Rationality: Talking Points (214586)

Steven Pinker

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Rationality is in the news, as we struggle to understand how an era with unpreceded scientific sophistication could harbor "post-truth" rhetoric, and it has long been a foundational topic in psychology, philosophy, economics, mathematics, and government. This graduate companion course to GENED 1066 Rationality explores the theories and controversies in greater depth, including the nature and psychology of rationality, and applications including crime, sports, medicine, climate, journalism, policy, and philanthropy, with a focus on effective altruism.

Course Notes: **Enrollment is limited to teaching fellows for GENED 1066 Rationality and graduate students who have obtained the permission of the instructor.**

Religion, The Study of

Subject: Religion

Religion 14 Section: 01

Studying Religion and Media (207022)

Helen Hardacre

2020 Spring (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In contemporary society, most people probably derive most of their knowledge about religion (their own and other people's) from media. Our dependence on media for information about religion creates a need to become critical consumers and to understand how that information is produced. Media deliver information on all topics, not just religion, as commercialized products created in corporate organizations that must be responsible to stockholders and responsive to consumers. Media corporations distinguish themselves for consumers in part through political stances and alliances constituting one aspect of corporate "branding." Thus, a variety of political affiliations color media products, including those concerning religion. The intensification of media's partisanship is associated with social polarization and a perverse disregard for truth, "disinformation campaigns," and "fake news" on a range of topics, including religion. Within the contemporary "media mix," online media and social media constitute a particular challenge to corporate media, since individual users can proliferate information and interpretations concerning their subjects and thus challenge the authority of the corporations. How these new media treatments of religion will develop is a question of great interest. Course readings, in-class activities, and written assignments seek to develop greater critical, interpretive skill in assessing the treatment of religion in the media.

Religion 22

Interpreting Humanity, Interpreting Religion (208140)

Nicholas Boylston

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is a gateway to the Study of Religion, presented against the backdrop of a larger question: What is the purpose of the humanities in the 21st century?

Based on the premise that solely Eurocentric approaches to what it means to be human are shortsighted at best, we seek to think through new ways of engaging with global sources that shed light on our common humanity. The course develops around a critical engagement with the concept 'transcendence', which will help us to approach alternative worldviews without eliminating difference.

After thinking about the stakes involved in cultivating the life of the mind in a crisis point for human existence, we begin with an extended reflection on the intellectual and cultural moment in which we find ourselves, investigating how this conditions the way we frame questions of what it means to be human.

Next, we take an honest look at the ways in which the dominant modes of knowledge and culture in the North Atlantic have been responsible for cultural, material and epistemic violence. Our exploration of diverse approaches to the human condition begins here, as we think through a range of responses to human-caused suffering. We then approach a range of questions of universal concern: What is ultimately real and how do we know what we know? What is the good, and how is it to be attained? How are we to relate to our fellow human beings, particularly when they seem deeply antagonistic?

This course is designed for freshmen and sophomores who are interested in exploring a vocation in the humanities. Throughout we will draw out the implications of the readings for our own intellectual and practical lives. Readings will include primary texts in translation drawn from traditions across the globe, as well as selected secondary literature.

Incarnation and Desire (107859)

Courtney Lamberth

2020 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The course offers an introduction to Christian thought by considering major texts, figures and ideas from the first century to the present in their changing cultural contexts. Central themes include the categories of body, flesh and soul; free will, desire and sin in relation to divine grace; and the meaning of incarnation. Texts include canonical and non-canonical early Christian literatures, Patristic and medieval texts, Reformation theologies, as well as modern and contemporary authors. Students will develop a sense of the distinguishing features of the Christian world view, while gaining an appreciation for the significant diversity across the tradition

Religion 55 Section: 01

Denying and Defending God: Classic Texts of Modern Western Religious Thought (125125)

Charles Lockwood

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Drawing on thinkers from the nineteenth and twentieth centuries, this course considers questions that continue to shape modern Western religious reflection: Is religion a liberating force or one of

oppression? Is religion rational or the antithesis of reason? What is the relationship between religion and morality? Can all human beings be called religious? Texts are drawn from Kant, Schleiermacher, Feuerbach, Marx, Kierkegaard, Nietzsche, Barth, Tillich, King, Cone, Gutiérrez, Daly, and Williams. Special attention will be given to the rise of the modern category of religion, especially in relation to Christian theology; modern suspicion and critique of religion; and the transformation of European theological frameworks by liberation theologians in North and South America.

Forgiveness (215765)

Matthew Potts

2020 Spring (4 Credits) **Schedule:** W 0300 PM - 0600 PM

Instructor Permissions: None **Enrollment Cap:** n/a

When, if ever, are we obliged to forgive? What should forgiveness look like in the aftermath of violence? What conditions should be attached to its offer? Does forgiveness foster peace at the expense of justice? Should it? This course will examine the complicated problem of forgiveness through an examination of several diverse sources: theological, philosophical, and literary. The aim will be to develop a sophisticated understanding of the promise and problems of forgiveness in human lives, and to foster the critical application of such lessons to contemporary contexts and moral problems.

Sacrifice: Theory and Praxis (112438)

Kimberley Patton

2019 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A comparative examination of the paradoxical ritual of sacrifice in a range of religious traditions where it is featured, rejected, or sublimated. We will consider types of sacrifice, blood- and bloodless offerings, and recurrent religious concepts: e.g., cosmogony, consecration, thanksgiving, communion, reciprocity, substitution, efficacy, violence, transgression, expiation, catharsis, human and divine hierarchy, and sacerdotal authority. We will also study important theories of sacrifice. Students will be encouraged to develop their own research and understanding.

Thinking Theologically in an Interreligious Perspective (126792)

Francis Clooney

2020 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course examines the processes by which we learn interreligiously, by faith seeking understanding across religious boundaries. The goal is to bring this learning into dialogue with one's home tradition, by careful comparison and contrast, dialogical reflection and, ideally, a well-informed theological understanding of what it means to belong to one tradition and learn from another. Readings include (by way of a necessary example) Hindu and Christian primary and secondary texts, but students are encouraged to bring their knowledge of and interest in other traditions into the discussion, and may write one of two course papers on traditions other than the Hindu and Christian. Jointly offered with the Divinity School as HDS 3101.

Course Notes: **Offered jointly as HDS 3101**

Recommended Prep: **Prior knowledge of either tradition, though desirable, is not required.**

Introduction to Religion and Ecology (109574)

Dan McKanan

2020 Spring (4 Credits) **Schedule:** W 0100 PM - 0300 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will explore the intersection between religious traditions and ecological activism, with special attention to current conversations about "ethical eating." We will consider both the resources that religious traditions provide to ecological activists and the ways these activists have challenges aspects of traditional religion. The course will also function as a general introduction to the multiple ways of knowing that comprise the scholarly study of religion, with attention to scriptural interpretation, history, ethnography, theology, ethics, and comparative studies. It will feature several field trips to spiritually inspired farms, communities, and organizations. Jointly offered in the Harvard Divinity School as HDS 2798.

Course Notes: **Offered jointly with the Divinity School as 2798.**
Course had field trips to be arranged.

Hindu Goddesses and the Virgin Mary (124707)

Francis Clooney

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores gender and divinity by reading hymns praising Hindu goddesses Sri Laksmi, the great Goddess (Devi), the Tamil Apirami, and Bengalâ€™s Kali, while asking how feminine divinity is constructed in an environment where gods and goddesses flourish. The course at the same time explores the cult of the Virgin Mary, theologically, historically, through key texts. This approach is sharpened by some attention to performative, social, visual dimensions, and through contemporary feminist and theological insights. Not a survey, but an in-depth introduction.

Course Notes: **Offered jointly with the Divinity School as 3760.**

Introduction to the Upanisads (121296)

Francis Clooney

2019 Fall (4 Credits) **Schedule:** T 0300 PM - 0600 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This seminar introduces the ancient Indian Upanisads, some of the oldest and most famous primary texts of Vedic and Hindu India, ranging from before 700 BCE to 200 BCE and later. Select later Upanisads too will be considered, and the reception of the Upanisads in the Advaita Vedanta tradition. Topics include: the nature of self and of absolute reality; knowledge as transformative; the limits of language; the role of God in a nondualist worldview; meditation practice; death and rebirth; knowledge and ethics. Texts will be read in translation. No language or course prerequisites, but students will be encouraged to make use of any such expertise.

Course Notes: **Offered jointly with the Divinity School as 3919.**

Encountering Motherhood: Sacred Histories (211228)

Kimberley Patton

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

Childbearing, pregnancy, and motherhood, and the uncanny bond between mother and child have been focal themes in the history of human religiosity since the Paleolithic period. This seminar considers the complex subject of motherhood through case studies in religion, ritual, and the archaeology of ideas from Neolithic Anatolia, Ancient Greece, Eastern Christian and Buddhist traditions, and Finnish epic. We will also read contemporary analytical works in religion, sociology, anthropology, art history, and literature. Limited to 15 by application in person at the first meeting. Jointly offered with Harvard Divinity School as HDS 3121.

Gender and Judaism in Modern America (214625)

Ann Braude

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0530 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Both demographic and cultural reproduction pose critical challenges to minority religions, placing pressure on personal decisions, group dynamics, religious practices, and intergroup relations. This course follows the navigation of these pressures by American Jews, and explores the formations of gender and sexuality that result. Topics include marriage, dating and family formation, synagogue life and Jewish ritual, as well as social and political movements that have become vehicles of American Jewish identity: civil rights, second-wave feminism, and Zionism. Readings include works by Riv-Ellen Prell, Lynn Davidman, Joyce Antler and Sarah Imhoff as well as fiction by Philip Roth and Anita Diamant. Jointly offered with Harvard Divinity School as HDS 2050.

Archaeology and History of Israel/Palestine from the Second Temple to the Early Islamic Period (214627)

Giovanni Bazzana

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

The course will focus on the history of Israel/Palestine in the span of time of almost a millennium that witnessed the emergence of Judaism, Christianity, and Islam. Specific attention will be devoted to the changing landscape of the region and, by way of case studies, to archaeological excavations as evidence for cultural, religious, and socio-economic trajectories. The study of history and archaeology will be connected with the current religious and political situation of the region in order to highlight the ways in which the memory of the past shapes the present and is in turn shaped by present ideological concerns.

Course Notes: **Participation in the course includes participation to a three-weeks trip to Israel/Palestine that will take place in May before graduation and will include a week of excavation on the Magdala site.**

The Odyssey: Memory and Metaphor (213284)

Kimberley Patton

2019 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course journeys with the Odyssey as an oral, then later written epic of the ancient Mediterranean—part of a wider tradition of marine wondertales of conquest and quest—with an afterlife of millennia in theology, literature, art, psychology and film. We will consider archaeological, artistic, and literary evidence bearing on this iconic story, a touchstone of classical antiquity that still resonates as metaphor and symbol for the ordeal of homecoming.

Class Notes: **Jointly offered with HDS 3072.**

The Protestant Reformations (205627)

Michelle Sanchez

2020 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The sixteenth century saw turmoil and rapid change in and beyond Europe: religious fragmentation, but also rising colonization, class warfare, new media, and the seeds of absolutism and nationalism. This course examines major movements of Protestant Reform, focusing on the role of theological arguments in reshaping concepts of power and representation. Why were certain reforms persuasive, and to whom? What were their political and social implications—not only for clergy, princes, and merchant-class men, but also peasants, women, Jews, Muslims, intellectuals, and artists? Finally, we will read these histories alongside our present, in which media-driven crisis has become the norm.

Evangelicalism in America (156250)

Catherine Brekus

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course focuses on the American evangelical movement from the 1740s to the present. Beginning with the rise of transatlantic evangelicalism in the eighteenth century, we will explore the role of evangelicals in the American Revolution, the revivals of the Second Great Awakening, the crisis caused by slavery, the Fundamentalist-Modernist controversy in the early twentieth century, the emergence of Pentecostalism and the Charismatic Movement, the controversies created by neo-evangelicalism in the 1940s, the relationship between evangelicalism and the civil rights movement, the political activism of the Christian Right, and contemporary evangelical attitudes toward gender and sexuality. Readings will introduce students to both evangelical ideas and practices. Throughout the course, we will focus on the historical development of evangelicalism and the relationship between evangelicals and American culture.

Calvin, Schleiermacher, Barth, Cone (205628)

Michelle Sanchez

2020 Spring (4 Credits) **Schedule:** T 1200 PM - 0300 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

John Calvin, Friedrich Schleiermacher and Karl Barth are major figures of Reformed Protestantism whose work directly engaged the political and intellectual concerns of their own times. In the 1970s, James Cone's Black Theology took its point of departure, in part, from Cone's critique of Barth. This course will closely read each author, looking at similarities and differences in how they approach theological topics (e.g., God, human being, scripture, nature, salvation, church). Throughout, we will consider what these four projects can teach us both about the "tradition" of Reformed theology and the task and responsibility of theology more generally. Jointly offered the Divinity School as HDS 2278.

The Holocaust and the Churches, 1933-45 (124910)

Kevin Madigan

2020 Spring (4 Credits) **Schedule:** F 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce students to the critical use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude with an assessment of the role played by the Holocaust in today's world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

Theologies of Universal Salvation (214609)

Dan McKanan

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0600 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In honor of the 250th anniversary of John Murray's arrival in North America, this course will explore a wide range of Universalist theologies, from within and beyond the Universalist denomination. We will consider ancient and early modern articulations of the idea of universal salvation (Origen, Gerard Winstanley, Jane Lead, Paul Siegvolck, George de Benneville); the defining theologies of denominational Universalism (James Relly, Elhanan Winchester, John Murray, Judith Sargent Murray, Hosea Ballou); nineteenth century debates about ultra universalism and spiritualism; twentieth century attempts to redefine Universalism in a post-Christian context; and recent explorations of the possibility of universal salvation by Roman Catholic and evangelical theologians. In addition to weekly class sessions, the course will include approximately four public events at Massachusetts locations important to the history of Universalism.

Love, Sanctity and Authority: An Introduction to Shii Islam (207015)

Nicholas Boylston

2019 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Though they are minority traditions often overlooked in the academy, the major branches of Shii Islam (Twelver, Ismaili and Zaydi) provide a valuable entry point into the study of those aspects of the Islamic tradition that are most constitutive and most contested. After examining the historical contexts in which these three branches arose, the course will address Shia theologies, rituals, law, spiritualities and notions of authority, comparing views across the three branches and highlighting their internal differences through history. We will inquire into what, if anything, unites the concerns of each branch, focusing on conceptions of Imamate and the central concept of wilāya/walāya, which means love, political and spiritual authority, filiation, sanctity, and proximity to God. In the final unit of the course we will examine the emergence of modern Shii social configurations and state building and their relationships to the doctrines and practices discussed throughout the class, focusing on Twelver Iran and Zaydi Yemen.

Additional hour to be arranged.

The Politics of Storytelling (109925)

Michael Jackson

2019 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course addresses Hannah Arendt's thesis that storytelling is a critical strategy for bridging the gap between private and public realms. Storytelling is thus understood as a mode of social and political activity that involves a struggle between personal and collective representations of the "truth" and between unofficial and official versions of events. Through the close analysis of storytelling in a variety of situations, we will explore the ways in which the meaning of stories resides not in any ahistorical essence or internal logic, but emerges from the everyday human struggle to strike a balance between domains of experience that are, on the one hand, felt to belong to oneself or one's own kind, and, on the other, felt to be shared by or to belong to others.

God and Modern Writing 1 (156093)

Mark Jordan

2019 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Whatever else the word "modern" means, it has named a crisis in European and American styles or forms—a crisis of inheritance for traditional forms, a crisis of confidence about form as such. Histories of modern arts or literatures tell familiar stories about how the crisis played itself out by defacing the old or improvising the new. It is not so obvious what story could be told about modern Christian theology. Indeed, it may not be clear how much modern theology there has been in this sense—namely, theology written as deliberate response to a cultural crisis of forms.

This course will pose the question, what modernity means for writing about God up through the second

'World War.' It will look within and beyond theology's academic boundaries to a selection of formally deliberate texts in a variety of genres. These texts will include among others works by Soren Kierkegaard, Friedrich Nietzsche, Karl Barth, Djuna Barnes, Simone Weil, and Walter Benjamin. The choice of texts is only a selection, not a survey. Its aim is not to judge everything that has been written so much as to find help for what might yet be written.

Course Notes: **Offered jointly with the Divinity School as 2374.**

Aquinas: Incarnation, Narration, Sacrament (156091)

Mark Jordan

2019 Fall (4 Credits) **Schedule:** M 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

At the center of the *Summa of Theology*, the reader finds a broad analysis of the motives and purposes of human action. But the analysis remains incomplete until Thomas takes up the incarnation, narrated life, and memorial sacraments of the Christ. Incarnation is the pedagogical principle that makes moral formation possible. It also justifies the teaching of Christian theology, not least in a *summa*. This course will read selected questions from Thomas's *Summa*. It will seek to understand the logic of divine teaching that explains God's choice to become incarnate, the events of Jesus's life, and the legacy of sacramental scenes of instruction. It will then ask how this logic was already at work in Thomas's description of moral life, perhaps especially in his treatments of the passions, the succession of laws, and vocation to a way of life.

Coloniality, Race and Catastrophe (213294)

Mayra Rivera

2019 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores the relationship between coloniality, race and ecology through the lens of "catastrophe." We will examine a variety of theoretical sources that deploy or refute tropes of the "end of the world". We will study different uses of "catastrophe"—to denounce the destruction of a particular world, re-imagine the past, or proclaim the impossibilities of the present. Through the readings and discussions, we will analyze the aims, effectiveness and limitations of talk of catastrophe in the contemporary context.

Women, Religion, and the Problem of Historical Agency (113871)

Catherine Brekus

2020 Spring (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course examines recent scholarship on women in American religious history, focusing particularly on questions of narration, agency and power. We will ask several interrelated questions: How have historians integrated women into narratives of American religious history? Whose stories have they highlighted, and why? How have they conceptualized women as historical agents? We will read major interpretive works as well as theoretical accounts of gender, social structure, and power. Readings will explore the diversity of religious traditions in America, including Puritanism, Judaism, Mormonism, Catholicism, African-American Christianity, evangelicalism, and Islam. Jointly offered in the Divinity School as HDS 2186

Buddhist Studies Seminar: The History of South Asian Buddhist Texts (118741)

Janet Gyatso

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This is a seminar for doctoral students planning to take generals exams in Buddhist Studies as well as for advanced masters students in the field. It will study the history of Sanskrit and Pali canonical and extra-canonical literature and their commentaries, translations, "canons," and major schools of interpretation. Foundational modern secondary scholarship will be considered as well, along with the state-of-the-art critical apparatus for Buddhist Studies. Prerequisite: Advanced background in Buddhist Studies and consent of instructor. Jointly offered with Harvard Divinity School as HDS3888.

Course Notes: **May be repeated for credit. Offered jointly with the Divinity School as 3888.**

Recommended Prep: **Advanced knowledge in Buddhist Studies.**
Knowledge of at least one classical Asian language.

Ethnographic Methods in the Study of Religion (215754)

Michael Jackson

2020 Spring (4 Credits) **Schedule:** T 0900 AM - 1100 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course provides a general introduction to ethnography - an approach to understanding life-worlds through a double perspective in which active participation and immersion (with a goal of seeing the world from another's point of view) is coupled with systematic observation and documentation (recording life-stories, filming critical or ritual events, and keeping fieldwork journals). Rather than reduce ethnographic practice to scientific protocols for data-gathering, we will approach it by reflecting on the shared elements of our humanity (sensus communis) that make it possible to interact with, understand, and write about others empathically, insightfully, and ethically. Accordingly, this course will not rely on textbooks in ethnographic method, but on readings and films that actually show ethnographers in the field and afford us glimpses into some of the research strategies, vital relationships, emotional stresses, and moral dilemmas associated with doing fieldwork 'outside our comfort zones'. We will also explore the tension between studying others contextually rather than through texts, and ask how first-hand experience of life-as-lived can be reconciled with the demands of theory-building and knowledge production in the academy.

Seminar for Advanced New Testament and Religions of the Ancient Mediterranean (213513)

Giovanni Bazzana

2019 Fall (2 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This graduate seminar will focus on current discussions within the study of Religions of the Ancient Mediterranean. The main goal is to prepare students to be aware of and to participate in ongoing conversations on current topics in the field, such as, for example, the relationship between formative Judaism and Christianity, the role of race in ancient religions, the transmission of ancient religious books, or the methodological challenge of combining textual and non-textual types of evidence in the study of ancient religions. The participants will be asked to read extensively in scholarly literature published over the last 4 or 5 years, present often to the class, and practice on genres relevant for academic work (such as book reviews, syllabi, annotated bibliographies, and so on). Participation in the seminar is encouraged for those thinking about academic work and for those interested in deepening their familiarity with the fields of New Testament studies and/or Religions of the Ancient Mediterranean. A basic acquaintance with the fields is required. Jointly offered with Harvard Divinity School as HDS 1981.

Romance Languages and Literatures

Subject: French

French 10

Beginning French I: Cross-Cultural Encounters in French (126933)

Nicole Mills

2019 Fall (4 Credits) **Schedule:** MTWR 0900 AM - 1000 AM

Instructor Permissions: Instructor **Enrollment Cap:** 17

This beginning French course addresses the theme of cross-cultural encounters in French through engagement in the discussion and interpretation of texts, art, images, and film. You will gain an introduction to the French language with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. You will engage in interactive communicative activities, both online and in the classroom, that provide rich exposure to the French language and francophone culture(s).

Course Notes: **French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students at GSAS may take the course Sat/Unsat with permission of course head. French 10 is taught by members of the Department.**

Beginning French II: Paris in Virtual Reality (126935)

Nicole Mills

2020 Spring (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In the second course in the Beginning French sequence, you will engage in a virtual simulation of life in the 11e arrondissement of Paris. Through virtual reality experiences, interactions with native speakers, and the exploration of photos, art, and film, you will gain a more developed understanding of the diversity of Parisian life. You will actively engage in oral and written communication in the past, present, and future and will learn to make suggestions, narrate in the past, express emotions and opinions, extend invitations, and convey hypothetical situations contextualized within themes associated to Parisian life. Topics explored in the class include architecture, art, music, and graffiti in the various Parisian quarters, and current events such as the yellow vest movement.

Course Notes: **French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students at the GSAS may take the course Sat/Unsat with the permission of course head. This course is taught by members of the Department.**

Recommended Prep: **Completion of French Aa/10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.**

Intensive Beginning French: Parisian Culture & Life (124332)

Nicole Mills

2020 Spring (8 Credits) **Schedule:** MTWRF 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This intensive Beginning French course provides an accelerated introduction to Beginning French with intensive work on interpersonal communication and interpreting and producing language in written and oral forms. Students explore diverse facets of Parisian life through the interpretation and exploration of photos, art, and film and through interactions with native French speakers. Students learn to speak and write in the past, present, and future, make descriptions, ask questions, make comparisons, accept and refuse invitations, give advice, and express hypothetical situations, emotions, and opinions.

Course Notes: **May not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the French 15 course head and receive permission to enroll in the course.**

This course is taught by members of the Department.

Recommended Prep: **An advanced knowledge of at least one foreign language, preferably a**

modern Romance language, but no previous study of French.

French 16

Reading, Understanding and Translating Written French for Research (111933)

Nicole Mills

2019 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

French 16 offers an introduction to reading and translating academic French texts for students who require a basic knowledge of French for research purposes. The course presents vocabulary and the principal structures of French grammar in a systematic and coherent order. The course begins with simple texts and advertisements, then moves to academic texts with more complex structures, and ends with the translation

and analysis of literary works and philosophical texts. The assignments are discipline-specific to accommodate students' research needs.

Course Notes: **Conducted in English. Not open to students with a score of 500 or above on the Harvard Placement Test or the SAT II French test, to those with more than one year of undergraduate French, or to auditors. May not be used to fulfill the language requirement and may not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.**

Recommended Prep: **Some previous study of a Romance language helpful but not necessary. Fluency in English required.**

French 20

Intermediate French: Francophone Cultures in Cambridge and Beyond (126938)

Karen Turman

2019 Fall (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

In this intermediate-level language course, you will review your knowledge of various grammatical structures by exploring cultural topics such as music, dance, and cuisine in French-speaking communities in Cambridge and abroad. Themes such as family life in West Africa, immigration in Haiti, and cuisine in Morocco will be broached through communicative activities to further develop proficiency in reading, listening, speaking, and writing. You will discover francophone cultures through conversations with online language partners abroad and French-speaking community members in Cambridge. Course assignments include creative writing compositions, presentations, video projects, online conversations, and off-campus cultural excursions.

Course Notes: **Conducted in French. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.**

This course is taught by members of the Department.

Class Notes: **This course requires an average of four contact hours per week. To supplement the scheduled 3.75 hours, a 30-minute online component will be arranged every other week. To this end, students will be required to purchase an access code for the online conversation program, Talk Abroad ($40-50).**

Recommended Prep: **A score no lower than 451 and no higher than 600 on the SAT II test or the Harvard Placement Test; 3 years of French in high school; French 11 or 15; or permission of course head.**

Additional Course Attributes:

Advanced French I: The Contemporary Francophone World Through Cinema (126997)

Ericka Knudson

2019 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

In this advanced French language and culture course, you will explore francophone culture(s) through contemporary films. The course is designed to strengthen language proficiency, explore different registers of language, and further refine your grammatical understanding while offering an introduction to film analysis. You will explore themes such as regional differences, Paris and the banlieue, immigration, post-colonialism, cinematic self-portraits, and gender through readings such as film reviews, interviews with directors, and script excerpts. Creative assignments include interactive writing assignments, short compositions, scripts, and a short film. No previous familiarity with film study is necessary.

Course Notes: **Conducted in French. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.**

Recommended Prep: **French 30, 681-720 on the SAT II test or the Harvard Placement test; or permission of course head.**

Advanced French II: Écrivons droit(s)/ Writing Right(s): Justice, Equity, Rights, and Writing (126998)

Karen Turman

2020 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Through the lens of social justice issues in France and the Francophone world, this class will focus on writing as a means of civic engagement. You will interrogate topics such as colonialism, islamophobia, immigration, and sexism by studying a range of creative, analytical, and polemical texts, images, and film. This course builds on the communicative competence acquired in French 40, with a particular emphasis on developing your writing proficiency. In addition to creative and analytical writing projects such as description, portrait, film review, and polemical essays, you will also engage with the local Francophone community through an intercultural exchange off-campus.

Course Notes: **Conducted in French. Students may take no more than two courses numbered in the 50s. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.**

Class Notes: **This course requires an average of four contact hours per week. To supplement the scheduled 2.5 hours, a supplementary online component will be arranged each week. To this end, students will be**

required to purchase an access code for the online conversation program, Talk Abroad ($40-50).

The New Wave: Reinventing French Cinema (109320)

Ericka Knudson

2019 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This advanced language and culture course explores a unique perspective on French society and culture through New Wave films from the late 1950s and 1960s. Following weekly film screenings, you will engage in interactive discussions and debates on topics associated with gender, aesthetics, and literary influences. You will interpret and analyze different registers of language in film scripts and literary texts and further develop your writing proficiency for academic contexts through written film analysis (begun in French 40) and theoretical papers designed to prepare you for 70-100 level courses. For the final project, you will write a film script and develop it into a short film that will be showcased in a class film screening.

Course Notes: **Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than two courses at the 60-level.**

Recommended Prep: **French 50 or another French course at the 50-level; 751-780 on the SAT II or the Harvard placement test; or permission of the course head.**

Modern Stories about Paris (116673)

Ericka Knudson

2020 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This advanced language and culture course examines modern narratives, in a mosaic of perspectives, set in and around Paris. Through the interpretation and analysis of texts, films, songs, and interviews, as well as interactive discussions with guest speakers from Paris, you will discover diverse stories about the Parisian experience. By reading and listening to these stories, you will gain insight into various forms of narration and refine your knowledge of written and spoken French grammar and vocabulary. The course

will focus on typical gaps found in advanced learners' linguistic repertoires, such as contemporary slang, and refine your ability to distinguish different registers of language. Course assignments include creative writing compositions and a final project that will solidify your ability to imagine, summarize, interpret, critique, and substantiate arguments about the Parisian experience.

Course Notes: **Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than two courses at the 60 level.**

Recommended Prep: **French 50 or another French course at the 50 level; 751-780 on the SAT II or the Harvard placement test; or permission of course head.**

Exploring French Language and Culture Through Industry: Fashion, Cabarets, and les Grands Magasins (148202)

Karen Turman

2020 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

***NEW CONTENT* In this advanced French language and culture course, you will refine your communicative competence by navigating the cultural landscape of French industry. Through the analysis of articles, images, literary texts and discussions with classmates and invited guest speakers, you will explore topics such as the invention of the department store in Paris and the commercialization of art and entertainment in Montmartre during the Industrial Revolution. Course assignments include weekly essays, in-class debates, exams, an oral presentation, and a final project.**

Course Notes: **Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details and section on-line on the French 61N website.**

Recommended Prep: **A score of 721-750 on the SAT II test or the Harvard Placement test; French 40 or 50; or permission of course head.**

Experiments in Justice, Gender, and Genre: Introduction to 19th - 21st Century French Literature (119121)

Kathy Richman

2019 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Gender identity and expectations; prison reform and the death penalty; personal accountability and protest; new media and modes of expression. Writers in the 19th and 20th centuries grappled with these questions as we do today. How do their sometimes revolutionary, sometimes surprisingly familiar approaches overlap with movements like Romanticism, Realism, Existentialism, and other new forms of fiction? We will explore short works by Sand, Hugo, Balzac, and Zola; poetry by Baudelaire; drama by Camus; a novel by Colette; a graphic novel by Fres; and films by Berri and Tavernier.

Course Notes: **Conducted in French.**

Recommended Prep: **A 50- or 60-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.**

French Theater across Time: An Introduction to Performance (109826)

Sylvaine Guyot

2019 Fall (4 Credits) **Schedule:** T 1030 AM - 1145 AM
R 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Aims to help students, including those who are genuine novices in acting, to understand and experience theater as a form of physical expression that evolve as aesthetic and ideological contexts change across time. Readings include the most famous French playwrights of both the early modern age (Molière, Corneille, Racine) and the later 20th / early 21st centuries. We explore how theater is used to interrogate questions such as sexual taboos, social injustices, or political engagement. Special emphasis paid to the power of performance through practical workshops and videos of recent productions. The final project consists of an excerpt to be performed in French.

Course Notes: **Conducted in French. May not be taken for credit by students who have previously taken French 71a or FRSEMR 30r.**

Recommended Prep: **A 60- or 70-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.**

"It's the end of the world as we know it, and I feel…": Apocalyptic and Dystopian French Fiction (213685)

Annabel Kim

2020 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The French novelist Stendhal once described the novel as "un miroir qu'on promène le long d'un chemin," a mirror we carry along the road. This course examines apocalyptic and dystopian French novels in order to explore what sort of reflection of reality such narratives of catastrophe, corruption, destruction, and dysfunction reveal to us. What are the political and literary stakes of writing the end of the world as we know it? What does it mean to be human at a moment in history where we are constantly poised at the edge of the end of humanity? What can and does literature do for us? Readings include Darrieussecq, Despentes, Garréta, Volodine.

Course Notes: **Conducted in French.**

French 144

Humanimals in Medieval French Literature (203310)

Virginie Greene

2020 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Animals are everywhere in medieval literature. We find horses and dogs in epic and courtly romances, birds in love poetry, pigs, cows, sheeps and chickens in fabliaux, lions and eagles in fables, Renard the fox in his own romance, unicorns, phenix and yales (yes, yales…) in bestiaries, and the human animal in all the above mentioned. Using texts by Aristotle and medieval theologians and philosophers, we will examine the unstable distinction between human and animal, their frequent fusion and confusion, their relationship, and

their coexistence.

Course Notes: **The course will be taught in modern French or English depending on linguistic aptitudes of those enrolled. The texts will be made available in Old or Middle French with a modern French translation. No knowledge of the Middle Ages is necessary to take this course, but reading knowledge of modern French is necessary.**

The Novel after the New Novel (203385)

Annabel Kim

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A survey of the contemporary French novel, defined loosely as the novel after the New Novel, viewed by some as the last avant-garde literary movement in France. We will begin with the New Novel and move chronologically through to the present, reading authors from a period—the contemporary—whose canon is in the process of being formed. Readings will include Carrère, Chevillard, Darrieussecq, Echenoz, Ernaux, Pireyre, Volodine.

Course Notes: **Conducted in French.**

Mediterranean Crossings: Exiles, Migrants and Refugees (156589)

Verena Conley

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The Mediterranean has long been the locus of a turbulent history and of vast population movements. This course will focus specifically on the period since the middle of the twentieth century, that is, since decolonization in North Africa and the Middle East. Civil wars, political strife and economic hardship push many into voluntary, forced or even metaphoric exile, lead to massive migrations and produce refugees in record numbers. This course will study some of these movements with a triple focus on exiles, migrants and refugees, as seen through literary works and film. We will ask what artistic practices contribute and how they mediate these contexts.

"The Words to Say It": Women Writing in French from Colette to Satrapi (126038)

Alice Jardine

2019 Fall (4 Credits) **Schedule:** M 1200 PM - 0200 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Motherhood, romantic love, independence, sexuality, citizenship, fantasy, death: these are just some of the themes explored in women's novels, written in French, in the twentieth century. We will read eight novels together, exploring how they have finally become classics, even given what they say about life and what it means for women to write about it.

Urban Cannibals: Les Mystères de Paris (205163)

Janet Beizer

2020 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Les Mystères de Paris, Eugène Sue's serialized novel of 1842-43, was one of the earliest French novels to focus on the working classes, and became an instant cross-cultural and international hit. It has not ceased to generate debate: around its project (simple potboiler or serious social reform?), its narrative aesthetics (crazy criss-crossed plotlines or proto-modernist collage?) and its ambiguous discursive strategies (populist and elitist, reformist and nationalist, abolitionist and racist, progressive and eugenic). We'll explore both the internal microcosm of the novel and the radiating external worlds it pulls into its pages

from France in the world, circa 1840. Each student will choose a research project spinning out from the novel (prisons, markets, hunger, cannibalism, social services, journalism, poverty, criminality, crowds, slavery, reform, revolution, class conflict, imperialism, charity, urban/pastoral, etc.)

Selected readings from Saint-Simon, Fourier, Le Bon, Nordau, Charcot, Lombroso, Marx, and Sue's own maritime tales, from the nineteenth century, and the more recent work of Louis Chevalier, Dominic Kalifa, Kaja Silverman, Alex Woloch, and others.

Class Notes: **Class will be taught in English; most readings in French.**

Transnationalism and the Francophone World: Race, Gender, Sexuality (161257)

Francoise Lionnet

2020 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This graduate course links different regions of the Francophone world and provides an introduction to the major debates about gender issues in postcolonial Francophone studies. We focus on the aesthetics and politics of writers who challenge the notion of a stable identity, be it national, racial or sexual. The course draws on the historico-cultural issues pertinent to each region (Africa, the Atlantic, Pacific, and Indian Ocean). Writers include Mariama Bâ (Senegal), Maryse Condé (Guadeloupe/France/USA), Ananda Devi (Mauritius and France), Fatou Diome (Senegal and France), Assia Djebar (Algeria/France/USA), Marie Chauvet (Haiti), Shenaz Patel (Mauritius), and Linda Lê (Vietnam and France).

Subject: Portuguese

Portuguese 10

Beginning Portuguese I: From Cambridge to Copacabana (120398)

Benedict Cruz

2019 Fall (4 Credits) **Schedule:** MTWR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Intended for those with no prior experience in the target language, this course emphasizes interpersonal communication as well as the interpretation and production of written and spoken language. Students take their first steps on the journey from speaking English to carrying conversations with Portuguese speakers over the course of one semester, thanks to immersion activities and dynamic, interactive learning. Students will be exposed to contextualized Luso-Afro-Brazilian culture through music, film, social media, as well as via Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes: **Conducted in Portuguese. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have previously studied Portuguese must take a placement exam. Students with a solid knowledge of Spanish should enroll in PORTUG 10s instead of PORTUG 10. This course is taught by members of the Department.**

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students

Portuguese 10S

Beginning Portuguese for Spanish Speakers I: It's SAMBA, not Salsa! (113806)

Viviane Gontijo

2019 Fall (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Designed specifically for students with a sound knowledge of Spanish. This course presents linguistic and cultural structures necessary for basic communication, emphasizing the features of Portuguese most challenging for Spanish Speakers: pronunciation, idioms, and grammatical structures peculiar to Brazilian Portuguese. Over the course of the semester, students learn to express themselves effectively using their Brazilian voice, distinct from their Spanish voice. Students experience contextualized Lusophone culture through music, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes: **Conducted entirely in Portuguese. Requires a solid knowledge of but not necessarily native proficiency in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to**

auditors. This course is taught by members of the Department.

Recommended Prep: **Prerequisite: 720 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; a 30s level Spanish course; or permission of Course Head.**

Additional Course Attributes:

Benedict Cruz

2019 Fall (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Guides students to continue the work of confronting features of the Portuguese phonological system that are most challenging for Spanish speakers. It helps solidify the student's foundation in Brazilian Portuguese, and pushes them to go deeper by engaging with literary readings, examining unique cultural aspects in addition to practical points of the language. Students will continue to experience contextualized Lusophone culture through music, film, literature, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes: **Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.**

Intensive Beginning Portuguese (156944)

Viviane Gontijo

2020 Spring (8 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This intensive Beginning Portuguese course provides an accelerated introduction to Portuguese with emphasis on interpersonal communication and interpreting and producing language in written and oral forms. Goals include building students' vocabulary, fluency, proficiency, and confidence. Students are exposed to Brazilian Portuguese and culture through music, cinema, and various media sources. The course covers the equivalent of a full first-year of Portuguese language study.

Course Notes: **This course requires an average seven contact hours per week. To supplement the scheduled 6.25 hours, a weekly online component will be arranged. May not be taken Pass/Fail or Sat/Unsat. Not open to auditors. Students must participate in an interview with the Portuguese 15 course head and receive permission to enroll in the course.**

Recommended Prep: **An advanced knowledge of at least one other foreign language but no knowledge of Portuguese.**

Intermediate Portuguese: Palcos e Palavras (121934)

Viviane Gontijo

2020 Spring (4 Credits) **Schedule:** MWF 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An intermediate course for students interested in expanding and strengthening their Portuguese language skills. Reading, writing, and conversational competencies are emphasized through a panoramic study of Luso-Afro-Brazilian Theater. The course will continue to promote cross-cultural understanding by introducing learners to different textual genres such as screenplays, critical review as well as a selection of literary work that represents the Lusophone arts. The weekly online Teletandem interaction with college students in Brazil, unique to the Portuguese Program, allows learners to discuss readings, and engage in peer-review of writing completed for this course.

Course Notes: **Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.**

Samba, Bossa Nova and Beyond: Brazilian Society through the Study of Music (203375)

Viviane Gontijo

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Deciphering contemporary Brazilian society through its music. This seminar-like course will employ critical reading, writing, and listening without excluding its hands-on elements and music workshops. Students will develop a deeper knowledge of political currents that have influenced Brazilian music, have the opportunity to explore a wide variety of musical genres that surpasses Samba and Bossa Nova, as well as interact with Brazilian musicians and critics from Brazil and beyond. The diversity of Brazil's music will be celebrated by considering its regional (música do norte, nordeste, sul e sudeste), and sociopolitical aspects.

Course Notes: **This course meets regularly on Tuesdays and Thursdays, with an additional weekly 30-minute online component. No music experience is necessary, but enthusiasm to participate in the dance and music workshops is indispensable. Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.**

The Worlds of Camões (110085)

Josiah Blackmore

2019 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A study of the Renaissance Portuguese imagination through the work of Luís de Camões. The course will center on the epic and lyric poetry of Camões as a way to think broadly about the literary and intellectual currents of the 16th century. Empire, the structure of the cosmos, and mythography will figure into our analyses. To promote an understanding of the international culture of letters and humanism, authors from Spain, Italy, and France will also be included. Prerequisite: Reading knowledge of Portuguese.

Course Notes: **Conducted in Portuguese or English, depending on class composition.**

Recommended Prep: **Reading knowledge of Portuguese.**

Subject: Catalan

Catalan 10

Introduction to Catalan (114279)

Elvira G. DiFabio

2019 Fall (4 Credits) **Schedule:** TR 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course offers a set of units that, while introducing critical topics of contemporary social, political, territorial, and artistic debates, teach the basics of Catalan language. By the end of the course students will be able to interact in daily situations with native speakers, read and write simple messages about themselves and others, and interpret cultural expressions and products.

Course Notes: **Conducted in Catalan. Knowledge of another Romance language is useful but not essential. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.**

This course is taught by members of the Department.

Additional Course Attributes:

Attribute	Value(s)
FAS: Meets Foreign Lang Req	Catalan
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Catalan 11

Catalan Language and Culture: a Multimedia Approach (122352)

Daniel Aguirre-Oteiza

2020 Spring (4 Credits) **Schedule:** TR 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Intermediate course introducing students to Catalan culture and boosting their oral and written skills through a wide range of resources, such as Internet, television, radio, and press. Students will get a taste of various aspects of Catalan culture: art, cinema, music, literature, traditions, cuisine, history, and more.

Course Notes: **Conducted in Catalan. Not open to auditors. May not be taken Pass/Fail by undergraduates, but may be taken Sat/Unsat by GSAS students.**

Requirements: **Prerequisite: Catalan 10**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Undergraduate Students
FAS Divisional Distribution	None
FAS: Meets Foreign Lang Req	Catalan
HCOL: Foreign Lang Citation	Catalan

Spanish 11

Beginning Spanish II (125058)

Jorge Mendez Seijas

2020 Spring (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish Aa and Ab, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes: **Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.**

This course is taught by members of the Department.

Recommended Prep: **A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Meets Foreign Lang Req	Spanish

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish Aa and Ab, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes: **Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared.**

This course is taught by members of the Department.

Recommended Prep: **A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Meets Foreign Lang Req	Spanish

Spanish 49H

Languaging and the Latinx identities (109820)

Maria Parra-Velasco

2019 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course builds on students' knowledge of Spanish to explore the relationship between their languaging practices and their Latinx identities. Understanding languages as a way of knowing and meaning making, we use a variety of texts, genres, music, videos, films and visual arts to engage in discussions about family heritage, migration, and Latinx cultural and linguistic traditions and innovations. Students will strengthen their oral and written abilities, expand their interpersonal, interpretive and performative resources for languaging in informal and academic contexts.

Course Notes: **Spanish 49h was formerly Spanish 35; therefore, students cannot take 49h if they've already taken 35. Spanish 49h should be a prerequisite for 59h (or permission of the instructor).**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Spanish for Latino Students II: Connecting with Communities (159938)

Maria Parra-Velasco

2020 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

An advanced language course for Spanish heritage learners that aims to: strengthen students' oral and written linguistic range, with emphasis on Spanish use for academic contexts; and to further develop students' critical language and social awareness around important issues for Latinos in our globalized era: Spanish as global language, identity, language rights, global migration and labor, U.S.-Latino America relations, food and environment, the 'war on drugs'. Students explore these topics through various genres (newspapers and academic articles, debates, literary essays, short novels, poetry, visual art, film and music) and through 4 hours a week of community service.

The Ethics of Business in Latin America (127573)

Adriana Gutierrez

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

An advanced language and culture class that examines literature and films portraying the political,

sociological, financial and environmental impact of multinational companies doing business in Latin America. Students' linguistic competency is developed through discussion of the ethics of business, grammar reviews, and weekly writing assignments. Students will also choose a specific project for a business in Latin America and research its possible outcome and social, political, and environmental consequences.

Course Notes: **Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.**

Recommended Prep: **A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.**

Hispanic Literature: the Middle Ages (110853)

Luis Giron Negron

2019 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to the study of medieval Spanish literature from its origins through the 15th century. Close reading of representative works (both prose and verse) framed in historical context: Cantar de Mío Cid, Milagros de Nuestra Señora, Libro de buen amor, Conde Lucanor, Laberinto de Fortuna, Coplas a la muerte de su padre, Cárcel de amor and La Celestina. Attention to critical approaches and themes in medieval literary studies (e.g. orality and poetics, historicism, folklore and narratology).

Course Notes: **Conducted in Spanish. This course includes student art-making as part of the Harvard Arts Initiative.**

Recommended Prep: **A score above 780 on the SAT II or the Harvard Placement test; a 40-, 50-, or 60-level course in Spanish; or permission of course head.**

Introduction to Contemporary Spanish Literature and Culture (207836)

Raquel Vega-Duran

2019 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces students to the literature, history, and visual culture of contemporary Spain from the 18th century through the first eighteen years of the 21st century. We will study representative short stories, poems, plays, novellas, essays, paintings, photographs, and films from the Spanish War of Independence, the "disaster" of 1898, the Surrealist movement, the Spanish Civil War and the Republican Exile, Franco's Dictatorship and the Transition to Democracy, the "Movida Madrileña," and the literature of the "New Spaniards." Through visual and written works by Goya, Galdós, Campoamor, Bécquer, Pardo Bazán, Azorín, Unamuno, Lorca, Machado, Buñuel, Laforet, Matute, Almodóvar, Martín Gaite, Puértolas, and others, students will gain a general knowledge and appreciation for the main works, periods, and authors of contemporary Spain, and will appreciate the uniqueness and diversity of Spanish culture by establishing transnational relations between Spain and cultures from Latin America, North Africa, Asia, and Europe. All readings will be in Spanish, although we will look at texts originally written in Spanish, Catalan, Galician,

and Basque.

Words of Which History is Made: Translation Workshop on 20th-Century Spain (126860)

Daniel Aguirre-Oteiza

2020 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Through close readings and translations centering on 20th-century Spanish history and society, students hone their linguistic, grammatical, and stylistic skills, and acquire the interpretive skills required to comprehend and analyze increasingly complex literary and cultural texts. Course materials include short stories, poems, newspaper articles, memoirs, travel journals and historical essays.

Course Notes: **Conducted in Spanish. Recommended for concentrators.**

Recommended Prep: **A score of 800 on the SAT II test or on the Harvard Placement test, a previous course in Spanish at the 70-level, or permission of course head.**

Table Talk and Food Writing (205164)

Johanna Damgaard Liander

2019 Fall (4 Credits) **Schedule:** MW 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

From classroom to kitchen, picnic or café, this advanced language and food culture course will examine the Spanish table, its history and origins, expansions and innovations, from medieval times to present-day molecular gastronomy. Frequent reading, viewing and writing assignments and classroom discussion are all designed to reinforce language skills and academic literacy in the target language. The course, along with all materials and assignments, is entirely in Spanish, primarily focusing on literary, historical, linguistic and sociological texts and topics from Spain –selections ranging from Harvard's vast culinary collection to the most current media- with reference to Latin America and the Latino community in the United States, as well.

Class Notes: **Class will ordinarily meet Monday and Wednesday 12-2:00, with 1.30-2.00 for individual, optional consultation with Dr. Liander. 6 hands-on cooking –and tasting- sessions are included each semester. Enrollment is limited to 16. Interested students must contact and interview with Dr. Liander before August 28, 2019.**

Recommended Prep: **A score of 750 or beyond on SAT II or Harvard Placement; previous enrollment in Spanish 50 or higher; or permission of the instructor.**

Cultural and Political Myth-Making: Eva Peron, Che Guevara, Simon Bolivar and La Malinche (205168)

Diana Sorensen

2019 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Political power rests on concrete factors involved in the administration of public resources and the implementation of governmental policies. But it cannot be fully understood without examining cultural strategies of self presentation and the ways in which social groups respond to them. Myth-making is intrinsic to politics, and we will trace its workings in a few Latin American cases.

Spanish Film from Buñuel to Almodóvar (141012)

Raquel Vega-Duran

2019 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course will examine a wide range of core Spanish films from directors such as Almodóvar, Amenábar,

Berlanga, Bollaín, Buñuel, Coixet, Erice, and León de Aranoa, among others. It will include analyses of prominent genres (drama, comedy, terror, fantasy, meta-cinema, sci-fi, noir) and will pay particular attention to key historical and cultural moments (the Spanish Civil War, film under dictatorship and democracy, censorship, "La movida," the economic crisis, the rise of immigration, etc.) from the 1940s to the present. Films with subtitles.

Course Notes: **Course will be conducted in Spanish.**

Afro-Latin America: History and Culture (215693)

Doris Sommer

Alejandro de la Fuente

2020 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course explores how African cultural expressions influenced colonial societies and later national cultures in Latin America. How did peoples of African descent shape the formation of Latin American national cultures in areas such as literature, religion, visual arts, music, dance, and cinema? Some scholars have debated whether African religious, musical, medical and communitarian practices were reproduced in the New World or whether they were creolized through fusion with other (European and indigenous) practices. Others have sought to explain how African cultural practices (music, religion, dances) that were derided as primitive and uncivilized in the early twentieth century became "nationalized" and transformed into key expressions of national cultures in many Latin American countries. What are the implications of this process for those cultural forms and their practitioners? How do they impact, if at all, other areas of social life? We explore these questions through historical and literary texts, films, visual arts, and recordings.

Performing Latinidad (110061)

Lorgia García Peña

2019 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** 80

What exactly does the word "latinidad" mean? How has "the Latino" been constructed in U.S. culture? What has been the importance of "latinidad" in the social and political history of people of Latin American

descent in this country? What place does "latinidad" occupy within the North American academy? Our course attempts to respond to these inquiries through an analysis of Latino performance and its representation within particular literary and cultural productions: poetry, theater, film, and stand-up comedy.

Course Notes: **Class will be conducted in English. Discussions in English and Spanish according to class composition.**

Bilingual Arts (114477)

Doris Sommer

2020 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Bilingual practices are everywhere, though we are just beginning to address them in academic disciplines. We will explore the aesthetic dimensions of bilingualism, and some effects in related areas, including politics, language philosophy, and psychology. How do bilingual language games increase political flexibility, or threaten personal or national coherence? Topics will include 1) formalist appreciations; 2) exile as incitation to write; 3) Gains and Losses of heteroglossia; 4) Hybrid Games; 5) Political dialogues; 6) Code-Switching and Creativity; 7) Bilingual Theater, Music and Film; 8) The art of translation; 9) Bicultural Spaces. Readings in prose and poetry by international authors and theorists. Taught weekly, including guest lectures by, and discussions with, anthropologists, linguists, writers, and cultural critics who have worked on this subject.

Course Notes: **Conducted in Spanish and English.**

Barcelona and the Catalan Culture (109775)

Aina Obis Monne

2020 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The course offers an interdisciplinary approach to Barcelona, a multilayered space furnished by Roman, French, Muslim, and Spanish legacies that shaped a singular culture and language. Developing from periods of egalitarian social and political institutions in the Middle Ages to strong socioeconomic industrial

development in the 19th century and later tourism, Spain's most European city is inscribed by a deep sense of civic and industrious society permanently seeking innovation and modernity, yet facing the consequences of its complex past. Through readings of historians, art critics, urban designers, and writers, and supported by visual materials, the course offers an integrated perspective which opens questions in every field of the Humanities and the Social Sciences on Catalan and Hispanic Cultures.

Course Notes: **The course will be conducted in Spanish. The readings will be in English & Spanish.**

Subject: Italian

Italian 10

Beginning Italian I: Pathways to Italy (113814)

Elvira G. DiFabio

2019 Fall (4 Credits) **Schedule:** MTWR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

For students with little or no knowledge of Italian. Aims at achieving basic communication skills and vocabulary. Emphasis on oral expression and listening comprehension. The cultural component examines

everyday life through a comparative perspective: families, shopping, food culture. This course will give you the language you need to communicate effectively in Italy, and is the best way to prepare for a summer study in Italy. Course materials include workbook, audio-lab, and video.

Course Notes: **Conducted in Italian. Students whose placement score does not entitle them to enter a more advanced course are assigned to Italian 10. Students who have studied Italian for two years or more in secondary school must begin at Italian 11 or higher. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Healing Words after the Black Death: Boccaccio, Petrarch, Catherine of Siena (213365)

Ambrogio Camozzi Pistoja

2019 Fall (4 Credits) **Schedule:** WF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

A survey course on the impact of the Black Death (1350ca), one of the most devastating ecological crises in human history, on Italian medieval society. Through an examination of literary, visual and architectural artifacts, we will look at how the great plague affected the life of many. Using the prism offered, in particular, by the works of Boccaccio, Petrarch, Catherine of Siena, Christine de Pizan, Giotto and Piero della Francesca, we will discuss the development of medicine and the rise of physicians; art as evasiveness, entertainment and introspection; spiritual and secular solidarity; story-telling and laughter as a form of healing; and a new approach to Roman and Greek antiquities laying the foundation of Italian

Humanism.

Course Notes: **Course will be conducted in Italian.**

The Cosmos of the Divine Comedy (207950)

Ambrogio Camozzi Pistoja

2019 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This is a course on Dante's 14th century masterpiece, the *Comedy*. The course will offer an in-depth introduction to Dante's poem (*Inferno*, *Purgatory*, *Paradise*) as a point of entry to the history of Western literature, political thought, natural science and cosmology. We will also discuss the text's capacity to move, inform, entertain and console readers, across time and socio-cultural barriers.

Intermedia Italy: Poetry and Visuality in the Twentieth Century (214524)

Dalila Colucci

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Moving in the hybrid space where the encounter between poetry and visual arts takes the forms of intermedia representation (involving painting, typography, photography, cinema, and music), this course explores the evolution of Italian visual poetry in the twentieth century. To this end, we will analyze a series of exceptional artifacts, from Futurism to Neo-Avant-Gardes: metal books; object and collage poems; video, sound, and performative poetry. Materials will be examined directly (if available at Harvard) or digitally (if from Italian archives), with respect to the local and global cultural context of their time, drawing an unprecedented outline of modern Italian poetry.

Course Notes: **Conducted in English and/or Italian, depending on class composition.**

Satire and Censorship in 20th Century Italy (212934)

Ambrogio Camozzi Pistoja

2020 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This seminar allows you to study and discuss a wide range of different texts and topics related to satire from within Italian culture of the modern era. It focuses on artifacts of different kinds (novels, poetry, manifestos, cartoons, comics, theatrical plays, tv series, movies), works in different media (written texts, film, visual arts), and different modes of cultural enquiry (literary criticism and theory, intellectual and cultural history, cultural sociology and philosophy), to give you a rich sense of the variety and complexity of the satirical mode in 20th century Italy. Authors include Marinetti, Malaparte, Flaiano, Guareschi, Fellini, Fo, Guzzanti, Sorrentino.

Course Notes: **This course will be conducted in Italian. Undergraduate students will need permission of instructor.**

Subject: Romance Languages

Romance Languages 210

Language Pedagogy: Theories, Approaches, and Practices (136717)

Nicole Mills

Elvira G. DiFabio

2019 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course is designed for TFs and TAs in the department of Romance Languages and Literatures who are teaching a Romance language at Harvard for the first time, or those who are interested in foreign language learning and teaching. It introduces TAs and TFs to theories of second language acquisition (SLA) and explores their implications for the teaching of foreign language, culture, and literature. The course provides opportunities for students to learn to enact the specific pedagogical practices deemed essential to foreign language teaching. The intensive week before the start of classes includes reports on and discussion of general SLA theories and demonstrations and analysis of varied instructional approaches.

Course Notes: **Students are required to attend the pre-service seminar that will take place the week before classes begin. Students who do not attend the pre-service seminar will not be permitted to enroll in the course. For details and further information, please contact the Course Heads. May be taken SAT/UNS. Permission of Course Head required.**

Romance Languages 220

Second Language Research and Practice (207688)

Nicole Mills

2020 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course is designed for experienced TFs and TAs who are currently teaching a foreign language at Harvard, or those who have prior foreign language teaching experience. The course will build upon instructors' understanding of second language acquisition through an in-depth exploration of current theories and trends in second language acquisition, relevant applied linguistics research, and models of theory in practice. Through interactive discussions, video-conferencing, and action research, the course will explore themes associated with social pedagogies, emerging technologies, beliefs and motivation, culture and identity, notions of advancedness, genre-based pedagogies, and multi-literacies and their relationship to language, culture, and literature instruction.

Course Notes: **This course is designed for instructors who have foreign language teaching experience and who have been exposed to principles of second language acquisition. This course fulfills one of the requirements of the Bok Certificate in Teaching Language and Culture. May be taken SAT/UNS. Permission of Course Head required.**

Recommended Prep: **ROM-LANG 210 or equivalent.**

Article Publication Workshop (212926)

Annabel Kim

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

A reading and writing intensive workshop aimed at doctoral students done with coursework, and postdocs affiliated with the department. Through workshopping (both as a class and in smaller groups), participants will go through two intensive rounds of revision to produce an article ready to submit to peer-reviewed journals at the end of the semester. We will begin with preliminary discussions of the nuts and bolts of writing and publication: reading essays and articles on how to write well; identifying journals that are a good fit for publication; reading sample abstracts and writing and revising one's own; analyzing sample readers' reports (from the generous and intelligent to the brutish and mean) to think through how to respond to feedback; etc.

Class Notes: **The first class will meet on Monday, September 9, from 3-5 with the schedule to be determined thereafter.**

Urban Diversity and Its Discontents (212925)

Bruno Carvalho

2020 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Diversity is sometimes viewed as a source of vitality and strength, other times as a threat to cultural or national cohesion. This seminar explores histories of segregation and debates about diversity in a hemispheric framework, asking: how can Latin American perspectives inform our understanding of the built environment in the United States? How has the U.S. helped to shape urban development in Latin America, as an inspiration or cautionary tale? We will focus on the interplay between identity formations, moral values, and urbanism, and reflect on how urban diversity relates to inclusion, difference, and inequality. Topics covered include migration, globalization, spatial justice, city planning, race and racism.

Course Notes: **This course will be conducted in English, and when possible readings will be available both in translation and in their original language.**

Class Notes: **Course enrollment is limited to 15 students.**

Additional Course Attributes:

Romance Studies 97

Sophomore Tutorial: Poetics, Practice, and Politics in Romance Societies (114941)

Kathy Richman

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course introduces students to a range of analytical and theoretical approaches to "reading" fiction, poetry, film, and essays. We will pair critical writings and creative texts of importance to the Romance world to help students develop their own voice and analytical stance. Prepares students for advanced work in literary and cultural studies in Romance Languages and Literatures and related fields.

Course Notes: **Language of instruction to be decided upon by student in consultation with the Undergraduate Adviser in Romance Studies. Successful completion of one term of Romance Studies 97 (or equivalent) is required of all concentrators in their sophomore year.**

Additional Course Attributes:

Latin American Cities and Visual Cultures (213681)

Bruno Carvalho

Beatriz Jaguaribe de Mattos

2020 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The seminar explores different forms of creativity, contestation and the production of urban imaginaries. Through case studies and theoretical perspectives, we will reflect on how various cities in Latin America were/are imagined in literature, film and photography. Focusing on modernist and contemporary expressions, the course addresses the emergence of new forms of subjectivity, political contestation and aesthetics, as well as issues concerning cultural memory, urbanization, and the formation of urban identities.

Course Notes: **This course will be conducted in English, and will involve activities with outside practitioners, including filmmakers.**

Class Notes: **Course enrollment is limited to 15 students.**

Romance Studies 201

Questions of Theory (205260)

Doris Sommer

Nicole Suetterlin

2019 Fall (4 Credits) **Schedule:** F 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

To explore key literary, cultural and critical theories, we pose questions through readings of classic and contemporary theorists, from Aristotle to Kant, Schiller, Arendt, Barthes, Foucault, Glissant, Ortiz, Kittler, and Butler, among others. Their approaches include aesthetics, structuralism, discourse analysis, media theory, deconstruction, psychoanalysis, gender theory, ecocriticism. Each seminar addresses a core readingand a cluster of variations. Weekly writing assignments will formulate one or two questions to the core text and the cluster, to prepare for seminar discussions.

Course Notes: **Conducted in English. This course is also offered as Romance Studies 201. Credit may be earned for Romance Studies 201 or German 291, but not both.**

Romance Studies 235A

Ethnic Studies: Past, Present, and Future (213437)

Lorgia García Peña

Ju Yon Kim

2019 Fall (2 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

An interdisciplinary graduate research seminar exploring cutting-edge approaches in ethnic studies. From its institutional beginnings in the late-1960s, the field of ethnic studies built frameworks to critically examine questions of inequality and power through intersecting analytical paradigms of race, indigeneity, gender, sexuality, class, and citizenship. With visiting scholars at Harvard's Warren Center, students will explore how such frameworks remain useful and relevant, interrogate limitations and contradictions within the field, all the while exploring new possibilities and directions within ethnic studies.

Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: **Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.**

Junior Tutorial (159853)

Philip Redko

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

We will read Pushkin's novel in verse, *Eugene Onegin*, in its entirety, paying special attention to its cultural and historical contexts, its play with poetic form and genre, and its innovative approach to plot and characterization. This is one of the most significant and beloved works in Russian literature, and together we will revel in its wit and virtuosity, and find out for ourselves why this work has never lost its appeal to readers. The course will also include a screening of Tchaikovsky's opera based on the novel, and a trip to Houghton to view Pushkin's first editions.

Course Notes: **Required of junior concentrators in Slavic Literatures and Cultures. Course open to non-concentrators by permission of the instructor.**

Readings will be in Russian.

Recommended Prep: **Students must be able to read in Russian.**

Science Fiction (213726)

Jacob Emery

2020 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Considers science fiction's development and shifting emphases in both of its major traditions, in Russia and in the English-speaking world. Touches on perennial themes of the genre including: our relationship to the future and the hypothetical; the technological mediation of human existence; the limits of space and time and the consequences of surpassing them; non-human and non-organic consciousness; radically different forms of human togetherness; and various apocalyptic scenarios. Reading list might include: H.G. Wells, Alexander Bogdanov, Eugene Zamiatin, Ursula K. LeGuin, Philip K. Dick, the Strugatsky Brothers, Octavia Butler, and China Miéville, as well as select films.

Russia's Golden Age: Literature, Arts, and Culture (207566)

Julie A. Buckler

2020 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Investigates major works of imperial Russian culture (1703-1917) as products of their original historical contexts and in their on-going life as acknowledged "masterworks." At the center of this course stand the works themselves, their original historical and cultural contexts, the intentions of their creators, and the responses of their initial audiences. Our aim will be to understand how these works intersected with their time to achieve canonical status. What mythologies of national identity did these works propose and why were they so compelling to their first audiences? In what ways were these works radical: formally, aesthetically, ideologically? How have these masterworks been variously renewed and reinterpreted since their initial reception, up to the present day?

Works by Rastrelli, Falconet, Pushkin, Gogol, Dostoevsky, Tolstoy, Musorgsky, Tchaikovsky, Chekhov, Bely.

Course Notes: **All readings in English. Students who wish to read Russian texts in the original may arrange for a special weekly section with the instructor.**

Apocalypse Then! Forging the Culture of Medieval Rus' (213422)

Michael Flier

2019 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

When the natives of Medieval Rus' (later Russians, Ukrainians, and Belarusians) accepted Orthodox Christianity in the 10th century, their nature-based paganism gave way to a powerfully sensual belief system that made good use of the visual and the verbal to prepare these newest Christians for the coming Apocalypse and Last Judgment. We investigate this transformation from the conversion of Saint Vladimir and the excesses of Ivan the Terrible through the Time of Troubles and the modern turn of Peter the Great. The class features close analysis of architecture, icons and frescoes, ritual, folklore, literature, and history to understand this shift in worldview, including the role of women. Special attention is devoted to the ways in which Medieval Rus' is portrayed in film, opera, and ballet.

Course Notes: **All readings in English.**
This course will include a field trip to the Museum of Russian Icons in Clinton, Massachusetts.

Nabokov (205527)

Justin Weir

2019 Fall (4 Credits) **Schedule:** W 0600 PM - 0800 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course on the major fiction of Vladimir Nabokov begins with his major Russian novels in English translation, including The Defense, Laughter in the Dark (Camera Obscura), Invitation to a Beheading, and Despair, and concludes with classic English works, Speak, Memory, Lolita, and Pnin. Topics in the course include emigration and cross-cultural translation, literary modernism, metafiction, nostalgia and stories of childhood, as well as the literary representations of tyranny, violence, and abuse. We will pay additional attention to Nabokov's interest in film and film aesthetics, and we will consider four screen versions of his novels (Luzhin's Defense, Laughter in the Dark, Despair, and Lolita).

Course Notes: **No knowledge of Russian in required**

Post-Soviet and Post-Modernist Ukrainian Literature (118111)

George Grabowicz

2019 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An examination of Ukrainian literature in the decade preceding Independence and in the years since, i.e., the 1980s to the present. Special focus on the massive changes that occurred with the shift from obligatory Socialist Realism to an ostensibly open poetics, with the coexistence of traditionalist forms, aspects of neo-modernism and postmodernism, and also on the significant resistance to these changes. Given the new open poetics and the de facto (if not subliminal) disappearance of censorship, contacts and interaction with western and especially émigré (now diaspora) Ukrainian literature are also examined. Several films exemplifying the changes and poetics involved will also be discussed.

Focus on Dibrova and the onset of Post-Sovietism; the post-modernist performance of Andrukhovych and the Bu-Ba-Bu circle; Izdryk; Prochasko; Kurkov, Zabuzhko and feminist and anti-feminist writing, Zhadan and the post-modern nostalgia for the USSR; Ukrainian literature in the diaspora: Yurij Tarnawsky and Vasyl Makhno.

The Holocaust in Polish Memory and Culture (213366)

Aleksandra Kremer

2020 Spring (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Hitler's plan to destroy European Jewry was carried out by the Nazis mostly on the territory of occupied Poland, where three million Jews had lived before World War II. The Poles' position has been described as that of bystanders—eyewitnesses to killings, ghettos, and death camps; nevertheless, Polish behavior also encompassed more direct involvement—whether complicity and murder, or the rescuing of Jews. How is this time remembered in Poland? How have eyewitnesses responded to what they saw? What is the relation between the Holocaust memory and Polish wartime history? Could the same person be a bystander, victim, and collaborator? We will look for answers in Polish poetry and essays, fiction and scholarship, written between the 1940s and today, and including authors of Jewish background who stayed in the country after the war. What vision of Polish–Jewish relations do these different works provide? How was the memory of

the Holocaust shaped and used by communist Poland? Who shapes it today?

Course Notes: **All readings in English. Students who wish to read Polish texts in the original may arrange a special section with the instructor.**

Slavic 177

Fugitives from Utopia: Polish Poets Across the Iron Curtain (205084)

Aleksandra Kremer

2019 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Immigrants and travelers, dissidents and eccentrics—there were many ways Polish poets created spaces of personal freedom from the communist regime and the languages of newspeak and propaganda. In poetry, they contrasted utopian slogans with reality, but they also questioned more generally the idea of any human-made collective paradise, choosing instead irony, distrust, and singularity. In this course, we will study Polish poetry as embedded in the lived experiences of home meetings and experiments with tape recording, censorship and internal exile, Polish and Western radio stations, struggles with emigration and translations into English, as well as dramatic decisions whether to stay abroad or come back from one's journeys. We will watch documentary films and listen to audio recordings; we will read essays, biographies, and criticism; and we will study poems by Czeslaw Milosz, Wislawa Szymborska, and Zbigniew Herbert, alongside many other authors.

Course Notes: **All readings in English. Students who wish to read Polish texts in the original may arrange a special section with the instructor.**

Soviet Theory and the West (214548)

Justin Weir

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course treats important Soviet theoretical contributions in philosophy, psychology, literature, film, and culture in dialogue with comparable movements in the West. In particular, we will look at the key role of language and semiotics, as well as its rejection, in various theoretical models. Reading will focus on major

works by Vygotsky, Bakhtin, Lukacs, Shklovsky, Jakobson, Lotman, and others. All readings will be in English translation.

Course Notes: **All readings in English.**

Historiography and Historical Fiction (213727)

Jacob Emery

2020 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Considers historical fiction in its connection with historiography on the one hand and other genres of fictional narrative on the other. Our case study is the contested tradition of historical fiction in the former Yugoslavia (Prince-Bishop Njegoš, France Prešeren, Ivo Andrić, Danilo Kiš, Saša Selimović, Aleksandr Hemon), contextualized in the wider development of the genre from its modern origins in Walter Scott and in Romantic nationalism. Theoretical readings include Johann Gottfried Herder, Georg Lukács, Hayden White, and Linda Hutcheon; comparative readings might include Ismail Kadare, Leo Tolstoy, and Vladimir Sorokin.

20th-Century Ukrainian Poetry (123131)

George Grabowicz

2019 Fall (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An examination, with close readings, of the major 20th century Ukrainian poets and poetic styles from the eve of WWI and the Revolution to the decade before Independence in 1991, with a special focus on early modernism (Tychyna), neo-classicism, futurism and other avant-garde movements as well as on the challenges to poetry imposed by official socialist realism, nationalism, and populist ideology and traditions.

Focus on Tychyna, the neo-classicists (Zerov and Ry's'kyj), Bazhan and futurism, Svidzins'kyj, Antonych, the interwar Prague School (Malaniuk and Olzhych), MUR (1945-1950) surrealism and experimentation (Kostec'kyj and Berezhan); the New York Group, the poets of the 1960s, the "Kyiv School," Vasyl Stus and Oleh Lysheha.

Poetry after Brodsky: How Russian Is It? (124482)

Stephanie Sandler

2019 Fall (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Studies poetic practice since the late 1980s, with an emphasis on very recent work. Includes Aristov, Aygi, Barskova, Brodsky, Dashevsky, Dragomoshchenko, Eremin, Fanailova, Glazova, Goralik, Gronas, Prigov, Rymbu, Sedakova, Shvarts, Stepanova, Skandiaka, Svarovsky, Vasiakina, Yusupova and others. Key themes are border crossings (in language and geography); poetry and other art forms; innovations in form and self-representation; poetry performance and visual display; political and ethical expression; and the changing representations of emotion and mind.

Course Notes: **Open to qualified undergraduates with good reading knowledge of Russian, pending permission of the instructor.**

Subject: Bosnian, Croatian & Serbian

Bosnian, Croatian & Serbian AA

Elementary Bosnian, Croatian, and Serbian I (110073)

Tatiana Kuzmic

2019 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Part one of a two-part introductory course in modern Bosnian, Croatian, and Serbian (BCS) language and culture, designed for students without previous knowledge who would like to speak BCS or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed.Students are exposed to BCS culture through excerpts from poetry, prose, and newspaper articles, as well as video and popular music clips as they learn to use the language both as a means of communication and as a tool for reading and research.

BCS AA: Elementary BCS I (in the fall) and BCS AB: Elementary BCS II (in the spring) satisfy the foreign language requirement and prepare students for continued study of BCS in intermediate-level courses and for study or travel abroad.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in BCS AA in the fall and BCS AB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Bosnian, Croatian & Serbian BA

Intermediate Bosnian, Croatian, and Serbian I (110074)

Tatiana Kuzmic

2019 Fall (4 Credits) **Schedule:** MWF 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Part one of a two-part intermediate course in modern Bosnian, Croatian, and Serbian (BCS) language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of BCS grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.
The two-part course prepares students for continued study of BCS in advanced-level courses and for study or travel abroad.

Course Notes: **This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy**

<sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in BCS BA in the fall and BCS BB in the spring within the same academic year. - - -

Russian BA

Intermediate Russian I (112823)

Steven Clancy

Veronika Egorova

2019 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1130 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family, education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social situations (sociolinguistic competence). Computer exercises on selected topics.

Course Notes: **Interested students should contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions regarding scheduling conflicts. With sufficient enrollments it is possible that this course will be offered in an additional section on MWF in a different time slot. - - -**

Part one of a two-part series. Students are strongly encouraged to enroll in Russian BA in the fall and Russian BB in the spring within the same academic year. - - -

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes. - - -

Any full course in Russian at the B-level (Russian Ba-Bb, Russian BTA-BTB, or Intensive Russian BAB) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Recommended Prep: **Russian AA-AB, AAB, ATA-ATB, AH, or placement at the B-level. Familiarity with fundamentals of Russian grammar, particularly case endings, verb conjugation, and elementary competence in spoken Russian.**

This course continues development of speaking and reading proficiency. Vocabulary work emphasizes verbs and verb government as essential to effective communication. Work on word formation to increase reading vocabulary. Texts for reading and discussion include works in prose, poetry, and film (Kazakov, Shvartz, Akhmatova).

This course includes a community service component. Students deepen their knowledge of the course content by interviewing residents of the 2Life Communities: Brighton campus, who are émigrés from the former Soviet Union. The final project for the course is a presentation shared with the community.

Course Notes: **Interested students should contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions regarding scheduling conflicts. With sufficient enrollments it is possible that this course will be offered in an additional section on MW in a different time slot. ---**

Ukrainian AA

Elementary Ukrainian I (116414)

Volodymyr Dibrova

2019 Fall (4 Credits) **Schedule:** MWF 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

An introductory course in modern Ukrainian language and culture, designed for students without previous knowledge who would like to speak Ukrainian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Ukrainian culture through work with prose and poetry as they learn to use the language both as a means of communication and as a tool for reading and research.

This year-long full course satisfies the foreign language requirement and prepares students for continued study of Ukrainian in intermediate-level courses and for study or travel abroad in Ukraine. Part one of a two-part series.

Course Notes: **This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see https://slavic.fas.harvard.edu/language-courses. - - -**

Part one of a two-part series. Students are strongly encouraged to enroll in Ukrainian AA in the fall and Ukrainian AB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: https://slavic.fas.harvard.edu/language-course-notes

Czech BA

Intermediate Czech I (121469)

Veronika Tuckerova

2019 Fall (4 Credits) **Schedule:** MWF 1200 PM - 0115 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Part one of a two part intermediate course in modern Czech language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Czech grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms.

The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Course Notes: **This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. Foundations of Social Science Research (213384)

Adaner Usmani

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

This course has two goals. First, to introduce students to the diversity of methods that social scientists use to answer questions about the social world. Second, to prepare thesis writers to conduct original research. We will survey both qualitative and quantitative approaches, reading a combination of methodological texts and exemplary empirical work. For their final project, students will write a research proposal that will anchor their future thesis work.

Class Notes: **The discussion sections for this course will be held on Wednesdays from 3:00-4:00 p.m. and 4:00-5:00 p.m.**

Methods Training for Social and Political Theorists (213383)

Don Tontiplaphol

2019 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Is social-scientific knowledge possible? How does empirical research depend on conceptual analysis? What is the relationship between normative theory and empirical reality? This course investigates different modes of theorizing and integrates them into the philosophical foundations of the social sciences. Units include "Epistemology and Social Explanation"; "Conceptual Analysis and the Human Sciences"; "Political Theory and Historiography"; "Normativity, Critique, and Political Realism." Recommended preparation for senior-thesis research in social and political theory, including the epistemology of social science. Continuation of the methodological themes of Social Studies 10b; intended for first-term juniors and first-term seniors.

Course Notes: **This course will be lotteried.**

Social Studies 68EA

Engaged Philosophy: The Theory and Practice of Altruism (213258)

Bonnie Talbert

2020 Spring (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Many people feel that it is important to help others and to make the world a better place. This altruistic mission sounds like a noble goal, but like all missions, it requires thoughtful planning and reflection. The main question this course will address is "What is altruism?" We will approach this question from a variety of interdisciplinary perspectives such as biology, psychology, political theory, and moral philosophy. Are we naturally altruistic, or are all actions in some sense selfish? How do we know when we are helping others? We will spend a good portion of the course on the "effective altruism" movement, which aims to maximize the amount of good that each of us can do. We will read stories of people who earn money for the sake of giving it away, people who have donated kidneys to strangers, people who adopted over 20 children, and many other examples that illustrate (or not!) different ways of being altruistic. The ultimate goal of this course is to help students think about what it means to help not just theoretically, but also in practice, both by reading examples and by engaging in altruistic activities of their own.

This is an Engaged Scholarship course, limited to students who volunteer in a PBHA or other community-based program. Open to students in all concentrations.

Course Notes: **This course will be lotteried.**

The Crisis of Social Democracy: Its History and its Future (213283)

E. J. Dionne

James Kloppenberg

2019 Fall (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Social democracy, which in the US has been associated with the left-wing of the Democratic Party, has attracted non-communist leftists around the world for over a century. Securing equal participation for all persons in political, economic, and social decision-making has been the aim of social democrats. Will social democracy—and the regulated capitalist welfare states it created—survive, or give way to autocracy, ethnic and national exclusion, and/or neoliberal globalism? Students will read and discuss primary and secondary sources and write research papers on the past or the present of social democracy.

Course Notes: **This course is also offered through the History Department as History 14L. Credit may be earned for either SOC-STD 96SD or History 14L, but not both. This course will be lotteried.**

Development and Modernization: A Critical Perspective (116329)

Stephen Marglin

2019 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

What assumptions about human beings underlie the conviction that development and modernization constitute progress, that the developed West points the way for the rest of the world? Does economic

growth involve a package that necessarily changes the society, the polity, and the culture along with the economy? This tutorial provides a framework for thinking about these questions, both in the context of the West, and in the context of the Third World. This is a junior tutorial.

Course Notes: **This course will be lotteried.**

Class Notes: **This course will run from 12:15-2:15 p.m.**

Law and American Society (121345)

Terry Aladjem

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The course examines law as a defining force in American culture and society in four dimensions: as it establishes individual rights, liberties, and limits of toleration; as it attempts to resolve differences among competing constituencies; as it sets out terms of punishment and social control, and as a source of informing images and ideological consistency. We will take up issues at the level of jurisprudence or political theory, but also at the level of legal cases and public controversy in which these questions arise—cases in which racial or gender equality are at stake, religious or sexual freedom, cases in which the claims of religious communities seem irreconcilable, cases in which the nature and extent of punishment have been debated and the question of who deserves to be punished decided, and notorious public trials in which the national self-understanding has been shaped. Our aim is to bring theory to bear, and down to earth, in each consideration, (we will read Foucault and also visit a prison) and since this is an inaugural presidential year, the issues being debated publicly concerning the law and U.S. Constitution will be much on our minds. This is a junior tutorial.

Course Notes: **A prison trip is planned, subject to approval. April date to be determined. This course will be lotteried.**

Art, Political Culture, and Civic Life (116288)

Kiku Adatto

2019 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The seminar explores the interplay of the arts, popular culture and civic life. It will draw on studies in art, history, political philosophy, literature, sociology, and photography. Among the questions we will address are: How is historical memory constructed, and what are the competing forces that shape it? What is the significance of public apologies, and does solidarity create moral responsibilities for historical injustices? How is cultural domination exerted, and how is it resisted? Under what circumstances, if any, should art be repatriated? In what ways does rhetoric shape politics, and what role does it play in national narratives? Why does the contest to control images loom so large in politics, the media, and in our everyday lives? This is a junior tutorial.

Course Notes: **This course will be lotteried.**

Globalization and the Nation State (125982)

Nicolas Prevelakis

2019 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Despite globalization, the nation is still a major actor in today's world. This course tries to understand why this is so by examining the role that nationalism plays in peoples' identities and the effects of globalization on nations and nation-states. It includes theoretical texts, but also case studies from the recent rise of populism and authoritarianism, the role of supranational entities such as the European Union, and the urgency of global issues such as climate change, inequality, and migration. Examples from the United States, Europe, Latin America, China, and the Middle East. This is a junior tutorial.

Migration in Theory and Practice (127021)

Nicole Newendorp

2019 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

In this course, we will examine how and why people migrate from one location to another, focusing both on the theoretical paradigms scholars use to explain migration processes as well as on the individual experiences of migrants. Topics include transnationalism, diaspora, identity formation, integration and assimilation, citizenship claims, and the feminization of migration. Ethnographic readings focus primarily

on migration to the US, but also include cases from other world areas, most notably Asia. This is a junior tutorial.

Inequality and Social Mobility in America (127817)

Anya Bassett

2019 Fall (4 Credits) **Schedule:** R 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The United States is currently experiencing high levels of income and wealth inequality and stagnant social mobility. This course will ask why this is and what, if anything, should be done about it. We will consider both social and individual explanations for inequality and social mobility, and we will examine efforts to decrease inequality and increase social mobility through educational and legal means. This is a junior tutorial.

Course Notes: **This course will be lotteried.**

Justice and Reconciliation after Mass Violence (128057)

Jonathan Hansen

2020 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This seminar examines the problem of justice and reconciliation after mass violence: How does a nation sundered by genocide, civil war, or gross human rights violations reestablish the social trust and civic consciousness required of individual and collective flourishing? What is the proper balance between individual and collective responsibility? What is the role of apology (or confession) and amnesty in civil reconciliation? How do specific types of mass violence influence outcomes? What makes some reconciliations successful, others less so? The course engages these and other questions from historical and contemporary perspectives, exploring the legacy of mass violence going back centuries, while examining reconciliation projects across cultures, countries, and continents.

This course comprises three units: 1) a typology of mass violence (civil war, genocide, state repression, for instance) and historical responses; 2) case studies of the U.S. Civil War (and its continuing legacy), the Balkan Wars, and the Rwandan genocide; and 3) a research and writing workshop emphasizing students

own work. The goal of the course is to introduce students to the literature of mass violence from an interdisciplinary perspective (including but not limited to historical, sociological, and anthropological approaches), ultimately launching students on their own research projects. This is a junior tutorial.

Global East Asia (108761)

Nicole Newendorp

2020 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

In this course, we will explore how social life in contemporary East Asia is both influenced by and contributes to processes of globalization. Ethnographic readings on China, Korea, and Japan focus on migration, gender roles, consumption, media, and markets as we trace the role of the global in everyday life for rural and urban inhabitants of a variety of East Asian locations. For these individuals, engagement with the global structures how they make sense of the world and creates desires for future life change. This is a junior tutorial.

Humans, Technology, and Biopolitics (109964)

Anya Bernstein

2019 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Recent scientific and technological advances are increasingly questioning what it means to be human. Debates on life extension, gene editing, and artificial intelligence regularly appear in the media, with views ranging from techno-optimism—the idea that such breakthroughs will deliver us from suffering—to the warnings that technoscience is advancing at such a rapid pace, that there is not enough time for ethical guidelines to be developed. Some argue that science is increasingly delivering on the promises traditionally made by Judeo-Christian religions, while others assert that such techno-optimist thinking is a kind of new religion in and of itself. Debates around emerging technologies cut across traditional political lines, making them specifically biopolitical, where such issues as human enhancement, control of reproduction, genetic engineering, and many others, create new types of political positions and actors.

This course will examine these issues, focusing specifically on what concepts of "the human" emerge from these debates, and how certain ideas about the future affect how we live and manage our time now, as futurist discourses are producing affective states of both hope and fear. Among the case studies for this course, we will look at the cultural and philosophical movements of transhumanism and posthumanism, new utopian and eschatological imaginaries, as well as ethical and legal questions of developing and using biomedical technologies, including their non-therapeutic use. As we proceed, we will pay particular attention to the shifting relations between body and person, human and time, transcendence and corporality, and technology and biology, while discussing how they contribute to the rethinking of the human condition in the technological age. Materials for the course will include academic pieces from a range of disciplines: STS, anthropology, philosophy, bioethics, as well as non-academic media sources, documentaries, and science fiction films. This is a junior tutorial.

Crime and Security in Latin America (203415)

Ieva Jusionyte

2020 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course examines crime and security in Latin America (and their relation to the United States). We'll focus on the following questions: What is the logic behind naming some but not other things and practices criminal? How does the act of outlawing stem from and feed into anxieties over safety? To what extent does crime produce insecurity, and how does insecurity create crime? Particular attention will be paid to the power asymmetries that underlie legal and political construction of threats and the significance of an ethnographic approach to understanding these dynamics and their effects. This is a junior tutorial.

Rethinking Transnational Feminism (160159)

Angela Maione

2019 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

While some claim that global feminism is made possible by a shared common condition among women,

others argue that power differentials make such claims nonsensical. What does transnational feminism mean for politics today? Can it be democratic? How have historical figures attempted to think and act on a world stage? This course offers a broad overview of transnational feminism through one genealogy of its appearances in theoretical, social movement, and institutional forms. This is a junior tutorial.

The Critical Theory of the Frankfurt School (156263)

Charles Clavey

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This junior tutorial examines the distinctive critical theory created by members of the Institute for Social Research—better known as the Frankfurt School—from its origins in the interwar era to the present day. Over these decades, critical theory has used tools from philosophy, psychology, and sociology to grasp the pathologies of the present and to chart a path towards emancipation in the future. We will reconstruct the Frankfurt School's evolving theory through its connections to the most important themes of twentieth-century thought: capitalism, authoritarianism, individuality, bureaucracy, and alienation. Our goal is not only to gain a deep understanding of critical theory but also to assess its continued relevance to modern social and political thought. This is a junior tutorial.

Rawls & the Moral Feelings (205452)

P. MacKenzie Bok

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This tutorial will use the Harvard archive of the philosopher John Rawls to uncover his work on a complex theory of moral feelings in the 1950s. This moral theory would come to underpin Rawls's political philosophy in his famous text *A Theory of Justice*, yet most of the relevant documents are unpublished. After learning approaches for archival research from this case study, students will write a historical research paper using other materials in the Rawls archive -- or another archive, with permission of the instructor. This is a junior tutorial.

Democracy and Education in America (205453)

Leslie Finger

2019 Fall (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course explores the political dimensions of education policy in the United States. It examines the various political factors that have contributed to modern battles over education policy making. The course draws from political science scholarship as well as other disciplines to explore how race, the courts, unequal political participation, interest group advocacy, social movements, as well as local, state, and federal institutions have impacted education in the U.S. The last few weeks are spent applying these ideas to the case of school choice and charters. Throughout, the course considers the normative implications of education policies and battles, asking how particular education proposals and the behavior of the actors pushing them impact the health of democracy. This is a junior tutorial.

The Ideal of the Open Mind (205483)

Adam Sandel

2019 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

We commonly consider an open mind as essential to fair-minded moral, political, and legal judgment. If you are called for jury duty, for example, you will likely be asked whether you are confident you can judge the case with an open mind. If you answer "no," you will be dismissed from the jury. To have a closed mind is to resist the possibility of persuasion, to be dogmatic, recalcitrant, even bigoted. But what exactly is an open mind?

This course will examine and assess the ideal of the open mind as it has emerged in the Western philosophical tradition. In the first half of the course, we will consider the ideal of detachment and impartiality that emerged during the Enlightenment and remains influential today. In the second half of the course, we will examine various attempts to recast and revive the case for tradition, partial association, and interpretive pre-judgments that emerged in reaction to the Enlightenment, some of which harken back to ancient political thought.

Throughout the course, we will address questions of contemporary relevance, drawn from the realms of law, politics, culture, history, and philosophy. For example: Is an impartial jury the same as a fair jury? Is political rhetoric invariably a form of manipulation and deceit, or is it a way of persuading people by appealing to them from within their own perspectives? Is one's own upbringing and linguistic background a regrettable limitation to the understanding of other cultures, or a resource for mutual understanding? Should we try to understand the past by setting aside our contemporary views and assumptions, or by drawing upon them? In what sense should a liberal arts education aim at cultivating an open mind? This is a junior tutorial.

The Politics of Culture in Europe (207902)

Andrew Brandel

2020 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

With the birth of "modern Europe," cultural difference emerged at the center of urgent debates about the organization of society. Even our present political moment seems to be defined by migration "crisis" and globalization. Public discourse appears to be structured by questions about how we might make a place for others in our societies, or whether we should. Does welcoming others require more than the tolerance of their differences? How/should migrants "integrate" into host cultures? Does an increasingly connected and mobile world mean that cultural differences will be replaced by a uniform global culture? By the same token, does integration mean the potential loss of European culture? What does it mean to have a culture in the first place, who belongs to it, and what kinds of boundaries do they have, if they have them at all? Scholars and politicians have proposed a variety of concepts to help us describe this social reality - concepts like *multiculturalism, interculturalism, diversity, globalization, cosmopolitanism* – each of which comes with its own political projects. In this tutorial, we will ask where these concepts come from, how have they changed, and how do they impact people's lives?

We will trace the history of this network of ideas, from the cosmopolitanism of the 18th century urban elites to the Syrian refugee "crisis" that has defined recent political contests on the continent. Cases will include recent migrations of peoples from former colonies to Europe, forced migrations from the margins to the metropole under the Soviet regime, and internal displacements of groups like Ashkenazi Jews and the Roma. In each case, we will pay close attention to the ways in which social scientific knowledges – and in particular, shifting ideas about "culture" - are implicated in these different political positions.

Students will be introduced to empirical research methods in discourse analysis and ethnographic fieldwork, including how anthropologists and sociologists combine interviews and participant-observation with policy analysis. This is a junior tutorial.

Neoliberalism and Its Discontents in the Middle East and North Africa (207914)

Jeremy Siegman

2019 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course offers students a theoretical and empirical understanding of neoliberalism - understood, inter alia, as a form of governance that approaches all spheres of life through the lens of the market. The course explores neoliberalism not merely as economic policy but as a set of transformations, roughly since the 1970s, in class relations, everyday life and politics; these transformations speak to broad social-science questions about society, power and politics. The course thus examines neoliberalism from theoretical, political-economic, historical and anthropological perspectives, and students practice associated research methods through assignments. Readings range from key expositions and critiques of neoliberal thought, including F.A. Hayek and Wendy Brown, to empirical studies of neoliberalism in the realms of development initiatives, urban life, war and colonialism, and the recent Arab Uprisings. Empirical materials come largely though not entirely from the Middle East and North Africa. Prior knowledge of the Middle East is not required, and research papers need not focus on the region. This is a junior tutorial.

Aesthetics and Politics (211214)

Ana Isabel Keilson

2020 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Since Ancient Greece, individuals have considered aesthetics, defined alternately as the appreciation of art and beauty and the felt (sensible, embodied) experience of the world, as a way to theorize society and politics. This course examines the history of ideas about aesthetics by major modern political thinkers (Kant, Burke, Hegel, Nietzsche, the Frankfurt School, Chantal Mouffe) alongside their cultural contemporaries in the literary, visual, musical and performing arts. This is a junior tutorial.

Constitutional Theory and the American State (213279)

David Lebow

2019 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This junior tutorial introduces students to American constitutionalism and explores its relationships with the American state, American democracy, and American history. The syllabus consists of four distinct, but interconnected modules. The first module is an introduction to constitutional theory: it explores theories of judicial review, constitutional interpretation, and constitutional change. The second module situates constitutionalism in the American political tradition, teasing out its intertwining with liberal, republican, and racist threads of thought. The third module provides a theoretically informed survey of representative topics in American constitutional history: economic regulation in the early twentieth century 'Lochner era', the arc from 'Jim Crow' to civil rights, the breakdown of the postwar liberal consensus, and democratic constitutionalism in the women's rights movement. The fourth module takes up major theoretical issues alive in contemporary constitutional debates: the administrative state, inequality, and campaign finance. The tutorial is intended to be accessible and interesting to a wide range of students with interests in any of the following: political theory, constitutional law, American political thought, American history, and contemporary legal controversies. This is a junior tutorial.

Caste, Race, and Democracy (213297)

Hari Ramesh

2020 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Drawing on the resources of social and intellectual history, political theory, and social science, this tutorial will explore the intimacies and differences between two forms of social differentiation: caste in India and race in the United States. We will focus, in particular, on the relationships between caste, race, and imperial power; the diagnoses of and forms of democratic resistance to caste and race subjugation that were articulated in the 19th and 20th centuries; and the place of contemporary social science in documenting both the persistence of oppression along caste and racial lines and the success of efforts to combat such oppression. This is a junior tutorial.

Race and Ethnicity in the United States (213256)

Christina Ciocca Eller

2019 Fall (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The United States is more racially and ethnically diverse than at any point in its history. Yet racial and ethnic social categories remain persistent sources of inequality in American society. This tutorial will interrogate the relationships between race, ethnicity, and inequality, examining theoretical and empirical approaches across multiple social domains. It particularly will emphasize how race and ethnicity structure experiences, opportunities, and outcomes in important social contexts such as neighborhoods, educational institutions, and the labor market, among others. This is a junior tutorial.

American Social Movements (213296)

Lisa Gilson

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

The world we live in is the product of social movements of all kinds. Yet the means by which they have succeeded in reshaping the world are poorly understood. Even when movement strategies are clear – which they often are not – they are controversial, with activists, academics, and the broader public debating the efficacy and ethics of various protest tactics. This course aims to make sense of these debates by studying a selection of U.S. social movements from the mid-20th century to the present. We will examine movements across the ideological spectrum, focusing on the conditions which gave rise to them, how they mobilized, the strategies each adopted, and the dilemmas they encountered in the course of political action. The course will move roughly chronologically from the Civil Rights Movement through SDS, second- and third-wave feminisms, the Moral Majority, the Tea Party, Occupy Wall Street, Black Lives Matter and Antifa to the Alt-Right. This is a junior tutorial.

Course Notes: **This course will be lotteried.**

Class Notes: **This course will typically run from 3:15 – 5:15 p.m. and will occasionally run to 5:45 p.m.**

The Many Faces of Tyranny (213280)

Rosemarie Wagner

2019 Fall (4 Credits) **Schedule:** R 0345 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course explores the way tyranny has been presented in different times and places, and the many ways tyranny can create unfreedom. From a wild man out of control, to a carefully orchestrated system of control, tyranny wears many faces. This course begins with Plato's tyrant who rises from the rubble of a failed democracy, through Hobbes's tyrant, to modern accounts of the tyranny of the majority, of empire, and of structural oppression. Through this course we will examine what a tyrannical nature is, what makes it rise to power, and what can be done to stop it. This is a junior tutorial.

Capitalism, Time, and Value (213266)

Tracey Rosen

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

College students are often counseled to "make the most valuable use of their time." The "budgeting" of hours, days, and weeks of a semester often rests on an evaluation of how much time an activity is worth. In this tutorial we will explore how capitalism might shape the way we perceive, understand, and value time. We start from the premise that economic systems do more than organize the production and distribution of goods; they also help organize how we experience the world as well as the meanings and values that shape our actions within it. In order to ground the dynamics of time and value within capitalism, we begin by drawing from anthropological and historical examples to consider the relationship of time and value in a variety of pre-capitalist contexts. The course then considers the way in which capitalist transformations coordinate new forms of value and perceptions of time. We end with an examination of our everyday, contemporary experience of time against the backdrop of "neoliberal" capitalism and the rise of "futures" markets. This is a junior tutorial.

Sociology

Subject: Sociology

Sociology 90I

Research Lab: Immigration (207118)

Leah Muse-Orlinoff

2019 Fall (4 Credits) **Schedule:** R 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 8

What does it mean to be a "good" immigrant? Is current media attention on immigration perpetuating an image of "deserving" and "undeserving" immigrants? How is coverage of immigrants' race, gender and sexuality, and human capital evolving in the current political context? And what implications for immigrant integration – the two-way process by which immigrants and their communities of settlement interact and adjust to one another – might be emerging from the media's depiction of immigrants and immigration policy?

In this research lab students will learn data collection and analysis skills that will help them answer these and related questions. Course content will include a robust research design and methodology component through its focus on media coverage of immigration and integration in mainstream and ethnic media. Course participants will develop qualitative research projects that analyze key sociological themes including race and ethnicity, gender and sexuality, and human capital. Students will learn how to formulate sociological research questions and hypotheses, collect and analyze data, and articulate findings in a formal academic proposal. This course is limited to sociology concentrators; bilingual students are encouraged to enroll.

Course Notes: **Limited to Sociology concentrators. Preference given to those who have taken Sociology 128.**

Sociology 97

Tutorial in Sociological Theory (115130)

Jocelyn Viterna

2020 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces students to the complicated, conflictual, and often contradictory theoretical origins of sociology as a discipline. We begin by reading the standard sociological "canon"—Marx, Weber, and Durkheim—and interrogating why their ideas were canonized over others. We then read scholars who have been historically "written out" of the social sciences to evaluate their important, yet historically underappreciated, contributions. By the end of the course, students should (1) master key concepts in classical sociological thought, (2) understand what it means to theorize, and what makes for good theory, and (3) learn to critically interrogate the relationship between power, standpoint, and the production of knowledge.

Course Notes: **Required of concentrators, ordinarily sophomores, and secondary concentrators.**

Class Notes: **First mandatory meeting Jan 27, 4:30-5:30**

Junior Tutorial: Race and Bureaucracy (212661)

Yael Berda

2020 Spring (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

We usually think of issues of race, racism and racialization as separate from organizations: corporate firms, departments of the federal government, and even schools. Yet organizations are major sites where racial categories and classifications have an impact on the lives of people and communities. Race and bureaucracy have a long history that begins with imperial and colonial practices and continues to shape the way organizations recruit employees, create different legal practices to different kinds of populations, distribute visas or prevent entry based on race and ethnicity and even decide who gets loans and credit cards.

Using Hanna Arendt's work on race and bureaucracy in the shaping of totalitarian regimes as a starting point, we will explore how racial categories and classifications are constructed, maintained, manipulated and resisted within formal organizations and particularly state bureaucracies.

Following the review of the relevant literature in the first four weeks, students will design and complete their own research projects. To aid in this process, we will have workshops throughout the course on the various steps of the research process, from formulating the question to collecting and analyzing data. We will provide brief overviews of both qualitative methods (interviews and ethnographic observations) and historical approaches (analysis of archival data).

Course Notes: **Required of and limited to Sociology concentrators. Junior Tutorials are by lottery only.**

Jr Tut: Collective Identity (205091)

Shai Dromi

2019 Fall (4 Credits) **Schedule:** T 0600 PM - 0800 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Blue collar and middle class, Blacks and Latinx, Christians and Muslims, Americans and French, Harvardians and Yalies –groups have, by their very definition, some criteria to discern those who belong from those who do not, whether they are as large as whole nations, or as small as a group of friends. But what does it mean for a group to have a collective identity? This course will examine what collective identity is and how we can study it sociologically. It will ask questions such as Does a collective identity rely on group members sharing the same past experiences, or does it rely on them facing similar present circumstances? To what extent do group members have to agree on what their collective identity is, and how are disagreement and conflicts managed? How do group members engage in identity politics, and how do they compare their groups to others?

The course will begin with a review of sociological literature that addresses some of the key debates on this topic. Moving forward, students will design and complete their own research projects. Each student will choose a group in the Boston area or on campus, formulate a research question, and conduct participant observations and / or interviews. The course will cover the various steps of the research process, from formulating a research question through collecting and analyzing data and reviewing existing literature, to constructing the final paper.

Sociology 98M

Junior Tutorial: Social Class (126248)

Rachel Meyer

2020 Spring (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Class, one of the most basic analytical concepts in sociology, structures our social world in fundamental ways. Nevertheless, the extent to which social class is salient to people, and the specific content of class-based identities and class cultures, varies widely. This course is rooted in a comparison of the working class versus professionals and the upper middle class. The focus is on the United States while maintaining a comparative perspective on other national, historical, and cultural contexts. Reviewing a variety of contemporary studies and theoretical perspectives, we will pursue the following questions, among others: How do class-based identities relate to class structure? How are boundaries drawn between classes and among people of the same social class? What might undermine—or bolster—class consciousness in different contexts? And how is social class reproduced? In the U.S. case, how does class intersect with other aspects of American culture? Are class-based identities racialized? Throughout the course we will be attentive to the variety of research agendas on the topic and the various kinds of data that are brought to bear on these questions. After reviewing the relevant literature students will then design and execute their own original research projects that seek to elucidate some aspect of class identity or class culture. Students will have the opportunity to engage in each step of the research process, from question formulation and data collection to analysis and write-up. Along the way we will have workshops on the process of conducting primary research and on each student's project. The methodological focus will be on interviewing, with an attention to how ethnographic data and surveys might also shed light on the subject.

Junior Tutorial: Sports and Violence (212667)

Danilo Mandic

2019 Fall (4 Credits) **Schedule:** M 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

How are sports and violence related? What role does sports play in especially-violent communities and societies? How come athletes are so often connected to violent behavior? Why are some sports more violent than others? Students will explore familiar and strange sports connections to activism, poverty, gangs, hooliganism, rioting, nationalism, war, international politics, and organized crime. We will learn why sport elicits such emotional fervor, and how that fervor is transmitted into good and bad social channels. A variety of case studies across the globe and history - from Brazilian soccer, to Cold War chess, to cricket under the British Empire - will be analyzed. This tutorial, aimed at junior concentrators, requires students to produce an original research project on a sport of their choosing (not necessarily one covered in the syllabus), addressing a particular case of sports-related violence. In addition to learning about the topic, students are expected to master skills in sociological methods and writing. Two concluding weeks will be devoted to presentations and workshopping, as students develop an independent research project with original data collection.

Junior Tutorial: Ethnography of Social Movements (212755)

Vivian Shaw

2020 Spring (4 Credits) **Schedule:** W 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

From the Universal Declaration of Human Rights, to the Civil Rights Movement, to Twitter, the world has recently witnessed a wide range of social, political, and cultural transformations. How do social movements factor into these changes? What can we do as sociologists to understand and document the work of activists and social movements? This tutorial explores the craft of ethnography through the theme of social movements. We will examine key ethnographies of social movements, using these as models for understanding and conducting ethnographic fieldwork and analysis. Drawing on each student's research interests, participants in this course will complete an independent research project on some aspect of social movements, employing ethnographic methods. Through in-class workshops, we will formulate research questions and practical research design. The goal of this course is to provide you with the opportunity to conduct original research and to better understand the insights and challenges of ethnographic fieldwork.

Junior Tutorial: Elite Education and Inequality (160224)

Tiffanie Ting

2019 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Privilege is an understudied but important topic in educational and social science research. Recent

scholarship increasingly attends to the role that elite educational institutions play in producing and maintaining social and economic inequalities. In this course, we will investigate the connections between class, privilege, and educational advantage. By employing the lens of cultural sociology, we will explore various contexts for elite education, the cultural practices around which they are organized, and the ways in which individuals negotiate a sense of legitimacy and identity within these spaces.

Junior Tutorial: Poverty (213641)

Hilary Holbrow

2020 Spring (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Nearly one in three residents of the United States lives close to the poverty line, and a growing number of us live in deep poverty, subsisting on less than $2 per day. This course examines the social world of poverty in the United States today. It pays particular attention to the lived experiences of low-income people. It also examines the parallel set of institutions low-income people must navigate—institutions that often perpetuate poverty: low-wage jobs, systems of policing and surveillance, substandard schools and colleges, exploitative housing, and predatory financial services. During the semester, students will conduct an extended research project about some aspect of poverty in the United States. The project will be a chance to hone important research skills, including conducting interviews and taking ethnographic fieldnotes, analyzing and presenting qualitative data, figuring out the "so what?" behind empirical findings, and thoughtfully giving and receiving peer feedback.

Models of Social Science Research (117560)

Mary Waters

2020 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces students to core methodological concepts and methods used in social science research including: question formulation, hypothesis generation, the logic of hypothesis testing, sampling and measurement, experiments, survey analysis, content analysis, network analysis, ethnography, and in-depth interviewing. Students will develop the analytic skills necessary to assess whether published research studies are flawed or well designed and implemented. In addition to critically evaluating previous research, students will collect and analyze their own data based on the different methods discussed in the class. By the end of the course, students will acquire valuable research skills widely applicable in academic and professional settings..

Sociology 1023

Political Sociology (159779)

Bart Bonikowski

2020 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Politics is a struggle for power—power over access to and the distribution of resources, over personal and collective status, and over the ability to define legitimate categories of thought. While politics can be found in all domains of social life, the ultimate site of political contestation is the state, which holds the legitimate monopoly on physical and symbolic violence. Hence, much political sociology is concerned with the relationship between the state and society: how the modern state came to exist, how it came to be viewed as legitimate, what factors shaped processes of democratization, how cleavages based on class, race, and gender affect democratic representation, how liberal democracies structure their welfare state policies, how states create and manage markets, and how social movements strive to effect political change by making claims on state actors. This course will offer an overview of these varied substantive topics, while exposing students to the analytical power of a sociological approach to politics.

Social Inequality (117584)

Jonathan Mijs

2019 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 35

This course is an introduction into the sociological study of Social Inequality. Students will learn about sociological theories and read empirical research describing how social inequality is produced and reproduced in various institutions (e.g. the family, neighborhood and labor market) and through different mechanisms (e.g. socialization, segregation, discrimination). We will explore what it would take to address these different sources of social inequality in America, and learn from comparisons with other countries and historical moments.

Introduction to the Sociology of Organizations (113256)

Peter Marsden

2020 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course examines the evolution of the modern organization, focusing on changing approaches to corporate strategy and to managing employees. We read both social scientific analyses and Harvard Business School cases to trace the history of management, from the harsh principles of the "drive system" to the latest theories of how "work teams" improve productivity and how focusing on a firm's "core competence" improves the bottom line. The course covers research examining the efficiency and the equity of current corporate practice

Global Social Change (109657)

Rachel Meyer

2019 Fall (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores the development of global capitalism with a focus on changing relationships between markets, states, and civil societies. Questions of power and inequality will be central to our approach. We will begin from a macro political economy perspective, exploring global social change through the lens of

world-system theory, neoliberalism, deindustrialization, and "flexible accumulation." We will then examine globalization "on the ground" in a variety of local contexts and, finally, turn to resistance and social movements. We will explore transnational activism, student movements, precarious workers' mobilizations, populism, and the role of social media. Throughout the course we will ask: How are social relations shaped in the global north and south in the context of global capitalist development? How can we understand the relationship between global capitalism and democracy? And how can we conceptualize the different forms of resistance to globalization and their significance? We will explore the possibilities for and limitations of global social change through a variety of cases of transnational and community-based activism.

Life and Death by Design (212727)

Jason Beckfield

2019 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In this course, we will study health differences between social groups. We will begin by examining the extent to which health is unevenly distributed across groups defined by nationality, neighborhood, race, gender, and class. We will then seek to pinpoint the reasons for these disparities with a detailed analysis of the pathways through which these factors are linked to health status. Finally, we will discuss new research on the sociology of population health that shows how health disparities depend on meso- and macro-scale causes like neighborhoods, social policy arrangements, global organizations, and climate change.

Environment and Inequality (212756)

Vivian Shaw

2020 Spring (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

How does your zip code affect your health? What are the social and political consequences to building a dam? How do natural disasters exacerbate racial inequalities? This seminar explores environmental issues through the lens of inequality, focusing particularly on race, indigeneity, gender, and (dis)ability. We will borrow from case studies across the globe: from toxic disasters in Bhopal, India, to the Grenfell Tower fire in London, UK, to Standing Rock, in the United States. While learning about the transnational and comparative-historical scope of environmental issues, students will apply key theoretical tools to situate course topics within broader themes, including cultural memory, popular culture, violence, and governmentality. Students will also develop an expertise in a course-related topic of their choice.

Humanitarian Activism and Civil Society (203440)

Shai Dromi

2020 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

International humanitarian organizations are often first on the scene when armed conflicts erupt or natural disasters strike, but their efficiency and legitimacy are constantly questioned. This course examines humanitarian activism from a sociological perspective by looking at its history and its role in contemporary society. We will examine the origins of organized humanitarian activism and the dilemmas and challenges that NGOs must often face. We will investigate the consequences, justifications, and limitations of humanitarian work, focusing substantively on several case studies including the Kosovo War, the Nigerian Civil War, and the 2004 Indian Ocean Tsunami. The course will conclude with presentations based on students' independent research and exploration of an applied topic from the course.

Latinx Identity and Mobilization (211161)

Cristina Lacomba

2019 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course examines Latinx identity and mobilization from a sociological perspective. It begins by investigating the complexity of the Latinx identity in the United States. Does Latinx refer to a culture that encompasses many cultures, a common geographical origin, a shared linguistic identification, some or all the former? How does the use of pan-ethnic identities, of which Latinx is a representation, shape power, representation, and inequalities within and between social groups? The course will first focus on sociological theory of ethnic identity construction. Students are then asked to apply their newfound understanding of the Latinx identity to an analysis of Latinxs' mobilization and social movement activism. What socio-political issues undergird Latinxs' mobilization in modern times? How well does social movement theory explain Latinx mobilization? The course discusses the formation of Latinx identities and mobilizations of Caribbean, Northern, Central, and South American people/s in the United States.

Racial Inequality and Public Policy (211146)

Anne-Marie Livingstone

2019 Fall (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The course examines the complex interplay between racial inequality and public policies in the United States and other Western countries. The course will blend together insights from the general literature on policy-making with the specific study of racial politics and policy. Students will learn how to view racial inequality as a political process that shapes public policy through its impact on everything from cultural beliefs, to political parties, public opinion, political representation, social movements, and interest groups. With these concepts in their grasp, students will then examine how these dynamics play out in different areas of public policy, including welfare, criminal justice, housing, health, affirmative action, immigration, and detention. Students should walk away from the course with an understanding of how to connect racial inequality and politics with the content and outcomes of public policy.

Leadership, Social Change, and its Challenges: Boston as a Case Study (212901)

Christopher Winship

Ira Jackson

2019 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 36

Over the last half century Boston has faced a multitude of issues and crises. Reoccurring themes have been the problems of inequality, race and ethnicity, class, and social justice. Their resolution as successes or failures has depended on the actions taken by leaders – individuals or groups. The role of leadership will be analyzed in part through major milestone events -- such as race in the Boston Red Sox and Celtics, the school busing crisis, the sexual abuse scandal in the Catholic Church, the cleanup of Boston Harbor once the filthiest in the US, the "Boston Miracle" in community policing, the "Grand Bargain" around the state's minimum wage, current criminal justice reform efforts, the Encore Casino, and the development of the Seaport and Alston. Key protagonists from each case will visit the class. For their final project students will be required to create a case of their own. This may involve interviewing or shadowing a leader for a day.

Human Rights in Israel and the United States (207866)

Tally Amir

2019 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

"Human rights" has become a ubiquitous concept around the world. It is used to justify, legitimize, and critique policies, practices, and laws. Despite the evolution of "human rights" over the last half-century in both international and domestic law, the content and impact of the concept remains unclear. This seminar will address key issues in contemporary human rights theory and practice through a comparison of Israel and the United States. Seminar participants will first study the philosophical and political processes that led to codification of human rights in both countries. We will then take a closer look at some of the main human rights controversies, including desegregation of education, freedom of religion, housing equality, extra-territorial application of human rights, and employment rights. Readings for the course include Court decisions, International Law instruments, Domestic legislation and socio-legal articles, as well as sociological analyses.

Class Notes: **Course will typically end by 2pm but may run until 2:45.**

Understanding Meritocracy (212827)

Jonathan Mijs

2020 Spring (4 Credits) **Schedule:** R 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Some hold inequalities to be the result of a fair "meritocratic" race that is decided by hard work and effort alone. Others believe the race is fixed: some of us, because of their gender, color of skin, or their parents' resources have a much better shot at winning than do others. This course challenges students to critically evaluate the concept of meritocracy, its origins and contemporary adoption as an ideal worth striving for. Taking a sociological perspective, we ask what a true meritocracy would look like, what its societal implications would be, and what social processes may stand in its way. We then review the empirical record describing people's various perceptions and explanations of social inequality, and we explore the factors underlying their beliefs. Specifically, what are the psychological underpinnings of people's beliefs about inequality and what role does culture play? Are people's beliefs most impacted by news reporting, by facts or by experience? We conclude by exploring how beliefs about inequality are mobilized in class and racial conflict, and explore in what ways people's beliefs are or aren't likely to change.

Social Class in the Black Community (205208)

Jacqueline Rivers

2019 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course focuses on the rise of class divisions among Black Americans. The effects of structural constraints on blacks' social and geographic mobility and how that resulted in a sense of "shared fate" will be the focus of the first portion of the course. The divergence of black people's material conditions as a result of the successes of the Civil Rights Movement, and the impact of factors such as black flight, deindustrialization and spatial mismatch of employment will be discussed. Other topics include changes in blacks' patterns of support for public policy options, divergences in their experience of mass incarceration, education and employment opportunities, and continuing similarities in academic underachievement. The conclusion of the course examines the roots of intergenerational poverty and considers the possibility that the gap between the two groups will continue to widen.

Social Movements (212768)

Cristina Lacomba

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 35

Social movements are powerful engines of social change. Remarkable ordinary people lead them, and outstanding people join their mobilization. But what is a social movement? What do social movements' protesters rebel against and why? What strategies do they use? Do social movements' activists achieve the changes they pursue?

Protesters and authorities have long tried to answer these questions in their quest to attain, or even silence, social change. Scholars have approached these questions through social scientific interrogation. In this course, students will read some of the finest sociological scholarship on these debates to examine a variety of movements that range from the U.S. Civil Rights of the 1960s to the latest movements of the 21st century.

Whether one's purpose is to understand the world or change it, the course will illuminate the real-life implications of social movements for activists, authorities, and bystanders. Through the course, we will come to understand the general processes that underpin collective mobilization, reflect on how collective mobilization drives these efforts, and formulate new ideas for how best to achieve social change.

Immigration and Gender (213351)

Talia Shiff

2019 Fall (4 Credits) **Schedule:** T 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The study of immigration and the study of gender often do not intersect. This is despite the fact that scholars in both fields of study focus on questions concerning cultural membership and equal citizenship and the processes that produce social inequality. The goal of this course is to reinvigorate the linkages between gender and immigration. We will interrogate how gender, as it intersects with race, shapes practices and policies of im/migration and migrants' lived experiences: what is the gendered character of migration patterns, and policies? How does migration occur on a voluntary and involuntary basis in ways that disproportionately disadvantage marginalized groups along lines of gender and race? And conversely, in what ways do the practices and consequences of immigration and transnationalism shape and constitute gender relations? The course will combine discussions of current issues on public media and news articles with academic analyses to encourage students to think about the complex interrelations between immigration, sexuality, gender and race, and the ways these shape our social world.

Sociology in the Age of Big Data (207631)

Joscha Legewie

2019 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course introduces students to how "big data" transforms our understanding of the social world. Focusing on topics like racial bias, partner & friendship choice, public opinion and polarization, and urban inequality, we explore how the digital age changes sociological research. We discuss transformative contributions to classical sociological questions based on the "new" science of networks, web-based social research, administrative data, and the traces of our digital lives. We explore important advances, the challenges facing the social sciences and consider ethical and privacy concerns raised by "big" data and analytics.

Student Leadership and Service in Higher Education (205039)

Manja Klemencic

2020 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

This Undergraduate Engaged Scholarship Course specifically targets students in service and leadership roles at Harvard (e.g. student leaders in student organizations, students serving on University committees or as interns in University offices or programs, PAFs, HOCOs, UC members, Crimson, etc.). To these students it offers an opportunity to engage with scholarship from sociology of higher education to better understand and explore student agency in college contexts. Through hands-on student leadership development workshops built into the course, students will also develop skills that will help them in their roles. Students' grasp of concepts, such as university citizenship, mattering, belonging, community-building, and self-formation, is reinforced through their experiential learning in existing service and leadership roles on campus. Based on their campus role, students work on participatory action research and develop blueprint to change practice or policy. Invited guest speakers bring insights from practice and conduct student leadership development workshops. A field visit to institutions in Boston area helps students understand student agency in different university contexts, share experiences and explore collaboration. This course challenges the traditional line of inquiry in sociology of higher education which focuses primarily on the effects of college on students. Instead, student action research projects demonstrate student agency and the impact students have on higher education communities.

Philanthropy and Nonprofit Organizations (203368)

Shai Dromi

2019 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** 50

Most moral and religious frameworks uphold some form of benevolence and charity. However, societies have different ways of thinking about the roles of philanthropy and nonprofit organizations. This course investigates the nature of philanthropy and nonprofit organizations, as well as their influence on civil society. We will consider different sociological approaches to charitable giving and apply them to substantive topics, such as competing philosophies of giving and the relationship between philanthropic and state-sponsored programs. We will also address issues of social responsibility that arise when

billionaire and corporate actors engage in philanthropic work.

As a culminating active learning exercise, students will work in groups to identify and evaluate nonprofits as potential donation recipients, and will assess the impact a donation would make for those organizations. Student groups will have a unique opportunity to decide how to disburse a grant provided by the Philanthropy Lab to nonprofits, and to experience first-hand the dilemmas donors face as they evaluate nonprofits for donation.

Global and Transnational Sociology (213352)

Talia Shiff

2020 Spring (4 Credits) **Schedule:** R 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course explores the production of social inequality from a global and transnational lens. The course is based on the premise that we have to think about core issues concerning unequal access to rights, resources and cultural membership globally while at the same time not denying the importance and centrality of the unit of the nation state. In this course, students will not only compare differences across countries but will also develop tools by which to critically think about what it means to see the world as a unit that is populated by markets, movements and networks that transcend national boundaries. We will ask how the national and transnational are interrelated and mutually constitutive of each other. Students will have the opportunity to explore questions concerning borders and boundaries, forced migration, and changes in the relations between civil societies, states and markets. Through considering these topics of global social change, students will critically investigate the limits and potential of establishing a global sociology for understanding social relations at local, national, and international scales.

War, Revolution, and Organized Crime (159926)

Danilo Mandic

2019 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course explores war, revolution and organized crime as interrelated social phenomena. Students will read sociologists, historians, political scientists and philosophers addressing the nature, causes and

consequences of these phenomena in different national and historical contexts. The course will combine influential theoretical frameworks (by Karl Marx, Max Weber, Sigmund Freud, Hannah Arendt), middle-range social scientific approaches (by Anthony Giddens, Charles Tilly, Michael Mann, Theda Skocpol), and empirical and historical analyses (by Eric Hobsbawm, Benedict Anderson, James C. Scott, Eugen Weber). The three phenomena will further be scrutinized through their (mis)representation in movies by Mike Nichols, Milos Forman, Bernardo Bertolucci and others.

Education and Culture (156083)

Tiffanie Ting

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

In this course, we will use culture as an analytic lens for investigating the institution and experience of school. We will examine 1) relationships and borders between schooling and broader educational contexts including families and communities; 2) schools as dynamic social and cultural systems, and 3) classrooms as sites of conflict, collaboration, and innovation in teaching and learning. Throughout, we will consider how individuals in a variety of roles – teachers, students, administrators, parents, researchers – interpret, negotiate, and respond to the practices and arrangements of schooling. We will examine the complex role of cultural factors in producing, maintaining, and potentially reducing inequalities in educational access, opportunity, and outcomes.

The Israeli/Palestinian Conflict: Contemporary Socio-Legal Aspects (212817)

Tally Amir

2020 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The decades-long Israeli-Palestinian conflict has attracted significant international attention and is perceived as an international threat. This seminar offers a nuanced and safe discussion of the conflict's socio-legal context and its implications for Palestinian and Israeli society, through exploring the works of scholars from diverse backgrounds and views. We will take a closer look at some of the main controversies, and how these impact the lived experiences of people in both societies, including Israel's

control over and settlements in the West Bank; the separation wall and policy; concepts of citizenship, migration and refugeehood; Palestinian and Israeli statehood; and more. Readings for the course include court decisions, international law instruments, and domestic legislation, as well as sociological analyses.

Religion, Politics, and Society (212762)

Shai Dromi

2020 Spring (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 35

While many countries profess a separation between state and religion, faith and religiosity remain central to political life, both in the United States and in the global scene. In recent years more than ever, religious figures have been deeply involved in electoral processes, in welfare and charity, in social justice movements, in war-making, and in peace-building. Given the changing dynamics between faith and politics, it is doubly important for us to understand the multiple ways religion and politics interact. This course will examine the intersections between religion and politics by exploring questions like why do some religious groups engage in political activism, while others shy away from it? why do some countries try to regulate religious expression in their public spaces, when others celebrate it? why do certain religious groups resort to violence to achieve their aims, and how do some religious groups strive for social justice and peace?The course will begin with a broad overview of the sociology of religion by linking classic sociologists like W. E. Du Bois, Emile Durkheim, and Max Weber to contemporary issues of faith and politics. It will continue by examining key meeting sites between politics and religion, such as social movements, welfare systems, terrorist organizations, and peacemaking initiatives. Case studies will include the French headscarf controversy, the U.S. Evangelical involvement in the 2016 elections, the Muslim Brotherhood welfare system in Egypt, and the religious-nationalist Hindutva movement in India. As a final project, students will write a term paper on a study case of their choice.

Contemporary Chinese Society (116219)

Ya-Wen Lei

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Situating China in the context of the transition from socialism, this seminar provides an overview of contemporary Chinese society. We will explore recent structural changes in China's economy, political system, legal institutions, media, family forms, education, stratification and inequality, and contests over space—as well as how all these various changes interact with one another. We will begin with the Chinese Communist Revolution and then the Cultural Revolution as crucial historical context, and then move on to examine the profound social transformations of the post-1978 reform period. The course will examine how these changes have impacted social relations, how they have been experienced and understood by individuals, and how, in turn, the responses of individuals have also shaped the trajectory of reforms.

Sociology of Asian America (212728)

Vivian Shaw

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 35

Today, over 22 million people living in the United States identify as Asian. Asian Americans and Pacific Islanders (AAPI) are one of the fastest growing populations in the US. What are the social, cultural, and political structures that shape the lives of AAPI? How have the experiences of AAPI changed from the nineteenth century to the present? This course takes a sociological view to examine "Asian America." Rather than analyzing AAPI as a monolithic group, this course explores the diversity of experiences and histories within Asian America. Through readings on a range of case studies, we will examine Asian America through important historical and social phenomena such as colonialism, environmental racism, war, migration, and social movements. We will look at the ways that AAPI have been socially and politically constructed as a racial group and the ways that such categorizations continue to shift. Finally, we will consider contemporary debates about AAPI that are particularly alive here at Harvard, such as affirmative action, socioeconomic mobility, and social justice.

Economic Sociology (204172)

Leah Muse-Orlinoff

2020 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 35

The field of economic sociology brings our attention to ways that economic priorities and processes reflect social dynamics. From ceremonial exchanges of goods in the South Pacific, to the development of modern capitalism, and from interlocking relationships between large corporations to wages, remittances, and social networks, economic sociology considers the social contexts that influence how individuals, communities, and societies organize their resources and how these processes in turn impact our lives. This course offers an overview of economic sociology's major theories and findings across several major themes. The first part of the course focuses on the theoretical underpinnings of economic sociology, and what characterizes a sociological view of the economy. In the second part of the course, we explore some of the social and cultural forces that have shaped key economic institutions such as corporations, insurance, wages and benefits, and marketplaces. The third part of the course considers the impact that these economic institutions have on the quality of life for individuals, communities, and societies. We conclude by asking how the field of economic sociology approaches issues of inequality and social mobility in the United States and globally.

Race and Ethnicity in Global and Comparative Perspective (207630)

Ellis Monk

2020 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course provides an introduction to the comparative study of "race and ethnicity" around the world. We focus here not on particular "ethnic" or "racial" groups, but rather, on particular cases which illustrate how "race" is used as a way in which to divide, sort, and rank human beings (i.e. a principle of social vision and division). In particular, we compare and contrast how different societies have constructed ethnoracial boundaries by focusing on several key forms of ethnoracial domination: categorization, discrimination, segregation, ghettoization, and exclusionary violence. Readings include sociological, historical, and anthropological studies of ethnoracial dynamics primarily in the U.S. and Brazil, but also South Africa, Asia, Western Europe, and Latin America.

Conflict, Justice, and Healing (212659)

Matthew Lee

2019 Fall (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 35

Serious crime and other forms of conflict are experienced as a traumatic violation. This is to be avoided at all costs. And yet… some survivors experience surprising levels of resilience, a renewed sense of meaning and purpose, empowerment, and post-traumatic growth. Some offenders turn towards a deeper sense of truth and existential responsibility. Some communities transcend institutionalized patterns of dehumanization and violence to embrace the challenging path of forgiveness, reconciliation, healing, and inclusive flourishing. When and how do individuals and communities heal after conflict? We engage with these issues through a series of diverse case studies, including contemporary examples drawn from the international Black Lives Matter movement, prisoner reintegration efforts in the U.S., victim/offender dialog in the Middle East, and embodied emancipation in post-apartheid South Africa, as well as classic cases such as the Cuban Missile Crisis. A critical engagement with the emerging fields of conflict transformation and positive criminology reveals potential restorative pathways to individual and communal well-being, and ultimately harm prevention. A growing body of empirical research on the social conditions and processes that give rise to these outcomes will also help us explore such timeless questions as: What is justice? How can "enemies" reconcile? What is the good life?

Subcultures (213536)

Cristina Lacomba

2019 Fall (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

What does subculture mean? Who participates in subcultures and why? What is society's reaction to subcultural mobilization? How do new technologies and the media shape subcultures? This course will mainly draw from sociological theory of culture to examine a variety of national and international subcultural movements around the world. The course also draws from literature on media and cultural studies to provide a further understanding of how subcultural movements arise and evolve. We will analyze different types of subcultures under the lens of class, gender, and race in music, arts, and style movements. Examples include but are not limited to hippies and hipsters, mods, pin-ups, lolitas, or French zazous, rastafarians, pachucos, and hip-hop. The course will explore these forms of identity through theories of resistance, stigma, deviance, fandom and participatory culture among others. The course is of interest to students who want to further their understanding of the relationship between culture, identity, and power.

Qualitative Methods in Sociology (205205)

Danilo Mandic

2020 Spring (4 Credits) **Schedule:** M 0900 AM - 1100 AM

Instructor Permissions: Instructor **Enrollment Cap:** 9

What does it mean to "sample"? What is a good research question, and how can you go about answering it? What do we do about bias in our research designs? This seminar offers an introductory overview of qualitative research methods in sociology. Through a series of hands-on, applied exercises and practical case-studies, students will learn what qualitative research looks like in the real world. Students will receive training in the basic instruments, sampling strategies, data collections, practical dilemmas, and common problems of different methodological approaches. We will learn about the advantages and limitations of interview-based, survey, ethnographic, and archival research. Throughout the semester, students will have weekly applications of methods, including with programs such as Atlas.ti and Nvivo. We will learn how to formulate research questions, conceptualize social phenomena, create research designs, code and operationalize, collect data, and interpret and present findings for different purposes.

Sociology of Law (212660)

Yael Berda

2019 Fall (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** 35

Law has a social life. Actually, it has multiple social lives. First, law is itself the product of social forces. It is shaped by what people fight about, what is taken for granted, and what can and cannot be said. But law is also an institution that makes other social institutions possible. From contracts to borders, citizenship to marriage, law consists of concepts and categories, institutions and processes that create social forms and enforce the rules of multiple games. As we will see this semester, law is both the outcome and the starting point of many social processes, it tells us both the history and the perceived future of a social phenomenon. Even before its inception within the legal structure of mandate Palestine in 1948, Israeli law, broadly defined, has been a site for social controversy and contestation. Issues of citizenship and land ownership, geographical borders and international law, the role of the religion in private and public life, questions of historical legacies from the Ottoman and British empires as well as Hebrew and Muslim law all provide powerful case studies for sociologists of law. We will use these issues in Israel as a comparative vantage point to learn to use our sociological imagination to identify, analyze and explain these social phenomena using law and society scholarship.

Inequality and Society in Contemporary Japan (205106)

Hilary Holbrow

2020 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Japan is at the forefront of a global trend of population aging and decline. Currently the only large, developed country with a declining population, over the course of the 21st century, dozens of other countries in Europe, Asia, and Latin America are expected to begin shrinking as well. The aims of this course are two-fold: first, to understand how institutions, including the family, the education system, the employment system, the welfare state, and social movements of ordinary citizens have shaped Japanese culture and society in unique ways; and second, to consider what Japan can teach us about the likely trajectory of other countries with declining populations.

Throughout the course we will examine how institutions create or mitigate inequalities across various categories of social difference including family background and social class, gender and sexuality, age, national origin, race and ethnicity, and how these inequities are likely to change under conditions of demographic decline.

Immigration and American Society (126223)

Mary Waters

2020 Spring (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course examines immigration to the United States and how that immigration transforms the immigrants as they become Americans and American society as it absorbs the immigrants. We cover theories of international migration and immigrant assimilation, the politics of immigration and nativist reactions, and how immigration policy actually works (or doesn't work). We address legal immigration, the issue of the undocumented, and refugees. Assignments include a visit to immigration court, an interview with an immigrant and an immigration policy memo. We focus on the United States, but also briefly discuss immigration in other immigrant receiving societies such as Canada and Western Europe.

Refugees in Global Perspective (203272)

Danilo Mandic

2020 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The recent arrival of refugees at the U.S.'s southern border and into Europe has caught citizens and policy-makers off guard. Yet such forced migration will continue to rock our globalized world in coming decades. Why are there so many refugees? How are they displaced? Where do they travel, and why? This course will inquire into the nature, causes and consequences of contemporary refugee waves. Students will survey regional dynamics in the Middle East, Africa, Southeast Asia, Eastern Europe and North America. We will examine the particularities of refugees (compared to other migrants) and the changing nature of forced migration since the Second World War. Students will explore historical precedents to contemporary waves, learn about different host society approaches to asylum, compare government and criminal mechanisms of forced migration, and examine the reasons refugees are the object of increasing suspicion and hostility around the world. Particular attention will be paid to Central American migration into the U.S., the recent EU crisis, the role of refugee camps in the 21st century, and alternative strategies for global asylum management by bridge and destination countries.

Nationalism and Ethnic Diversity (212763)

Elke Winter

2020 Spring (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course examines the dynamics of nation-building in the presence of ethnic diversity in contemporary societies. These two phenomena are increasingly frequent but usually regarded as contradictory, if not mutually exclusive, and hence not often discussed together in the academic literature. The course will familiarize students with key issues, concepts, and sociological theories as they relate to ethno-cultural and ethno-racial heterogeneity, the construction of "difference", nationalism, and nation-building. Concentrating specifically (but not exclusively) on the North American context, we examine the logics, successes, and failures of integrating specific forms of ethnic diversity within various nation-building projects.

Overall, the course enables students to better understand if and how ethnic diversity and multiple group identities can be equitably integrated within the boundaries of the nation. It also allows students to assess ambiguities, shortcomings, and failures of concrete nation-building projects and practices.

Intermediate Quantitative Research Methods (119985)

Peter Marsden

2019 Fall (4 Credits) **Schedule:** TR 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Descriptive and inferential techniques used in quantitative sociological research. Emphasis is on the fundamentals of the linear regression model for continuous response variables, focusing on assumptions and interpretation. Motivation, application, and presentation are stressed; topics include categorical covariates, interactions, and diagnostics. Because the linear regression model is the foundation for more specialized models that are often applied in sociological research, the aim of this course is to develop the skills necessary to (a) understand quantitative sociological research, (b) produce convincing analysis, (c) evaluate quantitative analysis, and (d) learn more specialized techniques as needed.

Course Notes: **Required of, and limited to, first-year graduate students in Sociology**

Recommended Prep: **Familiarity with basic statistics.**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Primarily for Graduate Students

Sociology 2203

Advanced Quantitative Research Methods (112874)

Christopher Winship

2019 Fall (4 Credits) **Schedule:** TR 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Matrix approach to regression analysis with an emphasis on the assumptions behind OLS. Instrumental variables, generalized least squares, probit and logit models, survival analysis, hierarchical linear models, and systems of equations are studied.

Course Notes: **Required of, and ordinarily limited to, second-year graduate students in Sociology. Previously offered as 203a and 203.**

Recommended Prep: **Sociology 2202 (formerly 202) or basic course in regression analysis.**

Additional Course Attributes:

Sociology 2204

Classical Social Theory (117877)

Adaner Usmani

2019 Fall (4 Credits) **Schedule:** W 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Introduction to the formative ideas and socio-intellectual contexts of 19th and early 20th century sociological theory. Course will explore social thought from the perspective provided by the problem of social order - and the roles different thinkers attributed to such factors as solidarity, power, and meaning as solutions to this problem. Consideration of the continuing significance of these ideas for contemporary social thought.

Course Notes: **Required of and limited to first-year graduate students in Sociology, OB, and Sociology/Social Policy students..**

Additional Course Attributes:

Attribute	Value(s)

Sociology 2205

Sociological Research Design (125089)

Christina Ciocca Eller

2019 Fall (4 Credits) **Schedule:** F 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course covers the fundamentals of sociological research design. Emphasis is placed on principles that are applicable in all kinds of sociological research, including surveys, participant observation, comparative historical study, interviews, and quantitative analysis of existing data. The course also delves into current methodological controversies in several arenas.

Course Notes: **Required of, and ordinarily limited to, first-year graduate students in Sociology.**

Qualitative Social Analysis: Seminar (110551)

Ya-Wen Lei

2020 Spring (4 Credits) **Schedule:** W 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course covers basic techniques for collecting, interpreting, analyzing, and reporting interview and observational data. Focused on both theory and practice, the course aims to expose students to many different kinds of qualitative research to provide students a vehicle to produce a compelling paper based on qualitative data.

Course Notes: **This course is required of and limited to first-year students in Sociology or in the joint Ph.D. programs between Sociology and other departments.**

Additional Course Attributes:

Sociology 2219

Transnational Historical Sociology: Antisemitism and Imperialism (206969)

Yael Berda

2019 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

Sociologists have analyzed empires through the entire history of the discipline. Using imperial frameworks as a unit of analysis was fruitful for learning about state formation and consolidation of power, the innovation of governance methods in multicultural settings, migration and political membership and the relationship between state violence, law, economic extraction, and the growing repertoire of toolkits of government. Hannah Arendt's thesis linking the rise of totalitarianism to imperial practices of government and exploitation, and the use of anti-Semitism to consolidate nationalism is a useful point of departure for investigation of contemporary impact of historical regimes. This course incorporates primary historical, administrative and legal sources from the Roman, Mongolian, Mughal, Ottoman and British Empires, with scholarship of historians, sociologists and economists to providing a broad introduction to transnational historical research. Coupling theoretical readings with hands-on methodological training, Students will practice searching archive materials (at Widener library) and will visit the Geographic Information Systems Center at Harvard for a look at possibilities for using spatial and temporal data for transnational historical research with a focus on Imperialism and Anti-Semitism.

This course is open to undergraduate students with instructor permission.

Course Notes: **This course is designed for graduate students in Sociology (but also open political science, economics, law and public policy interested in conducting transnational historical research using archival data), This course is open to undergraduate students with instructor permission.**

Class Notes: **This course taught by Yael Berda**

Organizational Analysis: Seminar (123130)

Rakesh Khurana

2020 Spring (4 Credits) **Schedule:** F 0945 AM - 1245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Reviews classical and contemporary theories of organizations and administrations, including a brief survey of foundational social theories, ecological, institutional, resource dependence, transaction-cost, agency theory, networks and social movements. Examines the development of organizational theory through a combination of intellectual history and an appreciative, but critical reading of organizational scholarship. The seminar is jointly offered with HBSDOC 4880: Macro Topics in Organizational Behavior.

Class Notes: **Taught at HBS**

Sociology 2234

Ethnographic Fieldwork (213557)

Roberto Gonzales

2020 Spring (4 Credits) **Schedule:** R 0100 PM - 0400 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This seminar explores the practice, politics, and poetics of ethnographic fieldwork--the method of immersing oneself into people's daily routines and systematically recording social processes as they unfold in real time. Along with engaging several classic and contemporary texts, seminar members will collect, analyze, and wrestle with ethnographic data. In service to the seminar's broad goals, members will engage in various stages of the ethnographic process: gaining access to a research site or population, taking field notes, conducting and transcribing interviews, and engaging in preliminary analyses of their data. We will also discuss the challenges of entering, being in, and leaving the field. The seminar is therefore designed for students who are willing to engage in focused, hands-on training on ethnographic theory and practice. To best take advantage of what this seminar has to offer, members are urged to come in with a preliminary sketch of a research plan that they would be ready to either directly study in the field or explore through field exercises. This will be a working seminar with members sharing field notes and experiences from the field as well as offering advice and constructive criticism at various stages of the process. This course structure requires a high level of responsibility, respect, and risk-taking among all members.

Course Notes: **Jointly offered with EDU S527; course capped at 15.**

Sociology 2247

Nationalism and Citizenship in Comparative Perspective (212764)

Elke Winter

2019 Fall (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 30

This course focusses on the structural and discursive conditions of membership in the nation. It examines how immigration and citizenship policies emphasize specific dimensions of national identity, and how they operate as means of nation-building under the conditions of neoliberalism and globalization. The course introduces students to key sociological issues, concepts, and theories on both nationalism and citizenship, two bodies of literature that cross-fertilize but do not fully overlap. Drawing primarily on recent debates and empirical cases from Europe and North America, the course also highlights how (im)migration and different forms of citizenship acquisition (e.g. birthright versus naturalization) interact with some of the "new nationalisms" (e.g. Brexit, the rise of Trump, new nationalist/identity movements in Europe).

Overall, this course has two principal goals: First, it offers an overview of the interdisciplinary debates that have shaped the field(s) in recent years. Second, it invites students to ask new questions and provides them with the sociological tools to address them.

Course Notes: **Designed as a graduate seminar, relying heavily on student presentations, case studies and class discussions; ideally, enrollment restricted to graduate students from sociology and related disciplines (social sciences and arts), however advanced undergraduate students and/or interested graduate students from other disciplines may be accepted upon request.**

Class Notes: **Course taught by Elke Winter**

Social Stratification: Seminar (118858)

Alexandra Killewald

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course examines the dimensions and magnitude of inequality in industrial societies, with a heavy emphasis on the United States since the mid-20th century. The readings and class discussion are designed to expose students to a broad range of influential pieces in the social stratification literature. In particular, we will study inequality through: pay for work, race, neighborhoods, gender, family, mobility, education, social capital, and rising income inequality since 1980.

Computational Sociology (207693)

Joscha Legewie

2020 Spring (4 Credits) **Schedule:** M 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course provides an applied introduction to computational methods and data science for sociologists. The first part of the course focuses on programming skills for social scientists. The second part focuses on machine learning and applied causal analysis with concrete exercises that force students to apply the programming skills they learned in the first part of the semester. The course will combine short lectures, with class discussions, hand-on experiences and students own empirical projects.

Class Notes: **Lab required.**

Sociology 2290

Qualitative Network Analysis (131291)

Mario Small

2019 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course examines how researchers have analyzed observational, interview, and textual data in the study of social networks. We will explore both classic and contemporary readings in anthropology, sociology, history, and other disciplines, and study both traditional and new techniques, including those based on large-n data but focused on meaning and qualitative aspects of the social world. Social Network Analysis or a similar course on SNA methods is strongly recommended but not required.

Course Notes: **Sociology concentrators in their senior year may take the course with prior permission from Instructor.**

Recommended Prep: **Qualitative Social Analysis or a comparable course is a prerequisite.**

Teaching Practicum (111781)

Jason Beckfield

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** 30

This course is intended to enhance the teaching skills of graduate students in the Sociology Department. Through a combination of classroom discussions and teaching simulations, the seminar challenges students to discover and hone their teaching styles, to develop a personal philosophy about teaching and learning, to develop self-confidence leading and facilitating small and large group discussions, to learn about the teaching resources that are available to them throughout the university, to experiment with designing engaging courses of study, and to discover that teaching can be a rewarding and stimulating element of an academic career.

Course Notes: **Required of and limited to graduate students in Sociology. Attendance at first meeting is required. Not repeatable for credit.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Sociology 3307

Proseminar on Inequality and Social Policy III (112355)

Christina Ciocca Eller

2019 Fall (4 Credits) **Schedule:** M 0130 PM - 0330 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

Students develop previously completed papers from Proseminar I and II into professional presentations and publishable articles, critique peer papers across disciplines, and discuss presentations of national experts.

Course Notes: **Offered jointly with the Kennedy School as SUP-923.**

Class Notes: **Course meets in HKS Litt 332**

Recommended Prep: **Open to doctoral students in the Multidisciplinary Program in Inequality and Social Policy or the joint PhD Program in Social Policy. Prerequisites: Sociology 296a/Gov 2340a and Government 2340b/Soc 296b (or SUP-921 and SUP-922 at the Kennedy School).**

Contemporary Studies of Race & Ethnicity Workshop (204977)

Lawrence Bobo

2020 Spring (4 Credits) **Schedule:** F 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

The Contemporary Studies of Race & Ethnicity (CSRE) workshop's purpose is to provide a forum to disseminate knowledge and facilitate dialogue among graduate students, faculty, and visiting scholars working on or interested in research about contemporary studies related to race & ethnicity. Though the Sociology department hosts the workshop, we seek to bring scholars together across disciplines to explore topics such as ethno-racial hierarchies, racial attitudes, and intergroup relations, as well as the role of race in institutions, politics, and everyday life. The workshop will foster both a learning and collaborative space in which participants can circulate and garner feedback on works in progress, including dissertation chapters, proposals, journal article submissions, conference papers, and practice job talks.

Medieval and Modern History of Kashmir (212652)

Michael Witzel

2019 Fall (4 Credits) **Schedule:** R 0945 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course presents a survey of the medieval history of Kashmir, beginning with archaeological data and the first available written sources in Indian, Greek and Chinese texts; as well as with the subsequent sources in Sanskrit and Persian. This is followed by an overview of early premodern and recent sources, up to the loss of independence in 1947 and the recent strife in the Kashmir Valley.

The Vernacular in South Asia (213521)

Sravanthi Kollu

2019 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will examine how vernacular languages have been understood within South Asian Studies and the significance of these languages for the South Asian region. We will explore multiple facets of the vernacular - its political and cultural relevance, the vernacular as a literary and aesthetic concept and the historical emergence of modern South Asian vernaculars - as an introduction to the discipline and to comparative literary and historical studies. Prior knowledge of South Asian languages is not required. All course readings will be in English or made available in English translation.

The Census and Its Uncountables (214502)

Sravanthi Kollu

2020 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Come 2020 we will participate in the United States census by filling out a questionnaire that includes questions about our gender, race, ethnic origin, etc. The categories mentioned here are all concepts we otherwise associate with individual, social and political identity. This course will begin with a simple question – why does the census count us along these lines? What do these categories have to do with modern governance? We will quickly see that the categories recorded on the census have evolved over the decades; categories such as 'race' and 'ethnic origin' have undergone particularly incredible shifts in whom they count.

To understand *why* these concepts have shifted and *how* they transform populations and identities requires a longer engagement with the census, its history and its contemporary manifestations. The Census and Its Uncountables offers you the opportunity for such engagement by focusing on the counting of one particular set of populations in the United States (South Asians) and the counting of South Asians by colonial governments in British India. Keeping in mind the prevalence of a South Asian diasporic community in the United States, we will begin the course by looking at how South Asians were categorized within the United States. We will then compare the early census in the United States with how the census and similar surveys in colonial South Asia used categories such as language, race, etc. to count populations and the social and political ramifications of such counting. The course is designed to offer you a conceptually nuanced engagement with identity and to that end we will also read some key texts (literary and otherwise) that explore what identity means.

By the end of the course, you will have a historically rich understanding of key concepts such as population, governmentality, colonialism and identity. You will end the course with a group project where you will use the knowledge and analytical skills gained in the course to write about the census of the future.

Writing Modern South Asia (214528)

Sravanthi Kollu

2020 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

In this course you will explore key texts of modern South Asian literature. The texts we will read span a period of roughly two centuries (1790-2016), four nations (India, Pakistan, Sri Lanka and Bangladesh), and global diasporic communities; yet they offer at best a limited sampling of the breadth and diversity of literary writing in/about South Asia. This course treats this breadth of material as a powerful challenge to us as readers. Hence, we will focus as much on our responses to, and expectations of, South Asian texts as readers as we will on the texts themselves. A key aim of the course is to help you cultivate reading and writing skills that equip you to work with diversity and contradiction in literary texts, skills that can be applied more broadly to other texts and textual representation. In keeping with this broader aim, the writing assignments through the semester will culminate at the end of the course in a longform essay you will write for a non-specialist audience. This essay will be your opportunity to historicize, compare, and reflect on two authors from the course that spoke to you.

Tibetan 101A

Elementary Classical Tibetan (113685)

Leonard van der Kuijp

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

An introductory course designed for students with no background in classical Tibetan. Students begin with the Tibetan script, its standard transliteration into Roman characters, and pronunciation before proceeding to the basics of Tibetan grammar. After mastering a foundational vocabulary, students begin translating simple Tibetan texts.

Course Notes: **Not open to auditors; cannot be taken Pass/Fail.**

Class Notes: **The First Meeting of this course will be held at 1 Bow St., Room 317. Subsequest meetings will be posted when finalized.**

Hindi-Urdu 101A

Introductory Hindi-Urdu (113639)

Richard Delacy

2019 Fall (4 Credits) **Schedule:** MTWR 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

An Introduction to the modern standard form of the most widely spoken language in South Asia, Hindi-Urdu. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The

course also draws from the modern medium of film, in particular recent Bollywood songs, to reinforce structures and vocabulary. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes: **Not open to auditors.**

Bollywood and Beyond: Commercial Cinema, Language and Culture in South Asia (123790)

Richard Delacy

2019 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course examines concepts of personhood, community and culture in South Asia as expressed in contemporary film and literature. Works in Hindi-Urdu and in translation will be examined with emphasis on language as an index of cultural difference and of broad social shifts, notably the transformation of audiences from citizens to culture-consumers. Knowledge of Hindi-Urdu is not required. However, there will be a section for students with intermediate proficiency utilizing language materials.

Course Notes: **Students who enroll in the language section of this course may count it towards a citation in Hindi-Urdu.**

Nell Hawley

2019 Fall (4 Credits) **Schedule:** MF 1200 PM - 0115 PM
W 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Students learn fundamental skills in Classical Sanskrit, the language that was, for many hundreds of years, the most prestigious and broadly-deployed medium of intellectual and literary expression across South Asia. In the first year of study, students develop capabilities in analytical reading (and, secondarily, in writing, speaking, and listening) that will enable them to interpret Sanskrit texts on a foundational level. Participation in this course lays a solid groundwork for students to engage with Sanskrit texts in a wide array of styles and genres-—poetry, narrative, philosophy, scripture-—as their studies progress. Please note that the "Related Section" for this course will be a weekly (optional) review session.

Sanskrit 102AR

Intermediate Sanskrit I (114270)

Nell Hawley

2019 Fall (4 Credits) **Schedule:** MWF 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The intermediate-level Sanskrit course enables students to interpret Sanskrit texts in several major categories: epic, poetry, and commentary. Students expand and strengthen the skills in reading comprehension, grammatical analysis, and vocabulary retention that they developed during the first year of study. Students will be able to dissect and describe nominal compounds, verbal forms, poetic meters, and morphological and syntactical features of Sanskrit words, sentences, and verses in greater detail. As a whole, the course prepares students to participate in Sanskrit language and reading courses at the advanced level.

Students achieve these objectives through focused study of three different texts. In the fall, students read a story from one of the two great Sanskrit epics, the *Mah*ā*bh*ā*rata* or the *R*ā*m*ā*ya*□*a*. In the first half of the spring term, students study a work of poetry (*k*ā*vya*) that portrays the same story. In the second half of the spring term, students read select portions of a Sanskrit commentary on that *k*ā*vya* composition. Please note that the "Related Section" for this course will be a weekly (optional) review session.

Subject: Thai

Thai 101A

Introductory Thai I (107892)

Richard Delacy

2019 Fall (4 Credits) **Schedule:** MW 0600 PM - 0715 PM

Instructor Permissions: Department **Enrollment Cap:** n/a

This course introduces the basic grammatical structures of modern Thai, enabling students to read and produce simple, standard prose as well as engage in basic conversation by the end of the first year. Thai is taught with a concern for the cultural context in which this language is spoken and written.

Course Notes: **Not open to auditors.**

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS: Meets Foreign Lang Req	Thai

Thai 101B

Introductory Thai II (107893)

Richard Delacy

2020 Spring (4 Credits) **Schedule:** W 0600 PM - 0715 PM

Instructor Permissions: Department **Enrollment Cap:** n/a

Continuation of Thai 101a.

Course Notes: **Not open to auditors.**

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

Thai 102A

Intermediate Thai I (124031)

Richard Delacy

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Department **Enrollment Cap:** n/a

A two-term continuation of the study of Thai at the intermediate level. Students build on acquired proficiency at the elementary level (or its equivalent) towards achieving more fluency in reading, speaking, writing, and listening comprehension of standard Thai, as well as in cultural-social skills. Introduces new vocabulary and grammar through communicative tasks and text readings, mainly using the situational-communicative methodology.

Course Notes: **Not open to auditors.**

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

First Meeting times will be posted on the Department of South Asian Studies' website in shortly before the term begins: sas.fas.harvard.edu

Thai 103AR

Readings in Thai I (121497)

Richard Delacy

2019 Fall (4 Credits) **Schedule:** MW 0730 PM - 0845 PM

Instructor Permissions: Department **Enrollment Cap:** n/a

This course is designed to focus on reading and comprehension. Selected readings will be both for academic purposes and for pleasure. Students will read newspaper and magazine articles; short stories; and passages covering topics such as history, science, politics, medicine, technology and more. This reading course will help students become more proficient with nuanced/implied meanings, bolster vocabulary and acquire familiarity with various professional jargon.

Course Notes: **Not open to auditors.**

Languages in the tutorial program are offered when there is demonstrated curricular or academic need on the part of the student, and when suitable instruction can be arranged. Please contact the department to learn more.

Subject: Indo-Persian

Indo-Persian 101

Readings in Indo-Persian Literature I (207944)

Hajnalka Kovacs

2019 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The course introduces students to Persian literature composed in the Indian Subcontinent from the 11th through the 20th century. We will combine close reading of texts in the original Persian with a discussion of grammar and prosody as well as secondary readings in English. Texts include excerpts from chronicles, discourses and letters of Sufis, hagiographies, biographical dictionaries, travelogues, collections of tales, as well as epic, lyric, and panegyric poetry.

Recommended Prep: **Two years of Persian or equivalent; one year experience with Classical Persian preferred.**

Statistics

Subject: Statistics

Statistics 10

Elements of Data Science (213330)

Joseph Blitzstein

Xiao-Li Meng

Hanspeter Pfister

Liberty Vittert

2020 Spring (4 Credits) **Schedule:** MWF 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 100

Data science combines data, statistical analysis, and computation to gain insights and make useful inferences and predictions. This course will take a holistic approach to helping students understand the key factors involved, from data collection and exploratory data analysis to modeling, evaluation, and communication of results. Working on case studies and a final project in teams will provide students with hands-on experience with the data science process using state-of-the-art tools. Emphasis will be given to the strengths, trade-offs, and limitations of each method to highlight the importance of merging analytical skills with critical quantitative thinking.

Class Notes: **Also offered as COMPSCI 10. Students may not take both for credit.**

Please note that the enrollment cap of 100 is a combined total for both STAT 10 and COMPSCI 10.

If you are interested in joining this course please fill out this form [https://forms.gle/CWG6j4qsiFb6gDRt5] by Wednesday, January 29, 11: 59 pm EST. We will notify you on Friday, January 31.

Requirements: **Anti-requisite: Cannot be taken for credit if AC 209A or CS 109A or CS 10 or STAT 121A is already complete.**

Introduction to Quantitative Methods for Economics (114027)

Michael Parzen

2020 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

A rigorous introduction to statistics for students intending to study economics. Examples drawn from finance, decision analysis and economic decision-making. In addition to descriptive statistics, probability, inference and regression modeling, also covers portfolio optimization, decision analysis, and time series analysis. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques.

Course Notes: **Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.**

Requirements: **Anti-Req: may not be taken for credit if STAT 109 or STAT 139 already complete.**

Intro to Statistical Modelling (205028)

Michael Parzen

2020 Spring (4 Credits) **Schedule:** MWF 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Stat 109 is a second course in statistical inference and is a further examination of statistics and data analysis beyond the introductory course. Topics include t-tools and permutation-based alternatives including bootstrapping, multiple-group comparisons, analysis of variance, linear regression, model checking and refinement. Statistical computing and simulation based emphasis will also be covered as well as basic programming in the R statistical package. Emphasis is made on thinking statistically, evaluating assumptions, and developing tools for real-life applications.

Course Notes: **Note that Stat 109 cannot be taken for credit if Stat 139 has already been taken.**

Requirements: **Anti-req: Cannot be taken for credit if STAT 139 already complete**

Statistics 110

Introduction to Probability (110766)

Joseph Blitzstein

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

A comprehensive introduction to probability. Basics: sample spaces and events, conditional probability, and Bayes' Theorem. Univariate distributions: density functions, expectation and variance, Normal, t, Binomial, Negative Binomial, Poisson, Beta, and Gamma distributions. Multivariate distributions: joint and conditional distributions, independence, transformations, and Multivariate Normal. Limit laws: law of large numbers, central limit theorem. Markov chains: transition probabilities, stationary distributions, convergence.

Class Notes: **This course meets on Mondays and Wednesdays from 1:30pm--2:45pm in Science Center Hall B.**

Recommended Prep: **Math 1b or equivalent or above**

Introduction to Computational Biology and Bioinformatics (122304)

Xiaole (Shirley) Liu

2020 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

The course will cover basic technology platforms, data analysis problems and algorithms in computational biology. Topics include sequence alignment and search, high throughput experiments for gene expression, transcription factor binding and epigenetic profiling, motif finding, RNA/protein structure prediction, proteomics and genome-wide association studies. Computational algorithms covered include hidden Markov model, Gibbs sampler, clustering and classification methods.

Recommended Prep: **Good quantitative skills, strong interest in biology, willingness and diligence to learn programming.**

Statistics 117

Data Analysis in Modern Biostatistics (203104)

Giovanni Parmigiani

2020 Spring (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: Instructor **Enrollment Cap:** 30

An Introduction to applied biostatistics via case studies. The course is based on four practical problems, and methodology relevant for each. Students will apply the concepts from the methodology to the data analysis or modeling task, and carry out four mini projects, with ample opportunities for peer-to-peer discussion.

Course Notes: **There is a cap of 30 students for this course. Preference is given to Statistics concentrators; all other students wishing to take the course must send a request along with a list of statistics/computer science courses already completed to the professor at gp@jimmy.harvard.edu. Please put Stat 117 in the subject line of the email.**

Recommended Prep: **Prerequisites: Stat 110 and Stat 102/111/139. Recommended: 112**

Introduction to Bayesian Inference and Applications (156425)

S. C. Samuel Kou

2019 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Provides students a comprehensive understanding to the questions as of what is, how and why Bayesian. Introduction to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various domain fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students' hands-on skills in statistical computation (mostly with R) and data analysis.

Recommended Prep: **STAT110, STAT111 and basics of R programming are required.**

Data Science 1: Introduction to Data Science (203101)

Pavlos Protopapas

Kevin A. Rader

Christopher Tanner

2019 Fall (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Data Science 1 is the first half of a one-year introduction to data science. The course will focus on the analysis of messy, real life data to perform predictions using statistical and machine learning methods. Material covered will integrate the five key facets of an investigation using data: (1) data collection - data wrangling, cleaning, and sampling to get a suitable data set; (2) data management - accessing data quickly and reliably; (3) exploratory data analysis – generating hypotheses and building intuition; (4) prediction or statistical learning; and (5) communication – summarizing results through visualization, stories, and interpretable summaries. Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: **Only one of CS 109a, AC 209a, or Stat 121a can be taken for credit. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109a, AC 209a, or Stat 121a for credit.**

Recommended Prep: **Programming knowledge at the level of CS 50 or above, and statistics knowledge at the level of Stat 100 or above (Stat 110 recommended).**

Requirements: **Not to be taken in addition to Computer Science 109 or Computer Science 109A, or Applied Computation 209, or Applied Computation 209A.**

Additional Course Attributes:

Data Science 2: Advanced Topics in Data Science (203102)

Pavlos Protopapas

Mark Glickman

Christopher Tanner

2020 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Data Science 2 is the second half of a one-year introduction to data science. Building upon the material in Data Science 1, the course introduces advanced methods for data wrangling, data visualization, and statistical modeling and prediction. Topics include big data and database management, interactive visualizations, nonlinear statistical models, and deep learning. Part two of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes: **Can only be taken after successful completion of CS 109a, AC 209a, Stat 121a, or equivalent. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109b, AC 209b, or Stat 121b for credit.**

Recommended Prep: **: CS 109a, AC 209a, or Stat 121a required.**

Requirements: **Requisite: (Must take CS 109A OR APCOMP 209A OR STAT 121A before taking STAT 121B) AND (Cannot take STAT 121B, if already taken STAT 121 OR CS 109 OR CS 109B OR APCOMP 209 OR APCOMP 209B)**

Time Series & Prediction (117131)

Natesh Pillai

2019 Fall (4 Credits) **Schedule:** TR 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Introduction to time series models and forecasting. Introduction to classical time series model:

autoregressive, moving average, ARIMA models. Some concepts from stochastic processes: martingales, stationarity, Gaussian processes, Brownian motions, ergodic theorems. Some aspects of advanced time series: hidden Markov models, state space models, filtering, smoothing, Kalman filters, sequential Monte Carlo methods.

Recommended Prep: **Statistics 111 and 139 or equivalent.**

Linear Models (110751)

Kevin A. Rader

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

An in-depth introduction to statistical methods with linear models and related methods. Topics include group comparisons (t-based methods, non-parametric methods, bootstrapping, analysis of variance), linear regression models and their extensions (ordinary least squares, ridge, LASSO, weighted least squares, multi-level models), model checking and refinement, model selection, cross-validation. The probabilistic basis of all methods will be emphasized.

Class Notes: **This Course has a Friday Lab.**

Recommended Prep: **Statistics 110 and Math 21a and 21b or equivalent**

Design of Experiments (116364)

Marie-Abele Bind

2020 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Statistical designs for efficient experimentation in the physical, life, social and management sciences and in engineering. A systematic approach to explore input-output relationships by deliberately manipulating

input variables. Topics include completely randomized and randomized block designs, inferential adjustments for mulltiplicity of estimands, balanced incomplete block designs, factorial designs, confounding in blocks, fractional replications, and re-randomization. Each topic motivated by real-life examples.

Recommended Prep: **Statistics 111 or 139.**

Generalized Linear Models (118974)

Mark Glickman

2020 Spring (4 Credits) **Schedule:** MW 0900 AM - 1015 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Sequel to Statistics 139, emphasizing common methods for analyzing continuous non-normal and categorical data. Topics include logistic regression, log-linear models, multinomial logit models, proportional odds models for ordinal data, Gamma and inverse-Gaussian models, over-dispersion, analysis of deviance, model selection and criticism, model diagnostics, and an introduction to non-parametric regression methods.

Course Notes: **Examples will be drawn from several fields, particularly from biology and social sciences.**

Recommended Prep: **Statistics 139 or with permission of instructor.**

Multilevel and Longitudinal Models (160736)

Luke Miratrix

2019 Fall (4 Credits) **Schedule:** TR 0200 PM - 0330 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Data often have structure that needs to be modeled explicitly. For example, when investigating students' outcomes we need to account for the fact that students are nested inside classes that are in turn nested inside schools. If we are watching students develop over time, we need to account for the dependence of

measurements across time. If we do not, our inferences will tend to be overly optimistic and wrong. The course provides an overall framework, the multilevel and generalized multilevel (hierarchical) model, for thinking about and analyzing these forms of data. We will focus on specific versions of these tools for the most common forms of longitudinal and clustered data. This course will focus on applied work, using real data sets and the statistical software R. R will be specifically taught and supported. While the primary focus will be on the linear model with continuous outcomes (i.e., the classic regression framework) we will also discuss binary, categorical, and ordinal outcomes. We will emphasize how to think about the applicability of these methods, how they might fail, and what one might do to protect oneself in such circumstances. Applications of hierarchical (multi-level) models will include the canonical specific cases of random-slope, random-intercept, mixed effect, crossed effect, marginal, and growth-curve models.

Recommended Prep: **Permission of instructor required. Prerequisite: S-052, Stat 139, or an equivalent. Jointly-offered in the Graduate School of Education.**

Design and Analysis of Sample Surveys (112121)

Alan Zaslavsky

2019 Fall (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

Methods for design and analysis of sample surveys. The toolkit of sample design features and their use in optimal design strategies. Sampling weights and variance estimation methods, including resampling methods. Brief overview of nonstatistical aspects of survey methodology such as survey administration and questionnaire design and validation (quantitative and qualitative). Additional topics: calibration estimators, variance estimation for complex surveys and estimators, nonresponse, missing data, hierarchical models, and small-area estimation.

Course Notes: **The regular classroom hours of Stat 160 are 2:30 - 4:00. The extra hour is for extra discussion for 260.**

Class Notes: **Fall 2019 First Meeting Location:**
Science Center Hall D from 3:00 PM - 4:15 PM:

Introduction to Nonparametric Methods (212953)

Zheng Ke

2019 Fall (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

This is an advanced undergraduate course in modern nonparametric methods for statistical estimation and inference. Nonparametric inference is about statistical methods and models that make weak assumptions. A typical nonparametric approach estimates a nonlinear function from an infinite dimensional space, rather than a linear model from a finite dimensional space. This course gives an introduction to nonparametric statistics, with a focus on density estimation, regression, bootstrap, confidence sets, orthogonal functions, and kernels. The course treats nonparametric methodology and its use, together with theory that explains the statistical properties of the methods.

Recommended Prep: **STAT 110, STAT 111, STAT 139.**

Causal Inference (110022)

Kosuke Imai

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Substantive questions in empirical scientific and policy research are often causal. Does voter outreach increase turnout? Are job training programs effective? Can a universal health insurance program improve people's health? This class will introduce students to both statistical theory and practice of causal inference. As theoretical frameworks, we will discuss potential outcomes, causal graphs, randomization and model-based inference, sensitivity analysis, and partial identification. We will also cover various methodological tools including randomized experiments, regression discontinuity designs, matching, regression, instrumental variables, difference-in-differences, and dynamic causal models. The course will draw upon examples from political science, economics, education, public health, and other disciplines.

Recommended Prep: **Probability, Statistical theory, Linear models**

Requirements: **Prerequisite: STAT 110 AND STAT 111 AND STAT 139 or Gov 2000 AND Gov 2001**

Statistical Machine Learning (207703)

Lucas Janson

2019 Fall (4 Credits) **Schedule:** MW 0430 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course is designed to follow CS 181 and will cover various machine learning methods with a focus on their statistical properties. Methods include linear methods for regression and classification, splines, and kernel smoothing, additive models, trees, boosting, bagging, and random forests. Statistical properties covered include generalization error, degrees of freedom, shrinkage, smoothing, and model selection. The course will be interspersed with an ongoing prediction project that will give students hands-on experience applying the concepts learned in class. If time allows, we will introduce some emerging statistical topics at the cutting edge of machine learning such as algorithmic fairness, differentially-private machine learning, and transfer learning.

Course Notes: **Textbook Information: Elements of Statistical Learning by Hastie, Tibshirani, and Friedman is a required text and is available for free at https://web.stanford. edu/~hastie/ElemStatLearn/printings/ESLII_print12.pdf**

Modern Statistical Learning (211175)

Zheng Ke

2020 Spring (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: None **Enrollment Cap:** n/a

High dimensional data analysis is a recent interdisciplinary research area of Statistics, Genetics and Genomics, Engineering, and several other scientific areas. It addresses an array of challenging problems that of contemporary interest, and research in this area has been very active in the past decade.

This course aims to provide a systematic introduction to various topics in high dimensional data analysis, focusing on large-scale sparse learning, and network and text data analysis. Large-scale sparse learning: Sparsity is a universal phenomenon in modern high dimensional data. Sparse structures are observed in many application settings and have many different forms, such as parameter sparsity, graph sparsity, eigenvalue sparsity, and so on. Exploring sparsity has become a common strategy in data analysis and has largely reshaped classical multivariate statistics problems. This course will investigate classical problems such as multiple testing, linear regression, classification and clustering, under the modern sparse settings. For each problem, the course discusses recent statistical methods for taking advantage of sparsity, and introduces the
theoretical framework for analyzing these methods.

Network and text data analysis: Social networks and text documents are unconventional data types. This course introduces statistical models and methods for analyzing such type of data. Topics for network data analysis include community detection, mixed membership estimation, link prediction, and dynamic network modeling. Topics for text data analysis include topic modeling, word embedding, information retrieval, and sentiment analysis.

Recommended Prep: **This course is mainly designed for graduate students in Statistics. The prerequisites are Statistical Inference 1&2 (students can take the prerequisites simultaneously with this course). Graduate students from other departments (CS, Biostatistics, Economics, etc.) can also take this course, if they have taken statistics-related courses which have a significant amount of content in mathematical statistics. Undergraduate students please consult the instructor before enrolling.**

Big data statistics in genomic and genetic research (204455)

Xiaole (Shirley) Liu

Jun Liu

2020 Spring (4 Credits) **Schedule:** R 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

As biomedical research community generates more and more high throughput genomic profiles, the need for careful statistical analyses also increases. In this weekly course, we will first introduce the main statistical challenges and basic solutions to big data in genomic and genetic research. We will also ask students to read a selection of methodology and data analysis papers for biomedical big data, and debate about their statistical and computational merits and drawbacks.

Recommended Prep: **Students taking the course should have a reasonable background and knowledge in statistical (e.g. STAT111/139), genomics and bioinformatics (e.g. STAT115/215).**

Additional Course Attributes:

Attribute	Value(s)

Scalable Statistical Inference for Big Data with Applications (214539)

Xihong Lin

2020 Spring (4 Credits) **Schedule:** T 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Unprecedented advances in digital technology have produced a revolution that is transforming science and society. Big data have been rapidly generated in many disciplines, such as genomics, health, physical and social sciences. The value of big data lies in effective analysis using statistical inference and machine learning methods that are computationally scalable and efficient. In this course, we will discuss several ongoing research areas on scalable statistical inference for big data, including several current research activities, challenges and open problems. Examples include dense and sparse signal detection, feature selection, boosting, high-dimensional prediction and testing, sparse and low-rank matrix estimation, general tensor methods, fast PCA, post PC inference and eigenvector theory, efficient concave and non-concave penalized likelihood maximization and inference, nonparametric function estimation, network analysis, convolutional neural networks, random projection, sketching, distributed computing, cloud computing, variational Bayesian methods, and estimating (possibly) low dimensional functionals in high dimensional models (e.g. average treatment effects in the presence of high dimensional covariates, signal to noise ratio, genetic relatedness). Applications of these methods in various areas will be discussed.

Building a Human Body: From Gene to Cell to Organism (212882)

Amie Holmes

Richard Lee

Jessica Whited

Jeffrey Macklis

Jason Buenrostro

Paola Arlotta

Lee Rubin

2020 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

Through a series of lectures, application exercises and laboratory experiments, we will explore how the human body develops on a molecular level from gene to cell to organ. Ever wonder how you can make heart cells beat in a dish? Why can axolotls regenerate their limbs but humans cannot? How do neurites grow? Can we grow a brain in a cell culture dish? Come join us to discover the answers to these questions and more.

Recommended Prep: **LS1a/LPSA is required; SCRB 10 is recommended**

Science Communication (214393)

William Anderson

Amie Holmes

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0530 PM

Instructor Permissions: Instructor **Enrollment Cap:** 14

Communicating complex ideas succinctly differentiates 1.5°C and 5°C, biotech success and failure, doctor and dispenser, and, in this class, an A and a C. Over twelve weeks of solo project-based communication practice in scientific presentations, impromptu pitching, New York Times article-writing, videography and video editing, scientific articles, biotechnology, policy, and grant-writing, this class aims to turn you into a standout communicator. This class is highly practical and follows a 'work smarter, not harder' teaching ethic.

Recommended Prep: **There are no prerequisites for this class but that you be a STEM concentrator at Harvard College.**

Stem Cell & Regenerative Biol 91R

Introduction to Research (125804)

Amie Holmes

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Laboratory research in topics related to the Human Developmental and Regenerative Biology Concentration under the direction of, or approved by, members of the Department of Stem Cell and Regenerative Biology, Principal Faculty of the Harvard Stem Cell Institute, or others with permission. A paper must be submitted to the laboratory sponsor and to the HDRB Concentration Office for review by the Course Director and Head Tutors.

Course Notes: **Students must have joined a laboratory by the course registration deadline (i.e., "study card day") to be able to enroll in SCRB 91.**

Limited to Human Developmental and Regenerative Biology Concentrators; written permission of the laboratory sponsor must be submitted to the HDRB Concentration Office prior to enrolling in the course. This introductory research course is intended to prepare students for SCRB 99 and may ordinarily be repeated no more than once. Ordinarily may not be taken as a fifth course. Laboratory safety session required.

Laboratory Research Honors Thesis (212691)

Amie Holmes

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

For honors candidates writing a thesis in Human Developmental and Regenerative Biology. Students must complete both terms of this course (A and B) to receive credit.

Recommended Prep: **Students intending to enroll in the fall are required to submit a written proposal to the Course Director. Students may enter the course at midyear only with the permission of the Course Director. The thesis proposal must be approved by the Course Director and Head Tutors prior to enrolling in SCRB 99.**

Additional Course Attributes:

All: Cross Reg Availability	Not Available for Cross Registration
FAS: Course Level	Primarily for Undergraduate Students

Stem Cell & Regenerative Biol 111

Regeneration: Phenomena to Mechanisms (212688)

Jessica Whited

2019 Fall (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How can some animals regenerate large pieces of their bodies following injury? This course will use both classical and current primary literature to explore the fascinating process of regeneration across phyla, covering both invertebrates and vertebrates. Students will learn to distill questions into specific, key experiments; to design experiments with meaningful controls; and to use data to refine, reformulate, and develop new hypotheses.

Course Notes: **Students will be engaged in group work throughout the semester. They will develop new Wikipedia pages about specific topics related to regeneration. As a final project, they will write and produce short**

videos centered on student-selected topics, and the course will culminate with a class-wide viewing event.

Additional Course Attributes:

FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 140

Developmental and Molecular Basis of Growth and Regeneration (126744)

Fernando Camargo

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will focus on the biology of organ growth and regeneration from a developmental perspective. How is the size and symmetry of our organs set? How does a regenerating animal sense that something is missing and eventually stop the regenerative process when tissues reform? We will learn about conserved developmental pathways that are necessary for adult regeneration and discuss how the aberrant activation of these pathways can lead to overgrowth disorders such as cancer.

Recommended Prep: **Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54, or permission of the instructor.**

Additional Course Attributes:

Attribute	Value(s)

Stem Cell & Regenerative Biol 145

From Cells to Tissues, in Sickness and in Health (161207)

Ya-chieh Hsu

2020 Spring (4 Credits) **Schedule:** MW 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

Every cell is a part of a larger "community", working together to enable tissue function. This course will explore the principles of building complex tissues from cells. How do cells know what tissues to make and when to make them? How do cells communicate with one another? What diseases can arise when these principles go awry? How can we build tissues in the lab? In addition to lectures, students will engage deeply in primary literature.

Stem Cell & Regenerative Biol 150

Human Genetics: Mining Our Genomes for an Understanding of Human Variation and Disease (114797)

Kevin Eggan

2020 Spring (4 Credits) **Schedule:** T 0900 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

The sequencing of the human genome has revealed the full extent of genetic variation that exists within us as a species. This genetic diversity underlies much of our physical variation as well as our differences in responsiveness to disease stimuli and their treatments. We will explore these and other ramifications of human genetic diversity by applying classical and contemporary genetic tools to the identification of specific genes and pathways that functionally underlie our variable biology.

Recommended Prep: **Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b (or equivalent); SCRB 10.**

Stem Cell & Regenerative Biol 167 Section: 01

Stem Cell Therapeutics: Exploring the science and the patient experience (125200)

Leonard Zon

2020 Spring (4 Credits) **Schedule:** W 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

Stem cells are the basis for tissue maintenance and repair, thus, are essential elements of normal organ and tissue physiology. Stem cells are also targets for disease processes and through transplantation are important therapeutic agents. This course will allow advanced undergraduates to explore how stem cells and tissue regeneration impact human disease pathogenesis and how stem cells might be exploited to advance new therapies for disease.

Recommended Prep: **Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10.**

Additional Course Attributes:

Attribute	Value(s)

Stem Cell & Regenerative Biol 175

Glucose: From Molecule to Society (128041)

Richard Lee

2019 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: None **Enrollment Cap:** n/a

We will explore the biochemistry, cell biology, and physiology that make glucose our main source of energy. How did humans depend on and crave this molecule? What consequences does it hold for normal metabolism and disease? Students will integrate evolution, endocrinology, biostatistics, bioengineering, and regenerative biology approaches in considering sugar and all its consequences. Finally, we will evaluate legal and business issues necessary to move scientific and technical innovations from the laboratory to the patient.

Recommended Prep: **Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or MCB 54; MCB 52 or permission of the instructor.**

Immunology: New Tracks and Greatest Hits (111316)

Jonathan Hoggatt

2020 Spring (4 Credits) **Schedule:** MW 0430 PM - 0545 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This course will explore cutting edge immunology topics with student presentations of recently published papers discussing topics ranging from hematopoietic stem cells, HIV, gluten, cancer and others. The class will also discuss the classic immunology papers that have shaped the field today, with discussions on the next steps for the future. Course work: Reading of papers, seminar presentations, and class participation.

Recommended Prep: **MCB 169 or permission of instructor recommended, but not required.**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students
FAS Divisional Distribution	Science & Engineering & Applied Science

Stem Cell & Regenerative Biol 190 Section: 01

Understanding Aging: Degeneration, Regeneration, and the Scientific Search for the Fountain of Youth (125185)

Amy Wagers

2020 Spring (4 Credits) **Schedule:** MW 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

This lecture and discussion course will explore the fundamental molecular and cellular mechanisms that govern organismal aging and contemporary strategies to delay or reverse this process.

Recommended Prep: **Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b;**

SCRB 10.

Additional Course Attributes:

Stem Cell & Regenerative Biol 195

The Translational Science of Stem Cells (204006)

Lee Rubin

2019 Fall (4 Credits) **Schedule:** MW 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 16

Through a series of lectures, given by Professor Rubin and Dr. Nayara, as well as some outstanding outside speakers, students will be introduced to a broad view of the ways in which stem cells can be used for translational research. This will include human disease modeling, identifying drugs that target endogenous stem cells, or otherwise promote tissue repair, and regenerative medicine (cell-based therapies).

The goal of the course is to give students a very up-to-date view of where stem cell-associated therapies stand now and are heading in the future. The course relies on active student participation and will include reading primary research articles for each lecture. This is done so that students are prepared to engage scientifically with the lecturers. All of the knowledge that students acquire in this class will be incorporated into a final paper in which the students have the opportunity to propose new types of therapies for serious disorders.

Course Notes: **Permission of the instructor required to enroll. Ability to work in a less structured environment will be essential.**

Recommended Prep: **Life Sciences 1a or Life and Physical Sciences A, Life Sciences 1b, and preferably SCRB 10.**

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Stem Cell & Regenerative Biol 197

Frontiers in Therapeutics (204358)

Mark Fishman

Douglas Melton

2020 Spring (4 Credits) **Schedule:** TR 1200 PM - 0115 PM

Instructor Permissions: None **Enrollment Cap:** n/a

How realistic are promises to "eliminate" diseases and to "personalize" medicine? This course looks at biological principles underlying therapeutics, ranging from those described first in Egyptian papyri to those

under development today (using chemicals, proteins, cells, and genetic manipulations) and based on traditional philosophies and on science. As part of the class, students will have the opportunity to design novel approaches to diseases today without cure.

Course Notes: **Prerequisites are Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; MCB 60, SCRB 50, or permission of the instructor**

Summer School

Subject: History of Science (Summer)

History of Science (Summer) S-131

Humans in Peril/Planet (214475)

2019 Fall (4 Credits) **Schedule:**

Instructor Permissions: None **Enrollment Cap:** n/a

This course is a history of how modern humans have understood their relationship to the natural world, with a focus on the cases where we see ourselves as either threatened by, or threatening to, the planet. How did we shift from seeing humans as imperiled by nature's hazards to thinking of humans as a threat to nature itself? How did once dangerous places come to seem fragile? Topics include human understandings of extreme events such as earthquakes and hurricanes; changing perceptions of glaciers, the arctic, and the deep sea; and themes such as climate scientists' roles in political debates, Pacific islanders' responses to rising sea levels, growing concern about climate change, the rise of the idea of the Anthropocene, and the sixth extinction. Course materials include first-hand accounts of natural disasters; calls to action in different epochs from writers such as Rachel Carson and Elizabeth Kolbert; and films that helped reshape popular sentiments about the world around us. The course provides an introduction to the field of history of science and also draws from scholarly traditions in environmental history, anthropology, and indigenous studies.

Synthetic Biology: From Ideation to Commercialization (127916)

Jeffrey Way

2019 Fall (4 Credits) **Schedule:** MW 0230 PM - 0400 PM

Instructor Permissions: Instructor **Enrollment Cap:** 50

This course provides an introduction to synthetic biology, with an emphasis on medical applications. Topics will include (1) design principles of cells, organisms, and complex proteins, industry case studies, and analysis of the synthetic-biological literature; and (2) commercialization of biotechnology and synthetic biology, including conceptualization of commercializable research, financing mechanisms, intellectual property strategies, licensing, publicity, virtual companies, and the progression through pre-clinical and clinical research and development. Specific topics include design of bacterial and mammalian genetic circuits, CAR-T cells, whole genome recoding, artificial protein design, and gene therapy.

Systems Biology 220QC

Analysis foundations for quantitative biologists (part 1) (204480)

Allon Klein

Sahand Hormoz

Ying Lu

2020 Spring (2 Credits) **Schedule:** WF 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The bedrock foundation of quantitative biology is controlling assumptions and errors in empirical measurement. This course focuses on developing "street-fighting" capabilities in quantitative analysis: statistical concepts that every biologist needs to ensure that they can interpret their data correctly. The course introduces estimators, the origin and consequences of key distributions in biology, error propagation, hypothesis testing, multiple hypothesis correction and the perils of p-hacking. Concepts are reinforced through problem sets, and team-based analysis of new experimental methods. This course can be taken alone, or as the start of SB221 that extends to cover: high-dimensional data analysis; statistical inference; and how molecular biological systems measure their surroundings in the face of thermal noise and limited energy resources.

Recommended Prep: **Knowledge of programming, statistics, physics and chemistry.**

Systems Biology 221QC

Analysis foundations for quantitative biologists (part 2) (214495)

Allon Klein

Sahand Hormoz

Ying Lu

Elizabeth Pomerantz

2020 Spring (2 Credits) **Schedule:** WF 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 40

(Part 2 of the SB220qc / SB221qcseries) New experimental techniques are changing the nature of data sets in biology. For example, high throughput methods routinely measure expression levels of thousands of genes in individual cells across tens of thousands of cells. Imaging methods record 3-dimensional movies of developmental processes, generating terabytes of data in a single run. How do we make sense of these data sets? This course will begin with "street-fighting" statistics: tools that every biologist needs to ensure that they can interpret their data correctly. We will then study the fascinating world of high-dimensional spaces and build the intuition required for interpreting data that live in these spaces. We will cover linear and non-linear dimensionality reduction, statistical learning and inference in high-dimensional spaces, and relevant machine learning tools such as autoencoders. Finally, we ask how biological systems themselves solve high-dimensional inference problems, subject to severe measurement constraints in the form of thermal noise and limited energy

resources. We will cover relevant ideas from statistical physics such as kinetic proof reading. To join the first five weeks of this course (on "street-fighting" statistics) enroll in SB220qc.

Systems Biology Research (121507)

Philippe Cluzel

2020 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 008

Systems Biology Research (121507)

Philippe Cluzel

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll

Systems Biology 350 Section: 009

Systems Biology Research (121507)

Adam Cohen

2020 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 009

Systems Biology Research (121507)

Adam Cohen

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll

Systems Biology 350 Section: 010

Systems Biology Research (121507)

Vladimir Denic

2020 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 010

Systems Biology Research (121507)

Vladimir Denic

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 011

Systems Biology Research (121507)

Angela Depace

2020 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 011

Systems Biology Research (121507)

Angela Depace

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 012

Systems Biology Research (121507)

Michael Desai

2020 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Course Roll	FAS Course Roll
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 012

Systems Biology Research (121507)

Michael Desai

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS Course Roll	FAS Course Roll
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 013

Systems Biology Research (121507)

Francis Doyle

2020 Spring (4 Credits) **Schedule:** TBD

Instructor Permissions: None **Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Theater, Dance, and Media

Subject: Theater, Dance & Media

Theater, Dance & Media CAMR

Advanced Playwriting: Workshop (203500)

Sam Marks

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This workshop is a continued exploration of writing for the stage. Students will be encouraged to excavate their own voice in playwriting. They will examine and attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Ibsen and Beckett as well as contemporary dramatists such as Annie Baker, Caryl Churchill and Sam Shepard.

Course Notes: **TDM CAMR is the same course as ENGLISH CAMR. Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.**

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration

Theater, Dance & Media CKR

Introduction to Playwriting: Workshop (205632)

Sam Marks

2019 Fall (4 Credits) **Schedule:** TBD

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Clare Barron, Aleshea Harris, Jeremy O. Harris, Taylor Mac, Suzan Lori-Parks, as well as work from Edward Albee, Caryl Churchill, and Harold Pinter.

Course Notes: **TDM CKR is the same course as ENGLISH CKR. Admission is based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.**

Theater, Dance & Media 90AR

Production Studio - Queer Cabaret (205023)

Carmelita Tropicana

2019 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

TDM production studios frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The fall 2019 production will be Queer Cabaret, directed by Carmelita Tropicana. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions and studio work at designated times (TBD) to examine the entire performance process through a creative lens.

- **Rehearsal dates and times are TBD**
- **The production is scheduled to open Thursday, December 5th.**

From the Dadaist's Cabaret Voltaire, to the jazz cabarets of Harlem, to the downtown NYC queer scene, cabaret as a non-traditional theatrical form is often associated with social and artistic subcultures. In this practice-based course, students will explore the history of cabaret and its relationships to queer art practice, politics, and community. Over the course of the semester, each student will create a cabaret act for performance. This work will ultimately become the content for TDM's fall production.

***NOTE: This class will function as the Production Studio course (TDM 90AR) for TDM's fall production. Students who enroll in the course will develop material for the production and collaboratively devise the piece under Tropicana's direction. This is to say that there will be no audition process for the fall production. If you are in the class, you are in the show.**

TDM FALL PRODUCTION
TDM's fall production (Title TBD) will be an original evening of cabaret performance directed by legendary performance artist Carmelita Tropicana and designed by Machine Dazzle, both of whom will be in residence throughout the production period. The content of this show will be devised from the work of students in Tropicana's Production Studio class: Queer Cabaret. Students taking the class will be cast in the roles they create for themselves through their course work. Students may also choose to apprentice with professionals on the production team. This production will be a site-specific, immersive cabaret experience staged in the Agassiz Theater. Rehearsals begin November 10. Performances take place December 5-7.

Course Notes: **TDM 90AR is required of concentrators and open to other students involved in the TDM fall production (as actors or apprentices on the production team). Participation is limited to students involved with the production, either as performers or as members of the production team.**

Theater, Dance & Media 90BR

Production Studio (205031)

Kaneza Schaal

2020 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Department **Enrollment Cap:** 15

TDM production studios frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The spring 2020 production will be directed by Kaneza Schaal. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions at designated times (TBD) to examine the entire performance process through a dramaturgical lens.

The arc of this course will trace the process of researching and developing original performances and will culminate in public showings. The work will emphasize creative research, collaboration, and social practice within artistic inquiry. Great story telling requires speaking many languages. Social practice is inextricable from a purist of artistic excellence. By making work that speaks diverse formal, cultural, historical, aesthetic and experiential languages we can speak to many different people.

Each week students will present on a production influential to their own creative development which Schaal will pair with a production that draws on global performance history to frame the vast lineages through which we can situate ourselves and our interests. Works may include the inaugural theater piece at The Genocide Memorial Amphitheater in Kigali Rwanda; the touring of American Avant Garde performance in Europe; contemporary musical stadium productions in Vietnam that replay over social media; original works produced by state run festivals in Egypt and Brazil; and theater productions inside Federal Prisons.

Alongside course work students will be guided through self-directed development of original performances drawing on their own unique interests and lexicons. Each performance cluster will establish a student design team and production team. These teams will be mentored by guest artists and program faculty, and encouraged to pursue collaboration with students and faculty in the broader Harvard community. No previous theater experience is required. Students from other concentrations are strongly encouraged to participate.

Course Notes: **TDM 90BR is required of concentrators and open to other students involved in the TDM spring production (as actors or apprentices on the production team). Participation is limited to students involved with the production, either as performers or as members of the production team. Students who wish to be part of the production team should contact Artistic Producer James Stanley, jamesstanley@fas.harvard.edu**

Harvard Dance Project (160653)

Jill Johnson

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0715 PM
T 0300 PM - 0715 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

The Harvard Dance Project cultivates invention and fosters the courage of artistry. This faculty-led performance company gives students the opportunity to be original cast members and collaborators in diverse dance works created by preeminent professional choreographers. The project focuses on performance research, collaboration, choreographic composition, and links choreographic thinking to other fields. It is a studio-based course which includes performances at major venues on campus. Harvard Dance Project choreographers, collaborators and repertory include: Jonathan Alsberry, Aszure Barton, Brian Brooks, Peter Chu, Chanel DaSilva, Anne Teresa De Keersmaeker, Michelle Dorrance, William Forsythe, Martha Graham, Bill T Jones, Francesca Harper, Miki Orihara, Crystal Pite, Shamel Pitts, Silas Reiner, Dwight Rhoden, Christina Robson, Melinda Sullivan, Clifford Williams. Spring 2020: a world premiere evening-length dance installation at the Dance Center created by Jill Johnson in collaboration with HDP students and interdisciplinary partners.

Course Notes: **Some dance experience required. Students concentrating in Theater, Dance & Media or interested in developing a performance practice encouraged to enroll.**

Enrollment determined by audition during shopping week. Fulfills a TDM requirement. Artistic Director/Course Head: Jill Johnson.

Recommended Prep: **Previous dance experience required.**

Theater, Dance & Media: See it. Do it. Make Theory. (160648)

Debra Levine

2020 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

What are theater and dance? What is at stake when a performance is live or recorded? How do performers use space, time, and bodies to make meaning? What is the relationship between a performance and a script? Why do performers and audiences gravitate to live arts? How do economic and political circumstances shape live performances? This sophomore tutorial in Theater, Dance & Media provides students with an intellectual and practical foundation to the concentration by exploring these questions and more. Readings will include theoretical texts from Schechner, Phelan, and Chaudhuri, alongside scripts and other performance materials by Kennedy, Bausch, Kaprow, and Smith. Assessments emphasize how to write about performance and how performance serves as a form of criticism.

Theater, Dance & Media 109

Beginning Acting Through Scene Study and Monologue Work (207571)

Marcus Stern

2019 Fall (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This is a beginning acting class where all the work will be done through scene study and monologue work, using contemporary texts from theater, television and film. The core components of the class are based on "action-based acting" (how one actor is trying to change/effect another actor), practical/functional text analysis, "reading your scene partner" in order to figure out how best to connect with them, and the ability to both self-assess and self-adjust your own acting work. No previous acting experience necessary. Good for those interested in exploring the world of acting for the first time, as well as for directors, writers, designers, dramaturgs, stage managers and other theater practitioners interested in learning about acting and how to work with actors.

Course Notes: **Enrollment to the class for this semester will be a lottery format. The lottery draw for positions in the class will happen towards the end of the first day of class. Those who attend the first day of the class will be eligible for the lottery.**

The Actor in Rehearsal: Practical Techniques (117461)

Karen MacDonald

2019 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 14

An expansion of basic acting techniques, with an emphasis on the actor's work done during rehearsal: creating a character, building a role and finding one's own way of preparing for and making the most of rehearsal time. Actors will use exercises and improvs to help explore character and sharpen instincts, and do monologue and scene work using contemporary texts, both comic and dramatic.

Class Notes: **Digital application is required; please complete survey here https://forms.gle/ttz3iks1HqW2aFGJ8. The digital application will close on Wednesday, Sept. 4th at 7 pm. For further questions, contact: james_montano@harvard.edu**

Advanced Acting: Contemporary Texts (122906)

Marcus Stern

2020 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

For actors interested in working in television, film and theater, this is a course of advanced acting techniques using contemporary dramatic texts for scene work. The emphasis is on action based acting and the creation of an acting process that can be specifically tailored to the individual actor. In addition to extensive scene work, the course includes audition techniques, choosing material for auditions, character work (making physical and vocal changes so a character can be different from your regular persona), text analysis, and how to "work from yourself " for more believable acting and vocal training for actors.

Course Notes: **Enrollment determined by audition on the first day of class. Please bring in a memorized and rehearsed contemporary monologue no longer than 2 minutes to audition with on the first day.**

Acting Shakespeare (119020)

Remo Airaldi

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course is an intensive study of Shakespeare's dramatic works from the point of view of the actor. It is important to remember that Shakespeare's verse dramas were written to be performed and that only when they are approached this way - as playable, theatrical texts - that they have their maximum impact. Through text analysis, scene study, vocal work, and acting exercises we attempt to find not only the meaning, but the music and theatrical power of Shakespeare's words.

Course Notes: **Enrollment will be determined by an audition during the first class meeting.**

Vocal Production for the Stage (118497)

Erika Bailey

2019 Fall (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Whether one is performing in a play, pitching an idea, presenting research or leading a group, the ability to use one's voice effectively is a primary element in the success of the performance. Using several major techniques of speaking training, students will learn the possibilities, nuances and power of the human voice. The class will explore anatomically, experientially and theoretically, exploring different ways to use the voice to meet specific performance challenges.

Course Notes: **Enrollment determined by short interviews to be conducted on the first day of class.**

What's so Funny?: Introduction to Improvisational Comedy (160654)

Remo Airaldi

2019 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Comedy has often been thought of as the poor relation to Drama but, as Lenny Bruce said, "the only honest art form is comedy because you can't fake it." We will attempt to take comedy seriously by engaging in committed, creative and collaborative "play" that will tap into each student's personal, individual sense of humor. The class will focus on the basics of improvisation: group games, narrative skills, object work, offers, spontaneity, agreement, using the space around you, building on-stage relationships and, eventually, scene work.

Course Notes: **Enrollment will be determined by an interview/audition on the first day of class.**

Theater, Dance & Media 121M

Introduction to Clown (214574)

Eugene Ma

2020 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This physically and emotionally rigorous class demands students to fully soften their hard shells, as we rediscover heart muscles that will point us towards the clown: the fully present, uncensored, pre-sexual, child-like state that unleashes our passions, impulses and presence that lets our essence be truly and terrifyingly seen. We will also learn to find games within a performance, to find fun, engaging theater on stage without the need for conflicts! On this journey, we get to slowly uncover one's unique, surprising

and unmistakeable place in the comic world. We are all in search of the sparkle in a clown yet we don't definitively know what a clown is, per se — we just know it when we see one, and respond with a deep belly Ha-Ha and sometimes reflect back on stage with poetic tears from the house.

Theater, Dance & Media 129B

Performing Puppetry (212802)

Kate Brehm

2019 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This laboratory movement course teaches performers how to animate puppets and objects. Students develop a movement skillset different from that of the actor or dancer, specific to the puppeteer. While training students' bodies, the course expands their minds' ability to recognize the potential for liveness in all things and generate story without words. We work with simple objects, solo tabletop puppets, giant ensemble puppets, and bunraku-style dolls.

Similar in format to a dance class, students begin each day with movement exercises training specific puppeteer skills: manipulating energy inside and outside the body; harnessing momentum and suspension; moving body appendages separately from one another; and performing 'invisibly.' Exercises lead into improvisations. Students learn to devise original dramatic material with patterns and movement dynamics in every class. Culminating projects are the performance of solo and group devised scenes.

(This course does not build puppets.)

Course Notes: **This course will be taught by TDM Visiting Lecturer Kate Brehm.**

Theater, Dance & Media 130R

Directing (123080)

Marcus Stern

2019 Fall (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 9

A directing class for directors interested in theater, television and film, as well as for actors, dramaturgs,

designers, and stage managers interested in investigating all aspects of theater. The class accommodates all levels of directing, from first time to advanced directors. It's a course for directors to tell stories. Choreographers interested in theatrical story telling and getting acting values from performers may also find this course useful.

Through constant scene work, students examine how to work with actors, stage stories for clarity and impact, and how to use light and sound to help tell those stories. The central focus is on how a director's personal experiences and/or passions can creatively and concretely shape their story telling. In addition to continuous hands-on directing, students will also study professional theater directors working in a variety of innovative styles. While students must direct some live stage scenes, they may also bring in video or film scenes as part of their class work.

Course Notes: **Enrollment determined by short interviews to be conducted on the first day of class.**

Directing Lab (126812)

Shira Milikowsky

2020 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This class is designed for students interested in expanding their understanding of directing for theater. The course will focus on the work of American experimental theater artists from the 1960's to the present, examining the various ways avant-garde directors and ensembles have experimented with form to seek out radical new modes of storytelling. Students will create work inspired by the artists and productions studied, applying theory to practice in rehearsals and presentations.

CoLLab: Methods and Practices of Arts Collaboration (212801)

Debra Levine

2019 Fall (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

At this moment in time, to be an emerging performance-based artist, you need to be highly entrepreneurial and distinguish yourself through an innovative and identifiable artistic vision. It helps to have collaborators to accomplish this goal. Young artists working in the live arts are graduating from their university concentrations or conservatory training programs having already consolidated a relationship with other student artist/collaborators with whom they have developed a sustained practice.

At TDM, we want to encourage this model of collaborative autonomy and allow for new models of artistic collaboration in the live arts. CoLLab is designed to provide student artists with the opportunity to nurture and develop a single project and, at the same time, explore a range of collaborative models and roles within that collaboration.

The goal of CoLLab is that: (1.) the proposed project makes significant progress from its current stage of development (though the work does not have to result in a finished project) and (2.) that the collective working on it wishes to explore how or if they may remain affiliated beyond their time in this course and, more specifically, graduation. CoLLab encourages imaginative ways to formulate interdisciplinary collaborations and to assign roles within those collaborative structures.

Collaborative teams will show work several times throughout the semester for in-class critiques with guest artist professional performance makers whose work is based on collective practice. We will also research performance collective models as case studies. Guest artists and case studies will be drawn from the following: 13P (13 mid-career playwrights who organized to produce one another's work) and the WOW Café (a collectively run women's and transgendered people's performance space); Elevator Repair Service, 600 Highwaymen, Debate Society, Movement Theater, Clubbed Thumb, Tectonic Theater Group (US-based theater companies who devise and produce new work); Rimini Protokoll, Forced Entertainment, Lagartijas Tiradas al Sol, and Milo Rau/International Institute for Political Murder/National Theater of Ghent, Belgium (interdisciplinary and transnational performance); Bill T. Jones/Arnie Zane Dance, Julie Tolentino, Chez Bushwick, Trajal Harrell (dance); and interdisciplinary artists who have included performance as a primary mode of their artistic practice and whose work focuses on developing models of transnational and social-practice collaboration, including: Kaneza Schaal and Chris Meyers, Jonathan Berger and Mady Schutzman, Vikram Divecha, Lola Arias, and Jacques Servin (Yes Men).

Course Notes: **To enroll in this class, you need to propose a project (which can be in any stage of development) with a group of peer collaborators whom you are interested in developing a shared artistic vision and set of practices. (All lead collaborators must agree to enroll in the course – total collaborators on a project can vary from 2-5).**

Practical Tools for Presence: Countertechnique and Dramaturgical Thinking (203636)

Mary Davis

2020 Spring (4 Credits) **Schedule:** T 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course is a multidimensional approach to cultivating dynamic performance presence through the theory and practice of Countertechnique, developed by choreographer Anouk Van

Dijk. Students will gain practical tools for agile attention while dancing, creating, performing, and problem solving. The course offers the physical practice of Countertechnique and supporting theoretical framework, the Toolbox, in relationship to fostering dramaturgical thinking for the creative process. Praxis components include studying basic anatomy; moving the body through learned exercises, improvisation, and performance; and utilizing the Countertechnique Tools to incorporate information into action. Alongside practicing Countertechnique, we will explore Katherine Profeta's *Dramaturgy in Motion, At Work On Dance And Movement Performance,* which reveals the multivalent approach to the dramaturg's position in contemporary dramaturgy.

Weekly Countertechnique class will follow with discussions, improvisation labs, readings, viewings, and/or outings, which will supplement the movement practice and foster final research and performance projects.

Course Notes: **No dance experience required. Students concentrating in Theater, Dance & Media or interested in developing a movement practice encouraged to enroll.**

GAGA People: Movement Language (204031)

Mario Zambrano

2019 Fall (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 25

Gaga, the movement language created by Ohad Naharin, former artistic director and choreographer of Batsheva Dance Company in Tel Aviv, is a continuous, sensation-based movement class. Students are encouraged to interpret and experience the somatic practice of listening to the body while activating a total sensorial attention. Gaga offers a creative framework for students to engage with physicality and imagination, bridging the activity between body and mind while increasing physical potential. There are no mirrors in Gaga, and there are no observers. The class moves in continuum without breaks for a minimum of an hour. GAGA People is intended for and welcomes students who have not had any previous dance training.

Deconstructing the Novel for Choreographic Thinking (204032)

Mario Zambrano

2019 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course will assess the structure and thematic elements of a novel as a means to recognize choreographic opportunities and interpretation in prose. Through discussion/analysis of how craft elements such as point of view, tone, voice, characterization, setting, and conflict are implemented in the composition of the novel, we'll consider structures and modalities of how novels are created, and how these structures/elements can be used for choreographic composition in creative processes. Architecture will be used as a reference point from which to orient course research, and passages of the work will inform students composition. By sourcing language—metaphor, style, rhythm—from the novels studied, written and movement exercises will be derived from the content of these works, either structurally, linguistically, or thematically. Novels studied will include: Hullabaloo in the Guava Orchard by Kiran Desai, Homecoming by Yaa Gyassi, Bluets by Maggie Nelson, Veronica by Mary Gaitskill, The Housekeeper and The Professor by Yoko Ogawa, and Tell Me How It Ends by Valeria Luiselli.

Hip Hop Dance: Exploring the Groove and the Movement Beneath and Beyond the Beat (214435)

Aysha Upchurch

2019 Fall (4 Credits) **Schedule:** W 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Having sprawled so far from its geographical roots, Hip Hop music and dance can be seen, taught, and learned in almost every corner of the globe. Indeed this kind of reach hints at a certain inclusivity or open invitation to all -- there seems to be no body that has not seen or even participated in some moment with Hip Hop dance. True to the essence of Hip Hop culture, the dance form continues to define and stretch itself -- sampling and remixing how and where it moves. Yet with all of this expansion, it is important to honor its roots and history -- there is a method to the madness, a rhyme and a reason behind the swag.

This new course will offer students an opportunity to explore the history and technique behind the dance form and culture called Hip Hop. As a studio experience, we will learn techniques from the different foundation forms of the dance -- breaking, popping, locking -- while also exploring choreography and new and old party dances that point to the groove that defines Hip Hop dance. The class is primarily a movement experience, yet we will ground our learning by honoring the historical grounding and criticality necessary to learn and appreciate the art form and culture responsibly. Through movement explorations,

discussions, short readings and film viewings, and engagement with guest lecturers, we will come to understand Hip Hop's power as a critical pedagogy and still have the requisite fun that come with Hip Hop dance.

Theater, Dance & Media 149UB

Performing Culture: Exploring Identity and Power Through Hip Hop Dance (215727)

Aysha Upchurch

2020 Spring (4 Credits) **Schedule:** W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

Hip Hop is music, is dance, is commentary, is revolution, is a way of being, is culture. The roots of Hip Hop are steeped in the traditions of the African Diaspora. So what of these roots remain as Hip Hop dance simultaneously allows itself to push across borders with other genres and is pulled into spaces for commercial and popular appeal? What does it mean to perform Hip Hop dance as an expression of culture that one may or may not be a part of? How is Hip Hop dance an embodied social critique on power? How does Hip Hop dance embrace diverse identities while also asserting and preserving its own?

In this new course, students will have an opportunity to engage these questions as they study and explore Hip Hop dance technique and history. Through a mix of learning activities that allow for skill development, dialogue, and engagement with artists/practitioners, students will investigate what it means to participate in or perform Hip Hop dance with an intentional eye on how it defines and intersects with various cultures, empowers identities, and interrogates power dynamic. Students will track their own progress with skills through a Movement Diary, while conditioning and flexing critical analysis muscles through group discussions, film assignments, and choreography projects. The course promises to be a boat load of "conscious fun."This course is a 70-30 split on time moving versus time in discussion.

Course Notes: **No dance experience required. Students who took TDM149U are eligible to enroll. Students concentrating in Theater, Dance & Media or interested in developing a movement practice encouraged to enroll.**

Directorial Concepts and Set Design of the 20th and 21st Centuries (110319)

Julia Smeliansky

2019 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

In this course, students will study the work of the great 20th and 21st century auteur directors and set designers. Students will explore a range of artistic movements including Constructivism, Futurism and Dada, and discuss how the theater became a place to experiment with the concepts and discoveries of these movements. Examining primary source materials in the Harvard Theatre Collection, students will research the work of artists including Gordon Craig, Richard Wagner, Leon Bakst, Pablo Picasso, Konstantin Stanislavsky and Vsevolod Meyerhold. The course will also focus on the work of such contemporary directors and designers as Robert Wilson, George Tsypin, and Robert Lepage.

Design Foundations: Scenography Studio (109545)

Amy Rubin-Higgason

2020 Spring (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course explores the foundational tools and concepts for set, light, and costume design. Students will be introduced to the foundational skills of scenography through a series of design projects that employ a variety of strategies for communicating designs including manual (diagramming, researching, drawing, painting, model making) and digital media (image manipulation, CAD). Students should not expect a technical survey, but rather an exploration of how visual elements shape a given performance. Projects will be complimented by study of theories and practices of Richard Kelly, Adolph Appia, Bertolt Brecht, and others.

Course Notes: **This course will be taught by Lecturer Amy Rubin**

Techniques in Theater Design and Technology (205360)

Andrew Gitchel

Kathryn Nakaji

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This course provides a foundation of theater technology knowledge that can be built upon throughout students' theater careers. This class will cover the basics of technical theater history, in addition to working hands-on with current technology. Students will become familiar with standard paperwork, safe practices,

and working standards in the theater industry, as well as creative problem-solving through in-class projects.

Course Notes: **Additional Lab section will be scheduled on Fridays at time TBD.**

Transformative Design (214575)

Dede Ayite

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

The class begins with the premise, following the great director Peter Brook, that all that is truly needed to tell a great story is an actor and an audience. And then it asks, what is design for the stage and what can it do? The class explores how design is that visual and material element that can not only amplify, interpret and extend the message of the production to the viewer through delight and astonishment— design (a costume, a prosthetic, a material prop or piece of scenery) can also transform the performer and shift the very terms of representational embodiment. For the actor, design can change one's understanding of the physicality and the intellectual and emotional life of the character she or he is engaged to portray.

Transformative Design is rooted in the principles of theatrical design practice as a process to explore the breadth of these questions. The pedagogical approach of the class is for the professor to first demonstrates the design process that a costume designer undertakes, from start to finish. Ayite will use a production for which she has been the lead designer to show how to read and research an existing dramatic text as a designer and how to manifest the vision of other lead artists – director, choreographer, dramaturgs and actors – in visual terms. Student will learn how to sketch and build costumes to transform the performer's body, and how to work as a collaborator throughout the rehearsal process. After carefully following the steps of a professional costume designer preparing for a theatrical work, students in the class will then emulate what they have been taught and take on an individual design project from start to finish under Ayite's supervision.

Live Art from Archival Sources: Devised Theater Workshop (203537)

James Stanley

2020 Spring (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 18

How can vinyl records, legal transcripts, classic movies, home recordings, 19th century burlesque routines, archival objects and old photographs become the raw materials for some of today's most compelling theater? And how do these works ask audiences to reconsider our inheritance of the past, creating a dialogue between the past and the present? This course focuses on theater-makers and processes of production that turn objects, archives and cultural data from the past into vibrant forms of contemporary performance. In the first half of the course, we will explore works by Tina Satter, Alison S. M. Kobayashi, the Wooster Group, Joshua Gelb and Nehemiah Luckett (among others), meet with these artists to discuss their processes, and take a deep dive into our own archives at the Harvard Libraries. Moving from theory to practice, we will then devise our own solo and collaborative works based on objects and artifacts of our choosing. This course is for writers, directors, designers and performers willing to work across disciplines.

Playwriting: Ritual Practice and Curious Worlds (207819)

Phillip Howze

2019 Fall (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

A play is a new world in and of itself. What sorts of strange, curious worlds are theater makers crafting today? What approaches are they taking to create these worlds?

In this new playwriting course we will explore both text and non-texts, the wild (as well as the conventional) to discover what drives contemporary plays, devised works, and performance today.

We will discuss the practices employed by various playwrights and directors—particularly women and artists of color—and try our own hand at some of these approaches. In addition, we will see live performances in realtime; engage special guest/visiting artists; collaborate with fellow classmates; and expand our curiosities.

Most importantly, we will write. This is an exploratory writing workshop with a focus on generating new material. By the end of the semester, you will have created a portfolio of new works, ideas, processes and rituals.

Playwriting: Intersecting Americas (211184)

Phillip Howze

2020 Spring (4 Credits) **Schedule:** R 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

"Look around, look around at how lucky we are to be alive right now!", exclaim The Schuyler Sisters in Lin-Manuel Miranda's HAMILTON. History is happening. This new writing workshop will engage what is happening and what has happened by examining texts, theater-making and live arts through the lens of singular periods in America's modern social history. We will explore form in frames of the twentieth century (for example, early AIDS-era) as well as in the contemporary moment (Black Lives Matter).

We will look primarily at writers of the Americas, but also beyond. We will write collisions and collusions, interrogating spaces across discipline and tradition. In addition to expanding our writing and reflective practice, we will undertake experiments in participation, spectatorship, and collaboration to question: how have theater makers been in conversation with their time and times?

Course Notes: **Though there is no prerequisite for this course, this is a complementary class that can be taken along with Playwriting: Ritual Practice and Curious Worlds, offered in Fall 2018.**

Digital Media Performance (213648)

Young Joo Lee

2020 Spring (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Digital media performance has a long history in its content, form and technology; starting from Winsor McCay's performance with the projection of Gertie the Dinosaur animation to the more recent Virtual Reality performances using advanced computer technology. This studio-based seminar explores different forms of digital media performance focusing on the specific research themes, largely divided into body, time and space, developed by each student/student group.

We will read and watch examples of relevant art works and analyze the technological aspects and conceptual background of these works. Reflecting on the discussions and prompts provided in the class, students will find their own research theme which will then be developed into a digital media performance project or a proposal for a project. Critique and presentation of the students' works are essential part of the class.

Depending on the student's interests and background, Unity 3D and After Effects tutorials will be taught in the class.

Uproot Aesthetics: Interdisciplinary Temporalities in Performance (212803)

Jace Clayton

2019 Fall (4 Credits) **Schedule:** M 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 14

Dancers engage with time in one way, actors another, software coders yet another. In this studio-based seminar we will develop a performance work powered by these very differences, using a generative crosstalk between disciplines. The practical and theoretical course begins with the notion that the colonial encounter in the Americas can be thought of as clash between incompatible conceptions of time, when various indigenous temporal philosophies and archives were largely destroyed. Examining scholarship about the era alongside texts on nonlinear new media techniques, we will investigate historical and artist-led 'dissonant temporalities' to inform the creation of our own. How might the subjective time experienced by performers challenge - or alter - the objective time of history? What insights can collective performance give to understanding the changing roles of narrative, historiography, and affective urgencies? Can Elias Canetti's claim that "a civilization comes to an end when a people no longer takes its own chronology seriously" be understood as a post-colonial promise rather than a post-Enlightenment threat? If time is the core material of performance, then how might participating in its flow refine our ability to communicate and transform contemporary subjectivity?

Course Notes: **This course will be taught by TDM Visiting Lecturer Jace Clayton. The class will meet on Mondays, from 12:30PM-2:45PM.**

Immersive Storytelling Using Mixed Media (208156)

Young Joo Lee

2019 Fall (4 Credits) **Schedule:** W 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 10

This course is a studio-based class about storytelling using mixed media: video, performance, drawing, text, sound and virtual reality. We will examine different ways in which artists used visual language to tell stories. Starting with the history of immersive media, the class will study the relationship between visual language and technological development. We will screen examples of relevant contemporary art works and analyze the technological aspects and conceptual background of these works. Utilizing video, performance, drawing, sound, text and virtual reality, students will develop projects, reflecting on the discussions in the class. Critique and presentation of the students' works are essential part of the class.

Students are required to attend the Coding Workshop for Artists series, held on September 26-27, 6-9pm, and October 16, 3-6pm (during class time) and October 17, 6-9pm, at the Derek Bok Learning Lab.

Acting and Authenticity (156461)

David Levine

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

This studio-based seminar examines the concept of "building a character" and pushes it towards performance art. While acquiring Stanislavski- and Method-based acting techniques, students will also consider psychological realism in light of philosophical, psychological, sociological and scientific notions of authenticity and falsehood, presence, mimesis, identity, and empathy. What does it mean to turn into someone else? How total is the transformation? What are the implications for our understanding of the individual? What does "realist acting" mean in an era of AI, social media, and motion capture? The seminar involves both readings and exercises, and culminates in a final project where participants turn into each other.

Selfies: Solo and Verbatim Performance (214588)

Elizabeth Phillips

2020 Spring (4 Credits) **Schedule:** R 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course will explore performances of the self--both storytelling and the first personal monologue, and documentary theater and third person verbatim performances. Each seminar will be divided between theoretical and critical discussion of plays and performances--with particular attention to themes of gender and sexual identity, race, community building, and US politics--and a studio practicum in which students will perform their own stories and the stories of others. For the final assignment, students will create either a one-act length verbatim/documentary performance or a one-act length solo show. Course materials will include plays and performances by artists including Heidi Schreck, Anna Deavere Smith, Alan Rickman and Katherine Viner, Erin Markey, Diana Oh, Lily Tomlin, Moises Kaufman, Doug Wright, Joe Salvatore/NYU Verbatim Performance Lab, and The Civilians.

Course Notes: **TDM 179P Is crosslisted with ENGLISH 90TC.**

The Making of a Musical: The Creative Process (205365)

Ryan McKittrick

Diane Paulus

2020 Spring (4 Credits) **Schedule:** W 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 20

This course introduces students to the collaborative process of creating a new musical by analyzing the real time development of world premiere musicals at the American Repertory Theater. In addition to these case studies, the course will examine other existing American musicals including *West Side Story*, *Assassins*, *Pippin* and *Waitress*. Through readings by historians, theorists and practitioners and visits from artists and professionals across the field, students will learn about the key components of a musical including: book and adaptation; music and lyrics; choreography; and visual design. There will also be a class devoted to the art of producing and the business of musical theater.

Over the course of the semester, students will develop a vision and "pitch" for their own musical project. As a final assignment, the class will collaborate on creative presentations drawn from the proposed musical projects.

Class Notes: **This course will meet from 12:00-2:00PM**

Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)

Eleanor Craig

2020 Spring (4 Credits) **Schedule:** TR 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 30

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we ask, the information that counts as data, and the genres of work that we recognize as 'academic'?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with ethnic studies, it aims to serve as a 'Theories and Methods' course, providing tools and strategies for refining one's own interdisciplinary inquiries.

Sex, Gender, and Afrofuturism (212895)

Robert Reid-Pharr

2020 Spring (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 30

The explosion of interest in Afrofuturism in the last two decades speaks to an ever more urgent desire to understand how people of color project themselves into narratives of both the future—and the past. Moreover, the work of Afrofuturist intellectuals has been profoundly concerned with matters of gender and sexuality. Indeed, examinations of inter-racial and inter-species "mixing," alternative family and community structure, and disruptions of gender binaries have been central to Afrofuturist thought. In this course we will examine these ideas both historically and aesthetically, asking how the large interest in Afrofuturism developed from the early part of the twentieth century until now. Focusing primarily on science fiction and fantasy literature, the course will treat a broad range of artists including, W.E.B. DuBois, George Schulyer, Marlon James, Octavia Butler, Andrea Hairston; Nalo Hopkinson; N.K. Jemisin, Nnedi Okorafor, and others.

Course Notes: **And a one hour section to be arranged.**

2019 Fall (4 Credits) **Schedule:** M 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course begins with feminist critical engagements with other theories and practices, including Marxism, psychoanalysis, and Foucault. It will then move on to debates and discussions within feminism, as well as intersections of feminist theory with other theories including sexualities studies, post-colonial/trans-national studies, transgender studies. One of the major concerns of the course is the relationship between feminism, theory, and politics. Throughout the course, we will discuss the contemporaneous movements that intersected with emergence of these theoretical concerns.

Course Notes: **This course fulfills the theory requirement for the undergraduate concentration in Studies of Women, Gender, and Sexuality.**

Theories of Race and Sexuality (156043)

Robert Reid-Pharr

2020 Spring (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Emphasizing the development of (transgressive) discourses of gender and sexuality within communities of color, this course will examine key contemporary texts addressing transgender identity, H.I.V./A.I.D.S., abjection, queer of color critique, reproduction and pornography. We will explore the work of: C. Riley Snorton, Dagmawi Woubshet, Darieck Scott, Sharon Holland, Roderick A. Ferguson, Jose Munoz, Samuel Delany, Jennifer C. Nash, Jasbir Puar, and more.

Solidarity: Transnational Women's Rights from Suffrage to NGOs (212893)

Durba Mitra

2020 Spring (4 Credits) **Schedule:** T 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

"Solidarity" takes an intersectional approach to the study of women's and sexual rights in transnational perspective from the late nineteenth century until today. In this course, we will explore how American feminism, particularly through the fight for women's suffrage, set the agenda for issues of equality and sexual rights around the world, often in complex and contradictory ways. Through a semester-long engagement with Schlesinger Library collections on transnational feminist and women of color feminisms, we will investigate feminist links to and critiques of the imperial project – from anti-trafficking campaigns in colonial and postcolonial India, to transnational feminist labor movements in the Philippines and Bangladesh, to the wars in Vietnam, Afghanistan, and Iraq. Together, we will think about the complex relationship of feminism and war, the place of feminist thought in debates about incarceration and immigration, and the contradictory role of feminism in global movements for rights.

Psychology of the Gendered Body (205489)

Nicole Noll

2019 Fall (4 Credits) **Schedule:** R 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Our perceptions of gender—our own and others'—powerfully shape our embodied experiences and behaviors. This course examines the embodiment of gender via the lens of psychological science. We will begin by exploring recent research related to gender and the body, and then study the underlying psychological mechanisms that influence our self-perceptions about gender. Our disciplinary foundation in psychological science will allow us to complicate current understandings of gender and embodiment by considering factors such as sex, race, sexuality, experience, intention, and awareness.

Leaning In, Hooking Up: Visions of Feminism and Femininity in the 21st Century (159887)

Phyllis Thompson

2020 Spring (4 Credits) **Schedule:** W 0300 PM - 0515 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

What does it mean to "do" feminism, or to "be" a feminist in the 21st-century United States? What can we make of the dominant social expectations for a woman's life? This course explores contemporary ideals of feminine success, including their physical, familial, professional, and political manifestations. We will engage with highly-contested topics—including sexual violence and Title 9; work-life balance; the imperatives of self-care and presentation; and new models for sexuality, reproduction, family, motherhood, and domestic life—using the tools of theory and cultural studies to interrogate their framing within popular discourse. Throughout, we will critique ideological formations of gender, particularly as bounded by race, class, and sexuality.

Course Notes: **Weekly lecture plus an additional one hour section to be arranged.**

Gender and Language (207785)

Jessica Taylor

2019 Fall (4 Credits) **Schedule:** T 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 40

In this course we examine some key questions about how language and gender work together in the world. What does it mean for language to be gendered? Are there "male" and "female" ways of speaking? Can language reinforce the patriarchy? Is gender something we express or something we build in interaction? How does gender intersect in language with other social identities like ethnicity, race, class, religion, and sexuality? How can we understand gendered language beyond the binary? The course focusses on language as a practice, as well as a system of representation. We consider words, conversations, and embodied interaction and draw on scholarship on language use around the world.

Course Notes: **And a one hour section to be scheduled.**

I Will Survive: Women's Political Resistance Through Popular Song (156084)

Michael Bronski

2019 Fall (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 75

This course will examine how women, through popular music, have articulated a clear political analysis of their oppression that has reached large audiences and become foundational to American culture. We will begin with African-American blues in the early 20th century and move through jazz, torch singing, folk, girl groups, disco, and contemporary song. Along with music readings we will include biographical, historical, and critical texts that will place these women in their artistic and political contexts. Performers studied will include, among others, Bessie Smith, the Boswell Sisters, Billie Holiday, Marian Anderson, Peggy Lee, Joan Baez, Gloria Gaynor, and Amy Winehouse.

Course Notes: **Weekly lecture and a one hour section to be arranged.**

Black Masculinities (203219)

Robert Reid-Pharr

2019 Fall (4 Credits) **Schedule:** T 0945 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 18

With particular emphasis on mid-twentieth century American culture, this seminar will examine complex - and often contradictory - iterations of race and gender in works of literary and visual culture produced by and about African American men. We will explore the work of: Shirely Clarke, Chester Himes, Iceberg Slim,

Alice Walker, Melvin Van Peebles, Samuel Delany, James Baldwin, Robert Deane Pharr, Eldridge Cleaver, Amiri Baraka, and more.

Women, Gender & Sexuality 1274

Gender, Race, and Poverty in the United States (207786)

Marya Mtshali

2020 Spring (4 Credits) **Schedule:** TR 0430 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course investigates the realities of poverty through an intersectional lens, meaning that we will consider the simultaneous impact of race, gender, sexuality (and other identities) on economic insecurity. In what ways are conversations about poverty and its causes infused with assumptions and stereotypes related to gender, race, and sexuality? We hear so much in the media about what causes poverty – what is reality and what is myth? How do these myths operate to reinforce and sustain economic inequality? Who and what gets left out of the conversation about poverty? Topics in the course include historical understandings of poverty; intergenerational class mobility; depictions of poverty in pop culture; and bringing attention to populations that often get left out of mainstream conversations about poverty.

Interracial Intimacy: Sex, Race, and Romance in the U.S. (215756)

Marya Mtshali

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0545 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

What assumptions about race and sex are embedded in the term "interracial," and why are different types of interracial relationships viewed differently? How did White fears of relationships between Black men and White women influence the creation of the Ku Klux Klan? How did the story of Pocahontas influence the development of a settler colonial state? This course investigates the significance of interracial intimate relations throughout United States history and through the lens of race, class, gender, and sexual orientation. Although interracial intimate relations (consensual and non-consensual) predate the nation's founding, they have been considered taboo throughout most of American history. From Sally Hemings and Thomas Jefferson to Meghan Markle and Prince Harry, we will analyze how social perceptions of these

relationships shift over time, as well as the economic and legal implications of interracial intimacy in the construction of the U.S. as a nation-state.

Love's Labors Found: Uncovering Histories of Emotional Labor (207804)

Caroline Light

2019 Fall (4 Credits) **Schedule:** R 0900 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 15

How do love, care, and desire influence the value of work, and why is emotional labor – which is vital to child or elder care, domestic labor, nursing, teaching, and sex work – often considered to be something other than work? How and why do the racial and gender identities of workers affect the economic, social, and emotional value of their labor? How do political and social arrangements of labor help produce and reinforce racial categories while solidifying the boundaries separating masculinity and femininity? Through a mix of primary and secondary sources, this seminar explores histories of emotional labor and the power structures that give meaning to often taken-for-granted categories of work. These sometimes hidden histories are key to untangling the gender, sexual, and racial implications of the "intimate industries" that populate today's transnational labor economies.

Course Notes: **This course, when taken for a letter grade, counts as a portal course for the secondary field in Ethnicity, Migration, Rights (EMR).**

Friendship as Way of Life (212892)

Afsaneh Najmabadi

2019 Fall (4 Credits) **Schedule:** W 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course will begin with Foucault's essay, "Friendship as a Way of Life." It will discuss the contemporary context of new engagements with and interests in friendship. We will then look at differing concepts and practices of friendship, and their work in shaping social sentiments and political affects in Euro-American context. Readings will include Plato, Montaigne, Bray, Marcus, Foucault, and Miller.

The Sexual Life of Colonialism (212894)

Durba Mitra

2020 Spring (4 Credits) **Schedule:** M 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

Sexuality has long shaped racial and civilizational assessments of what it means to be modern. In this course, we will investigate the role of colonialism in racial imaginations of gender and sexuality and how these histories shape contemporary understandings of LGBTQ politics, reproductive and sexual rights, and anti-colonial resistance around the world. We will explore histories of sexual control, colonial and racial difference, and marginalized and queer sexualities in colonial and postcolonial spaces, including parts of West Asia, South Asia, and Sub-Saharan Africa. The course will cover many forms of sexuality, including interracial relationships between colonizer and colonized peoples, questions of sexual violence, queer and same-sex desires, sexual outcasts like "prostitutes" and transgender peoples, and the politics of gender difference and LGBTQ rights in the postcolonial world.

Women, Men, and Other Animals (213362)

Mel Chen

2020 Spring (4 Credits) **Schedule:** T 0300 PM - 0500 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This course explores ways in which human collectives have conceived of other animals, whether in analogical relations for scientific research, exploitative relations for food and labor, affective relations like fear, disgust, love. What are some histories of these unique interdependencies between human animals and nonhuman animals? We will critically explore the relentless and yet slippery divisions between humans and nonhuman animals, seeing them as a falsely singular, conflictual and segregatory divide that has played historical roles in intrahuman violence as well as in the rhetoric, images and institutions of settlement, colonialism and capitalism. We will see ways in which the difference schemes of seeming givens of gender, sexuality, race, nationhood, and ability carry these legacies and obscure other ones that honor and redeem the lives of nonhuman animals. Informing many human/animal divides are binary relations of mind/body, man/woman, light/dark, modernity/tradition, West/rest, civilized/barbarian. Yet it is also evident that animals do not only carry these legacies and burdens; "they" are not simple metaphors nor are they wearers of mere signs for human meaning. They act in a world that is also theirs, and refuse the orders of being imposed on them. Our primary and secondary readings are drawn from queer and trans studies, philosophy, feminist science studies, indigenous studies, fiction, film, activist movements, and more. This

is a heavily discussion-based course; we will together learn to be "animal critics" of many phenomena, including the readings themselves, all of which need interpretive augmentation and critique in a given place and time.

Live Theory (and Practice): A Graduate Proseminar in WGS Studies (122276)

Alice Jardine

2020 Spring (4 Credits) **Schedule:** T 1200 PM - 0200 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

This newly designed WGS Graduate Proseminar, offered for the first time this spring term, will emphasize in-depth, lively conversations with WGS faculty about the interdisciplinary innovations of WGS Studies today, with singular attention to current debates in feminist and queer theories and practices. Each week, one member of the WGS faculty will guide the seminar in wide-ranging conversation about their own intellectual formation, about their own field of expertise, and about where and how their own writing fits into the larger intellectual itinerary of WGS Studies. Discussions focused on the intellectual history of WGS Studies as well as on matters of writing, teaching, and professional development will frame the course. Visiting faculty members include Robin Bernstein, Michael Bronski, Mel Chen, Caroline Light, Durba Mitra, Robert Reid-Pharr, Sarah Richardson, and Linda Schlossberg.

Course Notes: **Open to advanced undergraduates and to graduate students from all schools and disciplines.**

Is required for the WGS graduate secondary field.

Women, Gender & Sexuality 2051

In These Times: Queer, Feminist, Experimental Methods (213363)

Mel Chen

2020 Spring (4 Credits) **Schedule:** R 1245 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** 15

"These times" mark a particular nexus of, on the one hand, work marked as engaged with the politics of "difference" in the university, and on the other, a congealing of felt urgencies in the translocal spheres of life and politics. How might writers and thinkers serve, fuel, and legitimate forms of experiment in these times? What are ways to conceive of both "experiment" and "these times" in relation to our own work, work which inevitably emerges from lives in context? In this seminar, we will take an open-ended approach (our

own experiment) to experimental method in absorbing, testing, weighing, utilizing, inventing, and restaging, arguably experimental work in queer, feminist, trans, and critical race scholarship, written in its times. Possible readings include: Omise'ke Natasha Tinsley, Trinh T. Minh-ha, Riley Snorton, Jacqui Alexander, Saidiya Hartman, Eva Hayward, Roderick Ferguson, Judith Butler, Fred Moten, Gloria Anzaldua.
