will host a live course preview and Q&A session via Zoom at 1 p.m. EDT Tuesday, August 24. Please see the course Canvas site for Zoom link and more information.**

Understanding Darwinism (125195)

Andrew Berry

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 105

How does scientific knowledge develop, how is it shaped by history, and what effect does it have on society? An interdisciplinary exploration of Darwin's ideas and their impact on science and society, this course links the history of Darwin's ideas with the key features of modern evolutionary biology. We review the development of the main elements of the theory of evolution, highlighting the areas in which Darwin's ideas have proved remarkably robust and areas in which subsequent developments have significantly modified the theory. Assignments will include a project that allows you to explore your own DNA. We will explore the theological implications of evolution, why evolution is challenged by creationists, and what role

the scientific consensus plays in a society mainly composed of non-scientists. By also analyzing the historical context of the development of evolutionary thought beyond Darwin, the course emphasizes the dynamic interplay between science and society.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my. harvard by 11:59 p.m. Tuesday, August 24, 2021. Music From Earth (215876)

Alexander Rehding

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In 1977 humanity sent a mixtape into outer space. The two spacecraft of NASA's Voyager mission include a Golden Record, featuring greetings in 55 earth languages, 116 images of the planet and its inhabitants, plus examples of music from a range of cultures across the world: from Azerbaijani bagpipes to Zaire pygmy songs, from English Renaissance dances to Stravinsky's Rite of Spring, and from Louis Armstrong to Chuck Berry. The samplings of earthbound auditory culture are on their way into the unknown. The Voyagers left the solar system around 2014, and in about 40,000 years the sun will no longer be their nearest star.

The Golden Record raises a number of big questions. The vast temporal and spatial distances that it traverses force us to change our perspective so as to imagine the distant future and to think far beyond our usual comfort zone. In trying to make contact with the Big Other—quite literally, communicating with the alien—the Golden Record asks us to confront our very humanity and to pose questions of self-representation and communication on the broadest level.
It is ironic that in 1977 the idea of communicating with aliens was something of a crackpot theory that serious scientists rarely promoted, whereas the vast number of exoplanets that have been discovered over the last forty years has given new relevance to this idea. We now believe that there must be at least 100 billion exoplanets, so the tables have turned: now it seems statistically unlikely that there would be no other inhabited planet in the universe.

The central question we will ask in this class is bafflingly simple: What might happen if someone picked up the Golden Record at the other end? What does listening actually mean on this broadest, interplanetary

level? Of course, any answer must remain speculative, but this doesn't mean that we must throw our arms up in the air in despair. SETI, the Study of Extra-Terrestrial Intelligence, has identified a number of factors that we can safely assume to be universally recognizable across planets. Chief among them is the binary system of zero and one; it is also likely that sensory perception will rely on vibration patterns in a fluid medium. These give us a basis for some informed speculation. Concrete answers will likely remain evasive, but the creative and deductive work that goes into solving these puzzles are just as important as the answers themselves.

Power and Identity in the Middle East (142447)

Melani Cammett

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Why are some countries governed democratically while dictators seem to have a firm grasp on power in others? Why do people threaten and even kill each other in the name of ethnicity or religion in some places and times but not others? This course will give you a chance to explore these questions in the context of the Middle East, a region that has been widely perceived as a bastion of authoritarianism and a hotbed of ethnic and religious politics and political violence. In considering key questions and debates about politics, governance, and identity in the Middle East, you will develop a critical understanding of politics in the region, while simultaneously gaining the social-scientific vocabularies necessary to question the assumptions that are often made about Middle Eastern politics and people and, more generally, about politics in other contexts. In asking why and how the Arab Spring was possible, and how authoritarian governance has managed to persist following those uprisings, you will have an opportunity to engage some of the most urgent social-political questions of our time. You will leave this course with a clearer understanding of how dictators and militaries maintain their hold on power and how identity politics and conflict are constructed and change over time.

Satire (212834)

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A course on satire, its power and limitations, from Classical Rome, through medieval Italy, to Elizabethan theatre and 19th-20th century American cartoonists. Serving as both a critique of social norms and the oppression of minorities (anti-women, anti-Jews, etc.), satire has been one of the most practiced and effective languages in Western culture. By ridiculing ideas, habits or specific individuals, satire challenges and constantly reshapes moral, legal as well as linguistic boundaries. We will discuss various definitions of the genre, with readings on the theory, functions and limitations of satire, focusing on the intellectual debate and juridical responses (censorship, criminal law, libel writs, etc.) that have accompanied satirical expressions across the centuries. Satirical artifacts examined during the classes include poems, novels, theatrical plays, defamatory paintings and sketches, with the participation of contemporary satirists, cartoonists, comedians and judges from around the world.

Contemporary Developing Countries: Entrepreneurial Solutions to Intractable Problems (107464)

Tarun Khanna

Satchit Balsari

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

What problems do developing countries face, and how can individuals contribute to solutions rather than awaiting the largesse of the state or other actors? Intractable problems – such as lack of access to education and healthcare, forced reliance on contaminated food, deep-seated corruption – are part of the quotidian existence of the vast majority of five of the world's seven billion people. Developing societies suffer from what we refer to as 'institutional voids' that make organized activities of all sorts difficult; think of the mundane but important physical infrastructure that allows us to get to work or school in the developed world, as well as our access to higher-order institutions such as the availability of information at our fingertips or the security of the rule of law. The course demonstrates that reflecting upon the nature of the developing world's intractable problems through different lenses helps characterize candidate interventions to address them. The scientist's hypothesis-driven and iterative experimentation, the artist's imagined counterfactuals through putting oneself in others' shoes literally and theatrically, and the planner's top-down articulation of boundary conditions, all tailor the ultimate solution.

Class Notes: **This course's faculty members and teaching fellows will host a live course preview and Q&A session via Zoom at 10 a.m. EDT Monday, August 23. Please see the course Canvas site for Zoom link and more information.**

Ethics of Climate Change (205079)

Lucas Stanczyk

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How should governments respond to the problem of climate change? What should happen to the level of greenhouse gas emissions and how quickly? How much can the present generation be expected to sacrifice to improve conditions for future generations? How should the costs of mitigation and adaptation be apportioned between countries? Should significant funds be allocated to the study of geo-engineering? We will consider these and other questions in an effort to understand our responsibilities in respect of climate change, with a special focus on the structure of the analytical frameworks that have been dominant among policymakers.

Americans as Occupiers and Nation-Builders (108359)

Andrew Gordon

Erez Manela

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The United States has launched numerous projects of military occupation and nation-building in foreign lands since the late 19th century. These have been contradictory enterprises, carrying ideals of freedom and self-determination "offered" by force or by fiat. This course will assess the meanings and legacies of these projects by examining the ideas, strategies, policies, and outcomes of occupations ranging from the Philippines and Haiti early on, to Japan, Germany, and Korea in mid-century to, most recently, Afghanistan and Iraq. The course focuses on American activities and ideas but also examines the responses of the occupied.

How to Build a Habitable Planet (118517)

Charles Langmuir

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The aim of this course is to place human beings in a universal and planetary context. You will learn where we come from beginning with the Big Bang and ending with modern human civilization and our relationship to the planet from which we have evolved and on which we depend. You will understand the factual evidence for the Big Bang, the origin of the elements, plate tectonics, evolution and climate change. From this story a process of planetary evolution emerges and we will consider whether this process is likely to be common or a unique accident. Earth history has been punctuated by a series of revolutions where the planet molts to a new level of functioning. Viewed in this context, human civilization is the latest molting of the planet, giving Earth the possibility of a conscious presence to itself and in the galaxy. Are we as human beings an agent of planetary evolution, or instead a parasite or cancer to planetary systems? This question provides a novel perspective on current environmental problems and how we might deal with them, and moves the question from technology to personal philosophy and behavior. It also casts a different light on the likelihood of alien civilizations and whether we need to fear them. Climate change is seen in a much broader perspective of the relationship between people and Earth, and how our personal behavior is not trivial, but central. Readings include the book How to Build a Habitable Planet, short recorded lectures to deliver the scientific content, and discussion sessions each week to address any difficulties and explore the broader implications for human beings of what we are learning. At the end of this course, you will have a greater understanding of the past, present, and future of the planet we call home, and the planetary consequences of your life decisions.

Class Notes: **This course will host a live course preview and Q&A session via Zoom at 11:30 a.m. EDT Wednesday, August 25. Please see the course Canvas site for Zoom link and more information.**

The Caribbean Crucible: Colonialism, Capitalism and Post-Colonial Misdevelopment In The Region (118290)

Orlando Patterson

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores the complex, formative role of the Caribbean in the development of Western colonialism and capitalism and the consequences for the peoples of the region. Four major themes will be examined. First, the importance of the region in the origin and early development of Western imperialism and capitalism: Why did both Western Europe and America begin their imperial and colonial expansion in this region and to what degree did the region's slave-based economies influence the nature and development of Western capitalism? Second, what were the consequences of imperialism for the demographic and socio-cultural fate of indigenous and African populations? Is genocide a proper designation of the fate of exploited peoples of the region up to the end of the period of slavery? Third, we examine the post-colonial consequences of this history for the socio-political, economic and cultural development of the region. What have been the main paths toward sustainable development in the modern Caribbean? Why in spite of its long history of engagement with Western capitalism, has the region largely

faltered in its efforts to develop? We examine the different paths to development through five case studies—neo-colonial dependency in Puerto Rico, communist dependency in Cuba, democratic socialism in Jamaica, Barbados' neo-liberal strategy, and aid-dependency in Haiti. We also study the common problem of migration and transnationalism and the degree to which this process undermines national sovereignty. Fourth, we explore the distinctive features of racial classification and cultural representations in the Caribbean. What do we learn about race as a social construction from the Caribbean experience? How do Caribbean racism and colorism unsettle American notions of race and ethnic identities? Why has globalization not led to cultural homogenization? How do we account for the unusual influence of Caribbean music, especially that of Jamaica, on popular global culture?

Ignorance, Lies, Hogwash, and Humbug (204966)

Christopher Robichaud

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Is truth dead? Time Magazine posed this question in bold red print on its April 3, 2017 cover. It's a surprising concern, given that information of every sort imaginable is merely a click away on our phones, access to educational resources is robust for both traditional students and online learners, and direct interaction with public figures is more unencumbered than ever before with the help of social networks. Yet we nevertheless find that "alternative" facts regularly compete on equal footing with actual facts, fake news beats out mainstream news, and expert knowledge is sidelined for gut hunches and whatever feels correct. Such is the so-called post-truth age. Can our democracy survive it? Contrary to what many of you may think, it's not obvious that it can. Perhaps even more surprising, if it can survive, it may only be by way of the much-maligned practice of politics. In this course, you'll interrogate the post-truth age, primarily within the American context, through an interdisciplinary engagement with epistemology, political philosophy, media studies, and the behavioral and social sciences.

Pride & Prejudice & P-values: Scientific Critical Thinking (217834)

Ned Hall

Douglas Finkbeiner

2022 Spring (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** 50

We humans have developed rational and systematic methods for solving problems, ways carefully designed to chart a reliable path to the truth. Yet we as individuals, as groups, as whole societies fail to take full advantage of these methods. This course aims to equip you to do better, by helping you explore what it means to approach a question "scientifically."

What skills – and more importantly, habits of mind – does this approach require of you as an individual (especially an individual who needs to work in collaboration with other individuals)? What does successful scientific inquiry require of a community – both the community undertaking the inquiry, and the larger society of which it is part? Here you will find the tools to start answering such questions for yourself. You will learn to spot widespread and stubborn errors in reasoning that we humans easily fall prey to, along with techniques for avoiding them. You will uncover some of the fundamental assumptions (about the world we inhabit, and about our access to that world) that science must proceed from, and thereby become more sophisticated about what science can teach us and what it can't. By engaging with these foundational aspects of scientific inquiry, you will come to understand more fully what it means to adopt a critical scientific mindset, and how to do so for yourself. And you will thereby end up in a much better position to assess how communal scientific inquiry does and should guide decision making in a democratic society such as ours.

Human Evolution and Human Health (112339)

Daniel Lieberman

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How and why did humans evolve to be the way we are, and what are the implications of our evolved anatomy and physiology for human health in a post-industrial world? Why do we get sick, and how can we use principles of
evolution to improve health and wellbeing? To address these questions, this course reviews the major transitions that occurred in human evolution, from the divergence of the ape and human lineages to the origins of modern humans. Also considered are the many effects of recent cultural and technological shifts such as agriculture and industrialization on human health.

The Philosopher and the Tyrant (107880)

David Damrosch

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Philosophers and politicians alike struggle to set the terms for living a good life in a world of conflict. Rulers seek guidance from their counselors, and philosophers have often dreamed of wielding real-world influence. Reading a series of masterpieces of philosophical thought and literary expression, we will examine some striking cases of relations between the pursuit of wisdom and the pursuit of power, from the extremes of conflict (the executions of Socrates, Han Fei, Jesus, Sir Thomas More) to the opposite dream of the philosopher king. How do seekers of wisdom speak truth to power? How do rulers understand their ethical responsibilities toward their often fractious subjects? How do rulers and subjects alike weigh the competing demands of liberty and order, self-fulfillment and self-restraint? Moving from ancient to modern examples, this course will see how the insights and methods of Plato, Machiavelli, Shakespeare, and Hannah Arendt can be useful in working through contemporary conundrums of wisdom and power.

Res Publica: A History of Representative Government (120049)

Daniel Carpenter

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

"A republic, if you can keep it." So did Benjamin Franklin characterize his hopes for American government. What did Franklin and others mean by republic, and why did he and so many others worry that it might be something hard to hold onto? This course will give you the theoretical basis and historical evolution of republics so that you can understand the American system of a democratic republic, now spread widely around the planet even as it is considered under threat. You will read Hamilton alongside Jefferson, Machiavelli alongside Montesquieu, and Angelina Grimké alongside Frederick Douglass. You will consider systems of governance in Republican Rome, medieval Europe, early modern England and France, Native American nations and the United States. The thinkers and founders you will read thought long and hard what freedom is, how to balance executive and legislative power, and why republics and democracies can be unstable. As a democratic republic, the United States places great faith in the capacity of voters to choose their rulers, who in turn make most of our policies. Is this faith misplaced? What is the role for virtue in a republic, and what is virtue? How does inequality undermine republican stability, and what might be done about it?

Screen reader support enabled.

Conflict Resolution in a Divided World (107669)

Daniel Shapiro

2021 Fall (4 Credits) **Schedule:** M 0345 PM - 0630 PM

Instructor Permissions: Instructor **Enrollment Cap:** 80

How should we understand conflict in our own lives and in the world around us? At all levels of society, people tend to approach conflict as an adversarial battle—communities polarize, ethnopolitical groups clash, and nations and international institutions face daily political tensions. To prepare you for a lifetime of civic engagement, this course empowers you with new pathways for examining enduring questions about

the roots of conflict and interdisciplinary approaches for resolving it. We will explore rational, emotional, and identity-based perspectives on conflict resolution and connect these aspects to your own life challenges and to conflicts ranging from on-campus divisions to large-scale political disputes. Because conflict resolution often involves tough decisions and moral dilemmas, we also will examine models for understanding its broader sociopolitical and ethical dimensions. The hope is that, by the end of this course, you will have a deeper understanding of conflict resolution and will be better equipped to navigate its many contours to advance the vision of a more peaceful world.

Texts in Transition (212840)

Ann Blair

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 45

We live in a moment of rapid changes in the ways we communicate. As our writing becomes ever more digital—and paradoxically both more ephemeral and more durable—the attitudes and tools we have for preserving our culture seem more complex and fluid. This course studies how written language—text—travels through time and across media. We will ask: how good are texts for capturing, transmitting, and preserving human experience? How have texts come down to us from the distant past? How do we ensure that what we write today will survive into the future? As we investigate contemporary approaches to cultural preservation, we will consider how pre-modern European cultures transmitted and transformed texts, and created institutions that we still rely on today, including museums, libraries, and archives. Each week you will observe or apply methods of preservation, restoration, destruction, translation, and transmission in an attempt to preserve a personal artifact. We will also read works of literature that reflect on questions of durability, ephemerality, and written memory. Students will work through weekly assignments toward a final project focused on studying, curating, and preserving a textual source of their choice.

Experiments that Changed Our World (212854)

Philip Sadler

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 50

Facing the edifice of preexisting knowledge, how are breakthrough scientific discoveries made that contradict the existing canon? Twelve great experiments that have transformed our understanding of nature will guide us, first through immersion in the scholarship and popular beliefs of the time. Next, how did the discoverer prepare? What were the motivations, prior experiences, and training that led to the threshold of a fruitful advance? Then, to the degree possible, we will carry out the exact same investigations, building our own simple equipment from scratch, duplicating the challenges of wresting patterns from noisy and incomplete data. Students will compare their results to both private and published versions of the original research. The course will examine the magnitude of the cognitive shifts experienced and the often uphill battle to acceptance. We will build an understanding of the nature of scientific progress, examining how the mastery of natural phenomena leads to new technologies and how these can contribute to further scientific discovery.

Experiments are drawn from the natural sciences, ancient to modern, from Eratosthenes measuring the earth's size to Rosalind Franklin determining the structure of DNA. We will consider how these discoveries continue to impact society, as well as the many ethical questions raised. The course will examine the difficulty of accepting new experimental evidence falsifying accepted scientific paradigms and how this remains an issue that plays out in current society. By unpacking these 12 experiments, students will be able to better prepare for their own future discoveries and contributions.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my. harvard by 11:59 p.m. Tuesday, January 18. Sleep (212896)

Charles Czeisler

Frank Scheer

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

What is sleep? Why do we sleep? Why don't we sleep? How much sleep do you need? What are circadian rhythms? How do technology and culture impact sleep? This course will explore the role of sleep and circadian timing in maintaining health, improving performance and enhancing safety. We will evaluate the causes and consequences of the epidemic of sleep disorders and deficiency in our society, with particular attention to impacts on brain (learning and memory, mood and cognition) and body (appetite and metabolism,
hormones and heart) functions. Personal and public policy approaches to issues such as drowsy students, drowsy
drivers and drowsy doctors will be addressed.

Class Notes: **This course will host two live course preview and Q&A sessions via Zoom: one from 7:30-8 p.m. EDT Monday, August 23 and the other from 3:30-4 p.m. EDT Tuesday, August 24. Please see the course Canvas site for Zoom link and more information.**

How Did We Get Here? From Slavery to #MeToo (218232)

Linda Chavers

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

Everything we think we know is wrong, right? We get our news through a wide variety of mediums from Twitter to FOX News. The #MeToo movement as we know it came to national fame from a Twitter thread. Yet as soon as it went "viral" we learned that #MeToo already existed: as a nonprofit by a Black woman, Tarana Burke. What might this mean about other popular tropes and trends in our society? This interdisciplinary seminar takes popular tropes from our everyday language and fabrics and connects them to marginalized

texts from centuries ago. Would you understand the #MeToo era better if you'd read the words of Harriet Jacobs from 1863? What are we laughing at when SNL's Leslie Jones jokes that she'd be the most useful woman in antebellum America? What about those ancestry.com ads connecting everyone to presidents? This course allows you to perform the necessary cultural investigations in order to engage in the timely critical discourses of and by Black American women from the prescient testimonials of Anita Hill to Vice President Kamala Harris's critiques of white liberalism.

You will leave this course with a more informed understanding of American slavery as it relates to our current world: to perform close readings of literary and visual texts from written narrative to 20-second commercials, to identify coda in popular language and thus be better equipped to recognize acts such as dog-whistling. This course will prepare you to disrupt your notions of history, slavery and feminism taking the work you'll do in a single semester into a lifetime of critical thinking about our everyday language.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, August 24, 2021. American Dreams Made in Hollywood and Beyond (109501)

Eric Rentschler

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 200

The American dream once essentialized the grand promise of a better, fuller, and richer life. At the present moment, however, it seems in many minds to have lost its evocative power as a collective myth. Does this notion still represent a principle of hope or has it become a form of cruel optimism?

In a time of prolonged political crisis, this General Education course has a pressing mission. It aims to further a dynamic understanding of American dreams (for there are many and not just one), to apprehend their complexities and contradictions, to appreciate their diverse manifestations and historical shapes, and above all to take measure of their presence and meaning in the world we now inhabit.

In this endeavor we will study the variety of ways in which feature filmmakers, both in Hollywood and beyond, have created designs for living, indeed the most influential and resonant incarnations of American dreams. We will analyze popular narratives produced during crucial junctures in the modern history of the United States, from the Great Depression and World War II, through the Cold War and the McCarthy era, up to the late 1960s. We will consider the wide range of functions that these productions have assumed, how they have by turns sustained and questioned the status quo. In some instances they have interrogated, revealed, and even indicted social inequity, at other times they have legitimated injustice and fostered exclusion. The class offers a representative sampling of classical Hollywood features as well as some exemplary independent American releases from 1932 to 1969, including *Scarface, King Kong, Imitation of*

Life, It Happened One Night, The Wizard of Oz, Lying Lips, Citizen Kane, Casablanca, Mildred Pierce, The Best Years of Our Lives, Salt of the Earth, The Invasion of the Body Snatchers, Raisin in the Sun, The Manchurian Candidate, The Exiles,* and *Easy Rider.

Course Notes: **See syllabus for information on film screenings.**

Deep History (205088)

Dan Smail

Matt Liebmann

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

When does history begin? To judge by the typical history textbook, the answer is straightforward: six thousand years ago. So what about the tens of thousands of years of human existence described by archaeology and related disciplines? Is that history too? This introduction to human history offers a framework for joining the entirety of the human past, from the long ago to the present day, in a single narrative that stretches across many disciplines. We will explore a series of interrelated themes each of which invites questions that travel across time and space. The material presented through lectures, discussions, and activities will not only guide students through a collaborative exploration of human experience, but will also encourage them to contemplate how such experiences mirror and contrast with their own. To help anchor ourselves in the timeline of past and present, we will engage with the world-class collection of artifacts in Harvard's museums, giving students a unique, hands-on opportunity to experience human history through material remains. Course notes: No prior college-level course in archaeology, history, or a related field is required or assumed, and First-year students are welcome. Because the course touches on ideas in many disciplines beyond history and archaeology, including art, economics, human evolutionary biology, psychology, and religion, we welcome a range of students who can bring unique perspectives and expertise to class discussion.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, August 24, 2021. The Gen Ed lottery will run Wednesday, August 25 with approvals and denials sent out no**

Evolving Morality: From Primordial Soup to Superintelligent Machines (203129)

Joshua Greene

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In this course we'll examine the evolution of morality on Earth, from its origins in the biology of unthinking organisms, through the psychology of intelligent primates, and into a future inhabited by machines that may be more intelligent and better organized than humans. First, we ask: What is morality? Many people believe that morality descends from above, as divine commands or as abstract, timeless principles akin to mathematical truths. Here we take an empirical approach to morality, viewing it as a natural phenomenon that rises up from below—born of the strategic interactions among lifeforms and societies struggling to exist. Next, we take a scientifically informed look at the foundational questions of moral and political philosophy. Many people believe that the "is" of scientific knowledge has nothing to do with the fundamental "oughts" of morality, that science and morality exist in separate realms (and belong in separate courses). Here we challenge this assumption, asking whether our scientific self-knowledge can, and should, change our views about what's right and wrong and how a society should be organized. Finally, we consider the distinctive moral challenges posed by what may be the next stage in Earth's evolutionary history: the rise of artificial intelligence. Many people believe that there is and always will be a fundamental division between human minds and machines. Here we challenge this assumption, going beyond the tropes of science fiction and drawing instead on the latest advances in cognitive neuroscience and neurally inspired artificial intelligence. Our conclusions will have implications for moral challenges of the near and more distant future: Can self-driving cars, military drones, and life-like robots be programmed to behave morally? Will artificial intelligence displace human labor? If so, how can our societies adapt? Could machines displace humans entirely? If so, how can we stay in control? If machines do take over, will they be our conquerors or our children? Across diverse topics, this course explores the implications of a single idea: that the wonder we see around us, and ahead of us, is the product of competition and cooperation at increasing levels of complexity.

Course Notes:

General Education 1049

East Asian Cinema (110464)

Jie Li

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 140

This course introduces major works, genres, and waves of East Asian cinema from the silent era to the present, including films from Mainland China, Japan, Korea, Taiwan, and Hong Kong. We will discuss issues ranging from formal aesthetics to historical representation, from local film industries to transnational audience reception.

This course does not assume prior knowledge of East Asian culture or of film studies, but rather seeks to provide students with a basic understanding of modern East Asian cultural history through cinema, and with an essential toolkit for analyzing film and media, including narrative, cinematography, editing and sound. In addition to critical approaches, students are strongly encouraged to creatively respond to course materials by collaborating on their own short films, beginning with the illustration of film terms in the first two weeks and culminating in the "Golden Monkey Awards"—a class screening of final projects with Oscar-like awards in various categories.

As a General Education course, East Asian Cinema will help students develop aesthetic responsiveness and interpretive ability to moving images in an increasingly media-saturated world. While becoming acquainted with some analytical vocabulary and critical approaches to cinema, students will also gain insights into East Asian cultures and histories, aesthetic traditions and ethical values, as well as the politics and economics that went into the films' production and reception. Above all, the course will encourage students to be creative and enterprising with the digital media technologies at our disposal, to engage in collaborative teamwork and experiment with unorthodox ways of looking at the world through amateur filmmaking.

Course Notes:

All films subtitled in English. No prior knowledge of East Asian history or film studies necessary.

Race in a Polarized America (116248)

Jennifer Hochschild

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

How do we manage issues of race, ethnicity, and immigration in a polarized political era? What role did race play in the election of President Trump, after eight years of the presidency of Barack Obama? How can we be good citizens of the world when Americans have such mixed views and take such mixed actions in engaging with racial hierarchy, identity, or interaction?

This course addresses these questions by examining policy disputes around issues such as incarceration and policing, free speech, the role of biology in ancestry and medical care, electoral politics, activism, and movement across borders. We will examine class, nationality, and gender differences within and across groups, and how group boundaries are made stronger or weaker. We will consider how to reduce unproductive polarization, and how you --the new generation of citizens of the world -- can promote a better America even, or especially, when we do not agree on just what "better" entails.

Course readings range from public speeches and interviews to works in political science, sociology, economics, and a bit of genomic science. You will learn how and where the United States has progressed in promoting group equality and fairness, as well as where it has not or has even moved backwards. You will end the course with a deeper understanding of the core American paradox of the persistence of group hierarchy in a country dedicated to democracy, equality, and liberty, and what people such as yourselves can do to resolve that paradox.

The Global Heart Disease Epidemic: Stopping What We Started (215875)

Richard Lee

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 60

Heart diseases have killed occasional humans since ancient times, but only in the past century have heart diseases become epidemic throughout the world. In fact, the first description of a heart attack in a human was not until 1912. In the current century, heart diseases will be the leading global cause of death, and the majority of those heart disease deaths will actually occur in the developing world. The epidemic of heart disease has been driven by many social, economic and technological events. Some of these events have been dramatically detrimental to human health, such as the accidental invention of the American cigarette by a slave in North Carolina in the 19th Century—an invention that is projected to kill one billion people between 2000 and 2100. Other events, such as advances in public health and safety, have been beneficial by extending lifespan and preventing early death, but they have also allowed age-related heart diseases to explode. Technological advances have improved our economic productivity but also led to changes in our lifestyles that promote heart diseases. In this course, we will consider the complex relationship of health

and society by examining the epidemic in common heart diseases. We will explore how major lifestyle factors such as tobacco, alcohol, exercise and diet affect health, and we will also consider how economics and politics powerfully influence health. We will also discuss the role of government and our obligations to each other, and to future generations.

Political Economy and Its Future (126203)

Roberto Mangabeira Unger

Dani Rodrik

2022 Spring (4 Credits) **Schedule:** M 0930 AM - 1130 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The world's economic and political order reels under mounting challenges that predate the Covid pandemic, and have deepened in its aftermath: climate change, global financial fragility, the austerity debacle, a slowdown in economic growth and productivity, the aggravation of inequality and the inadequacy of conventional responses to it, the discrediting of the Washington Consensus, the globalization backlash, the re-emergence of nationalist politics in Europe and the United States, and a contest over the meaning, value, and requirements of democracy. We examine connections among these phenomena and explore alternative ways of thinking about contemporary market economies and their reconstruction. We organize the course around four related themes: the worldwide financial and economic crisis of the recent past and its management; the effort to promote socially inclusive economic growth in richer as well as in poorer countries; the nature, fate, and dissemination of the new knowledge-intensive style of production; and the past, present, and future of globalization.

Course Notes:

Students should have some previous acquaintance with economics but no advanced economic training is required.

Jointly offered with Harvard Law School and Harvard Kennedy School.

Human Nature (202992)

Erin Hecht

Martin Surbeck

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course asks the big question: What makes us human in behavior and psychology? In what ways are we similar to other species, and in what ways are we different? What are the evolutionary origins of "human universals" like parental love, pair-bonding, war, norms, altruism, language, and tool use? At the same time, how can we account for the immense diversity we observe in behavior and psychology across time and across societies? This course will tackle these questions within a broad evolutionary framework, considering humans as subject to the same biological demands as other members of the animal kingdom. The course will draw on the latest insights and evidence from evolutionary biology, primatology, anthropology, neuroscience, economics, and psychology. We'll examine studies of non-human primates, especially chimpanzees and bonobos, and a broad breadth of human variation, based on comparative studies of hunter-gatherers, herders, agriculturalists and—the most unusual of all—people from industrialized societies. We'll also consider how cultural evolution has shaped our genetic evolution, both over our species' deep history and in more recent millennia. Along the way, we'll consider how understanding the evolutionary origins of human behavior, psychology, and culture informs how we approach contemporary issues such as patriarchy, sex differences, attraction, racism, climate change, and disease.

Poetry Without Borders (125186)

Stephanie Sandler

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Without borders, can there be poetry? The border of white paper surrounds printed poems; national boundaries keep cultural and linguistic traditions distinct; and aesthetic practice and its conventions create genres and demarcate poetry from music or dance or film. How poetry requires but also perversely challenges these limits will be the subject of this course.

The course studies the cultural practice of poetry, with an emphasis on contemporary poetry. We will examine four kinds of borders – performative, linguistic, geographic, and aesthetic. That yields four large topics: poetry in and about public places (how does poetry speak to public life, including political life? How

does poetry address experiences of trauma and harm? What ethical challenges loom large in poetic practice?); poetry and translation (what happens when poems cross languages? how to read mixed-language or macaronic poems?); poetry, confinement, and migration (what happens when poets cross geographic borders? what do they hear in a new language and, as a result, in their own? how do mixed identities and allegiances work? how have current crises around border crossings and around incarceration affected poetic practices?); and poetry and the other arts (how have the cross-influences of music, film, dance, the visual arts, and photography been felt in poetry? how do poems become visual artifacts, or scripts for performance?).

We will read, listen to, and learn from Laurie Anderson, Polina Barskova, Reginald Dwayne Betts, Joseph Brodsky, Allen Ginsberg, Eliza Griswold, Susan Howe, Jorie Graham, Idra Novey, Eugene Ostashevsky, Yang Lian, Valzhyna Mort, Vladimir Nabokov, M. NourbeSe Philip, Tracy K. Smith, Layli Long Soldier, Brian Turner, C. D. Wright, Lida Yusupova, and others.

World Health: Challenges and Opportunities (126193)

Sue J. Goldie

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 120

Extraordinary changes in the world present both risks and opportunities to health—unprecedented interconnections across borders, rapidly shifting global demographics, and changing patterns of diseases and injuries. This course will challenge your assumptions about the world's populations, as you discover surprising similarities and unexpected differences between and within countries. Approaching the concept of health as a fundamental prerequisite for building strong societies, we will explore its connection to human rights, international relations, and sustainable development. Using case examples of contemporary health challenges, we explore the influence of social, political, and environmental determinants on health, particularly transnational risks associated with globalization. We consider solutions from an array of perspectives, contributions from within and outside the health sector, and interventions at the local, national and global levels. By the end of the course, you will be equipped to thoughtfully analyze important health challenges and appreciate how evidence is contextualized and translated to policy and action.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. EST Tuesday, January 18. Brains, Identity, and Moral Agency (109360)

Steven Hyman

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 100

Advances in brain science have the potential to diminish many forms of human suffering and disability that are rooted in disordered brain function. But what are the ethical implications involved in altering the structure and function of human brains? What's at stake when we have the ability to alter a person's narrative identity, create brain-computer interfaces, and manipulate social and moral emotion? In this course, you will ask and attempt to answer these questions, and discuss the implications of mechanistic explanations of decision-making and action for widely-held concepts of moral agency and legal culpability. This course will prepare you to be a thoughtful citizen of a world characterized by rapidly emerging understandings of human brain function, and by new technologies intended to repair or influence human brains.

Course Notes:

For students who have taken MCB 80, it is contemplated that there will be a section that incorporates more advanced concepts from neurobiology.

Class Notes:

This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. EST Tuesday, January 18. The United States and China (217632)

William Kirby

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The United States and China are global economic and military powers. They have a rich history of commerce, friendship, alliance, and antagonism. Both countries have been shaped and re-shaped by the nature of their mutual relations. Their relationship is in crisis, the outcome of which will do much to define the world of the 21st century.

This University-wide course invites undergraduates and graduate students to examine together the present and future of U.S.-China relations in the light of their past. What are the enduring patterns and issues in China's relations with the United States? How have these two countries perceived each other over time? How has trade defined the relationship from the Opium War to Huawei? How has war shaped experiences in the United States and China, and what are the risks of military confrontation today? What are the prospects for cooperation on global crises such as climate change? What is the role of American and Chinese universities, such as Harvard and Tsinghua, in shaping mutual relations in a time of global pandemic?

The course emphasizes active, participant-centered discussions of major issues, texts, and contemporary events, and will engage with Harvard Business School cases, experts on the U.S.-China relationship, and the rich resources of Harvard's schools and the Harvard Center Shanghai. In their final project, students, working in groups, will address a central challenge in the Chinese-American relationship and propose a solution.

Life as a Planetary Phenomenon (120881)

Dimitar Sasselov

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 100

What is it about Earth that enables life to thrive? This question was reinvigorated with the 2016 ground-breaking discovery of a habitable planet around the nearest star, Proxima Centauri. A decade of exploration confirmed that such planets are common in our galaxy, and the commonality of habitable planets has raised anew some age-old questions: Where do we come from? What is it to be human? Where are we going? Are we alone in the universe? And last, but not least, what are the dangers of becoming a multi-planet species? Life and planets are intricately linked through geological processes, chemistry, and ultimately, biology, all of which you will explore in this course as we endeavor to answer questions about our place on this planet and beyond. You will gain knowledge of some natural sciences fundamentals while exploring current issues in biotechnology and space exploration technology. This course aims to equip you with both a conceptual understanding of Earth and its place in the universe as well as the quantitative reasoning to think critically about it. Hands-on experiences are central to accomplishing these objectives.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 18. The Gen Ed lottery will run Wednesday, January 19 with approvals and denials sent out no later than 11:59 p.m. that day. African Spirituality and the Challenges of Modern Times (212849)

Jacob Olupona

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Taking the Marvel blockbuster *Black Panther* as a starting point, the course will explore the African spiritual heritage both on the continent and the diaspora communities (Black Atlantic diasporas). We will begin by spelling out the features of African indigenous religious traditions: cosmology, cosmogony, mythology, ritual practices, divination, healing ceremonies, sacred kingship, etc. We will then explore how these traditions have traveled across the oceans to the new world and how they have contributed to the emergence of new forms of black identities in Brazil, the Caribbean, the USA, and more. This class will equally look at African religious encounters with Islam and Christianity on the continent, resulting in what we often call "Africa's Triple Heritage." It then considers African religious sensibilities in the contemporary period, as they relate to the issues of modernity, economic and social development, ethnic and cultural identities, class, and community relations. Finally, we will look at the status of African religion as a global tradition, not necessarily in competition with other religious traditions, but in its relationship to other world religions.

Class Notes: **This will host a live course preview and Q&A session via Zoom at 11 a. m. EDT Tuesday, August 24. Please see the course Canvas site for Zoom link and more information.**

The Ancient Greek Hero (113501)

Gregory Nagy

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How to face death? Concentrating on this central human question, we will explore some of the greatest works of ancient Greek literature (in English translation). For the Greeks, a special way to address the

problem of death was to think long and hard about what they called heroes in their myths. Our purpose in this course is to extend that kind of thinking to the present. Assignments invite you to engage in personal reflections on the meaning of life and death in the light of what we read in Greek literature about the ordeals of becoming a hero.

Class Notes: **This course will host a live course preview and Q&A session via Zoom at 4 p.m. EDT Wednesday, August 25. Please see the course Canvas site for Zoom link and more information.**

Why is There No Cure for Health? (125932)

David Cutler

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Around the world, billions of dollars are spent on health care treatments, public health initiatives, and pharmaceutical research and development. So why are we still not able to prevent preventable diseases, provide affordable healthcare for millions of people, and deliver cures for curable diseases? And what are the best ways to address these issues?

Because these questions are so large, we will focus our discussion around questions like: What steps should be taken to address epidemics? How should the United States reform its health care system? And how should prescription drugs be produced and sold?

We will explore how social scientists address empirical questions, the types of data that are available, how those data are analyzed, and the confidence with which causal statements are made. By the end of the course, you will be able to dissect a large question—such as how to reform American healthcare—into its technological, social, economic, and moral components, and weigh potential solutions according to these guiding vectors.

How Music Works: Engineering the Acoustical World (205412)

Robert Wood

2021 Fall (4 Credits) **Schedule:** MW 1245 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 100

How does Shazam know what song is playing? Why do some rooms have better acoustics than others? How and why do singers harmonize? Do high-end musical instruments sound better than cheap ones? How do electronic synthesizers work? What processes are common in designing a device and composing a piece of music? How is music stored and manipulated in a digital form? This class explores these and related themes in an accessible way for all concentrators, regardless of technical background. The class is driven by hands-on projects to enhance your technical literacy, a critical skill for anyone designing solutions to today's most pressing and complex issues. The projects are designed so that the creativity of students in all fields will have a role to play. Lectures, demonstrations, and guest lecturers/performers are integrated into the class to build foundational knowledge and to inspire. We will also explore wider social and historical themes related to music and acoustics. The class is approached from an engineering perspective, using music and musical instruments as the framework to introduce a broad array of concepts in physics, mathematics, and engineering. Requires no previous exposure to physics or calculus beyond the high school level.

The Celts: People or Construct? (212846)

Catherine McKenna

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

We are exposed every day to terms referring to ethnic groups, and we tend to accept these terms uncritically, assuming that we know what they mean and to whom they refer. These labels help to shape our sense of ourselves, of others, and of ourselves in relation to others. Yet the ethnic identities associated with such terms are in fact ambiguous and malleable, constructed of a shifting array of elements, including genetics, shared history, language, religion, economy, political institutions, music, architecture, and foodways. Ethnic descriptors encode attributes, either positive or negative, with which people want to

associate themselves or others. So, in order to understand the claims implicit in the use of an ethnic label, we need to evaluate the bases for assigning it and who allows a people the identity they claim for themselves.

This course takes as a case study the idea of the "Celt," a term thrown around so freely that it sometimes seems to be as much a brand as an ethnonym. In our readings and a series of hands on exercises, we explore the ways in which the history, languages, material culture, and cultural mythology of Celtic peoples are used both to construct and to deconstruct Celtic identity. Then we examine the cultural and political forces that have motivated these constructions and deconstructions.

Studying what "Celt" has meant over the course of the past 2500 years, you will develop tools for analyzing the bases of ethnicity claimed by a people or attributed to them by others. And by examining the ways in which the name "Celt" has been both adopted as a badge of honor and assigned as a way of dismissing conquered peoples, you will better understand the ways in which ethnic labels manipulate attitudes toward the groups with which they are associated.

Permanent Impermanence: Why Buddhists Build Monuments (207917)

Jinah Kim

Eugene Wang

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Everything changes. This is, in its simplest and most fundamental formulation, one of the essential teachings of Buddhism. Buddhist communities throughout history have preached, practiced, and written about the ephemerality and illusoriness of our everyday lives and experiences. Ironically, however, many of these same communities have attempted to express these teachings in the form of monumental structures meant to stand the test of time. Some of the world's greatest cultural heritage sites are a legacy of this seeming contradiction between the impermanence that is a central presupposition of Buddhist thought and the permanence to which these same monuments seem to aspire. If the world is characterized by emptiness and the Self is illusory, how does one account for the prodigious volume of art and architecture created by Buddhists throughout history? This Gen Ed course takes a multicultural and reflective engagement with the challenges presented by this conundrum through a study of Buddhist sites scattered throughout time and space. Pertinent topics such as cosmology, pilgrimage, materiality, relics, meditation, and world-making will be explored. Through these Buddhist monuments in South and Southeast Asia, the Himalayas, Central Asia, China, Korea, and Japan, students will learn about the rich, diverse world of Buddhist practice and experience.

The First Nine Months (212874)

David Haig

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

What makes a human? A baby develops from a single cell during the nine months of gestation, but the process that begins so simply has complications that stretch beyond the womb into questions of human identity and individuality. This course will explore the process of embryonic and fetal development, highlighting complicated questions such as the medical dilemma of maternal-fetal conflict, which occurs when doctors must evaluate the competing health needs of both fetus and mother. You will study disorders of pregnancy such as gestational diabetes and preeclampsia, as well as types of nonstandard fetal development, like monozygotic twins or microchimerism, that result in human diversity. The course will also consider the kinds of families made possible by ovum donation, sperm donation, surrogate pregnancies, and the like, as well as the questions of bioethics raised by such assistive reproductive technologies.

Energy Resources and the Environment (156316)

John Shaw

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This is a revolutionary time of change regarding how we produce and utilize energy around the world. How will we provide enough energy to support our growing global economy while protecting our environment? This class examines the full life cycle of each energy resource, including where it comes from geologically, how we acquire it, the way it is used in our economies, and the environmental impacts of these activities. We will run the gamut from conventional to emerging sources of energy: coal, petroleum, geothermal and nuclear systems, as well as renewable energy options. By the end of this course, you will be familiar with the materials, tools and methods used in modern energy industries. You will be able to understand the ways in which we currently produce usable energy, and their effect on our environment. These insights into current practices, combined with an assessment of future trends in technology and energy demand, will help you to become a citizen who understands and can therefore help shape our energy systems, and preserve our environment in the face of expanding human development.

Multisensory Religion: Rethinking Islam (125190)

Ali Asani

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

One need only walk into a church, a mosque, a temple, a synagogue or any place of worship to experience the beauty and aesthetic power of religion. For millions of people around the world, understanding of religion is forged through personal experiences, often embedded in the sound, visual, and literary arts. What does it mean to call some art "religious"? How can interpreting an individual believer's engagement with the arts help us see "religion" in a new light?

Using Islam as a case study, this course explores the multifaceted relationship between religion and the arts. We will learn to listen, see, and experience Islam by studying Muslims' engagement with the literary arts (scriptures, panegyrics, love lyrics, epic romances, folk songs, and folk tales), as well as sound and visual arts (Quran and poetic recitations, music, dance, drama, architecture, calligraphy, and miniature painting). Weaving the voices of poets, writers and musicians with those of clerics, mystics and politicians, we will consider how the arts create a religious tradition and shape the worldviews of Muslim communities around the world.

Given the cultural diversity of Muslim societies, the course draws on material from regions beyond the Middle East, particularly sub-Saharan Africa and South and Southeast Asia. This course assumes no prior knowledge of Islam.

The Crusades and the Making of East and West (212838)

Dimiter Angelov

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 60

The course explores the birth of the civilizational categories of East and West during the era of the Crusades, one of the most significant and deeply symbolic events in human history. A series of wars in the Middle Ages fought between Latin Christians and the perceived enemies of Christendom, the Crusades saw the first experiments of European colonization, the rise of Western commercial capitalism, and the emergence of new cultural identities and boundaries across Europe and the Mediterranean. Students will learn about the origins of the Crusades, the most important expeditions, and the long-term consequences. This course is about the Crusades both in history and in memory, about communities in war and peace, and about stories and memories that have endured to the present day.

The Border: Race, Politics, and Health in Modern Mexico (204416)

Gabriela Soto Laveaga

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Why does the Mexico-U.S. border continue to be a space for debate and controversy? This course examines how the creation of the U.S.-Mexico border in 1848 shaped modern Mexican society from the nineteenth century to our present. For many, the border served (and serves) as a protective barrier from poverty, violence, and, especially, disease. By the early twentieth century many Mexican bodies were perceived as "alien," "illegal," and in need of patrolling. Yet these descriptions were also used by Mexican politicians to describe and isolate groups such as Indigenous and Chinese within Mexico. By examining, for example, Mexican public health campaigns, response to epidemics, and how Mexican ideas of race and health played out within Mexico we can better understand the U.S.-Mexico border today.

Classical Chinese Ethical and Political Theory (121778)

Michael J. Puett

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

What is the best way to live a fuller and more ethical life? Concretely what should we do to begin to live in a more flourishing and inspiring way? Questions such as these were at the heart of philosophical debates in China. The answers that classical Chinese thinkers developed in response to these questions are among the most powerful in human history. Regardless of whether one agrees with them or not, they should be studied and taken seriously by anyone who cares about ethics, politics, and the ways to live life more fully.

Theda Skocpol

Mary Waters

2021 Fall (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In a period of contentious politics, Americans are debating fundamental issues about economic wellbeing and social justice. How can the nation expand opportunity and security for workers and families following years of rising socioeconomic inequalities and shifts in the relationship of families to work? How do we regulate immigration and citizenship and cope with surges in refugees and asylum seekers? How have ongoing partisan polarization and rising economic inequalities influenced U.S. responses to the current COVID-19 pandemic and the accompanying economic crisis? Controversies in these areas are bitter and persistent, and this course will introduce students to the ways the United States has dealt with each of set of challenges.

Who Lives, Who Dies, Who Cares? Reimagining Global Health (124127)

Arthur Kleinman

Salmaan Keshavjee

Anne Becker

Paul Farmer

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

If you are sick or hurt, whether you live or die depends not only on biological factors, but social ones: who you are and where you are, what sort of healthcare system is available to help you survive, and what kind of care is available to help you recover, if society believes you deserve it. The global coronavirus pandemic illustrates with dramatic urgency the role social forces play in patterning health inequities and determining

individual fates. The vulnerabilities of those most likely to get sick and to die from Covid-19 stem from the ongoing effects of systemic racism on racialized subjects, the devaluation of eldercare and precarity of low-paid work under neoliberal forms of governance, and enduring material effects of colonial-era power structures that render health care systems dangerously weak or inaccessible for many communities. Now, as ever, it is imperative to develop frameworks and methodologies to identify and to intervene effectively in harmful social configurations that cause illness and suffering.

Most medical research narrowly focuses on the biological basis of disease, but this course takes a novel biosocial approach to reveal how governments, institutions, and histories shape health and well-being, how poverty and racism get into someone's lymph nodes, how cost- saving measures manifest as tuberculosis in someone's lungs. In doing so, the course challenges conventional assumptions within the field of global health—examining how interventions influence what happens after a catastrophe in unexpected ways, how the persistence of health inequalities over centuries can be explained, how the structures of powerful institutions influence the policies they develop, how the poor deserve not only health care but high quality health care, and how caregiving and global health are urgent moral practices.

Confronting Climate Change: A Foundation in Science, Technology and Policy (126633)

Daniel Schrag

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will consider the challenge of climate change and what to do about it. Students will be introduced to the basic science of climate change, including the radiation budget of the Earth, the carbon cycle, and the physics and chemistry of the oceans and atmosphere. We will look at reconstructions of climate change through Earth history to provide a context for thinking about present and future changes. We will take a critical look at climate models used to predict climate change in the future, and discuss their strengths and weaknesses, evaluating which forecasts of climate change impacts are robust, and which are more speculative. We will spend particular time discussing sea level rise and extreme weather (including hurricanes, heat waves, and floods). We will look at the complex interactions between climate and human society, including climate impacts on agriculture and the relationship between climate change, migration and conflict. We will also discuss strategies for adapting to climate change impacts, and the implications of those strategies for sub-national and international equity.

The last half of the class will consider what to do about climate change. First, we will review the recent history of greenhouse gas emissions, as well as various national and international efforts to limit them in the future. We will discuss reducing carbon emissions using forestry, agriculture and land use, and then focus on how to transform the world's energy system to eliminate CO2 emissions. We will conclude by examining different strategies for accelerating changes in our energy systems to limit greenhouse gas

emissions.

The course is intended as a foundational course on climate change for students from around the university, preparing them for more specialized courses in their individual concentrations or degree programs. No prerequisites are required; students will be encouraged to apply their different preparations and interests to the various individual and group assignments. The course emphasizes the scientific and technological aspects of climate change (including the clean energy transition), but in the context of current issues in public policy, business, design and public health.

Tradition, Performance, and Culture (125216)

Stephen Mitchell

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

What is culture, and how does it shape us? This class explores how folklore (a broad term meant to include all aspects of tradition, custom, and heritage) and its expressive manifestations shape national, regional, and ethnic identities. In particular, we examine the function of folklore within the communities that have, perform and use these cultural goods, as well as the ways traditions are expressed and performed in daily life. In this course, you will study major forms of folklore (e.g., myths, legends, beliefs, rituals, festivals), as well as the theoretical approaches (e.g., performance theory, the ethnography of communication) used to interpret cultural documents drawn from the world of traditional expression and ritualized behavior.

Natural Disasters (112430)

Brendan Meade

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 60

From Mexico to India, San Francisco to Tokyo, natural disasters have shaped both the surface of our planet and the development of civilizations. These catastrophes claim thousands of lives and cause tens of billions of dollars in damage each year, and the impact of natural disasters is only increasing as a result of human population growth and urbanization. This course uses the methods and skills associated with earth science to help you to develop an understanding of both the causes and impacts of these events. Readings will be assigned from the textbook *Natural Disasters* by Patrick Abbott (11th edition), to deliver the scientific content - recorded lectures will be available throughout the course, and live lectures and discussion sessions will be held each week to address any difficulties with the material, to facilitate discussion, and to provide an opportunity for interacting with fellow students and the teaching staff. By the end of this course, you will be able to understand the ways in which societies can systematically anticipate and prepare for the kinds of natural disasters which many people have come to assume are inevitable.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, August 24, 2021. Pyramid Schemes: What Can Ancient Egyptian Civilization Teach Us? (126641)

Peter Manuelian

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How much of your impression of the ancient world was put there by Hollywood, music videos, or orientalist musings out of the West? How accurate are these depictions? Does it matter? This course examines the quintessential example of the "exotic, mysterious ancient world" – Ancient Egypt – to interrogate these questions. Who has "used" ancient Egypt as a construct, and to what purpose? Did you know that pyramids, mummies, King Tut, and Cleopatra represent just the (overhyped) tip of a very rich civilization that holds plenty of life lessons for today? Combine the ancient Egyptians' explanations of the world's natural forces with all the social complexity of human interaction and you have a fully formed society—about four millennia of accumulated experience! Can investigating the "real" ancient Egypt unpack our current misconceptions about the land of the pharaohs? Hardly morose, tomb-building "zombies," the Egyptians embraced life in all its messy details. Piety and corruption, imperialism and isolationism, divinity and mortality all played significant roles in life along the Nile. What can we learn about the nature of politics and society in our time by seeing the parallels between the ancient past and today? We will explore archaeology, modern Egyptomania, repatriation, new digital visualization technologies, and international

politics. What was ancient Egyptian racism? What is modern archaeological racism? Who owns the past? Who needs it? We will take excursions into Egyptian art, history, politics, religion, literature and language (hieroglyphs), plus the evolution of Egyptology as a discipline. (Most likely virtual) field trips to the Museum of Fine Arts, Boston, the Peabody Museum, and the Harvard Museum of the Ancient Near East (formerly Harvard Semitic Museum) are included, along with the famous Giza Pyramids in 3D. Students will gain a transformative appreciation for the outstanding monuments and intellectual traditions of ancient Egypt. And with newly broadened horizons, we will debunk many popular myths.

The Two Koreas in the Modern World (116999)

Carter Eckert

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

How and why did there come to be two competing and adversarial states on the Korean peninsula in our contemporary world, one a prosperous capitalist democracy of global reach, and the other an impoverished dictatorship, bordering on theocracy and almost totally estranged from the international community—both claiming exclusive rights to speak for the Korean people and the Korean "nation" as a whole? In this course, we will explore not only the two contemporary Korean societies, North and South, but also to Korea's pre-modern and colonial periods, and to explore together the roles played by China, Japan, the United States, and Russia (Soviet Union) in shaping modern Korean history. We will look beyond the headlines to come to a more complex and nuanced understanding of the conflict on the Korean peninsula as one grounded in the history and legacies of the past hundred years. By showing the tumultuous changes, some good, some ill, on the Korean peninsula since the late 19th century, the course challenges us to confront the constantly shifting nature of historical forces, and to examine the ethical dimensions of particular historical choices. Readings will include primary source materials from each period, and assignments will culminate in a research paper or other capstone project that engages with the individual actors, historical forces, and global politics that have shaped the two Koreas.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 18. Science and Cooking: From Haute Cuisine to Soft Matter Science (126638)

Pia Sorensen

David Weitz

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Food and cooking are part of your everyday life. Whether you are a skilled chef or a home-cook, what you do in the kitchen is deeply rooted in science. This class brings together top chefs and Harvard scientists to explore how everyday cooking and haute cuisine can illuminate basic principles in physics and chemistry. Throughout the semester you will watch as chefs reveal the secrets behind some of their most famous culinary creations. Inspired by such cooking mastery, we will then explore the science behind the recipes. Students will gain a solid understanding of the properties and fundamental behaviors of soft matter materials. All food is made of soft materials, and cooking relies on many of their fundamental properties. Topics will include: emulsions, illustrated by aioli; elasticity, exemplified by the done-ness of a steak; and diffusion, revealed by the phenomenon of spherification, the culinary technique pioneered by Ferran Adria. The course includes laboratory work where students develop their skills as experimental scientists. Other assignments include weekly homeworks, in-class exercises, and a final project where students explore the science of a culinary topic of their choosing.

Course Notes:

Occasionally there will be an optional 15-30 minute question and answer session with visiting chefs.

Can We Know Our Past? (112378)

Rowan Flad

Jason Ur

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 240

What happened in the past? How do you know? Even though today we take great pains to document every major event that occurs, more than 99% of human history is not written down. How, then, can we determine with any certainty what people did, let alone thought about, hundreds, thousands, and even millions of years ago? This course addresses these and other fundamental questions: Can we ever really know what happened in the past? If the past is "dead and gone," how do we know what we (think we) know about it? And what is our degree of certainty about the past societies and cultures that historians, archaeologists and others study today? Through hands-on interaction with artifacts, experiments and other analytical methods you will consider how these approaches relate to different "stakeholders" – groups of people whose understanding of themselves is rooted in a connection to history. By the end of this course, you will have a sense of how your knowledge of the seemingly-distant past is, in fact, intimately tied to your

experiences in the contemporary world.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my. harvard by 11:59 p.m. Tuesday, August 24, 2021. The Gen Ed lottery will run Wednesday, August 25 with approvals and denials sent out no later than 11:59 p.m. that day. Visit https://gened.fas.harvard.edu/fall-2021 for more information and step-by-step instructions.**

Classical Mythology: Myth in Antiquity and Today (126004)

Brigitte Libby

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The myths of ancient Greece and Rome embody both our worst nightmares and our most fabulous fantasies. Heroism, happy endings, and everlasting love blend with disturbing themes of parricide, cannibalism, incest, misogyny, and unthinkable violence. The resulting stories have fascinated generations of artists, writers, and thinkers, and this course will serve as an introduction to this distant but strangely familiar world. We will move from the very first works of Greek literature through the classic Greek tragedies and the Roman tales in Ovid's Metamorphoses. Along the way, we will ask these fundamental questions: What is "mythology"? What can these ancient stories tell us about ourselves as human-beings, and why are they still so resonant thousands of years later? And how does mythology both ancient and modern continue to reflect and shape our world view today? We will use examples from classical mythology to see how a society can re-remember and revise traditional stories to fit changing cultural circumstances and political ideologies. Our discussions will consider ancient rationalizations of myth, psychoanalytic approaches to myth, the use of myth in politics, and the reception of classical myth in the modern world.

Popular Culture and Modern China (218236)

David Wang

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course examines "popular culture" as a modern, transnational phenomenon and explores its manifestation in Chinese communities (in People's Republic of China, Taiwan, Hong Kong, Southeast Asia and North America) and beyond. From pulp fiction to film, from "Yellow Music" to "Model Theater", from animations to internet games, the course looks into how China became modern by participating in the global circulation of media forms, and how China helps in her own way enrich the theory and practice of "popular culture."

Painting's Doubt: A Studio Course (212855)

Matt Saunders

2022 Spring (4 Credits) **Schedule:** W 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 72

Painting is an engagement between the self and the world. It is a practice of embodied making, and, as a language outside of words, can think around conditioned understanding. This introductory studio art course proposes learning to paint as a new experience of relating to the world, and through painting we will investigate not only what we have to say, but what we have to see.

Studio assignments in small sections are complemented by weekly lectures, visiting artist presentations, readings and visits to Harvard's collections. The primary materials for this course will be oil on canvas, with some excursions into drawing and work on a paper. No experience is necessary, except a willingness to make a mess.

Class Notes:

Studio sections will be scheduled for W 9am-1pm, Th 9am-1pm, F 9am-1pm, W 3-7pm, Th 3-7pm, or F 3-7pm. You must be able to attend one of these sessions to enroll in the course. If you are granted permission to enroll, you will be able to select your section based on a first-come, first-served process at the time of enrollment.

This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 18. The Gen Ed lottery will run Wednesday, January 19 with approvals and denials sent out no later than 11:59 p.m. that day. Human Trafficking, Slavery and Abolition in the Modern World (214486)

Orlando Patterson

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

We often think of slavery as being a dark chapter in our past, but this is a tragic oversimplification. What defines slavery in the modern world, and what are the moral, political and social implications of its continued existence? As we explore its underpinnings, we discover that all of us may be in some way complicit in its survival. This course surveys the nature, types and extent of modern servitude such as transnational and domestic prostitution, forced marriage, labor trafficking and forced domestic labor, child soldiering and other forms of enslavement of children, organ trafficking and other health aspects of trafficking, debt-bondage, and the forced exploitation of other vulnerable groups such as refugees and stateless persons. Throughout the course, but especially in the final part, we examine anti-trafficking and anti-slavery measures and movements and ways in which you can increase awareness or become involved. You will, by the end of our exploration, be able to trace the moral and ethical arguments surrounding human slavery in its various forms, understand the ways in which this problem still affects so many people, and what can and should be done about it.

Medical Ethics and History (108405)

David Shumway Jones

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Students will encounter the ethical dilemmas of medical practice throughout their lives, whether with their own health, or with the health their families and friends. This course will equip them with the tools of moral philosophy so that they can recognize, critique, and craft arguments grounded in appeals to utilitarianism, deontology, or rights. But the course will focus on historical analysis of the debates so that students understand how social, economic, and political contexts have influenced moral reasoning. By clarifying their own thinking in the classroom, students will be better equipped to engage in the debates and contribute to the ongoing efforts by medicine to relieve human suffering.

Class Notes: **This course will host a live course preview and Q&A session via Zoom at 2 p.m. EDT on Wednesday, August 25. The topic: Given that Harvard requires everyone on campus to be vaccinated (with just a few exceptions), is the mask mandate really justified? What is the mix of science, politics, and ethics behind this question? Join us for an informal discussion and debate of campus mask mandates, the ethical arguments for and against, and their historical precedents. This conversation should provide a good introduction to the course and its approach to dilemmas in medical ethics and health policy. Please see the course Canvas site for Zoom link and more information.**

The Holocaust (212918)

Kevin Madigan

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Who is responsible for genocide? Through the lens of the Holocaust – perhaps the most-studied genocide of the modern era – we will grapple with the issues of good and evil, blame and responsibility, duty and dissent as they pertain to violence enacted at the personal and state levels. What is the responsibility of "citizens and citizen leaders" in the face of local and global crises brought on by genocide, refugee catastrophes, terror, neo-fascism, etc.? And how do we make meaning out of what seems senseless? The course will address the historical background and context of the Holocaust, competing theories about who was responsible and why, and representations of the Holocaust in film and literature.

Course Notes:

This course is open to undergraduate students only.

Law, Politics, and Trade Policy: Lessons from East Asia (212842)

Christina Davis

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How do states balance the challenges and opportunities of international markets? Importing ideas and resources while exporting manufactured goods underlies the East Asian growth miracle but also builds conflict with other governments. This course examines the transformative role of trade policy for Japan, Korea, and China. From the "unequal treaties" of the nineteenth century to the World Trade Organization today, trade law binds the interactions between East Asia and the world. Japan grew from an isolated samurai nation to a leading economic power but now confronts stagnating growth. Korea relied on business conglomerates for rapid industrialization and embraced liberalization to steer its way out of financial crisis. China turned to the WTO to anchor domestic economic reforms but now faces U.S. resistance to its export dominance. East Asia offers models of the success and problems that accompany globalization.

The Political Economy of Globalization (107821)

Robert Lawrence

Lawrence H. Summers

2021 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Why is populism becoming pervasive - and is there a revolt against global integration? What is the right balance between national sovereignty and international integration? Is the US equipped to sustain its role as a global leader? How does international trade affect prosperity and inequality? Should we regulate multi-national companies who move their factories to countries with lower labor standards? How should the IMF respond to financial crises in Europe and the developing world? How will the rise of China change the world system? This course uses basic economic logic to illuminate the choices - and trade-offs - faced by governments, international institutions, businesses and citizens as the global economy evolves. Our course is based on the premise that passion without careful reason is dangerous and that reliance on solid analytics and rigorous empirical evidence will lead to a better world. Policy issues are debated in class by the professors and guest speakers, and students will participate in simulated negotiations on global pandemic preparedness and on the US-China economic relationship, experiencing the issues first hand, as well as illustrating the importance of decisions made by individual actors for the evolution of the global system.

Class Notes: **This course will host a live course preview and Q&A session via Zoom at noon EDT Thursday, August 26. Please see the course Canvas site for Zoom link and more information.**

Economic Justice (159809)

Mathias Risse

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Which is more just: capitalism or socialism? And how does that question intersect with racial justice? Capitalism has long reigned as the ideological solution to organizing society, but it is also clear that the pursuit of seemingly boundless material gain for some comes at the expense of others. The US and other countries have seen growing discontent around an ever-widening gap between rich and poor, and around the racial dimensions of that situation. Socialism addresses this wealth gap, but has a complex relationship with racial justice, and has had a checkered past around the world. So what is the answer? In this course, you will reflect on social justice in industrial societies over the last 250 years and grapple with potential answers to questions of economic justice, covering classics in the field while also paying special attention to often neglected African-American thinkers.

The Social Responsibilities of Universities (212853)

Julie Reuben

2022 Spring (4 Credits) **Schedule:** W 0900 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

What do universities owe society? Since their origins, universities have been granted special privileges because they have been understood to contribute to social welfare. Do these privileges incur corresponding obligations on universities? Should they influence how universities educate their students or create, share and preserve knowledge or conduct their internal affairs? Given that universities have a significant impact on society, what principles should guide their activities to ensure that they serve the public good? While universities have been expected to serve society, they also espouse values, such as academic freedom, institutional autonomy, and neutrality, that some see as antithetical to social engagement. The image of the ivory tower, remote and removed from society, captures this vision of the university. As a result, there has been tension about how universities can both serve society and remain true to these core values. Together we will explore how universities' social responsibilities are debated and enacted in the context of American higher education.

Artificial & Natural Intelligence (215896)

Venkatesh Murthy

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

What is intelligence? An inquiry into the nature of intelligence can take different forms – philosophical, biological, mathematical or technological. In this course, we will use machine intelligence (everything from voice recognizing smartphones to game-playing computers) as a handle to think about natural intelligence (brains and behavior of animals). Although we will start with big, general questions, we will quickly move to concrete queries about brains and computers. This approach, rather than just starting with brains of animals, may be useful in framing more universal questions independent of the specific architecture of brains of animals. As machines increasingly perform tasks that were once thought to be solely in the domain of humans, there is an urgent need for discussions of the moral and societal implications of artificial intelligence. This course targets students interested in brains and computers in equal measure, are comfortable discussing ethical concerns.

Race and Caste (218235)

Ajantha Subramanian

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Race and caste are two of the most enduring forms of social stratification. While their histories date well before the advent of political democracy, they have taken on new forms in the context of democratic social transformation and capitalist development. In this course, we will grapple with the meanings, uses, and politics of race and caste historically and in the contemporary moment. Drawing on mid-20th century sociological debates on race and caste as comparative categories, empirical work in history and anthropology that traces the legacies of imperialism and capitalism in shaping race and caste, and insights from anti-racist and anti-caste social movements, this course considers the intersections of (and divergences between) the two forms of stratification. What does thinking race and caste together illuminate about the nature of ascriptive identity and inequality today?

Power and Civilization: China (142451)

William Kirby

Peter K. Bol

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In China today we see a new country built on the bedrock of an ancient civilization. China's re-emergence as a global economic power and political model has deep roots. From Rome to the Romanovs, from Byzantium to the Ottomans, on to the global empires of the West, all the great multiethnic empires of the world have come and gone, while a unitary, multi-national, Chinese empire has endured. The ancient Chinese ideal of a single, unified civilized world has had consequences. It was, and still is, a grand vision: all peoples unified under a single ruler and an integrated social order that finds a place for every person in security and harmony. It created the first centralized bureaucratic state; it institutionalized meritocracy; its

economy became the world's greatest market; its philosophies provided models of humane governance; its inventions spread across the globe. And yet in practice it has also been a story of conflict and control, of warring states and competing peoples. We will discuss how the choices China has made in the past bear on the challenges it faces today, when a modern "China model," with ancient roots, competes with the United States for global leadership.

Class Notes: **This course will host a live introduction to the format and content of the course and Q&A session via Zoom at 10 a.m. EDT on Thursday, August 26. The teaching staff welcome any questions about the material covered in the class, the teaching style and requirements, or about the idea of discovering contemporary China through its past. Consent (108115)

Elaine Scarry

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Consent will be studied in four domains: Part I-the relation of consent and the body in marriage, in medicine, and in state citizenship; Part II – the act of consent and dissent in war (beginning with the dissent of Achilles in the Iliad and including readings up to the present); Part III – freedom of movement, freedom of entry and exit in citizenship (including contexts where right of movement has been denied); Part IV – consent as the basis of cultural creation. The nature of individual and collective deliberation is at the center of the course throughout. Readings include: philosophic accounts of consent (Plato, Locke, Rousseau), case law (Plessy v. Ferguson, Pratt v. Davis, Schloendorff v. Society of New York Hospital), constitutional writings (Federalist Papers 4, 7, 8, 23, 25, 27-29, 41; Madison's Record of Federal Assembly; Ratification Debates), plays (Euripides' Hecabe, Sophocles' Philoctetes, five U.S. suffrage plays), poetry (Iliad), films (Philadelphia Story, It Happened One Night), novels (Tale of Two Cities), and historical narratives (Thucydides selections, Underground Railroad narratives).

Borders (215894)

Mary Lewis

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 60

As a society, we pay particular attention to borders when incidents such as children separated from their asylum-seeking parents or tear-gas being used to deter entry throw the legal divide between two nation states into sharp relief. But seldom do we stop to think about what a border is, or when and why some borders are defended more aggressively than others.

This course looks at the modern history of borders, broadly construed, from national boundaries between sovereign countries, to supranational agreements such as the European Union. It considers how borders are erected and dissolved, both legally and materially. And it queries the legal, diplomatic, social, and ethical considerations that ensue from drawing a line between one side and another, and defending that line. We will also consider how actors within societies create internal (often racialized) boundary lines such as "gated communities" or "redlined zones," that are sometimes extra-legal or even illegal, but have profound effects on the everyday lives of individuals and groups.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 18. The Gen Ed lottery will run Wednesday, January 19 with approvals and denials sent out no later than 11:59 p.m. that day. Dark Satanic Mills: How the Factory Made Our World (215897)

Victor Seow

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 105

From spam to smart phones, much of the stuff we consume in our daily lives are factory-made. In the process of producing for our endless needs and wants, the factory has mobilized and motivated some of the latest advances in science and technology, defined and redefined the nature of work, and, through its polluting presence, pushed against the limits of our planetary boundaries. As such, it is implicated in nothing less than the making and unmaking of our modern world. This course examines the rise and transformation of the factory in global history, from cotton spinning mills in eighteenth-century England to robotics manufacturing plants in China today. Along the way, we will explore how innovations such as electrification, the assembly line, and computer numerical control shaped and were shaped by the dynamics between labor and management and by other forces of production.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.**

Global Japanese Cinema (159550)

Alexander Zahlten

2021 Fall (4 Credits) **Schedule:** M 0900 AM - 1100 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Global Japanese Cinema introduces some of the masterworks from the rich history of Japanese cinema as a way of exploring the global language of film. Participants will learn how to analyze moving images and the ways they influence us – a basic media literacy that we all need for life in a media- saturated society. Additionally we will learn how culture, in this case moving images, flows across the globe and transforms its meaning in site-specific ways. We will see how Japanese cinema's use of slow motion entered the American gangster film, or how samurai films helped create the Italian "Spaghetti Westerns", and many other examples. How do moving images constantly nudge us into a specific worldview, and how does the global circulation of these media subtly shift those nudges in unexpected ways? What does it mean that we nonetheless share a common media memory despite living in very different parts of the world? Join the course and explore how moving image culture functions in a networked, media saturated world!

Course Notes:

Japanese language skills are not required.

American Food: A Global History (126205)

Joyce Chaplin

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Food has been central to American history, from Indigenous domestication of maize (now the world's most common food staple) to European invasion in search of spices, and from the starving time in early Virginia to debates about fatness and health in the United States today. But what--if anything--is American about American food? What does food tell us about the American past and what might that past indicate about food today? How have food and eating changed over time? How have individual food choices and national food policies connected Americans to the larger world, both the social or political worlds of other human beings and the natural world of all other living beings? Readings will include primary (raw) and secondary (cooked) sources, and assignments will include two short papers, a mid-term exam, and either a final exam or an individual research paper or project.

Water and the Environment (213406)

Kaighin McColl

2022 Spring (4 Credits) **Schedule:** MW 0430 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

What do landslides in Brazil, droughts in California, mass migration in Syria and the collapse of Mayan civilization all have in common? Water. This course introduces students to the terrestrial water cycle: how it works, how humans manipulate it, and how it manipulates us. Students will learn about the major components of the terrestrial water cycle, including precipitation, evapotranspiration, runoff and streamflow, and saturated and unsaturated subsurface flow. We will also learn about the causes and consequences of natural hazards associated with the water cycle -- including floods, landslides and droughts – and examine several case studies, with a focus on human impacts. The course will consider how the water cycle has contributed to the demise of past civilizations, and explore implications for modern society in a warming world.

Class Notes: **This course has an enrollment cap, so to be considered, you must request permission to enroll and rank your choices through my.harvard by 11:59 p.m. Tuesday, January 18. American Capitalism (125496)

Sven Beckert

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How did capitalism emerge, expand and transform daily life in North America over the past 500 years? In this course, students will gain an in-depth understanding of how North America turned from a minor outpost of the Atlantic economy into the powerhouse of the world economy, how Americans built a capitalist economy and how that capitalism, in turn, changed every aspect of their lives. In the process, they will come to understand how contemporary capitalism is the result of centuries of human engagement, struggle, and aspirations. Topics range from the structure of Native-American economies to the economic consequences of the Civil War; from the impact of capitalism on gender relations to the changing structures of American businesses; and from the position of the United States in the world economy to the role of the government in channeling economic development. Boston merchants and Georgia sharecroppers, enslaved cotton growers and reforming statesmen, workers at the Ford assembly line and Silicon Valley entrepreneurs will all appear in the story. The course will put particular emphasis on the global context of American economic development and situate it deeply in political and social changes. Ultimately, students will gain an understanding of how the contemporary capitalism that so powerfully shapes all of our lives has emerged over the course of several centuries, and how the tools to understand the history of American capitalism can be applied to understanding our contemporary situation. Assignments in particular will encourage students to think about contemporary problems from historical perspectives.

Harvard Gets Medieval (218241)

Dan Smail

2022 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

Starting in the late nineteenth century, Harvard got medieval. Through direct purchase and through the collecting activity of numerous alumnae/i, we began collecting all sorts of texts and artifacts generated by the medieval world of Arabic, Greek, and Latin civilizations. The things that arrived in Harvard's collections came in many forms, ranging from great architectural monuments and motifs to little stuff such as belt buckles, pilgrims' flasks, and fragments of pottery.

Why did we want medieval stuff? And what have we since learned about the world from which it came? This is a course about objects and their meaning, focusing on the objects in Harvard's collections that derive from western Eurasia and North Africa between the fall of the Roman Empire to the eve of contact with the New World. The five modules in the course begin by introducing you to five objects—things, images, texts—in Harvard's collections. Each of these objects lies on the edges of canonical knowledge and

therefore pose mysteries and invite questions. Our own exploration starts with the context of the object's acquisition and briefly explores what was happening in the world at the moment of its arrival. What did the acquisition of the medieval mean a hundred years ago? From there, we plunge into the past to explore the objects in their own context, working to grasp technologies, economies, social relations, and beliefs. Among other topics, we explore how medieval people imagined saints, miracles and witchcraft, as well as hell and other nasty regions of the afterworld. We explore trade networks and power structures and beliefs about others. We see how medieval peoples mapped visions of their own world, and work our way into the deep inner structures of their cognition, such as their understandings of time and calendar. Starting from the particular and moving to the general, lectures and assignments seek to frame the cultural context of each object and model how students can develop the skills they need to unpack and explain the unfamiliar. A major course-long assignment will invite students to make their own discoveries in Harvard's collections and elsewhere and to curate their own virtual gallery of objects that engages with the medieval world. The semester ends with a concrete proposal to the museum regarding areas of the collection that we need to build up to promote the concerns and issues of our own day.

If There Is No God, All Is Permitted: Theism and Moral Reasoning (218237)

Jay Harris

2022 Spring (4 Credits) **Schedule:** TR 1245 PM - 0200 PM

Instructor Permissions: None **Enrollment Cap:** n/a

For centuries in the West, Jewish and Christian thinkers (among others) have asserted that moral judgment is impossible without some concept of the deity. So convincing were they that one important character created by a Russian author of the nineteenth century was led to express the idea (if not exactly the words), "if there is no God, all is permitted." In more recent times some thinkers have challenged this assumption, and insisted that removing (or reducing) the role of God is indispensable to proper moral discourse. This course will examine the ways in which a concept of God has informed Western moral discourse, trying to help students engage the literature as they confront the basic question, why might one think "if there is no God, all is permitted?" and why might one think if there is a God human moral achievement is diminished or impossible. Further, we will examine ways in which the differing paradigms actually affect the moral conclusions we might generate.

Belief in God and denial of God's existence have each figured prominently in Western moral discourse. Arguments have been advanced that: autonomous human reasoning is incapable of arriving at moral truths without a supreme principle to ground the system (which is sometimes invested with "personality" and called God); that autonomous human reasoning can have no impact on moral behavior due to human failure that only God can "correct"; that autonomous moral reasoning is impossible, and morality can only

be understood as the submission to the will of a superior moral being; that a concept of God is necessary to direct and regulate moral reasoning, but the actual confessional versions of theism are metaphysically implausible or impossible; that autonomous human moral reasoning is impossible with God, and thus only a-theism can lead to moral conclusions. This course will engage all these different themes.

Science of Stress (218238)

Katie McLaughlin

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 100

Stress is a universal human experience. What is stress and why do we experience it? How does stress influence our emotions and the way we think and behave? What are common causes of stress in our modern world? What are the consequences of stress for our health and well-being? Why are some people more vulnerable to developing stress-related illnesses than others? And perhaps most importantly – what are the most effective strategies for coping with stress?

This course will address these questions with a particular focus on translating advances in the science of stress to help students learn how to manage stress more effectively in their lives. Students who take this course will: Develop knowledge of the stress response, including the neurobiological systems that govern our responses to stress and how they can influence our emotions, cognition, and behavior; Learn to identify causes of stress in the environment and the types of experiences that are likely to trigger a stress response; Develop an understanding of the long-term effects of stress on our health and well-being and how stressful experiences might contribute to disparities in health; Learn skills for adapting to stress—by actively testing a series of evidence-based stress management skills, students will develop a toolkit of strategies for responding to stress effectively in their own lives; Become informed consumers of the scientific literature on stress.

Pluralism: Case Studies in American Diversity (118775)

Diana Eck

2021 Fall (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** 50

Who do we mean when we say "we?" How does a society deal with religious, ethical, and cultural diversity? What challenges do we face as people of different communities encounter one another in cities and public institutions, schools and businesses, neighborhoods and families? These are urgent questions in many nations today, but in this course we focus on the United States. We explore, discuss, and analyze the changing multi-cultural and multi-religious landscape of America with an eye to the growing Muslim, Buddhist, Hindu, and Sikh communities in the most recent period of post-1965 immigration. In what contexts do these and other minority communities encounter America's secularism, its commitment to religious freedom, and its long-dominant Christian and Jewish communities? Our approach will be through the study and in-class discussion of case-studies enabling you to enter into some of the controversies and dilemmas that confront schools, universities, town councils, zoning boards, and places of work. You will be challenged to take the perspective of mayors and concerned citizens, teachers and executives, religious and civic leaders –all confronting the choices and changes of a dynamic society. You will inevitably consider your own perspective on the issues we engage. You will gain a deeper understanding of the religious complexity of America and a new sense of the challenges confronting "we the people."

Tragedy Today (218233)

Naomi Weiss

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

"It's a sad tale, it's a tragedy / It's a sad song…. We're gonna sing it anyway." So sings Hermes at the start of Hadestown, the hit broadway show that deals with capitalism, demagoguery, borders, and climate change. Based on the ancient artform of tragedy, this musical provokes its audiences to reflect on very modern concerns; it also, as the show's creator Anaïs Mitchell says, "lets us cry."

This course is about how and why ancient Greek tragedy provides such a powerful lens for exploring some

of today's most pressing sociopolitical issues. In Athens in the fifth century BCE, thousands would gather at the theater to grapple, through the medium of tragedy, with questions that continue to preoccupy us today: What happens if a woman is in power? How different are we from foreigners? Or what happens to the victims of war? 2500 years later, ancient Greek tragedy is all around us, from Broadway to hip hop to Game of Thrones to TV advertisements. Its adaptations can expose forms of inequity: Luis Alfaro's play Oedipus el Rey, for example, highlights incarceration rates among Latinx communities in 21st-century America. They can examine recent historical events that have fundamentally affected our understandings of race, conflict, and immigration, from Apartheid and the Truth and Reconciliation Commission in South Africa (Yaël Farber's Molora) to the ongoing civil war in Syria (Queens of Syria). They can also provide models for explorations of identity—as we can see when Freddie Mercury becomes Dionysus in Queen's iconic video for "I Want to Break Free." In this course you will read, watch, and listen to some of the most recent reincarnations of ancient Greek tragedies alongside the original plays. You will think about how such an old artform can change how we respond to 21st-century problems, and how it can make us think differently about ourselves.

Numbers in Policy & Society (217835)

Sheila Jasanoff

Sam Evans

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The ability to critically assess numbers, data and models and hold to account those with the power to generate them is a vital capability for every 21st century citizen. This course will give you an increased understanding of why some important ethical and political perspectives fail to enter into the design of the scientific and technical systems that permeate our societies.

Quantitative reasoning helps us make sense of a rapidly changing social, technical, and scientific landscape. We will introduce you to concepts and methods you can use to understand the complex relationship between quantification and its social contexts, and to turn those insights into good policy. You will learn how to use data, quantitative methods, and modeling to inform decisions concerning the governance of areas such as social networking, climate change, genome editing, and pandemic control. You will discover how topics like uncertainty, probability, and risk are embedded within prior understandings of equality, fairness, and democracy. You will develop an ability to ask when, where, why, and how attempts to fit quantitative reasoning to those understandings become problematic. You will expand your skills for bringing democratic values to bear on the ways we measure the costs, risks, benefits, and impacts of technological change.

Life and Death in the Anthropocene (218234)

Naomi Oreskes

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In 2019, geologists voted to make the Anthropocene a time unit in the Geological Time scale. For scientists, this means that future geologists will be able to see the effects of human activities in the stratigraphic record and thereby distinguish this epoch from the ones that came before. But what does this mean for us, as humans living at a time where millions of species are threatened with extinction, where lead pollution reaches every corner of the globe, where endocrine-disrupting chemicals threaten our sexual identity, and climate change potentially threatens the end of the world as we know it? How will we live in a world where--as the United Church of Christ Minister James Antal has
put it--nature appears to have turned against us and it may feel as if we are truly alone? Is it ethical to be happy while the world around us is falling apart? Is it possible? This course will explore the diverse meanings of the Anthropocene, from scientific, technological, literary, philosophical, cultural, theological and personal perspectives, in an attempt to answer the question: What will it mean to live and die in the Anthropocene?

Vaccines: History, Science, Policy (218475)

Allan Brandt

Galit Alter

Ingrid Katz

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Vaccination is among the oldest and most effective of medical interventions, yet paradoxically, it is also one of the most controversial. In its modern form, it has been used for centuries to prevent some of the most virulent infectious scourges of our time. Today, immunization is one of the most successful and effective interventions available tomedicine and public health, reducing morbidity and mortality across the world. In this interdisciplinary course, you will examine the history of vaccination using a number of specific episodes in which it was utilized to prevent illness, disability and death, as well as the social and political controversies that vaccines have generated.You will also beintroduced to the modern science of immunology and virology, examining the research that has resulted in the development of effective vaccines. Additionally, you will explore current scientific theories and techniques for developing new vaccines and enhancing their durability. Finally, this course will investigate the complex ethical and policy issues that vaccines continue to generate. What is the nature of compulsory measures for vaccination,

vaccine hesitancy and skepticism, and anti-vaccination movements? What are the moral and ethical principles for ensuring equitable access to vaccines in local communities,nations, and globally? The course will encourage a broad interdisciplinary exploration of vaccines to inform our current understanding of the Covid-19 pandemic, while also examining critical issues in science, life-saving technologies, questions of individualism and the good of the community, as well as fundamental issues of global health equity.

Class Notes: **This course will host a live course preview and Q&A session via Zoom at 1 p.m. EDT Thursday, August 26. Please see the course Canvas site for Zoom link and more information.**

LGBT Literature, Politics and Identity (218476)

Linda Schlossberg

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 50

What is the relationship between LGBT literary representation and politics, activism, and culture? In this course, we'll learn how sexual identity and desire are understood and represented in different social and historical circumstances. We'll move beyond the binary of identifying images as "positive" or "negative," paying attention to how depictions, definitions, and understandings of sexuality are shaped by specific historical moments, as well as the aesthetic traditions and personal experiences shaping these individual works. Along the way, we'll unpack terms such as "intersectionality," "feminist," and "queer." We'll think carefully about how the evolving nature of language and terminology—for instance, the shift from "same-sex marriage" to "marriage equality"—affects political discourse and shapes our understanding of what is possible. In addition to novels, we'll look at op-eds, essays, poems, plays, photography, performance art, and film with an eye to thinking about how different genres speak to the larger world of politics, activism, citizenship, rights, and popular culture. Learning how to decode metaphors and images in novels, films, and other works will make you a more sophisticated reader of the texts that circulate outside the classroom. As you sharpen your ability to critically analyze these works as products of particular political and historical moments, you will become a more nuanced reader of the world around you, able to think critically about other texts (not only literature, but memes, videos, blogs, games, tweets, and advertising) that circulate in our own cultural moment and their crucial relationship to identity and social change.

Language in Culture and Society (112218)

Nicholas Harkness

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How are language, culture, and society related? The relation is complicated rather than simple, problematic rather than straightforward. To begin to explore this question, we discuss key theoretical issues and illuminating examples that begin to sketch out an approach to linking language, culture, and society. Specifically, we consider the following problems:

- **How is language use a kind of social action? (It is something we do; it has social effects.)**
- **How does language organize and provide access to shared concepts and beliefs? (It has something to do with the way we collaborate, socially, to represent, reflect upon, and think about the world.)**
- **How do speakers think about and reflect upon language, and how do these reflections affect how they use it? (We have presuppositions about what language is and rely on these notions to orient to and situate ourselves within social worlds).**

Throughout the course, we develop a set of powerful analytical tools for studying both language and culture and, ultimately, for defining their role in social life.

Psychotherapy and the Modern Self (219657)

Elizabeth Lunbeck

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 105

What does psychotherapy offer our distressed selves that friends, family, self-help, and psychopharmacological remedies do not? The demand for therapy is currently at an all-time high, bolstering its century-long dominance as the preferred antidote to human unhappiness and misery, even as it is under sustained attack from critics characterizing it as self-indulgent as well as from platforms that would replace human therapists with chatbots and analysts with algorithms. This course explores the conflicts and controversies that characterize today's psychotherapeutic landscape, addressing questions concerning its present condition and future prospects. We will look at the development, methods, aims, efficacy, and limitations of a range of psychotherapeutic modalities—among them psychoanalytic,

psychodynamic, cognitive, behavioral, manualized, evidence-based, and AI-informed treatments as well as family, sex, and group therapies—and explore how each took shape, who it is intended to treat, and how clinicians evaluate its effectiveness. We will examine therapy's long-overdue, on-going reckoning with racial issues, gendered identities, and access to treatment. We will explore the various modern selves envisioned by psychotherapy, from the highly relational to the independently sovereign. You will leave the course prepared to recognize and evaluate claims regarding therapy's rationale and impact in a range of sites, from the clinician's office to the modern workplace to the media, as well as to assess the ways in which happiness, contentment, and satisfaction in life are subject—or not—to therapeutic intervention. Does psychotherapy work, and, if so, how? Do we suffer less and enjoy greater self-knowledge one hundred years after the invention of the talking cures?

Recall, Recollect, Remember (218748)

William Stewart

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Is identity—whether of self, community, or culture—defined more by what is remembered or what is forgotten? And how do the techniques of recollection—words and images as much as traditions or monuments—determine the ways we are able to recall in the first place? In this course, we will consider the problems of memory in German-speaking contexts, especially in situations in which the past, immediate as much as long-term, appears so fraught and so weighty. Examining cases from German fiction, essays, graphic novels, and film, we will explore the techniques that allow us to recall the past as much as the things we feel compelled to remember—or compelled to forget. Readings include works by Freud, Kleist, Hofmannsthal, Benjamin, Bachmann, Wolf, Ayim, Steyerl, and Sebald.

Course Notes:

Conducted in German.

German Drama and Theater (207676)

Lisa Parkes

2022 Spring (4 Credits) **Schedule:** WF 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Close reading, analysis, and full production of a play in German. The first part provides an introduction to a small selection of dramas, dramatic theory, the vocabulary of theater, as well as intensive pronunciation practice. The second part focuses on the rehearsal and production of a German play. Students participate on stage and collaborate on different aspects of the production, including costumes, set, sound, and program. Two performances take place at the end of term. Conducted in German.

Course Notes:

Conducted in German. Class meets for one hour twice weekly during weeks 1-5; the remaining weeks are reserved for two-hour rehearsals at the scheduled time.

German Literature, Culture, and Society (159603)

William Stewart

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course examines the major social-political trends and tensions that have informed literature and culture in the German-speaking countries. Students will develop the language skills to discuss, analyze, and interpret a variety of texts and cultural phenomena from the 18th to the 21st centuries, with special attention to social theory and political critique. Our readings and discussions are organized around pairs of thinkers who address the same issues from a different time, place, angle, or genre. Further emphasis is placed on the history of ideas and how it contributes to current issues and debates. Paired readings may include Kant and Kleist, Freud and Kafka, Benjamin and Brecht, Böll and Celan, Seghers and Wolf.

Course Notes:

Readings and discussion in German.

German Literature, Art, and Thought (159710)

Nadine Schwakopf

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 17

This course explores the major trends and tensions that have informed German literature, art and thought from the 18th to the 21st centuries. In addition to developing the language skills to discuss, analyze and interpret literature, students will explore the rich cultural tradition in the German-speaking countries and its continued relevance for the world. Topics include: Enlightenment; Age of Goethe; Third Reich; GDR

surveillance; Cold War; German reunification; remembering the Holocaust; rise of right-wing populism (AfD); ecological revolution. Figures include: Lessing, Goethe, Schiller, Wagner, Nietzsche, Freud, Einstein, Brecht, Celan, Dürrenmatt, Wolf, Draesner, Horn.

German History from Bismarck to Hitler (203214)

Alison Frank Johnson

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

German History loomed like a specter over the twentieth century. In the twenty-first century, Americans have been debating the relevance and legitimacy of comparisons between German history and our

contemporary world. How useful is German history for understanding our current moment? How might our present day concerns distort what we see in the past? This course will examine the history of Germans in Europe and elsewhere, starting with the revolutions of 1848 and ending with the separation of Austria, West Germany, and East Germany following the Second World War. Themes will be war, insurrection, and terrorism, revolution and counter-revolution, gender and sexuality, reform, violence, anti-semitism, racial thinking and racism, and migration.

Course Notes:

This course is also offered through the History Department as History 1265. Credit may be earned for either German 143 or History 1265, but not both.

The Frankfurt School on Film and Mass Culture (203378)

Eric Rentschler

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar considers the Frankfurt School's deliberations on film, radio, television, and mass culture. We will devote the majority of the course to three seminal figures: Siegfried Kracauer, Walter Benjamin, and T. W. Adorno. More generally, we will focus on the debates catalyzed by the emergence of modern mass media and an industrialized visual culture; we will also reflect on the pertinence of these debates for our own contemporary culture of media convergence.

Course Notes:

This course is also offered through the Department of Visual and Environmental Studies as AFVS 189G. Credit may be earned for either AFVS 189G or German 154, but not both.

Cold War Stories: Art and Politics in the Two Germanies (218470)

Nadine Schwakopf

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course provides a survey of the history and culture of divided Germany during the Cold War. It examines the conditions leading to the foundation of two separate states, the role of the Allied Powers in East and West Germany, the ideological conflicts between them, and their different responses to dealing with a shared fascist past. Drawing on sources from literature, film, radio, theater and art, we will engage with key political debates and societal changes, such as the "economic miracle," rearmament/the arms race, the instauration of socialism and its demise, the Berlin Wall and the erection of the inner German border, the student movement, the rise of feminism and environmentalism, pacifism and the "Peaceful Revolution" of 1989. We will look into how writers and artists interfered in, or even shaped, these debates; and we will study how specific literary and artistic genres and media helped fuel political counter-discourses and protest on both sides of the Wall.

Course Notes:

Readings and discussions will be in German. Assignments must be submitted in German.

Just Law? Truth, Trial & Error in German Literature (160435)

Nadine Schwakopf

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 17

This course examines the intersections of law and literature from both a historical and a theoretical point of view. We will engage with literary and philosophical texts written by German[1]speaking authors that have become central for the understanding of this interdisciplinary field of study. With the help of readings spanning the time between the 18th and the 21st centuries, we will reflect on the manifold representations of questions of law in literature. How do literary texts articulate the rule of law and/or its failure, how do they depict legal procedure and "due process?" How is the complex relationship between violence, law and justice negotiated in philosophical discourse? What are the limits of the law and its authority, and what is the role of morality both in law-making and the subsequent execution of the law, as it becomes manifest in trial procedures, judgments and measures of retribution? Authors studied in this course may include: Goethe, Kleist, Büchner, Fontane, Kraus, Arendt, Jelinek, Zeh. Readings and discussions will be in English.

Course Notes:

Readings and discussion will be in English.

Instructor Permissions: Instructor **Enrollment Cap:** 15

This discussion-based course will explore the history of Vienna, one of Europe's largest and oldest cities, from the final decades of the Habsburg Empire to Austria's admission into the European Union. We will discuss urban design and renewal, political crisis, the influence of antisemitic politics on a young Adolf Hitler, the successes of the city's Socialist government during the First Republic, the flourishing of Jewish culture and thought, Austro-Fascism and civil war, the transition into and out of Nazi rule, city life during the First and Second World Wars, the postwar occupation, and the reckoning with the city's history in the Second Republic.

Course Notes:

This course is equivalent to History 1906. Credit may be earned for German 178 or History 1906, but not both.

Bargaining with the Devil: the Faust Legend (205080)

John T. Hamilton

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Seduction and transgression, forbidden knowledge and the insatiable lust for learning, the limits of cognition, human will, and the problem of evil – these are the central themes that circulate through the legend of Faust, who is said to have exchanged his immortal soul for infinite wisdom and power. The seminar examines the elaboration and complication of this legend across the centuries and its formative role in the development of European literature and philosophy. In addition to studying Goethe's masterwork, the seminar includes analyses of related works in European literature, music, and the visual arts, all with reference to shifting historical contexts and philosophical reflections.

Course Notes:

All readings are available in English.
Offered jointly with the Comparative Literature Department as Comp. Lit. 180. Credit may be earned for Comp. Lit. 180 or German 180, but not both.

Text – Sound – Image: Intermediality in Modern and Contemporary German Poetry (218347)

Nadine Schwakopf

2021 Fall (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course explores the vast range of poetic practices that have emerged in the German-speaking countries since the end of the 19th century. We will first engage with the hybrid forms of poetry characteristic of the early artistic and literary avant-gardes, such as sound poems, visual poems, collage-poems or object-poems. We will, too, examine examples of collaborative works aimed at dismantling the boundaries between poetry and the other arts: illustrated books, painting/drawing, film, or opera. Finally, we will reflect on the impact of analog and, then, digital technologies on the further diversification of poetic practices in the second half of the 20th century, and inquire into the changing significance of the human body in the making of poetry. Authors and artists studied in this course may include: Ball, Arp, Schwitters, Brecht, Jandl, Mayröcker, Grass, Pastior, Heiner Müller, Achleitner, Faktor, Herta Müller, Kling. Readings and discussions will be in German. Assignments must be submitted in German.

Course Notes:

Readings and discussions will be in German.

Biopolitics and Vampire Aesthetics (156124)

Nicole Suetterlin

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This seminar traces the infamous bloodsucker's bite-marks through major periods of European literature from the 18th century to the present, exploring how the notion of vampirism is inextricably linked with the emergence of what Michel Foucault has famously called "biopolitics" or "bio-power." Since the 18th century, institutions such as schools, hospitals, and prisons have exerted an increasing "hold over life" (Foucault), conditioning the ways in which we think and act. Why does the emergence of these modern institutions coincide precisely with the vampire's first appearance in European literature? Have the arts defied the biopolitical hold over life by creating a vampiric aesthetics? We pursue these questions by engaging in a dialogue between literature, film, the visual arts, the natural sciences, and critical theory. Using the constantly evolving vampire figure as a marker for paradigmatic cultural shifts, scientific

developments, and social conflicts, this course investigates Western cultural and literary history from its margins. Topics include the (bio)politics of health, race, gender, and sexuality, media revolutions and misinformation, surveillance, eugenics, Nazism and totalitarianism, trauma theory. Readings include canonical German, British, and French authors from Goethe, E.T.A. Hoffmann, and Byron to Baudelaire, Wagner, Nietzsche, Stoker, Jelinek, and Tawada; Eastern European authors from A.K. Tolstoy to B. Pekić; Afrofuturists O. Butler and J. Gomez; lesser-known Gothic writers such as S. LeFanu and K.H. Strobl; theorists from Freud and Nordau to Derrida, Foucault, Haraway, Irigaray, Kittler, Lorde, Mbembe, and others.

Course Notes:

Open to undergraduates with permission of instructor. Readings and discussions in English. All German-language texts available in original. Additional meetings in German available upon request.

Literature on Trial: Kafka in Paris (212931)

John T. Hamilton

2021 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The seminar engages in a close study of Kafka's major stories and novels, diaries and correspondence; and how this body of work was received, explicated and interpreted by key figures in post-war France: Maurice Blanchot, Jacques Lacan, Deleuze & Guattari, Jacques Derrida, and others.

Course Notes:

Readings in German and French, with English translations available. Discussion in English.

This course is equivalent to CompLit 212. Credit may be earned for CompLit 212 or German 287, but not both.

Questions of Theory (205260)

Nicole Suetterlin

Doris Sommer

2021 Fall (4 Credits) **Schedule:** F 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

To explore key literary, cultural and critical theories, we pose questions through readings of classic and contemporary theorists, from Aristotle to Kant, Schiller, Arendt, Barthes, Foucault, Glissant, Ortiz, Kittler, and Butler, among others. Their approaches include aesthetics, (post)structuralism, (post)colonialism, media theory, gender theory, ecocriticism. Each seminar addresses a core reading and a cluster of variations. Weekly writing assignments will formulate a question that addresses the core texts to prepare for in-class discussions and interpretive activities.

Course Notes:

Conducted in English. This course is also offered as Romance Studies 201 and German 291. Credit may be earned for Romance Studies 201 or German 291, but not both.

Scandinavian 55 Section: 1

One Hundred Years of Scandinavian Cinema (159715)

Agnes Broome

2022 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM
W 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores Scandinavian cinema from the pioneers of the silent era to the globally successful hit films of the present day. Students will trace the development of Scandinavian cinema through the films of directors such as Viktor Sjöström, Carl Th. Dreyer, Lars von Trier, Ingmar Bergman and Lukas Moodysson and discover the profound influence the region's films have had, and continue to have, on filmmaking in America and the world.

Course Notes:

Scandinavian Folklore: Trolls, Trolldom and the Uses of Tradition (127810)

Stephen Mitchell

2022 Spring (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Examines Nordic folklore and folklife, with an emphasis on narratives, supernatural beliefs, and material culture from the 17th to the early 20th centuries, interpreted against additional sources of information drawn from the archaeological and historical records. Key strategies used in the fields of folklore, literature, and cultural history to interpret such texts discussed in detail, and applied in analyzing our materials. Also carefully considered, the history and development of folklore studies in Scandinavia and the role of folklore (and folklore studies) as, and in, anti-colonial and nation-building movements.

Course Notes:

Enrollment limited to 12. Preference given to students who have declared a Concentration or Secondary Field in Scandinavian and/or Folklore & Mythology.

Swedish 20A

Intermediate Swedish: Childhood in Swedish Literature and Culture (112472)

Agnes Broome

2021 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 12

Sweden and Swedish Finland have produced some of the most translated and beloved works of children's fiction in the world. In this intermediate Swedish language course, we will review the essentials of Swedish grammar and vocabulary as we explore some of these classic works of children's fiction, film, and comic books and the aspects of Swedish culture they illuminate. The final project for this class involves producing your own work of children's fiction or film.

Course Notes:

Conducted in Swedish. Not open to auditors.

Global Oral Health: Healthy Teeth, Healthy Societies (216336)

Brittany Seymour

2021 Fall (4 Credits) **Schedule:** MF 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 34

Did you know that one of the strongest indicators of a healthy society is the health of its teeth? Everyone has teeth, but most people in the world don't have access to affordable dental care. This discussion-based course assesses current global health policies and approaches for addressing pressing health challenges despite resource constraints and severe political neglect. It aims for students to be competent in incorporating the global burden of oral diseases into foundational concepts of global health and world development. These include how oral diseases are associated with globalization, poverty, infectious and non-communicable diseases, maternal and child health, mental health, nutrition, tobacco, alcohol, urban and rural infrastructures, climate change, and the environment. This course demonstrates how complete health and an end to global poverty are not possible without including oral health in the global health and development agenda.

Course Notes:

Students who complete GHHP 30 may apply to participate in an experiential learning opportunity in San Vito, Costa Rica in the summer. Since slots are limited, there will be a lottery.

The Quality of Health Care in America (114957)

Anupam Jena

2022 Spring (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 42

Offers information and experiences regarding the most important issues and challenges in health care quality. Overview of the dimensions of quality of care, including outcomes, overuse, underuse, variation in practice patterns, errors and threats to patient safety, service flaws, and forms of waste. Each session focuses on one specific issue, exploring patterns of performance, data sources, costs, causes, and remedies. Explores desirable properties of health care systems that perform at high levels in many dimensions of quality.

Global Response to Disasters and Refugee Crises (161268)

Stephanie Kayden

Michael VanRooyen

2022 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

Climate change, urbanization, and conflict mean that global disasters are on the rise. How should the world respond when disasters force people from their homes? How can we better help the world's refugees? This course examines the past, present, and future of the international humanitarian response system. We will explore how Doctors Without Borders, the United Nations, the Red Cross, and other aid agencies came to be and how global response standards, international humanitarian law, and new technologies are shaping worldwide disaster relief—even during the COVID pandemic.

Through interactive discussions and case studies, students will learn how aid workers interact with governments, militaries, and civil society to provide refugee aid. Students will also have the opportunity to learn about Boston-area response from interactions with a local refugee resettlement agency.

Course Notes:

Lotteried course, enrollment limited to 30.

Global Health & Health Policy 99

Research in Global Health and Health Policy (123102)

David Cutler

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Global health and health policy are interdisciplinary fields that apply the theories and methods of statistics, sociology, political science, economics, management, decision science, and philosophy to the study of population health and health care. Research from these fields influences policymaking in a variety of settings. For example, the Patient Protection and Affordable Care Act (ACA) drew upon health policy research to develop programs for improving access and quality of care in the United States. Similarly, global health research guides international institutions, such as the World Health Organization, in determining health guidelines for all countries. Global health and health policy research can also inform practices inside hospitals, initiate programs for diseases like HIV, and regulate the food and drug industries. This course introduces the fundamentals of research design and methods in global health and health policy and assists students in developing research projects and crafting policy recommendations that can impact health care systems and public health.

Course Notes:

This course fulfills the research requirement of the Secondary Field in Global Health and Health Policy, and enrollment is ordinarily limited to seniors in the GHHP Secondary Field. Underclass GHHP students may petition to take the course if all other Secondary Field requirements have been met. GHHP 99 is primarily taught by graduate students in the PhD in Health Policy program. It may not be taken pass/fail.

Foundations of Political Theory (124414)

Eric Beerbohm

2022 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course investigates the central problems of political theory that concern the justification of democracy. Is democratic rule the uniquely just form of collective decision-making? What political institutions best express the democratic values of equality, freedom, deliberation, and participation? What are the moral responsibilities of citizens - whose representatives exercise political power in their name? Is democracy a human right? How do themes of race and globalization intersect with democratic theory? Readings integrate contemporary work in political philosophy from thinkers ranging from Chris Lebron to Karuna Mantena with canonical thinkers, including Plato, Aristotle, Rousseau, W.E.B. DuBois, John Rawls, Robert Nozick, Judith Shklar, and Charles Mills. Sections will be structured with thematic focus areas, and students will be asked to rank choices: options will include federalism and equality; civic agency; and race and democracy.

Foundations of Comparative Politics (117853)

Steven Levitsky

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Provides an introduction to key concepts and theoretical approaches in comparative politics. Major themes include the causes of democratization, economic development, ethnic conflict, and social revolutions; as well as the role of the state, political institutions, and civil society. Examines and critically evaluates different theoretical approaches to politics including modernization, Marxist, cultural, institutionalist, and leadership-centered approaches. Compares cases from Africa, Asia, Europe, Middle East and Latin America to provide students with grounding in the basic tools of comparative analysis.

American Government: A New Perspective (111813)

Paul Peterson

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Provides an overview of contemporary American politics. It analyses the way in which recent changes in elections and media coverage have helped shape key aspects of American government, including the courts, Congress, and the Presidency, the workings of interest groups and political parties, and, also, the making of public policy. Permanent political campaigns have altered governmental institutions and processes. The course explains how and why.

International Conflict and Cooperation (126258)

Stephen Chaudoin

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is an introduction to the analysis of the causes and character of international conflict and cooperation. The course covers core theoretical models for why and how countries bargain, fight, and cooperate. The first half of the course focuses on conflict and international security. The second half focuses on international political economy and international organizations.

Data (115859)

Adeline Lo

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course, an introduction to quantitative political science, will teach you how to answer questions with data, how to develop questions suited to empirical research, construct hypotheses, conduct descriptive analysis using statistical summaries and data visualizations, how to model relationships, how to assess uncertainty, and how to communicate your findings. Exercises both in and out of class will require students to engage with and apply various social science concepts, and to undertake quantitative analyses of political and policy-relevant data, often with the aid of R programming. Students will complete a final project.

Data Analysis and Politics (123443)

Joeri Smits

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

How can we measure racial discrimination in job hiring? What is the best way to predict election outcomes? What factors drive the onset of civil wars? The goal of this course is to give you the ability to understand, explain, and perform research on the most pressing social and political issues with a special

focus on data analysis and causal reasoning. You will be able to read and understand the methodology of most academic articles in the social sciences while also learning the core ideas and tools of data science used across many industries.

Models (211173)

Andrew Therriault

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores methods for using statistical and machine learning models in political research. We'll start by discussing research design and looking at the motivations for building models, the range of options available, and the tradeoffs involved in each approach. Students will then spend the remainder of the semester applying these tools to answer their own questions using real political data. These projects will be particularly valuable for students planning on graduate study or applied quantitative research after graduation, and may be used as the basis for a senior thesis.

Class Notes: **data_science**

Research Practice in Qualitative Methods (108287)

Frances Hagopian

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

With the goal of preparing students to undertake original research, this course introduces students to basic principles and tools of qualitative research in political sciences. Focus is on framing research, research design, and the principal tools of qualitative research. Topics examined include the pitfalls of selection bias, the logic of causal inference, measurement and conceptualization, how to test hypotheses, and the potential of mixed methods. Research techniques covered are process tracing, natural experiments, archival research, and interviews.

Topics and Resources in Political Theory (108285)

Michael Rosen

2022 Spring (4 Credits) **Schedule:** F 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course introduces students to the most important debates in contemporary English-language political theory, centered on questions of justice, equality and rights. We then turn to topics that reflect the individual interests of students who enroll. The course is designed to help participants to make the transition from being critical readers of political thought to being independent contributors to debate. It will be especially useful for those considering writing a thesis in political theory.

Technology Science Practicum (207920)

Latanya Sweeney

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This practicum is a capstone to the Technology Science Program, designed to give students the opportunity to conduct original research and write a publication-ready research paper. In consultation with the instructor, students select a concrete technology-society conflict to address, produce autonomous research to analyze it, and provide a set of actionable recommendations or produce appropriate technology to solve it. Throughout the semester, students receive feedback both from their peers and the instructor to aid the development of their projects. Class meetings include the development of writing schedules, discussions focused on framing, analysis, methodology, and peer-review of student projects. Emphasis is placed on issue spotting, academic story-telling and research framing for maximum impact. The course culminates with a formal presentation of the students' projects and papers.

How did we get here? America's racial history and its impact on social policy (218269)

Sarah James

2021 Fall (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Racial discord dominates many contemporary explanations for recent political and sociological developments in the United States. We will contextualize the recent racial discord by combining works from history, psychology, sociology, and political science to better understand the history of race in America. In the second half of the course, we will explore how race and racism has influenced the development of five policy areas (immigration, healthcare, education, voting rights, and the carceral state and policing) to evaluate their role in rising inequality. We will also learn about best practices for conducting independent research in preparation for writing a senior thesis.

Class Notes: **american_subfield**

Fighting Poverty (218267)

Nara Dillon

2022 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

What is poverty? What causes poverty, and how can it be eliminated? This seminar focuses on the big questions of how poverty varies around the world, as well as how and why different approaches to fighting poverty have been tried. These approaches include economic development, welfare programs, disaster relief, and anti-poverty campaigns. Case studies include China, India, Mexico, and the United States, among others. Students will write research papers on a topic and region of their choice.

#AbolishPolice: The Politics of Public Safety in the Age of Social Media (216449)

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Recent examples of police brutality have ignited unforeseen momentum for police and prison abolition. Online activism has helped to fuel this unprecedented moment, sparking heated debates about equitable public safety. We'll discuss these debates as well as questions like: what would police abolition look like in practice? How does #AbolishPolice relate to parallel/complementary movements like #DefundPolice, #AbolishIce, #BlackLivesMatter, and others? And how do online campaigns affect the speed, intensity, and content of social movements? Topics will also include the intellectual roots and history of the carceral abolition movement, activist tactics and technologies, and institutional design and change.

Redistricting (218265)

Stephen Ansolabehere

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

2021 marks the once in a decade ritual of redistricting. Every ten years, state legislatures draw new geographic districts for the election of members of Congress, state legislature, and other state and local offices. District boundaries shape who is better represented, how competitive elections will be, and even which party controls government. This course examines the districting process as it is happening. You will learn about redistricting first-hand: you will evaluate actual district maps and will learn how to draw districts yourself using GIS. Professor Ansolabehere has served as an expert witness in 16 redistricting and voting rights cases.

Global Governance and the Role of International Organizations (213436)

Christina Davis

2021 Fall (4 Credits) **Schedule:** R 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This seminar examines the role of international organizations as a tool to manage global problems. We will review international relations theories that account for why states establish institutions and assess the effectiveness of specific organizations to improve policy outcomes as well as explore their legitimacy within society. In light of the backlash against these institutions that can be seen in the Brexit vote and U. S. rejection of new international trade agreements, what is their role going forward? The scope of organizations that we examine will range across issue areas in security, economic, and human affairs. We will consider how selection effects and indirect influence present challenges to research on the effectiveness of international organizations. Through analysis of a variety of sources, including negotiation archives and quantitative measures of policy outcomes, students will be encouraged to probe the conditions under which international organizations promote cooperation.

Crime, responsibility, and the law (213657)

Gabriel Katsh

2022 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

One of the central questions of any political system is how to respond to those who violate the legally enforced norms of behavior that make up the criminal law. In this seminar, we will consider the philosophical justifications that have been given for the operation of the criminal justice system and, in particular, for the practice of punishing offenders. We will focus on the contrasting ideologies of retributivism and consequentialism and how those systems address moral principles such as responsibility, agency, blame, and desert as well as more practical concerns such as deterrence and public safety. Readings will be drawn from a wide range of sources, primarily political theory and law, but also the philosophy of mind, sociology, history, and neuroscience.

Africa: Power and Politics (218732)

Christopher Rhodes

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This course examines the countries of Africa in comparative perspective. Instead of merely focusing on the various problems facing the continent, this course looks at examples of both the successes and failures of African states in addressing the challenges they face. Through a combination of case studies, academic scholarship and journalism, the course analyzes the independent and colonial histories of African nations; explores the development of modern African states, societies and economies; and examines the impacts of current international influences on African states.

The Politics and Ethics of Medical Care (109731)

Gabriel Katsh

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This course is an introduction to medical ethics and the ways in which political theory can inform our understanding of the moral and political dimensions of medical care. Using case studies as a launching point, we will explore ideas about autonomy, paternalism, beneficence, and distributive justice, and their application to issues such as informed consent, medical privacy, and the right to refuse care. The Fall 2021 iteration of the course will focus in particular on ethical and policy dilemmas that have arisen in the context of the coronavirus pandemic, including questions about the distribution of scarce resources, the health effects of inequality, and balancing the needs of public health with concerns about individual liberty. Readings include classics of moral and political philosophy, writings by contemporary medical ethicists, Supreme Court decisions, and some empirical and historical studies.

Transitional Justice and the Politics of Truth Commissions (207734)

Gloria Ayee

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Scholars, policymakers, and political leaders have long debated appropriate responses to severe human rights violations that occur during periods of periods of civil conflict, war, and genocide. This course introduces students to interdisciplinary studies in transitional justice and post-conflict reconciliation by focusing on the work of truth and reconciliation commissions. Students will examine key concepts and theoretical perspectives that are central to the field of transitional justice. Drawing on cases such as South Africa, Chile, Peru, and Canada, the course will critically examine how truth commissions are used to provide accountability for human rights abuses carried out by the state.

Technically Justice? The Politics of Technology and Criminal Justice Reform (214573)

Jennifer Halen

2021 Fall (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

The U.S. criminal justice system is rife with problems that have devastating consequences for individuals, families, and communities. How can we fix this troubled institution? This class examines the politics and policies behind the explosion of tech-based reforms, including surveillance tech, predictive policing, Virtual Reality, and many other theoretical and applied reforms. Additionally, the class will explore activists' and prison abolitionists' perspectives and technologies used to resist or alter the carceral system. The empirical and normative consequences of each of these perspectives and technologies will be discussed throughout.

Propaganda and Politics: Past and Present (218295)

George Soroka

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Propaganda has always been a factor in politics, but in an age when social media has made disseminating ideas easier than ever and the terms "fake news" and "alternate facts" have entered the popular lexicon, it appears particularly pernicious. Studying what propaganda is, as well as by whom (and how) it is disseminated and what its goals are, is therefore particularly relevant today. This course will begin by looking at the history of the term, distinguishing it from related but nevertheless distinct forms of persuasive speech (e.g., advertising, op-eds, polemics) and outright misinformation. Next, we will examine various examples of propaganda, historical as well as current. The class will conclude by considering the normative implications of political propaganda.

Globalization of Finance (217519)

Arie Krampf

2022 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

In recent decades the role of the global financial and monetary system (GFMS) has undergone tremendous changes, which brought to the foreground the role of the GFMS in shaping the history of globalization. The seminar traces the key transformative events that shaped the history of the GFMS in the twentieth century. The seminar mainly focuses on the interaction and the changing balance of monetary power between the US, the European Community/Union, and the emerging markets. In order to understand those events, the course also discusses critical theories that explain the formation of institutions and mechanisms of institutional change of the GFMS.

Class Notes: **Gov 94kp will be taught by Prof. Krampf.**

Japanese Politics and Foreign Policy (218832)

Aki Nakai

2021 Fall (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This research seminar explores the dynamics of Japanese international and domestic development from WWII to the present, and how Japan is currently adjusting its foreign policies to meet the challenges of the twenty-first century. Despite having the world's third largest economy, Japan has been widely viewed as underperforming in world affairs. The central question is whether Japan will remain an "underperformer." Topics include: prewar Japanese foreign policy, postwar relations with the U.S., China, and South Korea, U. S. military bases, history problems, regional politics, soft power, immigration, human rights, and whaling.

Class Notes: **IR_subfield**

Class Notes: **Students will be admitted to Gov 94 seminars through a departmental organized lottery. The last day to submit your application is Monday, August 23rd by 6 pm. For more information, please visit the following link:https://undergrad.gov.harvard.edu/gov-94-seminars.**

Capital, Ideas, and Development in Latin America (218599)

Dan Epstein

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Latin America has long had a unique place in the global economy, and been a focal point for theories of economic development. The political economy of development in this broad but cohesive region, and the history of ideas and actual development trends, will be the basis of this course. After a short refresher on basics of macroeconomics, three key eras of development will be our focus, as well as their aftermath in both economic and political terms: the primary products export boom of the 19th and early 20th centuries, the turn towards Import Substituting Industrialization of the mid-20th century, and the experience of neoliberal reforms in the late 20th century. The course will illuminate the impact on economics, societies, and politics of major events such as the 1930s Great Depression and the 1980s Debt Crisis. The international spread of ideas about capital and development, Dependency Theory, and the neoliberal "Washington Consensus" will be critical to understand how ideas can shape interests and outcomes.

Nation and Nationalism (218598)

Dan Epstein

2021 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Nationalism is a powerful force whose importance is only growing. This course

addresses the concept of nation, how it holds legitimacy over peoples, and the origins of nationalism as an intellectual project and ideology in early liberal ideas, as well as more recent illiberal manifestations, including in the United States. Case studies consider the possibility of benign nationalism (Czech), imperial nationalism (Russian), and nationality the post-colonial context (Democratic Republic of Congo). The semiotic concept of "myth" will be key, especially when addressing the US case, and we'll engage with film and novels in addition to traditional academic reading.

The Politics of Nuclear Weapons (203474)

Stephen Rosen

2021 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Is the theory of nuclear deterrence wrong? Nuclear weapons and the political behavior associated with them are very complex, with large variations over time and space, and these variations may have significant consequences. This course is designed to give the interested student an introduction to the physical reality of nuclear weapons and the history of their use.

Inequality and American Democracy (125211)

Theda Skocpol

2022 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

The "rights revolutions" of the 1960s and 1970s removed barriers to full citizenship for African Americans, women, and other formerly marginalized groups. But inequalities of wealth and income have grown since the 1970s. How do changing social and economic inequalities influence American democracy? This seminar explores empirical research and normative debates about political participation, about government responsiveness to citizen preferences, and about the impact of public policies on social opportunity and citizen participation.

Law and Politics in Multicultural Democracies (128009)

Ofrit Liviatan

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Examines the role of law in the governance of cultural diversity drawing on examples from the USA, Western Europe, India, Northern Ireland, and Israel. Central themes at the intersection of law and politics will be explored, including: the impact of courts on rights protections, law's function as a venue of conflict resolution, and courts' relationship with other political institutions. Specific attention will be given to contemporary controversies such as religious symbols and abortion.

Race in Comparative Perspective (218734)

Christopher Rhodes

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

The predominant western conception of race is a relatively recent idea formed in the context of European imperialism, trade, exploration and slave trading and developed by many of the most important Enlightenment figures of the 17th and 18th centuries. This course explores various analogues to "race" that developed in other civilizations; focuses on the context and thinkers that were key to the European development of race and racism in the modern era; and examines the variations in "race" that developed in contexts including the United States, Brazil, South Africa and the colonial empires of Spain, Britain and France.

A Dream Deferred: The politics, promises, and pitfalls of American Education (218622)

Sarah James

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Access to a high quality education has been touted as a key rung in the ladder to the economic and social (if not also political) success in the U.S. By the end of the course, we will be able to explain the competing ideologies and changing economic, social, and political factors that have shaped the development of American education and develop cogent perspectives on what changes, if any, are needed to align the education system's outcomes with its purpose. We will also learn about best practices for conducting independent research in preparation for writing a senior thesis.

Media and Politics (218270)

James Snyder

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

In this course students will explore the role that mass media has played in U.S.

politics, focusing on newspapers. Students will conduct quantitative analyses using text extracted from on-line newspaper archives, to address questions such as: How biased are newspapers and in what ways are they biased? Has this changed over time? Has news coverage of politics become increasing focused on the national government, at the expense of state and local politics? How did radio, television and the internet affect newspaper behavior? Has newspaper coverage become increasingly "soft" or personalistic over time? Do these changes affect accountability?

The Politics of Economic Inequality (216213)

Thomas Remington

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This seminar investigates the political factors contributing to rising economic inequality in the United States, other developed democracies, transition countries, and globally. The first half will focus primarily on the United States and the second half will examine inequality in comparative and global perspective. We will review the major theories of inequality and examine the consequences of economic inequality for political equality, social mobility, and the differential impact of the COVID-19 pandemic. Throughout, we will relate political to economic factors that drive economic inequality, identifying commonalities and differences across countries.

Women in Politics (218294)

Sparsha Saha

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course examines the causes and consequences of gender inequality in politics, the workforce, and the household. We will draw on theory and literature from political science and other disciplines to learn about cutting edge research in the field, focusing on the United States (with some application to other advanced democracies). What explains why women have not yet achieved equal political representation? How did gender play a role in the 2016 U.S. presidential election campaign and beyond? Why should we care about gender parity? What has been implemented to correct gender disparity in politics? Why do women make less money than men? Why do women still do more of the work at home despite becoming more equal in education and professional life? How can we change hearts and minds? How does gender intersect with race and class and sexual orientation? What can people who identify as men (particularly white men) do? How are sexism, racism, and speciesism all connected? What is going on with gender in academia, and why do you have so few tenured female professors, particularly in fields like Government and STEM?

North Korea and Peace-building on the Korean Peninsula (218528)

Young-Kwan Yoon

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

North Korea has been causing serious international concerns in security, humanitarian, economic, and diplomatic areas. Some important theoretical puzzles in the field of IR are also embedded in the North Korea-related issues, which brought lively discussions among competing approaches such as realist, neo-conservative, and functionalist. After reviewing assumptions and arguments of these three approaches and drawing implications for North Korea-related topics, the course will analyze the

most urgent challenges such as its development of nuclear weapons, human rights and humanitarian crises, and marketization of the economy. It concludes with assessing future scenarios for North Korea and the possibility of Korea's reunification.

Global Ethnic Politics (207739)

Gloria Ayee

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Global Ethnic Politics is an undergraduate course that focuses on the social and political implications of ethnic identities in different parts of the world. The course provides a comparative, global analysis of race and ethnicity, and is designed to help students understand the history, dynamics, and salience of ethnic inequality and political cleavage. Issues under consideration include definitions of race and ethnicity, colonization, nationhood, the politics and political history of indigenous peoples, the history and persistence of White supremacy, multiculturalism, legacies of slavery, ethnic political mobilization, panethnicity, diasporas and transnationalism, migration, ethnic cleansing and genocide, and contemporary racial stratification.

Comparative Political Development (216212)

Yuhua Wang

2022 Spring (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

This course examines the historical development of different political institutions in the world. Why did modern nation states and representative governments emerge in Europe? What was the path of political development in other parts of Eurasia, such as China and the Middle East? How did different political institutions influence economic development in the long term? We explore these big questions drawing materials from political science, history, sociology, anthropology, and economic history. A major course objective is to understand how the roots of political development in different countries connect with their politics and economies today.

Political Economy (121724)

Peter Buisseret

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This class is an introduction to political economy. We study how individuals and groups pursue their goals in a variety of political contexts, and how their strategic interactions give rise to social dilemmas. We apply our theoretical tools to real-world political competition and policymaking. Topics include the size of the state, political polarization, electoral accountability, and the persistence of inefficient policy.

Educational Justice (204038)

Jacob Fay

2021 Fall (4 Credits) **Schedule:** W 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Educators and educational policy makers regularly face challenging ethical decisions. For example, what should be done about a student with diagnosed emotional issues who frequently disrupts class, but who benefits from being mainstreamed? Should teachers resist grade inflation even if it helps their students in the college and labor market? Is it just to expand a charter school that achieves outstanding academic outcomes at the cost of high attrition rates? When school closure or teacher evaluation policies disproportionately impact low-income communities of color, is that in itself evidence of an injustice that must be addressed? These kinds of questions are often addressed as technocratic challenges of leadership, legal compliance, or accountability. This course, by contrast, addresses the ethical dimensions of educational practice and policy, with justice as our primary focus. We will engage with philosophical, theoretical, and empirical readings from a wide variety of disciplines. We will also grapple with case studies of dilemmas of educational justice from classrooms, schools, districts, and organizations in the United States and abroad. Our goals will be to deepen our own understandings of educational justice, to engage with others about complex ethical judgments across multiple lines of difference, and to learn how to enhance educators' and policymakers' capacities to make ethical decisions under challenging conditions.

Political Thought of the American Founding (156108)

Eric Nelson

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

John Adams observed that the American Revolution took place, not on the battlefield, but rather "in the minds of the people...before a drop of blood was shed at Lexington." This course will examine the political debates leading to American independence, and, later to the ratification of the Federal Constitution. Famous works of the period, such as Paine's Common Sense and The Federalist, will be placed in the wider context of American political writing from 1763 to 1789.

Progressive Alternatives: Institutional Reconstruction Now (125860)

Roberto Mangabeira Unger

2022 Spring (4 Credits) **Schedule:** T 0145 PM - 0345 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An exploration of the past and future agenda of progressives, whether self-described as liberals or as leftists. What should they propose, now that they no longer believe in the usefulness of governmental direction of the economy or in the sufficiency of redistributive social programs? A basic concern is the relation of programmatic thought to the understanding of change and constraint.

In the recent historical period, progressives have sought to humanize the established order rather than to reimagine and remake it. Here the main focus is on institutional or structural change in the market system and in democratic politics. Among the themes to be discussed are the nature and future of the knowledge economy, the status of free labor vis-à-vis capital, the relation of finance to production, the making of a high-energy democracy that no longer needs crisis to make change possible, and the education required by such economic and political alternatives. A central theme throughout is the content and implications of the idea of freedom.

The course will draw on many disciplines and consider examples from many settings. It will try to develop ways of thinking as well as proposals for change.

Two brief response papers during the semester and a longer response paper at the end, in lieu of an examination. Open to, and appropriate for, both graduate and undergraduate students.

The Jewish Political Tradition (125570)

Eric Nelson

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The Jews existed as a stateless people for nearly two thousand years. Yet, throughout this period, they continued to make rich contributions to the theory and practice of politics. This course will examine the history of Jewish political thought, beginning with the Hebrew Bible itself and concluding with the birth of Zionism. Special attention will be paid to the influence of Jewish political writing in Christian Europe and in the early American republic.

The Political Economy of Israel (217518)

Arie Krampf

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How Israel—a small, semi-peripheral, late-developing country located in a geopolitically unstable region—shaped its growth model and adjusted it to a changing global environment? This question stands at core of the course. The course provides a long-term outlook at the economic history of Israel and its transformations. Its primary focus is on the economic, social, national and geopolitical factors that shaped its growth models and their transformations.

Political Economy--Advanced Democracies (218282)

Torben Iversen

2022 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This is a survey of advanced topics in political economy, with a focus on affluent democracies in North America, Western Europe, and East Asia. We will explore cross-national differences in the organization of economic, political, and social institutions, and how these produce divergent economic policies and outcomes. We will also ask how class, race, and gender affect the politics of inequality and redistribution, and we will consider the political and economic consequences of globalization, women's economic mobilization, and new technology -- including the rise of right populism. Identities, State Building, and Political Change in Eurasia (with a focus on Caucasia) (119776)

Stephen Jones

2022 Spring (4 Credits) **Schedule:** F 1200 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Caucasia has in the past constantly changed its identity and geography. It inhabits an isthmus between the Black and Caspian Seas and is dominated by the Great Caucasus mountain range. On the periphery of competing empires, and straddling important trade routes, the region has always been geopolitically significant. Divided between the North Caucasus (part of the Russian Federation) and the South Caucasus (Georgia, Armenia and Azerbaijan), over the last 30 years, the new states in the region have experienced interethnic conflict, civil war, and repeated revolutions. What has made the state building process in the region so difficult? How has the issue of "stateness" intersected with the region's complicated multiethnic and multireligious heritage? We will examine the socio-economic transformations in the region over the last three decades, including class, religious and ethnic identities, and connect them to changes in the political system – focusing on political parties, legislatures, executive power, the judiciary, civil society, and the press.

The Politics of Europe (121735)

Daniel Ziblatt

2021 Fall (4 Credits) **Schedule:** WF 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Examines political and economic change in Europe focusing primarily on England, France, Germany, Italy, Netherlands, Scandinavia, Spain, and the European Union with some focus on eastern Europe. Topics include the rise of modern states, industrialization, revolutions, democratization, the rise of fascism, the European Union, the politics of the post communist transitions, and contemporary far-right anti-immigrant populist parties. The course analyzes these phenomena from a variety of different theoretical perspectives, including economic, institutionalist, and leadership-centered approaches.

Race, Film, and American Politics (211313)

Gloria Ayee

2022 Spring (4 Credits) **Schedule:** W 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

Race, Film, and American Politics **is a course that examines the multifaceted ways in which racial and ethnic identity has been represented in American film. Drawing on political science, sociology, anthropology, and film and media studies, we will assess the ways in which the mainstream media in the United States — focusing primarily on the Hollywood film industry — has portrayed different population groups and shaped our understanding of what it means to be American. The course will address issues of social stratification, and consider the intersection of identity and politics by analyzing historical shifts in cinematic representation in the United States.**

The Future of American Political Parties in Historical and Comparative Perspective (218259)

E. J. Dionne

Theda Skocpol

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 35

What is the state of the American political party system? Is it working? Is it in crisis? Are those even the right questions? This class will examine the current state of American political parties in historical and comparative perspective. It will deal with issues such as representation, organization, the role of parties in governance, and polarization around race, class, ethnicity, and immigration. We will examine stability, fragmentation, and realignment by bringing in lessons from party systems in other democratic nations.

Tech Science to Save the World (110053)

Latanya Sweeney

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

In this course, we "save the world" and teach you to do the same using scientific experimentation and writing. During the weeks of the semester, we explore ways to create and use technology to assess and solve real-world societal, political and governance problems. In a hands-on lab format, we jointly tackle three real-world technology-society clashes and provide timely solutions or interventions. As the weeks unfold, we relax the structure, so by the end of the semester, you design and implement your own experiments that have real-world impact. Students in this class have often published papers that have modified practices in big tech companies and inspired legal and regulatory change. This course assumes no computer science or data science background, includes a project fair at the end of the term, and has collaborative interactions with students in a similar course at the Harvard Kennedy School.

Tech Science: From Democracy to Technocracy and Back (207711)

Latanya Sweeney

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

We live in a new kind of technocracy –a society in which technology design dictates the rules that govern daily life. In the race to construct the latest gadget, app and online service, winning depends on rapid uptake and business success. Losing are social norms and democratic values. This course uses case studies to understand issues, introduces a formal framework to model and reason about technology-society conflicts and then demonstrates the power of scientific experimentation and ability to exploit paradigm shifts as means to a victorious future where society reaps the benefits of technological innovations without sacrificing critical values.

American Constitutional Law (128024)

Richard Fallon

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course provides an introduction to contemporary American constitutional law, with a principal focus on decisions by the Supreme Court of the US. Early assignments will deal largely with historical background to modern issues and with theoretical perspectives on the role of the judiciary in constitutional interpretation. Subsequent assignments will focus more on modern Supreme Court decisions and resulting doctrine. A recurring theme will involve processes of constitutional change and surrounding debates about the desirability and legitimacy of changed interpretations of a largely unchanged constitutional text. Topics to be studied include equal protection, due process, the freedom of speech, and the powers of Congress and the courts.

The American Presidency (114432)

Roger Porter

2021 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 45

This course analyzes the development and modern practice of presidential leadership in the United States by: (1) examining the evolution of the modern presidency, the process of presidential selection, and the structure of the presidency as an institution; (2) considering the ways in which presidents make decisions and seek to shape foreign, economic, and domestic policy; and (3) exploring the relationship of the presidency with other major government institutions, organized interest groups, the press, and the public. Its primary concern is with the political resources and constraints influencing the president's ability to provide leadership in the U.S. political system.

Dustin Tingley

Stephen Ansolabehere

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Climate change has evolved over the past four decades into one of the most pressing challenges to the sustainable development of human societies. This course takes a

realistic look at the effects of climate change and of climate change policies, at local, national, and international levels. How will climate change affect water resources, food supplies, and conflict? How will policies affect fossil-fuel dependent economies? How are people, companies, and governments responding? Climate politics reflect well-established environmental and economic perspectives, but also raise new, unique issues.

Controlling the World's Most Dangerous Weapons (147213)

Matthew Bunn

William Tobey

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Preventing nuclear war is one of the truly existential challenges facing the human species -- but the danger is rising, as tensions among nuclear powers increase, nuclear agreements are challenged, and new technologies and arms competitions create new uncertainties. From Iran to North Korea, from U.S.-Russian and U.S.-Chinese nuclear competition to Syria's deadly chemical assaults, decisions about nuclear, chemical, and biological weapons can make the difference between war or peace and between safety or grave danger for people around the world. This course will give students an understanding of these weapons and the global efforts to prevent their use and control their spread. The course covers policy tools from treaties and diplomacy to sanctions and war. This year, particular attention will be paid to emerging great-power competition and its implications for deterrence and arms control. Students will learn to use an integrated, risk-informed approach to assessing policy options when difficult choices need to be made in the face of large uncertainties. This will help prepare students for careers dealing with choices about these deadly weapons.

Evaluating the Impacts of Public Policies: How to Design and Implement Randomized Controlled Trials (218749)

Michael Hiscox

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In a randomized controlled trial, a policy intervention or program participation is allocated among study subjects by random assignment, then differences in subsequent outcomes (e.g., health, academic performance, income) are compared across the groups. Such trials have become a favored method for empirical research across the social sciences in recent years and the methodology has also altered the way governments approach development, health, welfare, and education policies. The aim of the course is to provide students with training in how to design and implement randomized controlled trials to evaluate policies and programs. We will discuss working with government and non-government partners, ethics, sampling, the use of online and digital platforms, and the analysis and interpretation of results.

International Political Economy (111906)

Jeffry Frieden

2021 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Analyzes the interaction of politics and economics in the international arena. Focuses on international trade, investment, monetary, and financial relations. Includes discussion of developed, developing, and formerly centrally-planned nations.

Central Asia in Global Politics (207984)

Nargis Kassenova

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The course is designed as an in-depth study of the place of Central Asia in Eurasian and global politics, and the policies of key external actors, such as Russia, the United States, China, the European Union, Turkey, Iran, Japan, South Korea and India, toward the region. Students are familiarized with the ways Central Asia has been

contextualized both in scholarly sources and media. We will dwell on the changing geopolitical dynamics of the region and analyze how developments there are intertwined with bigger contexts and stories, ranging from nuclear non-proliferation and democracy promotion to authoritarian consolidation and infrastructure development. We will define similarities and differences in the foreign policies of Central Asian states and discuss the future prospects of the region.

Central Challenges of American National Security, Strategy, and the Press (113210)

Graham Allison

David Sanger

Derek Reveron

2021 Fall (4 Credits) **Schedule:** W 0430 PM - 0715 PM

Instructor Permissions: Instructor **Enrollment Cap:** 23

Using a series of case studies from the front page, and from the most urgent and important issues on the U. S. national security agenda, this course will engage students in grappling with the hardest American national security challenges of the decade ahead. Issues range from Russiagate and the economic and military rise of China to Iran, Syria and the continuing war on terrorism. Assignments require strategic thinking: analyzing dynamics of issues and developing strategies in a government whose deliberations are discombobulated by leaks, reports about internal differences among policymakers, and press analyses. Students will learn to devise strategies and write Strategic Options Memos as participants in the policymaking process. Strategic Options Memos combine careful analysis and strategic imagination, on the one hand, with the necessity to communicate to major constituencies in order to sustain public support, on the other. A major subtheme of the course explores coping with a world where a pervasive press makes secrecy more often the exception than the rule. In each case, there will be exploration of how media coverage affects decision making, with an examination of leaks about Russia's cyber intervention in the 2016 election, WikiLeaks, and the Snowden case as well as the revelations about drones and secret, American-led cyberattacks, and other examples of the publication of classified information.

Quantitative Social Science Methods I (124780)

Gary King

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This class introduces students to quantitative methods and how they are applied to political science research. It has two overarching goals. First, we focus on the theory of statistical inference - using facts you know to learn about facts you don't know - so that you can truly understand a wide range of methods we introduce, feel comfortable using them in your research, digest new ones invented after class ends, implement them, apply them to your data, interpret the results, and explain them to others. Second, students learn how to publish novel substantive contributions in a scholarly journal. A substantial portion of those in this class publish a revised version of their class paper as their first scholarly journal article. Please see http://j.mp/G2001 for details.

Quantitative Social Science Methods II (111530)

Fernando Hidalgo

2022 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course provides a rigorous foundation necessary for quantitative research in the social sciences. After reviewing the basic probability theory, we offer a systematic introduction to the linear model and its variants -- the workhorse models for social scientists. We cover the classic linear regression model, least squares estimation and projection, fixed and random effects models, principal components analysis, instrumental variables, flexible regression models, and regularization for high dimensional data. In covering these topics, we deepen our knowledge of fundamental concepts in statistical inference while also demonstrating how these methods are applied in political science.

Class Notes: **data_science**

Recommended Prep:

Basic probability and statistical inference, familiarity with R.

Requirements: **Prerequisite: Gov 2001 or the permission of the instructor.**

Causal Inference with Applications (160566)

Matthew Blackwell

2021 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Substantive questions in empirical scientific and policy research are typically causal. This class introduces students to both statistical theory and the practice of causal inference. As theoretical frameworks, we discuss potential outcomes, causal graphs, randomization and model-based inference, sensitivity analysis, and partial identification. We also cover important methodological tools, including randomized experiments, regression discontinuity designs, matching, regression, instrumental variables, difference-in-differences, and dynamic causal models.

Course Notes:

Course Requirements: Gov 2001 and 2002 or the permission of the instructor.

Migration (218281)

Jennifer Hochschild

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Migration, both voluntary and involuntary, helps to shape the culture, society, economics, and politics of the modern world. It benefits both movers and receiving countries, but also entails considerable costs. The course begins with consideration of the broad sweep of population movements, and addresses various impacts on both migrants and receiving countries. It focuses primarily, however, on the politics of and political science research about contemporary population movements in the United States and other western nations. Topics include patterns of incorporation and exclusion, consequences of different legal statuses, and the differential impact of migrants' nationality, gender, and class status.

International Organization (148283)

Christina Davis

2021 Fall (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The number and scope of international organizations continues to expand so that there are few areas of international politics that are not regulated in some way by an international institution, whether informal norms or a formal organization. Why do states establish institutions and what determines their design and evolution? Do these institutions merely reflect underlying power and interests? These are some of the questions we will be asking in this course. It is an advanced research seminar that will introduce theories of international institutions, evaluate critical perspectives, and examine applications in security, economic, and environmental policy areas.

Teaching and Communicating Political Science (143023)

Thom Wall

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This is a required course for Government PhD students who are teaching in the department for the first time (typically G3s). The course meeting five times in the fall semester. Between meetings, you will have the chance to apply what you learn through peer observation, having your section videotaped, and watching your section with the Departmental Teaching Fellow. The ultimate goal of this course is to help you to become a good teacher and an effective speaker.

Course Notes:

Limited to and required of all first time teaching fellows in Government.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course

No FAINFO	300 or 3000 level class, do not generate FAINFO

History

Subject: History

History 12F Section: 01

Slavery in the Global Middle Ages (216000)

Dan Smail

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Slavery was a ubiquitous phenomenon in Europe, Africa, and Asia in the centuries between the fall of Rome and the rise of the Atlantic slave system. Using a mixture of primary and secondary readings, this course offers students a survey of the medieval forms of slavery in Europe, North Africa, the Middle East, and the Indian Ocean, with additional comparative readings where relevant. A major focus will be the distinctly gendered forms of slavery that emerged in Christian and Muslim lands in the Mediterranean between 1200 and 1500. Assessments will include participation, several short papers, and a capstone project.

The Great Divergence and Convergence: Disparity in the Global Economy, 1500-Present (218357)

Michael O'Sullivan

2022 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This undergraduate seminar explores two of the defining processes of global economic history: the 'Great Divergence' and the 'Great Convergence.' Historians of the Great Divergence study how and why northwestern Europe (and not China or India) broke through to self-sustaining economic growth around 1800, while students of the Great Convergence look at how other states and societies have tried to catch-up ever since. In this course we examine how historians of Japan, the Ottoman Empire, and other regions have debated Convergence/Divergence, and we will test the validity of their ideas for understanding disparity and parity in the global economy.

History 12P Section: 01

The History of Emotions (218109)

Derek Penslar

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The history of emotion is a subset of both social history (the study of how people construct the environment in which they live) and cultural history (the study of how humans make sense of that environment, themselves, and their experience.) Focusing on the world since 1750, this seminar will historicize emotion within specific social contexts and explore the intertwining of emotion, cognition, and judgment in public and private life. We will examine the fluidity of emotion across time and space, differing approaches from the humanities and social sciences to the study of emotion (hence the plural "histories" in the course title), and why some scholars distinguish affect from emotion. The seminar culminates in a 15-page research essay whose methodology engages substantively with the history of emotion.

History 12Q Section: 01

U.S. Latinx History (218308)

Kris Klein Hernandez

2022 Spring (4 Credits) **Schedule:** W 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar examines the origins, her/histories, and the cultural, social, and political struggles of U.S.-based Latinxs. What are the differences between the terms, "Latina/o," or "Hispanic," and what histories have they endured within the U.S.'s past? This course will explore emerging monographs within Latinx history while introducing students to the longue-durée trajectory of Latinx pasts from 1500s Mexico to the modern trajectories of Mexican and Puerto Rican migrations, 1850s filibustering in Central and South America, the formation of the U.S.- Mexico border and borderlands, and then pivot to studies of Caribbean Latinx pasts such as Cuban and Dominican migrations.

History 12S Section: 01

Biography and Autobiography in Renaissance Italy (218169)

James Hankins

2022 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The Italian Renaissance has long been known as an age which produced extraordinarily talented human beings, "Renaissance Men" in the gendered language of the time: artists, poets, scholars and philosophers. It was also famous for discovering "the individual": an autonomous, self-fashioning person, as distinct from a member of a social whole, bound by unchosen obligations to family, friends, patrons, religion, and country. This course will explore both concepts by examining a series of biographies and autobiographies, including works by and about Dante, Petrarch, Boccaccio, Cosimo de'Medici, Leon Battista Alberti, Pico della Mirandola, Leonardo da Vinci, Michelangelo, Vittoria Colonna, and Benvenuto Cellini.

The Social Life of Science in East Asia (218164)

Ian J. Miller

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Science and technology have very active social lives. They are present in nearly every aspect of modern life around the world, from the ways we feed ourselves to the ways we work, dress, and think. This class puts technology and science in their place, grounding them in specific environments and contexts. Our sites are all in East Asia—China, Korea, Taiwan, and especially Japan—with particular focus on the modern era,

when East Asian factories and markets reshaped global economies and ecologies. You will learn to think differently about "nature" and "animals", for example, to better understand what it meant to be "human" in 19th century Japan. You will explore mines, factories, fields, and households to gain a sense for the historiography of techno-science in the region. You will hear Gojira (aka Godzilla) roar and watch robots die as you think about "science" as both a product and producer of culture. No prior knowledge or East Asian language skills required, previous work in history or history of science courses a plus.

History 12V Section: 01

Identity and the Self in the Medieval Greek Tradition (218168)

Dimiter Angelov

Alexander Riehle

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar explores the construction and complexity of identities in the Greek tradition (300-1500). Students will read fascinating narratives, biographies, and autobiographies, and will learn how to analyze them from historical and literary perspectives. Questions for discussion include political, religious, and ethnic identity in late antiquity and Byzantium, the meaning of being "Roman" and "Greek," the plasticity of self-representation, and the interpretation of religion, gender, and class as both social and cultural categories.

Course Notes:

This course is also offered through the Classics Department as Classics 122. Credit may be earned for either Classics 122 or History 12V, but not both.

History 12W Section: 01

The History of Energy (218336)

Ian J. Miller

2021 Fall (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** 15

This course is a critical introduction to the history of energy. What roles has energy played in the creation

and destruction of societies, cultures, and economies? How have different forms of energy—biomass, coal, oil, electricity, nuclear, renewables—influenced historical processes? How has the concept of "energy" been understood in different eras and places, and how have those understandings defined political and philosophical horizons—the borders between science and society, choice and necessity, for example? As we explore the history of energy we will ask what it means to be historians in an age of fossil-fueled climate change and how a focus on energy's past may help us to envision new pathways into the future. No prior knowledge or pre-requisites. All undergraduates welcome.

Class Notes: **Students who do not meet course requirements need instructor's consent to enroll.**

The AIDS Epidemic (218794)

Johanna Folland

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The AIDS crisis has entered its fourth decade, and the questions surrounding this deadly epidemic remain as difficult as ever. Why did it take so long for wealthy countries to respond to HIV/AIDS? What impact did the outpouring of activist energy in the 1980s and 1990s have on scientific research, public awareness, and state policy? How do we explain profound differences in the ways communities around the world have tried to contain and fight this epidemic or to keep HIV-positive people from entering their borders? What has HIV/AIDS revealed about relationships between the industrialized world and the Global South, and how has it impacted those relationships? How has it affected our understanding of the way science, medical research, and the pharmaceutical industry should function? In this course we'll confront these questions via a combination of evidence-based analysis and empathetic attention to the stories of people who've been affected by these issues.

Capitalism, Crime, and Punishment in American History (218496)

Aaron Bekemeyer

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course explores how capitalism and the criminal justice system have shaped each other throughout U.S. history, since the mid-nineteenth century. You will investigate how social conflicts along lines of race, class, and labor fostered new notions of crime and criminality and fueled the development of police, court, and prison institutions—the carceral state—to control those marked as criminal. You will also examine the political economy of carceral institutions, assessing their systemic role in regulating capitalist property and political relations. Finally, the course encourages you to interrogate the relationship between and mutual evolution of White supremacy and capitalism.

The History of American Conservatism from William F. Buckley, Jr., to Donald Trump (218587)

Aaron Bekemeyer

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

What is conservatism: a commitment to tradition or the defense of privilege? How does conservatism relate to other forms of right-wing politics? In this course, you will take up these questions through the study of American conservatism. You will explore its anti-New Deal origins in the 1940s and 1950s and explain how conservatives captured of the Republican Party in the following decades. You will interrogate the relationship between mainstream conservatism and "far-right" groups like the John Birch Society and Q-Anon. And you will decide what, if anything, Trumpism has to do with the history of this influential political movement.

St. Louis from Lewis and Clark to Michael Brown (159640)

Walter Johnson

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

St. Louis was the epicenter of American empire in the nineteenth century: the point of embarkation for

Lewis and Clark; the military headquarters for U.S. Indian wars. It was likewise central to the history of slavery: from the Missouri Compromise to Dred Scott. The city's intertwining of the history of empire and race continued through the twentieth century in its prominent role in the defense industry as well as the history of segregation, urban "redevelopment," and police violence. How does the global capitalist and imperialist history of St. Louis relate to its recalcitrant inequality, structural racism, and endemic violence?

Conquering Pandemics: Medicine and the State in the Effort to Control Disease (218463)

John Mulhall

2022 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

From the ancient world to the present, two actors have played a central role in humanity's struggle to control disease: governing authorities and medical professionals. This course traces the interaction of medicine and the state, broadly conceived, through case studies of some of history's most catastrophic pandemics, including the Justinianic Plague, the Black Death, eighteenth-century smallpox, HIV/AIDS and COVID-19. Through this longue durée approach to the history of pandemics, we will be able to study a wide range of possible relationships between the state and the medical profession as both respond, or fail to respond, to disease crises. By the close of the course, students will be in a position to address the failures and successes of modern governments to current disease crises, informed by the hard-won lessons of the past.

Between East Asia and the Americas: Migration, Diaspora, Empire (218358)

John Hayashi

2021 Fall (4 Credits) **Schedule:** T 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

In this seminar, we will examine intersections between Asian and Asian American history through a focus on the lives of men and women who migrated from East Asia to the Americas in the nineteenth and twentieth centuries. Readings will examine migration from the perspectives of both sending and receiving communities and track transformations across Asian exclusion, Chinese revolution, Japanese American incarceration, and Korean independence. By putting migrants at the center of discussions and assignments on empire-building, race-making, and the rise of nationalism, we will see how these individuals linked and transformed societies on both sides of the Pacific.

Modern Iran: From Empires and Revolutions to the Everyday (218307)

Belle Cheves

2022 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar surveys Iranian history from the Safavid Empire (1501-1722) to the 2009 Green Movement, emphasizing understanding different approaches to history -- from political and economic to social and cultural histories. Moving chronologically, each week will address a different era or historical moment through primary sources and two to three scholarly approaches, striking a balance between surveying broad historical trajectories and taking a deep dive into understanding experiences of particular historical moments, as well as the everyday. Students will achieve an understanding of modern Iranian history, and of how historical questions can be framed.

The Challenge of Making America Modern (218888)

Lizabeth Cohen

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Before and after World War II, and with greater intensity thereafter, Americans anticipated building a modern society of shared material prosperity and political equality. In particular, a well-paid working class was promised a middle-class lifestyle of home ownership, consumer abundance, and increasing leisure. Towards this goal, new highways, housing developments, shopping malls, and chain stores transformed the American physical landscape. The results, however, were mixed, varying according to people's race, gender, occupation, and location. And by the last quarter of the 20th century, as the nation deindustrialized and a low-paying service sector expanded, inequalities grew, with significant economic, social, and political impacts. This seminar will explore these themes through primary and secondary sources. Students will investigate aspects of the topic in their own research papers.

American Indian History in Four Acts (156667)

Philip Deloria

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Both scholars and tribal people (not mutually exclusive!) have found it useful to structure American Indian history around four broad chronological categories emerging from the formation of United States Indian policy: *Treatymaking, Indian Removal, Land Allotment, and Self-Determination*. This seminar will use this "four acts" structure to offer a broad overview of American Indian history, while also considering the limitations of such category-making, including the decentering of Indian people and the blunting of historical complexity. Engaged with primary sources and historiography, the course will also allow students to engage in original research in the field of American Indian history.

"What is Intellectual History?" (109927)

Ann Blair

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Intellectual historians study almost every period, place, and theme in human history: from classical times to the present, from Asia to the Americas, by examining philosophy and religion, social and political thought, literature and art, and other expressions of human agency and intention that range from ancient epics to graphic novels. This section will draw examples from a wide range of moments and regions to ask how intellectual history has developed as a field, what methods it uses, and how it can be distinguished from other forms of history even as it informs debates of interest to all historians.

Course Notes:

Required of all History concentrators and offered every spring semester. Typically taken in the spring term of sophomore year, but first-semester sophomores planning to concentrate in History are encouraged to take it at the first opportunity. Open to students taking a secondary field in History and to students in other concentrations (space permitting). This course may not be audited; it may not be taken Pass/Fail for concentration credit. It enrolls prior to shopping period through the History concentration. Please contact the ADUS in History or the admin tutor in History 97 if you wish to enroll without being a regular-sequence concentrator in History, preferably by Thanksgiving.

"What is Urban History?" (110445)

Lizabeth Cohen

2022 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The COVID-19 crisis and its economic fallout have directed new attention to the viability of cities in the United States. This seminar will explore the methods, sources, and ideas historians have employed to understand the evolution and significance of American urban environments. How central have cities been to American identity? What changes have taken place in the way cities have related to their larger metropolitan areas? How have ethnicity, race, gender, and sexuality played out in the urban experience? What impact have cities had on the health of the American environment? Questions like these will drive this seminar as students also undertake their own research into a particular dimension of city life.

"What is Family History?" (160421)

Jane Kamensky

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Every family has a history; every past actor had a family. This section of History 97 investigates the practices and purposes of family history, an analytic frame that opens some of the most challenging topics in contemporary life. We will explore primary sources ranging from diaries and photographs to party platforms and will survey methods ranging from demography to cultural history to biography. Our topics will include the Black family in slavery and freedom, the meanings of marriage, and the contested relationship between the household and the state. In addition to tracing the contours of family life across a wide array of times and places, we will investigate the ebbs and flows of family history itself, including the worldwide boom in amateur genealogy today.

Course Notes:

"What is International History?" (207519)

Erez Manela

2022 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Relations between states define some of the most important aspects of human history, including major wars, trade relations, and movements of people, ideas, and cultural productions. States, of course, have been important actors in this history, but so have other types of actors, such as international organizations, NGOs, missionary groups, philanthropic foundations, and transnational movements. In this course, we will explore major events, themes, and approaches in international history, all with the goal of better understanding how international interactions have shaped human history and experiences across time.

Course Notes:

"What is Military History?" (218153)

Derek Penslar

2022 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Military history studies the context, instruments, causes, course, and outcome of armed conflict. Its blending of discrete events such as battles and wars with the broad socio-political environment in which those events take place makes the study of military history an ideal means for initiating students into historical thinking, research methodology, and writing. This course approaches military history through not only traditional categories such as state power and interest but also perspectives of race, gender, and culture. We demonstrate the capaciousness of the historical discipline through the adoption for the study of war and the military of concepts from international relations and psychology and the use of sources ranging from military theory to the life-writing of ordinary soldiers and their families.

Course Notes:

The Making of the Modern Middle East (212665)

Rosie Bsheer

2022 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

How was the region of North Africa and West Asia between the Atlantic and Central Asia constructed, physically and discursively, as "the Middle East"? What were the major local, regional, and global events that have most profoundly affected the political, social, cultural, and intellectual realities of the region since the mid-eighteenth century? Throughout the semester, we will draw on interdisciplinary readings to think critically about these and related questions about the challenges of studying the modern Middle East, the politics of modernity, Ottoman reform, the formation of modern nation states, colonialism and imperialism, social and intellectual movements, petro-states in global perspective, and Islam and politics.

Course Notes:

No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and first-years are welcome.

Coffee and the Nighttime: History and Politics, 1400-2020 (207532)

Cemal Kafadar

2022 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Since the fifteenth century, individuals and societies in different parts of the world adopted a gradually but unmistakably quickening tempo in their everyday lives and started to make more uses of the nighttime –for socializing, for entertainment, and for work. In this reconfiguration of the architecture of day and night, people turned to various psychotropic substances such as coffee to help them better manipulate times of activity and repose. They have also created new social institutions such as coffeehouses, which turned into public spaces for engagement with new forms of arts and politics. The course offers a history of these developments until our own time of "living 24/7" in terms of their social, economic and political consequences. Biological aspects such as addiction and pressures on our circadian rhythms will also be explored in the context of histories of sleep and nocturnal activity.

Rise and Fall of Postwar Japan (124213)

Andrew Gordon

2021 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Examines Japan's rise from the ashes of wartime defeat to global economic power and subsequent stagnation, with primary focus on society and economy. Considers the value and the limits of a narrative of "rise and fall" as the framework for understanding the 75 years since World War II, with focus on trends in gender roles, social (in)equality, and human impact on the environment. Asks how have people in postwar Japan, and the government, explained to themselves and the world the previous embrace of empire and war.

First Empires: Power and Propaganda in the Ancient World (159593)

Gabe Pizzorno

2022 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course traces the continuum of socio-political and cultural developments in the Near East that led, over the course of three millennia, from stateless societies to the emergence of Assyria as the first empire in history. The class focuses on the long-term history of power centralisation, and the role of ideology and propaganda in overcoming resistance to this concentration of authority. The course material covers a broad evidentiary and chronological range. We will employ textual, visual, and archaeological sources to explore the evolution of the political and cultural landscape in the Near East and the Mediterranean, from the emergence of the first city-states in the late fourth millennium BCE to the early development of Roman imperial ideology around the start of the Common Era.

The New Science of the Human Past: Case Studies at the Cutting Edge (212671)

Michael McCormick

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Science is powering History into a revolutionary age of discovery through microarchaeology. We will learn how ancient DNA reveals our ancestors' migrations out of Africa and across the globe and recovers ancient pathogens and their impact from Rome to the Black Death and 16th-century Mexico; how paleoclimate

science reconstructs ancient environments from natural proxies (ice cores) and historical records; and how IT changes everything from shipwrecks to Roman coins, via medieval manuscripts. We'll explore the new archaeoscience as the discoveries unfold by reading, discussing, and doing, from ancient genomes to tree rings, from Roman coins to ancient pots, and more.

Course Notes:

No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and first-years are welcome.

Introduction to Islamic History: From the Rise of Islam to the Mongol Conquests, 620-1258 (218544)

Cemal Kafadar

2021 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The course will examine multiple themes in Islamic history during the period indicated. It will introduce students to early and medieval Islam in its Near Eastern setting and treat with admittedly less depth the subsequent advent of Islam in such geographies as North Africa, Spain, India, and Central Asia. Select primary sources (in translation) will be used to illuminate the students' understanding of certain themes in the cultural, intellectual, and social history of Islamic societies, including relations between different ethnic and sectarian groups, the role(s) of women, sexuality, as well as tensions and interactions with the non-Islamic world.

U.S. Foreign Policy in a Global Age (160977)

Fredrik Logevall

2022 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

The United States is the most powerful player on the international scene today, and is unlikely to relinquish that position any time soon. Understanding how and why this condition arose, and what it means for world affairs today, is our concern in this course. The emphasis is on U.S. policymaking over the past century, with due attention to the international and domestic political context in which decisions were made. Issues to be explored include the tension between isolationism and interventionism and between unilateralism and

multilateralism; the emergence of the U.S. as a superpower; the Soviet-American confrontation; the rise of presidential power in foreign affairs; the wars in Iraq and Afghanistan; and the nature of American power in today's world.

Course Notes: **Offered jointly with the Kennedy School as IGA-217. The enrollment limit for FAS students is 50.**

The Global Cold War (218602)

Johanna Folland

2021 Fall (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The Cold War permeated seemingly every aspect of global politics in the latter half of the twentieth century, and its legacies are still with us today. This conflict, moreover, extended far beyond the Soviet-American nuclear rivalry at its core. In this course we will examine the origins, vicissitudes, and lasting impacts of the Cold War with an emphasis on the view from the decolonizing world. Using a wide range of course materials including cutting-edge scholarly research as well as declassified documents, macroeconomic data, memoirs, films, popular music, archival radio broadcasts, and graphic novels, we'll look at the ways in which Cold War divisions shaped – and were shaped by – the course of globalization, geopolitics, science, technology, art, diplomacy, environmental governance, and revolutionary movements around the world.

Postwar Germanies (218795)

Johanna Folland

2022 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In 1945, Germany lay in ruins. Within a few short years, however, two distinct postwar German states emerged in East and West, their reconstruction efforts fueled by Cold War imperatives. This course will follow divided Germany through four decades of upheaval and change, with special attention to the transformations experienced both by the liberal democratic West and by the state-socialist East in an increasingly multicultural Europe and a rapidly globalizing world. We'll then consider the history and politics of the reunified Berlin Republic since its emergence in 1990, with an eye toward understanding Germany's role in our present-day world.

The Great Migration: The Exodus that Transformed Black America and the United States (218495)

Aaron Bekemeyer

2021 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores the history of the Great Migration, in which millions of African Americans moved from the U.S. South to the urban North and West during and after World War I and World War I. You will trace the Migration from its origins to its completion and reversal in the 1970s. You will learn how it transformed not only Black life and culture but also American society and politics, from the Black Freedom Struggle to the rise of mass incarceration. Finally, you will explore the connections between the Great Migration and other forms of migration within the African diaspora.

German History from Bismarck to Hitler (110285)

Alison Frank Johnson

2021 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

German History loomed like a specter over the twentieth century. In the twenty-first century, Americans have been debating the relevance and legitimacy of comparisons between German history and our contemporary world. How useful is German history for understanding our current moment? How might our present-day concerns distort what we see in the past? This course will examine the history of Germans in Europe and elsewhere, starting with the revolutions of 1848 and ending with the separation of Austria, West Germany, and East Germany following the Second World War. Themes will be war, insurrection, and terrorism, revolution and counter-revolution, gender and sexuality, reform, violence, anti-Semitism, racial thinking and racism, and migration.

Course Notes:

This course is also offered through the German Department as German 143. Credit may be earned for either German 143 or History 1265, but not both.
No prior college level History is required or assumed. Students seeking to fulfill their Social Sciences distribution requirement and first-years are welcome.

Democracy: The Long View and the Bumpy History (120921)

Alex Keyssar

2021 Fall (4 Credits) **Schedule:** TR 0430 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 8

This course will explore key episodes and turning points in the history of democracy from ancient Athens to the present. It is shaped by two overarching and compelling questions: What circumstances, conditions, and forces are conducive to the development, deepening, and preservation of democratic ideas, values,

and institutions? And conversely, what are the conditions or forces that tend to inhibit or threaten the emergence, strengthening, or even survival of democracy? Among the historical episodes to be examined are: ancient Greece and the Near East; the American Revolution; Europe during industrialization; Latin America in the 19th and 20th centuries; India and Pakistan; the "third wave" of democratization; and the challenges facing democratization in the last thirty years.

Course Notes:

Offered jointly with the Kennedy School as DPI 703. The enrollment for FAS students is 8.

West Africa from 1800 to the Present (140979)

Emmanuel Akyeampong

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The course explores the internal dynamics of West African states from 1800, and West Africa's relations with the wider world. Innovations in science, technology and finance made the 19th century an era of social and economic opportunity and of political experimentation; a phase curtailed by European imperialism. The course examines African perspectives on colonialism, the two world wars, nationalism, and the transfer of political power. We will review post-colonial political economies and the search for workable political and economic models.

The American Revolution (203018)

Jane Kamensky

2021 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

How, why, by whom, and for what was the United States created? How do the nation's origins—in a bloody civil war, and in a politics marked both by soaring promises and glaring faults—shape America today? This course explores the causes, experience, and consequences of the American Revolution, the conflict war that birthed the United States, among many other results. Treating the conflict as a multi-sided and multi-sited struggle, our vantage point will range among the thirteen rebellious colonies of the Atlantic seaboard, the thirteen other colonies that comprised Britain's America, and the vast stretches of the North American mainland that lay outside Britain's domain, but were nonetheless embroiled in the war. We will also take in the view from London and elsewhere around the globe, as America's revolution triggered realignments across Europe, Africa, and Asia.

Our inquiry will center on the unraveling of British America in the 1760s and 1770s, on the war years of 1775-1784, and on the first tentative steps toward nation building in the late 1770s and early 1780s. We will try, as much as possible, to view history forward rather than backward, exploring contingencies, interdependencies, possibilities, and roads not taken. We will also devote considerable time to pondering what it means to own the American Revolution in contemporary civic society: not only to admit the fissures of the founding era, but also to make good its still unrealized promises. Your final projects will ask you to connect primary-source research and your mastery of our assigned readings to various places the American Revolution lives in the twenty-first century, from high school classrooms to theatrical productions to monuments to museum exhibitions.

Course Notes:

Our format consists of three whole-class meetings, taught in hybrid lecture / breakout discussion mode, followed by one laboratory session, taught in small groups by the teaching fellow. These varied active learning formats are related to the content of the course. Rather than absorbing a pre-chewed narrative of the American Revolution, students in History 1776 will contest various perspectives, build their own interpretations, and carry those interpretations forward from the classroom to the public sphere.

The Imperial Map: Geographic Information in the Age of Empire (213281)

Kelly A. O'Neill

2022 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Maps and empires have entangled histories. In this course we will examine the evolution of geographic information technology and the way imperial states and subjects used atlases, boundary surveys, town plans, and topographical maps to manage information flows and generate political and cultural capital. We will learn to speak the language of maps: particularly maps of the Russian Empire. Through units devoted to Siberia, the Black Sea, and European Russia, we will reconstruct the history of an empire through maps held right here at Harvard.

Re-Wilding Harvard (216271)

Joyce Chaplin

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This class uses history to make a difference in the natural world. Rewilding returns a habitat to an earlier form to promote biodiversity; urban rewilding does this within urban spaces. In this class, we will research historical and cultural definitions of wilderness and landscape, identify what precolonialist habitats were like in New England, survey how such places might be restored, and then contribute to a ten-year urban rewilding plan for Harvard, including an outdoor exhibit for the Harvard Museums of Science and Culture and a GIS reconstruction of Harvard's landscape history. The class is open to both graduate students and undergraduates in a broad and relevant range of disciplines and will fulfill conference course credit in the History Department.

Introduction to Digital History (156564)

Gabe Pizzorno

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course trains students in a range of digital methods used for the acquisition, analysis, and visualization of data in the context of historical research. Beyond developing practical skills, students will learn how to critically evaluate the potential and limitations of new technologies, and how to integrate them into their work in a careful, theoretically informed way.

Understanding Political Economy: The View from the Middle East, and South Asia: Seminar (218154)

Rosie Bsheer

2022 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course is a critical history of political economy that centers on the Middle East and South Asia. It begins with readings in classical political economy, liberalism, and Enlightenment thought, coupled with colonial, postcolonial, and feminist critiques of these readings. It does so in order to critically trace the development of the field of economics and how it has shaped everyday political, social, material, and environmental life around the world since the 1750s. The course introduces major topics and debates in twentieth-century political economy, paying special attention to questions of private property, the making and naturalizing of the modern economy, and the relationship between capitalism and the environment, imperialism, Islamism, financialization, and development economics.

Readings in Native American and Indigenous Studies: Seminar (206979)

Philip Deloria

2021 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course offers a survey of the historiography of Native American and Indigenous Studies. Centered on six themes—Power and the Middle Ground, Borderlands, Settler Colonialism and Sovereignty, Race and Slavery, Modernity and Futurity, and Global and Comparative Indigeneity—the course is designed to allow explorations into additional terrain, including gender and sexuality, law and policy, and comparative ethnic studies, among others. Core readings will focus on recently published scholarship. To explore field trajectories, scholarly exchange, and indigenous politics, members of the class will research and write historiographical essays that will be shared collectively, and form the basis for seminar discussion.

Serhii Plokhii

2021 Fall (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course is an introduction to major themes and debates in the early modern and modern history of the "other Europe." Its main focus is on the histories of European Russia, Ukraine, Belarus, Lithuania, and Poland. Readings discuss international and political developments in the region and their impact on the formation of imperial, national, religious and cultural identities from the rise of Reformation to the collapse of Communism. The course is designed to prepare students for a general exam field in East European history. It is open to graduate and advanced undergraduate students working on a senior thesis.

Legal History Workshop: Intimacy and the Law (109873)

Kenneth Mack

Anna Lvovsky

2022 Spring (4 Credits) **Schedule:** W 0415 PM - 0615 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This workshop aims to provide students with a historical perspective on the intersections between law and society in the United States. Assignments and class discussions will feature a mix of major works in the field of legal history, introducing students to critical methodologies and historiographical debates, and workshop presentations by leading historians writing on the legal regulation of intimacy, including such topics as abortion rights, marriage, sexuality, and family life. Further information about the topics to be covered will be available closer to the Spring semester.

Course Notes:

Law students will have a choice of enrolling in the workshop for two or three credits. Those who choose to write a substantial paper will receive three credits upon successful completion of the course; those who do not complete substantial papers will receive two credits. All FAS graduate students who enroll in the workshop must complete a substantial paper and will receive four credits upon successful completion of the course. Offered jointly with the Law School as LAW 2596. The enrollment cap for FAS students is 15.

History of American Economic Regulation: Seminar (156896)

Kenneth Mack

2022 Spring (4 Credits) **Schedule:** RF 1045 AM - 1215 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course examines the history of capitalism in America, viewed through the lens of debates over regulation of economic activity. Beginning in the early days of the republic, it will examine the role of law in capitalist development, focusing on debates over the regulation of corporations, banking and the financial system, race and capitalism, competition policy, and administrative law, continuing through the regulatory reforms of the New Deal. It will then examine movements for deregulation, the roots of the financial crisis of 2007-08, and its aftermath up to the present day. The course will examine the social, institutional and intellectual history of economic regulation.

Course Notes:

Offered jointly with the Law School as LAW 2167. The enrollment limit for FAS students is 20. This course will meet at the Harvard Law School.

Sven Beckert

Evelynn Hammonds

2021 Fall (2 Credits) **Schedule:** W 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

The workshop will bring together scholars and students to systematically reflect on how such research can be elevated by considering how it contributes to a rethinking of the nation's history as a whole. Selected scholars will share work in progress and take stock of the moment in which it emerged. We will consider the uses of these histories including the engagement of broader publics and addressing contemporary inequalities. The workshop will encourage further research on the relationship between universities and slavery, still in early stages. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Comparative Slavery & the Law: Africa, Latin America, & the US: Seminar (159554)

Emmanuel Akyeampong

Alejandro de la Fuente

2021 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This seminar surveys the booming historiographies of slavery and the law in Latin America, the United States, and Africa. Earlier generations of scholars relied heavily on European legal traditions to draw sharp contrasts between U.S. and Latin American slavery. The most recent scholarship, however, approaches the legal history of slavery through slaves' legal initiatives and actions. These initiatives were probably informed by the Africans' legal cultures, as many of them came from societies where slavery was practiced. Our seminar puts African legal regimes (customary law, Islamic law) at the center of our explorations concerning slaves' legal actions in the Americas.

Introduction to American Studies (218309)

Philip Deloria

2022 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

American Studies is an interdisciplinary effort to understand the complicated social and cultural lives of people in—and in relation to—the United States, both past and present. The intersections of History and Literature shape much of American Studies, but the field has also been marked by forays into music, arts, ethnic studies, economics, anthropology, journalism, and even forestry and climate science. This course will introduce students to the history and methods of the field, exploring evocative cases with a range of guest faculty.

Open to all undergraduates; first-year students are especially encouraged to enroll.

The Postwar American Road Narrative (108091)

Patrick Whitmarsh

2021 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Traditionally, the postwar American road narrative has been associated with figures like Jack Kerouac and Hunter S. Thompson, and seen as representing a modern libertinism inseparable from white privilege and angst. As we will see in this seminar, white male writers and drivers do not have a monopoly on the road; it has also been a powerful element of storytelling for writers of color. The imagery and experience of the road assume very different meanings for different people; what is an opportunity for carefree adventure for one person is a source of precarity for another. Looking at works such as Jesmyn Ward's novel Sing, Unburied, Sing (2017), Misha Green's 2020 adaptation of Lovecraft Country for HBO, and contemporary music by Lil Nas X and Beyoncé, we will explore topics of travel, transience, migration, and dislocation in post-World War II American fiction and culture. The Federal Aid Highway Act of 1956 and the postwar boom in automobility coincided not only with the expansion of the American suburbs and the oil industry, but with the intensification of the Civil Rights movement. Taking this intersection as its historical starting point, our course considers the racial legacies of the United States through the framework of the road, arriving at a broader understanding of the injustices that persist today, including police brutality, gentrification, and environmental racism.

American Speeches (212821)

Drew Faust

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course will explore speeches across the sweep of American history, examining them both as windows into their own era and as texts created to inform and persuade. We will ask who speaks and how and the ways that has evolved over time, and we will seek to identify the enduring and changing elements of effective oratory from Jonathan Edwards to Frederick Douglass to contemporary commencement addresses and campaign speeches. Assignments include the composition and delivery of a speech.

Red Scares (212825)

Steven Biel

Lauren Kaminsky

2022 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The specter that haunted Europe when the *Communist Manifesto* was published in 1848 continues to shape American political discourse to this day. "From the very get-go," wrote a Mississippi newspaper columnist recently, "COVID was used by the leftists in this country to seize power, fundamentally change our nation and usher in totalitarian socialism." This course reveals how charges of fealty to radical "foreign" ideologies have operated as rhetorical and political strategies for much of U.S. history. The so-called First Red Scare, precipitated by World War I and the Bolshevik Revolution in Russia, followed on fears and persecution of anarchists, socialists, and other labor radicals in the late-19th and early-20th centuries. In the Second Red Scare after World War II, the House Un-American Activities Committee (HUAC), Senator Joseph McCarthy, the FBI, and others conducted widespread investigations of suspected communists and purged "subversives" from all levels of government, the entertainment industry, public and private schools, colleges and universities. Beginning with mid 19th-century fears that revolutionary uprisings could spread from Europe to the United States, "Red Scares" explores anxieties about subversion and perversion in American politics and culture. Readings will include texts by Karl Marx, Lucy Parsons, Emma Goldman, Eugene V. Debs, Sacco and Vanzetti, John Dos Passos, Claude McKay, Langston Hughes, Richard Wright, and Lillian Hellman, as well as films such as *On the Waterfront*, *My Son John*, *Salt of the Earth*, and *The Manchurian Candidate*.

Too Soon? Comedy in Europe's Tragic Twentieth Century (213374)

Kathryn Brackney

2022 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

In the first half the twentieth century, Europe was the site of two wars that depleted the world's population, dislocated millions, and stripped once diverse regions of the continent of their minority populations. Later, even as Europe managed to rebuild, progress occurred under the shadow of two hegemonic superpowers in possession of weapons capable of incinerating both sides of the Iron Curtain. In a 1966 profile of Bertolt Brecht for *The New Yorker*, Hannah Arendt wrote of "the terrible freshness of the post-war world"—in which all that poets could do in the rubble was laugh at the sky that remained. As Europe destroyed and reinvented itself through the twentieth century, how did humor serve as a tool for working through all this tragedy? This course will draw on sources in various media to examine how comedy can be a means of not just coping with history but investigating it. We will consider humor as a tool of political critique, historical analysis, and mourning and pay particular attention to the boundaries and historicity of taste. Assigned readings and films include works by Terry Eagleton, Hannah Arendt, Karel Čapek, Charlie Chaplin, Milos Forman, and Yasemin Şamdereli.

Islam in Early America (216231)

Arianne Urus

2021 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Muslims first arrived on the shores of the Americas at the turn of the sixteenth century, yet their long history in the western hemisphere has been largely forgotten. For centuries Islam was the second-most widely practiced monotheistic religion in the Americas, after Catholicism; some Muslims came from Spain to escape persecution at the hands of the Inquisition for continuing to practice their religion, while others were taken captive and forcibly crammed into the hulls of ships on the West African coast and transported across the Atlantic, where, in 1522, they participated in the first uprising of enslaved men and women in the Americas on a sugar plantation on the island of Hispaniola (the site of present-day Haiti and the Dominican Republic). From the very beginning of European imperialism in the Atlantic World, Muslims were integral to the history of what scholars call "Vast Early America." Their stories are entwined with the larger threads of

early American history including those of missionary work, European interimperial conflict, slavery, the genocide of Native peoples, and capitalism. This course unfolds in four units that will take us from the first early modern European encounters with Islam to the stories of Muslim agents of European conquest and Muslim resistance to enslavement in the Caribbean and US South, to how the Founding Fathers thought about Islam and the status of Muslims in the early Republic. We will work with sources ranging from Laila Lalami's 2014 novel, The Moor's Account, to Thomas Jefferson's copy of the Qur'an, as well as the autobiography of Omar Ibn Said written in Arabic from a jail cell in South Carolina and Rhiannon Gidden's new opera based on Said's story.

Espionage: A Cultural History (216232)

Duncan White

2021 Fall (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Over the course of the twentieth century the spy thriller became a central part of our culture, changing the way people imagined how the state operates in secret. Why are we attracted to stories of paranoia and conspiracy? What is the history of this genre, and how is it intertwined with the history of espionage? Does espionage fiction glamorize the work of spy agencies? Or help challenge it? The course is divided into four units. The first will consider the origins of the spy thriller and how the obsession with espionage fiction was connected to the creation of the Secret Services in Britain, reading stories by Baroness Orczy, Arthur Conan Doyle, and Rudyard Kipling. The second unit shift its focus to British spies in the Cold War and, against the backdrop of Soviet penetration of MI5 and MI6, will explore the different ideas of espionage offered by the glamor of James Bond and the "insider" fiction of Elizabeth Bowen and John le Carré. The third unit focuses on American spying, and considers the way the CIA has been represented on page and screen, and the relationship of these fictions to the actual operations of the agency, including political subversion, covert action, and targeted assassinations. In doing so we will also consider how writers like Viet Thanh Nguyen, Lauren Wilkinson, and Mohsin Hamid have challenged the conventions of the spy thriller genre. In the final unit we will explore the role of espionage in the "War on Terror," and reflect on how surveillance techniques developed by intelligence agencies have become part of our everyday lives.

American Noir (216233)

Angela Allan

2021 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Midcentury America saw the explosion of a genre on the page and screen—the hardboiled crime novel and the film noir. Noir represented a foil to postwar optimism: its protagonists were cynics and loners. Filled with lurid crimes and deeds, noir suggested a dark underbelly to American society and its promises of domestic fulfillment, economic stability, and institutional support. Husbands and wives plotted each other's murders; the city streets beckoned with sin; and the police were no match for the private detective. Yet even while these stories foregrounded alienation, they had a mass cultural appeal to American audiences. This class will examine noir not only as an aesthetic—brutality disguised in beauty—but also as a social commentary on American life in the 1940s and 50s. How did cultural conceptions of the tough guy and femme fatale reflect or shape the gender and sexual politics of the era? How did noir speak to anxieties surrounding race, ethnicity, and social class? And how did America's anti-heroes reflect a changing conception of nationhood and citizenship in the atomic age? By looking at cultural works like films, novels, and true crime pieces in the context of postwar psychology and sociology, we will consider what audiences' fascination with violence, murder, and deceit revealed about the American identity.

The Reinvention of New York City (216237)

Michael King

2021 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The recent history of New York City is one of crisis, resilience, and rebirth. From the terrorist attacks of 9/11 to the devastation of the pandemic, New Yorkers have experienced tragedy and reinvented their city in its aftermath. This is a cycle with a deeper history: in this course we will focus on how New York City reinvented itself in the Seventies and Eighties. On October 16, 1975, New York City was on the brink of bankruptcy. With nearly five hundred million dollars of debt due the next day and only thirty-four million in its bank, catastrophe seemed inevitable. Fortunately, the city was able to raise funds and avoid bankruptcy. Nevertheless, New York City was and had been a space on fire—both literally and figuratively speaking—for at least a decade prior. Landlords burned down buildings to collect insurance; Black, Latinx and LGBTQ communities fought for the right to claim space and protections. In the midst of these fires, however, many different communities seized upon cheap rent and abandoned spaces in order to use them as sites of profound community- and art-making. This course will explore the social and historical contexts under which the residents of New York City contended with precarity in order to create vibrant spaces of living. In order to understand how individuals and communities both understood and created the city around them, students will look at a wide variety of texts, including but not limited to songs, visual art, performance pieces, editorials, and oral histories. Students will be encouraged in how the New York City they know was shaped by this history and what lessons can be drawn from this period of unprecedented creativity as the city once again faces a precarious future.

Nuclear Imperialisms (216239)

Rebecca Hogue

2021 Fall (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course will examine nuclear narratives in global contexts as reminders and remainders of empire. Are nuclear futures only tied to whims of unpredictable world leaders, or are they already part of our daily realities? Whose stories of nuclear proliferation are told, and whose are suppressed? Drawing on government propaganda, activist writing, television, fiction, photography, poetry, and film from 1945 to the present, this course will explore the cultural and material legacies of radiation around the world. From American "atomic culture" of the 1940s and '50s to Cold War era peace movements in the Pacific Islands to nuclear disasters like Chernobyl and Fukushima, we will assess whether nuclear cultures have changed over time by using a place-based investigation of nuclear research, uranium mining, atomic bombs, "clean" energy, and anti-nuclear resistance. Course texts will include poetry by Kathy Jetnil-Kijiner and Craig Santos Perez, fiction by Ruth Ozeki and Robert Barclay, documentaries such as The Atomic Café and The Return of Navajo Boy, as well as popular film and television like Dr. Strangelove (1964), Star Trek (1967), and Godzilla (1954).

Prison Abolition (216326)

Thomas Dichter

2021 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Is prison abolition a serious proposal, an aspirational ideal, a trendy slogan, or a blueprint for social transformation? This interdisciplinary and community-engaged course situates the prison abolition movement in deep historical context and explores its current relation to the politics of criminal justice reform. We will study the movement's connections to slavery abolitionism, anti-lynching activism, Indigenous struggles for sovereignty, and the Black Power movement. We will examine the emergence of the modern prison abolitionist movement in the 1970s, as well as more recent developments concerning immigration detention, Black Lives Matter, and COVID-19. Our readings will include interdisciplinary scholarship on the carceral state in addition to protest writings and activist materials. A major component of the course will be collaborative activities and service with community organizations focused on incarceration and the criminal legal system, through which we will consider what prison abolitionist ideas might look like in action. There will be opportunities for dialogue with scholars and activists as we investigate prison abolition not as a singular policy, but as a rich and challenging set of questions for rethinking matters of violence, inequality, and social change.

The Rise of the Far Right in Europe (218271)

John Boonstra

2021 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Far-right movements have, in recent years, gained striking momentum across Europe. From France's anti-immigrant National Front and neo-Nazis in Germany to efforts to rehabilitate Franco and Mussolini in Spain and Italy, forces of extreme nationalism, xenophobia, and imperial nostalgia have increased in prominence as well as popularity. The current moment is not the first time that the continent has experienced a rise in right-wing extremism. Fascism, from the 1920s onward, offered violent, totalitarian solutions to the tensions of mass politics and populist resentment in polarized societies. How do today's reactionary political formations relate to their fascistic forebears? What social and cultural dynamics is each responding to, and, perhaps just as significantly, what historical legacies are they drawing on? In this seminar, we will ask, first, how the present wave of far-right parties in western and central Europe tapped into notions of national decline, instability, and changing demographics; second, what we can learn about these movements by studying histories of European fascism in France, Germany, Spain, and Italy; and finally, how these histories have been obscured and rehabilitated in different ways in each of these countries. By moving from contemporary cases of resurgent nationalist sentiment to their interwar predecessors and back again, and through a consideration of novels, films, historical documents, speeches, and monuments, among other sources, the course will seek to uncover how anxieties of migration, race, and empire—as well as changing roles of religion, gender, and nationhood—shaped political animosities and allegiances within the European Far Right.

Sound and Color: Music, Race, and US Cultural Politics (218272)

Lucy Caplan

2021 Fall (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Although race is often presumed to be a visual phenomenon, it is also created and produced through sound. But what does race sound like? What might we learn when we attune our ears to the music and noise that race makes in popular music, on the stage, and in literature? How can texts like songs, films, and novels both reinforce and challenge cultural hierarchies and arrangements of social power? This course explores the sonification of race and the racialization of sound, music, and noise in the United States from the late nineteenth century to the present. The first unit will consider examples ranging from blackface minstrel shows (the nineteenth-century nation's most popular form of entertainment) to the noise ordinances that governed sonic life in urban immigrant neighborhoods at the turn of the twentieth century. In the second unit, we turn our attention to two important postwar genres, the novel and the Broadway musical. Investigating works like Ralph Ellison's majestic Invisible Man (1952) and shows like West Side

Story (1957), we'll ask how mid-century artists and writers re-imagined the relationship between race and sound. The third and final unit focuses upon a selection of contemporary case studies; for instance, Pixar's Soul (2020), or the Afrofuturist worldmaking of Janelle Monáe. As we delve into these cultural texts, we'll listen closely to how they represent race in relation to other analytical categories such as gender, class, sexuality, and citizenship. In addition to developing skills in interdisciplinary analysis and close reading, students will also have the opportunity to pursue creative projects.

Migrants and Displacement in the Modern Middle East (218273)

Samuel Dolbee

2021 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course follows people who moved (or were made to move) in, to, or from the Middle East and North Africa between the late nineteenth century and the present. It brings together a diverse group, including enslaved people, religious pilgrims, nomads, genocide survivors, refugees, experts, migrant laborers, revolutionaries, exiles, and, indeed, no shortage of people who might fall into several of these categories. Through these different forms of mobility and displacement, the course will trace the end of the Ottoman Empire, European colonialism, and national liberation across the region. Relying on films, fiction, memoirs, music, podcasts, and poetry, the course will also shed light on how these historical events shaped everyday life: what food people ate, what music they listened to, and who they fell in love with. Thus while attending to structures of empire, the nation-state, and capitalism, the course always emphasizes how individuals struggled to make place their own.

Queer Latinx Borderlands (218274)

Thomas Conners

2021 Fall (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

What does Puerto Rican rapper Bad Bunny have to do with 16th century Mexico criminal archives? What does the Netflix series Pose (2018) have to do with the Treaty of Guadalupe Hidalgo (1848)? They converge in the queer borderlands, Chicana lesbian Gloria Anzaldúa's spatial framework. Just as border studies has taught us that such encounters and crossroads exist far beyond literal borders, so too does this course

delink from any geographical space, instead deploying Anzaldúa's framework to provide an account for two major arcs while centering gender and sexual non/normativity. First, how the competing Latin American and North American ideas about race have shaped Latinx communities since Spanish colonialism and through and beyond 19th and 20th century US imperialism have functioned in no small part through gender roles and sexual norms. Second, how queer Latinx writers, scholars, musicians, and filmmakers have responded to these pressures by daring to imagine beyond the constraints of racialized cis-heteromasculinity. Reading historical, archival, and legal documents to substantiate the former arc, and theoretical, literary, and filmic texts from Queer and Latinx Studies to analyze the latter, this seminar's queer borderlands encompass Central American, Chicanx, Cuban, DominiYork, Nuyorican, and South American histories and collectives to historicize Latinx's arrival at a crossroads and the horizons that lie before it.

Human Rights and Humanitarianism in the Modern World (218275)

Yan Slobodkin

2021 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Human rights and humanitarianism are fundamental to modern political ethics. Yet the moral consensus surrounding these terms obscures an often disturbing history. This course is an introduction to human rights and humanitarianism as frameworks for understanding European, imperial, and global history from the enlightenment to the present day. Rather than uncritically accepting a triumphalist narrative, we will explore how these concepts were constructed over time, asking how they were used in practice, whose interests they served, and how they enabled inequality and exclusion along axes of race, gender, class, and nationality even as they promised a more just world. We will consider a variety of theoretical approaches to the question of why we care about others, and analyze the role of these modes of care in transformative events and processes of modern history including the trans-Atlantic slave trade and its abolition in the first half of the 19th century, imperial expansion and decolonization from the late 19th century through the 1960s, 20th century genocides, and the end of South African apartheid in 1994. We will access this history through a mix of primary and secondary sources including theorists like Susan Sontag and Makau wa Mutua, novelists like Sindiwe Magona, and historical figures like Roger Casement and Mary Prince. Ultimately, we will come away from the course with a more nuanced understanding of the role of human rights and humanitarianism in pressing contemporary issues including immigration debates, racialized police violence, and unequal access to care during Covid.

The Global South Asian Diaspora (218276)

Vikrant Dadawala

2021 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Over the course of the nineteenth and twentieth centuries, people of South Asian heritage emigrated out of their ancestral homelands in vast numbers, giving rise to one of the world's largest and most geographically scattered diasporas. An estimated thirty million people of South Asian heritage live outside the Indian subcontinent today, with significant communities in the United Kingdom, the United States, the Caribbean, Southeast Asia, East Africa, and the Middle East. How and why did South Asians choose to settle in new countries? In what ways did the act of emigration transform their sense of religious, ethnic, caste, and racial identity? How did their lives become bound up with those of other displaced or colonized people – in Africa, the Caribbean, and in the Americas? This course is divided into two units. We will begin by analyzing the "old" South Asian diaspora in countries in Africa, the Caribbean, and Southeast Asia. Consulting a mix of primary sources from the colonial archives, historical scholarship, memoirs, and recent fiction, we will reconstruct the life-worlds of indentured laborers, sailors, soldiers, and migrant traders in the nineteenth century. The second unit shifts focus to more recent history: postcolonial migration from South Asian countries to the United States, United Kingdom and the Middle East. Reconstructing the history of immigration law in these countries, we will analyze memoirs, films, and literary texts that explore the ambiguous place of desis in the 'First world'. Besides celebrated contemporary writers like Salman Rushdie, Jhumpa Lahiri, and Mohsin Hamid, we will also engage with the work of lesser-known figures like Gaiutra Bahadur, Peggy Mohan, and M.G. Vassanji.
