FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 321

Structure and Function of ATP-dependent Chromatin Regulators in Human Cancer (156669)

Cigall Kadoch

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 324

Structure and Replication of DNA (115094)

Charles Richardson

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 324

Structure and Replication of DNA (115094)

Charles Richardson

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 325

Genomic Instability and Cancer Susceptibility (113667)

Alan D'Andrea

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 325

Genomic Instability and Cancer Susceptibility (113667)

Alan D'Andrea

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 328

Computational Analysis of Sequence Variation and Divergence (119840)

Shamil Sunyaev

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 328

Computational Analysis of Sequence Variation and Divergence (119840)

Shamil Sunyaev

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 329

Structure Biology of Cytoplasmic Signal Transduction (148041)

Michael Eck

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 329

Structure Biology of Cytoplasmic Signal Transduction (148041)

Michael Eck

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 330L

Protein aggregation and synaptic dysfunction (203803)

Dominic Walsh

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 330L

Protein aggregation and synaptic dysfunction (203803)

Dominic Walsh

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 331

Biochemistry and Biology of Neurodegenerative Diseases (117744)

Michael Wolfe

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 331

Biochemistry and Biology of Neurodegenerative Diseases (117744)

Michael Wolfe

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 333

Structural Biology of Mechanisms in Gene Regulation (110246)

Piotr Sliz

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 333

Structural Biology of Mechanisms in Gene Regulation (110246)

Piotr Sliz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 334

MicroRNA Functions in Cancers and Quiescence (127373)

Shobha Vasudevan

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 334

MicroRNA Functions in Cancers and Quiescence (127373)

Shobha Vasudevan

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 335

Biochemical and Genetic Analysis of Eukaryotic Gene Expression (122931)

Stephen Buratowski

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 335

Biochemical and Genetic Analysis of Eukaryotic Gene Expression (122931)

Stephen Buratowski

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 336

Molecular mechanisms of transmembrane signaling (160764)

Andrew Kruse

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 336

Molecular mechanisms of transmembrane signaling (160764)

Andrew Kruse

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 337

Drosophila Molecular Genetics (122426)

Welcome Bender

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 337

Drosophila Molecular Genetics (122426)

Welcome Bender

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 338

Gene Regulation in Yeast and Cancer (116302)

Kevin Struhl

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 338

Gene Regulation in Yeast and Cancer (116302)

Kevin Struhl

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 340

Biologically Active Small Molecules (118845)

Jon Clardy

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 340

Biologically Active Small Molecules (118845)

Jon Clardy

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 343

Molecular Genetics of Herpes Viruses (145027)

Donald Coen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 343

Molecular Genetics of Herpes Viruses (145027)

Donald Coen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 344

Molecular Pharmacology of Excitable Membranes (131357)

Gary Strichartz

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 344

Molecular Pharmacology of Excitable Membranes (131357)

Gary Strichartz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 345

Transcription Factors in Hematopoiesis and Leukemogenesis (120174)

Alan Cantor

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 345

Transcription Factors in Hematopoiesis and Leukemogenesis (120174)

Alan Cantor

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 349

Targeting Deregulated Apoptotic and Transcriptional Pathways in Cancer (122746)

Loren Walensky

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 349

Targeting Deregulated Apoptotic and Transcriptional Pathways in Cancer (122746)

Loren Walensky

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 352

Chemical Mediators in Inflammation and Resolution (119614)

Charles Serhan

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 352

Chemical Mediators in Inflammation and Resolution (119614)

Charles Serhan

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 353

Epigenomics and Chromatin Systems Biology (122334)

Yujiang (Geno) Shi

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 353

Epigenomics and Chromatin Systems Biology (122334)

Yujiang (Geno) Shi

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 355

Transcriptional Control of Hematopoiesis and Leukemia (122740)

Hanno Hock

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 355

Transcriptional Control of Hematopoiesis and Leukemia (122740)

Hanno Hock

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 356

NMR Spectroscopy of Proteins and Metabolites (148268)

Gerhard Wagner

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 356

NMR Spectroscopy of Proteins and Metabolites (148268)

Gerhard Wagner

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 358

Targeting Apoptosis Regulation in Cancer (122742)

Anthony Letai

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 358

Targeting Apoptosis Regulation in Cancer (122742)

Anthony Letai

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 359

Molecular Mechanisms of Signal Transduction (144995)

Elaine Elion

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 359

Molecular Mechanisms of Signal Transduction (144995)

Elaine Elion

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 360

Regeneration of Cartilage and Skeletal Muscle (120048)

Andrew Lassar

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 360

Regeneration of Cartilage and Skeletal Muscle (120048)

Andrew Lassar

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 361

X-Ray Crystallographic Studies of Viruses and Proteins (137505)

James Hogle

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 361

X-Ray Crystallographic Studies of Viruses and Proteins (137505)

James Hogle

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 362

Eukaryotic Survival Decisions (114726)

David Fisher

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 362

Eukaryotic Survival Decisions (114726)

David Fisher

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 363

Normal cell division mechanisms and cell division defects in cancer (114763)

David Pellman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 363

Normal cell division mechanisms and cell division defects in cancer (114763)

David Pellman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 366

Stem Cells in Disease and Development (119609)

George Daley

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 366

Stem Cells in Disease and Development (119609)

George Daley

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 370

Advanced Topics in Biological Chemistry and Molecular Pharmacology (114232)

David Cardozo

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit.

Course Notes:

Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 370

Advanced Topics in Biological Chemistry and Molecular Pharmacology (114232)

David Cardozo

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit.

Course Notes:

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 371

Maintenance of genome stability in S phase (115348)

Johannes Walter

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 371

Maintenance of genome stability in S phase (115348)

Johannes Walter

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 375

Biomolecular Nanotechnology (120627)

William Shih

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 375

Biomolecular Nanotechnology (120627)

William Shih

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 376

Mechanisms of Action of Antibiotics (121266)

Daniel Kahne

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 376

Mechanisms of Action of Antibiotics (121266)

Daniel Kahne

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 377

Quantitative Proteomics of Cancer Progression (121384)

Jarrod Marto

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 377

Quantitative Proteomics of Cancer Progression (121384)

Jarrod Marto

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 379

Biochemical and Molecular Regulation of Vascular Growth (121642)

Marsha Moses

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 379

Biochemical and Molecular Regulation of Vascular Growth (121642)

Marsha Moses

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 381

Functional Small Molecules for Biological Discovery (123001)

Nathanael Gray

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 381

Functional Small Molecules for Biological Discovery (123001)

Nathanael Gray

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 382

Mechanisms of RNAi in Stem Cells (123114)

Richard Gregory

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Biolog Chem & Molecular Pharm 382

Mechanisms of RNAi in Stem Cells (123114)

Richard Gregory

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 383

Integrated and Functional Genomic Studies of Human Cancer (125361)

Levi Garraway

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Subject: Virology

Virology 200

Introduction to Virology (116413)

Jonathan Abraham

Philip Kranzusch

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0345 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Introduction to virology. The lecture component reviews the basic principles of virology and introduces the major groups of human viruses. Weekly discussion groups critically analyze selected papers from the literature. Weekly written critiques of the selected papers are also required.

Course Notes:

There will be mid-term and final projects consisting of proposals based on laboratory rotations. Offered jointly with the <http://www.courses.fas.harvard.edu/6075> Medical School as MG 705.0.

Class Notes:

Classes begin on September 5, 2018 through December 5, 2018. Classes will be held in Room 447, TMEC

Recommended Prep:

Pre-Requisite: Current Virology PhD student, or upon special consent

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Virology 201

Virology (110546)

Benjamin Gewurz

James Cunningham

Joseph G. Sodroski

Daniel Kuritzkes

Sun Hur

2019 Spring (4 Credits)

Schedule:

MW 0230 PM - 0400 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

The course focuses on the following areas of virology: (i) epigenetic regulation, (ii) RNA virus replication mechanisms, (iii) innate responses to viral infection, (iv) inhibition of viral infection. The course will comprise lectures as well as reviewing literature that describes fundamental breakthroughs relevant to these areas. Within those areas, the class will read and discuss papers dealing with virus structure, replication, pathogenesis, evolution, emerging viruses, chronic infection, innate and adaptive immunity, anti-viral drugs/vaccines. Special emphasis will be placed on preparing students to critically evaluate the literature, formulate hypotheses and design experiments.

Course Notes:

Course format will be lectures, literature-based critical reading and discussion. Prepare and defend a written research proposal. Offered jointly with the Medical School as MG 723.0.

Class Notes:

Classes begin on January 21, 2019 through May 6, 2019. Classes will

be held in TMEC 304

Recommended Prep: Graduate standing and permission required.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Virology 202

Proposal Writing (117649)

Sean P.J. Whelan

Todd Allen

James DeCaprio

Daniel Lingwood

Priscilla Yang

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 12

Students will write, present, and evaluate research proposals in the areas of virus replication, viral pathogenesis and treatment and prevention of viral infections.

Course Notes: Offered jointly with the Medical School as MG 724.0.

Class Notes: Classes begin on September 6, 2016 and ends on November 8, 2016.

Recommended Prep: General background in biochemistry and virology.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Virology 300QC

Advanced Topics in Virology (127510)

David Cardozo

2019 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks).

Course Notes: Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Virology 306QC

Viruses of Bacteria and Archaea: Updates on Recent Key Literature (204372)

Max Nibert

2019 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 8

In this course, we will expand our view, commonly focused on viruses of humans and sometimes other vertebrates, to viruses of bacteria and archaea. Emphasis will be placed on exciting new findings in the recent literature. Active student participation will be expected and essential for the success of this readings and discussions based course, which is intended for students with previous advanced background in virology

Course Notes: This course will be offered in spring term of odd-numbered years, starting 2017. It will be replaced in spring term of even-numbered years by Virology 302QC, Viruses of Nonvertebrate Eukaryotic Hosts

Class Notes: Contact the course director for course room location. Class starts on March 21, 2017 through May 25, 2017

Pre-requisite: Virology 200, or equivalent approved by course director

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Subject: Immunology

Immunology 201

Principles of Immunology (148547)

Thorsten Mempel

Stephanie Dougan

Shiv Pillai

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

50

Comprehensive core course in basic immunology, providing an intensive and in-depth examination of the cells and molecules of the immune system. Special attention is given to the experimental approaches that led to the discovery of the general principles of immunology.

Course Notes: Intended for students who have had prior exposure to immunology on the undergraduate level. In the absence of such exposure, students must obtain the permission of the Course Director. Offered jointly with the Medical School as IM 702.0.

Class Notes: Classes begin on September 4, 2018 through December 6, 2018.

Recommended Prep: A background in genetics and biochemistry strongly recommended.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 202

Immune and Inflammatory Diseases (148503)

Filip Swirski

Mikael Pittet

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0400 PM

Instructor Permissions: None

Enrollment Cap:

n/a

IMM202 builds on IMM201 and explores fundamental principles of immunology in the context of immune and inflammatory diseases. Through a series of lectures and discussion, students will survey a broad range of diseases in which the immune system is essential. Topics will include not only diseases that mobilize classical immunity but also conditions to which we now know the immune systems contributes. Students will use oral and written exercises to learn how to evaluate and synthesize major concepts and tools germane to immunology's relationship to bioscience.

Course Notes: Offered jointly with the Medical School as IM 712.0.

Class Notes: Classes begin on January 29, 2019 through May 9, 2019. Classes will be held in Jeffery Modell Immunology Center, Room 100

Recommended Prep: Immunology 201 or its equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Immunology 204

Critical Readings for Immunology (143254)

Duane Wesemann

2019 Spring (4 Credits)

Schedule:

R 1000 AM - 0100 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Original research articles from fields including immunology, biochemistry, genetics, and cell and developmental biology will be critically analyzed in an intensive small group format. Grading will be based on class participation and oral presentations.

Course Notes: Required for first-year immunology students, open to second-year immunology students. No auditors. Offered jointly with the Medical School as IM 703.0.

Class Notes: Classes will begin on January 31, 2019 through May 2, 2019. Classes will be held in Jeffery Modell Immunology Center, Room 100

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 300

Advanced Topics in Immunology (141598)

David Cardozo

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Reading and discussion seminars each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit. Topics include the role of intracellular and transmembrane protein phosphates in signal transduction.

Course Notes: Intended for first- and second-year Immunology graduate students. Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Call 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Immunology 301

Immunology Seminar (142204)

Shiv Pillai

Galit Alter

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Gives students exposure to research topics in Immunology. Students prepare for the weekly seminar through readings, discussions, and preparing brief write-ups. These discussions are facilitated by members of the Committee on Immunology.

Course Notes:

Required for, and limited to, first-year Immunology graduate students. All others will be evaluated for enrollment on a case by case basis.

Class Notes:

**Classes begin on January 30, 2019 through May 2, 2019. Jeffery Modell
Immunology Center, Room 100**

Additional Course Attributes:

Autoimmunity (146257)

Francisco Quintana

Stephan Kissler

2019 Spring (2 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will focus on basic immunological mechanisms of autoimmune diseases, with an emphasis on recent advances in the field. At each session, we will focus on a particular topic and discuss three important publications.

Course Notes:

Offered in alternate years. Expected to be given in the first quarter of the spring term in academic year 2014-2015

Class Notes:

Class start February 25, 2019 through April, 22, 2019. Classes will be held in Modell 258

Additional Course Attributes:

Immunology 305QC

Neuro-Immunology in Development, Regeneration and Disease (130342)

Isaac Chiu

Beth Stevens

Michael Carroll

Jun Huh

2019 Spring (2 Credits)

Schedule: R 0400 PM - 0629 PM

Instructor Permissions: None

Enrollment Cap: n/a

It is increasingly clear that the nervous system and immune system share parallel molecular pathways, and communication between neurons and immune cells play significant roles in homeostasis and disease. This course will investigate current topics in neuro-immunology: CNS development, chronic pain, neuro-degeneration, aging, axon regeneration, auto-immunity and infection. We will focus our discussions on molecular mechanisms shared by the immune and nervous systems and the molecular cross-talk between these two systems.

Course Notes: Each class will cover a specific topic in neuro-immunology. Students should be prepared to lead discussions on pre-selected papers for each session.

Class Notes: Class starts on April 11, 2019 through May 30, 2019. Classes will be held in Modell 100

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

2019 Spring (2 Credits)

Schedule:

F 0100 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Our focus in this course is on the emerging field of systems immunology. Each session will review a class of experimental approaches, followed by a critical discussion of illustrative papers. Hands-on workshops will introduce students to computational tools for analyzing large-scale datasets, focusing on gene expression.

Class Notes:

Classes begin on February 1, 2019 through April 26, 2019. Classes will be held in Modell 100.

Cancer Immunology (130614)

Kai Wucherpennig

Cathy Wu

Stephanie Dougan

Philip Kranzusch

2018 Fall (2 Credits)

Schedule:

M 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

There have been many exciting recent developments in the cancer immunology field, and multiple therapeutic approaches have shown efficacy against diverse types of cancer. This course will emphasize new mechanistic insights, in particular on the following topics: Mechanisms of spontaneous protective anti-tumor immunity; Key effector cell populations of anti-tumor immunity; Inflammation and tumor microenvironment; Immunosuppressive mechanisms in tumor immunity; Targeting of inhibitory receptors; Cancer vaccines; New approaches for delivery of immunotherapies into tumors.

Course Notes:

Must be PhD student at Harvard or postdoctoral fellow. This class will be taking place in the Modell Center 2nd Floor conference room

Class Notes:

Course meets October 29, 2018 through December 10, 2018.

Therapeutic Human Antibody Engineering (208013)

Wayne Marasco
Stephanie Dougan
Quan Zhu

2018 Fall (2 Credits)

Schedule:

T 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This quarter course will focus on all aspects of therapeutic antibody (Ab) engineering from bench to bedside with an emphasis on translational research. Short lectures will introduce the topics of the day, reviews and seminal papers will be provided. Ab discovery will include readings on in vitro microbial discovery platforms such as Ab-phagemid and Ab yeast display as well as single B cell cloning strategies. Current state of the art of human Ig locus transgenic mice will be discussed. Engineering strategies will include chimeric, humanized and human Abs, and different formats including single chain Abs (scFvs), domain Abs, BITEs and Bi-specific Abs. Human Fc engineering to increase or decrease immune-mediated clearance will be discussed including glycan engineering. Manipulating engineered Ab in vivo clearance through size and FcRn interactions will be discussed. We will also discuss nanobodies, antibody drug conjugates and immunotoxins and chimeric antigen receptors.

Course Notes: Classes will start with short didactic lectures followed by discussion of 2-3 published papers.

Class Notes: Class begins September 11, 2018 through November 13, 2018.

Recommended Prep: Background in genetics and biochemistry strongly recommended. Must be a PhD student at Harvard or postdoctoral fellow otherwise course director permission will be needed to enroll

2019 Spring (2 Credits)

Schedule: T 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

Natural and Engineered Host Defense against Emerging Viral Pathogens

Achieving long term immunity in humans to emerging viral pathogens is an important component of global health for which there are broad socioeconomic and geopolitical implications. Yet this effort has been thwarted because of genetic variability of circulating strains and ease of undergoing antibody neutralization escape. In addition, zoonotic transfer of viruses to humans can lead to emergence of new viruses into the human population that can lead to pandemics in the absence of anti-viral herd immunity. This course will primarily focus on broadly neutralizing and protective anti-viral antibody responses and how critical epitope selection on viral glycoproteins that can help to achieve long-term immunity. We will examine through classical and contemporary readings several principles that can be used to design vaccines and anti-viral antibodies to target the virus's Achilles heel. Critical teachings in this class will include studying how immunoediting of viruses can drive neutralization escape and zoonotic transfer across species. We will discuss the molecular characteristics of bone marrow derived long-lived plasma cells. We will also discuss how to interrogate the broadly neutralizing antibody response to natural infection and vaccines using modern molecular techniques such as NGS and Ab RepSeq. There is also much effort in the field to engineer broadly neutralizing antibodies for passive immunotherapy as prophylactic, preemptive and therapeutic agents. These treatments include therapeutic antibody gene transfer and bi- and tri-specific anti-viral monoclonal antibodies. Numerous viruses will be discussed including HIV and emerging influenza, coronaviruses, flaviviruses, alpha viruses, Ebola and others. We will touch on intracellular microbial pathogens. The course will be structured with 20-30 min didactic lectures by Dr. Marasco and other lecturers followed by discussion of 3-5 published papers on the assigned topic of the day.

Course Notes: Background in immunology and virology is strongly recommended. Must be a PhD student at Harvard or postdoctoral fellow otherwise course director permission will be needed to enroll

Class Notes: Classes begin from January 29, 2019 through April 2, 2019. Classes will be held in TMEC 423

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 331L

Immune Regulation of Cancer (160772)

Shadmehr Demehri

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 332

The Role of Cysteinyl Leukotrienes and their Receptors in Pulmonary Inflammation and Fibrosis (144366)

Yoshihide Kanaoka

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 332

The Role of Cysteinyl Leukotrienes and their Receptors in Pulmonary Inflammation and Fibrosis (144366)

Yoshihide Kanaoka

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 332L

Genetic dissection of neural circuits that control stress-induced behavioral states (160778)

Todd Anthony

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 332L

Genetic dissection of neural circuits that control stress-induced behavioral states (160778)

Todd Anthony

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 334

Understanding the Mechanisms of Pathogen-sensing by the Innate Immune System (146383)

Terry Means

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 334

Understanding the Mechanisms of Pathogen-sensing by the Innate Immune System (146383)

Terry Means

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 334L

Function of Genes Associated with Autoimmune Disease (160972)

Stephan Kissler

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 334L

Function of Genes Associated with Autoimmune Disease (160972)

Stephan Kissler

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 335

Neuro-immunology of Pain and Host Defense (160760)

Isaac Chiu

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 335

Neuro-immunology of Pain and Host Defense (160760)

Isaac Chiu

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 336

T-Lymphocyte Recognition (144165)

Michael Brenner

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 336

T-Lymphocyte Recognition (144165)

Michael Brenner

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 337

Influence of Initial Bacterial Colonization on the Development of the Mucosal Immune Systems (131243)

W. Allan Walker

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 337

Influence of Initial Bacterial Colonization on the Development of the Mucosal Immune Systems (131243)

W. Allan Walker

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 337L

Vascular and Cell Biology of Inflammation and Wound Healing (146665)

Christopher Carman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 337L

Vascular and Cell Biology of Inflammation and Wound Healing (146665)

Christopher Carman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 339

Function and Regulation of Cellular Adhesion Mechanisms (144591)

Martin Hemler

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 339

Function and Regulation of Cellular Adhesion Mechanisms (144591)

Martin Hemler

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 340

The Human Major Histocompatibility Complex, Immune Function, and Disease (143640)

Chester Alper

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 340

The Human Major Histocompatibility Complex, Immune Function, and Disease (143640)

Chester Alper

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 341

Gene Regulation in Normal and Leukemic Stem Cells (144368)

Daniel Tenen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 341

Gene Regulation in Normal and Leukemic Stem Cells (144368)

Daniel Tenen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 342

Immune Cell Signaling, Gene Transcription and Tissue Injury in Lupus (145026)

George Tsokos

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 342

Immune Cell Signaling, Gene Transcription and Tissue Injury in Lupus (145026)

George Tsokos

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 343

The Regulation of Eicosanoid Generation (148188)

Jonathan Arm

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 343

The Regulation of Eicosanoid Generation (148188)

Jonathan Arm

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 344

Genetic Analysis of Lymphocyte Development and Nuclear Oncogene Function (143482)

Frederick Alt

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 344

Genetic Analysis of Lymphocyte Development and Nuclear Oncogene Function (143482)

Frederick Alt

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 345

Assembly and Function of pre-B Cell-fate and B Lymphocyte Antigen Receptors (145022)

Shiv Pillai

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 345

Assembly and Function of pre-B Cell-fate and B Lymphocyte Antigen Receptors (145022)

Shiv Pillai

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 346

Trafficking of Antigen in Lymph Nodes (131316)

Michael Carroll

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 346

Trafficking of Antigen in Lymph Nodes (131316)

Michael Carroll

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 347

Lymphocyte development, antibody diversity and host - microbe interactions (161335)

Duane Wesemann

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 347

Lymphocyte development, antibody diversity and host - microbe interactions (161335)

Duane Wesemann

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 30

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 348

Cell Biology, Biochemistry, and Immunology of Leukocyte-endothelial Adhesion (142207)

Francis Luscinskas

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 348

Cell Biology, Biochemistry, and Immunology of Leukocyte-endothelial Adhesion (142207)

Francis Luscinskas

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 348L

Epigenomic regulation of innate immunity (205903)

Kate Jeffrey

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 348L

Epigenomic regulation of innate immunity (205903)

Kate Jeffrey

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 349L

Cell death, cytopenia and immunosuppression triggered by pathogen recognition (203783)

Ben Croker

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 349L

Cell death, cytopenia and immunosuppression triggered by pathogen recognition (203783)

Ben Croker

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 350

Regulation of Autoimmune T Cell Responses (131343)

Vijay Kuchroo

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 350

Regulation of Autoimmune T Cell Responses (131343)

Vijay Kuchroo

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 351

Studies on Glycosylation and Adaptive Immunity (144582)

Charles Dimitroff

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 351

Studies on Glycosylation and Adaptive Immunity (144582)

Charles Dimitroff

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 352

Understanding of how immune cells perform systems-level functions in health and disease. (207243)

Alexander Shalek

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Development and application of new technologies that facilitate understanding of how immune cells collectively perform systems-level functions in health and disease.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 352

Understanding of how immune cells perform systems-level functions in health and disease. (207243)

Alexander Shalek

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Development and application of new technologies that facilitate understanding of how immune cells collectively perform systems-level functions in health and disease.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 353

Innate and Adaptive Immune Responses in HIV-1 Infection (144750)

Marcus Altfeld

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 353

Innate and Adaptive Immune Responses in HIV-1 Infection (144750)

Marcus Altfeld

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 354

Topics in Transplantation Biology (146705)

David Sachs

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 354

Topics in Transplantation Biology (146705)

David Sachs

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 355

Molecular Mechanisms of Antigen Presentation (130016)

Edda Fiebiger

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 355

Molecular Mechanisms of Antigen Presentation (130016)

Edda Fiebiger

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 356

Cytotoxic T Lymphocytes (144903)

Judy Lieberman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 356

Cytotoxic T Lymphocytes (144903)

Judy Lieberman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 357

Microbial-epithelial-immune Cell Interactions in Mucosal Tissues (146787)

Richard Blumberg

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 357

Microbial-epithelial-immune Cell Interactions in Mucosal Tissues (146787)

Richard Blumberg

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 359

Immunoregulatory Mechanisms at Mucosal Surfaces, Including the Lung and Gut, Affecting the Developme (148219)

Dale Umetsu

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 359

Immunoregulatory Mechanisms at Mucosal Surfaces, Including the Lung and Gut, Affecting the Developme (148219)

Dale Umetsu

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 360

Hematopoietic Stem Cells and their Niche (131562)

David Scadden

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 360

Hematopoietic Stem Cells and their Niche (131562)

David Scadden

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 360L

Understanding the Immune Microenvironment (204568)

Stephanie Dougan

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 360L

Understanding the Immune Microenvironment (204568)

Stephanie Dougan

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 361

Induction and Regulation of Antigen-specific T Cell Responses (146786)

Gilles Benichou

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Immunology 361

Induction and Regulation of Antigen-specific T Cell Responses (146786)

Gilles Benichou

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 362

Chemokine and Lipid Chemoattractants in Immune Cell Trafficking in Normal Physiology and Disease (131559)

Andrew Luster

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 362

Chemokine and Lipid Chemoattractants in Immune Cell Trafficking in Normal Physiology and Disease (131559)

Andrew Luster

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 363

Regulation of Immune and Inflammatory Responses by the Leukocyte Immunoglobulin-like Receptor Family (131556)

Howard Katz

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 363

Regulation of Immune and Inflammatory Responses by the Leukocyte Immunoglobulin-like Receptor Family (131556)

Howard Katz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 364

T-cell Differentiation, Tolerance and Autoimmunity (131766)

Diane Mathis

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Immunology 364

T-cell Differentiation, Tolerance and Autoimmunity (131766)

Diane Mathis

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Immunology 365L

Macrophage biology in multiple contexts, including IBD and metabolism. (203786)

Tiffany Horng

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 365L

Macrophage biology in multiple contexts, including IBD and metabolism. (203786)

Tiffany Horng

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Immunology 366

Immune Mechanisms in Cardiovascular Disease (131558)

Andrew Lichtman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 366

Immune Mechanisms in Cardiovascular Disease (131558)

Andrew Lichtman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Immunology 367

Biology and Chemistry of Complement Problems (131561)

Anne Nicholson-Weller

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Subject: Microbiology

Microbiology 201

Molecular Biology of the Bacterial Cell (126271)

David Rudner

Thomas Bernhardt

Simon Dove

2019 Spring (4 Credits)

Schedule: TR 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course is devoted to bacterial structure, physiology, genetics, and regulatory mechanisms. The class consists of lectures and group discussions emphasizing methods, results, and interpretations of classic and contemporary literature.

Class Notes: Classes begin January 29, 2019 through April 30, 2019. Classes will be held in NRB 1031.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Microbiology 205

Mechanisms of Microbial Pathogenesis (146757)

Clyde Crumacker

Harvey Simon

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 40

The mechanisms of bacterial, mycoplasmal, fungal, and viral pathogenesis are covered. Topics are selected for intrinsic interest and cover the spectrum of pathophysiologic mechanisms of the infectious process. Emphasis on pathogenesis at the molecular level.

Course Notes: Offered jointly with the Medical School as HT 040.

Class Notes: Please note that there will be an additional fee for microscope rental. Classes begin September 4, 2018 through December 18, 2018

Recommended Prep: A background course in molecular biology is strongly encouraged.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Microbiology 210

Microbial Sciences: Chemistry, Ecology, and Evolution (125823)

Michael Gilmore

2019 Spring (4 Credits)

Schedule:

F 0845 AM - 1200 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This is an interdisciplinary graduate-level and advanced undergraduate-level course in which students explore topics in molecular microbiology, microbial diversity, and microbially-mediated geochemistry in depth. This course will be taught by faculty from the Microbial Sciences Initiative. Topics include the origins of life, biogeochemical cycles, microbial diversity, and ecology.

Course Notes: Also offered as Organismic and Evolutionary Biology 290.

Class Notes: Classes begin February 1 through April 26. Classes will be held in Natural History Museum, 24 Oxford St., Cambridge.

Recommended Prep: For graduate and advanced undergraduate students, Life Sciences 1a and 1b or their equivalent are required, or permission of instructor. MCB 52 or equivalent is recommended.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Microbiology 213

Social Issues in Biology (122708)

Jonathan Beckwith

Stephen Lory

Richard Born

David Glass

Angela Depace

Nancy Krieger

Johnny Kung

Vicki Dzin

2019 Spring (4 Credits)

Schedule:

R 0200 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

This discussion course covers historical and contemporary readings about controversial issues related to biology and social responsibility of scientists. The topics are selected from amongst the following: Scientific racism as a determinant of population health inequities; Eugenics: past, present and future; Reproducibility, probability and truth in science; Pros and cons of DNA use in forensics; Social activism in science; Women and minorities in science; Science communication to the public(s); Controversies in biology and medicine re: issues of race, ethnicity and gender; The course can provide future scientists with a background in anticipating and considering present and future ethical and social implications of biology.

Course Notes: Offered jointly with the Medical School as MG 722.0. Alternates yearly between the Longwood and the Cambridge campuses.

Class Notes: Classes begin on February 7 through April 25, 2019. Class will be held in NRB 833

Recommended Prep: Some background in genetics.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Microbiology 214

Mechanisms of Bacterial Pathogenesis and Host Immune Response (156454)

Marcia Goldberg

Jonathan Kagan

Michael Starnbach

Darren Higgins

Min Dong

2018 Fall (4 Credits)

Schedule: TR 1000 AM - 1159 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course focuses on molecular mechanisms of bacterial pathogenesis and the host response to infection. The class consists of lectures and group discussions emphasizing themes of pathogenesis, methods, results, and interpretations of classic and contemporary literature. Subjects including bacterial secretion systems, mechanisms of entry into host cells, biofilm formation, and motility are viewed primarily from the pathogen's perspective, whereas topics including inflammasome activation, TLR signaling, and adaptive immune responses provide a host-centric view. Additional sessions are spent examining current methods of antibiotic discovery and vaccine development. The course also introduces students to the wide diversity of pathogenic bacteria. Organisms discussed include pathogenic *E. coli*, *Shigella* species, *Vibrio cholerae*, *Listeria monocytogenes*, *Chlamydia trachomatis*, *Pseudomonas aeruginosa* and *Staphylococcus aureus*, as well as a discussion of the challenges presented by currently unculturable species.

The course is designed to complement Microbiology 201; however students who have not taken Microbiology 201 previously are welcome.

Course Notes: Designed for graduate students in first year or beyond, however undergraduates with specific interest in the field may audit.

Class Notes: Class begins September 4, 2018 through November 29, 2018.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Microbiology 300

Advanced Topics in Microbiology and Molecular Genetics (111409)

David Cardozo

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks). Two seminars, which can be taken in different terms, are required for credit.

Course Notes: Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0605 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Recommended Prep: Dependent on seminar.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Microbiology 302QC

Introduction to Infectious Disease Research: Infectious Diseases Consortium Boot Camp (109380)

Eric J. Rubin

2019 Spring (2 Credits) **Schedule:** MTWRF 0900 AM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This January boot camp course provides a fun, informative introduction to the breadth of infectious disease research carried out at Harvard and beyond. The course will focus on several aspects of infectious diseases:

Underlying biology of infectious diseases and the diverse pathogens that cause them

Modern approaches to studying infectious diseases, including experimental biology, epidemiology, bioinformatics, and clinical microbiology

Modern approaches to developing new interventions, including drugs, vaccines, diagnostics, and public health measures

This will be accomplished through a mix of lectures, discussions, and reading combined with lab visits and hands-on workshops. In addition, students will have the chance to meet faculty, students, and postdocs in infectious disease roles across Harvard.

Course Notes: This is an intensive January course. While most participants in this course come from biology graduate programs at HMS/HSPH, students from other programs or schools are welcome to register.

Class Notes: Classes will be held in Jeffrey Modell Immunology Center, Room 100

The Human Microbiome: Comprehensive experimental design and methodologies (207117)

Aleksandar Kostic

Abigail Devlin

2019 Spring (2 Credits)

Schedule: MW 0100 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This is a comprehensive introduction to the study of human microbial communities and their functions relevant to human physiology. Topics covered include metagenomics, mechanistic interactions of the microbiome with metabolism, the immune system, and the gut-brain axis. Rather than lectures, this course is primarily a critical discussion of the literature.

Class Notes: Classes will begin January 28, 2019 through March 13, 2019. Classes will be held in Folin Wu room

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Subject: Speech & Hearing Sciences

Speech & Hearing Sciences 200

Acoustics, Production and Perception of Speech (108212)

John Rosowski

Satrajit Ghosh

2018 Fall (4 Credits)

Schedule:

W 0100 PM - 0159 PM

TR 0100 PM - 0229 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Reviews the physical processes involved in the production and propagation of sound, and acoustics related to hearing. Particular attention to how the acoustics and mechanics of the speech and auditory system define what sounds we are capable of producing and how we sense sound. Introduces acoustic theory of speech production, digital speech processing, and neural mechanisms of speech production and perception. Exposes students to applications around acoustics, recognition, and speech disorders. Also introduces analysis of various types of sounds. Includes take-home laboratory assignments and discussions of classic papers.

Course Notes:

This course is taught in consort with HST.714J at the Massachusetts Institute of Technology. Classes will be held at MIT.

Class Notes:

Class begins September 6, 2018 and ends December 12, 2018. Classes will be held MIT 46-5056

Recommended Prep:

Mathematical methods in science (Applied Mathematics 21a or Mathematics 21a) or equivalent. Rigid body mechanics (Physics 11A), or electrical circuits (Engineering Science 154) or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Speech & Hearing Sciences 201

Biology of the Inner Ear (108213)

M. Liberman

Stephane Maison

2018 Fall (4 Credits)

Schedule:

M 0100 PM - 0229 PM

TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Normal biology, biophysics, physiology and morphology of the inner ear, its sensory innervation and efferent control systems, and the mechanisms underlying sensorineural hearing loss and balance disorders. Material is presented through lectures, laboratory exercises and discussions of the primary literature.

Class Notes:

Class begins on September 4, 2018 through December 4, 2018.

Recommended Prep:

Introductory neurobiology recommended.

Lecture notes will be available online.

Classes will be held in Mass. Eye and Ear Infirmary - EPL Library(4th Floor) Room 32

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Speech & Hearing Sciences 202

Clinical Aspects of Speech and Hearing (108217)

Konstantina Stankovic

2019 Spring (4 Credits)

Schedule: MW 0500 PM - 0700 PM

Instructor Permissions: None

Enrollment Cap: n/a

Clinical approach to speech and hearing disorders as practiced by physicians, audiologists, speech clinicians, rehabilitation specialists, bioengineers. Includes observation of patient care in clinic and operating room, audiology/balance disorders experience, lectures and discussion groups.

Course Notes: Offered jointly with HST 724 at MIT. Classes to be held at the Massachusetts Eye and Ear Infirmary (MEEI)

Class Notes: Classes begin on January 28, 2019 and will be held at the Massachusetts Eye and Ear, 4th Floor

Recommended Prep: Anatomy of Speech and Hearing, Acoustics of Speech and Hearing or permission of the course director

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Speech & Hearing Sciences 203

Anatomy of Speech and Hearing (108218)

Barbara Fullerton

James Heaton

James Kobler

2019 Spring (4 Credits)

Schedule: MTWRF 0900 AM - 0100 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course covers anatomy of the head and neck, with cadaver dissection, stressing structures important in speech and hearing. Lecture topics also include basic neuroanatomy, imaging, surgery, and cancer of head and neck.

Course Notes: This an intensive January Course. Offered jointly with MIT as HST 718. Classes to be held at the Harvard Medical School campus (HMS)

Prerequisite: Introductory biology or equivalent and permission of the

course director, if not an SHBT student.

Class Notes: January Session dates: January 2-25, 2019. Classes will be held in TMEC 306

Recommended Prep: Introductory biology or equivalent and director permission, if not SHBT student.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biological & Biomedical Sci 230

Qualitative and Quantitative Analysis of the Biological Literature (108994)

Jesse Gray

Roberto Chiarle

2018 Fall (4 Credits)

Schedule: TR 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap: n/a

BBS 230 is an integrated literature analysis course comprised of two related components: (1) intensive paper discussion and (2) workshops that develop statistical intuition and R programming skills using example data from papers. The midterm and final exams will focus on statistics and programming knowledge

Course Notes: This course is required for first year BBS students, and is open only to BBS students.

Class Notes: Classes begin on September 6, 2018

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Biological & Biomedical Sci 301

Embedded Teaching Practicum (for Graduate Teaching Assistants) (127207)

Ronald Heustis

Madhvi Venkatesh

2018 Fall (4 Credits)

Schedule: MWF -

Instructor Permissions: Instructor

Enrollment Cap: 60

The Embedded Teaching Practicum aims to enhance the teaching experience for TAs and the learning experience for enrollees in the core BBS courses. While TAs serve different functions and experience teaching from different perspectives in each of our core courses, they collectively serve a vital role in helping with the delivery a contemporary, high quality and accessible education to HMS graduate students. The embedded teaching practicum provides practice-based training in facilitating a group discussion; professionalism in the classroom; curriculum design, course evaluation, assessment development and DBER; and preparation for teaching throughout and beyond time in graduate school. Teaching assistants are provided training and experience in the development of an early-career teaching philosophy.

Course Notes: TAs should contact Jason Heustis (Ronald_Heustis@hms.harvard.edu).

Class Notes: Course runs from September 5, 2018 through December 12, 2018. Students will be contacted directly with room.

Biological & Biomedical Sci 330

Critical Thinking and Research Proposal Writing (156089)

Rosalyn Adam

Matthew Harris

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A small group tutorial systematically guiding students in the writing of original, hypothesis-driven research proposals from initial topic selection through completion of a final draft.

Course Notes: This course is required for second year BBS students; others need permission of the instructor. Dates, times, and locations for all sessions (except for Session 1) will be determined by the faculty running the tutorial sessions. Students will be able to sign up for their specific groups on a first-come, first-served basis. The BBS office will coordinate this process. Group assignments will be posted on the course website.

Class Notes: Please contact the instructor for meeting times.

Recommended Prep: Check course website for downloadable material <https://canvas.harvard.edu/courses/41914>.

Principles of Cell Biology (108339)

John Hanna

Maofu Liao

Sichen Shao

Pere Puigserver

Steven Gygi

Jennifer Waters

Alan Brown

Edward Chouchani

Marcia Haigis

Marc Kirschner

Jack Szostak

Brendan Manning

Sanja Sever

Timothy Mitchison

Daniel Finley

Adrian Salic

David Van Vactor

Joan Brugge

Wade Harper

2019 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1200 PM

Instructor Permissions: Instructor

Enrollment Cap:

113

CB201 is a graduate level course intended to teach critical concepts in cell biology, and expose students to current and quantitative approaches in cell biology research. Topics include the molecular basis of cellular dynamics, subcellular compartmentalization, protein trafficking, chromosome biology and epigenetics, regulated ubiquitin-proteasome pathways, cell cycle regulation, cytoskeleton and motor dynamics, signal transduction, cell-cell interactions, and programmed cell death.

Course Notes:

Methodological focus on current approaches in cell biology including quantitative tools. Emphasis on experimental design. Offered jointly with the Medical School as CB 713.0.

Class Notes:

Classes begin on January 28 through May 1 2019. Classes will be held in the Cannon Room.

Recommended Prep:

Basic knowledge in biochemistry, genetics and cell biology.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Cell Biology 207

Vertebrate Developmental and Regenerative Biology (111215)

Andrew Lassar

John Flanagan

Jordan Kreidberg

Sean Megason

Jessica Lehoczky

Olivier Pourquie

Guillermo Garcia-Cardena

2019 Spring (4 Credits)

Schedule:

MW 0200 PM - 0400 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Analyzes the developmental programs of frog, chick, zebrafish, and mouse embryos, emphasizing experimental strategies for understanding the responsible molecular mechanisms that pattern the vertebrate embryo. Signaling pathways controlling morphogenesis, organogenesis, stem cells and regeneration will be discussed in detail.

Course Notes:

Offered jointly with the Medical School as CB 710.0. Includes lectures and conference sessions in which original literature is discussed in depth. Short research proposals are required in lieu of exams. If you have any questions, please contact the course head, Dr. Andrew Lassar, andrew_lassar@hms.harvard.edu

Class Notes:

Classes begin on January 28, 2019 through May 15, 2019. Classes will be held in Armenise 527.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 212

Biology of the Cancer Cell: From Molecular Mechanisms to Therapeutic Implications (125825)

David Frank

2019 Spring (4 Credits)

Schedule:

MW 1230 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

24

This semester long course takes a molecular approach to examine the basis of human cancer. The main concepts that we will cover include: cancer genetics and epigenetics, tumor suppressor genes and oncogenes, signal transduction, DNA damage and repair, angiogenesis, metastasis and invasion, apoptosis, cancer stem cells, and tumor immunology and immunotherapy. Lectures will be delivered by experts in the various fields to provide an integrated perspective on past, current and future approaches in cancer biology research. In addition, students will participate in workshops in which they will delve more

deeply into the primary literature of several of these topics.

Course Notes: Given alternate years with Cell Biology 211.

Class Notes: Classes begin January 28, 2019 through May 1, 2019. Classes will be held in TMEC 106 for first meeting and L-007 for subsequent meetings

Recommended Prep: Advanced biochemistry, molecular genetics, and cell biology.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 226

Concepts in Development, Self-Renewal, and Repair (121707)

Iain Drummond

Amar Sahay

2018 Fall (4 Credits)

Schedule: F 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Explores developmental mechanisms through the life cycle, contrasting pluripotency and cell fate restriction in embryos and adult tissues. In depth analysis of in vivo approaches, with emphasis on adult stem cells, tissue repair and self-renewal.

Course Notes: Offered jointly with the Medical School as CB 721.0. For more information visit: <https://canvas.harvard.edu/courses/31779>

Class Notes: Classes begin on September 6, 2018 through December, 7 2018. First class will be held in TMEC L007, subsequent classes Simches MGH 3.120

Recommended Prep: Upper division cell biology or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 300

Advanced Topics in Cell, Molecular, and Developmental Biology (116986)

David Cardozo

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (seven weeks). Different topics

are covered each term.

Course Notes: Two seminars, which can be taken in different terms, are required for credit. Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Cell Biology 301QC

The Epidemiology and Molecular Pathology of Cancer (127478)

Massimo Loda

2019 Spring (2 Credits)

Schedule: MTWRF 0900 AM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This January course will provide students with an in-depth introduction to the epidemiology and molecular pathology of cancer. We will explore multiple types of cancer, including breast, colon, lung, prostate and brain, through a series of lectures and hands-on practice tutorials. These tutorials will include training in molecular pathology techniques, state of the art image analysis of human biomarkers, tissue processing, immunohistochemistry, and tumor histology. In addition, the epidemiology, genetics and relevant signal transduction pathways of cancer will be highlighted.

Lunch is provided.

Course Notes: This is an intensive January course. Curriculum Fellow: Ryan Lee, Ryan_Lee@hms.harvard.edu. The course runs from January 7, 2019 through January 11, 2019.

Class Notes: Class will be offered from January 7, 2019 through January 11, 2019 and will be held in TMEC 118

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 302QC

Advanced Experimental Design for Biologists (127479)

David Glass

Randall King

2019 Spring (2 Credits)

Schedule:

MW 0400 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

24

This course will focus on both the theory and practice of experimental design. The emphasis is on project planning and vetting, individual experimental design, and trouble-shooting. Special focus will be placed on methods to avoid experimental bias, and potential sources of inappropriate interpretation. Also the importance of system validation is especially emphasized.

Class Notes:

Classes begin on January 28, 2019 through March 6, 2019. Classes will be held in TMEC L-007

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 304QC

Introduction to Human Gross Anatomy (127989)

Gerald Greenhouse

2019 Spring (2 Credits)

Schedule:

MWF 1200 PM - 0700 PM

Instructor Permissions: Instructor

Enrollment Cap:

24

Lectures, laboratory dissections, and prosections will provide students an opportunity to explore the gross structure and function of the human body. The course will provide a foundation for the student to acquire practical skills in recognizing, dissecting, and differentiating key anatomical structures. Structure/function relationships will be emphasized and some foundation will be provided for understanding the anatomic basis of diseases.

Each of the 13 sessions will include a lecture, 3 hours of dissection, and an evening guest lecturer on clinical or research aspects related to the dissections (supper provided).

Course Notes:

Open to graduate and undergraduate students, postdoctoral fellows, research assistants. Students must sign up during the Spring semester sign up period.

Class Notes:

Class starts on June 24, 2019 through July 24, 2019. Classes will be held in TMEC 447.

Cell Biology 306QC

Teaching 100: The Theory and Science of Teaching (107400)

Johanna Gutlerner

Bradley Coleman

2018 Fall (2 Credits)

Schedule: R 0200 PM - 0429 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

For many graduate students and medical educators, teaching will be part of their career, whether as mentoring, formal classroom teaching, or teaching in the hospital. In addition, the theory and research evidence accumulating in the disciplines of cognitive psychology, neuroscience, and from STEM classrooms, has turned the question of, "How do we best teach science?" into its own scientific discipline.

The Theory and Science of Teaching focuses on understanding why certain teaching methods are effective by examining the scientific research and theoretical frameworks that support these methods. We will read and discuss foundational educational and cognitive psychology texts and primary literature, and then develop course materials that allow us to put these ideas into practice.

Make It Stick, by Brown, Roediger and McDaniel is required pre-reading and should be completed before the first day of class.

Course Notes: The course has been designed as a companion to Genetics 302qc: Teaching 101, but neither course is a prerequisite of the other.

Class Notes: Course meets September 27, 2018 through November 15, 2018.

Recommended Prep: Make It Stick, by Brown, Roediger and McDaniel is required pre-reading and should be completed before the first day of class.

Introduction to Histology for Graduate Students (107831)

Gerald Greenhouse

Everett Anderson

2019 Spring (2 Credits)

Schedule:

TR 1200 PM - 0400 PM

Instructor Permissions: Instructor

Enrollment Cap:

11

Histology—the study of structure and how structure relates to function, in cells and tissues. The class will include a session on each of the major tissue types—epithelium, connective, muscle, and nerve. This will be followed by sessions during which organ systems will be studied. Each session will include an introductory lecture followed by shared observation of slides using a 12-headed light microscope. Pathology correlates will be included when possible. Students learn frozen section technique on brain tissue from Stephen Liberles.

Course Notes:

This course is offered usually during the month of June or July each year. Undergraduates may enroll. Students must sign up during the Spring semester sign up period.

Class Notes:

Class start on June 20, 2019 through July 25, 2019. Classes will be held in TMEC 132

How to get your experiments right in the age of high-content imaging, emerging technologies and translational science. This week-long interdisciplinary quarter course will examine analysis of error in measurement and best practices for the experimental design and analysis of quantitative microscopy experiments, high throughput screening and disease models. Participants will apply experimental design and optimization principles through proposal presentation and discussion. In addition, we will explore the navigation of research challenges facing independent investigators through a Keynote lecture and panel discussions.

Course Notes: This is a one week intensive course in June

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 333

Electron Microscopic Structure Determination (114751)

Thomas Walz

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 333

Electron Microscopic Structure Determination (114751)

Thomas Walz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 334L

Adipocyte development and energy metabolism (203841)

Yu-Hua Tseng

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 334L

Adipocyte development and energy metabolism (203841)

Yu-Hua Tseng

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 336

Signal Transduction in Normal and Transformed Cells (119551)

Joan Brugge

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 336

Signal Transduction in Normal and Transformed Cells (119551)

Joan Brugge

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 339

Cell Morphogenesis and Regulation (113489)

Marc Kirschner

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 339

Cell Morphogenesis and Regulation (113489)

Marc Kirschner

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 343

Mechanisms of Mammalian Cell Differentiation and Gene Expression (111198)

Bruce Spiegelman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Cell Biology 343

Mechanisms of Mammalian Cell Differentiation and Gene Expression (111198)

Bruce Spiegelman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 344

Molecular Mechanism of Signal Transduction (117770)

Xi He

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 344

Molecular Mechanism of Signal Transduction (117770)

Xi He

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 345

Protein Transport Across the Endoplasmic Reticulum Membrane (119350)

Tom Rapoport

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 345

Protein Transport Across the Endoplasmic Reticulum Membrane (119350)

Tom Rapoport

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 348

Transcriptional Regulation and Epigenetics in Breast and Prostate Cancer (110253)

Myles Brown

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 348

Transcriptional Regulation and Epigenetics in Breast and Prostate Cancer (110253)

Myles Brown

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 349

Gene Silencing and Chromosome Structure (124315)

Danesh Moazed

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 349

Gene Silencing and Chromosome Structure (124315)

Danesh Moazed

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 353L

Regulated protein degradation (203806)

John Hanna

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 353L

Regulated protein degradation (203806)

John Hanna

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 354

Basic and Applied Mechanisms of Intracellular Transport (112504)

Victor Hsu

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 354

Basic and Applied Mechanisms of Intracellular Transport (112504)

Victor Hsu

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 358

Mechanisms of Tumor Metastasis (143098)

Bruce Zetter

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 358

Mechanisms of Tumor Metastasis (143098)

Bruce Zetter

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Cell Biology 359

Intracellular Signaling Pathways in the Regulation of Cell Growth and Differentiation (110416)

David Frank

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 359

Intracellular Signaling Pathways in the Regulation of Cell Growth and Differentiation (110416)

David Frank

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 360

Genetic Control of Apoptosis in Drosophila (115969)

Kristin White

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 360

Genetic Control of Apoptosis in Drosophila (115969)

Kristin White

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Cell Biology 365

Mechanism and Biology of Ubiquitin-like Protein Conjugation Cascades (128171)

Wade Harper

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Cell Biology 365

Mechanism and Biology of Ubiquitin-like Protein Conjugation Cascades (128171)

Wade Harper

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 366

Mitochondria in Aging and Metabolism (128172)

Marcia Haigis

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 366

Mitochondria in Aging and Metabolism (128172)

Marcia Haigis

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Cell Biology 369L

Protein structure by high-resolution electron microscopy (203788)

Maofu Liao

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Subject: Human Bio & Translational Med

Human Bio & Translational Med 200

Pathology of Human Disease (107843)

Scott Lovitch

2019 Spring (4 Credits)

Schedule: R 0900 AM - 1259 PM
T 0900 AM - 1059 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

This course provides a comprehensive overview of human pathology with emphasis on mechanisms of disease and modern diagnostic technologies. Topics include (1) general mechanisms of disease (inflammation, infection, immune injury, host response to foreign materials, transplantation, genetic disorders and neoplasia), (2) pathology of major organ systems, and (3) review of diagnostic tools from invasive surgical pathology to non-invasive techniques such as diagnostic imaging and molecular pathology. The objectives of this course are achieved through a set of integrated lectures and laboratories, as well as a student-driven term project leading to a formal presentation on a medical, socioeconomic, or technological issue in human pathology.

Course Notes: Enrollment may be limited. Jointly offered with HMS as HT035.0**Class Notes:** Classes begin February 5, 2019 through May 16, 2019. Classes will be held in TMEC 227.**Recommended Prep:** General biology.**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

FAS Divisional Distribution	None

Human Bio & Translational Med 235

Principles of Human Disease: Physiology and Pathology (109394)

Connie Cepko

2018 Fall (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course covers the normal physiology and pathophysiology of selected organs, through lectures, readings, tutorials based on clinical cases, and patient presentations. Human biology is emphasized, with some examples also drawn from model organisms. Recent therapeutic approaches, including RNAi, gene therapy, and genome editing will be covered.

Course Notes: Course enrollment is open to graduate students from any program as well as undergraduates.

Class Notes: Students will have tutorial sessions once a week. Classes begin on September 5, 2018 through December 12, 2018

Recommended Prep: Knowledge of introductory biochemistry, molecular biology, and cell biology required (MCB52 and MCB54 or equivalent and one year of organic chemistry for undergraduates is recommended).

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Human Bio & Translational Med 300QC

Advanced Topics in Human Biology and Translational Medicine (127506)

David Cardozo

2019 Spring (2 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

A series of reading and discussion seminars, each running for a half term (7 weeks).

Course Notes: Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Bio & Translational Med 300QC

Advanced Topics in Human Biology and Translational Medicine (127506)

David Cardozo

2018 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A series of reading and discussion seminars, each running for a half term (7 weeks).

Course Notes: Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 301QC

Case Studies in Human Biology and Translational Medicine (127520)

Marc Bonaca

2019 Spring (2 Credits)

Schedule: F 0900 AM - 1000 AM
MTWR 0900 AM - 1030 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Two-week course that is required of and restricted to first-year LHB students. Each week of the course focuses on a different "case study" in translational medicine.

Course Notes: This is an intensive January term course. Restricted to Leder students only.

Class Notes: January Session dates: January 7-18, 2019. Classes will be held in Countway 403

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 302QC

Imaging and Microscopy Methods in Biology and Medicine (107418)

Lev Perelman

2018 Fall (2 Credits)

Schedule: T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Introduce modern imaging modalities used in biology and medicine with emphasis on modalities frequently employed in cellular and molecular biology. Overview of basic principles of light and electron microscopy and modern advanced light microscopy techniques such as confocal, light sheet, STED, multi-photon, super-resolution, and chromatin-sensitive CLASS. Discuss modality-specific molecular probes and genetic targeting in microscopy which includes optogenetics and CRISPR-based photoactivatable transcription systems.

Class Notes: Classes start October 9, 2018 through December 4, 2018.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 304

Resolution of Lung Inflammation and Injury (124267)

Bruce Levy

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 304

Resolution of Lung Inflammation and Injury (124267)

Bruce Levy

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 305

Endothelial Cell, Nitric Oxide, Proteomic Redox Regulation (124268)

Joseph Loscalzo

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Bio & Translational Med 305

Endothelial Cell, Nitric Oxide, Proteomic Redox Regulation (124268)

Joseph Loscalzo

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 305QC

Molecular Bases of Eye Disease (127483)

Darlene Dartt

Magali Saint-Geniez

2019 Spring (2 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course provides an overview of the pathogenic process of prevalent ocular diseases. The goals of the course are: (i) to explore the structural and functional aspects of the eye relevant to understanding the pathology, (ii) to review the manifestations of the disease and its effects on vision, (iii) to discuss current views and research in the pathophysiology, and strategies for therapeutic intervention. For most sessions, the basic science and clinical topics will be presented by two faculty lecturers.

Class Notes: Class start January 21, 2019 through April 22, 2019. Location is 2nd floor conference room, Schepens Eye Research Institute.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 307

Mechanisms of Heart Growth, Regeneration, and Failure (124270)

Anthony Rosenzweig

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Human Bio & Translational Med 308QC

Experimental Design and Analysis of Eye and Vision Studies (207004)

Russell Woods

Lotfi Merabet

Eric Ng

Magali Saint-Geniez

Philip Bronstad

Daniel Sun

Corinna Bauer

Alexandra Bowers

Tobias Elze

2019 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 16

This course will be a series of workshops in which the design and analysis of experiments conducted within vision and eye research will be considered. At each session, a faculty member will provide and introduce data from a real study that they have conducted as an example. Issues around experimental

design will be discussed. Then, using the participant's own software on their computer, we will work through analyses of that data, guided by two faculty members. Thus, participants will handle real data and address real experimental design and data issues.

Course Notes:

Participants must bring a laptop computer with a statistical analysis package with which they are familiar. Data will be available for download in advance of each session.

Class begins February 5, 2019 through April 16, 2019 and will be held at 2W Common Room, Schepens Eye Research Institute, 20 Staniford Street, Boston

Epithelial:stromal Interactions in the Formation and Progression of Carcinomas (109124)

Antoine Karnoub

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 355

Epigenetic Mechanisms in Mammalian Development (109125)

Bradley Bernstein

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 355

Epigenetic Mechanisms in Mammalian Development (109125)

Bradley Bernstein

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Human Bio & Translational Med 356

Genetic Models of Leukemogenesis (109139)

A. Look

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 356

Genetic Models of Leukemogenesis (109139)

A. Look

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Bio & Translational Med 358

Control of Cell Proliferation by RB/E2F (109126)

Nicholas Dyson

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 358

Control of Cell Proliferation by RB/E2F (109126)

Nicholas Dyson

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 359

Genetics of Neurodegenerative Disease (109127)

Mel Feany

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 359

Genetics of Neurodegenerative Disease (109127)

Mel Feany

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Human Bio & Translational Med 360

Molecular characterization of circulating tumor cells (109128)

Daniel Haber

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 360

Molecular characterization of circulating tumor cells (109128)

Daniel Haber

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 361

Molecular Approaches to Cell Immortalization and Transformation (109129)

William Hahn

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Bio & Translational Med 361

Molecular Approaches to Cell Immortalization and Transformation (109129)

Subject: Neurobiology - Graduate

Neurobiology - Graduate 215A

The Discipline of Neuroscience (205295)

Lisa Goodrich

Wade Regehr

Michael Do

David Corey

Joshua Kaplan

Bernardo Sabatini

John Assad

Gary Yellen

Bruce Bean

Thomas Schwarz

Sandeep Datta

Rosalind Segal

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course will endow students with the broad conceptual fluency in the discipline of neuroscience required to relate genes to circuit function, metabolism to neurological disease, and cell biology to neural computations. Through a combination of lectures and in-class activities, students will learn to design, quantitatively analyze, and interpret experiments that address a variety of questions spanning molecular to systems neuroscience. During the first semester, students will think critically about the fundamental units of the nervous system within the context of cellular function, electrical conduction, and chemical signaling. The second half of the course builds upon this foundation to focus on broadly defined "networks of neural function" as related to coordinated neural activity, the concerted execution of genetic programs, and anatomically defined structural networks. The course culminates with students writing a grant proposal in the style of the NIH NRSA.

Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes:

Please note that Program in Neuroscience (PiN) students must take both semesters to fulfill the requirement. Non-PiN students may enroll in just the fall semester with the instructor's approval

Class Notes:

Class will be held in WAB 236

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
Full Year Course	Divisible Course
FAS Divisional Distribution	None

Neurobiology - Graduate 230

Visual Recognition: Computational and biophysical perspective (107755)

Gabriel Kreiman

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How does cerebral cortex store information, compute and learn? How can we build prosthetic devices to fix or augment brain function? How can we build biologically inspired artificial intelligence? This course will examine these questions in the context of visual cognition. Topics: architecture of visual cortex, neurophysiology, visual consciousness, computational neuroscience, models of pattern recognition and computer vision, artificial intelligence, brain-machine interfaces.

Course Notes:

Course website: http://klab.tch.harvard.edu/academia/classes/hms_neuro300_vision/hms_neuro300_vision.html
Neurobiology 230, Visual Recognition, brain-machine interfaces and artificial intelligence

Neuro 230 cannot be taken if Neuro 130 has been taken. Neuro 230 cannot be taken concurrently with Neuro 130.

Class Notes:

Classes begin on September 10, 2018 through December 10, 2018.
Classes will be held in Biolabs 2062

Recommended Prep:

Life Sciences 1a (or Life and Physical Sciences A) and Life Sciences 1b (or equivalent). Recommended: Math (Maa/Mab, Math 1A,1B, Math 19 a or equivalent). Physical Sciences 1. MCB 80.

This course will be held in Biolabs 2062.

Requirements:

Anti-Req: Cannot be taken for credit if NEURO 130 already complete.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Neurobiology - Graduate 300

Advanced Topics in Neurobiology (117896)

David Cardozo

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Topics cover areas at the molecular, cellular, and systems levels in both basic and clinical neuroscience. A series of reading and discussion seminars, each running for a half term (seven weeks).

Course Notes:

Two seminars, which can be taken in different terms, are required for credit. Non-DMS students must get permission from the Division of Medical Sciences before registering for this course. Please contact us at 617-432-0162 or visit the DMS Office at T-MEC 435, 260 Longwood Avenue, Boston.

Additional Course Attributes:

Neurobiology - Graduate 301QC

Nervous System Disorders: Advances in Diagnostics and Emerging Therapies (127482)

Bakhos Tannous

Xandra Breakefield

Christian Badr

2018 Fall (2 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will discuss current trends in diagnostic and therapeutic applications, including gene/cell therapy and CRISPR technology, for different nervous system disorders ranging from neurodegeneration, eye/ear diseases and brain tumors. We will also examine bench-to-bedside translation, ongoing clinical trials as well as imaging/biomarkers for diagnostics and therapeutic monitoring.

Class Notes:

Classes will begin on September 4, 2018 through November 6, 2018.

Quantitative Methods for Biologists (107877)

Michael Springer

Richard Born

2018 Fall (2 Credits)

Schedule: MTWRF -

Instructor Permissions: Instructor

Enrollment Cap: 80

The goal of this camp is to introduce you to programming in the MATLAB environment and to show you the power this provides for analyzing data and for gaining intuition about the behavior of complex systems through the use of numerical simulations. Some of you, upon encountering in the previous sentence words like "programming" and "numerical simulations," will feel the cold hand of fear grip your stomach, because

you have never done any programming and, in fact, have tried to avoid math as much as possible. If so, **YOU ARE PRECISELY THE PERSON WE HAD IN MIND** as we were planning the course. We are aiming to help you break through this barrier of darkness and fear into the radiant sunshine of quantitative enlightenment. The true beauty of MATLAB, as we will personally demonstrate, is that it allows people who are not mathematically adept (e.g. some of the instructors of this course) to use powerful numerical methods and visualization tools to gain an understanding of concepts that are very difficult to grasp analytically.

Course Notes: This bootcamp course will meet in August from 8/13/16 - 8/24/16.

Thinking about data: statistics for the life sciences (205051)

Richard Born

Brian Healy

2018 Fall (2 Credits)

Schedule: W 0600 PM - 0845 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

Probability & statistics taught with an emphasis on using simulations and re-sampling methods to both analyze data and understand core statistical concepts. Prior to class, students will view online lectures from Dr. Brian Healy's biostatistics course. In class, we will focus on MATLAB coding exercises to practice different approaches to analyzing real data sets, with an emphasis on resampling methods.

Course Notes:

This course will use a flipped design in which students will view video lectures from Dr. Brian Healy's Biostatistics Certificate Course (offered through Catalyst) prior to in-class programming exercises.

Class Notes:

Classes begin on September 5 2018 through October 24 2018. Please contact Richard Born, richard_born@hms.harvard.edu for any questions concerning the course.

Recommended Prep: Students are required to take Neurobiology 306QC as a pre-requisite for this course.

The Molecular Pathology and Current Therapies for Retinal Diseases (109255)

Dong Chen

Petr Baranov

Corinna Bauer

Kin-Sang Cho

Tatjana Jakobs

Lotfi Merabet

Daniel Sun

2018 Fall (2 Credits)

Schedule:

M 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Retinal diseases are major causes of irreversible blindness. A surge of progress resulting from studies in the disease mechanisms and the development of new imaging technology have led to a huge step forward in the therapies for diagnosing and treating retinal diseases and preventing blindness. This course will offer students an in-depth examination of current knowledge regarding retinal diseases, molecular pathology, and therapy, with an emphasis on recent breakthroughs and discussion of key studies in the field. The class consists of lectures and group discussions that focus on seminal papers selected from both the basic science and clinical ophthalmology, which will serve as a basis for teaching students basic concepts of ophthalmology and becoming familiar with animal models of retinal diseases. Each session will review the landmark publications on a particular topic or disease. As the retina has long served a standard model for studying the CNS, the class will foster discussion on the implications of these studies in other disease mechanisms and therapy.

Course Notes: Offered in alternate years.

Class Notes: Classes begin September 10, 2018 through December 3, 2018

Neurobiology of Psychiatric Disease: From Bench to Bedside (205053)

William Carlezon

Kerry Ressler

2018 Fall (2 Credits)

Schedule: T 0100 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap: n/a

To provide clinical insight and critical analysis of basic and translational science approaches necessary for students to approach psychiatric disorders as scientific problems, and thus contribute future research work with clinical relevance. Each pair of lectures presents 1) basic neuroscience approaches to the neural circuitry, cell and molecular biology underlying disease, followed by 2) clinical neuroscience, genetics, neuroimaging, etc., including case studies of the disorders.

The lectures will focus on a range of psychiatric disorders, neural systems underlying behavior, and translational approaches to novel interventions, while providing insight on disease characteristics, current, novel and translationally-informed treatments, gene vs. environmental risk factors, animal models, and gaps in knowledge across the field. There will also be laboratory-based sessions (organized visits to McLean Hospital) to demonstrate examples of basic and human laboratory approaches to the study and treatment of psychiatric illness.

Class Notes: Classes begin on September 11 2018 through October 16 2018. Please contact Bill Carlezon, carlezon@mclean.harvard.edu and Kerry Ressler, kressler@mclean.harvard.edu for any questions regarding the course

All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 323L

Sensory Transduction in Hair Cells of the Mammalian Inner Ear (109101)

Jeffrey Holt

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 323L

Sensory Transduction in Hair Cells of the Mammalian Inner Ear (109101)

Jeffrey Holt

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 324

Research in Neuropeptide Gene Regulation (136833)

Joseph Majzoub

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 324

Research in Neuropeptide Gene Regulation (136833)

Joseph Majzoub

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 324L

Neuroscience and Genetics of Human Variation in Reward and Self-Control (109102)

Joshua Buckholtz

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 324L

Neuroscience and Genetics of Human Variation in Reward and Self-Control (109102)

Joshua Buckholtz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 325

Synaptic Transmissions and Dendritic Processing (111229)

Wade Regehr

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 325

Synaptic Transmissions and Dendritic Processing (111229)

Wade Regehr

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 325L

Genetic Dissection of Inhibitory Modulation in the Central Nervous System (109103)

Uwe Rudolph

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 325L

Genetic Dissection of Inhibitory Modulation in the Central Nervous System (109103)

Uwe Rudolph

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 326

Age-Dependent Mechanisms of Perinatal Brain Injury (119610)

Frances Jensen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 326

Age-Dependent Mechanisms of Perinatal Brain Injury (119610)

Frances Jensen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 326L

Extracellular Matrix/neuron/glia Interactions in Pathophysiology of Schizophrenia & Bipolar Disorder (109104)

Sabina Berretta

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 326L

Extracellular Matrix/neuron/glia Interactions in Pathophysiology of Schizophrenia & Bipolar Disorder (109104)

Sabina Berretta

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 327

Rotation Course in Neurosciences (116607)

Rosalind Segal

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Course Notes: Primarily for students in Neuroscience.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 327

Rotation Course in Neurosciences (116607)

Rosalind Segal

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Course Notes: Primarily for students in Neuroscience.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 327R

Lab Rotations in Neurosciences (109330)

Rosalind Segal

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 327R

Lab Rotations in Neurosciences (109330)

Rosalind Segal

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 328

Mechanisms of Cell Death in Stroke and Trauma (112849)

Eng Lo

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 328

Mechanisms of Cell Death in Stroke and Trauma (112849)

Eng Lo

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 328L

Role of Sleep in Memory and Emotional Processing in Healthy Subjects, Schizophrenia, Autism, and PTS (109253)

Robert Stickgold

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 328L

Role of Sleep in Memory and Emotional Processing in Healthy Subjects, Schizophrenia, Autism, and PTS (109253)

Robert Stickgold

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 329

Molecular Mechanisms of Neurodegeneration in Alzheimer's and Parkinsons Diseases (124384)

Dennis Selkoe

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 329

Molecular Mechanisms of Neurodegeneration in Alzheimer's and Parkinsons Diseases (124384)

Dennis Selkoe

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 329L

The Genetic and Neural Basis of Sleep in Drosophila (109254)

Dragana Rogulja

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 329L

The Genetic and Neural Basis of Sleep in Drosophila (109254)

Dragana Rogulja

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 330

Effects of stress and other experiences on motivated behavior (115975)

William Carlezon

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 330

Effects of stress and other experiences on motivated behavior (115975)

William Carlezon

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 330L

Translational Genomics of Parkinsons Disease: Cause, Cures, Diagnostics (109252)

Clemens Scherzer

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 330L

Translational Genomics of Parkinsons Disease: Cause, Cures, Diagnostics (109252)

Clemens Scherzer

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 331

Neural Differentiation, Regeneration and Stem Cell Regulation in the Brain and Eye (115976)

Dong Chen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 331

Neural Differentiation, Regeneration and Stem Cell Regulation in the Brain and Eye (115976)

Dong Chen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 331L

Motivational Influences on Cortical Networks Underlying Attention, Learning and Memory of Sensory Cu (109256)

Mark Andermann

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 331L

Motivational Influences on Cortical Networks Underlying Attention, Learning and Memory of Sensory Cu (109256)

Mark Andermann

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 332

Ligand-Gated Ion Channels: Structure and Function (110882)

Jonathan Cohen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 332

Ligand-Gated Ion Channels: Structure and Function (110882)

Jonathan Cohen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 332L

Biological and Computational Underpinnings of Visual Processing (109257)

David Cox

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 332L

Biological and Computational Underpinnings of Visual Processing (109257)

David Cox

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 333

Intercellular Communication (111693)

David Paul

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 333

Intercellular Communication (111693)

David Paul

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 333L

Behavioral and synaptic plasticity in neuropsychiatric disorders; mechanisms of axon guidance and sy (109293)

Christopher Cowan

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 333L

Behavioral and synaptic plasticity in neuropsychiatric disorders; mechanisms of axon guidance and sy (109293)

Christopher Cowan

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 334

Hair Cells and Afferent Neurons of the Inner Ear (123141)

Ruth Anne Eatock

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 334

Hair Cells and Afferent Neurons of the Inner Ear (123141)

Ruth Anne Eatock

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 334L

Cellular and Molecular Mechanisms of Cortical Circuit Assembly (109369)

Corey Harwell

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 334L

Cellular and Molecular Mechanisms of Cortical Circuit Assembly (109369)

Corey Harwell

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 335

Physiological Function and the Pathogenetic Actions of Genes Implicated in Neurodegenerative Disease (109376)

Mark Albers

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 335

Physiological Function and the Pathogenetic Actions of Genes Implicated in Neurodegenerative Disease (109376)

Mark Albers

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 335L

Molecular Mechanisms Underlying the Assembly of Neural Circuits (156902)

Matthew Pecot

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 335L

Molecular Mechanisms Underlying the Assembly of Neural Circuits (156902)

Matthew Pecot

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 336

Developmental Cognitive Neuroscience, Focusing Primarily on Memory and Face Processing (121800)

Charles Nelson

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 336

Developmental Cognitive Neuroscience, Focusing Primarily on Memory and Face Processing (121800)

Charles Nelson

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 336L

Synapse formation and refinement in the mammalian brain (156926)

Hisashi Umemori

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 336L

Synapse formation and refinement in the mammalian brain (156926)

Hisashi Umemori

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 337

Neurobiology of the Human Circadian Pacemaker (115515)

Charles Czeisler

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 337

Neurobiology of the Human Circadian Pacemaker (115515)

Charles Czeisler

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 337L

Human and primate social decision making, executing functioning and memory (160771)

Ziv Williams

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 337L

Human and primate social decision making, executing functioning and memory (160771)

Ziv Williams

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 338

Neural Circuitry of Primate Visual Cortex (116539)

Richard Born

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 338

Neural Circuitry of Primate Visual Cortex (116539)

Richard Born

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 338L

Molecular Biology, Genetics, & Neural Circuitry of Fear in Animals & Human Fear-Related Disorders (160775)

Kerry Ressler

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 338L

Molecular Biology, Genetics, & Neural Circuitry of Fear in Animals & Human Fear-Related Disorders (160775)

Kerry Ressler

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 339

Synaptic and Neuronal Network Mechanisms of Learned and Innate Fear (119841)

Vadim Bolshakov

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 339

Synaptic and Neuronal Network Mechanisms of Learned and Innate Fear (119841)

Vadim Bolshakov

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 339L

Cell-extracellular matrix interaction in brain development and malformation (203215)

Xianhua Piao

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 30

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 339L

Cell-extracellular matrix interaction in brain development and malformation (203215)

Xianhua Piao

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 341

Cognition and Cognitive Disorders; the Role of Translational Regulation (123142)

Raymond Kelleher

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 341

Cognition and Cognitive Disorders; the Role of Translational Regulation (123142)

Raymond Kelleher

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 342

Neurophysiology of Visual Cortex and LGN (111946)

R. Reid

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 342

Neurophysiology of Visual Cortex and LGN (111946)

R. Reid

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 343

Neuronal Metabolism and Excitability; Molecular Physiology of Ion Channels (111077)

Gary Yellen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 343

Neuronal Metabolism and Excitability; Molecular Physiology of Ion Channels (111077)

Gary Yellen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 344

Neurobiology and Protein Biochemistry Underlying Parkinson's Disease (107634)

Matthew LaVoie

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 344

Neurobiology and Protein Biochemistry Underlying Parkinson's Disease (107634)

Matthew LaVoie

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 345

Molecular Basis of Neuron Glia Interactions (114397)

Gabriel Corfas

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 345

Molecular Basis of Neuron Glia Interactions (114397)

Gabriel Corfas

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 346

Visual Processing in Primates (111038)

John Assad

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 346

Visual Processing in Primates (111038)

John Assad

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 347

Alzheimer's Disease Research (118956)

Bradley Hyman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 347

Alzheimer's Disease Research (118956)

Bradley Hyman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 347L

Computational cognitive neuroscience of learning and memory (205911)

Samuel Gershman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 347L

Computational cognitive neuroscience of learning and memory (205911)

Samuel Gershman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 348

Neural stem cells and cerebrospinal fluid (108355)

Maria Lehtinen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 348

Neural stem cells and cerebrospinal fluid (108355)

Maria Lehtinen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 349

Olfactory and Vomeronasal Systems Molecular and Developmental Neurobiology (115980)

Catherine Dulac

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 349

Olfactory and Vomeronasal Systems Molecular and Developmental Neurobiology (115980)

Catherine Dulac

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 350

Development, degeneration, and circuitry of the vertebrate retina (146731)

Connie Cepko

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 350

Development, degeneration, and circuitry of the vertebrate retina (146731)

Connie Cepko

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 351

Neurogenetics of Disease (112135)

Louis Kunkel

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 351

Neurogenetics of Disease (112135)

Louis Kunkel

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 352L

Neural circuitry of sleep and sleep disorders (203807)

Thomas Scammell

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 352L

Neural circuitry of sleep and sleep disorders (203807)

Thomas Scammell

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 353

Physiology, with an Emphasis on Ion Channels, Signal Transduction, and Imaging (134189)

David Clapham

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 353

Physiology, with an Emphasis on Ion Channels, Signal Transduction, and Imaging (134189)

David Clapham

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 354

Structural Biology of Signaling and Transport Through Biological Membranes (123145)

Rachelle Gaudet

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 354

Structural Biology of Signaling and Transport Through Biological Membranes (123145)

Rachelle Gaudet

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 355

A Biophysical Approach to System Function (107746)

Michael Do

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 355

A Biophysical Approach to System Function (107746)

Michael Do

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 356

Ion Channels in Neural Cell Membranes (144968)

David Corey

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 356

Ion Channels in Neural Cell Membranes (144968)

David Corey

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 357

Experience-Dependent Neuronal Circuit Maturation and Plasticity (123610)

Michela Fagiolini

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 357

Experience-Dependent Neuronal Circuit Maturation and Plasticity (123610)

Michela Fagiolini

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 358

Neurogenetics of Human Disease (121701)

Xandra Breakefield

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 358

Neurogenetics of Human Disease (121701)

Xandra Breakefield

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 358L

Genomic analyses of brain cell function and dysfunction (205912)

Evan Macosko

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 358L

Genomic analyses of brain cell function and dysfunction (205912)

Evan Macosko

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 359

Functional and Behavioral Interrogation of Neural Circuits in the Mammalian Olfactory System (126396)

Sandeep Datta

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 359

Functional and Behavioral Interrogation of Neural Circuits in the Mammalian Olfactory System (126396)

Sandeep Datta

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 360

Neural Signal Processing and Mechanisms of General Anesthesia (119842)

Emery Brown

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 360

Neural Signal Processing and Mechanisms of General Anesthesia (119842)

Emery Brown

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 361

Immunobiology of the Nervous System and its Tumors (116018)

Lois Lampson

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 361

Immunobiology of the Nervous System and its Tumors (116018)

Lois Lampson

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 362

Optical Imaging in Alzheimer's Disease (125535)

Brian Bacskai

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 362

Optical Imaging in Alzheimer's Disease (125535)

Brian Bacskai

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 363

Axonal Development and Reorganization (120337)

Larry Benowitz

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 363

Axonal Development and Reorganization (120337)

Larry Benowitz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 363L

The genetics, biochemistry and physiology of forebrain inhibition (205895)

Gordon Fishell

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Using genetic, physiological and molecular methods to understand how inhibitory interneuron subtypes are generated and subsequently integrated into neural circuits in both normal and pathophysiological conditions.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 363L

The genetics, biochemistry and physiology of forebrain inhibition (205895)

Gordon Fishell

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Using genetic, physiological and molecular methods to understand how inhibitory interneuron subtypes are generated and subsequently integrated into neural circuits in both normal and pathophysiological conditions.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 364

hypothalamic circuitry controlling sleep and circadian rhythms (131279)

Clifford Saper

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 364

hypothalamic circuitry controlling sleep and circadian rhythms (131279)

Clifford Saper

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 365

Behavioral Pharmacology of Stimulant Drugs and Brain Dopamine Systems (121799)

Barak Caine

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 365

Behavioral Pharmacology of Stimulant Drugs and Brain Dopamine Systems (121799)

Barak Caine

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 366

Functional Organization of the Retina (121350)

Richard Masland

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 366

Functional Organization of the Retina (121350)

Richard Masland

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 367

Neocortical Development and Regeneration (113770)

Jeffrey Macklis

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 367

Neocortical Development and Regeneration (113770)

Jeffrey Macklis

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 368L

Serotonin neurotransmission in behavior and psychopathology (203814)

Kathryn Commons

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 368L

Serotonin neurotransmission in behavior and psychopathology (203814)

Kathryn Commons

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 369L

Statistical neuronal computations underlying complex decisions and behavior under uncertainty (203815)

Jan Drugowitsch

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Neurobiology - Graduate 369L

Statistical neuronal computations underlying complex decisions and behavior under uncertainty (203815)

Jan Drugowitsch

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 370

Genetic and Molecular Studies of Neurodegenerative Diseases (118843)

Rudolph Tanzi

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 370

Genetic and Molecular Studies of Neurodegenerative Diseases (118843)

Rudolph Tanzi

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 371

Sensory Neuron Development and Sleep Using Genetics and Live Imaging in Zebrafish (123147)

Alexander Schier

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 371

Sensory Neuron Development and Sleep Using Genetics and Live Imaging in Zebrafish (123147)

Alexander Schier

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 372

Neurotransmitter Control of Ion Channels (112805)

Bruce Bean

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 372

Neurotransmitter Control of Ion Channels (112805)

Bruce Bean

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 373

Developmental Studies of the Murine Trigeminal Sensory System (112846)

Qiufu Ma

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Neurobiology - Graduate 373

Developmental Studies of the Murine Trigeminal Sensory System (112846)

Qiufu Ma

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 374

Molecular Basis of Alzheimer's Disease & Parkinson's Disease (112852)

Jie Shen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 374

Molecular Basis of Alzheimer's Disease & Parkinson's Disease (112852)

Jie Shen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 375

Mechanisms of Synaptic Transmission & Plasticity (112850)

Venkatesh Murthy

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 375

Mechanisms of Synaptic Transmission & Plasticity (112850)

Venkatesh Murthy

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 375L

Deep phenotyping in mental illness (208292)

Justin Baker

2019 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 375L

Deep phenotyping in mental illness (208292)

Justin Baker

2018 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Neurobiology - Graduate 376

Genetics of Neuronal Cell Biology (115462)

Thomas Schwarz

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 376

Genetics of Neuronal Cell Biology (115462)

Thomas Schwarz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 377

Physiological Studies of Phototransduction and Light Adaptation (116020)

Clint Makino

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Neurobiology - Graduate 377

Physiological Studies of Phototransduction and Light Adaptation (116020)

Clint Makino

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Neurobiology - Graduate 377L

Structure, function, and development of neuronal networks (205935)

Wei-Chung Lee

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Subject: Genetics

Genetics 201

Principles of Genetics (113752)

Fred Winston

Maxwell Heiman

Thomas Bernhardt

Steven McCarroll

Jenna Galloway

Matthew Pecot

2018 Fall (4 Credits)

Schedule: MWF 0900 AM - 1020 AM

Instructor Permissions: None

Enrollment Cap: n/a

An in-depth survey of genetics, beginning with basic principles and extending to modern approaches and special topics. We will draw on examples from various systems, including bacteria, yeast, *Drosophila*, *C. elegans*, zebrafish, mouse and human.

Course Notes: Intended for first-year graduate students. Offered jointly with the Medical School as GN 701.0.

Class Notes: Classes begin September 5, 2018 through December 7, 2018

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Genetics 216

Advanced Topics in Gene Expression (111358)

Fred Winston

Robert Kingston

Stephen Buratowski

2019 Spring (4 Credits)

Schedule:

T 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This course covers different topics in gene regulation, covering genetic, genomic, biochemical, and molecular approaches. A small number of topics are discussed in depth, using the primary literature. Topics range from prokaryotic transcription to eukaryotic development.

Course Notes: BCMP 310QC has merged with Genetics 216. Offered jointly with the Medical School as GN 703.0.

Class Notes: Course begins on January 29, 2019 through May 7, 2019. Classes will be held in TMEC L-008

Recommended Prep: BCMP 200 and Genetics 201. All students taking Genetics 216 should read and be prepared to discuss the papers for the first meeting on January 29. The readings can be downloaded from the course web site.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Genetics 228

Genetics in Medicine - From Bench to Bedside (121745)

David Sweetser

2019 Spring (4 Credits)

Schedule:

F 0200 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Focus on translational medicine: the application of basic genetic discoveries to human disease. Each three-hour class will focus on a specific genetic disorder and the approaches currently used to speed the transfer of knowledge from the laboratory to the clinic. Each class will include a clinical discussion, a patient presentation if appropriate, followed by lectures, a detailed discussion of recent laboratory findings and a student led journal club. Lecturers will highlight current molecular, technological, bioinformatic and statistical approaches that are being used to advance the study of human disease. There is no exam. Students will present one paper per session in a journal club style. Attendance and active participation for the duration of all class meetings is required. If you are unable to attend class, or cannot be present for the entire session you are expected to contact the course instructor. Two incomplete or missed sessions will result in a failing grade.

Please do not sign up if you know you will have to miss 2 or more sessions. For more information visit https://ecor.mgh.harvard.edu/Default.aspx?node_id=375

Course Notes: Course will be held at MGH (transportation provided to MGH). Offered jointly with the Medical School as GN 711.0. Dental students should cross register for Genetics 228 on my.harvard to receive updated assignments and readings.

Class Notes: Pre-Requisites: Dental students should email course instructor dsweetser@mgh.harvard.edu for permission to enroll, including a description of their prior formal genetics training.

Course begins on February 1, 2019 through April 26, 2019 and will be held on the 3rd Floor, Room 3120 at the Simches Research Center - MGH

Recommended Prep: Genetics 201 or equivalent.

Current Tools for Gene Analysis (156915)

Neena Haider

Rachel Wright

2019 Spring (2 Credits)

Schedule: R 1000 AM - 1159 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

The goal of this course is to explore a number of the current online tools to analyze genes, gene function, pathways, DNA, RNA, and protein analysis. Each class we will introduce a new online tool. The majority of the class will be spent exploring the tool together in an interactive manner. During each class students will be given an assignment which utilizes the knowledge they gained in class and helps them to further explore the new tool. After taking this class students will be proficient in the use of each online tool and will be able to apply their knowledge to learning new tools and programs..

Course Notes:

Students will need to bring a laptop to class each day.
Recommended Prep: Genetics 201 or with permission from the instructor.

Class Notes:

Class start February 7, 2019 through April 11, 2019. Classes will be

held in Countway 403

Jonathan Seidman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 306

Inherited Human Disorders (121121)

Jonathan Seidman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 307

Regeneration in Axolotls (160766)

Jessica Whited

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 307

Regeneration in Axolotls (160766)

Jessica Whited

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 308

Molecular Biology of Signal Transduction (116507)

Brian Seed

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 308

Molecular Biology of Signal Transduction (116507)

Brian Seed

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 309

Gene Expression in Yeast (113402)

Fred Winston

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 309

Gene Expression in Yeast (113402)

Fred Winston

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 310

Molecular Genetics of Neural Development and Gene Therapy to Prevent Blindness (118193)

Connie Cepko

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 310

Molecular Genetics of Neural Development and Gene Therapy to Prevent Blindness (118193)

Connie Cepko

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 311

Molecular Mechanisms of Transcription Regulation in Mammals (121057)

Robert Kingston

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 311

Molecular Mechanisms of Transcription Regulation in Mammals (121057)

Robert Kingston

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 312

Genetic analysis of small RNA pathways and surveillance of core cellular systems (123512)

Gary Ruvkun

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 312

Genetic analysis of small RNA pathways and surveillance of core cellular systems (123512)

Gary Ruvkun

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 313

Genomic Approaches to Human Disease Genetics (117268)

David Altshuler

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 313

Genomic Approaches to Human Disease Genetics (117268)

David Altshuler

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 314

The Origin of Cellular Life (120754)

Jack Szostak

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 314

The Origin of Cellular Life (120754)

Jack Szostak

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 315

Molecular Genetics of Inherited Disorders (112919)

James Gusella

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 315

Molecular Genetics of Inherited Disorders (112919)

James Gusella

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 316

Transcription Factors and DNA Regulatory Elements (117269)

Martha Bulyk

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 316

Transcription Factors and DNA Regulatory Elements (117269)

Martha Bulyk

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 317

Signaling Networks in Development and Disease (111381)

Jordan Kreidberg

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 317

Signaling Networks in Development and Disease (111381)

Jordan Kreidberg

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 318

Genome Structure (114865)

George Church

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 318

Genome Structure (114865)

George Church

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 320

Genetics of Common Human Disease (126368)

Mark Daly

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 320

Genetics of Common Human Disease (126368)

Mark Daly

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 321

Genetic Analysis of Growth and Homeostasis (118751)

Norbert Perrimon

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 321

Genetic Analysis of Growth and Homeostasis (118751)

Norbert Perrimon

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 322

Vertebrate Pattern Formation (113859)

Clifford Tabin

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 322

Vertebrate Pattern Formation (113859)

Clifford Tabin

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 323

Molecular Biology of V(D)J Recombination (143860)

Marjorie Oettinger

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 323

Molecular Biology of V(D)J Recombination (143860)

Marjorie Oettinger

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 325

Human Genetics, Genomics and Complex Traits (117273)

Joel Hirschhorn

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 325

Human Genetics, Genomics and Complex Traits (117273)

Joel Hirschhorn

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 326

Human Molecular and Cancer Genetics (114753)

David Kwiatkowski

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 326

Human Molecular and Cancer Genetics (114753)

David Kwiatkowski

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 327

Systems Biology of Mammalian Cell Fate Decisions (126370)

Suzanne Gaudet

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 327

Systems Biology of Mammalian Cell Fate Decisions (126370)

Suzanne Gaudet

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 328

Lymphocyte Differentiation, Recombination, DNA Repair, Cancer (111897)

Frederick Alt

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 328

Lymphocyte Differentiation, Recombination, DNA Repair, Cancer (111897)

Frederick Alt

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 329

Genetic Analysis of Synaptic Transmission (117637)

Joshua Kaplan

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 329

Genetic Analysis of Synaptic Transmission (117637)

Joshua Kaplan

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 331

Developmental Oncobiology and Cancer Stem Cells (126371)

Zhe Li

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 331

Developmental Oncobiology and Cancer Stem Cells (126371)

Zhe Li

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 332

Combining genetic and biochemical approaches to elucidate mechanisms underlying cancer (115971)

Karen Cichowski

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 332

Combining genetic and biochemical approaches to elucidate mechanisms underlying cancer (115971)

Karen Cichowski

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 333

Computational biology of transcriptional and epigenetic regulation (109352)

Xiaole (Shirley) Liu

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 333

Computational biology of transcriptional and epigenetic regulation (109352)

Xiaole (Shirley) Liu

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 334

Genomics and the Genetics of Human Disease (117271)

Raju Kucherlapati

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 334

Genomics and the Genetics of Human Disease (117271)

Raju Kucherlapati

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 335

Genetics, epigenetics, gene regulation, evolution, disease (114764)

Chao-ting Wu

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 335

Genetics, epigenetics, gene regulation, evolution, disease (114764)

Chao-ting Wu

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 336

Developmental Biology of Hematopoiesis (120540)

Leonard Zon

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 336

Developmental Biology of Hematopoiesis (120540)

Leonard Zon

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 337

Human Molecular Genetics (120637)

Stuart Orkin

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 337

Human Molecular Genetics (120637)

Stuart Orkin

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 338

Epigenetic inheritance and small regulatory RNAs (159949)

Scott Kennedy

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 338

Epigenetic inheritance and small regulatory RNAs (159949)

Scott Kennedy

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 339

Mechanisms of Heritable Epigenetics (160777)

Eric Greer

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 339

Mechanisms of Heritable Epigenetics (160777)

Eric Greer

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 340L

Mechanisms of microtubule organization (203801)

Radhika Subramanian

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 340L

Mechanisms of microtubule organization (203801)

Radhika Subramanian

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 341

Development and Homeostasis of the Skeleton (124135)

Matthew Warman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 341

Development and Homeostasis of the Skeleton (124135)

Matthew Warman

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 342

Genetic Analysis of Zebrafish Kidney Organogenesis (124201)

Iain Drummond

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 342

Genetic Analysis of Zebrafish Kidney Organogenesis (124201)

Iain Drummond

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 343

Zebrafish Cardiovascular Development and Regeneration (110244)

Charles Burns

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 343

Zebrafish Cardiovascular Development and Regeneration (110244)

Charles Burns

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 344

Computational Genomics (124202)

Peter Park

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 344

Computational Genomics (124202)

Peter Park

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 345

Computational Biology of Cancer (160951)

Franziska Michor

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 345

Computational Biology of Cancer (160951)

Franziska Michor

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 347

Ras signaling and colon cancer (107886)

Kevin Haigis

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 347

Ras signaling and colon cancer (107886)

Kevin Haigis

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 348

The Regenerative Biology of Tendons and Ligaments (156719)

Jenna Galloway

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 348

The Regenerative Biology of Tendons and Ligaments (156719)

Jenna Galloway

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 350

Genetic Regulation of Organogenesis and Organ Regeneration (114732)

Richard Maas

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 350

Genetic Regulation of Organogenesis and Organ Regeneration (114732)

Richard Maas

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 351L

Musculo-skeletal development (203793)

Olivier Pourquie

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 351L

Musculo-skeletal development (203793)

Olivier Pourquie

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 352

Cardiovascular Development and Disease, Muscle Biology (127376)

Da-Zhi Wang

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 352

Cardiovascular Development and Disease, Muscle Biology (127376)

Da-Zhi Wang

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 353

Genetics of Human Disease (122745)

Susan Slaughaupt

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 353

Genetics of Human Disease (122745)

Susan Slaughaupt

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 355

Molecular Genetics of Human Neuromuscular Diseases (126288)

Alan Beggs

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 355

Molecular Genetics of Human Neuromuscular Diseases (126288)

Alan Beggs

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 356

Research in Molecular Cytogenetics (107887)

Cynthia Morton

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 356

Research in Molecular Cytogenetics (107887)

Cynthia Morton

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 357

Lung Stem Cell Biology and Cancer (123104)

Carla Kim

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 357

Lung Stem Cell Biology and Cancer (123104)

Carla Kim

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 358

Developmental Neurobiology and Genetics (123342)

Susan Dymecki

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 358

Developmental Neurobiology and Genetics (123342)

Susan Dymecki

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 359

Cancer and development, intestinal development/differentiation (117740)

Ramesh Shivdasani

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 359

Cancer and development, intestinal development/differentiation (117740)

Ramesh Shivdasani

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 360

Microtubule Associated RNAs During Mitosis (123002)

Michael Demian Blower

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 360

Microtubule Associated RNAs During Mitosis (123002)

Michael Demian Blower

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 361

Epigenetic regulation by long noncoding RNAs (125583)

Jeannie Lee

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 361

Epigenetic regulation by long noncoding RNAs (125583)

Jeannie Lee

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 362

Molecular Biology and Genetics of Cancer (126670)

David Livingston

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 362

Molecular Biology and Genetics of Cancer (126670)

David Livingston

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 366

Molecular Genetic Approaches to Human Disease Mechanisms (110421)

Marcy MacDonald

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 366

Molecular Genetic Approaches to Human Disease Mechanisms (110421)

Marcy MacDonald

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 368

Molecular Genetics of Aging and Neurodegenerative Disorders (128166)

Bruce Yankner

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 368

Molecular Genetics of Aging and Neurodegenerative Disorders (128166)

Bruce Yankner

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 369

Molecular Mechanisms of Plant Signal Transduction (115351)

Jen Sheen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 369

Molecular Mechanisms of Plant Signal Transduction (115351)

Jen Sheen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 370

Molecular Basis of Breast Cancer Initiation and Progression (115356)

Kornelia Polyak

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 370

Molecular Basis of Breast Cancer Initiation and Progression (115356)

Kornelia Polyak

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 371

Functional Genomics and Proteomics (115465)

Marc Vidal

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 371

Functional Genomics and Proteomics (115465)

Marc Vidal

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 372

Molecular Mechanisms of Aging and Age Related Diseases (128167)

David Sinclair

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 372

Molecular Mechanisms of Aging and Age Related Diseases (128167)

David Sinclair

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 373

Kidney Disease, Genetics, Cytoskeleton (117272)

Martin Pollak

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 373

Kidney Disease, Genetics, Cytoskeleton (117272)

Martin Pollak

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 374

Mechanisms underlying accurate meiotic chromosome segregation (120007)

Monica Colaiacovo

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 374

Mechanisms underlying accurate meiotic chromosome segregation (120007)

Monica Colaiacovo

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 376

Cell Cycle Control and Genomic Integrity (120008)

Stephen Elledge

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 376

Cell Cycle Control and Genomic Integrity (120008)

Stephen Elledge

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 377

Molecular Genetics of Chromosome Organization and Gene Expression (120009)

Mitzi Kuroda

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 377

Molecular Genetics of Chromosome Organization and Gene Expression (120009)

Mitzi Kuroda

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 378

Aging, Stress Defenses, and Developmental Gene Regulation in *C. elegans* (128168)

T. Keith Blackwell

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 378

Aging, Stress Defenses, and Developmental Gene Regulation in *C. elegans* (128168)

T. Keith Blackwell

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 379

Applying Population Genetics to Find Disease Genes (119612)

David Reich

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 379

Applying Population Genetics to Find Disease Genes (119612)

David Reich

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 380

Molecular Approaches to Metabolism and Energy Balance (120011)

Evan Rosen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 380

Molecular Approaches to Metabolism and Energy Balance (120011)

Evan Rosen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 382

Muscle Stem Cell Commitment and Differentiation (120180)

Emanuela Gussoni

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 382

Muscle Stem Cell Commitment and Differentiation (120180)

Emanuela Gussoni

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Genetics 383L

Genome structure and function, Neuropsychiatric genomics (204036)

Michael Talkowski

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 383L

Genome structure and function, Neuropsychiatric genomics (204036)

Michael Talkowski

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 385

Cell Cycle Proteins in Development and Cancer (128169)

Peter Sicinski

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 385

Cell Cycle Proteins in Development and Cancer (128169)

Peter Sicinski

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 387

Stem Cells and Developmental Biology (125403)

Chad Cowan

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 387

Stem Cells and Developmental Biology (125403)

Chad Cowan

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 388

Genetics of Neuronal Morphogenesis and Connectivity in C. Elegans (127400)

Maxwell Heiman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 388

Genetics of Neuronal Morphogenesis and Connectivity in C. Elegans (127400)

Maxwell Heiman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 389

Epigenomics of Allele-Specific Expression (128170)

Alexander Gimelbrant

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 389

Epigenomics of Allele-Specific Expression (128170)

Alexander Gimelbrant

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 390QC

Advanced Experimental Methods: Experimental Approaches in Genetic Analysis (125362)

Fred Winston

Rachel Wright

2019 Spring (2 Credits)

Schedule: MTWRFS -

Instructor Permissions: Instructor

Enrollment Cap: 8

A survey of major themes in genetics combined with exposure to various experimental techniques, technologies, and model systems. Combines lectures and hands-on laboratory activities emphasizing experimental methods, hypothesis generation and testing, and data analysis.

Course Notes: This is an intensive January course. Priority will be given to first year graduate students. Students must first contact the faculty for enrollment approval prior to registration for the course. Meeting Dates/Times: Approximately 8:30 am - 6:00 pm each day for 8days.

Class Notes: January 14, 2019 to Jan 26, 2019. Location varies each day, please contact Rachel Wright, rachel_wright@hms.harvard.edu

Recommended Prep: Students must also enroll in, or have taken, Genetics 201.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 391

Genetic and genomic basis of biological variation (127407)

Steven McCarroll

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 391

Genetic and genomic basis of biological variation (127407)

Steven McCarroll

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 392

Self-Renewal and Cancer (108113)

David Langenau

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 392

Self-Renewal and Cancer (108113)

David Langenau

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 393

Genetic basis of skeletal development and evolution (128192)

Matthew Harris

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 393

Genetic basis of skeletal development and evolution (128192)

Matthew Harris

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 394

How transcriptional networks rewire neuronal circuits (107885)

Jesse Gray

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 394

How transcriptional networks rewire neuronal circuits (107885)

Jesse Gray

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 395

Regulation of global gene expression at high resolution (107761)

Stirling Churchman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 395

Regulation of global gene expression at high resolution (107761)

Stirling Churchman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 396

Genome Editing and Epigenome Editing (108111)

Keith Joung

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Genetics 396

Genome Editing and Epigenome Editing (108111)

Keith Joung

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Genetics 397

Immunogenomics (107630)

Soumya Raychaudhuri

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 397

Immunogenomics (107630)

Soumya Raychaudhuri

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Genetics 398

Epigenetic regulation in stem cell/development & disease (109349)

Yi Zhang

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Genetics 398

Epigenetic regulation in stem cell/development & disease (109349)

Yi Zhang

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Medical Sciences 210

Intro to Matlab, Statistics, and Dynamical Systems for Mathematical Biology in Pharma and Biotech (205991)

Catherine Dubreuil

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

24

This course provides an introduction to the use of mathematical modeling, continuous differential equations, statistics and analysis and programming in Matlab with a focus on mathematical biology applications in pharmaceutical and biotechnology industries. Biological topics will include dynamic systems math modeling and statistical analysis applied to the drug discovery and development pipeline. Computational tools, model simulations, and statistical analyses will be executed in MATLAB. MATLAB code will be covered in class.

Medical Sciences 250AB

Human Functional Anatomy (120066)

Lee Gehrke

Trudy Van Houten

Breda Zimkus

Mohini Lutchman

Sabine Hildebrandt

2018 Fall (8 Credits)

Schedule:

MWF 0130 PM - 0559 PM

Instructor Permissions: Instructor

Enrollment Cap:

52

Lectures, detailed laboratory dissections, and prosections provide a thorough exploration of the gross structure and function of the human body. Fundamental principles of embryology and bioengineering promote analytical approaches to understanding the body's design.

Course Notes:

Open to qualified graduate students with permission of the course director. The course has a minimum enrollment of 30. This course requires rental of a locker for two hundred and ten dollars. Offered jointly with the Medical School as HT010.

Class Notes:

Please note that there will be an additional fee for microscope rental.

Additional Course Attributes:

This course is a required course for all DMS students and all who receive support from NIH training grants. The goal of this course is to inform students about the appropriate conduct of research and the many ethical and social problems that they may encounter during their research career in graduate school. The course consists of three lectures for the entire class and five highly interactive sessions with a small group of fellow students moderated by a faculty member. Some of the issues that will be discussed in this course include appropriate methods of collecting laboratory data, interactions with members of the laboratory and the mentor and issues dealing with research misconduct.

Course Notes:

All current G2 students must register for this course on their Fall Semester 2017 study cards. Specific enrollment instructions will be sent to current G2s and other eligible students in the upcoming weeks. Please contact Tatevik Holmgren (tatevik_holmgren@hms.harvard.edu) for enrollment inquiries.
Restricted to GSAS graduate students on the Longwood campus.

Class Notes:

Classes begin on September 20, 2018 through November 15, 2018.
Lectures will take place in Armenise 125(D)

Graduate TA Training in the Biomedical Sciences (207116)

Bradley Coleman

Taralyn Tan

2018 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 50

Instructs graduate student teaching assistants in the pedagogy and course management skills required to be an effective TA. The course begins with three two-hour class sessions that focus on the basics of how to use evidence-based teaching approaches to be more prepared for class, strategies to maximize what your students learn, and advice about common situations and problems. As the semester progresses, students use their work as TAs as the basis for continued instruction and reflection on teaching best practices. Instruction is matched to individual TA responsibilities, but includes goal-setting, evaluation of approaches, teaching observations, and structured feedback.

Class Notes: Class begins on August 28, 2018 through December 5, 2018

Recommended Prep: Open to any graduate student currently serving as a Teaching Assistant, pending approval of a Curriculum Fellow overseeing the appropriate longitudinal component. If your course is already has a curriculum fellow, please contact them prior to registering. If you are TAing a course that is not served by a Curriculum Fellow you must contact Bradley Coleman prior to enrolling to discuss your ability to receive continued instruction and practice throughout the semester.

PhD Pathfinder (161280)

*David Cardozo**Lisa Rossini**Joseph Arboleda-Velasquez*

2019 Spring (2 Credits)

Schedule:

TBD

Instructor Permissions: Instructor**Enrollment Cap:**

50

In this course, Ph.D. Pathfinder, students will learn about the many career paths available to people with advanced degrees in biomedical research including academia, biotech, patent law, science writing/publishing, consulting/business, education, and science policy/regulation.

A Ph.D. education provides students with fundamental knowledge about the principles and practice of the scientific method and promotes development of problem-solving skills in ways that are quite useful for many different professions. Students will have the opportunity to learn from experienced professionals representing each of these paths, to learn about strategies for career development, curriculum enrichment, and networking opportunities that will make them competitive for their career of choice.

The course is open to all Ph.D. students interested in learning about the range of career options available to biomedical Ph.Ds. The course includes talks, didactic sessions, workshops and networking events to promote interactions between students and invited speakers. There will be a special emphasis on helping students with their own skill self-assessment to assist in career and professional development. After each session there will be a small networking reception for both the students and lecturers.

The last session of this course will be the launch for the new DMS Paths Certificate Program. DMS students who have successfully completed the pilot program will present their Capstone presentations.

Course Notes:

Course Begins on October 22 through October 26. Students are required to attend all five sessions. Monday's session will run from 3:30PM-7PM. Students are required to arrive at 3:30 on the first day of the course for a one-hour interactive Career Jump Start workshop with Laura Stark from OCS.

Please note that 4/5 course sessions will be held in Modell 100A, with the exception of Wednesday, October 24th, which will take place in the Cannon Room (Building C).

Class Notes:

Classes begin April 23 and end April 27, 2018. Class ends at 6:30 and a reception follows immediately after. Classes will be held in Modell 100A except on Wednesday April 25, 2018 which will be held in Cannon.

Cheng-Zhong Zhang

2018 Fall (4 Credits)

Schedule:

MW 0230 PM - 0359 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course focuses on quantitative aspects of genetics and genomics, including computational and statistical methods of genomic analysis. We will introduce basic concepts and discuss recent progress in population and evolutionary genetics and cover principles of statistical genetics of Mendelian and complex traits. We will then introduce current genomic technologies and key algorithms in computational biology and bioinformatics. We will discuss applications of these algorithms to genome annotation and analysis of epigenomics, cancer genomics and metagenomics data. Proficiency in programming and basic knowledge of genetics and statistics will be assumed.

Class Notes:

Class begins on September 5, 2018 through December 3, 2018. Room
Location: TMEC 250

Theodore Feldman

2018 Fall (2 Credits)

Schedule:

TR 0945 AM - 1115 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will prepare students for advanced graduate level classes that require practical programming and data analysis skills. The main focus of this course is to familiarize students with the R programming language, the command line on Linux-based systems, high performance computing environments, and fundamental data analysis approaches. The skills taught in this course will enable students to design and implement programs for reproducible data analysis, manage file-based data sets, apply basic statistical, algorithmic, and visual approaches for data interpretation, assemble basic analysis workflows, and execute analyses on a compute cluster. Students will be working with Jupyter Notebooks, RStudio, git, and bash.

Course Notes:

Cross listed with HMS as BMI 713
BMIF 313qc is graded SAT/UNSAT. If a letter grade is preferred, students can cross-register through my.harvard for BMI 713.

Class Notes:

Courses start on September 4 through October 18, 2018. Classes will be held in Countway Room 403

Peter Park

2018 Fall (2 Credits)

Schedule:

TR 1000 AM - 1129 AM

Instructor Permissions: Instructor

Enrollment Cap:

26

This course will provide a practical introduction to statistical analysis of biological and biomedical data. Basic techniques will be covered, including descriptive statistics, elements of probability, hypothesis testing, nonparametric methods, correlation analysis, and linear regression. Emphasis will be on how to choose appropriate statistical tests, how to assess statistical significance, and how to avoid common mistakes in analysis of large datasets. This course is geared toward graduate students in the biological sciences, but others are welcomed as auditors if space permits. No previous knowledge in statistics is required, but some proficiency in R will be assumed.

Instructor Permissions: Instructor

Enrollment Cap:

16

This laboratory course is designed to provide a survey of major topics and contemporary research in developmental and regenerative biology. Students will rotate in the laboratories of DRB faculty across the Harvard campuses and affiliated hospitals. Students engage with faculty and gain hands on experience in a variety of model systems, experimental techniques and research areas. Each day of the course will consist of a lecture followed by hands-on laboratory activities and interactive discussions.

Course Notes:

This is an intensive January course. Open to first-year and second-year BBS students;[HDRB undergraduates with approval of the course director]. Not repeatable for credit.

Class Notes:

Dates: January 7, 2019 to January 18, 2019. Please contact the Ted Feldman for the course location

Medieval Studies 111

Sex, Love, and Marriage in the Middle Ages (205890)

Sean Gilsdorf

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This class explores the relationships of passion, love, and obligation that bound men and women over the course of nearly two millennia, from Rome in the first century B.C.E. to sixteenth-century Italy. In particular, it focuses on how those relationships were organized legally and institutionally, on the social roles created by such relationships, and on the connection (or lack thereof) between marriage, love, and sexual passion. Although marriage in the West long was viewed as an exclusively heterosexual estate, the course also considers how homosocial and homosexual desires have affected it throughout history.

Medieval Studies 117

English Legal History, 600-1600 (142694)

Charles Donahue

2018 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the legal and constitutional history of England from the Anglo Saxons to the end of the Tudor period, essentially 600 – 1600, including the development of private (e.g., contract, torts, property) and public law (e.g., criminal and constitutional law). No previous background in English legal history is assumed.

Course Notes: Meets together with HLS 2165.

At Cross Purposes: The Crusades in Material Culture (109230)

Evridiki Georganteli

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Crusading expeditions in the Holy Land, Spain and Eastern Europe from 1096 until the end of the Middle Ages shaped the political, socio-economic and cultural map of Europe and the Middle East. This course explores the multifaceted encounters between crusaders, Byzantines, Jews, Armenians and Muslims through the material traces they left behind: architecture, Byzantine objects dispersed across Western Europe, coins, sculptures, frescoes, and manuscripts from the East and the West.

Mind, Brain & Behavior 980B Section: 1

Exploring Addiction (124115)

Gene Heyman

Paul Harris

2019 Spring (4 Credits)

Schedule:

R 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Course goals include an introduction to the varied and conflicting claims about the nature of addiction. Topics include (1) the characteristics of addiction as revealed in biographies, epidemiological studies, clinical research, and "natural experiments;" (2) the current "drug overdose epidemic," including an opportunity to explore its social-economic correlates; (3) genetic influences on alcohol consumption and AA; (4) drug-induced cognitive changes and their implications for drug use; (5) smoking; (6) consideration of the consequences of legalizing marijuana; and (7) an introduction to research-based, quantitative choice models (e.g., delay discounting). The section on drug overdoses includes access to EXCEL files that combine national, state-level data on drug overdoses, prescription sales, and social-economic measures (e.g., "social capital").

Class Notes:

Preference to juniors in MBB tracks and the MBB secondary field.

Mind, Brain & Behavior 980F

Creativity Research: Eccentrics, Geniuses, and Harvard Students (128215)

Shelley Carson

Alfonso Caramazza

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Examines human creativity from three perspectives: a) empirical research sources, b) case studies of eminent creative achievers, and c) ourselves as creative subjects. Topics include the definition and measurement of creativity, the creative process, the neuroscience of creativity, the creative personality, the role of family life and culture in creativity, the relationship of creativity to IQ, gender differences, and the relationship of creativity to psychopathology. The course format will consist of a combination of lectures, student presentations, and discussion. Students will write a final paper on the topic of their choice related to creativity.

Class Notes:

Preference to juniors in MBB tracks or MBB secondary field.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Social Sciences
FAS: Course Level	Primarily for Undergraduate Students

Mind, Brain & Behavior 980H

What Disease Teaches about Cognition (109866)

Michael Alexander

William Milberg

2019 Spring (4 Credits)

Schedule:

T 0345 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

Seeks to reconcile the complicated and messy problems of patients with brain disease with the concise analysis of precisely defined cognitive functions in normal subjects. Students will learn to overlap cognitive functions on to the brain in disease - at the gross dissection and imaging levels - and to understand some of the complex interactions of individual cognitive operations in disease. Includes dissection of a human brain, mapping on to imaging, dissection of multi-dimensional clinical disorders into their component functional parts.

Class Notes: Preference to juniors in MBB tracks and the MBB secondary field.

Mind, Brain & Behavior 980K Section: 1

Fighting Cancer with the Mind (156497)

Jamie Jacobs

William Pirl

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Using contemporary mind-body practices as context, examines evidence (or lack of evidence) linking psychological practices with cancer survival. We will (1) review theoretical foundations for these links including psychoanalysis, psychoneuroimmunology, and cognitive-behavioral therapy; (2) analyze legitimization of mind-body practices for cancer in popular media; (3) interview mind-body medicine practitioners; and (4) examine published scientific data. Students will choose one mind-body practice for in-depth study, analyzing its underlying theories, scientific evidence, and appeal to patients.

Class Notes: Preference to juniors in MBB tracks or MBB secondary field.

Mind, Brain & Behavior 980L

Dopamine (160758)

2018 Fall (4 Credits)

Schedule:

W 0600 PM - 0759 PM

Instructor Permissions: Instructor**Enrollment Cap:**

18

A Parkinson's victim regains control of her body with L-dopa. A schizophrenic man paralyzed by fear and hallucinations is freed from a mental institution by clozapine. A meth addict lies, cheats, and steals, ending up emaciated and dead. Miracles and monstrosities, all related to a single molecule - dopamine. The overall goal of this tutorial is to focus on a single subject, a single chemical neurotransmitter, and remaining on that topic to proceed through three phases of study, as follows. First, to orient students to tools from multiple traditional disciplines: synaptic mechanisms of neurotransmission, neuropharmacology, behavioral pharmacology, neuroanatomy, and psychiatry. Second, to elicit interest and curiosity through examples of specific and important disease states: Parkinson's Disease, Schizophrenia, and Drug Addiction. Third, to gain an historical perspective up to and including a current and sophisticated consensus (i.e., review articles of recent years). Socratic debate will be prioritized in the classroom. The main discipline presented in this course is pharmacology, specifically, in vivo pharmacology and more specifically, behavioral pharmacology in humans. Pharmacology has traditionally been a graduate-level subject and rarely present in undergraduate curricula. That is a shame, because pharmacology has played and continues to play a key role in the history of neuroscience, in many applications of clinical medicine, and in the relationships among "mind, brain, and behavior." Moreover, students with an interest in medical sciences and careers will find extremely useful the tools and concepts of pharmacology, from elucidating mechanisms of action using basic research, to applications in the clinic using analgesic, antipsychotic, anti-Parkinsonian, stimulant, and anesthetic drugs. My philosophy of teaching is that 70% of the work can be completed in the classroom. I believe the rest can be completed in 1-2 hours per week outside of the classroom. Mostly to study your notes from class together with an outline prepared and distributed by Dr. Caine, and then to complete the semi-weekly writing assignment ("take-home" quizzes, open book, open note, short answer, six assignments in all).

Class Notes:

The course will meet 6:00-8:00PM on Wednesdays. Not open to students who have taken Neurobiology 95hfb or Neurobiology 101hfb. Preference to juniors in MBB tracks or MBB secondary field.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Mind, Brain & Behavior 980M

Functional Neuroimaging of Psychiatric Disorders: Insights into the Human Brain-Mind (160759)

David Silbersweig

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

Functional brain imaging has revolutionized the study of systems-level behavioral neuroscience and psychiatric disorders, through the ability to localize and characterize distributed brain activity directly associated with perception, cognition, emotion and behavior in disorders where there are not gross brain lesions. This seminar will introduce students to translational neuroimaging methods at the interface of neuroscience, psychology and medicine. It will cover recent and ongoing advances in our understanding of fronto-limbic-subcortical brain circuitry across the range of psychiatric disorders (e.g. mood disorders, anxiety disorders, psychotic disorders, personality disorders, addictions). It will discuss new, emerging biological (as opposed to descriptive) taxonomies and conceptualizations of mental illness and its

treatment. It will explore the implications of such knowledge for issues such as consciousness, meaning, free will, emotion, resilience, and religiosity. It will incorporate clinical observations, scientific data and readings, and examine future directions in brain-mind medicine.

Class Notes: Preference to juniors in MBB tracks or MBB secondary field. Additional class meetings for site visits to be arranged.

Additional Course Attributes:

Mind, Brain & Behavior 980N Section: 1

Neuroaesthetics (161267)

Nancy Etcoff

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Focuses on neuroaesthetics, an emerging field offering a scientific perspective on the nature of art and the ways that art reveals human nature. Integrates findings from neuroscience, psychology, evolutionary biology, philosophy, and scholarship in the arts and humanities. Begins with a brief history of ideas on aesthetics, art, beauty, and pleasure. Considers the neural underpinnings of response to art in the brain's reward system and default network. Among the questions considered: Why are people drawn to art that is neither conventionally beautiful nor entirely pleasurable? Is art a vehicle for simulating experiences and understanding other minds? What does it mean to "enjoy" sad music or chills and thrills in response to fiction or film? Can art promote well-being? The course will focus on visual art, fiction, film, and to a lesser extent, music, and on our response to art rather than its creation. The course will include a semester long gallery classroom at the Harvard Art Museum with original works of art from the museum's collections that will serve as primary source materials for study and as subjects of assignments.

Class Notes: Preference to juniors in MBB tracks or MBB secondary field.

Mind, Brain & Behavior 980P Section: 1

The Role of Music in Health and Education (205158)

Lisa Wong

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Music shapes the course of human history at both a micro and macro scale; it can make an individual weep and rally crowds of thousands to cheer. The "universal language" has the power to connect people who

share no other common ground. Its power to bind people together is intuitively understood, but only through recent neuroimaging advances over the past 50 years have scientists been able to move past intuition to reveal its impact on the brain. Through this course, we will examine the exciting progress of the fields of music and medicine, through a variety of lenses. Who are the key investigators and practitioners in today's emerging music / brain landscape? What are the latest discoveries about how music influences the brain? How does the direct application of music function — how do we hear, how do we listen, and what happens when this process goes wrong? What has music's role been through human history, and where does that bring us today? This course invites the student to deepen his/her relationship with music exploring different aspects of the art form through several perspectives, including neuroscientist, educator, musician, therapist, patient, and healthcare provider. By the end of this course, the learner will (1) understand the effect of music on the developing brain; (2) understand the mechanism of hearing music; (3) consider the pathophysiology of disordered movement and hearing and how music can be used therapeutically; and (4) understand how other disciplines can add educational and neuroscientific knowledge to therapeutic uses of music. Students will be invited to bring their own experiences to the seminar, and to pursue a final independent project, conducting a combination of scientific, historical, education, or psychology research. In the final weeks, they will present their findings to the group in oral, written or musical format. Given the transdisciplinary nature of the work, students will be challenged to read literature from a variety of genres, from lay literature to educational monographs to scientific papers. This will lead to discussion of one of the key questions in interdisciplinary study between the sciences and the arts: how to research and document outcomes. How do we agree on common definitions of research in disparate fields? What constitutes research to a musician? A music therapist? A neuroscientist? A physician? What is proof of success? What can/should be measured?

Course Notes: Preference to juniors in MBB tracks or MBB secondary field.

Of Mice and Microbes: How Microbes Shape Animal Behavior (207089)

Chris Baker

Naomi Pierce

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Animals constantly interact with an astonishing diversity of microbes, far outstripping the animals themselves in terms of cell counts or genetic content. While many interactions may be fleeting encounters in a shared environment, it is the capacity for symbiosis that makes animal-microbe interactions so special. Microbial symbioses range from highly antagonistic relationships to intimate obligate mutualisms. Across that spectrum, coevolution produces some of the most elaborate adaptations to be found in biology. This course explores a variety of animal-microbe symbioses through the lens of animal behavioral ecology. Topics may include gut microbiomes and host nutrition; microbial agriculture; host chemical defenses; mind-controlling parasitoids; host chemical communications; host behavior and symbiont acquisition; and the gut-brain axis and dysbiosis. The course will explore both proximate mechanisms and ultimate explanations, and will emphasize critical reading of the primary literature.

Class Notes: Preference to juniors in MBB tracks or MBB secondary field.

Psychopaths and Psychopathy: Psychological, Neuroscientific, Legal, and Policy Issues (207090)

Ellsworth Fersch

Richard McNally

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Psychopathy is often used to describe individuals who act in criminal even non-criminal predatory or conscience-less fashion. It is not, however, an official term in the Diagnostic and Statistical Manual of Mental Disorders, though antisocial personality disorder has in the past been described as encompassing psychopathy and sociopathy. Psychopathy was explored by Cleckley in his 1944 book *The Mask of Sanity*; and by Robert Hare in his 1999 book *Without Conscience*, and in his 2003 revision of his *Psychopathy Check-list*. My psychology department seminar on Psychopaths and Psychopathy a decade ago focused on behavioral research and case studies up to that time. By that time the American Psychiatric Association had issued a statement that psychopaths and those with antisocial personality disorder were not, for heuristic reasons, eligible for the insanity defense. Also, at that time, the determination that a convicted killer was a psychopath was often a strong indicator that the death penalty was warranted. Since then neuroscience research has increasingly explored brain structure and brain function in relation to the disorder causing some professionals to reevaluate the applicability of former positions on insanity and other defenses. Related research has further examined social and philosophical factors, and further operationalized behavioral considerations. In this interdisciplinary discussion-based seminar, students from any of a number of concentrations will examine and discuss that newer research in the context of previous research, and will write and present a briefer case study as well as a longer paper about a topic of their choosing.

Cognitive Neuroscience of Meditation (207091)

Sara Lazar

2019 Spring (4 Credits)

Schedule:

M 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Buddhist philosophy describes a model of how the mind works, as well as a method, mindfulness meditation, that can be used as a tool to transform consciousness and reduce mental distress. Neuroscientists have begun to study the impact of meditation on brain structure and function, often using Buddhist philosophy to guide their hypotheses. We will review and discuss how the science relates to Buddhist philosophy, using the four foundations of mindfulness as the primary framework. We will also compare and contrast the Buddhist model with modern scientific models of how conscious experience is created in the brain, in order to gain a more nuanced understanding of consciousness that integrates philosophy, neuroscience, and personal experience. No prior knowledge of Buddhism is required. The course will be a mixture of lecture, discussion of two primary scientific articles that are assigned each week, and formal powerpoint presentations by students. Students will write a final paper on a topic of their choice that is relevant to the themes of the course.

The Biological and Social Embedding of Early Life Stress (208068)

Sarah Jensen

Charles Nelson

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

A large epidemiological literature along with experimental studies in both humans and animals attests to the wide-ranging and long-lasting effects of early experiences on physical and mental well-being. In this course, we will address the complex but fundamental question of how these early experiences get "under the skin." Specifically, we will explore the mechanisms by which early experiences (e.g., caregiving environment, poverty, and maltreatment) interact with biological systems (e.g., the stress response, inflammatory and metabolic processes, and cellular aging mechanisms) to shape developmental trajectories. While biological disruptions serve as the primary interface between our experiences, body, and mind, such biological disruptions will be discussed in light of the complex social human environments that, along with other moderating factors such as genomic variation, shape individual susceptibility to early experiences. By the end of this course, the learner will (1) develop a mechanistic understanding of the long-term consequences of early life modulations of biological systems underlying physical and mental health; (2) understand major theoretical frameworks of human development, including ecological, stress-vulnerability, cumulative stress, and complex interactional models; (3) critically evaluate the existing scientific literature; and (4) examine how insights from science can be translated into clinical and political change to promote and support healthy development of children domestically and across the globe.

This course provides an introduction to the principles of molecular and cellular biology and their connections to biomedicine. We explore how medical syndromes provide insights into biological processes and how biological mechanisms underlie human disease and physiology. Topics range from DNA repair, protein folding and vesicle transport to metabolism, cell migration and cancer. Lectures focus on the experimental evidence for key concepts, and the weekly sections combine a discovery-based laboratory research project with discussions that emphasize problem solving and primary literature.

Recommended Prep: LS 1b recommended.

The course integrates an introduction to the structure of macromolecules and a biochemical approach to cellular function. Topics addressing protein function will include enzyme kinetics, the characterization of major metabolic pathways and their interconnection into tightly regulated networks, and the manipulation of enzymes and pathways with mutations or drugs. An exploration of simple cells (red blood cells) to more complex tissues (muscle and liver) is used as a framework to discuss the progression in metabolic complexity. Students will also develop problem solving and analytical skills that are more generally applicable to the life sciences.

An introduction to the ways in which the brain controls mental activities. The course covers the cells and signals that process and transmit information, and the ways in which neurons form circuits that change with experience. Topics include the neurobiology of perception, learning, memory, language, emotion, and mental illness. This year we are changing the way in which this material is taught by emphasizing more student participation through active learning techniques and by providing real-world experiences and hands-on demonstrations each week.

Course Notes:

The course is open to students with little formal training in biology.

This course cannot be taken if Neuro 80 has already been taken. MCB 80 cannot be taken concurrently with Neuro 80.

Requirements:

Anti-Req: Cannot be taken for credit if MCB 81 or NEURO 80 already complete.

Mathematics in Biology (117342)

Florian Engert

2019 Spring (4 Credits)

Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course is meant for biologists who want to learn mathematical principles relevant to current biological research, as well as for mathematically oriented students who want to explore applications in biology. About half of the course covers topics on information theory, Bayesian inference, statistics, and probabilistic modeling. The second half of the course covers dynamical systems in biology, including

random walks, feedback control, and molecular population dynamics.

Each week-long unit is devoted to one specific topic, and is based in one or more scientific papers selected from the recent literature. For instance, one unit is devoted to Maximum likelihood methods in the context of quantitative trait loci analysis; another unit explores probabilistic models in the context of inferring ancestry and recombination breakpoints from genomic reads in fly populations.

Recommended Prep: Mathematics 19 or higher.

The essential function of a neuron is to process complex signals derived from the external world. In doing so, neurons employ diverse mechanisms that respond to chemical and electrical signals with incredible sensitivity and plasticity. In this course, we will study these electrical, molecular, and cellular processes using biophysical and biological approaches. Specifically, we will explore topics on excitable membranes, neurotransmission, ion channels, dendritic integration, intracellular signaling, and synaptic plasticity in the context of real cells and brain circuits. Additionally, there will be a hands-on laboratory section for students to learn to collect and analyze data from common electrophysiological methods (patch clamping and extracellular recording in cultured cells and brain slices).

Laboratory section (2 hours) will be scheduled ad hoc after enrollment on either Thursdays, Fridays, or Mondays.

Course Notes: This course cannot be taken if Neuro 115 has already been taken. MCB 115 cannot be taken concurrently with Neuro 115.

Requirements: Prerequisite: Must take MCB 80 OR MCB 81 and cannot be taken for credit if NEURO 115 already complete

Molecular & Cellular Biology 129

The Brain: Development, Plasticity and Decline (124817)

Sam Kunes

2018 Fall (4 Credits)

Schedule: MWF 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 50

A lecture and discussion course on how the brain develops, employs plasticity to adapt to its environment and undergoes functional decline with aging. Topics include the birth, death and identity of neurons, axon guidance and synaptic specificity, adult neurogenesis, developmental disorders of synaptic function and memory, including autism and Alzheimer's Disease. We explore how the brain loses function with aging.

Course assignments emphasize critical evaluation of the primary literature, experimental design and scientific writing.

Recommended Prep: Permission of the instructor.

Requirements: **Anti-Requisite:** Cannot be taken for credit if NEURO 129 already complete.

Additional Course Attributes:

Neurobiology of Vision and Blindness (207772)

Joshua Sanes

2019 Spring (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

The visual system fascinates biologists, in part because humans are such visual animals. This

also makes loss of vision a pressing concern: many Americans regard blindness as the worst ailment they could get, fearing it more than Alzheimer's or AIDS. For these reasons, as well as because of its relative accessibility, the visual system is a favored model for studying fundamental aspects of neurobiology, as well as for testing novel therapeutic approaches, such as gene therapy. This course will cover key topics in the structure, function and development of the mammalian visual system, and then use them as a basis for considering causes of blindness and potential cures.

Requirements: Anti-Req: Cannot be taken for credit if NEURO 143 already complete.

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

The immune system is frontier at which molecular biology, cell biology, and genetics intersect with the pathogenesis of disease. The course examines in depth the cellular and molecular mechanisms involved in the development and function of the immune system and also analyzes the immunological basis of human disease including AIDS and other infectious diseases, autoimmune disorders, allergic disorders, primary immunodeficiency syndromes, transplantation, and cancer.

Recommended Prep: Genetics and cell biology strongly recommended.

Requirements: Prerequisite: LPS A OR LS 1a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam

Molecular & Cellular Biology 170

Brain Invaders: Building and Breaking Barriers in the Nervous System (109636)

Laura M. Magnotti

2019 Spring (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

The brain has evolved a unique but very effective system to protect itself from invaders. In this course, we will explore the specific defenses that the nervous system uses to protect itself. We will also examine how some pathogens evade or breach those defenses and the impact of those invasions. Finally, we will explore how scientists have been able to translate their understanding of these pathogenic mechanisms into

technologies for research and therapeutic applications.

Requirements: Prerequisite: (LPS A OR LS1a) AND (MCB 60 OR MCB 80 OR MCB 81)
and cannot be taken for credit if NEURO 170 already complete

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 176

Biochemistry of Membranes (112742)

Guido Guidotti

2018 Fall (4 Credits)

Schedule: MW 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

A course on the properties of biological membranes, essential elements for cell individuality, communication between cells, and energy transduction. Topics include: membrane structure; membrane protein synthesis, insertion in the bilayer and targeting; transporters, pumps and channels; electron transport, H⁺ gradients and ATP synthesis; membrane receptors, G proteins and signal transduction; membrane fusion.

Recommended Prep: MCB 60 or MCB 52 and MCB 54 are recommended but not required.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Molecular & Cellular Biology 178

Biochemistry of Protein Complexes (128150)

Guido Guidotti

2019 Spring (4 Credits)

Schedule: MW 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

A course on the properties of protein complexes that serve as supports, machines and motors. Topics include : hemoglobin, actin filaments, myosin function, microtubules, kinesin, metabolon, photosynthesis, rotary motors, nuclear pores and transport, proteasome. Lecture on Monday is followed by student presentations on Wednesday. The course involves reading two research papers per week, and writing a research proposal.

Recommended Prep: Chemistry 27 and MCB 60 or MCB 54 are recommended, but not required.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 186

Sleep and Circadian Clocks: from Biology to Public Health (112001)

Charles Czeisler

Frank Scheer

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The impact of the brain's circadian clock on sleep becomes evident when we travel across time zones or shift our sleep on weekends. How does this clock work? How does light from a tablet or smartphone affect our biology? What is the best time for sleep? What about naps? This course will explore the neurobiology of the brain's circadian clock that regulates the timing and structure of sleep, its interaction with the periodic environment, and the consequences of circadian disruption in our 24/7 society on health, performance and safety.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 198

Advanced Mathematical Techniques for Modern Biology (127011)

Sharad Ramanathan

2019 Spring (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

How do we find biologically meaningful patterns in a large amount of data? How do animals learn to use patterns in the environment to infer information despite the ignorance of the underlying laws? The course will introduce Bayesian analysis, maximum entropy principles, hidden markov models and pattern theory in order to study DNA sequence, gene expression and neural spike train data. The relevant biological background will be covered in depth.

Recommended Prep:

A strong background in calculus, linear algebra, fourier analysis, complex analysis at the advanced undergraduate level and an introductory knowledge of probability theory is required. Knowledge of statistical mechanics and comfort with programming will be useful.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Molecular & Cellular Biology 199

Statistical Thermodynamics and Quantitative Biology (122410)

David R. Nelson

2019 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Course seeks to develop an understanding of thermodynamics and statistical mechanics, with applications to quantitative problems in biology such as configurations of biopolymers, equilibrium states of matter, chemical reactions and protein transport, using the concepts of entropy, free energy, adsorption, chemical kinetics and molecular diffusion.

Recommended Prep:

Two terms of college calculus, a calculus-based physics course, and some exposure to molecular and cellular biology. Experience with statistics and differential equations not essential, but helpful.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	For Undergraduate and Graduate Students

Molecular & Cellular Biology 208

Talking about Science (121320)

Michael Greenberg

Jeff W. Lichtman

Richard Losick

2019 Spring (4 Credits)

Schedule:

M 0430 PM - 0715 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Teaches advanced students how to give a good research talk while exposing them to seminal scientific discoveries. Emphasis will be on speaking style, lecture organization, and use of video projection tools.

Course Notes:

In addition to lecture material from the instructor, students will present experiments from Nobel Prize-winning work. The presentations will be critiqued in class by the participants. Open to second year graduate students or with permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 290A

Current Topics in Molecular, Cellular and Organismal Biology (127009)

Vladimir Denic

2018 Fall (2 Credits)

Schedule:

F 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This class teaches students how to publicly present scientific papers to a diverse audience with emphasis on contextualizing the scientific problem under discussion, critically presenting the essential data, and using an engaging presentation style.

Course Notes:

Required for all first and second year graduate students in the Molecules, Cells and Organisms (MCO) Training Program. This course must be taken Sat/Unsat.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
Full Year Course	Indivisible Course

Molecular & Cellular Biology 290B

Current Topics in Molecular, Cellular and Organismal Biology (159566)

Vladimir Denic

2019 Spring (2 Credits)

Schedule:

F 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This class teaches students how to publicly present scientific papers to a diverse audience with emphasis on contextualizing the scientific problem under discussion, critically presenting the essential data, and using an engaging presentation style. Required for all first and second year graduate students in the Molecules, Cells and Organisms (MCO) Training Program. This course is part two of a two part series.

FAS: Course Level	Graduate Course

Molecular & Cellular Biology 291

Genetics, Genomics and Evolutionary Biology (124899)

Craig Hunter

James Mallet

2018 Fall (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course covers the fundamentals of classical genetics, molecular genetics, macro- and microevolution, phylogenetics, and developmental evolution. The emphasis is on major concepts and terminology, reading landmark primary literature, and acquainting students with research techniques.

Course Notes: Required for first year graduate students in the Molecules, Cells and Organisms (MCO) Training Program.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 292

Cellular Biology, Neurobiology and Developmental Biology (124900)

Ethan Garner

Joshua Sanes

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

27

The biology of the individual cell lies at the heart of multi-cellular phenomena such as development and neural function. This course will emphasize critical evaluation of the primary literature, experimental design and scientific writing.

Course Notes: Required for first year graduate students in the Molecules, Cells and Organisms (MCO) Program, but open to graduates of all programs.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 293

Biochemistry, Chemical and Structural Biology (124901)

Daniel Needleman

Doeke Hekstra

2019 Spring (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will introduce basic principles in general, organic and physical chemistry, including kinetics and thermodynamics, as well as macromolecular structure. Concepts will be illustrated with examples taken from the visual system.

Course Notes: Required for first year graduate students in the Molecules, Cells and Organisms (MCO) Training Program.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 294

Interesting Questions in Physical Biology (122422)

Nancy Kleckner

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Physical biology can be defined as a discipline that seeks to understand biological processes through the lens of physics and engineering. Faculty and students will unite to review current research with the aim of identifying and pondering interesting emerging questions in this area. Combination of lecture and discussion format. Comprises a series of two-week modules, most of which are given by a one or a pair of faculty drawn from MCB, Physics and SEAS.

Course Notes:

Intended primarily for first year graduate students in the EPB PhD track of the MCO program but available to other graduate students and advanced undergraduates as space permits.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Scientific Integrity (156950)

Polina Kehayova

Naoshige Uchida

2018 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

MCB 350 is a discussion forum on scientific integrity using case studies to examine basic ethical and regulatory requirements for conducting research, and fulfills the National Institutes of Health (NIH) and National Science Foundation (NSF) requirements for formal Responsible Conduct of Research (RCR) instruction. Students are required to complete a pre-course assignment, attend all lectures including the final lecture in February, participate in class discussions, and complete a final course evaluation. A certificate will be issued upon successful completion of the course.

Course Notes: According to NIH Guidelines, students are required to take a Scientific Integrity Refresher Course every four years (*MCB 351).

FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 352

Microscopy (156952)

Jeff W. Lichtman

Douglas Richardson

2019 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course presents the fundamental concepts that underlie modern light microscopy in a rigorous but non-mathematical way for biological applications. The students will learn about the four major frameworks for light (ray optics, wave optics, electromagnetism, and quantum optics). The ways lenses work, the theory of resolution, and the optical design of the compound microscope will be described. The course will also describe the photo-physical principles that underlie fluorescence and genetically encoded fluorescent proteins, and light detector and imaging strategies. Scanning (confocal and 2P), light sheet and super-resolution microcopies will also be described. We will end with a tour of the Harvard Center of Biological Imaging.

Additional Course Attributes:

Molecular & Cellular Biology 353

Building Your Own Microscope (160485)

Venkatesh Murthy

2019 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Microscopes of various sorts are used by most biologists, who typically buy these off the shelf. With a little knowledge, however, most biologists can build their own microscopes to do many of the things that the commercial ones do. In this quarter course, you will learn to build an epifluorescence microscope and to acquire images using a computer.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None

FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 354

Introduction to Model Organisms (160493)

Craig Hunter

2018 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Model organisms are embedded in our scientific culture, from text books on the discovery of genetic material, to mod-encode genome projects. This quarter course is a means to formally introduce an enormously successful experimental scientific approach that has revealed uncountable new biological mechanisms for the last 70 years. Students in this class will engage in hands-on learning exercises to become familiar with commonly used model organisms. They will learn about the genesis of each model system and compare and contrast the features and available experimental approaches that govern whether a particular organism is an appropriate model for different biological phenomena.

Course Notes: Limited to first year graduate students in the MCO Ph.D. program.

Additional Course Attributes:

Attribute	Value(s)

All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Molecular & Cellular Biology 355

Visualizing, Analyzing and Presenting Macromolecular Structures with PyMOL (160523)

Rachelle Gaudet

2019 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

PyMOL is one of the most popular software programs to display and explore high-resolution structures of macromolecules. It is readily used to create publication-quality figures, and movies and animations of structural information. In this course, you will learn the basics of PyMOL and be able to display, explore and present three-dimensional structures of macromolecules. With this basic training, you will be able to generate high-quality images and simple movies, and have the resources to learn more on your own to generate more complex displays.

Additional Course Attributes:

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Molecular & Cellular Biology 356

Practical Introduction to Robotics (160558)

Benjamin de Bivort

2019 Spring (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 20

Automation and robotics have revolutionized molecular biology. Liquid handling robots are already facilitating the "omics" revolution in genome sequencing, proteomics and high throughput screening. Now, neuroscience and microscopy are adopting robotics for throughput and experiments requiring precision and repeatability, like targeted microelectrode placement. In this nano course, students will learn 1) basic principles of practical robotics including the interaction of software and hardware, 2) the roles of drivers, control cards, microcontrollers and sensor electronics, and 3) practical engineering skills including basic soldering, measurement of voltage, conductivity, polarity and resistance. Students will explore the challenges of translating conceptual operational algorithms into physical implementations.

Course Notes: To enroll, students must be apart of a Life Science Graduate Program, or permission of the instructor.

Additional Course Attributes:

FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Molecular & Cellular Biology 357

Bioinformatics (207472)

Timothy Sackton

2018 Fall (2 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 60

This week long intensive workshop run by the Harvard FAS Informatics group will introduce students to the tools needed to conduct bioinformatic analysis of high-throughput sequencing data. The first part of the week will introduce universal, foundational tools: the R language and the Unix command line. We will cover a basic introduction to the R programming language, including concepts of tidy data and data pre-processing, data visualization techniques, and extending R using packages and custom functions. We will also cover a basic introduction to the Unix command line and high-performance computing with the Odyssey cluster. The second part of the week will be split into two tracks: a functional genomics track, focusing on methods for expression analysis using RNA-seq and single cell RNA-seq; and population and comparative genomics track, focusing on methods for analyzing population resequencing and phylogenetic data, although in both cases additional topics will be covered as time permits. While some prior experience with the Unix command line and R or another programming language would be useful, it is not required and this course is designed to ensure that everyone regardless of previous experience will gain familiarity and comfort with bioinformatics.

An Integrated Introduction to the Life Sciences: Chemistry, Molecular Biology, and Cell Biology (121189)

Richard Losick

Daniel Kahne

Sien Verschave

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What are the fundamental features of living systems? What are the molecules imparting them and how do their chemical properties explain their biological roles? The answers form a basis for understanding the molecules of life, the cell, diseases, and medicines. In contrast with traditional presentations of relevant scientific disciplines in separate courses, we take an integrated approach, presenting chemistry, molecular biology, biochemistry, and cell biology framed within central problems such as the biology of HIV and cancer.

Course Notes:

For more information about the assignment process, please see the course website in the fall. This course, in combination with Life Sciences 1b, constitutes an integrated introduction to the Life Sciences.

Additional Course Attributes:

Attribute	Value(s)

How are observable characteristics of organisms influenced by genetics? How do genomes change over time to produce the differences we see among species? This course takes an integrated approach, showing how genetics and evolution are intimately related, together explaining the patterns of genetic variation we

see in nature, and how genomics can be used to analyze variation. In covering Mendelian genetics, quantitative genetics, and population genetics, this course will emphasize developments involving our own species.

Course Notes: This course, in combination with Life Sciences 1a, constitutes an integrated introduction to the Life Sciences.

Additional Course Attributes:

Enrollment Cap: 41

This is an intensive two-semester, double course that introduces the natural sciences as an integrated whole to students who have a very strong interest in science. Our goal is to teach students how to solve scientific problems by drawing methods and concepts from biology, chemistry, physics, and mathematics. The course uses examples from biology as an integrating theme, principles from physics and mathematics to reduce complex problems to simpler forms, and computer simulation to allow students to develop their intuition about the behavior of the dynamical systems that control the physical and biological universe. The course includes bootcamps to introduce students to biological experiments and the computer language, Matlab. Each semester will include a project lab, in which students will work in small teams to do original research on unsolved biological problems.

Class Notes: Lab is currently scheduled for Tuesdays or Wednesdays. Life Sciences 50a and 50b, when taken together for a letter grade, fulfill the General Education requirements of Science of Living Systems, Science of the Physical Universe, and Empirical and Mathematical Reasoning. LS 50a taken alone fulfills two of these requirements.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS: General Education	Science of Living Systems

Experimental Research in the Life Sciences (119061)

Alain Viel

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

A laboratory course that immerses students in a dynamic project-based research environment. Participate in experimental projects directly linked with ongoing faculty research. Students select a project from the following research tracks: neurobiology, microbial sciences, cell biology, and synthetic biology. New projects, including some in other research fields, are offered every term. In a highly collaborative atmosphere, students form a fully-functional and diverse research group based on the sharing of ideas and progress reports between projects. The spring microbiology project is part of the "genomes to Biomes" series.

Course Notes: Location of the first meeting will be announced on the course website. Open to freshmen, sophomores, juniors, and seniors, regardless of concentration, and suitable for students either with or without extensive laboratory experience. The course may only be repeated once and the second enrollment must be approved by the instructor.

Recommended Prep: Students interested in a neurobiology project will need MCB 80 or permission of the instructor. Please also note that students cannot take MCB 100 and LS 100 at the same time.

Requirements: Prerequisite: LPS A OR LS 1a

Music 1

1000 Years of Listening (156060)

Emily Dolan

2019 Spring (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 100

This course aims to introduce you to a variety of music, and a range of ways of thinking, talking and writing about music. The majority of music dealt with will be drawn from the so-called "Classical" repertory, from the medieval period to the present day, including Monteverdi, Bach, Handel, Mozart, Beethoven, Schumann, and Schoenberg. Class will explore the technical workings of music and together we will build a vocabulary for analyzing music and articulating a response to it; we will explore music as a cultural phenomenon. By the end of class, students will be equipped to embark on a lifetime of informed listening.

Additional Course Attributes:

Music 2

Foundations of Tonal Music I (118594)

Osnat Netzer

2019 Spring (4 Credits)

Schedule: W 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 108

Seeks to develop a greater understanding of music, musical analysis, and critical listening. We will study some of the organizing principles of musical works (from a range of styles) by means of composition projects, score analysis, and aural skills. While reading knowledge of simple musical notation is helpful, there will be at least one section for students with no previous experience. Additional sections required on Mondays and Fridays, 10:30 - 11:45 am

Course Notes: Open to all students.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Culture and Belief

Music 4

Introduction to Composition (111353)

Felipe De Souza Lara

2018 Fall (4 Credits)

Schedule: T 0930 AM - 1130 AM

Instructor Permissions: Instructor

Enrollment Cap: 14

Open to students with little or no prior experience in composition. Explores ways of thinking about and

organizing basic compositional elements such as melody, harmony, rhythm and instrumental color, as well as developing skills of score preparation and analytical listening. The primary focus of the course is a series of short compositional exercises, culminating in a somewhat longer final project. Workshop performances of students' music take place throughout the term.

Recommended Prep: Some prior experience in music theory or permission of the instructor.

This is an experiential learning course. The ensemble gives several concerts each year, sometimes joining with the chorus to perform large-scale works. Students are required to attend all rehearsals and certain special Saturday "retreats" announced in advance. Students are expected to practice the music outside the rehearsal time. Grades are based on attendance and participation.

Course Notes:

The course is graded SAT/UNSAT based on attendance and participation. This course may be taken repeatedly, but to receive credit the course must be taken in the Fall and Spring semesters consecutively. A maximum of four semesters (two years) may be counted as credit towards the degree.

Class Notes:

Auditions for the HRO are August 28, 2:00 pm - 8:00 pm and August 30, 10:00 am - 6:00 pm. Please see HRO website for details.

Recommended Prep:

Two contrasting movements or pieces chosen by candidate.

Harvard Glee Club (TTBB Choir). As the nation's oldest collegiate chorus, the Glee Club is a tenor and bass ensemble exploring music written in the male chorus tradition. The Glee Club performs throughout the year, collaborating with arts groups on campus and at other universities, and across the world on annual tours. Through excellence in performance, student-management, education, community, tradition, and philanthropy, the Glee Club offers a unique musical experience for all members. The Glee Club frequently combines with the Collegium and the Choral Society, as well as the Harvard-Radcliffe Orchestra, to perform large-scale works. Students must complete both parts of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

Audition required. For audition and further information, visit www.singatharvard.com

The course is graded SAT/UNSAT based on attendance and participation. This course may be taken repeatedly, but to receive credit the course must be taken in the Fall and Spring semesters consecutively. A maximum of four semesters (two years) may be counted as credit towards the degree.

Class Notes: Audition times will be posted.

Radcliffe Choral Society (SSAA choir). The Radcliffe Choral Society is dedicated to the celebration and performance of women's choral music. Founded in 1899, RCS is Harvard's oldest women's organization and one of the country's premier women's choruses. The Choral Society sings a wide variety of repertoire including Medieval chant, Renaissance polyphony, Romantic masterworks, international folk songs, and contemporary women's choral music. RCS tours annually. The Choral Society frequently combines with the Collegium and the Glee Club, as well as the Harvard-Radcliffe Orchestra, to perform large-scale works. Students must complete both parts of this course (parts A and B) within the same academic year in order to receive credit.

The Radcliffe Choral Society, founded in 1899, is a treble (soprano-alto) choral ensemble of about 40-50 members, open to any student at Harvard University. The ensemble performs a distinctive repertoire spanning nine centuries of choral literature: sacred and secular, a cappella and accompanied, and choral-orchestral works. Featuring a student led a cappella group, 'Cliffe Notes, RCS aims to foster the appreciation and celebration of women's choral music through the commission of new works for soprano and alto voices, high-caliber performances, music festivals as well as annual domestic and international travel. The choir strives to honor its history and further its legacy of excellence in treble choral music and an extraordinary community formed through music-making. RCS frequently collaborates with the Harvard-Radcliffe Collegium Musicum and the Glee Club, as well as the Harvard-Radcliffe Orchestra, to perform large-scale works. Students must complete both parts of this course (parts A and B) within the same academic year in order to receive credit.

Harvard Jazz Band (000018)

Yosvany Terry

2018 Fall (2 Credits)

Schedule:

T 0730 PM - 0845 PM

M 0715 PM - 0915 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

The Harvard Jazz Band was created in 1971 by Director of Bands Tom Everett when he first arrived at the University. Passionate that exposure to this unique American art form be part of students' education, he created a rag-tag jazz band of primarily Harvard [marching] Band recruits. Since its inception, the Harvard Jazz band has served as the vehicle for students across disciplines to study and learn the jazz canon. Over the years, the Jazz Band has focused on the literature of Duke Ellington and complete retrospective concerts of the music of Charles Mingus, Charlie Parker, Gerry Mulligan, Lee Konitz, Benny Carter, Buck Clayton, Clark Terry, J. J. Johnson, and Julius Hemphill. Other literature has ranged from the classic arrangements of Count Basie and Fletcher Henderson to the modern jazz of Gil Evans and Charles Mingus, the contemporary ensemble improvisations of Barry Guy and Lester Bowie, and the jazz-rock of Michael Gibbs, Russ Gershon Harvard '81, Rufus Reid, George Cables and Cassandra Wilson. In 2015, Yosvany Terry was appointed Director of Jazz Bands. Under his direction, the Harvard Jazz Band continues this tradition of focusing on a program of study that provides students with a grounding in a wide range of iconic and new literature. Students are required to take both parts of the course within the same academic year. The curriculum builds throughout the year.

Course Notes:

The course is graded SAT/UNSAT based on attendance and participation. This course may be taken repeatedly, but to receive credit the course must be taken in the Fall and Spring semesters consecutively. A maximum of four semesters (two years) may be counted as credit towards the degree.

Class Notes:

This year, the Harvard Jazz Band will prepare for its four annual concerts and two jazz master residencies. The Fall residency will include Grammy-Award winner, composer, drummer extraordinaire and Guggenheim Fellow, Jeff Watts. During the Spring the visiting master will be Grammy-Award winner, composer and world activist, Angelique Kidjo. The Jazz Band will perform the repertoire of some of the Jazz masters such as Thad Jones, Oliver Nelson and Benny Golson during the Montage concert in collaboration with the Harvard

Wind Ensemble, the Harvard Band and the Sunday Jazz band at Sanders Theater on October 14. During the fall residency, the band will perform the music of Jeff "Tain" Watts in a concert at Lowell Hall on November 11. Looking ahead to the spring residency the band will perform the music of Angelique Kidjo and Celia Cruz at Sanders Theater on April 14. The last two concerts of the year will be the at Art First Festival at the end of April and the annual "Swing Dance" at the Sheraton Commander Hotel in Cambridge.

Class Notes: An audition is required to become a member of the HUJB. Auditions will be hold at the OFA rehearsal space during the first week of September. For more information please visit the HUJB website <http://harvardjazzbands.com> or the OFA website <https://ofa.fas.harvard.edu/arts> under Harvard Jazz Band audition information.

Opera (204418)

Carolyn Abbate

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

60

This lecture course will explore opera, a theatrical genre with a 400-year history, which is still a living and vibrant art. Opera has always been multimedia: Its marvelous singing, and its music, is shaped by drama, by characters, visual spectacles in staging, and theater architecture and machinery. Operatic performance, by engaging and even overwhelming multiple senses, challenges us to question intellectual truisms like critical detachment, sober analysis. Opera has always inspired intense passion in audiences. For some, it is the most beautiful and moving musical genre that has ever existed. For others, it can involve tedium and acoustic strangeness. Opera's special acoustic is defined by its singers, who are often called "gods" ("divas" and "divos"), with voices that are the most powerful unamplified human sonic force in existence. We will look at opera as it evolved over time from its origins in Italy into a global phenomenon, considering works by famous composers (including Mozart, Wagner, and Verdi) as well as obscure corners and byways. Students will be experiencing live opera performances (in class and on field trips), and opera as technological art in recordings, film, and other media. No previous music courses, no expertise in music theory or ability to read music, are required.

Course Notes:

No previous music courses, no expertise in music theory or ability to read music, are required. Please be advised that sections will be scheduled on Thursday afternoon, Friday mornings or Friday afternoons.

Class Notes:

Sections will be held on Thursdays, 3:00 and 4:30, Fridays at 1:30 and 3:00

A Social History of Rock 'n Roll (206891)

Katy Leonard

2018 Fall (4 Credits)

Schedule:

R 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

105

This course will examine the social and historical context of rock 'n' roll, including the ways in which the genre intersects with business, politics, gender, age, class, race, and technology. We will survey rock 'n' roll's early 20th century roots, the rock 'n' roll explosion of the 1950s, surf-rock, folk-rock, blues-rock, the British Invasion, and psychedelic rock through the early 1970s. As we discuss the evolution of "rock 'n'

roll" of the 1950s to "rock" of the 1960s and 70s, we will consider the role of songs, albums, and artists, as well as producers, promoters, fans, and detractors.

Course Notes: No prior musical experience (academic or otherwise) is required to participate in this course.

Histories, Economies, Communities. This course will mount a semester-long, team-based project to identify and offer professional support to Boston metropolitan-area musicians from communities of color who have recently migrated to the United States. At the same time, we will fuse direct engagement with musical communities with an intellectual framework for understanding their historical circumstances, economic and political realities, and community needs. Our work will focus on a core group of performers drawn from recipients of the Mass Cultural Council's 2018 Traditional Arts Apprenticeship Program. Music 24 is supported by the MIndich Program in Engaged Scholarship, and there are no prerequisites for the course.

Course Notes: In order to be considered for the course, students should submit an essay of 250 words by January 28th, the first day of class. A link will be provided on the Canvas site.

Katherine Pukinskis

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course explores, through elements and parameters of music theory, musicianship, and aural skills,

what makes music "good;" "good," of course, being a significantly subjective term, but still with room to root one's observations in premises of music theory, analysis, and construction/composition. Students will explore fundamentals in this (mostly) Western tradition through Classical, Jazz, and Popular music, musical theater, and film scores. Theory comes into play with all music, regardless of aesthetic and genre. Course unfolds the foundations of tonal music, including line, harmony, counterpoint, rhythm, text, rhythm, motive, and timbre. Includes regular practical exercises in composition, analysis, ear training, and musicianship.

Course Notes: For this course a placement exam is required, which is offered the week before classes begin. Please see the Canvas course website for M51a for more information. Music 51a or its equivalent is not required of all concentrators but is required as a prerequisite should you like to take any additional and more advanced theory courses in the department. Students planning to concentrate in Music are encouraged to take the course in their freshman year. Concentrators should plan to meet this requirement by no later than the end of the sophomore year.

Class Notes: Four lectures will meet from 3:00 - 5:45. Please check syllabus.

Recommended Prep: Basic theory and ear-training skills, ability to read music, Music 2, or equivalent experience; all confirmed by a placement test given in August before the Fall semester.

Continuation of the principles in Music 51a. This course engages advanced topics in theory and analysis, zooming out the discussion to engage with how a piece works over its whole arc rather than isolated excerpts, and how music develops across delineations of historical eras, genres, and styles. Repertoire for exploration will be student-populated in addition to Classical, Jazz, popular music, musical theater, and film scores. Includes regular practical exercises in composition, analysis, ear-training, and musicianship.

Course Notes: You must either place directly into Music 51b via August placement test or pass 51a in order to register for this course. If more than two semesters have passed since completing 51a, you will need permission from the Instructor to register for the course; this may include a quick refresher test to make sure the material from 51a hasn't left your brain completely. This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding.

Class Notes: Pass/Fail is only available in extreme circumstances, at the discretion of the instructor.

Critical Listening (204967)

Vijay Iyer

2018 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

25

Much like reading, listening is a relational, highly contingent process of meaning construction. Founded on aural sensation, it also involves processes of prediction, recognition, and imagination. It is therefore so strongly conditioned by culture that we tend to privilege certain patterns of perception at the expense of others. In this writing-intensive course we will listen to music together, refine our attention to its ingredients and its construction, share and unpack our listening strategies, develop and strengthen our vocabularies to describe what we hear, and cultivate a critical perspective on the act of listening. Since our focus is on process, our repertoire will be wide-ranging and partly selected by the class. Students will collectively edit and self-publish a monthly anthology of their writings.

Critical Thinking (204975)

Braxton Shelley

2019 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

25

Music, one of the most ubiquitous aspects of human sociality, manifests the imbrication of sound and context. What are the relationships between such audible phenomena and their social settings? How does the intentional patterning of musical sound reflect, resist, and refashion the cultural, confessional, and commercial frameworks from which it springs? Animated by these questions, *Thinking about Music: Sound in/as/and Context* presents students with a diverse collection of musical forms and analytic methodologies, offering opportunities to think, write, and speak about musical sound's engagement with multiple contexts. Students will read ethnographic, historical, and analytic work on music ranging from Syrian Jewish Pizmonin to Bob Dylan's "It's Alright Ma (I'm Only Bleeding)" in order to feed their own exploration of works extending from Beethoven's *Eroica* to Beyonce's *Lemonade*. Along the way, the course will examine the way music's meanings arise in relationship to topics including expectation, textuality, materiality, and multimedia. Working comparatively, with such historical and cultural variety, students will encounter the richness of expression that music makes possible, while pursuing greater fluency in articulating their own music-analytic insights.

West African Musical Traditions: Benin. With a focus on the Arará musical tradition as it arrived from the Old Kingdom of Dahomey, present day Benin, to Cuba and the Caribbean, this course is designed to

familiarize students with the key structural elements in West African music and how to recognize them in modern jazz. Students will be given tools that will allow them to demonstrate these key concepts in both their improvisational work and assigned compositional exercises. Through coursework, students will deepen their knowledge, understanding and appreciation of important rhythms, melodic patterns, and phrase models, but the fundamental goal is to enable them to feel these elements before and apart from their interpretation of written music. This attention to improvisation will develop the student's creative abilities and introduce them to methods of music composition. Exercises that involve the clapping and singing of specific rhythmic patterns will help students approach sight-reading in an intuitive and responsive way, because strong ear-training and musicianship skills are key requirements for successful interpretations of and improvisations on the score. By examining instructional DVDs, historical and contemporary recordings, scholarly books and articles, and through the analysis and discussion of class material, the class will collectively develop a more thorough understanding of the principles guiding modern jazz musicians and composers. Students will be expected to contemplate and practice on their instruments the repertoire given to them between class meetings. The West African Ensemble's repertoire consists primarily of original compositions by Lionel Lueke (Benin), Avishai Cohen (Israel), Dafnis Prieto (Cuba), Edward Simons (Venezuela), and Yosvany Terry (Cuba). Other composers will be explored in accordance with the time limits and the direction of each class.

The Jazz Messengers were more than just a musical group; they were one of the greatest institutions in modern jazz, paving the way for several generations of musicians to develop new and original approaches to composition and improvisation. This course will introduce students to the Jazz Messengers and the concept of hard bop created by artists searching for new musical expressions, as a necessary evolutionary step after Be-Bop in modern Jazz. Students will become familiar with the Jazz Messengers' repertoire, gaining insight and practical experience by first playing and memorizing their songs, and, afterwards, transcribing and studying the recordings of key compositions. Additionally, students will gain proficiency in performing compositions by some of the Messengers' most prolific alumnae, including pianist Horace Silver, saxophonist Wayne Shorter, pianist Cedar Walton, saxophonist Benny Golson, and trumpeter Freddie Hubbard. Each week the students will make presentations on the selected class readings which are intended to deepen their understanding of the music by providing the social context in which this music was developed. Finally, students will select, rehearse, and perform some of the Jazz Messenger compositions in an end-of-semester concert.

The Way Things Work: Musical Form and Analysis (114188)

Katherine Pukinskis

2019 Spring (4 Credits)

Schedule:

R 0945 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What does Ligeti have to do with the fugue? How is Dirty Computer like an opera? As music continues to evolve, when and how form arises in the compositional process evolves with it; sometimes music is structured by form and sometimes form is revealed by the music itself. This course explores musical forms and modes of analysis, both small- and large-scale, across a variety of genres and periods. Within the Classical tradition topics include sonata and small song forms, fugue and invention, and an exploration of the development of large forms such as the symphony, oratorio, and opera. Analytical methods will touch on Western classical analysis, serialism and post-tonal theory, Schenkerian analysis, Neo-Riemannian theory, among others. Further, we will investigate how the aforementioned structures have been folded into Jazz, popular music, film scores, and musical theater, and how some traditionally Classical modes of analysis can help inform our understanding of non-Classical music. We will dive into questions of formal function and ways of hearing in addition to examining modern theoretical and analytical engagement with this broad and multifaceted topic.

Recommended Prep: Music 51 or equivalent.

2018 Fall (4 Credits)

Schedule:

F 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Composing music for the human voice is a specialized knowledge and skill, one that requires long, concentrated study, and mentorship from a variety of mentors. Music 160r will address the many issues that composers must address in order to write vocal music. Those include text setting and prosody, understanding the human voice as a musical instrument, advanced musical notation, and most importantly, collaboration with singers Jennifer Ashe and Julia Cavallaro. Breaking down the many components that comprise vocal music into learnable projects will help students reach a deeper understanding and skill level. Final composition project will be a piece for voice and cello.

Class Notes:

On days in which we have presentations or workshops, we will make use of the entire 2 hours 45 minutes.

Recommended Prep:

One course in theory/composition or permission of the instructor.

In this course students will explore composition in multi faceted way. Each student is expected to come with joy towards experimenting and trying things out of their comfort zone. We will compose/ invent small pieces using self made objects, recordings, texts and will discover what it means to zero in on harmony or on rhythm or melody, orchestration, texture by individually exploring and experimenting. The class offers creative space to people who love composing whether they have a lot of experience or not. We will have class sessions and discussions and also about 4 individual sessions of 30 minutes for each student some weeks, replacing the class sessions. At the end of the semester we will have a concert with Parker String quartet accompanied by the class members.

Recommended Prep:

One course in theory/composition or permission of the instructor.

Songwriting Workshop (206929)

2019 Spring (4 Credits)

Schedule:

Instructor Permissions: Instructor

Enrollment Cap:

12

This course will approach songwriting from two directions: analytical study of the methods of successful songwriters throughout the past 50 years together with students performing and critiquing their own original compositions. Throughout the course, we will address specific aspects of successful songwriting,

including lyric development, song form, melody, harmonic progression, poetic imagery, story telling and presentation. The physical classroom will be designed to provide the experience of live performance in a club-like setting. In each unit, students will investigate a distinct songwriting style; compose an original work within that form; and perform it for peer review, including their own thoughtful analysis. The final for this course will be a showcase style performance of the students' own compositions. Any undergraduate or GSAS student who would like to increase their skill in songwriting is encouraged to apply. Those who wish to be considered must submit a questionnaire between January 2 and January 12, 2019 with a digital recording or link(s) of a video of themselves performing two (2) of their original compositions. Audio and video examples should be at least two minutes, and no more than six minutes in length. Fill out this google form: https://docs.google.com/forms/d/1Weq_XvGFn29DYep_ZXN0z6Lo10f3BffcfUqBiWeYCXU/

Instruments in Performance & Composition. MUSIC 172R (The 21st Century Flute) is a new course that will explore various instruments in contemporary compositional contexts. For the Fall 2018 term, the focus of MUS 172R will be the flute. The course is open to undergraduate and graduate student flutists, composers and improvisers seeking to explore the instrument's capabilities. We will study a wide range of existing 20th and 21st century flute repertory, with emphases on notation as well as performance practice and interpretive considerations, and we will also generate a wide range of newly composed work as part of the class. All student composers and other non-flutists in the course will learn basic techniques on the instrument that will be used in group improvisations and other in-class performances. Mid-term presentations will consist of student-driven research into 21st century flute works not covered in the syllabus. All students will write or perform original compositions in a public concert as a final project.

Class Notes:

Submit 1-2 work samples (audio, video or score) and a half-page statement about your practice, your background, and why you are interested in Instruments in Performance and Composition. Online submissions should be submitted via the Canvas Website between August 17 through August 27.

This course is an intensive, research-oriented workshop environment for advanced improviser-composers. Open to both undergraduate and graduate students. Through critical listening, readings, term papers, and collaborative musical projects, students will engage with a range of contemporary musical perspectives and practices. Graduate students are welcome.

Course Notes:

Please note submission requirements.

Class Notes:

To be considered for this course, you must submit a recording, up to 15 minutes long, of your original work as a composer-performer-improviser. Submissions should be in the form of links to streams (Soundcloud, YouTube) or downloads (Dropbox, Google Drive, etc). Please do not send files directly. Please email your links, along with a brief description of the contents and your role in it, plus a one-sentence bio, to pgolub@fas.harvard.edu BY JANUARY 18, 2019.

Music and Dis/Ability II (208098)

Andrew Clark

2019 Spring (4 Credits)

Schedule:

F 1245 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

Music and Disability II continues the inquiry presented in **Music and Disability I (Music 176a)**, exploring music and disability studies, inclusive music education, and disability arts, among other topics. We will consider cultural ideas—and ideals—of satisfaction and beauty through the lens of non-normativity while interrogating established and conventional artistic practices, canons, and relationships with disability aesthetics as our resource. The Engaged Scholarship approach of the course will aim to develop new projects and nurture on-going initiatives that facilitate sustainable creative practice, empowering individuals and communities through active engagement with the arts. Students from other departments welcome. Course will include weekly participation in a community-music ensemble project.

Course Notes:

Preference given to students who have completed **Music & Dis/Ability I (Music 176a)**. Requires participation (2hrs/week) in a neurodiverse music ensemble at a time to be determined.

Applied Music Activism (114666)

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor**Enrollment Cap:**

20

This course will identify music that has been key to successful social movements; explore the specific methods used by those musicians to deliver their message effectively; and empower students to utilize their learning, designing and presenting their own musical campaign to further a cause of their choosing. Investigating the historical context of the composers cited, we will draw from the musical techniques that allowed them to successfully apply their passion to the causes they empowered. Through these case studies, students will be challenged to actually measure the effectiveness and scope of musical activism. We will learn how to utilize modern commercial marketing techniques to evaluate the effectiveness both of songs that have created a known effect on more recent social campaigns, and our own efforts to direct this learning to the causes dear to us. As we progress through the semester, students will (through live performance and/or social media) create, share, and analyze their own examples of musical activism.

This course will come together periodically with students from [Music 194rs](#), *Music, Power, and the Collective Voice* taught by Katherine Pukinskis, to share and cross-reference the focused learning of each.

Course Notes: This course is limited to #20 students and preference will be given to music concentrators and students who have enrolled in a faculty led ensemble course (Music 10 - Music 18).

This course is a workshop for the creation of vigorous new models for ensembles, collectives and organizations that perform and present 21st century music. Open to performers, composers/improvisers, musicologists and scholars who are engaged with experimental music practice, cultural production, education and performance. New repertoires and new organizational practices will be explored in a laboratory format that includes a monthly series of concerts on Tuesday evenings, as well as various community events and pop-up concerts throughout the semester. Performance and production activity will be carried out alongside research projects on existing 21st century music ensembles and entities. Guest speakers include leading members of Ensemble InterContemporain, the Association for the Advancement of Creative Musicians (AACM), Bang on a Can, and the International Contemporary Ensemble (ICE).

Course Notes: Open to individuals and pre-formed groups. Undergraduates from other departments and graduate students welcome.

Class Notes: Submit 1-2 work samples (audio, video or score) and a half-page statement about your practice, your background, and why you are interested in 21st Century Ensemble Workshop. Send submissions via the Canvas Website August 17 through August 27.

Through auditions, students will be divided into chamber music ensembles by the Parker Quartet, and have weekly coachings with members of the Parker Quartet and pianist Katherine Chi. Instrumentalists and vocalists are welcome to audition; however, no duos or vocal ensembles are allowed. Students will be expected to rehearse between each coaching and to participate in Performance Classes throughout the semester. There will be a final jury evaluation prior to the final class performances, to be held sometime during Reading Period, and all students are required to be available. Students who do not meet the requirements in Notes below may take the course for Pass/Fail credit. Please check audition dates and other mandatory meetings/classes in Class Notes below and on the Canvas Music 189R home page.

Course Notes:

Students who are either enrolled in 189R for the Fall 2018 semester, are currently in the NEC/Harvard dual program, or have been a past winner of the Parker Quartet Guest Award do not need to re-audition for the Spring 2019 semester. However, ALL students must fill out the questionnaire and submit this through Canvas: <https://canvas.harvard.edu/courses/50141/assignments/252776>.

Any students who have enrolled in the course in past school years, but not the Fall 2018 semester, are required to re-audition. Students intending to enroll in both Harvard-Radcliffe Orchestra and Music 189R must audition for each course separately.

While students may request to be placed with certain peers, final group assignments will ultimately be at the discretion of the instructors.

This course is offered for letter-grade credit only when students are involved in one or more of the following: a Concentrator in Music, enrollment in a Department of Music course in the same semester, a member of a faculty-led music ensemble in the same semester, a student of the NEC/Harvard dual program. Students who do not meet one of these requirements may take the course for Pass/Fail credit, which must be done by petition after the first week of class.

Class Notes:

All students are encouraged to take the live audition over the video submissions, with the exception of pianists. Pianists are required to audition in person; video submissions will not be accepted. Information about the audition requirements is posted on the Music 189R Canvas home page: <https://canvas.harvard.edu/courses/50141>

A video recording needs to be made and submitted between Monday, January 7 and Monday, January 28, 11:59pm ET. All students will be notified by Sunday, February 3.

Students are required to attend the following appointments:

Mandatory Meeting: Thursday, February 7, 6:45 - 7:45pm

4 Performance Classes including one Guest Performance

Class: March 14, April 11, 18, 25 - 6:45-8:45pm

Final Performances: May 5, 6, 7 - Performances begin at 7 pm

*Dates to be confirmed and are subject to change. Locations will be announced.

The Spring 2019 Guest Performance Class will be taught by violinist Mark Steinberg.

Students who do not meet the requirements below may take the course for PASS/FAIL credit, which must be done by petition after the first week of class. This course is only offered for a letter grade when students are involved in one or more of the following: music concentrator, enrolled in a music department course in the same semester, a member of a faculty-led ensemble in the same semester, a student of the NEC/Harvard dual program. Pre-formed ensembles are encouraged and will be accommodated as much as possible.

Class Notes:

All students are strongly encouraged to attend a live audition. Please see the Music 189R Canvas Home Page for complete information: <https://canvas.harvard.edu/courses/44829>

Live audition date will be held on Tuesday, September 4, 9 am - 12 pm & 1 - 3 pm in classroom 6 in the Music Building (3 Oxford St, Cambridge, MA, 02138).

Students should prepare about 7 minutes of two contrasting pieces. Pianists are strongly encouraged to attend the live audition, and may be asked to sight-read.

If you cannot attend a live audition then please send in an audition tape by September 5. Must be a live recording made after August 1, 2018. Audition requirements are the same as the live audition.

All students will be notified by September 9.

Students are required to attend the following appointments:

Mandatory Meeting: Tuesday, September 11, 7 - 8 pm, classroom 9 in the Music Building (3 Oxford St, Cambridge, MA, 02138)

6 Performance Classes including one Guest Performance Class: October 30, November 6, 7, 13, 14, 29. All classes are 7-8:30 pm except Guest Performance Class with Orion Weiss on November 29, 7 - 9:30 pm. Because of Orion Weiss's schedule, please note that this mandatory class is on Thursday, November 29. We understand this is

outside of the published class times, so if you cannot attend this class, please discuss with us your make-up options.

Final Jury: Thursday, December 6, 9 am – 12 pm

Final Performances: December 9 - 12 - performances begin at 7 pm -
DATES TO BE CONFIRMED AND SUBJECT TO CHANGE

Understanding Wagner's Ring. This seminar brings together Wagner's music and the political philosophy that informs it. The Ring of the Nibelung (1876), that monumental work of four massive operas (or "music dramas," as Wagner preferred calling them), sums up the ambitions of the European nineteenth century. This complex allegory of power and redemption has long been recognized as an intensely political and philosophical work; modern stagings often focus on the politics articulated in the opera, whether it is socialism, totalitarianism, or environmental destruction. Our seminar will focus on various nineteenth-century intellectual contexts.

Course Notes:

May be taken by students from other departments. This course is cross-listed with Music, Government, Germanic Languages and Literatures, and Theater–Dance–Media. Enrollment capped at 18.

Recommended Prep:

Prior musical knowledge is helpful, but not a prerequisite.

Music and Lyrics. Musical theatre tells its stories through a blend of spoken words in scenes, and text in song. In combination with music, words blur the edges between "real life" and "song" in a performance, clouding our understanding of where reality begins and ends in the theatre and on stage. Text can communicate a message; it can become the driving force for musical motives. Text can be presented in extended metaphor and mind-boggling tongue twisters. Each week in Music and Lyrics, we will look at a different musical and unpack how text plays a role in the overall structure, content, and resultant effect of a performance of the work. The musical as primary source will be supplemented by readings on reception, poetry, performance and performativity, text setting, and other critical analyses. As part of this course, students will watch videos, listen to recordings, see live performances, and speak with experts in the field. Works of focus may include (but are definitely not limited to): *A Chorus Line*, *The Sound of Music*, *Rent*, *West Side Story*, *The Wiz*, *Hamilton*, *Cats*, and *The Producers*. In addition, students will get a glimpse inside "The Room Where It Happens" as they speak with Scott Wasserman, the Ableton Programmer for *Hamilton*, about what it's like to adjust music to every new cast that takes on the hit musical.

Recommended Prep: Music 51A or equivalent; some cases may be able to register for these courses concurrently.

American Roots Music. What does it mean for a genre of music to be "American"? How far back must a song reach to be considered part of a "roots" tradition? This seminar examines the vernacular music of the United States, also called roots music, folk music, or traditional music. Our study will include genres such as acoustic blues, old-time, bluegrass, Cajun and zydeco, Native American music traditions, and diasporic traditions that have adapted or formed in the United States. We will discuss key songs, traditions, artists, and regions as well as influential social and cultural factors in the development of roots music genres.

The Gospel Imagination. The class will explore African American gospel performance, focusing on the tradition's braiding together of music, movement, and belief. When these three expressive dimensions are engaged together, what emerges is "the gospel imagination," the complex of words and music, sound and belief that sustains many expressions of African American Christian worship. How might this integrated notion of gospel performance inform an analytical paradigm? Relatedly, how might this approach inspire performance? This course brings together material and approaches from the fields of musicology, music theory, ethnomusicology, homiletics, and theology to pursue these questions. Through a combination of weekly reading, listening and writing assignments students will immerse themselves in this way of patterning sound as an expression of belief. Alongside these assignments, students will undertake composition in the gospel style, culminating in a masterclass with a nationally-renowned gospel artist.

Course Notes:

While this class will be open to undergraduate and graduate students from across the university, scholars of music, religion, American studies, and African and African American studies may derive particular benefit from the course.

Recommended Prep:

Prior musical knowledge is helpful, but not a prerequisite.

Women Creators in Music. In spite of significant gains in gender equality over the last half century, women creators remain dramatically underrepresented in the music world, in all genres of music and in all categories of musical production: as composers, improvisors, producers, conductors, and even as performers. This new course focuses on the contributions of female and non-binary musicians who have composed, improvised, or collaboratively created music in the 20th and 21st centuries.

We will listen closely to their music, asking questions such as: what were the historical, institutional, cultural and educational factors that supported or hindered their work? How do they define their gender identities, gender roles, and sexual orientation, and to what extent do they relate these to their work? How does these identities function intersectionally with others, such as racial, class, national, and transnational identities? How has their work been received? What structures have historically enabled inclusion or fostered exclusion into the musical canon?

The course is not just a history of individuals overcoming obstacles; it is intended to celebrate and acknowledge the contributions of women creators to the history of music. We will also talk about activism: how to "move the needle" and work towards great representation of women's music in different genres today.

We will consider a wide range of women creators from the early 20th century to the present, with examples from classical, jazz, and popular music. Students will help generate the syllabus, but the list could include: Florence Price, Ruth Crawford Seeger, Elisabeth Lutyens, Nina Simone, Pauline Oliveros, Meredith Monk,

Younghi Pagh-Paan, Carla Bley, Irène Schweizer, Mary Lou Williams, Laurie Anderson, Tanya Leon, Chaya Czernowin, Björk, Nkeiru Okoye, Okkyung Lee, Reena Esmail, Nicole Mitchell, Maria Schneider, Caroline Shaw, and Alex Temple.

Guests include composers and scholars who are experts on women and music (TBA).

Course Notes: The course is for anyone interested in questions of music and gender, including graduates and undergraduates (music concentrators, joint concentrators, those studying music as a secondary field, students in dual degree programs with Berklee and NEC). Students from other departments who have some background in music (any style or genre) are welcome. Basic musical literacy will be helpful, but knowledge of music theory is not required (there are no pre-requisites).

This course is pre-approved for concentration credit in Women, Gender and Sexuality.

Introduction to musicological scholarship drawing upon theoretical frameworks, and working methods of historical musicology. Includes aspects of the history of the discipline of musicology, as well as newer methodologies. Students will read relevant theoretical texts from other disciplines and consider the possibilities of interdisciplinary projects within musicology.

Course Notes: Graduate students only. May be taken independently by students from other departments with permission of instructor.

Music and Race in Brazil. This course surveys music-making in South America's largest nation in light of historical and contemporary debates about ethnicity, race, and cultural citizenship. Through readings, close listening, and hands-on musical experiences, we will trace the contours of Brazilian discourses of negritude (Blackness), indigeneity, embranquecimento (whitening), mestiçagem (mixture), racialized regionalism, pan-Latin identity, and the myth of racial democracy as they are played out, danced, and sung throughout the country. Though our primary focus will be on Afro-Brazilian music and dance practices – after all, Brazil has more people of African descent than any other nation save Nigeria – we will also consider genres rooted in Native, Portuguese, Italian, Arab, Japanese, and Anglo-Irish traditions, and the ways in which performers, audiences, and critics have framed them in relation to ongoing national arguments about race and citizenship.

Course Notes: Open to undergraduates with permission of instructor. May be taken by students from other departments by permission of instructor.

Race and American Musical Theatre 1900-1950. This seminar explores the complex history of African Americans in musical theater, beginning in the late nineteenth century and concluding in the first half of the twentieth. It encompasses shows with all-black casts and creative teams (In Dahomey 1903; Shuffle Along 1921) and those with black casts and white creative teams (notably Porgy and Bess 1935). The gradual (and fitful) racial desegregation of casts is also explored, beginning with Show Boat (1927); and the persistence of (and resistance to) racial stereotypes is analyzed. Early in the semester, we will attend The Black Clown at A.R.T., and central figures from the production will visit class.

Course Notes: Open to undergraduates with permission of instructor.

Genre. This graduate seminar explores the concept of genre, a topic that is central both to specialized disciplinary conversations and public discourse. In its various guises, genre is used to police music, as a gatekeeper of taste, and as a path through music histories. In order to examine the work genre does for contemporary music studies—to attend to what it clarifies and what it obscures—we will survey theoretical work on genre in music, literature, film; analyze performances that problematize the notion of genre; and tease out genre's function in musicological work on Blues, Jazz, Contemporary gospel, Beethoven string quartets, New Music, and 18th century Italian opera seria. Alongside, we will see how particular implicit and explicit formulations of genre are shaped by conceptions of history, race, place, and belief. Taken together,

the course's components will repeatedly call attention to relationships between systems of sound and groupings of people, and to how these arrangements of sound are bound up with the performance of identity.

Film Music/Film Sound (000244)

Carolyn Abbate

2019 Spring (4 Credits)

Schedule:

W 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This seminar explores film sound and music in classic American and European cinema, concentrating on the 1920s to the 1960s, though jumping well beyond that frame at times. We deal with specific sound technologies, as well as differing approaches to the relation between music, sound, and image. Individual topics cover both technical and theoretical issues, and sociological-historical issues. They include: mechanical procedures that integrated sound and music with image; cultural work done by music in Orientalist movies; operetta movies and insouciance in the 1930s; theories of rendered sound and the audio-visual contract. Hyperattentive listening is required (we use notated music very infrequently). There are five evening film screenings during the semester (times TBA).

Course Notes: Instructor permission required.

Musicality (211139)

Vijay Iyer

Christopher Hasty

2019 Spring (4 Credits)

Schedule: T 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

The term Musicality has at least two senses. In the realm of aesthetics, it connotes "musicalness", a communicative/affective value, whereas in the so-called music sciences, it is used to posit a biologically determined capacity for musicmaking. At issue is the instability of music as a category, which aligns with the instability of the very category of the human; both designations are as ideological as they are scientific, with membership in each category variously conferred or revoked across axes of difference and power. In this research seminar, we reconsider "musicality" as a critical concept (like "aurality" or "vocality") that can lead to broader inquiries into the human animal, the infrahuman animal (including those relegated to

the margins of the human category), and more generally, the animate. Readings from a variety of fields that question the ontologies of music and "humanness" will guide us in exploring new ways of thinking about music.

Mediterranean Mobilities, Past and Present. This course will provide insight into music's powerful role in human mobility, seeking to break down barriers between historical and ethnographic methods in a study of musical border crossing. The course will focus on migration in and from the eastern and central Mediterranean with particular attention to regions part of and/or influenced by the Ottoman Empire, which incorporated a confluence of Jewish, Christian, and Muslim worlds. Today modern Turkey and surrounding areas are sites of a massive refugee crisis. The course will include fieldtrips to the Armenian Museum and Library in Watertown, MA and to the Avedis Zildjian Cymbal Factory in Norwell, MA. There are no prerequisites for the course and we hope to have an interdisciplinary enrollment. Undergraduates can take the course by permission; it fulfills the secondary concentration in Ethnicity, Migration, Rights [EMR]. A final research project/paper is required on a topic related to music and migration approved by the instructors; the topic is not restricted to the Mediterranean region.

Course Notes: Undergraduates can take the course by permission; it fulfills the secondary concentration in Ethnicity, Migration, Rights [EMR].

Class Notes: Some class meetings will end at 2:45 pm

Recommended Prep: There are no prerequisites for the course and we hope to have an interdisciplinary enrollment.

Music and Philanthropy. Philanthropy, or the desire to promote human welfare through donations of money, time, labor, and influence, is a central means of assisting art that might not otherwise exist if left to the capitalist marketplace. The roots of philanthropy come from some measure of charity, generosity, and social conscience, just as its existence is rooted in ever increasing global wealth and power inequality. With the exercise of any source of economic, social, or cultural capital, an examination of power is necessary. In this course, we will understand what role philanthropy has played in supporting music in the United States and Western Europe through historical and present-day case studies, including the philanthropy of individual patrons like Isabella Stewart Gardner, non-profit organizations, and large institutions like the Ford and Rockefeller Foundations. Guest visitors to the class will deepen our awareness of how decisions are made on personal and practical levels. We will engage in historical, theoretical, and moral discussions concerning philanthropy and its role in civil society, in order to gain a better understanding of how money speaks in music, as well as learn how to think *critically about the impact and efficacy of philanthropic endeavors*.

Course Notes: Open to undergraduates with permission of instructor.

Beyond Akhlāq: Ethical Literatures of the Persianate World (211354)

Robert Ames

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course offers an overview of the development of classical Persian literature through the lens of ethics (broadly conceived as normative or prudent conduct), from the 10th through 15th centuries. Students will become acquainted with the key themes and beliefs at work in pre-modern Persian literature, and with the variety of literary forms, images and rhetorical devices employed to train the reader.

In this course, I aim to illustrate that the medieval and early modern Persianate worlds witnessed a flowering of literary production on normative conduct within a wide variety of literary genres including *belles lettres* (*adab*), Sufi prose and poetry, epic poetry, and *akhlāq*, the genre whose title is normally translated as "ethics." Although *akhlāq* is usually translated into English as "ethics," in light of a broader conception of ethics, *akhlāq* was only one of many genres dedicated to the subject. Readings on *akhlāq* will include Tūsī's *Akhlāq-i Nāsirī* and Kāshifī's *Akhlāq-i Muhsinī*, while readings outside of it will include selections from Ferdowsi's *Shāhnāmah*, Sa'dī's *Gulistān*, and Kāshifī's *Futuvvat-nāmah-yī Sultānī*.

Recommended Prep:

While the course assumes no prior knowledge of Persian language or literature, some familiarity with it and/or Islamic studies would be helpful. The course is appropriate for both those who wish to become acquainted with one of the major cultural dimensions of the Islamic world as well as those contemplating future specialization in the field of Islamic or Middle Eastern studies.

Persian 108

Persian Sufi Literature (210888)

Nicholas Boylston

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this course we will explore the major genres of classical Persian Sufi poetry and prose. In addition to examining the formation of these genres and their contexts of composition, we will pursue a range of broader questions, including: What is Sufism, and how do we discern 'Sufi' from 'non-Sufi' literature? What have the purposes and functions of literature been in Persianate Islamic contexts? What is the relationship between language, realization and experience in Persian Sufi literature, and how do authors in the Sufi tradition deal with the problem of ineffability? What is the place of love in Persian Sufi literature and how is it conceptualized? And, how do Persian Sufi authors deal with the diversity inherent in human experience?

Readings will include Baba Tahir, Umar Khayyam, Sana'i, Attar, Rumi, Ahmad and Abu Hamid al-Ghazali, Sa'di, Hafez, Fakhr al-Din Iraqi, Shabistari, and Jami. All readings will be in English translation, but there will be an extra section for students with advanced Persian to read texts in the original.

Introduction to Persian Literature (109546)

Sheida Dayani

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a survey of Persian literature in Persian with a focus on the 19th and the 20th centuries. We begin with methods of reading literary Persian texts and continue to classical poetry, folk literature, travelogues, letters, political satire, drama, fiction, and modern poetry. There is occasional incorporation of film depending on interest. Knowledge of Persian is required. Students must have successfully completed Intermediate Persian BB at Harvard or passed the placement test for the equivalent. Instructor's permission is required if former Persian studies are outside Harvard.

Course Notes: Formerly Persian 131r and Persian 132r.

Recommended Prep: Persian BA/BB sequence, or equivalent, or permission of the instructor.

Literary and Historical Texts in Persian (109547)

Sheida Dayani

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores classical and modern Persian literature for literary texts with historical significance and historical texts with literary value. Genres include travelogues, journals, classical and modern poetry, essays, satire, fiction, plays, letters, court documents, film, music, and other audio-visual material. Students are expected to reflect on the weekly readings with one-page response papers in Persian, plus a midterm paper and a final paper. Class is conducted in Persian.

Course Notes: Formerly Persian 131r and Persian 132r.

Recommended Prep: Persian 130AR or permission of the instructor.

Persian 158

Modern Persian Poetry and Prose (159766)

2018 Fall (4 Credits)

Schedule:

Instructor Permissions: None

Enrollment Cap: n/a

The course focuses on the reading and understanding of a selection of texts from various genres within the corpus of modern Persian poetry and prose. Students will become acquainted with the major actors of the early Iranian literary modernity (late 19th - early 20th century) through a selection of excerpts drawn from their literary as well as theoretical output. The detailed understanding of the language at play among Iranian modernists will complement the study of the context and literary significance of these texts.

Recommended Prep: At least two years of Persian or equivalent.

Child Sacrifice, Pros and Cons: The Binding of Isaac in Jewish, Christian, Islamic, and Modern Lit (211072)

David Stern

2019 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Child Sacrifice-- specifically, the story of the parent's sacrifice of the first-born child-- lies at the heart of Western religion and culture. The Biblical narrative in Genesis 22, known as the Binding of Isaac, is one of the most famous and problematic tales in the Bible. The same narrative is foundational to Christianity. Later Jewish tradition has interpreted the Biblical text in countless ways from the ancient period down to the present day. The narrative figures prominently in Islam from the Qur'an on. And the Biblical story has been criticized and critiqued since the Middle Ages as a barbaric narrative. Recent works have blamed it for the ubiquity of child abuse in Western society, and it has become a ubiquitous motif of anti-war and protest poetry all over the world. This course will use the interpretive career and literary history of Genesis 22 as a lens through which to study the place of this foundational narrative in Western culture.

Readings will include Biblical texts, Euripides' Iphigeneia in Aulis, Philo of Alexandria, ancient Jewish sources, the New Testament, St. Augustine and other Christian exegetes, the Qur'an and later Islamic traditions, Kierkegaard's Fear and Trembling, Martin Buber, Kafka, Bob Dylan, Yehuda Amichai, and Leonard Cohen, among many other modern writers and poets.

Course Notes: Offered jointly with the Divinity School as HDS 1134.

Studies in the Babylonian Talmud: Parents and Children (207795)

Shaye Cohen

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What obligations do children have to their parents? Parents to their children? In this course, we will study legal and narrative passages about these questions, which will provide a window into rabbinic thinking about how the parent-child relationship fits into an ideal way of communicating values and maintaining a culture. This course will also serve as a methodological introduction to the academic study of the Babylonian Talmud. Secondary readings will be primarily focused on academic tools such as source criticism, social history, critical gender studies, and literary theory, as scholars have applied these tools to the Babylonian Talmud. We will also explore how traditional commentators can help raise critical questions about the text.

Recommended Prep: One year of intensive Talmud study or permission of the instructor.

Hebrew 204

Reading the Song of Songs (207756)

Yair Zakovitch

2018 Fall (4 Credits)

Schedule:

W 0900 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The Song of Songs, a collection of secular and often erotic poems, is a riddle within the anthology of sacred literature we know as the Hebrew Bible. Its poems describe various encounters between the young woman and her lover and several of her dreams, include both dialogues and monologues, riddles and wasfs (a poetic genre of poems describing the human body), and many seem to portray the world and viewpoints of the young woman—a rarity in the very male-oriented literature of the Bible.

Over the course of the semester, we will do a close reading of many of these poems. We will learn about the different genres and the poems' relationships with other parts of the Bible—wisdom, prophecy, and narrative—as well as with the literature of the Ancient Near East. We will question the redactive process that formed the collection, its attribution to Solomon and his portrayal in the book's poems and, towards the end, we will reach conclusions about the book's origins, language, dating and, finally, the book's allegorization and canonization.

Course Notes: Intermediate Hebrew reading proficiency is recommended.

Class Notes: The instructor for this course is Professor Yair Zakovitch, Weinstock Visiting Professor of Jewish Studies (Fall 2018).

Hebrew 255

The Passover Haggadah (210972)

David Stern

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The Passover Haggadah is the Jewish book of redemption par excellence. As the script for the seder (the ritual banquet on the first night(s) of Passover), the Haggadah has changed and developed as the Jews have moved from one diasporic center to another from Late Antiquity until the present day. In this course we will study the history and development of both the seder and the Haggadah-- as a ritual, as a text, and as a physical book. Readings will be drawn from the Bible, Mishnah, the Jerusalem and Babylonian Talmuds, the New Testament and early Christian writers, medieval Haggadah manuscripts and early printed editions, as well as more recent versions of the Haggadah from both Israel and America (including non-traditional haggadot). We will deal extensively with the tradition of Haggadah illustration, and will utilize Harvard's extensive collection of Haggadot in both Widener and Houghton Library. The focus of the course will be on the reading and analysis of primary sources. No previous experience with Passover is required, but students should have at least two years of Hebrew (Biblical or modern) and be prepared to read texts in Hebrew. Any student with questions about their Hebrew competence should contact Professor Stern.

Course Notes: Offered jointly with the Divinity School as HDS 1641.

Recommended Prep: Two years of Hebrew.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

Hebrew 256

The Poetics of Biblical Composition: Foundational Principles of Hebrew Narrative Art (211312)

Andrew Teeter

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A study of select narratives from the Hebrew Bible to function as case studies for exploring the nature of compositional artistry in this corpus. Particular attention will be given to stylistic and structural features, to principles of organization, to literary strategy and argumentation, to textual logic, and to overall expectations made of readers, both ancient and modern. These texts and underlying principles of design will be considered in the context of major debates within the current state of the field.

Course Notes: Offered jointly with the Divinity School as HDS 1423.

Recommended Prep: The course will presume basic proficiency with Biblical Hebrew. A minimum of one year of Hebrew is prerequisite.

Arabic 242AR

Arabic Theater of the Absurd (108971)

Sami Alkyam

2018 Fall (4 Credits)

Schedule: M 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This is a seminar on contemporary Arabic theater. When the world is full of signs that point to the deterioration of sensical morals and political values, then depicting this absurdity is an art. It is an art which takes the absurd and the chaotic as its raw material. Characteristic of such kind of art is its tendency to lack organization which really serves to heighten the sense that we human beings are mere victims of the arbitrary un/known forces. In this course, we will be reading selected Arabic plays by celebrated playwrights to showcase this absurdity through their inventive use of writing and redundant dialogues, unclear passage of time, and characters to express frustration with deep social and philosophical questions. Among the playwrights whose works have been selected are: Tawfiq al-hakim, Abdellatif Laâbi, Saadallah Wannous, Nawal El Saadawi, Raja'a Alem and Gamal Abu hamdan.

Course Notes: Course conducted solely in Arabic; all readings in Arabic.

Class Notes: Enrollment limited to 12.

Recommended Prep: Four years of Modern Arabic or equivalent level of proficiency.

Additional Course Attributes:

Modern Middle East 100

Introduction to the Modern Middle East (107349)

Malika Zeghal

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

An introduction to Middle Eastern Studies focusing on the modern period (19th and 20th centuries). Lectures will be broadly sequenced according to historical chronology but will be thematically organized. They will provide some historical context for each topic examined, as well as present specific examples through primary sources, visual sources, and numerical data when relevant.

This course is designed to give students an overall good grasp of the history of the modern Middle East and of some of the major themes in modern Middle Eastern Studies. Students will critically engage with some of the most important topics that resonate in that area of the world. We will cover topics such as reformism, economic development, colonialism and nationalism, authoritarianism and democratization, sectarianism, culture, gender, literature and the arts, as well as the role of religion in politics. Most of these topics, in one way or another, will speak to the construction of nation-states in the Middle East and to the challenges they have been confronting.

This is not a survey course. In particular, it will not be exhaustive in its coverage of the region in space or time, and in its coverage of topics. Students in search of a specific topic, country, or period are strongly encouraged to take a look at the syllabus prior to enrolling to make sure their specific interests will be covered.

Assigned readings will consist of primary and secondary sources. Students will be exposed to first-hand accounts by protagonists in the history of the Middle East (primary sources) as well as to the diversity of approaches that the scholarly literature (secondary sources) has taken across disciplines, e.g. anthropological studies, quantitative analysis, philology and textual studies. The larger aim of the course is to develop students' critical thinking in dealing with the history, cultures, politics, and political economies of the contemporary Middle East. Required for all concentrators in The Modern Middle East. Open to all undergraduate and graduate students. There are no prerequisites for this course.

Course Notes:

A required course for undergraduates pursuing a secondary field in Modern Middle Eastern Studies.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students

Approaches to Middle Eastern Studies (117327)

William Granara

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Interdisciplinary seminar serves as an introduction to the major disciplines constituting Middle Eastern Studies, including history, political science, anthropology, literature and Islamic Studies. Faculty affiliated with Center for Middle Eastern Studies serve as guest lecturers.

Course Notes:

Taught by members of the department. Required for students pursuing the AM in Middle Eastern Studies. Primarily for first-term students in the AM in Middle Eastern Studies program, although open to Graduate students in related fields.

Class Notes:

Because the first day of FAS classes, Wednesday August 30, follows a Monday class schedule, the first meeting for this class is on Wednesday, August 30.

This language course explores the fundamentals of Middle Egyptian, the classical stage of Egyptian hieroglyphs used throughout much of ancient Egyptian history. Lessons in the Egyptian writing system, grammar, and culture, with weekly vocabulary and exercises, will introduce the language and verbal system in a systematic fashion. By the end of the semester, students may begin to read selections from Egyptian classic stories and historical texts. Visits to the Semitic Museum and the Museum of Fine Arts, Boston, in order to read ancient hieroglyphic inscriptions on the original monuments, may also be included.

Course Notes: Continues as Egyptian Ab. Offered jointly with the Divinity School as 4120.

Introduction to Yiddish language, literature, and culture. In the course of the year, students will acquire a thorough grounding in Yiddish grammar and will develop strong foundational reading, writing, speaking, and comprehension skills. The course will introduce students to the 1000-year history of Yiddish culture in Eastern Europe, the United States, and around the world. Students will learn about the past and present of this culture through exposure to Yiddish literature, music, theater, film, radio, oral history, and the Yiddish internet—an introduction to the dynamic world of Yiddish culture and scholarship that exists today. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

For students with little or no knowledge of Yiddish. Additional sections at different times may be added as needed. Contact instructor if you have a scheduling conflict. Yiddish AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Recommended Prep:

No prerequisites; knowledge of Yiddish not assumed.

Building on the skills gained in Yiddish AA/AB, students will further develop their Yiddish reading, writing, speaking, and oral comprehension skills. Focus will be on working with a wide variety of textual and cultural materials spanning the Yiddish-speaking world in the modern era. Course materials include selections from Yiddish fiction, poetry, drama, film, music, the press, and historical documents. Students will become familiar with the language's dialects, writing conventions, and historical development. Course activities will introduce students to the latest developments in online Yiddish publishing and digital humanities scholarship.

The Politics of Yiddish (207574)

Saul Zaritt

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A bastardized German, a jargon, a woman's vernacular, an old world language, a dying and ghostly tongue, a Hasidic language, a queer language, a radical language—these are just a few of the ways that Yiddish has been labeled over its one-thousand-year history. This course will trace the shifting politics attached to Yiddish from its early modern beginnings as a language of translation between Jewish and non-Jewish cultures to its postwar vacillation between a language of mourning and nostalgia, Jewish American humor, Hasidic isolation, and contemporary Jewish radicalism. Through poetry, fiction, essay, and film, we will discuss what it might mean to discover "the secret language of the Jews" at the origins of Jewish socialism and at the foundations of diaspora nationalism. All texts will be read in translation.

From love-sick demons ("The Dybbuk") to crossdressing fiddlers ("Yidl mitn fidl"), the Yiddish "talkie" of the 1930s and 40s was dynamic medium for both preservation and innovation in Jewish culture. This

"golden age" of Yiddish film was short but wide-ranging, with films produced in Soviet, US, and Polish contexts that explored themes of class struggle, immigration, tradition versus modernity, generational conflict, queerness, Jewish persecution, and the fate of Yiddish culture. This course will delve into the diversity of this tradition while also exploring its impact on later Yiddish films, from Israeli confrontations with the Holocaust to the rise of the Yiddish YouTube video and contemporary filmic depictions of the Hasidic world.

Course Notes: No prior knowledge of Yiddish or film studies required. □

Historical Background to the Contemporary Middle East: Religion, Literature and Politics (110914)

Gojko Barjamovic

2019 Spring (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

What defines the Middle East? What long-term historical and cultural developments can we trace in the region? How do these affect contemporary global order and policy? This team-taught course in the NELC department will address these three fundamental questions of great present relevance by introducing students to the ancient and modern peoples, languages, cultures, and societies of Western Asia and North Africa. The study of this diverse region is uniquely aided by a deep-time perspective afforded by thousands of years of vibrant art, writing and cultural artefacts. Relying on the classic expertise integral to area studies, the course brings together faculty from a variety of disciplines – from history and archaeology to literature and philology, and from sociology and economy to the political sciences – in a common endeavour to explore the rich cultural complex of the region through four key topics: history, religion, literature and politics.

Course Notes: Formerly NEC 97r, this course satisfies the NELC Sophomore Tutorial requirements.

NELC Doctoral Colloquium: Research, Resources and Pedagogy (203473)

Shady Nasser

2019 Spring (2 Credits)

Schedule: T 0600 PM - 0715 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

This practical colloquium addresses major issues of research and teaching competence. Designed to introduce G-1 students to the Ph.D. requirements, to methodological issues and examples of ongoing scholarship in NELC, it further offers opportunity for reflection on the art of teaching (leading discussion

sections, designing syllabi, giving lectures, etc.). Questions covered will include: How to choose coursework? How to prepare for qualifying and general exams? What are the challenges of language training? How does one prepare and write a prospectus? How to use the library resources most efficiently? What type of investment does recourse to digital and quantitative methodology require? How best to prepare for professional life after the Ph.D., both inside and outside of academia? In addition, NELC faculty will informally present their respective fields (main issues and methods), in broad strokes through their current research, and advanced Ph.D. students will present their prospectus for discussion and feedback before submitting it to the faculty.

Course Notes: Note: The Doctoral Colloquium will meet throughout the academic year (fall and spring semesters) once every other week. Sessions designed specifically for G1-G2 students, or alternatively, for G3-G4 students (and until approval of the prospectus) will be clearly tagged; assessment (SAT/UNSAT) will be based on attendance of a targeted number of sessions for each level. Required of all NELC G1 and G3 students.

Subject: Akkadian

Akkadian AA

Introductory Akkadian I (114320)

Gojko Barjamovic

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

An introduction to the Semitic language of Akkadian, primarily through the Old Babylonian dialect and cuneiform writing system as used during the time of Hammurabi (c. 1750 BCE). Students learn the fundamentals of grammar and the writing system, as well as the most common cuneiform signs in official and cursive script. Readings span a variety of genres, including private letters, judicial documents, literary and religious texts, divinatory compendia, legal code, and royal inscriptions. The course also briefly introduces students to examples of texts from other periods and dialects of the Akkadian language for cultural and comparative purposes. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

Akkadian AA/AB is an indivisible year-long course. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Introduction to Old Assyrian Language and History (110013)

Gojko Barjamovic

2018 Fall (4 Credits)

Schedule:

T 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course provides an overview of the Old Assyrian dialect of the Akkadian language as well as the political, social and economic history of Northern Mesopotamia and Anatolia in the early 2nd millennium BC. We read texts from a wide variety of genres, including private and state letters, legal and administrative records, loans and quittances, caravan texts, commercial records, partnership contracts, family and state law, political treaties, literature, magic, religion, and royal inscriptions. The course integrates the textual record with an overview of Assyrian and Central Anatolian history, visual and material culture during the period in question. The goal of the course is to deepen your understanding of both the Old Assyrian language and its historical context. Course readings combine standard introductions, thematic and core studies in the field.

Jewish Studies 179

Ghostwriters and Ventriloquists: Postwar Jewish American Culture (203082)

Saul Zaritt

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course takes ideas of the "ghostwriter" and the "ventriloquist" as a lens through which to read postwar Jewish American culture. In the wake of the Holocaust, Jewish American writers and cultural producers began to feel a responsibility to a lost civilization that seemed to haunt their every creative act. Even as they achieved worldwide fame, these artists felt both burdened and inspired by old world ghosts. Often the very success of a given work was attributed to the ways in which it reanimated and revoiced ghosts in order to alternately dazzle and comfort audiences. This course asks: How do strategies of ghostwriting and ventriloquy compensate for trauma and loss? In what ways do such reenactments modify an original text? Through analysis of postwar texts and films in English and Yiddish (in translation), this course studies how specters of the past function both as arbiters of cultural value and as reminders of the discontinuities and traumas of the Jewish American present. Films include *Tevya*, *Fiddler on the Roof*, *The Diary of Anne Frank*, and the TV series *Transparent*. We will read texts by Sholem Aleichem, Isaac Bashevis Singer, Philip Roth, Cynthia Ozick, Grace Paley, and others.

Armenian 163

Revolutionary Women: Contemporary Fiction of Dissent in Context (211203)

Lisa Gulesserian

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

The twentieth century had its fair share of revolutions—Bolshevik, Young Turk, Iranian, and feminist—that changed the course of history. In each of these revolutions, women and minorities played a key role in fostering change in Russia, Turkey, Iran, and the US. Revolutionaries penned essays, plays, poems, novels, graphic novels, and memoirs about the massive shifts occurring around them. In this course, we will read the work of Armenian women revolutionaries alongside works from the cultures in which they were embedded. We will sit in on conversations about human rights, family structures, economics, religion, culture, language, and sexuality with authors to include: Zabel Yessayan (Ottoman Empire/France/Armenia), Shushanik Kurghinian (Armenia), Alexandra Kollontai (USSR), Marjane Satrapi (France/Iran), Zoya Pirzad (Iran), Nancy Agabian (USA), Audre Lorde (USA), and others. Because all non-English works will be read in translation, no knowledge of Armenian, Farsi, Russian, or Turkish is required.

Subject: Islamic Civilizations

Islamic Civilizations 99

The Quran in Muslim Life and Practice (208302)

Shady Nasser

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course offers a basic introduction to the Qur'an, focusing on its origins, form, and content, with attention to its ongoing life in Muslim exegesis, general piety, mystical thought, and other domains of thought and practice. No previous study of Arabic or Islam is required. This course is designed primarily for undergraduate students.

Topics include: Prophetic traditions, Oral and written transmissions, schools of Qur'anic Exegesis (Commentaries), women and family in Islam, Qur'an and science, animals in the Qur'ān, and the supernatural. Students will read weekly selections from the Qur'an (approximately 50% of the whole text) in addition to substantial secondary materials.

Discussion will be the primary mode of common work, supplemented by instructor's introductions to, and comments on, each week's topic. Class time will focus on the week's readings, both secondary and primary, and on issues and questions arising from both.

Islamic Civilizations 135

Early and Medieval Islamic History, 600-1500 (205248)

Nebil Husayn

2019 Spring (4 Credits)

Schedule: TR 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course will survey Islamic history from the rise of Islam to the end of the 15th century. The course will survey political, religious and sectarian developments in this period. Topics include debates about the Quran, Muhammad, hadith and the caliphate.

Professor Husayn's webpage: <http://bit.ly/2Bm3ljP>

For grading and other course topics watch this video trailer: <http://bit.ly/2DAOZID>

Course Notes: Offered jointly with the Divinity School as HDS 3029. All material read in translation. If enough students show interest, we may create a section in which we will read Arabic sources in the original.

What is Good in Islam? Ethics in the Islamic Tradition (210887)

Nicholas Boylston

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Can values be judged by reason or are they dependent on revelation? What is the goal of human existence and how is it to be attained? What is the relationship between the Sharia and ethics? What are a human's responsibilities towards fellow humans? How is the human self to be cultivated? In this class we will explore the diverse approaches to these questions in the Islamic tradition, with a focus on the pre-modern. Beginning with the Quran and Hadith, we will discuss a wide range of discourses in which questions of the good, the right, and the cultivation of virtue have been addressed, including theology, law, philosophy, literary ethics (adab), and various strands of the Sufi tradition. Throughout the course we will pay close attention to ways in which conceptions of what is good are connected to accounts of the nature of reality and the sources of human knowledge, noting how ethical questions pervade Islamic systems of knowledge and practice.

Islamic Civilizations 145A

Introduction to Islamic Philosophy and Theology: The Classical and Medieval period (121928)

Khaled El-Rouayheb

2018 Fall (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Islamic Civilizations 145A is an introduction to some of the key problems and figures in medieval Islamic theology and philosophy. The main topics covered will be: The rise of theological controversies in early Islam and the crystallization of theological factions; the rise of an Arabic tradition of Neo-Platonized Aristotelianism with such figures as Farabi (d. 950) and Avicenna (d.1037); the confrontation between the theological and Aristotelian traditions in such works as *The Incoherence of the Philosophers* by the theologian al-Ghazali (d.1111) and the response by Averroes (d.1198); the powerful influence of philosophy on later Islamic theology; the anti-Aristotelian, Platonist philosophy of "Illumination" of Suhrawardi (d. 1191), and the mystical monism of Ibn Arabi (d.1240) and his followers.

Any student is welcome who would like to know more about the vigorous and long-lived Islamic traditions of theology and philosophy. No prior knowledge of Islam is presupposed, and all readings will be in English. Assigned readings, additional handouts and announcements for the course will be available through the course web site.

Course Notes:

Offered alternate years with Islamic Civilizations 145b. Though the two courses can be taken in either order, 145a covers the 8th-15th centuries and 145b covers the 19th-20th centuries. Offered jointly with

the Divinity School as 3602a.

Class Notes: Please note the first meeting on 9/6 will be held in Sever Hall, Room 310.

Islamic Civilizations 170

Islam, Modernity and Politics (109243)

Ousmane Oumar Kane

2019 Spring (4 Credits)

Schedule: F 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap: 18

The aim of this seminar is to study the evolution of Islamic thought and political practices in Muslim societies from the 19th to the early 21st centuries. Attention will be devoted to the patterns of interaction between the Muslim World and the West because it is our assumption that these patterns contribute to influence ideological formations and modes of religious/political mobilizations in the Muslim World. By the end of the eighteenth century, much of the Muslim World was in "decline" whereas European imperial powers, mainly France and Great Britain, were on the rise. The course will explore the response of Muslim societies and intellectuals to the rise of European prominence. The major 19th century reformist movements that appeared in the Muslim World will be discussed, ranging from movements advocating mild reform to those rejecting all influence of "Western civilization" and advocating a return to the Tradition of Muhammad. In the twentieth century, virtually all the Muslim World came under European colonial domination. During colonial rule and after, the Muslim world experienced major transformations which affected the nature and administration of law, politics and society. It is in this context, that the new Islamic revival that some have called "Islamism" was articulated as an alternative to Westernization. The course will address the rise of contemporary "Islamism," as an alternative to Western domination and modernization/Westernization. The major theorists of political Islam as well as the different trajectories of "Islamism" in diverse Muslim societies will be covered. The impact of political Islam in the West will also be addressed. The final part of the course will assess the trajectories of political Islam and address the ongoing debates on post-Islamism, secularism and modernity.

Course Notes: Offered jointly with the Divinity School as 3368.

Islamic Civilizations 179

Critical Perspectives on the Dynamics and Development of Islam in Africa (205305)

Ousmane Oumar Kane

2019 Spring (4 Credits)

Schedule: W 0100 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap: n/a

An estimated 450 to 500 million Muslims live in Africa—close to a third of the global Muslim population. The overwhelming majority of them live in the northern half of the continent, above the equator. The spread of Islam increased the contact between the peoples of North Africa, the Sahara, and parts of sub-Saharan Africa. The course is designed to provide an understanding of the spread of Islam and the formation and transformation of Muslim societies in Africa. It is organized in two parts. The first part of the course will focus on the history of Islamization of Africa, and topics will include the ways in which Islam came to Africa, the relationships of Islam to trade, the growth of literacy in Arabic and Ajami, the rise of clerical classes and their contribution to State formation in the pre-colonial period. The second part of the course will feature guest lecturers who will present cutting edge research on the transformation of Islam in postcolonial Africa.

Course Notes: Offered jointly with the Divinity School as 3357.

Muslim Devotional Literatures in South Asia: Qawwalis, Sufiana Kalam (Sufi Poetry) and the Ginans (161217)

Ali Asani

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0515 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course explores traditions of Islamic spirituality in South Asia through the lens of three genres: the qawwali, concerts of mystical poetry; sufiana kalam, Sufi romantic epics and folk poems; and the ginans, hymns of esoteric wisdom recited by the Satpanthi Ismailis. Since these genres represent examples of language, symbols and styles of worship shared across Islamic and non-Islamic denominational boundaries, we will also examine their relationships with other Indic traditions of devotion, particularly those associated with the so-called sant and Hindu bhakti movements. Special emphasis will be given to the impact of contemporary political ideologies, globalization and the revolution in media technology on the form and function of these genres and their relationship with contemporary communities of faith in South Asia and beyond.

Ismaili History and Thought (125910)

Ali Asani

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course explores the doctrines and practices of the Ismailis, adherents of a minority branch of Shia Islam that recognizes the continuation of religious authority after the Prophet Muhammad through a particular line of his descendants known as the *Imams*. Focusing on their historical evolution and manifestations in diverse political, cultural and social contexts, the course will consider three major communities: the Nizari Ismailis (in Syria, Iran, Central Asia, and South Asia); the Tayyibi (Daudi Bohra) Ismailis (in Yemen and South Asia) and the Druze (in Syria and Lebanon). Principal themes to be considered include conceptions of the *Imamah* and notions of authority, messianic doctrines, philosophy, ritual practice and devotional traditions. The course will also briefly consider the contemporary situation of these communities as minorities in North America and Europe. Jointly offered with the Divinity School as HDS 3939.

Course Notes: Offered jointly with the Divinity School as HDS 3939.

Recommended Prep: Introductory course on Islam or permission of instructor.

Subject: Ancient Near East

Ancient Near East 103

Ancient Lives (110014)

Gojko Barjamovic

2018 Fall (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

What are the essential elements of human society? Have our fundamental conditions developed, and how? Can we use themes from ancient history to think about contemporary society and culture? These questions are in focus in this course on 'Ancient Lives', which explores the earliest human civilizations in the region commonly known as Mesopotamia (c. 3000-300 bce) in what is now Iraq, Iran, Syria and Turkey. Few elements in the way we live and organize ourselves today are to be taken for granted. There is, and has always been, a wealth of ways in which humans live. But biologically we are the same as our ancestors of 5000 years ago, at the dawn of history. Any likeness or difference between 'us and them' is therefore likely to be a product of history and culture. 'Ancient Lives' builds upon this realization to inspire a critical way of thinking about society in the broadest possible scope. Areas explored during the course are selected for their relevance across the range of contemporary life - they include freedom, music, public health, food, jurisprudence, trade, the visual arts, science, sexuality, religion and political power. You learn about how societies and individuals have dealt with change on multiple levels, from large-scale societal revolutions to personal transformation. Having taken this course, you will have gained a fundamental understanding and appreciation of human life in the broadest scope, as well as of your own life as a part of history. You will be able to critically assess contemporary discourses on the study of 'the other' in past and present; engage with core concepts of human society, such as justice, beauty, value and belief on a broad historical base; be familiar with examples of classical social theory and thinkers through concrete cases in which their work has been applied to or shaped by the study of the past; and acquire skills in presenting scholarly work to a general audience.

Ancient Mesopotamian Literature: 2000 years of early storytelling (211195)

Laura Hawkins

2019 Spring (4 Credits)

Schedule:

F 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will present an overview of literature from ancient Mesopotamia, the world's earliest civilization and the birthplace of the first writing system. We will be exploring themes of creation and origins, myths and epics, death and the afterlife, religion, lamentation, humor, and more, as a way to understand some of the fundamental aspects of Mesopotamian society. Comparative texts from other regions or time periods will be brought in to add richness and depth to our discussions. Class sessions are structured heavily around weekly readings and discussions. All texts will be read in translation so no knowledge of Akkadian or Sumerian is required.

Ancient Near East 209

Biographies in the Hebrew Bible (207757)

Yair Zakovitch

2018 Fall (4 Credits)

Schedule:

R 0900 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

The Hebrew Bible's historiography is designed as a series of life stories. From Abraham to Isaac, from Jacob to Joseph, Moses, Joshua and on to the judges, prophets, and kings, this is a long-distance relay race in which the baton is being passed from one character to his successor, from the beginning of history till the expulsion of Israel from its Land. Some of these life stories, like Moses's, are rather complete, starting with pre-birth traditions and ending with death; others, such as Joshua, are only partial.

In this course, we will conduct a close reading of some of the Bible's biographies, noting and explaining the relationships, similarities and differences between them. Since we deal with religious literature, special attention will also be given to each character's relationship with God and its significance. All the while, we will question the biblical writers, their motivations, who they were supporting and who they were criticizing, what their ideological motivations were, and noticing and enjoying their literary techniques.

Finally, we will also be looking at how some biographies came to be retold in Second Temple Period literature as well as rabbinic literature, and question the varying motives, literary tastes and modes of interpretation of the different eras and socio-political contexts.

Class Notes: The instructor for this course is Professor Yair Zakovitch, Weinstock Visiting Professor of Jewish Studies (Fall 2018).

Aramaic B

Targumic Aramaic (114142)

Shaye Cohen

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0515 PM**Instructor Permissions:** None**Enrollment Cap:** n/a

Targumic Aramaic is designed to improve the student's ability to work with ancient Aramaic texts. The

Aramaic texts studied in this course will be selected from the major Targums – Targums Onqelos, Neofiti, Pseudo-Jonathan, and others. Class-time will be devoted primarily to reading and analyzing the selected texts. In addition to emphasizing Aramaic vocabulary, morphology, and syntax, this course will explore the exegetical practices of the targumists in their respective Targums. Students will attain reading proficiency in Targumic Aramaic and experience the rich but complex literary nature of the Targums.

Course Notes: Two years of biblical Hebrew, or the equivalent; and Aramaic A. Offered jointly with the Divinity School as HDS 4060.

Class Notes: The course will be taught by Professor Cohen and staff.

Subject: Neuroscience - Undergraduate

Neuroscience - Undergraduate 57

Animal Behavior (207534)

Bence Olveczky

Naomi Pierce

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A review of the behavior of animals under natural conditions, with emphasis on both mechanistic and evolutionary approaches. Topics include classical ethology; behavioral endocrinology; behavioral genetics; learning and memory; communication; orientation, migration and biological rhythms; optimal foraging; evolutionary stable strategies; sexual selection; parental investment and mating systems; selfishness, altruism, and reciprocity; and sociality in vertebrates and invertebrates.

Course Notes:

This course cannot be taken if OEB 57 has already been taken. Neuro 57 cannot be taken concurrently with OEB 57.

Requirements:

Anti-Requisite: Cannot be taken for credit if OEB 57 already complete.

Additional Course Attributes:

Neurobiology of Behavior (207476)

Jeff W. Lichtman

Venkatesh Murthy

2018 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the ways in which the brain controls mental activities. The course covers the cells and signals that process and transmit information, and the ways in which neurons form circuits that change with experience. Topics include the neurobiology of perception, learning, memory, language, emotion, and mental illness. This year we are changing the way in which this material is taught by emphasizing more student participation through active learning techniques and by providing real-world experiences and hands-on demonstrations each week.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems. The course is open to students with little formal training in biology.

This course cannot be taken if MCB 80 has already been taken. Neuro 80 cannot be taken concurrently with MCB 80.

Requirements: Anti-Req: Cannot be taken for credit if MCB 80 already complete.

Human Cognition: Reading and Writing the Neural Code (159700)

2018 Fall (2 Credits)

Schedule:

R 0600 PM - 0715 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this course, we will explore a new and cutting-edge discipline in neuroscience -- invasive human neurophysiology. Some neurosurgical procedures, such as deep brain stimulation surgery, allow for the unique opportunity to directly access the human brain while patients are awake-and-behaving. Topics will include: place/grid cells, deep brain stimulation, epilepsy, face processing, brain-machine control, and reward processing. Students must complete both terms of this course(parts A and B) within the same academic year in order to receive credit.

Requirements:

Prerequisite: MCB 80 OR MCB 81

The Neurobiology of Sleep and its Role in Mental Health (207615)

2018 Fall (2 Credits) **Schedule:** M 0430 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The scientific study of sleep is both highly interdisciplinary and among the most unifying of topics in psychology and the neurosciences. In the past several decades, exciting new discoveries on the neurobiology of sleep have been facilitated by technologies such as functional neuroimaging and molecular genetics. Sleep science exemplifies the translational approach in biomedical science whereby investigators in human and animal research work together to continually advance the field of sleep medicine. Scientific findings increasingly point to the importance of sleep for mental health and optimum performance, as well as to sleep disruption as both a result and potential cause of mental illness. In psychiatric neuroscience, sleep is an area in which many fundamental questions remain unanswered due to the unique challenges of studying human sleep.

Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Requirements: Prerequisite: MCB 80 OR MCB 81

Cellular Basis of Neuronal Function (207530)

Ryan W. Draft

Kathleen Quast

2019 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

The essential function of a neuron is to process complex signals derived from the external world. In doing so, neurons employ diverse mechanisms that respond to chemical and electrical signals with incredible sensitivity and plasticity. In this course, we will study these electrical, molecular, and cellular processes using biophysical and biological approaches. Specifically, we will explore topics on excitable membranes, neurotransmission, ion channels, dendritic integration, intracellular signaling, and synaptic plasticity in the context of real cells and brain circuits. Additionally, there will be a hands-on laboratory section for students to learn to collect and analyze data from common electrophysiological methods (patch clamping and extracellular recording in cultured cells and brain slices).

Laboratory section (2 hours) will be scheduled ad hoc after enrollment on either Thursdays, Fridays, or Mondays.

Course Notes: This course cannot be taken if MCB 115 has already been taken. Neuro 115 cannot be taken concurrently with MCB 115.

Requirements: Prerequisite: Must take MCB 80 OR MCB 81 and cannot be taken for credit if MCB 115 already complete.

Introductory Computational Neuroscience (205105)

Kenneth Blum

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course introduces students to abstract models of what and how neurons compute and concrete analyses of real neurons in action. Topics include network models of sensory processing, short- and long-term memory, reinforcement learning, the Hodgkin-Huxley model of the action potential, and techniques to analyze real experimental data. The approach will draw upon recent advances in neuroscience and deep learning. This course will emphasize students' contributions and classroom interactions. Programming homework assignments and group final projects will be a significant aspect of the course, so programming experience (Matlab will be used) will be assumed. Familiarity with linear algebra and differential equations at the level of Math or Applied Math 21b will be assumed.

Additional Course Attributes:

Attribute	Value(s)

Molecular Basis of Behavior (207533)

Catherine Dulac

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Modern molecular genetic approaches are teaching us a great deal on how the brain controls behaviors. This course will cover newly developed experimental strategies of molecular neuroscience, and how they have helped uncover the nature and identity of behavior circuit components. How genes and molecules affect behaviors will be investigated through key examples of mammalian behaviors with an emphasis on instinctive and social behaviors, their expression, development, and associated mental disorders.

Course Notes:

This course cannot be taken if MCB 125 has already been taken. Neuro 125 cannot be taken concurrently with MCB 125.

Requirements:

Anti-Req: Students who have taken MCB 125 cannot take this course for credit.

Additional Course Attributes:

Computational Neuroscience (207731)

Haim Sompolinsky

2019 Spring (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Follows trends in modern brain theory, focusing on local neuronal circuits as basic computational modules. Explores the relation between network architecture, dynamics, and function. Introduces tools from information theory, statistical inference, and the learning theory for the study of experience-dependent neural codes. Specific topics: computational principles of early sensory systems; adaptation and gain control in vision, dynamics of recurrent networks; feature selectivity in cortical circuits; memory; learning and synaptic plasticity; noise and chaos in neuronal systems.

Recommended Prep:

Basic knowledge of multivariate calculus, differential equations, linear algebra, and elementary probability theory.

Requirements:

Anti-Requisite: Cannot be taken for credit if MCB 131 already complete.

Additional Course Attributes:

Attribute	Value(s)

Neuroscience - Undergraduate 141

The Physics of Sensory Systems in Biology (207730)

Aravinthan Samuel

2018 Fall (4 Credits)

Schedule:

TR 0900 PM - 1015 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Living organisms use sensory systems to inform themselves of the sights, sounds, and smells of their surrounding environments. Sensory systems are physical measuring devices, and are therefore subject to certain limits imposed by physics. Here we will consider the physics of sensory measurement and perception, and study ways that biological systems have solved their underlying physical problems. We will discuss specific cases in vision, olfaction, and hearing from a physicist's point of view.

Requirements:

Prerequisite: MATH 21A and MATH 21B and cannot be taken for credit if PHYSICS 141 already complete.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Neuroscience - Undergraduate 143

Neurobiology of Vision and Blindness (207773)

Joshua Sanes

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Vision system fascinates biologists, in part because we are such visual animals. In fact, Americans regard blindness as the worst ailment they could get, fearing it more than Alzheimer's or AIDS. For these reasons, as well as because of its relative accessibility, the visual system is a favored model for studying neural circuitry, as well as for testing novel therapeutic approaches, such as gene therapy. This course will cover key topics in visual development, structure and function, and then use them as a basis for considering causes of blindness and potential cures.

Requirements: Anti-Req: Cannot be taken for credit if MCB 143 already complete.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Neuroscience - Undergraduate 170

Brain Invaders: Building and Breaking Barriers in the Nervous System (207770)

Laura M. Magnotti

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

The brain has evolved a unique but very effective system to protect itself from invaders. In this course, we will explore the specific defenses that the nervous system uses to protect itself. We will also examine how some pathogens evade or breach those defenses and the impact of those invasions. Finally, we will explore how scientists have been able to translate their understanding of these pathogenic mechanisms into technologies for research and therapeutic applications.

Requirements: Prerequisite: (LPS A OR LS 1a) AND (MCB 60 OR MCB 80 OR MCB 81) and cannot be taken for credit if MCB 170 already complete

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Neuroscience - Undergraduate 1401

Computational Cognitive Neuroscience: Building Models of the Brain (207732)

Samuel Gershman

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

"What I cannot create, I do not understand." This course applies Richard Feynman's dictum to the brain, by teaching students how to simulate brain function with computer programs. Special emphasis will be placed on how neurobiological mechanisms give rise to cognitive processes like learning, memory, attention, decision-making, and object perception. Students will learn how to understand experimental data through the lens of computational models, and ultimately how to build their own models.

Recommended Prep:

Students be comfortable with a numerical programming language (e.g., Python, Matlab, R). Psychology concentrators should have taken Science of Living Systems 20 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, Science of Living Systems 15, MCB 80 or MCB 81 before enrolling in this course; or permission of instructor.

Requirements:

Anti-Requisite: Cannot be taken for credit if PSY 1401 already complete.

Additional Course Attributes:

Independent Study (150200)

Tiffanie Ting

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Independent Study is designed to provide credit for field research, academic study not available in regular course work, or practice or performance in the arts. What distinguishes a suitable project is the application of analytical skills to the object of Independent Study. Any sophomore, junior, or senior whose previous record is satisfactory may petition to undertake Independent Study for non-letter-graded credit. Students may access the petition for Independent Study on the [Office of Undergraduate Education website](#).

Course Notes:

A student may petition to take up to a total of four, four-credit courses of Independent Study. Independent Study courses are subject to the same rules for dropping and withdrawing as any other course. The petition requires the signatures of a qualified adviser and the student's resident dean, as well as an outline of the student's proposed project. It must be submitted to the Allston Burr Resident Dean for approval, ordinarily in the first week of the term.

Katherine Zink

Carole Hooven

Ian Wallace

2018 Fall (4 Credits)

Schedule:

MWF 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Why is the human body the way that it is? This course explores human anatomy and physiology from an integrated framework, combining functional, comparative, and evolutionary perspectives on how organisms work. Major topics, which follow a life-course framework, include embryogenesis, metabolism and energetics, growth and development, movement and locomotion, food and digestion, stress and disease, and reproduction. Also considered is the relevance of human biology to contemporary issues in human health and biology.

Course Notes: This course replaces OEB 102. This course may not be taken Pass/Fail.

Class Notes: M/W/F at 12:00, and three hours of laboratory/discussion weekly.

Additional Course Attributes:

Peter Girguis

2018 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An integrated approach to the diversity of life, emphasizing how chemical, physical, genetic, ecological and

geologic processes contribute to the origin and maintenance of biological diversity. Topics to be covered include the evolution of metabolic pathways, multicellularity and structural complexity; causes and consequences of differences in diversity over space and time; the role of species interactions (including symbioses) as an evolutionary force; and the evolution of humans and their impact on the environment.

Course Notes: Knowledge of introductory molecular, cellular biology, and genetics is recommended. 2.5 hour mandatory sections and field trips.

Additional Course Attributes:

Organismic & Evolutionary Biol 11

Introduction to Tropical Biology (208258)

David Haig

Gonzalo Giribet

2019 Spring (4 Credits)

Schedule: F 0600 PM - 0715 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course will expose students to concepts of tropical biology and tropical biodiversity. A pre-semester three-week January, 2019, field trip to Australia is recommended. Pre-planning meetings will take place in the fall. Students will work in tropical rainforest and coral reefs, and will focus on the ecology, physiology and diversity of these ecosystems. Experts on tropical ecology, including rainforests and marine environments, and taxonomic experts will be involved.

Course Notes: Enrollment limited to 12 Integrative Biology Concentrators (sophomores given priority). OEB 10 is a prerequisite. Course recommends a 3-week field trip in January, 2019, at a tropical location in Australia. Students will partner with 12 students from The University of Sydney. The course is designed to be taught by faculty from Harvard and the University of Sydney.

Biology and Evolution of Invertebrate Animals (144597)

Gonzalo Giribet

Cassandra Extavour

2019 Spring (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

14

Introduction to invertebrate diversity, will cover the development, adult anatomy, biology and evolutionary relationships of the main animal phyla including sponges, mollusks, annelids and arthropods among others. Special emphasis is placed on understanding the broad diversity of animal forms and their

adaptations to different ecosystems and how these phenomena shape animal evolution. Lectures will be complemented with a mandatory weekly lab and a field trip to different areas of outstanding marine diversity in the Caribbean.

Course Notes: Field trip to the Caribbean for research during spring break.

Recommended Prep: LS1b, OEB 10, OEB 53 or permission of instructor required.
Lab component: Wednesdays, 3:00pm-6:00pm, Spring 2016

Biology of Plants (131579)

Elena Kramer

Noel Holbrook

2019 Spring (4 Credits)

Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

Introduction to the structure, diversity, and physiology of plants with an emphasis on evolutionary relationships and adaptations to life on land. Topics include growth, resource acquisition, interactions with other organisms (i.e., fungi, bacteria, insects), reproduction, and survival in extreme environments. Laboratory sessions provide an overview of plant diversity and an introduction to basic physiological processes.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Science of Living Systems.

Class Notes: One afternoon laboratory per week, plus occasional field trips.

Additional Course Attributes:

Attribute	Value(s)

Organismic & Evolutionary Biol 58

How to Build an Animal (204989)

Stephanie Pierce

Mansi Srivastava

2018 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 28

Ever wonder why you and other animals have eyes? What about teeth or even skin? "How to Build an Animal" answers your questions by exploring the wonders of animal biology. Each week, we consider a prominent feature of animal anatomy; study its variation in form and function; and how it's made during embryonic development. To facilitate student learning, each topic is accompanied by a 'hands-on' activity that illustrates the concepts discussed in the lecture. Further, the course introduces a number of scientific areas, including comparative anatomy, functional morphology, phylogenetics, genomics, and experimental

embryology. The overall goal is to provide a basic understanding of animal evolution and development and how these processes combine to shape the diversity of life on Earth.

Class Notes: This course is made up of a traditional lecture on Tuesday and a hands-on activity on Thursday, plus a Discussion section on Friday. The first class meeting will take place on Tuesday, September 4, in MCZ 101. Thursday activities will take place in BioLabs Room 5088.

Plant Systematics and Evolution (144583)

Charles Davis

2019 Spring (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

An introduction to the diversity and evolution of vascular plants. The course focuses mainly on flowering plants because of their dominant role on the earth, but lycophytes, ferns, and gymnosperms are studied as well. A phylogeny of vascular plants provides the framework for their evolution and diversification. Related subjects, including plant habitats, biogeography, phylogenetics, herbaria, nomenclature, and pollination biology are also presented in lecture and laboratory.

Course Notes:

There will be a weekly 3-4 hour lab on Friday morning or Thursday afternoon; time to be determined at first class meeting. There are two midterms, a final, and frequent lab quizzes. Included in the course will be a spring break field trip to eastern Brazil in the state of Bahia to study plant diversity in their natural setting.

Recommended Prep:

OEB 10 or permission of instructor.

The Mouse in Science and Society (161184)

Steven Niemi

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Mice remain the most popular vertebrates used in biomedical R&D today, with tens of millions of lab mice produced annually in the United States alone. At the same time, mice are commonly studied for their own characteristics that continue to enhance our knowledge about innate mammalian behavior, predator-prey dynamics in changing ecosystems, and reservoir hosts for emerging diseases, to name a few. This course intends to provide a strong foundation in mouse biology, both basic and applied, as well as exposure to cultural and political aspects of the current impact of mice (real or fictitious) on contemporary societal values. Instructors: Steven M. Niemi and Kathleen Pritchett-Corning.

Mansi Srivastava

Matthew Harris

Clifford Tabin

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A lecture course in evolutionary developmental biology. This course will focus on the molecular and cellular bases of how embryos generate adult body plans in order to understand how form, physiology, and life history strategies are modulated over the course of evolution. We will discuss insights from both invertebrate and vertebrate animal model systems as well as plants. We will investigate the forces driving change at both micro- and macro-evolutionary time scales. Particular emphasis will be placed on how changes in development underlie major evolutionary transitions and the origin of innovation in organismal evolution. The course will also emphasize learning of experimental design, molecular tools, and phylogenetic methods currently used by researchers in the field of evolutionary developmental biology.

Recommended Prep: Life Sciences 1a (or LPS A) and 1b, or permission of instructor. OEB 10, MCB 52, and MCB 54 are recommended but not required. Open to students from any concentration.

Behavior is inheritable and regulated by genes. This lecture course explores the causal links between the genes encoded in the genome and various behaviors, aiming to provide mechanistic understandings on how gene products control and influence behavioral outputs. The topics of the lectures cover both important findings as well as major research approaches in the field. The behavioral traits in discussion include olfaction, mechanosensation, foraging, circadian rhythm, aggression, courtship, sleep, social recognition, learning and memory, etc. The organisms that we will discuss include invertebrates,

vertebrates and humans. Life Science 1a.

Course Notes: The class will include a new 4-week lab component for research experience on genetic basis of behavior in Fall 2016.

Biology of Insects (142688)

Naomi Pierce

2018 Fall (4 Credits)

Schedule: WF 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

An introduction to the major groups of insects. The life history, morphology, physiology, and ecology of the main taxa are examined through a combination of lecture, lab, and field exercises. Topics include the phylogeny of terrestrial arthropods with a review of the extant orders, an analysis of abiotic and biotic factors regulating populations, including water balance, temperature, migration, parasitism, mutualism, sociality, insect/plant interactions, medical entomology, and the use of insects in biological control.

Course Notes: Permission of instructor.

Organismic & Evolutionary Biol 204R

Pre-Darwinian Evolutionary Thought (208148)

William Friedman

2019 Spring (4 Credits)

Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

The publication of *On the Origin of Species* in 1859 marked a major turning point in the understanding and broad acceptance of a non-miraculous evolutionary explanation of biodiversity. Yet, *Origin* was by no means the first publication on the topic of descent with modification. For more than a century before Charles Darwin published *Origin*, evolutionary ideas were being advanced, discussed, and keenly debated. This seminar will explore the birth and early development of evolutionary thought between 1748 (*Telliamed*, Benoît de Maillet) and 1859 (*Origin*). Among the roughly 50 pre-Darwinian evolutionists are a number of now largely forgotten natural historians, physicians, clergymen, atheists, philosophers, and poets. Central to the readings and discussions will be an analysis of how the worlds of botany, agricultural domestication history, comparative animal anatomy, and paleontology - as well as materialist views of the workings of the

universe - all played important roles in preparing the world for Charles Darwin's *magnum opus* (*Origin*), the most important book written in human history.

Class Notes: FIRST COURSE MEETING (JAN. 30) WILL TAKE PLACE IN H.U. HERBARIA, ROOM 125. All subsequent meetings will take place at the Arnold Arboretum - the Walnut Room in the Weld Hill Building.

Undergraduates are particularly encouraged to consider this course.

Organismic & Evolutionary Biol 206

Trait-Based Ecology (208268)

Paul Moorcroft

2019 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The past three decades has seen a dramatic increase in plant physiologists and ecologists amassing and analyzing measurements of plant physiological, biochemical and morphological properties. These studies have identified characteristic axes of co-variation in the leaf, stem and root properties of plants across different climates, including: the "leaf economics spectrum", the "stem economics spectrum", and "wood economics spectrum". Ecologists are now linking these repositories of information about the functional properties of plant species to measurements on the demography of plant populations (i.e. rates of plant growth, mortality and recruitment). In this course, we will explore this exciting new interface between plant physiology and ecology, and the insights it is providing about how plant form and function influences the distribution and abundance of plant species across environments.

Class Notes: For Spring 2019, actual class meeting end time will be 5:15 PM.

Recommended Prep: An introductory course in ecology

Organismic & Evolutionary Biol 207

The Fishy Aspects of the Human Body (211177)

Stephanie Pierce

2019 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Explore how the human body evolved through an analysis of the award-winning non-fiction book, *Your*

Inner Fish: A Journey into the 3.5 Billion-Year History of the Human Body, by evolutionary biologist Neil Shubin. We will read and discuss each chapter in turn and discover how different parts of the human body can be traced back to creatures that lived eons ago. By the end of the course students will gain a better appreciation for how all life on Earth is interrelated and how our own bodies are a result of millions of years of evolutionary history.

Course Notes: Undergraduates are particularly encouraged to consider this course. It provides a basic foundation in anatomy that would be applicable for many concentrations and career paths, such as IB, HEB, MCB, and human and veterinary medicine.

Organismic & Evolutionary Biol 277 Section: 01

Topics in Symbiosis: From Intracellular Symbioses to the Human Microbiome (146387)

Colleen Cavanaugh

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Symbiosis between microbes and eukaryotes is a globally important phenomenon that has powerful effects on the physiology, ecology, and evolution of all living organisms and is a source of biological innovation. An outstanding example is that of mitochondria and chloroplasts, eukaryotic organelles arising from bacteria that became established within primitive single-cell organisms 1-2 billion years ago. Microbial symbioses expand the potential ecological niches and metabolic capabilities of the host-symbiont combinations, playing essential roles in ecosystem processes, evolution of new species, agriculture, and human health. Symbiosis has evolutionary potential in that the partnership can result in a "new organism", charging us to think about biodiversity on a different level.

Within the last decade, it has become evident that the human microbiome, collectively the communities of microorganisms that live on and in us, is intimately connected with human health and disease. With colonization at birth and developing throughout our lives, our microbiome plays a role in human nutrition and development, immunity and protection from pathogens, and is implicated in numerous diseases including obesity, inflammatory bowel disease, and mental disorders. These discoveries have prompted exciting new research areas focused on exploring the microbiome both in health and with the goal of eventually managing and curing related diseases.

This course will provide a broader understanding of microbial symbioses ranging from intimate associations (e.g., intracellular microbes) to the human microbiome in the context of ecology and evolution. The book I Contain Multitudes by Ed Yong will serve as backdrop for the course combined with critical review and discussion of current research. Discussions and presentations will draw heavily from

the primary literature, focusing on recent discoveries in the field.

The course is open to graduate students and to interested upper-level undergraduates who have taken courses or conducted research in microbial sciences, and/or obtain permission from the instructor.

Recommended Prep: Life Sciences 1a, 1b, OEB 10 or equivalent, course(s) in microbial science, or permission of instructor.

Microbial Sciences: Chemistry, Ecology and Evolution (124109)

Michael Gilmore

2019 Spring (4 Credits)

Schedule:

F 0845 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

This is an interdisciplinary graduate-level and advanced undergraduate-level course in which students explore topics in molecular microbiology, microbial diversity, and microbially-mediated geochemistry in depth. This course will be taught by faculty from the Microbial Sciences Initiative. Topics include the origins of life, biogeochemical cycles, microbial diversity, and ecology. Course will limit enrollment to 20 students.

Course Notes: Also offered as Microbiology 210.

Recommended Prep: For advanced undergraduates, Life Sciences 1a and 1b are required, or

permission of instructor. MCB 52 is recommended.

The True and the Good (111175)

Bernhard Nickel

2018 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How you live your life is not just a matter of taste. The basic outlook of value and perspective that each of us adopts as we make decisions large and small are more than mere opinion. They are commitments that are open to deeper understanding and critique. This course introduces you to the practice of such critique and prepares you for its demands. It introduces you to the practice of philosophy. Issues include the nature of knowledge, of the mind and self, and of right and wrong. We'll also consider race and gender in relation to these philosophical topics. We will pursue these issues by considering both traditional philosophical writers, such as Plato, Descartes, Locke, Kant, and Mill, as well as contemporary writers. Because this course is concerned with the students' active engagement with the material they encounter, this class will be taught in a highly interactive format. No prerequisites

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief.

Philosophy 6

Ancient Ethics and Modern Morality (133181)

James Doyle

2019 Spring (4 Credits)

Schedule:

MWF 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An historical introduction to ethics, from the Greeks to, roughly, now. We begin with the concept of virtue in Homer and trace its development through Socrates, Plato, Aristotle, the Stoics and Aquinas. In the modern period we look, in a somewhat skeptical spirit, at the rise of the 'moral' as a supposedly sui generis category of reasons, traits, obligations etc, as this is found in Hume, Kant, Mill and others.

Introduction to Ancient Philosophy (114416)

Katherine Chambers

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

The philosophy of ancient Greece forms the cornerstone of Western intellectual thought and culture. This course will survey themes in ancient Greek philosophy from the works of three major figures: Socrates, Plato and Aristotle. We will look at their views about how humans should act, the nature of the soul, what the world is like, and how we can have knowledge. In this course we will pay special attention to the arguments given by these philosophers for their views. The goal of the course is not to learn about Greek philosophy; the goal is to learn how to do philosophy. Like the Greeks, our inquiry will be aimed at finding the truth, and we will critically engage with the arguments given by the Greek philosophers to help us get there.

Philosophy of Law (156186)

Emilio Mora

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Is there a standing duty to obey the law? What is the relation between law and morality? How should judges interpret the constitution? Does the practice of judicial review compromise democratic values? When and in what manner may the state interfere with the conduct of its citizens? We will discuss these and other questions in this survey course on the philosophy of law. Significant attention will be devoted to questions that lie at the intersection of legal and political philosophy. The final part of the course will be determined in consultation with course participants and will be devoted to philosophical puzzles arising in the law.

Ethics of a Human Life (000012)

Katherine Chambers

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Ethical questions arise at every stage of a human life, from before a person is born until after she dies. We will explore the ethical questions that arise at familiar stages of a person's life: her conception, childhood, adulthood, death, and after her death. For example, is it bad to be born, to be a child, or to grow old? Why do we love some people and not others? What does it mean to get married? Does it matter what happens to us after we die? We will consider some surprising ways philosophers have tried to answer these questions, and we will think about how the arguments they make can help us better understand the ethical shape of a human life as a whole.

Enrollment Cap:

62

Should we pursue happiness, and if so, what is the best way to do it? This course will critically assess the answers to these questions given by thinkers from a wide variety of different places, cultures, and times, including Stoicism, Epicureanism, Buddhism, Daoism, and contemporary philosophy, psychology, and economics.

Class Notes: The course will be capped at 62. Interested students should attend the first meeting of the course. Priority will be given to students who decide by 7 PM on January 29 that they will enroll in the course, if given a spot. Priority will also be given to students according to their availability during the tentative course section times (these are: Tuesday 5-6, Tuesday 6-7, Wednesday 3-4, and Wednesday 4-5). (Those with more availability will have priority. E.g. a student who is available during two of these times will have priority over a student who is available during only one of them.) To join the lottery, go to the course website and fill out the relevant google form (under "Announcements.").

Ethics of Climate Change (205079)

Lucas Stanczyk

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How should governments respond to the problem of climate change? What should happen to the level of greenhouse gas emissions and how quickly? How much can the present generation be expected to sacrifice to improve conditions for future generations? How should the costs of mitigation and adaptation be apportioned between countries? Should significant funds be allocated to the study of geo-engineering? We will consider these and other questions in an effort to understand our responsibilities in respect of climate change, with a special focus on the structure of the analytical frameworks that have been dominant among policymakers.

Class Notes: This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

Ethical Issues in Social, Cultural, and Artistic Representation (000033)

Emilio Mora

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this course we will examine a range of issues which we might, very loosely, term questions of social, cultural, and artistic representation. For instance, the construction, deployment, and celebration of historical narratives are a familiar part of the political pageantry in the life of nations. What are the ethical constraints and imperatives relating to the representation of these national histories? How do these injunctions relate to present political norms of equality and inclusivity and the demands of social cohesion? Consider, also, representational questions that arise in relation to norms of social interaction. What, for instance, might be considered wrong with cultural appropriation? When is it wrong to allow social stereotypes to inform one's interpersonal interactions, and should this wrong be understood in primarily moral or epistemological terms? Finally, consider ethical issues relating to our engagement with (construed broadly) artistic representations. How can we ethically enjoy tragedy? On the face of things it would appear paradoxical or else the mark of a sadist. Are pornographic representations of immoral acts wrong to consume and enjoy? Are there any special ethical constraints on what may be represented in a video game? Can we ethically represent the Holocaust in any artistic medium? Can we continue to enjoy the products of artists who have engaged in immoral actions? Although we should not expect a set of master principles to govern this range of topics, we might realistically hope that the answers we give, and the philosophical difficulties we encounter in any one topic will help illuminate our treatment and investigation of the others.

Existentialism in Literature and Film (109600)

Sean Kelly

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What is it to be a human being? How can human beings live meaningful lives? These questions guide our discussion of theistic and atheistic existentialism and their manifestations in literature and film. Material includes philosophical texts from Pascal, Kierkegaard, Nietzsche, Sartre; literature from Dostoevsky, Kafka, Beckett; films from Jean-Luc Godard, Alain Resnais, Carol Reed.

Aristotle's Theoretical Philosophy (112252)

Jacob Rosen

2019 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

According to Aristotle's classification, philosophy is 'theoretical' if it concerns things we wish to know simply for the sake of knowing, not for the sake of doing or making anything. This course will be a close reading of selected passages from Aristotle's works of theoretical philosophy, especially his *Physics*, *On the Soul*, *Metaphysics*, and his logical works. We'll build up an understanding of his overall world picture, according to which the cosmos is eternal, finite in size, harmoniously ordered, and characterized by natural teleology (that's to say, things naturally are as they are for the sake of what is good). Above all, we will seek to understand the key concepts that Aristotle bequeathed to theoretical philosophy, such as substance, accident, essence, potentiality, necessity, and priority.

Augustine (Proseminar) (203453)

James Doyle

2018 Fall (4 Credits)

Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

Introduction to the life and thought of Augustine of Hippo (354-430), the last great philosopher of antiquity and the first great philosophical expositor of Christianity. The primary focus will be on his spiritual autobiography, *Confessions*. Topics covered will include the existence and nature of God, the problem of evil, the influence of Plotinus and other neoplatonists, the ideas of divine illumination and an 'inner realm', the relation between belief and the will, Augustine's ethical and political thought and his influence on Malebranche, Descartes, Wittgenstein and others.

British Empiricism (114331)

Alison Simmons

2019 Spring (4 Credits)

Schedule: MW 0900 AM - 1015 AM**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

The canonical British Empiricists (Locke, Berkeley, and Hume) take us on a journey from very sensible philosophical starting points to rather extravagant sounding philosophical conclusions. We will explore their influential arguments concerning such things as the self, the external world, mind and body, natural kinds, concepts, language, science, skepticism, and the role of philosophy itself. We will also explore Lady Mary Shephard's attempt to pull us back from the philosophical brink that the Empiricists lead us to.

Kant's Critique of Pure Reason (117823)

Samantha Matherne

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

In this course, we will work through Immanuel Kant's *Critique of Pure Reason* (1781/87). In analyzing this text, we will explore the account of metaphysics, epistemology, and philosophy of mind that Kant defends. More specifically, we will address the negative aspects of his project, including his criticisms of rationalism and empiricism. We will also examine his positive views regarding the nature of the mind, the nature of experience, the metaphysics of transcendental idealism, and the foundations of mathematics and natural science. At the end of the course we will consider the limits and prospects of Kant's critical project. In the former vein, we will discuss concerns pertaining to Kant's view on race. In the latter vein, we will address Kant's hope of building a system of nature and freedom.

Phenomenology of Lived Experience (000136)

Samantha Matherne

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

In this course, we will explore phenomenological approaches to lived experience, i.e., the experience we have, as embodied beings, who are embedded in a world and entangled with others. We will begin by looking at treatments of the phenomenology of lived experience in general in texts by Franz Brentano, Edmund Husserl, Martin Heidegger, and Maurice Merleau-Ponty. We will then address attempts to work out the phenomenology of specific modes of lived experience in Simone de Beauvoir's *The Second Sex*, Frantz Fanon's *Black Skin, White Masks*, Emilio Uranga's "Essay on an Ontology of the Mexican," and Sara Ahmed's "Orientations: Towards a Queer Phenomenology."

Heidegger's Being and Time (000138)

Sean Kelly

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A close reading of Martin Heidegger's *Being and Time*. Topics from Division I of the book include: In what sense, and on the basis of what, is the world we inhabit intelligible? In what sense do we inhabit such an intelligible world? And what, after all, is the relation between what is and what we understand there to be? Division II of the book addresses existential issues such as: death, guilt, authenticity, history, and temporality. We aim to read the entire book.

Philosophy 145

Modal Logic (156023)

Mark Richard

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Modal logic in the first instance is the study of the logical properties of modal words like 'must', 'may', 'necessarily', and 'possibly'. The standard way of explaining the meanings of modal idioms like 'necessarily' --in terms of "truth at a possible world" --has been taken over by many linguists as a tool to analyze meaning in natural language (so-called 'possible worlds semantics'). It has also been used to study the nature of provability in formal systems, to analyze programs in computer science, and to model temporal processes.

This course is first and foremost a course in logic, but one that attends to modal logic's uses in philosophy and the study of language. One of the goals of the course is to introduce you to doing metatheory--proving things like completeness and soundness for logical systems. We also look in some detail some applications of modal logic and its semantics, discussing such things as: semantics for counterfactual conditionals; mutual knowledge and conversational context; the use of modal logic to model such things as computer programs and non-standard (e.g., intuitionistic) mathematical systems.

The course does not suppose that you know any logic. We do move pretty fast through elementary logic; you may find the course challenging unless you have taken and remember some of an elementary logic course like EMR17. Grades will be determined by: class attendance, four to six problem sets, a take home final. The primary text for the course is Hughes and Cresswell, *A New Introduction to Modal Logic* (Routledge).

Foundations of Space-Time Theories (000149)

Peter Koellner

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Space and time have always seemed rather mysterious. Yet space and time are ubiquitous in that the events of everyday life and physics are described within the framework of space and time. What exactly is this framework? Is it merely conventional or does it capture a fundamental feature of reality? What is the relationship between space and time? Are they independent of one another? Are they intertwined? Are they fixed? Can they be manipulated? In this course we will try to get clear on such questions by tracing the historical development from the time of Newton to the present, while also employing tools of modern geometry to sharpen the fundamental notions and the central questions. Some of the main spacetimes we shall see along the way are: Newtonian Spacetime (the spacetime associated with everyday common sense), Minkowskian Spacetime (the spacetime of special relativity, where space and time are intertwined), and Einsteinian Spacetime (the spacetime of general relativity, where space and time can be warped and manipulated). We will see that our understanding of spacetime has undergone radical transformations, that there has been a great deal of progress in our understanding, and we shall get into some of the more fascinating issues that arise with our contemporary understanding, issues involving black holes, singularities, time travel, and other spacetime anomalies.

Prerequisites: An introductory course in linear algebra and calculus.

Reproductive Ethics--Whose Body is it, anyway?: Proseminar (000171)

Katherine Chambers

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

We are generally prohibited from acting on the bodies of other persons. I cannot decide for you what food you will put in your body, what exercise (if any) you will do, what color you will dye your hair, or whether you will have corrective eye surgery. However, parents are generally allowed to act on the bodies of their children: they feed them, change their diapers, cut their hair, make them play sports, make major medical decisions, etc. Reproductive technology has now made it possible for parents to shape their children's bodies by creating children with specific physical traits. In this seminar, we will explore the limits of parental permission to shape the bodies of their future children. We will ask the question: whose body is it anyway? We will consider questions like the following: Is there a moral difference between making a child wear glasses and selecting for a child with good eyesight? Should parents be permitted to select for disability? Do parents have an obligation to enhance their children's physical or mental capacities? We will consider how thinking about the obligations parents have to their existing children bears on what prospective parents owe their future children.

The Wisdom of Work: Proseminar (000175)

Jeffrey Hanson

2019 Spring (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

Human beings spend much of their waking lives at work. We invest much of our early lives and education thinking about and preparing for work, and as adults we regard the quality of our work as highly important. Yet we rarely reflect on what work even is or what role it can or should play in a fulfilling existence. Particularly since technological and economic changes seem to portend a future of radically different possibilities for work, questions related to the meaning of labor are receiving increased attention. Does work have a place in a philosophically and spiritually informed life? How does work relate to its ostensible opposite, leisure? Does work contribute to or distract from the highest human purposes? This course will consider contemporary questions like these in light of the tradition of Western philosophical reflection. The course will consider the foundational perspectives of Plato and Aristotle on work and leisure as well as the contributions of Augustine and Aquinas. Readings from a host of modern thinkers will be drawn from thinkers as diverse as Martin Luther, John Locke, Karl Marx, Simone Weil and Hannah Arendt.

Groups and Political Philosophy: Proseminar (000176)

Emilio Mora

2019 Spring (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

In this course we will be examining the role and significance of groups (social, cultural, and institutional) in various areas of political philosophy. Although we will consider a variety of issues we will concentrate on two principal topics. Firstly, we will consider the significance of groups in relation to the claims and demands of social and political justice. Should social groups be thought to have a fundamental normative significance in political philosophy or must we reduce all political claims and interests to the claims and interests of individuals? What is the significance of social groups to questions of distributive justice? What sort of social groups are relevant to questions of distributive justice and why are they relevant? Are there group membership rights? What is the nature and foundation of these rights, and do these rights conflict with liberal political thought? The second dimension of the course concerns the significance of groups as subjects to the demands of justice. Is it only the political community, taken as a group, that is answerable to fundamental principles of social justice, or do these principles also govern the individual conduct of a political community's members? Do national groups bear responsibility as a group for what the group does? Can social groups in a society be deemed collectively responsible for certain social and political outcomes? What is the nature and mechanism of this group responsibility? Finally, we will consider the moral status and responsibilities of corporate 'group agents'.

Philosophy 177I

Historical Injustice: Proseminar (218177)

Emilio Mora

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

30

What is the moral and political significance of past injustice in the history of a political community? In a variety of national contexts, the redress of historical injustice has struck many as both a legitimate and urgent political cause. Others argue that, since both the original victims and perpetrators of historical injustices are dead, there are no persons who have valid claims against these historical episodes nor, at any rate, are there any individuals who can be rightly held responsible for injustices that predate their existence. This course examines the underlying philosophical questions that underpin and sustain these disagreements, focusing on the issues of Injury, Responsibility, and Justice. In the first topic, we examine a number of accounts characterizing the nature, and defending the legitimacy, of historical injustice

claimants as well as the main lines of objection to these claims. In the second topic we examine questions of responsibility. Which contemporary parties, if any, can be held responsible for the effects of historical injustice, and what is the basis and nature of their responsibility? In the final topic, we examine some of the questions and difficulties regarding the administration of a scheme of historical rectification, and we will seek to understand the relation of historical rectification to the project of social justice more generally. Would historical injustice claims be made redundant or otherwise be addressed by the implementation of an egalitarian scheme of distributive justice for all? Conversely, do historical injustices give rise to social and political complaints that must be specifically addressed by a scheme of historical rectification?

Philosophy and Literature: Proust (127792)

Richard Moran

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course will attempt to achieve a sense of Proust's great novel, *In Search of Lost Time*, as a whole, necessarily in an abbreviated form, but with the aim of tracing the plan that Proust worked out when he began the project. The bulk of the reading will be in Proust's text, but there will be regular secondary readings in philosophy and in the critical literature on Proust. Philosophical themes to be emphasized will include: the nature of subjectivity and the problem of other minds, the strategies of solipsistic desire, freedom and dependence, *amour-propre* and the desire for approbation, the nature and limits of the will (including 'involuntary memory'), personal identity and artistic vocation, the will to knowledge and self-deception.

Kant's Theory of the Imagination (000229)

Samantha Matherne

2019 Spring (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

In this course, we will explore the role the imagination plays in Immanuel Kant's philosophical system, including his account of perception, cognition, beauty, sublimity, metaphysics, and morality. We will look at major works from the Critical period, including the *Critique of Pure Reason* (1781/87) and the *Critique of the Power of Judgment* (1790), as well as his lectures on anthropology and metaphysics from the 1770s and 80s, "What Does it Mean to Orient Oneself in Thinking" (1786), *Religion within the Bounds of Mere Reason* (1793), and the *Anthropology from a Pragmatic Point of View* (1798). Our goal will be to see whether Kant defends a unified theory of imagination across these various texts.

Topics in Philosophy of Language (114439)

Mark Richard

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Propositions are supposed to be the primary bearers of truth and falsity as well as the objects of psychological and illocutionary states such as belief, fear, desire, assertion, promising, etc. A standard view of meaning has it that a sentence's meaning should be theorized in terms of propositions, with the meaning of sentence S a rule that determines the proposition expressed by a use of S.

In this seminar we will look at historically important and contemporary work on the notion of a proposition in philosophy and semantics. Topics discussed may include: debates about the nature of and the need for propositions; debates about the nature of propositional attitudes and the extent to which they are or are not tied to language; debates about 'fineness of grain' of propositions.

You don't need a background in philosophy of language to take this course. But it is intended for graduate students in philosophy, and so philosophical sophistication is expected; students from other disciplines should consult with the instructor before taking the course.

Course requirements are: active participation in class, a class presentation, and a final paper. We will meet once a week for about two and a half hours.

Enrollment Cap:

30

This seminar will examine classic and recent philosophical theories of punishment with a focus on incarceration. We'll critically discuss justifications of punishment based on deterrence, retribution, fairness, forfeiture, consent, public censure, and moral education. We'll also examine the moral considerations for and against rehabilitation and incapacitation through incarceration. Considerable

attention will be given to assessing the case for the abolition of prison as a form of punishment.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

FAS: Course Level	Graduate Course

Philosophy 333 Section: 003

Preparation for the Topical Examination (111147)

Warren Goldfarb

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333 Section: 004

Preparation for the Topical Examination (111147)

Ned Hall

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Required in both fall and spring terms of all third-year graduate students in the Department.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Philosophy 333 Section: 005

Preparation for the Topical Examination (111147)

Russell Jones

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Philosophy 333 Section: 007

Preparation for the Topical Examination (111147)

Sean Kelly

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Philosophy 333 Section: 008

Preparation for the Topical Examination (111147)

Peter Koellner

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Philosophy 333 Section: 009

Preparation for the Topical Examination (111147)

Christine Korsgaard

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Philosophy 333 Section: 010

Preparation for the Topical Examination (111147)

Warren Goldfarb

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333 Section: 010

Preparation for the Topical Examination (111147)

Jeffrey McDonough

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Philosophy 333 Section: 011

Preparation for the Topical Examination (111147)

Richard Moran

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Philosophy 333 Section: 012

Preparation for the Topical Examination (111147)

Bernhard Nickel

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Philosophy 333 Section: 013

Preparation for the Topical Examination (111147)

Mark Richard

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.**

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Philosophy 333 Section: 014

Preparation for the Topical Examination (111147)

Susanna Rinard

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Philosophy 333 Section: 015

Preparation for the Topical Examination (111147)

Jacob Rosen

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Philosophy 333 Section: 016

Preparation for the Topical Examination (111147)

Thomas M. Scanlon

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333 Section: 017

Preparation for the Topical Examination (111147)

Amartya Sen

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Philosophy 333 Section: 018

Preparation for the Topical Examination (111147)

Tommie Shelby

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Philosophy 333 Section: 019

Preparation for the Topical Examination (111147)

Susanna C. Siegel

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Philosophy 333 Section: 020

Preparation for the Topical Examination (111147)

Ned Hall

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333 Section: 020

Preparation for the Topical Examination (111147)

Alison Simmons

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333 Section: 021

Preparation for the Topical Examination (111147)

W. Hugh Woodin

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Philosophy 333 Section: 022

Preparation for the Topical Examination (111147)

Regina Schouten

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Philosophy 333 Section: 023

Preparation for the Topical Examination (111147)

Lucas Stanczyk

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Philosophy 333 Section: 030

Preparation for the Topical Examination (111147)

Russell Jones

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Philosophy 333 Section: 040

Preparation for the Topical Examination (111147)

Frances Kamm

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Required in both fall and spring terms of all third-year graduate students in the Department.****Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Philosophy 333 Section: 050

Preparation for the Topical Examination (111147)

Sean Kelly

Physics

Subject: Physics

Physics 15A

Introductory Mechanics and Relativity (111164)

Julia Mundy

Keith Zengel

Carey Witkov

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Newtonian mechanics and special relativity. Topics include vectors; kinematics in three dimensions; Newton's laws; force, work, power; conservative forces, potential energy; momentum, collisions; rotational motion, angular momentum, torque; static equilibrium, oscillations, simple harmonic motions; gravitation, planetary motion; fluids; special relativity.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15a. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester.

Recommended Prep:

Mathematics preparation at least at the level of Mathematics 1b concurrently is required. However, some elementary ideas from multivariable calculus may be used and students are encouraged to take Mathematics 21a concurrently.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Science of the Physical Universe

Physics 15B

Introductory Electromagnetism and Statistical Physics (111896)

Philip Kim

Robert Westervelt

Carey Witkov

Keith Zengel

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Electricity and magnetism. Topics include electrostatics, electric currents, magnetic field, electromagnetic induction, Maxwell's equations, electromagnetic radiation, magnetic fields in materials, and some basic notions in kinetic theory, entropy, temperature, and phase transition associated with electricity and magnetism.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15b. Students use creative problem-solving in applying theoretical topics to explore physical phenomena and design real life applications. Topics include experimental design, model testing, error analysis, basic programming, introductory circuit analysis, and practical applications of electromagnetism. PSI will meet weekly throughout the semester.

Recommended Prep: Physics 15a, Physics 16, or written permission of the Head Tutor in Physics. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Vector calculus, (div, grad and curl) are used extensively--in principle, this is taught in the course. Students

taking Mathematics 21a concurrently will likely find that some concepts are introduced in Physics 15b before they have seen them in Mathematics 21a. Some students may wish to postpone Physics 15b until they have completed Mathematics 21a.

Additional Course Attributes:

Physics 15C

Wave Phenomena (124154)

John Huth

Mara Prentiss

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Forced oscillation and resonance; coupled oscillators and normal modes; Fourier series; Electromagnetic waves, radiation, longitudinal oscillations, sound; traveling waves; signals, wave packets and group velocity; two- and three-dimensional waves; polarization; geometrical and physical optics; interference and diffraction. Optional topics: Water waves, holography, x-ray crystallography, solitons, music, quantum mechanics, and waves in the early universe.

Course Notes:

Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 15c. Topics include experimental design, model testing, error analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester.

Recommended Prep:

Physics 15a, Physics 15b, or written permission of the Head Tutor in Physics. Mathematics preparation at least at the level of Mathematics 21b taken concurrently is required. Some prior knowledge of complex numbers (for example as taught in Mathematics 1b) is helpful. Linear algebra and differential equations are used extensively. Students taking Mathematics 21b concurrently will likely find that some concepts are introduced in Physics 15c before they have seen them in Mathematics 21b. Some students may wish to postpone Physics 15c until they have completed Mathematics 21b.

Physics 16

Mechanics and Special Relativity (111197)

Howard Georgi

Amir Yacoby

Carey Witkov

Keith Zengel

2018 Fall (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

Newtonian mechanics and special relativity for students with good preparation in physics and mathematics at the level of the advanced placement curriculum. Topics include oscillators damped and driven and resonance (how to rock your car out of a snow bank or use a swing), an introduction to Lagrangian mechanics and optimization, symmetries and Noether's theorem, special relativity, collisions and scattering, rotational motion, angular momentum, torque, the moment of inertia tensor (dynamic balance), gravitation, planetary motion and a little glimpse of quantum mechanics.

Course Notes: Principles of Scientific Inquiry (PSI) is the laboratory component of Physics 16. Topics include experimental design, model testing, error

analysis, basic programming, oral presentations, and scientific writing. PSI will meet weekly throughout the semester. Emphasis is placed on collaborative teaching and learning. Many class materials are Mathematics notebooks.

Recommended Prep:

Score of 5 on the mechanics section of the Physics C Advanced Placement exam, or equivalent. Mathematics preparation at least at the level of Mathematics 21a taken concurrently is required. Thorough knowledge of calculus of one variable and vectors plus some mathematical sophistication. The mathematical level will be significantly higher than that of Physics 15a. If in doubt, check the Canvas site ahead of time, or email the professor at hgeorgi@fas.harvard.edu, or just shop.

Physics 90R

Supervised Research (111672)

David Morin

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Primarily for selected concentrators in Physics, or in Chemistry and Physics, who have obtained honor grades in Physics 15 and a number of intermediate-level courses. The student must be accepted by some member of the faculty doing research in the student's field of interest. The form of the research depends on the student's interest and experience, the nature of the particular field of physics, and facilities and support available. Students wishing to write a senior thesis can do so by arranging for a sponsor and enrolling in this course.

Course Notes:

A list of possible faculty sponsors and their fields is available in Lyman 238 and on the Physics Department Web page. Course enrollment forms may be obtained from Lyman 238.

Class Notes:

David Morin and members of the Department

Additional Course Attributes:

Physics 95

Topics in Current Research (111967)

Eric Mazur

2018 Fall (4 Credits)

Schedule:

W 0715 PM - 0845 PM

M 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The goal of this tutorial is twofold. First, students will learn about a range of modern physics research topics from experts at Harvard as well as from one another. Every Wednesday evening a faculty member speaks on his/her area of research, preceded by assigned reading and a student presentation designed to introduce the basic physics, as well as important developments and burning problems at the frontiers of that particular research area. Second, the tutorial provides structured activities to help students develop practical skills for their future careers, expanding knowledge on unfamiliar subjects, participating in discussions, presenting and writing clearly about complex topics, and engaging in self and peer evaluation.

Course Notes:

Primarily for junior and senior concentrators, however interested sophomores are welcome.

Class Notes:

The course meets Monday afternoons, 3:00pm - 4:15pm, and Wednesdays, 7:00 pm - 8:59 pm.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 101

Foundations of Theoretical Physics (207005)

2019 Spring (4 Credits)

Schedule:

MWF 0300 PM - 0415 PM

Instructor Permissions: Instructor**Enrollment Cap:**

40

A comprehensive, fast-paced introduction to the conceptual and mathematical foundations of modern theoretical physics that starts from the very beginning of the subject, with an integrated, first-principles approach to its five main areas: analytical dynamics, statistical mechanics, relativity, fields, and quantum theory. Examples will be drawn from many areas of physics, including Newtonian mechanics, electromagnetism, particle physics, general relativity, and quantum information. In-class discussions will frequently address the history and philosophy of physics, as well as the conceptual implications of our modern physical theories for making sense of the world around us.

Course Notes:

The course is intended for students from a variety of backgrounds, including those who are considering pursuing advanced study of physics in the concentration as well as those who are unsure. The course is also meant for undergraduate and graduate students in other fields of study—such as pure or applied math, astronomy, biology, chemistry, computer science, history, and philosophy—who are interested in developing a better understanding of the modern foundations of theoretical physics either to serve the needs of their own academic work or as a first step toward switching their area of study to physics. Cooperation and diversity strengthen our academic community, so the course prioritizes collaboration and will aim to provide a welcoming and inclusive environment for students with diverse identities and backgrounds. The instructor will help students form study groups as needed.

Recommended Prep:

The course assumes a knowledge of single-variable differential and integral calculus, as well as a high comfort level with abstract concepts, but does not assume previous coursework in physics. The course is therefore appropriate both for students who have taken the Physics 15/16 sequence as well as those who have not. The course will cover relevant topics from undergraduate physics, vector calculus, linear algebra, complex analysis, and other areas of mathematics as needed, so a familiarity with these subjects, while helpful, is not required.

Physics 123

Laboratory Electronics (124108)

Thomas Hayes

David Abrams

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

A lab-intensive introduction to electronic circuit design. Develops circuit intuition and debugging skills

through daily hands-on lab exercises, each preceded by class discussion, with minimal use of mathematics and physics. Moves quickly from passive circuits, to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters. The digital half of the course treats analog-digital interfacing, emphasizes the use of microcontrollers and programmable logic devices (PLDs).

Course Notes: Physics 123 is the same course as Physics 223; if you are a graduate student, please enroll in 223. Limited to 20 students. Physics 123 is also offered as Engineering Sciences 153. Students may not take both for credit. Undergraduate engineering students should enroll in Engineering Sciences 153.

Class Notes: Please note that Physics 123 is also offered on Wednesdays and Fridays, 1:30pm to 5:45pm. If you'd rather sign up for the Wednesday/Friday section, please find class number: 19768.

Widely Applied Physics (120167)

David Morin

2019 Spring (4 Credits)

Schedule:

WF 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Uses physics to analyze important technologies and real world systems. Stresses estimation and "back of the envelope" calculations, as are commonly used by research physicists when addressing new problems and analyzing national and international policy issues. New physical concepts are introduced as necessary. Example topics: energy production and storage (solar, nuclear, batteries), nuclear physics, power and weapons, airplanes, spy satellites, rockets, fluids, health effects of radiation, risk analysis, mechanical design and failure, communication, computation, global warming, and cosmology. Emphasis is on developing physical intuition and the ability to do order-of-magnitude calculations.

Recommended Prep: Physics 15a, b, c, and mathematics at the level of Mathematics 21a.
Physics 143a and 181 are very helpful, and may be taken concurrently.

Additional Course Attributes:

Physics 141

The Physics of Sensory Systems in Biology (121885)

Aravinthan Samuel

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Living organisms use sensory systems to inform themselves of the sights, sounds, and smells of their surrounding environments. Sensory systems are physical measuring devices, and are therefore subject to certain limits imposed by physics. Here we will consider the physics of sensory measurement and perception, and study ways that biological systems have solved their underlying physical problems. We will discuss specific cases in vision, olfaction, and hearing from a physicist's point of view.

Recommended Prep: Math 21a,b, Physics 12 or 15, or by permission of the instructor.

Requirements: **Anti-Requisite:** Cannot be taken for credit if NEURO 141 already complete.

FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 143A

Quantum Mechanics I (108465)

Masahiro Morii

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to nonrelativistic quantum mechanics: uncertainty relations; Schrödinger equation; Dirac notation; matrix mechanics; one-dimensional problems including particle in box, tunneling, and harmonic oscillator; angular momentum, hydrogen atom, spin, Pauli principle; and if time allows: time-independent perturbation theory; and scattering.

Recommended Prep: Linear algebra including matrix diagonalization; Physics 15c or written

permission of the Head Tutor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam

Physics 143A

Quantum Mechanics I (108465)

Louis Deslauriers

Subir Sachdev

2018 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Physics 143B

Quantum Mechanics II (111731)

Daniel Jafferis

2018 Fall (4 Credits)

Schedule: WF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Introduction to path integrals, identical particles, many-electron theory, WKB approximation, time-dependent perturbation theory, scattering theory, and relativistic quantum mechanics.

Class Notes: Weekly section to be arranged.

Recommended Prep: Physics 143a.

Additional Course Attributes:

Attribute	Value(s)

FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS: Final Assessment Category	Three-hour Exam

Physics 145

Elementary Particle Physics (117719)

Roxanne Guenette

2018 Fall (4 Credits)

Schedule:

WF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to elementary particle physics. Emphasis on concepts and phenomenology rather than on detailed calculational development of theories. Starts with the discovery of the electron in 1897 and ends with the theoretical motivations for the Higgs boson, and attempts to cover everything important in between. Students will also have a brief experience of particle physics research using Atlas experiment open data.

Recommended Prep: Physics 143a. Physics 143b or equivalent is useful.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Physics 151

Mechanics (111231)

Arthur Jaffe

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Fundamental ideas of classical mechanics including contact with modern work and applications. Topics include Lagrange's equations, the role of variational principles, symmetry and conservation laws, Hamilton's equations, Hamilton-Jacobi theory and phase space dynamics. Applications to celestial mechanics, quantum mechanics, the theory of small oscillations and classical fields, and nonlinear oscillations, including chaotic systems presented.

Recommended Prep: Physics 15a, 15b or written permission of the Head Tutor; Mathematics 21a, b or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Physics 153

Electrodynamics (111822)

Mikhail Lukin

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Aimed at advanced undergraduates. Emphasis on the properties and sources of the electromagnetic fields and on the wave aspects of the fields. Course starts with electrostatics and subsequently develops the Maxwell equations. Topics: electrostatics, dielectrics, magnetostatics, electrodynamics, radiation, wave propagation in various media, wave optics, diffraction and interference. A number of applications of electrodynamics and optics in modern physics are discussed.

Recommended Prep: Physics 15a, b, and c, or written permission of the Head Tutor; Mathematics 21a, b or equivalent.

Physics 181

Statistical Mechanics and Thermodynamics (143450)

Matthew Schwartz

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course provides an introduction to statistical mechanics and thermal physics. It surveys the fundamental elements of classical and quantum statistical mechanics (ensembles and partition functions) and thermodynamics (temperature, heat, work, free energy) and their application to a variety of physical systems. Topics covered may include heat engines, solid-state physics, blackbody radiation, phase transitions, physical chemistry, stellar physics, quantum information, Bose-Einstein condensation, and transport phenomena.

Course Notes: May not be taken for credit in addition to Engineering Sciences 181.

Recommended Prep: Physics 143a or equivalent.

Additional Course Attributes:

FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 191 Section: 001L

Advanced Laboratory (121993)

Isaac Silvera

Jenny Hoffman

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Students carry out three experimental projects selected from those available representing condensed matter, atomic, nuclear, and particle physics. Included are pulsed nuclear magnetic resonance (with MRI), microwave spectroscopy, optical pumping, Raman scattering, scattering of laser light, nitrogen vacancies in diamond, neutron activation of radioactive isotopes, Compton scattering, relativistic mass of the electron, recoil free gamma-ray resonance, lifetime of the muon, studies of superfluid helium, positron annihilation, superconductivity, the quantum Hall effect, properties of semiconductors, and plasma physics. The facilities of the laboratory include several computer controlled experiments as well as computers for analysis.

Course Notes: A substantial amount of outside reading is expected. Physics 191 is the same course as Physics 247; if you are a graduate students, please enroll in 247.

The course is offered in Science Center 204.

Recommended Prep: Physics 15a or 16, 15b, 15c. Physics 143a is highly recommended; 181 is also useful.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students

Physics 195

Introduction to Solid State Physics (112107)

Donhee Ham

2018 Fall (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The physics of crystalline solids and their electric, magnetic, optical, and thermal properties. Designed as a first course in solid-state physics. Topics: free electron model; Drude model; the physics of crystal binding; crystal structure and vibration (phonons); electrons in solids (Bloch theorem) and electronic band structures; metals and insulators; semiconductors (and their applications in pn junctions and transistors); plasmonic excitations and screening; optical transitions; solid-state lasers; magnetism, spin waves, magnetic resonance, and spin-based devices; dielectrics and ferroelectrics; superconductivity, Josephson junctions, and superconducting circuits; electronic transport in low-dimensional systems, quantum Hall effect, and resonant tunneling devices.

Course Notes: Physics 195 is also offered as Applied Physics 195. Students may not take both for credit.

Recommended Prep: Elementary quantum mechanics.

Physics 201

Data Analysis for Physicists (161201)

Vinothan Manoharan

2019 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course covers methods for analyzing experimental data. Students will learn both frequentist and Bayesian frameworks for statistical inference, modern computational methods such as Markov-chain Monte Carlo techniques, and the application to problems in particle physics, biophysics, condensed matter, applied physics, astrophysics, and other fields. The course emphasizes an intuitive, principled approach to data analysis and will involve discussions of ethics and reproducible research.

Course Notes: This course is suitable for students with limited or rusty programming skills. Students with more advanced programming skills may wish to take APMTH 207 or ENG-SCI 255.

Recommended Prep: Research experience commensurate with that of a first-year (or higher) PhD student in experimental physics. Students without such experimental experience are recommended to take Physics 191r or Physics 247r (or equivalent) first.

Additional Course Attributes:

FAS Divisional Distribution	None

Physics 210

General Theory of Relativity (114266)

Jacob Barandes

2018 Fall (4 Credits)

Schedule: MWF 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to general relativity: the principle of equivalence, Riemannian geometry, Einstein's field equation, the Schwarzschild solution, the Newtonian limit, experimental tests, black holes.

Recommended Prep: Physics 143a (quantum mechanics), 151 (mechanics) and 153 (electromagnetism), and Mathematics 21 (multivariable calculus) or equivalents.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 211AR

Topics in Cosmology and Particle Physics (208076)

2018 Fall (4 Credits)

Schedule:

Instructor Permissions: None

Enrollment Cap: n/a

Standard cosmological model and inflation, scalar inflationary models, cosmological perturbation theory, brief introduction to quantum fields on cosmological backgrounds, interactions and in-in (Keldysh-Schwinger) perturbation theory, non-gaussianities, symmetries and cosmological Ward identities.

Course Notes: Physics 211ar will be taught in Fall 2018 by Prof. Ali Kaya from Bogaziçi University, Istanbul, Turkey.

Recommended Prep: General relativity at level of Physics 210 or equivalent. Physics 253a helpful, but not required.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 211BR

Black Holes from A to Z (117201)

Andrew Strominger

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A survey of a variety of issues in black hole physics. A central focus will be the deep 'information paradox' they present concerning the relations between general relativity, quantum mechanics and thermodynamics. Several expert guest speakers will cover more astrophysical, mathematical and historical aspects of black holes. Topics include: the information puzzle, the Bekenstein-Hawking entropy/area law, microstate counting, asymptotic symmetries, soft hair, holography and Kerr/CFT.

Course Notes: The actual start time for the course will be 4:00pm, and the course will end at 6:00pm.

Recommended Prep: General relativity at level of Physics 210 or equivalent. Physics 253a helpful, but not required.

Additional Course Attributes:

Attribute	Value(s)

Physics 216

Mathematics of Modern Physics (127815)

Arthur Jaffe

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to functional integral methods relevant for problems in quantum and statistical physics, and quantum information. Properties of linear transformations on Hilbert space. Generators of continuous groups and semigroups. Properties of Green's functions and matrices. Uniqueness and non-uniqueness of ground states and equilibrium states. The KMS condition and its consequences.

Recommended Prep: Familiarity with quantum theory.

Additional Course Attributes:

Attribute	Value(s)

Physics 223

Electronics for Scientists (109346)

Thomas Hayes

David Abrams

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

An introduction to electronic circuit design intended to develop circuit intuition and debugging skills through daily design exercises, discussion and hands-on lab exercises. The approach is intensely practical, minimizing theory. Moves quickly from passive circuits to discrete transistors, then concentrates on operational amplifiers, used to make a variety of circuits including integrators, oscillators, regulators, and filters. The digital half of the course treats analog-digital interfacing, emphasizes the use of microcontrollers and programmable logic devices (PLDs).

Course Notes: Physics 223 is the same course as Physics 123; if you are an undergraduate student, please enroll in 123. Limited to 20 students.

Class Notes: Please note that Physics 223 is also offered on Wednesdays and Fridays, 1:30pm to 5:45pm. If you'd rather sign up for the Wednesday/Friday section, please find class number: 19767.

Special Topics in Quantum Matter (122818)

Ashvin Vishwanath

2018 Fall (4 Credits)

Schedule:

WF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This is a special topics course on quantum systems of many particles, i.e. quantum matter. Primarily, we will be interested in condensed matter systems - eg. electrons in solids or ultra-cold atoms in optical lattices - although the concepts invoked will be more generally applicable. Mostly, we will study well defined microscopic models, involving a finite number of degrees of freedom per unit volume, such as

spins on a lattice. Our aim will be to understand the physics at much longer scales, where rich phenomena described by universal laws emerge. Simple spin models will be shown, at long distances, to give rise to remarkable new excitations, from 'sound' and 'light', to fermions and even more exotic excitations. Often, (but not always) we will use quantum field theory to describe this physics, which may also help demystify the origin of quantum field theory in a physical setting free from 'infinities.'

Two criteria are applied when selecting topics. First, that they be of experimental relevance and, second, that they illustrate a central concept of quantum many body physics such as (i) the importance of locality in many body systems (ii) symmetry and its spontaneous breaking (iii) origin of gauge theories (iv) finding the right variables to describe the physics (a.k.a. dualities) (v) topological order (vi) scale invariance.

Planned Topics:

1. The 1+1D transverse field Ising model - duality, fermionization, chiral symmetry. Experimental realization in CoNb₂O₆.
2. Continuous symmetry breaking in 2+1D. Goldstone modes and the Anderson Tower. Non-perturbative approaches such as dualities and large N expansions. The Mott-superfluid transition in optical lattices.
3. Emergent Gauge Theories and topological order. Confinement and topological order. Chern Simons theories. Fractional quantum Hall states and gapped quantum spin liquids. Emergent electromagnetism in quantum magnets and "Spin-ice".
4. Special Topics: Quantum entanglement in many body systems. Scale invariance.

Evaluation: Assignments (roughly biweekly) and a final reading/small research project in groups of 2-3 based on enrollment. There will be no examinations.

Recommended Prep: Previous offerings of this course have been taken mainly by condensed matter/AMO and high energy theory graduate students, although the only real requirement is a strong background in basic quantum and statistical mechanics. No previous exposure to quantum field theory is assumed.

Physics 285A

Modern Atomic and Optical Physics I (118734)

Susanne Yelin

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to modern atomic physics. The fundamental concepts and modern experimental techniques will be introduced. Topics will include two-state systems, magnetic resonance, interaction of radiation with atoms, transition probabilities, spontaneous and stimulated emission, dressed atoms, trapping, laser cooling of "two-level" atoms, structure of simple atoms, fundamental symmetries, two-photon excitation, light scattering, introduction to molecular physics, and selected experiments. The first of a two-term subject sequence that provides the foundations for contemporary research.

Recommended Prep: One course in quantum mechanics (143a and b, or equivalent).

Additional Course Attributes:

Physics 287BR

The String Landscape and the String Swampland (114008)

C. Vafa

2019 Spring (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A selection of topics from current areas of research on string theory.

Recommended Prep: Physics 287a.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Physics 295A

Introduction to Quantum Theory of Solids (127980)

Eugene Demler

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Electrical, optical, thermal, magnetic, and mechanical properties of solids will be treated based on an

atomic scale picture and using the independent electron approximation. Metals, semiconductors, and insulators will be covered, with possible special topics such as superconductivity.

Recommended Prep: Physics 181 or equivalent, Applied Physics 195 or equivalent, and a graduate level quantum mechanics course similar to Physics 251a. (Physics 251b would be helpful and may be taken concurrently.)

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Physics 295B

Quantum Theory of Solids (127979)

Eugene Demler

2019 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course presents theoretical description of solids focusing on the effects of interactions between electrons. Topics include Fermi liquid theory, dielectric response and RPA approximation, ferro and antiferromagnetism, RKKY interactions and Kondo effect, electron-phonon interactions and superconductivity.

Course Notes: Physics 295b is also offered as Applied Physics 295b. Students may not take both for credit.

Recommended Prep: Physics 251a,b, an introductory course in solid state physics, or permission of instructor.

Teaching and Communicating Physics (107899)

Jacob Barandes

2019 Spring (4 Credits)

Schedule: W 0430 PM - 0715 PM

Instructor Permissions: Instructor

Enrollment Cap: 38

Hands-on, experienced-based course for graduate students on teaching and communicating physics, conducted through practice, observation, feedback, and discussion. Departmental rules for teaching fellows, section and laboratory teaching, office hours, assignments, grading, and difficult classroom situations.

Course Notes:

Please enroll in either Wednesday or Thursday meeting. Every class will start in Science Center 102. The classes are intended to run from 4:30pm to 6:30pm.

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 327B

Topics in Condensed Matter Physics (118814)

David R. Nelson

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 327B

Topics in Condensed Matter Physics (118814)

David R. Nelson

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 329A

Condensed Matter and Statistical Theory (143256)

Bertrand Halperin

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 329A

Condensed Matter and Statistical Theory (143256)

Bertrand Halperin

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 329B

Condensed Matter and Statistical Theory (118337)

Bertrand Halperin

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 329B

Condensed Matter and Statistical Theory (118337)

Bertrand Halperin

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 331A

Topics in String Theory (125320)

Xi Yin

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 331A

Topics in String Theory (125320)

Xi Yin

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 331B

Topics in String Theory (125321)

Xi Yin

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 331B

Topics in String Theory (125321)

Xi Yin

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 333A

Experimental Atomic Physics (112040)

Mara Prentiss

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 333A

Experimental Atomic Physics (112040)

Mara Prentiss

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 333B

Experimental Atomic Physics (112042)

Mara Prentiss

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 333B

Experimental Atomic Physics (112042)

Mara Prentiss

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 337A

Topics in Experimental High Energy Physics (114834)

Masahiro Morii

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 337A

Topics in Experimental High Energy Physics (114834)

Masahiro Morii

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 337B

Topics in Experimental High Energy Physics (114835)

Masahiro Morii

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 337B

Topics in Experimental High Energy Physics (114835)

Masahiro Morii

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 338A

Experimental Neutrino Physics and Dark Matter (205501)

Roxanne Guenette

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 338A

Experimental Neutrino Physics and Dark Matter (205501)

Roxanne Guenette

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 338B

Experimental Neutrino Physics and Dark Matter (205502)

Roxanne Guenette

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 338B

Experimental Neutrino Physics and Dark Matter (205502)

Roxanne Guenette

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 339A

Condensed Matter and Atomic Physics (120869)

Subir Sachdev

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 339A

Condensed Matter and Atomic Physics (120869)

Subir Sachdev

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 339B

Condensed Matter and Atomic Physics (120868)

Subir Sachdev

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 339B

Condensed Matter and Atomic Physics (120868)

Subir Sachdev

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 341A

Topics in Experimental Atomic and Condensed Matter Physics (111169)

Markus Greiner

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 341A

Topics in Experimental Atomic and Condensed Matter Physics (111169)

Markus Greiner

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 341B

Topics in Experimental Atomic and Condensed Matter Physics (118950)

Markus Greiner

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 341B

Topics in Experimental Atomic and Condensed Matter Physics (118950)

Markus Greiner

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 343A

Observational Cosmology and Experimental Gravitation (119051)

Christopher Stubbs

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 343A

Observational Cosmology and Experimental Gravitation (119051)

Christopher Stubbs

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 343B

Observational Cosmology and Experimental Gravitation (119052)

Christopher Stubbs

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 343B

Observational Cosmology and Experimental Gravitation (119052)

Christopher Stubbs

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 345A

Experimental Gravitation: Radio and Radar Astronomy (115102)

Irwin Shapiro

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 345A

Experimental Gravitation: Radio and Radar Astronomy (115102)

Irwin Shapiro

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 345B

Experimental Gravitation: Radio and Radar Astronomy (115113)

Irwin Shapiro

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 345B

Experimental Gravitation: Radio and Radar Astronomy (115113)

Irwin Shapiro

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 347A

Topics in Quantum Optics (115495)

Mikhail Lukin

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 347A

Topics in Quantum Optics (115495)

Mikhail Lukin

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 347B

Topics in Quantum Optics (115525)

Mikhail Lukin

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 347B

Topics in Quantum Optics (115525)

Mikhail Lukin

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 349A

Topics in Theoretical Particle Physics (125315)

Matthew Schwartz

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 349A

Topics in Theoretical Particle Physics (125315)

Matthew Schwartz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 349B

Topics in Theoretical Particle Physics (125316)

Matthew Schwartz

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 349B

Topics in Theoretical Particle Physics (125316)

Matthew Schwartz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 350A

Experimental Physics in Low Dimensional Materials (116409)

Philip Kim

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 10

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 350A

Experimental Physics in Low Dimensional Materials (116409)

Philip Kim

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** 10**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 350B

Experimental Physics in Low Dimensional Materials (205462)

Philip Kim

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 350B

Experimental Physics in Low Dimensional Materials (205462)

Philip Kim

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 351A

Experimental Soft Condensed Matter and Materials Physics (120872)

Vinothan Manoharan

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 351A

Experimental Soft Condensed Matter and Materials Physics (120872)

Vinothan Manoharan

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 351B

Experimental Soft Condensed Matter and Materials Physics (120873)

Vinothan Manoharan

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 351B

Experimental Soft Condensed Matter and Materials Physics (120873)

Vinothan Manoharan

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 353A

Topics in Statistical Physics and Quantitative Molecular Biology (125788)

Erel Levine

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 353A

Topics in Statistical Physics and Quantitative Molecular Biology (125788)

Erel Levine

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 353B

Topics in Statistical Physics and Quantitative Molecular Biology (125789)

Erel Levine

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 353B

Topics in Statistical Physics and Quantitative Molecular Biology (125789)

Erel Levine

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 357A

Experimental Condensed Matter Physics (113916)

Robert Westervelt

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 357A

Experimental Condensed Matter Physics (113916)

Robert Westervelt

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 357B

Experimental Condensed Matter Physics (115410)

Robert Westervelt

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 357B

Experimental Condensed Matter Physics (115410)

Robert Westervelt

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 359A

Topics in Condensed Matter Physics (115526)

Eugene Demler

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 359A

Topics in Condensed Matter Physics (115526)

Eugene Demler

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 359B

Topics in Condensed Matter Physics (115527)

Eugene Demler

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 359B

Topics in Condensed Matter Physics (115527)

Eugene Demler

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Physics 363A

Topics in Condensed Matter Theory (112091)

Efthimios Kaxiras

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 363A

Topics in Condensed Matter Theory (112091)

Efthimios Kaxiras

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 363B

Topics in Condensed Matter Theory (112092)

Efthimios Kaxiras

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 363B

Topics in Condensed Matter Theory (112092)

Efthimios Kaxiras

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 365A

Topics in Mathematical Physics (115341)

Arthur Jaffe

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 365A

Topics in Mathematical Physics (115341)

Arthur Jaffe

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Physics 365B

Topics in Mathematical Physics (110837)

Arthur Jaffe

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 365B

Topics in Mathematical Physics (110837)

Arthur Jaffe

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 371A

Topics in Experimental High Energy Physics (111721)

Gary Feldman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 371A

Topics in Experimental High Energy Physics (111721)

Gary Feldman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Physics 371B

Topics in Experimental High Energy Physics (118633)

Gary Feldman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Physics 371B

Topics in Experimental High Energy Physics (118633)

Gary Feldman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Physics 373A

Historical and Philosophical Approaches to Modern and Contemporary Physics (143237)

Peter Galison

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Subject: Physical Sciences

Physical Sciences 2

Mechanics, Elasticity, Fluids, and Diffusion (122575)

*Gregory Kestin**Jieping Fang*

2018 Fall (4 Credits)

Schedule: TR 0900 AM - 1015 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

An introduction to classical mechanics, with special emphasis on the motion of organisms in fluids. Topics covered include: kinematics, Newton's laws of motion, oscillations, elasticity, random walks, diffusion, and

fluids. Examples and problem set questions will be drawn from the life sciences and medicine.

Recommended Prep: Physical Sciences 1 (or Chemistry 7), Mathematics 1b, or the equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Science of the Physical Universe
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: General Education	Empirical and Mathematical Reasoning
FAS: General Education	Science of Living Systems
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS: Core Curriculum	Science A

Physical Sciences 3

Electromagnetism, Circuits, Waves, Optics, and Imaging (122576)

Louis Deslauriers

Roxanne Guenette

2019 Spring (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is an introduction to electromagnetism, digital information, waves, optics and sound. Topics covered include: electric and magnetic fields, electrical potential, circuits, simple digital circuits, wave propagation in various media, microscopy, sound and hearing. The course will draw upon a variety of applications to the biological sciences and will use real-world examples to illustrate many of the physical principles described. There are six laboratories.

Course Notes:

This course is part of an integrated introduction to the physical sciences intended for students who plan to pursue a concentration in the life sciences and/or satisfy pre-medical requirements in Physics. May not ordinarily be taken for credit in addition to Physics 1b, 11b, or 15b.

Recommended Prep: Physical Sciences 2 (or Physics 1a or 11a), Mathematics 1b, or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Core Curriculum	Science A
FAS: General Education	Science of Living Systems
FAS: General Education	Science of the Physical Universe
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Physical Sciences 12A

Mechanics and Statistical Physics from an Analytic, Numerical and Experimental Perspective (109274)

Efthimios Kaxiras

Christopher Stubbs

Usman Naseer

2019 Spring (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This is the first term of a two-semester introductory physical science and engineering course sequence. The focus is on quantitative scientific reasoning, with the first term's exploration framed in the context of basic mechanics. Students will gain competence in both analytic (using pencil, paper and single-variable calculus) and numerical (using computer modeling) approaches to modeling simple physical systems and for the analysis of experimental data. Topics include kinematics, linear and rotational motion, forces, energy, momentum, collisions, gravitation, oscillations, and a brief introduction to statistical physics and waves. Examples are drawn from across the physical sciences and engineering. The course is aimed at first year students who have an interest in pursuing a concentration in the sciences and/or engineering. The course structure includes lecture, discussion and laboratory components.

Course Notes: Physical Sciences 12a may not be taken for credit by students who have passed Physics 11a, 15a or 16.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Science A
FAS: Course Level	Primarily for Undergraduate Students
FAS: Core Curriculum	Quantitative Reasoning
FAS: General Education	Science of Living Systems
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: General Education	Science of the Physical Universe
FAS Divisional Distribution	Science & Engineering & Applied Science

Physical Sciences 12B

Electromagnetism and Statistical Physics from an Analytic, Numerical and Experimental Perspective (109457)

Logan S. McCarty

Jieping Fang

2018 Fall (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This is the second term of a two-semester introductory sequence that uses a combination of analytic and numerical methods to understand physical systems, to analyze experimental data, and to compare data to models. Topics include electrostatics and magnetostatics, electromagnetic fields, optics [all topics illustrated with applications to current technological and societal challenges], and an introduction to the physics of many-body systems and their aggregate properties such as entropy, temperature and pressure. The course is aimed at second year students who have an interest in pursuing a concentration in the sciences and/or engineering. The course structure includes lecture, discussion and laboratory components.

Course Notes: May not be taken for credit by students who have passed Physics 15b

or Physics 15c.

Recommended Prep: **Physical Sciences 12a**

Population Health Sciences 2000A

Quantitative Research Methods in Population Health Sciences I (203329)

Jarvis Chen

Michael Hughes

2018 Fall (4 Credits)

Schedule: TR 1130 AM - 1259 PM

Instructor Permissions: Instructor

Enrollment Cap: 50

This is part one of a two part core year-long quantitative methods course for the Population Health Science PhD students at the School of Public Health. The course integrates methods and concepts from the various disciplines represented by Population Health Sciences to equip students with the methodological tools to conduct their own research as well as collaborate across fields of study and areas of specialization. The

course will cover foundational statistical methods including linear and logistic regression, generalized linear models, survival analysis, longitudinal data analysis, and multilevel modeling. Discussion will be given to important concepts including study design, sampling, scientific inference, causal reasoning, measurement, and replication. The course will also provide an overview of a number of additional and sometimes more advanced methods including Bayesian statistics, big data methods, missing data, sensitivity analysis, propensity scores, time-varying exposures, interaction, mediation, instrumental variables, regression discontinuity designs, difference-in-difference methods, selection models, time series, bootstrapping, simulations, and meta-analysis. With these latter topics, emphasis will be placed on understanding the basic definitions, assumptions, and methodology. Students will be referred to further readings and courses to gain more detailed understanding. Various software resources will be used throughout the course. The course will prepare students to critically read through the empirical population health science literature, and to implement a number of different methods in their own research. Students are strongly encouraged to complete both parts of this course (parts A and B) within the same academic year.

Course Notes: This course is reserved for first-year Ph.D. students in Population Health Sciences. Population Health Sciences Ph.D. students are required to register for both semesters of this course and to achieve a final average grade of B or higher.

Requirements: Requisite: Course open to First Year GSAS (G1) Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
Full Year Course	Divisible Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Psychology

Subject: Psychology

Psychology 14

Cognitive Neuroscience (126551)

Daniel Schacter

George Alvarez

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

How do our brains give rise to our minds? Specifically, how are mental processes related to neural activity? This course will explore these questions, as well as the methods by which cognitive neuroscience seeks to answer them. We will focus on processes within perception, attention, memory, language, action, emotion, and social cognition, and methods including neuroimaging, neuropsychology, and electrophysiology.

Course Notes: This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Psychology 15

Social Psychology (114178)

Fiery Cushman

2018 Fall (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to social psychological research and theory regarding everyday behavior, incorporating methods from the life sciences (neuroscience, genetics, evolutionary biology). Topics include: attitudes and social influence; obedience to authority; stereotyping, prejudice, and intergroup relations; emotion; interpersonal attraction; morality and prosocial behavior; and errors of everyday human judgment

Course Notes: This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or 1B=7 or Psyc S-1) before enrolling in

this course for all freshmen and sophomores and for all students completing a concentration or secondary field in psychology.

Developmental Psychology (110776)

Jesse Snedeker

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to theories and findings in developmental psychology. The course will cover brain development, perception, language, the origins of individual differences, theory of mind/autism, moral development, emotion and understanding emotion, friendship, parenting and cross-cultural variation.

Course Notes:

This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB = 7) before enrolling in this course; or permission of instructor. Not open to students who have taken SciLivSys 15.

Abnormal Psychology (123973)

Joshua Buckholtz

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Introduction to the study of psychological dysfunction. Focuses on abnormal behavior as it relates to the definition, etiology, and treatment of major symptom domains. This course will emphasize critical evaluation of the causes and mechanisms of mental illness, with special attention paid to recent neuroscientific and genetic research on the neurobiology of psychopathology.

Course Notes: This course counts toward foundational requirements for Psychology and should be taken before courses at the 1000 level or higher.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB = 7) before enrolling in this course.

Contemporary Issues in Psychology: Intensive Cross-level Analyses (113094)

Jill Hooley

Katherine Powers

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Examines selected issues and phenomena in contemporary psychological research. Special attention to examining topics from a variety of perspectives, to reading primary sources in the field, and to developing thinking, writing, research, and discussion skills. This tutorial, or Psychology 975, is required of concentrators upon entering the concentration, normally in the sophomore year. Letter graded.

Course Notes: Students may take this course before formally declaring Psychology as their concentration. Psy 971 and Psy 975 are interchangeable for Psychology requirements.

Class Notes: This course is taught entirely in sections, so a required first meeting of this course for sectioning will be held the first day of classes. For Spring 2019, attend one of two meetings on Monday January 28: 1-1:30 pm or 5-5:30 pm in William James Hall 1550.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor. PSY1900 or equivalent statistics course should be taken in advance or concurrently.

Mood Disorders (156557)

Jill Hooley

Katherine Powers

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

The goal of this course is to give an overview of the major research findings across mood disorders such as major depressive disorder, bipolar disorder, generalized anxiety disorder, and social anxiety disorder. Every class will involve classic and cutting edge research from the literature on mood disorders. The class will also involve discussion of psychological (i.e., therapeutic) and psychiatric (i.e., medical) perspectives on etiology and treatment. By the end of the course, students will understand the etiology, course, and treatment of a variety of mood disorders.

Course Notes:

This is the same course as PSY 1855 Mood Disorders, which has been offered previously. Students who have taken 1855 cannot enroll in this course.

Class Notes:

The instructor is Evan Kleiman, ekleiman@fas.harvard.edu.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Clinical Psychology in Everyday Life (110203)

Jill Hooley

Katherine Powers

2019 Spring (4 Credits)

Schedule:

M 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 16

The goal of this course is to give you exposure to the types of evidence-based psychological interventions available for many clinical and non-clinical conditions, such as sadness, anxiety, substance use, insomnia, pain, and arguments with your significant other. While this seminar emphasizes intervention research in the context of children and adolescents, the principles are often applicable across age groups.

Through this seminar, you will learn to notice and apply principles of psychological intervention to the world around you, not only in theory but also in practice. The seminar is not a self-help program or a training program for providing therapeutic services to others. Instead, the weekly discussions, exercises, and assignments will help you view the world through the lens of a scientist-practitioner – and apply those insights to everyday life in a scientific manner.

Course Notes: This is the same course as PSY 1852 Clinical Psychology in Everyday Life, which has been offered previously. Students who have taken 1852 cannot enroll in this course.

Class Notes: The instructor is Lauren Santucci, lsantucci@fas.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Psychology 980JM

Human Sexuality (207654)

Jill Hooley

Katherine Powers

2018 Fall (4 Credits)

Schedule: T 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 16

What are we looking for in a short vs. long-term relationship partner? Do we all mean the same thing when we talk about sex? How do our sexual interests change as we age? The goal of this seminar is to expose students to the rich and complex study of human sexuality from the perspective of psychological science. We will discuss historical and contemporary definitions of sex; male/female similarities and differences in sexuality; love and jealousy; variability in sexual preferences; and evolutionary perspectives on human sexuality. Through the synthesis of psychological, socio-cultural and biological research, you will learn to evaluate academic and popular portrayals of human sexuality. This course will work towards developing students' appreciation for the wide variety of empirical perspectives around sex and sexuality and understanding of their own and others' sexuality and sexual activities.

Class Notes: The instructor is Jennifer Kotler, jkotler@fas.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one

foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Experiencing Endings (207655)

Jill Hooley

2019 Spring (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

We all confront endings, both large and small, throughout the course of our lives - in social interactions, personal relationships, and major life events (graduating college, becoming a parent). This course will examine our understanding of these transitions via the lens of psychological science. We will also discuss social and clinical studies of how people face the end of life, including research on suicide, palliative care, medically assisted dying, and bereavement. This course aims to combine our lived experiences with qualitative and quantitative research, to advance the way we think about experiencing endings.

Class Notes:

The instructor is Jennifer Kotler, jkotler@fas.harvard.edu.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Understanding Autism (207681)

Jill Hooley

Katherine Powers

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

One in 50 children is currently diagnosed with autism spectrum disorder (ASD), yet we still do not know what causes it, or how best to treat it. This course provides students with a broad, interdisciplinary exploration of ASD from infancy through adulthood. We explore three major themes: 1) the psychological and neurological drivers of ASD, including deficits in social cognition, executive function and perception; 2) the epidemiology and clinical practice of ASD, including diagnosis and treatment modalities, and individual and sex/gender differences; and 3) the personal and societal impact of ASD, including discussion of quality of life, neurodiversity, policy and advocacy.

Class Notes: The instructor is John Knutsen, knutsen@bc.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Becoming an adult: Exploring Emerging Adulthood as a distinct developmental stage (205541)

Jill Hooley

Katherine Powers

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This course will focus on unpacking human development from ages 18 to 29, a period of the life course now known as "emerging adulthood" coined by Dr. Jeffrey Arnett in 2000. Topics explored will include domains of individual development, including cognitive development, mental health, and identity formation, and contexts that influence individual development, including family relationships, education and work settings, and media. Differences between the experience of emerging adulthood in industrialized and developing countries will be incorporated, as well as attention to debunking popularized myths about this period of development.

Course Notes: This is the same course as PSY 1609 Becoming an adult: Exploring emerging adulthood as a distinct developmental stage, which has been offered previously. Students who have taken 1609 cannot enroll in this course.

Class Notes: The instructor is Katie Lowe, katielowe@fas.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or PSY 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Decision-Making in an Uncertain World (207801)

*Jill Hooley**Katherine Powers*

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

How should I make investment decisions without knowledge of future stock market developments? Or weigh the pros and cons of one medical treatment over another? Most decisions we make in our daily lives have many components of uncertainty and risk, simply because we cannot foresee the future. This course combines theories and frameworks from social psychology and behavioral economics to understand the complex process of decision-making. We will consider how social and situational influences such as emotions, social motivations, group dynamics, psychological distance, framing and cultural orientation impact perceptions of risk. We will also explore the growing research on nudges -- subtle but powerful changes in the environment that can counteract behavioral biases and encourage better decisions. Students will acquire practical skills for supporting decision-making through choice architecture and risk communication in areas such as health, finance, environmental behavior and high-risk sports.

Class Notes:The instructor is Martina Raue, marae@mit.edu.**Recommended Prep:**

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Personality and Individual Differences (207802)

*Jill Hooley**Katherine Powers*

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

Game of Thrones, The Bachelor or Fortnite? Do your entertainment preferences relate to different needs for stimulation caused by your genetic makeup? Or are they rooted in something deeper in your unconscious that shapes motivations and how you form connections with others? In this course, you will learn about factors that make you uniquely you. We will examine classic personality theorists and their paradigm-shifting models of personality that changed accepted thinking on healthy personality development and led to very different treatment methods for disorders like anxiety and depression. We will discuss major debates and research findings in contemporary personality psychology, including the latest research on topics such as unconscious motivation, self-efficacy, locus of control, defensive pessimism, fear of success, self-actualization, and trait theories of introversion and extraversion. Students will learn how to apply the different theoretical frameworks to better understand an individual's personality, leading to deeper insights into human nature and the people that inhabit their social worlds.

Class Notes: The instructor is Kyra Kulik-Johnson.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

But Why?: Ultimate Explanations for the Quirks of the Mind (203917)

Jill Hooley

Katherine Powers

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Social psychology has documented many surprising features of the human mind, providing robust evidence that people deceive themselves, are systematically overconfident, believe implausible things to avoid inconsistency, and so on. Explanations often focus on proximate psychological mechanisms (e.g., we avoid inconsistency because we find it uncomfortable). But behind every proximate mechanism is an ultimate explanation (why is inconsistency uncomfortable?)—why did evolution or learning lead us to be this way? This course will examine proximate and ultimate explanations for classic social psychological phenomena and the insight that ultimate level explanations add, with a focus on how to test ultimate explanations convincingly.

Course Notes: This is the same course as PSY 1576 But Why? Ultimate Explanations for the Quirks of the Mind, which has been offered previously. Students who have taken 1576 cannot enroll in this course.

Class Notes: The instructor is Bethany Burum, burum@wjh.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or PSY 1 or the equivalent of introductory psychology (e.g.

Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies (203916)

Jill Hooley

Katherine Powers

2019 Spring (4 Credits)

Schedule:

W 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Why do our ideologies change when we are put in positions of power (e.g., victim dehumanization), or subordination (e.g., Stockholm Syndrome), or with peers with a different opinion (e.g., conformity)? Why are our moral and political ideologies so different across time and culture (e.g., the ideologies of ISIS members compared to Americans)? Why do we claim that our morals are logically justifiable when we cannot justify them (e.g., moral dumbfounding)? This course will explore the hidden incentives that can explain these and many other puzzling features of our beliefs and ideologies. Evidence from psychology, as well as philosophy, economics, history, and current events (including the election cycle), will demonstrate the crucial way that incentives outside of our awareness shape our beliefs and ideologies.

Course Notes:

This is the same course as PSY 1575 How Hidden Incentives Shape the Mind: The Origins of Our Beliefs and Ideologies, which has been offered previously. Students who have taken 1575 cannot enroll in this course.

Class Notes:

The instructor is Bethany Burum, burum@wjh.harvard.edu.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or PSY 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Mind Reading v2.0 (160690)

Jill Hooley

Katherine Powers

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Mind reading is not the stuff of science fiction, it is a complex set of mental processes honed throughout our evolutionary history that allow us to survive and thrive in a social world. But what is a mind? Who has one? Can we ever know what is in the minds of others? We will attempt to answer these questions by exploring how the human mind uses perceptual information to infer other peoples' thoughts, beliefs, and desires. In this iteration of the course, we will also explore how mind perception is mediated through social technology by reading empirical papers and designing studies to address open questions in the field. Our goal is to critically examine how our social brains, shaped by evolution to understand other minds, might thrive or wither in an increasingly connected world.

Course Notes: This is the same course as PSY1562 Mind Reading which has been offered previously. Students who have taken 1562 cannot enroll in this course.

Class Notes: The instructor is Christine Looser, clooser@fas.harvard.edu.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Growing Up and Growing Old: Cognitive Changes in Childhood and Aging (127535)

Jill Hooley

Katherine Powers

2018 Fall (4 Credits)

Schedule:

R 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

This seminar will focus on the profound cognitive changes of early childhood and old age. We will be especially interested in what such changes tell us about how the adult mind -- perched between childhood and old age -- is organized. Topics include: theories of development and theories of aging, changes in the neural substrate; the rise and fall of executive functions; conceptual gain and conceptual loss; expertise and wisdom; healthy aging and dementias.

Class Notes: The instructor is Deborah Zaitchik-Samet, zaitchik@mgh.harvard.edu. The Q scores below are for the same instructor, Deborah Zaitchik-Samet.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science

Eating Disorders (119717)

Jill Hooley

Katherine Powers

2018 Fall (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

The goal of this course is to provide a comprehensive overview of DSM-5 feeding and eating disorders (EDs) with a primary focus on anorexia nervosa, bulimia nervosa, and binge eating disorder. We will explore the etiology (i.e., biological and environmental factors), symptom presentation, and empirically supported treatments across these EDs. Additional topics will include cultural considerations, gender and EDs, medical complications, impact of media/social media, and novel directions and treatments for these disorders.

Class Notes: The instructor is Rebecca Shingleton, rshingleton@g.harvard.edu. The Q scores below are for the same instructor, Rebecca Shingleton.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18, PSY 1861 or Psyc S-1240 before enrolling in this course; or permission of instructor.

Health: A Positive Psychology Perspective (126556)

Ellen Langer

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Why does it seem that some people are so resilient and content? This course looks at psychological and physical health from the perspective of Positive Psychology. The major focus will be on mindfulness theory and its relationship to stress/coping; illness/wellness; decision-making; and placebos. The medical model, the biosocial model, and a unified mind-body model will be compared to examine their role in becoming mindful and thus healthier, happier and less stressed.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology of Women (110216)

Nicole Noll

2019 Spring (4 Credits)

Schedule:

TR 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

How does being a woman affect our behavior, our evaluations of ourselves, and our interactions with others? This course examines psychological science on women and girls in western industrialized societies, addressing such topics as gender stereotypes, girlhood, women and work, relationships, pregnancy and motherhood, mental health, violence against women, and women in later adulthood. We will consider these topics through an understanding of gender as a social construction, being mindful of the intersections of gender, sexuality, class, and race. Although focused on women's lives and experiences, this course is highly relevant to people of all genders.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology of Willpower (207826)

Rebecca Fortgang

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

40

It's two in the morning. Will you finally write that paper, or will you give up and go to sleep? You are not the only person who faces dilemmas like these -- self-control is challenging, and everyone struggles with it. How do we find the willpower to do the things we will be happy about tomorrow -- and stay away from things we regret? This course brings together insights from psychology, psychiatry, neuroscience, and behavioral economics to identify how we can break old habits and forge new ones, resist temptation, and pursue goals. Students will learn about the science of self-control and will put empirically-supported strategies to the test in their own lives.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, PSY 1861, or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

How Students Learn: Psychological Science in the Classroom (207881)

Jessica Schwab

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor**Enrollment Cap:**

40

As students, we can become accustomed to sitting through hours of lectures, transcribing those lectures, and cramming for exams. But is this the best educational method for promoting student learning? And are the same strategies effective for everyone? This course explores the intersections of psychology and education to reveal the science underlying the best practices of learning and teaching. Topics include the influence of attention, cognitive development, emotion regulation, stereotype threat, growth mindset, and motivation on learning. Through in-class demonstrations and the development of evidence-based lessons, we will wrestle with how to apply psychological principles to enhance the practice of teaching and learning. This course includes an experiential component in which you will learn study strategies and practical tips to enhance your own learning and performance in the classroom.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology 1201

Your Brain on Drugs: Psychopharmacology (122224)

Scott Lukas

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: Instructor**Enrollment Cap:**

101

An introduction to how drugs affect mood, sensation, consciousness, and other psychological and behavioral functions in both healthy and disease states. Introduces concepts in neuroscience and pharmacology to understand how drugs are used to treat drug abuse, psychiatric disorders and why individuals use recreational drugs. Covers all CNS drugs, including antidepressants, antipsychotics, alcohol, and both licit and illicit drugs of abuse. Debates controversial topics such as research with psychiatric populations, diagnosing ADHD, teenage suicide, marijuana legalization, and needle exchange

programs.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 18, MCB 80, MCB 81 or Psyc S-1240 before enrolling in this course; or permission of instructor.

Brain Science for World Leaders (160658)

Talia Konkle

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Three forces have converged to make this the most exciting time for brain science. First, we don't yet understand how the brain works, how it breaks, and how to fix it: we have important questions to answer. Second, a slew of powerful brain methods have emerged and we have entered an era of massive computing power: we have serious tools. Third, more than ever before, there is a social will and now a political mandate to tackle these questions head on: we all want to know more about brains!

This course will give you an overview of our current state of brain science knowledge and some basic neuroscience know-how. The content is structured to help you best on that future day when you're an entrepreneur, lawyer, scientist, or the next president, so you'll have the foundation to shape the next decade of brain science discovery and policy.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course, or permission of the instructor. No previous neuroscience coursework is required.

Brain Damage as a Window into the Mind: Cognitive Neuropsychology (116622)

Alfonso Caramazza

2018 Fall (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Examines the patterns of perceptual, motor, cognitive, and linguistic impairments resulting from brain damage. The focus is on the implications of the various types of neuropsychological deficits (such as visual neglect, dyslexia, and aphasia) for theories of the mind and the functional organization of the brain.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, MCB 80, or MCB 81 before enrolling in this course; or permission of instructor.

Evolutionary Psychology (156054)

Max Krasnow

2019 Spring (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Why are humans the way we are? What explains why we get angry, who we find attractive, and why we think the way we do? How are we different than other species, how are we the same, and why? In this course, students will master the foundational logic of evolutionary psychology and come away able to answer these questions and more. We will cover topics across the range of human experience including: cooperation, mating, friendship, aggression, warfare, collective action, kinship, parenting, social learning, dietary choice, spatial cognition, reasoning, emotions, morality, personality and individual differences, and culture. We will close by considering how our new understanding of human nature can help us solve problems in our world (for example, how understanding human coalitional psychology offers solutions to modern day political polarization).

Class Notes: A discussion section will be scheduled only if the enrollment is high enough; if not, the course will have only a lecture component.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Essentials of fMRI for Cognitive Neuroscientists (207573)

Talia Konkle

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

With functional magnetic resonance imaging (fMRI), we can now see into the human brain and map activity across different regions. If you are using fMRI in your research, or think you may want to in the future, this course will cover the critical aspects of neuroimaging with the goal of making you an informed practitioner. In the first part of the course, we will cover content including signal acquisition, experimental protocol design and power, and the general linear modeling framework for data analysis. In the second part of the course, we will survey the recent advances in fMRI data analysis, e.g. multivariate analyses, voxel-wise encoding models, functional connectivity analyses. Depending on your level of experience, you will complete a project that employs one of these techniques, either on your own dataset, or from datasets available online.

Course Notes: This course is intended for both advanced undergraduates and graduate students.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, MCB 80, or MCB 81 before enrolling in this course; or permission of instructor.

Psychology 1352

Foundations of Cognitive Neuroscience Research (121887)

Randy Buckner

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

12

Intended for undergraduates or those with limited background in cognitive neuroscience. Students will attend and participate in laboratory research and in a seminar that includes discussion of active scientific projects, recent important journal articles, and didactic lecture on technical aspects of methods central to cognitive neuroscience research. Readings will be assigned that survey basic principles of system neuroscience, cognitive science, and methods including functional MRI, MEG, and single unit physiology.

Course Notes: Limited to students involved in research.

Class Notes: To express interest in enrollment, please email the instructor at randy_buckner@harvard.edu prior to the first class meeting. Non-psych. concentrators are encouraged to enroll.

Recommended Prep: Psychology concentrators should have taken SLS 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, Science of Living Systems 15, or MCB 80 before enrolling in this course; or permission of instructor.

Psychology 1355

The Adolescent Brain (110064)

Leah Somerville

2019 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

This course will introduce students to the dynamics of brain development during the second decade of life. This course will examine key changes in structural, functional, connectivity, and neurochemical changes that take place in the brain during adolescence. We will assess how these changes influence several domains of the adolescent mind, including self-control, risky decision making, changes in daily emotions and moods, the onset of psychiatric illnesses (such as mood and anxiety disorders), and sensitivity to social evaluation. After building foundational knowledge in these areas, we will consider how to use this research to inform societal issues including trends in parenting, defining when a person reaches "adulthood", and considering when a person should be held responsible for their actions.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, MCB 80 or MCB 81 before enrolling in this course; or permission of instructor.

Computational Cognitive Neuroscience: Building Models of the Brain (160656)

Samuel Gershman

2019 Spring (4 Credits)

Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

"What I cannot create, I do not understand." This course applies Richard Feynman's dictum to the brain, by teaching students how to simulate brain function with computer programs. Special emphasis will be placed on how neurobiological mechanisms give rise to cognitive processes like learning, memory, attention,

decision-making, and object perception. Students will learn how to understand experimental data through the lens of computational models, and ultimately how to build their own models.

Recommended Prep: Students be comfortable with a numerical programming language (e.g., Python, Matlab, R). Psychology concentrators should have taken Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, Science of Living Systems 15, MCB 80 or MCB 81 before enrolling in this course; or permission of instructor.

Psychology 1454

Neuroscience Fiction: An Introduction to Cutting Edge Neuroscience through the Lens of Film and Tele (156569)

George Alvarez

2018 Fall (4 Credits)

Schedule: R 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Film and television shows often capture the cutting edge of science, and they sometimes even anticipate future scientific advances. We'll use examples from film and television as an introduction to several hot topics in the field of neuroscience, such as Mind Control, Mind Reading, Smart Pills, and Brain Machine Interfaces, which are all getting closer to reality. Will neuroscientists ever be able to control a person's thoughts, or to know what a person is thinking? Can taking a pill really awaken untapped brain power? Will you ever be able to drive a car without touching a steering wheel? In this course, we will cover the state of the art and the future of these exciting areas of neuroscience (and entertainment). Because these are not textbook topics, this is an advanced course that will focus on reading and discussing the primary literature.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14 or MCB 80 before enrolling in this course; or permission of instructor.

Psychology of Close Relationships (107602)

Holly Parker

2019 Spring (4 Credits)

Schedule: M 0600 PM - 0830 PM

Instructor Permissions: Instructor

Enrollment Cap: 150

This course is an in-depth exploration of close relationships. Examples of topics to be covered include the biological bases of attraction; relationship formation; the end of relationships through break-up, divorce, or death; relationship satisfaction; deception; gender roles; same-sex relationships; loneliness; relationships and well-being; and public perceptions about relationships. You will have an opportunity to explore these topics primarily through critical examination of the empirical literature as well as through popular press.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Wired to Connect? The Neuroscience of Social Understanding and Interaction. (126848)

Mina Cikara

2018 Fall (4 Credits)

Schedule: M 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

By some accounts, the large expansion of the human brain evolved due to the complex demands of dealing with social others—competing or cooperating with them, deceiving or empathizing with them, understanding or misjudging them. This discussion-based seminar surveys the emerging field of social cognitive neuroscience and its multi-level, multi-method approach to understanding the brain in its social context. We will review current theories and methods guiding the field and recent research examining the neural bases of social processes, including: theory of mind, empathy, morality, social decision-making, intergroup relations, among others.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, Science of Living Systems 15 or MCB 80 before enrolling in this course.

Research Seminar in Implicit Social Cognition (127489)

Mahzarin Banaji

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An introduction to research on implicit social cognition, with special focus on attitudes, beliefs, and identity and in some cases its applications to law, business, medicine, and government. Students will be paired with individual researchers to work on ongoing projects that can turn into more independent projects. In addition to weekly work in the laboratory, students are expected to attend biweekly discussion groups focusing on current issues and directions in the laboratory as a whole.

Class Notes:

To express interest in enrollment, please email the instructor at mahzarin_banaji@harvard.edu prior to the first class meeting.

Psychology of Economic Inequality (205556)

Sarah Cotterill

2018 Fall (4 Credits)

Schedule:

M 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Every society in the world is structured such that some people earn higher incomes, have greater access to resources, and enjoy more social power and status than others. Scholars across several disciplines have

sought to explain why income inequality is ubiquitous and persistent. In this course, we are particularly concerned with how features of the mind, and the mind in society, help explain the widening gap between the rich and the poor. How do people perceive income inequality, and how do those perceptions influence their social attitudes and policy positions? Why do people who stand to benefit from redistribution sometimes oppose it? How do we decide what's fair, and when do perceptions of fairness emerge in human development? How does perceived lack of control or power affect the psychology of low-status groups, and how do those effects, in turn, influence power imbalances? In answering these questions, we'll consider a diversity of perspectives from the literatures on evolutionary and developmental psychology, social psychology, political science and social policy.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 before enrolling in this course; or permission of instructor.

Psychology of Belief Systems: Sense-Making, Motivated Reasoning, Ideology, and Misinformation (205557)

Sarah Cotterill

2018 Fall (4 Credits)

Schedule: W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

The human mind has a remarkable capacity for story-telling and meaning-making. We weave together narratives of our lives and the world around us, we readily justify our attitudes and behavior, and we tend to perceive the world in a manner that's consistent with our narratives and justifications, even when we're confronted with evidence to the contrary. This course explores why the human mind is so prone to building stories and rationales, and the consequences of these processes both for our everyday lives and for society at large.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 before enrolling in this course; or permission of instructor.

Psychology 1583

Psychology of Social Protest (205558)

2019 Spring (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: Instructor**Enrollment Cap:**

40

This course examines the psychological factors that drive people to engage in collective action to improve the status and standing of their social group, or to protest the status quo—as was seen, for example, in the Civil Rights Movement of the mid-twentieth century, the Occupy Wall Street protests, the Arab Spring, and the recent Women's March. The course begins with an introduction to the psychology of social groups, including perspectives from the literatures on social identity and self-categorization theory. We'll consider the conditions that cause people to be more likely to collectively challenge the status quo, as well as the equally compelling question of why low-status groups often don't protest inequity and injustice. Later in the course, we'll explore predictors of normative versus nonnormative collective action, and consider the problem of terrorism. What drives radicalization, and why are some people willing to die in order to inflict harm on others? In addressing these questions, the course incorporates perspectives from moral and political psychology, political science, and personality psychology.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

On and Beyond the Witness Stand: Social Psychology and Law (207887)

Joseph Vitriol

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

40

Why do eyewitnesses often identify the wrong suspect? What leads innocent people to confess to crimes they did not commit? How do jurors evaluate trial evidence and arrive at a verdict? This course examines the interface between social psychological research and the law to address such questions. We will examine scientific evidence and scholarly perspectives surrounding the role of psychological experts in the legal system; the use of social science in law and public policy; criminal behavior and policing; eyewitness memory and lineup procedures; lie detection and police interrogation; innocence and false confessions; jury selection and decision-making; judicial and prosecutorial discretion; and implicit bias and discrimination litigation. This course will equip students with a scientific understanding of how psychology can be used to both inform and improve our legal system and public policies.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Confronting Bias in the Self and Others (207888)

Joseph Vitriol

2019 Spring (4 Credits)

Schedule:

R 1245 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

Most people reject hostile expressions of prejudice and are motivated to reduce bias in their judgment and behavior, but many groups continue to be marginalized and discriminated against in modern society. Targets of prejudice often experience interpersonal and institutional discrimination that undermines their psychological well-being and economic mobility. In this course, we will critically examine the psychological processes that underpin conscious and unconscious forms of prejudice and stereotyping. We will examine the effectiveness of interventions for reducing bias, considering how and why many people fight back rather than self-improve when confronted with evidence of their own bias or that of others in society. Together we will work to develop a scientific understanding of how modern forms of prejudice and discrimination operate in human relations and how to confront biases in the self and others.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Fake News and Political Misperceptions (207890)

Joseph Vitriol

2019 Spring (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

At its core, politics is about the psychology of persuasion—through rhetorical machination, argumentation, and debate, communicators try to influence how citizens think about an issue, candidate, or event. In the age of "fake news" and alternative facts, where misleading, sensationalized, or disproven information abounds, how individuals arrive at their political beliefs and acquire political knowledge is of central importance. In this class, we will step "inside the mind" of citizens and political elites to explore the psychological processes underlying the persistence and consequences of misinformation for political

psychology. We will examine interdisciplinary perspectives on mass communication, the structure and function of belief systems and political identity, and strategies for correcting political misperceptions (which often fail). A major goal of this course is to consider how psychological science contributes to our understanding of politics, and how the study of politics advances our understanding of human nature.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

What Infants Know, How Children Learn (125979)

Elizabeth Spelke

2019 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Despite recent advances in computer science and machine learning, human infants remain the most prodigious learners on the planet. This seminar considers the origins and nature of human cognitive development in four broad domains: knowledge of objects and their physical relationships, knowledge of people and social relationships, knowledge of geometry and the larger spatial layout, and knowledge of numbers and mathematics. We will discuss how these foundational cognitive building blocks support humans' ability to explain, understand, and generalize, skills that are critical for successfully navigating our surroundings. Understanding these core psychological competencies has become essential to progress in

many areas of society, including efforts to improve education, to create digital "cognitive assistants" who help us navigate, plan, and remember things, and to develop human-like artificial intelligence. Building on findings from basic research, we will consider how each of these efforts can be advanced.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

The First Five Years: Parenting and the Developing Mind (207885)

Jessica Schwab

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

How important are caregivers' actions for determining their children's destinies? In this seminar, we will delve into the ongoing scholarly debate about the extent to which parents can influence children's development over and above their genetic inheritance, with a focus on the first five years of life. We will reason through controversial parenting issues from the perspective of cognitive science, including questions such as what are the pros and cons of breastfeeding? How detrimental is "screen time" to a child's health and well-being? Does raising children to be bilingual help or harm their language development? Given the ubiquity of parenting advice and claims about child development – in combination with our own personal biases as former children and possible future parents – the goal for this course is to become more effective consumers of developmental science and learn to utilize empirical evidence in drawing our own conclusions about early childhood development.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Science of Stress (207564)

Katie McLaughlin

2019 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 80

Stress is a universal human experience. Why do we experience stress? What are common causes of stress in our modern world? How does stress influence our emotions and the way we think and behave? What are the consequences of stress for our health and well-being? Why are some people more vulnerable to developing stress-related illnesses than others? And perhaps most importantly – what are the most effective strategies for coping with stress? This course will address these questions with a particular focus on translating advances in the science of stress and stress management to help students learn how to manage stress more effectively in their lives.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Social Factors in the Development of Psychopathology (110110)

Sarah Hope Lincoln

2018 Fall (4 Credits)

Schedule: T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

Does bullying lead to school shootings? Can Facebook cause depression? Are "fitspiration" communities dangerous? This course will review the role social factors (social support, social interactions, social functioning, and the broader social context of communities) relate to the development and maintenance of psychopathology on biological and behavioral levels. In the context of disorders such as schizophrenia, depression (including suicide), eating disorders, and post-traumatic stress disorder, this course will look at how social factors might contribute to the development of mental illness, as well as how social factors might be indicators of mental illness, and finally how social factors might mediate the severity of or even prevent the development of mental illness.

Class Notes: Classes will end at 5:00 p.m.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18, PSY 1861 or Psyc S-1240 before enrolling in this course; or permission of instructor.

Buddha Meets Freud: The Influence of Eastern Religion on Western Psychotherapy (207827)

Rebecca Fortgang

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Can meditation cure depression? Over the last century, Buddhism has increasingly influenced western psychology and the practice of psychotherapy. With the development of Mindfulness Based Stress Reduction therapy in the 1970s, the integration of Buddhist principles in psychotherapy was first formalized in a unified treatment. Since then, multiple evidence-based treatments have fused eastern and western traditions for healing the mind. Meditation in particular has gained tremendous traction and empirical evidence supporting its many benefits – psychological and otherwise, leading even the more skeptical to acknowledge its value. This course covers historical and modern influences of eastern religion on western psychotherapy, including the modern science of meditation and the integration of these practices into current forms of psychotherapy and positive psychology. Students will have the opportunity to use these practices themselves for a first-hand understanding of how they work.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Psychology 1866

Psychosis: Development, Symptoms, and Treatment (207828)

Rebecca Fortgang

2019 Spring (4 Credits)

Schedule:

R 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Psychosis is among the most mysterious states of the human mind. It is a symptom of several psychiatric disorders, and can also be experienced temporarily under the influence of psychoactive drugs, sleep loss, or extreme stress. In this course, we will discuss the symptoms and phenomenology of psychosis and how it manifests in schizophrenia spectrum disorders, mood disorders, and other psychiatric conditions. Students will also learn about the various pathways of its development, with a focus on genetic and environmental influences, as well as possible treatment interventions. Students will be challenged to confront their preexisting notions about psychosis and to develop understanding and empathy for those experiencing it.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Psychology 1867

Pseudoscience and Mental Health (207860)

Sarah Hope Lincoln

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Have you ever wondered whether polygraphs (lie detectors) are valid assessments? Or why inkblots are thought to be useful tests for psychopathology? Or if multiple personality disorder actually exists? And if these ideas are misconstrued or false, why do so many people believe them? This course focuses on distinguishing pseudoscientific claims from scientific claims in clinical psychology. We will evaluate popular, and oftentimes controversial, methods, assessments, and treatments within the field of clinical science. Grounded in the fundamentals of scientific inquiry and research methods, students will sharpen critical thinking skills by evaluating pseudoscientific claims and learning to identify the characteristic features that distinguish pseudoscience and science. We will discuss the psychological issues associated with theories and practices such as false memories, projective testing, facilitated communication, the use of expert testimony, dissociative identity disorder, and harmful or unsupported treatments for psychiatric disorders.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and either PSY 18

or PSY 1861 before enrolling in this course.

Introduction to Statistics for the Behavioral Sciences (118254)

Thomas Rusch

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Provides a conceptual and practical introduction to statistics used in psychology and other behavioral sciences. Covers basic topics in statistics including: measures of central tendency and variability; probability and distributions, correlations and regression, hypothesis testing, t-tests, analysis of variance, and chi-square tests. Includes a lab section with instruction in statistical analysis using a computer program.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Empirical and Mathematical Reasoning.

Class Notes:

There will be an additional lab section to be arranged. The Q scores listed below are for a previous instructor, not for Dr. Rusch.

Psychology 1901

Methods of Behavioral Research (127078)

Mina Cikara

2019 Spring (4 Credits)

Schedule: M 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap: 40

This is a laboratory course only. Our goal is for you to master the essentials of behavioral experimentation through a succession of projects, starting with a small number of fundamental paradigms that can be used in many areas of psychology, culminating with a larger final project. Emphasis will be on acquiring practical laboratory skills and more abstract conceptual tools. Basic aspects of data exploration and analysis will be covered. A high value will be placed on the communication of results through effective visual graphics in oral and written reports.

Course Notes: There will be a required lab session in addition to lecture (schedule TBD, there is typically an afternoon and evening option). Students must be able to attend the lab session in order to enroll in the course.

Class Notes: In addition to the lecture, students must take a lab section to be held either Tuesdays 6-7:15 or Wednesdays 10:30 - 11:45.

Recommended Prep: The Psychology Department requires completion of Psychology 1900, Statistics 100, 101, 102, 104, or the equivalent.

Intermediate Statistical Analysis in Psychology (121738)

Patrick Mair

2018 Fall (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course offers intense, foundational exposure to psychological statistics, focusing heavily on analysis of variance (one-way, factorial, repeated-measures, mixed-model). Other topics include: exploratory data analysis, sampling distributions, null hypothesis significance testing, t-tests, fixed versus random effects,

post hoc and planned comparisons, correlation, simple regression, the general linear model, chi-square tests, nonparametric statistics, confidence intervals, and meta-analysis.

Course Notes: Required of doctoral students in Psychology.

Recommended Prep: One of Psychology 1900, Statistics 100, 101, 102, 104, or the equivalent.

Psychology 2030

Bayesian Data Analysis (160667)

Patrick Mair

2018 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Bayesian statistics is becoming more and more popular in psychology. This class covers basic and advanced topics of Bayesian statistics with a strong focus on applications in Psychology. Formulas and technical details are kept on a minimum — it is all about how to integrate Bayesian concepts into your everyday research.

The first part of the course introduces students to the Bayesian paradigm of inferential statistics (as opposed to the frequentist approach everyone should be familiar with). To have a good understanding of this idea, we need to elaborate on various concepts of probability theory (e.g., Bayes' theorem) and statistical distributions. We then introduce the key components of Bayesian inference (prior, likelihood, posterior), and discuss Bayesian hypothesis testing as well as Bayes factors.

Subsequent units focus on Bayesian regression (including model checks and model comparison) and mixed-effects models which, within a Bayesian context, belong to the family of Bayesian hierarchical models. There we also elaborate on modern approaches like integrated nested Laplace approximation (INLA) that allow us to efficiently estimate complex nonlinear, spatio-temporal models.

After midterm we look at what's going on under the hood: Markov chain Monte Carlo (MCMC). We introduce Stan, a probabilistic programming language for full Bayesian inference, which interfaces with R. We will then use Stan for some tasks related to Bayesian cognitive modeling. The last three units focus on the following special topics: Gaussian process regression and latent Dirichlet allocation (LDA), selected methods from Bayesian psychometrics, and Bayesian networks.

All topics covered will be supported by corresponding computations and illustrations in R.

Recommended Prep: This course is intended for Harvard doctoral candidates in Psychology. It is required that students both Harvard graduate and undergraduate students have completed Psych 1950 (or an equivalent course). That said, other students (e.g. Harvard undergraduates, Harvard graduate students from other fields, MIT graduate students) may obtain permission to take the course. It helps if students have at least basic R knowledge. If someone is new to R, two introductory R units will be given right at the beginning of the semester.

Psychology 2152

Abstract Thought in Non-Human Animals, Human Infants, Young Children, and Human Adults (160731)

Susan Carey

2019 Spring (4 Credits)

Schedule:

T 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

A scientific account of human concepts and conceptual development must characterize the content, format, and functional roles of both the innate and the mature conceptual repertoire, as well as the developmental processes that operate on the former to produce the latter. The evidence for innate sensory, perceptual, and motor representations is overwhelming; much recent work has provided evidence for richer primitives with content such as agent and object as well. But the adult conceptual repertoire includes explicit abstract concepts supporting natural language, spatial symbols, mathematics and logic. We will provide evidence for innate content in each of these domains, and explore the hypotheses that the representational systems that express that content nonetheless are qualitatively different from those that are realized in the adult state. These issues will be explored in three case studies: representations of number, geometry, and of logical connectives and abstract relations. The seminar will consider proposals from linguistics, philosophy, and cognitive science concerning the combinatorial resources of natural language, and will ask whether these resources are qualitatively different from those that articulate perception and action, and if so, whether they arise in human evolution only with the evolution of language, and in human development only in the course of language acquisition.

Course Notes: Undergraduates admitted by permission only.

Recommended Prep: The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1).

Samuel Gershman

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This course provides a tour of foundational topics in learning from a theoretical perspective. It covers a diversity of learning processes, aiming for breadth over depth (although it inevitably neglects several important forms of learning). Each meeting will consist of student-led presentations of two papers. Experience with computational modeling is not required, but students should have some familiarity with basic math (algebra and probability).

Recommended Prep:

For undergraduates, the Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or 1B=7 or Psych S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

Psychology of Racism, Prejudice, and Discrimination (108488)

James Sidanius

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course provides an in-depth and comprehensive exposure to the theoretical and methodological issues within the social psychology of racism and prejudice research. Approaches will include sociology, political science, and anthropology.

Course Notes: Open to advanced undergraduates with permission of instructor.

Recommended Prep: For undergraduate psychology students, completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Diagnostic Interviewing (113704)

Stephanie Roberts

2019 Spring (4 Credits)

Schedule:

M 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course is designed to provide students who already have a good working knowledge of psychopathology, with specific interviewing and diagnostic skills. Issues in psychiatric diagnosis will be discussed and particular attention will be devoted to the Structured Clinical Interview for DSM (SCID-5). We will focus on the SCID-5, with some exposure to other structured interviews (e.g. K-SADS). Diagnostic

interviewing techniques will be illustrated using video examples and in-class role-plays will be utilized for diagnostic assessment practice. The aim of the course is to provide students with the skills needed to make reliable diagnostic assessments for research and clinical purposes.

Course Notes: Graduate students only.

Bad Genes, Bad Parents, Bad Behaviors (159711)

Joshua Buckholtz

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This class will explore the biology of criminal behavior and violence. We will examine the construct of "anti-sociality" and unpack clinical and diagnostic issues surrounding its diverse manifestations, such as psychopathy. A strong emphasis will be placed on biological mechanisms. A particular focus will be on understanding how genes and environments act and interact to predispose antisocial behavior by shaping brain function and development.

Class Notes:

Classes will end at 2:00 p.m.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and either PSY 18 or PSY 1861 before enrolling in this course.

Intergroup Relations: Research Seminar (122753)

James Sidanius

2019 Spring (4 Credits)

Schedule:

R 0430 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

The seminar provides students with research experience concerning different forms of intergroup relations, including the social psychology of interracial and interethnic conflict and prejudice. Students meet on a weekly basis to discuss ongoing research on psychological mechanisms involved in power, stereotyping, inequality, identity, and ideology. Undergraduates will work under the supervision of a graduate student in the design and conduct of lab-based and survey experiments, and the input, coding and early analysis of empirical data. Undergraduate enrollees will also attend biweekly critical discussions of research articles in the field, and will have the opportunity to develop and receive feedback on their own research ideas.

Religion, The Study of

Subject: Religion

Religion A Section: 01

Introduction to Biblical Aramaic (116764)

Jon Levenson

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course covers all of the essential grammatical features of biblical Aramaic, and enables students to fully access those portions of the Bible composed in Aramaic, eg. Daniel and Ezra. We will also read the Second Temple book of Tobit in its original Aramaic, thus familiarizing ourselves with an interesting but under-studied text in a deep way. Jointly offered with the Divinity School as HDS 4059.

Course Notes: No previous knowledge of any Semitic language is assumed.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Meets Foreign Lang Req	Aramaic

Targumic Aramaic (211337)

Shaye Cohen

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Targumic Aramaic is designed to improve the student's ability to work with ancient Aramaic texts. The Aramaic texts studied in this course will be selected from the major Targums – Targums Onqelos, Neofiti, Pseudo-Jonathan, and others. Class-time will be devoted primarily to reading and analyzing the selected texts. In addition to emphasizing Aramaic vocabulary, morphology, and syntax, this course will explore the exegetical practices of the targumists in their respective Targums. Students will attain reading proficiency in Targumic Aramaic and experience the rich but complex literary nature of the Targums.

Course Notes: Two years of biblical Hebrew, or the equivalent; and Aramaic A. Offered jointly with the Divinity School as HDS 4060.

Class Notes: The course will be taught by Professor Cohen and staff

Interpreting Humanity, Interpreting Religion (208140)

Nicholas Boyleston

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a gateway to the Study of Religion, presented against the backdrop of a larger question: What is the purpose of the humanities in the 21st century?

Based on the premise that solely Eurocentric approaches to what it means to be human are shortsighted at best, we seek to think through new ways of engaging with global sources that shed light on our common humanity. The course develops around a critical engagement with the concept 'transcendence', which will help us to approach alternative worldviews without eliminating difference.

After thinking about the stakes involved in cultivating the life of the mind in a crisis point for human existence, we begin with an extended reflection on the intellectual and cultural moment in which we find ourselves, investigating how this conditions the way we frame questions of what it means to be human. Next, we take an honest look at the ways in which the dominant modes of knowledge and culture in the North Atlantic have been responsible for cultural, material and epistemic violence. Our exploration of diverse approaches to the human condition begins here, as we think through a range of responses to human-caused suffering. We then approach a range of questions of universal concern: What is ultimately real and how do we know what we know? What is the good, and how is it to be attained? How are we to relate to our fellow human beings, particularly when they seem deeply antagonistic?

This course is designed for freshmen and sophomores who are interested in exploring a vocation in the humanities. Throughout we will draw out the implications of the readings for our own intellectual and practical lives. Readings will include primary texts in translation drawn from traditions across the globe, as well as selected secondary literature.

The Letters of Paul: Ethnicity, Empire, the Body, and the End of the World (109528)

Laura Nasrallah

2019 Spring (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This introductory course focuses on 1) the Pauline epistles in their first-century sociopolitical context, and their earliest interpretations; 2) recent trends in Pauline studies, including feminist and postcolonial interpretation, the New Perspective, and European philosophical treatments (Badiou, Žižek). Special attention will be given to ideas of the gendered/enslaved body and its potential for transformation and pollution, ethnicity in the Roman world, the relations of communities to Roman imperial power, and views of time and the impending eschaton.

Course Notes:

Offered jointly with the Divinity School as 1544. Former course title: Paul's Letters and Their Interpreters: Ethnicity, Empire, the Body, and the End of the World.

Faith and Authenticity: Religion, Existentialism and the Human Condition (109861)

David Lamberth

Courtney Lamberth

Cornel West

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course engages some of the most fundamental questions of human existence through the philosophical, theological and literary works of 19th and 20th century authors many of whom are associated with the movement called "existentialism." What is an authentic individual life? How does one find meaning in light of modern challenges to claims about the nature of God, revelation and the soul? Is religious faith compatible with an understanding of historicity and the threat of nihilism? With a life of integrity and freedom? Of what use are philosophical and theological reasoning in establishing meaning? This course introduces central questions in Western philosophy of religion through close reading of fundamental texts in existentialism with attention to selected philosophical and theological sources. The course focuses especially on the themes of authenticity and absurdity, finitude and death, faith and ambiguity, and the quest for freedom and responsibility.

Course Notes: Additional hour to be arranged.

The Real Game of Thrones – Culture, Society, and Religion in the Middle Ages (205626)

Racha Kirakosian

2018 Fall (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The fictional world of "The Game of Thrones" is often associated with the Middle Ages. Why is this the case? What do our associations today tell us about the ways in which we appropriate history and narratives? In this course, we will use the popular fantasy show Game of Thrones to explore events, structures, and people in medieval history, art, and literature. Students will gain a reflective understanding of medieval culture, society, and religion while engaging in a critical discussion on medievalism.

Class Notes:

There will be a field trip to Dumbarton Oaks and Washington DC with one night at a hotel for ten students from the course. Harvard Yard Institutions.

Krishna and Christ: Text, Practice, Person, Experience (208033)

Francis Clooney

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

For centuries, people have compared and contrasted Jesus Christ, the central figure of Christian faith, and Krishna, a supreme deity of Hindu tradition, both understood as loving, saving figures who descend into this world and are embodied here, gather followers and offer instructions, and are to be approached by love and devotion. Yet they are also figures in very different cultures, histories, social and intellectual contexts. What have been their positions in their faith traditions? Who do the faithful believe them to be? How are they similar and different? Can they be beneficially understood by those who do not believe in them? Course readings will deal with great scriptural texts, worship practices, devotions, images, and their destinies as universal figures. Larger questions related to the nature of God, of religions, and of theology

itself will be raised. The course proceeds by key readings, discussed vigorously in class. Course requirements include brief weekly written responses to readings, and two 12-page course papers, but no final examination. Jointly offered with the Divinity School as HDS 3070.

Religion, Gender, and Politics in Transnational Perspective (156112)

Leila Ahmed

Ann Braude

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0259 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course follows key themes in religion and gender as these were shaped and reshaped through the colonial and post-colonial eras. In particular, the religious history of American women and the history of women in Islam primarily in relation to the Middle East (professors Braude's and Ahmed's fields respectively) are intertwined and brought into conversation. The interaction of religion, gender and sexuality and the turns and complexities imparted to these by the politics of imperialism, race, resistance, and the politics of class, are examined in the context of the emergence of modernity, nationalism, feminism and the globalization of religions in the wake of empire and Christian mission. Jointly offered with the Divinity School as HDS 3233.

The Shock of the New (108501)

Michael Jackson

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course will explore the impact of new worldviews, traumatic experiences, and radical technological innovations on both human lives and lifeworlds. It will cover some of the epistemological, ethical, social and existential quandaries that constitute what Robert Hughes calls 'the shock of the new', as well as the religious and ritual strategies whereby people struggle to avert, accommodate, cope with and comprehend massive changes to their lives. Interpretive perspectives will be drawn from psychology, philosophy, ethnography, ethology and biomedicine, while specific empirical cases will cover new media of communications and information processing, new genetic technologies, medical crises (disabilities, organ transplantation, trauma and epidemic disease), as well as culture contact and culture shock. Jointly offered with the Divinity School as HDS 3256.

Thinking Theologically in an Interreligious Perspective (126792)

Francis Clooney

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines the processes by which we learn interreligiously, by faith seeking understanding across religious boundaries. The goal is to bring this learning into dialogue with one's home tradition, by careful comparison and contrast, dialogical reflection and, ideally, a well-informed theological understanding of what it means to belong to one tradition and learn from another. Readings include (by way of a necessary example) Hindu and Christian primary and secondary texts, but students are encouraged to bring their knowledge of and interest in other traditions into the discussion, and may write one of two course papers on traditions other than the Hindu and Christian. Jointly offered with the Divinity School as HDS 3101.

Recommended Prep: Prior knowledge of either tradition, though desirable, is not required.

Religion and Family (208128)

Todne Thomas

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Religion and family are contested concepts that become politicized as they are mobilized and debated in the public sphere. Religion and family are also often depicted as separate forms of social organization. This course explores the ways in which religious and familial concepts, institutions, and relationships intersect to shape the lived experiences of religious participants who create and imbue their relationships with social and sacred significance. In particular, we will examine how rituals, practices, and meanings surrounding sexuality, marriage, parenthood, siblinghood, and genealogy become important signifiers of religious identity and membership. Our discussion of these case studies will also open up broader conversations about the politics ethnicity/race, gender, sexuality, fundamentalism, and trans/nationalism and their imprint on modes of religious and spiritual belonging. Jointly offered with the Divinity School as HDS 2126.

Black Women and Divinity in the African Diaspora (207945)

Marla Frederick

Todne Thomas

2018 Fall (4 Credits)

Schedule:

W 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

25

The religiosity of Afro-diasporic women has been studied in terms of the prevalence of their religious participation or their subjugation by patriarchal institutional authority. Yet, what of black women's proximities to the divine as carriers, representatives, embodiments, and authors of divinity? This new religious studies seminar course surveys a number of Afro-diasporic women's engagement with the divine. From black women's engagement with the divine as mystics, to their elaboration of modalities of theology and God-talk, to their representation as divine figures as Iwa, orisha, saints, or Madonna, to their crafting of ethnographic, historical, and literary narratives of black women's encounters with the divine and afro-futurity, this course surveys social scientific, religious studies, fictional, autobiographical, and visual sources.

Ritualization and Transitional Phenomena (108503)

Michael Jackson

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

The focus of this course is less on institutionalized rituals, viewed as framed and identifiable forms of social action, than on *ritualization* - on the everyday strategies, tactics and routines of 'playful' and 'magical' action whereby people manipulate words, gestures, emotions, bodies, objects and images in an effort not only to control and comprehend their relationship with the world but to change the way the world *appears* to them, particularly in times of separation and transition, change or crisis. Like play and fantasy, the process of ritualization is an intrinsic aspect of everyday life, evident in the ways human beings compose stories, furnish and clean their home-spaces, cook and eat meals, read a newspaper, court, joke,

argue, mourn, give gifts and converse. Crucial to all these actions is the process of transferring or projecting thoughts and emotions onto non-immediate objects or persons in an attempt to symbolically or vicariously grasp and transform confusing, contradictory or chaotic inner experiences. Jointly offered with the Divinity School as HDS 3818.

Course Notes: Offered jointly with the Divinity School as 3818.

Religion 1316

Spirit Possession and Exorcism in Early Christianity (208115)

Giovanni Bazzana

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0459 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will focus on the role played by spirit possession and exorcism in the religious experience and cultural trajectories of the early Christ group. Texts related to these two themes will be contextualized within the Second Temple Jewish and broader Mediterranean religious and cultural environments that witnessed the beginnings and the spread of the movement. Particular attention will be paid to the need to understand possession as a productive religious and cultural practice through which humans embody knowledge of their cultural past in performance, reflect and build their subjectivity, and map alternative ontologies. To this effect, a significant component of the course will consist in engaging and discussing ethnographic materials related to possession on the way to establish how these contemporary descriptions of possession phenomena might help guiding our historical imagination of the past and construe an effective and productive hermeneutics of it. No specific linguistic knowledge is required. Offered jointly with the Divinity School as HDS 1558.

Introduction to the New Testament (113956)

Karen King

2019 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

The course will address the questions: What is the New Testament? What work does the New Testament do? We will examine various approaches including scripturalizing, minority Biblical criticism, and historical criticism. Topics include teachings of/by/about Jesus, Jews and Christians, empire and colonialism, the roles of women, Roman and US slavery, the politics of storytelling and canon formation, heresy, and sexualities/masculinities/gender.

Course Notes: Offered jointly with the Divinity School as 1202.
Additional hour to be arranged.

Greek Exegesis of 1 Corinthians (109529)

Laura Nasrallah

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course is devoted to close reading and interpretation of 1 Corinthians. Discussion of the Greek text of 1 Corinthians will focus on use of rhetoric and the socio-political and theological issues of the text. This course also fulfills the study of fourth semester Greek. If you have any concerns about your level of Greek, please contact the instructor. Jointly offered in Divinity School as HDS 1551.

Course Notes:

Offered jointly with the Divinity School as 1551.

From Saint to Witch: Female Spirituality in the European Middle Ages (156422)

Racha Kirakosian

2019 Spring (4 Credits)

Schedule:

W 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course deals with the forms of spirituality that were associated with women in the Middle Ages. Considering the history of spirituality as "the study of how basic religious attitudes and values are conditioned by the society within which they occur" (Caroline W. Bynum), the course takes male-dominated debates of female spirituality and sanctity into account. It deals in particular with mysticism but also looks at other forms of religious life. This course also covers theological questions such as the gender of the soul. Primary sources (with translations) include texts by Meister Eckhart, Mechthild von Magdeburg, Bridget of Sweden, and Jean Gerson as well as sculptures, relics, and other objects. Theoretical readings comprise works on gender and body studies.

Christian Ethics, Persuasion, and Power I (126763)

Mark Jordan

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0159 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Teaching ethics-or writing about it-can be a powerful effort at life-changing persuasion. Early Christians wrote in this way against older religious laws or rites but also in competition with philosophical curricula for soul-shaping. This course reads some exercises in ethical persuasion from Christianity's philosophical competitors: Plato, Aristotle, Epictetus, the Cynics. It juxtaposes these with early and medieval Christian authors that want to surpass the philosophers in persuasive power: Gregory of Nyssa, Augustine, the desert ascetics, Alan of Lille, Bonaventure, Thomas Aquina, Marguerite Porete. Jointly offered with the Divinity School at HDS 2393.

Course Notes: Offered jointly with the Divinity School as 2393.

Class Notes: Course has additional section hour to be arranged.

Cities on a Hill: Images of America as a Redeemer Nation, 1630-present (156249)

Catherine Brekus

2019 Spring (4 Credits)

Schedule: T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Beginning with John Winthrop's 1630 speech, "A Model of Christian Charity," and ending with the 2012 presidential election, we will examine images of America as a city on a hill. We will ask several questions: How and why have Americans conceived of the nation in sacred terms? How have religious images of the nation developed and changed over time? What are the implications of America's "civil religion"? We will discuss the Puritan idea of a national covenant, the millennial rhetoric of the American Revolution, defenses of manifest destiny, the sacrificial theology of the Civil War, religious and political rationales for global missions, the rise of the Christian Right, and presidential invocations of America as a city on a hill. We will also examine how women's rights leaders, abolitionists, and civil rights activists both critiqued and appropriated the image of America as a city on a hill. Jointly offered with the Divinity School as HDS 2180.

Course Notes: Offered jointly with the Divinity School as 2180.

Sovereignty, Providence, History (208142)

Michelle Sanchez

2018 Fall (4 Credits)

Schedule: T 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This advanced seminar looks at some of the most important theoretical literature addressing the relationship between distinctly Christian theological approaches to worldly governance and those that emerged with "Western modernity." We will look at classic works as well as recent scholarship on the relationship between divine and political conceptions of sovereignty; providential and progressive approaches to historical time and "development"; and the impact of both of these on modern understandings of race, culture, and governance. The course equips students to understand and critique the structure of common assumptions of "superiority," "advancement," and "development," challenging any simplistic binary between a theological and secular imagination. At the same time, it encourages students to take up an original research project, asking in part how attention to theology can be a critical resource for attending to alternate histories and imagining alternate modes of governance. Jointly offered with the Divinity School as HDS 2197.

Nineteenth Century Religious Thought: Theology and the Critique of Religion (109865)

David Lamberth

2019 Spring (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

The nineteenth century formulated many of the questions and frameworks that continue to dominate theology and religious reflection in the West. This course considers the developing interplay between modern Christian theology (primarily continental) and the principal philosophical and social critiques of religion in the nineteenth century. Topics include human nature, religion, the divine-human relationship, religious knowledge, the social, and historicity. Readings from Lessing, Kant, Schleiermacher, Hegel, Marx, Feuerbach, Kierkegaard, Nietzsche, Harnack, and Troeltsch. Jointly offered with the Divinity School as HDS 2431.

Course Notes: Offered jointly with the Divinity School as 2431.

The Bible in the Public Square (208032)

Elisabeth Schussler Fiorenza

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0459 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

The Bible seems to speak loud in the public square when it comes to gay marriage, abortion, or the Religious Right's advocacy of Trump's vision to "make America great again." However, the Bible's voice is less heard in matters of justice for immigrants, gun control, budget cuts to key social services or rapidly increasing poverty and income inequality. This course will explore the "other voice" of the Bible calling for justice and love for the poor, the afflicted, the immigrant, and the stranger. We will ask whether and how biblical scholarship addresses this problem of the missing biblical voice of justice in public discourse and inquire as to what can be done to amplify the Biblical call for justice in the public square. Jointly offered with the Divinity School as HDS 2074.

Religion and Race in the United States (207215)

Todne Thomas

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Religion and race mediate contested social memberships. Religious imaginaries often possess power through their association with eternal and transcendent truths. Racial identities have existed as powerful social taxonomies because they are believed to be fixed, innate, and biologically-determined. Thus, religious and racial phenomena are powerfully imagined as somehow existing beyond the realm of the social. When set in the context of the United States—a society that is self-referentially exceptional and multicultural but that is informed by hegemonic and colonial white Anglo-Saxon Protestant cultural norms—the critical, deconstructive study of religion and race emerges as a complex yet significant intellectual project. This new intermediate class examines how religion and race intersect in the United States from the nineteenth century until the present. Through our shared analysis of texts that straddle a number of disciplines and genres, we will explore how religion and race mutually inform shared understandings of socio-political belonging, hierarchy and boundaries, recuperative institutional projects, and structural and personal identities. Jointly offered with the Divinity School as HDS 2127.

The Complete Hindu Theologian: Ramanuja (1017-1137) as Intellectual, Devotee, and Reformer (207997)

Francis Clooney

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Theology and the study of religions depend on the works of great religious intellectuals, but rarely do we study integrally the range of their works, attending to the person, her or his ideas, interpretive practices, personal experiences and devotional commitments. Without the person, the theology is liable to distortion and misunderstanding, rootless ideas. This course focuses on Ramanuja (1017-1137), one of the greatest Hindu theologians. He belonged to south India's Srivaishnava tradition, and has been for 1000 years its main inspiration in theology and practice. His nine works include philosophy and commentaries, instructions for insiders and debates with outsiders, ecstatic prayers, and even a manual of daily worship. What inspired his writings? What was his message to believers and non-believers? How might he change how we think of "theology" and "theologian" today, and challenge the customary practices of South Asian studies? This seminar is text-oriented, focused on Ramanuja's own works, but with some secondary readings. Jointly offered with the Harvard Divinity School as HDS 3754.

Course Notes: Jointly offered with the Divinity School as HDS 3754.

The Jesuits in India: Missionaries, Pioneers, Scholars (207996)

Francis Clooney

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0559 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This seminar explores the Jesuit missionary tradition in India, from Francis Xavier's arrival in Goa in 1544, to great innovators such as Roberto de Nobili, Constantine Beschi, and (in Tibet) Ippolito Desideri, the cautious schoolmen of the 19th century, up to the work of the Belgian Jesuit scholars in Bengal in the early and mid-20th century – and finally, the Indian Jesuits who now lead the way. Background attention will be given to the wider Jesuit mission in Asia, but the focus will be on India. Emphasis will be on primary sources read in English, with interest in the historical and theological dimensions of the interreligious encounters, the nature and purpose of Jesuit interreligious scholarship, the theology generated by Jesuit missionary scholars, and the problems accruing to missionary work and its complicity in empire. Key too is the response to the Jesuits by Indian religious intellectuals across the centuries. Jointly offered with the Divinity School as HDS 2780.

Forms of Life: Buddhist Ethics for a Posthuman World (208012)

Janet Gyatso

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will bring Buddhist ethics into conversation with contemporary "posthuman" studies. It will take as its starting point Buddhist scriptural sources that explore notions of life (āyus and related terms), compassion, interdependence, and karma, and attempt to think these through in light of current questions in interspecies ethics and connected issues around life on this planet. In so doing it will draw upon Buddhist and/or contemporary critical theory in such diverse areas as history of medicine, animal studies, continental philosophy, biopolitics, systems of bodily and moral cultivation, etiquette, aesthetics, and the phenomenology of perception -- all in service of developing a virtue ethics for a posthuman future. The course resources will also include video materials. Jointly offered with the Divinity School as HDS 3247.

Persian Sufi Literature (208141)

Nicholas Boylston

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this course we will explore the major genres of classical Persian Sufi poetry and prose. In addition to examining the formation of these genres and their contexts of composition, we will pursue a range of broader questions, including: What is Sufism, and how do we discern 'Sufi' from 'non-Sufi' literature? What have the purposes and functions of literature been in Persianate Islamic contexts? What is the relationship between language, realization and experience in Persian Sufi literature, and how do authors in the Sufi tradition deal with the problem of ineffability? What is the place of love in Persian Sufi literature and how is it conceptualized? And, how do Persian Sufi authors deal with the diversity inherent in human experience?

Readings will include Baba Tahir, Umar Khayyam, Sana'i, Attar, Rumi, Ahmad and Abu Hamid al-Ghazali, Sa'di, Hafez, Fakhr al-Din Iraqi, Shabistari, and Jami. All readings will be in English translation, but there will be an extra section for students with advanced Persian to read texts in the original. Jointly offered with the Divinity School as HDS_____.

Muslim Devotional Literatures in South Asia: Qawwalis, Sufiana Kalam (Sufi Poetry) and the Ginans (161217)

Ali Asani

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores traditions of Islamic spirituality in South Asia through the lens of three genres: the qawwali, concerts of mystical poetry; sufiana kalam, Sufi romantic epics and folk poems; and the ginans, hymns of esoteric wisdom recited by the Satpanthi Ismailis. Since these genres represent examples of language, symbols and styles of worship shared across Islamic and non-Islamic denominational boundaries, we will also examine their relationships with other Indic traditions of devotion, particularly those associated with the so-called sant and Hindu bhakti movements. Special emphasis will be given to the impact of contemporary political ideologies, globalization and the revolution in media technology on the form and function of these genres and their relationship with contemporary communities of faith in South Asia and beyond.

This course explores the doctrines and practices of the Ismailis, adherents of a minority branch of Shia Islam that recognizes the continuation of religious authority after the Prophet Muhammad through a particular line of his descendants known as the *Imams*. Focusing on their historical evolution and manifestations in diverse political, cultural and social contexts, the course will consider three major communities: the Nizari Ismailis (in Syria, Iran, Central Asia, and South Asia); the Tayyibi (Daudi Bohra) Ismailis (in Yemen and South Asia) and the Druze (in Syria and Lebanon). Principal themes to be considered include conceptions of the *Imamah* and notions of authority, messianic doctrines, philosophy, ritual practice and devotional traditions. The course will also briefly consider the contemporary situation of these communities as minorities in North America and Europe. Jointly offered with the Divinity School as HDS 3939.

Course Notes: Offered jointly with the Divinity School as HDS 3939.

What is Good in Islam? Ethics in the Islamic Tradition (208066)

Nicholas Boylston

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Can values be judged by reason or are they dependent on revelation? What is the goal of human existence and how is it to be attained? What is the relationship between the Sharia and ethics? What are a human's responsibilities towards fellow humans? How is the human self to be cultivated? In this class we will explore the diverse approaches to these questions in the Islamic tradition, with a focus on the pre-modern. Beginning with the Quran and Hadith, we will discuss a wide range of discourses in which questions of the good, the right, and the cultivation of virtue have been addressed, including theology, law, philosophy, literary ethics (adab), and various strands of the Sufi tradition. Throughout the course we will pay close attention to ways in which conceptions of what is good are connected to accounts of the nature of reality and the sources of human knowledge, noting how ethical questions pervade Islamic systems of knowledge and practice.

Jointly offered with the Divinity School as HDS 3042.

Religion and Neoliberalism (208110)

Todne Thomas

2018 Fall (4 Credits)

Schedule: T 1200 PM - 0159 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

As it is popularly conceptualized, neoliberalism is a political and economic system that calls for the deregulation of capitalist enterprises, the increasing privatization of government services, and the application of market rationalities in the operation of social institutions. Yet, how does neoliberalism interface with religion? What religious sensibilities are encoded in and spread amidst neoliberal formations? Through our review of theoretical texts and anthropological monographs, this course investigates religion and neoliberalism around some of the following loci: Christian temporal reckonings that shape renditions of millennial capitalism and late liberalism, moral orders, co-constitutive discourses and institutions of prosperity and accumulation, and conflicting paradigms of selfhood and belonging. Offered jointly with the Divinity School as HDS 2125.

This course will explore the rich philosophical legacy of Platonism after Plotinus, including such figures as Porphyry, Iamblichus, Hypatia, Proclus, and Damascius. Some attention will be given to the Chaldean Oracles and the Hermetic corpus as well. Special attention will be given to debates around the theory and practice of theurgy, the possibilities of mystical union with the One, and the relationship between philosophy and theology. There are no prerequisites, but some knowledge of the history of ancient philosophy, especially Platonism, is recommended. Jointly offered with the Divinity School as HDS 2725.

Coloniality, Race, and Philosophy of Religion (207879)

Mayra Rivera

2018 Fall (4 Credits)

Schedule:

T 0900 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

This advanced seminar explores the persistent effects of colonialism and its racial hierarchies in our modes of thinking, including concepts that inform the study of religion. The readings for class tell different accounts of the historical imbrications of colonialism, race, and religion and propose a variety of approaches to study their relations. Additionally, students will participate in a colloquium, which will bring to campus scholars currently working on this area. Jointly offered with the Divinity School as HDS 2584.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

FAS: Course Level	Primarily for Graduate Students

Religion 2510

Narratives of American Religion: The Canon and Its Revisions (156251)

Catherine Brekus

David Holland

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0259 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will examine the writing of American religious history from the nineteenth century until the present. In the first part of the course, we will trace the creation of an American religious historical "canon." Readings will include Robert Baird's *Religion in America* (1844), William Warren Sweet's *The Story of Religions in America* (1930) and Sydney E. Ahlstrom's *A Religious History of the American People* (1972). In the second part of the course, we will explore the transformation of the field of American religious history since the 1970s. In addition to reading textbooks such as Catherine Albanese's *America: Religion and Religions* (1981) and George Marsden's *Religion and American Culture* (1990), we will read case studies of new approaches and methodologies. Our goal is to assess the strengths and weaknesses of both the canon and the new religious history that has taken its place. Jointly offered with the Divinity School as HDS 2185.

Course Notes: Offered jointly with the Divinity School as HDS 2185.

Religion 2537

Religion and the Human Mind: Philosophy of Religion Then and Now (208053)

David Lamberth

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0529 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

What should we think about religion from the standpoint of our fast-developing understanding of the human mind? This was a live question at the end of the 19th century when American philosopher William James brought the cutting edge of physiological psychology to the philosophy of religion. Today, neuroscientists likewise are pushing experimentally grounded theories of mind, which provoke similar reassessments of religion. This seminar focuses on the work of James and contemporary neuroscientist Antonio Damasio, then assesses selected current understandings of religion. Participants will work in research groups, and present joint projects in the final weeks of class. Limited to 15. Jointly offered with the Divinity School as HDS 2506.

Religion 2546

Wo/men and Early Christian Beginnings: Revisiting *In Memory of Her* (207999)

Elisabeth Schussler Fiorenza

2018 Fall (4 Credits)

Schedule: T 0900 AM - 1059 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

In Memory of Her: A Feminist Theological Reconstruction of Christian Origins, appeared in 1983, almost 40 years ago, and has become a foundational text for the study of wo/men in early Christianity and for feminist the*logy. Since the book inaugurated the field of feminist historical and theological studies in early Christianity, the seminar will revisit this volume and explore questions of Christian origins, its Jewish roots and Greco-Roman historical contexts, the development of institutional structures, wo/mens leadership and the book's reception and ongoing significance for historical gender studies in religion and feminist the*logy.

Transcendentalism and Nature (208007)

Dan McKanan

Charles Stang

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

The Transcendentalist movement of the nineteenth century is often credited with inaugurating the American environmental movement—in part, paradoxically, because Transcendentalists stressed the primacy of the spirit in what they regarded as a troublingly materialistic age. This seminar will explore significant writings about nature by Ralph Waldo Emerson, Henry David Thoreau, Margaret Fuller, John

Muir, and others, alongside recent texts connecting them to environmental philosophy, the new materialisms, and the study of western esotericism. Jointly offered with the Divinity School as HDS 2310.

Islamic Institutions - Middle East & Beyond: Modern Transformations & Debates (19th-21st centuries) (208008)

Malika Zeghal

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This graduate seminar explores the transformation of Islamic institutions in the modern period, such as religious endowments (Awqaf), sharia courts, and Islamic education. We will engage with the historiography of these institutions and with primary sources in Arabic that will help us open new paths for research.

Recommended Prep: Arabic reading proficiency preferable.

Romance Languages and Literatures

Subject: Portuguese

Portuguese 10

Beginning Portuguese I: From Cambridge to Copacabana (120398)

Benedict Cruz

2018 Fall (4 Credits)

Schedule:

MTWR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Intended for those with no prior experience in the target language, this course emphasizes interpersonal communication as well as the interpretation and production of written and spoken language. Students take their first steps on the journey from speaking English to carrying conversations with Portuguese speakers over the course of one semester, thanks to immersion activities and dynamic, interactive learning. Students will be exposed to contextualized Luso-Afro-Brazilian culture through music, film, social media, as well as via Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes:

Conducted in Portuguese. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have previously studied Portuguese must take a placement exam. Students with a solid knowledge of Spanish should enroll in PORTUG 10s instead of PORTUG 10. This course is taught by members of the Department.

Class Notes:

This course requires four contact hours per week. Each class session is one hour (e.g., 9-10am).

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Meets Foreign Lang Req	Portuguese
FAS Divisional Distribution	None

Portuguese 10S

Beginning Portuguese for Spanish Speakers I: It's SAMBA, not Salsa! (113806)

Benedict Cruz

2019 Spring (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Designed specifically for students with a sound knowledge of Spanish. This course presents linguistic and cultural structures necessary for basic communication, emphasizing the features of Portuguese most challenging for Spanish Speakers: pronunciation, idioms, and grammatical structures peculiar to Brazilian Portuguese. Over the course of the semester, students learn to express themselves effectively using their Brazilian voice, distinct from their Spanish voice. Students experience contextualized Lusophone culture through music, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes: Conducted entirely in Portuguese. Requires a solid knowledge of but not necessarily native proficiency in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Class Notes: This course requires an average of four contact hours per week. To supplement the scheduled 3.75 hours, there will be a 30-minute online component assigned every week.

Recommended Prep: Prerequisite: 720 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; a 30s level Spanish course; or permission of Course Head.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students

Benedict Cruz

2019 Spring (4 Credits)

Schedule: MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

Guides students to continue the work of confronting features of the Portuguese phonological system that are most challenging for Spanish speakers. It helps solidify the student's foundation in Brazilian Portuguese, and pushes them to go deeper by engaging with literary readings, examining unique cultural aspects in addition to practical points of the language. Students will continue to experience contextualized Lusophone culture through music, film, literature, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

This intensive Beginning Portuguese course provides an accelerated introduction to Portuguese with emphasis on interpersonal communication and interpreting and producing language in written and oral forms. Goals include building students' vocabulary, fluency, proficiency, and confidence. Students are exposed to Brazilian Portuguese and culture through music, cinema, and various media sources. The course covers the equivalent of a full first-year of Portuguese language study.

Course Notes: May not be used to fulfill the language requirement and may not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the Portuguese 15 course head and receive permission to enroll in the course.

Recommended Prep: An advanced knowledge of at least one other foreign language but no knowledge of Portuguese.

Portuguese 15

Intensive Beginning Portuguese (156944)

Viviane Gontijo

2018 Fall (8 Credits)

Schedule:

MTWRF 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This intensive Beginning Portuguese course provides an accelerated introduction to Portuguese with emphasis on interpersonal communication and interpreting and producing language in written and oral forms. Goals include building students' vocabulary, fluency, proficiency, and confidence. Students are exposed to Brazilian Portuguese and culture through music, cinema, and various media sources. The course covers the equivalent of a full first-year of Portuguese language study.

Course Notes: May not be used to fulfill the language requirement and may not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the Portuguese 15 course head and receive permission to enroll in the course.

Class Notes: This course requires an average seven contact hours per week. To supplement the scheduled 6.25 hours, a weekly online component will be arranged.

Recommended Prep: An advanced knowledge of at least one other foreign language but no knowledge of Portuguese.

Portuguese 20

Intermediate Portuguese: Palcos e Palavras (121934)

Viviane Gontijo

2019 Spring (4 Credits)

Schedule:

MWF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An intermediate course for students interested in expanding and strengthening their Portuguese language skills. Reading, writing, and conversational competencies are emphasized through a panoramic study of Luso-Afro-Brazilian Theater. The course will continue to promote cross-cultural understanding by introducing learners to different textual genres such as screenplays, critical review as well as a selection of literary work that represents the Lusophone arts. The weekly online Teletandem interaction with college students in Brazil, unique to the Portuguese Program, allows learners to discuss readings, and engage in peer-review of writing completed for this course.

Course Notes:

Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.

Recommended Prep:

Prerequisite: PORTUG 11 (AB) or 11s (AD) OR permission of Course Head.

Requirements:

Prerequisite: Portuguese 11 OR Portuguese 11s
