Environmental Science and Public Policy

Subject: Environmental Sci & Public Pol

Environmental Sci & Public Pol 78 Section: 1

Environmental Politics (112610)

Sheila Jasanoff

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the history, organization, goals, and ideals of environmental protection in America. Examines the shifts in emphasis from nature protection to pollution control to sustainability over the past hundred years and develops critical tools to analyze changing conceptions of nature and the role of science in environmental policy formulation. Of central interest is the relationship between knowledge, uncertainty, and political or legal action. Theoretical approaches are combined with case studies of major episodes and controversies in environmental protection.

Course Notes: Offered in alternate years with ESPP 77.

Additional Course Attributes:

Conservation Biology (119814)

Aaron Hartmann

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0600 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The major goal of conservation biology is to preserve and recover populations and ecosystems through evidence-based assessment, analysis, and management. This course will integrate ecological and evolutionary theory into resource management, economics, sociology, and political science to explore conservation strategies, the value of ecosystem services, and the challenge of decision-making under conflicting interests. Case studies will include major contemporary issues such as the preservation of foundational taxa (e.g., corals on tropical reefs, trees in rainforests), management of genetic diversity, defining recovery targets, and ecosystem-based management. A local field trip within New England will be arranged.

The Law and Policy of Climate Change: Influencing Decision Makers (208113)

Aladdine Joroff

2019 Spring (4 Credits)

Schedule:

M 0600 PM - 0845 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Empirical data demonstrate that the climate is changing and that these changes could produce increasingly serious consequences over the course of this century. Governments and private actors around the world are strategizing, debating, lobbying, implementing, and defending mechanisms to both mitigate and adapt to the impacts of climate change. This course will explore (i) the legal framework in which climate change action occurs in the United States, (ii) policy tools available to regulators, (iii) impacts on regulated entities and individuals and (iv) opportunities for private stakeholders to participate in and influence climate change decisions.

Energy Economy for Developing Countries: Perspectives from the Past; Challenges for the Future (123858)

Michael McElroy

Xinyu Chen

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The seminar will provide a historical perspective on the development of the Chinese, Indian and African economies with emphasis on their energy sectors, including analysis of related environmental problems. Low-carbon energy options will be introduced, including opportunities for nuclear, wind, solar, hydro, and biofuels. Relations to the global energy systems will be discussed. The seminar will discuss tradeoffs implicit in these choices with respect to reconciling competing goals for environmental protection and economic development.

The Technology, Economics, and Public Policy of Renewable Energy (127572)

George Baker

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0600 PM

Instructor Permissions: Instructor

Enrollment Cap:

50

Energy is the lifeblood of economic activity, and there is little prospect of this changing. However, the planet's stores of easily accessed fossil fuels are limited, and the climatological cost of continuing to rely on fossil fuels is high. This course examines the long run and short run prospects for renewable energy. We start by understanding the technology of hydro, solar, wind, and biomass. We then examine the economics of these technologies, and how subsidies and taxes affect their viability. Special attention will be paid to the interaction of technology, economics, and public policy.

Course Notes: This course will be offered in a seminar format with an enrollment limit of 50.

Recommended Prep: Economics 10a.

Climate Policy—Past, Present, and Future (203663)

Gernot Wagner

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

What's the optimal way to curb carbon emissions? Should we price fossil or subsidize low-carbon energy? What's the role of solar geoengineering? What should it be? What will it be? The course has two goals: to provide a set of tools to approach these and many other fundamental climate policy questions, and to help us distinguish positive (Dzwhat will bedz) from normative (Dzwhat should bedz) analysis. Economics and political economy provide particularly powerful lenses through which to analyze climate policy—past, present, and future.

Course Notes: Prerequisite Ec 10.

Enrollment Cap:

n/a

This course will provide students with an introduction to current topics in environmental science and engineering by providing: an overview of current environmental issues, critically evaluating their underlying science and knowledge limitations, and exploring the best-available engineering solutions to some of our most pressing environmental problems. The course will emphasize the interconnected biological, geological, and chemical cycles of the earth system (biogeochemical cycles) and how human activity affects these natural cycles within each of the major environmental compartments (atmospheric, aquatic, and terrestrial).

Recommended Prep: The course presumes basic knowledge in chemistry, physics, and mathematics at the high school level.

2019 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to the physics that determine our planet's climate motivated by concerns about human-driven climate change. From highly-simplified models of radiation and convection in a column to state-of-the-art models of the general circulation, the course provides a hands-on introduction to modeling tools as a basis for understanding predictions of climate change and assessing their uncertainty. Solar geoengineering, the possibility of deliberate large-scale intervention in the climate, is covered as a potentially important new application of atmospheric science and as a tool to motivate analysis of aerosol radiative forcing, feedbacks, and uncertainty.

Recommended Prep: One freshman-level math or applied math course, one freshman-level science course, and physics at either the freshman or high-school level; or, permission of instructor.

This course will showcase how novel technologies have allowed fascinating new insights into key aspects of our environment that are of high societal importance. Students will gain both an understanding of topics such as climate change and air pollution as well as detailed knowledge of the design and underlying principles of environmental instrumentation, especially via the hands-on laboratory sessions.

The development of novel instrumentation, driven by technological advances, is transforming observations and revolutionizing the environmental sciences. For example, they introduce new observables and extend the spatial and temporal coverage and resolution of (Earth) observations. This course will highlight how state-of-the-art instrument design has enabled these fascinating advances by focusing on the engineering as well as physics and chemistry principles that are central to this success. A central component of the course consists of laboratory sessions that provide hands-on experience on important aspects of analytical instrumentation, ranging from data acquisition, instrument control software, basic electronic filtering all the way to learning design concepts and operation of spectroscopic and mass-spectrometric instrumentation. There will also be a tour of some of the laboratories using state-of-the-art environmental instrumentation at Harvard. The course and especially the laboratory experiments contain aspects from various engineering disciplines including environmental, electronic and mechanical engineering.

Recommended Prep: Math 1a, b; PS 11 or equivalent; PS 12a, b (or Physics 15a, b or AP 50a, b).

Engineering Sciences 112

Thermodynamics by Case Study (160454)

Scot Martin

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Fundamental concepts and formalisms of conservation of energy and increase of entropy as applied to natural and engineered environmental and biological systems. Pedagogical approach is to start with real-world observations and applications, extracting the underlying fundamentals of thermodynamics from these.

Course Notes:

ES 112 is also offered as EPS 112. Students may not take both for credit. Undergraduate engineering students should enroll in ES 112. Total class capacity of 18 includes students in both ES 112 and EPS 112.

Class Notes:

Enrollment in this course is limited to 18 students and will be determined by a lottery if interest exceeds the limit.

- For the lottery, please send an email to me (smartin@seas.harvard.edu) with your rationale for taking the course.
- You must attend class on January 28 to be eligible for the lottery.
- Students wishing to enroll in this course must enter the lottery by 8 am on Tuesday, January 29, by adding the course to your Crimson Cart in my.harvard.edu and requesting enrollment permission.
- You will be notified about whether you may enroll in this course by 5 pm on Tuesday, January 29.
- Students who are not selected by the lottery will be waitlisted.

Ethnicity, Migration, Rights

Subject: Ethnicity, Migration, Rights

Ethnicity, Migration, Rights 121

Native Americans in the 21st Century: Nation Building II (160752)

Dennis Norman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 25

This field-based research course focuses on some of the major issues Native American Indian tribes and nations face as the 21st century begins. It provides in-depth, hands-on exposure to native development issues, including: sovereignty, economic development, constitutional reform, leadership, health and social welfare, land and water rights, culture and language, religious freedom, and education. In particular, the course emphasizes problem definition, client relationships, and designing and completing a research project. The course is devoted primarily to preparation and presentation of a comprehensive research paper based on a field investigation. In addition to interdisciplinary faculty presentations on topics such as field research methods and problem definition, students will make presentations on their work in progress and findings. Recommended course: PED-501M. Enrollment limited to 24 students. Permission of instructor required. Must contact instructor prior to enrolling by email, dennis_norman@harvard.edu. Jointly offered at Harvard Kennedy School as DEV 502 and Harvard Graduate School of Education as A102.

Course Notes: The course requires instructor consent.

Class Notes: Contact dennis_norman@harvard.edu by email with information about the current program that you are enrolled in, year of expected graduation, and why you are interested in this course. Professor Norman grants final approval for enrollment. The class will be held at 14 Story Street, Conference Room 4th floor.

Ethnicity, Migration, Rights 127

Racial and Ethnic Inequality in Education: The Role of Culture (203918)

Natasha Warikoo

2018 Fall (4 Credits)

Schedule: T 0100 PM - 0359 PM

Instructor Permissions: Instructor

Enrollment Cap: 2

Scholars, educators, and journalists often use culture to explain differences in academic achievement by race--sometimes insightfully and other times more clumsily. However, the evidence for cultural explanations is thin and difficult to assess. Cultural explanations for low achievement have sometimes been criticized as blaming children for their own low achievement, and as offering little to practitioners and policymakers on ways to reduce educational inequality. On the other hand, cultural explanations for high achievement frequently assume a model minority myth. This course addresses how and when culture can

lead to ethnic and racial inequality in education, in order to facilitate a better understanding of how to reduce educational inequality. We will analyze differences between and within ethnic and racial groups. In addition to ethnic and racial cultures, the course addresses school culture, youth culture, popular culture, and cultural identities. Discussing solutions for reducing inequality will be an important component of this course. The course will be run as a seminar.

Permission of instructor required. Enrollment limited to 25. Jointly offered at HGSE as EDU A133.

Ethnicity, Migration, Rights 129 Section: 1

Education in Armed Conflict (205500)

Sarah Dryden Peterson

2019 Spring (4 Credits)

Schedule:

M 0900 AM - 1200 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course examines the multidimensional and multidirectional relationships between armed conflict and education. How can education contribute to the work of building "lasting peace" in settings of armed conflict globally? How does education reflect inequalities and reinforce social tensions? How does it contribute to stability and reconciliation? What role does it play in shaping individual and collective imaginings of a post-conflict future? Through critical reading of theoretical texts and case studies, engagement with guest speakers, simulations, and other learning tools, we will adopt an action-oriented approach to investigation of these and other questions. We will look beyond the provision of schooling to the learning and teaching that takes place in schools and community settings, and examine the relationships that are at the core of these educational interactions. Central to discussions will be connections between public policy, daily experiences, and social justice. The course includes a semester-long project through which students will deepen their research, writing, and policy analysis skills, and explore the intellectual and practical dimensions of connecting research, policy, and practice.

Open to all students with an interest in settings of armed conflict or comparative education generally.

Course Notes:

Required, weekly, one-hour section.

Offered jointly with HGSE as EDU A816. Harvard College students can enroll with instructor consent.

Ethnicity, Migration, Rights 131

Loves Labors Found: Uncovering Histories of Emotional Labor (207804)

Caroline Light

2018 Fall (4 Credits)

Schedule:

R 0900 AM - 1145 AM

How do love, care, and desire influence the value of work, and why is emotional labor – which is vital to child or elder care, domestic labor, nursing, teaching, and sex work – often considered to be something other than work? How and why do the racial and gender identities of workers affect the economic, social, and emotional value of their labor? How do political and social arrangements of labor help produce and reinforce racial categories while solidifying the boundaries separating masculinity and femininity? Through a mix of primary and secondary sources, this seminar explores histories of emotional labor and the power structures that give meaning to often taken-for-granted categories of work. These sometimes hidden histories are key to untangling the gender, sexual, and racial implications of the "intimate industries" that populate today's transnational labor economies.

Course Notes: Offered jointly as WGS 1283. This course course, when taken for a letter grade, counts as a portal course for the secondary field in Ethnicity, Migration, Rights (EMR).

Ethnicity, Migration, Rights 132

Detention, Deportation, and Resistance in US History (208020)

Kristina Shull

2018 Fall (4 Credits)

Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

The United States' emergence as a colonial power in the late 1800s also ushered in a new era of border enforcement, detentions, and deportations. These acts of exclusion, however, have always met strong resistance. This writing and discussion-intensive seminar will explore the racialized and foreign policy dimensions of various episodes of heightened immigration enforcement in modern U.S. history: Chinese Exclusion, mass deportations after World War I and during the Great Depression, Japanese internment during World War II, mass detentions and deportations during the 1950s, and the exponential growth of a militarized, for-profit detention system since the 1980s. We will also consider forms of resistance to immigration enforcement that include: legal challenges and appeals to human rights; intersectional and transnational organizing; art, poetry, and storytelling; riots and hunger strikes; public tribunals and the Sanctuary movement.

Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)

Eleanor Craig

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we ask, the information that counts as data, and the genres of work that we recognize as 'academic'?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with Ethnic Studies, it aims to serve as a 'Theories and Methods' course, providing robust tools for refining one's own interdisciplinary inquiries.

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Department

Enrollment Cap:

10

A rigorous, intensive elective that helps students prepare for the demands of college writing. In small classes, students work closely with instructors on developing and organizing ideas, analyzing sources, and drafting and revising clear, engaging essays. Students meet frequently in individual conferences with instructors to discuss their work, and the class also emphasizes collaborative work among students. Assignments are based on sources from a range of disciplines and genres.

Topic: Expos Studio 10: Introduction

Course Notes: After taking Expos Studio 10, a student must pass Expository Writing 20 or Expos Studio 20 to meet the College's Expository Writing requirement.

Class Notes: In order to enroll in Expos Studio 10, you must have had an Expos Studio 10 advising session at the Writing Program.

Expository Writing 20 Section: 201

Expository Writing 20 (116353)

David Barber

2019 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: Department **Enrollment Cap:** 15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Wizards and Wild Things

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Once upon a time, there was no Harry Potter. Once upon a time, there was no such thing as children's literature. When and if children learned to read, they read what grown-ups read. How then did writing for children as we now know it come of age? Why does the genre have such an enduring hold on our cultural imagination, even as it continues to provoke sharp debate over its greater purpose and value? Are classic children's books like *The Wizard of Oz*, *The Wind in the Willows*, and *The Cat in the Hat* instructive or subversive, didactic or liberating? In this course we'll examine selections from three centuries of popular prose and verse written expressly for and about children as we investigate how this eclectic canon reflects evolving ideas about

childhood, changing views about educating and enchanting young readers, and persistent disputes over what and how children should learn from books. In Unit 1 we'll survey landmark works in English for children from the Puritan through the Victorian eras, including *The New England Primer*, *Grimms' Tales*, and *Alice in Wonderland*, as we consider what these texts tell us about the origin and evolution of the genre. In Unit 2 we'll examine works by touchstone authors for younger readers including Mark Twain, Louisa May Alcott, Rudyard Kipling, E. B. White, C. S. Lewis, Maurice Sendak, and others, drawing on the critical perspectives of thinkers such as John Locke, Bruno Bettelheim, Alison Lurie, and Marina Warner to assess arguments about the essential function of imaginative literature from infancy through adolescence. In the final unit, students will conduct their own research to place a major children's author of their choice in a relevant cultural and historical context.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Religious Pluralism

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The United States is arguably the most religiously diverse nation in the world. Americans possess a dizzying array of religious beliefs and behavior. And despite predictions to the contrary, levels of devout religious belief remain high, evidenced by recent controversies over a proposed Islamic community center in Lower Manhattan, as well as Supreme Court rulings on female access to contraception and same-sex marriage. How do people—including nonbelievers—experience this religious multiplicity? How are these vast religious differences negotiated socially, culturally, politically, and legally? Moving beyond theology, this course will explore the broad concept of lived religion in the United States. Through readings in fiction, law, history, and

sociology, we'll tackle these fundamental issues. In Unit One, we'll read Ayad Akhtar's 2013 Pulitzer Prize-winning play, *Disgraced*, to explore how religion affects intimate relationships among spouses, friends, and co-workers. In the second unit, we'll wade into the constitutional quandary surrounding the First Amendment, dissecting legal scholars' arguments over the limits of religious freedom. Through a series of case studies involving snake handling, home schooling, and drug use, we'll examine the frequent tension that emerges from a Bill of Rights that both guarantees the free exercise of religion and requires some degree of secularism. Finally, in Unit 3, students will focus on a religious topic of their choosing, design a research proposal, examine both primary and secondary sources, and write a substantial research paper.

Topic:

Whose Boston?

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Each year over three million visitors walk Boston's Freedom Trail, learning a curated story of how this country came to be. But whose story is it? This engaged scholarship course will leave the Yard in order to think about how the stories we tell shape the city we live in. In the wake of the riots in Charlottesville over the removal of a statue dedicated to Robert E. Lee, Americans are embroiled in a debate long familiar to historians: what do our monuments say about who we are? Maybe more importantly: how do those messages change the way we interact with each other? This course will explore these questions in the context of the city you have come to live in for the next four years. We will begin by critically examining the story visitors and residents learn when they walk the Freedom Trail—whose stories are told? What do those narratives say about what this city is? We will be part of the debate about what it means to be represented (or not) on the city landscape. This course will teach you to see the cityscape as a book to be read—a book whose meaning you can shape. After examining these questions, we will make our own decisions about what stories need to be told: the course will culminate in creating a digital map and our own walking tour presented to the public.

This course will require an out-of-class workshop in April (date TBD) and participation in the capstone public tour on May 4, 2019.

Topic: Respectable Ladies, Rebellious

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Modern Americans typically view the idea of being "ladylike"—a notion of womanhood as bound up in respectability—as something restrictive, even demeaning. For a woman to be "ladylike," after all, often means she is relegated to a corner where she will not be assertive and empowered. But for centuries, women fought and died to be allowed that reputation. While modern feminism fights against restrictive stereotypes, why did some women fight to keep them? How can we snap out of our modern frameworks and try to fully understand the past? This course will examine the curious history of "respectable" womanhood focusing on three moments in American history. We will begin with women who lost their lives when their neighbors began to question whether they really were "women" at all – the Salem witches. Using close reading skills we will sift through historical documents to understand just how the people of Salem were willing to decide some of their own daughters were not really human after all. A field trip to Salem will give us a chance to try to understand what the 17th century felt like, and why women might have had different priorities then. Next we will move forward two centuries to read the fascinating memoir of anti-lynching crusader Ida B Wells, a woman whose entire career depended on navigating the line between respectability and defiance. We will learn about race and womanhood in the late 19th century to understand why in order to be a reformer, Wells had to be a lady first. Finally, we will take on a research project on iconic 20th-century

figures from Civil Rights lawyer Pauli Murray to poet Barbara Deming, women who found themselves caught between being ladies and being leaders. Throughout we will examine how racial and sexual stereotypes posed not only challenges but also unexpected opportunities for rebels and reformers. What power does being a lady hold, and what boundaries does it create? What does it mean, both yesterday and today, to be not just female, but a woman?

Topic: Green Spaces, Urban Places

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: From Boston Common to the Charles River Esplanade and the Arnold Arboretum, Boston boasts many beautiful green spaces. Closer to home, the leafy lawns of Harvard Yard provide a respite in a busy urban environment. With over half of the world's population living in cities, urban green space is more important than ever. The value of public parks to those fortunate enough to live near them is considerable, whether the reduction of the negative effects of climate change, improved public health, or ample opportunities for residents to connect with and appreciate the power of the natural world. But as cities boom and prices skyrocket, access to spaces like parks is increasingly expensive and exclusionary. This course will consider a series of related questions: What exactly are the benefits of resources like public parks? Should urban green space be considered a right of every citizen? Has access to green space in cities become a privilege of the elite? We will explore these questions, thinking about why access to green space matters in an increasingly urbanized world.

Our first unit will focus on the green spaces of Harvard's campus. You'll question the role that access to nature plays for the Harvard community by touring campus and choosing a site to study. We'll then move to examine questions of public access to parks through the case study of Boston Common, America's oldest urban park. We'll think through the thorny relationship between public and private green space for urban communities by working with the Friends of the Public Garden and reading an increasingly influential essay on the fate of public space, "The Tragedy of the Commons." Our third unit will provide you with a unique opportunity to explore how academic research on questions of environmental access is playing out on the ground through a partnership with Groundwork, a community organization in neighboring Somerville. Groundwork works to build community and environmental health through projects such as urban gardens and youth education. You will consider the relationship between urban green initiatives and the residents who benefit from them while learning about Groundwork's urban farming initiatives in conjunction with your research. Students will have a chance to present their innovative ideas and research from their writing at a capstone fair at the end of the semester.

There will be three outside-of-class activities students will be asked to attend at specific times, and for which they should plan to keep their schedules open:

--Friday March 8, 3:15-5:30 p.m.—A discussion with Elizabeth Vizza, Executive Director of the Boston Friends of the Public Garden

--Wednesday April 3, 4:30-6 p.m. – A panel discussion with the
Groundwork Green Team
--A capstone fair during Reading Period (Time and Date TBA)

Groundwork works to build community and environmental health through projects such as urban gardens and youth education. You will consider the relationship between urban green initiatives and the residents who benefit from them while learning about Groundwork's urban farming initiatives in conjunction with your research. Students will have a chance to present their innovative ideas and research from their writing at a capstone fair at the end of the semester.

There will be three outside-of-class activities students will be asked to attend at specific times, and for which they should plan to keep their schedules open:

--Friday March 8, 3:15-5:30 p.m.—A discussion with Elizabeth Vizza, Executive Director of the Boston Friends of the Public Garden

--Wednesday April 3, 4:30-6 p.m. – A panel discussion with the Groundwork Green Team

--A capstone fair during Reading Period (Time and Date TBA)

Expository Writing 20 Section: 208

Expository Writing 20 (116353)

Alison Chapman

2019 Spring (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Art of Shock

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: From Michelangelo's fleshly angels on the ceiling of the Sistine Chapel through to Andres Serrano's *Piss Christ* (1987), art has never shied away from representing difficult subject matter – or from courting controversy. In the twentieth century, some critics even argued that art

is *only* effective when it jolts us out of our customary ways of relating to the world, or when it makes explicit the structures of violence and oppression that operate invisibly. This course will begin by exploring works of art and literature by Michelangelo, Edouard Manet, and Charles Baudelaire that were considered transgressive in their time but which have since been incorporated into the canon of art history. Is an artwork deemed shocking because of its own intrinsic qualities, or because of the norms and values of its viewing culture? How did these creations and their controversies shape or redirect the course of art history? In our second unit, we will study some contemporary artists who understand "shock" to be an integral part of their aesthetic projects. In looking at Damien Hirst's pickled animal installations, or Tracey Emin's own stained mattress set in the middle of the Tate Gallery, or Kara Walker's provocative 75-foot-long sphinx made out of sugar, why do these artists want their audience to feel such alarm and unease? We will consider these artworks alongside readings by feminist critics, philosophers, and art theorists who defend art even at its most outrageous extremes. Can shock motivate moral or ethical reasoning? Is shock a particularly political feeling? And why are images or representations of the body so central to this genre of art? The third unit will investigate how institutions – like museums, the media, and even universities like Harvard – play a role in either canonizing transgressive art or else fanning the flames of public outrage. Students will have the opportunity to visit the Harvard Art Museum as they work on their final, individual research papers.

Topic:

Who's Got The Power?

Course Notes:

Students must pass one term of Expository Writing 20 to meet the

College's Expository Writing requirement.

Class Notes:

Our news feeds today present a panorama of struggles over power, from elections and peaceful protests to riots, revolutions, and civil wars. In each case, those who hold power cling to it at all costs, while those who feel oppressed or excluded fight to attain some power of their own. In most societies, power is concentrated in the hands of a select few, and even in the world's democracies, many citizens continue to feel powerless—the playthings of some distant and shadowy elite, or of grand political and economic forces beyond their control. In this course, we will consider some of the fundamental questions regarding the nature of power: Does power always have to be "power-over," with one group dominating the rest? Or is it possible for groups of people to generate "power-with," empowering themselves to act in pursuit of shared goals? Is power ultimately synonymous with violence, or wealth, or political authority? Is it possible to exercise power over culture and ideas in addition to people and resources? As the course progresses, we will converse with the dissident writers who confronted the totalitarian regimes of the 20th century, examine the student-led movements that toppled dictatorships in the 21st, and consider what these episodes can teach us about the techniques of domination and resistance in democratic societies like our own. To that end, we'll conclude the course by testing our theories of power against some recent and acclaimed documentaries, from films like Jehane Noujaim's *The Square* and Laura Poitras' *Citizenfour*, which give us front row seats to history-making acts of revolution and civil disobedience, to polemical works like Ava DuVernay's *13th* and Craig Ferguson's *Inside Job*

Topic:

Modern Love

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Reader, I married him." As this famous line from Charlotte Brontë's *Jane Eyre* reminds us, writers have long been preoccupied with matters of the heart. Courtship plots are everywhere, from the novels of Jane Austen to the "rom-coms" of the 1980s and 1990s to essays you can find every Sunday in the "Styles" section of the *New York Times*. For centuries, marriage was primarily an economic relationship, and love outside of marriage ended in humiliation or even death. But what happens when society expands the options for living and loving? What happens to the courtship plot when women choose not to be wives, or when people who once couldn't marry now can? When couples are as likely to meet through Tinder as they are through mutual friends? In this course, we'll explore what courtship plots can tell us about changing concepts of gender, sexuality, family, and freedom. We'll start with fiction by Edith Wharton, one of the American literature's keenest social observers (and, incidentally, one of the inspirations for the TV show *Gossip Girl*). By closely reading her accounts of love and marriage in New York's high society at the turn of the twentieth century, we'll ask what stories about eligible bachelors and old maids can tell us about a society's values and beliefs. In our second unit, we'll turn to more recent courtship plots that trouble traditional conceptions of romance, marriage, and the family. Our texts will include the story "Brokeback Mountain" (and scenes from the Oscar-winning film), short fiction from Pulitzer-prize-winner Jhumpa Lahiri, and the viral *New Yorker* short story "Cat Person." Using feminist theory, queer theory, literary criticism, and recent sociologies of dating, we'll examine what new romantic possibilities—and problems—exist for couples today. Finally, in our third unit, students will pick a modern love story of their choosing—a novel, a memoir, a film—and, drawing on the work of critics and scholars, make an argument about what this story shows us about our society's sexual mores.

Topic: Eating Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresciewicz, in an opinion piece for the *New York Times*, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresciewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call "foodways"—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, "food is good to think," as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food "disgusting" or "natural." How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, *Top Chef*, *Iron Chef*, and *The Great British Bake Off*. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Eating Culture

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Food . . . is not art. . . . A good risotto is a fine thing, but it isn't going to give you insight into other people, allow you to see the world in a new way, or force you to take inventory of your soul." So William Deresciewicz, in an opinion piece for the *New York Times*, dismisses our society's rising fascination with food over the last few decades, from the explosion of cookbooks, food blogs, and bestselling histories of cod, salt, and sugar, to the glut of cooking shows, many featuring contestants dueling in gladiatorial kitchens. Like the ancient Romans, we have become obsessed with food. But is Deresciewicz right to say that food won't give us insight into ourselves? Is it not possible that by examining what scholars and commentators call "foodways"—the various forces involved in how different cultures produce, buy, sell, and consume food—we learn much about ourselves and the world? In this course we will be guided by the maxim of famous anthropologist Claude Levi-Strauss, "food is good to think," as we contemplate various foodways from a number of illuminating perspectives. In our first unit we delve into what makes food "disgusting" or "natural." How do we categorize edible material as polluting or pure? What even counts as food in different societies? In our second unit, we explore what we can learn about food and culture by looking at successful cooking shows produced in different countries, for instance, *Top Chef*, *Iron Chef*, and *The Great British Bake Off*. What do these shows as cultural artifacts tell us about the values that are celebrated or perpetuated through food? Our third unit will consider global trends of commodities, economics, and food ethics. For this unit students will conduct a research of food practice centered in some way on Annenberg. Can we define what a dining hall does, or should do? How has the ritual and practice of dining changed over time at Harvard? Along the way, we will read classic works, from theories of food by anthropologists Mary Douglas, Jack Goody, and Michael Dietler, to ideas about food as a medium for relationships between people, including the relationships that make up a vast food economy of farms, factories, supermarkets, and our tables, as seen in the writing of

novelists, essayists, and food journalists as diverse as Marcel Proust, David Foster Wallace, Wendell Berry, M.F. K. Fisher, and Michael Pollan.

All sections emphasize revision.

Topic: The Psychology of Success and

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Who gets ahead in America? Why do some succeed while others fail? Given knowledge of someone's background or personal characteristics, can we predict if she will become successful? How do

we account for the influence of various complex factors, including personality, family, and community? In this course, we will examine questions of success, failure, achievement, and identity viewed through the lens of current theories in psychology. We will begin by examining individual-level, person-centered theories of success with readings on grit, the growth mindset, and multipotentiality. Next, we will read Malcolm Gladwell's *Outliers: The Story of Success* alongside a longitudinal, ethnographic study of 12 American children and a seminal treatise on the role of race in the American classroom. As part of our broader inquiry into the environmental factors that impact success, we will explore how race, class, and familial wealth and resources affect children's lived experiences of childhood and, later, their chances of successfully getting into college. In the final unit of the course, students will answer the question, "What does it take to be successful at Harvard?" Students will select their own pop-science book on a self-help topic like willpower, motivation, happiness, or creativity, research the relevant academic literature, and create a written proposal with an accompanying short presentation to disseminate their findings. Throughout the course, we will use psychological theory to motivate questions and answers about human behavior in a society where the demand for success can be tantalizingly high and the fear of failure devastatingly relentless.

Topic: Telling Her Story: Narrative,

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: In a powerful essay, the late writer and activist Audre Lorde suggested, "Where the words of women are crying to be heard we must each of us recognize our responsibility to seek those words out, to read them and share them and examine them in their pertinence to our lives." Lorde is not alone in asking us to pay attention to and take responsibility for women's stories; for centuries scholars and activists alike have championed the words of women, including women of color and queer

women, whose stories have routinely gone untold or unheard. Yet if this issue has always been pressing, the call to heed women's stories seems especially urgent at a moment when such stories have come to dominate the cultural landscape and public consciousness – from news accounts to popular shows, literature to social media. This course responds to this moment by examining how women's stories are narrated across a variety of media and exploring what impact the sharing of them can have. Our first unit will focus on short stories by contemporary women authors Roxane Gay, Carmen Maria Machado, and Jenny Zhang that raise questions about the body, family, love, and society. Our second unit then turns to television, studying Hulu's 2017 adaptation of Margaret Atwood's dystopian novel *The Handmaid's Tale*. Informed by readings in critical feminist theory, we'll consider how the show probes the troubling connections between gender, authority, power, and image. Finally, our third unit engages visual and performance art alongside movements like #MeToo and #SayHerName, offering students an opportunity to pursue independent research projects that explore the relations between art, activism, and social media.

Topic: Humans, Nature, and the Enviro

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the

environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: "to imagine that which we know." How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson's *Silent Spring* (1962), and James Lovelock's *The Revenge of Gaia* (2006). Through shocking critiques that draw upon the power of the imagination, both writers, in different ways, have tried to inform the public of the harm being done to nature in the hope that this harm can be averted. And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog's *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

Instructor Permissions: Department

Enrollment Cap:

14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic:

Humans, Nature, and the Enviro

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

Deforestation, overpopulation, pesticide use, toxic oceans, endangered species, global warming. How are we to make sense of the many environmental problems facing the Earth today? Although the sciences provide a factual account of environmental threats and ways of countering them, scientific facts seem not to be enough, since artists, writers, filmmakers, and even scientists find themselves turning again and again to their imaginations to respond to the environmental predicaments of industrial society. They may be doing what English Romantic poet Percy Shelley powerfully described 200 years ago as an essentially human and creative impulse: "to imagine that which we know." How, then, have creative minds imagined – in essays, books, and movies – the very idea of nature, the place of humans in it, and their power to change the environment? In this course, we will consider both the possibilities and the problems that writers and filmmakers have imagined about human interactions with the natural world. We begin with the nineteenth century, when Romantic writers were urgently contemplating the meaning of nature in an age of increasing industrialization. In the first unit we interpret "Walking" (1862), the naturalist Henry David Thoreau's seminal nature essay that imaginatively explores the concept of wildness. In the second unit we will critically compare the literary approaches of two popular books by scientists – Rachel Carson's *Silent Spring* (1962), and James Lovelock's *The Revenge of Gaia* (2006). Through shocking critiques that draw upon the power of the imagination, both writers, in different ways, have tried to inform the public of the harm being done to nature in the hope that this harm can be averted. And in the final unit we will examine the techniques of documentary movies about relationships between humans and animals – Werner Herzog's *Grizzly Man* (2005) in which the filmmaker takes issue with the self-proclaimed environmentalist Timothy Treadwell who strove to protect bears in the Alaskan wilderness, and Gabriela Cowperthwaite's *Blackfish* (2013) in which she delivers a brilliant polemic against the Sea World corporation and its treatment of captive killer whales.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Propaganda

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: During the Second World War, Nazi SS officers executed some twenty thousand Polish prisoners of war, burying their bodies in hastily-dug mass graves in a pine forest near Russia's western edge. In April 1943, news of the atrocity was broadcast over US-government funded radio stations, adding to the long litany of Nazi crimes against humanity. The only problem? The story wasn't true. The mass graves were real, but the Polish prisoners had in fact been killed several years earlier by Soviet officers on orders from Josef Stalin—or "Uncle Joe," as he was known affectionately in the US. In today's parlance, the broadcast was "fake news." Truth, as the saying goes, is war's first victim, and the conflicts of the twentieth century saw the widespread use of propaganda on all sides. But what explains the wide reach of deception and influence campaigns today? How has social media galvanized new tools of mass persuasion, and how has a fragmented and polarized media landscape enabled their spread? In this course, we'll look at the history and current state of propaganda, disinformation, fake news and conspiracy theories. We'll start with a look at online influence campaigns, using a collection of political memes promoted by Russia's so-called "troll factory" to analyze common tactics and rhetorical strategies. In our second unit, we'll shift from images to film with an analysis of the documentary *Kony 2012*, a video with over a hundred million views on YouTube, and controversies around its adoption of viral marketing strategies for a humanitarian initiative. Our final unit will address propaganda narratives and disinformation—a subject students will explore through a research paper on a contemporary conspiracy theory or mass influence campaign of their choice, illuminating the broader factors attending its emergence and spread.

Topic: Society and the Witch

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Riding broomsticks and dancing in the woods at night, witches are often imagined to be outside society. But in these representations may be keys to understanding social norms, norms that get articulated through the witch's very violation of them. In this seminar, we ask what discourses about witches tell us about the societies that produce them. We begin by examining anthropologists' depictions of witchcraft among people who come to find magic believable: how do we understand the seemingly irrational idea that magic is real? Closely considering evidence from classic ethnographic accounts, we critically examine other scholars' answers to questions such as this one by thinking across competing approaches to the study of magic. Next, we analyze the film *Harry Potter and the Chamber of Secrets* and the television sitcom *Bewitched*, bringing these pop-cultural phenomena into conversation with Mary Douglas's treatise on *Purity and Danger* and Pierre Bourdieu's critique of *Masculine Domination*. These theories help us examine, for example, how fictional representations of witches speak to political struggles over class and gender. For the research paper, each student chooses an example of witchcraft on which to conduct independent research. Sample topics include fairy tales, the Salem witch trials, neo-paganism, and the Broadway musical *Wicked*. What will unite our diverse inquiries is a common interest in the social significance of this seemingly marginal figure: the witch.

Topic: Work in the Modern World

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: This course explores the structure and experience of work in the contemporary political economy with an eye toward both its liberating and oppressive potential. We will take up enduring sociological questions with respect to power, control, autonomy, surveillance and self-determination on the job. How do different forms of work affect our life circumstances, personalities, and connections to each other? In the first unit we will examine corporate culture and how it affects the experience of professional work. Does a strong corporate culture enhance professional autonomy or management's power? Does it facilitate or undermine community? In unit two we explore the crucial issue of workers' control over their own labor and the concept of alienation. We examine accounts of deskilling, the separation of mental and manual labor, and the consequences of these processes for workers' experience on the job. To what extent does alienation occur in offices versus factories versus service counters? For the final unit we will critically engage in a debate about the development of "flexible" labor and the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory. We will explore what flexibility means in a variety of contexts and ask: does flexibility lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? What does flexibility mean for tech workers in Silicon Valley and bankers on Wall Street? Our texts consist of case studies and ethnographic accounts representing a variety of workplaces along with readings from prominent social theorists who in different ways seek to elucidate the conditions of work under modern capitalism.

Topic: The Femme Fatale

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The femme fatale--the attractive, seductive woman who brings about the downfall of any man she encounters—has fascinated us through the ages, from Biblical figures like Eve, Delilah, and Salome and Ancient Egypt's Cleopatra to Catwoman, or even Nicki Minaj's media persona. In most stories, the femme fatale's dangerous actions empower her, but she ultimately must also submit to the idea that her empowerment renders her a villain. How does this contradiction in the femme fatale's character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real gender problems that modern women and men face? This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we'll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain's noir novella *Double Indemnity*. In our second unit, we'll move to a fictional account of a more powerful femme fatale published in the 1970's post-feminist movement, and examine Stephen King's novel *Carrie* alongside the updated film adaptation, Brian de Palma's eponymous cult classic. Finally, in our third unit, students will research a modern day femme fatale, either real or fictional, and argue why the modern version is recognizable as a femme fatale, but also represents some evolution of, or twist on, the classic archetype. Here students will be challenged not only to apply broad theories and ideas from the course, but also to reach a greater understanding of what makes some modern women seem so dangerous.

Expository Writing 20 (116353)

Lindsay Mitchell

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Femme Fatale

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The femme fatale--the attractive, seductive woman who brings about the downfall of any man she encounters—has fascinated us through the ages, from Biblical figures like Eve, Delilah, and Salome and Ancient Egypt's Cleopatra to Catwoman, or even Nicki Minaj's media persona. In most stories, the femme fatale's dangerous actions empower her, but she ultimately must also submit to the idea that her empowerment renders her a villain. How does this contradiction in the femme fatale's character reflect tensions in our own evolving understanding of gender? How can the femme fatale character help us untangle the real gender problems that modern women and men face? This course will begin to explore these and other related questions by studying accounts of femme fatales in literature and film. In our first unit, we'll explore 1920s and 1930s pulp fiction as a source of the modern fatale archetype, with special focus on James M. Cain's noir novella *Double Indemnity*. In our second unit, we'll move to a fictional account of a more powerful femme fatale published in the 1970's post-feminist movement, and examine Stephen King's novel *Carrie* alongside the updated film adaptation, Brian de Palma's eponymous cult classic. 2018 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Department **Enrollment Cap:** 14

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Human Rights as History

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

The U.N.'s Universal Declaration of Human Rights has thirty articles, among them the more familiar — "life, liberty, and security of person" — and the less familiar — the right to a family, to cultural life, to rest, and leisure. We often presume that human rights need no justification or explanation. But what *are* human rights, and where do they come from historically? We begin our course by looking at arguments for human rights arising out of the ideas of the Enlightenment, as well as their "strange triumph" in the aftermath of the violence of the Second World War. After analyzing the development of the idea over time, we'll think about how different individuals have interpreted the idea of "universal" rights. We'll read primary sources from two Muslim women writers on the example of what is often called the Islamic veil, one supportive of the practice and one against, setting our discussion against the backdrop of the development of humanitarianism during the colonial period in the Middle East. Who has, historically, decided what is included in the categories of "universal" and "inherent"? In the final unit, we will dig into several ongoing and highly contested issues in human rights, like the "right to be forgotten," which would force Google to erase certain unwelcome search results; Samantha Power's arguments for international humanitarian intervention in the face of genocide; Ta-Nehisi Coates's argument in *The Atlantic* for reparations to the descendants of black American slaves; the growing debates over transgender rights; the role of the Nuremberg legacy in the success (or failure) of trying war crimes today; and even Harvard's own complicated relationship to slavery in the United States.

Topic: Narratives of Immigration

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: *Note: This Expos course requires participation in some activities outside of normal class hours.*

Immigration has become an increasingly divisive topic in U.S. politics,

as thousands of people fleeing violence and poverty in Central America have arrived at the nation's border. While conversations about immigration tend to focus on its economic and cultural implications, the specific experiences of immigrants can get lost in the political shuffle. Who are the people who are coming to the U.S. border? What has motivated their journeys? Once they arrive, what happens to their individual stories and experiences? Who receives those narratives? How are they used? In this course, students will try to answer these questions, grappling with one of the most pressing moral and social issues U.S. lawmakers and citizens are confronting today. But rather than just approaching the complexities of immigration using academic literature, students will engage actively with how narratives of immigration are told and transformed, especially as individual experiences get processed into legal asylum cases. Students will have the opportunity to meet with and pose questions to lawyers and law students from the Harvard Law School Immigration Clinic, as well as lawyers working on the border at the U.S. family detention center in Dilley, Texas. They will also exit the gates of Harvard to attend immigration court proceedings, visit local immigrant neighborhoods, and talk with activists about their hopes and frustrations regarding immigration reform. This course aims to be a multifaceted intellectual experience, allowing students the opportunity to witness directly how academic arguments can affect human lives. And students will be asked to participate in this process, offering their own claims about how immigration policy should be shaped based on what they learn over the course of the semester. In Unit 1, we will start by looking at concepts of nationhood and community, asking students to critique arguments for and against open borders—including those by political philosophers Richard Carens and David Miller, and economist Bryan Caplan. In Unit 2, we will turn to the self-articulated experiences of immigrants to the United States, reading Valeria Luiselli's *Tell Me How It Ends* and a number of redacted affidavits from asylum seekers, to consider how "tricky" cases—like those involving minors who have complicated relationships with gangs in their homelands—ought to affect how asylum cases are made. Finally, in Unit 3 students will write a research paper in which they will use an immigration story of their own choosing to argue for changes in United States policy. They will write this paper in conjunction with creating a capstone project: a five-minute video on a specific immigration issue that will then be shared with the community partners they've engaged with throughout the course.

There will be two outside-of-class activities students will be asked to attend at specific times, and for which they should plan to keep their schedules open:

- November 8, 5-7 p.m.—A panel discussion with local immigration activists
- December 7, 4-6:30 p.m.—A capstone fair (the capstone fair will happen within these hours, but will not take the entire time)

Topic: "Noncombatants": The Home Fron

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: While it is perceived today as one of the greatest aberrations in human society, warfare has also been one of the most common experiences in human history. Yet popular conceptions of the history of warfare are often limited to the myth of completely separated soldiers and civilians. This has not, historically, been so: there is a reason that we call the "home front" a *front*. We begin by looking at the idea of "total war" within the context of several modern case studies. We will question and examine the roles of women and children, as agents and as targets, in these conflicts. We then move to thinking about the memory and meaning of war through the art and memoirs of the great German printmaker and sculptor Käthe Kollwitz and the intellectual polymath (and French Resistance member) Marguerite Duras. What do the histories and stories that we tell about war, about resistance and about patriotism, particularly stories told by those *not*

We then move to thinking about the memory and meaning of war through the art and memoirs of the great German printmaker and sculptor Käthe Kollwitz and the intellectual polymath (and French Resistance member) Marguerite Duras. What do the histories and stories that we tell about war, about resistance and about patriotism, particularly stories told by those *not* in uniform, add to the national and cultural understanding of a conflict? In the final unit, students will choose their own historical research subject from a

variety of options. They might investigate conflicts and wars ranging from the recent (the "forever wars" of Iraq and Afghanistan) to the nineteenth century (the U.S. Civil War); from the modern and industrial (the Second World War) to the guerrilla, civil, and anti-imperial (the Spanish Civil War and the Algerian War of Independence). Further research options include different types of participants in conflict (from forcibly recruited child soldiers to anti-war activism) and different ways to pressure an enemy (food policy and blockade). Students will analyze the conflict in their chosen subject through the lens of the unexpected agent in modern warfare: the woman and/or the child. Throughout the course, we will ask what it means to be a "soldier" or a "civilian" in modern conflict, pondering the nature of the distinction.

Topic:

Laugh Riots

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: To many people, the current era seems like a golden age of political satire. Judging solely by the number of viral comedians, late-night shows, humor books, parody websites, and meme generators, the genre certainly seems to be thriving. Yet critics, both liberal and conservative, have raised substantive concerns about this explosion of satirical content, questioning its corrosiveness, its persuasive efficacy, and its contributions to the democratic public sphere. Others, in a rather different vein, have argued that satire is actually dying—or already dead—victim to the surreality and self-parody of modern political life. This course will ask students to weigh in on these questions about the value and viability of social and political satire. In Unit 1, students will consider when, if ever, do jokes go "too far"? Using a recent controversial example, such as the *Charlie Hebdo* cartoons or Michelle Wolf's White House Correspondents Dinner routine, students will try to theorize whether humor should be held accountable to positive moral standards, or whether it is inherently anarchic and deconstructive. In Unit 2, we will read Paul Beatty's acclaimed novel, *The Sellout* (2015), a "tragicomic" satire of race in America, alongside several classical essays in the psychology of humor. Putting these texts in conversation will enable students to think about how satire "works," how it makes us laugh, and the potential roles it might play in discussions about sensitive political subjects. Finally, in Unit 3, students will be tasked with assessing the real-world effects of political satire, selecting their own historical (e.g., anti-immigration political cartoons from the 1870s) or contemporary (e.g., *The Daily Show*) case study.

In Unit 1, we will start by looking at concepts of nationhood and community, asking students to critique arguments for and against open borders—including those by political philosophers Richard Carens and David Miller, and economist Bryan Caplan. In Unit 2, we will turn to the self-articulated experiences of immigrants to the United States, reading Valeria Luiselli's *Tell Me How It Ends* and narratives of actual asylum seekers. Then, students will put these narratives in conversation with former Attorney General Jeff Sessions's definition of persecution in his decision on *The Matter of A-B-* to make a case for who should "count" as a refugee. Finally, in Unit 3 students will write a research paper in which they will use an immigration story of their own choosing to argue for changes in United States policy. They will write this paper in conjunction with creating a capstone project: a two-minute video produced for the community partners they've engaged with throughout the course.

Expository Writing 20 Section: 231

Expository Writing 20 (116353)

Kip Richardson

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Department**Enrollment Cap:**

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Laugh Riots**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: To many people, the current era seems like a golden age of political satire. Judging solely by the number of viral comedians, late-night shows, humor books, parody websites, and meme generators, the genre certainly seems to be thriving. Yet critics, both liberal and conservative, have raised substantive concerns about this explosion of satirical content, questioning its corrosiveness, its persuasive efficacy, and its contributions to the democratic public sphere. Others, in a rather different vein, have argued that satire is actually dying—or already dead—victim to the surreality and self-parody of modern political life. This course will ask students to weigh in on these questions about the value and viability of social and political satire. In Unit 1, students will consider when, if ever, do jokes go "too far"? Using a recent controversial example, such as the *Charlie Hebdo* cartoons or Michelle Wolf's White House Correspondents Dinner routine, students will try to theorize whether humor should be held accountable to positive moral standards, or whether it is inherently anarchic and deconstructive. In Unit 2, we will read Paul Beatty's acclaimed novel, *The Sellout* (2015), a "tragicomic" satire of race in America, alongside several classical essays in the psychology of humor. Putting these texts in conversation will enable students to think about how satire "works," how it makes us laugh, and the potential roles it might play in discussions about sensitive political subjects. Finally, in Unit 3, students will be tasked with assessing the real-world effects of political satire, selecting their own historical (e.g., anti-immigration political cartoons from the 1870s) or contemporary (e.g., *The Daily Show*) case study.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Journey to Mars

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Evoking President Kennedy's famous speech to put a man on the moon by the end of the 1960s, on October 11, 2016, President Obama called for the United States to launch humans to Mars by 2030 and to one day settle there. The quest to achieve this goal has dominated recent headlines from NASA's landing of the Curiosity Rover to Hollywood's renewed fascination with the red planet. Mars has become the next great frontier in human conquest and exploration. Why Mars? What is at stake in our efforts to reach Mars? What does it say about life here on Earth? Over the semester, we will look at a range of scholarly literature on Mars as well as films, science fiction, and virtual reality simulations to examine some possible futures in which humans have colonized outer space and become a multi-planetary species. Our launch will be a close analysis of the film *The Martian* to discover key themes and topics in media representations of Mars. We will next chart a path through Ray Bradbury's *The Martian Chronicles* to explore connections between science, technology, and art in our imagination of human life and the experience of difference on Mars. The course will conclude with a broader inquiry of Mars as the next frontier of human entrepreneurship that critically engages with the science and ethics of proposed future Mars missions (Mars One, SpaceX, UAE's Mars 2117, among others). Students will write a final research paper on a topic of their choice that builds on course readings, activities, and discussion.

All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Existentialism

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: "Existence precedes essence." According to Jean-Paul Sartre's slogan, we are not born with a purpose given to us by god, human nature, or society, but are instead "condemned to freedom," to create ourselves through the choices we make. In our first unit, we will grapple with the idea that we create our own values, reading Sartre's lecture "Existentialism Is a Humanism," and consider a recent philosopher's attempt to understand what it means to describe life as absurd. Concerned as they were with concrete situations, existentialists also produced a great deal of literature in addition to philosophy. In our second unit, we will think about coming of age, inauthenticity, and the performance of gender and identity in stories by Simone de Beauvoir (Sartre's lifelong intellectual partner) and David Foster Wallace. Finally, at the end of the course, students will write a research paper about a major existentialist literary text of their choice, examining themes like bad faith, despair, freedom, and authenticity in a classic novel by Sartre, Beauvoir, or Albert Camus, or in a more recent text influenced by that tradition, such as Richard Wright's *Black Boy*, Walker Percy's *The Moviegoer*, Kobo Abe's *The Face of Another*, Tom McCarthy's *Remainder*, or Kamel Daoud's *The Meursault Investigation*, among other possibilities.

Topic:

Sexism and Politics

Course Notes:

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

The "Engaged Scholarship" components of this course include activities outside class time.

Today, the United States Congress is 19.4% female. That statistic trails the world average of 23.3%, with Nordic, European, sub-Saharan African, and Asian countries achieving better gender balance in national legislatures than the U.S. Some scholars contend that when women run, they are no more likely to win or lose compared to their male counterparts, though they are simply less likely to run in the first place. Other scholars identify a strong correlation between voting and sexist attitudes, notably in the 2016 U.S. election. But the puzzle persists: what accounts for the persistently low levels of female political representation in American politics, particularly since the United States boasts some of the highest levels of female participation in the labor market, especially in executive positions? Our course explores this question as it examines how prejudicial attitudes about women manifest themselves in American political life and society. In Unit 1, we begin by examining the popular argument that women should have more political representation because they would be better political leaders. In this unit, you will also have a chance to engage in the Harvard community by interviewing peers, neighbors,

and other members of Harvard Square to get a sense of beliefs about women in politics. In Unit 2, we turn our attention to recent case studies, including Hillary Clinton, Sarah Palin, and Alexandria Ocasio-Cortez, to investigate how gender stereotypes may or may not have played a role in the outcomes of their political races. Finally, in Unit 3, you will contribute to the scholarship in this field, by researching the phenomenon that Massachusetts lags behind other states when it comes to female political representation at the state and gubernatorial level. We will partner with the Massachusetts Women's Political Caucus (www.mwpc.org) to help them address this problem at the state level by writing a policy paper with recommendations that draw on your research into this issue.

The "Engaged Scholarship" components of this course include activities outside class time (these are tentative dates that will be finalized in September, so please note that they are subject to change):

- *Interviews with Harvard peers and members of Harvard Square community to be completed before October 10 (not set time, flexible dependent on individual schedules).*
- *Panel symposium featuring female politicians, candidates for office, academics, and other stakeholders to be held on Nov 14, 4-6pm. Location TBD.*
- *Capstone Presentations to Massachusetts Women's Political Caucus, HQ in Boston, MA in early December, specifics TBD.*

Class Notes:

The "Engaged Scholarship" components of this course include activities outside class time.

Today, the United States Congress is 19.4% female. That statistic trails the world average of 23.3%, with Nordic, European, sub-Saharan African, and Asian countries achieving better gender balance in national legislatures than the U.S. Some scholars contend that when

women run, they are no more likely to win or lose compared to their male counterparts, though they are simply less likely to run in the first place. Other scholars identify a strong correlation between voting and sexist attitudes, notably in the 2016 U.S. election. But the puzzle persists: what accounts for the persistently low levels of female political representation in American politics, particularly since the United States boasts some of the highest levels of female participation in the labor market, especially in executive positions? Our course explores this question as it examines how prejudicial attitudes about women manifest themselves in American political life and society. In Unit 1, we begin by examining the popular argument that women should have more political representation because they would be better political leaders. In this unit, you will also have a chance to engage in the Harvard community by interviewing peers, neighbors, and other members of Harvard Square to get a sense of beliefs about women in politics. In Unit 2, we turn our attention to recent case studies, including Hillary Clinton, Sarah Palin, and Alexandria Ocasio-Cortez, to investigate how gender stereotypes may or may not have played a role in the outcomes of their political races. Finally, in Unit 3, you will contribute to the scholarship in this field, by researching the phenomenon that Massachusetts lags behind other states when it comes to female political representation at the state and gubernatorial level. We will partner with the Massachusetts Women's Political Caucus (www.mwpc.org) to help them address this problem at the state level by writing a policy paper with recommendations that draw on your research into this issue.

The "Engaged Scholarship" components of this course include activities outside class time (these are tentative dates that will be finalized in September, so please note that they are subject to change):

- *Interviews with Harvard peers and members of Harvard Square community to be completed before October 10 (not set time, flexible dependent on individual schedules).*
- *Panel symposium featuring female politicians, candidates for office, academics, and other stakeholders to be held on Nov 14, 4-6pm. Location TBD.*
- *Capstone Presentations to Massachusetts Women's Political Caucus, HQ in Boston, MA in early December, specifics TBD.*

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Sexism and Politics

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: *The "Engaged Scholarship" components of this course include multiple mandatory activities outside of regular class hours. Dates of the Spring 2019 activities will be announced in the first class meeting.*

Expository Writing 20 Section: 238

Expository Writing 20 (116353)

Adam Scheffler

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: The Underworld

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Hell is popular. In fact, it's been doing much better than heaven. It's practically a literary consensus that Dante's best book is his *Inferno* not *Purgatorio* or *Paradiso*, and that Milton, a Christian believer, got so carried away in describing Satan and hell that he ended up being "of the Devil's party without knowing it" (Blake). And the world today may be more secular than in past generations, but hell is doing just fine.

Harvard presents its own interesting case: Currier House's annual "Heaven and Hell" party has situated "Hell" in a room that can hold about 500 people whereas "Heaven" can fit only about 50. (This past year heaven was eliminated entirely.) But what are the components of hell – what archetypes or depictions of hell and the underworld helped to cement their importance in culture? And why is hell so alive in *secular* culture? Why do those people who don't believe that hell is real want to keep imagining it again and again (in *Supernatural*, in *South Park*, in *Buffy the Vampire Slayer*, etc.)? In our first unit, we will examine famous underworld themes and archetypes as we look at short excerpts from *Gilgamesh*, Homer, Virgil, Dante, Milton, Jonathan Edwards, the story of Persephone, and the story of Orpheus and Eurydice. In our second unit, we'll consider how these themes and archetypes are taken up by recent secular texts such as a Stephen King short story, the film *Pan's Labyrinth*, and a *New Yorker* article by Harvard Professor Danielle Allen about her cousin's experience in the American prison system. Finally, in our third unit, students will select and research a contemporary depiction of hell, and make an argument about how that hell works as a metaphor for a real-world issue or fear (such as the sleaziness of Hollywood, or bickering families, or mental illness, or the vastness of outer space). Throughout, we will try to better understand the curious attraction of hell, and why its 4,000-year-old story shows no sign of ending.

Topic: Privacy and Surveillance

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Most of us are vaguely aware that our online activities are extensively monitored by corporations in search of profits and that the government may be watching or listening to some of our communications in the name of national security. It is easy to decry this state of affairs as Orwellian, or, on the other hand, to reassure ourselves that surveillance only harms those with something to hide. In this course we will seek to move beyond these simplistic responses by considering the rights underlying privacy claims and by closely examining how surveillance operates in practice. In the first unit, we will explore the powerful, but surprisingly elusive, concept of privacy. Are we concerned only about the possibility that information gathered about us will be abused? Or is there something more fundamentally troubling in the government reading people's emails, or in corporations having records of our internet browsing histories? In the second unit, we will consider government surveillance, specifically the National Security Agency's power to monitor the content of calls and emails originating from non-American citizens who are outside the United States. Do these non-citizens have any privacy rights vis-à-vis the U.S. government? Are there adequate legal protections for American citizens whose communications—both dangerous and innocent—are swept up in surveillance that is targeted at foreigners? In the final unit we will turn to the issue of privacy rights against corporations. Do we have a right to be forgotten online, or should truthful information about private citizens be available via internet search engines indefinitely? Can internet users be regarded as having

given meaningful consent to privacy agreements that they have not read and would in any case likely not fully understand? For this unit, students will write a research paper about the appropriate limits on the power that private entities have over our online lives.

Topic: Ecological Crisis: Witnessing

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: *Note: This Expos class requires an independent research trip into Boston outside of normal class hours.*

In winter 2018, Boston and coastal Massachusetts experienced two "hundred-year floods" in quick succession. Coming hard on the heels of costlier disasters elsewhere, the impassable roads in the Seaport and icebergs in the streets of Scituate were widely understood as a sign of things to come. The changing shape of the New England coastline raises tough questions: how should governments and peoples prepare for, and adapt to, a changing climate? How do we stave off the worst-case scenarios, and how should we mete out responsibility for the damage that's already been done? And how might our society—our politics, our culture, our sense of justice and our narratives of ourselves—transform in response to the unfolding global ecological crisis?

While such questions are usually left to activists, engineers, and urban

planners, this course will ask you to begin to answer these questions using the tools of the humanities. We'll begin by exploring the way we talk about the world-to-come today, focusing on the writer Elizabeth Rush's portraits of coastal communities confronting sea level rise and the loss it entails. In the second unit, we turn to questions of ethics and politics. We'll weigh Aldo Leopold's foundational "Land Ethic" – which calls for a society that respects an "ecological conscience" – against more recent work on the role that race and class play in exposure to environmental risks. In doing so, we'll develop richer, more sensitive accounts of the interaction between nature and society. The course ends by considering the case example of Boston itself. In class, we'll assess Climate Ready Boston's reports together, analyzing how the city is preparing for "climate resilience." In a final capstone project and research paper, you'll prepare your own neighborhood-specific studies that respond to these reports, drawing on our readings in ethics and political thought as well as your own discoveries in the research process – a process that will ask you to survey climate scientists' projections, delve into the history of Boston, and even walk the shoreline of the city. The goal is to develop and articulate your own vision for a just and livable future for New England.

Required Research Travel: As part of the research for Unit 3, students will be expected to coordinate with each other and visit a neighborhood in Boston subject to climate impacts. This trip will require taking the T and walking. A response paper recording observations from this trip is due November 9th; the research trip can be made at any point beforehand.

And how might our society—our politics, our culture, our sense of justice and our narratives of ourselves—transform in response to the unfolding global ecological crisis?

While such questions are usually left to activists, engineers, and urban planners, this course will ask you to begin to answer these questions using the tools of the humanities. We'll begin by exploring the way we talk about the world-to-come today, focusing on the writer Elizabeth Rush's portraits of coastal communities confronting sea level rise and the loss it entails. In the second unit, we turn to questions of ethics and politics. We'll weigh Aldo Leopold's foundational "Land Ethic" – which calls for a society that respects an "ecological conscience" – against more recent work on the role that race and class play in exposure to environmental risks. In doing so, we'll develop richer, more sensitive accounts of the interaction between nature and society. The course ends by considering the case example of Boston itself. In class, we'll assess Climate Ready Boston's reports together, analyzing how the city is preparing for "climate resilience." In a final capstone project and research paper, you'll prepare your own neighborhood-specific studies that respond to these reports, drawing on our readings in ethics and political thought as well as your own discoveries in the research process – a process that will ask you to survey climate scientists' projections, delve into the history of Boston, and even walk the shoreline of the city. The goal is to develop and articulate your own vision for a just and livable future for New England.

Required Research Travel: *As part of the research for Unit 3, students will be expected to coordinate with each other and visit a neighborhood in Boston subject to climate impacts. This trip will require taking the T and walking. A response paper recording observations from this trip is due November 9th; the research trip can be made at any point beforehand.*

Expository Writing 20 (116353)

Ezer Vierba

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Buddhism, Mindfulness, and the

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Today, mindfulness is touted as a panacea, the secret to happiness and health, superb sex and unparalleled productivity. The hype is not entirely new, however. For decades, ostensibly Buddhist ideas have been tossed around in the West as recipes for success in just about any art or craft. But what hides behind this craze? Can Buddhist teachings offer us tools with which to achieve our goals, or are we corrupting Buddhism by applying it in such a way? What have artists and practitioners thought of the use of meditative tools, and how have they integrated Buddhist terms like "bare awareness" and "emptiness" into their work?

In order to answer such questions, we will start the course with a reading of the *Satipatthāna Sutta*, the Buddha's instructions on mindfulness meditation. A close reading the text in our first unit will give us a glimpse of the ancient Buddhist practice, its complexity and richness. As we move into our second unit, we will read the text that first gave the West the idea that Buddhism can allow us to "hit the mark" without trying to do so, Eugen Herrigel's bestselling 1948 book, *Zen in the Art of Archery*. Using Edward Said's classic work, *Orientalism*, we will ask if Herrigel was romanticizing Zen Buddhism, and if he was, what the consequences of such a romanticization have for Japan and the West. In our last unit, we will read the work of Chögyam Trungpa, one of the most charismatic masters to have taught in the West. His lectures in *Dharma Art* will provide us a glimpse into the way Buddhist religious-artistic practices have influenced contemporary artists in the West. By looking at Trungpa's Tibetan "crazy wisdom," we will try to understand what Buddhist ideas of self/not-self mean, and why artists have taken such avid interest in them.

As we read these texts, we will also practice mindfulness meditation, as well as various other forms of Buddhist meditation. In doing so, we will think about these meditations both practically and critically, at the same time as we refine our analytical understanding of Buddhist ideas.

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Ecological Crisis: Witnessing

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: *Note: This Expos course requires participation in some activities outside of normal class hours as well as a mandatory capstone project.*

In winter 2018, Boston and coastal Massachusetts experienced two "hundred-year floods" in quick succession. Coming hard on the heels of costlier disasters elsewhere, the impassable roads in the Seaport and icebergs in the streets of Scituate were widely understood as a sign of things to come. The changing shape of the New England coastline raises tough questions: how should governments and peoples prepare for, and adapt to, a changing climate? How do we stave off the worst-case scenarios, and how should we mete out responsibility for the damage that's already been done? And how might our society—our politics, our culture, our sense of justice and our narratives of ourselves—transform in response to the unfolding global ecological crisis?

While such questions are usually left to activists, engineers, and urban planners, this course will ask you to begin to answer these questions using the tools of the humanities. We'll begin by exploring the way we talk about the world-to-come today, focusing on the writer Elizabeth Rush's portraits of coastal communities confronting sea level rise and the loss it entails. In the second unit, we turn to questions of ethics and politics. We'll weigh Aldo Leopold's foundational "Land Ethic" – which calls for a society that respects an "ecological conscience" – against more recent work on the role that race and class play in exposure to environmental risks. In doing so, we'll develop richer, more sensitive accounts of the interaction between nature and society.

The course ends by considering the case example of Boston itself. In class, we'll assess Climate Ready Boston's reports together, analyzing how the city is preparing for "climate resilience." In a final capstone project and research paper, you'll prepare your own neighborhood-specific studies that respond to these reports, drawing on our readings in ethics and political thought as well as your own discoveries in the research process – a process that will ask you to survey climate scientists' projections, delve into the history of Boston, and even walk the shoreline of the city. The goal is to develop and articulate your own vision for a just and livable future for New England.

Students will be required to coordinate with at least two classmates to attend and observe a community group or municipal agency meeting outside of class hours. These observations should be conducted in March or April. A schedule of potential observations will be distributed in the first week of class.

Topic: Why Shakespeare?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay \$2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve all this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We'll begin with a reading of the most famous artwork of the past millennium, *Hamlet*, a play about a bad philosopher trying to avenge his father's murder. Then we'll read one of Shakespeare's least popular plays, *Henry VI* (about feuding English families during a bloody civil war), alongside one of the most popular TV shows right now, *Game of Thrones* (which, like *Henry VI*, was based on the Wars of the Roses). We'll also read *Henry VI* in light of some controversial recent computer-based scholarship arguing that Shakespeare actually didn't write much of the play. Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the cynical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Topic: What Is Health and How Do We A**Course Notes:** Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The U.S. spends more on healthcare than any country in the world. What we are getting for all that money? Are we more healthy than all of the world? How would we even know if we were healthier? What "health" is and what it means to be "healthy" are more challenging questions than they may seem. It may be living very long, having healthy behavior, or being happy. It could be a combination of all of these, and it could be different for different people. Understanding what we mean when we talk about health is important to promoting health, so we know what we're aiming for. This course will explore what health is, what it means to be healthy or not healthy, and how we can improve people's health. In Unit 1 we will look at definitions of health from the World Health Organization and the Centers for Disease Control and Prevention (CDC), and see how well they work in case examples-- whether, for instance, someone like Stephen Hawking would be considered healthy by these definitions, and what may be missing from them. In Unit 2 we will assess policies designed to improve health, focusing on obesity and weight. We will read conflicting views of obesity as a medical condition or a descriptor of body size, and grapple with a situation where opinions and science point in different directions. The Unit 2 essay will tackle how should we develop policy around obesity in this context of contradicting perspectives. In Unit 3 students will conduct independent research on ways to improve college students' health, building from the definition work of Unit 1 and the policy work of Unit 2. The materials for the course will consist of medical and public health articles, online health data sources, and videos/TED talks. Students will have the opportunity to participate in "verbal practice" exercises at Harvard's Global Health Education and Learning Incubator to help them write and communicate to audiences more effectively.

Topic: Why Shakespeare?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Shakespeare, we have all been told, is extremely important. You might agree or disagree with this pronouncement, but do you know why Shakespeare matters to so many people? Why does every high school in America assign Shakespeare? Why did the world erupt with jubilation on his 450th birthday in April 2014? Why did the British government pay \$2.4 million to have Shakespeare translated into Mandarin? Does Shakespeare deserve this fuss, or is he really overrated? In this section, Shakespeare lovers and haters alike are invited to consider the question of Shakespeare's popularity by looking into the relationship between his methods of artistic creation and the values of the modern world. We'll begin with *Othello*, its confrontation with race and gender especially relevant in our moment, an urgency you can see first-hand with the modern-dress production on stage at the [American Repertory Theater](#). Then we'll turn to *King Lear*, often said to be Shakespeare's best play (sorry, *Hamlet*). We'll tackle *Lear* by looking backward to the philosophy of tragedy, and forward to a brand-new play based on it: the mostproduced playwright in America Laura Gunderson's [The Heath](#), having its world premiere in February in Lowell, MA (30 miles north of Cambridge — field trip!). Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the cynical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Note: This section will see two live theatrical performances outside usual class hours: Othello on Thurs., Feb. 7 at 7:30 PM (optional), and The Heath on Sun., March 10 at 2 PM (required).

We'll begin with *Othello*, its confrontation with race and gender especially relevant in our moment, an urgency you can see first-hand with the modern-dress production on stage at the [American Repertory Theater](#). Then we'll turn to *King Lear*, often said to be Shakespeare's best play (sorry, *Hamlet*). We'll tackle *Lear* by looking backward to the philosophy of tragedy, and forward to a brand-new play based on it: the mostproduced playwright in America Laura Gunderson's [The Heath](#), having its world premiere in February in Lowell, MA (30 miles north of Cambridge — field trip!). Finally, we'll ask, "Why Shakespeare?" and entertain answers ranging from the cynical (Shakespeare is a dead, white male that other dead, white males have used to promote the values of dead, white males) to the euphoric (Shakespeare is universal; Shakespeare invented the human).

Note: This section will see two live theatrical performances outside usual class hours: Othello on Thurs., Feb. 7 at 7:30 PM (optional), and The Heath on Sun., March 10 at 2 PM (required).

Expository Writing 20 Section: 250

Expository Writing 20 (116353)

Eve Wittenberg

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Department

Enrollment Cap:

15

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: What is Health?

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The U.S. is among the richest countries in the world and spends more on health care than any other. Yet are we more "healthy" than all of the world? How would we even know if we were healthier? What is health and what does it mean to be healthy? And is being healthy something to which we aspire—as individuals and as a society? If so, how do we get there, and how do we know when we arrive? These are the questions that challenge practitioners of medicine, public health, and health policy. To be "healthy" may be living very long, having healthy behaviors, or being happy. It could be a combination of all of these, and it could be different for different people. Understanding what we mean when we talk about health is important to promoting health, so we know what we're aiming for, and assessing health, so we know what we have or have not achieved.

This course will explore what health is, what it means to be healthy or not healthy, and how we can improve people's health. The emphasis will be on writing from a science and social science perspective, highlighting the distinctions with writing in the humanities. In Unit 1 we will look at definitions of health, starting with the World Health Organization's, and see how well they work in case examples--whether, for instance, someone like Stephen Hawking is or should be considered healthy, and the implications of our assessment for health care and policy. In Unit 2 we will evaluate policies, specifically focusing on obesity. We will read conflicting views of obesity as a medical condition or a descriptor of body size, and grapple with a situation where science points in different directions. The Unit 2 essay will consider how to develop policy around obesity in this context of contradicting perspectives. Unit 3 will introduce research papers—we will choose individual topics on ways to improve college students' health, learn about the Harvard library system and resources, and conduct independent research to write a final paper. This third essay will build upon the previous units' focus on what health is and how policies can address health outcomes. The materials for the course will consist of scientific articles (mainly in medicine and public health), online health data sources, commentaries and editorials, videos/TED talks, and a few newspaper articles and websites. Some classes will be held at Harvard's Global Health Education and Learning Incubator to

use exercises, both verbal and visual, to clarify concepts, practice articulating ideas, and develop a focus for writing.

All sections emphasize revision.

Topic: Work in the Modern World

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: This course explores the structure and experience of work in the contemporary political economy with an eye toward both its liberating and oppressive potential. How do different forms of work affect our life circumstances, personalities, and connections to each other? In the first unit we will examine jobs—including some professional occupations like physicians and financial analysts—where social class is ambiguous or problematic, leading us to the question of who is a worker. How and to what extent are working class jobs different from professional jobs? In unit two we explore the crucial issue of workers' control over their own labor and the concept of alienation. We examine accounts of deskilling, the separation of mental and manual labor, and the consequences of these processes for workers' experience on the job. To what extent does alienation occur in offices versus factories versus service counters? For the final unit we will critically engage in a debate about the development of "flexible" labor and the ways in which workers' connections to employers, occupations, and locations have become more fluid and transitory. We will explore what flexibility means in a variety of contexts and ask: does flexibility lead to liberation or loss of identity? Does it bring self-fulfillment or insecurity? What does flexibility mean for tech workers in Silicon Valley and bankers on Wall Street? Our texts consist of case studies and ethnographic accounts representing a variety of workplaces along with readings from prominent social theorists who in different ways

seek to elucidate the conditions of work under modern capitalism.

Topic: Representing Childhood

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Cultural attitudes toward childhood have long been complex. Novelists, poets, and philosophers alike have espoused the virtues of cultivating cherished qualities of childhood: the playfulness, authenticity, and boundless curiosity of children unburdened by the stifling responsibilities of adulthood. But, as educators and political commentators remind us at every turn, childhood is also a condition to be overcome, a state of unsophisticated lack of discipline and immaturity that our leaders should avoid. These tensions have made children—so often spoken *for* and *about*

Topic: Representing Childhood

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: Cultural attitudes toward childhood have long been complex. Novelists, poets, and philosophers alike have espoused the virtues of cultivating cherished qualities of childhood: the playfulness, authenticity, and boundless curiosity of children unburdened by the stifling responsibilities of adulthood. But, as educators and political commentators remind us at every turn, childhood is also a condition to be overcome, a state of unsophisticated lack of discipline and immaturity that our leaders should avoid. These tensions have made children—so often spoken *for* and *about* on the page and screen, but rarely speaking for themselves—into vessels of meaning for a wide variety of purposes, from rallying cries urging military involvement abroad to immigration reform at home. In this course, we'll consider what representations of childhood can tell us about the adult world and childhood itself. What is the root of adult anxieties about children? And what are the moral and practical costs of upholding certain images of childhood—for example, its innocence—to both adults and children themselves? We'll begin our exploration of these questions by attending to the imagined worlds of authors from several different cultures: British science fiction author Brian Aldiss and contemporary writers Ludmilla Petrushevskaya and Lesley Nneka Arimah of Russia and Nigeria, respectively. What deeper meanings, we will ask, can be uncovered by attending to representations of children and the child's point of view in their works? Next, we'll shift our gaze to the highly controversial photographs of Sally Mann as we question the limits of acceptable representation of childhood. In the third unit, students will have the opportunity to conduct their own original research as we explore how childhood figures in a range of recent debates from climate change to slacktivism.

Topic: Tragedy and Everyday Life

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The image of Oedipus blinding himself at the end of Sophocles' *Oedipus Tyrannus* is among the most violent in Western drama. Realizing that he has killed his father, married his mother, and brought a plague upon his people, Oedipus represents a human scenario too horrible to imagine. And yet Western culture *does* imagine it—it can't seem to stop imagining it—and the most horrible thing about the tragic fate of Oedipus is the suggestion that tragedy lurks within each of us as a fundamental risk of human existence. In this course we will examine tragedies both ancient and modern, asking why certain human scenarios are supposed to be tragic and whether those scenarios represent states of exception within the ordinary range of human experience—or exceptions that prove an unsettling rule.

In Unit 1 we will read Sophocles' *Oedipus Tyrannus* (429 BCE) and *Antigone* (442 BCE), examining the structure of tragic conflict and considering the manner in which this particular structure reflects the form of critical debate more generally. In Unit 2, we will compare Shakespeare's *Othello* (1603/4) with a recent adaptation of the play by Toni Morrison, *Desdemona* (2012), asking about the role of specific cultural features (such as race, class, and gender) in producing particular kinds of tragic effects. In Unit 3 we will view a selection of films, including *Vertigo* (1958), *Persona* (1966), *Memento* (2000), and *Black Swan* (2010), asking whether the tragedy of contemporary culture can be understood as an everyday and insoluble conflict between individuals, themselves, and the societies in which they live.

Topic: Wastelands

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: The impenetrable wilderness of *The Revenant*, the diseased streets of *Children of Men*, the trash heap cities of *Wall-E*—these are the wastelands that fascinate our pop culture. On the screen, they come to life as horrifying alternate universes and dead civilizations—the very fates we must avoid at all costs. And yet wastelands are not exclusively the stuff of science fiction. In this course, we will grapple with both imaginary and actual wastelands. We will begin with short stories by Jack London, Thomas King, and Octavia Butler. From the icy wilds of the Yukon to the borderlands of Native American exile, these writers question the way wastelands have been imagined, especially in North America, over the past century. Next, we will turn to real wastelands—to the garbage dumps and arid landscapes where nothing grows. We will ask what these places reveal about their inhabitants, their struggles, and their achievements. Finally, students will research a wasteland of their own choosing—anything from the mega slums of Mumbai to the sprawl of Boston's unused rooftops. Along the way, we will investigate how wastelands form and evolve, and how people adapt to them. Are wastelands actually the places we should avoid at all costs, or are they the places we can no longer afford to ignore?

Topic: Gothic Fiction

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

"Horror, madness, monstrosity, death, disease, terror, evil, and weird sexuality": these preoccupations, according to a recent critic, have animated the Gothic genre ever since it emerged in the mid-1700s. We will contemplate these preoccupations as we examine a range of Gothic texts from eighteenth-century Gothic fragments to stories by Edgar Allan Poe and Isabel Allende. And we will ask these questions about those texts: What makes the Gothic "Gothic"? How are we to understand its recurring motifs--its crumbling old houses, fragmented texts, prematurely buried women, incestuous siblings, and mad narrators? And what have modern Gothic writers and readers made of the genre they've inherited? We'll develop a working definition of the Gothic in our first segment, which will take a group of short stories, of various centuries and countries, as its primary texts. Next, we'll consider several of Edgar Allan Poe's stories (including "The Fall of the House of Usher," "The Tell-Tale Heart," "The Cask of Amontillado," and "Ligeia") in relation to each other and in the context of what a handful of twentieth-century critics have argued about them. Our third segment will focus on "the new Gothic": your final project, a research essay, will require you to identify a modern Gothic work in any medium—the possibilities include fiction, film, television, music, poetry, and visual media--and to develop your own argument about it in the context of contemporary critics' ideas.

Topic:**Expos Studio 20: The Successfu****Course Notes:**

Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes:

What does the successful life consist of? Do we base our notions of success on careers and paychecks? On the impact we have on others? On where we go to college, or on the happiness we achieve? In this course, we will investigate the different definitions and assumptions

we might hold about success. First, we will examine accounts of working in a variety of professions. What makes the work in that career meaningful? How do people measure success in these occupations? And what do people sacrifice for their success? Next, students will conduct original research to answer a question about success they're interested in, whether happening right here at Harvard or elsewhere. What, for example, predicts success in school, or in athletics and other extracurricular activities? What difference does a person's race, socioeconomic background, gender identity, culture, or religion make to their attaining success? What power do media images of success and failure have on people? What are potential barriers to success in a college or high school environment? When we look back at Harvard's own history, who fought to change institutional barriers to success and how, and what barriers might still remain? The course will also give students the opportunity to become more confident and skilled oral presenters; to create a final capstone project about their research; and to learn the art of writing an effective Job Cover Letter commonly required by employers for summer jobs, term-time positions, or employment after college.

Expository Writing 20 Section: ES06

Expository Writing 20 (116353)

Jonah Johnson

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Department

Enrollment Cap:

10

An intensive seminar that aims to improve each student's ability to discover and reason about evidence through the medium of essays. Each section focuses on a particular theme or topic, described on the [Expos Website](#). All sections give students practice in formulating questions, analyzing both primary and secondary sources and properly acknowledging them, supporting arguments with strong and detailed evidence, and shaping clear, lively essays. All sections emphasize revision.

Topic: Expos Studio 20: The Successfu

Course Notes: Students must pass one term of Expository Writing 20 to meet the College's Expository Writing requirement.

Class Notes: What does the successful life consist of? Do we base our notions of success on careers and paychecks? On the impact we have on others? On where we go to college, or on the happiness we achieve? In this course, we will investigate the different definitions and assumptions we might hold about success. First, we will examine accounts of working in a variety of professions. What makes the work in that career meaningful? How do people measure success in these occupations? And what do people sacrifice for their success? Next, students will conduct original research to answer a question about success they're interested in, whether happening right here at Harvard or elsewhere. What, for example, predicts success in school, or in athletics and other extracurricular activities? What difference does a person's race, socioeconomic background, gender identity, culture, or religion make to their attaining success? What power do media images of success and failure have on people? What are potential barriers to success in a college or high school environment? When we look back at Harvard's own history, who fought to change institutional barriers to success and how, and what barriers might still remain? The course will also give students the opportunity to become more confident and skilled

oral presenters; to create a final capstone project about their research; and to learn the art of writing an effective Job Cover Letter commonly required by employers for summer jobs, term-time positions, or employment after college.

Enrollment Cap: 15

Expos 40 is an elective within the Writing Program, and focuses on developing and strengthening the skills necessary for successful public speaking. Students learn strategies for impromptu speaking, preparing and delivering presentations, formulating and organizing persuasive arguments, cultivating critical thinking, engaging with an audience, using the voice and body, and building confidence in oral expression.

Admission is by application only. See any of the Canvas sites for a link to the online application. Limited to 15 students per section (105 total).

Course Notes: Please visit the <https://canvas.harvard.edu/courses/10200> >Expos 40 Canvas site for application information.

Class Notes: This section will meet for two hours, noon until 2 p.m., on Tuesdays and Thursdays in the Spring 2019 term.

History of Witchcraft and Charm Magic (109652)

Stephen Mitchell

2019 Spring (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines witchcraft (and the "magical world view") from cross-cultural, historical, and literary perspectives. Although witches and witchcraft are considered in their non-Western settings, the course focuses on the melding of Christian and pagan views of witchcraft and magic in the European Middle Ages, and the evolving construction of witchcraft ideologies through the witch crazes of the sixteenth and seventeenth centuries to the rise of modern paganism.

Folklore & Mythology 108

The Art and Craft of Scholarly Storytelling: A Workshop in Folkloristic Writing and Expression (210898)

Lowell Brower

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Storytelling is not just an object of folkloristic study, but also a central aspect of the folklorist's job. This course asks how scholars of human communities and expressive practices might do justice to other peoples' stories while turning them into stories of their own. An intimate, supportive, writing-intensive seminar, FM 108 introduces students to a host of exciting and innovative approaches to "scholarly storytelling," allowing them to develop both practical and poetic academic writing skills as they engage in hands-on peer review workshop sessions and theoretical discussions about academic writing, narrative craft, and creative expression. Students should enter the class having already begun a larger intellectual project—be it a senior thesis, a creative project, a major research paper—and be prepared to share this project with the class and offer thoughtful feedback to their peers. Along with reading and critiquing one another's works-in-progress, we'll examine everything from classical folklore collections, to ethnographic novels, to former departmental theses, to experimental non-fiction, to yesterday's most folkloristic tweets,

taking inspiration from our predecessors in our quest to become better storytellers about the communities, expressive practices, and consequential questions that we've chosen to explore.

Class Notes: Primarily intended for concentrators and those doing a secondary field in Folklore & Mythology. Others please consult with the instructor before enrolling.

Folklore & Mythology 128

Fairy Tale, Myth, and Fantasy Literature (122553)

Maria Tatar

2018 Fall (4 Credits)

Schedule: T 1200 PM - 0100 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Traces the migration of traditional tales from communal storytelling circles into the literary culture of childhood and into new media. How are powerful cultural myths about innocence and seduction, monstrosity and alterity, or hospitality and hostility recycled in fairy-tale fashion? How do fantasy worlds - both utopian and dystopic - provide children with portals for exploring counterfactuals and worst-case scenarios? Authors include the Brothers Grimm, H.C. Andersen, Lewis Carroll, J.M. Barrie, and J.K. Rowling.

Class Notes: Enrollment limited to 12, determined before the first class meeting. If you wish to apply, please send an e-mail message to Professor Tatar (tatar@fas.harvard.edu) with year, concentration, and a brief statement about your interest in the subject matter.

Folklore & Mythology 130

The Folklore of Emergency: Change, Continuity, and Communal Creativity Amid Crisis (208259)

Lowell Brower

2019 Spring (4 Credits)

Schedule: R 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course tracks the maneuvers of folklore and expressive culture through crises, conflict zones, and emergency situations. By examining the creative interventions of storytellers, performers, and artists in response to a wide range of profound ruptures—from political upheaval, to genocidal violence, to forced migration, to social revolution, to ecological disaster—the course illuminates and interrogates the powers, potentials, politics, and poetics of cultural performance, communal storytelling, and ritual praxis in the face of destabilizing change. Exploring case studies from Africa to the Arctic, we'll ask how storytellers revive and revise old stories to confront new challenges, how preexisting expressive forms weather unprecedented socio-cultural storms, how individuals and communities attempt to re-narrate themselves after calamity. How do folks turn their afflictions into art, how do they make sense of their sufferings, how do they treat their traumas, and transform their tragedies? What roles can folklore play in reimagining communities, in rehabilitating selves, in remaking worlds? Course work will include close readings of expressive texts, analytic and creative projects, class excursions, and a social engagement option.

Folklore & Mythology 172

Quilts and Quiltmaking (127859)

Felicity Lufkin

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Are quilts the great American (folk) art? From intricately stitched whole-cloth quilts, to the improvisational patchworks of Gee's Bend; from the graphic simplicity of Amish quilts to the cozy pastels of depression-era quilts; from the Aids Quilt to art quilts; quilts have taken on extraordinary significance in American culture. This class surveys the evolution of quilt-making as a social practice, considering the role of quilts in articulations of gender, ethnic, class and religious identities, and their positions within discourses of domesticity, technology, consumerism, and cultural hierarchy.

Tattoo: Histories and Practices (161297)

Felicity Lufkin

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Tattooing has been practiced in many different social and cultural settings, in many different time periods, to different ends. In the United States, tattooing was long associated with marginalized and stigmatized

groups, but since the 1970s, has become increasingly popular and even mainstream. This seminar style class will explore distinct regional histories of tattoo, the development of tattooing in the US, and the different ways that contemporary tattoo practitioners situate themselves historically and negotiate boundaries of race, class and gender. We will also consider tattoo as an art form that both invites and resists aesthetic judgments.

Freshman Seminar 21G

First Stars and Life in the Cosmos (108389)

Abraham Loeb

2019 Spring (4 Credits)

Schedule:

M 1200 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Since the Universe is expanding, it must have been denser in the past. But even before we get all the way back to the Big Bang, there must have been a time when stars like our Sun did not exist because the Universe was denser than they are. Since stars are needed to keep us warm, we face the important question about our origins: how and when did the first stars form? Primitive versions of this question were considered by humans in religious and philosophical texts for thousands of years. The Seminar will summarize the fundamental principles and scientific ideas that are being used to address this question in modern cosmology. Eventually, the formation of stars like the Sun was accompanied by planets like the Earth on which life has emerged. When did life start in the cosmos and when will it all end? The Seminar will describe current plans to search for extraterrestrial life, including project "Starshot" which aims to visit the nearest stars within our lifetime and send close-up photos of their planets.

Freshman Seminar 21H

Modern Civilization and the Rise of Heart Disease (159722)

Richard Lee

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Heart diseases have plagued humans since ancient times, but only in the past century has heart disease become epidemic throughout the world. Despite great progress in prevention and therapy, heart diseases will be major causes of death and disability throughout the next century. Modernization of civilization has played a major role in the rise of heart disease. Conversely, advances in heart disease have powerfully changed society and our personal daily behavior. In this seminar, we will examine some of the major intersection events between heart disease and modern society over the past century and consider how this could change the next century in America and throughout the world. The topics include dramatic events like a young physician inserting a urinary drainage tube into his heart—ultimately generating the modern life-saving treatment for heart attacks. We will explore how major lifestyle factors such as tobacco, alcohol, exercise and diet affect health, and how economics and politics often play a role in the complex relationship of health and society. In addition, we will visit a high-technology modern cardiology facility and watch some technology in action.

Class Notes: 2 hr seminar only-M, 3-5pm

Requirements: Course open to Freshman Students Only

Freshman Seminar 21R

The Evolutionary Transition From Dinosaurs To Birds: Fossils, Genomes and Behavior (159830)

Scott Edwards

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The transition of dinosaurs to modern birds is one of the most rapidly advancing and increasingly complete records of evolutionary change in the vertebrate fossil record. Additionally it is an excellent model for how science builds on incremental discoveries and undergoes paradigm shifts as new data are collected. We will explore the dinosaurian origins of modern birds through exploration of Harvard's excellent collections of dinosaur fossils, skeletons and specimens of extant birds, and focused readings and discussions. The goal will be to gain a greater appreciation of dinosaur diversity and to better understand the deep origins of modern bird adaptations.

Requirements: Course open to Freshman Students Only

Freshman Seminar 21V

Black Holes, String Theory and the Fundamental Laws of Nature (109627)

Andrew Strominger

2018 Fall (4 Credits)

Schedule:

T 0600 PM - 0830 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The quest to understand the fundamental laws of nature has been ongoing for centuries. This seminar will assess the current status of this quest. In the first five weeks we will cover the basic pillars of our understanding: Einstein's theory of general relativity, quantum mechanics and the Standard Model of particle physics. We will then examine the inadequacies and inconsistencies in our current picture, including for example the problem of quantum gravity, the lack of a unified theory of forces, Dirac's large numbers problem, the cosmological constant problem, Hawking's black hole information paradox, and the absence of a theory for the origin of the universe. Attempts to address these issues and move beyond our current understanding involve a network of intertwined investigations in string theory, M

theory, inflation and non-abelian gauge theories and have drawn inspiration from the study and observation of black holes, gravitational waves and developments in modern mathematics. These forays beyond the edge of our current knowledge will be reviewed and assessed.

Recommended Prep: Prerequisites: High school level calculus and physics.

Freshman Seminar 21W

Research at the Harvard Forest: Global Change Ecology-Forests, Ecosystem Function, the Future (112349)

David Foster

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 11

Global change ecology is the line of scientific inquiry that integrates the responses of organisms, ecosystems, and their environments with changes in human activity and climate. This seminar will focus on state-of-the-art research, tools, and measurements used in evaluating and anticipating global change through ongoing studies at the Harvard Forest's 3,500-acre outdoor laboratory in Petersham, MA. Students will explore the key role that forests play in climate control and develop the necessary skills to present and discuss the ecological evidence for past and future global change. The seminar consists of four weekend-long field trips (Friday evening-Sunday) to the Harvard Forest, where students will visit various long-term ecological experiments, use long-term and real-time datasets to understand biosphere-atmosphere interactions, and discuss key scientific findings. The course will highlight integrated faculty studies of land-use history, forest dynamics, atmospheric exchange of carbon and water, plant phenology, invasive plants and pests, and the impacts of climatic warming on complex ecosystems. Transportation, accommodations, and meals at the Harvard Forest will be provided. A final, on-campus mini-symposium will give students an opportunity to present what they have learned in a public forum.

Course Notes: The seminar consists of four weekend-long field trips (Friday evening-Sunday) to the Harvard Forest, dates TBA. Transportation, accommodations, and meals at the Harvard Forest will be provided at no cost to the student.

Class Notes: Open to Freshmen only. Four weekends at the Harvard Forest in Petersham, MA (Fri, 3pm-Sun, late afternoon) dates TBA. Transportation, accommodations, and meals at the Harvard Forest will be provided.

Requirements: Course open to Freshman Students Only

Freshman Seminar 22H

My Genes and Cancer (159990)

Giovanni Parmigiani

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The role of a person's genetic background in determining whether he or she will develop cancer, and when, is at the center of public discussions and active scientific investigations. Already, one's genetic background is used in making life-altering health decision aimed at preventing the occurrence of cancer, as was recently the case with actor Angelina Jolie. This seminar will explore the extent to which current scientific knowledge can inform this type of decisions. The goal is to gain enough understanding of the scientific background to critically evaluate the discourse of a genetic counseling session. The course will proceed at first by laying essential foundations of genetic inheritance in humans; cancer evolutionary theories; statistical risk; and decision-making in health care. Subsequently student will read articles from the scientific and popular press, and listen to podcasts. In class we will discuss the readings. There is a good deal of reading and listening, which everyone is expected to do ahead of class. Students can expect readings in genetics and statistics that will stretch them, though it will not always be necessary to understand all the technical details of every paper. Students can also expect to read opinion pieces with which they (as well as I) may disagree. Students will be required to present summaries of the assigned readings, and lead class discussions. They will also be required to write one 5-page double spaced essays at the end of the class, and to lead a class discussion on the topic of their papers. A typical paper is the critique of a scientific or popular press article, chosen from a list of suggested options or identified independently by the student, with my approval, during the first seven weeks of classes. Attendance is essential, not only for the students' education, but for the benefit their contributions provide to the others.

Freshman Seminar 22M Section: 1

The Amazing Brain (123659)

John Dowling

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What makes us human and unique among all creatures is our brain. Perception, consciousness, memory, learning, language, and intelligence all originate in and depend on the brain. The brain provides us with wondrous things, from mathematical theories to symphonies, from automobiles and airplanes, to trips to the moon. But when it goes awry, we are undone. (From "Understanding the Brain")

This seminar will be an introduction to our present understanding of neural and brain function. It is designed for students not planning to concentrate in neuroscience, but who enjoy science and are curious about the brain. We will read from my recently published book "Understanding the Brain: From Cells to Behavior to Cognition that is accessible to anyone with a high school science background. Each chapter

begins with a vignette, usually about a neurodegenerative or other brain disorder that is then explained further in the chapter.

Course Notes: The class will run only 2 hours within the time block. Professor Dowling especially invites those students who are not planning to concentrate in neurobiology or a natural science to join the seminar.

Recommended Prep: High school science

Requirements: Course open to Freshman Students Only

Freshman Seminar 23C

Exploring the Infinite (160198)

Peter Koellner

W. Hugh Woodin

2019 Spring (4 Credits)

Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Infinity captivates the imagination. A child stands between two mirrors and sees herself reflected over and over again, smaller and smaller, trailing off to infinity. Does it go on forever? ... Does anything go on forever? Does life go on forever? Does time go on forever? Does the universe go on forever? Is there anything that we can be certain goes on forever? ... It would seem that the counting numbers go on forever, since given any number one can always add one. But is that the extent of forever? Or are there numbers that go beyond that? Are there higher and higher levels of infinity? And, if so, does the totality of all of these levels of infinity itself constitute the highest, most ultimate, level of infinity, the absolutely infinite? In this seminar we will focus on the mathematical infinite. We will start with the so-called "paradoxes of the infinite", paradoxes that have led some to the conclusion that the concept of infinity is incoherent. We will see, however, that what these paradoxes ultimately show is that the infinite is just quite different than the finite and that by being very careful we can sharpen the concept of infinity so that these paradoxes are transformed into surprising discoveries. We will follow the historical development, starting with the work of Cantor at the end of the nineteenth century, and proceeding up to the present. The study of the infinite has blossomed into a beautiful branch of mathematics. We will get a glimpse of this subject, and the many levels of infinity, and we will see that the infinite is even more magnificent than one might ever have imagined.

Course Notes: For First-Year students only.

Freshman Seminar 23E

The Scientific Method: A Roadmap to Knowledge (127570)

Robert Sackstein

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course is designed to provide a working knowledge of the scientific method, thereby fostering development of fundamental skills in logic and experimental design. The various forms of reasoning (inductive, abductive, deductive) will be discussed in context of the practice of science. Through critical analysis of historical and contemporary scientific reports, students will gain an understanding of creating appropriate hypotheses, of controlled experimentation, and of the breadth and limits of conclusions drawn from experimental data.

Freshman Seminar 23I

GeoSciFi Movies: Real vs. Fiction (160219)

Miaki Ishii

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

Natural disasters such as earthquakes, tsunamis, hurricanes, and volcanic eruptions have major impact on society and cause great tragedies. The participants in this seminar will examine one Earth-science related science fiction movie each week and discusses features that are real and fictitious based upon our current understanding of the science of disastrous events. Simple math and science concepts are used to test how likely some effects are (e.g., is magnitude 11 earthquake possible and why?), and to understand the underlying science behind these features (e.g., what are the factors that control the size of an earthquake?). If applicable, we discuss how these scientific ideas are exaggerated to dramatize the effects.

Course Notes: Students will be required to watch the assigned movie prior to class.

Recommended Prep: Students must be comfortable with high-school level math and science.

Requirements: Course open to Freshman Students Only

Additional Course Attributes:

Attribute	Value(s)

Freshman Seminar 23K

Insights from Narratives of Illness (117969)

Jerome Groopman

2019 Spring (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

A physician occupies a unique perch, regularly witnessing life's great mysteries: the miracle of birth, the perplexing moment of death, and the struggle to find meaning in suffering. It is no wonder that narratives of illness have been of interest to both physician and non-physician writers. This seminar will examine and interrogate both literary and journalistic dimensions of medical writing. The investigation will be chronological, beginning with "classic" narratives by Tolstoy, Chekhov, and Kafka, and then moving on to more contemporary authors such as William Carlos Williams, Richard Selzer, Oliver Sacks, Susan Sontag, and Philip Roth. Controversial and contentious subjects are sought in these writings: the imbalance of power between physician and patient; how different religions frame the genesis and outcome of disease; the role of quackery, avarice, and ego in molding doctors' behavior; whether character changes for better or worse when people face their mortality; what is normal and what is abnormal behavior based on culture, neuroscience, and individual versus group norms. The presentation of illness in journalism will be studied in selected readings from the New York Times' and Boston Globe's Science sections, as well as periodicals like the New Yorker, The New York Review of Books, Harper's, and The Atlantic. The members of the seminar will analyze how the media accurately present the science of medicine or play to "pop culture." The seminar will study not only mainstream medical journalists, but so called alternative medical writers such as Andrew Weil also. Patients with different diseases will be invited to speak to the members of the seminar about their experiences. Students will try their hands at different forms of medical writing, such as an editorial on physician-assisted suicide that would appear in a newspaper and a short story that describes a personal or family experience with illness and the medical system.

Course Notes:

This seminar will meet for only 2 hours weekly within the time block.

Requirements:

Course open to Freshman Students Only

Freshman Seminar 23P

Physics, Math and Puzzles (109319)

C. Vafa

2019 Spring (4 Credits)

Schedule:

R 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Physics is a highly developed branch of science with a broad range of applications. Despite the complexity of the universe the fundamental laws of physics are rather simple, if viewed properly. This seminar will focus on intuitive as well as mathematical underpinnings of some of the fundamental laws of nature. The seminars will use mathematical puzzles to introduce the basic features of physical laws. Main aspects discussed include the role of symmetries as well as the power of modern math, including abstract ideas in topology, in unraveling the mysteries of the universe. Examples are drawn from diverse areas of physics

including string theory. The issue of why the universe is so big, as well as its potential explanation is also discussed.

Recommended Prep: This seminar is recommended for students with a strong background in both math and physics and with keen interest in the relation between the two subjects.

Requirements: Course open to Freshman Students Only

Freshman Seminar 23R

Asteroids and Comets (161261)

Charles Alcock

2019 Spring (4 Credits)

Schedule: M 0600 PM - 0815 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Comets have been seen regularly since before the beginning of recorded history. They have often been regarded as disturbing portents. Asteroids, on the other hand, were not discovered until the 19th century, with the advent of astronomy with telescopes. Today we know of many more asteroids than comets, but we believe that there are vastly more comets than asteroids in the solar system.

This seminar will start with the history of the study of comets and asteroids, including the "Great March Comet of 1843", observations of which led to the establishment of the Harvard College Observatory and its Great Refractor, at that time the largest telescope in the Americas. Our understanding of comets advanced dramatically in 1950 with the publication of two extraordinary papers: Whipple (then at Harvard) described the mixture of dust and ice that comprises the nuclei of comets, and Oort (Leiden University) showed that new comets enter the inner solar system from a vast, diffuse cloud surrounding the planetary system. Modern telescopes and spacecraft encounters provide us today with a wealth of information about comets and asteroids. We will examine these observations and learn what is known and what is inferred about the origin and structure of asteroids and comets. The students will observe with the Astronomy Laboratory's Clay Telescope on the roof of the Science Center. Students will take on projects, which may involve their own observing program, or which exploit existing data.

Course Notes: The seminar will make use of the Clay Telescope on the roof of the Science Center. There may also be a trip to the Observatory at 60 Garden Street to visit the Great Refractor.

Recommended Prep: AP calculus or equivalent.

Freshman Seminar 23S

The Seven Sins of Memory (117972)

Daniel Schacter

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

How do we remember and why do we forget? Can we trust our memories? How is memory affected by misinformation such as "fake news"? Do smartphones and the Internet help our memories or hurt them? Are traumatic experiences especially well remembered or are they poorly remembered? What are the best ways to study for exams? This seminar will address these and other questions related to the fallibility of memory by considering evidence from studies of healthy people with normal memories, brain-damaged patients who show dramatic forgetting or striking memory distortions, and neuroimaging studies that reveal brain regions and networks that are linked to memory. The framework for the seminar is provided by the idea that the misdeeds of memory can be classified into seven basic "sins". Three of the memory sins refer to different kinds of forgetting (transience, absent-mindedness, and blocking), three refer to different kinds of distortions or false memories (misattribution, suggestibility, and bias) and the final sin refers to intrusive recollections (persistence). We will consider how the memory sins impact everyday life and discuss the possibility that they can be conceptualized as by-products of adaptive features of memory, rather than as flaws in the system or blunders made by Mother Nature during evolution. Relatedly, we will also discuss the interplay between remembering past experiences and imagining future experiences, which provides clues regarding the nature and fallibility of memory.

Child Health in America (119619)

Judith Palfrey

Sean Palfrey

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

How can American health care be improved for children? How a nation cares for its children's health is often considered a measure of its commitment to the general citizenry and to its future. The members of the seminar will review together the history of children's health and health care in the United States, exploring the impact of geography, environment, nutrition, clean water, as well as of the scientific discoveries of the late 19th century and the early 20th century and the emergence of the high technology care of the middle and late 20th century. Then they will pose the question, "Does America provide children and youth the best possible health care available in the 21st century?" To approach this question, students will analyze the current causes of illness, disability and death among U.S. children and youth and compare United States epidemiology with that of other developed and developing nations. Students will also explore how child health delivery is financed.

Freshman Seminar 24Q

Biology of Symbiosis: Living Together Can Be Fun! (110305)

Colleen Cavanaugh

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

11

This course examines the remarkable diversity of symbiotic associations on Earth, their ecology and evolution, and their roles in human health and disease, agriculture, and biotechnology. Symbioses - "living together" - with microbes are ubiquitous in nature, ranging from lichens to the human microbiome. Symbiosis drives evolution, resulting in "new organisms" and charges us to think about biodiversity on a new level. In this freshman seminar, microbial symbioses with animals (including humans), plants, fungi, protists will be discussed, complemented by microscopy and field trips to local environs including Boston Harbor Islands, the New England Aquarium, and your own microbiome.

Human Brain in Health and Disease: A Neurologist's Perspective (108257)

Thomas Byrne

2018 Fall (4 Credits)

Schedule:

T 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Is the human mind an "emergent" property of the brain? How might that occur? We study how structure and properties of the brain and mind are shaped by biology, chemistry, experience and disease. For example, experiences during "critical periods" modify brain anatomy/function; learning a foreign language before or after puberty is revealed by a native or foreign accent. Mirror neurons play a role in perception, motor skills and emotion. Examples include "contagious" happiness or sadness, empathy and theory of mind; their dysfunction may cause autism. Beyond these "bottoms up" explanations, we will also consider a "top down" approach, in which the intention or purpose of a behavior or idea can "pull" our behavior or state of mind, what Aristotle termed "Final Cause." The human brain/mind is a pattern-seeking organ that uses logical patterns to predict the future. From infancy we make sense of the world by seeking logical patterns; mathematics is "core knowledge" of infants. We then use these patterns to look into the future to

anticipate where a given pattern will lead and are thus "pulled" to that goal or not; thus the goal can determine behavior and worldview. We read Victor Frankl's "Man's Search for Meaning" which explores human thought, behavior and purpose. This seminar straddles the realms of science, which asks "how?" and the humanities, which traditionally asks "why?" and strives to reconcile these two approaches to understanding the world and our place in it.

Recommended Prep: The course is intended for those who have scored -5- on AP Biology or Chemistry.

Freshman Seminar 26F

Dreams: Our Mind by Night (107340)

Deirdre Barrett

2018 Fall (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

John Steinbeck wrote: "It is a common experience that a problem difficult at night is resolved in the morning after the committee of sleep has worked on it." Steinbeck doesn't name the dream as spokesperson for the Committee of Sleep. However, most stories of nocturnal problem solving involve dreams. They are documented to have given the waking world one Nobel laureate's scientific experiment, music from classical masterpieces to pop chartbusters, innumerable novels and paintings, and inventions from the automated sewing machine to the computerized anti-aircraft gun. This course examines dreams with an emphasis on their relation to the creative process and problem solving. We'll first read about a variety of psychological aspects of dreaming—neurophysiology, biochemical, clinical, personality, and lucid dreaming research. The course also includes perspectives from history, religion, art, literature, and anthropology. In the later part we'll focus on the phenomena of problem solving and creativity in dreams—both the historic anecdotes and modern research on college students attempting to 'incubate' problem-solving dreams and how this may relate to which brain areas are active during dreaming sleep. We'll visit a sleep laboratory and a dream artist's studio. You'll get a chance to work with your own dreams—in at-home assignments and also in class exercises. You'll keep a dream journal for the first half of the course, participate in experiential dreamwork exercises, and write a term paper to explore a topic of your choice in more depth.

The Universe's Hidden Dimensions (121549)

Lisa Randall

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar will give an overview and introduction to modern physics. As with the book, *Warped Passages*, on which it will be loosely based, the seminar will first consider the revolutionary developments of the early twentieth century: quantum mechanics and general relativity; and then it will investigate the key concepts which separated these developments from the physical theories which previously existed. We will then delve into modern particle physics and how theory and experiment culminated in the "Standard Model of particle physics" which physicists use today. Then we will move beyond the Standard Model into more speculative arenas, including supersymmetry, string theory, and theories of extra dimensions of space. We will consider the motivations underlying these theories, their current status, and how we might hope to test some of the underlying ideas in the near future.

Changing Our Mind: Evolving Thoughts on Brain Regeneration (156449)

Paola Arlotta

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

We will discuss current theories on brain regeneration in a dynamic setting that combines brainstorming of the literature with hands-on experience in the laboratory. Students will learn experiments that have shaped the field of brain repair and consider the newest theories on ways to regenerate the nervous system. We will also visit the laboratory to investigate the regenerative capabilities of different organisms. Experimental results will be used to consider, contrast and evaluate how regenerative capacities have changed during evolution and to brainstorm paths forward towards new solutions for brain regeneration in species, like humans, that have not mastered this art.

Course Notes: Open to Freshmen only.

The Biology and Science of Cancer and Its Treatments: From Empiric to Scientific to Humanistic (125960)

George Demetri

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

"Cancer" represents hundreds of different diseases with a wide variety of causative mechanisms, as well as enormous social impact. This seminar aims to provide an introduction to the biology of cancer and what makes a normal cell become a cancerous one, delving into acquired and inherited genetic abnormalities and effects of environmental factors, such as nutrition, radiation, and tobacco. Current approaches to cancer will be discussed from prevention and early detection to treatment and survivorship. Treatment modalities continue to evolve—no longer just surgery, chemotherapy and radiotherapy, but development of targeted therapies such as monoclonal antibodies, signal transduction inhibitors, vaccines, and angiogenesis inhibitors, which are rationally aimed at biological mechanisms uniquely important to the cancer cells themselves with the goal of reducing side effects of therapy and improving outcomes. Although cancer incidence continues to increase, mortality is decreasing, resulting in many more cancer survivors and a need to care for the secondary effects of the treatment and the societal impact of this disease. We will discuss the field of Integrative Oncology, an evolving discipline that treats the patient as a whole and combines the best of eastern and western medicine. As successful cancer management becomes more targeted with the newer therapies, there needs to be an integrative approach which focuses on clinical outcomes for patients, personalized approaches to individual cancers, yet which takes into account the financial impact of new therapies at a global level and allows development of wise public policy decisions.

What Is Life? (156181)

Guido Guidotti

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar will consider the conditions of a cell necessary to support life. The central questions are: what are the principal constituents of the cell, what is the role of water in cellular activities, what determines the size of a cell, what are the consequences of crowding of the components of the cell, what is the role of diffusion in biological interactions, what is the energy currency of the cell, what are the critical reactions that provide energy for the cell, how does the cell evade the requirement for an increase in entropy for a spontaneous process. The proposal is to find a definition for a living system using information and principles of biology, chemistry and physics. Answers to the central questions may allow an understanding of the size of prokaryotic and eukaryotic cells, of the ionic composition of the cell cytoplasm, and of the involvement of molecular interactions and complementarity in cellular processes.

Freshman Seminar 27J

Prediction: From Ancient Omens to Modern Computer Simulations (156929)

Alyssa Goodman

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

We will discuss the variety of approaches humans have taken to predicting their own future. Early weeks will focus on omens, oracles, religion and prophecy. Next, we will move on to the so-called Scientific Revolution, exemplified by the work of Galileo, and the Age of Exploration, enabled by John Harrison's solution to finding longitude at sea. The last several weeks of the seminar will focus predictive work in epidemiology, finance, and climate, and ultimately on work about the Universe's future. The final session will be a discussion of how computer models of health/wealth/climate combine to predict our future. Preparatory assignments will include readings and/or multimedia experiences relevant to the next week's topic. Between meetings, students will be asked to make contributions to a course WordPress site, sometimes as answers to specific prompts (e.g. discuss a way in which Galileo's predictions of Jupiter's moons' orbits might have affected Renaissance ideas about determinism vs. free will?), and other times as

links to and explanations of online (open multimedia) content that will enrich the (public) course record. A central goal in discussions will be to follow threads, such as finding the right level of skepticism when assessing the likely veracity of predictions, or considering sources of uncertainty, that connect the wide variety of predictive systems to be discussed. The course will offer one field trip, to Harvard's Collection of Historical Scientific Instruments.

Freshman Seminar 27K

Energy: Be the Change (159950)

Mara Prentiss

2018 Fall (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

In the US, energy use creates large political and social tensions and much emphasis is placed on climate change. In China, health issues surrounding energy use are emerging as a critical issue. Importantly, there are many areas where the role of energy is often overlooked. A large fraction of current geopolitical tensions arise from issues originating in energy consumption, and that fraction may increase as water use and energy use become more closely tied. Too many discussions of energy focus on one feature of the problem, without considering how a change in one area will inevitably ripple out with the power to transform our relationships with each other and with the physical world. Some of those ripple effects are enormously positive, others are not. The goal of the course will be to choose energy changes that we would like to happen and to form a realistic plan for making that change occur. An important feature of the discussion will be considerations about what is physically possible; however, the major emphasis will be on trying to understand the connections that will be altered by that change. Any change, however laudable, inevitably creates both winners and losers. For change to happen, losers must at least be brought to accept the change. One goal of the course will be to establish local and global forums that allow us to learn more about people's reactions to proposals for energy change so that our proposals for change have a real possibility of coming to pass.

Digging Egypt's Past: Harvard and Egyptian Archaeology (108261)

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In 1905, Harvard University and the Museum of Fine Arts, Boston (MFA), teamed up to conduct excavations in Egypt and Nubia (modern Sudan). No one knew then that the Harvard–MFA Expedition would run for forty-plus years, cover twenty-three different sites, and discover hundreds of thousands of artifacts, art masterpieces, and other treasures, as well as contribute fundamentally to our knowledge of ancient Egyptian history. Egyptologist, Harvard Professor, and MFA curator George Reisner (1867-1942) ran the Expedition from "Harvard Camp," his mud-brick headquarters just behind the famous Giza Pyramids. Reisner was ahead of his time in revolutionizing the development of responsible archaeological methods. This course takes a chronological tour in the footsteps of this historic dig, focusing on topics such as early Harvard and MFA history, the development of archaeological method in the early 20th century, Western imperialism and colonialism and the role of archaeology, current attitudes toward repatriation of cultural patrimony, and new technologies for studying the Expedition's legacy. Students will access unpublished archival documents at Harvard and elsewhere, and will research important expedition members and events. Field trips to the Peabody Museum, the MFA, Harvard's Visualization Center (3D Giza Pyramids), Harvard Semitic Museum, and other locations will bring the Expedition to life.

Freshman Seminar 30Q

Death and Immortality (110425)

Cheryl Chen

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

In this seminar, we will discuss philosophical questions about death and immortality. What is death? Is there a moral difference between "brain death" and the irreversible loss of consciousness? Is the classification of a person as dead a moral judgment, or is it an entirely scientific matter? Is death a misfortune to the person who dies? How can death be a misfortune if you are no longer around to experience that misfortune? Is it possible to survive after death? What does it mean for you to survive after your death? Is there such a thing as an immaterial soul distinct from your body? Is immortality something you should want in the first place? Even if you do not live forever, is it nevertheless important that humanity continues to exist after your death? By discussing these questions about death, we will hopefully gain insight about the importance and meaning of life.

Freshman Seminar 31D

Nietzsche (159736)

Mathias Risse

2018 Fall (4 Credits)

Schedule:

T 0600 PM - 0845 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Friedrich Nietzsche addresses some of the big questions of human existence in a profoundly searching but often disturbing manner that continues to resonate with many. Hardly any philosopher (except Karl Marx) has exercised such a far-reaching and penetrating impact on intellectual life in the last 150 years or so. He has influenced thinkers and activists across the political spectrum. Nietzsche has always been of special interest to young people who have often appreciated the irreverence and freshness of his thought, as well as the often very high literary quality of his writing. In this course, we explore Nietzsche's moral and political philosophy with emphasis on the themes he develops in his best-known and most accessible work, *The Genealogy of Morality*. The best-known themes from this book include the slave rebellion in morality, resentment, bad conscience, and ascetic ideals. However, we also read several other of Nietzsche's works, and do so chronologically (except that we begin with his auto-biography, *Ecce Homo*, which Nietzsche wrote briefly before his mental collapse in 1889). The others works include *The Birth of Tragedy*, *The Gay Science*, *Beyond Good and Evil*, and *The Antichrist*. We do not read any secondary literature, though the instructor will recommend such literature as appropriate. The point is to become familiar with Nietzsche's writings themselves and to engage with his thought.

Course Notes:**PLEASE NOTE:** the first class will be held on Tuesday, Sept 4 for that week only.**Requirements:**

Freshman Seminar 31M

In Pursuit of the Ordinary: Genre Painting in Boston-Area Museums (123767)

Joseph Koerner

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course focuses chiefly on "genre" pictures: that is, depictions, mostly painted on canvas or panel, of everyday life. Examining closely key examples in different Boston-area collections, as well as at the Metropolitan Museum of Art in New York (excursion scheduled below), we investigate the changing nature and context of this type of image from its rise as a specialty product in early modern Europe through its complex development in the seventeenth through nineteenth centuries, to its rejection in Modernist art practice. Renewed fascination with the 'ordinary' in contemporary art and in recent museology (that is, museum history, theory and practice) features in this course, as well. Today's icons of the everyday (for example, Marcel Duchamp's *Fountain* of 1917, Andy Warhol's *Brillo Box* of 1964 boxes) obey a modern imperative that artists represent everyday life in suitably banal ways. Eschewing figural anecdote, artists dismantle art's traditional claims of occupying some special "higher" sphere; they confront viewers with estrangements of the things of the world we unthinkingly inhabit. Such works illuminate our pursuit within this course: We study how artists of the past pictured everyday life; but we also consider what people do with art in their everyday lives. And we explore what the discipline of art history, in its practices of scholarship, criticism, collection, preservation, and display, imagines the 'ordinary' to be. This focus—our own image of the ordinary—takes us to museum spaces that intend to simulate everyday life. The gallery becomes itself a genre picture to stroll through. Although the course is structured around broad themes and historical developments, the emphasis of the classes will be on close visual analysis of objects and critical evaluation of key art historical texts.

Course Notes: The seminar will conduct its meetings on site at various local museums.

Freshman Seminar 31N

Beauty and Christianity (121903)

Robert Kiely

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In Book X of *The Confessions* Augustine wrote, "I have learned to love you late, Beauty at once so ancient and so new!" In addressing God as source and model of beauty, Augustine joins theology and aesthetics in one sentiment that has informed and sometimes troubled Christianity throughout its history. There is no doubt that the life and teachings of Jesus have inspired some of the greatest works of art, literature, and music in Western culture, but it is also true that Christians have not always agreed on the definition and function of beauty. The seminar will consider certain key Christian aesthetic theories, including those of Augustine, Gregory the Great, Aquinas, and Calvin. But the focus will be on the analysis of particular works, selections from Dante's *Paradiso*, poems of Herbert, Donne, and G.M. Hopkins, *The Little Flowers of St. Francis*, Bunyan's *Pilgrim's Progress*, Hawthorne's *Scarlet Letter*, Melville's *Billy Budd*, works of C.S. Lewis, and the short stories of Flannery O'Connor. Included as well will be paintings (eg Italian Renaissance depictions of Jesus, Mary, Mary Magdalene, John the Baptist, and St. Sebastian) and choral music (eg Bach's *Saint Mathew Passion* and selected African-American spirituals). The abiding question will be: In what ways does aesthetic form—beauty—enhance, qualify, complicate, or obscure the gospel?

Freshman Seminar 31P

Trials from Classical Athens and Modern Legal Debates (109474)

Adriaan Lanni

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In classical Athens, litigants represented themselves before hundreds of jurors who rendered verdicts without instruction from a judge. We will evaluate Athens' distinctively amateur legal system by reading surviving court speeches involving homicide, assault, adultery, international law, and commerce as well as Plato's account of Socrates' defense speech. We will analyze the speeches as pieces of legal rhetoric and for the insight they offer into ancient approaches to crime and punishment, the regulation of sexuality, the trial jury, and court procedure. Taught by a law professor, the focus will be on comparing ancient and modern approaches to problems faced by all legal systems. We will use the ancient material as a jumping off point to debate modern legal topics such as the role of victims in the criminal process, jury nullification, the proper exercise of discretion in prosecution and sentencing, the provocation doctrine in modern homicide law, transitional justice institutions (human rights prosecutions, amnesties, truth commissions); theories of punishment, the use of collective sanctions in international law, free speech and the protection of dissent in a democratic society, and direct vs. representative models of democracy. Approximately half of each class session will be devoted to discussing the Athenian cases, the other half to discussing analogs in modern legal debates.

Recommended Prep:

Prior knowledge of ancient history or ancient languages is not required; all readings are in translation and the seminar is designed to be of interest to those without a background in the ancient world.

Freshman Seminar 31Q

Literal Looking: What We See in Art (109624)

Peter Burgard

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What do we really see when we look at a work of art? If we have little experience, we may not get far beyond discerning the theme and ascertaining whether the work is an accurate representation of reality (in the case of representational art); confronted with abstract art, seeing the work may result primarily in confusion or frustrated musing over what the point is. If we have too much experience — the seminar will address what "too much experience" might be and how literal looking relates to it — we may see the work as a function of historical, religious, aesthetic, mythological, and other concerns, or we may get caught in the web of a work's iconography. Either way, our too little or too great experience can prevent us from seeing what is there. This seminar is an exercise in seeing what is actually there in a series of great works of art, in moving beyond too much mystification yet staying this side of too much sophistication, an exercise in evaluating composition and representation as they present themselves to the viewer directly and without context. We will spend most of our time looking and talking about what we think we see, what we actually see, and how it informs interpretation, but we will also read short texts where professionally encumbered lookers (i.e., experts) say what we should see, so that we can compare the two and explore the degree to which literal looking aids or is aided by contextually informed looking. Works by Raphael, Caravaggio, Bernini, Velázquez, Turner, Renoir, Sargent, Kandinsky, Bauhaus, Warhol.

Course Notes:

The seminar will usually meet for 2 hours, 12-2pm, but will occasionally run longer to 2:30pm.

The seminar meets in the Art Study Center of the Harvard Art Museums, where original works of art pertinent to those we are studying will be displayed in the seminar room for our examination and discussion. There will also be one trip to the Museum of Fine Arts in Boston, which will entail one Wednesday on which you will have to be available from 12-4 PM.

Freshman Seminar 32R

Autobiography and Black Freedom Struggles (159835)

Tommie Shelby

2018 Fall (4 Credits)

Schedule:

T 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar introduces the main traditions of African American political thought and the history of the black fight for justice through the genre of autobiography. Students will read some classic autobiographies by African Americans (for example, those by Frederick Douglass, Booker T. Washington, and Malcolm X), along with some lesser-known works (for instance, autobiographies by Ida B. Wells, Shirley Chisholm, and Amiri Baraka). They will discover how an influential set of black individuals, both men and women, came to political consciousness and participated in the collective struggle for justice in America. Students will reflect on these figures' personal struggles to find meaning and solace under unjust conditions and to forge dignified modes of resistance. The seminar provides an opportunity to see how these personalities interpreted key events and periods in U.S. history—slavery, the Civil War, Reconstruction, the Jim Crow era, the two World Wars, the Great Depression, the civil rights movement, and the post-industrial urban crisis—as social actors who participated and lived through them. Close attention will be paid to their engagement with and contributions to the political traditions of liberalism, conservatism, socialism, black nationalism, and feminism. And students will critically examine how these influential thinkers and activists understood ideals like freedom, equality, democracy, fairness, and tolerance.

Freshman Seminar 33C

Borges, García Márquez, Bolaño and Other Classics of Modern Latin American Fiction and Poetry (159836)

Mariano Siskind

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course introduces students to some of the most important Latin American literary works produced during the twentieth century. We will explore the ways in which these novels, short-stories, essays and poems interrogate the historical traumas, political contexts and aesthetic potential of the region between 1920s and 1980s. We will shed light on their place in the historical and cultural formation of the literary canon, as well as on the concept of 'classic'. The goal of this seminar is two-fold. On the one hand, it introduces students to the Latin American literary and critical tradition through some of the best and most interesting literary and critical works (each novel or grouping of short stories and poems are paired with an important critical essay that situates them historically and aesthetically). On the other, it provides them with the fundamental skills of literary analysis (close reading, conceptual and historical framing, continuities and discontinuities with the aesthetic tradition), and that is why I have selected a relatively small number of readings, in order to have time to work through them, discuss them and have some flexibility to extend the classes we dedicate to a given author when our discussions merit it.

Freshman Seminar 33O

Animation--Getting Your Hands on Time (126211)

Ruth Lingford

2019 Spring (4 Credits)

Schedule: R 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

Students in this practice-based seminar will experiment with a variety of animation techniques to gain new perspectives on time. Using drawing, we will break down time into frames, understanding movement as both a liquid flow and a sequence of distinct infinitesimals. Using pixillation, a technique from the beginning of cinema, we will analyze and deconstruct human movement, then reassemble it for magical effect. Using strata-cut animation, we will attempt to think of time as a solid, and visualize the progression of time in terms of volume and shape. Using editing software, we will explore cinematic constructions of time through the use of cutting and juxtaposition. Each session will include screenings, discussion and practical work. There will be practice-based assignments each week. Each student will have the opportunity to make a film of around one minute, using an animation technique of their choice. Or they may decide to collaborate with others to make a longer piece. No previous experience of drawing or animation is required.

Course Notes: There will be an optional screening on Fridays, 1-3 that students are strongly encouraged to attend.

Requirements: Course open to Freshman Students Only

Freshman Seminar 33X

Complexity in Works of Art: Ulysses and Hamlet (116807)

Philip Fisher

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 13

Is the complexity, the imperfection, the difficulty of interpretation, the unresolved meaning found in certain great and lasting works of literary art a result of technical experimentation? Or is the source extreme complexity—psychological, metaphysical, or spiritual? Does it result from limits within language, or from language's fit to thought and perception? Do the inherited forms found in literature permit only certain variations within experience to reach lucidity? Is there a distinction in literature between what can be said and what can be read? The members of the seminar will investigate the limits literature faces in giving an

account of mind, everyday experience, thought, memory, full character, and situation in time. The seminar will make use of a classic case of difficulty, Shakespeare's Hamlet, and a modern work of unusual complexity and resistance to both interpretation and to simple comfortable reading, Joyce's Ulysses. Reading in exhaustive depth these two works will suggest the range of meanings for terms like complexity, resistance, openness of meaning, and experimentation within form.

Course Notes: There may be interviews for selected applicants during Opening Days week.

Freshman Seminar 34C

The Problem of Evil and the Nature of Human Freedom (160199)

Courtney Lamberth

2019 Spring (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Common sense seems to confirm the reality of evil. From the genocides of the 20th century to the homicides that fill our daily news, evil seems to be a category of ordinary language and experience. But what do we really mean when we use the word "evil" to describe a person, an action or an historical event? Why does the word pack an emotional punch that other terms do not? The term "evil" seems to point to an incomprehensible quality that marks the limits of human understanding and control. Theologians, philosophers and poets have long struggled with these limits, drawing on their deepest imaginative powers in writing about the meaning and consequences of evil. This course will consider key texts in Western philosophy, theology and other literary forms that have sought to frame the question and offer readers avenues for responding to the problem of evil.

Freshman Seminar 34F

The Folklore of Gaelic Scotland (160204)

Natasha Sumner

2018 Fall (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course explores the 'treasure house' of Gaelic folklore recorded in the Highlands of Scotland since the nineteenth century. The international controversy over Macpherson's 'Ossian' poems in the 1760s prompted interest in the Scottish Gaelic folklore from which they were adapted. Folklorists have since documented a wealth of orally recorded material, including tales of ancient heroes (e.g. Finn McCool) and beliefs in malevolent fairies, seal-people, dangerous water-horses, the evil eye and second sight. As we explore these fascinating topics, we will take into account international scholarly approaches to folklore.

Course Notes: No knowledge of Scottish Gaelic is required for this course. The seminar will also include 'an end-of-term 'ceilidh", a traditional social gathering often involving song, dance, and/or storytelling.

Freshman Seminar 35C

Soundtracking (161177)

Christopher Hasty

2019 Spring (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This course will offer a critical, close-reading approach and a creative art-making approach to exploring ways of combining sound and moving image. The first few weeks will involve analysis and discussion of uses of music/sound in excerpts from a variety of movies and TV series episodes and mastering skills for working with ProTools, a digital audio workstation system that can incorporate video. As skills with Pro Tools develop emphasis will shift to composition exercises that experiment with combining sound and image. Since all students will be given the same assignments we will have the opportunity of testing and discussing various solutions. The seminar will accept students with and without compositional training and the ability to notate music. Sound will be composed in various ways, many of which will not involve conventional music notation. All students will learn to use high quality field recorders to gather sound materials that can then be sculpted with Pro Tools. The final project will be the production of a sound track to an assigned short film (5-10 minutes) and a public screening.

Course Notes: The ability to read musical notation is not a pre-requisite.

Freshman Seminar 35E

What is Beauty? (125964)

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Of the three fundamental concepts of Western civilization—truth, goodness, and beauty—beauty is the only one that does not demand loyalty or consistency. One moment we are entirely absorbed by a person or an object, the next moment we find it insignificant. Beauty does not promise or imply the possibility of verification, not even in a distant future—there will be no comprehensive research and no day of reckoning to finally prove that Leonardo's Mona Lisa or Beethoven's Ninth Symphony are in fact beautiful. But perhaps this is precisely the reason why we need beauty, and why it is worth studying: it teaches the contingency of values and the revocability of absolutes; it is a most effective training for tolerance and innovation. Selections from Plato, Kant, and other Western classics of aesthetics will be discussed in the first part of the seminar. In the second part we will explore the representation of beauty in literature, art, opera, cinema, and design, with examples mostly taken from the culture of a country, Italy, that successfully self-fashioned itself as the land of beauty. Topics will include the Renaissance "invention" of art, Mozart's Don Giovanni, Fellini's La Dolce Vita, and Benetton's advertising campaigns.

The Art and Craft of Acting (126838)

Remo Airaldi

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

We've all watched a great performance and wondered, "How did that actor do that?" Acting is undoubtedly the most popular, most widely experienced of the performing arts and yet, in many ways, it remains a mystery. This seminar will give students an opportunity to demystify the art of acting by introducing them to the basic tools of the trade; they will learn about the craft of acting by actually "doing" it. It will provide an introduction to acting by combining elements of a discussion seminar with exercises, improvisations and performance activities. Improvisation will be used to improve group/ensemble dynamics minimize habitual behaviors and to develop characters. Students will explore a range of acting techniques designed to give students greater access to their creativity, imagination and emotional life. The aim will be to improve skills that are essential to the acting process, like concentration, focus, relaxation, observation, listening, etc. In the later part of the term students will work on monologues. Students will also attend and critique productions at the Loeb Drama Center and other theaters in the Boston area.

Course Notes:

Students will be required to attend theater performances (dates TBD) during the course of the term. There will be no charge to the student.

Comparative Historical Mythology (109498)

Michael Witzel

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

This seminar will deal with an innovative approach to comparative Mythology, detailed in my 700 pp. book on the topic (OUP, Dec. 2012). Comparative mythology has been a well-trodden but controversial field since at least 1800. The proposed seminar will discuss the matter in a new way by incorporating an historical approach, which has so far been lacking. The two most prominent explanations for the wide-spread, worldwide similarities in myths have been archetypes (C.G. Jung) and diffusion (L. Frobenius / H. Baumann). Both approaches are inadequate to explain these similarities. Approaching myths historically, and working backwards from our earliest written sources (Egypt, Mesopotamia, Levant, India, China, Maya, etc.), earlier stages in the development of mythologies can be detected through successive reconstructions. These are supported by the additional testimony of oral texts found across the globe. Further, recent developments in human population genetics as well as in archaeology, anthropology and comparative linguistics sustain the proposed historical model, which ultimately, but rather tentatively, reaches back to the time of the "African Eve." This seminar will investigate the ways myths have been compared in the past; further, the underlying assumptions about human spirituality and religion, as well as available scientific evidence for such models. The new historical and comparative proposal will be tested against this evidence. All of this offers a wide scope for students' class room intervention and individual research in a multitude of ancient and oral texts (in translations) from a variety of languages as well as in the sciences.

Money Matters (108768)

Evridiki Georganteli

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Money Matters aims to engage first-year students with the economics, politics and aesthetics of one of the

most fascinating and enduring aspects in human history. The seminar is a study of money in all its manifestations from the early agrarian societies to the first financial crisis of the 21st-century global market. How have individuals and societies reacted to and used money in business, politics and religion? What are the factors that shaped the metallic content and iconography of coins from the 7th century BC to the end of the Gold Standard in the 20th century? Why are early modern American and European banknotes so important for the study of social history? What are the links between art, literature, theatre, cinema and money? Seminar meetings will take place at the Harvard College, the Harvard Carpenter Center for the Visual Arts and the Harvard Art Museums, introducing students to the world-class Harvard Coin Collection and offering them the opportunity to handle research and discuss priceless artifacts. Money Matters is intended for students with an interest in history, art history, archaeology, political science, economics and the study of world religions. Handling sessions, group discussions and a short essay on a choice coin from the Harvard Coin Collections will offer students a sense of immediacy and accessibility of Harvard's splendid numismatic holdings and the opportunity to understand why money makes indeed the world go round.

Horror in Literature and Movies: Cultural, Psychological, and Scientific Aspects of the Horror Genre (156293)

Steven Schlozman

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Horror films and horror stories have been in existence since movies and stories themselves have been in existence. In other words, from the time that humans could tell stories, some of those stories have been deliberately frightening. Nevertheless, a clear definition of horror as a genre remains elusive and even controversial. This course will attempt to make sense of horror stories. We will work towards a comprehensive definition of fictional horror through careful exploration of scholarly literature from film theorists, literary critics, cultural psychologists, neuroscientists, and the popular press. The course will also make use of classic and more recent horror movies and writing. In addition, there will be a strong creative component to this course. The instructor is a physician and an assistant professor at Harvard Medical School and also a professional horror writer. He will utilize many of the techniques that have been incorporated into writing workshops, panel discussions, and film festivals in which he has himself participated. In this fashion, we will as a course develop our own sense of what constitutes horror through careful academic scrutiny of the topic and through the honing of our own creative talents.

Reading Tolstoy's War and Peace (119150)

Julie A. Buckler

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Leo Tolstoy's massive masterwork *War and Peace* (1865-69) is a magnificent work of art by a world-class writer tackling life's "big questions." It is also a great read! Over the course of a semester, we will give this nineteenth-century novel the time and attention it deserves. We will read *War and Peace* closely, while comparing two different English-language translations, exploring cultural and historical context, artistic biography, historiography, the novel as a literary form, literary language, issues in translation, interpretive paradigms, and potential new ways of reading. We will trace the changing interpretative approaches to *War and Peace* from the 1860s to the present. How does the pacing of the novel relate to nineteenth-century reading and publishing practices? To nineteenth-century conceptions of time, space, narrative, and genre? What are the problematic distinctions between history and literature that the novel raises? We will also consider the significance of the Napoleonic wars (1803-1815) in Russian history and the broader pan-European cultural legacy of this period, including literature, art, and architecture.

Course Notes: All readings will be in English.

Freshman Seminar 37Y

Muslim Voices in Contemporary World Literatures (119569)

Ali Asani

2018 Fall (4 Credits)

Schedule:

T 0600 PM - 0845 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What do Muslims think of acts of terrorism committed in the name of Islam, the mixing of religion with politics, the rights of women, the "West"? This seminar investigates the viewpoints of prominent Muslim writers on these and other "hot button" issues as reflected in novels, short stories and poetry from different parts of the world. Explores a range of issues facing Muslim communities in various parts of the world by examining the impact of colonialism, nationalism, globalization and politicization of Islam on the search for a modern Islamic identity. Readings of Muslim authors from the Middle East, sub-Saharan Africa, South Asia, Europe and America.

Course Notes: No prior knowledge of Islam required. Assignments include compiling a portfolio of creative responses to the weekly readings using different media.

Class Notes: 2 hr seminar only: 7-9:00pm

Freshman Seminar 40E

Law and Society through the Cinematic Frame (160785)

Ofrit Liviatan

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

In this seminar we will explore the interaction of law and society using the lens of film. The cinematic experience has become a key site through which the public understanding of law is produced, debated and influenced. Driven first and foremost by market and audience considerations, law-related films often inject drama, contentious dimensions and even misrepresentations into the portrayal of real events. Nonetheless, by raising awareness about legal themes that pervade the plot, these films offer valuable insights toward discovering social scientific perspectives on the manner in which law functions in everyday life. Hence, the seminar will not focus on legal doctrine or teach you the fundamentals of the legal profession. Rather, using films as a framework for discussion, we will study law's working in relations to the social, political, economic and cultural environments in which it operates. Central thematic topics to be discussed include: the relationship between law, justice and morality; how does law intervenes in social relations and whether it is over-utilized as part of these relations; the dynamics between law and social change; is access to the legal process equal to everyone; and the function of law in deeply divided societies. Throughout the semester film viewing will occur outside class as part of your weekly preparation for the seminar. However, we will dedicate one class as a field trip to watch a law-related film together and analyze its themes through the sociolegal perspective.

Freshman Seminar 40I

The Supreme Court in U.S. History (123660)

Richard Fallon

2018 Fall (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Often described as the world's most powerful court, the US Supreme Court has not always enjoyed high prestige or unquestioned authority. The Court's significance has waxed and occasionally waned, with the variations typically depending on surrounding currents in the nation's social and political history. Examines the history of the Court from the nation's founding to the present. Highlights relation between constitutional law and ordinary politics, and the ways in which they influence one another.

Freshman Seminar 40K

America's \$3 Trillion Challenge: Health Care Access and Productivity in the Health Reform Era (109334)

Alan Garber

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Health care in the United States is often criticized for its expense, ineffectiveness, and inequity. Every policy solution for increasing access to care faces the challenge of dealing with its costs. Because per capita annual health expenditures exceed 8,000 dollars, the subsidies needed to support health insurance expansions are large and controversial. The fundamental challenge to improving health and health care is to rationalize expenditures by improving the efficiency or productivity of care. This seminar explores barriers to health care productivity in the U.S, along with potential approaches to enhance the value of care.

Recommended Prep: Background in microeconomics at the level of first-semester Economics 10 is required. Knowledge of AP-level statistics is desirable. The course is relevant to anyone with an interest in applied economics, public policy, health care, or public health.

Requirements: Course open to Freshman Students Only

Free Speech (110427)

Sanford Ungar

2018 Fall (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 13

In this age of rapid globalization and heightened cross-cultural contacts, nations struggle to reaffirm their identities and values. In the United States, one of the most precious values is free speech, embedded in the First Amendment to the Constitution and regarded as a keystone of American democracy. But arguments over the boundaries of free speech have become intense, especially in the era of electronic communication. This seminar will examine the dialogue taking place within the United States and around the world on free speech issues – sometimes civil, but often a political or cultural confrontation that turns violent. We will discuss international and domestic protests over politically sensitive cartoons, controversies over Holocaust denial, whether hate speech should be banned on campuses, whether the domestic media can ever be legitimately constrained on national security grounds, whether anti-gay religious activists have a right to disrupt military funerals, whether pornography and violent music lyrics should be regulated, and what constitutes free speech on the Internet or cell phones. Through Supreme Court decisions and by other means, we will examine the debate over what it means to be patriotic and whether patriotism requires Americans to say, or prohibits them from saying, certain things – and examine how standards have changed over the years. We will ask whether other countries' attitudes toward free speech and the other First Amendment freedoms should influence US foreign policy toward those countries. Examples of constraints on free speech in our daily lives and work, unwitting or not, will also be considered.

Making the Grade? Middle and High School Math Education in the U.S. (109469)

Robin Gottlieb

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What are the goals of mathematics education at the middle and high school level, and how do these goals impact our evaluation of the success or failure of math education in America? Why does math education at these levels matter? What societal structures (historic, economic, political, cultural) impact mathematics education? How does math education in turn impact societal structures? As the world changes, how do the goals of mathematics education change, and in what ways? We will explore these issues to become more educated participants in this ongoing discussion.

Course Notes: This is not a mathematics course and has no prerequisites. A special invitation is extended to students not planning to concentrate in math.

Freshman Seminar 41K

Human Rights, Law and Advocacy (156502)

Susan Farbstein

2019 Spring (4 Credits)

Schedule:

M 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Human rights practitioners confront numerous ethical, strategic, and legal dilemmas in their struggles for social justice. This freshman seminar explores the underlying legal framework in which human rights advocates operate, and then uses specific case studies to consider the various challenges they must grapple with in their work. The seminar is designed to encourage students to critically evaluate the human rights movement while offering an introduction to some of the essential tools and strategies used by human rights advocates, including advocacy, litigation, documentation, and report writing. Students will be asked to grapple with tough questions, such as: How can human rights be harnessed to successfully influence and change behavior? What does responsible, effective human rights advocacy look like? How do we engage without perpetuating power differentials along geopolitical, class, race, gender, and other lines? How do we find ways to work in collaboration with directly affected communities? What does it mean to be a human rights advocate working on abuses affecting individuals and communities remote from yourself? How do you balance broader advocacy goals with the needs of individual survivors or clients? How do you determine when to intervene and devote limited resources to a given issue? Students will also consider a series of dynamics (e.g., north/south, insider/outsider, donor/donee, lawyer/non-lawyer) that influence how and why advocacy is formulated and received. Finally, the seminar considers the limits of the human rights paradigm and established methodologies, such as litigation and "naming and shaming," and explores alternative sources and forms of advocacy, including the role of community lawyering in the human rights context.

Course Notes: Open to Freshmen only.

American Presidential Campaigns and Elections 1960-2020 (124777)

Maxine Isaacs

2018 Fall (4 Credits)

Schedule:

R 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

For two hours each week, students will work to understand the history, forces and politics of American presidential campaigns and elections. Each student will be "responsible" for one presidential election between 1960 and 2016, and, together, members of the seminar will develop some perspective on dramatic changes as well as enduring factors that have shaped our own times, issues and society. With the help of some guests – practitioners including political leaders, public opinion analysts and journalists – students will develop a deeper understanding of contemporary politics; the impact of demographic patterns and changes; public opinion and polling; and political communication. Students will learn about the relationship among politics, news and public opinion, and who influences whom. Participants will be

introduced to excellent contemporary studies about modern presidential campaigns and elections. At the end of the term, students will make oral reports to the class on lessons learned from a past election which can help all of us better understand this one.

Freshman Seminar 42C

The Role of Government (160196)

Oliver Hart

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Economists have a very positive view of the role of markets. The intellectual foundations of this are the first and second theorems of welfare economics. The purpose of the seminar is to introduce the students to these results but also to their limitations. For example, for markets to work well it is essential to have a legal system that upholds contracts and protects property rights. The legal system is also important to

deter crime. But who can provide the legal system other than a government that has the coercive power to raise taxes? The legal system is an example of a public good, but of course there are many others including national defense, clean air, etc. Markets under-provide public goods and they also do not work well in the presence of externalities, a highly topical example of which is global warming resulting from carbon emissions. Another very topical issue is inequality. There is no particular reason to think that a market economy will yield an equitable distribution of income, and given this what is the appropriate government response? Throughout the seminar the analysis of ideas and concepts will be interspersed with policy issues such as whether and what limitations should be placed on the right to smoke or consume drugs, the right to marry, the right to buy and sell organs, the right to bear arms, and the freedom of businesses to decide whom to serve. We will also consider the pros and cons of the Affordable Care Act (Obamacare), the role of government nudges, and whether goods or services paid for by the government need to be produced by the government or can be outsourced: the issue of privatization.

Freshman Seminar 42H

U.S. Energy Policy and Climate Change (160203)

James H. Stock

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

How we produce and use energy has major implications for the economy, energy security, and climate change. The U.S. "energy revolution" – nonconventional oil and gas production (fracking), increasing use of renewable energy, and reduced demand – has contributed to a sharp decline in U.S. oil imports, a 12% reduction in U.S. carbon dioxide emissions, a shift away from coal, and economic growth. With these technological and economic changes have come wild swings in national climate policy, as Obama-era regulatory and subsidy policies designed to shift from fossil fuels to renewables are replaced by the Trump administration with policies to promote and subsidize fossil fuel use and production. The conceptual framework is economics (but no prior economics is assumed), a powerful tool for understanding market failures and for designing government policies that are efficient, effective, and appropriate. The course starts with a review of the U.S. energy sector, climate science, and climate economics including carbon pricing. The course then dives into four current policy issues: (1) the regulation of CO2 emissions from fossil-fuel fired power plants; (2) biofuels policy; (3) fossil fuel extraction policy and the "keep it in the ground" movement; and (4) fuel economy standards. In each case we will evaluate the policy landscape with a focus on the economic and climate consequences. The course concludes with an assessment of the reasons for the changes from the Obama to Trump administrations, and the implications for future energy and climate policy.

Freshman Seminar 42N

From the Arab Spring to ISIS: National Security Challenges in the Mideast (124885)

Charles Freilich

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

The Middle East is home to many diverse peoples, with ancient and proud cultures, in varying stages of political and socio-economic development, often times in conflict. Now in a state of historic flux, the Arab Spring and subsequent regional tumult have transformed the Middle Eastern landscape, with great consequences for the national security strategies of the countries of the region. The primary source of the world's energy resources, the Middle East remains the locus of the terror-WMD-fundamentalist nexus, which poses a significant threat to regional and international security, as does the rise of ISIS. The course surveys the national security challenges facing the region's primary players (Egypt, Saudi Arabia, Iran, Iraq, Syria, Lebanon, Israel, the Palestinians, Jordan, and Turkey) and how the recent upheaval has affected them. Unlike many Middle East courses, which focus on US policy in the region, the course concentrates on the regional players' perceptions of the threats and opportunities they face and on the strategies they have adopted to deal with them. Students play the role of senior advisers to the actual regional leaders in power and write "real world" policy papers for them, from their perspective and given the strategic, political and personal constraints they face. The course provides an essential vantage point for all those interested in gaining a deeper understanding of the region, especially those with an interest in "real world" international relations and national security.

Freshman Seminar 43C

Human Rights and the Global South (160211)

*Jacqueline Bhabha**Caroline Elkins*

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0530 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Human rights have become a global lingua franca, invoked by leaders and movements across the political, religious and cultural spectrum. Because they can come into conflict with each other, human rights can serve to justify wars (to combat terrorists), religious intolerance (to counter fundamentalists), gender discrimination (to support religious tenets), refusal of safe haven to refugees (to promote domestic human

security). Despite over half a century of international law making and domestic enactment of human rights treaties, and despite a vibrant civil society that has embraced human rights principles world-wide, remedies for violations such as torture, rape, genocide, political or economic persecution, and crippling destitution, remain elusive. This dilemma is particularly clear in situations of forced migration, when vulnerable populations are separated from individuals and institutions that traditionally provide support. This seminar will focus on the Global South and address key issues in contemporary human rights theory and practice through the lens of displaced, disenfranchised, and threatened individuals and groups. Members of the seminar will first study the philosophical and political traditions that led to codification of human rights. The seminar will then cover the legal frameworks of contemporary international human rights and humanitarian law and examine how they affect some of the most egregious human rights violations of the current period. Case studies of pivotal controversies and decisions will be examined to explore such questions as who is a refugee or an internally displaced person (IDP), what is trafficking, when is deportation justified, what protections do civilians have in conflict settings, and what are major crimes of atrocity and war.

Class Notes: 2hr seminar only-Th, 3:30-5:30pm.

Freshman Seminar 43D

Christianity and Slavery in America, 1619-1865: A Student-Curated Library Exhibit (160213)

Catherine Brekus

2018 Fall (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Most people today assume that Christianity and slavery are incompatible. For most of Christian history, however, the opposite was true. Christians not only owned slaves, but they also argued that slavery was sanctioned by the Bible. This seminar will explore the relationship between Christianity and slavery in America from 1619, when the first slaves arrived in Virginia, to the Emancipation Proclamation in 1865. We will ask several questions. What was the role of Christianity in sanctioning slavery? How did white Christians become convinced that slavery was sinful? Why did many slaves convert to Christianity, the religion of their oppressors? How did enslaved Christians make sense of their suffering? The main work of the seminar will involve curating an exhibit on Christianity and slavery in America at the Andover-Harvard Theological Library. With the help of library staff, we will choose documents and objects for the exhibit, write captions, and organize the exhibit cases. The exhibit will open in early December and will remain on display for the rest of the academic year. Class meetings will take place each week in the Special Collections department of Andover-Harvard Theological Library, where we will read and discuss rare books and manuscripts, including proslavery tracts and sermons, abolitionist speeches, poems, and the personal religious narratives of enslaved men and women.

Freshman Seminar 43F

When Bad Things Happen Early in Life: Effects of Early Adversity on Brain and Behavioral Development (160221)

Charles Nelson

2018 Fall (4 Credits)

Schedule:

M 1230 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Decades of research tell us that the foundations of healthy development are built early in life. Genes provide the basic blueprint for brain architecture, but experiences shape the activity of the genome and thus determine how the circuitry is wired. Significant adversity can derail developmental processes and distort brain maturation, leading to limited economic and social mobility. Exposure to significant adversity early in life, particularly during critical periods of brain development, may increase risk for a host of chronic physical health problems, including cardiovascular disease, hypertension, diabetes, and addictive behavior; it can also lead to a variety of mental health problems, including depression and anxiety and characterological problems. Science clearly indicates that the longer we wait to intervene on behalf of such children, the more difficult it becomes to achieve healthy outcomes. This constraint is particularly true for children who sustain the wear and tear of early exposure to so-called "toxic stress". In this seminar we will critically examine the range of adverse early experiences that impact children growing up in both low and high resource countries. Key themes include a) the nature of the adversity children are exposed to, b) the timing of the adversity c) the chronicity of the adversity, and d) individual differences (including genetic and environmental factors that may confer protection on children exposed to early adversity). We will pay particular attention to the short- and long-term outcomes on physical, neurological and psychological health.

Freshman Seminar 43M

Psychology of Religion (125718)

Jon Boyd

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This seminar will address some of the fundamental questions about the nature of the self, issues that appear at the intersection of religion and psychology: Where do we turn, if anywhere, for ultimate meaning? What happens when individuals undergo some sort of crisis and radically change their belief system or how they engage with the world? How do we face death? An underlying assumption of the seminar is that no individual or society can thrive without resting on a fundamental value system or symbol-system that provides some kind of orientation to the cosmos. The seminar will therefore explicitly address the ways in which both individuals and cultures create frameworks of meaning—religion being a basic one for many—and the limits of those frameworks. The seminar will also explore the complexities raised by those who might not be able to create such systems of meaning for themselves (such as those with certain mental illnesses) and those who might be unwilling or unable to abide by or live within culturally established norms. The readings explore philosophical, psychological, and literary perspectives on these questions and issues and will include works by Freud, Dostoevsky, William James, Flannery O'Connor, Malcolm X, and others.

Freshman Seminar 50F

Artificial and Natural Intelligence (203000)

Venkatesh Murthy

2019 Spring (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

What is intelligence? An inquiry into the nature of intelligence can take different forms – philosophical, biological, mathematical or technological. In this Freshman Seminar, we will use machine intelligence (everything from voice recognizing smartphones to Jeopardy-playing computers) as a handle to think about natural intelligence (brains and behavior of animals). Although we will start with big, general questions, we will quickly move to concrete queries about brains and computers. This approach, rather than just starting with brains of animals, may be useful in framing more universal questions independent of the specific architecture of brains of animals.

Recommended Prep: This Seminar targets students that are interested in brains and computers in equal measure, and are comfortable with analytical thinking. Some basic programming skills in Python, Matlab or equivalent is required to complete assignments—you will receive help with a remedial programming boot camp in the first two weeks.

Requirements: Course open to Freshman Students Only

Freshman Seminar 50H

The Biology of Movement (203243)

Andrew Biewener

2019 Spring (4 Credits)

Schedule: M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Movement is a fundamental property of life that underlies many biological functions, ranging from collecting or catching food, predator escape, dispersal of offspring, mating and reproduction, to migration, social interaction, sport, and artistic expression. This seminar will explore why and how organisms move, providing an overview of the biological motors animals and microbes use to power movement, and mechanisms plant use for growth and geo-/photo-taxis. The seminar will survey historical photographic and modern filming approaches; examine how movement is depicted in art and evoked in dance; how movement shapes perception and cognitive interpretation; and how and why movement plays a central role health and disease. The broader relevance of movement to the humanities and social sciences will therefore be examined. Students will be introduced to a variety of filming methods, allowing them to explore how movement is studied, and will learn how to quantify movement patterns to inquire and gain insight into their functional significance. Students will actively participate by video-recording observed movements of interest, exploring their functional relevance to terrestrial locomotion, swimming, flying, dance, athletics, and cognition as well as plant movement. This seminar will include 'field trips' to Harvard Museums and Libraries, a dance studio and the Concord Field Station. Students will read general articles and share weekly video recordings throughout the term. Students will complete a course project based on a video-kinematic analysis of movement highlighting its biological, social and/or artistic significance; or by writing a final paper that examines in-depth some aspect of the biology of movement.

Freshman Seminar 50I

The Temporal Universe (203269)

Jonathan Grindlay

2018 Fall (4 Credits)

Schedule:

T 0600 PM - 0845 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The Universe is not static, but rather stars and entire galaxies are evolving as revealed by their variability on timescales ranging from milliseconds for collapsed stars (neutron stars and black holes) to gigayears for stars and galaxies. In this seminar we shall explore stars and nuclei of galaxies through variability—from how brightness variability of stars with binary companions measured with small telescopes measures star masses and radii, to the extremes of variability of stars that undergo repeated huge flares, to enormously luminous variations from accretion onto gargantuan black holes in the nuclei of "Active Galaxies" (blazars and quasars). We shall use the Clay Telescope on the Science Center roof to make some repeated observations (from the 8th floor Astronomy Lab) of several types of variable stars and accretion-powered binaries and deduce what life would be like if either were our Sun. From a blazar, we shall observe historical outbursts that occasionally change brightness to exceed its host galaxy by a factor of ~100, by using the digitized brightness measures on thousands of glass plate images taken by Harvard telescopes from 1885–1992 and now digitized and on-line from our digital access to a Sky Century @ Harvard (DASCH) project. The seminar will include readings from an introductory astronomy text as well as both popular and journal articles and the short books *Black Hole* (Bartusiak) and *Black Hole Blues* (Levin). Students will use astronomical software to measure stellar brightness and variability from telescope images as well as learn temporal analysis techniques with applications to other disciplines. Students discuss in-class readings and observations conducted and write short papers on their observations and deductions.

Course Notes:

This seminar is open to all but may be of particular interest to those considering Astronomy, Physics or Engineering concentrations.

Requirements: Course open to Freshman Students Only

Freshman Seminar 50L

Quantum Entanglement (203399)

Subir Sachdev

2019 Spring (4 Credits)

Schedule: M 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

Quantum mechanics was discovered in the early 20th century in experiments involving single electrons and photons, such as the emission and absorption of light by a gas of hydrogen atoms. The quantum theory introduced a revolutionary new perspective on the nature of physical reality, replacing the powerful classical paradigms of Newtonian mechanics. Indeed, some of the most remarkable implications of the quantum theory have only become clear in the past few decades, and it is likely that more surprises will appear in the future. The fundamental new idea introduced by quantum theory is that of "superposition". This has no counterpart in Newtonian mechanics, and allows a particle (an electron, or even atoms and molecules) to be in a superposition of states at two or more distinct locations. When extended to multi-particle systems, a corollary of superposition is that of "entanglement": this allows measurements of two or more particles to be correlated with each other even though they may be separated by large distances. The objective of the seminar will be described how entanglement can be used as a resource to perform tasks that are not possible classically. We will begin by discussing the basic structure of quantum mechanics using the concept of a "qubit". The simplest protocols for quantum cryptography and quantum teleportation will be described, followed by an introduction to quantum computing and quantum error correction. Ideas on "anyons" will lead to a discussion of topologically protected quantum computing.

Recommended Prep: High school-level calculus and physics

Requirements: Course open to Freshman Students Only

Freshman Seminar 50V

Sea Monsters (205177)

Peter Girguis

2019 Spring (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

There have always been tales of sea monsters. For as long as we humans have ventured into the ocean, our imaginations have conjured images of serpents, krakens, leviathans, and other creatures, all of whom seem bent on the destruction of those who dare set foot into the sea. Humankind's conviction that sea monsters are real is so powerful that—even today—rumors abound of sea monsters lurking in the depths. Indeed, every major religion—Eastern and Western—features sea monsters. Are these declarations true? Do giants roam the deep sea? Did the explorers of centuries ago see creatures from their small wooden boats that we do not see today? During this seminar we will explore sea monsters through a social, spiritual, literary, and scientific "lens". We will study the sea monsters that flourish on ancient maps to understand the minds of 16th-century scholars. We will examine the bodies of real sea monsters, and consider the world in which such grotesque creatures might evolve. We will busy ourselves with tales of creatures from classic and contemporary literature. Most importantly, we will develop a better understanding of how humans perceive the world, and how our consciousness can simultaneously embrace our wildest dreams and cower from our greatest fears. Sea monsters, both real and imagined, tell us much about life in the deep sea, and even more about humankind.

Course Notes: Required field trips related to the sea are included. There will be no cost to the student.

Requirements: Course open to Freshman Students Only

Freshman Seminar 50Z

CRISPR, Genome Editing, and the Future of Medicine (207509)

David Liu

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0515 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The life sciences are undergoing a revolution stimulated by breakthrough advances in genome editing technologies. These technologies, including CRISPR, enable researchers and physicians to modify target DNA sequences in the genomes of living cells, including human cells and human embryos. The goal of this Seminar is to equip participants with an understanding of the genome editing revolution that will inform their lives inside or outside of science. During the early part of the semester, students will learn how these remarkable agents were discovered and how they work. We will also discuss their current limitations, their potential to shape medicine, and some social and ethical implications of their use. Students will analyze recent reports from both the scientific literature and from popular media, and will present their analyses and opinions during the semester. Participants will also visit a state-of-the-art genome editing laboratory during the semester, and will develop and propose "think pieces" on an aspect of genome editing to the class at the end of the semester.

Course Notes: The Seminar will be held at the Broad Institute in Cambridge. Participants will be provided with a pre-paid Charlie Card for travel by MBTA. There will be a required trip to a state-of-the-art genome editing laboratory.

Recommended Prep: High school chemistry and biology knowledge.

Requirements: Course open to Freshman Students Only

Freshman Seminar 51C

Science in the Age of Artificial Intelligence (207514)

Brendan Meade

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Science is focused on discovering and explaining the world around and within us. This has been its goal for hundreds of years and has produced astonishing breakthroughs from population genetics, to general relativity, to plate tectonics. Artificial intelligence is touted as a tool for learning about a complex systems in ways that humans can't and has seen exceptional progress in natural language processing and image identification. In this class we explore the emerging linkages between scientific inquiry and artificial intelligence. The central goal of this class is to question the classical role of the scientist as a creator of theories and consider how scientists may become interpreters of theories developed by AI. We do this by developing an understanding of how AI systems actually work (they're astonishingly simple), explain recent success cases, and then consider how we may (or may) not rebuild science in an AI-first manner. Examples with be drawn from the earth and planetary sciences as well as the life sciences.

Recommended Prep: High school calculus and/or computer programming would be extremely useful.

Requirements: Course open to Freshman Students Only

Freshman Seminar 51D

Predicting Life and Death—Quantitative Approaches to Human Health and Disease (207515)

Franziska Michor

2019 Spring (4 Credits)

Schedule: W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

How long does each of us have to live? How does this expectation depend on the extent of exercise, stress, and lifestyle choices such as a love of burgers or long-term smoking? If we are diagnosed with cancer or cardiovascular disease, how many years do we lose, and how does that depend on where we live and how much we earn? Given that millions of

people are diagnosed with disease each year, is that data publicly accessible, and is it sufficient to infer the lifespan of an individual patient? Do I want to know how long I have left to live? Can someone else deduce my identity by me being part of a database for lifespan prediction? Do I care if my identity and lifestyle choices become publicly known if it is for the greater good of learning more about preventing disease? How do doctors decide on treatment plans and what can we learn from visiting a radiation oncology clinic where terminal patients are being treated? And finally, how can we use emerging datasets in innovative ways to learn about human health and disease?

Course Notes: There will be a required field trip to the Dana Farber Cancer Institute Radiation Oncology Clinic.

Recommended Prep: There are no prerequisites for this seminar.

Requirements: Course open to Freshman Students Only

Freshman Seminar 51E

The Story of the Alternating Sign Matrix Conjecture (207517)

Lauren Williams

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar is intended to illustrate how research in mathematics actually progresses, using recent examples from the field of algebraic combinatorics. We will learn about the story of the search for and discovery of a proof of a formula conjectured by Mills-Robbins- Rumsey in the early 1980's: the number of $n \times n$ alternating sign matrices. Alternating sign matrices are a curious family of mathematical objects, generalizing permutation matrices, which arise from an algorithm for evaluating determinants discovered by Charles Dodgson (better known as Lewis Carroll). They also have an interpretation as two-dimensional arrangements of water molecules, and are known in statistical physics as square ice. Although it was soon widely believed that the Mills-Robbins-Rumsey conjecture was true, the proof was elusive. Researchers working on this problem made connections to invariant theory, partitions, symmetric functions, and the six-vertex model of statistical mechanics. Finally in 1995, all these ingredients were brought together when Zeilberger and subsequently Kuperberg gave two proofs of the conjecture. In this course we will survey the story of the alternating sign matrix conjecture. If time permits, we will also get a glimpse of very recent activity in the field, for example the Razumov-Stroganov conjecture.

Recommended Prep: This seminar is recommended for students with a strong background in mathematics. Some exposure to combinatorics and linear algebra is helpful, but not required.

Requirements: Course open to Freshman Students Only

Understanding the Seemingly Impossible: A Revolution in Biology (207834)

Craig Hunter

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Occasionally a scientific discovery is so unexpected that it is seemingly unexplainable. This seminar will revisit one such event, the discovery of RNA interference and how modern experimental molecular genetics cracked this "problem" and started a billion-dollar industry. Rare unexpected discoveries in biology, for example catalytic RNAs, instantly extend and broaden our understanding of the world, while the impact of other discoveries (split genes, hopping genes) are more gradual. However, some discoveries challenge firmly supported ideas. The initial description of RNA interference (RNAi) was seemingly magical—the introduction of a RNA molecule matching the sequence of any gene, results in the effective silencing (turning off) of the gene. Further, the silencing signal(s) were extremely potent and mobile, moving between cells, tissues, and generations. A series of seminal discoveries during an amazing four-year period revealed the previously unimagined process. We will read and talk about how these discoveries were made and how this unexpected new biology launched new therapeutic companies and is informing developing ideas about heritability, adaptation, and evolution.

Freshman Seminar 51G

Physics and Photography (207798)

Peter S. Pershan

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The practice by which the 3-dimensional world is projected onto a 2-dimensional surface dates to at least the 30,000-year-old cave drawings; however, it is only in the last two centuries that taking pictures has made it possible to easily create the images that consume so much of our social networks. The seminar will cover both the history of how photography developed from the early 19th century to today along with the science that made this possible. Topics to be discussed include classical optics, the quantum mechanics on which digital technology is based, the computer software for editing your images, the basics of how our eyes process color and the way color is reproduced in printing and electronic displays. The surprising behavior of our eyes is often the basis of many optical illusions. Some of the weekly homework assignments will involve photographic exercises designed to illustrate the use of camera controls such as $f/\#$, shutter speed, focal length zoom choices, white balance and ISO (sensitivity) settings. Other assignments will involve image editing.

Course Notes: Arrangements for loaned cameras will be made for those who do not own one. Photographs taken by the members of the seminar will be discussed in class.

Recommended Prep: Ideally students should have had a good high school physics course; however, individuals who are motivated to understand the science of photography should not have a problem with the material taught in the seminar. Similarly students should feel comfortable with high school algebra and trigonometry.

Freshman Seminar 51H

Models of the World: Explaining the Past and Predicting the Future (207799)

Nina Zipser

2018 Fall (4 Credits)

Schedule: T 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

This freshmen seminar explains the concept and practice of social and natural science modeling. The seminar will address four fundamental questions: (1) What is a model? (2) How are models related to data? (3) How are models used to explain and predict events in the world, including counterfactuals (i.e., what would happen if we conducted military campaigns differently)? (4) How do models evolve over time? The course answers these questions with numerous case studies from the fields of astronomy, biology, computer science, economics, mathematics, physics, psychology, and statistics. For example, we'll see that natural science models have (unintentionally) challenged fundamental social and religious beliefs, like the geocentric view of the universe and the origin of species. We'll also show how models have been used to measure social phenomena, like discrimination and the pursuit of instant gratification. We'll also explore the origins and trajectory of a new class of powerful, data-driven models that are emerging in the field of machine learning.

Class Notes: 2 hr seminar only - T, 9-11am.

Requirements: Course open to Freshman Students Only

Freshman Seminar 51J Section: 01

Whence the Little Ice Age: An Inquiry into the Penultimate Climate Anomaly (207759)

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 12

The relatively cooler surface temperature that prevailed during the Little Ice Age are important to understand for their historical significance, as a baseline from which to understand modern changes, and as an opportunity to explore how and why the climate varies. There are three not-necessarily exclusive hypotheses for the Little Ice Age: volcanism, solar variability, and internal redistributions of heat. We will begin by familiarizing ourselves with the scientific literature related to these three hypotheses, and then turn to inquiring whether human and natural historical records can help distinguish amongst these various factors. As examples of human historical records, we will make use of daily temperature records kept by Harvard's President Holyoke; depictions of ice, shadows, and vegetation in paintings; and the dates of flowering given in Henry Thoreau's diaries. For natural records, will explore tree ring and pollen records, geochemical indicators of sea surface temperatures, and records from ice cores. More broadly, we will seek to gain some appreciation of how societies adapted to and were influenced by the altered climate conditions of the Little Ice Age. This class is for students interested in conducting original climate research that draws upon physical science, data analysis, and history.

Recommended Prep: A background in math and physics and interest in human and natural history is recommended.

Requirements: Course open to Freshman Students Only

Freshman Seminar 51K

Technology vs. Nature: From Toggling Harpoons to Geoengineering (207761)

David Keith

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Are we at the end of nature? What would it mean if we were? Advanced hunting technologies enabled our ancestors to hunt so efficiently that the human expansion out of Africa drove a wave of extinctions around the globe. No more mammoths. No more moas. Over the last millennia, technological innovation has dramatically reduced many environmental impacts on a per capita basis; but, technology simultaneously enabled a population explosion and caused new forms of environmental disruption. Technology is simultaneously a despoiler and savior of the environment. We will explore the shifting frontier between the natural and artificial through critical examination of globally transformative technologies such as climate geoengineering, Haber-Bosh nitrogen fixation, gene-drives and de-extinction. Solar geoengineering is the idea that humanity could deliberately intervene in the Earth's climate to limit the risks of accumulating carbon dioxide. It's the focus of my own research. It serves as the central motivating case through which the class will explore broader questions about environmentalism in the 21st century. We will read selections from great environmental writings such as *The End of Nature* to *Desert Solitaire* along with new writing about the Anthropocene. I aim to help students find their own voice through writing short informal blog posts, commenting on posts by peers, and participating in class debate. The human connection to the natural world cannot be rightly understood in the abstract. So, we will take the class outside, from short explorations on campus, to an organized day-hike.

Course Notes:

There will be one required day-hike on a weekend.

Requirements: Course open to Freshman Students Only

Freshman Seminar 51L

Feeling the Heat? The Many Temperatures of Life in a Warming World (207781)

Noel Holbrook

Fulton Rockwell

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

From one's first thought in the morning ("how hot will it be today?"), to a concern over the future of our climate ("how hot will it be in 2100?"), temperature is a ubiquitous topic in our lives. But what exactly does temperature measure? And of all the temperatures that one might define and measure, which are the important ones? In this seminar we will explore how organisms experience and respond to temperature, investigate the different modes by which plants and animals exchange thermal energy, and ask what strategies have evolved for thermal management. An important feature of temperature responses at any scale is that otherwise gradual changes can be punctuated by abrupt changes of state. This is true for as simple a system as pure water transitioning from solid to liquid to vapor, or as complex as a biome transitioning from forest to grassland to desert. Our goal is to develop, through reading, discussion, in-class experiments, and a field trip to the White Mountains, an "educated intuition" for how life responds to temperature in both predictable and unpredictable ways. Along the way we will touch on a broad array of topics, from human health to the growth of food crops, and consider how these might change as our planet warms.

Course Notes: There will be a required (moderate) hiking day trip to the White Mountains in New Hampshire.

Recommended Prep: There are no prerequisites, and students geared toward either the humanities or sciences are welcome.

Requirements: Course open to Freshman Students Only

FAS: Course Level	No Course Level

Freshman Seminar 51M

Skin, Our Largest, Hottest, and Coolest Organ: From Cancer to Cosmetics (207776)

David Fisher

2018 Fall (4 Credits)

Schedule: T 0600 PM - 0830 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Skin provides a protective barrier that is vital to survival of all multicellular organisms. Its physical properties have been exploited for centuries, from clothing to footballs, and yet skin is a vibrant and dynamic organ that responds to environmental signals in myriad ways. Skin protects humans from toxic exposures, but can also be an intrinsic source of dangerous diseases. While its defects only rarely kill humans, its imperfections can cause misery and discomfort, ranging from subtle annoyances to depression and loss of self-esteem. It is a source of immense pleasure or excruciating pain. This seminar will provide a series of exposures at an introductory level, to distinct topics in skin biology. They will exemplify the diverse and vibrant nature of cutaneous networks and signals, through the lens of commonly recognized topics such as tanning, hair, sweat, cancer, cosmetics, cancer, and infections.

Course Notes: The seminar meets for 2 hours only within the time block, T, 6-8:45pm. There will be several meetings with an altered time for Jewish holidays - Sept 11: 8:15-10:15pm; Sept 18: No Class; Sept 25: 7:45-9:45pm; Oct 2: 7:45-9:45pm; Nov 6: No Class.

Recommended Prep: None. Prior AP-Biology may be helpful but not required.

Requirements: Course open to Freshman Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Freshman Seminar 60H

Faith and Fiction in American History (203005)

David Holland

2018 Fall (4 Credits)

Schedule: T 0900 AM - 1130 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

This seminar uses key literary works to explore some of the most difficult and demanding questions in the religious history of the United States: Does God have a special relationship with the United States? Is sin an individual responsibility or a social flaw? Why has American religion been so frequently concerned with sexuality? How has religion shaped racial identities and tensions? How does it inform domestic relationships? How do non-Christian immigrants find a place and a voice in a nation with deeply entrenched Christian traditions? To explore these and other areas of concern, we bore into the faith-inflected cultures of American history through the imagined narratives of some of its most celebrated writers, including the likes of Catharine Sedgwick, Harriet Wilson, Flannery O'Connor, James Baldwin, Rudolfo Anaya, Pearl Abraham, Ayad Akhtar, and Marilynne Robinson. I will offer mini-lectures to contextualize these works in their historical moment. We will read some scholarly work to sharpen our tools of analysis, but mostly we will read and talk about the novels themselves. The seminar aims to be both analytically rigorous and aesthetically rewarding.

Requirements: Course open to Freshman Students Only

Freshman Seminar 60K

The Grail Quest of Marcel Proust (203268)

Virginie Greene

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

We will read Chrétien de Troyes' *Tale of the Grail*, the most ancient known Grail story (c. 1190) and large excerpts of Marcel Proust's *In Search of Lost Time*, which I propose to read as a Grail quest, involving a young ignorant hero discovering the world and seeking something else than money, fame, and love (but also money, fame, and love). Through comparing a medieval and a modern text we will reflect on the passing of time, modernity and memory, reality and fiction, romance and novel. We will focus on the visual aspects of both stories, whose heroes share a contemplative/voyeuristic temper. The *Tale of the Grail* has generated an immense corpus of images from thirteenth-century illuminated manuscripts to the 1895 Edwin Austin Abbey wall paintings at the Boston Public Library and Grail films (1975 Monty Python Holy Grail, 1981 Raiders of the Lost Ark, etc.). *In Search of Lost Time* has been called a "cathedral work," that is, like a gothic cathedral, a space of eclectic visions. Real and fictional paintings illuminate the novel like a medieval manuscript. All members of the seminar will be invited to share their experiences of reading, viewing, and writing. Texts will be available in English and French. The seminar will follow the model of a quest: each class will be held in a different location (Harvard house, museum, garden, etc.) in the Boston area.

Course Notes: Each class will be held in a different location and all locations will be wheel chair accessible and reachable by public transportation.

Recommended Prep: No previous knowledge of the Middle Ages, Proust or French is necessary. Texts will be available in English and French.

Requirements: Course open to Freshman Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Undergraduate Students

Freshman Seminar 60Z

Go Rococo! Techniques in Digital Design (203405)

Andrew Holder

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

At the beginning of the 18th century, baroque architecture and art in Western Europe entered a new phase called the Rococo, characterized by extreme visual complexity, ornamentation, and the collapse of compositional and political hierarchy. Architectural interiors became excessive (or at least no longer classically ordered) during this period, filled almost to the point of overflowing with painting, sculpture, and decoration, much of it depicting characters in mischievous and compromising postures. This seminar will examine the Rococo as a precedent for reflection on problems in contemporary design and as a provocation to create new work using digital design tools. Coursework will be founded on two related propositions: first, that the architecture and art of the Rococo are remarkably similar to the visual and material culture of the present day; and second, that contemporary design stands to benefit from a close examination of its predecessor. Activities will be divided between reading, writing, and making. Each week, students will examine a Rococo building precedent, reading the architecture against a series of texts on contemporary design

issues. In addition, each student will undertake a semester-long design project using digital design tools to create and animate an architectural interior in the manner of the Rococo. Software tutorials on the Adobe Creative Cloud software suite will be provided in class. Readings and tutorials will be supplemented with field trips to the Houghton Library and Fogg Museum to experience Rococo artifacts first-hand.

Course Notes: This course is a hybrid design workshop and seminar in the history of 18th century architecture. Students will learn to use state-of-the-art digital design tools while critically examining canonical examples of late baroque and rococo buildings. Design skill, artistic ability, and prior exposure to digital modeling software are NOT required for this course, nor is any prior knowledge of architecture. Absolute neophytes are welcome. Students do not need to purchase software or any computer equipment in order to participate.

Requirements: Course open to Freshman Students Only

Freshman Seminar 61D

Trying Socrates in the Age of Trump (205065)

Russell Jones

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

We find ourselves in the middle of fierce political debates. Should the common folk have political power, or should it be concentrated in the hands of an elite? Is our national interest best served by looking inward and directing our resources toward local concerns, or by thinking globally about both threats and opportunities? How do we balance concerns for economic growth, humanistic understanding, religious freedom, and scientific advancement? Our answers to such questions are enormously consequential, and even people of good will can find themselves in heated disagreement, labeling opponents as the enemy and striving to drive them and their ideas from the public square. The Athenians of 2400 years ago didn't conduct their political battles with tweets and hacks and super PACs, but they would easily recognize our battles as versions of their own, fought over much the same ground. At a particularly heated time, they used the lethal power of the courts to silence Socrates, one of their own. Our task is forensic. We'll assemble the available evidence to determine why the Athenians killed Socrates. His views were complex – certainly he doesn't align neatly with any of our own major political parties, and he's difficult to categorize even in the context of ancient Athens. So what was so offensive or threatening about him as to provoke such extreme measures? Once we've assembled our evidence, we'll formally try Socrates in absentia for ourselves. Was he guilty? And what should be done with people who spread dangerous ideas?

Freshman Seminar 61H

Jefferson and Hamilton: Dueling American Visions (204932)

Annette Gordon-Reed

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

It is often said that the United States is a country based upon ideas, rather than blood ties. Shortly after the end of the American Revolution, and during the ratification of the Constitution, it became apparent that the people who had helped to make the Revolution differed about exactly what ideas would define America's experiment in self-government. Two men, Thomas Jefferson and Alexander Hamilton, symbolized the conflicting visions that emerged once the revolutionaries began the business of running a new country. Jefferson was Secretary of State and Hamilton was Secretary of Treasury in Washington's cabinet. They started cordially enough, but their contrasting views about politics and government quickly hardened into personal enmity. Much to President Washington's chagrin, they battled in cabinet meetings and-- through surrogates and pseudonyms--in newspapers. Their clash helped create two-party politics in America, as each man attracted adherents to their respective visions of the future of the United States. Jefferson was the rural "man of the people", anti-British to his core, and supporter of the French Revolution. Hamilton was the urban friend of the elites in society, admirer of the British government, and opponent of the French Revolution. Their arguments about the true nature of American society continue today. This seminar will examine Jefferson and Hamilton as men, the way they fought their battle, and the nature of Jeffersonian and Hamiltonian visions. What did the men and their visions mean at the time, and what do they mean to us today?

Class Notes:

2 hours only.

Life Lessons from Professional Killers: What We Can Learn from the Samurai (205026)

David Atherton

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Is it possible to fail successfully? Should we be more beholden to the needs of others or to our own ambitions? Is there a set moral standard by which we should live our lives? What should we be prepared to sacrifice for higher goals—and what if pursuing those goals causes suffering to others? When should we take a risk? Is there such a thing as an ideal human being? Questions such as these have animated the figure of the samurai for nearly a millennium, captivating imaginations both in Japan and around the globe. What is it about this figure that speaks to some of our deepest questions about how to live a model human life? In this seminar, we will explore together the many meanings people have invested in the Japanese

warrior, from medieval epics to kabuki plays, modern novels to propaganda, manga and anime to global cinematic blockbusters. (Tom Cruise, anyone?) Our focus will be less on the historical realities of the samurai than on the ways people have chosen to imagine them—and to what ends. In the process, we will consider what we ourselves might learn from this complex, fraught, appealing, and possibly dangerous figure. Our "life lessons" from the samurai will include (among others), "How to be a spectacular failure," "How to face the consequences of your actions," "How to justify your existence," "How to get revenge," and "How to make your brand go global."

Recommended Prep: No prior knowledge of Japan is required, and all readings will be in English.

Silk Road Stories (205030)

Mark Elliott

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

The words "Silk Road" conjure up images of camel caravans crossing vast deserts and traversing lofty mountains with precious cargoes of textiles and porcelain. From ancient Chinese travelers and intrepid Buddhist pilgrims to plucky Venetians, swashbuckling Swedes, and adventurous Americans, the Silk Road has produced countless storytellers with enchanting accounts of "East meets West." But what do we really know about the Silk Road? What if it turns out that much of what we believe about the Silk Road turns out to be a myth? This seminar invites you to embark on your own Silk Road journey, exploring the invention of the idea of the Silk Road, the material and historical reality behind the fabled Eurasian trade routes, and the ways in which different Silk Road stories serve today as artistic inspiration, political capital, and economic stimulus. In the process, we will come to understand the peculiar biology of *Bombyx mori*, study attitudes toward cultural patrimony, and get hands-on experience in the Harvard museum collections, where the University's own history and that of the Silk Road intersect. The course aims to introduce you to the history of what we know as the Silk Road and to problematize that history in various ways; to expose you to the idea that globalization is a process with no beginning and no end; to challenge you to think about the role of culture in society and politics yesterday and today; and to persuade you that travel is the only way out of the prison of our own consciousness.

Course Notes: Students are required to participate in a trip during class time to the Harvard Art Museums. There will also be two required evening film screenings.

Freshman Seminar 61O

Global Crime Fiction: Tackling Crime, Corruption, and Social Disintegration (205067)

Karen Thornber

2018 Fall (4 Credits)

Schedule:

T 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Crime fiction is one of literature's most popular genres, with hundreds of millions of fans across the globe. Both local and foreign crime fiction, the latter often in translation, flies off bookshelves from Boston to Barcelona to Beijing and beyond, regardless of whether the novel takes place in a small Swedish village or in multiple cosmopolitan megacities. Why is this? Part of it is in the storytelling. Who can resist a gripping whodunit with unexpected twists and turns and often with an appealing investigator or detective (professional or amateur), particularly if everything is resolved at the end, and often in ways we least expect? But part of the appeal of crime fiction is also the insights this genre can offer into some of the most significant challenges facing societies globally. In this course we will read a selection of bestselling crime fiction from the Americas, Africa, Asia, Europe, and the Middle East. We will be most concerned with what this literature tells us about investigating, exposing, and potentially ameliorating historical crimes, environmental crimes, corruption in criminal justice, and social disintegration, particularly as these involve injustices inflicted on marginalized and otherwise vulnerable individuals and communities, people targeted on account of their class, ethnicity, gender, race, religion, sexuality and other factors. Secondary readings and class discussion will provide the necessary cultural and literary contexts for these readings.

Language: The Origins of Meaning (205082)

Gennaro Chierchia

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

How do languages work? Why are they so distinctly human in the natural world? Is language a creation of our intelligence, i.e. we speak, because we are smart, or the other way around? Birds produce sophisticated songs. Do bird songs mean anything? They do, in some way. They serve, for example, as predator warnings or mating calls. Humans too, like birds, can produce music. But for effective day to day communication (or, say, to develop a scientific theory, etc.), we need languages with words and sentences, i.e. the kind of languages which is unique to our species. Do all languages, in spite of looking so diverse, share a common structure? For example, in English words fall into categories: cat is a noun, meow is a verb. Do all languages have nouns and verbs? A fairly recent turning point in addressing these fundamental questions has been to view language as a computational device. This is enabling us to build

effective models of how languages are structured so as to empower us with the ability to create meaning; which, in turn, is shedding light, more and more, on who we are. The seminar will explore how natural languages come to create meaning and invite participants to develop their own linguistic analyses through modern logical and computational tools.

Recommended Prep: An interest in language and mind, and no fear of formal methods or the desire to overcome such fear.

Freshman Seminar 61U

Reading the Novella: Form and Suspense in Short Fiction (205181)

Jonathan Bolton

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Short enough to read in a single sitting, but more complex and absorbing than short stories, novellas give us some of our most intense reading experiences. Indeed, many of the enduring classics of world literature, from Melville's *Benito Cereno* to Tolstoy's *The Death of Ivan Ilich*, take advantage of the novella's compression and acceleration of plot—features that are also suited to horror, mystery, and other forms of "genre" fiction. In this seminar, we will read some of the great masters of the novella form, including Henry James, Leo Tolstoy, Thomas Mann, Alice Munro, Katherine Anne Porter, and James Joyce, as well as other examples from around the world, including Eastern Europe, China, and Japan. Readings of 50-125 pages a week (all of it in English) will allow us to work closely with some classics of modern fiction, going down to the level of word choice and sentence structure, but we'll also consider the way authors build and sustain suspense, the different forms of narrative resolution, and other questions of plotting and structure. We will also talk about how to get the most out of your weekly reading experiences—I'll ask you to set aside solitary time for your reading each week and, as far as possible, to read each novella in just one or two sittings. You'll keep a reading journal, including 2-3 pages of unstructured writing each week; a number of short papers, including creative assignments, will help you understand the choices made by authors as they shape their stories for this most demanding and exciting of fictional forms.

Freshman Seminar 62D

Voyages: Extraordinary and Wondrous Journeys through This and Other Worlds (207505)

2018 Fall (4 Credits)

Schedule:

M 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Together we will go on journeys over land, over sea, and into the deepest reaches of the human imagination. Great artistic works and big ideas will carry us through vast expanses of time and space. We will think about how the voyage is a fundamental aspect of the human condition, how travel to and through familiar, exotic, and otherworldly places raises basic questions about humanity, the possibilities of knowledge and imagining, and the interdisciplinary nature of our own minds. Our seminar will contemplate how people make sense of themselves, their histories, and the world around them. By contemplating voyage narratives of the commonplace and the fantastical, the visionary and the terrifying, the monstrous and the familiar, we will scrutinize how travel may occur in time, space, and speculative and supernatural worlds, and how some journeys happen as we sit still. The seminar encourages participants to cultivate their own curiosity as well as a capacious vision of the world, a culture of debate, and a love of ideas. We will see how stories of various kinds of journeys rest at the heart of the humanities on a truly global scale. A few questions that will guide our collective study of voyages are: what is the relationship between reason and passion? Between lived experience, story-telling, and self-reflection? How might we appreciate cultural difference without abandoning a notion of essential human values? Finally, the seminar seeks to open ways for students to enrich not only their future studies but also their lives.

Course Notes:

There will be mandatory field trips to Harvard's Houghton Library and the Harvard Art Museums.

Freshman Seminar 62E

Soccer and Globalization in Latin America (207506)

Bruno Carvalho

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What can we learn about globalization and Latin America through the prism of soccer? Soccer may be the global game, but it sometimes contradicts the patterns of globalization. Latin America, although peripheral to the geopolitical order, plays an oversized role in the sport. A prominent filmmaker once claimed that there were two types of soccer: "European teams were prose, tough, premeditated, systematic, collective," while Latin American ones were "poetry, ductile, spontaneous, individual, erotic." However outdated those notions, Latin American identities have sometimes been conflated with the performances of Latin American soccer players. In this seminar we will explore relationships between the region and the world by examining historical, cultural, political and aesthetic dimensions of the game. We will examine how soccer captivates the imagination of so many, viewing its popularization in the context of developments in stadium construction, mass media, and capitalism, as well as in light of the legacies of slavery and European migration. Readings draw from various fields such as philosophy, political science, and journalism. We will analyze literature, photography and film, including narratives that elevate soccer to "epic" status. In the process, we will discuss the uses of soccer during authoritarian regimes, as well as its more liberating

potentials. Reflections over the place of soccer in changing global and local landscapes will invite questions of how, amid deep economic inequalities, the sport might function both as the proverbial 'opium of the masses' and as a powerful congregator.

Freshman Seminar 62F

Talking Animals (207516)

James Simpson

2019 Spring (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

When literary writers think about social organization, hunger, violence, sex, suffering, technology, expressivity, and education (for example), they often draw upon animal behavior to understand human practice. They think with animals. Occasionally that thinking prompts awareness of the otherness of animal behavior, and the reality of animal suffering. For the most part, however, recourse to animals is a way of thinking about human behavior. It's also a way of persuading humans to act differently. Animals present us to ourselves in exaggerated form, whether as cute, as clever, as beautiful, or as terrifyingly violent and relentlessly rapacious. Animals address all human ages: cute animals appeal to children, beautiful animals (especially birds) to young lovers, whereas the violent and rapacious animal stories are reserved for the grown-ups. Either way – cute, beautiful or terrifying - we need animals to think, no doubt because we are ourselves animals, even if we often pretend not to be. This course will focus on extraordinarily brilliant animal literature (funny, mordant, touching, sophisticated), across literary genres destined for different age groups (children, adolescents, adults), in European literature, from the last 2000 years. You will be encouraged to build your own bibliography, with your own animal story finds in the Harvard library system.

Freshman Seminar 62G

The Rise and Fall of the Machine: Technology and Its Critics (207760)

Jill Lepore

2018 Fall (4 Credits)

Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This freshman seminar investigates the history of six modern machines—the train, the camera, the radio, the mainframe computer, the personal computer, and the Internet—to trace shifting ideas about the relationship between technology and progress. Machines like these do a lot of things: they document the world; they advance scientific research; they make goods cheaper; they accelerate transportation and communication; they produce knowledge and diffuse information. Do they make the world a better place? Boosters and critics have debated this question since the Enlightenment. This hands-on seminar, in which we'll grapple with the machines themselves, using Harvard's Collection of Historical Scientific Instruments (CHSI) and the MIT Museum, asks students to wrestle with one of the most urgent and fundamental questions of the twenty-first century: What is the end of innovation? Students from all backgrounds are welcome, from engineers to artists. The chief work of the course is reading, listening, and watching: we'll read essays, watch films, and listen to broadcasts. You'll be asked to provide a response to each week's materials before each seminar meeting. Another piece of work for this course is making: your final project will be either A) a machine of your own design (you could either build it or submit plans for it) or B) a product manufactured by a machine that we have studied (e.g., you could make a film or a podcast). Either way, you'll also submit an essay, explaining how your machine or product makes the world a better place.

Course Notes: There will be a required trip to Walden Pond on Saturday, September 15, 2018. Transportation will be provided with no cost to the student.

Dickens and America (207806)

Leah Price

Jill Lepore

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

What happened when Britain's most celebrated novelist visited the world's most celebrated experiment in democracy? This course will reconstruct Charles Dickens' travels through the United States in 1842. We'll read his travel narrative, the novel he wrote about the United States, and critical responses. We'll visit some of the place he visited. And we'll produce our own responses to Dickens's work, including in the twenty-first century's favorite serial form: the podcast.

Course Notes: Attendance will be mandatory at two sessions that meet outside of our regular class time: a day-long trip to Lowell, by train and boat and an evening screening and discussion of Martin Chuzzlewit.

Freshman Seminar 62I

Early 20th Century American and English Poetry: Love, War, Religion and Nature (207763)

Neil Rudenstine

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar will focus on a few early 20th century poets, W. B. Yeats, T. S. Eliot, Elizabeth Bishop, W. H. Auden, and a limited number of their most significant poems, ranging from their earliest verse to their latest. We will read the poetry in detail in order to understand not only its major themes but also its variety of tones, styles and structures. The hope will be to discover how each writer developed over the course of his or her career. The seminar will be run as a lively discussion intended to help us understand the extremely challenging as well as deeply rewarding verse that we will encounter. In the work of William Butler Yeats, we will trace, for example, major changes in his conception of love, as well as his complex views of Irish nationalism and the Irish revolution. Meanwhile, in T.S. Eliot, we encounter a narrator whose essential quest is spiritual in nature, beginning with Prufrock and then *The Wasteland* (which we will devote two weeks). Elizabeth Bishop introduces a highly original voice that expresses personal emotions obliquely and, in effect, "objectively" through understated descriptions of events and places. Finally, W.H. Auden's trajectory reveals an early (1930s) portrayal of human nature and society that is in certain respects similar to Eliot's but that ends very differently, suggesting values and modes of life that are far less foreboding. In the seminar's first week, we will read and analyze a small group of lyrics by various writers (none of whom will be identified by name or exact time-period). This will be an exercise in "close reading" intended to help us judge poetic quality, because some of the lyrics will be excellent—and some quite dismal! The week is meant to be enjoyable, and our discussion should be fun and perhaps hilarious.

Harvard's Greatest Hits: The Most Important, Rarest, and Most Valuable Books in Houghton Library (207807)

David Stern

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Have you ever fantasized of turning the pages of a Gutenberg Bible with your own fingers? Or a medieval illustrated Book of Hours? Or touching a papyrus fragment of Homer? Or a First Folio edition of Shakespeare? Or seeing close-up Copernicus' diagram of the heliocentric universe? The Houghton Library of Harvard University is one of the world's greatest repositories of ancient scrolls, papyrus codices, illuminated manuscripts on parchment and paper, early printed books, rare books published since the

sixteenth century down until today, and stunning prints and other types of graphic art. In this freshman seminar, we will utilize Houghton's extraordinary holdings to study first-hand the history of the book in the West as a material artifact from its beginnings in the ancient Near East down to the present day. Each week we will focus upon a cluster of books. Before class, students will be asked to examine selected books in Houghton's Reading Room as well as online. During class-time, we will study the books again as a group. Visiting experts will demonstrate how to unroll a papyrus codex, the technology involved in creating a codex and printing on a hand-pulled press, and the techniques modern conservators use to preserve manuscripts and books. You will emerge from this seminar with a heightened understanding of what a rich thing a book is, and so much more than just a text. And you will have seen and studied close-up some of the most visually spectacular and culturally significant books in all Western history.

12

"it lives!" Since his dull yellow eye first opened in the pages of Mary Shelley's novel of 1818, Victor Frankenstein's creature has occupied a key place in western culture. This year is the 200th anniversary of publication. Mary Shelley was only 19 when she first mapped out the monster's story, and 21 when it was published. Our seminar aims to think seriously about the mingling of literature and science in this important creative work. We will read and analyze the novel together, cover Shelley's life and times, consider some of the major interpretations that have been offered, especially thinking about the story as an alternative to traditional creation legends, and explore the history of science of her day. We will also engage with the movie tradition. Students will have an opportunity to research the continuing metaphor of Frankenstein in modern Franken-themes such as genetic engineering, test-tube babies, and GMOs.

Course Notes: There will be a required trip to a performance of FRANKENSTEIN (Oct 4-Nov 4, 2018).

Freshman Seminar 62L

Knowing Cicero (207810)

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

More than any other person from Greco-Roman antiquity, the Roman orator, politician, and philosopher Marcus Tullius Cicero (106-43 BCE) appears to be someone we can "get to know." Over eight hundred detailed, often highly personal, letters of his survive (most not intended for publication), as well as around a hundred from his correspondents, not to mention his fifty-odd extant speeches (most promoting a particular persona) and several self-portraits in his philosophical and rhetorical dialogues. Such a relative abundance of documentation, together with a fertile and complex afterlife in subsequent literature and culture, has led to a number of assumptions about Cicero's "character" or "personality"—the man behind so many eloquent words. Yet a quick look at past reactions reveals just how changeable posterity's judgment of Cicero the man has been: "Every one admires the Orator and the Consul; but for my Part, I esteem the Husband and the Father. His private Character, with all the little Weaknesses of Humanity, is as amiable, as the Figure he makes in publick is awful and majestic." (Steele, 1710); "the most unstable and timid of all Roman statesmen" (Mommsen, 1856); "We may say then without discrediting Cicero, that he was not altogether fit for public life" (Boissier, 1897); "a man of mild temper and of constitutional timidity, but of honest heart and sincere purpose" (Strachan-Davidson, 1900); "no other antique personality has inspired such venomous dislike" (Shackleton Bailey 1971). This seminar offers an in-depth investigation of what it might mean to "know Cicero" today, some two thousand years after he lived. After an introduction to ancient approaches to biography, it will use selections from the *Letters* alongside scholarly biographies to explore key phases of Cicero's life in which the most fascinating and vivid glimpses of his personality are on offer. The last sessions will be devoted to contemporary representations of "Cicero the man" in popular fiction and television. By getting to know Cicero we will consider what his compelling life has to teach us about self-presentation, persuasive speech, and the limits of biography.

Recommended Prep:

No prior knowledge of Cicero, Latin, or the ancient Roman world is assumed or required in order to take this seminar. The seminar will include a visit to Houghton Library to examine some of the library's rare manuscripts of Cicero's works.

Freshman Seminar 62M

Can Art Inspire Social Justice? (207762)

Sarah Lewis

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

How do images—photographs, films, and videos—create narratives that shape our definition of national belonging? Social media has changed how we ingest images. Protests, social injustice, and collective moments of triumph are all played out in photos and videos in real time unlike anything we thought possible just a few decades ago. What skills of visual literacy and critical consciousness are required to understand of the opportunities and challenges that technology is presenting to civic life? The seminar will explore the connection between images and justice in America, focusing on case studies that deal with historic and contemporary topics from emancipation, indigenous conflict, desegregation, Japanese internment,

borderland conflicts, the long Civil Rights movement, and more. It will wrestle with the question of how the foundational right to representation in a democracy, the right to be recognized justly, is indelibly tied to the work of images in the public realm. What constitutes a figurative emblem of protest? What does effective resistance look like in art and in the digital realm? By the end of the course, students should be able to consider how images have had persuasive efficacy in the context of social and racial justice movements, critically engage with and contextualize the narratives surrounding images posted online, and understand how democratic rights are connected to visual representation in the United States.

Course Notes: Students will have the chance to curate a selection of Gordon Parks photographs in the collection of Alicia Keys and Swizz Beats (Kasseem Dean) which will go on display at Harvard's Cooper Gallery at the end of Spring 2019. There will also be a required trip to New York City to visit artist studios and museum and gallery exhibitions.

Freshman Seminar 62N

Why Does Injustice Persist? (207779)

Bernhard Nickel

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

A lot of people say the right things about justice, and yet injustice persists. Why? Perhaps people are disingenuous: they say out loud what others want to hear, but their actions are guided by a different set of beliefs. Perhaps people are divided within themselves: they sincerely believe in principles of justice, equality, and fairness, but their actions are driven by unconscious biases. Perhaps people are confused: they believe, at the most abstract level, that justice, equality, and fairness are important, but their views about what they require are distorted. Perhaps it doesn't matter what any one of us wants to do: the way a society is organized depends on an overarching ideology, not what any one person thinks or does. Perhaps it doesn't matter what any one of us wants to do: the way a society is organized depends on our institutions, not what any one person thinks or does. In this seminar, we'll look at approaches that focus on each of these possible explanations as they concern racial justice. We'll look at the strengths and weaknesses of each on its own terms, and whether the different approaches compete or complement each other. The seminar is an exercise in collaborative learning. The students in the class will contribute the examples we use to interrogate the different approaches and thereby shape our discussion.

Freshman Seminar 62O

Who is a Fascist? Culture and Politics on the Radical Right (207789)

Jeffrey Schnapp

2018 Fall (4 Credits)

Schedule:

R 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar provides an in-depth introduction to fascism, its intellectual and political roots, its critique of liberal democracy and socialism, and the traces fascism has left on the contemporary cultural-political scene from Marine Le Pen's *Rassemblement National* to the American alt-right to populist insurgencies like Trumpism. It begins with readings from key fascist thinkers and theorists, before surveying a series of domains where artists, writers, architects, film-makers, and engineers sought to interpret and embody the "fascist revolution" not just in Italy but worldwide. Among the figures considered are mystical nationalists like Gabriele D'Annunzio; Filippo Tommaso Marinetti, founder and leader of the Futurist movement; the American poet Ezra Pound, author of the *Cantos*, one of the masterpieces of 20th century American poetry; Leni Riefenstahl, the film director of classic documentaries such as *Olympia* and *Triumph of the Will*; the architects Marcello Piacentini and Adolf Speer, the former Italy's leading designer of public monuments and buildings during the Mussolini era, the latter Hitler's preferred architect; and the engineer Gaetano Ciocca, creator of everything from Corporativist pig farms to mass-produced worker housing to mass sports stadia. Seminar themes will include: fascism vs. nazism; collectivism vs. individualism; radical right attitudes towards technology and industrialization; and examinations of the convergences and divergences between mid-20th century fascisms and the sub-cultures of today's alt-right. The capstone project for the semester will involve an original research project focused on a contemporary alt-right group.

This seminar provides an in-depth introduction to fascism, its intellectual and political roots, its critique of liberal democracy and socialism, and the traces fascism has left on the contemporary cultural-political scene from Marine Le Pen's *Rassemblement National* to the American alt-right to populist insurgencies like Trumpism. It begins with readings from key fascist thinkers and theorists, before surveying a series of domains where artists, writers, architects, film-makers, and engineers sought to interpret and embody the "fascist revolution" not just in Italy but worldwide. Among the figures considered are mystical nationalists like Gabriele D'Annunzio; Filippo Tommaso Marinetti, founder and leader of the Futurist movement; the American poet Ezra Pound, author of the *Cantos*, one of the masterpieces of 20th century American poetry; Leni Riefenstahl, the film director of classic documentaries such as *Olympia* and *Triumph of the Will*; the architects Marcello Piacentini and Adolf Speer, the former Italy's leading designer of public monuments and buildings during the Mussolini era, the latter Hitler's preferred architect; and the engineer Gaetano Ciocca, creator of everything from Corporativist pig farms to mass-produced worker housing to mass sports stadia. Seminar themes will include: fascism vs. nazism; collectivism vs. individualism; radical right attitudes towards technology and industrialization; and examinations of the convergences and divergences between mid-20th century fascisms and the sub-cultures of today's alt-right. The capstone project for the semester will involve an original research project focused on a contemporary alt-right group.

Freshman Seminar 62P

War in Fiction and Film (207812)

Justin Weir

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

War has always been one of the most important subjects of art and literature, but in the twentieth and twenty-first centuries, public ideas about war and military service have been formed increasingly by film and other visual media. In this seminar we will consider the different ways war has been depicted in literature and in films. We will spend some time identifying the conventions and clichés of the genre, and we will have occasion to discuss depictions of war in news coverage, documentaries, and video games. But we will mainly be reading and viewing several masterpieces—including novels and stories by Leo Tolstoy, Isaac Babel, Ernest Hemingway, Kurt Vonnegut, Cormac McCarthy, Tim O'Brien, and Phil Klay, and films by directors Jean Renoir, Stanley Kubrick, Francis Ford Coppola, Stephen Spielberg, Terrence Malick, and Kathryn Bigelow. In our discussions, we will reflect on how these largely fictional narratives of war have shaped our understanding of culture, politics, and history.

Recommended Prep:

There are no prerequisites for the seminar. The seminar is designed for a general audience. Literary and/or media studies backgrounds are not required, nor is the material presented in a way that requires any special knowledge of military history. All texts originally written or filmed in languages other than English will be provided in translation or with subtitles.

Freshman Seminar 62Q

Thinking about Race and the Law in American History: Liberal and Critical Perspectives (207778)

Kenneth Mack

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What is race? What is law? What does law have to do with race and racial inequality? We talk about these kinds of questions all the time when we discuss familiar cultural touchstones as the Brown v. Board of Education decision, the legacy of slavery and Jim Crow, and topics such as the Black Lives Matter movement. In this seminar, we will examine the role law has played throughout American history in creating racial categories, maintaining and eliminating racial hierarchy, and policing the borders between race and other classifications such as gender, sexuality and ethnicity. The civil rights movement taught mainstream Americans that law could be a tool to remedy past sins and made the promise of equality real for all citizens. In recent years, however, this conception of law and its role in the world has been criticized from many quarters, and many of those doubts have coalesced into a field now known as Critical Race Theory. In this seminar, we will bring the long-running dialogue between liberal and critical approaches to race and the law

up to the present day. Which approach, or combination of approaches – liberal or critical – best describes our present circumstances? Which would seem to describe a more realistic view of our future? Which provides the tools that we might need to grapple most productively with that future? These are some of the questions we will explore in the seminar.

Freshman Seminar 70E

Climate Change Economics: Analysis and Decisions (203008)

Martin Weitzman

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Climate change is one of the most difficult problems facing humanity. This seminar relies on modern economic theory to focus on how an economist frames and views the basic issues. A small sample of questions to be asked and answers attempted in this seminar includes the following. How do we analyze and decide what to "do" about climate change? What are the basic "models" combining economics with climate science, what are these models telling us, and how do we choose among their varying messages? How are risk and uncertainty incorporated? How do we estimate future costs of carbon-light technologies? How do we quantify damages, including ecosystem damages? Who pays for what? Why are discounting and the choice of discount rate so critical to the analysis and what discount rate should we use? What is the "social cost of carbon" and how is it used? Which instruments (prices, quantities, standards, etc.) are available to control greenhouse gas emissions and what are the strengths and weaknesses of each? What is "climate sensitivity" and why is it, and the feedbacks it incorporates, so important? How should the possibility of catastrophic climate change be evaluated and incorporated? What are costs and benefits of geoengineering the planet to counter global warming? Why has climate change been characterized as "the biggest international market failure of all time" and how might the world resolve the associated free-rider problem?

Recommended Prep: Important Prerequisite: Economics 10a or equivalent

Freshman Seminar 70H

Landmark Cases in American Constitutional History (203011)

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0530 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

This freshman seminar will cover landmark Supreme Court decisions in American history: *Marbury v. Madison* (1803) (origins of judicial review); *Plessy v. Ferguson* (1896) (racial segregation in railroad transportation); *Korematsu v. United States* (1944) (Japanese-American internment); *Brown v. Board of Education* (1954) (school segregation); *Brown II* (1955) (Brown's remedial order); *Engel v. Vitale* (1962) (school prayer); *Reynolds v. Sims* (1964) (legislative malapportionment); *Miranda v. Arizona* (1966) (right against self-incrimination); *Furman v. Georgia* (1972) (death penalty); *Roe v. Wade* (1973) (abortion); *Bakke v. Board of Regents* (1978) (affirmative action); and *Obergefell v. Hodges* (2015) (gay marriage). Each session will discuss one case or one issue involving a couple of related cases. The seminar's aim is to elucidate how the Supreme Court functions as a political institution—that is, to see how the Court's decisions reflect the broader social and political context, and to consider the consequences of its rulings. The readings aim to present enough different angles from which to view the Court's rulings to enable discussion of how a particular issue—such as the death penalty—became a topic of social controversy and of constitutional law, why Justices' opinions were written as they were, and an evaluation of the decision's reasoning and its consequences. Readings for each session will average about two hours. In addition to discussing the readings, students will be required to write three papers reacting to the readings, each of about four or five pages. Students will be afforded some degree of choice in the weeks for which they write papers.

Freshman Seminar 70K

Morality, Leadership, and Gray-Area Decisions (203014)

Joseph Badaracco

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

Everyone with serious responsibilities, at work and throughout their lives, faces gray area decisions. In organizations, these highly uncertain, high-stakes decisions are delegated upward, to men and women in leadership positions. They have to make final decisions on these problems, despite the gray, and these decisions test their competence and their humanity. This seminar offers a variety of important perspectives on gray-area problems and on ways to resolve them, responsibly and effectively. The seminar begins by examining gray area problems in various professions and lines of work. Subsequent sessions focus on three different ways of resolving gray area problems – in terms of accountability, character, and action. A typical session of the seminar will draw upon classic works of fiction, basic ideas in moral philosophy, and contemporary situations. These situations are typically described in short case studies involving men and women early in their careers, and they give students in the seminar the opportunity to grapple with these problems in personal terms – by discussing what they would do in these situations. From time to time, students will write short papers, which will be discussed in the seminar.

Freshman Seminar 70L

Ancient East Asia: Contested Archaeologies of China, Korea and Japan (203386)

Rowan Flad

2018 Fall (4 Credits)

Schedule:

F 0900 AM - 1130 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

How is our understanding of the past determined or framed by the concerns of the present? This course considers this problem with a focus on East Asia. In the process, we learn about the origins of the people, cultures, and civilizations of East Asia, but we don't focus simply on the apparent facts of historic reconstruction, but instead consider how the varied and complicated histories and relationships among people and societies in the modern Nation-States of China, Korea, Japan and other nearby countries are understood through archaeological practice in the present. This class explores those origins, and focuses on controversies that show the stakes of archaeological interpretation to political and social discourse in the modern world. We will discuss fundamental questions in the prehistory and early history of East Asia through the lens of archaeological discoveries, including human origins, the origins of agriculture, how stratified, complex societies emerged, early processes of globalization and connections across Eurasia, conflicts between centers and peripheries, connections between China, Korea and Japan in prehistory, Buddhist origins, and more. How are the "origins" in these modern countries similar or different? How are they related? Are they controversial? We will explore controversies that have emerged in recent East Asian archaeological research and discuss why archaeological topics are subject to controversial interpretation and what is at stake in the disagreements. These examples illustrate the significance of ancient cultural material in the modern world and what is at stake in debates over who owns the past. Why should we, situated at Harvard, care about the Asian past? How is this connected to modern Asian identity, and does this relate to Asian-American identity? Course participants will produce a digital exhibit that will engage in the reflective production of knowledge about Ancient East Asia by examining some aspect of the archaeological record of the East Asian past.

The City of Tomorrow: Constructing and Inhabiting the 21st Century (203389)

Arthur Segel

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

"We shape our buildings, and afterwards, our buildings shape us." ~ Winston Churchill

The built environment has profound effects on both our daily lives and the human condition at large. It determines where and how we live, work, play, and dream. The built environment embodies concrete stances on a wide variety of material, spatial, and cultural issues within a society. The quality and availability of affordable housing, for instance, is not merely an economic concern, but also a value judgment about the obligations of a society to its citizens. Underlying the practical aspects of the built environment—can this be built?—are cultural and societal considerations. By examining these issues on a variety of scales, ranging from the single-family home to the megacity, this seminar investigates how the built environment is the fingerprint of societal values and how it can be a vehicle for both positive and negative change.

This seminar weaves together the practical aspects and social factors that make up the built environment. Each week, students will take on the role of decision-makers and engage with a wide variety of ethical, aesthetic, political, environmental, and social considerations. We will discuss how issues such as climate change, rapid urbanization, resource scarcity, economic inequality, and geopolitical conflicts, affect us as both inhabitants and constructors of the built environment. At the end of the seminar, students will bring together both ideological and practical considerations to design a new city from scratch à la Sim City.

Course Notes: As part of this dual process of investigation and application, students will have the opportunity to meet with world-renowned architects, urban planners, and developers, while also taking excursions into Cambridge and Boston.
PLEASE NOTE: Professor Segel regrets that the trip to Toronto has been cancelled.

Freshman Seminar 70Q

Keeping It Simple: Consumer Financial Protection in a Complex World (205027)

John Campbell

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

People face a daunting array of problems in managing their financial lives. Taking out student loans, managing bank accounts and credit cards, financing a home purchase with a mortgage, and saving for retirement are all major challenges. There is evidence that many people lack the skills they need to meet these challenges. This seminar has three goals. The first objective is to give participants a basic grounding in financial literacy: principles of finance that we can use in our own lives. The second objective is to introduce research on the ways in which households use the financial system, emphasizing common financial mistakes and financial products that seem prone to misuse. We will learn to read papers from the academic economics literature, focusing on the papers' central ideas and empirical findings. The third objective is to explore ways in which the financial system can be improved to make it easier and safer to use. We will discuss the role of financial advisers, technological solutions ("fintech"), and public policy interventions including required disclosures, default choices ("nudges"), and regulations restricting access to financial products. We will monitor developments at the Consumer Financial Protection Bureau and other government agencies

involved in consumer financial regulation.

Freshman Seminar 70R

Beachhead for Radicalism or Bastion of the Elite Establishment? American Higher Education (204933)

Julie Reuben

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

"When colleges and universities are in the news, it's often related to politics. Headlines feature students who shout down controversial speakers or professors who only present liberal ideas in their classrooms or universities that fire professors whose tweets anger donors. The public is interested in these stories because the stakes are high. Colleges and universities teach the people who are going to be the next generation of leaders. What if those people are indoctrinated with bad ideas or are not taught how to behave in democracy? Faculty members are the country's experts. What if they do not provide reliable information? As experts, should their views count more than those of average citizens? Colleges and universities are supported with tax dollars and private donations and tuition payments. Who are they accountable to?

The debate about higher education and politics polarizes quickly. Conservatives accuse higher education of radicalism and progressives accuse it of supporting the elite power structure. But the reality is more complex. We will explore the complexity of universities' relation to politics by studying historical periods of intense political conflict such as times of war or periods of political activism, such as the abolitionist movement or the civil rights movement. These historical cases will help us think more clearly about the present, another period of political strife effecting American higher education.

In addition to examining how these political conflicts intersected with higher education nationally, we will conduct original research on their impact at Harvard. The class will meet in the Harvard University Archives where we will have access to a wealth of primary sources including students' diaries, course materials, administrative records, professors' correspondence and materials produced by student organizations. Every week we will delve into sources related to political issues that we are reading about in the assigned readings. Over the course of the semester, students will undertake increasingly complex research projects of their own design."

Law at Work: Employment Rights in the Age of Uber (205071)

Benjamin Sachs

2018 Fall (4 Credits)

Schedule:

M 0900 AM - 1130 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Work is what most of us do with most of our time. Even before we start a career, we invest our energy in preparing for work and in imagining what work life will be. In this seminar, we explore the multiple ways that *law* defines what work is like in the contemporary United States. We start with the question of how much power an employer should have over employee: should it really be legal to fire someone for wearing the wrong tie or having the wrong spouse? We then debate the issue of appearance codes, asking whether an employer should be able to require women to wear makeup or to ban employees from having dreadlocks. We will explore the ways in which sexual orientation, gender identity, and immigration status impact employees' rights at work. And we will ask whether it ever should be legal for an employer to hire employees of only one gender: should Hooters Restaurant, for example, be permitted to hire only women as waiters or should those jobs be equally available to men? The seminar also will examine the way law polices the line between work and "life" by looking at the emerging right-to-disconnect. And the seminar will address the fundamental question of *who* exactly is an employee: do Uber drivers or college football players count? The seminar concludes with a discussion of the ways technological changes are transforming work and, with it, the law that governs this central feature of our lives.

Contemporary Issues in American Higher Education (205072)

Robert Iuliano

2019 Spring (4 Credits)

Schedule:

R 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Issues fundamental to society regularly play out on the campuses of America's colleges and universities. For example, how should a community react to speech that some members may find offensive? To symbols or traditions that speak to the institution's past but may be alienating to parts of its current student body? Is a college or university justified in considering race in admissions, or is that unfair discrimination? Should institutions invest their endowments to serve specific public policy goals, such as divestment from fossil fuel companies as a statement about climate change, or does that convert them into political actors inconsistent with their mission and obligation to create vibrant space for academic discourse? As you join the Harvard academic community, this seminar is designed to orient you to higher education and issues that often arise on and about college and university campuses. We will look at topics normatively, asking less what the rules are and more what they ought to be. The seminar's ultimate goal is to introduce you to the nature and values of the peculiar institutions that are America's college and universities and to begin to help you understand more fully the world that will help shape your lives over the next four years.

Freshman Seminar 70Y

Asian America (205175)

Diana Eck

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

How "Asian" is America today? This seminar explores the Asian dimensions of American history, immigration, religion, and culture from the first encounters of Thoreau and Emerson with texts and ideas of the "Orient" to the saturation of modern America with the holistic cultures of yoga, tai chi, and mind-body medicine. We will also look at the Asian communities from India, China, Korea, and Japan that brought new forms of religious and cultural life to the U.S. in the 20th century.

Course Notes: There will be several required field trips—visits to the Sri Lakshmi Hindu Temple and the Raynham Thai Temple, an optional Tea Ceremony at the Tea House of the Harvard-Radcliffe Chado Society, the Ramakrishna Vedanta Society, and the Medford Gurdwara.

Freshman Seminar 70Z

Regulating Online Conduct: Speech, Privacy, and the Use and Sharing of Content (205179)

Christopher Bavitz

2018 Fall (4 Credits)

Schedule: T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

In the course of a few short decades, the Internet has become integral to significant swaths of human experience. It has radically altered modes of interpersonal engagement, democratized access to tools of mass communication, and changed the role of gatekeepers that traditionally controlled access to music, video, and other media. Given the breadth of its impact, it is not surprising that the Internet has pushed the bounds of legal doctrines that govern speech, privacy, and the creation and exploitation of content. Mass-scale online distribution of copyrighted works tests the limits of legal doctrines developed in an era of physical copies. Age-old tensions between privacy and the right to free expression have been exacerbated in cases where one's right to speak bumps up against the desire of another to keep information private. And, the ability to share—and, thus, to consume—extraordinary amounts of personal data has impacted

government (which collects and uses data for purposes of law enforcement) and private companies (which collect and use data for purposes of advertising and monetization). This seminar will provide an overview of legal doctrines that govern the online conduct of individuals and institutional actors. It will address the rights and responsibilities of the intermediaries that mediate many of our online activities – social networks, cloud-based storage services, email providers, and the like. Students will consider old and new legal frameworks and the ways in which the law informs strategic decisions for those that operate online. The seminar will address some of the most important and complex policy debates of our day—regarding the proper scope of intellectual property protection; the balance between a robust environment for online free expression and a desire to protect against harmful speech; and the ways in which the law addresses privacy vis-à-vis both government and private actors. Readings and in-class conversations will cover legal cases and case studies, offering students a high-level view of the technical, legal, and business landscape and allowing them to delve deeply into particularly difficult sets of problems concerning the regulation of online conduct.

Zen and the Art of Living: Making the Ordinary Extraordinary (205217)

James Robson

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar explores the rich history, philosophy and practices of Zen Buddhism as it developed in China, Korea, and Japan. We will first consider the emergence of the Zen tradition out of the Buddhist tradition and then explore the full range of its most distinctive features (Zen monastic meditation), cultural practices (painting, calligraphy, and poetry), and radical—even iconoclastic—innovations (such as the use of kōans, which are seemingly nonsensical sayings that defy rationality). We will also critically evaluate some less well-known facets of the Zen tradition, such as gender issues, the veneration of mummified masters, and the question of how Zen was implicated in modern nationalistic movements in Japan during World War II. During the mid-20th century, Zen became a global phenomenon as Zen masters began to move around the world and introduce the practice of Zen meditation to those in search of religious alternatives to Western organized religions, rationalism, and materialism. Zen attracted the attention of writers, musicians, artists, and athletes. Why did Zen develop such a trans-cultural appeal at that moment in history? Why are there so many books with the title: "Zen and the Art of...."? Why do so many computer and tech companies have Zen in their names? How has Zen meditation fed into the current "meditation/mindfulness" boom? These are some of the questions we will explore in this seminar through readings, film screenings, museum viewings, and a visit to a Zen meditation center.

Course Notes:

This course will also include required film screenings, visits to the Harvard Art Museums and Boston's Museum of Fine Arts, and to the Cambridge Zen Center.

Freshman Seminar 71F

The Origins of the Human Mind (205222)

Susan Carey

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The adult human mind is a unique phenomenon on earth. Only people can ponder the causes of and cures for global warming or pancreatic cancer, and can think thoughts about molecules, genes, democracy... Animals, and human infants, do not have most of the 500,000 concepts expressed by words in English. How does the human mind work, and how can we understand how it came to be, with its vast repertoire of concepts from which we routinely compose thoughts? In this seminar, we will explore together the origins and development of human knowledge in the individual child, in relation to two larger time scales: biological evolution and historical/cultural development. We will begin with several case studies, including case studies of the origin of the concepts *natural number* and *living being*. Each case study illustrates how all of the disciplines within the cognitive sciences, as well as anthropological, archeological and historical disciplines, shed light on these issues. The main focus will be on experimental work from psychology. We will then turn to case studies chosen by the participants in the seminar. By the end, seminar students will have a grasp of the theoretical debates about the nature of the human mind that have animated philosophy since the time of the Greek philosophers, as well as why considerations of the origins of the mind were always seen as central to these debates. Students taking this seminar should have an interest in learning about the cognitive sciences, which draw primarily from linguistics, analytic philosophy, computer science, and experimental psychology.

Americans at Work in the Age of Robots and Artificial Intelligence (207507)

Benjamin Friedman

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

13

Where will the coming generation of Americans (say, today's 18-year-olds) find jobs? And will the jobs be worth having? People have worried about losing their jobs to technology at least since the Luddites 200 years ago. In the aggregate, they have been wrong. The automobile put lots of stable boys and saddle makers out of work, but it created vastly more jobs making cars, and fueling them and repairing them, and

it opened the way for whole new industries like roadside motels and restaurants. With robots increasingly performing the tasks once done by blue-collar labor, however, and computers and artificial intelligence now eliminating the need for many workers once thought to be immune because of their cognitive skills, today's technological threat seems different. It is no longer just the unskilled and undereducated whose jobs are at risk. Moreover, the challenge may be especially acute in America, where wages are far higher than in many other countries and an ever greater share of what we consume and invest not only can be provided from overseas but often is. Does the next generation of Americans, then, face a genuine threat from advancing workplace technology? If so, what are the dangers – not just economic, but social, political, even moral – to the country as a whole? Most important, what can we do about it?

Freshman Seminar 71H

Political Philosophy in Swift's Gulliver's Travels (207513)

Harvey Mansfield

2018 Fall (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Jonathan Swift was a great writer and one of the funniest men who ever lived. But he was also a great thinker, as this seminar proposes to show. His comedy leads him to the baser side of human life and to flagrant indecencies about shameful things. Why are humans ashamed of themselves? Why do they need to have their dignity recognized? Another aspect of Gulliver's Travels is its politics. Gulliver visits four imaginary regimes and compares them—a study of comparative government. What is the best regime, and why is Gulliver dissatisfied wherever he goes? In one of the regimes is an academy of scientific researchers, mocked by Swift. How can modern science reconcile its materialism with the dignity of humans? What is the compatibility of science and the humanities? To these three themes of the seminar, all of them still timely for us, one must add a view of Swift's matchless satire and irony. Is his comic imagination mere idiosyncratic exaggeration, or is there truth in it?

Freshman Seminar 71I

Thinking About History in a Post-Truth World (207813)

Sidney Chalhoub

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0500 PM

We live in a world of polarized, post-truth politics. Blatant lies are major components of public discourse. It seems that the phenomenon is global, accompanied by a resurgence of hate politics, expressed, for example, in the strengthening of racism worldwide. Words appear to have lost the prestige of referring to facts or interpretations presented in good faith and based on discourses of proof which, however contested, meant the recognition of a certain shared terrain of disputation. History as a form of knowledge has been affected by the current situation, with historians often accused of embracing political causes rather than rendering objective knowledge. What went wrong? Under pressure, historians tend to think historically (sic!) –that is, they seek to understand the trajectory of a problem and to explain change over time. History can help us to gain perspective on events. This seminar is an attempt to tell a history of thinking about history from the Enlightenment to the present, through the reading of some key texts and authors. The idea is to show that disputes about the meaning of history and the value of historical knowledge have often been quite intense without resulting in a world of epistemological dystopia and political dysfunction. Some of the questions to be discussed are: What is a historical fact? Whose history should historians tell? Is there progress in history? What is historical change and how to explain it? We will also discuss key concepts deployed by historians today, such as class, gender, and race.

Power Shifts: Understanding Global Change through History (207814)

Arne Westad

2018 Fall (4 Credits)

Schedule: W 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

Nobody can understand the present without a keen understanding of the past. Even though the study of history has value in itself, it is also something that can help us make sense of today's world. Successful people often understand this and turn a view of the past to their advantage in interpreting the present. They understand how any good plan is grounded in a sound view of history. This seminar will discuss major shifts in history from European and Asian antiquity up to today. It looks at power in all its dimensions—material, demographic, technological, ideological, military, or religious—and shows how it has influenced and been influenced by major transformations in global history. Our aim is to discuss the key causes of power shifts, but also to get an impression of the fickleness of established orders in times of tectonic change. The class reading will center on a number of brief historical cases developed at the Harvard Kennedy School. They range from ancient Greece, China, and Arabia up to the Iraq war and US-China relations today. Through these cases we want to discuss dimensions of power and how they shift over time. We also want to look at how leaders have initiated, steered, or responded to power shifts. The purpose of the cases is to illuminate how people in the past have reacted to major change and how their choices may help us understand the tools and options that are at our disposal when making critical decisions.

Economists on Building a Better Society (207815)

Jason Furman

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0500 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 12

This seminar will provide you with a broad perspective on the views that economists and economic thinkers have had on how to build a better society. We will discuss more foundational questions including: (i) the role of individual freedom to make choices vs. the importance of public policy in helping people fully realize their potential, (ii) the ways that markets and governments succeed and fail, (iii) the downsides and upsides of economic inequality, and (iv) the degree to which we should think of people as behaving rationally or not. Each week we read a different book by an economist, often with contrasting perspectives on these issues, and discuss and debate the relevance of its arguments and how they shape our thinking about both economics and a broader set of questions we all confront in society.

Course Notes:**CLASSROOM NOTE:** The seminar will meet at the Harvard Kennedy School in the Ofer building, Conference Room 401.**Requirements:****Course open to Freshman Students Only****Additional Course Attributes:**

Can Democracy be Saved? (207816)

Daniel Ziblatt

2018 Fall (4 Credits)

Schedule: R 0900 AM - 1145 AM**Instructor Permissions:** Instructor**Enrollment Cap:** 12

Around the globe, democracy is increasingly embattled. From Hungary, Venezuela and Turkey to Western Europe and the United States, there is growing perception that democracy itself faces a series of unprecedented challenges. Norm-breaking insurgents confront declining mainstream parties. Once in power, elected leaders with authoritarian inclinations often entrench themselves in power. Voters seem increasingly susceptible to "fake news." Economic inequality makes democracy vulnerable to "capture" by powerful economic interests. And intense party polarization sometimes leaves voters blind to abuses of elected autocrats. Can democracy be saved? This seminar explores the concept of democracy and some chronic problems in the practice of democracy to trace the history of the idea, exploring whether the supposedly self-

correctly logic of democracy is broken today. We explore how voters and political parties are thought to behave according to democratic theory. And we then explore how the three challenges of "fake news," "economic inequality," and "polarization," may make democracy more fragile than it has been in the past. We explore significant historical and contemporary cases of democratic breakdown to try discern lessons for our own democracy as it confronts these challenges.

Course Notes: There will be a required trip to a local political organization that will relate to group presentations.

Global Capitalism: Past, Present, Future (207817)

Sophus Reinert

2019 Spring (4 Credits)

Schedule:

R 0900 AM - 1130 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Capitalism has powerfully shaped human history, and continues to shape the world we live in. The opinions of its defenders and defamers saturate our media landscape. But what do we mean by "capitalism"? Since their historical origins, "capitalist" values and practices have been the principal drivers of a process today known as "globalization," unfolding through both peaceful and violent means, which has brought disparate parts of the world together in a network of politically independent yet economically interdependent states and non-state actors. But how did capitalism come about? How is wealth created, why do we inhabit a world of "developed" and "emerging" markets, and what are the origins of economic inequality within and between nations? What futures might await what we call global capitalism? This seminar introduces students to the Socratic teaching method used in the Harvard Business School and is based on case studies covering the vast epic of capitalism. Where some cases are historical, considering topics such as the Great Divergence and the consequences of colonialism, others turn to contemporary conditions in the world's major regions and, ultimately, to the great transformations now underway and lying ahead. In addition to discussing the past, present, and future of capitalism, the seminar will familiarize students with basic concepts of macroeconomics as well as tools, such as balance of payments analysis and national economic accounting to prepare them for lives of active global citizenship.

The Causes and Consequences of Inequality (207818)

David Deming

2018 Fall (4 Credits)

Schedule:

W 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Why has earnings inequality in the U.S. and other developed countries increased so much since the 1970s? What are the consequences of rising inequality, and what can we do about it? This course provides an overview of what social science has to say about the causes and consequences of inequality, and engages students in a critical and balanced discussion of the positive and normative issues concerning rising inequality. Example topics include: 1) the key role of education and skills in rising inequality among the "99 percent"; 2) rising wealth inequality and taxation; 3) segregation, racial discrimination and the criminal justice system; 4) globalization and international trade; 5) elite capture of the political system, mass media and "big money" in politics. The goal of the course is to introduce analytical and moral frameworks for thinking about inequality, and to relate those frameworks to specific political and policy tradeoffs in the U.S. and around the world.

Course Notes: There will be a required trip to Mt. Auburn Cemetery.

The Heart of Medicine: Patients and Physicians and the Experience of Serious Illness (207777)

Susan Block

Jerome Groopman

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Sickness and death are universal human experiences. Yet we are often uncomfortable talking and thinking about them in relation to ourselves, and to those whom we love. The core thesis of this seminar is that exploring these human vulnerabilities is a way of learning to live a more meaningful life, strengthening relationships, and helping us be better caretakers of people we love, and of people whom we serve in a professional role. In this seminar, we propose to examine, from multiple perspectives, the social, cultural, psychological, economic, and spiritual factors that influence the experience of serious illness. The seminar will draw on core readings from the humanities, social sciences, and medicine to deepen understandings of how people experience and live and die with a serious illness. Opportunities for discussion, reflection, live interviews, case analysis, and experiential exercises will take place in class; additional field learning opportunities (e.g., home visits, participation in hospital-based teaching rounds) may also be available outside of class.

American Health Care Policy (112358)

Michael Chernew

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

180

Health care in America poses fundamental policy challenges to our ability to provide affordable insurance coverage to all Americans; to produce high quality care; and to efficiently use health care resources. This course aims to offer students a solid understanding of the American health care system, the potential impact of new reform legislation, and challenges that will remain in the future.

Course Notes: Students who have taken General Education 186 or Extra-Departmental Courses 186 may not take this course for credit.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Requirements: Anti-Req: Cannot be taken for credit if GEN-ED 186 has been taken.

Designing the American City: Civic Aspirations and Urban Form (116243)

Alex Krieger

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An interpretive look at the American city in terms of changing attitudes toward urban life. City and suburb are experienced as the product of design and planning decisions informed by cultural and economic forces, and in relationship to utopian and pragmatic efforts to reinterpret urban traditions in search of contemporary alternatives. Topics include: persistent ideals such as the single-family home, attitudes

toward public and private space, the rise of suburbs and suburban sprawl, cycles of disinvestment and renewed interest in urban centers, and impacts of mobility and technology on settlement patterns.

Course Notes: Offered jointly with the Graduate School of Design as DES 0330200.

The Civil War from Nat Turner to Birth of a Nation (128327)

John Stauffer

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This interdisciplinary course reframes traditional understandings of the Civil War in three ways. First, it shows that the conflict in the United States began well before 1861 and ended well after 1865, taking the form of slave uprisings and Klan terrorism, as well as conventional war. Second, it reveals that the former Confederacy won this longer Civil War by establishing a new order of black unfreedom. And third, it places this war in the context of international politics and trade. "Readings" range from fiction, film, letters, and speeches to poetry, pamphlets, prints and photographs, songs, and history.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Dilemmas of Equity and Excellence in American K-12 Education (107341)

Katherine K. Merseth

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

80

Events such as Teach for America's 20th anniversary and films like Waiting for Superman highlight urgent concerns about the quality and reach of American schooling in the 21st century. Against this backdrop, the course grapples with several dilemmas that have defined American K-12 education throughout history. What constitutes educational excellence? Can excellence be achieved for everyone? Why do we have schools and what is their purpose? Given that families, politicians, and the courts often disagree vehemently about the answers to these questions, the course considers who and what will define the future of American education and its role in society.

Class Notes: US-WORLD 35 will be offered twice in Fall 2018 (Tu,Th 10:30-11:45 and Tu,Th 12:00-1:15). Students must register for and attend only one of the two offerings.

See the course website for more details about the lottery process for this course.

Forced to be Free: Americans as Occupiers and Nation-Builders (108359)

Andrew Gordon

Erez Manela

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The United States has launched numerous projects of military occupation and nation-building in foreign lands since the late 19th century. These have been contradictory enterprises, carrying ideals of freedom and self-determination "offered" by force or by fiat. This course will assess the meanings and legacies of these projects by examining the ideas, strategies, policies, and outcomes of occupations ranging from the Philippines and Haiti early on, to Japan, Germany, and Korea in mid-century to, most recently, Afghanistan and Iraq. The course focuses on American activities and ideas but also examines the responses of the occupied.

Natural Disasters (112430)

Brendan Meade

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

70

Natural disasters, such as earthquakes, hurricanes, and floods, claim thousands of lives and cause tens of billions of dollars in damage each year. Moreover, changes in Earth's climate are raising sea level, changing precipitation patterns, and likely causing an increase in the occurrence of damaging storms, putting more of our increasing exposed global population at risk. In this course we develop an understanding of these natural hazards from an earth science perspective, and examine several case studies to assess their catastrophic impacts. Given our scientific understanding of these phenomena, we examine ways to assess and forecast future natural disasters, and to mitigate the adverse impacts to our societies. Sections will emphasize the use of GIS technology to measure the impacts of natural hazards.

Why You Hear What You Hear: The Science of Music and Sound (114922)

Eric Heller

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

60

Sound and music are integral parts of all human cultures, and play critical roles in communications and social interactions. In this course, we study the production, transmission, and perception of sound, with the aim of expanding communication, musical, and artistic horizons. The course includes many class demos and hands on tools for students to explore. Psychoacoustics (the study of how we perceive and interpret sound) is a central theme of the course, providing a lens through which we can better understand the generation, propagation, and analysis of sound. Student-selected projects (with staff consultation) are an

important part of the course.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

The story of Earth from the inception of the universe at the Big Bang to the revolution in planetary function and capability associated with the rise of human civilization. The aim of the course is to place human beings in a universal and planetary context, and to see the steps in planetary evolution as an essential perspective on how we relate to Earth today. Topics covered include the Big Bang, origin of the elements, formation of minerals, origin of the solar system, formation of planets, climate regulation, origin of life, co-evolution of ocean, atmosphere, solid earth and biosphere, development of plate tectonics, the modern Earth as an interconnected system, and the human era and its consequences for the planet. Current environmental problems can then be considered in a planetary context. Finally we consider whether Earth may be a microcosm reflecting laws of planetary evolution that may be common to a class of planets throughout the universe, or alternatively may be a low probability accident.

Instructor Permissions: Instructor

Enrollment Cap:

90

We use the theme of primitive navigation to open the eyes of students to the physical world in a direct and palpable manner. Basic principles include human cognition of physical and mental maps, dead reckoning, direction finding from nature. The course includes the basics of astronomy, including planetary orbits, meteorology, thermodynamics, bird behavior, electromagnetic radiation, optics, waves, tides, ocean currents, and fluid dynamics. Navigational practices of Pacific Islanders, Norse, medieval Arabs, and early western Europeans provide a focus. Some facility with algebra and trigonometry is useful. A series of hands-on projects are employed to understand navigational practices discussed in lecture.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. This course is a collaboration between world-class chefs and Harvard professors. Each week, a chef will lecture about some aspect of gastronomy. This lecture will introduce and motivate a lecture about the science of soft materials by a Harvard professor. The course will cover the basic concepts in the science of soft materials, providing a solid understanding of their properties and behavior. All food is made of soft materials, and cooking relies on many of their fundamental properties. The course will also include laboratory work that uses concepts of cooking to understand and motivate experimental measurements on soft materials.

Course Notes:

Occasionally there will be an optional 15-30 minute question and answer session with visiting chefs.

Class Notes:

During shopping week this course will meet in Science Center Hall B.

This course considers the relationship between life and the planet on which it resides. It examines the scientific quest to understand where life might thrive beyond Earth. On Earth, life was born of planetary processes and has been sustained by plate tectonics and other physical processes. Through evolution, life has in fact emerged as major influence on our planet's surface. Fundamental features of terrestrial life and evolution are addressed in the context of astronomy, planetary physics and chemistry. These, in turn, provide a basis for the exploration for other habitable planets, both within our solar system and in the greater universe.

Science of Physical Universe 31

Energy Resources and the Environment (156316)

John Shaw

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

105

The course provides an overview of the energy resources that we use to sustain our global economies, and explores the impact of these activities on our environment. We address the full life cycle of each energy resource, including its origins, methods used to explore for and exploit it, how it is used in our economies, and the environmental impacts of these activities. Topics include coal, petroleum (conventional and unconventional), nuclear power, geothermal systems, and renewable energy options (hydro, tidal, solar,

wind power). Lectures and labs will introduce students to data and methods used in these energy and environmental sectors.

Class Notes: The course includes one required field trip to a local energy facility during reading period. Students who cannot attend will be provided with an alternative assignment.

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Culture & Belief 16

Performance, Tradition and Cultural Studies: An Introduction to Folklore and Mythology (125216)

Stephen Mitchell

2018 Fall (4 Credits)

Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

Examines major forms of folklore (e.g., myths, legends, epics, beliefs, rituals, festivals) and the theoretical approaches used in their study. Analyzes how folklore shapes national, regional, and ethnic identities, as well as daily life; considers the function of folklore within the groups that perform and use it, employing materials drawn from a wide range of areas (e.g., South Slavic oral epics, American occupational lore, Northern European ballads, witchcraft in Africa and America, Cajun Mardi Gras, Sub-Saharan African oral traditions).

Course Notes: Required of Concentrators and for the Secondary Field in Folklore and Mythology.

Class Notes: Occasional Fridays are required. Please check course website for details.

Understanding Islam and Contemporary Muslim Societies (108890)

Ali Asani

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course is an introduction to the fundamental concepts of Islam and the role that religious ideas and institutions play in Muslim communities around the world. Its main concern is to develop an understanding of the manner in which diverse notions of religious and political authority have influenced Muslim societies politically, socially and culturally. Through specific case studies of countries such as Saudi Arabia, Iran, Turkey, Egypt, Pakistan, and Afghanistan, the course considers the role played by ideologies such as jihad, colonialism, nationalism, secularism, and globalization in shaping the ways in which Muslims interpret and practice their faith today. The course briefly considers the contemporary situation of Muslim minorities in Europe and the United States.

Course Notes: Offered jointly with the Divinity School as 3628.

The Ancient Greek Hero: Mythology and Facing Death (113501)

Gregory Nagy

2018 Fall (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How did ancient Greeks, particularly ancient Athenians, face death? How can a community face the death of its members, and how can one face one's own death as well as the deaths of others? This course takes ancient Greek hero worship and its attendant mythology as a focal point for examining these questions. Assignments are based on ancient forms of verbal and visual art while also incorporating a creative element. This course also has a "great books" aspect, given its extensive reading list: the two Homeric epics, seven tragedies, two dialogues of Plato, as well as selections from Sappho, Herodotus, Hesiod, Philostratus, Pindar, Aristotle, and others.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Saints, Heretics, and Atheists: An Historical Introduction to the Philosophy of Religion (122258)

Jeffrey McDonough

2019 Spring (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Does God exist? What is the nature of evil and where does it come from? Are humans free? Responsible? Immortal? Does it matter? This course will explore foundational questions in the philosophy of religion through the study of classic works by Plato, Augustine, Al-Ghazali, Aquinas, Pascal, Spinoza, Hume, Nietzsche and James. Students will have the opportunity to reexamine their own views and assumptions about religion in the company of some of the greatest thinkers of the past. (Key words: agnosticism, atheism, Christianity, faith, freedom, humanism, immortality, Islam, Judaism, meaning, Muslim, mysticism, reason, sin, soul)

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

East Asian Religions: Traditions and Transformations (126199)

James Robson

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course provides an introduction to the study of East Asian religions. It covers the development of Buddhism, Daoism, Confucianism and Shinto. It is not a comprehensive survey, but is designed around major conceptual themes, such as ritual, image veneration, mysticism, meditation, death, and category

formation in the study of religion. The emphasis throughout the course is on the hermeneutic difficulties attendant upon the study of religion in general, and East Asian religions in particular.

Course Notes: Offered jointly with the Divinity School as 3010.

Classical Mythology (126004)

Brigitte Libby

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

120

Incest and parricide, cannibalism and self-blinding: classical mythology has fascinated artists, writers, and thinkers throughout western civilization, and this course will serve as an introduction to this strange and brilliant world. We will move from the very first works of Greek literature through to the classic Greek tragedies and the Roman tales in Ovid's *Metamorphoses*. Along the way, we will confront the question of what "mythology" is and how it works, and we will discuss how these traditional stories changed over time to fit different cultural circumstances. We will also consider ancient rationalizations of myth, the relationship of myth and politics, and the reception of classical myth in the modern world.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Apocalypse Then! Forging the Culture of Medieval Rus' (111958)

Michael Flier

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

When the natives of Medieval Rus (later Russians, Ukrainians, and Belarusians) accepted Orthodox Christianity in the 10th century, their nature-based paganism gave way to a powerfully sensual belief system that made good use of the visual and the verbal to prepare these newest Christians for the coming Apocalypse and Last Judgment. We investigate this transformation from the conversion of Saint Vladimir and the excesses of Ivan the Terrible through the Time of Troubles and the modern turn of Peter the Great. The class features close analysis of architecture, icons and frescoes, ritual, folklore, literature, and history to understand this shift in worldview, including the role of women. Special attention is devoted to the ways in which Medieval Rus is portrayed in film, opera, and ballet.

Course Notes: All readings in English.

Communism and the Politics of Culture: Czechoslovakia from World War II to the Velvet Revolution (123734)

Jonathan Bolton

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What was Communism, and how did it shape the intellectual life of East Central Europe after World War II? How do artists and writers counter the ideological pressures of the state? This course examines how the intense political pressures of invasion, occupation, and revolution shape a country's cultural life and are shaped by it in turn. We look at Czechoslovakia's literature, drama, film, and music from the 1948 Communist takeover, through the Prague Spring and Soviet invasion of 1968, to the 1989 Velvet Revolution, a hallmark of the peaceful overthrow of Communism in Europe. We consider works by Milan Kundera, Bohumil Hrabal, Vaclav Havel; films of the Czech New Wave (Milos Forman, Vera Chytilova, Jiri Menzel); clandestine publishing and underground art; and theories of political dissent under authoritarian regimes.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The History of the English Language (126847)

Daniel Donoghue

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Everyone who uses English has experienced its idiosyncrasies. Why is pronunciation at odds with spelling? Why so many irregular verbs? What happened to "thou"? What did Shakespeare sound like? How do we know? What is the future of English as a world language? What is code-switching? Spanglish? This course addresses such questions as it surveys the long history of the language up to the present day. While the topic is fascinating on its own, a historical knowledge of English can boost confidence in your reading and writing. It also helps dispel common anxieties and misconceptions about language. Lectures will be supplemented by exercises from the course website. A final project asks you to invent an English of the future.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Culture and Belief or Aesthetic and Interpretive Understanding, but not both. Making the Middle Ages (108161)

Daniel Smail

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course offers a general introduction to the cultures and beliefs of medieval Europe. We focus on a variety of artifacts and cultural productions as the centerpieces of a broad and interdisciplinary exploration of medieval studies. Using specific objects and texts as points of entry into a vanished world, we encourage students to explore those areas that interest them most, teasing out the cultures and beliefs of the past while simultaneously developing their skills in research and writing. Through collaborative projects and a creative exploration of texts, images, and collections at Harvard and beyond, students will be invited to make their own Middle Ages.

Is Globalization Good or Bad for World Health? (126193)

Sue J. Goldie

2019 Spring (4 Credits)

Schedule:

T 0900 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

200

Three extraordinary changes in the world present both risks and opportunities to health—unprecedented interconnections across borders, rapidly shifting population dynamics, and changing epidemiological patterns. This course will challenge your assumptions about the world's populations and broaden your perspectives about how health relates to sustainable development. We will explore the most important health challenges of our times, and analyze the influence of social, political, and environmental determinants on health, including transnational risks. Acknowledging that 21st challenges cannot be solved by any single discipline, sector or nation, we will consider solutions from a variety of perspectives, drawing on contributions from health and non-health sector, and actions at the local, national and global levels. By the end of the course, you will have a toolbox of approaches, both qualitative and quantitative, that will equip you to thoughtfully analyze and contextualize 21st century global challenges, and to formulate your own opinion about the question – is globalization good or bad for global health?

Class Notes:

Political Economy After The Crisis (126203)

Roberto Mangabeira Unger

Dani Rodrik

2019 Spring (4 Credits)

Schedule:

M 0100 PM - 0300 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The world's economic and political order reels under mounting challenges: the global financial crisis, the austerity debacle, a slowdown in economic growth and productivity, the aggravation of inequality and the inadequacy of conventional responses to it, the discrediting of the Washington Consensus, the globalization backlash, the re-emergence of nationalist politics in Europe and the United States, and a contest over the meaning, value, and requirements of democracy. We examine connections among these phenomena and explore alternative ways of thinking about contemporary market economies and their reconstruction. We organize the course around four related themes: the worldwide financial and economic crisis of the recent past and its management; the effort to promote socially inclusive economic growth in richer as well as in poorer countries; the nature, fate, and dissemination of the new knowledge-intensive style of production; and the past, present, and future of globalization.

Course Notes: Students should have some previous acquaintance with economics but no advanced economic training is required. The course is open to undergraduate and graduate students outside as well as within economics. Readings will be drawn from the classic and contemporary literatures of economics, political science, philosophy, and social theory.

Extended take-home examination/writing assignments. Jointly offered with the Law School.

Class Notes: Taught by a combination of lecture and discussion, with an additional weekly discussion meeting for undergraduates.

The Caribbean Crucible: Colonialism, Capitalism and Post-Colonial Misdevelopment in the Region (118290)

Orlando Patterson

2018 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Caribbean societies are largely the economic and political creations of Western imperial powers and are among the earliest products of globalization. Though *in* the West, they are only partly *of* it, and their

popular cultures are highly original blends of African, European and Asian forms. The course examines the area as a system emerging through genocide, piracy, plantation slavery, colonialism and globalization, from a situation of great social and cultural diversity to the present tendency toward socio-economic and cultural convergence. Patterns of underdevelopment and government are explored through national case studies (Puerto Rico, Cuba, Jamaica & Haiti) and selected, region-wide modern issues (hurricanes, earthquakes and other natural disasters; migration & transnationalism; crime & drug trafficking), as are cultural adaptations through studies of Afro-Caribbean religions, folkways, and music. America's special role in the region is emphasized.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Conditional Equality: The Case of the Jews of Europe in Modern Times (126640)

Jay Harris

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a study in the relations between majorities and minorities in modern Europe, using the Jews as a focus. It will examine the ways in which the equal status of a minority is negotiated through cultural and political interaction, both subtle and blunt. It will further focus on the role that such negotiations have in the formation of identities of both the majority and the minority. Finally, it will examine the ways in which majorities can exercise control over minorities rendering them conditionally rather than fully equal participants in the national projects of the age.

This course provides the historical depth and the comparative context in which to understand modern and contemporary South Asia. It explores the history, culture, and political economy of the subcontinent which provides a fascinating laboratory to study such themes as colonialism, nationalism, partition, the modern state, democracy development, religious identities, and relations between Asia and the West. Significant use of primary written sources (in English) and multi-media presentations.

Pyramid Schemes: The Archaeological History of Ancient Egypt (126641)

Peter Manuelian

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An illustrated, interactive survey of ancient Egyptian pharaonic civilization. Emphasizes Egyptian material culture: pyramids, temples, tombs, settlements, and artifacts. Explores major developmental themes that defined the Egyptian state: the geographical landscape, kingship, social stratification, and religion. Follows a chronological path with excursions into Egyptian art, history, politics, religion, literature, and language (hieroglyphs). Also touches on contemporary issues of object repatriation, archaeology and cultural nationalism, and the evolution of modern Egyptology. Includes field trips to the Egyptian collections of the Peabody Museum and the Museum of Fine Arts, Boston, along with immersive 3D computer models in Harvard's Visualization Center. No prior experience in Egyptology expected.

Class Notes:

Please note the change of meeting time (made on Jan. 22, 2019).

The Incas: The Last Great Empire of Pre-Columbian South America (117137)

Gary Urton

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course guides students on an exploration of the largest and most complex civilization of Pre-Columbian America - the Inca Empire of Andean South America. We will address such questions as how did a civilization emerge and thrive at 12,000 feet above sea level? How could a state-level society exist without markets, the wheel, or writing? In addition to lectures and discussions, students will experience the products of Inca civilization through hands-on study of artifacts in the Peabody Museum of Archaeology and Ethnology.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Japan's Samurai Revolution (114776)

David Howell

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

On July 8, 1853, Commodore Mathew C. Perry steamed into Japan's Edo Bay with four heavily armed US Navy warships. Two were the so-called "black ships," ominously painted coal-burning steamships of the latest design. There, within view of a stunned populace, Perry issued an ultimatum: open the country to trade or face unstoppable bombardment. Thus began Japan's modern engagement with the outside world, a new chapter in the broader encounter between "East" and "West." Through primary sources, discussion and lecture, this course examines Japan's rapid development from samurai-led feudalism into the world's first non-Western imperial power.

Course Notes:

No Japanese language skills required. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Human Trafficking, Slavery and Abolition in the Modern World (127538)

Orlando Patterson

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course surveys the nature, types and extent of modern servitude, distinguishing broadly between those resulting from international trafficking such as trans-national prostitution, human smuggling into bonded labor, child soldiering and organ trafficking, and more intra-national forms such as debt-bondage and the domestic exploitation of women and other vulnerable groups. Examines the conceptual and theoretical issues raised in attempts to distinguish among these types of differential power relations; the empirical difficulties of estimating the magnitude of what are inherently secretive processes; and the ideological controversies surrounding the subject. Explores ethical, socio-political and practical issues raised by these trends.

Contemporary Developing Countries: Entrepreneurial Solutions to Intractable Problems (107464)

Tarun Khanna

2018 Fall (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will provide a framework (and multiple lenses) through which to think about the salient economic and social problems of the five billion people of the developing world, and to work in a team setting toward identifying entrepreneurial solutions to such problems. Case study discussions will cover challenges and solutions in fields as diverse as health, education, technology, urban planning, and arts and the humanities. The modules themselves will be team-taught by faculty from engineering, the arts, urban design, healthcare and business. The course will embrace a bias toward action by enabling students to understand the potential of individual agency in addressing these problems. All students will participate in the development of a business plan or grant proposal to tackle their chosen problem in a specific developing country/region, emphasizing the importance of contextualizing the entrepreneurial intervention. The student-team will ideally be comprised of students with diverse backgrounds from across the University.

Course Notes:

Offered jointly with the Business School as 1266, the School of Public

Health as GHP 568, the Kennedy School as DEV-338, the Law School as HLS 2543, the Graduate School of Education as A-819, the Graduate School of Design as SES 5375, and the Medical School as IND520.

Class Notes: If student interest exceeds the course limit, a lottery will be conducted. Please attend class and visit the course website for more details.

Class Notes: NO AUDITORS. The course is designed around section participation and the completion of the final group project.

Islam and Politics in the Modern Middle East (126908)

Malika Zeghal

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

72

The course critically examines the ideologies and political strategies of twentieth century Islamist movements, as well as their origins and evolution. It will relate the emergence of organized Islamist movements in the first part of the twentieth century to earlier Islamic reformist narratives, and explore the political and social contexts in which these movements emerged and evolved. Particular attention will be given to the ideas these movements developed and to the texts they published and disseminated. One component of the course is historical and seeks to cover the evolution of Islamist movements over the course of the twentieth century, from the Muslim Brothers' emergence, to the development of radical Islam, and the "mainstreaming" of Islamist movements searching for avenues of legal participation. Another component will be issue-based and will examine questions such as: why did political movements based in Islam become so important in the twentieth century? How can we account for their polarization into what are usually described as "moderate" and "radical" trends? How is their existence and history related to the formation of modern states in the Middle East and to their authoritarianism? What are the reasons behind and the consequences of some of these movements' electoral successes, after the Arab Spring in particular? Egypt will be the central focus due to its crucial role in the genealogy of Islamism as a political movement. Although examples from North Africa, Iran, Saudi Arabia and other countries of the Middle East will also be covered, the course is not a survey of the history of Islamist movements throughout the entire region.

Course Notes: Sections offered in English or Arabic.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

An interdisciplinary exploration of Darwin's ideas and their impact on science and society. The course links the history of Darwin's ideas with the key features of modern evolutionary biology. We review the development of the main elements of the theory of evolution, highlighting the areas in which Darwin's ideas

have proved remarkably robust and areas in which subsequent developments have significantly modified the theory. By also analyzing the historical context of the development of evolutionary thought beyond Darwin, the course emphasizes the dynamic interplay between science and society.

The course introduces students to the functioning of the human body in health and disease. Students will examine determinants of their own health (genetics, diet, environment, sleep, exercise, stress, social interactions) and consider how these and other factors impact the health of diverse communities around the world. Emphasis will be placed on how the human body responds to physiologic challenges, such as psychological stress and environmental exposures, and on topics with high public health impact (obesity, smoking, mental health and addiction). Activities include lectures, 2 guided laboratories/demonstrations, structured weekly sections that focus on scientific literacy, and a directed term project.

Class Notes:

If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Nutrition and Global Health (126200)

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

250

This course will introduce students to nutrition and its relation to global health problems, including infectious and chronic diseases, maternal and child health, and climate change. Students will explore the demographic, epidemiological, biological, social, political, and economic determinants of nutritional status. Emphasis will be placed on the role of nutritional status and dietary intake as determinants and consequences of health problems. Students will be encouraged to think critically about major challenges to improving nutrition and health at a global level. Nutritional assessment, study design, and efficacy of nutrition interventions will be explored in detail.

Class Notes:

Global Infectious Diseases and Social Justice: Lessons from Science, History, & Humanities (110382)

Donald Goldmann

Ken McIntosh

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

65

This course will review the profound, often devastating impact nine major infectious diseases have had on society, including politics, war, religion, economics, public health, justice, and ethics. Rather than merely reciting grim statistics and body counts, we will illustrate the effects of these diseases as seen through the lens of history, literature, film, music and drama. We will celebrate how these infections have stimulated revolutionary epidemiologic and scientific advances in detection, treatment, and prevention, but we will also explore the darker side of this story. Behind the veneer of inexorable progress lies the reality that infections have spawned stigmatization, prejudice, exclusion, shameful human experimentation, social injustice, and inequalities in health outcomes. Even today, if we look behind the curtain of miracle drugs and a flourishing medical-industrial complex, we find that these same troubling themes remain relevant across the globe, and in the US.

By weaving science together with the humanities, students will learn to address current and emerging global infectious disease threats and the social justice challenges they pose. We will provide enough clinical and scientific background about each infection for students to fully understand why they have had such important societal effects. Classes and sections will be highly interactive, including case studies, games, advocacy "pitches," a mock trial, debates, role playing, and collaborative learning.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Gulru Necipoglu-Kafadar

David Roxburgh

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to ten iconic monuments of the Islamic world from the beginning of Islam to the early modern period. The course introduces various types of building-mosques, palaces, multifunctional complexes-and city types and the factors that shaped them, artistic, patronal, socio-political, religio-cultural, and economic. Each case study is divided into two lectures. The first presents the monument or city by "walking" through it. The second is devoted to themes elicited from the example, developed in light of comparative monuments, sites, and/or written sources, and to problems of patronage, production, audience and meaning as they pertain to architectural history.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Is Revolution or Reform the Best Way to Transform Society? (125749)

James Simpson

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Is revolution or reform the best way to transform society?

What noun do the following adjectives qualify: English, American, French, Russian, Chinese Cultural, Cambodian, Iranian? Answer: "Revolution." Liberal cultural tends to praise some of these revolutions and recoil in horror from the others. In America, "revolutionary" is a positive adjective while victims of the Soviet gulags are less enthusiastic about the term. Countries whose revolutions have been successful and durable regard the term "utopia" as more positively than the victims of utopian thinking. What do you make of this dissonance?

This course explores the relation between utopian Enlightenment and literary cultures in Western history.

For each moment of rapid change, from Plato to the Communist revolutions of the twentieth century and beyond, we will focus on two texts: one which promotes the enlightened and revolutionary utopian social blueprint; and one that offers an alternative model of transformation, or even a dystopian account of the utopian model. You will come away from this course having a chronologically wide and intellectually deep immersion in 2500 years of European philosophical and literary history. Throughout, you are encouraged to think about what resources we use to imagine social transformation and to ask if revolution is in fact the best way to effect social transformation.

Course Notes: Students who have taken Culture and Belief 18 or Humanities 53 may not take this course for credit.

David Wang

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course introduces a unique dimension of Chinese modernity: amorous engagement in fiction and lived experience, its discursive and visual representations, and its institutional implementation (gender, marriage, family, law, nation/state, etc.), censorship, and transgression. It examines how the modern lure of free will and emancipated subjectivity drove Chinese to redefine terms of affect, such as love, feeling, desire, passion, sexuality, loyalty, dedication, revolution and sacrifice. It also looks into how the moral, legal and political consequences of affect were evoked in such a way as to traverse or fortify consensual boundaries and their manifestations.

The course examines the defining moments in the development of modern European and American art from the eighteenth- through to the twentieth-century. Anchored by a significant date, each lecture focuses on the relationship between a major artistic event and the social, political, cultural, and technological conditions of its emergence. A wide range of media, from painting, sculpture, and print-making to photography, photomontage, video, installation, and performance art, will be considered. Situating the key aesthetic transformations that defined art's modernity in a broader historical context, the course explores the fundamental role of advanced forms of artistic practice in the formation of modern culture and society.

Course Notes: This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Nazi Cinema: The Art of Propaganda (108580)

Eric Rentschler

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

218

As thinking beings we consider the limits of human potential and wonder what is the worst. The Nazis obsess us because they were masters of extremity who brought to the world unprecedented violence, destruction, and murder. They were also masters of propaganda who engineered sophisticated techniques of mass manipulation; in this endeavor cinema and modern media assumed a seminal role. This course considers why films proved to be so essential to the Hitler regime and so captivating to German audiences of the Third Reich. It also reflects on the continuing allure of Nazi sights and sounds for contemporary mass culture.

Course Notes: No knowledge of German required. An additional film screening will be held on Sundays, 1-3.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Aesthetic & Interpretive 62

California in the 60s (156264)

Kate van Orden

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

100

This course examines American youth culture in the 1960s through the lens of music in California. Both "popular" and "art" music will be considered, including early minimalism, songs from L.A. and the Laurel Canyon crowd, and San Francisco psychedelia. In addition to understanding musical forms, performance styles, and the effects of technology (radio, recording, electric instruments), the class will delve into the politics of race, gender, counter-cultures, and the draft. Art-making will be facilitated as part of course work (activist theater, song-writing, etc.).

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Aesthetic and Interpretive Understanding or Culture and Belief, but not both.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Aesthetic & Interpretive 63

East Asian Cinema (110464)

Jie Li

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course introduces major works, genres, and waves of East Asian cinema from the silent era to the present, including films from Mainland China, Japan, Korea, Taiwan, and Hong Kong. We will discuss issues ranging from formal aesthetics to historical representation, from local film industries to transnational audience reception. This course does not assume prior knowledge of East Asian culture or of film studies, but rather seeks to provide students with a basic understanding of modern East Asian cultural history through cinema, and with an essential toolkit for analyzing film and media, including narrative, cinematography, editing and sound. In addition to critical approaches, students are strongly encouraged to creatively respond to course materials by collaborating on their own short films, beginning with the illustration of film terms in the first two weeks and culminating in the Oscar-like "Golden Monkey Awards."

Course Notes: All films subtitled in English. No prior knowledge of East Asian history

or film studies necessary.

Chaucer: The Canterbury Tales (146214)

Nicholas Watson

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What makes stories so pleasurable and so enraging? How do we understand the strong emotions they evoke, and how do we learn to resist their power? Answering back to a world of fake news and divisive political narratives, this course revisits Chaucer's Canterbury Tales the deepest, most caustic, and most entertaining analysis of the problematic status of stories ever written.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

The Future of Cultural Space (212578)

Robin Kelsey

Jerold Kayden

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

35

Museums, concert halls, theatres, art galleries, libraries, opera houses, cinemas, performing arts complexes, clubs, bookstores, restaurants, public spaces, universities, and other bricks-and-mortar venues have accommodated and shaped cultural ambitions for centuries. Today, many such facilities face accelerating threats from shifting user preferences and technologically driven substitutes that put their physical form, if not their very existence, into question. What is a library or bookstore when books are downloadable or available with same day delivery? Can cinemas draw an audience when the latest movie is a click away? Are demographic trends inexorably dimming the relevance of concert halls? The moment seems ripe for serious reflection and imaginative excursions about the future of cultural space.

This class examines the future of cultural space through class discussions, case presentations, reading assignments, short weekly exercises, a term project, and a class-as-a-whole brainstorming exercise. The course meets weekly for two hours, with an additional weekly 50-minute section devoted to closer examination of the readings and critical reflection on the previous class discussion. Readings will provide foundational knowledge about specific types of cultural facilities. Operators and designers of cultural facilities will visit the class and present case studies. Throughout the term, class members will explore the possibility of a new "space" at Harvard University dedicated to the study of cultural spaces.

Ethical Reasoning 12

Political Justice and Political Trials (125197)

Charles Maier

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Punishing people for their political opinions or activity has a long history and is a practice unlikely to disappear. Criminal trials have served to enforce revolutionary change, to stifle dissent, or, alternatively, sometimes to advance democracy. Students examine major trials and debate such issues as who can prosecute; can behavior be criminalized retroactively; can restricting speech ever be justified. Case material is drawn from the trial of Socrates, the French Revolution, the Soviet purges, French collaborators, the Nuremberg war-crimes trials, American impeachment proceedings, cold-war hearings and Guantánamo defendants, and recent international tribunals. Course requirements include brief response papers, a final essay, and participation in a historically based mock trial.

Course Notes:

This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Ethical Reasoning 18

Classical Chinese Ethical and Political Theory (121778)

Michael J. Puett

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What is the best way to live a fuller and more ethical life? Concretely what should we do to begin to live in a more flourishing and inspiring way? Questions such as these were at the heart of philosophical debates in China. The answers that classical Chinese thinkers developed in response to these questions are among the most powerful in human history. Regardless of whether one agrees with them or not, they should be studied and taken seriously by anyone who cares about ethics, politics, and the ways to live life more fully.

Ethical Reasoning 20

The Conduct of Life in Western and Eastern Philosophy (122544)

Roberto Mangabeira Unger

Michael J. Puett

2019 Spring (4 Credits)

Schedule:

W 0100 PM - 0300 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A study of approaches in the philosophical traditions of the West and the East to the conduct of life. Philosophical ethics has often been understood as meta-ethics: the development of a method of moral inquiry or justification. Here we focus instead on what philosophy has to tell us about the first-order question: How should we live our lives?

This year a major concern will be the study and contrast of two such orientations to existence. One is the philosophical tradition focused on ideas of self-reliance, self-construction, and nonconformity (exemplified by Emerson and Nietzsche). The other is a way of thinking (notably represented by Confucius) that puts its hope in a dynamic of mutual responsibility, shaped by role and ritual and informed by imaginative empathy.

No prerequisites other than a willingness to consider a wide range of problems and materials. Extended take-home examination.

Course Notes:

No prerequisites other than a willingness to consider a wide range of problems and materials. Extended take-home examination.

Offered jointly with the Law School as 2392 and the Divinity School as 2313.

Class Notes: Taught by a combination of lecture and discussion, with an additional weekly discussion meeting for undergraduates.

Additional Course Attributes:

Ethical Reasoning 37

Adam & Eve (109904)

Joseph Koerner

Stephen Greenblatt

2018 Fall (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

What is the power of a story? For several thousand years Adam and Eve were the protagonists in the central origin myth of the Jewish, Christian, and Muslim worlds. That myth was the arena for ethical reasoning about transgression and innocence, sexuality, gender roles, labor, suffering, and death. Jointly taught by History of Art and Architecture and English, our course focuses on this enigmatic story and its spectacular elaborations in theology, philosophy, literature and art. Above all, looking closely at some of the greatest achievements of European art and literature--from Dürer, Michelangelo and Rembrandt to Milton's Paradise Lost--we will compare the possibilities of the verbal and visual arts in portraying human existence.

Ethical Reasoning 39

Money, Markets, and Morals (156035)

Michael Sandel

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 212

What should be the role of money and markets in our society? Are there some things that money should

not be able to buy? For example: Should people be permitted to buy sex, votes, babies, citizenship, or college admission? What about buying and selling the right to pollute, procreate, immigrate, discriminate, or to hunt endangered species? Should we use markets to allocate health care, education, and military service?

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to the Study Card and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Ethical Reasoning 41

Economic Justice (159809)

Mathias Risse

2019 Spring (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Capitalism organizes society around individual pursuits of material gain. Capitalism seems to have won the great ideological struggle with other ways of organizing society. But there is much discontent: the Occupy Movement made clear that even Americans now care about excessive inequality, and many worry about the future in an increasingly economically divided society where access to technology richly rewards some to the exclusion of many others. Capitalism is also closely associated with what is arguably the biggest policy problem of the 21st century: climate change. So how can we justify capitalism? And what are feasible alternative ways of organizing society?

Sex and Ethical Reasoning (161179)

Mark Jordan

2019 Spring (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 180

"Immorality" once meant sexual misconduct, especially by women. Now many people are unclear whether ethics can say anything convincing about sex at all. Such rapid change in ethical views makes sex a very good place to think about how ethical reasoning develops and how it might matter to our lives. We will study the historical shifts and current ranges of some American controversies about sex, including sexual identity, rape or assault, adultery or polyamory, prostitution, pornography, and online sex. You will then be encouraged to use these cases to clarify and critique your own sexual ethics.

Ethical Reasoning 44

What is a Republic? (120049)

Daniel Carpenter

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A theoretical and historical survey of the evolution of republican (representative) government, with a particular focus upon European and American institutions. We will alternate between philosophical treatments and empirical studies of republican regimes. Questions include: How did republican government evolve (in England and France) centuries before mass elections? What institutions besides elections keep the ruled attuned to the people? Did arguments for legislative supremacy prefigure the rise of parliamentary authority? If so, how? How did modern republics co-evolve with institutions of slavery? What is the role of virtue in a democratic republic? How can government ensure the "rule of the wise" without fostering autocratic power? What critique might republican theory advance of populist and libertarian arrangements, and how populist and libertarian critics respond?

Ethical Reasoning 45

Brains, Identity, and Moral Agency (109360)

Steven Hyman

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

105

Human beings have the experience of selfhood, of possessing a stable identity, and of agency—the capacity to act for freely chosen reasons. Humans automatically attribute selfhood and intentionality to others and have built concepts of moral agency and legal culpability upon these seemingly ineluctable intuitions. However, observations from neuroscience have long called the truth of these intuitions into question. Debates about selfhood, identity, and agency may have seemed abstract in the past, but new neurotechnologies have made such discussions pressing. Powerful new technologies treat the human brain as a machine to be interrogated, repaired, or enhanced. They have provided new insights into human conditions that affect thinking, emotion, and action. They permit increasingly precise recording of human brain activity and the ability to decode it, facilitating a rudimentary form of 'mind reading'. Other technologies make it possible to directly connect human brains to computers and machines and to intervene directly in the brain to alter people's memories, personalities, and goals. This course will use scientific and technological examples that are matters of current ethical and policy debate to question basic assumptions that underlie human self-understanding and to prepare students to be informed participants in discussions of appropriate uses and ethical limits on rapidly advancing neurotechnologies.

Course Notes: For students who have taken MCB 80, it is contemplated that there will be a section that incorporates more advanced concepts from neurobiology.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Recommended Prep: LPS A or LS 1a, a 4 or 5 on the AP Biology exam, or equivalent experience in biology

Ethical Reasoning 46

Evolving Morality: From Primordial Soup to Superintelligent Machines (203129)

Joshua Greene

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

246

This course examines the evolution of morality on Earth, from its origins in the biology of unthinking cooperative organisms, through the psychology of intelligent cooperative primates, and into a future inhabited by machines that may be more intelligent and better organized than humans. We begin with foundational scientific questions: What is morality? Where does it come from, and what does it do? How is it implemented in our brains? We then apply our scientific understanding of morality to foundational moral and political questions: How should human societies be organized? How should we resolve the moral questions that divide us? Finally, we consider the distinctive moral challenges posed by increasingly powerful artificial intelligence. Can machines (such as self-driving cars and military "drones") be programmed to behave morally? Will artificial intelligence displace human labor? If so, how can we adapt? Could machines displace humans entirely? If so, how can we stay in control? If machines do take over, will

they be our conquerors or our children?

Course Notes: Not open to students who have taken PSY 2250. Prior to Spring 2019, this course was offered as PSY 1002.

Class Notes: If student interest exceeds the course limit, a random lottery will be conducted. To enter the lottery, you must add the course to your Crimson Cart and explicitly request enrollment permission when prompted. Instructor permission will be granted to only those admitted by the lottery; all students will be notified of their results. See the course website for more details.

Empirical & Math Reasoning 17

Logical Reasoning (112199)

Mark Richard

2018 Fall (4 Credits)

Schedule: MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

The concepts and principles of symbolic logic: valid and invalid arguments, logical relations of statements and their basis in structural features of those statements, the analysis of complex statements of ordinary discourse to uncover their structure, the use of a symbolic language to display logical structure and to facilitate methods for assessing arguments. Analysis of reasoning with truth-functions ("and", "or", "not", "if...then") and with quantifiers ("all", "some"). Special attention will be given to the norms underlying valid reasoning, to applications of formal techniques to "arguments in the wild", and to the wide variety of non-logical ways that ordinary discourse can succeed at being (illicitly) persuasive.

Class Notes: For details about the Friday quizzes, please check the syllabus on the course website.

Why is There No Cure for Health Care? (125932)

David Cutler

2018 Fall (4 Credits)

Schedule:

MWF 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Around the world, billions of dollars are spent on health care treatments, public health initiatives, and pharmaceutical research and development. So why are we still not able to prevent preventable diseases, provide affordable healthcare for millions of people, and deliver cures for curable diseases? And what are the best ways to address these issues?

Because these questions are so large, we will focus our discussion around questions like: What steps should be taken to end HIV/AIDS? How should the United States reform its health care system? And how should prescription drugs be produced and sold?

We will explore how social scientists address empirical questions, the types of data that are available, how those data are analyzed, and the confidence with which causal statements are made. By the end of the course, you will be able to dissect a large question—such as how to reform American healthcare—into its technological, social, economic, and moral components, and weigh potential solutions according to these guiding vectors.

Germany and Europe: Heimat, Exile, Return (160494)

Nadine Schwakopf

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course discusses 20th and 21st Century German culture and poetics in dialogue and dispute with its European neighbors. Particular emphasis will be put on the effect of history on contemporary political, cultural and historical issues. How did the rest of Europe react to the German unification? How does Germany relate to its „Gastarbeiter" today? This course is designed to provide students with the ability to gain insights into how personal and collective identity is constructed and problematized through art and culture. In this interdisciplinary course we will work with a variety of written genre (poetry, short stories, plays, essays, journalistic non-fiction), as well as visual art, architecture, and film. We will take a cultural studies approach to understanding how to read effectively and interpret textual and visual materials. Conducted in German.

Nadine Schwakopf

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course examines the major social-political trends and tensions that have informed literature and culture in the German-speaking countries. Students will develop the language skills to discuss, analyze, and interpret a variety of texts and cultural phenomena from the 18th to the 21st centuries, with special

attention to social theory and political critique. Our readings and discussions are organized around pairs of thinkers who address the same issues from a different time, place, angle, or genre. Further emphasis is placed on the history of ideas and how it contributes to current issues and debates. Paired readings may include Kant and Kleist, Freud and Kafka, Benjamin and Brecht, Böll and Celan, Seghers and Wolf.

Course Notes: Readings and discussion in German.

German Literature, Art, and Thought (159710)

Nicole Suetterlin

2019 Spring (4 Credits)

Schedule: WF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course explores the major trends and tensions that have informed German literature, art and thought from the 18th to the 21st centuries. In addition to developing the language skills to discuss, analyze and interpret literature, students will explore the rich cultural tradition in the German-speaking countries and its continued relevance for the world.

Topics include: Enlightenment; Dark Romanticism or the German Gothic; decadence; media revolution 1900; Third Reich; GDR surveillance; Cold War; German reunification; remembering the Holocaust/ memory politics; rise of right-wing populism (AfD); ecological revolution. Figures include: Lessing, Goethe, Schiller, Wagner, Nietzsche, Freud, Einstein, Brecht, Celan, Dürrenmatt, Wolf, Draesner, Horn.

Note: Readings and discussions in German.

German 139. Understanding Wagner's Ring (207644)

Alexander Rehding

2018 Fall (4 Credits)

Schedule:

M 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course brings together Wagner's music and the political philosophy that informs it. Wagner's monumental tetralogy *Der Ring des Nibelungen* (1876), a complex allegory of power and redemption, has long been recognized as an intensely political work, whose stagings often focus on the politics articulated in the opera, whether it is socialism, totalitarianism, or environmental destruction. (Musical literacy is helpful but not required.)

Course Notes: This course is equivalent to Music 193r. Credit may be earned for German 139 or Music 193r, but not both.

Class Notes: This course meets 12 - 2 p.m.

Shaping National Identity: Cultural Trauma in Germany and the U.S. (207646)

Nicole Suetterlin

2019 Spring (4 Credits)

Schedule:

F 0945 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Explores how the catastrophic events of World War II, persecution, and segregation have shaped the identity of present-day Germany and the U.S., respectively. The course focuses on the so-called "ethical turn in memory culture," a recent global shift in remembrance strategies that initiated an unprecedented emphasis on commemorating the victims rather than the heroes of war, violence, and injustice. Post-1989 Germany proved a leader in this shift, though its controversial "memory politics" (Erinnerungspolitik) has faced increasing criticism from right-wing movements in recent years. Do we find a similar dynamic in the way the U.S. addresses its own traumatic past? What are the strategies by which a cultural identity has been reconstituted in post-Holocaust Germany and in post-segregation America? What challenges lie still ahead of us in this ongoing process of reconstitution and reconciliation? The goal of this course is to examine how the new memory ethics actively shapes the way in which Germans and Americans construct their identity today. To this end we investigate discussions of the Holocaust, slavery and segregation in German and American literature, film, art, journalism, and philosophy. Reading materials include Christa Wolf, Günter Grass, W.G. Sebald, James Baldwin, Toni Morrison, Hannah Arendt, Judith Butler, Bryan Stevenson.

Course Notes:

Readings and discussions in English. Original German texts available upon request. Open to Graduate Students with permission of instructor.

German 262 Section: 1

Adorno's Aesthetic Theory: Seminar (207527)

Peter Gordon

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

This graduate-level interdisciplinary seminar will address the philosophical, historical, sociological, and aesthetic questions raised by the Frankfurt School social theorist and philosopher Theodor W. Adorno in his posthumously-published masterpiece *Aesthetic Theory* (1970). Our chief task will be to come to a better understanding of this notoriously difficult work by examining its place in past and present debates over the relationship between art and society. Topics include: the possibility of poetry after Auschwitz, the debate with Walter Benjamin over the status of the "aura", the problem of artistic political engagement, and the dialectic between the culture-industry and "autonomous art."

Course Notes: This course is equivalent to German 262. Credit may be earned for History 2326 or German 262, but not both.

Subject: Scandinavian

Scandinavian 55 Section: 1

One Hundred Years of Scandinavian Cinema (159715)

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0115 PM

M 1200 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course explores Scandinavian cinema from the pioneers of the silent era to the globally successful hit films of the present day. Students will trace the development of Scandinavian cinema through the films of directors such as Viktor Sjöström, Carl Th. Dreyer, Lars von Trier, Ingmar Bergman and Lukas Moodysson and discover the profound influence the region's films have had, and continue to have, on filmmaking in America and the world.

Course Notes: Conducted in English.**Class Notes:** Class meets M 12:00-2:45 pm and W 12:00-1:15 pm.**Additional Course Attributes:**

Attribute	Value(s)

Swedish 20A

Intermediate Swedish: Childhood in Swedish Literature and Culture (112472)

Agnes Broome

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Sweden and Swedish Finland have produced some of the most translated and beloved works of children's fiction in the world. In this intermediate Swedish language course, we will review the essentials of Swedish grammar and vocabulary as we explore some of these classic works of children's fiction, film, and comic books and the aspects of Swedish culture they illuminate. The final project for this class involves producing your own work of children's fiction or film.

Course Notes: Conducted in Swedish. Not open to auditors.

Prerequisite: Swedish Ab or equivalent.

Recommended Prep: Swedish Ab or equivalent.

The Heroic Epic in Northern Europe (207651)

Stephen Mitchell

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** 12

Examines the principal heroic monuments of northern Europe, including Beowulf, Waltharius, The Lay of Hildebrand, The Lay of the Nibelungs, The Saga of the Volsungs, and the Sigurd poetry of the Poetic edda, and their interpretations. Considers the relationship of epic poetry to tradition, orality, and writing, to populations, to proto-nationalism, to cultural institutions, to the Otherworld, and to the shaping of an heroic ideal.

Course Notes: Enrollment limited to 12. Preference given to students in GLL and Folklore & Mythology.

The Quality of Health Care in America (114957)

Ashish Jha

Anupam Jena

2019 Spring (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap:

62

Offers information and experiences regarding most important issues and challenges in health care quality. Overview of the dimensions of quality of care, including outcomes, overuse, underuse, variation in practice patterns, errors and threats to patient safety, service flaws, and forms of waste. Each session focuses on one specific issue, exploring patterns of performance, data sources, costs, causes, and remedies. Explores desirable properties of health care systems that perform at high levels in many dimensions of quality.

Course Notes: Lotteried course, enrollment limited to 62.

Negotiation and Conflict Management: From the Interpersonal to the International (107669)

Daniel Shapiro

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

42

How can you best negotiate conflict in your own life? How should policymakers negotiate global conflict? Around the world, conflict imposes profound direct and indirect costs on global health and individual well-being, ranging from death and injury to trauma, loss of social networks, and destabilization of political systems. Rather than focusing on how to address the aftermath of conflict and violence, this course examines theory and practical methods to prevent destructive conflict. We explore conceptual frameworks from which to negotiate its substantive, emotional, and identity-based dimensions, and students apply these methods to real-life dilemmas, ranging from interpersonal disputes between friends to international conflict in the Middle East and elsewhere. This highly interactive course aims to improve students' understanding of conflict and their skill in resolving it, drawing on a variety of learning methodologies including interactive lectures, case simulations, analysis of real-life conflicts, and self-reflection exercises.

Course Notes: Lotteried course, enrollment limited to 42.

Global Response to Disasters and Refugee Crises (161268)

Stephanie Kayden

Michael VanRooyen

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Climate change, urbanization, and conflict mean that global disasters are on the rise. How should the world respond when disasters force people from their homes? How can we better help the world's refugees? This course examines the past, present, and future of the international humanitarian response system. We will explore how Doctors Without Borders, the United Nations, the Red Cross, and other aid agencies came to be and how global response standards, international humanitarian law, and new technologies are shaping worldwide disaster relief.

Through interactive discussions and case studies, students will learn how aid workers interact with governments, militaries, and civil society to provide refugee aid. At the end of the course, students can choose to live the refugee experience during a large-scale, weekend outdoor simulated humanitarian response training program together with other students and professional aid workers from around the world.

Course Notes: Lotteried course, enrollment limited to 30.

Research in Global Health and Health Policy (123102)

David Cutler

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Global health and health policy are interdisciplinary fields that apply the theories and methods of statistics, sociology, political science, economics, management, decision science, and philosophy to the study of population health and health care. Research from these fields influences policymaking in a variety of settings. For example, the Patient Protection and Affordable Care Act (ACA) drew upon health policy research to develop programs for improving access and quality of care in the United States. Similarly, global health research guides international institutions, such as the World Health Organization, in determining health guidelines for all countries. Global health and health policy research can also inform practices inside hospitals, initiate programs for diseases like HIV, and regulate the food and drug industries. This course introduces the fundamentals of research design and methods in global health and health policy and assists students in developing research projects and crafting policy recommendations that can impact health care systems and public health.

Course Notes:

This course fulfills the research requirement of the Secondary Field in Global Health and Health Policy and enrollment is ordinarily limited to seniors in the GHHP Secondary Field. Underclass GHHP students may petition to take the course if all other Secondary Field requirements have been met. Course is primarily taught by graduate students in the PhD in Health Policy program and guest lecturers. May not be taken pass/fail.

Foundations of Political Theory (124414)

Eric Beerbohm

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course investigates the central problems of political theory that concern the justification of democracy. Is democratic rule the uniquely just form of collective decision-making? What political institutions best express the democratic values of equality, deliberation, and participation? What are the moral responsibilities of citizens - whose representatives exercise political power in their name? Is democracy a human right? Readings integrate contemporary work in political philosophy with canonical thinkers, including Plato, Aristotle, Rousseau, and J.S. Mill.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Ethical Reasoning.

International Conflict and Cooperation (126258)

Robert Chaudoin

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

60

This course is an introduction to the analysis of the causes and character of international conflict and cooperation. The course begins with a foundational review of the different levels at which states interact

and the primary theoretical paradigms in the field. It then addresses how states achieve cooperation in the face of international anarchy. The course next addresses basic bargaining theory, which uses insights from economics to explore how bargaining breakdowns, commitment problems, and incomplete information can lead to war. Thereafter we examine three popular topics in contemporary international relations research: the roles that psychology, leaders, and domestic politics play in explaining international conflict and cooperation. We will also look at international organizations/law, terrorism, trade, foreign aid, international development, and climate change.

Course Notes: This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Jon Rogowski

2019 Spring (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course focuses on the application of quantitative methods to the study of political phenomena. It is appropriate for students interested in quantitative approaches to political research, and is especially relevant for students who wish to conduct quantitative research for senior theses. We will discuss the formulation of research questions, fundamental principles of research design, and the practical application of quantitative methods for questions in all fields of political science. The course will culminate with students preparing an original research prospectus that applies the methods and tools discussed in the course and provides the foundation for senior thesis research.

Recommended Prep: Gov 50 or equivalent.

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This practicum is a capstone to the Technology Science Program, designed to give students the opportunity to conduct original research and write a publication-ready research paper. In consultation with the instructor, students select a concrete technology-society conflict to address, produce autonomous research to analyze it, and provide a set of actionable recommendations or produce appropriate technology to solve it. Throughout the semester, students receive feedback both from their peers and the instructor to aid the development of their projects. Class meetings include the development of writing schedules, discussions focused on framing, analysis, methodology, and peer-review of student projects. Emphasis is placed on issue spotting, academic story-telling and research framing for maximum impact. The course culminates with a formal presentation of the students' projects and papers.

New European democracies: the Spanish democratic revolution in a comparative perspective (156725)

Jose Martinez sierra

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

This seminar aims to develop an in-depth understanding of modern Democracy's discontent through the Spanish case study in a comparative perspective. We will scrutinize the rise of social movements and new political parties and leaders (Trump, Sanders, Ocasio-Cortez, Salvini or Pablo Iglesias) and new ways of political communication, and how traditional parties and are reacting to the challenges these new actors pose for them.

To understand this process, we will analyze the different factors that have led the system to a crisis of

legitimacy: inequality, political and institutional corruption, austerity, territorial tensions and the role of international institutions including the European Union.

In 40 years, Spain has gone from being an exemplary model of transition to democracy to an example of radical sociopolitical change driven by disaffection with political and economic elites. Disenchantment has led to political reaction and counter-reaction which resulted in the rise of three new political parties at the national level: first Podemos and Ciudadanos and now Vox. The first two have entered government in the biggest cities (Barcelona, Madrid and Valencia) and have considerable influence at the regional level. Vox, a far-right political party, is now an influential player in the Andalusian government after obtaining 11% of votes in the Andalusian parliament elections and with polls signaling that they are on the rise at the national level.

Are we facing the European version of the Trump phenomenon in which radicality on one extreme only generates a radical response at the other end? Can citizens really change the establishment agendas or, on the contrary, can the elites still manage to implement the Lampedusa's dictum: "everything must change so that everything can remain the same"?

Course Notes: This course will be conducted in Spanish.

The Politics and Ethics of Medical Care (109731)

Gabriel Katsh

2019 Spring (4 Credits)

Schedule: R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

This course is an introduction to medical ethics and the ways in which political theory can inform our understanding of the moral and political dimensions of medical care. Using case studies as a launching point, we will explore ideas about autonomy, paternalism, beneficence, and distributive justice, and their application to issues such as informed consent, euthanasia, the right to refuse care, the distribution of scarce resources, and conflicts between patient rights and the public good.

Politics of Climate Change (207733)

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

This course will explore the political problems involved in mitigating and adapting to global climate change. We will draw on both the empirical and normative political literatures, as well as climate science and economics, to approach key questions about climate politics. What do we owe to the future and to people elsewhere? What are the costs of different policy options, and how should they be distributed? How have different governments responded, and what factors shape their responses? What role do international treaties, social movements, and public opinion play? And what can or should be done to change our current trajectory?

Transitional Justice and the Politics of Truth Commissions (207734)

Gloria Ayee

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Scholars, policymakers, and political leaders have long debated appropriate responses to severe human rights violations that occur during periods of periods of civil conflict, war, and genocide. This course introduces students to interdisciplinary studies in transitional justice and post-conflict reconciliation by focusing on the work of truth and reconciliation commissions. Students will examine key concepts and theoretical perspectives that are central to the field of transitional justice. Drawing on cases such as South Africa, Chile, Peru, and Canada, the course will critically examine how truth commissions are used to provide accountability for human rights abuses carried out by the state.

Instructor Permissions: Instructor

Enrollment Cap:

16

International migration patterns have shaped and reshaped individual and collective identities throughout history and across the world. In the present time of globalization, these dynamics have posed particular political and social challenges in Western European democracies.

Immigration, important part of the national history in the United States, is, in the European context the result of the reconstruction of the economy after WWII and of the decolonization of the 1960s. Today with the settlement of economic and postcolonial migrants the question is raised in terms of integration and national unity, sovereignty and identity.

Inequality and American Democracy (125211)

Theda Skocpol

2019 Spring (4 Credits)

Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 16

The "rights revolutions" of the 1960s and 1970s removed barriers to full citizenship for African Americans, women, and other formerly marginalized groups. But inequalities of wealth and income have grown since the 1970s. How do changing social and economic inequalities influence American democracy? This seminar explores empirical research and normative debates about political participation, about government responsiveness to citizen preferences, and about the impact of public policies on social opportunity and citizen participation.

Corruption in Latin America (208266)

Viridiana Rios

2019 Spring (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

The peculiar and enigmatic relationship between corruption and politics is poorly understood and commonly distorted by ideological rhetoric. We generally imagine wealthy elites in poor countries easily breaking weak laws to increase their wealth. Yet Latin America is the only region of the world where empirical evidence has revealed a counterintuitive phenomenon where corruption tends not to increase income inequality, but rather to reduce it. This seminar explores the many unusual paradoxes of corruption in Latin America, and its effect on economic and social variables. Our aim is to understand when and how corruption thrives, and how to properly combat it.

Statistical models help us to understand the world. This class explores the use of models for analysis in the social sciences broadly, and in political science specifically. Do get-out-the-vote calls affect turnout? Does a history of slavery in a county influence contemporary political views? Does demographic change impact policy preferences? We use the R programming language, RStudio, and GitHub. Each student will complete a "replication" as their final project, an attempt, successful or not, to replicate the results from a published article in the academic literature. This class is especially designed to lay the groundwork for an empirical senior thesis.

Recommended Prep: Gov 1005 and statistics at the level of Gov 50, or permission of the instructor.

Educational Justice (204038)

Meira Levinson

2019 Spring (4 Credits) **Schedule:** TR 1000 AM - 1159 AM

Instructor Permissions: Instructor **Enrollment Cap:** 40

Educators and educational policy makers regularly face challenging ethical decisions. For example, what should be done about a student with diagnosed emotional issues who frequently disrupts class, but who benefits from being mainstreamed? Should teachers resist grade inflation even if it helps their students in

the college and labor market? Is it just to expand a charter school that achieves outstanding academic outcomes at the cost of high attrition rates? When school closure or teacher evaluation policies disproportionately impact low-income communities of color, is that in itself evidence of an injustice that must be addressed? These kinds of questions are often addressed as technocratic challenges of leadership, legal compliance, or accountability. This course, by contrast, addresses the ethical dimensions of educational practice and policy, with justice as our primary focus. We will engage with philosophical, theoretical, and empirical readings from a wide variety of disciplines. We will also grapple with case studies of dilemmas of educational justice from classrooms, schools, districts, and organizations in the United States and abroad. Our goals will be to deepen our own understandings of educational justice, to engage with others about complex ethical judgments across multiple lines of difference, and to learn how to enhance educators' and policymakers' capacities to make ethical decisions under challenging conditions.

Dissent and Disobedience in Democracies (207954)

Arthur Applbaum

2019 Spring (4 Credits)

Schedule: MW 0245 PM - 0400 PM

Instructor Permissions: Instructor

Enrollment Cap: 36

Recent political upheavals in several of the world's established democracies have sparked discussions about dissent and disobedience not seen since the 1960s. When, if ever, are citizens in a democracy justified in breaking the law to protest or resist what they believe to be bad, unjust, or illegitimate laws or policies? When, if ever, are public officials in a democracy justified in undermining or refusing to enforce such laws or policies? This course will study important examples of principled disobedience in democracies, and explore normative arguments for and against various strategies of unlawful dissent through the close reading of texts in political and legal philosophy. In the major written assignment of the course, students will argue for or against a proposed, ongoing, or recent case of principled disobedience by public officials or citizens in a democratic state.

Course Notes: Offered jointly with HKS as DPI-218.

Class Notes: This class will meet on the Harvard Kennedy School campus in Wexner Building, room 332.

Topics in Music from 1800 to the Present: Proseminar (208334)

Eric Nelson

Alexander Rehding

2018 Fall (4 Credits)

Schedule: M 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

Understanding Wagner's Ring. This seminar brings together Wagner's music and the political philosophy that informs it. The Ring of the Nibelung (1876), that monumental work of four massive operas (or "music dramas," as Wagner preferred calling them), sums up the ambitions of the European nineteenth century. This complex allegory of power and redemption has long been recognized as an intensely political and philosophical work; modern stagings often focus on the politics articulated in the opera, whether it is socialism, totalitarianism, or environmental destruction. Our seminar will focus on various nineteenth-century intellectual contexts.

History and Freedom in German Idealism (123540)

Michael Rosen

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The high period of German Idealism -- from 1781, the year of the publication of Kant's Critique of Pure Reason, to the death of Hegel in 1831 -- was one of the great revolutionary epochs in the history of philosophy. We shall study the thought of the period using the central notions of history and freedom as our guide. Our modern conceptions of the self and society were shaped by the ideas about history and human agency that emerged at that time. We conclude by looking at how Marx's critique of capitalism and his vision of communism emerged from his reworking of the ideas of history and freedom that he inherited from the Idealist tradition.

An exploration of the past and future agenda of progressives, whether self-described as liberals or as leftists. What should they propose, now that they no longer believe in the usefulness of governmental direction of the economy or in the sufficiency of redistributive social programs? A basic concern is the relation of programmatic thought to the understanding of change and constraint.

In the recent historical period, progressives have sought to humanize the established order rather than to reimagine and remake it. Here the main focus is on institutional or structural change in the market system and in democratic politics. Among the themes to be discussed are the nature and future of the knowledge economy, the status of free labor vis-à-vis capital, the relation of finance to production, the making of a high-energy democracy that no longer needs crisis to make change possible, and the education required by such economic and political alternatives. A central theme throughout is the content and implications of the idea of freedom.

The course will draw on many disciplines and consider examples from many settings. It will try to develop ways of thinking as well as proposals for change.

Class Notes:

Mexico's history bears a unique combination of characteristics: it experienced a prolonged violent revolutionary war, constructed one of world's longest lasting authoritarian regimes, and yet consolidated a democratic political system. This course will explore Mexico's idiosyncratic political identity and the distinctive challenges that come with it. We will examine the spiraling problem of drug-related violence, the role of the North American Free Trade Agreement (NAFTA) in widening inequalities, and how crony capitalism has survived the consolidation of a democratic Mexico. Our goal is to discover the country in all its complexities, debunking the cartoonish stereotypes of one of the US's most important allies.

In the turbulent times of difficult EU-US relations, Brexit, and rising nationalism in Europe, this module analyzes the impressive extent of EU presence in the developing world. It first introduces theories, concepts and decision-making processes related to EU foreign policy (by both Member States and EU institutions). In particular, we analyze the processes within the European Communities, and the CFSP (Common Foreign and Security Policies) / CSDP (Common Security and Defense Policies) frameworks. The module then critically assesses security and economic policies towards the developing world. Themes to explain the nature of contemporary EU foreign policies include: European integration (intergovernmentalism and supranationalism, neoliberalism and ethical foreign policy); diplomacy; post-colonialism; military and civilian means for conflict-management; trade and aid; and also policies on migration, asylum and human trafficking. We focus on current policies towards unstable areas in Africa, the Middle East, and Asia.

Course Notes: Offered jointly with the Kennedy School as IGA-662.

Class Notes: Class Notes: Shopping Day (two sessions) will take place at HKS on Friday, January 25, 2019, 10:15 a.m. – 10:45 a.m. and 11:00 a.m. – 11:30 a.m., in the same room as the class (Belfer Bldg., Rm. L -1 Weil Town Hall). Interested students may attend either one of the sessions.

Shi'a Islam and Politics (211396)

Payam Mohseni

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course provides a survey of the field of Shi'a Islam and politics. It complicates dominant narratives and conventional understandings of sectarianism, Shi'a Islam, and geo-political conflict in the Middle East by differentiating between distinct yet overlapping factors such as state competition (i.e. between Iran and Saudi Arabia), historical legacies of empire and state building in the Middle East, and actual substantive theological and intellectual differences between Shi'a and Sunni Islam. It looks at the origins of Shi'a Islam and who the Shi'a are today including their diverse ethnic, geographic, cultural, and political backgrounds. The course largely focuses on modern political movements and developments in Shi'a political thought from the post-colonial period onwards including a survey of the Shi'a clergy and clerical institutions and networks, mass pilgrimage practices and sociological changes in the Shi'a world, Iran's Islamic revolution, the transnational politics of Shi'a political parties and armed movements, such as the Lebanese Hezbollah, Iraq's Popular Mobilization Forces (Hashd al-Sha'abi), and Yemen's Ansarallah (the Houthis). The course will also cover the Islamic Revolutionary Guards (IRGC) and the "Axis of Resistance" that has Iran, Syria, Hezbollah, and other partners facing off with the United States and its allies in the region.

Recommended Prep: Introductory course on Islam or the Middle East recommended but not required.

***Race, Film, and American Politics* is a course that examines the multifaceted ways in which racial and ethnic identity has been represented in American film. Drawing on political science, sociology, anthropology, and film and media studies, we will assess the ways in which the mainstream media in the United States — focusing primarily on the Hollywood film industry — has portrayed different population groups and shaped our understanding of what it means to be American. The course will address issues of social stratification, and consider the intersection of identity and politics by analyzing historical shifts in cinematic representation in the United States.**

Schedule: MW 0900 AM - 1015 AM**Instructor Permissions:** None**Enrollment Cap:** n/a

Elections are the foundation of American democracy. This course focuses on the simple questions: Who wins elections and why? Answers to these questions guide the interpretation of elections and evaluation of how well government represents the public preferences. The first half of the course presents the basic explanations and models of elections and voting behavior, and asks students to make their best forecast of the election. The second half of the course will examine why the models worked or didn't work. Students will learn how to interpret and analyze surveys and other data, to estimate models and make forecasts, and test arguments and models using predictions.

This course surveys the politics of the American presidency in a system where power is distributed across branches of government. From this institutional perspective, the course uses historical and contemporary examples to engage the following questions: What is presidential power and what are its implications for American democracy? When do presidents succeed — and why do they fail? How do presidents manage relations with Congress, the courts, the bureaucracy, and the public? How do presidents make decisions about war and peace? Through answering these questions, the course illuminates the factors that shape the behavior of the world's most powerful political leader.

The Politics of Terrorism: Causes and Consequences from a Global Perspective (212602)

Erica Chenoweth

2019 Spring (4 Credits)

Schedule:

MW 0115 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap:

50

Terrorism dominates the headlines, but few observers attempt to think critically about the origins, evolution, and variable impacts of terror groups over the course of history. Alongside many enduring myths and misperceptions about terrorism, the history of this violent technique is rife with puzzles. Why is it so difficult for people to agree on a common definition of terrorism across the globe? Why do groups take up arms against civilians to effect political change? Why do some groups remain fairly restrained in their use of violence while others routinely engage in mass atrocities? Why do some terror groups end within a year of their emergence, whereas others toil along for decades? What are the most effective ways to combat terrorism? What is really "new" about the "new terrorism"? The course takes a theoretical and historical approach, attempting to nest contemporary challenges within the broader global context of terrorism as a phenomenon. To this end, the course will acquaint students with the historical evolution of domestic and international terrorism while introducing them to the major analytical approaches to the study of terrorism. The five primary goals of the course are for students to: (1) present leading theories, approaches, and concepts for understanding terrorist behavior around the globe; (2) evaluate current approaches to terrorism against prevailing evidence; (3) apply cumulative knowledge to current policy problems and make informed inferences about future developments; (4) deepen their knowledge about particular cases or topics regarding terrorism and counterterrorism; and (5) synthesize their knowledge during in-depth course discussions and several written assignments. By the end of the course, students should understand the fundamental analytical and policy debates surrounding terrorism globally, as well as several policy alternatives that may lead to solutions. Students should also develop substantive knowledge about current trends in terrorism and counterterrorism. By the end of the term, students should be comfortable taking an intellectual stand about topics related to terrorism, defending their positions with evidence, engaging in self-critique, deriving actionable policy recommendations, and communicating those recommendations to both specialist and non-specialist audiences—particularly when the empirical record contrasts with the conventional wisdom. Course assignments are designed to enhance those skills.

2018 Fall (4 Credits)

Schedule:

M 0415 PM - 0700 PM

Instructor Permissions: Instructor

Enrollment Cap:

23

Using a series of case studies from the front page, and from the most urgent issues on the U.S. national security agenda, this course will engage students in grappling with the hardest American national security challenges of the decade ahead. Issues range from the Arab Awakening and intervention in civil wars to combating Iran's nuclear ambitions and dealing with the economic and military rise of China. Assignments require strategic thinking: analyzing dynamics of issues and developing strategies in a government whose deliberations are discombobulated by leaks, reports about internal differences among policymakers, and press analyses. Students will learn to devise strategies and write strategic options memos as participants in the policymaking process. Strategic options memos combine careful analysis and strategic imagination, on the one hand, with the necessity to communicate to major constituencies in order to sustain public support, on the other. A subtheme of the course explores coping with a world where a pervasive press makes secrecy more often the exception than the rule. In each case, there will be exploration of how media coverage affects decision making, with an examination of WikiLeaks, the revelations about drones and secret, American-led cyberattacks, and other examples of the publication of classified information. Because of time constraints, Mr. Sanger will be joining a limited number of class sessions, and will join some remotely.

Course Notes: Offered jointly with the Kennedy School as IGA-211.

Causal Inference (111530)

Kosuke Imai

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Substantive questions in empirical scientific and policy research are often causal. Does voter outreach increase turnout? Are job training programs effective? Can a universal health insurance program improve people's health? This class will introduce students to both statistical theory and practice of causal inference. As theoretical frameworks, we will discuss potential outcomes, causal graphs, randomization and model-based inference, sensitivity analysis, and partial identification. We will also cover various methodological tools including randomized experiments, regression discontinuity designs, matching, regression, instrumental variables, difference-in-differences, and dynamic causal models. The course will draw upon examples from political science, economics, education, public health, and other disciplines.

Class Notes: Jointly offered with Statistics as Stat 186

Recommended Prep: (1) Stat 110 AND Stat 111 or (2) Gov 2000 AND Gov 2001.

Research Design in Political Science: Qualitative and Mixed Methods (207717)

Frances Hagopian

Melani Cammett

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0515 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course introduces students to multi-method research design and the basic principles and tools of qualitative research in the social sciences. Topics examined include the logic of causal inference, measurement and conceptualization, choosing cases, natural experiments, the potential uses of mixed methods, and research ethics. Research techniques covered are process tracing, archival research, interviews, and ethnography. Students will also have the opportunity to workshop their early-stage research. The application of multi-methods research designs is emphasized throughout the course

Class Notes:

Note: this course will meet in CGIS S-250 on February 6, February 13, February 20, February 27, March 6, March 27, April 3, April 10, and May 1. All other meetings will be held in 61 Kirkland St, Room 202.

Liberalism and Theodicy (125905)

Eric Nelson

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course will investigate the theological origins of what we have come to call "liberal" political philosophy. In particular, it will explore the degree to which central liberal commitments—to the freedom of the will, religious toleration, and political liberty—emerged as responses to the problem of "theodicy" (the challenge of vindicating God's justice, given the manifold evils present in the world). Throughout, we will be seeking to understand the fraught relationship between contemporary egalitarianism and the early-modern liberal tradition. Readings will include Grotius, Milton, Locke, Leibniz, Rousseau, Kant, Rawls, Dworkin, and Cohen.

Enrollment Cap:

n/a

This graduate seminar centers on big questions related to why development occurs in some places or times and not others and adopts a broad understanding of development, focusing on both economic and social development. Topics include but are not limited to states and markets, the origins and effects of the "developmental state" and state capacity, regime type and development, the influence of historical legacies, the role of elites and citizens in driving development, welfare regime variation in developing countries, ethnoreligious diversity and development, the relationship between development and conflict, and the relationship between the scholarly study of development and development policy and practice. The course opens with foundational approaches and quickly moves into key contemporary debates, with readings that use a broad array of methods and approaches.

Pia Raffler

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

This graduate seminar provides an overview of the research frontier on governance in developing countries, including democracies, electoral autocracies, and authoritarian regimes. Topics include democratization and democratic erosion, voting behavior, clientelism, accountability, the bureaucracy, and the role of foreign aid. While including some foundational readings, the syllabus puts emphasis on recent work. Readings primarily draw from comparative politics, political economy, and development economics. In addition to theory and empirics, the course focusses on the nuts and bolts of implementing governance-related fieldwork in developing countries.

Democratic Transitions, Breakdowns, Stagnations, and Advances (156437)

Scott Mainwaring

2019 Spring (4 Credits)

Schedule:

F 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The first part of this course will examine the conditions that help make democracies and authoritarian regimes stable or that, conversely, give rise to democratic breakdowns and transitions to democracies. These questions have long been of central interest to social scientists, historians, and democracy advocates. And they sometimes have huge consequences for the world, as was tragically demonstrated by the aftermath of the breakdown of democracy in Germany in 1933.

The second half of the course will analyze patterns of democratic stagnation and deepening after transitions to democracy. In the wave of democratization that began in 1974, despite a large number of transitions to electoral democracy (well over 100 according to the Varieties of Democracy coding), few countries have been able to develop high-quality liberal democracies, with solid protection of citizen and opposition rights and solid mechanisms of accountability. What accounts for the success cases? Why have few countries been able to develop deeper quality democracies? Why so many stagnations and breakdowns?

International Organization (148283)

Christina Davis

2019 Spring (4 Credits)

Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

The number and scope of international organizations continues to expand so that there are few areas of international politics that are not regulated in some way by an international institution, whether informal norms or a formal organization. Why do states establish institutions and what determines their design and

evolution? Do these institutions merely reflect underlying power and interests? These are some of the questions we will be asking in this course. It is an advanced research seminar that will introduce theories of international institutions, evaluate critical perspectives, and examine applications in security, economic, and environmental policy areas.

This is a required course for Government PhD students who are teaching in the department for the first time (typically G3s). The course meeting five times in the fall semester. Between meetings, you will have the chance to apply what you learn through peer observation, having your section videotaped, and watching your section with the Departmental Teaching Fellow. The ultimate goal of this course is to help you to become a good teacher and an effective speaker.

Course Notes: Limited to and required of all first time teaching fellows in Government.

Asian Diasporas in Global History (207520)

Sunil Amrith

Michael Szonyi

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This undergraduate seminar will explore the role of Chinese and Indian diasporas in the making of the modern world. Focusing on the two regions where Chinese and Indian diasporas converged—Southeast Asia and North America—the course explores both the comparisons and the connections between these great migrations. The seminar will give students the opportunity to undertake primary research on Asian migration—in a group project focused on the history of Boston's Chinatown, and through individual research papers that students will develop over the course of the semester.

The Antebellum American Empire (207643)

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The United States became an empire shortly after its inception. In this course, we will investigate how the US used settler colonialism—the claiming and cultivation of land—to acquire more territory between 1800 and 1860. Driven by slavery's expansion, the United States used increasingly aggressive tactics in its imperial quest, including forcibly removing Indians and provoking war with Mexico. In a period often seen as the prelude to the Civil War, instead of viewing a nation turning in on itself, we will see an empire stretching to fill a continent—and faltering when its leaders disagreed on its fate.

Nazi Germany and the Holocaust (207696)

Brandon Bloch

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar analyzes the history of National Socialist Germany (1933-45), focusing on the Nazi regime's murder of nearly six million Jews as well as individuals targeted as Polish elites, Roma, homosexuals, disabled people, and political opponents. We engage with debates about the rise of the Nazi Party in Germany; the sources of Nazi antisemitism; the decision to annihilate European Jewry; the role of local populations in mass killings; the meanings of collaboration and resistance; and the relationship between statelessness and genocide. The overarching question is how patterns of racism and exclusion in everyday life relate to extreme violence in wartime.

Europe and its Others: From the Enlightenment to the European Union (207697)

Brandon Bloch

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What is Europe, and who counts as European? This course takes a long view on contemporary struggles to define Europe, by analyzing how Europeans since the Enlightenment have imagined their relationships to peoples considered to be at Europe's geographic or cultural margins. We

address Enlightenment ideas of humanity and cosmopolitanism, the rise of nineteenth-century orientalism and racial science, and twentieth-century challenges to European identities through genocide, decolonization, and immigration. Questions for debate include: Was Enlightenment universalism anti-Semitic? Did nationalism supersede Christian constructions of European identity? Was scientific racism a secular theology? Is the "Muslim Question" the new "Jewish Question"?

World War II Through Soviet Eyes (207746)

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What was life like for Soviet citizens who lived and died during World War II? This seminar will focus on major events and themes in the history of World War II in the Soviet Union (1941-1945) and the changing cultural interpretations of the history of the war from the 1940s to the present. We will explore the perspectives of women and men fighting on the front lines, living under Nazi occupation, and struggling on the home front. Each week will feature a major work of Soviet literature, film or architecture dedicated to World War II (in English translation).

Liberty and Slavery: The British Empire and the American Revolution (207652)

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines the American Revolution from a Trans-Atlantic, British imperial perspective and takes as its focus the complicated relationship between the twin political ideas of liberty and slavery. We will study the political and constitutional tension between colonial rights and imperial authority, the political economy of slavery in North America and the West Indies, and the growth of anti-slavery and abolition within the British Empire. Through this wider framework, students will explore how the Revolution was much more than just a conflict over taxation and why it was so important to people other than Boston's Sons of Liberty.

The History of Boston Through Its Built and Natural Environments (207837)

Zachary Nowak

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This class challenges students to examine the city around them and connect its social and economic history with its shoreline, glacial hills, city parks, and segregated neighborhoods. Our subject of study will be the city of Boston as well as the inhabitants and builders of the city's historical landscapes. We will see how the city's natural and built environments shaped its history, and how Bostonians of all walks of life made and remade the city—sometimes together, sometimes fighting bitterly. Assignments include a field journal, short essays, and a group wiki entry. There are two field trips, one a "toxic tour" of Dorchester.

American Food, A Global History: More Than Just a Meal (207838)

Zachary Nowak

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

***How can food let us "taste" the past?* This course uses food history to reveal the stories of Native Americans, women, enslaved people, factory workers, and other everyday people in the American past. By looking at what people in the United States ate from the twelfth century onward, we will uncover how historical actors other than just elite white men made America. The course is about contributions to American food culture but also about resistance. We will make extensive use of primary sources of all kinds, including objects.**

BINDING TIES: African North Americans and Citizenship, 1775 to the Present (207951)

Wendell Adjetey

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

From the Revolutionary War to the Emancipation Proclamation to the apex of the Black Power struggle, African descendants—whether in Canada, the Caribbean Basin, or the United States—crisscrossed borders in pursuit of liberty and citizenship. As transnational peoples with a diasporic outlook, African descendants engaged in military service, demanded enfranchisement, chased work, sustained families, and established cross-border communities. This course will introduce undergraduates to the multilayered black racial formation in North America. We will interrogate how race-making and border crossing in the Atlantic world enabled African North Americans to disrupt imperial and nation state hegemony and imagine freedom.

Oil and Empire (208062)

Rosie Bsheer

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

This undergraduate seminar examines the political and social history of oil since the late nineteenth century, looking at oil's impact on the rise and fall of empires, the fates of nation-states, its role in war, as well as its varied impact on social, cultural, and environmental life. It is designed to introduce students to the broader historical narratives and historiographical debates associated with oil and the making of the modern world. While we address global trends and processes, from Venezuela to Indonesia and the Niger Delta, the primary focus will be on the Middle East.

Course Notes: First year students are highly encouraged to take the course.

American Indian History in Four Acts (156667)

Philip Deloria

2018 Fall (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Both scholars and tribal people (not mutually exclusive!) have found it useful to structure American Indian history around four broad chronological categories emerging from the formation of United States Indian policy: *Treatymaking, Indian Removal, Land Allotment, and Self-Determination*. This seminar will use this "four acts" structure to offer a broad overview of American Indian history, while also considering the limitations of such category-making, including the decentering of Indian people and the blunting of historical complexity. Engaged with primary sources and historiography, the course will also allow students to engage in original research in the field of American Indian history.

Byzantium between the Crusades and the Islamic World, c.1100-c.1450 (108058)

Dimitar Angelov

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The seminar focuses on the eastern Mediterranean in a period of economic integration and political fragmentation marked by the crusades, the expansion of the Italian maritime republics, western colonization, and the conquests of the Turks. How did the Byzantines react to the new unsettled world around them? What was the role of the newcomers? Special attention will be paid to the crusades, cross-cultural contacts, and the Mediterranean economy.

U.S. History: Major Themes in the Twentieth Century (125517)

Lisa McGirr

2018 Fall (4 Credits)

Schedule:

R 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

The twentieth-century United States is a vibrant and flourishing field of historical study. The goal of this seminar is to introduce students to the central questions, problems and debates in the history of the "American century." Students will learn how the literature of history has developed through reading both older and newer approaches. Readings focus on questions of politics, political culture, the state and social life. The course is both thematic and chronological (as well as necessarily selective). Students are expected

to prepare well for seminar and to participate actively in discussion. Each class will begin with a brief introduction to the readings (no more than five minutes) by a member of the seminar. The idea here is for one student to take special responsibility for leading discussion, raising questions and problems posed by the reading.

Medieval History and Cinema (126624)

Cemal Kafadar

2018 Fall (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

This course deals with the challenges of representing medieval history by focusing on selected films, which will be viewed at two levels at once, as films and as history. What are the uses of cinema as a vehicle for thinking about the past? What qualities, other than accuracy, make for good history in films? What are the advantages, if any, of cinematic representation of the premodern past with its different sense of intimacy with the supernatural?

Course Notes:

There will be a group viewing of selected films each week and a class meeting to discuss films and related readings.

"What is Imperial History?" (109930)

Sugata Bose

2019 Spring (4 Credits)

Schedule: R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Though empires have recently disappeared from the map, for historians these sprawling multi-ethnic, multi-confessional states remain crucial laboratories for the study of violence, power, ideology, aesthetics, and identity. This section will introduce students to the many ways historians define empires and interpret the experiences of those who inhabited them. How does one write the history of such diverse, expansive

entities? How does imperial history incorporate the perspectives of disenfranchised, enslaved, and colonized peoples? What is its scale? How does the work of historians relate to images of empire generated through public commemoration and popular memory?

Course Notes: Instructor to be determined

Class Notes: Required of, and limited to, all History concentrators in the spring term of their sophomore year.

"What is Urban History?" (110445)

Elizabeth Hinton

2019 Spring (4 Credits)

Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This section will explore the methods historians have used to understand the political, economic, and social development of cities and urban life over the past four centuries. How have historians approached the study of metropolitan regions and their inhabitants? What methods have they used to examine the ways in which social and spatial forms differ by time and place? How does urban history provide a unique vantage to analyze issues of class, ethnicity, migration, race, and gender? Readings and discussions will give special attention to cities and transformations in the United States, but we will draw comparative examples from the histories of urban centers across the globe.

Course Notes: Instructor to be determined

What is Biography? (110446)

Jill Lepore

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Biographers write histories of lives. Their storytelling is often novelistic but their standards of evidence are those of the historian. They confront distinctive questions: What lives are worth writing? What is the

relationship between the individual and society? What rules govern the relationship between biographers and their subjects? How has the art of biography changed over the centuries, and what forces have driven those changes? In this section, we'll read both notable biographies and the critical literature on biography as a genre that is often seen to be at odds with the conventions of other kinds of historical writing.

Course Notes: Instructor to be determined

Class Notes: Required of, and limited to, all History concentrators in the spring term of their sophomore year.

"What is International History?" (207519)

Erez Manela

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Relations between states define some of the most important aspects of human history, including major wars, trade relations, and movements of people, ideas, and cultural productions. States, of course, have been important actors in this history, but so have other types of actors, such as international organizations, NGOs, missionary groups, philanthropic foundations, and transnational movements. In this course, we will explore major events, themes, and approaches in international history, all with the goal of better understanding how international interactions have shaped human history and experiences across time.

Class Notes: Required of, and limited to, all History concentrators in the spring term of their sophomore year.

"What is Gender History?" (207521)

Genevieve Clutario

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines how the historical framework of "gender" emerged from women's history to a field that explores relational dynamics and examines the processes by which female and

male, feminine, and masculine are constituted in culturally and historically specific ways. We will look at how historians have evaluated gender formations and at the same time how they use the concept to understand historical change and processes. The course will also examine the methods of gender historians, the kinds of sources they use, research strategies, and how their methodologies intersect with other frameworks, namely those of class, race, ethnicity, religion, and citizenship.

Class Notes: Required of, and limited to, all History concentrators in the spring term of their sophomore year.

The War in Vietnam (205257)

Fredrik Logevall

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

The struggle for Vietnam occupies a central place in the history of the 20th century. How did it happen? Why did first France and then the United States wage large-scale war there, and why did both powers fail in their effort to subdue the revolutionary Vietnamese forces? And what is the legacy of the struggle for our world and for U.S. foreign policy today? This course examines these and related questions, with particular attention to the long period of direct American involvement. The events will be considered in their relationship to Vietnam's history, to American politics and society, and to the concurrent Cold War.

Native American and Indigenous Studies: An Introduction (207523)

Philip Deloria

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Though American Indian people make up 1.7% of the U.S. population, their importance outweighs the census numbers. Native American history and politics define critical issues in law, energy, land management, and government, while the culture industries inevitably confront the curious hold that indigenous people have on American culture. American conquest and colonialism invite connection and comparison across a global scale, particularly in settler states such as Canada, Australia, and Aotearoa/New Zealand. This course offers a broad introductory survey of these and other issues as it explores the development and current state of the history-based interdisciplinary field known as Native American and indigenous Studies.

The State of Israel in Comparative Perspective (203044)

Eyal Naveh

2019 Spring (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course addresses controversies surrounding the history of Zionism and the state of Israel. Central to these controversies are questions of comparison. Is Zionism a movement for collective liberation, like national movements of stateless or colonized peoples, or a variety of western colonialism? Does Israeli statecraft operate within a normal geopolitical spectrum, or is it unusually expansionist and aggressive? This course seeks to answer such questions through a broad and deep analysis that spans the 19th and 20th centuries, pays close attention to Israel's social and cultural history as well as high politics and military affairs, and imbeds modern Israel into multiple global contexts.

Course Notes: Instructor: Professor Eyal Naveh

Introduction to Asian American History (159559)

Genevieve Clutario

2018 Fall (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course examines comparative histories of modern transpacific movement and migration between Asia and the Americas, under the scope of multiple colonizations and imperial expansions. We will study empire and colonialisms impact transnational movements of ideas, commodities, and people, tracing how movements also occur within and between colonial spaces and across hemispheres. By connecting transnational histories of Asia, including the Philippines, as well as Pacific Islands, like Guam, Samoa, and Hawai'i to the "Americas," this course explores how legacies of empire shaped and continue to shape forms of Asian migration, global formations, and diaspora.

Coffee and the Nighttime: History and Politics, 1400-2020 (207532)

Cemal Kafadar

2019 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Since the fifteenth century, individuals and societies in different parts of the world adopted a gradually but unmistakably quickening tempo in their everyday lives and started to make more uses of the nighttime –for socializing, for entertainment, and for work. In this reconfiguration of the architecture of day and night, people turned to various psychotropic substances such as

coffee to help them better manipulate times of activity and repose. They have also created new social institutions such as coffeehouses, which turned into public spaces for engagement with new forms of arts and politics. The course offers a history of these developments until our own time of "living 24/7" in terms of their social, economic and political consequences. Biological aspects such as addiction and pressures on our circadian rhythms will also be explored in the context of histories of sleep and nocturnal activity.

Byzantine Civilization (108059)

Dimiter Angelov

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The Byzantine (Eastern Roman) Empire outlived the fall of Rome by a thousand years. In what ways did Byzantium preserve the institutions and politics of imperial Rome? In what ways was it a medieval civilization? How did Byzantium's professional armies, able diplomats, and brilliant intellectuals ensure its survival and renewed expansion? This course traces the story of the Byzantine Empire between c. 600 and 1453, setting it in the context of medieval and world history.

Course Notes:

This course, when taken for a letter grade, meets the General Education requirement for Societies of the World. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Gabriel Pizzorno

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course traces the continuum of socio-political and cultural developments in the Near East that led,

over the course of three millennia, from stateless societies to the emergence of Assyria as the first empire in history. The class focuses on the long-term history of power centralisation, and the role of ideology and propaganda in overcoming resistance to this concentration of authority. The course material covers a broad evidentiary and chronological range. We will employ textual, visual, and archaeological sources to explore the evolution of the political and cultural landscape in the Near East and the Mediterranean, from the emergence of the first city-states in the late fourth millennium BCE to the early development of Roman imperial ideology around the start of the Common Era.

This course surveys European politics and culture from the end of the Second World War to the present. We explore how Europeans rebuilt their societies after the devastation of total war, and how the legacies of war and genocide have shaped European politics and identities in the decades since. Topics include postwar U.S. and Soviet occupations; the Cold War; labor and consumption in communist and capitalist societies; the rise of feminist, environmental, and anti-colonial movements; immigration; memory cultures; and European unification. Lectures and readings provide historical context for understanding contemporary debates surrounding populism, ethnic diversity, and economic disparities in Europe.

From the Little Ice Age to Climate Change: Introduction to US Environmental History (207839)

Zachary Nowak

2018 Fall (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How did people in what is now the United States shape their environment, and how were they shaped by it? This course examines how humans thought about and used the natural world over the centuries—and the consequences of both use of and thoughts about the nature. Topics include food, climate change, pollution, conquest and resistance, environmentalism, and energy.

This course actively seeks to show the importance of the material world and the contributions of a broad spectrum of historical actors to US history, among them Native Americans, enslaved people, women, working people, and outlaws, as well as the climate, microbes, and animals.

Deep History (205088)

Daniel Smail

Matt Liebmann

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Transcending disciplinary boundaries, "Deep History" brings the entirety of the human past together into a single historical narrative. Lectures and discussions enable students to anchor their understanding of the human past in tangible remains—a tool, a piece of ceramic or rock art, a shell-bead. These, in turn, provide models for students as they research objects of their own choosing. Spanning the world and traveling from the deep past to the present, this course offers students a chance to engage with a new kind of historical identity and provides a counterbalance to the short-termism common in our public sphere.

Course Notes:

This course is equivalent to Anthropology 1059 . Credit may be earned for either History 1059 or Anthropology 1059, but not both.

The United States is the most powerful player on the international scene today, and is unlikely to relinquish that position any time soon. Understanding how and why this condition arose, and what it means for world affairs today, is our concern in this course. The emphasis is on U.S. policymaking over the past century, with due attention to the international and domestic political context in which decisions were made. Issues to be explored include the tension between isolationism and interventionism and between unilateralism and multilateralism; the emergence of the U.S. as a superpower; the Soviet-American confrontation; the rise of presidential power in foreign affairs; the wars in Iraq and Afghanistan; and the nature of American power in today's world.

Course Notes:

Modern China (109621)

Arunabh Ghosh

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

This lecture course will provide a survey of some of the major issues in the history of post-imperial China (1912-). Beginning with the decline of the Qing and the dramatic collapse of China's imperial system in 1911, the course shall examine how China has sought to redefine itself anew over the past one-hundred years. The revolutionary years of 1911, 1949, and 1978 will serve as our three fulcra, as we investigate how China has tussled with a variety of 'isms' (such as republicanism, militarism, nationalism, socialism, and state capitalism) in its pursuit of an appropriate system of governance and social organization. In so doing,

we shall also explore the social, economic, cultural, and scientific changes wrought by these varied attempts at state-building.

Narrative History: Art and Argument (207531)

Maya Jasanoff

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Who, what, where, when, how, and why? The elements of history are the elements of a story, and the art of writing history is the art of how to tell it. This course offers an intensive workshop on the art and craft of historical narrative. Through reading (from T. B. Macaulay to Hilary Mantel) and in-class writing exercises we will develop a repertoire of techniques to address issues central to historical story-telling, such as establishing scene and character, handling evidence, and embedding argument. Open to any advanced undergraduates and graduate students interested in writing as a craft.

The Mediated Book: Texts, Writers, and Readers in Early Modern Britain and Early America (203460)

David Hall

2019 Spring (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

An introduction to book history and its connections with intellectual, cultural, and religious history, this course focuses on popular Protestantism in Britain and early America, together with certain "revolutions" in print in the context of political insurgencies; as well, it deals with the relationships between writers, readers, and the book trades. Apart from weekly readings and brief reports, the principal assignment is a 15-20 page research paper using primary sources.

Course Notes: Offered jointly with the Harvard Divinity School as 2132.

Literature and Social History: A View from Brazil (159656)

Sidney Chalhoub

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The objective of this course is to study major authors and works of nineteenth-century Brazilian fiction. Writing fiction from a spot deemed to be in the "periphery" of the western world meant a difficult and complex engagement with European literary and intellectual traditions. The course will focus primarily on the evidence regarding changes in the politics of social dominance in the period –from slavery and paternalism to the worlds and meanings of "free" labor. Questions of class, gender and race in the general context of defining and setting new limits of citizenship rights will be emphasized.

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course seeks to explain why social revolutions have taken place in Latin America and analyzes their impact on the region. The objective is for students to gain a critical understanding of the origins, development, and impact of revolutionary movements in Latin America during the twentieth century. The course examines several case studies, which may include Mexico, Cuba, Chile, Nicaragua, the Zapatista uprising in Chiapas, and the so-called "Bolivarian revolution" of Venezuela. Our goal is to identify similarities and differences among these cases.

Course Notes:

This course is also offered through the African and African American Studies Department as AAAS 199X. Credit may be earned for either History 1937 or AAAS 199X, but not both.

Instructor Permissions: Instructor**Enrollment Cap:**

15

Beginning with the Cold War and ending with the contemporary "War on Terror," this seminar explores how the post-WWII development of the national security state transformed American politics and culture. Assigned readings and films encourage students to analyze how U.S. domestic relations of race, gender, and sexuality have been intertwined with the nation's global policies of empire, militarization, and war. Topics include Cold War containment/integration, civil and human rights, decolonization, immigration, terrorism, drones, neoliberalism, and military detainment. This course brings together scholarship from American History, Ethnic Studies, Transnational Feminism, Diplomatic History, and International Studies.

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will examine the history of the People's Republic of China's relations, struggles, and interconnections with the wider world since its founding in 1949. This course centers on the ways in which China's leaders have understood and interacted with the world outside their borders, focusing primarily on: (1) diplomatic and security engagements, (2) international economic interactions, and (3) transnational intellectual and cultural exchanges. The course will enable students to examine major themes in the history of socialism, development, and globalization and develop a deeper historical understanding of China's rise at a moment when it is dramatically reshaping the world.

This graduate seminar aims to familiarize students with some of the major debates in the field of modern Middle East history and pays careful attention to competing theoretical frameworks and methodological

approaches. It will look at some of the most important literature on Orientalism, area studies, Ottoman rule, colonialism, nationalism, gender, and religion. This course will prepare doctoral students for the comprehensive exam in the field of modern Middle East history but is also suitable to all PhD students interested in these thematic areas of study. It will also lay the groundwork for teaching courses on the modern Middle East.

Genevieve Clutario

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar examines gender as an important lens to understand formations of modern empire and colonialism. Students will engage with historical works that use the framework of gender to track the development of empires and colonialism, to recognize gendered colonial technologies in arenas such as domesticity, militarization, commodity capitalism, and medicine, and to explore the consequences of such processes on marginalized groups. While the course does not cover the entire temporal and geographic range of gender and empire histories, it will delve into the debates of what constitutes "the global" in writings of gender history and the relationships of gender to other frameworks such as race, class, religion, and sexuality. Students will also consider the methodological problems and strategies as well as compare the types of sources and archives used by gender historians. Ultimately, the course aims to provide a framework for students seeking to pursue further research in the fields of gender history, studies of empire, colonialism, and the global south.

Gabriel Pizzorno

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar focuses on the use of material culture as a primary source for constructing historical

narratives that access aspects of the past not covered by written words. We will look closely at how materiality theory relates to the methodologies and conceptual categories used by historians to understand the past. Students will also be trained in the specific skills needed for interpreting material sources. Because material history relies on methodologies and theoretical approaches that transcend the fields that define our discipline, the course's coverage will be broad across both time and space, allowing for participants to explore corpora of materials according to their own interests and expertise.

Peter Gordon

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This graduate-level interdisciplinary seminar will address the philosophical, historical, sociological, and aesthetic questions raised by the Frankfurt School social theorist and philosopher Theodor W. Adorno in his posthumously-published masterpiece *Aesthetic Theory* (1970). Our chief task will be to come to a better understanding of this notoriously difficult work by examining its place in past and present debates over the relationship between art and society. Topics include: the possibility of poetry after Auschwitz, the debate with Walter Benjamin over the status of the "aura", the problem of artistic political engagement, and the dialectic between the culture-industry and "autonomous art."

Course Notes: This course is equivalent to German 262. Credit may be earned for History 2326 or German 262, but not both.

Focusing on the history of imperial expansion, slaving wars, *jihads*, and liberation struggles in Africa and its diaspora, this seminar considers conflicts dispersed over wide areas with largely undefined battle lines and blurred distinctions between civilians and combatants. In addition to classic issues of military organization, weaponry, tactics, and strategy, objects of study include

the following: the definition, scope, and scale of collective violence; militarism as a social phenomenon; the relation between militancy and sex, gender, and sexuality; how violence articulates with the politics of belonging and difference; and military ecology and the built environment.

This course examines the history of capitalism in America, viewed through the lens of debates over regulation of economic activity. Beginning in the early days of the republic, it will examine the role of law in capitalist development, focusing on debates over the regulation of corporations, banking and the financial system, antitrust, and administrative law, continuing through the regulatory reforms of the New Deal. It will then examine movements for deregulation, the roots of the financial crisis, and recent proposals to regulate banks and other financial institutions. The course will examine the social, institutional and intellectual history of economic regulation.

Course Notes:

Offered jointly with the Law School at 2167. The enrollment limit for FAS students is 20. This course will meet at the Law School Campus.

Comparative Slavery & the Law: Africa, Latin America, & the US: Seminar (159554)

Emmanuel Akyeampong

Alejandro de la Fuente

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar surveys the booming historiographies of slavery and the law in Latin America, the United States, and Africa. Earlier generations of scholars relied heavily on European legal traditions to draw sharp contrasts between U.S. and Latin American slavery. The most recent scholarship, however, approaches the legal history of slavery through slaves' legal initiatives and actions. These initiatives were probably informed by the Africans' legal cultures, as many of them came from societies where slavery was practiced. Our seminar puts African legal regimes (customary law, Islamic law) at the center of our explorations concerning slaves' legal actions in the Americas.

History 2725 Section: 01

History and Anthropology: Seminar (110313)

Vincent Brown

Ajantha Subramanian

2019 Spring (4 Credits)

Schedule:

T 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

Explores exchanges between the disciplines of History and Anthropology, emphasizing overlaps and distinctions in the treatment of mutual concerns such as the representation of time and space, the

conceptualization of power, and the making of the subject.

Course Notes: This course is equivalent to Anthropology 2725 . Credit may be earned for either History 2725 or Anthropology 2725, but not both.

God Save the Queen! Ruling Women from Rome to the Renaissance (127654)

Sean Gilsdorf

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This seminar will explore female rulership in Europe from the late Roman empire to the age of Elizabeth I. Discussion of varied texts and images (most of them primary sources in translation) will reveal the role of queens within their societies, their relationship to broader social and cultural institutions such as the Christian Church, and the ways in which queens were celebrated, criticized, and imagined by writers and artists of their time.

The Postwar American Road Narrative (108091)

David Alworth

2019 Spring (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines a vibrant subgenre of post-World War II American literature. We will read major novels by Kerouac, Nabokov, and Didion as well as less familiar (yet still fascinating) writings by Hunter S. Thompson, Tom Wolfe, Patricia Highsmith, Ralph Ellison, and others. In addition, students can expect to analyze both primary and secondary historical sources, while giving some attention to visual art (e.g. John Chamberlain) and to film (e.g. Bonnie and Clyde).

England After Empire (109958)

Duncan White

2018 Fall (4 Credits)

Schedule:

M 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

This course considers the way England was transformed through the demise of its Empire after the Second World War through to the present day. From the birth of the welfare state to the rise of Thatcherism, from post-colonial migration to multicultural Britain, from the Swinging Sixties to punk rock and riots, we will track these radical political, social and cultural changes through novels, poetry, theater, film, pop music, photography, fashion, food and sport. We will explore the way Britain sought to retain its influence in the world, through its involvement in the Cold War, its relations with the Commonwealth, and its continuing 'special relationship' with the United States, even as what being English or British began to change in meaning. As well as reading literary works by Philip Larkin, Jean Rhys, JG Ballard, Salman Rushdie, China Miéville, and Zadie Smith, we will consider the nation's popular culture, from The Beatles to The Sex Pistols, from James Bond to J.K. Rowling.

Sports and Empire (159790)

Daniel Loss

2019 Spring (4 Credits)

Schedule: M 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

One of the enduring legacies of modern imperialism has been the spread of British and American sports around the globe. This seminar takes the connection between sports and imperialism as a starting point to explore questions about the nature of imperialism, the response of colonized peoples to imperial projects, and the persistent connections between imperialism and globalization. The British Empire and British sports (cricket, rugby, soccer, etc.) will be our main focus, though we will also consider the U.S. as an imperial power.

As a History & Literature seminar, this course is focused primarily (though not exclusively) on the analysis of primary sources, both historical and literary. Course materials include novels, poems, memoirs, rulebooks, and essays. Over the course of the semester, students will develop their research, close reading, and writing skills, culminating in a final research paper. Regular participation in class discussions is expected from all students.

World War I in Fiction, Film, Poetry, and Memoir (160727)

Lauren Kaminsky

Steven Biel

2018 Fall (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

On the centenary of WWI, this seminar will explore a wide range of representations of the conflict that began in the Balkans but swept through Europe to the Middle East and Russia, to the Atlantic, Pacific, and Indian Oceans, to the Mediterranean, Baltic, and Black Seas, and drew in soldiers and civilians from Africa, Asia, and the Americas. By looking closely at materials across genres and cultural forms, we will examine the contradictions and contingencies of the war that set the stage for a century of political, social, and cultural history.

Film and the Cold War in U.S. History (160728)

Mark Sanchez

2018 Fall (4 Credits)

Schedule: M 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

We will focus on U.S. popular films produced during the Cold War to gain insight into circulating cultural understandings of the time period. The course will be organized around questions such as how popular culture productions characterized the United States and the world as well as how these films produced and reproduced conceptions of race, gender, and nation. We will also investigate how these films were related to and reflected understandings of United States foreign policy. Course readings, lectures, and discussions will be focused on developing an understanding of the international dimensions of the Cold War and the place of cultural productions, such as film, in history and historical narration.

The American Prison & The Literature of Punishment (203218)

Thomas Dichter

2019 Spring (4 Credits)

Schedule: M 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

The United States currently keeps more people behind bars than any other country. While the US's emergence as the leader in incarceration rates is relatively recent, the prison has loomed large in American public life for 200 years. In this class, we will approach the prison not as a marginal phenomenon, but as an institution central to American culture. Readings include works of literature by and about prisoners as well as reformers' pamphlets, sociological studies, government reports, and inmate manifestos. We will trace debates about freedom and captivity from the birth of the penitentiary through the era of mass incarceration.

History & Literature 90CQ

Afro-Latin American Cultures: Race, Religion, Music, and Literature (205569)

Rebecca Kennedy de Lorenzini

2019 Spring (4 Credits)

Schedule:

W 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will explore the history of Afro-Latin American culture as expressed through literature, music, dance, and religious and spiritual practices. Beginning with an analysis of the theoretical framework of the African diaspora, we will ask central questions around how and why African heritage has been celebrated or rendered invisible in Latin America. We will also consider where ideas of homeland and displacement shift with experiences of migration and in borderland regions. Themes of racialized and gendered experience will be discussed as well as systems of racism, oppression, cultural imperialism, and individual and collective agency within this history. The rich diversity of Afro-Latin American cultures will be highlighted in both the Caribbean and South America, as well as in sites of connection and convergence such as New York City, Havana, and Panamá.

Deportation and the Policing of Migration in U.S. History (205573)

Emily Pope-Obeda

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines the history of deportation in American society, and considers how the policing, exclusion, and expulsion of immigrant populations has shaped the nation. Through historical texts, primary sources, literature, and popular culture, we will cover a wide range of topics including racial quotas, guestworker expulsions, labor control, racialized health panics, national security scares, the disproportionate removal of black immigrants, the growth of immigrant detention, the criminalization of immigrant communities, and immigrant rights activism. Although mass deportation is often understood as a recent phenomenon, this course will demonstrate the ways that immigration control stretches as far back as creation of the United States. We will trace shifting opinions about immigration, the meaning of citizenship, statelessness, and national belonging.

Contemporary American Literature and Popular Music (205575)

Alex Corey

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This class examines the relationship between popular music, American literature, and the power structures that organize life in the United States. We will study the ways that music constructs social identities by considering how popular music—in performance, on record, and in written representation—can both reinforce and challenge hierarchies of gender, race, region, sexuality, class, and citizenship. Listening to recording artists such as Johnny Cash, Frank Ocean, Beyoncé, and Kendrick Lamar, we will learn how music plays a critical role in producing the social distinctions that popular culture is often presumed simply to reflect. Moreover, our study of literature by Alice Walker, Mary Gaitskill, Essex Hemphill, and others will show how the literary representation of sound can both articulate the pleasures and resist the injustices of an often-inadequate present moment. As part of this course, you will learn to design, record, and produce your own podcast episodes.

Stop Making Sense: America in the 1980s (205577)

Angela Allan

2018 Fall (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

The 1980s saw the convergence of American politics and economics to strengthen US interests abroad, but the decade was also a moment of enormous social, political, and economic divergence at home. How compatible—or causal—was the end of the cold war with the end of the American cultural consensus? Did such a consensus ever exist, or was it a mere illusion and nostalgia for a "simpler time"? Three decades later, these questions remain essential to understanding the history surrounding the cold war and the culture wars. This course will look at how culture—including novels, films, plays, music, and more—both shapes and is shaped by social and political attitudes. As the 1980s experiences a pop culture comeback in the 2010s, how do we begin to critically make sense of a decade of contradictions?

Human Rights and Transitional Justice in Latin America (207845)

Debbie Sharnak

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will examine the emergence of the twin phenomenon of human rights advocacy and transitional justice across Latin America, exploring the original debates and major players within the movement, a few of the larger case studies in the past three decades throughout the region, and the central issues now facing the field. We will examine how a human rights discourse emerged in these nations, and how the countries dealt in different ways with the repressive legal, cultural, and political legacies of authoritarianism. We will examine how human rights definitions changed and intersected with calls for justice within the emerging the democratic governments, and how accountability claims evolved in the decades following the military rule based on domestic political battles and changing international norms. As a group, we will focus on existing literature on justice and truth-telling in the politics of transition, as well as scholarship on social memory and historical commemorations by using literature, film, testimonies, government documents, and scholarly articles.

Everyday Life in Cold War Berlin (207846)

Briana Smith

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

In this course, we will examine the history of Berlin from the "rubble years" after World War II, through the aftermath of German unification in the 1990s from the perspective of the history of everyday life. Our discussion of diaries, primary source documents, historical studies, literature, films, art, and music produced in divided Berlin will reveal how the divided city shaped individual lives and subjectivities, and how individual Berliners shaped the history of Cold War Berlin.

Students at the Barricades: Student Activism in Global Perspective (207847)

Beatrice Wayne

2018 Fall (4 Credits)

Schedule:

T 0945 AM - 1145 AM

What is the role of the student in the struggle for global justice? Do students bear particular responsibility in addressing global inequalities? How does student activism differ from other forms of activism, and how do they intersect? Has student activism changed over time, and have different student movements across the world exhibited different characteristics? What are the economic, cultural and political factors that have animated the emergence of vibrant student movements? And how has this particular form of activism been portrayed and fostered through literature and film? This course will explore the role that students have played and continue to play in social justice movements around our world. Throughout our study of student mobilization across time and geographies, we will debate how these movements should be understood, and the role they play in altering social values, practices and institutions. The purpose of this course is to theorize the ways in which these critical movements come into being and their consequences. This course aims to be directly relevant to your lives as students, and to encourage you to think broadly about the struggle to enact change in our world.

History & Literature 90DI

Speculative Fictions in Multiethnic America (207848)

Ellen Song

2018 Fall (4 Credits)

Schedule:

R 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Speculative fiction, especially science fiction, is known to be a predominantly white genre; data from one source, the sci-fi trade journal *Locus*, indicates that less than 5% of SF and fantasy books published are by writers of color. This course examines in an intentionally multi-ethnic framework speculative fiction written by African American, Asian American, and white authors alike in the 20th and 21st centuries, which opens us up to the diversity of themes, concepts, and settings to be found – should we be interested in looking for it. From the early Afro-futurism of W.E.B Du Bois's "The Comet," to the techno-orientalism of Paolo Bacigalupi's *The Windup Girl*, to the environmental critique of Karen Tei Yamashita's *Through the Arc of the Rainforest*, contemporary speculative fiction asks us to imagine a world completely alien to us and works to uncover the hidden operations, institutions, and power structures of our own – often, though not always, at the same time. Yet, some of the authors examined in this course also reveal that their writings are not necessarily dictated or primarily influenced by their identity markers. Ultimately, in this course, we will gain a nuanced appreciation for the breadth of conceptual concerns covered in contemporary speculative fiction. We will also learn to read both with and against the grain of our expectations as readers, and to use this fluidity to reflect on the ethical dimensions of reading and writing.

History & Literature 90DJ

From Wounded Knee to Standing Rock: Native America in the Twentieth Century (207849)

Christopher Clements

2019 Spring (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will explore various forms of Native American cultural and political production in the twentieth century. Drawing on fiction, film, historical documents, documentaries, photographs, nonfiction, and memoirs, this class will explore the ways in which Indigenous people have articulated both belonging and separateness from the United States. In addition to its focus on key aspects of modern indigenous culture and politics—sovereignty, self-determination, decolonization, anti-racism, gender equality, and land claims, to name a few—we will also consider broader conceptual questions. What, for example, is the relationship between indigeneity and modernity? Does the twentieth century mark a distinct break from the first four hundred years of Native-settler history? How does settler colonialism intersect with other forms of oppression? And, why have events like Wounded Knee II and Standing Rock gained support from wider, non-indigenous publics while issues like police brutality against Native people and the ongoing crisis of Missing and Murdered Indigenous Women (MMIW) have not?

History & Literature 90DK

Asian/American Graphic Novels (207850)

Catherine Nguyen

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The course on Asian American studies focuses on the genre and form of comics and graphic novels in the context of histories of migration and diasporas. Through these illustrative and textual works, we will explore the representation of Asian American identity and the experience of racial difference through possible works, such as Adrian Tomine's *Shortcomings*, Mine Okubo's *Citizen 13660*, and Thi Bui's *The Best We Could Do*. The course will also open up to consider the transnational and global literature of Asian/American graphic novels from other sights of Asian migration and diaspora, including Chinese Australian Shuan Tan's *The Arrival* and Japanese British Fumio Obata's *Just So Happens*. As such, this course seeks to examine literary works and cultural productions in the form of comics and graphic novels that engage with and articulate the Asian American experience as well as the sense of being Asian in the world.

Global Hollywood (207851)

Jordan Brower

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course charts the development of the American film industry in the context of and in response to the pressures of world capitalism and the shaping forces of geopolitics. "Global Hollywood" begins with the "universal language" hypothesis, the belief among theorists and makers of early cinema that the silent movie functioned as a twentieth-century Esperanto; it proceeds to the problem of sound cinema and the shooting of multiple language versions of movies in the early 30s, and then addresses World War II (Three Amigos; Why We Fight), the European influence on what would become known as film noir (Sunset Boulevard), science fiction allegories of the Cold War and nuclear anxiety (Invasion of the Body Snatchers), and so on up to our current regime of international coproduction (Mad Max: Fury Road; Arrival). Along the way, American films will be supplemented by international responses to Hollywood, both in film (e.g. Godard's Contempt; Fassbinder's Ali: Fear Eats the Soul) and literature (e.g. Manuel Puig's Kiss of the Spiderwoman).

America's Queer Canon (207852)

Paul Edwards

2019 Spring (4 Credits)

Schedule:

T 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines a range of texts from American authors, poets, musicians, and film directors that engage with queer and subversive themes and desires, various sexual identities, and other relations outside of the heterosexual nuclear family. Central to the course's investigation are the intersections between queer theory, feminism, and critical race theory. The regulation of gender and sexual behavior—and transgression of sex/gender norms—have been central to American society from its beginnings.□ Weaving these analyses with our primary sources, this course focuses on the second half of the nineteenth century into the twenty-first. With help from social and cultural historians, we'll pay close attention to how changing discourses shape the meaning of queerness in America, and how queer writers and artists have changed America.

History & Literature 90DO

Old Weird America (207854)

Jennifer Brady

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar focuses on the United States before 1865. Poised halfway between our current moment and the seemingly archaic, superstitious fervor of the Salem Witch Trials, America in the antebellum era was in the process of fitfully, at times reluctantly, becoming modern. We will focus on strange objects—daguerreotypes of dead children, the spectacles created by P. T. Barnum, the seedy newspapers of antebellum New York—and texts that figure the disorienting changes to media, transportation, personhood, and nation that unfolded as the United States settled uneasily into nationhood. Considering literary and subliterate texts, religious beliefs, visual culture, and political practices with an eye to race, gender, sexuality, and class, students will learn about a period that is in many respects deeply alien to contemporary Americans but offers surprising moments of coincidence with the present.

Science, Exploration, and Empire in Nineteenth-Century America (208118)

Reed Gochberg

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar will consider the relationship between science, exploration, and empire in nineteenth-century American culture. Throughout the semester, we will discuss how expeditions to South America, the Pacific, and the Arctic played a major role in shaping ideas about nature and culture around the globe. Newspapers speculated about the mysterious fates of lost voyages; museums displayed specimens and objects from faraway places; and novelists depicted the thrill and adventure of imagined journeys. By reading works by Olaudah Equiano, Charles Darwin, Herman Melville, Maria Amparo Ruiz de Burton, and Pauline Hopkins alongside periodicals and material artifacts, we will trace how exploration informed broader understandings of race, gender, and cultural exchange in an era of national expansion.

Black Beauty Culture (208119)

Jonathan Square

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The history of black beauty culture mirrors the complexities of both African and Afro-diasporic cultures.

People of African descent have always used their African roots and their own artistic ingenuity to create styles and standards that reflect unique black cultures. Black beauty culture has also been in dialogue with other aesthetic traditions, most notably European and Eurocentric beauty standards. Black is beautiful, yet people of African descent have often had to struggle to craft a self-presentation that is both acceptable to themselves and larger society. In this class, we will explore various facets of black beauty culture. Topics will run the gamut from hair maintenance during slavery, the rise of the black beauty industry, black beauty pageants, barbershops, skin bleaching, extensions, weaves, and wigs, braiding, black models, the natural hair movement, queer black aesthetics, and more. Course material will cover the African Diaspora in its full complexity, including the United States, Caribbean, Latin America, Africa, and even Europe.

Stories of Slavery and Freedom (156003)

Timothy McCarthy

2018 Fall (4 Credits)

Schedule:

T 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

In the last generation, scholars have revolutionized our understanding of slavery and freedom in the modern Atlantic world. This sea-change has been the result of a major methodological shift: to view this history through the eyes of slaves rather than the eyes of masters. This course will examine the history of the "black Atlantic" through a diverse range of cultural texts--poetry, pamphlets, court cases, petitions, autobiographies, novels, speeches, and sermons--produced by slaves, free blacks, and abolitionists from the Age of Revolution to emancipation.

Landmarks of World Architecture (113337)

Joseph Connors

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Examines major works of world architecture and the unique aesthetic, cultural, and historical issues that frame them. Faculty members will each lecture on an outstanding example in their area of expertise, drawing from various periods and such diverse cultures as modern and contemporary Europe and America, early modern Japan, Mughal India, Renaissance and medieval Europe, and ancient Rome. Sections will develop thematically and focus on significant issues in the analysis and interpretation of architecture.

Course Notes:

This course, when taken for a letter grade, meet the General Education requirement for Aesthetic and Interpretive Understanding. This course fulfills the requirement that one of the eight General Education courses also engage substantially with Study of the Past.

Class Notes:

TBD and members of the Department and the GSD faculty

History of Art & Architecture 14K

The Roman World in Transition: 4th to 8th centuries (121791)

Ioli Kalavrezou

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course will concentrate on the Mediterranean world during Late Antiquity (4th– 8th centuries). This is a time of cultural changes that set the traditions leading to the medieval world. It will study building activities through a number of major monuments from Rome to Constantinople that transformed urban life as Christianity was becoming the major religion in the Greco-Roman world. It will focus on imperial patronage in these centuries but also through the study of a variety of artifacts follow the evolution of visual language.

Introduction to Contemporary Art (207735)

Carrie Lambert-Beatty

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This class is about encountering the art of your time. You will learn why artists today have such a different range of choices than their counterparts in other periods, and how to make sense of the experiences they create, in order to take up the opportunities contemporary art provides: to retune your senses, reassess your assumptions, and reencounter matters that concern you as one of the globally interconnected, differently positioned constituents of the contemporary period.

Introduction to Contemporary Photography: War and Conflict (207668)

Makeda Best

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines how photographs of contemporary conflict have impacted the history of photography, and the role of the photographic documentarian in society. Contemporary war photographs circulate in various forms – from social media outlets to photobooks to museum walls. The so-called "Forever Wars" of our present era have taken place alongside a burgeoning field of photographic image production, and writing and theorizing about photography as an art form, instrumental tool, and cultural and political force. Through these works and texts, we will explore how contemporary war photographs challenge notions of photographic truth, impact the role of photography in the museum, drive political discourse and transform the meanings of contemporary conflicts, disrupt ideas about art and warfare, and raise new ethical dilemmas around issues of privacy and public policy.

Introduction to Modern Architectures (207642)

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This undergraduate survey course traces developments in architecture from the late nineteenth-century to the twentieth and beyond. We will focus on the consolidation of modernism as a global phenomenon in the 20th Century, engaging projects and architects who had a direct hand in its shaping and those who opposed it. We will look at key works of architecture and urban planning as laboratories of modernity fraught with tensions between tradition and innovation, form and function, art and technology, creative genius and teamwork, nationalism and internationalism. As modern architecture developed throughout the world, architects, planners and designers refashioned the built environment to serve the needs of growing populations, emerging nations, political ideologies, international markets and industrial modernization. The course will present how architects aimed to fulfill the promises of industrial modernity and need to be 'modern.' We will focus on case studies in the Americas and the Europes that launched global debates and international actors. The course highlights a simultaneous modernity and a dynamic international architecture culture that prepared the grounds for contemporary globalization.

History of Art & Architecture 18J

Introduction to Japanese Architecture (109906)

Yukio Lippit

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A survey of the diverse architectural traditions of the Japanese archipelago from the prehistoric era through the twentieth century. Various building types-including the Shinto shrine, Buddhist temple, castle, teahouse, palace and farmhouse-will be studied through representative surviving examples. Issues to be explored include the basic principles of timber-frame engineering, the artisanal culture of master carpenters, and the mixed legacy of the functionalist interpretation of Japanese architecture.

Class Notes:

Please note room change to Carpenter Center B-04 (basement lecture room) effective 9/10/18

Introduction to the History of Chinese Art (117624)

Eugene Wang

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course surveys Chinese art from antiquity to the recent avant-garde. Though the introduction follows a chronological order, it is also thematically motivated. We will see how visual artifacts_paintings, sculptures, architectural monuments_both consciously encode different pragmatic agendas and circumstantial exigencies and unconsciously betray cultural anxieties and tensions. The purpose is to enable students to look at Chinese history in visual terms and to view visual objects in historical terms, with a critique of the perception of Oriental art as static aesthetical objects suspended in a timeless vacuum.

Spanish Golden Age Painting: Truth and Deceit (205401)

Felipe Pereda

2019 Spring (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The art of the Spanish Golden Age is well known for its radical naturalism, on the one hand, and its intense religious imagery, on the other. This course will be an introduction to the major artists of this period – Murillo, Velázquez, Zurbarán and others— from the point of view of painting's power to produce visual illusions and deceive their spectators. Consequently, the course will consider artistic tropes of illusion and disillusionment in relation to early modern debates on belief and skepticism.

This introductory lecture course examines architectural monuments of the Buddhist world, including sites in South Asia, Southeast Asia, the Himalayas, Central Asia, China, Korea, and Japan. Roughly following the history and development of Buddhism in chronological sequence, the course explores pertinent topics in the study of Buddhist monuments, such as cosmology, pilgrimage, ritual, materiality, relics, meditation, world-making, and the relationship between Buddhism and local religions. Through Buddhist sites scattered throughout time and space, students will learn about the rich, diverse world of Buddhist practice and experience.

Design Speculations: Senior Design Tutorial (207690)

Megan Panzano

Lisa Haber-Thomson

2018 Fall (4 Credits)

Schedule: R 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 14

This seminar will serve as a design platform for inquiry, documentation and analysis in relation either to the thesis topic or capstone project of interest to each student. Thesis students will be responsible for selecting a Thesis Advisor (or Advisors) with whom they will meet regularly to develop specific intention, substance and methodology of the thesis research and paper. This seminar is a support of independent thesis and/or independent project research, extending methodological inquiry of the project topic to design where students may convene to collectively discuss and experiment with design speculations – design tests that explore research through the visual and spatial language of architecture. The course will cover topics general to design research with discussions, assignments, and readings focused on three main themes in relation to architectural design: Discourse, the development of a proposition for the role and significance of architecture relative to the project topic of interest; Method, the design steps/process of working through a design application/inquiry of those ideas; and Context, the relationship of the project topic of study to broader surroundings which include but are not limited to the discipline of architecture, cultural contexts, technical developments and/or typologies. The seminar will emphasize and support the translation of ideas emerging from independent research into visual forms of representation including, but not limited to, drawings, diagrams, images, study models, and short animations. The techniques of representation reviewed will be catered to the project topics of individual students, but will also form a part of the general discussion of the course.

HAA 96A Transformations or HAA 96B Connections design studios is a pre-requisite to the Design Speculations course.

Architecture Studio I: Transformations (109375)

Elle Gerdeman

2019 Spring (4 Credits)

Schedule:

WF 0130 PM - 0415 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Architecture assembles multiple models, surfaces, and materials; it is not a single monolithic thing, rather it is comprised of disparate parts and organizational systems operating at different scales. Design, the bringing together of these elements, requires sensitivity, registers scale, and renders perceptual effect. This course is an introductory architectural design studio focused on building foundational architectural concepts and design methodologies studied through a process of making. A series of physical modeling/fabrication assignments explore spatial and organizational transformations as a consequence of the changing interactions among material, fabrication technique, and form. Resultant expressions of space, scale, and perceptual effects are discussed and evaluated in relation to a series of course readings that frame the intentions of each assignment within architectural theory and history discourse.

Both studios in the Architecture Studies Track (Transformations HAA 96A and Connections HAA 96B) explore architectural means and methods of design. Each begins from a different scale of inquiry, but converges at a similar end. This studio originates at the scale of material - focusing on specific capacities and effects thereof as well as the details of assembly - and expands from this to an investigation of an occupiable architectural scale in relation to a dynamic site.

The course emphasizes fluency in the visual and spatial communication of ideas through instruction in 2D drawing and 3D modeling techniques. Technical workshops are provided in choreography with serial assignments encompassing drafting and 3D modeling (AutoCAD + Rhino), techniques of fabrication (Rhino to various outputs), 3D printing, and representational processing (Adobe Creative Suite). The studio exposes students to critical architectural thinking and design methods for more broad disciplinary application following. No particular skill set, technical or otherwise, is a required prerequisite for this course; students from all backgrounds are welcome.

Lisa Haber-Thomson

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

The practice of architecture fundamentally asks us to continuously engage with, and re-conceptualize, the world for which we are designing. As such, architecture as a discipline is not only about designing buildings, but also about challenging us to imagine new ways of seeing the world. This studio takes on the challenge through a series of design exercises focused on understanding, engaging with, and reimagining the urban condition. Throughout the course, we will approach architectural design as both a method of producing urban environments, and also as an avenue through which to understand our cities. We will be directly confronting the social, political, and environmental contexts that are necessarily implicated in any design process.

Both studios in the Architecture Studies Track (Transformations HAA 96A and Connections HAA 96B) explore architectural means and methods of design. Each begins from a different scale of inquiry, but converges towards a similar end. This studio originates at the scale of the urban site, and begins with a set of design research assignments that ask students to imagine the city from the perspective of a non-human agent. Extrapolating abstract principles from these agents, we will be mobilizing the possibilities of architectural representation to reimagine the city through mapping, diagraming, and collage.

The studio culminates in a design proposal for a site in Harvard Square. Students will be given an architectural brief, and will produce projects that address existing site conditions, programmatic space requirements, and projected users of the site. Technical workshops will provide all the necessary skills required for the course, and will allow students to develop aptitude in architectural drawing, mapping, rendering, and simple animation. No existing expertise or technical proficiency is necessary for this course. Students from all backgrounds are welcome; we will be encouraging interdisciplinary thinking throughout the design research process.

To what extent do the availability of materials and development of material technology influence artistic choice and innovation? How was a particular work of art made, and why does it look the way it does? The course will explore these and other questions of materiality through a combination of close looking at objects in the Harvard Art Museums' collections, hands-on experimentation with a range of artist's materials and techniques, and discussions of related readings. Among the goals of the course are for students to gain a better understanding of the dynamic relationship between makers and the materials and techniques they use; to be able to better recognize traces of artistic processes in works of art; and consider the implications of alterations that can occur in objects over time. The course will be taught by the Harvard Art Museums' research curator for conservation and technical studies in collaboration with staff of the Straus Center for Conservation and Technical Studies - professionals who routinely consider questions of materiality and how they effect the way we understand, interpret, preserve and present works of art.

Medieval Architecture in Greater Iran and Central Asia (207669)

David Roxburgh

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The seminar examines cities and monuments built in Greater Iran and Central Asia from the 11th through 15th centuries spanning three principal dynastic periods (Seljuqs, Mongols, and Timurids). Various functional types—mosques, madrasas, minarets, tombs—, urban systems, and spatial organization are studied including the cities of Baghdad, Bukhara, Herat, Isfahan, Mashhad, Nishapur, Rayy, and Samarqand. We will examine the materials, construction and design processes of buildings, their typologies and morphologies, as well as their relationships to law, religion, climate, social and political life. A variety of primary sources are also considered ranging from geographies to histories and travel narratives.

From Byzantium to the British Isles: The Materiality of Late Antiquity (205052)

Evridiki Georganteli

2018 Fall (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course explores the extraordinary cultural transformation Europe, the Mediterranean and the Middle East underwent from Diocletian's reorganization of the Roman Empire in the late third century to the Islamic conquest of the Iberian Peninsula in the eighth century. Monuments and sites, sculpture, mosaics,

frescoes and ceramics, icons and relics, textiles, coins and seals chart the movement of people, commodities and ideas along routes of warfare, pilgrimage, trade and diplomacy. Was the world of late antiquity still bearing the hallmarks of Roman connectivity, administration and culture? Were Ireland and Anglo-Saxon England really the edge of the known world? What was the extent of the Eastern Roman Empire's cultural power in late antique Europe, Africa and the Middle East? How did religious changes influence urban topographies, geographies of power and artistic choices?

Close-up inspection of works of art in the Harvard Art Museums, the Harvard Business School and the Boston Fine Arts Museum; art making in the Harvard Art Museum Materials Lab and the Harvard Ceramics Studios; and study of archaeological records of the Archaeological Exploration of Sardis offer participants a rare insight into one of the most fascinating chapters in the history of art and architecture.

Making Art in Amsterdam, c. 1645-1675; Rembrandt and his Competitors (208184)

Eric Jan Sluiter

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This lecture course will focus on the production of paintings in Amsterdam between c. 1645 and 1675, a market which surged to its summit in the 1650s and early 1660s – both in quantity, and, propelled by artistic and economic rivalry, in quality — and quickly contracted within a matter of years. Central will be the later career and work of Rembrandt (from c. 1645 until his death in 1669) and of his most distinguished pupils and competitors, up to the highly successful Gerard de Lairese, who arrived in 1665. The main thread of

the lectures will be the question of how painters positioned themselves in relation to each other within this competitive and continually changing art market. What choices did they make with respect to style, subject matter, techniques, and targeting audiences? How did they distinguish their works from, or follow the examples of, other artists, and how did they find buyers for their products or patrons for commissions? How did they acquire a reputation, and how was the monetary value of their works related to this? With these questions in mind, we will examine primarily the successful artists who made expensive high-quality paintings for wealthy patrons and knowledgeable connoisseurs, but we will also consider those making cheap, mass-produced work for the lower end of the art market.

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course is about two things. First it's an introductory course to the art of Francisco de Goya (1746-1828) at the time of the Enlightenment and early Romanticism. It will look into his formation in the institutions of the Old Regime (Travel to Rome, member of the Royal Academy, Court Artist) and explore how Goya challenged this artistic culture, exploring new ideas for the meaning of art, of its public and of the role of the artist in society. Second, the course will discuss Goya's work (from his early "caricatures," the *Caprichos*, to the *Disasters of the War*) in relation to modern debates about testimony, witnessing and trauma. The class will take place, half in the seminar-room, half at the museum's study-room looking at prints and drawings from his own work and other contemporary masters.

The Motif in Renaissance and Baroque Art of the Italian Peninsula (207791)

Shawon Kinew

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This course studies the invention, permutations and transformations of visual motifs in the art of Renaissance and Baroque Italy, 1400-1700. The mirror, the shadow, the nymph, a person who can fly—what

can the specific study of these motifs tell us of origins and identities, of love and violence, in early modern Italy? By taking this non-chronological approach, this course thinks critically and diachronically through the artworks of Botticelli, Leonardo da Vinci, Michelangelo, Raphael, Caravaggio, Bernini and others, artists often in conversation with one another across space and even across time.

Romanticism Revisited: Géricault (207656)

Ewa Lajer-Burcharth

A. Cassandra Albinson

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Held in conjunction with an exhibition at the Harvard Art Museums, *Mutiny: Works by Géricault*, this seminar explores the social and political role of art in the Romantic period. Focused on the most influential Romantic artist, Théodore Géricault (1791–1824), the exhibition tells a new story of this socially and politically engaged artist across a range of media. Including approximately 40 drawings, watercolors, lithographs, and paintings from the Harvard Art Museums collections augmented by loans from three Boston-area collectors, the exhibition will offer students an opportunity to work closely with the objects and present on them in the exhibition space. Students will also be encouraged to address at least one object in the exhibition as part of their final paper.

Examples of other works by Géricault in the collection, and works by his contemporaries, will also

be examined during the course in the Harvard Art Museums Art Study Center. A visit to the Museum of Fine Arts, Boston, and a class excursion to New York to see an exhibition about Géricault's contemporary, Eugène Delacroix, at the Metropolitan Museum of Art, are also planned. (Enrollment limited)

Bauhaus and Harvard: The Making of an Exhibition (207671)

Maria Gough

Benjamin Buchloh

Laura Muir

2019 Spring (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Offered in conjunction with a major exhibition at the Harvard Art Museums, this seminar introduces students to the utopian politics, experimental pedagogy, and wide-ranging aesthetic production of the Bauhaus, the most influential school of art, architecture, and design of the 20thC. Founded in Germany in 1919, in the wake of the devastation wrought by the first world war, the Bauhaus sought to reunify art and architecture—and thus remake the cultural production of everyday life—through a return to manual craft. In the mid-1920s, however, it abandoned craft in favor of a new alliance with new technologies and industrial corporations, in a bid to bring its design prototypes into mass production. Forcibly closed by the Nazis in 1933, many of its faculty and students emigrated from Germany to the United States, bringing its principles with them. Among their number were: the school's founding director, the architect Walter Gropius, who joined the Harvard faculty in 1937; László Moholy-Nagy, founder of the New Bauhaus in Chicago; Mies van der Rohe, who became head of architecture at the Illinois Institute of Technology; and Anni Albers and Josef Albers who taught at Black Mountain College in North Carolina and subsequently at Yale.

Key issues to be discussed include: the contribution of textile design to the development of modernist abstraction; the ways in which the culture and organization of the school was marked by gendered norms and assumptions; craft object vs. design prototype; the design of domestic vs. public space; utopia vs. technocracy; the cosmopolitan nature of both the faculty and student body; the vagaries of financial support from the state; the school's relation to its sole foreign counterpart, the Vkhutemas in Moscow; and the constitutive role of exile in the transfer of Bauhaus principles to U.S. institutions.

Comprising some 200 objects drawn almost entirely from the collection of the Busch-Reisinger Museum, the Harvard exhibition will serve as our chief laboratory, enabling first-hand study of original textiles, furniture, homewares, architecture, typography, and photography, as well as student exercises and works of fine art. Co-taught by its curator, Laura Muir, along with HAA faculty Benjamin H. D. Buchloh and Maria Gough, the seminar will also familiarize students with the curatorial principles and practices that informed the making of the exhibition itself.

Requirements include: preparation of weekly readings; class attendance and participation; and a paper based on original research in the museum's rich and voluminous Bauhaus collection. We are particularly

interested in research papers that focus on artists in the collection whose work has been underserved by the secondary literature, especially if not exclusively women. Open to undergraduates and graduate students. Attendance at the first session is mandatory. Limited to 12.

History of Art & Architecture 179X

Tectonics Lab: Conference Course (110270)

Andrew Plumb

2018 Fall (4 Credits)

Schedule:

F 0230 PM - 0530 PM

M 0900 AM - 0959 AM

Instructor Permissions: Instructor

Enrollment Cap:

18

Tectonics Lab introduces students to material properties, structural behavior, and fabrication-and-assembly issues in architecture through a combination of lectures, workshops, and design-build projects. The course emphasizes two modes of architectural experimentation: analytical and intuitive. Abstract and architectonic exercises involving these modes of experimentation will take place in a workshop format, with students working in teams of varying sizes. Weekly lectures provide a theoretical basis for the design-build projects, with topics including fundamental, non-quantitative statics (e.g., free-body diagrams, types of forces and reactions) and generic structural approaches; material properties and fabrication; joinery and assembly; scalar transformation; modular construction; kinetic structures; and more. Design-build projects challenge students to engage lecture material in a hands-on manner; these projects focus on the construction of full-scale artifacts that may be tested against a range of performance criteria. In each project, students will explore the role of material expression, figuration, and formal gesture in communicating their ideas. Project documentation through drawing, photography, and video is an essential component of coursework, and a comprehensive course portfolio will be due at the end of term.

The principal objective of Tectonics Lab is to extend our shared knowledge of material properties, structural behavior, and construction techniques by testing new ideas. Our research model is a hybrid: equal parts scientific laboratory (where narrowly defined hypotheses are tested and evaluated) and artist's atelier (where expression of ideas, both articulated and ineffable, is the goal).

Recommended Prep: HAA 96a is useful, but not mandatory

Himalayan Art (109902)

Jinah Kim

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Understood as a divine abode in Indic mythology and envisioned as the immortal realm of "Shangri-la" by later western interpreters, the Himalayas abound with Hindu and Buddhist holy sites. This course explores the vibrant visual culture of the Himalayan region. Two learning goals are: 1) Understanding the historical development of distinctive artistic forms in paintings and sculptures of Nepal and Tibet during major moments of artistic innovations in the region, including the artistic responses to the current political situation; 2) Locating this knowledge in the context of the history of reception and collecting of Himalayan art in the west.

Global Art History (207738)

Suzanne Blier

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

Global Art History is a relatively new field taken up partially a response to the challenge posed by global and the challenge to rewrite Art History. Often framed by hermetic and geographically-defined vantages – including nationalist ones, such approaches have often left out insights into the cultural dynamics and entanglements cross between places and peoples. This course focuses both on the core issues in play in creating a more global approach to Art History, and, in a pragmatic sense, on constructing a new course around this subject. Reframing the disciplinary model of art history around related discussions and exercises encourage us to explore often marginalized broader world artistic practices and experiences as well as related contexts of cross-engagement and entanglement.

The Museum (207658)

Suzanne Blier

Jessica Martinez

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course explores a vital cluster of themes around museums and the relation between objects, knowledge, culture and society. The focus is at once contemporary practice, historical, and theoretical. A key aim is to move beyond Euro- American geographies to think about constructions of the universal and the global, and the relationship between works of art, museum displays, and the construction of meaning.

Since the early twentieth century, scholars, artists, and activists have closely questioned the movements of objects and the role of museums, particularly in relation to socio-political developments. Why do individuals and societies collect, conserve, and display objects? How has this practice changed over time and space? What role do culture and taste play? These are some of the questions we will be addressing alongside practical experience designing programs for an exhibition of African art at Harvard Art Museums.

Historiography of Modern Architecture: In Search for a Global History (207666)

Patricio del Real

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This graduate seminar traces the development of architectural modernism as a discursive practice. It explores the construction of a cohesive narrative that enabled modernism to become the hegemonic embodiment of modernity in the mid-20th Century and led to its critique in the 1960s and beyond. We will interrogate foundational texts by architectural historians—such as Hitchcock, Giedion, Benevolo and Tafuri and Dal Co—and address the challenges to these histories with the development of modernism beyond Europe and the United States. We will focus on 'other' modernisms as sites of enunciations, both formal and discursive, that will challenge these foundational histories. The aim is to gain a greater understanding of modern architecture as a global endeavor, as well as to examine architecture history as an operative and critical practice. In examining the historiography of modernism, the course aims to address contemporary historiographic critiques and explore the present need of a global history of architecture.

Enrollment Cap:

15

Emergence, development, reception, and legacy of Cubism in Paris between 1907 and 1937, focusing on Picasso, Braque, Léger, and Gris, the four major artists of the pioneering Galerie Kahnweiler. Having analyzed the fundamental role of primitivism, tradition, mass culture, and the commodity form in Cubism's genesis, our major endeavor is to unpack its ever-shifting relation to its aesthetic Others, namely, abstraction, decoration, the ready-made, realism, and monumentalism. Crucial to this endeavor is a thorough examination of the problem of medium in Cubism, considering not only drawing, easel painting, collage, and constructed sculpture, but also mural painting, architecture, photography, and film.

This seminar, open to Graduates and qualified undergraduates will trace the developments and exchanges between presumably regressive and anti-technological media such as the woodcut and the linocuts in the first half of the twentieth century, in its various geo-political contexts from Mexico and Germany to the Soviet Union and China. Key figures to be studied will be Käthe Kollwitz and some of the German Expressionists, José Posada, Leopoldo Mendez, Elizabeth Catlett and the Taller de Grafica Popular, Frans Masereel, Gerd Arntz and Otto Neurath. The debates around and against photography and technological media will be one of the theoretical challenges of the seminar, and the internationalization and interactions through major critics and historians travelling to the Soviet Union and subsequently in exile in Mexico, such as Hannes Meyer, Paul Westheim and Anna Seghers will form its historical horizons.

On Line: Drawing Then and Now (207740)

Ewa Lajer-Burchard

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This seminar seeks to reassess the role of drawing in modern artistic culture. We will follow the trope of line, the most basic drawing mark, not to construct a linear history of the medium, but to provide a selective account of its uses, purposes, and functions as an instrument of modernity--or, as the case may be, of anti-modernity. Focusing on the period spanning the eighteenth century to the present, we will approach drawing not as a monolithic entity, but as a heterogenous phenomenon. We will consider it as a medium, a practice, an object, and a concept, and explore its interaction with, and cross-pollination by, other mediums and practices, (e.g., prints, photography; dance). We will discuss diverse approaches to draftsmanship--e.g., chronometric, kinetic, embodied, sculptural, automatic, blinded, black--and different modes of practice, (studio vs. urban drawing), and acquaint ourselves with procedures, techniques and materials by using them ourselves. We will also participate in a life drawing class in order to get a better sense of what the practice entails and what it makes possible.

Convened in the Harvard Art Museums study room, the seminars will offer students a hands-on experience of the works of art combined with the discussion of the assigned readings. In an effort to assess as well as reimagine the role of drawing, students will be encouraged to experiment with the format of their final project: aside from the classic research paper, annotated drawing series, an exhibition project, a film, a podcast and other inventive modes of presenting an argument will be welcome. (Enrollment limited.)

Photography in Weimar Germany, and in Exile, 1919-1959 (160002)

Benjamin Buchloh

2019 Spring (4 Credits)

Schedule:

T 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

The seminar, offered to graduate students and advanced qualified undergraduate art history majors, will study the development of photographic practices in Weimar Germany, from 1918-1933, and trace a number of selected case studies of photographers in exile in the US, Latin American countries and France after 1933.

Focusing on the opposition between the key movements of New Objectivity and New Vision, the seminar will study the theoretical and artistic and cultural implications of this opposition, with August Sander and Laszlo Moholy Nagy serving as the key opponents.

Particular emphasis will be given to the large number of female photographers working both as artists and producers for the milieu of advertisement and fashion. In particular figures like Lotte Jacobi, Grete Stern and Ellen Auerbach, Gisele Freund, Anne Biermann and Ilse Bing, will be at the center of our studies tracing the differentiations in their oeuvres between Weimar and their production in Exile.

The seminar will read the major theoretical and critical literature on photography to emerge from the Weimar debates as much as it will carefully study the increasingly detailed monographic accounts that have been published over the past ten years on the work of these photographers.

T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Practicing art history in today's increasingly mobile art world—whether as a field curator, academic researcher, critic, or other professional specialism—requires museum literacy, intellectual empathy, and the ability to work in multiple voices and mediums, in addition to art historical expertise. This object-centered seminar will introduce students to the central competencies required of art historians working in or with museums today, ranging from skills for assessing the quality and authenticity of objects on the market, to tools for working with living artists and presenting works of art to non-expert audiences. Through practical and written assignments accompanied by key readings, as well as site visits and behind-the-scenes introductions, students will gain an understanding of how the practice of art history in the gallery both differs from and relates to its practice on the page. The course will consider the key issues, debates, and interpretative strategies driving museum practice, and tackle existential questions about the role and responsibility of the 21st-century museum. Throughout the semester, students will work towards public-facing outcomes. They will identify potential acquisitions, and produce and present a temporary

installation at the end of the semester. The course will meet at the Harvard Art Museums, a uniquely rich university museum environment endowed with deep collections and state of the art curatorial and conservation facilities.

Indian Esoteric Buddhism (207667)

Jinah Kim

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar explores the art of Indian Esoteric Buddhism from various interpretive vantage points. After a brief historiographical introduction, the discussion will focus on unpacking recent scholarly discourses on Esoteric or Tantric Buddhism in relation to the artistic productions in medieval South Asia (ca. 800-1200CE). The two main topics for this semester will be 1) Saiva-Buddhist interactions as manifested in iconographic (and artistic) articulations, and 2) trans-regional connections across Asia. Students will engage in case studies exploring a historical relationship between ritual practices and artistic outputs in various Esoteric Buddhist contexts, which include comparative examples from outside the Indian sub-continent.

This graduate seminar examines the remarkable array of objects preserved in the eighth-century Shōsō-in Imperial Treasury in Nara, Japan. Each session will be centered around in-depth analysis of case studies drawn from different categories of objects (painting, calligraphy, textiles, lacquerware, ceramics, glass, and metalwork among others) created in different cultural regions along the Silk Road, spanning Persia and Japan, from the sixth through eighth century. The goal will be to work outwards from specific objects to larger themes including the interregional transmission of artistic techniques and cultural knowledge along the Silk Road; transposition of modalities of making from one material or process into another; the role of

artifacts in diplomatic exchange; vernacular iconographies; pseudomorphology; the role of treasuries in the construction of kingship; the relationship between art and environment in Central and East Asia; the contribution of conservation science to discursive forms of art historical analysis; and the merits and demerits of various digital humanities approaches to the study of the Silk Road and its cultural history.

Exhibitions have been integral to the promotion of modern architecture. They helped imagine, construct and order a modern world under the hegemony of modernism. This graduate seminar explores the theory and practice of exhibiting architecture. It focuses on 'Latin America' as a historical category imagined through national and international magazines, pavilions and museum exhibitions in the 20th Century. Our aim is to study how the 'exhibitionary complex'—to use Tony Bennett's characterization—engaged modern architecture to help render visible a place called 'Latin America.'

Tutorial - Sophomore Year (115419)

Anne Harrington

2019 Spring (4 Credits)

Schedule: M 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Sophomore tutorial is a hands-on course that introduces students to some of the most exciting and productive questions in the history of science, technology and medicine, while developing critical reading, presentation and discussion skills. Small groups of students will tackle different aspects of a larger theme each week and share discoveries in sessions led by the faculty instructor. The course will be further enhanced by a series of supervised individual projects.

Course Notes: Required for undergraduate concentration in History and Science. Students must register for the plenary class session that meets on Mondays from 9:00-11:45am OR 12:00-2:45pm, as well as a weekly section to be arranged.
The 9:00 am class will begin at 9:45 am.
The 12:00pm class will begin at 12:45 pm.

Knowing the World: An Introduction to the History of Science (123398)

Hannah Marcus

Benjamin Wilson

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What are the origins of modern science and of the scientific method? Have the ways of knowing the world of different cultures and societies changed over time? How has scientific knowledge been related to other enterprises such as art, religion, literature, and commerce? We will ask these questions and more through a broad survey of many of the crucial moments in the development of science from the Scientific Revolution of the 17th century to the present day. Topics and figures will include Galileo, evolution, eugenics, the atomic bomb, and the human genome project.

Inventing Science: Stars, Bodies, Books, and Beasts, 1500-1700 (205189)

Hannah Marcus

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Between 1500 and 1700, a number of hugely consequential things happened in Europe that have

traditionally and collectively been called revolutionary – the Scientific Revolution. Copernicus and Galileo reconfigured the cosmos, Vesalius exposed the inner workings of the human body, Bacon and Descartes debated the fundamentals of scientific truth, and Newton reformulated the mathematical and physical world. But how should we understand events like these? Was there really a Scientific Revolution and did it really invent science? In this course, we will relate the classical moments associated with the early modern history of science to new scholarship that will allow us to ask questions about this so-called revolution's relationship to ancient and medieval science, the development of the arts in the Renaissance, the impact of print, the politics of European imperial projects, early tensions between science and religion, and the growth of new traditions of observation, empiricism, and rationalism in fields such as astronomy, medicine, and natural history.

The Century of Physics (205259)

Benjamin Wilson

2019 Spring (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The 20th century was a momentous period in the history of physics. It witnessed the collapse of the classical certainties of the past and the emergence of startling new ideas about the nature of physical reality, from the special and general theories of relativity to quantum mechanics, the physics of subatomic particles, and cosmological theories of the structure and development of the universe. These new understandings helped give rise to remarkable technological applications, from nuclear weapons to lasers. In this course, we will study the ideas, events, and personalities that shaped physics in the 20th century. Of particular interest are the entanglements between physics and the social and political currents of modern history—from the maintenance of empire to the rise of totalitarianism, from world wars to the Cold War.

History of Biotechnology (107858)

Sophia Roosth

2019 Spring (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What becomes of life when researchers can materially manipulate and technically transform living things? In this course, we will historically investigate biotechnology in the twentieth and twenty-first centuries, paying attention to how efforts to engineer life are grounded in social, cultural, and political contexts.

Topics include reproductive technologies, genetic engineering and cloning, genetically modified foods, genomics, stem cells, intellectual property, and biosafety and biosecurity. The course is organized around five crosscutting domains in which we will explore the ethical, legal, and social impacts of biotechnology: (1) food, (2) property and law, (3) sex and reproduction, (4) disease and drugs, and (5) genomic identities. We will read and discuss historical accounts of biotechnology, primary scientific publications, and legal cases. We will learn to evaluate the social constitution and impact of biotechnology on daily life, as well as how to place contemporary issues and debates in biotechnology in historical context.

Animals in History (160366)

Janet Browne

Rebecca Lemov

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

This course serves as an introduction to animal studies while also exploring the history of animals in relation to humans. Topics include the history of animals as food, laboratory animals, animal-human boundaries, museum and zoo displays, conservation and extinction, panda diplomacy, the anti-vivisection movement, animals in literature, and animals as pets. All these issues invest animals with crucial socio-political meaning. There will be a field trip and perhaps films. Small research projects through the semester will allow students to explore their own interests as well as relevant issues in the news. Among the things that make animal studies such an interesting area is the constant need for scholars to be aware of their own commitments and assumptions. Students from History, History of Science, and History and Literature are all welcome.

Course Notes: Enrollment limited to 18.

Ecological Visions of Health and Disease (207919)

Warwick Anderson

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course examines how ecology has been factored in to the understanding of health and disease during the past two hundred years, focusing on epidemics and disease emergence. During the twentieth century,

leading figures in infectious diseases research sought to understand diseases ecologically, in effect, to make microbiology more broadly biological. Their ecological vision was related to earlier work in medical geography and studies of the direct impact of the environment, including climate, on disease expression. Disease ecology explains the interactions of parasites and their hosts, revealing the co-evolution of disease virulence and host resistance. It is largely a science of settler colonial societies, such as Australia, South Africa, and the United States. Drawing on animal ecology, it represents one of the two great integrative, even holistic, enterprises in modern biomedicine, the other being social medicine, which explores the socioeconomic patterns of disease. Accordingly, disease ecology presents a challenge to those who view biomedicine as increasingly "reductionist" or molecular in orientation. We will study some of the key figures of disease ecology, including Smith, Burnet, Dubos, and Fenner, exploring their ecological thought and critiques of civilization and development.

This will be an opportunity to reflect on the ways that the challenge of diseases like influenza, malaria, psittacosis, and myxomatosis has changed thinking in medicine. We will also examine how, since the early 1980s, disease ecologists have transformed our understanding of the emergence of diseases such as AIDS, Ebola, and Zika—and developed concepts of disease surveillance, biosecurity, and preparedness.

Additionally, we will look at what ecological visions shape global health, OneHealth, EcoHealth, and the new planetary health.

The Border: Race, Politics, and Health in Modern Mexico (204416)

Gabriela Soto Laveaga

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Why does the Mexico-U.S. border continue to be a space for debate and controversy? This course examines how the creation of the U.S.-Mexico border in 1848 shaped modern Mexican society from the nineteenth century to our present. For many, the border served (and serves) as a protective barrier from poverty, violence, and, especially, disease. By the early twentieth century many Mexican bodies were perceived as "alien," "illegal," and in need of patrolling. Yet these descriptions were also used by Mexican politicians to describe and isolate groups such as Indigenous and Chinese within Mexico. By examining, for example, Mexican public health campaigns, response to epidemics, and how Mexican ideas of race and health played out within Mexico we can better understand the U.S.-Mexico border today.

(How) Does Medicine Work? (207811)

David Shumway Jones

2019 Spring (4 Credits)

Schedule:

R 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

This course explores the history of medicine with a focus on therapeutics. When and why do people seek professional health care? What do patients and doctors hope that medical interventions will achieve? How do they judge the success or failure of the therapies? Answers to these questions have changed over time. By tracing social and intellectual histories of therapeutics, this course will offer perspective on vital debates about therapeutics today.

Course Notes: In Spring 2019 the course will focus on surgery.

Bodies in Flux: Medicine, Gender, and Sexuality in the Modern Middle East (156290)

Soha Bayoumi

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines how bodies, genders and sexualities in the modern Middle East, from the nineteenth century to the Arab revolts, have been shaped and represented via changing and competing discourses. Through a variety of historical, ethnographic, media and literary readings, the course studies multiple and dynamic representations of bodies in flux: medicalized bodies, gendered bodies, sexualized bodies, (re) productive bodies, aging bodies and bodies in revolt. The course pays special attention to medicine and science in their interaction with laws, traditions and religious practices. Some of the topics covered include analyzing histories of and discourses on slavery, femininity and masculinity, homosexuality, health, reproduction, disabilities, circumcision and genital cutting/mutilation and gender-based violence.

The Changing Concept of Race in America: From Jefferson to Genomics (160520)

Evelynn Hammonds

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course explores changing concepts of race in American science and medicine, and examines the historical meanings and uses of these concepts in U.S. society from the 18th century to the present. The

course asks the following questions: How have diverse scientific and medical disciplines historically defined, measured, and produced knowledge about "race"? How have scientific and medical concepts of race historically interrelated with key political, economic, and social institutions? How do current 21st century genomic concepts of race fit into this larger history of race and science?

Graphic! Visualizing Medicine from Textbooks to Comics (205361)

Soha Bayoumi

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Visuals play an important role in the history and practice of medicine, from medical textbooks to medical imaging, and from hospital signage and public health posters to comics and graphic novels. This course will examine the use of visuals in medicine, but will place particular emphasis on a new academic and creative field known as "graphic medicine"—medical comics and graphic novels. Over the course of the semester, we will ask questions about how attending to the visual allows us to think in new ways about diagnostic practices, therapeutics, medical consumerism, doctor-patient communication, and ways in which patients and caregivers narrate their personal experiences of disease. We will pay careful attention to questions of class, race and gender, and to larger ethical and political issues raised by our materials.

Mind and Brain: Themes in the History of Neuroscience (207905)

Yvan Prkachin

2019 Spring (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will examine the development of the neurosciences from the late eighteenth century to the early twenty-first century, with the aim of providing the student with a firm foundation in their historical, philosophical, technical, and cultural contexts. Topics to be examined include the origins of 'neuroscience' in eighteenth and nineteenth century debates over phrenology and the localization of mental faculties; the emergence reflex theory and arguments over the evolution of the nervous system; the emergence of neurology and neurosurgery as medical specialties; lobotomy and the debates over psychosurgery; the

'technological turn' in the brain sciences and the emergence of 'neuroscience' during the Cold War; the birth of modern 'brain scanning' technologies; Alzheimer's, Parkinson's and other diseases of the nervous system; artificial intelligence and neural networks; and contemporary debates over autism and 'neurodiversity.'

Digital Cultures (205422)

Alma Steingart

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines the history and cultures of digital computing technologies. In the first half of the semester, students will learn to approach computers as artifacts that embed the social orders and cultural practices that produce them. Students explore the history of automation; cybernetics and World War II; the Cold War and the Closed World; artificial intelligence and gendered subjectivity; the growth of the Internet as a military and commercial project. The second half of the course explores how digital computing shapes our contemporary world: topics include big data, surveillance, computer graphics, and video games. Emphasis is placed on how ideas about gender, privacy, and democracy shape labor practices, models of cognition, and material and symbolic practices of networking in an increasingly online world.

An American Way of War: Technology and Warfare (203128)

Matthew Hersch

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

American society has, from its founding, been transformed by the experience of warfare. This lecture course explores two interconnected ideas: the development of military technologies from the earliest settlement of North America to the present day, and the profound impact of these technologies on people, including veterans and the societies to which they returned. Beginning with an examination of bladed weapons and the psychology of killing, we will look at how supposedly revolutionary weapon systems—the gun, the tank, the airplane, the atomic bomb, the drone—came to define a distinctly American mode of warfare, and created new problems for those exposed to their lethality.

Engineering East Asia: Technology, Society, and the State (207617)

Victor Seow

2018 Fall (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Who creates and controls technology within society? How have technological developments shaped and, in turn, been shaped by social change? Do technological artifacts have particular politics? In this course, we will explore these and other questions concerning the intertwined relationship of technology, society, and the state within the context of East Asia's long twentieth century. From the era of steam power to the present, East Asia has undergone epochal social and technological transformations. China's recent bold forays into artificial intelligence are but among the latest in broader trends, beginning with Japanese, South Korean, and Taiwanese successes with consumer electronics manufacturing over preceding decades, that have marked the region as the site from which we may very well see the emergence of our technological future. In examining the history of technology in modern East Asia, we will gain a deeper understanding of the region and its technological revolutions and, more generally, of the workings of technology in the industrial modern age.

Data and Democracy (205433)

Alma Steingart

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Digital technologies shape – in ways both visible and obscure – many aspects of contemporary governance and democracy. As citizens, it is imperative that we understand how legislative and juridical concepts are built into these technologies, as well as how these technologies in turn impact contemporary uses and abuses of justice, privacy, surveillance, and representation. Beginning with the use of punch-cards to manage census data, this course tours the intersections of digital technology and American politics. Topics will include voting machines, hacktivism, the Snowden Affair, redistricting and Congressional apportionment, statistical uses of polling data, the relation of national security to information privacy, as well as CCTV cameras, social networking, and algorithmic thinking.

Course Notes: Students who enrolled in History of Science 188v, Technology and Democracy, in Spring 2018 may not take this course for credit.

Enrollment Cap: n/a

For as long as people have lived on Earth, they have shaped their world and have, in turn, been shaped by it. This lecture course surveys humans' relationships with the built world, beginning with the origins of civilization and extending through the present day. During the semester, we will track the development of transformative technologies—from fire-making to the Internet—throughout human history and across the globe, and place them in their social contexts. In so doing, we will learn how humanity chooses which technologies to exploit, and how human society is transformed by those choices.

The Empire Strikes Back: Science Fiction, Religion, and Society (160332)

Sophia Roosth

Ahmed Ragab

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

From the seventeenth century to today, science fiction has reflected the aspirations of scientific innovation and anticipated new discoveries. It has reflected rhetorical practices by which science melds present

contexts with futurism, extrapolation, and promissory logics. Authors have engaged with ethical problems, fears about innovations gone awry, and pessimism about the prospects of technological development, all while critiquing views on gender, race, and sexuality, and subverting colonial ambitions while engaging postcolonial aspirations. At the same time, science fiction has engaged religious and spiritual views, both interacting with religious imaginaries and engaging with the role of religion in society and in relation to science.

In this course, we trace science fiction through history. We analyze how it has understood science and technology, war and colonialism, sex, race and gender, health and disease. We investigate how it has interacted with religion and influenced social and cultural attitudes. We will read major works in science fiction and understand how they live with and within us. Topics include: time travel, utopias and dystopias, race, gender, and sexuality, religion and culture, embodiment and disembodiment, posthumanism). In addition to novels and short stories, lectures will incorporate film, television, graphic novels, music videos, and other science fictional subgenres.

The course will be accompanied by a film series of major science fiction films and guest speakers (film series attendance is optional).

Scientific Sites (208323)

Peter Galison

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course aims to explore scientific-technical sites—places of research, production, teaching, testing, and disposal. Some may be historical (such as disused Cold War relics) others in current use. How are these places shaped by the work that goes in them, how do the sites, in return, condition the work? Our sources will be a mix of site visits, texts (e.g. historical, ethnographic) and films (documentary). Each student will produce both a paper and a short cell-phone filmed video (no experience, we will teach all you need). Open to undergraduates and graduates.

History of Science 203

Communities of Knowledge: Science, Religion and Culture in Medieval Europe and Islam (208127)

Ahmed Ragab

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

25

How did people understand nature in the Middle Ages? Is "premodern science" a contradiction in terms? What does it mean for science to be "religious"? How did medieval "Western" and "Islamic" civilization differ? Where and in what ways did they interact, and how did knowledge circulate between them?

This course offers a new account of the history of medieval science in Europe and the Middle East. Rejecting the traditional narrative that treats Arabic science only as a "bridge" between the achievements of Greek antiquity and the Scientific Revolution, we will study western Eurasia and northern Africa as a region with a long shared history, unified by the circulation of people, objects, and ideas. In the process, we will call into question the larger conceptual framework opposing "East" (in the sense of Muslim civilization) and "West" (in the sense of Latin Christian civilization).

We will also explore the ways in which the perspectives of Islam, Judaism, and Christianity led their practitioners to emphasize differing aspects of the bodies of knowledge that they jointly inherited from the ancient world.

Reading assignments will focus on primary sources—texts, images, and objects—viewed in the context of contemporary developments in religious, cultural, and political history. We will also draw on the resources of the Harvard Map Collection, the Collection of Historical Scientific Instruments, Houghton Library, and the Harvard Art Museums. Jointly offered in the Harvard Divinity School as HDS 3340.

Death and the Body in the Age of Plague (207909)

Hannah Marcus

2018 Fall (4 Credits)

Schedule: M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

Though we all will die, ideas and practices surrounding death have differed across time and space. This course will examine death and dead bodies in an era defined by epidemic and the ravages of disease. Our graduate seminar has three interrelated goals. First, we will engage with a range of fascinating primary sources about death and dead bodies in the late medieval and early modern world. Second, we will read the most important historical literature on the topics of death, dying, and the many scientific, political, and religious uses of dead bodies. The final goal of the course is for students to produce an original research paper. Most (but not all) of the sources on the syllabus will deal with Christian death, though I very much welcome students interested in considering these themes and pursuing research about different religious and geographical contexts.

Course Notes: NB: This course will meet for the first time on 17 September to not conflict with Rosh Hashanah. I will arrange other times in the first week of classes to discuss the syllabus with interested students.

History of Science 219

Critical Approaches to the Study of Science and Religion (208255)

Ahmed Ragab

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

The study of science and religion has been traditionally dominated by theoretical discussions centered

around the possibility of reconciling Science (capital S: often referring to Western Science) and Religion (capital R, often referring to specific traditions as understood through Western lens). In the process, science is presented as monolithic and ahistorical, and religion as equally fixed and unidimensional. This mode of investigation often fails to engage with questions of race, gender, sexuality and socioeconomic status, and is oblivious to the history of colonialism and to the concerns of indigenous populations. In this course, we deploy a critical lens in understanding and discussing different questions at the intersection of science and religion. Using a series of case studies, and engaging with a number of theoretical and methodological approaches derived from religious studies, history and philosophy of science and STS (Science, Technology and Society studies), postcolonial, critical race and queer theory, the course investigates the production of meanings and the making of intellectual, epistemic and political authority at the intersection of scientific and religious cultures.

The course is a research workshop with a focus on training and professionalization and an emphasis on methods tools in academic writing and research. Students work on specific projects throughout the semester from topic selection, question formation, to research and writing to produce a piece of academic writing such as research papers, conference papers, articles, book reviews, prospectus, syllabi, etc. Jointly offered in the Harvard Divinity School as HDS 3346.

Course Notes: This course has an additional section hour to be arranged.

The Opioid Epidemic in Historical Perspective (207699)

Allan Brandt

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

This course will trace the use of opiates and other addictive substances over the last century. The goal will be to understand the historical and social contexts of the emergence and significance of the current epidemic, as well as public policies designed to address its impact. The course will also explore the social, cultural, medical, and political determinants of the rise in opioid addiction and its associated morbidity and mortality. Students will be required to write an original research paper that will be part of a multi-authored anthology on the history of the epidemic.

Course Notes: Permission of the instructor is required to enroll in this course.

Latin America as Laboratory, 1492-Present (207952)

Gabriela Soto Laveaga

2018 Fall (4 Credits)

Schedule: M 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 25

Since 1492 outsiders have tried to explain and define the region we now call Latin America. In the fifteenth century the inhabitants of the Americas, often displayed as curiosities in the courts of Europe, served as a source of perplexed wonder. Were these humans? If so, what type? Questions about the humanity of natives led to philosophical debates about the nature of humankind and introduced the concept of race. Unknown flora, arriving on ships, sparked notions that expanded the fields of botany, biology, and

medicine. Ocean navigation and a new understanding of the relationship between land and water emerged when mariners experienced the hurricanes of the Caribbean. From royal botanical expeditions to astronomy European scientific knowledge expanded with the introduction of knowledge and raw material coming from the Americas.

In this graduate seminar students will broaden their understanding of knowledge circulation from the fifteenth to the twenty-first century; examine place and knowledge production; race, citizenship, and science; and how Latin America fueled Europe's Age of Reason and the Industrial and Scientific Revolutions. By placing Latin America in conversation with Europe we gain a fuller understanding of how science is produced and consumed.

2018 Fall (4 Credits)

Schedule:

T 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

25

About fifty years ago, George Basalla, a recent Harvard PhD graduate, published "The Spread of Western Science," describing stages in the diffusion of science around the world. What have we learned since then? Historians of science are now deftly showing how science is "situated" and fragmentary—but are we any more adroit at explaining how science travels and comes to appear unitary? This seminar surveys approaches to the spread of science—in the circumstances, often a somewhat enigmatic category—looking at diffusionist and circulatory models, actor-network theories, imperial and subaltern histories, area and borderlands studies, problems of exchange and transaction, issues of connection and translation. Drawing on anthropological insights, we will examine the applicability of frames such as contact zones and trading zones. Particular attention will be given to Indigenous and settler colonial perspectives. We will ask what postcolonial or decolonial science studies might become.

This course investigates the emergence of new types of surveillance fueled by big data. The premise of the course is that these urgent contemporary issues can begin to be better understood by use of historical

epistemological methods. In this spirit, first we will examine the question, "What is big data?" We will ask how it differs from other forms of knowledge, how it bears on the scientific method, and how we might best define it. Next the course will explore different historical forms of surveillance – comparing the totalized top-down forms of surveillance in, for example, East Germany, with new data-driven forms emerging today. Finally we will explore areas such as predictive policing and algorithmically-driven decision-making in many arenas and ask about their implications for freedom and subjection.

History of Science 281

Science and Technology in East Asia (207694)

Victor Seow

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

This graduate proseminar surveys developments in the field of science and technology in East Asia from the early modern period to the recent past. Through the critical reading of scholarship both classic and contemporary, we will familiarize ourselves with the main historiographical debates that have shaped the field, and think through the processes and politics involved in writing this history. We will also discuss ways that these debates can be brought into the classroom for undergraduate teaching. Topics we will cover include the Needham question, everyday technologies, natural history and systems of classification, scientific nationalism, and technoscience under communism and capitalism. Background knowledge in East Asian history expected and required.

Sources and Methods in the History of Technology (160503)

Matthew Hersch

2019 Spring (4 Credits)

Schedule:

W 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

25

Intended for graduate students, this seminar provides a comprehensive introduction to the field of history of technology and surveys its canonical works. Readings by authors like Thomas Hughes, Jennifer Light, and Fred Turner will explore the evolving histories of industrialization, computing, military and aerospace technologies, gender and technology, and other areas of student interest. Students will also gain experience working with primary sources, including archival documents, oral histories, popular media, memoirs, and material culture. At the conclusion of the term, each student will prepare a research prospectus suitable for a grant application or future work in the field.

Science, Power and Politics (122718)

Sheila Jasanoff

2018 Fall (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This seminar introduces students to the major contributions of the field of science and technology studies (STS) to the understanding of politics and policymaking in democratic societies.

Course Notes: Offered jointly with the Kennedy School as IGA-513. Interested undergraduates should send an email to Professor Jasanoff explaining their interest and qualifications before they come to class.

Class Notes: This course will meet for the first time on Wednesday, September 5.

Noah Feldman

2018 Fall (4 Credits)

Schedule: M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 24

In the heat of World War II, the state for the first time systematically contracted universities to advance science and technology to pursue the war effort. During the Cold War, the institutional and legal arrangements that facilitated the state-science relationship broadened to cover a vast range of disciplines and agencies, from the far reaches of theoretical physics to the most applied technologies. This course will explore the major, ongoing post-Cold War shift in this arrangement: corporations and foundations now play a powerful role in directing and supporting scientific inquiry. The seminar asks: How are the relations among state, science, for-profit corporations, and civil society changing? How do contemporary politics interplay with research funding from all sources? What is the new geography of technical-scientific work? What kind of work, what forms of knowledge are stressed or dropped? Who is engaged in its pursuit and how is it disseminated? How do law and (de-)regulation affect the newly emergent model, and how are they affected by it?

Course Notes: This course is jointly offered at Harvard Law School (course number 2565).

Enrollment limited to 24: Open both to students at Harvard Law School and the Faculty of Arts and Sciences.

House Seminars

Subject: Leverett House Seminar

Leverett House Seminar 75

(Mis)Understanding Islam Today (161256)

Bilal Malik

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course grapples with key controversies – suicide bombings, blasphemy, gender, Muslim minorities, Islamism—as a point of entry into understanding Muslim cultures and societies. Drawing on insights from Cultural Anthropology and related fields (Religious Studies, History, Government, Philosophy, Law), the course also encourages self-reflection on our own assumptions regarding religion, secularism, freedom, tolerance and violence. Finally, by dwelling on the case of cross-cultural (mis)understandings related to Islam, the course underscores that no matter what our personal objectives—social theorizing, developing policy, or being an engaged global citizen—there is value in understanding how historical and cultural contexts shape us all.

Course Notes:

Q-scores listed at <http://goo.gl/yKXrHE> and <https://goo.gl/vidcam>. No prior familiarity with Islam is required or assumed. This class is also offered as ANTHRO 1661. Students may not take both classes for credit. Eligible for GenEd (under new policies) and Anthro/ NELC/ Hist&Lit credit. Open to all concentrations/years. Meeting time to be finalized on enrolled students' preference. See course site for details, or email bmalik@fas.

Human Evolutionary Biology 1200

Neanderthals and Other Extinct Humans (160467)

Bridget Alex

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Over the past 100,000 years why did modern humans survive while other human lineages went extinct? This seminar will center on comparing modern humans to Neanderthals and other extinct humans using the genetic, fossil, and archaeological records. With a focus on science outreach and communication, students will create videos and activities for the public, to be shared in schools and museums.

Recommended Prep: Prerequisite: LS1B

Human Evolutionary Biology 1210

Research in Human Biomechanics and Physiology (127206)

Nicholas Holowka

2019 Spring (4 Credits)

Schedule:

M 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

Introduces students to experimental techniques used to investigate the musculoskeletal structure and physiology of humans. Students undertake a supervised research project in the Skeletal Biology and Biomechanics Laboratory. Students meet to introduce their project, discuss their work and progress, and to present their final results, as well as for several lectures on writing and presenting research findings. An extensive commitment of time in the laboratory is required. Grades are based on the work completed, the oral presentation, and a short research paper.

Course Notes: This course fulfills the research seminar concentration requirement for Human Evolutionary Biology

Recommended Prep: **Recommended: Life Sciences 2 or Human Evolutionary Biology 1420**

Richard Wrangham

Joseph Henrich

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course will examine the evolutionary origins, biological foundations, and psychology underlying human behaviors including kinship, sexuality, incest, parental love, xenophobia, status, homicide, warfare, culture, cooking, language, and religion. Using a comparative approach, we will contextualize human behavior by examining both studies of non-human primates, especially chimpanzees, and the full breadth of human diversity, including both ethnographic and experimental data from hunter-gatherers, agriculturalists, and—the most unusual of all—people from industrialized societies.

Course Notes:

This course is most relevant for freshmen and sophomores who have not yet declared a concentration in Human Evolutionary Biology, for HEB concentrators who have not yet taken courses in the evolution of behavior, or for other concentrators looking for an introduction to evolutionary theories of human behavior.

Graduate students interested in this course should enroll in HEB 2480.

This course fulfills the behavior subfield requirement for Human Evolutionary Biology.

Requirements:

Course open to Undergraduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
FAS: Final Assessment Category	Three-hour Exam

Human Evolutionary Biology 1323

The Science and History of Alcohol (205495)

Noreen Tuross

Linda M. Reynard

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 15

The course is an introduction to the chemistry, biochemistry and physiological impacts of alcohol use. We will explore the use of alcohol by other animals, including nonhuman primates and rodents. A historical perspective on human alcohol use will be woven into the scientific aspects.

Recommended Prep: LS1b or permission of instructor required for enrollment.

Additional Course Attributes:

Human Evolutionary Biology 1328

Evolutionary Medicine: Comparative Perspectives on Medical, Surgical and Psychiatric Illness (205490)

Barbara Natterson-Horowitz

2018 Fall (4 Credits)

Schedule: T 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap: 50

Heart attacks, breast cancer, anxiety and eating disorders occur across the animal kingdom. Taught by a physician, the course explores the species-spanning and evolutionary origins of medical, surgical, and psychiatric illnesses. A 'mini-medical school' format will be used to introduce students to ten forms of human pathology emphasizing the typical mechanistic explanations of disease causation offered by physicians followed by in depth evolutionary analyses. Both physical and mental illnesses will be explored across the animal kingdom with a special focus on how emerging awareness of psychopathology in animals can alter the perception (stigma) and treatment of mental illness in human beings.

Class Notes: This course will meet from 6:00-8:00pm.

Students will be required to attend 2 Grand Rounds lectures at Massachusetts General Hospital in Boston during the term. Students are free to choose the lectures that will best fit their schedules. A list of options will be provided during class.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1330

Primate Social Behavior (113837)

Isaac Schamberg

Christine Webb

2019 Spring (4 Credits)

Schedule: MW 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

A review of the behavioral interactions in natural primate populations, drawing on experimental, observational, and theoretical studies. Discussion of ecological, physiological, and developmental bases of primate social behavior, with special attention to the evolution of patterns of behavioral interactions among individuals of different age, sex, relatedness, and status. Topics include sexual conflict, sexual selection, and mating systems; care of offspring and other aid-giving; manipulative and cooperative aspects of communication; competition, dominance, and territoriality; and the evolution of social relationships.

Course Notes: This course fulfills the behavior concentration requirement for Human Evolutionary Biology.

Class Notes: This course will include a mandatory field trip to the Franklin Park Zoo at a date to be determined.

Course meets in Museum of Comparative Zoology (MCZ) Room 529.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1361

Hormones and Life History Physiology (203615)

Susan Lipson

2019 Spring (4 Credits)

Schedule: M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

A survey of human (especially female) life history physiology and the role of hormones in the orchestration of key transitions, the allocation of energy to optimize fitness, and the consequences for health and disease. Fundamental biology and questions that motivated research in the past will serve as foundations for the discussion of issues of current debate.

The seminar format means that all students will be expected to read and think about assigned readings and to actively engage in class discussions.

Course Notes: Prerequisite for enrollment: Human Evolutionary Biology 1310, "Hormones and Behavior," or Human Evolutionary Biology 1418, "Research Methods in Endocrinology," or with permission of instructor.

Requirements: Anti-req: Cannot be taken for credit if HEB 1351 already complete

Additional Course Attributes:

Attribute	Value(s)

Human Evolutionary Biology 1373

Explaining Beauty: The Hidden Functions Behind Aesthetics (208137)

Bethany Burum

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Why do people from some cultures find body modifications attractive that others find ugly? What makes a Picasso beautiful? Why are fashion trends constantly changing? This course will delve into the hidden functions that explain our aesthetic tastes, including what we find beautiful in the physical body, art, and fashion. Drawing on classic evolutionary theory, theories of cultural evolution, and game theory, we will seek to explain both aesthetic tastes that remain relatively constant, and those that differ dramatically across time and culture. This course will feature field trips to art museums and discussions with experts in different domains of aesthetics.

Human Evolutionary Biology 1386

Human Evolution & Human Health (210878)

Ian Wallace

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How and why did human bodies evolve to look and function the way they do, and what are the implications of our evolved biology for health in the modern world? Why do we develop diseases that our ancient ancestors managed to avoid, and how can evolutionary principles be applied to improving modern human health? To tackle these questions, this course begins by tracing the major transitions in human evolution, from the split between the human and chimpanzee lineages to the rise of modern humans. From this evolutionary perspective, we then examine the health consequences of several recent cultural and technological changes such as agriculture and industrialization and consider whether and how modern diseases are preventable.

Class Notes:

The lab for this course will meet for two hours per week between Monday and Wednesday.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam

Human Evolutionary Biology 1389

Coming of Age on Planet Earth (205493)

Barbara Natterson-Horowitz

2019 Spring (4 Credits)

Schedule:

T 0600 PM - 0845 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

The challenges of adult maturation are not unique to our species. Some young adult animals take risks and lose their lives, others respond to stress with eating problems or to traumatic first sexual encounters with subsequent dysfunction. The course will use a comparative approach to explore how young adult animals learn to be safe, how they acquire or lose status and rank, how they come of age sexually, and how they learn to survive and thrive on their own. The course will combine analysis of literature from scientific fields (behavioral ecology, endocrinology and evolutionary biology) and the humanities (coming of age short stories and novels) for a comparative analysis of the common challenges of maturation across the animal kingdom and in human life.

Additional Course Attributes:

Attribute	Value(s)

Human Evolutionary Biology 1392

What Game Theory Reveals About Social Behavior (208048)

Bethany Burum

2018 Fall (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What happens when the benefits of one strategy depend on the strategy chosen by another? From doing favors to driving on the right side of the road, this interdependence characterizes much of human social behavior, and game theory is the tool designed to reveal what results. This course will draw on models from game theory and evolutionary dynamics to explain some of the most puzzling aspects of our psychology, including why we speak indirectly, why people end up in feuds over trivial resources, and where our moral intuitions come from. No prior knowledge of game theory or evolutionary dynamics is required.

Class Notes:

For course "Q scores", please see scores for PSY 1578, a previously offered section of Game Theory with instructor Bethany Burum.

Human Evolutionary Biology 1401

Kinship, Conflict, & Behavior (211399)

Jennifer Kotler

2019 Spring (4 Credits)

Schedule:

M 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Do you always want to do exactly what your parents want you to do? Do you and your siblings always get along? When we think of evolutionary fitness, we often talk about increasing our own fitness by increasing the fitness of our genetic relatives, but if that's the case, why do we still not always get along? Part of the answer lies in the evolutionary and genetic history of human families. This course will dive into the concept of genomic imprinting, or what happens when the genes you inherit from your mom have been selected to do something different than the genes you inherit from your dad. We will discuss how this conflict plays out in terms of growth and development, pregnancy and reproduction, and psychology and behavior.

Class Notes:

This course meets in Museum of Comparative Zoology (MCZ) Room 529.

Recommended Prep:

Prerequisite: LS 1B or permission of the instructor.

Human Evolutionary Biology 1404

Human Adaptation (208047)

Neil Roach

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Humans are very weird primates. We walk on two legs, are the most ferocious predators alive, live in all corners of the globe, cook our food and are incredibly reliant on technology. This course will introduce students to human origins and ongoing debates about how natural selection acted to shape our past. We will focus our discussions on major transitions in our ancestors' sexual, dietary, technological and migratory behaviors.

Class Notes:

This course will meet from 3:00 pm to 5:00 pm in room MCZ 541.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1410

Gut Microbiome and Human Health (204010)

Rachel Carmody

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Microorganisms residing in the human gastrointestinal tract outnumber our own cells and together encode at least 100 times as many unique genes. In this research seminar, we explore gut microbial contributions to human physiology in states of health and disease. We consider the pivotal roles of the gut microbiota in digestion, detoxification, energy regulation, and immunity, and discuss emerging evidence for the microbial modulation of risks and/or treatment of metabolic syndrome, cardiovascular disease, cancer, and behavioral disorders. Students will be introduced to bench and bioinformatics techniques used to investigate gut microbial communities, allowing students to pilot projects that dovetail with topics discussed in seminar.

Course Notes:

This course will meet from 3:00pm - 5:00 pm on Thursdays.

This course fulfills the research seminar requirement for Human Evolutionary Biology.

Preference will be given to Human Evolutionary Biology concentrators fulfilling a research seminar requirement and Human Evolutionary Biology graduate students.

Class Notes:

This course will meet from 3:00pm - 5:00 pm on Thursdays.

Recommended Prep:

Life Sciences 2 or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Human Evolutionary Biology 1412

Human Energetics (205492)

Linda M. Reynard

2019 Spring (4 Credits)

Schedule: MWF 1030 AM - 1145 AM**Instructor Permissions:** Instructor**Enrollment Cap:** 10

In this course we will study human energy intake and expenditure, with a focus on sports. The course will also feature case studies of extreme endurance feats and modern-day and historical explorers/adventurers. Course activities will include lab or field-based measurements and seminar-style discussions

Course Notes: This seminar will count towards the HEB junior research seminar requirement.

Recommended Prep: An introductory level LS or Chemistry course are recommended for students interested in this course.

Additional Course Attributes:

Attribute	Value(s)

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Human Evolutionary Biology 1418

Research Methods in Endocrinology (110741)

Susan Lipson

2018 Fall (4 Credits)

Schedule: MWF 1030 AM - 1145 AM**Instructor Permissions:** Instructor**Enrollment Cap:** 8

An introduction to research in behavioral endocrinology (the study of how hormones and behavior are related), focusing on: 1) laboratory techniques (immunoassay) for the measurement of hormone levels (cortisol, and C-peptide) in saliva and urine, 2) study design strategies and data analysis methods, and 3) writing a scientific research paper.

Students complete original research projects, collecting samples, analyzing data on hormone levels and how they are related to various aspects of behavior and/or physiology, and presenting their results orally to the class and as a written research report.

Course Notes: This course includes a mandatory two-hour laboratory section per week (days/times to be arranged).

Lab safety training required (after enrollment).

This course fulfills the research seminar requirement for Human Evolutionary Biology.

Preference is given to junior HEB concentrators.

Recommended Prep: Human Evolutionary Biology 1310 or Life Sciences 2 or with permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students

Human Evolutionary Biology 1420

Human Evolutionary Anatomy (116069)

Neil Roach

2019 Spring (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

How does the human body function? How do our organs develop and grow? Why did we evolve this strange bipedal form? This course explores human anatomy, with an emphasis on the function, structure and evolution of the muscular, skeletal, nervous, circulatory, digestive and reproductive systems. Lectures are combined with small laboratory learning experiences and visits to the Harvard Medical School to study human cadavers.

Course Notes: This course fulfills the anatomy/physiology concentration requirement for Human Evolutionary Biology

Recommended Prep: Life Sciences 2 recommended, but not required

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1480

Building the Human Body (156174)

Terence Capellini

Neil Roach

2018 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

Humans and our primate relatives are incredibly variable. This variation results from natural selection operating on the developmental mechanisms that control anatomy and physiology. While these

mechanisms remain mostly undiscovered, we are beginning to understand these complex processes due to major advances in technology that have pushed the fields of genetics, genomics and developmental biology rapidly forward. This research-centered course explores these relationships in the context of the human paleontological record. We focus on the evolution and development of the musculoskeletal system, which includes the cranium, axial skeleton and limbs, and present studies that cast light on the developmental genetic mechanisms that underlie major transitions in human evolution.

Course Notes: This course fulfills the research seminar requirement for Human Evolutionary Biology and includes a mandatory laboratory section.

Class Notes: This course will meet in room MCZ 541.

Recommended Prep: LS1b (Genetics, Genomics, and Evolution). Introductory courses in paleoanthropology, anatomy helpful but not required.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

FAS Divisional Distribution	Science & Engineering & Applied Science

Human Evolutionary Biology 1600

Evolutionary Genetics of Complex Human Traits (161269)

Maryellen Ruvolo

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

An advanced seminar on complex human traits with a special focus on neurodevelopmental and other behavioral disorders. Topics will include schizophrenia, autism spectrum disorder, and Williams syndrome; links between genotype and phenotype; whether natural selection acts on underlying genetic loci; the role of gene-by-environment interactions; what we can learn about humans from model organisms; complicating factors in the analysis of complex traits; societal reactions to neural diversity; and prospects for the reconstruction of past human behavior from genomic evidence.

Course Notes: Auditing is not available for this course.

This course is appropriate for upper-level undergraduate students, as well as first and second year graduate students.

Recommended Prep: **REQUIRED** prerequisites: An A or B grade in Life Sciences 1b or a passing score on a pre-course quiz to assess mastery of genetics to be administered by the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Human Evolutionary Biology 1610

Genes and Human Adaptations (203909)

Maryellen Ruvolo

2019 Spring (4 Credits)

Schedule:

W 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

Natural selection produces genetic changes that make a population better able to reproduce and survive in an ever-changing environment, a process known as adaptation. We will examine the genetic bases of adaptations common to all humans (since divergence from our closest primate relatives) and those that have occurred in particular populations and individuals as humans dispersed around the globe and responded to the challenges of novel environments, diets, parasites, and infectious diseases, including those with potential biomedical relevance. We will focus on the genetic evidence for adaptations as detected from the signals left by natural selection on the genome, including polygenic traits. To place human adaptations in broader evolutionary perspective, we will investigate adaptations in diverse non-human species (e.g., mice, *Drosophila*, stickleback fish) where the genetic and genomic bases of adaptation are often known more completely. Lastly, we will consider how artificial selection compares with adaptation, using dog domestication as an example, and how climate change impacts the genetic basis of phenotypic traits.

Recommended Prep: REQUIRED prerequisites: An A or B grade in Life Sciences 1b

Requirements: Prerequisite: Life Sciences 1b with an A or B grade

Enrollment Cap:

14

What are the key concepts of Human Evolutionary Biology? Why and how should these concepts be shared with society and other fields like medicine, law, and education? This course will explore challenges, methods, and impacts of outreach in Human Evolutionary Biology. In the first unit we will identify socially relevant HEB concepts and discuss barriers to public understanding and acceptance of science. Then we will explore methods to overcome these barriers, meeting with professionals from museums, K-12 schools, and media organizations. In the final unit we will analyze case studies in which HEB concepts have been presented in public discourse, policy, and other fields. Throughout the semester, students will design, conduct, and evaluate an outreach project in collaboration with community partners. Possible projects including teaching a lesson to K-12 students or designing an activity at a museum.

For HEB Concentrators, HEB 1700 counts as Junior Research Seminar or upper-level HEB elective.

Class Notes: Class will meet in MCZ 529.

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

FAS: Course Level	Graduate Course

Human Evolutionary Biology 3000 Section: 009

Reading and Research (126279)

Noreen Tuross

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3000 Section: 010

Reading and Research (126279)

Richard Wrangham

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3000 Section: 010

Reading and Research (126279)

Richard Wrangham

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Special reading in selected topics under the direction of members of the department.

Course Notes: Consult the appropriate member of the department.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3001

Reading for General Examination (126280)

Terence Capellini

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Class Notes: Members of the Department

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3001

Reading for General Examination (126280)

Terence Capellini

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Class Notes: Members of the Department

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3001 Section: 002

Reading for General Examination (126280)

Rachel Carmody

2019 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3001 Section: 002

Reading for General Examination (126280)

Rachel Carmody

2018 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3001 Section: 004

Reading for General Examination (126280)

Joseph Henrich

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Individual reading in preparation for the general examination for the doctoral degree.****Course Notes:** Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3001 Section: 004

Reading for General Examination (126280)

Joseph Henrich

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Individual reading in preparation for the general examination for the doctoral degree.****Course Notes:** Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3001 Section: 005

Reading for General Examination (126280)

Daniel Lieberman

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Individual reading in preparation for the general examination for the doctoral degree.**

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3001 Section: 005

Reading for General Examination (126280)

Daniel Lieberman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3001 Section: 006

Reading for General Examination (126280)

David Pilbeam

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

FAS: Course Level	Graduate Course

Human Evolutionary Biology 3001 Section: 006

Reading for General Examination (126280)

David Pilbeam

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3001 Section: 008

Reading for General Examination (126280)

Maryellen Ruvolo

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3001 Section: 008

Reading for General Examination (126280)

Maryellen Ruvolo

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Individual reading in preparation for the general examination for the doctoral degree.

Course Notes: **Restricted to candidates for the doctoral degree and ordinarily to those who have completed at least one year in residence.**

Requirements: **Course open to Graduate Students Only**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3200

Graduate Seminar in Human Evolutionary Biology (126919)

Rachel Carmody

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Proseminar for Human Evolutionary Biology graduate students. Discussion of adaptations and the process of adaptation using examples from various areas of human evolutionary biology.

Course Notes: Required for first year graduate students in Human Evolutionary Biology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3300

Teaching Fellowship (212556)

Joseph Henrich

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

This course reflects time that a graduate student affiliated with Human Evolutionary Biology spends on teaching effort when the student serves as Teaching Fellow for a Faculty of Arts and Sciences course.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3300 Section: 002

Teaching Fellowship (212556)

Daniel Lieberman

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

This course reflects time that a graduate student affiliated with Human Evolutionary Biology spends on teaching effort when the student serves as Teaching Fellow for a Faculty of Arts and Sciences course.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3300 Section: 003

Teaching Fellowship (212556)

David Pilbeam

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

This course reflects time that a graduate student affiliated with Human Evolutionary Biology spends on teaching effort when the student serves as Teaching Fellow for a Faculty of Arts and Sciences course.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3300 Section: 004

Teaching Fellowship (212556)

Maryellen Ruvolo

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

This course reflects time that a graduate student affiliated with Human Evolutionary Biology spends on teaching effort when the student serves as Teaching Fellow for a Faculty of Arts and Sciences course.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3300 Section: 005

Teaching Fellowship (212556)

Noreen Tuross

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

This course reflects time that a graduate student affiliated with Human Evolutionary Biology spends on teaching effort when the student serves as Teaching Fellow for a Faculty of Arts and Sciences course.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3300 Section: 006

Teaching Fellowship (212556)

Rachel Carmody

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

This course reflects time that a graduate student affiliated with Human Evolutionary Biology spends on teaching effort when the student serves as Teaching Fellow for a Faculty of Arts and Sciences course.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3300 Section: 007

Teaching Fellowship (212556)

Terence Capellini

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

This course reflects time that a graduate student affiliated with Human Evolutionary Biology spends on teaching effort when the student serves as Teaching Fellow for a Faculty of Arts and Sciences course.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3300 Section: 008

Teaching Fellowship (212556)

Richard Wrangham

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

This course reflects time that a graduate student affiliated with Human Evolutionary Biology spends on teaching effort when the student serves as Teaching Fellow for a Faculty of Arts and Sciences course.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3300 Section: 009

Teaching Fellowship (212556)

Erin Hecht

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

This course reflects time that a graduate student affiliated with Human Evolutionary Biology spends on teaching effort when the student serves as Teaching Fellow for a Faculty of Arts and Sciences course.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3310

Experimental Methods in Human Evolutionary Biology (117873)

Terence Capellini

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a**Requirements:** Course open to Graduate Students Only**Additional Course Attributes:**

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3310

Experimental Methods in Human Evolutionary Biology (117873)

Terence Capellini

2018 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3310 Section: 002

Experimental Methods in Human Evolutionary Biology (117873)

Rachel Carmody

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3310 Section: 002

Experimental Methods in Human Evolutionary Biology (117873)

Rachel Carmody

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3310 Section: 004

Experimental Methods in Human Evolutionary Biology (117873)

Daniel Lieberman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3310 Section: 004

Experimental Methods in Human Evolutionary Biology (117873)

Daniel Lieberman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3310 Section: 005

Experimental Methods in Human Evolutionary Biology (117873)

Maryellen Ruvolo

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3310 Section: 005

Experimental Methods in Human Evolutionary Biology (117873)

Maryellen Ruvolo

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3310 Section: 006

Experimental Methods in Human Evolutionary Biology (117873)

Noreen Tuross

Linda M. Reynard

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3310 Section: 006

Experimental Methods in Human Evolutionary Biology (117873)

Noreen Tuross

Linda M. Reynard

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3310 Section: 007

Experimental Methods in Human Evolutionary Biology (117873)

Richard Wrangham

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Human Evolutionary Biology 3310 Section: 007

Experimental Methods in Human Evolutionary Biology (117873)

Richard Wrangham

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3337

Advanced Laboratory Methods in Human Endocrinology (116541)

Susan Lipson

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Intended for Human Evolutionary Biology graduate students engaged in laboratory research on human endocrinology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration

Human Evolutionary Biology 3337

Advanced Laboratory Methods in Human Endocrinology (116541)

Susan Lipson

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Course Notes: Intended for Human Evolutionary Biology graduate students engaged in laboratory research on human endocrinology.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Human Evolutionary Biology 3350

Laboratory Methods in Primate and Human Nutrition (126406)

Rachel Carmody

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3350

Laboratory Methods in Primate and Human Nutrition (126406)

Rachel Carmody

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3350 Section: 002

Laboratory Methods in Primate and Human Nutrition (126406)

Richard Wrangham

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Human Evolutionary Biology 3350 Section: 002

Laboratory Methods in Primate and Human Nutrition (126406)

Richard Wrangham

2018 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Independent laboratory study in the biochemical analysis of plant and animal foods, and of human and animal digestive physiology and feeding behavior.

Requirements: Course open to Graduate Students Only

Humanities

Subject: Humanities

Humanities 10A

A Humanities Colloquium: From Homer to Garcia Marquez (110440)

Louis Menand

Jill Lepore

Davíd L. Carrasco

Melissa M. McCormick

Jonathan Walton

Stephen Greenblatt

2018 Fall (4 Credits)

Schedule:

T 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

90

2,500 years of essential works, taught by six professors. Humanities 10a includes works by Homer, Plato, Aristotle, Sappho, Murasaki, Bernal Díaz, Shakespeare, Douglass, Du Bois, Woolf and García Márquez, as well as the Declaration of Independence and The Federalist Papers. One 75-minute lecture plus a 75-minute discussion seminar led by the professors every week. Students also receive instruction in critical writing one hour a week, in writing labs and individual conferences. Students also have opportunities to visit cultural venues and attend musical and theatrical events in Cambridge or Boston.

Course Notes:

The course is open only to freshmen. Students who complete Humanities 10a meet the General Education requirement in Aesthetic and Interpretive Understanding. Students who take both Humanities 10a and Humanities 10b fulfill the General Education requirements for Aesthetic and Interpretive Understanding and Culture and Belief as well as the College Writing requirement. This is the only course outside of Expository Writing that satisfies the College Writing requirement. No auditors. The course may not be taken Pass/Fail.

Class Notes:

The course has a two-step lottery and application process. This includes a mandatory first meeting for all interested students on Tuesday, September 4. See the course website for full details.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Aesthetic and Interpretive Understanding
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	Primarily for Undergraduate Students
FAS: Final Assessment Category	Three-hour Exam
FAS: General Education	Culture and Belief

A Humanities Colloquium: From Joyce to Homer (110441)

Stephen Greenblatt

Jay Harris
Sean Kelly
Deidre Lynch
Leah Whittington
Louis Menand

2019 Spring (4 Credits)

Schedule:

T 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

90

2,500 years of essential works, taught by six professors. Humanities 10b is open only to students who completed Humanities 10a in Fall 2018. Humanities 10b includes works by Joyce, Nietzsche, Mary Shelley, Austen, Pascal, Marguerite de Navarre, Dante, Augustine, Sophocles, and Homer, as well as the Arabian Nights. One 75-minute lecture plus a 75-minute discussion seminar led by the professors every week. Students continue to receive instruction in critical writing one hour a week, in writing labs and individual conferences. Students also have opportunities to visit cultural venues and attend musical and theatrical events in Cambridge or Boston.

Course Notes:

The course is open only to freshmen who have completed Humanities 10a. Students who take both Humanities 10a and Humanities 10b fulfill the General Education requirements for Aesthetic and Interpretive Understanding and Culture and Belief as well as the College Writing requirement. This is the only course outside of Expository Writing that satisfies the College Writing requirement. No auditors. The course may not be taken Pass/Fail.

Class Notes:

Only students who have satisfactorily completed the Fall 2018 term of Hum 10a are eligible to enroll in Hum 10b.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Humanities 11B

The Art of Listening (109855)

Alexander Rehding
John T. Hamilton

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Our world is steeped in sound, but we must learn to pay attention to listening. Sounds produce emotions, mark out spaces, call up memories; silence can be deafening; voice is a marker of identity. This course will sharpen our ears. We explore the sonic world through diverse readings and creative projects with sound. Discussions and assignments will open our minds (and ears) to listening practices, what the arts teach us about listening, and how we describe our experiences as listeners. We examine the relationships between sound and time, community, responsibility and attentiveness, and explore the soundscape in which we live.

Course Notes: Students will meet once weekly for two-hour sections.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Aesthetic and Interpretive Understanding
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

Linguistics 73C

Beginning ASL III (205111)

Andrew Bottoms

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

ASL III is designed for students who have completed ASL levels I and II. Students come to ASL III with an understanding of the fundamentals of ASL comprehension and production. These foundational courses (ASL I and II) introduce students to the language using a natural acquisition approach without explicit focus on grammatical rules. ASL III has an increased focus on the appropriate ways to converse with members the Deaf community. In this class, students will learn how to tell stories that adhere to the pragmatic and linguistic standards of the Deaf community with a focus on stylistically appropriate production. In this class, students will learn how to engage with members of the Deaf community in respectful and culturally appropriate ways. In addition to fostering language development, we will discuss the history and culture of the Deaf community.

Course Notes: This course is limited to 15 students.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 73D

Beginning ASL IV (205124)

Andrew Bottoms

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

ASL IV course will build on the foundation set in the first three levels of ASL and will focus on expressive language at a more advanced level. Students will have an opportunity to play with the language and explore different literary genres including: classifier stories, narratives of personal experience, visual vernacular and ASL poetry. Given that language learning doesn't happen in isolation, we will continue our exploration of Deaf culture and norms in order to develop a deeper understanding of the Deaf community. Growing out of this discussion, students will learn what it means to work as an ally to the Deaf community and avoid oppressive behavior. Other issues to be discussed include recognizing audism in oneself and others and how to appropriately respond.

Course Notes: This course is limited to 15 students.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

Language, Structure, and Cognition (122514)

Masoud Jafarali Jasbi

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What do the world's almost 7,000 languages have in common? Why do they show recurrent commonalities and principled differences? What do they reveal about the human ability for speaking and thinking? How do languages develop? How do they die? This course addresses these and related questions while introducing the languages of the world; their distribution, recurrent structural properties, and genetic classification; processes of language contact; and the relationship between language and the brain.

Kathryn Davidson on leave Fall 2018 Term. Instructor TBA

Tutorial - Senior Year (124754)

Diti Bhadra

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Individual tutorial with a faculty member for research and writing of the Linguistics honors thesis. An honors student who expects not to complete the thesis should consult with the Head Tutor about completing other substantial work to receive credit for the course.

Course Notes:

Both Linguistics 99a and 99b are required of all senior honors concentrators. Students who wish to enroll must obtain the signature of the Head Tutor.

Class Notes:

Hours to be arranged

Isabelle Charnavel and members of the Department

Requirements:

Course open to Senior Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 101

The Science of Language: An Introduction (110785)

Diti Bhadra

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course introduces components of study of language: phonology, morphology, syntax, and semantics. It presents the view that knowledge of language is best characterized as an unconsciously internalized set of abstract rules and principles. Evidence is drawn from a variety of signed and spoken languages, language universals, child language acquisition, language change, language games, and language disorders. SPRING TERM Instructor will be Diti Bhadra

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities
FAS: Final Assessment Category	Three-hour Exam
FAS: Core Curriculum	Social Analysis
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 102

Sentence Structure (121089)

Isabelle Charnavel

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What determines how the words in a sentence are put together in a given language? This course introduces the field of syntax, and the study of order and structure among words. Students will learn to construct and evaluate syntactic analyses and argumentation and will be exposed to variation and universals in the syntactic patterns found in natural languages. The course will also provide an introductory survey of syntactic phenomena, including question formation, the passive, anaphora, and agreement.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 104

Word Structure (125790)

Jonathan Bobaljik

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course investigates the nature and structure of words through the lens of contemporary morphological theory. What's in a word? Topics include the place of word formation in relation to phonological and syntactic phenomena, morphological processes, and the nature of the lexicon. Emphasis on the analysis of morphological phenomena in a range of typologically diverse languages.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 105

Sounds of Language (111954)

Kevin Ryan

2018 Fall (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What are the sounds of the world languages, and how are they organized to make words and sentences? Why are some sounds hard to hear or make? Is there a 'universal inventory' of sounds? This class introduces students to the sounds of the world's languages, and provides tools for studying them systematically. We will study the setup to transfer thoughts from one brain to another.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities

All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam

Linguistics 106

Knowledge of Meaning (117788)

Masoud Jafarali Jasbi

2019 Spring (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this course, we discuss how language encodes and creates meaning. We start by investigating the meaning of words and show how the meaning of sentences are derived from the meaning of their constituent words. In doing so, we closely examine the notion of truth. We ask: When is a statement true? When is it false? Can a statement be neither true nor false? Can it be both true and false? Finally we discuss how meaning is created when we use language in context. We discuss the role of social goals in creating linguistic interpretation. For example, why do people use polite language? Why do they lie? What is lying? Is it possible to lie by saying something true? Throughout this course, we grapple with these questions, as well as many others, that shed light on the nature of meaning in human language and reasoning.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 107

Introduction to Indo-European (110658)

Jay Jasanoff

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the historical study of the Indo-European languages, using the comparative method to arrive at a picture of the parent language of the family, Proto-Indo-European.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 111

First Language Acquisition (207774)

Masoud Jafarali Jasbi

2018 Fall (4 Credits)

Schedule:

R 1030 AM - 1230 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course investigates the process of acquiring language in childhood, through the lens of formal, corpus, and experimental linguistics. What is it about the human mind that makes it so good at learning language, and why are children such natural language learners? Topics will include syntax, semantics, morphology, and phonology, with an emphasis on different methods and argumentation related to understanding first language acquisition.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 112

Syntactic Theory I (114153)

C.-T. James Huang

2018 Fall (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course provides an intensive introduction to generative syntactic theory. Emphasis on syntactic argumentation. Topics center on foundational problems in the theory of syntax, including phrase structure of nominals and clauses, varieties of movement, locality, argument structure, ellipsis case agreement, and the syntax-semantics interface.

Recommended Prep: Linguistics 102, equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 114

Morphological Theory (111957)

Jonathan Bobaljik

2018 Fall (4 Credits)

Schedule: M 0945 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course provides an intensive introduction to morphological theory. Students will be introduced to current research and areas of debate in morphology proper, in morpho-syntax, and in morpho-phonology.

Recommended Prep: Ling 104, equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities

FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 115

Phonological Theory I (123439)

Kevin Ryan

2018 Fall (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is an intensive introduction to phonological theory and experimental work in phonology. This includes rule-based and constraint-based approaches, the typology of phonological processes (vowel and consonant harmony, assimilation and dissimilation, lenition and fortition, etc.), and phonological acquisition. Experimental approaches will deal with gradience, exceptionality, and productivity with an introduction to the quantitative methodologies that these phenomena require.

Recommended Prep: Linguistics 105, equivalent, or permission of the instructor

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 116

Semantic Theory I (122515)

Diti Bhadra

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introductory course on semantics in generative grammar. This course provides the formal tools to investigate the truth-conditional meanings of sentences. Topics covered include: compositionality, type theory and the fundamentals of clause structure, quantifier scope, and variable-binding.

Recommended Prep: Linguistics 106, equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

Linguistics 117R

Linguistic Field Methods (123611)

Jonathan Bobaljik

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In our study of human language we rely on data from different, sometimes underdescribed, languages. But how do we obtain reliable data? This course provides tools for the elicitation of phonological, morphological, and syntactic information, working with a native speaker of an unfamiliar language. We focus on the practical methodology and discuss problems of data collection and grammatical description in the field, with the aim to prepare students for their own potential fieldwork. SPRING TERM instructor will Jonathan Bobaljik

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

Linguistics 147

Semantics of Questions (203755)

Gennaro Chierchia

Diti Bhadra

2019 Spring (4 Credits)

Schedule:

R 1200 PM - 0300 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is an in-depth investigation into the semantics of questions. Several canonical approaches are introduced, including Categorical Semantics, Partition Semantics, and Alternative Semantics. Topics covered include composition of questions, variations of exhaustivity, uniqueness effects, quantificational variability effects, and mention some readings.

Recommended Prep: Linguistics 116 or equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 168

Introduction to Germanic Linguistics (122755)

Jay Jasanoff

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to the comparative and historical linguistics of the Germanic family, with emphasis on Gothic and the early medieval languages.

Recommended Prep: Elementary knowledge of German, or another Germanic language, or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 171

Structure of Chinese (115947)

C.-T. James Huang

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Introduction to the syntactic structure of Mandarin Chinese: the basic structure of clauses and nominal constituents; words, compounds, and phrases; word order and variations; selected special topics (passives, resultatives, ba-construction, topic and relativized structures, questions, anaphora, pro drop); syntactic structure and semantic interpretation.

Recommended Prep: Linguistics 102 in previous or current term or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 174

Tense and Aspect in Japanese (123350)

Wesley Jacobsen

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Examination of phenomena of tense and aspect in Japanese, with special attention to verbal semantics and the interaction of temporal categories with modality and transitivity.

Recommended Prep: Knowledge of Japanese equivalent to Japanese 120b, or familiarity with the linguistic structure of a non-Indo-European language, or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	For Undergraduate and Graduate Students

Linguistics 204R

Topics in Syntax (114737)

C.-T. James Huang

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Examination of current issues in syntactic theory with focus on topics of interest to the class.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	Primarily for Graduate Students

Linguistics 205R

The Syntax-Semantics Interface (114962)

Isabelle Charnavel

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An exploration of issues related to the architecture of the grammar, with emphasis on the structures that are interpreted at the semantic interface, and how they are derived.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Arts and Humanities

Linguistics 212

Syntactic Theory II (123099)

Isabelle Charnavel

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is designed to enable students to follow current research in syntax. Topics vary from year to year; may include head movement, case and agreement, anaphora, functional categories, ellipsis, argument structure, constraints on movement and derivations, and on form-meaning mappings.

Recommended Prep: Linguistics 112, equivalent, or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 215

Phonological Theory II (107809)

Kevin Ryan

2019 Spring (4 Credits)

Schedule: M 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course addresses topics of current interest in phonological theory, potentially including competing constraint grammar frameworks, learnability, naturalness biases, prosody, quantitative approaches (experimental or corpus-driven), variation, gradience, and the morphological interface.

Recommended Prep: Linguistics 105, equivalent, or permission of the instructor

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Arts and Humanities

Linguistics 216

Semantic Theory II (117103)

Gennaro Chierchia

2019 Spring (4 Credits)

Schedule: W 1000 AM - 1200 PM

Instructor Permissions: None

Enrollment Cap: n/a

Continuation of Linguistics 116. Designed to enable students to follow current research in semantics. Topics covered include: intensional contexts, indexicals, modalities, event based semantics, presuppositions, and formal theories of implicatures.

Recommended Prep: Linguistics 116, equivalent, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	Arts and Humanities
All: Cross Reg Availability	Available for Harvard Cross Registration

Linguistics 220AR

Advanced Indo-European (112991)

Jay Jasanoff

2019 Spring (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

Topics in Indo-European comparative grammar, including Anatolian. Conducted as a seminar.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Arts and Humanities
FAS: Course Level	Primarily for Graduate Students

Mathematics

Subject: Mathematics

Mathematics ESPA

Emerging Scholars: Problem Solving Exploration (204095)

Dusty Grundmeier

2018 Fall (2 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In his seminal work from 1945, *How to Solve It*, George Polya introduced principles of mathematical problem solving that are widely applicable to problems in science and engineering. This year-long class focuses on building a powerful and portable problem-solving and modeling tool kit while bridging the divide between mathematics and science courses. The second semester will be organized around projects in areas of student interest. Both Math ESPA and Math ESPB must be taken in the same academic year to receive credit.

Additional Course Attributes:

Attribute	Value(s)
Full Year Course	Indivisible Course
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics MA

Introduction to Functions and Calculus I (111161)

Brendan Kelly

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

The study of functions and their rates of change. Fundamental ideas of calculus are introduced early and used to provide a framework for the study of mathematical modeling involving algebraic, exponential, and logarithmic functions. Thorough understanding of differential calculus promoted by year long reinforcement. Applications to biology and economics emphasized according to the interests of our students.

Course Notes:

This is a lecture course taught in small sections. In addition, participation in two one-hour workshops is required each week. This course, when taken together with Mathematics Mb, can be followed by Mathematics 1b. Mathematics Ma and Mb together cover all the material in Mathematics 1a (and more).

Class Notes:

Required first meeting in Fall: Tuesday, September 4, 8:15 am, Science Center C

Fall Section Times: MWF 9:00, MWF 10:30, MWF 12, MWF 1:30, MWF 3 with sufficient enrollment.

Brendan Kelly, Rosalie Belanger-Rioux, Matthew Demers, David Freund, Jill Guerra, Caroline Junkins, Katherine Penner, Hakim Walker, and members of the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Core Curriculum	Quantitative Reasoning
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: General Education	Empirical and Mathematical Reasoning
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics MB

Introduction to Functions and Calculus II (113464)

Brendan Kelly

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Continued investigation of functions and differential calculus through modeling; an introduction to integration with applications; an introduction to differential equations. Solid preparation for Mathematics 1b.

Course Notes:

This is a lecture course taught in small sections. In addition, participation in two one-hour workshops is required each week. This

course, when taken together with Mathematics Ma, can be followed by Mathematics 1b. Mathematics Ma and Mathematics Mb together cover all the material in Mathematics 1a (and more).

Class Notes:

Required first meeting in Spring: Monday January 28, 8:15 am, Science Center A

Spring Section Times: MWF 9:00, MWF 10:30, MWF 12, MWF 1:30, and MWF 3:00 with sufficient enrollment.

Brendan Kelly, Rosalie Belanger-Rioux, Emily Braley, Matthew Demers, David Freund, Robin Gottlieb, Caroline Junkins, Katherine Penner, Hakim Walker, and members of the Department.

Requirements:

Prerequisite: Mathematics MA

Additional Course Attributes:

Mathematics 1A

Introduction to Calculus (123680)

Jill Guerra

2019 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The development of calculus by Newton and Leibniz ranks among the greatest achievements of the past millennium. This course will help you see why by introducing: how differential calculus treats rates of change; how integral calculus treats accumulation; and how the fundamental theorem of calculus links the two. These ideas will be applied to problems from many other disciplines.

Course Notes:

In the fall, Math 1a is taught in sections of 20-30 students. In the spring, Math 1a is taught in a larger lecture format. Participation in a weekly 90-minute workshop is required. Mathematics Ma and Mb together cover all of the material in Mathematics 1a (and more).

Class Notes:

Spring section time: M.W.F. at 10:30 and weekly lab section to be arranged.

Jill Guerra

Recommended Prep:

A solid background in precalculus.

Additional Course Attributes:

Attribute	Value(s)
FAS: Core Curriculum	Quantitative Reasoning
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 1B

Calculus, Series, and Differential Equations (111010)

Dusty Grundmeier

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Speaking the language of modern mathematics requires fluency with the topics of this course: infinite series, integration, and differential equations. Model practical situations using integrals and differential equations. Learn how to represent interesting functions using series and find qualitative, numerical, and analytic ways of studying differential equations. Develop both conceptual understanding and the ability to apply it.

Course Notes: This is a lecture taught in small sections.

Class Notes: Required first meeting in Spring: Monday, January 28, 8:15 am, Science Center D

Spring Section Times: MWF 9:00, MWF 10:30, MWF 12:00, MWF 1:30, and MWF 3:00 with sufficient enrollment.

Dusty Grundmeier, David Freund, Caroline Junkins, Hakim Walker, and members of the Department.

Recommended Prep: Mathematics 1a or Ma and Mb; or 5 on the AB advanced placement test; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 18

Multivariable Calculus for Social Sciences (125396)

Yu-Wen Hsu

2018 Fall (4 Credits)

Schedule:

MWF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Focus on concepts and techniques of multivariable calculus most useful to those studying the social sciences, particularly economics: functions of several variables; partial derivatives; directional derivatives and the gradient; constrained and unconstrained optimization, including the method of Lagrange multipliers. Covers linear and polynomial approximation and integrals for single variable and multivariable functions; modeling with derivatives. Covers topics from Math 21a most useful to social sciences.

Course Notes:

Mathematics 21b can be taken before or after Mathematics 18. Examples draw primarily from economics and the social sciences, though Mathematics 18 may be useful to students in certain natural sciences. Students whose main interests lie in the physical sciences, mathematics, or engineering should consider Math or Applied Math 21a.

Recommended Prep:

Mathematics 1b or equivalent, or a 5 on the BC Advanced Placement Examination in Mathematics.

Requirements:

Anti-Requisite: Not to be taken in addition to Mathematics 21a or Applied Mathematics 21a

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Quantitative Reasoning
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 19A

Modeling and Differential Equations for the Life Sciences (110596)

John Cain

2018 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Considers the construction and analysis of mathematical models that arise in the life sciences, ecology and environmental life science. Introduces mathematics that include multivariable calculus, differential equations in one or more variables, vectors, matrices, and linear and non-linear dynamical systems. Taught via examples from current literature (both good and bad).

Course Notes: This course is recommended over Math 21a for those planning to concentrate in the life sciences and ESPP. Can be taken with or without Mathematics 21a,b. Students with interests in the social sciences and economics might consider Mathematics 18. This course can be taken before or after Mathematics 18.

Recommended Prep: A course in one variable calculus preferably at the level of Mathematics 1b.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: General Education	Empirical and Mathematical Reasoning
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Undergraduate Students
FAS: Core Curriculum	Quantitative Reasoning

Mathematics 19B

Linear Algebra, Probability, and Statistics for the Life Sciences (122219)

Rosalie Belanger-Rioux

2019 Spring (4 Credits)

Schedule: MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Probability, statistics and linear algebra with applications to life sciences, chemistry, and environmental life sciences. Linear algebra includes matrices, eigenvalues, eigenvectors, determinants, and applications to probability, statistics, dynamical systems. Basic probability and statistics are introduced, as are standard models, techniques, and their uses including the central limit theorem, Markov chains, curve fitting, regression, and pattern analysis.

Course Notes: This course is recommended over Math 21b for those planning to concentrate in the life sciences and ESPP. Can be taken with Mathematics 21a. Students who have seen some multivariable calculus can take Math 19b before Math 19a.

Recommended Prep: A course in one variable calculus preferably at the level of Mathematics 1b.

Requirements: Not to be taken in addition to Mathematics 21b or Applied Mathematics 21b.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Core Curriculum	Quantitative Reasoning
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 21A

Multivariable Calculus (119196)

Stepan Paul

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

To see how calculus applies in practical situations described by more than one variable, we study: Vectors, lines, planes, parameterization of curves and surfaces, partial derivatives, directional derivatives and the gradient, optimization and critical point analysis, including constrained optimization and the Method of Lagrange Multipliers, integration over curves, surfaces and solid regions using Cartesian, polar, cylindrical, and spherical coordinates, divergence and curl of vector fields, and the Green's, Stokes's, and Divergence Theorems.

Course Notes: This is a lecture taught in small sections. May not be taken for credit by students who have passed Applied Mathematics 21a. Activities using computers to calculate and visualize applications of these ideas will not require programming experience.

Class Notes: Required first meeting in Spring: Monday January 28, 8:15 am, Science Center C

Spring Section Times: MWF 9:00, MWF 10:30, MWF 12, MWF 1:30, and MWF 3:00 with sufficient enrollment.

Stepan Paul, Matthew Demers, Yu-Wen Hsu, Drew Zemke, and members of the Department.

Recommended Prep: Mathematics 1b or an equivalent background in mathematics.

Requirements: Anti-requisite: Not to be taken in addition to AM21a.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS: Core Curriculum	Quantitative Reasoning

Mathematics 21A

Multivariable Calculus (119196)

Janet Chen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

To see how calculus applies in practical situations described by more than one variable, we study: Vectors, lines, planes, parameterization of curves and surfaces, partial derivatives, directional derivatives and the gradient, optimization and critical point analysis, including constrained optimization and the Method of Lagrange Multipliers, integration over curves, surfaces and solid regions using Cartesian, polar, cylindrical, and spherical coordinates, divergence and curl of vector fields, and the Green's, Stokes's, and Divergence Theorems.

Course Notes: This is a lecture taught in small sections. May not be taken for credit

by students who have passed Applied Mathematics 21a. Activities using computers to calculate and visualize applications of these ideas will not require programming experience.

Class Notes: Required first meeting in Fall: Wednesday, September 5, 8:15 am, Science Center B

Fall Section Times: MWF 9:00, MWF 10:30, MWF 12, MWF 1:30, and MWF 3:00 with sufficient enrollment.

Janet Chen, Jameel Al-Aidroos, Brendan Kelly, Yu-Wen Hsu, Stepan Paul, Drew Zemke, and members of the Department.

Recommended Prep: Mathematics 1b or an equivalent background in mathematics.

Requirements: Anti-requisite: Not to be taken in addition to AM21a.

Mathematics 21B

Linear Algebra and Differential Equations (110989)

Janet Chen

2019 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Matrices provide the algebraic structure for solving myriad problems across the sciences. We study matrices and related topics such as linear transformations and linear spaces, determinants, eigenvalues, and eigenvectors. Applications include dynamical systems, ordinary and partial differential equations, and an introduction to Fourier series.

Course Notes: This is a lecture taught in small sections. May not be taken by students who have passed Applied Mathematics 21b.

Class Notes: Required first meeting in Spring: Monday, January 28, 8:15 am, Science Center B

Spring Section Times: MWF 9:00, MWF 10:30, MWF 12:00, MWF 1:30, and MWF 3:00 with sufficient enrollment.

Janet Chen, Jameel Al-Aidroos, Ana Balibanu, Jill Guerra, Yu-Wen Hsu, Sebastien Picard, Sebastien Vasey and members of the Department.

Recommended Prep: Mathematics 1b or an equivalent background in mathematics. Mathematics 21a is commonly taken before Mathematics 21b, but is not a prerequisite, although familiarity with partial derivatives is useful.

Requirements: Anti-requisite: Not to be taken in addition to Math 19b or AM 21b.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: General Education	Empirical and Mathematical Reasoning

Mathematics 22A

Vector Calculus and Linear Algebra I (207485)

Oliver Knill

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course covers multivariable calculus and linear algebra for students interested in mathematical sciences. It covers the same topics as Mathematics 21, but does so with more rigor. Students are taught techniques of proof and mathematical reasoning. The workload and content is comparable with the Mathematics 21 sequence. But unlike the latter, the linear algebra and calculus are more interlinked.

Course Notes:

Students in Mathematics 22 are required to participate in a weekly class length workshop dedicated to proof aspects (the schedule of workshop times will be finalized after the first class meeting).

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Empirical and Mathematical Reasoning

Mathematics 23A

Linear Algebra and Real Analysis I (111695)

Paul Bamberg

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

45

Linear algebra: vectors, linear transformations and matrices, scalar and vector products, basis and dimension, eigenvectors and eigenvalues, including an introduction to the R scripting language. **Single-variable real analysis:** sequences and series, limits and continuity, derivatives, inverse functions, power series and Taylor series. **Multivariable real analysis and calculus:** topology of Euclidean space, limits, continuity, and differentiation in n dimensions, inverse and implicit functions, manifolds, Lagrange multipliers, path integrals, div, grad, and curl. Emphasis on topics that are applicable to fields such as physics, economics, and computer science, but students are also expected to learn how to prove key results.

Course Notes:

Students are expected to watch videos of the lectures from Fall 2015 before attending class. Weekly two-hour classes will consist of a one-hour seminar in which students present key definitions and proofs and a one-hour activity-based session in which students work in small groups to solve problems. Students are expected to continue in either Mathematics 23b (recommended for students who are thinking of concentrating in mathematics, the physical sciences, or engineering) or Mathematics 23c (recommended for students who are not sure of their concentration, or who are thinking about a concentration in the social sciences, economics, computer science, life sciences or data science). Either alternative will provide a solid foundation for a concentration in mathematics or any field that uses mathematics.

Class Notes:

Required first meeting: Tuesday, September 4, 8:15 am Science Center A.

Recommended Prep:

Mathematics 1b or a grade of 4 or 5 on the Calculus BC Advanced Placement Examination, plus an interest both in proving mathematical results and in using them. No background in linear algebra, real analysis, or multivariable calculus is assumed.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 23A Section: 002

Linear Algebra and Real Analysis I (111695)

Paul Bamberg

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

96

Linear algebra: vectors, linear transformations and matrices, scalar and vector products, basis and dimension, eigenvectors and eigenvalues, including an introduction to the R scripting language. Single-variable real analysis: sequences and series, limits and continuity, derivatives, inverse functions, power series and Taylor series. Multivariable real analysis and calculus: topology of Euclidean space, limits, continuity, and differentiation in n dimensions, inverse and implicit functions, manifolds, Lagrange multipliers, path integrals, div, grad, and curl. Emphasis on topics that are applicable to fields such as physics, economics, and computer science, but students are also expected to learn how to prove key results.

Course Notes: Students are expected to watch videos of the lectures from Fall 2015 before attending class. Weekly two-hour classes will consist of a one-hour seminar in which students present key definitions and proofs and a one-hour activity-based session in which students work in small groups to solve problems. Students are expected to continue in either Mathematics 23b (recommended for students who are thinking of concentrating in mathematics, the physical sciences, or engineering) or Mathematics 23c (recommended for students who are not sure of their concentration, or who are thinking about a concentration in the social sciences, economics, computer science, life sciences or data science). Either alternative will provide a solid foundation for a concentration in mathematics or any field that uses mathematics.

Class Notes: Required first meeting: Tuesday, September 4, 8:15 am, Science Center A.

Recommended Prep: Mathematics 1b or a grade of 4 or 5 on the Calculus BC Advanced Placement Examination, plus an interest both in proving mathematical results and in using them. No background in linear algebra, real analysis, or multivariable calculus is assumed.

Mathematics 23B

Linear Algebra and Real Analysis II (145010)

Paul Bamberg

2019 Spring (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A rigorous, integrated treatment of linear algebra and multivariable calculus. Topics: Riemann and Lebesgue integration, determinants, change of variables, volume of manifolds, differential forms, and exterior derivative. Stokes's theorem is presented both in the language of vector analysis (div, grad, and curl) and in the language of differential forms.

Course Notes: Mathematics 23b is a sequel to Mathematics 23a, recommended for students who are thinking of concentrating in mathematics, the physical sciences, or engineering. Students are expected to watch

videos of the lectures from spring 2016 before attending class. Weekly two-hour classes will consist of a one-hour seminar in which students present key definitions and proofs and a one-hour activity-based session in which students work in small groups to solve problems.

Class Notes: Required first meeting: Monday, January 28, 8:15 am, Science Center E.

Recommended Prep: Mathematics 23a.

Requirements: Prerequisite: MATH 23A OR (MATH 21A AND MATH 21B) AND (Not to be taken in addition to MATH 23C)

Additional Course Attributes:

Attribute	Value(s)
FAS: Core Curriculum	Quantitative Reasoning
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 23C

Mathematics for Computation, Statistics, and Data Science (205386)

Paul Bamberg

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Proof strategies and logic. Sets, countability, sigma fields, and axiomatic foundations of probability. Summation of series and evaluation of multiple integrals, with emphasis on calculation of expectation and variance. Abstract vector spaces and inner product spaces, with applications to analysis of large datasets. Key functions and theorems of mathematical statistics. A brief introduction to classical vector calculus as used in electromagnetic theory. Students will learn to use some of the statistical and graphical display tools in the R script language.

Course Notes: This course is a sequel to Mathematics 23a, recommended for students who are not sure of their concentration or who are thinking about a concentration in the social sciences, economics, computer science, life sciences or data science. Graduate students wishing to take this course for credit should speak with Dr. Bamberg to arrange enrollment in Mathematics 370 instead.

Class Notes: Required first meeting: Monday, January 28, 8:15 am, Science Center E.

Recommended Prep: Mathematics 23a or Mathematics 21a and 21b. The latter option is for seniors who are preparing for graduate programs in statistics, computer science, or data science.

Requirements: Prerequisite: MATH 23A OR (MATH 21A AND MATH 21B) AND (Not to be taken in addition to MATH 23B)

Additional Course Attributes:

Attribute	Value(s)

Mathematics 25A

Theoretical Linear Algebra and Real Analysis I (110808)

Bena Tshishiku

2018 Fall (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A rigorous treatment of linear algebra. Topics include: Construction of number systems; fields, vector spaces and linear transformations; eigenvalues and eigenvectors, determinants and inner products. Metric spaces, compactness and connectedness.

Course Notes: Expect to spend a lot of time doing mathematics.

Class Notes: Should not be taken for credit after the freshman year without permission from the Mathematics Director of Undergraduate Studies.

Recommended Prep: 5 on the Calculus BC Advanced Placement Examination and some familiarity with writing proofs, or the equivalent as determined by the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	Primarily for Undergraduate Students

Mathematics 25B

Theoretical Linear Algebra and Real Analysis II (110855)

Bena Tshishiku

2019 Spring (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A rigorous treatment of basic analysis. Topics include: convergence, continuity, differentiation, the Riemann integral, uniform convergence, the Stone-Weierstrass theorem, Fourier series, differentiation in several variables. Additional topics, including the classical results of vector calculus in two and three dimensions, as time allows.

Course Notes: Expect to spend a lot time doing mathematics.

Class Notes: Should not be taken for credit after the freshman year without

permission from the Mathematics Director of Undergraduate Studies.

Requirements:

Prerequisite: Mathematics 25A OR Mathematics 55A

Additional Course Attributes:

Attribute	Value(s)

Mathematics 55A

Studies in Algebra and Group Theory (113627)

Joseph D. Harris

2018 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

A rigorous introduction to abstract algebra, including group theory and linear algebra. This course covers the equivalent of Mathematics 25a and Mathematics 122, and prepares students for Mathematics 123 and other advanced courses in number theory and algebra. (A course in analysis such as Mathematics 25b or 55b is recommended for Spring semester.)

Course Notes:

Mathematics 55a is an intensive course for students who are comfortable with abstract mathematics. (Students without this background will gain it and learn the material from Math 55a,b in other courses by continuing into the Mathematics Concentration as sophomores.) Students can switch between Mathematics 55a and either Mathematics 25a, 23a, 22a, 21a during the first three weeks without penalty.

Recommended Prep:

Familiarity with proofs and abstract reasoning; and commitment to a fast moving course.

Additional Course Attributes:

Attribute	Value(s)

Sets, Groups and Topology (122943)

Sebastien Vasey

2018 Fall (4 Credits) **Schedule:** MF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

An introduction to rigorous mathematics, axioms, and proofs, via topics including set theory, symmetry groups, and low-dimensional topology.

Course Notes: Familiarity with algebra, geometry and/or calculus is desirable. Students who have already taken Mathematics 22a,b, 23a,b, 25a,b or 55a,b should not take this course for credit. This course given fall term and repeated spring term.

Recommended Prep: An interest in mathematical reasoning. Acquaintance with algebra, geometry and/or calculus is desirable. Students who have already taken Math 25a,b or 55a,b should not take this course for credit.

Requirements: Anti-Req: Not to be taken in addition to Mathematics 23a,b or 25a,b or 55a,b.

Mathematics 102

Much Ado About Everything: The Mathematics of Leonhard Euler (207544)

William Dunham

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The focus of this course is Leonhard Euler (1707-1783), one of history's greatest mathematicians. After surveying 16th and 17th century results that underlay his work, we consider Euler's contributions to number theory, calculus, algebra, combinatorics, and other fields. The course has historical and biographical elements, but its primary objective is to introduce students to rigorous mathematics through the work of an undisputed master.

Recommended Prep: Prerequisite: The equivalent of Mathematics 1a, 1b or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 110

Vector Space Methods for Differential Equations (126610)

Christian Brennecke

2019 Spring (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Develops the theory of inner product spaces, both finite-dimensional and infinite-dimensional, and applies it to a variety of ordinary and partial differential equations. Topics: existence and uniqueness theorems, Sturm-Liouville systems, orthogonal polynomials, Fourier series, Fourier and Laplace transforms, eigenvalue problems, and solutions of Laplace's equation and the wave equation in the various coordinate systems.

Recommended Prep: Mathematics 22a,b, 23a,b or 25a,b or Mathematics 19a,b or 21a,b plus any Mathematics course at the 100 level; or an equivalent background in Mathematics.

Additional Course Attributes:

Mathematics 112

Introductory Real Analysis (109817)

Denis Auroux

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to mathematical analysis and the theory behind calculus. An emphasis on learning to understand and construct proofs. Covers limits and continuity in metric spaces, uniform convergence and spaces of functions, the Riemann integral.

Recommended Prep: Mathematics 19a,b or 21a,b and either an ability to write proofs or concurrent enrollment in Mathematics 101 or 102; or an equivalent background in mathematics.

Requirements: Anti-Req: Not to be taken in addition to Mathematics 23a,b or 25a,b or 55a,b.

Additional Course Attributes:

Attribute	Value(s)

Mathematics 116

Real Analysis, Convexity, and Optimization (118302)

Marius Lemm

2018 Fall (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Develops the theory of convex sets, normed infinite-dimensional vector spaces, and convex functionals and applies it as a unifying principle to a variety of optimization problems such as resource allocation, production planning, and optimal control. Topics include Hilbert space, dual spaces, the Hahn-Banach theorem, the Riesz representation theorem, calculus of variations, and Fenchel duality. Students will be expected to understand and come up with proofs of theorems in real and functional analysis.

Recommended Prep: Mathematics 22a,b, 23a,b or 25a,b or 55a,b; or Mathematics 21a,b plus at least one other more advanced course in mathematics; or an equivalent background in mathematics.

Additional Course Attributes:

Probability and Random Processes with Economic Applications (127947)

Paul Bamberg

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A self-contained treatment of the theory of probability and random processes with specific application to the theory of option pricing. Topics: axioms for probability, calculation of expectation by means of Lebesgue integration, conditional probability and conditional expectation, martingales, random walks and Wiener processes, and the Black-Scholes formula for option pricing. Students will work in small groups to investigate applications of the theory and to prove key results.

Additional Course Attributes:

Mathematics 121

Linear Algebra and Applications (120228)

Alexander Kupers

2018 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Real and complex vector spaces, linear transformations, determinants, inner products, dual spaces, and eigenvalue problems. Applications to some or all of the following: Geometry, systems of linear differential equations, optimization, and Markov processes. This course emphasizes learning to understand and write rigorous mathematics.

Recommended Prep: Mathematics 19b or 21b or an equivalent background in mathematics.

Requirements: Anti-req: Not to be taken in addition to Mathematics 22b, 23a or 25a or 55a.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 124

Number Theory (111533)

Cliff Taubes

2018 Fall (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Factorization and the primes; congruences; quadratic residues and reciprocity; continued fractions and approximations; Pell's equation; selected Diophantine equations; theory of integral quadratic forms. Also, selected applications to coding, introduction to elliptic curves and introduction to zeta functions if time permits.

Recommended Prep: Mathematics 101 or 122 or 25a or 23a; or 55a which can be taken concurrently; or an equivalent experience and comfort level with abstract mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students

FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 131

Topological Spaces and Fundamental Group (111458)

Brooke Ullery

2018 Fall (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

First, an introduction to abstract topological spaces, their properties (compactness, connectedness, metrizable) and their corresponding continuous functions and mappings. Then, an introduction to algebraic topology including homotopy theory, fundamental groups and covering spaces.

Recommended Prep: Some acquaintance with metric space topology as taught in Mathematics 22a,b, 23a,b, 25a,b, 55a,b, 101, 102, or 112; and with groups as taught in Mathematics 101, 122 or 55a.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Mathematics 132

Differential Topology (123212)

Alexander Kupers

2019 Spring (4 Credits)

Schedule:

WF 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Differential manifolds, smooth maps and transversality. Winding numbers, vector fields, index and degree. Differential forms, Stokes' theorem, introduction to cohomology.

Recommended Prep: Mathematics 22a,b, 23a,b or 25a,b or 55a,b or 112; or an equivalent background in mathematics.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Mathematics 141A

Mathematical Logic I (207500)

Sebastien Vasey

2018 Fall (4 Credits)

Schedule:

MF 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to mathematical logic focusing on the fundamentals of first-order logic (language, axioms, completeness theorem, etc.) and the basic results of model theory (compactness), Lowenheim-Skolem, omitting typesetc.

Recommended Prep: A previous Mathematics course at the level of Mathematics 19a,b, 21a, b, or a higher number. For students from Mathematics 19a,b or 21ab, previous enrollment in Mathematics 101 or 102 or 112, or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students

Mathematics 152

Discrete Mathematics (116191)

Paul Bamberg

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

An introduction to finite groups, finite fields, finite geometry, finite topology, combinatorics, graph theory, and (for section 2 only) elementary algebraic topology. A recurring theme of the course is the symmetry group of the regular icosahedron. Elementary category theory will be introduced as a unifying principle. Taught in a seminar format: students will gain experience in presenting proofs at the blackboard.

Course Notes:

Covers material used in Computer Science 121 and Computer Science 124. Enrollment limited to 16.

Recommended Prep:

**For section 1: Mathematics 19b or 21b. Previous experience with proofs is not required.
For section 2: Mathematics 23a or 25a or an equivalent background in mathematics that includes experience with proofs.**

Requirements:

Not to be taken in addition to Computer Science 20, Mathematics 55a/b or Mathematics 122.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Probability Theory (113811)

Aukosh Jagannath

2019 Spring (4 Credits)

Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to probability theory. Discrete and continuous random variables; distribution and density functions for one and two random variables; conditional probability. Generating functions, weak and strong laws of large numbers, and the central limit theorem. Geometrical probability, random walks, and Markov processes.

Recommended Prep: A previous mathematics course at the level of Mathematics 19ab, 21ab, or a higher number. For students from 19ab or 21ab, previous or concurrent enrollment in Math 101 or 102 or 112 may be helpful. Freshmen who did well in Math 22a, 23a, 25a or 55a fall term are also welcome to take the course.

Combinatorics (116196)

Lauren Williams

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to algebraic combinatorics that comes from the representation theory of the symmetric group. We will start with a quick overview of the representation theory of finite groups and then cover topics such as Young tableaux, Specht modules, the hook-length formula, symmetric functions, the Littlewood-Richardson rule, the RSK correspondence, etc.

Recommended Prep:

Prerequisites: linear algebra and abstract algebra. Familiarity with the representation theory of finite groups would be helpful.

Mathematics 168

Making Math Material (207518)

Glen Whitney

2018 Fall (4 Credits)

Schedule:

MF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How can we make mathematical ideas material, both by translating them into physical embodiments and by

making them more accessible and relevant to a broader audience? Conversely, how can mathematics inform the designs we make for physical structures, both from practical and aesthetic points of view? This course will pursue these questions by doing: exploring mathematical topics that connect well with physical structures, modeling those ideas in software, and building real-world structures based on the models. Specific topics will include symmetry, classical geometry, and rigidity; modeling techniques will include dynamic geometry software, matrix manipulation packages, and 3-D modeling applications; and building techniques will range from simple "garage" constructions to computer controlled cutting devices and 3-D printing.

Recommended Prep: Although there are not specific mathematics prerequisites beyond a comfort with upper level high-school mathematics, participants should be comfortable and willing to explore new mathematical ideas in some technical detail.

Mathematics 251X

Topics on Geometric Analysis (207503)

Shing-Tung Yau

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A discussion of how nonlinear analysis is applied to solve problems in geometry and physics. We will cover some basic materials on nonlinear partial differential equations. A discussion of problems related to questions in general relativity such as definitions of quasilocal mass and its dynamical meaning. A discussion of existence of special metrics and connections over bundles. The major focus will be on Kahler manifolds.

Additional Course Attributes:

Attribute	Value(s)

Mathematics 253Y

Symplectic Manifolds and Lagrangian Submanifolds (207504)

Denis Auroux

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The course will start with a review of standard symplectic topology: symplectic manifolds, symplectomorphisms, Lagrangian submanifolds, neighborhood theorems, almost-complex structures and compatibility, Hamiltonian group actions. The focus will then shift towards J-holomorphic curves: moduli space. Gromov compactness, etc., with a view towards Lagrangian Floer theory. The final part of the course will give a taste of more advanced topics: invariants of monotone Lagrangians; Fukaya categories; mirror symmetry.

Mathematics 263

Algebraic Vector Bundles and Motivic Homotopy Theory (207508)

Michael Hopkins

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The work of Lindel, Quillen and Suslin on a question of Serre shows that the set of isomorphism classes of algebraic vector bundles over a smooth affine variety over a field is "homotopy invariant". This means that questions about algebraic vector bundles can be approached with motivic homotopy theory. A discussion of Serre's question, the theorems of Lindel, Quillen, and Suslin, the basics of motivic homotopy theory, the "affine representability" theorems of Morel, Asok-Hoyois-Went, and some applications of motivic homotopy theory to the construction and classification of algebraic vector bundles.

Topics in Analysis: Matrix Inequalities and Quantum Entropy (207542)

Marius Lemm

2019 Spring (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Matrix inequalities are used in a variety of mathematical contexts. They can be more subtle but more powerful than their scalar analogs. In this course, we will use methods from spectral theory, convex

analysis, and complex analysis to develop a toolbox of matrix inequalities (mostly trace inequalities). We will develop the inequalities alongside the basic notions of quantum information theory. We will also discuss applications to random matrix theory.

Additional Course Attributes:

Mathematics 267X

Dynamical and Spectral Properties of Large Many-Body Quantum Systems (207510)

Christian Brennecke

2018 Fall (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An analysis of spectral and dynamical properties of large bosonic many-body quantum systems. We will start by recalling first some basic concepts of quantum mechanics (self-adjoint operators, basic criteria for self-adjointness, spectral theorem and spectral types, Stone's theorem and existence of quantum dynamics). The main part of the course will be devoted to the concept of Bose-Einstein condensation. Starting with the microscopic many-body description, we will derive non-linear effective theories that describe energetic and dynamical properties of Bose-Einstein condensates interacting through mean-field and singular interaction potentials.

Mathematics 291

Analytic Methods in Differential Geometry (207604)

Karsten Gimre

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

The injection of analysis into differential geometry distinguishes certain geometric objects, such as Ricci flows, Yang-Mills connections, and minimal submanifolds. Since these objects are defined as solutions of geometric partial differential equations, they are not given explicitly except in highly symmetric contexts. Instead, their construction is, broadly, as limits of approximating sequences. The primary concerns are then to do with precompactness theorems, the possible ensuing degenerations, and regularity of the

limits. We will cover these problems in a number of contexts. Possible applications include the Kahler-Einstein problem, the positive energy theorem from general relativity, Cheeger-Coding theory, and Ricci flow with applications to 3-manifold topology.

Mathematics 295 Section: 1

Topics in Discrete Probability: Random Structures and Algorithms (207567)

David Gamarnik

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An introduction to probabilistic reasoning for random structures, including random graphs, graphical models and Markov Random Fields (MRF). Topics include: large deviations theory and concentration inequalities Theory of random graphs, the moment method. Combinatorial optimization on random graphs and the differential equations method. Planted clique and applications to sparse PCA in statistics. Gibbs measures on finite and infinite MRF. Algorithms for counting and computing partition functions, Dubroshin's uniqueness and the correlation decay method. Glauber dynamics and rapid/toric mixing. Introduction to statistical physics. Reconstruction of MRF from observations. Sample and computational complexity.

Teaching Undergraduate Mathematics (124821)

Jameel Al-Aidroos

Robin Gottlieb

2018 Fall (4 Credits)

Schedule:

T 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Become an effective instructor. This course focuses on observation, practice, feedback, and reflection providing insight into teaching and learning. Involves iterated videotaped micro-teaching sessions, accompanied by individual consultations. Required of all mathematics graduate students.

Class Notes: Robin Gottlieb and Brendan Kelly

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Mathematics 304

Topics in Algebraic Topology (121078)

Michael Hopkins

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Requirements: Prerequisite: Graduate Students Only

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Principles of Molecular Biology is a course organized around the Central Dogma of Biology with presentations covering fundamental aspects of DNA and RNA structure, their function and their interactions with proteins. The course opens with a discussion of the physical and chemical properties that drive the interactions of proteins with nucleic acids. This is used as a basis for understanding the material presented in the subsequent five modules, which cover DNA replication, DNA repair, gene regulation, transcription and translation. Throughout this course an emphasis will be placed on how the structure of small molecular machines (proteins) define their function in the processes and pathways that are introduced.

Course Notes: Offered jointly with the Medical School as BP 723.0.

Class Notes: Classes run from September 5, 2018 through December 10, 2018.

Recommended Prep: Intended primarily for graduate students familiar with basic molecular biology or with strong biology/chemistry background.

Additional Course Attributes:

8

Introduction to behavioral pharmacology of CNS drugs (e.g., psychomotor stimulants, antischizophrenics, opioid analgesics, antianxiety agents); seminar format with emphasis on behavioral methodology (i.e.,

model and assay development) and pharmacological analysis (i.e., receptor selectivity and efficacy); attention to tolerance, drug dependence/addiction/treatment, and basic behavioral processes.

Course Notes: Offered jointly with the Medical School as BP 719.0.

Class Notes: Course begins January 29, 2019 through May 7 2019

Recommended Prep: 1 year biology or chemistry or 1 year psychology

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None

Biolog Chem & Molecular Pharm 218

Molecular Medicine (122596)

Irving London

Vijay Sankaran

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 25

A seminar on various human diseases and their underlying genetic or biochemical bases. Primary scientific papers discussed. Lectures by faculty and seminars conducted by students, faculty supervision.

Course Notes: Faculty mentors will guide student-led discussions of the papers. Jointly offered with the Medical School as HT 140. Go to [canvas.hms.harvard](https://canvas.hms.harvard.edu) to view contents for the course.

Recommended Prep: College-level mastery of principles of cellular and molecular biology and genetics.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 230

Principles and Practice of Drug Development (114740)

Stan Finkelstein

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Critical assessment of the major issues and stages of developing a pharmaceutical or biopharmaceutical. Drug discovery, preclinical development, clinical investigation, manufacturing and regulatory issues considered for small and large molecules. Economic considerations of the drug development process.

Course Notes: Classes held at MIT Building 4, Room 149

Class Notes:

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students

Biolog Chem & Molecular Pharm 234

Cellular Metabolism and Human Disease (121820)

Thomas Michel

2019 Spring (4 Credits)

Schedule: MWF 0900 AM - 1030 AM

Instructor Permissions: None

Enrollment Cap: n/a

Cellular and organismal metabolism, with focus on interrelationships between key metabolic pathways and human disease states. Genetic and acquired metabolic diseases and functional consequences. Interactive lectures and critical reading conferences are integrated with clinical encounters.

Course Notes: Enrollment may be limited

Class Notes: Course begins on January 28, 2019 through May 8, 2019. Classes will be held in the Cannon Room

Recommended Prep: Prerequisites for Undergraduate students only: Knowledge of introductory biochemistry, genetics, and cell biology required (MCB 63 or MCB 60 or LIFESCI50, and MCB 64 or equivalent); plus one year of organic chemistry (Chem 17/27 or 20/30).

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 236

Modern Drug Discovery: From Principles to Patients (156104)

Timothy Mitchison

Catherine Dubreuil

2019 Spring (4 Credits)

Schedule: TR 0330 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course will familiarize students with central concepts in drug action and therapeutics: specifically we will cover concepts surrounding Pharmacokinetics (PK) and the intersection of PK and medicinal chemistry in both lectures and cases based discussions. These concepts are central to modern drug development and evaluation. In the course we will cover drug-target interactions, Pharmacokinetics and

Pharmacodynamics. This course will have a focus on modern approaches to therapeutic development for small molecules, protein based therapeutics, nucleic acid based drugs and antibacterial compounds as well new frontiers in therapeutic discovery.

Course Notes: This course is the combination of the BCMP 309qc and 307qc quarter courses, offered as half course. Students who plan to take the two quarters must sign up under BCMP 236.

Class Notes: Course begins on January 28 through May 2, 2019. Classes will be held in TMEC 106

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Biolog Chem & Molecular Pharm 250

Biophysical and Biochemical Mechanisms of Protein Function (204396)

Andrew Kruse

Stephen Blacklow

Eric Fischer

Philip Cole

2019 Spring (4 Credits)

Schedule: TR 1030 AM - 1200 PM

Instructor Permissions: Instructor

Enrollment Cap: 40

Biophysical and Biochemical Mechanisms of Protein Function focuses on the molecular mechanisms that underlie essential biochemical processes such as signal transduction. Major topics include biochemical thermodynamics and conformational equilibria, protein structure and folding, receptor pharmacology, allostery, and enzymatic mechanisms of signaling. The course includes both content lectures and research frontiers seminars focused on current research in biochemistry with an emphasis on signal transduction in therapeutically relevant pathways.

Class Notes: Classes begin on January 29, 2019 through April 30, 2019. Classes will be held in SGM 106.

Recommended Prep: A foundational biochemistry course

Translational Pharmacology (127474)

David Golan

Donald Coen

Catherine Dubreuil

2019 Spring (2 Credits) **Schedule:** MTWRF 0900 AM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This intensive course, held during the first two weeks of January (nine days), covers principles of pharmacology and their translation into new drug development. Students participate in project groups composed of graduate students, medical students, and post-graduate M.D. fellows to propose a drug development strategy from target choice through clinical trials. Most mornings include two hours of lectures and/or panel discussions; most afternoons include (i) case studies presented by Harvard faculty and faculty from the pharmaceutical and biotechnology industries and/or (ii) time to work on the group

project. Evaluation is based on written and oral presentations of the group project and on class participation. Enrollment may be limited.

Course Notes: Class begins Tuesday January 7th, 2019 through Friday, January 25, 2019

Class Notes: Course begins on January 7 through January 25. Please contact Catherine Dubreuil for location.

Seminars in Molecular Mechanistic Biology (207006)

Madhvi Venkatesh

2019 Spring (2 Credits)

Schedule: M 0500 PM - 0600 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

Seminars in Molecular Mechanistic Biology is a series of student work-in-progress talks that meets approximately once a month during the academic year. Each presentation will be attended by two faculty members (neither of whom are the presenting student's dissertation advisor) and students will receive feedback from both the faculty and the other students in the Molecular Mechanistic Biology (MMB) program. The peer-to-peer structure of this course (which is only open to students in MMB) should build community and a sense of belonging to the program. It will also help students develop a deeper understanding of the study of molecular mechanisms outside of their own labs and build relationships with faculty.

Course Notes: Registration for this class is limited to students who are a part of the Molecular Mechanistic Biology program. Students should contact Madhvi Venkatesh (madhvi_venkatesh@hms.harvard.edu) regarding enrollment.
Students will be contacted directly with room

Class Notes: Registration for this class is limited to students who are a part of the Molecular Mechanistic Biology program and students will be contacted with a room. Classes will be held from January 21, 2019 through May 6, 2019

Cell Fate Decisions in Development and Disease (108999)

Alan Cantor

2018 Fall (2 Credits)

Schedule: W 0130 PM - 0329 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This quarter course will offer students an in-depth examination of current knowledge regarding mechanisms of cell fate decisions. It will examine these processes in the context of developmental cell plasticity, cellular reprogramming, and cancer. This will primarily be a literature-based course with examination and discussion of key studies in the field. Concepts involving the instructive role of lineage-specific transcription factors, transcription factor cross-antagonism, gene regulatory networks, multilineage priming, pioneer factors, epigenetics, chromatin accessibility, chromatin remodeling factors, "super enhancers", stem cell bias, lineage identity maintenance, mitotic bookmarking, non-coding RNAs, cell polarity, asymmetric cell division, lateral inhibition, lineage plasticity, and cellular reprogramming will be explored. These ideas will be examined in the context of several different tissue systems and organisms.

Class Notes: Course meets Wednesdays, September 12 through November 14.
