An intermediate course for students interested in expanding and strengthening their Portuguese language skills. Reading, writing, and conversational competencies are emphasized through a panoramic study of Luso-Afro-Brazilian Theater. The course will continue to promote cross-cultural understanding by introducing learners to different textual genres such as screenplays, critical review as well as a selection of literary work that represents the Lusophone arts. The weekly online Teletandem interaction with college students in Brazil, unique to the Portuguese Program, allows learners to discuss readings, and engage in peer-review of writing completed for this course.

Course Notes:

Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.

Class Notes:

This course requires an average of four contact hours per week. To supplement the scheduled 3.75 hours, there will be a 30-minute online component assigned

every week.

Recommended Prep: Prerequisite: PORTUG 11 (AB) or 11s (AD) OR permission of Course Head.

Requirements: Prerequisite: Portuguese 11 OR Portuguese 11s

This course focuses on a deep reflection on the social functions of written texts in Lusophone cultures and aims to develop writing, reading and speaking skills in the Portuguese language. Portuguese 50 will guide the students through the analyses of essays, articles, editorials, letters, short stories, and poems, as well as the enhancement of vocabulary and complex grammar structures. Students will produce a variety of textual genres and will find their own voices as Portuguese writers.

Course Notes:

Conducted in Portuguese. May not be taken Pass/Fail, but may be taken SAT/UNS by GSAS students. Not open to auditors.

Recommended Prep:

Prerequisite: PORTUG 40; A score between 721-750 on the SAT II or on the Harvard Placement Test; or permission of the Undergraduate Adviser in Portuguese and Brazilian Studies

Beyond Samba and Bossa Nova: Brazilian Society through the Study of Music (203375)

Viviane Gontijo

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Deciphering contemporary Brazilian society through its music. This seminar-like course will employ critical reading, writing, and listening without excluding its hands-on elements and music workshops. Students will develop a deeper knowledge of political currents that have influenced Brazilian music, have the opportunity to explore a wide variety of musical genres that surpasses Samba and Bossa Nova, as well as interact with Brazilian musicians and critics from Brazil and beyond. The diversity of Brazil's music will be celebrated by considering its regional (música do norte, nordeste, sul e sudeste), political, social and gastronomical aspects.

Course Notes:

Taught in Portuguese. No music experience is necessary, but

enthusiasm to participate in the dance and music workshops is indispensable.

Class Notes: This course meets regularly on Mondays and Wednesdays, with an additional weekly 30 minute online or workshop component.

Recommended Prep: Prerequisites: PORTUG 50, 59 OR permission of Course Head

Writing and Urban Life (207683)

Bruno Carvalho

2018 Fall (4 Credits)

Schedule: T 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

In this seminar we will explore literary representations of urban experience, and how the evolution of cities has been shaped by writing. Topics include the impact of technology on cities as lived and imagined spaces; interfaces between literacy, orality, and visual cultures; intersections between fiction, poetry, and social history; porous boundaries between built and natural environments; relationships between modernity, writing, and urban planning. Focus will be placed on major cities of the Portuguese-speaking world and authors like Machado de Assis, Fernando Pessoa, Patrícia Galvão, and Clarice Lispector.

Transatlantic Africa and Brazil (128254)

Josiah Blackmore

2019 Spring (4 Credits)

Schedule:

T 1245 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

A study of the transatlantic enterprise between Portugal, Brazil, and Africa. We will scrutinize the historical and imaginative encounters with Africa and Brazil from the Middle Ages to Brazilian Romanticism. Topics include oceanic empire, monsters, shipwreck, cannibalism, the Atlantic slave trade, and debates on the African and Brazilian/New World indigene. Authors include Aristotle, Pliny, Zurara, Álvaro Velho, Caminha, Las Casas, Camões, and Castro Alves, as well as contemporary critics.

Course Notes:

Conducted in Portuguese or English, to be determined by class composition. A reading knowledge of Portuguese or Spanish helpful but not required.

Class Notes:

This course will meet T, 12:45-2:45

Imagined Futures in Brazil (207684)

Bruno Carvalho

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0230 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Amid ecological crises, political impasses, and labor precariousness, to what extent is the contemporary condition marked by exhausted, foreclosed, or dystopian futures? From a catastrophist point of view, it is as if the dire future, not the past, is already a given – inalterable, fixed, irrevocable. Alternatively seen as Edenic and catastrophe-laden since the colonial era, Brazil provides a fertile ground for reflections around imagined futures. During the Second World War, Austrian-born writer Stefan Zweig famously imagined it as the "land of the future." In the late 1950s, art critic Mario Pedrosa wrote that Brazil was "doomed to the modern." The seminar focuses on how competing visions for the future are at the center of tensions that define the history of modernity. We will examine how different authors, designers and filmmakers have imagined urban and environmental futures over the past century, asking questions like: how did unrealized projects impact built and lived environments? How can fiction help to stretch the limits of the thinkable? How might the imagined futures of the past expand the terms of current debates about urban and environmental challenges?

Subject: French

French 10

Beginning French I: French Identity through Visual Media (126933)

Nicole Mills

2019 Spring (4 Credits)

Schedule:

MTWR 0300 PM - 0415 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This elementary French course provides an introduction to French with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. Students engage in interactive communicative activities, both online and in the classroom, that provide rich exposure to the French and francophone language and culture. The course addresses the theme of identity through engagement in the discussion and interpretation of various French visual media including video, images, and film.

Course Notes:

French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students at GSAS may take the course Sat/Unsat with permission of course head. French 10 is taught by members of the Department.

Class Notes:

This course requires four contact hours per week. Each class session will be one hour (i.e., 9-10am).

2018 Fall (4 Credits)

Schedule: MTWR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 17

This elementary French course provides an introduction to French with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. Students engage in interactive communicative activities, both online and in the classroom, that provide rich exposure to the French and francophone language and culture. The course addresses the theme of identity through engagement in the discussion and interpretation of various French visual media including video, images, and film.

Course Notes: French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students at GSAS may take the course Sat/Unsat with permission of course head. French 10 is taught by members of the Department.

Class Notes: This course requires four contact hours per week. Each class session will be one hour (i.e., 9-10am).

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Primarily for Undergraduate Students

Beginning French II: Exploring Parisian Life and Identity (126935)

Nicole Mills

2019 Spring (4 Credits)

Schedule: MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

In the second course in the Elementary French sequence, students will engage in an online simulation of life in Paris while exploring diverse facets of Parisian identity. Through the exploration of various forms of media, you will gain a more developed understanding of the diversity of Parisian life. Students will actively engage in oral and written communication in the past, present, and future and will learn to make suggestions, narrate in the past, express emotions and opinions, extend invitations, and convey hypothetical situations. Topics explored in the class include art, music, and graffiti in Paris, the various quarters of Paris, the role of media in the 2015 Paris attacks, and the 2017 elections. The course will immerse you in Parisian culture and language through virtual reality experiences, social networking, and archive exploration.

Course Notes: French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students at the GSAS may take the course Sat/Unsat with the permission of course head. This course is taught by members of the Department.

Class Notes: This course requires **an average of** four contact hours per week. To supplement **the scheduled 3.75 hours**, a 30 minute online component will be arranged every two weeks.

Recommended Prep: Completion of French Aa/10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.

Additional Course Attributes:

Attribute	Value(s)
FAS: Meets Foreign Lang Req	French

Intensive Beginning French: Parisian Identity through Visual Media (124332)

Nicole Mills

2019 Spring (8 Credits)

Schedule:

MTWRF 0900 AM - 1015 AM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

This intensive Beginning French course provides an accelerated introduction to Beginning French with intensive work on interpersonal communication and interpreting and producing language in written and oral forms. Students explore diverse facets of Parisian identity through the interpretation of various forms of visual media. Students learn to speak and write in the past, present, and future, make descriptions, ask questions, make comparisons, accept and refuse invitations, give advice, and express hypothetical situations, emotions, and opinions.

Course Notes:

May not be used to fulfill the language requirement and may not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the French 15 course head and receive permission to enroll in the course.

This course is taught by members of the Department.

Class Notes:

This course requires seven hours contact hours per week. To supplement **the scheduled 6.25 hours**, a weekly online component will be arranged.

Class Notes:

The on-line request form is available on the French 15 canvas site and must be submitted by January 21 (Spring Term).

Recommended Prep:

An advanced knowledge of at least one foreign language, preferably a modern Romance language, but no previous study of French.

French 16

Reading Modern French (111933)

Nicole Mills

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

An introduction to reading and translating modern French texts for students who require only a basic knowledge of French for research purposes. French 16 presents the principle structures of French grammar in a systematic and coherent manner and, at the same time, makes reading and translation assignments as discipline-specific as possible for each student's needs.

Course Notes: Conducted in English. Not open to students with a score of 500 or above on the Harvard Placement Test or the SAT II French test, to those with more than one year of undergraduate French, or to auditors. May not be used to fulfill the language requirement and may not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.

Class Notes: This course requires an average of three hours contact hours per week. To supplement the scheduled 2.5 hours, this course will meet on Tuesday and Thursdays with an additional online component.

Recommended Prep: Some previous study of a Romance language helpful but not necessary. Fluency in English required.

Additional Course Attributes:

Attribute	Value(s)

n/a

An advanced French language and culture course designed to enhance all language skills. Using contemporary Francophone movies, students will study various cultural issues relevant to Francophone identity such as immigration, education, the workplace, regional differences, sexuality, relationships, etc. Students will participate in a range of written and oral activities, and will produce their own short film as a final project.

Course Notes:

Conducted in French. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Class Notes: This course requires an average of three hours contact hours per week. To supplement the scheduled 2.5 hours per week, this course will meet on Tuesday and Thursdays with an additional weekly 30 minute online or workshop component.

Recommended Prep: French 30, 681-720 on the SAT II test or the Harvard Placement test; or permission of course head.

Additional Course Attributes:

French 50

Advanced French II: Ecrivons droit(s)/Writing Right(s): Justice, Equity, Rights, and Writing (126998)

Karen Turman

2019 Spring (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course builds on the interpersonal, interpretive, and communicative skills acquired in French 40, with a particular emphasis on developing students' writing proficiency. Students will study a range of creative, analytic, and polemical texts, images, and film that explore themes of justice, equity, and human rights in the Francophone world. Using these texts, students will study and reproduce various genres of written and spoken French (description, portrait, polemic essay, etc.)

Course Notes:

Conducted in French. Students may take no more than two courses numbered in the 50s. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

Class Notes:

This course requires an average of three hours contact hours per week. To supplement the scheduled 2.5 hours per week, this course will meet on Tuesday and Thursdays with an additional weekly 30 minute online or workshop component.

Recommended Prep:

French 40; a score of 721-750 on the SAT II test or the Harvard Placement test; or permission of course head.

Modern Stories about Paris (116673)

Ericka Knudson

2018 Fall (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course examines contemporary narratives set in Paris. Students explore writers' and filmmakers' perceptions of Paris and analyze the different ways in which the Parisian experience is presented. By reading and viewing stories about Paris, students gain insights into methods of narration and integrate various techniques into their own writing and speaking. They also develop a sophisticated understanding of how the French language is evolving, especially in its spoken form.

Course Notes: Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than two courses at the 60 level.

Class Notes: This course requires an average of three hours contact hours per week. To supplement the scheduled 2.5 hours per week, this course will meet on Tuesday and Thursdays with an additional weekly 30 minute online or workshop component.

Business French: Cultural and Communicative Foundations (148202)

Karen Turman

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course focuses on the cultural knowledge, vocabulary, and linguistic skills and tools that are needed to work and succeed in an international French-speaking setting. It provides an overview of the organization and culture of French companies, highlighting important aspects of conducting business in France, such as attitudes, customs, written and unwritten laws, as well as economic and geographical factors. Moreover, students learn specialized French business terminology and acquire the language skills needed to understand and discuss, in speaking and writing, topics within a professional environment.

Course Notes:

Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details and section on-line on the French 61N website.

Class Notes:

This course will meet on TR with an additional weekly 30 minute online or workshop component. The two sections of this course may be consolidated if there are fewer than 19 students enrolled in the course overall.

Class Notes:

Students who have taken French 55 should not take this course.

Recommended Prep:

A score of 721-750 on the SAT II test or the Harvard Placement test; French 40 or 50; or permission of course head.

Comic Relief: The Power of Humor in Social Fiction (207932)

Kathy Richman

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

18

Comic Relief focuses on fictional works in French which use humor to *dorer la pilule*, or make more palatable, the social ills and political dangers they reveal. With naïfs and rebellious women as protagonists, these coming-of-age stories raise questions about the relationship between social critique and self-discovery. We will explore nuances of irony, parody, satire, and slapstick in works by Voltaire, Vargaftig, Chraïbi, and Queneau.

Course Notes: Conducted in French. Counts toward Citation, Secondary, and Concentration in French or Romance Studies.

Recommended Prep: French 50 or equivalent, or permission of instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students

L'autre Balzac/The Other Balzac (161239)

Janet Beizer

2019 Spring (4 Credits)

Schedule:

T 1245 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Behind the better-known Balzac, the realist, the documentarist of everyday life, is the "other" Balzac: the philosopher, the psychopathologist, the writer of dark tales. In this class we will focus on the haunting tales of this lesser-known Balzac.

Class Notes:

This course will meet T, 12:45-2:45.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

French 136

A La Francaise: French Feminisms Today (108716)

Alice Jardine

2019 Spring (4 Credits)

Schedule:

M 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Close readings of postwar French fiction and theory with emphasis on what is called "the feminine" in key psychoanalytic, philosophical, and literary writings of the French poststructuralist tradition. In particular, we will focus on fifty years of dialogue between postwar theory in France and feminist practice in the United States. Writers considered include Cixous, Duras, Irigaray, Kristeva, and Wittig as well as Deleuze, Derrida, and Lacan.

Course Notes:

This course occurs entirely in French.

Recommended Prep:

Excellent reading knowledge of French.

Metamorphoses of the Vampire (122354)

Janet Beizer

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The vampire took on a prominent and lasting iconic form -- ironically, as the ever-metamorphosing Dracula -- in Bram Stoker's 1897 novel. But the vampire began its sweep through French literature well before its fin-de-siècle apotheosis in Britain. We'll consider the aesthetic and political uses of the nineteenth-century vampire as it corresponds to cultural fears and desires, as it figures in Baudelaire, Balzac, Gautier, Maupassant, Verne, Polidori, as well as in Stoker, Coppola's movie version, and theory.

Course Notes:

Conducted in French. Readings in French (and English).

Additional Course Attributes:

Enrollment Cap:

n/a

This course provides an overview of major trends in Francophone and postcolonial studies that correlate with the field of world literature/littérature-monde.

Course Notes:

This course is taught in French and English. Advanced reading knowledge of French is required. Theoretical readings are in English. Students specializing in French or needing French language credits must write all their papers in French; others may write papers in English.

French 180

"The Words to Say It": Women Writing in French from Colette to Satrapi (126038)

Alice Jardine

2018 Fall (4 Credits)

Schedule:

M 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Motherhood, romantic love, independence, sexuality, citizenship, fantasy, death: these are just some of the themes explored in women's novels, written in French, in the twentieth century. We will read eight novels together, exploring how they have finally become classics, even given what they say about life and what it means for women to write about it.

France-North Africa, Encounters in Literature and Film: Cultures of Protest and Violence (211119)

Verena Conley

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Focusing on fiction, film and other media, this course deals primarily with encounters between North Africa, Algeria, Morocco, Tunisia and France; but also, with Italy and Spain, from independence to today. Through the lens of protest cultures and violence, we will study and compare political, social and media entanglements among countries joined and separated by the Mediterranean, from colonial uprisings to the

"Black decade" of terror, the Arab Spring, disenchantment with nationalisms, and today's forced migrations. Special attention will be paid to the ties between violence, protest and artistic forms.

In Search of a Medieval Subject (115898)

Virginie Greene

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

We will read various medieval authors ranging from Augustine to Christine de Pizan to identify a medieval subjectivity. Modern texts on subjectivity will be used as a counterpoint.

Course Notes: Conducted in French. Open to qualified undergraduates with permission of the instructor.

Francophone Studies and Human Rights (203331)

Francoise Lionnet

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0230 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This graduate course is taught in English and French and requires advanced knowledge of French (in reading and aural/oral comprehension). It provides a literary approach to human rights across different cultural, historical, and geographical areas. Required readings invite us to reflect on both historical and contemporary violations of human rights from slavery to indenture, from colonialism to war and migrant crises. Class participation can be in English or French depending on your ability and/or field of specialization.

The Culture of Hysteria in Nineteenth-Century France (118063)

Janet Beizer

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

As we read nineteenth-century medical, literary, and cultural texts, we ask why hysteria flourished in this time and place, and trace the diagnosis as symptom of a broader cultural malaise.

Course Notes:

Conducted in French or English, to be determined by class composition. Readings in French.

Subject: Italian

Italian 10

Beginning Italian I: Pathways to Italy (113814)

Elvira G. DiFabio

2018 Fall (4 Credits)

Schedule:

MTWR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

For students with little or no knowledge of Italian. Aims at achieving basic communication skills and vocabulary. Emphasis on oral expression and listening comprehension. The cultural component examines everyday life through a comparative perspective: families, shopping, food culture. This course will give you the language you need to communicate effectively in Italy, and is the best way to prepare for a summer study in Italy. Course materials include workbook, audio-lab, and video.

Course Notes: Conducted in Italian. Students whose placement score does not entitle them to enter a more advanced course are assigned to Italian 10. Students who have studied Italian for two years or more in secondary school must begin at Italian 11 or higher. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Class Notes: This course requires four contact hours per week. Each class session is one hour (e.g., 9-10am).

Additional Course Attributes:

Attribute	Value(s)
FAS: Meets Foreign Lang Req	Italian
All: Cross Reg Availability	Available for Harvard Cross Registration

Intensive Beginning Italian: Special Course: Gateway to Italy (112340)

Elvira G. DiFabio

2019 Spring (8 Credits)

Schedule:

MTWRF 0900 AM - 1015 AM

TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

A complete first-year course in one term for students with no knowledge of Italian, focused on developing all four communicative skills. Students are introduced to contemporary Italian culture through a variety of topics from everyday life (family, shopping, food, fashion) to the arts (music, literature, cinema). Materials include films and cultural readings that present capsules on the history of modern Italy. Excellent choice for students planning to study in Italy.

Course Notes:

Not open to auditors. May not be used to fulfill the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Recommended Prep:

An advanced knowledge of at least one foreign language, preferably a modern Romance language, but no previous study of Italian.

Advanced Italian I: Oral Expression and Performance (116233)

Elvira G. DiFabio

2018 Fall (4 Credits)

Schedule:

TR 0430 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Ciak, si parla! Students develop oral expression and communication skills through the close reading of texts that are meant for performance, such as plays, film scripts, poetry, and games. Variation in diction and presentation techniques culminates in the adaptation and production of one or more of these texts for a public performance at the end of the term. Consult course website for current semester topics.

Course Notes: Conducted in Italian. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Appropriate for concentrators electing the Italian Studies or Romance Studies track. Not open to auditors. This course is taught by members of the Department.

Class Notes: This course meets regularly on Mondays and Wednesdays, with individual meetings and occasional class meetings on Fridays.

Recommended Prep: A score of 681-720 on the SAT II or the Harvard Placement Test, or a score of 5 on the Italian AP exam; Italian 30; equivalent preparation; or permission of course head.

Visions of Poetry (203305)

Adam Muri-Rosenthal

Elvira G. DiFabio

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

A creative and critical exploration of poetry through image-making practice, this course investigates the great works of modern and contemporary Italian poetry through a process of cross-media translation. Among the questions the course will seek to answer are the following: What makes a text or film poetic? How do words and images evoke sensory experience? What is the fundamental task of the translator and what does it mean to "translate" from one medium to another? Students will create regular short video pieces in response to these foundational questions and to works studied. Inspiration will be drawn from filmmakers both within the Italian canon, such as Antonioni and De Seta, and without, such as Gehr and Brakhage. Major poets studied may include Marinetti, Ungaretti, Montale, Pasolini and Rosselli.

Course Notes: Conducted in Italian.

Italian and the Community: Italy. Academic Internships in Italian Language and Culture: Special Crse (124993)

Elvira G. DiFabio

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An opportunity to engage in the practical applications of Italian language and culture in an immersion environment. Internships may include placement in a variety of sectors, including public education, the media and the arts.

Course Notes:

Though academic internships may be arranged in the Greater Boston area, this course can be proposed as integral to a study abroad program in Italy, the details of which are to be coordinated in consultation with the course head and the Office of International Education. Students are expected to produce substantial research papers based on relevant class work and field placements. The student, under the guidance of faculty and study abroad advisers, is responsible for arranging the terms of the internship.

This course is taught by members of the Department.

Class Notes:

Students must submit a written proposal to Dr. DiFabio by August 31, 2017 for Fall term enrollment and by January 23, 2018 for Spring term enrollment.

Stories to Move, Heal and Change People's Minds: Parables in Medieval Italian Culture (208074)

Ambrogio Camozzi Pistoja

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This is a course about things that a story can do apart from transmitting knowledge and releasing information. For instance: can a story change the way in which people think of themselves and the universe? How? This course will examine the use of short stories for moral education in medieval romance cultures. We will read short stories from medieval sermons and fables, and collections of exemplary texts (Fioretti of Francis of Assisi, Novellino, Petrarch, Boccaccio, Christine de Pizan and others); we will also look at visual narratives, such as Giotto's pictorial cycle in Umbria and Padua. Through discussion and creative practice, students will gain an understanding of how effective stories can be in changing, moving and healing people's minds and which rhetorical and performative strategies are put in place to achieve that in practice. We will use readings from late-antique and medieval rhetoric, narrative theories and cognitive science, and also from esoteric literature, Rabbinic Midrash, the parables in the Gospels and Sufi teaching stories.

Italian 214

The Power of Satire and the Limitations of the Laws in Ancient Rome and Medieval Italy (208075)

Ambrogio Camozzi Pistoja

2019 Spring (4 Credits)

Schedule: T 0600 PM - 0715 PM
T 0430 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap: n/a

A research seminar on satire, its power and limitations, with a focus on the Roman and medieval periods. Serving as both a critique of social norms and the oppression of minorities (anti-women, anti-Jews, etc.), satire has been one of the most practiced and effective languages in classical Rome (Horace, Persius, Juvenal) and medieval culture, especially in Italy (Poeti Giocosi, Dante, Boccaccio). By ridiculing ideas, habits or specific individuals, satire challenges and constantly reshapes moral, legal as well as formal-rhetorical boundaries. We will discuss various definitions of the genre, with readings on the theory, functions and limitations of satire, focusing on the intellectual debate and juridical responses (censorship, criminal law, libel writs, etc.) that have accompanied satirical expressions across the centuries. Satirical artefacts examined during the seminars include poems, novels, theatrical plays and defamatory paintings.

Recommended Prep: Italian reading knowledge

2018 Fall (4 Credits)

Schedule: MTWR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

A basic beginning semester course for students with no previous study of Spanish. Emphasis on speaking, writing, reading, and listening, as the basis for the development of all three Communication Modes (Interpersonal, Interpretive, and Presentational). Hispanic cultures will be introduced through a variety of texts, including readings, music, art, and film.

Course Notes: Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher.

This course is taught by members of the Department.

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish Aa and Ab, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes:

Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.

This course is taught by members of the Department.

Class Notes: This course requires an average of four contact hours per week. To supplement the scheduled 3.75 hours, there is a 30 minute online component assigned every two weeks.

Recommended Prep: A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

Spanish 49H

Spanish for Latino Students I (109820)

Maria Parra-Velasco

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

Designed for Latino students, this course builds on students' previous knowledge of Spanish to expand and strengthen their oral and written interpersonal, interpretive and presentational communicative skills. Spanish grammar is reviewed using a functional approach to highlight differences found in informal and academic contexts. Students explore the topics of language, cultures and identity in the U.S and in the Spanish-speaking world , using a variety of texts and genres, music, videos, films and visual arts.

Course Notes:

Spanish 49h was formerly Spanish 35; therefore, students cannot take 49h if they've already taken 35. Spanish 49h should be a prerequisite for 59h (or permission of the instructor).

Additional Course Attributes:

Adriana Gutierrez

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

An advanced language course designed to strengthen and develop competence in written expression. Close reading of texts in literary and non-literary genres will help students refine personal style. The performance of short excerpts of plays, combined with advanced work on oral expression and phonetics, will help students increase their fluency and ease of expression.

Course Notes:

Conducted in Spanish. Recommended for concentrators. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

Recommended Prep:

A score between 721-750 on the SAT II test or on the Harvard Placement Test, Spanish 40, or permission of course head.

The Ethics of Business in Latin America (127573)

Adriana Gutierrez

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An advanced language and culture class that examines literature and films portraying the political, sociological, financial and environmental impact of multinational companies doing business in Latin America. Students' linguistic competency is developed through discussion of the ethics of business, grammar reviews, and weekly writing assignments. Students will also choose a specific project for a business in Latin America and research its possible outcome and social, political, and environmental consequences.

Course Notes: Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Class Notes: This course requires an average of three hours contact hours per week. To supplement the scheduled 2.5 hours per week, this course will meet on Tuesday and Thursdays with an additional weekly 30 minute online component.

Class Notes: Interested students must apply in writing to Dr. Gutiérrez no later than August 21, 2018 (Fall Term) or January 15, 2019 (Spring Term)

Recommended Prep: A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

Spanish for Public Health (205383)

Adriana Gutierrez

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An advanced language and culture class that examines literature, documentary, films, journalistic articles and other media portraying the cultural, political, sociological and financial impact of Public Health issues in Latin America. Students' linguistic competency is developed through discussion of the issues of public health. Grammar reviews, and weekly writing assignments. Students will also choose a specific project for a Public Health issue in Latin America and research its possible outcome and cultural, social, political, economic consequences.

Course Notes: Interested students must apply in writing to Dr. Gutiérrez no later than January 15. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Recommended Prep: Prerequisite: A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

Introduction to Modern Latin American Literature (126853)

Gustavo Quintero

2019 Spring (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is a survey of Latin American Literature from the last decades of the 19th century to the present. It offers an overview of the most salient moments in modern Latin American cultural history, placing emphasis on the ways in which specific literary works relate to the social and political developments that have shaped the region since the late 19th century. Readings by Machado de Assis, Rulfo, Borges, Gioconda Belli, Bellatin, Pizarnik, and others.

Course Notes:

Conducted in Spanish.

Recommended Prep:

A score above 780 on the SAT II or on the Harvard Placement test; a 50-, or 60-level course in Spanish; or permission of course head.

This course introduces students to the literature, history, and visual culture of contemporary Spain from the 18th century through the first eighteen years of the 21st century. We will study representative short stories, poems, plays, novellas, essays, paintings, photographs, and films from the Spanish War of Independence, the "disaster" of 1898, the Surrealist movement, the Spanish Civil War and the Republican Exile, Franco's Dictatorship and the Transition to Democracy, the "Movida Madrileña," and the literature of the "New Spaniards." Through visual and written works by Goya, Galdós, Campoamor, Bécquer, Pardo Bazán, Azorín, Unamuno, Lorca, Machado, Buñuel, Laforet, Matute, Almodóvar, Martín Gaité, Puértolas, and others, students will gain a general knowledge and appreciation for the main works, periods, and authors of contemporary Spain, and will appreciate the uniqueness and diversity of Spanish culture by establishing transnational relations between Spain and cultures from Latin America, North Africa, Asia, and Europe. All readings will be in Spanish, although we will look at texts originally written in Spanish, Catalan, Galician, and Basque.

This course will provide an introduction to Latinx literatures and cultures in the United States from 1960 to the present, paying close attention to the historical and social events that have influenced the construction of U.S. Latinx identities as a field within American Studies. Through the examination of canonical texts produced in English, Spanish and Spanglish we will analyze questions of racial, ethnic, sexual, and cultural identities in conversation with current theoretical concepts such as Diaspora, border identities, code-switching, triple-consciousness, intersectionality. While our focus is on Latinidad as a U.S. concept, we will also explore its expansion as a political and cultural term in Latinx diasporas in Madrid, Milan, and Amsterdam.

Course Notes:

Course is in English, with optional section in Spanish.

Table Talk and Food Writing (205164)

Johanna Damgaard Liander

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

From classroom to kitchen, picnic or café, this advanced language and food culture course will examine the Spanish table, its history and origins, expansions and innovations, from medieval times to present-day molecular gastronomy. Frequent reading, viewing and writing assignments and classroom discussion are all designed to reinforce language skills and academic literacy in the target language. The course, along with all materials and assignments, is entirely in Spanish, primarily focusing on literary, historical, linguistic and sociological texts and topics from Spain –selections ranging from Harvard's vast culinary collection to the most current media- with reference to Latin America and the Latino community in the United States, as well.

Class Notes:

N.B.: Class will ordinarily meet 12-2:00, with 1.30-2.00 for individual, optional consultation with Dr. Liander. 6 hands-on cooking –and

tasting- sessions are included each semester. Enrollment is limited to 16. Interested students must contact and interview with Dr. Liander before January 20, 2019.

Recommended Prep: Pre-requisites: A score of 750 or beyond on SAT II or Harvard Placement; previous enrollment in Spanish 50 or higher; or permission of the instructor.

Things in Literature (207675)

Diana Sorensen

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

How are things imagined in fiction, and what is the role of the inanimate in the environment of fiction? We live surrounded by matter, and yet give short shrift to our understanding of the relationship between the inanimate and the animate. What complex interactions can we study as we consider the epistemological question of how material phenomena are represented in literature and in thought?

Inspiring Women: The History of Women in Spain in Dialogue with Hispanic America (211120)

Raquel Vega-Duran

2019 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

In this course we will examine the significant role of women in society, politics, and culture from the Middle Ages to the 21st century on both sides of the Hispanic Atlantic. Through films, political speeches, manuscripts, short stories, novels, newspaper articles, memoirs, and visual art, we'll study women's history, voices, and experiences in Spain, and we will put them in dialogue with the women who lived at the same time on the American side of the Atlantic. We will examine medieval beguines, witches, healers, and the Inquisition; heroines, adventurers, and explorers in the Spanish empire; Goya's nineteenth-century depictions of women at war; suffragettes, women politicians, and feminist movements at the turn of the century; the Civil War anti-facist group "Las trece rosas" and the "milicianas"; the "visible invisibility" of women during the early dictatorship; women in the works of Federico García Lorca and Pedro Almodóvar;

the diversity of women's voices in the Transition to democracy; and the feminization of immigration in the twenty-first century.

Narrating the Borderlands: Immigration, Deportation, and Resistance (208042)

Gustavo Quintero

2018 Fall (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

The questions of border crossing, immigration, and deportation are nowadays more prevailing than ever. The goal of this course is to study the United States-Mexico border from three different perspectives that explore multiple issues concerning crossing, living, and narrating the borderlands. These three perspectives are: 1) The border as a legal space bound to interpretations about what it means to legally or illegally cross the border. 2) The border as a geographical space whose 1.954 miles encompass cities, villages, deserts, and rivers. This vast and uneven territory entails diverse and often contradictory narrations and imaginaries that range from idealized landscapes to apocalyptic wastelands. 3) Border-crossing as a theme for artists and writers working on the solidarity networks from those who have dealt with the journey and its perils. These three perspectives – (un)documentation, geography, and solidarity– will allow us to approach aesthetic and written materials in English, Spanish, and Spanglish about borderlands.

Course Notes: Language of Instruction: English, Spanish, and Spanglish

Recommended Prep: A previous course in Spanish at the 60- or 70-level; or permission of

course head.

Introduction to Spanish Art: A History of Its Masterpieces (206815)

Raquel Vega-Duran

2018 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores significant works of Spanish art, with a particular emphasis on painting, photography, and sculpture in their historical, political, and cultural context, as well as interactions between painting, photography, and film. Through masterpieces such as Goya's black paintings, Velazquez's *Las Meninas*, Picasso's *Guernica*, Frank Capa's photographs of the Spanish Civil War, Gaudi's Parc Güell, and Dali's contribution to the surrealist films of Buñuel and Hitchcock, among others, we will analyze interplays between art, history, and society. In this course we will develop a vocabulary for appreciating and discussing visual art, as well as learning what works of art can tell us about history and culture.

Course Notes: Conducted in Spanish.

Introduction to Chicana Studies (211156)

Rene Carrasco

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What began as a community-led social movement in the 1960s, backed by farmworkers, day-laborers, students, as well as many other sectors of the Chicana community that demanded equality and inclusion into the idea of "America", gave way in the 1970s to the formation of many Ethnic Studies programs across the country, among them, Chicana Studies. In this course, we will be introduced to the field of cultural production and knowledge that focuses on the experience of Mexican-American citizens in the United States. Given the intersectional nature of the themes we will be dealing with – and the importance

that gender, sexuality, race, class and ethnicity have in them – our methodological approach will be interdisciplinary, making use of analytical frameworks from diverse fields such as historiography, literary criticism, ethnography, sociology, and film studies.

The course will be divided into five sections. First, we will look at the history surrounding the foundational moments of Chicanx Studies, as well as the colonial and XIX century antecedents that set in motion the conditions for the existence of a Mexican population in the United States. Secondly, we will look at the politics deployed by Chicanx communities and how intimately the sense of "community" is linked to Chicanx Studies. In the Third Unit, we will look at Chicanx cultural production, focusing on literature – primarily the genres of the novel and poetry –, theater and film to examine their role within the larger context of "American" cultural production. The Fourth Unit will be dedicated to an analysis of the Chicana Radical Feminism movement and its main protagonists. Finally, in the Fifth Unit we will question the future of Chicanx Studies in the wake of the "decolonial turn." Ultimately, the course will bring into question the issues of belonging, legitimacy, and (ethno)nationalism in the United States at a crucial moment in its history.

Understanding Migration through Film and Photography (207679)

Raquel Vega-Duran

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

From an interdisciplinary perspective, this course explores the ways in which film and photography recount past and present human migrations, and how they contribute to the construction of the social imaginary of the migrant. Focusing on migrations to and from Spanish-speaking countries (particularly Hispanic America and Spain), we will analyze the history of migrations, and will examine the complexity of the concept of migrant (as both emigrant and immigrant), paying particular attention to the different stages of migrants' journeys (the departure from the home country; the crossing of transit countries and borders; the arrival; and the settlement or forced deportation). We will also consider journalistic and artistic photography covering migrations from Africa, America, Asia, and Europe, and discuss the relationship between photography and film. Major themes are: "Global" vs. "Local"; conceptions of hybridity, otherness, belonging, border, "new Europeanness," assimilation, and neo-racism; the paradoxical nature of "migrant" as both emigrant and immigrant; and the role of history, language, religion, and culture in the acceptance and rejection of foreigners.

Class Notes:

Instructor's permission is required for enrollment.

Narratives of Identity about 19th- and 20th-Century Spain (207918)

Daniel Aguirre-Oteiza

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0230 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

What are the connections between narrative and identity? To what extent are our personal and collective identities shaped by received ideas of "others"? How does questioning "others" help us understand our ideas of culture, nation, and polity? In what ways are fear, hate, pain, and identity narratively related? What's the value of asking these questions when we read modern fiction about Spain? Texts by Cercas, Clarín, Laforet, Ndong, Saer, Semprún, among others.

Sobre Indigenismos y sus Literaturas en América Latina (211157)

Rene Carrasco

2019 Spring (4 Credits)

Schedule:

TR 0600 PM - 0715 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is designed to help students reflect on the vast set of discursive representations (identity/alterity) that were produced in Latin American Literature from the time of conquest, the processes of independence and revolutions of the XIX Century, up until the second half of the XX Century. The main objective of the course is to inquire and to reflect critically on the multiple aesthetic and political significances of the diverse representations that the "lettered" and white culture articulated in regards to the indigenous populations of Latin America. Through a selection of paradigmatic and representative texts, we will examine the constant construction, reformulation, and challenges of the narratives on identity and alterity throughout different moments in Latin American cultural history. We will analyze texts that speak to the issues surrounding "national identity" and their relationships with the processes of racial/ethnic inclusion and exclusion, "indianismo" and "indigenismo" being clear examples of this articulation. We will include literary criticism, novels, and autobiographical testimonies, as part of the reading *corpus*.

In order to facilitate and better guide our journey through the literatures of *indigenismo*, the course is divided into five units. The first unit, will deal with the writers and works most often associated with, and thought of as, being precursors to *indigenismo* who produced their works during the XVI and XVII centuries. The second unit will be dedicated to the first current of literature produced about indigenous peoples and customs in the XIX. Afterwards, the third unit will cover the canonical texts most often associated with the literary current properly known as *indigenismo*. The fourth unit showcases works related to "*neo-indigenismo*" and the literature of and about indigenous peoples and themes that was produced in the second half of the twentieth century, most often associated with concurrent literary trends like surrealism and magical realism. Finally, the fifth unit will present works of literature produced by indigenous writers themselves, closing a cycle of representation and providing a counterpoint to the materials presented throughout the course of our study.

Course Notes: This course will be taught in Spanish.

The course offers an interdisciplinary approach to Barcelona, a multilayered space furnished by Roman, French, Muslim, and Spanish legacies that shaped a singular culture and language. Developing from periods of egalitarian social and political institutions in the Middle Ages to strong socioeconomic industrial development in the 19th century and later tourism, Spain's most European city is inscribed by a deep sense of civic and industrious society permanently seeking innovation and modernity, yet facing the consequences of its complex past. Through readings of historians, art critics, urban designers, and writers, and supported by visual materials, the course offers an integrated perspective which opens questions in every field of the Humanities and the Social Sciences on Catalan and Hispanic Cultures.

Course Notes: The course will be conducted in Spanish. The readings will be in English & Spanish.

Futures Past: Narrating Revolutions and Temporalities in Latin America (208038)

Gustavo Quintero

2018 Fall (4 Credits)

Schedule:

T 0600 PM - 0800 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Ours is a time in which, while right-wing political movements are rising on a global scale, we are told that rapid technological and economic improvement is the path to fulfill democratic ideals. In Latin America, this reinvented teleology posits that insurrectionary movements are unable to offer alternatives to non-sustainable neoliberal political regimes. This course explores ways to explicitly challenge such assumption by focusing on the relation between revolutions and temporalities in Latin America. Through literary, theoretical, and visual materials, we will study how

multiple orders of time –i.e. forms in which past, present, and future relate to each other– can prove useful to critically think about a radical transformation of the present. By reading works by Louis Althusser, Wendy Brown, Fidel Castro, Bolívar Echeverría, Reinhart Koselleck, Sarah Minter, and Juan Rulfo, among others, we will address the following questions: How is time not a consistent or unified object or phenomenon? How can we speak about, theorize, or narrate time? How does time relate to revolutionary movements in Latin America? How do aesthetic materials such as novels, short stories, contemporary art, and experimental video help us delineate continuities and ruptures in time? How can these aesthetic products enable us to theorize a profound cut in the present?

Course Notes: Graduate Level or Permission of Instructor. Language of Instruction: English and Spanish.

About the End of the World: Crises of Cosmopolitanism in Contemporary Culture and Theory (207895)

Mariano Siskind

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Cosmopolitanism and globalization, two master-concepts that were extremely useful to understand subjective universalistic desires and material processes of global dislocation, disjuncture and displacement (as well as fantasies of totality, transparent communication and interrelations, and fictions of totality) can no longer account for our present cultural-political situation; they are not useful to interrogate the global displacements and traumatic losses constitutive of the overwhelming experience, over the last few years, that we are living through the end of the world. The idea of end of the world does not refer only to the sense of overwhelming political futility that dominates the artistic and intellectual spheres today, but also to the collapse of the world understood as the modern/modernist symbolic structure that supported humanist discourses of universal emancipation through global connections, translations, interactions, displacements and exchanges; the world as the symbolic realm where demands of justice, emancipation and universal inclusion were meant to be actualized. Today, the displacement of more than 67 millions refugees, migrants and forcibly displaced persons as a result of environmental catastrophes, economic hardships, and small and large scale perpetual wars and terror in Latin America, Africa, the Middle East and Europe; the theatrical demolition of liberal democratic governmentality in Trump's America and across the Western hemisphere; the crisis or death of Europe as a project of political and cultural reorientation of the American global hegemony; the painful intensification of the military, economic and symbolic violence the Israeli state exerts over Palestinian people; and the radicalization of financial capital's global sovereignty since the "recovery" from the 2008 crisis and the subsequent concentration of wealth and global socio-economic inequality—all these point to the radical dislocation of the structure we used to call "world". But this course is not about the very real historical suffering and losses of those whose bodies are wounded by the end of the world; it is rather about the trace of those experience that we call art and literature; about some of the idiosyncratic ways in which those of us who care about art and literature attend to these forms as symbolic sites in order to try and fail to understand the end of the world; about our reaction to an experience of the end of the world that is and is not our end of the world; and about what we (we professors, students, intellectuals, writers, artists) can and can no longer do about the end of the world through art as mediation. In order to work through these notions we read texts by Roberto Bolaño, Immanuel Kant, Yuri Herrera, Hannah Arendt, Homi Bhabha, Jason de León, Maurice Blanchot, Jesús

Carrasco, Giorgi Agamben, Georges Didi-Huberman, Samantha Schweblin, Svetlana Boym, Cuathémoc Medina, Raqs Media Collective, Enzo Traverso, Sigmund Freud, Hernán Díaz, Julia Kristeva, Verónica Gerber Bicecci, Olga Tokarczuk, Bonnie Honig, César Aira, Walter Benjamin, Lina Meruane, Mike Wilson, Dipesh Chakrabarty, Bettina Keizman, Ursula K. Heise, Bruno Latour, Irmgard Emmelhainz; we think with the visual work of Bouchra Khalili, Francis Alÿs, Daniel Richter, Leila Alaoui and Daniel Castro García; and we analyze films by Alejandro Brugués (Juan de los Muertos), Jia Zhangke (The World), Lars von Trier (Melancholia), Alfonso Cuarón (Children of Men), and the Brazilian Netflix series "3%".

Sor Juana Inés de la Cruz and the New World Baroque (211149)

Francisco Ramirez Santacruz

2019 Spring (4 Credits)

Schedule:

M 0600 PM - 0800 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Sor Juana Inés de la Cruz (¿1648?-1695), called by her contemporaries the "Tenth Muse", is widely considered the major female figure of Baroque literature in the Americas. She is viewed not only as a nun or a poet, but also as a persecuted intellectual and a proto-feminist. Her life, works and ideas will be studied and discussed in the context of history and culture of colonial Mexico.

Course Notes: Conducted in Spanish.

Latina/o Theory: Being and Knowing (156603)

Mayra Rivera

2019 Spring (4 Credits)

Schedule:

T 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap:

18

Latina/o literary theory gives a central place to the effects of history and geo-political conditions on the production of knowledge. Therefore, Latina/o theorists begin their critical work by foregrounding the distinct contexts from which the intellectual work of Latinas/os arise and how those contexts relate to the content, language, and style of their writing. How do Latina/o writers challenge assumptions about literature and national languages? How do they understand the self, identity, race, and gender in their relation to context? What is the relationship between myth, history, and the self? What is the relationship between knowledge, power, and wisdom; between creative writing and political transformation? In this seminar we will explore these questions through close readings of key Latino/a scholars and writers,

including Gloria Anzaldúa, Walter Mignolo, María Lugones, and Eduardo Mendieta, among others. We will also read key literary texts from which the theorists draw for their analyses.

Course Notes: Offered jointly with the Divinity School.

Subject: Catalan

Catalan 10

Introduction to Catalan (114279)

Daniel Aguirre-Oteiza

2018 Fall (4 Credits)

Schedule:

TR 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course offers a set of units that, while introducing critical topics of contemporary social, political, territorial, and artistic debates, teach the basics of Catalan language. By the end of the course students will be able to interact in daily situations with native speakers, read and write simple messages about themselves and others, and interpret cultural expressions and products.

Course Notes:

Conducted in Catalan. Knowledge of another Romance language is useful but not essential. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

This course is taught by members of the Department.

Additional Course Attributes:

Civic Humanities (128246)

Doris Sommer

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A developing field, Civic Humanities explores the arts and humanistic interpretation through a centuries-long tradition of civic engagement. Here the humanities are a site for promoting innovation and skills for active citizenship. Democracy and aesthetic judgment developed together to project citizens as co-artists of social constructions. Readings in this tradition of enlightened aesthetics include Kant, Schiller, Dewey, Freire, Gramsci, Ranciere, Mockus, Boal, Kester, Elster, Florida, Nussbaum, and Pasolini. Guest lectures by doctors, lawyers, political leaders, business experts, and public artists will develop specific areas of innovation and represent potential mentors for students as they design original projects.

Course Notes: Conducted in English. Students are required to attend the lectures of Aesthetics and Interpretive Understanding 13 (Cultural Agents).

Romance Studies 250

Mahindra Humanities Center Workshop (207026)

Diana Sorensen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 30

The Mahindra Humanities Center Workshop (ROM ST 250), is a credit-bearing workshop-style course designed to offer intellectual exchange based on the different activities and conversations convened by the MHC, such as the Tanner Lectures (given by Masha Gessen this Spring), the Mellon Postdoctoral Program on Migration, and the MHC multiple seminars and fora. Each student will choose a few events to attend a month, and the workshop will focus on discussing the ways in which they add depth and complexity to her/his thinking, as well as to his/her preparation for the profession. Event reports and responses to be posted on canvas. Meeting times TBD by the group.

Course Notes: Permission of the Instructor needed.

Class Notes: The first class meeting will take place at 403 Boylston Hall at 5:30 on Wednesday January 30. The schedule will be determined according to the group.

Romance Languages 210

Language Pedagogy: Theories, Approaches, and Practices (136717)

Nicole Mills

Elvira G. DiFabio

2018 Fall (4 Credits)

Schedule: W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course is designed for TFs and TAs in the department of Romance Languages and Literatures who are

teaching a Romance language at Harvard for the first time, or those who are interested in foreign language learning and teaching. It introduces TAs and TFs to theories of second language acquisition (SLA) and explores their implications for the teaching of foreign language, culture, and literature. The course provides opportunities for students to learn to enact the specific pedagogical practices deemed essential to foreign language teaching. The intensive week before the start of classes includes reports on and discussion of general SLA theories and demonstrations and analysis of varied instructional approaches.

Course Notes: Students are required to attend the pre-service seminar that will take place the week before classes begin. Students who do not attend the pre-service seminar will not be permitted to enroll in the course. For details and further information, please contact the Course Heads. May be taken SAT/UNS. Permission of Course Head required.

Class Notes: Required pre-service seminar will take place August 23-29, 2018.

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course is designed for experienced TFs and TAs who are currently teaching a foreign language at Harvard, or those who have prior foreign language teaching experience. The course will build upon instructors' understanding of second language acquisition through an in-depth exploration of current theories and trends in second language acquisition, relevant applied linguistics research, and models of theory in practice. Through interactive discussions, video-conferencing, and action research, the course will explore themes associated with social pedagogies, emerging technologies, beliefs and motivation, culture and identity, notions of advancedness, genre-based pedagogies, and multi-literacies and their relationship to language, culture, and literature instruction.

Course Notes: This course is designed for instructors who have foreign language teaching experience and who have been exposed to principles of second language acquisition. This course fulfills one of the requirements of the Bok Certificate in Teaching Language and Culture. May be taken SAT/UNS. Permission of Course Head required.

Recommended Prep: ROM-LANG 210 or equivalent.

Slavic Languages and Literatures

Subject: Czech

Czech AA

Elementary Czech I (111301)

Veronika Tuckerova

2018 Fall (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Part one of a two part introductory course in modern Czech language and culture, designed for students without previous knowledge who would like to speak Czech or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Czech culture through work with film and literature and gain some familiarity with the major differences between literary and spoken Czech as they learn to use the language both as a means of communication and as a tool for reading and research. Czech AA: Elementary Czech I (in the fall) and Czech AB: Elementary Czech II (in the spring) satisfy the foreign language requirement and prepare students for continued study of Czech in intermediate-level courses and for study or travel abroad in the Czech Republic.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see <https://slavic.fas.harvard.edu/language-courses>. - - -
Part one of a two-part series. Students are strongly encouraged to enroll in Czech AA in the fall and Czech AB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Part one of a two part intermediate course in modern Czech language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Czech grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop

confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms. The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Course Notes: This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. Junior Tutorial - "Eugene Onegin" (159853)

Philip Redko

2019 Spring (4 Credits)

Schedule:

F 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

We will read Pushkin's novel in verse, *Eugene Onegin*, in its entirety, paying special attention to its cultural and historical contexts, its play with poetic form and genre, and its innovative approach to plot and characterization. This is one of the most significant and beloved works in Russian literature, and together we will revel in its wit and virtuosity, and find out for ourselves why this work has never lost its appeal to readers. The course will also include a screening of Tchaikovsky's opera based on the novel, and a trip to Houghton to view Pushkin's first editions.

Course Notes:

Required of junior concentrators in Slavic Literatures and Cultures. Course open to non-concentrators by permission of the instructor.

Readings will be in Russian.

Recommended Prep: Students must be able to read in Russian.

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes: No prerequisites. All readings in English.

Michael Flier

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Russian has a fascinating history that reveals explanations for the irregularities and mysteries presented in textbooks but often unexplained. Why does *g* sound like [g] in *mnogo* 'many', but like [v] in *segodnia* 'today'? How is *moloko* 'milk' related to *mlechnyi put'* 'the Milky Way'? Why *pet'* / *poiu* 'sing' and not *pet'* / **peiu*? Why do the numbers 2, 3, and 4 govern the genitive singular rather than nominative plural? How can *nachalo* 'beginning' and *konets* 'end' come from the same root? A historical knowledge of Russian is not only enlightening; it will help improve your skills in the modern language.

Course Notes: No knowledge of linguistics is required. Lectures will be supplemented with problem sets available from the course website.

Recommended Prep: Russian A, "Elementary Russian" (parts I and II), or Russian AAB, "Intensive Elementary Russian"

Investigates major works of imperial Russian culture (1703-1917) as products of their original historical contexts and in their on-going life as acknowledged "masterworks." At the center of this course stand the works themselves, their original historical and cultural contexts, the intentions of their creators, and the responses of their initial audiences. Our aim will be to understand how these works intersected with their time to achieve canonical status. What mythologies of national identity did these works propose and why were they so compelling to their first audiences? In what ways were these works radical: formally, aesthetically, ideologically? How have these masterworks been variously renewed and reinterpreted since their initial reception, up to the present day?

Works by Rastrelli, Falconet, Pushkin, Gogol, Dostoevsky, Tolstoy, Musorgsky, Tchaikovsky, Chekhov, Bely.

Course Notes:

All readings in English. Students who wish to read Russian texts in the original may arrange for a special weekly section with the instructor.

Performing Arts and Cultural Performances in Russia (Medieval to Contemporary) (108365)

Julie A. Buckler

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Surveys and samples Russian drama, opera, ballet, film, musicals, and performance art in medieval, imperial, Soviet, and contemporary post-Soviet culture. What is distinctive about the Russian tradition in performing arts? How has this tradition renewed itself with the changing times? How have these works been interpreted and performed outside of Russia?

Includes works by Gogol, Pushkin, Musorgsky, Chekhov, Blok, Stravinsky, Mayakovsky, Eisenstein, Kharms, Alexandrov, Shostakovich, Bogaev, Krymov, Stoppard. For context, we also examine cultural performance in Russian life, as it figures in religious ritual and folk tradition, monarchy and court, commemorative practices, political life and protest art, identity formation, and the everyday.

Course Notes:

This course will be conducted "conference-style" with a short lecture by the professor at the beginning of each session, followed by student presentations and general discussion. All readings in English. Students who wish to read Russian texts in the original may arrange for a special weekly section with the instructor.

Revolutionary Ukraine: Between the Russian Revolution and the Euromaidan of 2014 (156680)

George Grabowicz

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Focus on Ukrainian avant-garde literature and film, in the context of modernism, socialist realism, the impact of Stalinism, the famine (Holodomor), WWII and the Holocaust, late Sovietism and dissent, Crimea and the Tatars, collapse of the USSR and independence, varieties of post-modernism, and the present conflict with Russia. Also forays into visual art.

Course Notes: All readings in English.

Slavic 182

The Political Novel (205018)

Jonathan Bolton

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

No novel can be reduced to a set of political beliefs, and yet we often feel that novels speak to our political theories and practices. What makes a novel "political"? Can the novel make a contribution to political theory? How does our understanding of political power change when we imagine detailed and dramatic confrontations between individuals and the state, individuals and empire, or individuals and global ideologies? How does narrative form reinforce or undermine ideology? What archetypal dramas—protest against authority, the loss of political innocence, the battle between tolerance and conviction—have shaped the political novel in its various traditions from the nineteenth century to the present?

For spring 2019, our readings will include works by Pushkin, Dostoevsky, Conrad, Koestler, Kundera, Gordimer, and others.

Course Notes: All readings in English.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Arts and Humanities

Slavic 195

East Central European Literature after World War II (119278)

Jonathan Bolton

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Writers from Poland, Czechoslovakia, Hungary, Yugoslavia, and Romania have imagined their region as one of both multicultural harmony and murderous ethnic cleansing, as home to Europe's most debased forms of evil and most inspiring spirit of resistance, as Europe's neglected backwater and its true conscience. What holds these contradictory identities together?

This seminar will introduce you to some of the classics of Central European literature after World War II, including novels and short stories from Milan Kundera, Bohumil Hrabal, Danilo Kiš, Czesław Miłosz, Thomas Bernhard, Elias Canetti, Ryszard Kapuściński, Magda Szabó, László Krasznahorkai, Olga Tokarczuk, and others. We will ask how these writers can be understood in a regional context as well as a national one, and we will examine some key themes of the Central European novel, including war and occupation, emigration and exile, intellectuals' encounter with Marxism and Communism, the interplay of personal biography and national history, and negotiations between artists and the state.

Course Notes: All readings in English.

Additional Course Attributes:

20th Century Ukrainian Modernist Prose (208126)

George Grabowicz

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A survey of Ukrainian modernist and avant-garde prose, from turn-of-the century symbolism to post WW II surrealism, focusing primarily on shorter forms. Among the authors examined will be Kotsiubynsky, Stefanyk, Vynnychenko, Khvyl'ovyi, Kosynka, Pidmohyl'nyi, Iohansen, Domontovych, Kosach, Kostec'kyj and Andrievs'ka.

Course Notes: The course meeting time will be determined at the start of term based on students' availability. This course is primarily intended for graduate students, but qualified undergraduates may enroll with permission of the instructor.

Recommended Prep: Reading knowledge of Ukrainian required.

Slavic 241

Russian Futurism and Formalism (159557)

Daria Khitrova

2018 Fall (4 Credits)

Schedule:

F 0900 AM - 1100 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Follows the development of two major movements in Russian literature – Futurism and Formalism - in close conjunction with each other and in the context of Russian Modernism at large. Examines poems, manifestos, theoretical writings, visual arts, theater productions, films. Key questions include: how could Futurism, with its scandalous manifestos and "transrational" poems, evolve into the Formalist theory with its cult of science and rigorous methodology? How to make sense of the transrational? What made Futurists paint their faces? Works by Bely, Khlebnikov, Mayakovsky, Kruchyonych, Shklovsky, Tynianov, Jacobson, Larionov, Malevich, Zdanovich, Rodchenko, Vertov.

Rereading Russian Intellectual History (156361)

Justin Weir

2019 Spring (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This seminar reviews the standard texts and topics of pre-Revolutionary Russian intellectual history. Course readings include works by Chaadaev, Herzen, Belinsky, Chernyshevsky, Pisarev, Bakunin, Solovyov, and others. The seminar also considers methodological problems and how approaches to writing Russian intellectual history have evolved from the last half of the twentieth century to the post-Soviet era.

Course Notes: Open to qualified undergraduates.

Recommended Prep: Reading knowledge of Russian useful but not required.

Additional Course Attributes:

Attribute	Value(s)

Subject: Russian

Russian AA

Elementary Russian I (122907)

Steven Clancy

2018 Fall (4 Credits)

Schedule: MWF 0900 AM - 1000 AM

Instructor Permissions: None

Enrollment Cap: n/a

Part one of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Course Notes:

Part one of a two-part series. Students are strongly encouraged to enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Russian AA together with Russian AB or Russian ATB (Elementary Russian through Authentic Texts II) satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A, AAB, and AT) prepare students for continued study of Russian in intermediate (B-level) courses (B, BAB, or BTA) and for study or travel abroad in Russian-speaking countries.

Class Notes: Due to the ongoing construction in Science Center B09, Elementary Russian (RUSS Aa) section 001 will meet in Sever Hall 305 on Monday, September 10, Wednesday, September 12 and Friday, September 14 from 9am to 10am. The course will relocate to Science Center B09 as of Monday, September 17, upon completion of the construction.

Recommended Prep: No prior knowledge of Russian is required.

Additional Course Attributes:

Russian AA Section: 003

Elementary Russian I (122907)

Steven Clancy

2018 Fall (4 Credits)

Schedule:

MWF 0900 AM - 1000 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Part one of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Course Notes:

Part one of a two-part series. Students are strongly encouraged to enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Russian AA together with Russian AB or Russian ATB (Elementary Russian through Authentic Texts II) satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A, AAB, and AT) prepare students for continued study of Russian in intermediate (B-level) courses (B, BAB, or BTA) and for study or travel abroad in Russian-speaking countries.

Recommended Prep: No prior knowledge of Russian is required.

Schedule:

MWF 1030 AM - 1130 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family, education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social situations (sociolinguistic competence). Computer exercises on selected topics.

Course Notes:

Interested students should contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions regarding scheduling conflicts. With sufficient enrollments it is possible that this course will be offered in an additional section on MWF in a different time slot. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Russian BA in the fall and Russian BB in the spring within the same academic year. - - -

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>. - - -

Any full course in Russian at the B-level (Russian Ba-Bb, Russian BTA-BTB, or Intensive Russian BAB) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Recommended Prep: Russian AA-AB, AAB, ATA-ATB, AH, or placement at the B-level. Familiarity with fundamentals of Russian grammar, particularly case endings, verb conjugation, and elementary competence in spoken Russian.

Advanced Russian: Russian Cultural Self-Images and National "Mentality" (122814)

Natalia Pokrovsky

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0400 PM

MF 0300 PM - 0400 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Through readings and film, we explore Russian cultural attitudes and self-images as socio-cultural context. Topics include cultural perceptions of self as nation and as cultural "mentality," the collective vs. the individual, attitudes toward friendship, the family and women, law, crime, prestige and success, and ethnic difference. Concentrates on vocabulary and phrasing, and includes extensive writing practice.

Recommended Prep: Russian 103, 113, or permission of the instructor.

An introductory course in modern Ukrainian language and culture, designed for students without previous knowledge who would like to speak Ukrainian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Ukrainian culture through work with prose and poetry as they learn to use the language both as a means of communication and as a tool for reading and research.

This year-long full course satisfies the foreign language requirement and prepares students for continued study of Ukrainian in intermediate-level courses and for study or travel abroad in Ukraine. Part one of a two-part series.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see <https://slavic.fas.harvard.edu/language-courses>. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Ukrainian AA in the fall and Ukrainian AB in the spring within the same academic year. - - -

Part one of a two part intermediate course in modern Polish language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Polish grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Introduction to Polish literature through fiction and poetry, history and contemporary events, including readings from literary masterpieces from Polish literature from the era of the Renaissance to contemporary times including Jan Kochanowski, Wisława Szymborska, Zbigniew Herbert, Czesław Miłosz and others. Film clips and newspaper articles will introduce students to a variety of styles of contemporary Polish. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.

Intermediate Polish I and Intermediate Polish II together prepare students for continued study of Polish in advanced-level courses and for study or travel abroad in Poland.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Subject: Social Studies

Social Studies 10A

Introduction to Social Studies (115470)

James Johnson

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course offers an introduction to the classic texts of social theory of the eighteenth and nineteenth centuries. Our focus will be on the rise of democratic, capitalist societies and the concomitant development of modern moral, political, and economic ideas. Authors we will examine include Jean-Jacques Rousseau, Adam Smith, Alexis de Tocqueville, John Stuart Mill, and Karl Marx.

Course Notes:

This course is limited to sophomores and Social Studies concentrators. This course is a prerequisite for sophomores applying to Social Studies. Students planning to take this class must attend the first lecture to be admitted.

Class Notes:

A weekly section to be arranged.

Social Studies 68CT

The Chinese Immigrant Experience in America (159824)

Nicole Newendorp

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

11

Uses the history of Boston's Chinatown as a case study to examine the experiences of Chinese immigrants in the U.S. from the 1880s until the present. Employs historical, anthropological, and sociological perspectives to examine major themes related to the social and economic development of U.S. Chinatowns and Chinese immigrant communities throughout the 20th and 21st centuries. This course is an Engaged Scholarship course, limited to students who are concurrently participating in a Harvard-affiliated service program in or around Boston's Chinatown. Class discussions and assignments will make active links with students' service work. Open to students in all concentrations.

Course Notes: This course will be lotteried.

Social Studies 68HJ

Justice in Housing (205517)

P. MacKenzie Bok

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

How do theories of justice deal with the problem of housing? What use does American housing policy and politics make of ideas about "fairness" and "justice"? This course will juxtapose contemporary philosophical debates about distributive justice with current concrete problems in housing policy, using the Boston/Cambridge area as a case study. Seminars will feature guests from a number of local housing-focused organizations, and students' final papers will assess real housing policy examples in light of a chosen framework of justice. As this is an Engaged Scholarship course, preference will be given to students involved in direct service to housing-insecure populations (whether in shelters, the public schools, urban summer camps, etc.).

Course Notes: This course will be lotteried.

Urban Health and Community Change: Action Planning With Local Stakeholders (205545)

Flavia Perea

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This is a project-based course on urban community health. We will examine urban health topics from a macro level in the classroom, while exploring community health issues at the local level by engaging with community stakeholders on a health promotion project. We will explore the social conditions people need to be healthy, and strategies to advance health equity that put people in diverse communities on pathways to health as opposed to disparities. To understand how health promoting environments can be created and sustained, we will discuss how community engagement, participatory planning, and cross-sector collaboration can advance health improvement efforts at the local level. There are great possibilities as well as challenges to creating and sustaining healthy communities, particularly in rapidly evolving cities in major metropolitan areas. This course will provide a window into how pressing, highly visible and complex national issues are experienced and addressed in real time, and the real-world complexities involved in advancing meaningful community change.

Open to students in all concentrations. Enrollment capped at 10.

Challenges to Liberal Democracy: Trump, Europe, and the New Ethno-Nationalism (205543)

E. J. Dionne

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Is liberal democracy in crisis? Has it always been in crisis?

Until recently, liberal democracy was largely taken for granted in the West, and many saw it as the wave of the future around the globe. But over the last decade, it has come under challenge in unanticipated ways. Far-right parties gained ground in many countries, although recent elections in Europe suggest that they

have plateaued and might even be in retreat. Donald Trump's election brought this conversation directly to American shores. This class will discuss the challenge to liberal democracy, with special reference to the United States, but also in comparative perspective. There will be particular attention to France, Britain, the Netherlands and Germany and also discussion of the similarities and differences between our time and the 1930s. We will discuss the economic, sociological, and cultural challenges to liberal democracy, and the obligations that fall upon those who would defend it.

Development and Modernization: A Critical Perspective (116329)

Stephen Marglin

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

What assumptions about human beings underlie the conviction that development and modernization constitute progress, that the developed West points the way for the rest of the world? Does economic growth involve a package that necessarily changes the society, the polity, and the culture along with the economy? This tutorial provides a framework for thinking about these questions, both in the context of the West, and in the context of the Third World. This is a junior tutorial.

Course Notes: This course will be lotteried.

Law and American Society (121345)

Terry Aladjem

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

The course examines law as a defining force in American culture and society in four dimensions: as it establishes individual rights, liberties, and limits of toleration; as it attempts to resolve differences among competing constituencies; as it sets out terms of punishment and social control, and as a source of informing images and ideological consistency. We will take up issues at the level of jurisprudence or political theory, but also at the level of legal cases and public controversy in which these questions arise—cases in which racial or gender equality are at stake, religious or sexual freedom, cases in which the claims of religious communities seem irreconcilable, cases in which the nature and extent of punishment have

been debated and the question of who deserves to be punished decided, and notorious public trials in which the national self-understanding has been shaped. Our aim is to bring theory to bear, and down to earth, in each consideration, (we will read Foucault and also visit a prison) and since this is an inaugural presidential year, the issues being debated publicly concerning the law and U.S. Constitution will be much on our minds. This is a junior tutorial.

Course Notes: A prison trip is planned, subject to approval. April date to be determined. This course will be lotteried.

Art, Political Culture, and Civic Life (116288)

Kiku Adatto

2018 Fall (4 Credits)

Schedule: T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

The seminar explores the interplay of the arts, popular culture and civic life. It will draw on studies in art, history, political philosophy, literature, sociology, and photography. Among the questions we will address are: How is historical memory constructed, and what are the competing forces that shape it? What is the significance of public apologies, and does solidarity create moral responsibilities for historical injustices? How is cultural domination exerted, and how is it resisted? Under what circumstances, if any, should art be repatriated? In what ways does rhetoric shape politics, and what role does it play in national narratives? Why does the contest to control images loom so large in politics, the media, and in our everyday lives? This is a junior tutorial.

Course Notes: This course will be lotteried.

Migration in Theory and Practice (127021)

Nicole Newendorp

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

In this course, we will examine how and why people migrate from one location to another, focusing both on the theoretical paradigms scholars use to explain migration processes as well as on the individual experiences of migrants. Topics include transnationalism, diaspora, identity formation, integration and assimilation, citizenship claims, and the feminization of migration. Ethnographic readings focus primarily on migration to the US, but also include cases from other world areas, most notably Asia.

Social Studies 98ND

Justice and Reconciliation after Mass Violence (128057)

Jonathan Hansen

2019 Spring (4 Credits)

Schedule: M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This seminar examines the problem of justice and reconciliation after mass violence: how does a nation sundered by genocide, civil war, or gross human rights violations reestablish the social trust and civic consciousness required of individual and collective flourishing? What is the proper balance between individual and collective responsibility? What is the role of apology (or confession) and amnesty in civil reconciliation? How do specific types of mass violence influence outcomes? What makes some reconciliations successful, others less so? The course engages these and other questions from historical and contemporary perspectives, exploring the legacy of mass violence going back centuries, while examining reconciliation projects across cultures, countries, and continents.

This course comprises three units: 1) a typology of mass violence (civil war, genocide, state repression, for instance) and historical responses; 2) case studies of the U.S. Civil War (and its continuing legacy), Argentina's Dirty War, the Bosnian War, and the Rwandan genocide; and 3) a research and writing workshop emphasizing students own work. The goal of the course is to introduce students to the literature of mass violence from an interdisciplinary perspective (including but not limited to historical, sociological, and anthropological approaches), ultimately launching students on their own research projects. This is a junior tutorial.

Course Notes: This course will be lotteried.

Social Studies 98OC

Humans, Technology, and Biopolitics (109964)

Anya Bernstein

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Recent scientific and technological advances are increasingly questioning what it means to be human. Debates on life extension, gene editing, and artificial intelligence regularly appear in the media, with views ranging from techno-optimism—the idea that such breakthroughs will deliver us from suffering—to the warnings that technoscience is advancing at such a rapid pace, that there is not enough time for ethical guidelines to be developed. Some argue that science is increasingly delivering on the promises traditionally made by Judeo-Christian religions, while others assert that such techno-optimist thinking is a kind of new religion in and of itself. Debates around emerging technologies cut across traditional political lines, making them specifically biopolitical, where such issues as human enhancement, control of reproduction, genetic engineering, and many others, create new types of political positions and actors. This course will examine these issues, focusing specifically on what concepts of "the human" emerge from these debates, and how certain ideas about the future affect how we live and manage our time now, as futurist discourses are producing affective states of both hope and fear. Among the case studies for this course, we will look at the cultural and philosophical movements of transhumanism and posthumanism, new utopian and eschatological imaginaries, as well as ethical and legal questions of developing and using biomedical technologies, including their non-therapeutic use. As we proceed, we will pay particular attention to the shifting relations between body and person, human and time, transcendence and corporality, and technology and biology, while discussing how they contribute to the rethinking of the human condition in the technological age. Materials for the course will include academic pieces from a range of disciplines: STS, anthropology, philosophy, bioethics, as well as non-academic media sources, documentaries, and science fiction films. This is a junior tutorial.

Course Notes: This course will be lotteried.

Social Studies 98PF

Rethinking Transnational Feminism (160159)

Angela Maione

2019 Spring (4 Credits)

Schedule:

T 0345 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

What is transnational feminism? Is it an internationalized identity, a form of solidarity, a political project, a type of activism, a set of practices, a methodology, or something else? Is it a response to political economy, global feminism, differences among women, post-colonialism, or the national limitations of feminist movements and thought?

This course answers these questions in order to offer a broad overview of transnational feminism in light of one genealogy of its appearances in theoretical, social movement, and institutional forms. It begins with questions around conflicts and compatibilities between the politics of home, on the one hand, and solidarity among women, on the other. It tracks the rise of transnational feminist theory and practice, and explores its influence in debates on both globalization and women's human rights. Using frameworks from recent scholarship, it examines key transnational-oriented texts, documents, and speeches from the 18th to 20th centuries in the history of feminist political thought. Finally, it invites students to rethink 21st century positions using historical and theoretical resources encountered in the course.

This course asks, Can transnational feminism be democratic? How have historical figures attempted to think and act on behalf of women on a world stage? How might aspirations to think across national borders in the name of feminism be understood today? A variety of interpretive and theoretical approaches as employed in course texts will be considered. This is a junior tutorial.

Course Notes: This course will be lotteried.

Empire and Colonialism in the Modern World (160338)

Daragh Grant

2019 Spring (4 Credits)

Schedule:

T 0345 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This tutorial will expose students to scholarship on modern empire from across the fields of anthropology, history, and political science. Students will explore how relations of empire and colonialism were constituted through structures of law and of economic relations, as well as how notions of race and culture were shaped by imperial encounters. By focusing on island colonies of the Caribbean, students will also be invited to explore the rich seam of anti-colonial and post-colonial theory that developed in that context. Finally, the readings for this tutorial will introduce students to a range of methodological approaches to the study of empire, with an emphasis on historical methods, and will invite them to consider the strengths and weaknesses of these different approaches. This is a junior tutorial.

Course Notes: This course will be lotteried.

The Critical Theory of the Frankfurt School (156263)

David Lebow

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This junior tutorial examines the major thinkers and themes associated with the Frankfurt School of critical theory. From its origins in the interwar crisis, critical theory has sought to diagnose the pathologies of the present in order to chart paths for social and political emancipation in the future. The readings trace the development of the Frankfurt School its various generations, engaging with many of the most important themes of twentieth century continental philosophy, including fascism, democracy, capitalism, bureaucracy, globalization and inequality, to name just a few. The goal of the tutorial is not only to gain a deeper understanding of the Frankfurt School, but also to assess the continued relevance of this distinctive approach to the critical theory of society. This is a junior tutorial.

Democracy and Education in America (205453)

Leslie Finger

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course explores the political dimensions of education policy in the United States. It examines the various political factors that have contributed to modern battles over education policy making. The course draws from political science scholarship as well as other disciplines to explore how race, the courts, unequal political participation, interest group advocacy, social movements, as well as local, state, and federal institutions have impacted education in the U.S. The last few weeks are spent applying these ideas to the case of school choice and charters. Throughout, the course considers the normative implications of education policies and battles, asking how particular education proposals and the behavior of the actors pushing them impact the health of democracy. This is a junior tutorial.

Course Notes: This course will be lotteried.

Secularism and Its Critics (205481)

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Often heralded as the antidote to religious conflict, "secularism" has come under attack in recent years by scholars across the political spectrum. This course explores these debates as they have taken shape around reappraisals of the "secularization thesis" – a once-dominant theory asserting the declining importance of religion in the modern world – since the Cold War. Our goal will be to explore the relation of religion to democratic thought and practice by reading both recent critics and defenders of secular modernity in the fields of history, philosophy, anthropology, and political theory. While the course will focus on Europe and the United States, it will also seek to understand how the legacies of colonialism and globalization have shaped the face of religion and the secular today. Two central questions of the course will be: Is secularism dead as a political program? If so, what ought to replace it? This is a junior tutorial.

Course Notes: This course will be lotteried.

Social Studies 98QK

The Ideal of the Open Mind (205483)

Adam Sandel

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

We commonly consider an open mind as essential to fair-minded moral, political, and legal judgment. If you are called for jury duty, for example, you will likely be asked whether you are confident you can judge the case with an open mind. If you answer "no," you will be dismissed from the jury. To have a closed mind is to resist the possibility of persuasion, to be dogmatic, recalcitrant, even bigoted. But what exactly is an open mind?

This course will examine and assess the ideal of the open mind as it has emerged in the Western philosophical tradition. In the first half of the course, we will consider the ideal of detachment and impartiality that emerged during the Enlightenment and remains influential today. In the second half of the course, we will examine various attempts to recast and revive the case for tradition, partial association, and interpretive pre-judgments that emerged in reaction to the Enlightenment, some of which harken back to ancient political thought.

Throughout the course, we will address questions of contemporary relevance, drawn from the realms of law, politics, culture, history, and philosophy. For example: Is an impartial jury the same as a fair jury? Is political rhetoric invariably a form of manipulation and deceit, or is it a way of persuading people by appealing to them from within their own perspectives? Is one's own upbringing and linguistic background a regrettable limitation to the understanding of other cultures, or a resource for mutual understanding? Should we try to understand the past by setting aside our contemporary views and assumptions, or by drawing upon them? In what sense should a liberal arts education aim at cultivating an open mind? This is a junior tutorial.

Theorizing the Postcolony (207901)

Anurag Sinha

2018 Fall (4 Credits)

Schedule:

W 0900 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

10

This course investigates what is distinctive about postcolonial political theory and what lessons it holds for political and social theory in general. We will revisit authors from Social Studies 10a and 10b, reading them alongside recent work in postcolonial thought. In so doing, we will ask: What are the different ways in which the postcolony has been understood? Does postcolonial politics display any particular characteristics? Can the extant idiom of political theory capture the varieties of postcolonial political imaginaries? How does postcolonial thought problematize our reading of the canonical history of political thought? Salient themes of the course include modernity, nationalism, democracy, religion, and questions of authority and freedom. Several weeks will be devoted to understanding the postcolonial experience of South Asia, the Caribbean, North Africa, and Latin America. This is a junior tutorial.

The Politics of Culture in Europe (207902)

Andrew Brandel

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

With the birth of "modern Europe", cultural difference emerged at the center of urgent debates about the organization of society. Even our present political moment seems to be defined by migration "crisis" and globalization. Public discourse appears to be structured by questions about how we might make a place for others in our societies, or whether we should. Does welcoming others require more than the tolerance of their differences? How/should migrants "integrate" into host cultures? Does an increasingly connected and mobile world mean that cultural differences will be replaced by a uniform global culture? By the same token, does integration mean the potential loss of European culture? What does it mean to have a culture in the first place, who belongs to it, and what kinds of boundaries do they have, if they have them at all? Scholars and politicians have proposed a variety of concepts to help us describe this social reality - concepts like *multiculturalism*, *interculturalism*, *diversity*, *globalization*, *cosmopolitanism* – each of which comes with its own political projects. In this tutorial, we will ask where these concepts come from, how have they changed, and how do they impact people's lives?

We will trace the history of this network of ideas, from the cosmopolitanism of the 18th century urban elites to the Syrian refugee "crisis" that has defined recent political contests on the continent. Cases will include recent migrations of peoples from former colonies to Europe, forced migrations from the margins to the metropole under the Soviet regime, and internal displacements of groups like Ashkenazi Jews and the Roma. In each case, we will pay close attention to the ways in which social scientific knowledges – and in particular, shifting ideas about "culture" - are implicated in these different political positions.

Students will be introduced to empirical research methods in discourse analysis and ethnographic fieldwork, including how anthropologists and sociologists combine interviews and participant-observation with policy analysis. This is a junior tutorial.

Course Notes: This course will be lotteried.

The Problem of Work (207903)

Katrina Forrester

2019 Spring (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

We are often told that the nature of work is changing. But how should we think about it? From the work ethic to emotional labor, housework to service work, welfare to the strike, this tutorial will explore the history of political ideas about work in the twentieth century. We will combine readings in classic texts in the history of social and political theory, intellectual history and feminism to provide students with the major conceptual tools for understanding the transformation of work in the twentieth century, and in our own. This is a junior tutorial.

Course Notes: This course will be lotteried.

Patriotism, Nationalism, and Identity (207904)

Rebecca Ploof

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Embraced by some and rejected by others, identity politics permeates the contemporary political landscape. Among many markers of identity, nationality and nationalism have seen a remarkable recent resurgence. How, though, are national identities formed and constructed? How are they expressed and mythologized? Can identifying with nation be separated from nationalism? And can nationalism, for that matter, be meaningfully disentangled from patriotism?

Given nationality's multidimensional nature, the course will examine these and related questions through works of history, oratory, epic poetry, political theory, dramatic tragedy, comparative politics, and film. In keeping with this interdisciplinary approach, the class will also address interpretive methods across an array of mediums including text, image, and video. This is a junior tutorial.

Course Notes: This course will be lotteried.

Neoliberalism and Its Discontents in the Middle East and North Africa (207914)

Jeremy Siegman

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course exposes students to theoretical, political-economic, historical and anthropological perspectives on neoliberalism in the Middle East and North Africa and more generally. Raising broad humanistic social-science questions about the relations among states, markets and the social, the course

explores neoliberalism beyond economic policy as a set of transformations in class relations, everyday life, nationalist politics, and regional politics. Readings range from key exposition and critiques of neoliberal thought to a geographic focus on Egypt, the Levant, and the Gulf states. The course concludes by considering the fraught legacy of neoliberalism today, in the region, and beyond. This is a junior tutorial.

Course Notes: This course will be lotteried.

Aesthetics and Modern Politics (211214)

Ana Isabel Keilson

2019 Spring (4 Credits)

Schedule:

W 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Since Plato, art and aesthetics have stood in an intimate, and often uneasy, relationship to politics. This course is an intellectual history of modern ideas about the relationship between aesthetics, broadly defined as the sensible appreciation of life and human experience, and politics, defined as the quest to establish secure and stable order among individuals. We will examine how philosophers, social and political theorists, writers, and artists have understood aesthetic experience to be central to political life and, in turn, have grappled with similar questions about human nature, collective order, individual freedom, morality, and justice. With our focus on Europe and the United States in the nineteenth and twentieth centuries, the major themes covered in the course include: questions about art as imitation or creative production; depictions of human nature and the role of government; the relationship of form to content; debates about "modernism," "the modern," and "modernity"; the emergence of cultural Marxism and debates about aesthetic form among the first generation Frankfurt School and affiliates (e.g. Lukàcs, Bloch, Krackauer, Adorno); political and artistic avant-gardes (e.g. Italian and Afro-futurisms; Socialist Realism, fascism, National Socialism); race, capitalism, and mass society. Together, we will attempt to answer the deceptively simple question: what is – and should be – the relationship of aesthetics to modern politics? This is a junior tutorial.

Course Notes: This course will be lotteried.

College students navigate complex social and economic dynamics when deciding what to do after graduation. These include pressure to join "elite" fields or organizations, the need to maximize earnings to support family members, a desire to pursue advocacy or activism, and applications to post-graduate programs. In this course, students will use theories and concepts from economic sociology explore how upcoming and recent college graduates make their post-graduation plans. Students will develop qualitative research projects and collect and analyze interview data to understand how financial concerns, social context, and relationships shape graduates' employment and educational choices.

Faculty Research Assistant (160534)

Hilary Holbrow

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Students gain research skills along with an understanding of the production of sociological knowledge through work on faculty research projects. Work is arranged and directed by faculty members, who supervise and meet with students regularly (every 1-2 weeks). The specifics of the intellectual goals for the student and the research tasks involved will vary. The student and faculty member will consult on this in advance and will outline the following on the 92r Registration Form: 1) the specific skills to be learned, 2) how the course will engage students with the discipline, and 3) the specific work product. What students produce will depend on the kind of research involved. It is expected that students will work 8 to 10 hours per week on the course. Students may engage with data collection, data analysis, literature reviews, or other aspects of a faculty project.

Course Notes: Rachel Meyer and members of the department.

Class Notes: Limited to Sociology Concentrators. Actual meeting times to be determined between student and instructor.

Junior Tutorial: Urban Politics in the Global City (207628)

2019 Spring (4 Credits)

Schedule: T 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

Across the world, cities are becoming increasingly connected, as international flows of people and goods turn local places into sites of global exchange. Yet the problems of the city remain fundamentally local: housing, economic growth, and public policy are determined by local leaders and contested by urban residents. This course examines urban politics in globalized cities. Using sociological theories of urbanism and politics, we will examine debates over urban issues including housing, job creation, and sustainability. The tutorial will guide students in the preparation of an empirical research paper on an urban issue of their choosing. Topics may include: housing and gentrification; economic development and inequality; globalization and urban culture; technology and urban governance; and the urban environment and sustainability. The class will include workshops on developing a research question and research design. We will explore qualitative research methods, including interviews and ethnography, as well as new methods for observing urban space such as systematic social observation with Google Street View. Throughout, we will refine our understanding of the urban environment, how it is changing in the face of globalization, and what local policy-makers, activists, and residents are doing to shape the future of their cities.

Course Notes: Required of and limited to Sociology concentrators. Junior tutorials are by lottery only.

Jr Tut: Collective Identity (205091)

Shai Dromi

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Blue collar and middle class, Blacks and Latinx, Christians and Muslims, Americans and French, Harvardians and Yalies –groups have, by their very definition, some criteria to discern those who belong from those who do not, whether they are as large as whole nations, or as small as a group of friends. But what does it mean for a group to have a collective identity? This course will examine what collective identity is and how we can study it sociologically. It will ask questions such as Does a collective identity rely on group members sharing the same past experiences, or does it rely on them facing similar present circumstances? To what extent do group members have to agree on what their collective identity is, and how are disagreement and conflicts managed? How do group members engage in identity politics, and how do they compare their groups to others?

The course will begin with a review of sociological literature that addresses some of the key debates on this topic. Moving forward, students will design and complete their own research projects. Each student will choose a group in the Boston area or on campus, formulate a research question, and conduct participant observations and / or interviews. The course will cover the various steps of the research process, from formulating a research question through collecting and analyzing data and reviewing existing literature, to constructing the final paper.

Course Notes: Required of and limited to Sociology concentrators. Junior tutorials are by lottery only.

Junior Tutorial: Consumption and Culture (207653)

2018 Fall (4 Credits)

Schedule:

T 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

Why do we consume the things we do? This course examines how culture structures what we desire and how what we consume affects our identity and more broadly the systems of inequality in our society. Course readings will focus on the interplay between the sociology of taste and its connections to the market. We will examine key questions such as: Why do we enjoy certain types of music, food, or leisure activities, and what are the implications of these tastes? Who are the key tastemakers who influence us to adopt the tastes we do? How do our consumption patterns relate to our class background and to other social dimensions? How are our tastes related to social movements and political debates? In the first part of the course, students will learn key concepts in the sociology of consumption and culture. In the second part, they will apply this knowledge to a field of consumption that they find most compelling through an independent research project based on qualitative data (interviews and/or ethnographic methods). In-class workshops will assist students in developing a research question, designing a project, collecting and analyzing data, and reporting on findings. Throughout the course, students will be encouraged to think broadly about the concept of "consumption", which can apply not only to our preferences for material goods, but also for things such as marriage partners, beauty, careers, and a host of other domains of social life.

Course Notes: Required of and limited to Sociology concentrators. Junior tutorials are by lottery only.

Junior Tutorial: Social Class (126248)

Rachel Meyer

2019 Spring (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Class, one of the most basic analytical concepts in sociology, structures our social world in fundamental ways. Nevertheless, the extent to which social class is salient to people, and the specific content of class-based identities and class cultures, varies widely. This course is rooted in a comparison of the working class versus professionals and the upper middle class. The focus is on the United States while maintaining a comparative perspective on other national, historical, and cultural contexts. Reviewing a variety of contemporary studies and theoretical perspectives, we will pursue the following questions, among others: How do class-based identities relate to class structure? How are boundaries drawn between classes and among people of the same social class? What might undermine—or bolster—class consciousness in different contexts? And how is social class reproduced? In the U.S. case, how does class intersect with other aspects of American culture? Are class-based identities racialized? Throughout the course we will be attentive to the variety of research agendas on the topic and the various kinds of data that are brought to bear on these questions. After reviewing the relevant literature students will then design and execute their own original research projects that seek to elucidate some aspect of class identity or class culture. Students will have the opportunity to engage in each step of the research process, from question formulation and data collection to analysis and write-up. Along the way we will have workshops on the process of conducting primary research and on each student's project. The methodological focus will be on interviewing, with an attention to how ethnographic data and surveys might also shed light on the subject.

Sociology 98MD

Junior Tutorial: Social Networks (207704)

Peter Marsden

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Relationships among persons, organizations, places (physical and virtual alike), and countries make up social networks. Networks are involved when people get help (jobs, advice, support), circulate information and gossip, signal status to one another, form opinions and identities, or collaborate in workplaces, social movements, crimes, or other covert activities. Companies and activist groups coordinate and compete with one another in interorganizational networks. International networks depict exchanges of goods and services among countries, as well as alliances and agreements. Networks are important constituents of what has come to be known as "social capital." Both the "social worlds" surrounding individual people and the "social structure" of groups—both formal and informal—can be informatively conceived of and represented as social networks. Among group-level social phenomena that involve social networks are segregation, status processes, the diffusion of ideas and information, social support, and social influence.

This tutorial will introduce social network phenomena and research in sociology. We begin by studying some theoretical ideas on which much network research draws. Next, we will study individual or "egocentric" networks, group-level networks, and networks that link individuals to groups or other entities. Substantively, the seminar will cover diverse fields of sociology: possibilities include community and social support, crime and delinquency, social movements, behavior in and around organizations, education, the organization of science, new media and networks, migration, and the "small world" phenomenon, and more. [The particular fields will be selected before the beginning of the semester. They will be chosen to illustrate a variety of different approaches to studying networks.]

All junior tutorials in sociology seek to develop both substantive knowledge and research skills. Social science network studies use many methodological approaches to collecting and analyzing data. Students will gain some experience in assembling network data and in working with different sources that contain information about actors and their social relationships. They will also learn to use software for visualizing network data and carrying out basic network analyses. Each tutorial session will examine some research studies, asking both what was learned and how it was learned. During the second half of the semester, students will gradually develop and conduct research about social networks in a field of interest to them, and present their findings in both oral and written form.

Course Notes: Required of and limited to Sociology concentrators. Junior tutorials are by lottery only.

Sociology 98NA

Junior Tutorial: Crime & Criminal Justice (207687)

2019 Spring (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course examines several of the most contemporary and contentious debates in the study of crime and criminal justice: how are we to make sense of mass incarceration? What are the variety of ways in which race influences policing in America? Why have crime rates plummeted since the 1990s? And what can studying trajectories of crime across the life course tell us about the relative importance of sociological and psychological causes of crime? Through readings and classes that tackle these questions, students will be exposed to many instances in which social scientific inquiry has provided important insights, and to even more instances in which it has yet to provide good answers.

After reviewing these debates, students will complete an independent research project on some aspect of crime or criminal justice. We will hold in-class workshops on the various stages of the research process, from formulating a research question to data collection and analysis. Students will have the choice of completing either a qualitative (interviews and/or ethnographic observation) or quantitative (statistical) project, and all students will be exposed to both approaches through in-class discussions. Ultimately, students will both formulate research questions about crime and criminal justice, and work through their projects to provide convincing answers to those questions.

Course Notes: Required of and limited to Sociology concentrators. Junior Tutorials are by lottery only.

Sociology 98OA

Junior Tutorial: Modern Family (207632)

Eunsil Oh

2018 Fall (4 Credits)

Schedule:

M 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

The second half of the twentieth century witnessed dramatic changes in family formation around the world, including increasing divorce rates, decreasing fertility rates, diversification of family types, and changing roles of spouses and children. However, existing studies have different views and arguments about how norms, beliefs, attitudes, and structural conditions shape and are shaped by families. This course explores ongoing debates about the changing and durable characteristics of the modern family in America and worldwide. Course materials and lectures will introduce key historical trends and concepts in family sociology. Readings focus on micro-, macro-, and interactional-level processes in which the meaning of "a legitimate family" is constructed and decisions about family formation take place. The goal is to understand how what are typically seen as individual decisions about families are also shaped by culture and structure.

Throughout the course, students will design their own research, collect their own data, and complete an independent research project on some aspect of the modern family. The methodological focus is qualitative, mainly using in-depth interviews. When necessary, ethnographic methods can be used. Throughout the course, we will focus on how the existing literature asks different questions based on different research methods and on the strengths and limitations of quantitative and qualitative methodologies in understanding the modern family. Also, to build our analytic and research skills, we will combine existing work on families and mini-workshops on qualitative methodology, including designing a research question, collecting data, analyzing data, and writing a qualitative work. Students will also be expected to consider the limitations of a qualitative cultural sociological approach.

Course Notes: Required of and limited to Sociology concentrators. Junior tutorials are by lottery only.

Tiffany Ting

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Privilege is an understudied but important topic in educational and social science research. Recent scholarship increasingly attends to the role that elite educational institutions play in producing and maintaining social and economic inequalities. In this course, we will investigate the connections between class, privilege, and educational advantage. By employing the lens of cultural sociology, we will explore various contexts for elite education, the cultural practices around which they are organized, and the ways in which individuals negotiate a sense of legitimacy and identity within these spaces.

Models of Social Science Research (117560)

Paul Chang

2018 Fall (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course introduces students to core methodological concepts and strategies used in social science research including: question formulation, hypothesis generation, the logic of hypothesis testing, sampling and measurement, experiments, survey analysis, content analysis, ethnography, and in-depth interviewing. In the course we will discuss and develop the analytic skills necessary to interrogate epistemological assumptions in published research specifically and truth-claims generally. In addition to critically evaluating previous research, students will collect and analyze their own data based on the different methods discussed in the class. By the end of the course, students should have acquired valuable research tools widely applicable in academic and professional settings.

Course Notes: Required of concentrators, ordinarily sophomores, and secondary concentrators.

Sociology 1023

Introduction to Political Sociology (159779)

Danilo Mandic

2019 Spring (4 Credits)

Schedule: MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

Politics is a struggle for power—power over access to and the distribution of resources, over personal and

collective status, and over the ability to define legitimate categories of thought. While politics can be found in all domains of social life, the ultimate site of political contestation is the state, which holds the legitimate monopoly on physical and symbolic violence. Hence, much political sociology is concerned with the relationship between the state and society: how the modern state came to exist, how it came to be viewed as legitimate, what factors shaped processes of democratization, how cleavages based on class, race, and gender affect democratic representation, how liberal democracies structure their welfare state policies, how states create and manage markets, and how social movements strive to effect political change by making claims on state actors. This course will offer an overview of these varied substantive topics, while exposing students to the analytical power of a sociological approach to politics.

Introduction to Global Social Change (109657)

Rachel Meyer

2018 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores the development of global capitalism with a focus on changing relationships between markets, states, and civil societies. Questions of power and inequality will be central to our approach. We will begin from a macro political economy perspective, exploring global social change through the lens of world-system theory, neoliberalism, deindustrialization, and "flexible accumulation." We will then examine globalization "on the ground" in a variety of local contexts and, finally, turn to resistance to globalization and social movements. We will explore transnational activism, student movements, precarious workers' mobilizations, and the role of social media and Internet activism. Throughout the course we will ask: How are social relations shaped in the global north and south in the context of global capitalist development? How can we understand the relationship between global capitalism and democracy? And how can we conceptualize the different forms of resistance to globalization and their significance? We will explore the possibilities for and limitations of global social change through a variety of cases of transnational and community-based activism.

Higher Education: Institutions, Inequalities, and Controversies (203333)

Manja Klemencic

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This undergraduate seminar explores modern higher education systems and institutions through sociological lenses. We identify major issues and controversies in contemporary higher education – such as rising student debt, inequality in access, grade- and degree "inflation", commercialization of higher education, what students learn and more. We also look backstage to student experience at Harvard. We explore these issues drawing on the seminal works and concepts from the six domains of inquiry in this field: college impact, study of inequalities, universities and colleges as organizations, academic profession, higher education politics, and higher education culture. This is a research-intensive seminar and each student conducts research leading to a final paper. Students also participate as co-teachers in parts of the course. This is an opportunity to gain perspectives into established and emerging areas of research into higher education and insights into today's changing higher education landscape at Harvard, in the United States and across the world.

International humanitarian organizations are often first on the scene when armed conflicts erupt or natural disasters strike, but their efficiency and legitimacy are constantly questioned. This course examines humanitarian activism from a sociological perspective by looking at its history and its role in contemporary society. We will examine the origins of organized humanitarian activism and the dilemmas and challenges that NGOs must often face. We will investigate the consequences, justifications, and limitations of humanitarian work, focusing substantively on several case studies including the Kosovo War, the Nigerian Civil War, and the 2004 Indian Ocean Tsunami. The course will conclude with presentations based on students' independent research and exploration of an applied topic from the course.

Latinx Identity and Mobilization (211161)

Cristina Lacomba

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines Latinx identity and mobilization from a sociological perspective. It begins by investigating the complexity of the Latinx identity in the United States. Does Latinx refer to a culture that encompasses many cultures, a common geographical origin, a shared linguistic identification, some or all the former? How does the use of pan-ethnic identities, of which Latinx is a representation, shape power, representation, and inequalities within and between social groups? The course will first focus on sociological theory of ethnic identity construction. Students are then asked to apply their newfound understanding of the Latinx identity to an analysis of Latinxs' mobilization and social movement activism. What socio-political issues undergird Latinxs' mobilization in modern times? How well does social movement theory explain Latinx mobilization? And how do community organizations shape the mobilization process? The final weeks of the course will expand the discussion to the formation of Latinx identities and mobilizations in Europe, with an emphasis on the Spanish context.

Race, Ethnicity, and Public Policy (211146)

Anne-Marie Livingstone

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The course is broadly concerned with the impact of race and ethnicity on the formation, content, and results of public policies in western countries. The focus will be primarily on the United States, where the issue has been studied most extensively; however, attention will also be given to examining developments in Europe. Students will make use of concepts from the relevant theoretical literature to analyze and understand specific cases of public policy, including civil rights, welfare, immigration, affirmative action,

and criminal justice. Readings will address how race and ethnicity influence public policy through cultural beliefs, party politics, public opinion, social movements, interest groups, and political representation.

Migration in Israel and Comparative Context (207867)

Tally Amir

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

With about sixty-five million persons forcibly displaced around the world, most nations have had to create or rethink policies on the admission and integration of migrants. This seminar will focus on migration to Israel from a comparative perspective. Israel, originally founded as the land of Jewish refugees, is struggling to determine who constitutes a "forced" migrant and how it might strike a balance between its legal and moral obligations toward such migrants and its other interests. The seminar covers a number of themes in migration policies such as the categorization and definition of a "forced" migrant; judicial review of immigration policy; detention; encampment; urban integration; and the rights of migrants (including education, cultural rights and employment) in a comparative context. Comparisons focus on the US, Australia and the EU. Readings for the course include Court decisions, International Law instruments, Domestic legislation and socio-legal articles, as well as sociological analyses.

Human Rights in Israel and the United States (207866)

Tally Amir

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

"Human rights" has become a ubiquitous concept around the world. It is used to justify, legitimize, and critique policies, practices, and laws. Despite the evolution of "human rights" over the last half-century in both international and domestic law, the content and impact of the concept remains unclear. This seminar will address key issues in contemporary human rights theory and practice through a comparison of Israel and the United States. Seminar participants will first study the philosophical and political processes that led to codification of human rights in both countries. We will then take a closer look at some of the main human rights controversies, including desegregation of education, freedom of religion, housing equality,

extra-territorial application of human rights, and employment rights. Readings for the course include Court decisions, International Law instruments, Domestic legislation and socio-legal articles, as well as sociological analyses. Social Class in the Black Community (205208)

Jacqueline Rivers

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course focuses on the rise of class divisions among Black Americans. The effects of structural constraints on blacks' social and geographic mobility and how that resulted in a sense of "shared fate" will be the focus of the first portion of the course. The divergence of black people's material conditions as a result of the successes of the Civil Rights Movement, and the impact of factors such as black flight, deindustrialization and spatial mismatch of employment will be discussed. Other topics include changes in blacks' patterns of support for public policy options, divergences in their experience of mass incarceration, education and employment opportunities, and continuing similarities in academic underachievement. The conclusion of the course examines the roots of intergenerational poverty and considers the possibility that the gap between the two groups will continue to widen.

Sociology in the Age of "Big Data" (207631)

Joscha Legewie

2018 Fall (4 Credits)

Schedule:

M 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

36

Over the last decades, the technological revolution in mobile, Web, social media and Internet communications has transformed many aspects of our life. The digital age also promises to change social research and how we can learn about the social world. Data science and large-scale or "big" data including the increasing use of administrative records are at the core of this transformation of sociological research. This course discusses transformative contributions to classical sociological questions based on the "new" science of networks, web-based social research, administrative data, and the traces of our digital lives. We will explore important advances, the challenges facing the social sciences and consider ethical and privacy concerns raised by "big" data and analytics.

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This Undergraduate Engaged Scholarship Course specifically targets students in different service and leadership roles at Harvard (e.g. students serving on University committees or as interns in University offices or programs, student leaders, PAFs, HOCOs, FYE, UC, Crimson, etc.). To these students it offers an opportunity to engage with scholarship from sociology of higher education to better understand and explore student agency in university contexts. Students' grasp of concepts, such as university citizenship, mattering, belonging, community-building, and self-formation, is reinforced through their experiential learning in existing service and leadership roles on campus. Students work on participatory action research and develop blueprints to influence policy relevant to their service and leadership. Invited guest speakers bring insights of the backstage of higher education governance at Harvard and beyond. Meetings with student communities outside Harvard helps students understand student agency in different university contexts, share experiences and explore collaboration. This course challenges the traditional line of inquiry in sociology of higher education which focuses primarily on the effects of college on students. Instead, student projects developed in this course showcase student agency and the impact students have on their universities through policy and service.

Philanthropy and Nonprofit Organizations (203368)

Shai Dromi

2018 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap: 25

Most moral and religious frameworks uphold some form of benevolence and charity. However, societies have different ways of thinking about the roles of philanthropy and nonprofit organizations. This course investigates the nature of philanthropy and nonprofit organizations, as well as their influence on civil society. We will consider different sociological approaches to charitable giving and apply them to substantive topics, such as competing philosophies of giving and the relationship between philanthropic and state-sponsored programs. We will also address issues of social responsibility that arise when billionaire and corporate actors engage in philanthropic work.

As a culminating active learning exercise, students will work in groups to identify and evaluate nonprofits as potential donation recipients, and will assess the impact a donation would make for those organizations. Student groups will have a unique opportunity to decide how to disburse a grant provided by the Philanthropy Lab to nonprofits, and to experience first-hand the dilemmas donors face as they evaluate nonprofits for donation.

Sociology of Religion (207600)

Riva Kastoryano

2018 Fall (4 Credits)

Schedule: T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

The rise of religious fundamentalisms and or the increasing importance of religion in public lives today raise the question of the relevance of modernity associated to the process of secularization at the end of the 19th and beginning of the 20th century. The public expression of worldwide religious feelings has become source of tensions among individuals, groups and communities, between communities and nations. This seminar will explore different understanding of state-religion relationships based on different religious claims in different contexts; the meaning of visibility of religion on a local and national level, its organization on a transnational level as well as its transformation with globalization.

Based on empirical studies and their theoretical framework this course will treat the sociology of religion from different perspectives:

Religion and culture

Religion and moral values

Religion and social and political action

Religion and state – debates on secularism and pluralism

Religion and transnational solidarity

Religion and globalization

Each of these angles will be studied in a comparative perspective: state-religion relationship, enlightenment and secularism, religious and multiculturalism, the effect of institutional organization of religions, the status of religious minorities with a focus on Muslims in Europe and the United States.

In this course, we will use culture as an analytic lens for investigating the institution and experience of school. We will examine 1) relationships and borders between schooling and broader educational contexts including families and communities; 2) schools as dynamic social and cultural systems, and 3) classrooms as sites of conflict, collaboration, and innovation in teaching and learning. Throughout, we will consider how individuals in a variety of roles – teachers, students, administrators, parents, researchers – interpret, negotiate, and respond to the practices and arrangements of schooling. We will examine the complex role of cultural factors in producing, maintaining, and potentially reducing inequalities in educational access, opportunity, and outcomes.

Keridwen Luis

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course asks how gender, sexuality, race, dis/ability, class, and other intersections of identity impact how we use and appear on social media. Early internet theorists imagined the World Wide Web as a "free" society, where "bodily" issues such as race, gender, and disability would somehow disappear. However, these identities have not vanished; in fact, we might argue that they remain even more potent in today's age of constant media connection. We will explore sociological and feminist theories of media, gender, sexuality, and race, as well as applying these theories to current events online. Students will explore the boundaries of digital activism, question the ways we continue to be embodied online, and consider power relations, discipline, and surveillance.

In this course, we will study health differences between social groups. We will begin by examining the extent to which health is unevenly distributed across groups defined by nationality, neighborhood, race, gender, and class. We will then seek to pinpoint the reasons for these disparities with a detailed analysis of the pathways through which these factors are linked to health status. Finally, we will discuss new research on the sociology of population health that shows how health disparities depend on meso- and macro-scale causes like neighborhoods, social policy arrangements, global organizations, and climate change.

Ellis Monk

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

36

This course provides an introduction to the comparative study of "race and ethnicity" around the world. We focus here not on particular "ethnic" or "racial" groups, but rather, on particular cases which illustrate how "race" is used as a way in which to divide, sort, and rank human beings (i.e. a principle of social vision and division). In particular, we compare and contrast how different societies have constructed ethnoracial boundaries by focusing on several key forms of ethnoracial domination: categorization, discrimination, segregation, ghettoization, and exclusionary violence. Readings include sociological, historical, and anthropological studies of ethnoracial dynamics primarily in the U.S. and Brazil, but also South Africa, Asia, Western Europe, and Latin America.

What does it mean to "sample"? What is a good research question, and how can you go about answering it? What do we do about bias in our research designs? This seminar offers an introductory overview of qualitative research methods in sociology. Through a series of hands-on, applied exercises and practical case-studies, students will learn what qualitative research looks like in the real world. Students will receive training in the basic instruments, sampling strategies, data collections, practical dilemmas, and common problems of different methodological approaches. We will learn about the advantages and limitations of interview-based, survey, ethnographic, and archival research. Throughout the semester, students will have weekly applications of methods, including with programs such as Atlas.ti and Nvivo. We will learn how to formulate research questions, conceptualize social phenomena, create research designs, code and operationalize, collect data, and interpret and present findings for different purposes.

Global Medicine, Global Health: Cultural Considerations and Clinical Realities (156053)

Mary Jo Good

2018 Fall (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

This conference course on global medicine and global health examines cultural considerations and clinical realities in comparative environments of risk and trust, in the US and globally, and explores the transformative influence of the medical imagination on contemporary worlds of biomedicine, global health, mental health, and medical humanitarianism. The seminar is designed for students at all levels who wish to explore in depth cultural considerations of global medicine and global health, from a comparative perspective. The seminar will query assumptions, and concepts generated by current movements in global health. We will also explore the subjective experiences of clinicians and patients through clinical narratives, the biotechnical embrace, the medical imaginary, and the political economy of hope.

Readings will include recently published ethnographies and case studies from around the globe, including the United States, as well as classic essays from sociology designed to enliven our discussions. Students will have the opportunity to draw on their own experiences and to design and pursue their own projects. Weekly response papers of 1-2 pages raising questions and comments based on the readings are required and designed to enhance our queries and discussions. Two essays (8-12 pages) and course attendance and presentation are required.

This course examines the sources and consequences of inequality in Japanese society. We consider how the lives of ordinary people were affected as Japan moved through decades of high economic growth followed by the "lost decades" of economic recession. The course uses ethnographies, historical accounts, survey data, film, and other sources. In analyzing inequality based on social class, gender, and ethnicity in Japan, students will learn how processes of inequality operate in similar or distinct ways from other societies. The course provides historical background and does not require prior knowledge of Japan.

Mary Waters

2018 Fall (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Immigration is one of the most powerful forces in influencing the structure of societies, altering everything from educational and economic institutions to politics. Understanding the immigration process from a sociological perspective provides insight into why individuals and groups move, how they are received and incorporated into the host society, and the implications for the native-born and for those who stay behind. These theoretical issues will be explored through an examination of actual migration flows over time and around the world. Although the focus of the course will be on U.S. immigration, we will also spend some time on non-U.S. flows, including the current refugee crisis in Europe.

Refugees in Global Perspective (203272)

Danilo Mandic

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The recent influx of Middle Eastern refugees into Europe has caught citizens and policy-makers off guard. Yet such waves will continue to rock our globalized world in coming decades: massive movements of forced migrants will be "the new normal." Why is the world producing so many refugees? How are they displaced? Where do they travel, and why? This course will inquire into the nature, causes and consequences of contemporary refugee waves in our globalized world. Students will survey regional dynamics in the Middle East, Africa, Southeast Asia, Eastern Europe and North America. We will examine the particularities of refugees (compared to other migrants) and the changing nature of forced migration since the Second World War. Students will explore historical precedents to contemporary waves, learn about different host society approaches to asylum, compare government and criminal mechanisms of forced migration, and examine the reasons refugees are the object of increasing suspicion and hostility around the world. Particular attention will be paid to the recent EU crisis, the role of refugee camps in the 21st century, and alternative strategies for global asylum management by bridge and destination countries.

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Why do men and women tend to cluster into different occupations? Why do they earn different wages? Is there a certain path that all countries follow as they become more economically prosperous, or do issues concerning men's and women's work differ dramatically across countries because of cultural reasons? This course provides an overview of key issues and perspectives in the study of men, women, and work in

contemporary society. May be counted for introductory concentration requirement, if letter-graded.

Course Notes: Graduate-level version of Sociology 1112. Meets with Sociology 1112 and has separate section.

Class Notes: Graduate level version of Sociology 1112. Meets with Sociology 1112 and has separate section.

Economic Sociology (207698)

Frank Dobbin

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

The field of economic sociology brings our attention to ways that economic priorities and processes reflect social dynamics. From ceremonial exchanges of goods in the South Pacific, to the development of modern capitalism, and from interlocking relationships between large corporations to wages, remittances, and social networks, economic sociology considers the social contexts that influence how individuals, communities, and societies organize their resources and how these processes in turn impact our lives. This course offers an overview of economic sociology's major theories and findings across several major themes. The first part of the course focuses on the theoretical underpinnings of economic sociology, and what characterizes a sociological view of the economy. In the second part of the course, we explore some of the social and cultural forces that have shaped key economic institutions such as corporations, insurance, wages and benefits, and marketplaces. The third part of the course considers the impact that these economic institutions have on the quality of life for individuals, communities, and societies. We conclude by asking how the field of economic sociology approaches issues of inequality and social mobility in the United States and globally.

Course Notes: This course will be open to 8-10 upper level undergraduates with instructor permission.

Class Notes: Course will be open for 8-10 junior or senior Sociology undergraduates by instructor consent.

Sociology of Immigration (207599)

Mary Waters

2018 Fall (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Immigration is one of the most powerful forces in influencing the structure of societies, altering everything from educational and economic institutions to politics. Understanding the immigration process from a sociological perspective provides insight into why individuals and groups move, how they are received and incorporated into the host society, and the implications for the native-born and for those who stay behind. These theoretical issues will be explored through an examination of actual migration flows over time and around the world. Although the focus of the course will be on U.S. immigration, we will also spend some time on non-U.S. flows, including the current refugee crisis in Europe.

Course Notes: Graduate-level version of Sociology 1175. Meets with Sociology 1175 and has separate section.

Peter Marsden

2018 Fall (4 Credits)

Schedule:

TR 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Descriptive and inferential techniques used in quantitative sociological research. Emphasis is on the fundamentals of the linear regression model for continuous response variables, focusing on assumptions and interpretation. Motivation, application, and presentation are stressed; topics include categorical covariates, interactions, and diagnostics. Because the linear regression model is the foundation for more specialized models that are often applied in sociological research, the aim of this course is to develop the skills necessary to (a) understand quantitative sociological research, (b) produce convincing analysis, (c) evaluate quantitative analysis, and (d) learn more specialized techniques as needed.

Course Notes: Required of, and limited to, first-year graduate students in Sociology

Recommended Prep: Familiarity with basic statistics.

Additional Course Attributes:

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Introduction to the formative ideas and socio-intellectual contexts of 19th and early 20th century sociological theory. Course will explore social thought from the perspective provided by the problem of social order - and the roles different thinkers attributed to such factors as solidarity, power, and meaning as solutions to this problem. Consideration of the continuing significance of these ideas for contemporary social thought.

Course Notes: Required of and limited to first-year graduate students in Sociology, OB, and Sociology/Social Policy students..

Sociology 2226

Correcting the Canon: A Critical History of Sociological Thought (207686)

Jocelyn Viterna

2018 Fall (4 Credits)

Schedule:

M 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course investigates the history of sociological thought from a critical perspective. A series of invited speakers will engage course participants in discussions about who was "written in" to the canon, who was "written out," and how these historical decisions have shaped the present-day landscape of our discipline. Students will conduct individual research assignments throughout the semester, but the final project will be the collective creation of a new syllabus for use in undergraduate theory instruction at Harvard. Course participants will also launch a website that makes the pedagogical tools we develop in the classroom available to other programs. Students enrolled in this course will gain knowledge in two separate but related spheres: they will learn theory, and they will also learn best pedagogical practices for theory instruction. This course is strictly limited to sociology graduate students and upper-level sociology undergraduates. All interested students must receive instructor approval prior to enrollment.

Class Notes: Undergraduate concentrators who have taken Sociology 97 may enroll in this course with instructor permission.

Culture, Inequality, Recognition (207702)

Michele Lamont

2019 Spring (4 Credits)

Schedule:

M 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

This seminar will focus on selected research areas in cultural sociology and sociology more broadly that may be helpful for developing our understanding of the cultural processes of production of social inequality. Topics will include: microsociology; the production of social and symbolic boundaries; moral schemas; cultural scripts in the construction of stigma and status; new developments in the study of identity, ethno-racial and class cultures; destigmatization, recognition and evaluation; and the conceptualization of contexts and explanations in cultural sociology.

Sociology 3305

Teaching Practicum (111781)

Jason Beckfield

2018 Fall (4 Credits)

Schedule:

F 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

30

This course is intended to enhance the teaching skills of graduate students in the Sociology Department. Through a combination of classroom discussions and teaching simulations, the seminar challenges students to discover and hone their teaching styles, to develop a personal philosophy about teaching and learning, to develop self-confidence leading and facilitating small and large group discussions, to learn about the teaching resources that are available to them throughout the university, to experiment with designing engaging courses of study, and to discover that teaching can be a rewarding and stimulating element of an academic career.

Course Notes:

Required of and limited to graduate students in Sociology. Attendance at first meeting is required. Not repeatable for credit.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Sociology 3308

Workshop on Economic Sociology (121013)

Frank Dobbin

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Presentations and discussions of new research by members of the community and visiting scholars. Students are exposed to the major paradigms in the field, and see how research articles are developed and refined.

Course Notes:

This course meets weekly at either Harvard or MIT.

Class Notes:

Course taught 4-5:30; meets alternately at MIT.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Sociology 3308

Workshop on Economic Sociology (121013)

Frank Dobbin

2019 Spring (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Presentations and discussions of new research by members of the community and visiting scholars. Students are exposed to the major paradigms in the field, and see how research articles are developed and refined.

Sociology 3316

Politics and Social Change (203921)

Jocelyn Viterna

Paul Chang

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The Politics and Social Change Workshop promotes the development of a community of scholars interested in how power relations shape social patterns in societies around the world. We define 'politics' broadly to include everything from gender politics within the household to state politics within a transnational system. Our participants' interests span a wide range of topics including political sociology, political economy, political violence, political behavior, governance, democracy, state welfare, education, social movements, civil society, NGOs, protest, race, ethnicity, gender, sexuality, class, the media, the environment, and development, among others. We meet twice a week. During most meetings, group participants take turns discussing their works in progress. Once or twice a semester, we also bring in outside speakers to discuss topics of interest to our members.

Class Notes:

Course will meet 3-5; HKS Taubman 520

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None

Culture, History and Society (128274)

Orlando Patterson

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The Workshop in History, Culture, and Society is a forum for the exploration of new developments in historical social science, especially in the fields of Anthropology, Economics, History, Political Science, Psychology, and Sociology. The workshop's primary methodological goal is to initiate a discussion of what constitutes acceptable historical evidence in each of the social sciences. Its main substantive goal is to understand how the past influences the present.

Course Notes: First Fall meeting Friday, September 11th; First Spring meeting Friday, February 5th.

Class Notes: Course taught 12-2

Contemporary Studies of Race & Ethnicity Workshop (204977)

Lawrence Bobo

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The Contemporary Studies of Race & Ethnicity (CSRE) workshop's purpose is to provide a forum to disseminate knowledge and facilitate dialogue among graduate students, faculty, and visiting scholars working on or interested in research about contemporary studies related to race & ethnicity. Though the Sociology department hosts the workshop, we seek to bring scholars together across disciplines to explore topics such as ethno-racial hierarchies, racial attitudes, and intergroup relations, as well as the role of race in institutions, politics, and everyday life. The workshop will foster both a learning and collaborative space in which participants can circulate and garner feedback on works in progress, including dissertation chapters, proposals, journal article submissions, conference papers, and practice job talks.

Class Notes:

Course meets 12-2

Additional Course Attributes:

Hindi-Urdu 101A

Introductory Hindi-Urdu (113639)

Richard Delacy

2018 Fall (4 Credits)

Schedule: MTWR 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

An Introduction to the modern standard form of the most widely spoken language in South Asia, Hindi-Urdu. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film, in particular recent Bollywood songs, to reinforce structures and vocabulary. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: Not open to auditors.

Additional Course Attributes:

Hindi-Urdu 123

Bollywood and Beyond: Commercial Cinema, Language and Culture in South Asia (123790)

Richard Delacy

2018 Fall (4 Credits)

Schedule: W 1200 PM - 0245 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 20

This course examines concepts of personhood, community and culture in South Asia as expressed in contemporary film and literature. Works in Hindi-Urdu and in translation will be examined with emphasis on

language as an index of cultural difference and of broad social shifts, notably the transformation of audiences from citizens to culture-consumers. Knowledge of Hindi-Urdu is not required. However, there will be a section for students with intermediate proficiency utilizing language materials.

Course Notes: Students who enroll in the language section of this course may count it towards a citation in Hindi-Urdu.

Instructor Permissions: None

Enrollment Cap: n/a

Introduction to Classical Sanskrit, the translocal language of intellectual life in South Asia for much of the last two millennia. This course provides the essential grammar and reading proficiency necessary to take up the language's many rich literary traditions: scripture (*Upaniṣad*), epic (*Rāmāyaṇa* and *Mahābhārata*), poetry, Hindu and Buddhist philosophy, etc. After completing the textbook, we will read a narrative (*Hitopadeśa*) drawn from one of the most popular literary works in the pre-modern world.

Anand Venkatkrishnan

2018 Fall (4 Credits)

Schedule: MWF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

A reading course designed to give students the tools necessary for advanced study in Classical Sanskrit. Readings in epic (*itihāsa*) or narrative (*kathā*), poetry (*kāvya*) or systematic thought (*śāstra*) will introduce students to a variety of important genres and their distinctive conventions. A focus upon the Sanskrit tradition's categories of analysis - grammatical, commentarial and prosodic - will enable students to begin to make sense of original Sanskrit texts as generations of the tradition's own readers have.

South Asia: A Global History (160721)

Sunil Amrith

2019 Spring (4 Credits)

Schedule: MW 0130 PM - 0245 PM**Instructor Permissions:** None**Enrollment Cap:** n/a

This course provides a global perspective on modern South Asia, from the early twentieth century to the present day. It examines how South Asia has shaped the world, and how the world has shaped South Asia. Topics covered will include: the Indian freedom movement in global perspective; the migration and settlement of South Asian communities overseas; conflict and cooperation between South Asia's states—India, Pakistan, Bangladesh and Sri Lanka—and relations between South Asia, China and the United States. We will also examine the centrality of South Asia to the successes and failures of schemes of international health and development, and to global environmental politics in the twenty first century.

Elementary Tamil (127491)

Jonathan Ripley

2018 Fall (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

An introduction to the oldest of the Dravidian languages of South India, Tamil holds official language status in Tamil Nadu, Singapore, and Sri Lanka. Tamil has one of the oldest uninterrupted literary traditions in the world, ranging from classical love poetry, devotional compositions and epics to the modern novel and short story. Students will be introduced to the Tamil script and to reading, writing, and speaking. Materials from popular culture will supplement modern teaching materials.

Course Notes: **Not open to auditors.**

Subject: Indo-Persian

Indo-Persian 101

Readings in Indo-Persian Literature I (207944)

Hajnalka Kovacs

2018 Fall (4 Credits)

Schedule:

T 0600 PM - 0715 PM

T 0430 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course introduces students to Persian literature composed in the Indian Subcontinent from the 11th through the 20th century. We will combine close reading of texts in the original Persian with a discussion of grammar and prosody as well as secondary readings in English. Texts include excerpts from chronicles, discourses and letters of Sufis, hagiographies, biographical dictionaries, travelogues, collections of tales, as well as epic, lyric, and panegyric poetry.

Recommended Prep:

Two years of Persian or equivalent; one year experience with Classical Persian preferred.

Introduction to Quantitative Methods for Economics (114027)

Michael Parzen

2019 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

A rigorous introduction to statistics for students intending to study economics. Examples drawn from finance, decision analysis and economic decision-making. In addition to descriptive statistics, probability, inference and regression modeling, also covers portfolio optimization, decision analysis, and time series analysis. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques.

Course Notes: Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.

Requirements: Anti-Req: may not be taken for credit if STAT 109 or STAT 139 already complete.

Additional Course Attributes:

Intro to Statistical Modelling (205028)

Michael Parzen

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Stat 109 is a second course in statistical inference and is a further examination of statistics and data analysis beyond the introductory course. Topics include t-tools and permutation-based alternatives

including bootstrapping, multiple-group comparisons, analysis of variance, linear regression, model checking and refinement. Statistical computing and simulation based emphasis will also be covered as well as basic programming in the R statistical package. Emphasis is made on thinking statistically, evaluating assumptions, and developing tools for real-life applications.

Course Notes: Note that Stat 109 cannot be taken for credit if Stat 139 has already been taken.

Requirements: Anti-req: Cannot be taken for credit if STAT 139 already complete

Introduction to Probability (110766)

Joseph Blitzstein

2018 Fall (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

A comprehensive introduction to probability. Basics: sample spaces and events, conditional probability, and Bayes' Theorem. Univariate distributions: density functions, expectation and variance, Normal, t, Binomial, Negative Binomial, Poisson, Beta, and Gamma distributions. Multivariate distributions: joint and conditional distributions, independence, transformations, and Multivariate Normal. Limit laws: law of large numbers, central limit theorem. Markov chains: transition probabilities, stationary distributions, convergence.

Recommended Prep: Math 1b or equivalent or above

Statistics 115

Introduction to Computational Biology and Bioinformatics (122304)

Xiaole (Shirley) Liu

2019 Spring (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

The course will cover basic technology platforms, data analysis problems and algorithms in computational biology. Topics include sequence alignment and search, high throughput experiments for gene expression, transcription factor binding and epigenetic profiling, motif finding, RNA/protein structure prediction, proteomics and genome-wide association studies. Computational algorithms covered include hidden Markov model, Gibbs sampler, clustering and classification methods.

Recommended Prep: Good quantitative skills, strong interest in biology, willingness and diligence to learn programming.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Statistics 117

Data Analysis in Modern Biostatistics (203104)

Giovanni Parmigiani

2019 Spring (4 Credits)

Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap: 30

An Introduction to applied biostatistics via case studies. The course is based on four practical problems, and methodology relevant for each. Students will apply the concepts from the methodology to the data analysis or modeling task, and carry out four mini projects, with ample opportunities for peer-to-peer discussion.

Course Notes: There is a cap of 30 students for this course. Preference is given to Statistics concentrators; all other students wishing to take the course

must send a request along with a list of statistics/computer science courses already completed to the professor at gp@jimmy.harvard.edu. Please put Stat 117 in the subject line of the email.

Recommended Prep: Prerequisites: Stat 110 and Stat 102/111/139. Recommended: 112

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Statistics 120

Introduction to Bayesian Inference and Applications (156425)

Shaoyang Ning

2018 Fall (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Provides students a comprehensive understanding to the questions as of what is, how and why Bayesian. Introduction to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various domain fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students' hands-on skills in statistical computation (mostly with R) and data analysis.

Recommended Prep: STAT110, STAT111 and basics of R programming are required.

Additional Course Attributes:

Data Science 1: Introduction to Data Science (203101)

Pavlos Protopapas

Kevin A. Rader

2018 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Data Science 1 is the first half of a one-year introduction to data science. The course will focus on the analysis of messy, real life data to perform predictions using statistical and machine learning methods. Material covered will integrate the five key facets of an investigation using data: (1) data collection - data wrangling, cleaning, and sampling to get a suitable data set; (2) data management - accessing data quickly and reliably; (3) exploratory data analysis – generating hypotheses and building intuition; (4) prediction or statistical learning; and (5) communication – summarizing results through visualization, stories, and interpretable summaries. Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Only one of CS 109a, AC 209a, or Stat 121a can be taken for credit. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109a, AC 209a, or Stat 121a for credit.

Recommended Prep: Programming knowledge at the level of CS 50 or above, and statistics knowledge at the level of Stat 100 or above (Stat 110 recommended).

Requirements: Not to be taken in addition to Computer Science 109 or Computer Science 109A, or Applied Computation 209, or Applied Computation 209A.

Additional Course Attributes:

Attribute	Value(s)
Full Year Course	Divisible Course
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Statistics 121B

Data Science 2: Advanced Topics in Data Science (203102)

Pavlos Protopapas

Mark Glickman

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Data Science 2 is the second half of a one-year introduction to data science. Building upon the material in Data Science 1, the course introduces advanced methods for data wrangling, data visualization, and statistical modeling and prediction. Topics include big data and database management, interactive visualizations, nonlinear statistical models, and deep learning. Part two of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: Can only be taken after successful completion of CS 109a, AC 209a, Stat 121a, or equivalent. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109b, AC 209b, or Stat 121b for credit.

Recommended Prep: : CS 109a, AC 209a, or Stat 121a required.

Requirements: Requisite: (Must take CS 109A OR APCOMP 209A OR STAT 121A before taking STAT 121B) AND (Cannot take STAT 121B, if already taken STAT 121 OR CS 109 OR CS 109B OR APCOMP 209 OR APCOMP 209B)

Statistics 123

Quantitative Finance (126048)

Stephen Blyth

2019 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to financial derivatives and the probabilistic techniques used to analyze them. Topics include: forwards, swaps and options; replication, no-arbitrage and risk-neutrality; martingales, numeraires and the fundamental theorem of asset pricing; and an introduction to interest-rate derivatives and their valuation. Provides a rigorous but accessible treatment of the elegant theory underpinning quantitative finance, motivated by real problems from the financial industry.

Course Notes:

Designed for those seeking an understanding of the quantitative challenges on Wall Street and the probabilistic tool-kit developed to address them.

Recommended Prep:

Statistics 110 or equivalent.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students

Linear Models (110751)

Kevin A. Rader

2018 Fall (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An in-depth introduction to statistical methods with linear models and related methods. Topics include group comparisons (t-based methods, non-parametric methods, bootstrapping, analysis of variance), linear regression models and their extensions (ordinary least squares, ridge, LASSO, weighted least squares, multi-level models), model checking and refinement, model selection, cross-validation. The probabilistic basis of all methods will be emphasized.

Recommended Prep: Statistics 110 and Math 21a and 21b or equivalent

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Statistics 149

Generalized Linear Models (118974)

Mark Glickman

2019 Spring (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Sequel to Statistics 139, emphasizing common methods for analyzing continuous non-normal and categorical data. Topics include logistic regression, log-linear models, multinomial logit models, proportional odds models for ordinal data, Gamma and inverse-Gaussian models, over-dispersion, analysis of deviance, model selection and criticism, model diagnostics, and an introduction to non-parametric regression methods.

Course Notes: Examples will be drawn from several fields, particularly from biology and social sciences.

Recommended Prep: Statistics 139 or with permission of instructor.

Additional Course Attributes:

Attribute	Value(s)

Statistics 151

Multilevel and Longitudinal Models (160736)

Luke Miratrix

2018 Fall (4 Credits)

Schedule:

TR 0200 PM - 0330 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Data often have structure that needs to be modeled explicitly. For example, when investigating students' outcomes we need to account for the fact that students are nested inside classes that are in turn nested inside schools. If we are watching students develop over time, we need to account for the dependence of measurements across time. If we do not, our inferences will tend to be overly optimistic and wrong. The course provides an overall framework, the multilevel and generalized multilevel (hierarchical) model, for thinking about and analyzing these forms of data. We will focus on specific versions of these tools for the most common forms of longitudinal and clustered data. This course will focus on applied work, using real data sets and the statistical software R. R will be specifically taught and supported. While the primary focus will be on the linear model with continuous outcomes (i.e., the classic regression framework) we will also discuss binary, categorical, and ordinal outcomes. We will emphasize how to think about the applicability of these methods, how they might fail, and what one might do to protect oneself in such circumstances. Applications of hierarchical (multi-level) models will include the canonical specific cases of random-slope, random-intercept, mixed effect, crossed effect, marginal, and growth-curve models.

Recommended Prep: Permission of instructor required. Prerequisite: S-052, Stat 139, or an equivalent. Jointly-offered in the Graduate School of Education.

Causal inference (110022)

Kosuke Imai

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Substantive questions in empirical scientific and policy research are often causal. Does voter outreach increase turnout? Are job training programs effective? Can a universal health insurance program improve people's health? This class will introduce students to both statistical theory and practice of causal inference. As theoretical frameworks, we will discuss potential outcomes, causal graphs, randomization and model-based inference, sensitivity analysis, and partial identification. We will also cover various methodological tools including randomized experiments, regression discontinuity designs, matching, regression, instrumental variables, difference-in-differences, and dynamic causal models. The course will draw upon examples from political science, economics, education, public health, and other disciplines.

Recommended Prep: (1) Stat 110 AND Stat 111 or (2) Gov 2000 AND Gov 2001

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Probability II (156452)

Natesh Pillai

2019 Spring (4 Credits)

Schedule: TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap: n/a

A graduate introduction to advanced probability. Foundations of probability: exchangeability and de Finetti's type theorem. Martingales: convergence theorems, optional stopping, Polya urn schemes and applications to statistics. Poisson processes: general spaces, marked processes, applications to Bayesian nonparametrics. Gaussian processes: existence theorem, Brownian bridges, meanders and excursions. Empirical processes: inequalities, central limit theorems and the bootstrap. Markov Chains: ergodicity,

convergence and MCMC algorithms. Stochastic calculus: Ito's formula.

Statistics 213

Statistical Inference II (159802)

Pierre Jacob

2019 Spring (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Stat 213 will build upon Stat 211 and give some tools to study and validate statistical methods (asymptotic statistics, well-specified and mis-specified models, model comparison, cross-validation, bootstrap). These concepts will be discussed in the context of advanced statistical models: non-parametric regression, regularized regression, latent variable and hidden Markov models. Numerical methods required to put such models into practice will be discussed.

Recommended Prep: Stat 210, 211, 212(stat 210b)

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Final Assessment Category	Three-hour Exam
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Statistics 215

Introduction to Computational Biology and Bioinformatics (126060)

Xiaole (Shirley) Liu

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Meets with Statistics 115, but graduate students are required to do more coding, complete a research project and submit a written report during reading period in addition to completing all work assigned for Statistics 115.

Recommended Prep: Good quantitative skills, strong interest in biology, good programming skills in C/C++, Java, Perl or Python.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Statistics 220

Bayesian Data Analysis (118016)

Jun Liu

2019 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Basic Bayesian models, followed by more complicated hierarchical and mixture models with nonstandard solutions. Includes methods for monitoring adequacy of models and examining sensitivity of models.

Course Notes: Emphasis throughout term on drawing inferences via computer simulation rather than mathematical analysis.

Recommended Prep: Statistics 110 and 111.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Statistics 221

Monte Carlo Methods & other computational tools for statistical learning (115077)

Jun Liu

2018 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Computational methods commonly used in statistics: random number generation, optimization methods, numerical integration, Monte Carlo methods including Metropolis-Hastings and Gibbs samplers, approximate inference techniques including Expectation-Maximization algorithms, Laplace approximation and variational methods, data augmentation strategies, data augmentation strategies.

Course Notes: Computer programming exercises will apply the methods discussed in class.

Recommended Prep: Linear algebra, Statistics 111, and knowledge of a computer programming language (R or Matlab) required; Statistics 220 recommended.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Sequential Decision Making (205213)

Susan Murphy

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This graduate course will focus on reinforcement learning algorithms and sequential decision making methods with special attention to how these methods can be used in mobile health. Reinforcement learning is the area of machine learning which is concerned with sequential decision making. We will focus on the areas of sequential decision making that concern both how to select optimal actions as well as how to evaluate the impact of these actions. The choice of action is operationalized via a policy. A policy is a (stochastic) deterministic mapping from the available data at each time t into (a probability space over) the set of actions. We will consider both off-line and on-line methods for learning good policies.

Mobile health is an area that lies within multiple scientific disciplines including: statistical science, computer science, behavioral science and cognitive neuroscience. This makes for very exciting interdisciplinary science! Smartphones and wearable devices have remarkable sensing capabilities allowing us to understand the context in which a person is at a given moment. These devices also have the ability to deliver treatment actions tailored to the specific needs of users in a given location at a given time. Figuring out when and in which context, which treatment actions to deliver can assist people in achieving their longer term health goals. In the last 15-20 minutes of many of the classes we will brainstorm about how the methods we discussed during that class might be useful in mobile health.

This course will cover the following topics: Markov Decision Processes, on-policy and off-policy RL, least squares methods in RL and Bayesian RL, namely posterior sampling. Most of the course will focus on

Bayesian RL via posterior sampling. This is particularly useful in mobile health as posterior sampling facilitates off-policy and continual learning. Also the Bayesian paradigm facilitates use of prior data in initializing an RL algorithm. Other topics from statistics, machine learning and RL that I think are potentially important in mobile health but that we won't cover are (you could consider in your class project) include: 1) transfer learning (using data on other similar users to enable faster learning); 2) non-stationarity (dealing with slowly changing or abrupt changes in user behavior); 3) interpretability of policies (enabling communication with behavioral scientists by making connections to behavioral theories); 4) using approximate system dynamic models to speed up learning, 5) hierarchical RL, 6) experience replay and 7) multi-task learning.

Statistical Learning (211175)

Zheng Ke

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

High dimensional data analysis is a recent interdisciplinary research area of Statistics, Genetics and Genomics, Engineering, and several other scientific areas. It addresses an array of challenging problems that of contemporary interest, and research in this area has been very active in the past decade.

This course aims to provide a systematic introduction to various topics in high dimensional data analysis, focusing on large-scale sparse learning, and network and text data analysis.

¿ Large-scale sparse learning: Sparsity is a universal phenomenon in modern high dimensional data. Sparse structures are observed in many application settings and have many different forms, such as parameter sparsity, graph sparsity, eigenvalue sparsity, and so on. Exploring sparsity has become a common strategy in data analysis and has largely reshaped classical multivariate statistics problems. This course will investigate classical problems such as multiple testing, linear regression, classification and clustering, under the modern sparse settings. For each problem, the course discusses recent statistical methods for taking advantage of sparsity, and introduces the theoretical framework for analyzing these methods.

¿Network and text data analysis: Social networks and text documents are unconventional data types. This course introduces statistical models and methods for analyzing such type of data. Topics for network data analysis include community detection, mixed membership estimation, link prediction, and dynamic network modeling. Topics for text data analysis include topic modeling, word embedding, information retrieval, and sentiment analysis.

Recommended Prep:

This course is mainly designed for graduate students in Statistics. The prerequisites are Statistical Inference 1&2 (students can take the prerequisites

simultaneously with this course). Graduate students from other departments (CS, Biostatistics, Economics, etc.) can also take this course, if they have taken statistics-related courses which have a significant amount of content in mathematical statistics. Undergraduate students please consult the instructor before enrolling.

Big data statistics in genomic and genetic research (204455)

Xiaole (Shirley) Liu

Jun Liu

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

As biomedical research community generates more and more high throughput genomic profiles, the need for careful statistical analyses also increases. In this weekly course, we will first introduce the main statistical challenges and basic solutions to big data in genomic and genetic research. We will also ask students to read a selection of methodology and data analysis papers for biomedical big data, and debate about their statistical and computational merits and drawbacks.

Recommended Prep:

Students taking the course should have a reasonable background and knowledge in statistical (e.g. STAT111/139), genomics and bioinformatics (e.g. STAT115/215).

99

Optimal transport (OT) is a branch of mathematics related to probability, geometry and linear programming. It was first formalized by Gaspard Monge in the 18th century, with concrete military applications. It has been a very active and exciting subfield of mathematics over the last decades. Recently, OT has started to yield techniques and methods for machine learning and statistics, thanks to advances in the computational side of the topic. The goal of this course is to learn about these advances by going through the recent book by Gabriel Peyré and Marco Cuturi, entitled "Computational Optimal Transport" (freely available at arXiv: 1803.00567). We will aim at reading all chapters, one per week.

Statistics 366 Section: 01

Introduction to Research (108851)

Jun Liu

2019 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** 15

Introduction to the process of developing research ideas into publications in Statistics, using case studies and actual research projects. Emphasizes scientific communication in research papers and presentations, deciphering referee reports, and finding the right forum.

Recommended Prep: Statistics 211a.**Additional Course Attributes:**

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Statistics 398

Research (127772)

2019 Spring (4 Credits)

Schedule:**Instructor Permissions:** None**Enrollment Cap:** n/a

Individual research under the supervision of faculty members of the Statistics Department. Used to replace TIME R.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Statistics 399

Teaching (123920)

2019 Spring (4 Credits)

Schedule:**Instructor Permissions:** None**Enrollment Cap:** n/a

Statistics graduate students may register for this course during the semesters they are teaching. Used to replace TIME T.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Stem Cell and Regenerative Biology

Subject: Stem Cell & Regenerative Biol

Stem Cell & Regenerative Biol 10

Human Developmental and Regenerative Biology (125800)

William Anderson

2018 Fall (4 Credits)

Schedule:

MWF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Fundamental concepts in developmental biology will be presented within the framework of the developing and regenerating mammal. Where possible, lectures will focus on humans.

Class Notes: M., W., F., at 1:30pm, and a weekly section to be arranged

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a is required either prior to or concurrently with enrollment in SCRB 10.

Additional Course Attributes:

Attribute	Value(s)
FAS: General Education	Science of the Physical Universe
FAS: General Education	Science of Living Systems

Stem Cell & Regenerative Biol 15A

CRISPR Cas9: Precision Genetics and Gene Therapy (203604)

Kevin Eggan

2018 Fall (4 Credits)

Schedule:

T 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

16

This year-long hands-on laboratory course hones skills essential for researchers in developmental biology. Students will learn genome editing tools, cell culture techniques, and phenotypic analyses in both cell lines and model systems while addressing unknown questions in the field. SCRB 15 is designed to complement material found in SCRB 10, and is best taken during the sophomore year. Students are strongly encouraged to complete SCRB 15B in the spring.

Requirements: Prerequisite: (LS 1a AND LS 1b) OR (LPS A AND LS 1b) OR Concurrent Enrollment with SCRB 10 is allowed.

Additional Course Attributes:

Attribute	Value(s)
Full Year Course	Divisible Course
FAS: Course Level	Primarily for Undergraduate Students

Stem Cell & Regenerative Biol 91R

Introduction to Research (125804)

William Anderson

2019 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Laboratory research in topics related to the Human Developmental and Regenerative Biology Concentration under the direction of, or approved by, members of the Department of Stem Cell and Regenerative Biology, Principal Faculty of the Harvard Stem Cell Institute, or others with permission. A paper must be submitted to the laboratory sponsor and to the HDRB Concentration Office for review by the Course Director and Head Tutors.

Course Notes:

Students must have joined a laboratory by the course registration deadline (i.e., "study card day") to be able to enroll in SCRB 91.

Limited to Human Developmental and Regenerative Biology Concentrators; written permission of the laboratory sponsor must be submitted to the HDRB Concentration Office prior to enrolling in the course. This introductory research course is intended to prepare students for SCRB 99 and may ordinarily be repeated no more than once. Ordinarily may not be taken as a fifth course. Laboratory safety session required.

Class Notes:

William J. Anderson and members of the Department

Stem Cell & Regenerative Biol 140

Developmental and Molecular Basis of Growth and Regeneration (126744)

Fernando Camargo

2019 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course will focus on the biology of organ growth and regeneration from a developmental perspective. How is the size and symmetry of our organs set? How does a regenerating animal sense that something is missing and eventually stop the regenerative process when tissues reform? We will learn about conserved developmental pathways that are necessary for adult regeneration and discuss how the aberrant activation of these pathways can lead to overgrowth disorders such as cancer.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54, or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam

Stem Cell & Regenerative Biol 145

From Cells to Tissues, in Sickness and in Health (161207)

Ya-chieh Hsu

David Scadden

2019 Spring (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap:

18

Every cell is a part of a larger "community", working together to enable tissue function. This course will explore the principles of building complex tissues from cells. How do cells know what tissues to make and when to make them? How do cells communicate with one another? What diseases can arise when these principles go awry? How can we build tissues in the lab? In addition to lectures, students will engage deeply in primary literature.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS: Final Assessment Category	Three-hour Exam
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Stem Cell & Regenerative Biol 167

Stem Cell Therapeutics: Exploring the science and the patient experience (125200)

Leonard Zon

2019 Spring (4 Credits)

Schedule:

T 0200 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Stem cells are the basis for tissue maintenance and repair, thus, are essential elements of normal organ and tissue physiology. Stem cells are also targets for disease processes and through transplantation are important therapeutic agents. This course will allow advanced undergraduates to explore how stem cells and tissue regeneration impact human disease pathogenesis and how stem cells might be exploited to advance new therapies for disease.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10; MCB 52 or MCB 54.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 175

Glucose: From Molecule to Society (128041)

Richard Lee

2018 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

We will explore the biochemistry, cell biology, and physiology that make glucose our main source of energy. How did humans depend on and crave this molecule? What consequences does it hold for normal metabolism and disease? Students will integrate evolution, endocrinology, biostatistics, bioengineering, and regenerative biology approaches in considering sugar and all its consequences. Finally, we will evaluate legal and business issues necessary to move scientific and technical innovations from the laboratory to the patient.

Class Notes:

Lectures are Mondays and Wednesdays at 10:30-11:45am, discussion sections are Fridays at 10:30-11:30am, and a lab component to be arranged

Recommended Prep:

Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54; MCB 52 or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science

Stem Cell & Regenerative Biol 178

Immunology: New Tracks and Greatest Hits (111316)

Jonathan Hoggatt

2019 Spring (4 Credits)

Schedule: MW 0430 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course will explore cutting edge immunology topics with student presentations of recently published papers discussing topics ranging from hematopoietic stem cells, HIV, gluten, cancer and others. The class will also discuss the classic immunology papers that have shaped the field today, with discussions on the next steps for the future. Course work: Reading of papers, seminar presentations, and class participation.

Recommended Prep: MCB 169 or permission of instructor recommended, but not required.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Stem Cell & Regenerative Biol 180

Development, Plasticity, and Regeneration in the Mammalian Brain (125803)

Jeffrey Macklis

2018 Fall (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Regenerative biology of the mammalian central nervous system (CNS), motivated by a focused and related set of human CNS disorders: This course will discuss molecular and cellular mechanisms of regeneration and repair in the mammalian central nervous system (CNS), motivated by prototypical examples in the motor control systems and circuitry of the cerebral cortex and spinal cord centrally relevant to spinal cord injury, ALS / Lou Gehrig's disease ("amyotrophic lateral sclerosis", and related disorders), and spinal muscular atrophy (SMA). We will take an approach integrating developmental and regenerative biology: we will compare and contrast aspects of embryonic neural development (molecular and cellular) with adult neural plasticity; discuss limitations to neuronal and axonal regeneration in the mature mammalian CNS following degeneration or injury; examine CNS regeneration approaches directed at overcoming intrinsic limitations; explore developmental controls, gene manipulation, and cellular reprogramming to promote neurogenesis, axonal regeneration, and directed differentiation in diseased adult mammalian brain; and consider technology such as "brain-computer interfaces".

Course Notes: Expected to be offered in alternating fall terms in even years.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; MCB 80 or permission of the instructor.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 190

Understanding Aging: Degeneration, Regeneration, and the Scientific Search for the Fountain of Youth (125185)

Amy Wagers

2018 Fall (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap: 26

This lecture and discussion course will explore the fundamental molecular and cellular mechanisms that govern organismal aging and contemporary strategies to delay or reverse this process.

Recommended Prep: Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54.

Additional Course Attributes:

Attribute	Value(s)
FAS: Final Assessment Category	Three-hour Exam
FAS: Course Level	For Undergraduate and Graduate Students

FAS Divisional Distribution	Science & Engineering & Applied Science

Stem Cell & Regenerative Biol 192

Principles of Drug Discovery and Development (109112)

Gregory Verdine

2019 Spring (4 Credits)

Schedule: MW 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap: 40

This interdisciplinary course will examine the process of drug discovery and development through disease-driven examples. Topics include: the efficacy/toxicity balance, the differences between drugs and inhibitors, and the translation of cellular biochemistry to useful medicine.

Course Notes: May not be taken concurrently with Chemistry 192. May not be taken for credit if Chemistry 192 or MCB 192 have already been taken.

Recommended Prep: Chemistry 20/30 or 17/27, Life Sciences 52 or their equivalents, MCB 52, and one year of organic chemistry. MCB 54 is recommended.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Stem Cell & Regenerative Biol 195

The Translational Science of Stem Cells (204006)

Lee Rubin

2018 Fall (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Through a series of lectures and assigned papers, students will be introduced to a broad view of the ways in which stem cells can be used for translational research. This will include human disease modeling, identifying drugs that target endogenous stem cells, or otherwise promote tissue repair, and regenerative medicine (cell-based therapies). This year, the central module of the course and the focus of student projects will be regenerative medicine.

Course Notes: Permission of the instructor required to enroll. Ability to work in a less structured environment will be essential.

Recommended Prep: Life Sciences 1a or Life and Physical Sciences A, Life Sciences 1b, SCRB 10, SCRB 20 or equivalent.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students

Stem Cell & Regenerative Biol 197

Frontiers in Therapeutics (204358)

Mark Fishman

Douglas Melton

2019 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How realistic are promises to "eliminate" diseases and to "personalize" medicine? This course looks at biological principles underlying therapeutics, ranging from those described first in Egyptian papyri to those under development today (using chemicals, proteins, cells, and genetic manipulations) and based on traditional philosophies and on science. As part of the class, students will have the opportunity to design novel approaches to diseases today without cure.

Course Notes: Prerequisites are Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; MCB 60 or SCRB 20, or permission of the instructor

FAS: Course Level	Primarily for Graduate Students

Systems Biology 220

Quantitative Measurement and Analysis (204480)

Allon Klein

Sahand Hormoz

2019 Spring (4 Credits)

Schedule:

WF 1030 AM - 1200 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

The mission of the course is to impart students with a strong intuition for designing quantitative assays and performing data analysis in biology. The course will extract general principles through a set of lectures and workshops, focusing on some of the major techniques used in biology today. We will discuss the physicochemical basis of major measurement techniques in biology, and we will explore how this basis leads to particular errors, and what types of statistical pitfalls might be encountered in data analysis.

Class Notes: Class meets on Longwood Campus, Warren Alpert Building 436

Recommended Prep: Knowledge of programming, statistics, physics and chemistry.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Science & Engineering & Applied Science

Systems Biology 305QC

Practical Synthetic Biology (109345)

Jeffrey Way

2019 Spring (2 Credits)

Schedule: MTWRF 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

Synthetic biology is a new discipline that seeks to enable the predictable engineering of biological systems. According to one conception of synthetic biology, proteins and genetic regulatory elements are modular and can be combined in a predictable manner. In practice however, assembled genetic devices do not function as expected. The purpose of the course is to go beyond the textbook, first-pass description of molecular mechanisms and focus on details that are specifically relevant and useful in engineering microbial and mammalian biological systems.

"Practical Synthetic Biology" is a January course that will meet in the Harvard Medical Area (Warren Alpert Building, 5th floor seminar room) from Jan. 12-26 (excluding Martin Luther King Day) from 3-5 PM, with additional discussion sections. The course is aimed at graduate students and advanced undergraduates, and requires familiarity with transcription, translation, the genetic code, plasmid construction, gene regulation, protein structure, mutation mechanisms, and calculus. The course will present readings from the literature including recent papers in synthetic biology, relevant papers from the basic research literature, and readings on biological warfare defense that relate to the early history and motivation for synthetic biology.

The course will include 10 lectures (1.5 hours each), optional discussion sections (1 hour each), and a 30-minute quiz. Grades will be based on the quiz and class participation. There is no limit on class size.

Course Notes: This course will be taught in the Warren Alpert Building, Room 436, at the Harvard Medical School campus.

Class Notes: Class will be meeting January 14-25 in Warren Alpert 436.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350

Systems Biology Research (121507)

Jacob Hooker

Michael Baym

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Class Notes: Timothy J. Mitchison (Medical School) 3713 and members of the Committee

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350

Systems Biology Research (121507)

Ramy Arnaout

Michael Baym

Timothy Mitchison

Jessica Lehoczky

Eliezer Van Allen

Mario Suva

Sahand Hormoz

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Class Notes:

Timothy J. Mitchison (Medical School) 3713 and members of the Committee

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 002

Systems Biology Research (121507)

Edoardo Airoidi

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 002

Systems Biology Research (121507)

Edoardo Airoidi

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 003

Systems Biology Research (121507)

Katie Bentley

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 003

Systems Biology Research (121507)

Katie Bentley

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 004

Systems Biology Research (121507)

Michael P. Brenner

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 004

Systems Biology Research (121507)

Michael P. Brenner

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 005

Systems Biology Research (121507)

Martha Bulyk

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 005

Systems Biology Research (121507)

Martha Bulyk

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 006

Systems Biology Research (121507)

George Church

2019 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 006

Systems Biology Research (121507)

George Church

2018 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 007

Systems Biology Research (121507)

Stirling Churchman

2019 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 007

Systems Biology Research (121507)

Stirling Churchman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 008

Systems Biology Research (121507)

Philippe Cluzel

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 008

Systems Biology Research (121507)

Philippe Cluzel

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 009

Systems Biology Research (121507)

Adam Cohen

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 009

Systems Biology Research (121507)

Adam Cohen

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 010

Systems Biology Research (121507)

Vladimir Denic

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 010

Systems Biology Research (121507)

Vladimir Denic

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 011

Systems Biology Research (121507)

Angela Depace

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 011

Systems Biology Research (121507)

Angela Depace

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 012

Systems Biology Research (121507)

Michael Desai

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 012

Systems Biology Research (121507)

Michael Desai

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 013

Systems Biology Research (121507)

Francis Doyle

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 013

Systems Biology Research (121507)

Francis Doyle

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 014

Systems Biology Research (121507)

Catherine Dulac

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 014

Systems Biology Research (121507)

Catherine Dulac

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 015

Systems Biology Research (121507)

Sean Eddy

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 015

Systems Biology Research (121507)

Sean Eddy

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 016

Systems Biology Research (121507)

Walter Fontana

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 016

Systems Biology Research (121507)

Walter Fontana

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 017

Systems Biology Research (121507)

Ethan Garner

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 017

Systems Biology Research (121507)

Ethan Garner

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 018

Systems Biology Research (121507)

Yonatan Grad

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 018

Systems Biology Research (121507)

Yonatan Grad

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 019

Systems Biology Research (121507)

Jesse Gray

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 019

Systems Biology Research (121507)

Jesse Gray

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 020

Systems Biology Research (121507)

Jeremy Gunawardena

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 020

Systems Biology Research (121507)

Jeremy Gunawardena

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 021

Systems Biology Research (121507)

John Higgins

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 021

Systems Biology Research (121507)

John Higgins

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 022

Systems Biology Research (121507)

Curtis Huttenhower

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 022

Systems Biology Research (121507)

Curtis Huttenhower

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 023

Systems Biology Research (121507)

Marc Kirschner

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 023

Systems Biology Research (121507)

Marc Kirschner

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 024

Systems Biology Research (121507)

Allon Klein

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 024

Systems Biology Research (121507)

Allon Klein

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 025

Systems Biology Research (121507)

Galit Lahav

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 025

Systems Biology Research (121507)

Galit Lahav

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 026

Systems Biology Research (121507)

Erel Levine

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 026

Systems Biology Research (121507)

Erel Levine

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 027

Systems Biology Research (121507)

Richard Losick

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 027

Systems Biology Research (121507)

Richard Losick

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None

FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 031

Systems Biology Research (121507)

Vamsi Mootha

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 032

Systems Biology Research (121507)

Andrew Murray

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 032

Systems Biology Research (121507)

Andrew Murray

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 033

Systems Biology Research (121507)

Daniel Needleman

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 033

Systems Biology Research (121507)

Daniel Needleman

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 034

Systems Biology Research (121507)

David R. Nelson

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 034

Systems Biology Research (121507)

David R. Nelson

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 035

Systems Biology Research (121507)

Martin Nowak

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 035

Systems Biology Research (121507)

Martin Nowak

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Theater, Dance, and Media

Subject: Theater, Dance & Media

Theater, Dance & Media CAMR

Advanced Playwriting: Workshop (203500)

Sam Marks

2019 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 12

This workshop is a continued exploration of writing for the stage. Students will be encouraged to excavate their own voice in playwriting. They will examine and attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Ibsen and Beckett as well as contemporary dramatists such as Annie Baker, Caryl Churchill and Sam Shepard.

Course Notes:

TDM CAMR is the same course as ENGLISH CAMR. Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Theater, Dance & Media CKR

Introduction to Playwriting: Workshop (205632)

Sam Marks

2018 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Kenneth Lonergan, Martin McDonagh, Suzan Lori-Parks, and Sarah Ruhl as well established work from Anton Chekhov, Sarah Kane, and Harold Pinter.

Course Notes:

TDM CKR is the same course as ENGLISH CKR. Admission is based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

TDM production studios frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The fall 2018 production will be directed by [Ashley Tata](#). The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions at designated times (TBD) to examine the entire performance process through a dramaturgical lens.

- Rehearsals will begin in mid-October and will run regularly Monday - Thursday 7-11 pm (tentative time); Saturdays 12-6 pm. (Not everyone will be called for all rehearsals.)

- The production is scheduled to open Thursday, December 6th.

Course Notes:

TDM 90AR is required of concentrators and open to other students involved in the TDM fall production (as actors or apprentices on the production team). Participation is limited to students involved with the production, either as performers or as members of the production team. Performers will be cast by audition during Common Casting: <http://hrdctheater.com/common-casting/>. Students who wish to be part of the production team should contact production coordinator, Dana Knox: danaknox@fas.harvard.edu.

Class Notes:

The first class meeting for TDM 90AR will be Thursday, September 13, 2018.

Harvard Dance Project (160653)

Jill Johnson

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0715 PM

T 0300 PM - 0715 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The Harvard Dance Project cultivates invention and fosters the courage of artistry. This faculty-led performance company gives students the opportunity to be original cast members and collaborators in diverse dance works created by preeminent professional choreographers. The project focuses on performance research, collaboration, choreographic composition, and links choreographic thinking to other fields. It is a studio-based course which includes performances at major venues on campus. Harvard Dance Project Collaborators (2013 - 2018): Jonathan Alsberry, Azure Barton, Brian Brooks, Peter Chu, Chanel DaSilva, Anne Teresa De Keersmaecker, Michelle Dorrance, William Forsythe, Jill Johnson, Francesca Harper, Crystal Pite, Shamel Pitts, Silas Reiner, Dwight Rhoden, Melinda Sullivan, Clifford Williams, Mario Zambrano.

Course Notes: Formerly MUSIC 12B.

Some dance experience required. Enrollment determined by audition. Course meeting days alternate between T/W/TH: 3:00-7:30pm (3:30pm actual start time), T/TH: 3:00-7:30pm (3:30pm actual start time). Fulfills a TDM requirement. Artistic Director/Instructor: Jill Johnson

Recommended Prep: Previous dance experience required.

Theater, Dance & Media: What It Is and How to Do It (160648)

Debra Levine

2019 Spring (4 Credits)

Schedule: T 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 30

What are theater and dance? What is at stake when a performance is live or recorded? How do performers use space, time, and bodies to make meaning? What is the relationship between a performance and a script? Why do performers and audiences gravitate to live arts? How do economic and political circumstances shape live performances? This sophomore tutorial in Theater, Dance & Media provides students with an intellectual and practical foundation to the concentration by exploring these questions and more. Readings will include theoretical texts from Schechner, Phelan, and Chaudhuri, alongside scripts and other performance materials by Kennedy, Bausch, Kaprow, and Smith. Assessments emphasize how to write about performance and how performance serves as a form of criticism.

Course Notes: Required of all, and limited to, concentrators.

Introduction to Dramaturgy (American Repertory Theater 2018-19 Season) (118876)

Ryan McKittrick

2018 Fall (4 Credits)

Schedule: W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course introduces students to the fundamentals of dramaturgy and the role of the dramaturg, with a special focus on the American Repertory Theater's 2018-19 season. Students will analyze a range of plays, musicals, productions, and works in development at the A.R.T.; study theories of adaptation and write their own adaptations for the stage; meet with artists developing work at the theater; and see productions on A. R.T. stages.

Beginning Acting Through Scene Study and Monologue Work (207571)

Marcus Stern

2018 Fall (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This is a beginning acting class where all the work will be done through scene study and monologue work, using contemporary texts from theater, television and film. The core components of the class are based on "action-based acting" (how one actor is trying to change/effect another actor), practical/functional text analysis, "reading your scene partner" in order to figure out how best to connect with them, and the ability to both self-assess and self-adjust your own acting work. No previous acting experience necessary. Good for those interested in exploring the world of acting for the first time, as well as for directors, writers, designers, dramaturgs, stage managers and other theater practitioners interested in learning about acting and how to work with actors.

Course Notes:

Enrollment determined by audition. Please prepare a 1-2 minute contemporary monologue. Choose any piece of text (1990's to the present) from theater, television or film. Choose text you can relate to in some way. Please memorize the text, and then simply practice saying those lines until they feel natural and normal to say.

Theater, Dance & Media 110

Foundations in Acting: Points of View (112880)

John Kuntz

2019 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

An exploration of the basic techniques of acting, beginning with exercises that flex the imagination and heighten observation; the course will then move towards work on rhythm, an actor's instincts, focus, concentration, and character with an ongoing emphasis in improvisation. The play "Waiting for Godot" by Samuel Beckett will be used as a point of reference for the work. The latter part of the course will concentrate on selected scenes from that play. Especially suitable for first-year and sophomore students.

Course Notes:

Enrollment determined by audition. Students will audition for the course with a short improvisation described by the professor at the first class meeting.

Theater, Dance & Media 112R

Advanced Acting: Contemporary Texts (122906)

Marcus Stern

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

For actors interested in working in television, film and theater, this is a course of advanced acting techniques using contemporary dramatic texts for scene work. The emphasis is on action based acting and the creation of an acting process that can be specifically tailored to the individual actor. In addition to extensive scene work, the course includes audition techniques, choosing material for auditions, character work (making physical and vocal changes so a character can be different from your regular persona), text analysis, and how to "work from yourself " for more believable acting.

Course Notes:

Enrollment determined by audition on the first day of class. Please bring in a memorized and rehearsed contemporary monologue no longer than 2 minutes to audition with on the first day.

Squaring the Circle: Russia, Art, Revolution (208135)

Daria Khitrova

2019 Spring (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes:

No prerequisites. All readings in English.

Theater, Dance & Media 117

Acting Chekhov (123900)

Remo Airaldi

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

An exploration of Chekhov's plays from an actor's point of view in order to develop a practical approach to any dramatic text. We will balance the use of analytical skills - playable actions, active verbs, subtext and beats - with the need to free the actor's creative imagination, through exercises and improvisations. A variety of acting techniques will be used in scene work from the plays, including the techniques of Stanislavski, Michael Chekhov, Strasberg, Adler and Meisner as well as non-text-based approaches.

Course Notes:

Enrollment determined by audition during the first day of class. Each student will be asked to read a selection from one of Chekhov's plays. No memorization required.

What's so Funny?: Introduction to Improvisational Comedy (160654)

Remo Airaldi

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Comedy has often been thought of as the poor relation to Drama but, as Lenny Bruce said, "the only honest art form is comedy because you can't fake it." We will attempt to take comedy seriously by studying its component parts and engaging in committed, creative and collaborative "play" that will tap into each student's personal, individual sense of humor. The class will focus on the basics of improvisation: group games, narrative skills, patterns, offers, spontaneity, agreement, using the space around you, building on-stage relationships and, eventually, scene work.

Course Notes: Enrollment will be determined by an interview/audition on the first day of class.

Directing (123080)

Marcus Stern

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

9

A directing class for directors interested in theater, television and film, as well as for actors, dramaturgs, designers, and stage managers interested in investigating all aspects of theater. The class accommodates all levels of directing, from first time to advanced directors. It's a course for directors to tell stories.

Through constant scene work, students examine how to work with actors, stage stories for clarity and impact, and how to use light and sound to help tell those stories. The central focus is on how a director's

personal experiences and/or passions can creatively and concretely shape their story telling. In addition to continuous hands-on directing, students will also study professional theater directors working in a variety of innovative styles. Live video camera work for the stage will also be part of the course. All Students must direct some live stage scenes, but they may also bring in video or film scenes as part of the class work.

Course Notes: Enrollment determined by short interviews to be conducted on the first day of class.

Motion for Performers (207572)

Jill Johnson

2018 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

For actors, choreographers, dancers, directors, and writers, this course aims to build a skillset in the physicality of roles for stage, screen, and installations. The course considers how and in what ways a performer can capture and inhabit a character, develop embodied stakes, cultivate dexterity and nuance in a role – through and with the body. From the pedestrian to highly stylized or improvised movement, students will conduct in-depth research and physical practice in a studio lab environment, focusing on motion expression and physicalizing a role. The course will include a rigorous study in body awareness, task-based improvisation, staging/choreographic exercises, and cultivate communication skills for effective feedback and direction. Professor Mario Zambrano (TDM/Dance) will teach several classes. Guest artists and directors, site-specific research on campus, including in artist Teresita Fernandez's installation *Autumn (...Nothing Personal)*; and several colloquia will be a part of the course.

Course Notes:

No experience in dance and/or a physical practice required. Fulfills a TDM requirement.

The Art of Scenography: 20th and 21st Century Directorial Concepts and Set Design (110319)

Julia Smeliansky

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor**Enrollment Cap:**

20

In this course, students will study the work of the great 20th and 21st century auteur directors and set designers. Students will explore a range of artistic movements including Constructivism, Futurism and Dada, and discuss how the theater became a place to experiment with the concepts and discoveries of these movements. Examining primary source materials in the Harvard Theatre Collection, students will research the work of artists including Gordon Craig, Richard Wagner, Leon Bakst, Pablo Picasso, Konstantin Stanislavsky and Vsevolod Meyerhold. The course will also focus on the work of such contemporary directors and designers as Robert Wilson, George Tsypin, and Robert Lepage.

Design Foundations: Scenography Studio (109545)

Sara Brown

2019 Spring (4 Credits)

Schedule:

R 0900 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course explores the foundational tools and concepts for set, light, and costume design. Students will be introduced to the foundational skills of scenography through a series of design projects that employ a variety of strategies for communicating designs including manual (drawing, painting, model making) and digital media (image manipulation, CAD). Students should not expect a technical survey, but rather an exploration of how visual elements shape a given performance. The Projects are based on the writings of Italo Calvino, Octavia Butler, and Sarah Ruhl. Projects will be complimented by study of theories and practices of Richard Kelly, Adolph Appia, Bertolt Brecht, and others.

Introductory Theater Design: Lighting, Audio, and Video (204029)

*Justin Paice**Johnathan Carr**Andrew Will*

2018 Fall (4 Credits)

Schedule:

MW 1200 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

The process of making theater is a collaboration between different people and different crafts. This course will introduce students to the basics of design and production for three of those crafts: Lighting, Audio, and Video. Through lectures, hands on work, and practical projects, students will explore these three crafts as tools to help tell a story onstage and on screen. Students will learn not only about the technology and methods used in these design fields, but also the underlying principles of design that are universal across these three, and many other crafts.

FICTIONAL ARCHITECTURE: design studio for performance (207551)

Mimi Lien

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This studio-based course explores the narrative and dramatic potential of three-dimensional space – the intersection of architecture and performance. We will examine how the character and content of a designed space informs the experience of the viewer and becomes a container/counterpart for performance, or is itself a performance. How can the design and experience of space transgress traditional narrative models?

Students will be introduced to examples of dramatic narrative and anti-narrative in space by examining the work of architects, artists, and theorists such as Diller & Scofidio, Lebbeus Woods, John Hejduk, Gordon Matta-Clark, and Gaston Bachelard, as well as works of theater and dance created by designer-directors and choreographers such as Romeo Castellucci, Sasha Waltz, and Philippe Quesne. Throughout the semester, students will generate a series of design projects inspired by works of fiction, visual art, and performance.

Course Notes: This course will be taught by TDM Visiting Lecturer Mimi Lien.

Playwriting: Ritual Practice and Curious Worlds (207819)

Phillip Howze

2018 Fall (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

A play is a new world in and of itself. What sorts of strange, curious worlds are theater makers crafting today? What approaches are they taking to create these worlds?

In this new playwriting course we will explore both text and non-texts, the wild (as well as the conventional) to discover what drives contemporary plays, devised works, and performance today.

We will discuss the practices employed by various playwrights and directors—particularly women and artists of color—and try our own hand at some of these approaches. In addition, we will see live performances in realtime; engage special guest/visiting artists; collaborate with fellow classmates; and expand our curiosities.

Most importantly, we will write. This is an exploratory writing workshop with a focus on generating new material. By the end of the semester, you will have created a portfolio of new works, ideas, processes and rituals.

Course Notes: This course will be taught by TDM Lecturer on Playwriting Phillip Howze

Playwriting: Intersecting Americas (211184)

Phillip Howze

2019 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

"Look around, look around at how lucky we are to be alive right now!", exclaim The Schuyler Sisters in Lin-Manuel Miranda's *HAMILTON*. History is happening. This new writing workshop will engage what is happening and what has happened by examining texts, theater-making and live arts through the lens of singular periods in America's modern social history. We will explore form in frames of the twentieth century (for example, early AIDS-era) as well as in the contemporary moment (Black Lives Matter).

We will look primarily at writers of the Americas, but also beyond. We will write collisions and collusions, interrogating spaces across discipline and tradition. In addition to expanding our writing and reflective practice, we will undertake experiments in participation, spectatorship, and collaboration to question: how have theater makers been in conversation with their time and times?

Course Notes:

Though there is no prerequisite for this course, this is a complementary class that can be taken along with Playwriting: Ritual Practice and Curious Worlds, offered in Fall 2018.

Tools for Virtual and Real Perceptions (211207)

Young Joo Lee

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This class will examine how the current media culture affects the perception of the physical reality, identity, and relationship to other humans as a starting point for individual projects. We will read writings and watch relevant films, artworks in addition to meeting and talking with guest artists/speakers. The tools taught in the class are Unity 3D and After Effects. One or more of these programs should be used to create the final project. Some of the themes to think about in the class are virtual reality, gender and community, dreams as virtual reality, phantom limb, extension of body and sensorial organs. This course is formatted as a seminar and studio class, thus the critique and presentation of students' work are essential.

Immersive Storytelling Using Mixed Media (208156)

Young Joo Lee

2018 Fall (4 Credits)

Schedule:

M 0900 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

15

This course is a seminar and studio class about storytelling using mixed media: video, performance, drawing, text, sound and virtual reality. We will examine different ways in which artists used visual language to tell stories. Starting with the history of immersive media such as wall paintings, panorama, cyclorama, phantasmagoria, the class will study the relationship between visual language and technological development. We will screen examples of relevant contemporary art works and analyze the technological aspects and conceptual background of these works. Utilizing video, performance, drawing, sound, text and virtual reality, students will develop multiple projects, reflecting on the discussions in the class. Critique and presentation of the students' works are essential part of the class.

Course Notes:

This course will be taught by Harvard College Fellow Young Joo Lee.
This class will meet Mondays, 9:45 AM - 11:45 AM.

Acting and Authenticity (156461)

David Levine

2019 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

This studio-based seminar examines the concept of "building a character" and pushes it towards performance art. While acquiring Stanislavski- and Method-based acting techniques, students will also consider psychological realism in light of philosophical, psychological, sociological and scientific notions of authenticity and falsehood, presence, mimesis, identity, and empathy. What does it mean to turn into someone else? How total is the transformation? What are the implications for our understanding of the individual? What does "realist acting" mean in an era of AI, social media, and motion capture? The seminar involves both readings and exercises, and culminates in a final project where participants turn into each other.

Theater, Dance & Media 181K

Choreographies of Resistance (207882)

Sharon Kivenko

2019 Spring (4 Credits)

Schedule:

W 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This "movement seminar" examines socio-political resistances that choreography can enact. Engaging with weekly movement provocations inspired by Euro-American and Africanist forms of movement students will learn to undertake critical dance studies as a means towards naming, knowing, and coming to terms with difference. What and how do performing bodies signify? Can a collection of performing bodies make lasting change in and on their social and political milieux? Can choreography theorize corporeal, individual and social identities? Does choreography address and can it recast our thinking about ethnicity, gender, class and sexuality? The suggestion underlying these questions is that choreographies can and do, in fact, have the potential for potent social, cultural, political and economic interventions. By considering these questions carefully, we will in this course enact a form of generative choreographic scholarship, that will culminate in creative and critical work both on stage and off.

Art and Empathy (207570)

David Michalek

2018 Fall (4 Credits)

Schedule:

R 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

The English word "empathy" came into being only about a century ago as a translation of the German aesthetic criterion *Einfühlung* – to "feel into" a work of art or nature. Originally adapted for use in psychology to describe the projection of imagined feelings onto the world, empathy has since evolved to suggest, among other things, a contagion of feeling or the intellectual apprehension of another person's condition or state of mind. For some, it is our empathetic capacities that make us human and upon which our social and interpersonal lives depend. For others, empathy can be a blinding emotion that precludes and muddies more rational moral thinking. The debate about what empathy means and why it matters continues.

This course will trace empathy's genealogy through aesthetic theory, philosophy, psychology, performance theory, and spirituality while primarily considering the potential and the limitations, the opportunities and the risks inherent in the art+empathy relationship. The course will, furthermore, feature and examine works of art that are about empathy, against empathy, as well as works celebrated for their ability to help us imaginatively apprehend and engage The Other's condition or state of mind. Special emphasis will be applied to the live arts of Theater and Dance and the media arts of Photography and Film. Each student will be challenged to create a work of art (in any medium) with the consideration of the role that empathy might play in it (essay writing included).

Course Notes: This course will be taught by TDM Visiting Lecturer David Michalek.

From History to Hamilton: Contemporary Non-Fiction Theater and How To Make It (207899)

Kathryn Matschullat

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Often, theater is equated with great works of fiction, but, in fact, a great deal of contemporary dramatic arts is based on historical, scientific, and political events and ideas. This class is designed for students interested in exploring and creating such Nonfiction Theater. The course will cover the emergence of several genres of Nonfiction Theater in the 20th century and their evolution in the 21st century. The material to be considered ranges from Lin Manuel Miranda's take on Hamilton's biography as a subversion of the traditional power structure in American politics, and Anna Deveare Smith's manifesto for social change to Bruce Springsteen's theater of memoir cum music to Spalding Gray's monologues mining the unconscious.

Beyond examining the development of Nonfiction Theater, we will consider the role of artists in this enterprise. When does the activist become an actor? When does the actor become an activist? At the same time, we will create Nonfiction Theater of our own. Students will experiment with methods of adapting and performing material from everyday reality, current, and historic.

Media provides a spine in much of Nonfiction Theater. For purposes of this class, media will include visual imagery, live and recorded sound and music, as well as computer-generated augmentation. These resources will be examined and then experimented with as a method to enhance storytelling and/or as an alternative to the standard logic of storytelling.

Course Notes: This course will be taught by TDM Visiting Lecturer Kay Matschullat

Recommended Prep: Students with diverse interests and producers, performers, and directors in performing arts are all encouraged to enroll. All levels of experience welcome.

Disability, Debility and Performance (208116)

Debra Levine

2018 Fall (4 Credits)

Schedule:

W 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will serve as an introductory exploration of the intersection between the field of disability studies with theater and performance. We will investigate examples of how disability has been represented on the stage and in expressive culture; how theater, performance, and expressive culture have contributed to notions of which bodies are considered disabled in different contemporary and historical cultures; and how the aesthetics of popular forms of theater and performance have historically invalidated the premise that disabled bodies are rhetorical and virtuosic. Through reading and viewing theater and performance art (both live and digital) that engages with disability and disability culture, we will survey the impact of disability activism on what now constitutes "normal" embodiment and the expansion of who is allowed to flourish in society. We will consider the contribution of resistant discursive frameworks such as "crip" and "queer." And finally, we will reflect on performances that highlight how liberal frameworks of disability and disability pride have become weaponized by nation-states that have adopted debility as a form of biopolitical oppression. Queer theorist Jasbir Puar distinguishes state-inflicted injury on civilian populations – the state's assumption of the "right to maim," where the state designates certain populations available for injury and privileges the disabled status of others – as the phenomenon that limits and revises frameworks of disability identity, rights, and culture. By watching, reading, and making theater, dance and performance that intersects with these concerns, we will contend with how disability functions at the intersection of imperialism and racialized capital.

Intermediality - Literature, Image, Performance (211189)

Cecile Guedon

2019 Spring (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This is an introductory course which explores various ways of theorising the interaction between literature and other art forms (music, visual arts, performing arts). We will thus be looking at the interrelation

between literature, image, performance; we will try to understand their triangular definition, with various historical configurations. The overall idea is to refine a trans-medial narratology applied to the field of performance specifically. In the last couple of decades, narrative has been positively recuperated by the performing arts, which were once overtly hostile to any assimilation to a plot or a storyline. However, what we have seen so far has been restricted to theorizations of narrative in dance (Susan Foster) or theatre studies (Claudia Breger); at both ends of this spectrum—from dance, as predominantly gestural, to theatre, as predominantly verbal—there seems to be a strong, cumbersome tie to a language-based narratology.

In this course, we will, in turn, seek to identify features of narrativity, which could be transposable to the in-between, dialogic and relational field of performance. Part of the difficulty is that performance is a profoundly intermedial endeavor, and is anything but a stable object of research. Performance is also a dangerously all-encompassing term. In the last fifty years, "performance" has come to characterize an increasingly large number of choreographic pieces— from early modern court dances to baroque operas, from classical ballet to modern dance, from postmodern dance to post-war "happenings" or contemporary "installations." Such a shift from dance to performance has been observed as a corollary development in twentieth-century practices, following a consistent enlargement from modern dance, to post-modern dance and rival categories such as "happenings", finally (and temporarily) stabilizing with the wide-ranging notion of "performance." We can agree on using "performance" as a productive term, encompassing a large sample of case-studies. But how can we manage the generality of the term when we are by the same token seeking highly specific instances of residual, exceptional and scarce narrativity in our case-studies? Can we establish key features of narrativity pertaining to performance as a medium?

Introduction to Non Fiction Videomaking (108859)

Joana Pimenta

2019 Spring (4 Credits)

Schedule: MW 1200 PM - 0245 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 10

This course is an introduction to documentary filmmaking. We will explore a range of approaches to nonfiction filmmaking through assignments which encompass video and sound recording and editing, cinematography and montage. Following introductory camera, sound and editing exercises, each student will spend the semester making a single nonfiction film on a subject of their choice. Class time will include technical workshops, film screenings, discussions of student work and occasional visiting filmmakers.

Course Notes: Students seeking to enroll are encouraged to bring a paragraph to the first class meeting describing a proposed subject for a short non fiction film, and how they envision approaching it using images and sounds.

Class Notes: There will be occasional film screenings during the semester on Wednesday evenings from 7:15 to 10pm in the Carpenter Center Lecture Hall.

Fundamentals of Animation (110676)

Lisa Crafts

2019 Spring (4 Credits)

Schedule: W 0130 PM - 0545 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 10

An introduction to the possibilities of animation. Using a mixture of traditional and 2D digital tools, students will complete practical exercises which will familiarize them with basic skills and techniques. Screenings and discussions will help develop the specialized thinking needed to understand the discipline.

Course Notes: Drawing skills are optional, though helpful.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: This course meets from 1:30 to 5:30 on Wednesdays, and has a mandatory film screening on Fridays from 1:30-3:30.

Constructing Realities: A Filmmaker's Guide to Contemporary Southeast Asian Cinema (207858)

Anocha Suwichakornpong

2019 Spring (4 Credits)

Schedule: WF 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This studio course is a combination between film production and film studies. In the course, we will examine cinema from Southeast Asia from the year 2000 to the present, looking at the works of independent filmmakers such as Lav Diaz, Apichatpong Weerasethakul, Tan Chui Mui, and others. Films selected for class viewing will be studied for their modes of production as well as their relations to their socio-cultural milieu. As critical reflection expected, the study also aims to broaden students' perspectives towards interrelationship between film production and its social/monetary constraints – to the point where its constraints become a form of political/creative act.

Course Notes: This course welcomes students with little or no film/video production experience.

Interested students must attend the first meeting of the class during shopping week.

Approaching Narrative: Introduction to Filmmaking (127469)

Anocha Suwichakornpong

2018 Fall (4 Credits)

Schedule: MW 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 10

In this production course, students will learn the basic principles of narrative filmmaking. Different tools and filmmaking techniques, including lighting and cinematography, sound recording, and editing will be introduced to students by lecturer and invited film professionals. Classes will also consist of screenings, discussion, and critiques of student work.

By the end of the course, students will be equipped with the necessary tools to produce a short film with sync sound.

Course Notes: No prior filmmaking experience necessary. Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Moving Images: An Introduction to Video as Art (207841)

Karthik Pandian

2019 Spring (4 Credits)

Schedule: TR 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 10

This production course introduces students to the fundamentals of working in video. Drawing on the energy, intensity and criticality of contemporary video art practice, students will complete a series of projects exploring dimensions of cinematography, mise-en-scène, editing and sound design before producing a final self-determined project. Concepts crucial to time-based media such as apparatus, montage and identification will be introduced through screenings, discussions and texts by a diverse range

of artists, filmmakers, and theorists.

Course Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

The Art of Film (115688)

Katherine Rennebohm

2019 Spring (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

An introductory course that focuses on the language of film and moving image media. It will provide the students with the analytical tools to respond both critically and creatively to moving image media, with an emphasis on close formal analysis. In the interest of exploring the vast possibilities of the moving image, we will watch a broad selection of narrative and non-narrative works from around the globe alongside canonical feature films.

Course Notes: This course is required for all students concentrating in or pursuing a secondary field in film and visual studies.
This course has mandatory weekly film screenings on Tuesday evenings from 7:15 pm to 10pm.

Artist-Curators and Collections (207832)

Daniel Byers

2019 Spring (4 Credits)

Schedule:

T 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

Harvard's collections, archives, and libraries hold vast repositories of visual and material culture. How have artists engaged collections to create new works, and to curate critical, idiosyncratic, and subversive exhibitions? This class will create a dialog between visits to the university's varied collections guided by their curators, librarians, and archivists and case studies of 20th and 21st century artist-curated exhibitions and artworks that adopt the logic and form of collections. Will include visiting artists and curators.

Class Notes:

Classes will alternate between visits to collections, libraries, and

archives at Harvard and elsewhere, with sessions where we will look at artists and exhibition case studies that relate to our visits.

Recommended Prep: Pre-req: At least one course in VES or History of Art and Architecture, or the permission of the instructor.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Additional Course Attributes:

Drawing 2: Paper Always Talks a Lot (203313)

Katarina Burin

2019 Spring (4 Credits)

Schedule: MW 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This studio art course foregrounds the medium of drawing, investigating its many potentials, both on and off the page. Drawing is positioned as model and as witness, and as something which carries ideas forward. It is experimental, light and flexible, while maintaining the ability to record direct process or be deeply specific.

Students will explore the potential of depicting both literal and metaphorical space, including the space of personal or collected memory, of future possibility and the imprint of time and process. Working in two-and three-dimensions we will strengthen our conceptual, technical and artistic visual skills.

Course Notes: This course is open to anyone who has some experience with creative visual work.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Material Research: The Bauhaus Studio (207844)

Katarina Burin

Laura Frahm

2019 Spring (4 Credits)

Schedule: MW 0300 PM - 0545 PM

In connection with the Bauhaus Centennial, this intensive research-based making course will explore the legacy of Bauhaus influence on art and design education in the United States by drawing from a wide range of archives, collections, and historical sites. Integrating studio and seminar instruction, we will examine Bauhaus pedagogy through weekly archival visits, guest lectures, material workshops, and studio practice. Our research will culminate in an exhibition that combines materials from collections, drawings, and objects alongside the student projects generated as a result of our investigations.

Course Notes: This course is for graduate students and advanced undergraduate students.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Save the Last Dance for Me--Intermediate Painting Class (207922)

Sonia Almeida

2019 Spring (4 Credits)

Schedule: M 0945 AM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

Integrating both studio practice and reading discussions, this painting course will be centered on being a maker, challenging separations between crafts and fine arts and the obsession with pure 'opticality'. It will also look at how experiences get processed and ultimately translated into painting, and how the motor system influences cognition just as the mind influences actions of the body. This hand-on class will engage with traditional painting methods as well as experimenting with different related techniques such as drawing, printmaking and bookmaking. Through student lead discussions, the course will expand on agency, subjectivity and intention.

Course Notes: Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes: This course will break for 45 for minutes for lunch at 12:00pm.

Recommended Prep: **Prerequisite:** At least one VES studio course or the permission of the instructor.

This studio class engages with photographs that have been deemed difficult, wrong, shocking, inappropriate, and/or subversive. Discussion is foundational to this course, with the goal of having open, generous, and generative conversations. Does photography have unique moral obligations that are distinct from other mediums? Furthermore, what are the moral and ethical responsibilities of photographers today? Students will devote themselves to the development of a semester long individual project that culminates in a final portfolio of photographs. In addition, students will engage with multiple case studies of photographs and photographers whose work has drawn controversy drawing from global examples.

Course Notes:

Interested students must attend the first meeting of the course during shopping week.

Recommended Prep:

Prerequisite: Introduction to Still Photography or the permission of the instructor.

In this intermediate photography course, students will engage with the archives of June Jordan, writer, political activist, and fierce human. Using her papers, personal and rare documents, we will have discussions and create photo based work exploring notions of intimacy, gender, and social conditions. We will address in this course the constellation of her contemporaries and the role that photography plays in many of the issues that her work raises.

Course Notes: Interested students must attend the first meeting of the course during shopping week.

Class Notes: This course meets from 1:30-4:15pm

Recommended Prep: Prerequisite: Introduction to Still Photography or the permission of the instructor.

Film Directing: From Script to Screen (114116)

Anocha Suwichakornpong

2018 Fall (4 Credits)

Schedule:

TR 0130 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

The course guides the students through different stages of filmmaking, from script to finished film. Students develop short film scripts which they will make at the end of the course. Emphasis is placed on directing actors, single-camera blocking, and the role of camera work in its narration of the story. Film professionals will occasionally be invited to conduct some workshops with students. In-class screenings and critiques of student assignments form an important component of the course.

Course Notes:

Interview with instructor required for admission. Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes:

This course meets from 1:30 to 4:15.

Recommended Prep:

VES 50 or two other courses in video production such as VES 51a; VES 52r; VES 59; VES 63; VES 60x; VES 151b or VES 163V.

True Fiction: Intermediate Film Production (113516)

Anocha Suwichakornpong

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This production course is the more advanced level of 150A. Students must have at least the first draft of their short screenplays on the first day of class. Content includes scene analysis and script revision, directing professional and non-professional actors, cinematography, blocking and mise-en-scène, sound design, editing and post-production. Students will be given assignments related to their written screenplays throughout the course, culminating in the final project: the production of a narrative short film. Film professionals will occasionally be invited to conduct workshops or hold master classes with students.

Course Notes:

Students seeking to enroll should come to the first class meeting with a developed short narrative screenplay.

Class Notes:

This course meets from 1:30 to 4:15.

Recommended Prep:

VES 150A or two courses in video production, one of which must be VES 60x or VES 59.

Nonfiction Video Projects (113447)

Alfred Guzzetti

2018 Fall (4 Credits)

Schedule:

R 0130 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

Working from a proposal approved in advance by the instructor, each student plans, shoots, and edits a documentary video of his or her design. Shooting should take place over the summer and editing during the fall term. Readings and screenings augment individual work.

Course Notes:

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

In exceptional cases, a student will be permitted to take the course without having filmed over the summer, but the student must have a specific proposal for a documentary that can be both shot and edited during the term. An interview with the instructor is required for admission.

Class Notes:

This course meets from 1:30-6pm.

Recommended Prep:

At least one VES course in live-action film or video.

Scientific Sites (208323)

Peter Galison

2019 Spring (4 Credits)

Schedule: MW 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

This course aims to explore scientific-technical sites—places of research, production, teaching, testing, and disposal. Some may be historical (such as disused Cold War relics) others in current use. How are these places shaped by the work that goes in them, how do the sites, in return, condition the work? Our sources will be a mix of site visits, texts (e.g. historical, ethnographic) and films (documentary). Each student will produce both a paper and a short cell-phone filmed video (no experience, we will teach all you need). Open to undergraduates and graduates.

Documentary Fictions (205241)

Joana Pimenta

2019 Spring (4 Credits)

Schedule: TR 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 10

In this film production course, students will make short films that explore the fluid boundaries between fiction and documentary. We will discuss the generative possibilities of the real in the production of fiction works, and fictional strategies for working in documentary film. Assignments will encompass video and sound recording and editing, cinematography and montage. Class time will include technical workshops, film screenings, discussions of student work and occasional visiting filmmakers.

Course Notes: Interested students must attend first meeting of class to speak with teaching staff about enrollment procedures.

Class Notes: There will be occasional film screenings during the semester on Wednesday evenings from 7:15 to 10pm in the Carpenter Center

Lecture Hall.

Recommended Prep: At least one previous VES film/video course and/or experience in film/video and sound recording and editing is recommended, but not required.

Algorithmic Performance (208333)

Sohin Hwang

2019 Spring (4 Credits)

Schedule: R 1200 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

How do we think, feel, and work in the age of performative algorithms? This course explores performative practices using algorithms as an investigative method. Programming figures in both immediate and remote environment, students will develop experimental practices based on various forms of algorithmic constructions. Contemporary examples will be introduced, with a focus on the use of lists, instructions, and diagrams. Screenings, workshops, guest presentations, and readings will supplement the development of the projects.

Course Notes: Prerequisite: Previous studio or programming experience helpful but

not required.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Documentary in the 21st Century (207803)

Dennis Lim

2019 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

23

This class will survey the contemporary documentary landscape and explore some of the most pressing questions facing the field in a time defined equally by an unprecedented ubiquity of documentary images and a rhetoric of post-truth. Topics include the role of digital technology, the documentary image as it relates to global crisis, the documentary turn in contemporary art, the proliferation of documentary-fiction hybrid films, and the revitalization of observational and ethnographic modes of filmmaking.

Course Notes:

There are mandatory film screenings for this class from 12:00pm to 2:00 on Mondays, preceding the class meeting, which is from 3pm to 5pm. Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Art of the Real: Rethinking Documentary (156235)

Dennis Lim

2018 Fall (4 Credits)

Schedule:

M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What defines the documentary, and why have these definitions proved so mutable and even contentious over the years? This seminar will undertake a historical survey of the documentary from the silent era to the digital present, paying special attention to the formal, aesthetic, and ethical questions that have shaped its evolution. Looking beyond the canon and beyond traditional notions of non-fiction, the class aims to provide students with an expanded view of the real in cinema.

Course Notes:

There are mandatory film screenings for this class from 12:00pm to 2:00 on Mondays, preceding the class meeting, which is from 3pm to 5pm. Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Class Notes:

A Deep History of Arts of the Secret (207921)

Laura Marks

2018 Fall (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

The arts of the secret carry out operations on the universe, understood as an interconnected, deeply folded whole. People with special knowledge—secret societies, enslaved peoples, and persecuted minorities—create and use secret arts, including alchemy, talismans, Baroque curiosity cabinets, ornament and abstraction, performative media, and algorithmic apps. We will practice embodied methods to unfold their secrets. Theories and methods will draw on Islamic Hermeticism, Sadrā, Deleuze, Focillon, Simondon, Moten, Steyerl, and others.

Course Notes: There are mandatory weekly screenings for this class on Wednesday evenings in the Carpenter Center Lecture Hall. Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

Artistic Research Workshop (208330)

Sohin Hwang

2018 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

How can we conduct and present research through art? This studio-based seminar explores practices of artistic investigation and critical visual thinking with a focus on strategies from performance, video, and installation. Pursuing individual projects, students will be encouraged to use bare senses for making observations and understand different ways of using objects, space, recordings, and other materials to formulate questions and convey findings. Three presentations will be expected to show the work process that leads to the final one. Screenings, guest presentations, field trips, and readings supplement the development of the projects.

Course Notes:

This is a graduate level course, but undergraduates are also welcome to apply. Interested students must attend the first meeting of the class during shopping week to speak with teaching staff about course enrollment procedure.

Recommended Prep:

Prerequisite: Experience in Media Production helpful but not required.

Proseminar in Film and Visual Studies: Theory (122080)

Laura Marks

2018 Fall (4 Credits)

Schedule:

T 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

This proseminar presents useful theories and methods for film, media, and visual culture. Beginning with aesthetics and theories of perception, we will hone skills in object-based and embodied forms of inquiry. We will work on medium specificity and intermediality, media ecologies, archives and archaeologies, and the attention economy. We will learn to research across time and space, including non-Western theories and cross-cultural research methods. We will develop skills for outputs from publishing to public programming.

Course Notes:

Required of all Film and Visual Studies graduate students as well as graduate students intending to declare a secondary field in Film and Visual Studies.

Interested students must attend first meeting of class during shopping week to speak with teaching staff about course enrollment procedure.

The course is organized to support student success in writing a junior research paper. We will read a variety of texts and interrogate closely how topics are approached in literary and cultural studies, in social and historical studies, and in life-sciences, in order to become prepared to discuss critically different methodological approaches and theoretical frames. Students will also work with an individual tutor, who will guide them through their research and writing on the particular topic of their interest.

Course Notes: Required of all Honors concentrators in their junior year.

An introduction to the radical American social change movements of the 1960s and 70s. We will examine the specific historical conditions that allowed each of these movements to develop, the interconnections and contradictions among them, and why they ultimately lost political power. Along with historical analysis, we will examine primary source materials, manifestos, autobiographies, and media coverage from the period, as well as relevant films, music, and fiction. The class will be a mixture of lecture and discussion.

Women, Gender & Sexuality 1204

Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)

Eleanor Craig

2019 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we ask, the information that counts as data, and the genres of work that we recognize as 'academic'?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with Ethnic Studies, it aims to serve as a 'Theories and Methods' course, providing robust tools for refining one's own interdisciplinary inquiries.

Women, Gender & Sexuality 1210FT Section: 01

Feminist Theory as Critique (142819)

Afsaneh Najmabadi

2018 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course begins with feminist critical engagements with other theories and practices, including Marxism, psychoanalysis, and Foucault. It will then move on to debates and discussions within feminism, as well as intersections of feminist theory with other theories including queer theory and sexualities studies, post-colonial/trans-national studies, transgender studies. One of the major concerns of the course is the relationship between feminism, theory, and politics. As such, several classes will cover some of the recent debates, such as #MeToo, Title IX, the Women's March, and trace these debates to some of the earlier moments of feminist theory and activism.

Course Notes:

This course fulfills the theory requirement for the undergraduate concentration in Studies of Women, Gender, and Sexuality.

Femme Theory: An Introduction to the Critical Study of Queer Femininities (208151)

Natasha Tinsley

2019 Spring (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The word femme, for myself specifically, is a departure from traditional femininity. I see femme as the rebellious teenage daughter of femininity. Femme is the process of taking the feminine words that were placed in my body, words like "soft, weak, quiet" and transforming them into: "wild, loud, confident"... When I broke up with femininity and embraced femme, I felt strong and confident and powerful. --Cecelia

"Femme the Future" trended as a hopeful feminist hashtag and t-shirt slogan in 2017, but how did its tweeters and wearers understand *femme*? A queer gender that self-consciously embodies and subverts cultural standards of femininity, the category "femme" remains undertheorized in contemporary queer,

transgender, and feminist studies and activism. Speaking back to femme invisibility, this course takes on the work of thinking through cis- and transwomen's femme-ness as a practice of queer expression and resistance. We engage femme representations in photography, popular music, autobiography, novels, essays, and cultural criticism in order to explore *femme* as a *verb*: that is, as a set of consciously, continually (re)choreographed cultural and aesthetic practices that disrupt norms of race, gender, and sexuality. And, like femme writer Cecilia, we will be "taking the word femme on as a project... to actively investigate and take apart the ways that traditional femininity lived" in our minds and bodies.

Works considered include Del LaGrace Volcano and Ulrika Dahl, *Femmes of Power*; Reina Gossett, *Trap Door: Trans Cultural Productions and the Politics of Visibility*; Juana Rodriguez, *Sexual Futures, Queer Gestures, and Other Latina Longings*; Janelle Monae, *Dirty Computer*; Susan Stryker, *Transgender History*; Janet Mock, *Surpassing Certainty*; Amber Musser, *Sensual Excess: Queer Femininity and Brown Jouissance*; Gabrielle Bellot, *"Volcano Dreams" and other essays*; Ann Cvetkovich, *An Archive of Feelings*; and Yvonne Fly Etaghene, *For Sizakele*.

Beyoncé Feminism, Rihanna Womanism: Popular Music and Black Feminist Theory (207924)

Natasha Tinsley

2018 Fall (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

In her single "Flawless," Beyoncé Knowles samples a speech by Nigerian writer Chimamanda Ngozi Adichie which includes her definition of "feminist": a "person who believes in the social, political, and economic equality of the sexes." As Beyoncé then continues to sing about what it means for "ladies" to "post up,

flawless," she literally inserts her music into African Diaspora conversations about what black feminism is, means, and does. In this course, we also enter this black feminist conversation—by engaging the music of recording artists Beyoncé and Rihanna as popular, accessible expressions of African American and Caribbean feminisms that reach worldwide audiences. Beginning with close analysis of these artists' songs and videos, we read their oeuvre in conversation with black feminist theoretical works that engage issues of violence, economic opportunity, sexuality, standards of beauty, and creative self-expression. The course aims to provide students with an introduction to media studies methodology as well as black feminist theory, and to challenge us to close the gap between popular and academic expressions of black women's concerns.

Psychology of the Gendered Body (205489)

Nicole Noll

2018 Fall (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Our perceptions of gender—our own and others'—powerfully shape our embodied experiences and behaviors. This course examines the embodiment of gender via the lens of psychological science. We will begin by exploring recent research related to gender and the body, and then study the underlying psychological mechanisms that influence our self-perceptions about gender. Our disciplinary foundation in psychological science will allow us to complicate current understandings of gender and embodiment by considering factors such as sex, race, sexuality, experience, intention, and awareness.

Leaning In, Hooking Up: Visions of Feminism and Femininity in the 21st Century (159887)

Phyllis Thompson

2019 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

What does it mean to "do" feminism, or to "be" a feminist in the 21st-century United States? What can we make of the dominant social expectations for a woman's life? This course explores contemporary ideals of feminine success, including their physical, familial, professional, and political manifestations. We will engage with highly-contested topics—including sexual violence and Title 9; work-life balance; the imperatives of self-care and presentation; and new models for sexuality, reproduction, family, motherhood, and domestic life—using the tools of theory and cultural studies to interrogate their framing within popular

discourse. Throughout, we will critique ideological formations of gender, particularly as bounded by race, class, and sexuality.

Course Notes: Weekly lecture plus an additional one hour section to be arranged.

How does one balance the demands of "politics" with the subtleties of "artistry?" In this course, we'll write and analyze short stories, paying close attention to key writing concepts such as characterization, voice, point of view, dialogue, and setting, while also investigating thematic issues related to women, gender, and sexuality studies. In addition, we'll read secondary readings by authors such as Audre Lorde, Dorothy Allison, and Adrienne Rich that illuminate the ways in which issues of power, agency, and voice have emerged as key themes in feminist writing. Frequent writing assignments, including written evaluations of peers' stories.

Gender and Language (207785)

Jessica Taylor

2019 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

40

In this course we examine some key questions about how language and gender work together in the world. What does it mean for language to be gendered? Are there "male" and "female" ways of speaking? Can language reinforce the patriarchy? Is gender something we express or something we build in interaction? How does gender intersect in language with other social identities like ethnicity, race, class, religion, and sexuality? How can we understand gendered language beyond the binary? The course focusses on language as a practice, as well as a system of representation. We consider words, conversations, and embodied interaction and draw on scholarship on language use around the world.

Course Notes: And a one hour section to be scheduled.

Men to Boys: Masculinities in Postwar Hollywood Film (109610)

Michael Bronski

2019 Spring (4 Credits)

Schedule:

W 0900 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This survey course examines the changing images of masculinity in Hollywood films from 1950 to the present. We will use the films, critical readings, feminist theory, film theory and primary source materials to chart the enormous changes in how postwar culture conceptualized "manhood" and "masculinity." Beginning with post-World War II films such as "The Men," and then covering Vietnam films and sports films such as "Rocky" and "Raging Bull" we will end with popular comedies celebrating male immaturity of Judd Apatow. We will be analyzing the films in the economic, political, sociological, and psychological context in which they were made and to which they were responding.

Transforming Scientific Knowledge: Science and Feminism (205291)

2018 Fall (4 Credits)

Schedule:

M 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

How have feminism and gender theory influenced the practice of science? What are feminist methodologies, and how do they shape research agendas in fields such as genetics, human biology, biotechnology, and medicine? How do ethical questions intersect with the research process, including questions of who conducts research and who participates? We will explore how working scientists use gender analysis to shape research choices, frame hypotheses, and re-imagine the structure of scientific inquiry. Assignments will allow students to explore areas of interest in depth, with the final project including an option to design and outline their own research project.

This seminar will explore understandings of gender-based violence through the lenses of feminist and trauma theory. Topics include intimate partner violence, sexual assault, child abuse, workplace harassment, Title IX, and street harassment. We will examine the evolution across time of cultural and medico-legal understandings of the problem, important developments in policy, medicine, and law in the last 40 years, and how violence looks outside of the male-female binary through which it is often understood.

Gender, Race, and Poverty in the United States (207786)

Marya Mtshali

2019 Spring (4 Credits)

Schedule:

TR 0430 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course investigates the realities of poverty through an intersectional lens, meaning that we will consider the simultaneous impact of race, gender, sexuality (and other identities) on economic insecurity. In what ways are conversations about poverty and its causes infused with assumptions

and stereotypes related to gender, race, and sexuality? We hear so much in the media about what causes poverty – what is reality and what is myth? How do these myths operate to reinforce and sustain economic inequality? Who and what gets left out of the conversation about poverty? Topics in the course include historical understandings of poverty; intergenerational class mobility; depictions of poverty in pop culture; and bringing attention to populations that often get left out of mainstream conversations about poverty.

Women, Gender & Sexuality 1275

Disability and Sexuality (205057)

Aubry Threlkeld

2019 Spring (4 Credits)

Schedule:

T 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course will examine the complex disconnections and intersections between studies of race, gender, sexuality and disability. Why are disabled people so often represented in the popular media as sexless, innocent, and childlike? Why are the few portrayals we do see of disabled people in relationships heterosexual, white, and cis-gender? Topics include: shifting definitions of disability and mental illness in relation to sexuality; fetish and desire; vulnerability and violence; the role of technology as cure; neurodiversity; disability art; the media's role in shaping cultural perceptions of disabled people's desires and pleasures; Mad pride and LGBT pride; queer and crip theory; politics and liberation.

Women, Gender & Sexuality 1276

The Black Male Body (207782)

Robert Reid-Pharr

2018 Fall (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines the ways that contemporary American intellectuals, particularly novelists and filmmakers, have attempted to rework and resist the many (negative) images of African American men in mainstream media. With a particular emphasis on the ways that these artists figure black corporeality, we will examine illness, enclosure, physical violence, work, sexual practice, and aging. Focusing on the period from the late 1960s to the present, students will be asked to map the historical development of images of black masculinity and to consider ways that these images might be either expanded or disrupted.

Women, Gender & Sexuality 1281

Hysterical Women: A History (205341)

Anouska Bhattacharyya

2018 Fall (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

What does it mean when contemporary media sources characterize celebrity figures, or frenzied consumers, as 'hysterical'? How are "hysteria" and "insanity" related, and what are the historical roots of these loaded concepts? This seminar addresses the complex history of hysteria by asking how this medicalized affliction has assumed a multiplicity of forms, especially on feminized and non-white bodies. As depicted through newspapers, multimedia sources, medical literature, sociological articles, and psychoanalytic texts, 'hysteria' affords a unique lens onto the social, cultural and medical history of mental and physical suffering. In a postcolonial world, the term has taken on even more complexity. As we compose a 'history of hysteria,' we will reflect on who gets to record history and whose narratives get left out.

Women, Gender & Sexuality 1283 Section: 01

Love's Labors Found: Uncovering Histories of Emotional Labor (207758)

Caroline Light

2018 Fall (4 Credits)

Schedule:

R 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

How do love, care, and desire influence the value of work, and why is emotional labor – which is vital to child or elder care, domestic labor, nursing, teaching, and sex work – often considered to be something other than work? How and why do the racial and gender identities of workers affect the economic, social, and emotional value of their labor? How do political and social arrangements of labor help produce and reinforce racial categories while solidifying the boundaries separating masculinity and femininity? Through a mix of primary and secondary sources, this seminar explores histories of emotional labor and the power structures that give meaning to often taken-for-granted categories of work. These sometimes hidden histories are key to untangling the gender, sexual, and racial implications of the "intimate industries" that populate today's transnational labor economies.

Course Notes:

Will count for WGS 1200 concentration requirement.

Women, Gender & Sexuality 1291

The Postcolonial Amazonian: Corporality, Gender, and Sexuality in Caribbean Literature (207925)

Natasha Tinsley

2019 Spring (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

"Our black ladies have rather a tendency to the Amazonian cast of character..."--Mr. Hamden, arguing to Barbados legislature against a law that proposed a ban on whipping of female slaves, 1798

The difference between Euro- and Afro-Caribbeans, posited colonial writer Edward Long, was located in their bodies: slaves' physical development, thought, and above all sexuality were other than that of their white counterparts, he argued. In response, regional literatures developed textual strategies to reclaim rhetorically and physically colonized bodies, genders, and sexualities, multiplying possible understandings of race, wo/manness, and desire. This course provides an introduction to literature from the English-, French-, Dutch- and Spanish-speaking Caribbean while exploring a series of texts that address this problematic. How are histories of racialized genders and sexualities—beginning in the Middle Passage and continuing to the present day—experienced in the Caribbean? What interests do the misrepresentation of (hyper) heterosexuality serve, and (how) can transculturating gender and/or sexuality link to political empowerment? Reading poetry, songs, essays, and novels from Jamaica, Suriname, Cuba, Antigua, Haiti, Curaçao, Martinique, and Trinidad, the course will focus both on how ideas of race, gender, and sexuality are colonially constructed in specific times and places; and on how these constructions can be re-thought and re-worked to imagine gender and sexual transgression as postcolonial praxes.

Women, Gender & Sexuality 1412 Section: 01

The Volatile Veil: Gender, Sexuality, and Islam (205056)

Afsaneh Najmabadi

2018 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Muslim women's public veiling has become a volatile symbol: a sign of solidarity, an embodiment of Muslim women's oppression, a target of states' regulations, and of public harassment. This course will begin with some contemporary manifestations of these issues, here in the US, in Europe, and in the Middle East and North Africa. It will then move back into history of the present, in order to trace some of these meanings, in their emergence at different moments, and consider their distinct political work in various historical contexts. These journeys will include women's voices – from those who practice veiling, and those who do not.

Women, Gender & Sexuality 1430

Gender, Sexuality, and the Archive (208059)

Robert Reid-Pharr

2019 Spring (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This seminar revisits and re-envisions the archive by questioning the many ways in which traditional archives (libraries; research collections; museums; canons) exclude and discipline women, people of color, and LGBTQ communities. Exploring a range of innovative archival methods, we will read authors such as Saidiya Hartman, Stephanie Smallwood, Jennifer Morgan, Antoinette Burton, Deidre Cooper Owens, Marisa Fuentes, Tina Campt, C. Riley Snorton, and Katherine McKittrick, who propose both new conceptions of "the archive" and new archival practices in relation to issues surrounding race, ethnicity, gender, and sexuality. Seminar participants will explore key archival holdings at Harvard while initiating an archive-based research project of their own.

Women, Gender & Sexuality 1443

Sex Education: Politics, Policy, and the Production of Knowledge (207783)

Keridwen Luis

2018 Fall (4 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course covers the history of sexual education in the U.S. and Global North, the conflation of abstinence and virginity (and the Western history of virginity), the way sex education is used to teach particular gender roles, sex education for those who are categorized as disabled (with an introduction to disability studies), abstinence-only and abstinence-first education and its impact on queer, trans, and intersex teens (with an introduction to queer studies), sex education and consent, sexual assault and teaching about dealing with sexual assault, and, of course, the complex politics of sex education. We will look at research on sexual education in the United States, Canada, the U.K., Australia, and New Zealand, and consider how politics help shape sexual education and education as a whole. And, of course, we will look at the impact of feminism, gay liberation, AIDS, and other social movements on sex education and "social hygiene." We will also review selected materials from Global South regions and their experiences with sexual education, and consider the intersections between sex education and colonialism.

Course Notes:

Because of the use of explicit sexual materials (we will be reviewing sexual education curricula), students must be 18 or older to take this course.

Women, Gender & Sexuality 1465

The Gender of Celebrity (207784)

Robert Reid-Pharr

2018 Fall (4 Credits)

Schedule:

T 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course tracks the ways that celebrity, especially literary celebrity, has developed in the United States since the Second World War as well as the ways in which the basic ideological structures of celebrity are structured by ideologies of race, class, and gender. Celebrities stand in for the hotly contested ideological and social arrangements that allow for the maintenance and reproduction of a common American society. At the same time, part of the strength of celebrity status is that it seems innocuous, inert, and distinct from pressing matters of politics and society. In addition to key theorists of celebrity (Frantz Fanon, Pierre Bourdieu, David Marshall) we will look at important treatments of individual celebrities (Anne Cheng on Josephine Baker, Michelle Stephens on Paul Robeson, Norman Mailer on Marilyn Monroe).

Women, Gender & Sexuality 2000

Introduction to WGS: Graduate Proseminar (122276)

Alice Jardine

2019 Spring (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course offers an introduction to theoretical themes in the study of women, gender, and sexuality. Special attention is given to recent critical debates that have (re)energized the field and that cross disciplinary boundaries. The course also addresses matters of professional development.

Course Notes:

Will count as the Graduate Proseminar for the PhD secondary field requirement in WGS.

Advanced undergraduates may enroll with instructor permission.

Women, Gender & Sexuality 2050

"Ain't I a Wo/man?": Gender and Sexuality in the Caribbean and the African Americas (207923)

Natasha Tinsley

2018 Fall (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

When Sojourner Truth asked her famous question "Ain't I a woman?," she not only offered an incisive critique of chattel slavery's system of enforced labor. She opened an insightful line of commentary about the nature of African experience in diaspora and under colonialism. Namely: when and where people of African descent enter diasporic societies, we challenge their dominant formulations of gender and sexuality. These challenges can be (simultaneously or not) acts of domination and/or resistance, injury and/or creativity, subjugation and/or pleasure. In this course, we interrogate and explore a variety of challenging formulations of gender and sexuality throughout the African Americas. The texts we engage speak to black historical and contemporary genders and sexualities in the Caribbean, South America, and North America, and are framed through disciplines including anthropology, literature, literary criticism, history, feminist studies, queer studies, cultural studies, and sociology. Through our engagements, we will explore creative answers not only to Truth's question, but to our own queries about what black genders and sexualities can and cannot, will and will not mean.
