The term implicit bias was coined in 1995 to capture the idea that bias, i.e., a deviation from truth or shared values can be implicit, i.e., occur without conscious awareness and/or conscious control. It belongs to an area of scientific psychology named implicit social cognition (ISC), dedicated to exploring the hidden aspects of the mental representation of social groups. Today, 25 years later, the term implicit bias has transcended academic psychology and permeated contemporary culture (set your Google Alert to "implicit bias" to see the daily entries that arrive!) to refer to unintended actions that nevertheless create harm and lead to disparities along the lines of social group membership, e.g., age, gender, sexuality, race, ethnicity, socioeconomic class, physical attributes, religion, politics, language and culture, geographic region and nationality. The course will provide an introduction to the science of implicit bias: its origin and break from previous ways of thinking about the human mind, basic theoretical concepts, dominant methods, and noteworthy discoveries. In parallel, the course will offer students the opportunity to explore the societal impact of implicit bias in domains such as employment, healthcare, education, law and law enforcement, and the daily task of living. The requirements of the course are geared toward achieving these goals: (a) sharpening analytic and ethical thinking with a focus on the science itself, (b) regular writing and speaking exercises, and (c) creating products of social value such as entries for Wikipedia and teaching modules for outsmartinghumanminds.org.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, and PSY 18 before enrolling in this course; or permission of instructor.

Research Seminar in Implicit Social Cognition (127489)

Mahzarin Banaji

2021 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

An introduction to research on implicit social cognition, with special focus on attitudes, beliefs, and identity and in some cases its applications to law, business, medicine, and government. Students will be paired with individual researchers to work on ongoing projects that can turn into more independent projects. In addition to weekly work in the laboratory, students are expected to attend biweekly discussion groups focusing on current issues and directions in the laboratory as a whole.

Class Notes: To express interest in enrollment, please email the instructor at mahzarin_banaji@harvard.edu prior to the first class meeting.

Leadership Decision Making (205646)

Jennifer Lerner

2021 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

25

Organizational leaders make decisions involving risk and uncertainty every day. Whom should our organization hire? Should we choose the gamble or the sure thing? How should we structure accountability systems? How do we avoid operating out of fear? But a leader's impact only goes so far unless s/he takes steps to engineer optimal decision environments for the organization as a whole. By gaining an understanding of fundamental mind-brain-behavior relationships in judgment and decision making, you will become better able to design decision environments that make everyone smarter - i.e., less susceptible to common errors and biases. Taking this course will not tell you what to choose but it will give you frameworks that reveal how to choose and how to structure optimal decision environments. Specifically, course topics will include (a) fundamental mental processes in perception, memory and context dependence; (b) how questions affect answers; (c) models of decision making; (d) heuristics and biases; (e) social and group influences; (f) common traps; and (g) debiasing techniques. We will also discuss emotional influences on decision making. The lectures and discussions will be coordinated to complement weekly readings, which draw from psychology, behavioral economics, and neuroscience. Throughout the course, the overarching goals are to: (1) Learn about the academic field of behavioral decision making, its major theories, results, and debates. (2) Become a critical consumer of research findings, learning methodological standards for evaluating the soundness of empirical studies. (3) Develop the ability to effectively write and speak about behavioral science theories, results, and debates. (4) Acquire practical skills for improving your own judgments and decisions. (5) Acquire knowledge of which biases individuals can fix with training/knowledge and which biases individuals cannot fix unless leaders engage in institutional design (e.g., nudges). (6) Develop a capstone project in which you apply the material in a way that will improve professional decision making processes. Possible applications to legal process, government institutions, medical settings, public health, education, finance and other domains abound.

Course Notes:

Also offered by the Harvard Kennedy School as MLD 301. Doctoral students will have customized assignments and an additional meeting time in order to receive credit.

Recommended Prep:

For undergraduates, the Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18 or Science of Living Systems 15 before enrolling in this course; or permission of instructor.

The Moral Life of Babies (213251)

Regan Bernhard

2020 Fall (4 Credits)

Schedule:

W 0645 PM - 0845 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Two-year-olds are among the most anti-social people on earth. They respond to the smallest slight with screaming, thrashing, kicking, and spitting. They take what they want, when they want it without concern for others. They hit and bite other children just to see what will happen. Yet, psychological research also shows that even very young babies prefer those who help to those who harm, suffer when they see others in pain, favor equal allocations of resources, and expect good actions to be rewarded and bad actions to be punished. What explains this discrepancy? In this course we will explore the science of social development focusing specifically on what aspects of social cognition might be innate and which likely develop through childhood. Topics include the development of fairness, morality, theory of mind, empathy, cooperation and punishment, and harm aversion.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

Driven to Succeed: Understanding Student Motivation (213354)

Emily Hangen

2020 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

What motivates people to give their best efforts? Are you driven by awards, curiosity, challenges? Is all motivation created equal or do some types of motivation lead to burnout while others fuel long-term success? To understand the complexities of human motivation, we will discuss a variety of motivation frameworks such as self-determination theory, expectancy-value theory, and achievement goal adoption. This course will focus on student motivation in particular, but motivational principles discussed are broadly applicable. We will also consider how emotions, grit, relationships with others, and stress affect motivation. With an understanding of what affects motivation, students will explore practical implications by evaluating

motivation interventions and by formulating individualized motivational plans.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

The Power of Others: Social Influence and Persuasion (213355)

Emily Hangen

2021 Spring (4 Credits)

Schedule:

TR 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This is an intensive, half-term seminar that runs during the first 7 weeks of the semester (from Jan. 25-Mar. 12). How does social psychological research contribute to our understanding of courtroom decisions, shopping habits, and guide effective leadership? What are the key ingredients of effective persuasion? This intensive, half term seminar explores the powerful impact other people have on our thoughts, attitudes, and behaviors. Students will gain familiarity with a breadth of scientific findings on influence such as framing, reciprocity, social proof, and commitment. Students will create a podcast utilizing or describing how to apply two of these techniques as their capstone assessment. In addition to developing a deeper understanding of the science of persuasion, students will use this empirical basis to deliberate on how to leverage and resist social influences in their everyday lives.

Course Notes:

This is a full credit, half term course.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, or PSY 18 before enrolling in this course; or permission of instructor.

What Infants Know, How Children Learn (125979)

Elizabeth Spelke

2021 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

Despite recent advances in computer science and machine learning, human infants remain the most prodigious learners on the planet. This seminar considers the origins and nature of human cognitive development in four broad domains: knowledge of objects and their physical relationships, knowledge of people and social relationships, knowledge of geometry and the larger spatial layout, and knowledge of numbers and mathematics. We will discuss how these foundational cognitive building blocks support humans' ability to explain, understand, and generalize, skills that are critical for successfully navigating our surroundings. Understanding these core psychological competencies has become essential to progress in many areas of society, including efforts to improve education, to create digital "cognitive assistants" who help us navigate, plan, and remember things, and to develop human-like artificial intelligence. Building on findings from basic research, we will consider how each of these efforts can be advanced.

Special Seminar: Clinical Psychological Science (216440)

Matthew Nock

2020 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

5

In this course we will study foundational questions in clinical psychological science, such as: What is mental illness? How does it develop and change over time? How is it best treated and how do our most effective treatments actually work? What can be learned from basic and applied research and what are the limitations of each? After covering key readings on these and related topics, the direction of the course will be driven by student interests and input. Inspired by the Oxford tutorial system, enrollment for this course will be limited to five students.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course; or permission of instructor.

Stigma, Discrimination, and Health (216272)

Mark Hatzenbuehler

2021 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What is stigma? How do stigmatized identities and conditions differ from each other? Why do we stigmatize? What are the consequences of stigma for cognitions and emotions, for social relationships, and for health? Through what mechanisms—individual, interpersonal, and structural—does stigma operate to produce adverse health outcomes? How do stigmatized individuals cope with and resist stigma? How can we reduce stigma and its negative effects? In this course we will consider stigma as a fundamental cause of health inequalities across a broad range of phenomena, including (but not limited to) mental illness, sexual and gender diversity, weight, disability, aging, poverty, and immigration status. Students can expect to examine stigma as a predicament that affects nearly all individuals at some point in the life course, and to develop expertise in an individual stigma that is relevant to their personal, academic, and professional interests through a series of focused course assignments.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) before enrolling in this course; or permission of instructor.

Psychotherapy: Science and Practice (160646)

John Weisz

2020 Fall (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Would you pay someone to help you change? Millions of people do, every week. Psychotherapy is a healing art, a subject of scientific inquiry, and—for many—a business venture. In this course we will bring these strands together, focusing on how psychotherapy is practiced in the real world and how clinical science is used to test claims of success. We will examine competing models of therapy, evaluate their scientific status, and dig into case examples of each. We will also explore hot topics in the field, including whether all therapies have about the same effect (the "dodo bird" hypothesis), whether internet-based therapies actually work, and how to get effective therapies to traumatized people in war-ravaged and low-resource countries.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and one of PSY 18 or PSY 1861 before enrolling in this course.

Schedule:

M 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This is a lecture, discussion, and laboratory course. Our goal is for you to master the essentials of behavioral experimentation through a succession of projects, starting with a small number of fundamental paradigms that can be used in many areas of psychology, culminating with a larger final project. Emphasis will be on understanding causal inference and acquiring practical laboratory skills and more abstract conceptual tools. Basic aspects of data exploration and analysis will be covered. A high value will be placed on discussion participation and the communication of results through effective visual graphics in oral and written reports. Note that lectures will be pre-recorded, class discussion will take place during the time listed above, and lab time slots (TBD) will be selected to accommodate as many students as possible.

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

16

Modern psychology labs look similar to tech offices and startups, filled with researchers sitting behind computers writing code. In this course, we will cover fundamental coding practices and computational tools used frequently in psychology research. We will go over the basics of coding, how to run experiments in PsychoPy (Python), how to keep a digital lab notebook, univariate data analyses in R and/or Python, and how to make graphs in R with ggplot. Through this process, students will have the opportunity to develop and run a simple experiment from start to finish. This course is ideal for students considering or beginning a thesis, students interested in graduate school, or students who want more experience in data science or programming.

Course Notes:

This course is open to all students who have completed the prerequisite coursework; no background in programming or coding is assumed or required.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and PSY 1900 or the equivalent of introductory statistics before enrolling in this course; or permission of instructor.

Requirements:

SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1
AND PSY1900 or STAT100 or STAT101 or STAT102 or STAT104

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Social Sciences

Psychology 1950

Intermediate Statistical Analysis in Psychology (121738)

Patrick Mair

2020 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 24

This course offers intense, foundational exposure to psychological statistics, focusing heavily on analysis of variance (one-way, factorial, repeated-measures, mixed-model). Other topics include: exploratory data analysis, sampling distributions, null hypothesis significance testing, t-tests, fixed versus random effects, post hoc and planned comparisons, correlation, simple regression, the general linear model, chi-square tests, nonparametric statistics, confidence intervals, and meta-analysis.

Course Notes:

Required of doctoral students in Psychology.

Class Notes:

Lecture Time: Mon & Wed 1:30-2:15pm

Supplemental Lecture Time (not mandatory): Wed 7:30-8:30pm

Lab Time: Thurs 9-10:30pm and Fri 1-2:30pm

Recommended Prep:

One of Psychology 1900, Statistics 100, 101, 102, 104, or the equivalent.

Requirements:

PSY1900 or STAT100 or STAT101 or STAT102 or STAT104

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	Social Sciences
FAS: Course Level	For Undergraduate and Graduate Students

Psychology 1952

Multivariate Analysis in Psychology (117879)

Thomas Rusch

2021 Spring (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course introduces advanced statistical methods for the empirical measurement of abstract constructs and multivariate analysis. Topics include: Bayesian statistics, non- and semiparametric regression models, conditional process models, reliability and validity, exploratory and confirmatory factor analyses, structural equation modeling and growth curve modeling.

Recommended Prep:

The Psychology Department requires completion of PSY 1950 or equivalent.

Requirements:

Prerequisite: PSY 1950 or equivalent

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

Psychology 2050

History of Psychology: Seminar (118993)

Richard McNally

2020 Fall (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Covers major issues, theories, schools of thought, and controversies integral to the development of psychology from the late 19th century to the middle of the 20th century. Readings include classic articles exemplifying these themes.

Course Notes:

Open to undergraduates with permission of instructor.

Recommended Prep:

For undergraduates: completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from PSY 14, PSY 15, PSY 16, PSY 18, or Science of Living Systems 15 before enrolling in this course.

Requirements:

Pre-requisite: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND PSY14 or PSY15 or PSY16 or PSY18 or SLS15

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Graduate Students

Psychology 2080

Statistical Learning (110487)

Patrick Mair

2020 Fall (4 Credits)

Schedule:

R 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

24

This course is all about Statistical Learning techniques in Psychology and related fields. Statistical Learning is a modern discipline of Statistics which involves developments from the fields of Statistics (obviously), Machine Learning, Computer Science, and Data Science. Overall it refers to a vast set of tools for understanding complex data. More details on the contents can be found in the Syllabus.

Recommended Prep:

It is required that students completed Psych 1950 or an equivalent class. Students need to be solid in multiple regression analysis including mixed-effects models. R knowledge is absolutely necessary

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Social Sciences
FAS: Course Level	Primarily for Graduate Students
All: Cross Reg Availability	Available for Harvard Cross Registration

Psychology 2420

Cognitive-Behavioral Treatment of Psychological Disorders (144980)

*Rebecca Shingleton**Jill Hooley*

2020 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Covers current cognitive-behavioral approaches to the treatment of common psychological disorders in adults. Emphasis is on the practical aspects of treatment, and on treatment outcome research. Includes theoretical underpinnings of cognitive-behavioral therapy.

Course Notes:

Limited to Harvard Psychology graduate students in clinical

psychology.

Additional Course Attributes:

Laboratory in Development and Psychopathology (207568)

Katie McLaughlin

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Provides instruction and experience conducting clinical research in laboratory settings with children and adolescents, with a particular focus on understanding the role that experiences of stress and adversity play in shaping children's emotional, cognitive, and brain development in ways that place them at risk for experiencing psychopathology.

Class Notes:

To express interest in enrollment, please email the instructor at kmclaughlin@fas.harvard.edu prior to the first meeting. Interested students should also take the survey at https://harvard.az1.qualtrics.com/jfe/form/SV_6JY0wjescHXovpr.

Research Methods in Child & Adolescent Clinical Psychology (124970)

John Weisz

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 30

This course is designed to give you exposure to the concepts, as well as the nuts and bolts, of research in clinical psychology of childhood and adolescence. There is a special emphasis in this course (as in the lab) on intervention research addressing youth depression, anxiety, and conduct-related problems and disorders. If you are a psychology concentrator at Harvard, you may have already taken classroom-based courses covering theories and methods that guide research in clinical psychology, such as Abnormal Psychology and Developmental Psychopathology. You may also have taken courses that introduced you to the types of statistical analyses (Psych 1900) and research methods (Psych 1901) used in psychological research. In this course, we will build on the foundation you received in such courses by applying what you have learned to the conduct of specific research projects.

In this class, you will participate in several aspects of the clinical research process via your active involvement in the research of our psychology laboratory. More specifically, through attending weekly class/lab meetings and participating in one or more research projects, you will learn how specific research ideas take shape; how research questions and hypotheses are generated; how studies are designed to address these research questions and hypotheses; how data are collected, cleaned, entered into study datasets, then analyzed; and how findings are interpreted and organized for presentation at professional meetings and in scientific publications.

The main goals of research in our lab are to build an understanding of which interventions for child and adolescent mental health problems are effective, and to promote use of the best evidence-based assessment and intervention in everyday clinical practice for youths and families. In pursuing these goals, we and our colleagues develop ways of structuring evidence-based practices to make them user-friendly and tailored to the settings in which youngsters typically receive mental health care—e.g., community mental health clinics and schools. Much of our work focuses on developing and testing these tailored approaches. We also conduct meta-analyses of the youth psychotherapy research literature, to sum up what has been learned from all the treatment studies with children and adolescents.

This course is designed to be useful to students who plan to pursue a career in child and adolescent mental health, particularly those with an interest in psychological research. However, the skills conveyed (e.g., critical thinking, research design, science writing) may be useful in a variety of ways and relevant to a number of different career paths.

Class Notes:

Class will meet on Tuesdays, 5:30-6:45pm.

To express interest in enrollment, please email Rachel Horn, rachelhorn@g.harvard.edu. An interview with the instructors is required.

Bad Genes, Bad Parents, Bad Behaviors (159711)

Joshua Buckholtz

2021 Spring (4 Credits)

Schedule: T 0600 PM - 0845 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 20

This class will explore the biology of criminal behavior and violence. We will examine the construct of "anti-sociality" and unpack clinical and diagnostic issues surrounding its diverse manifestations, such as psychopathy. A strong emphasis will be placed on biological mechanisms. A particular focus will be on understanding how genes and environments act and interact to predispose antisocial behavior by shaping brain function and development.

Recommended Prep:

The Psychology Department requires completion of Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and either PSY 18 or PSY 1861 before enrolling in this course.

Requirements:

**SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1

Laboratory on Complex Thought and Cooperation (123308)

Joshua Greene

2020 Fall (4 Credits)

Schedule:

R 0130 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

In this hands-on lab course, students have the opportunity to participate in all aspects of psychological research, including experimental design, data collection, and data analysis. Each student will work closely with a graduate student or post-doctoral mentor. Topics of research are divided across cognitive and social psychology. Cognitive projects focus on the neuroscience of complex thought: Humans can understand and reason about an effectively infinite number of different ideas. How do our brains accomplish this? Social projects are applied work focused on promoting cooperation, conflict resolution, and improved social decision-making. Methods include fMRI, neural network modeling, and online and in-lab behavioral experiments.

Class Notes:

To express interest in enrollment, please email the lab manager, Kirstan Brodie, at kirstan_brodie@fas.harvard.edu.

Lab in Intergroup Neuroscience (156624)

Mina Cikara

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Year-long lab course exploring how cognition, affect, neural responses, and behavior change when social relations shift from "me and you" to "us and them." Students will participate in experiment development and data collection employing methods ranging from standard laboratory experiments, implicit and explicit self-reports, and behavioral measures, to fMRI and psychophysiology. Students will also read and discuss papers on intergroup relations in our weekly meetings.

Class Notes: To express interest in enrollment, please mail the instructor at mcikara@fas.harvard.edu

Recommended Prep:

For undergraduates, Science of Living Systems 20 or Psychology 1 or the equivalent of introductory psychology (e.g. Psych AP=5 or IB =7 or Psyc S-1) and at least one foundational course from MCB/NEURO 80, MCB 81, PSY 14, PSY 15, PSY 16, or PSY 18.

Requirements: SLS20 or PSY1 or Psychology AP=5 or Psychology IB=7 or Psyc S-1 AND MCB80 or NEURO80 or MCB81 or PSY14 or PSY15 or PSY16 or PSY18

Psychology 3520

Writing Workshop (216439)

Susan Carey

2020 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** 15

The Writing Workshop is the ultimate professional development course. It was developed by Barbara Sarnecka at UC Irvine, and involves working through her witty, moving, and extremely effective book. Basically, if one cannot write effectively, and publish, one cannot succeed in academia. As Sarnecka puts in in the opening paragraph of the book, "Research is writing. No one gets a fellowship, a PhD, a postdoc, a job, a grant, or a promotion except by writing, which means that professional researchers are by definition professional writers." Sarnecka has run writing workshops as graduate classes with great success for several years now and the book distills what she has found to work. She documents increased productivity and happiness among the workshop participants. Classes will each involve some time doing actual writing, in parallel, but all at once, a feedback forum where at least once a semester a participant gets feedback on a page or two of writing, and in class exercises and discussion about the mechanics of writing, managing time, dealing with anxiety and rejections, among many other topics.

What's required: Participation in one 2 hour 50 minute seminar meeting a week which will be a workshop on academic writing. One semester commitment, but option to continue in the workshop for a second semester, and perhaps beyond. There will be a small amount of reading in advance of each class, mainly from Barbara Sarnecka's book, *The Writing Workshop: Write More, Write Better, Be Happier in Academia*, sometimes supplemented by readings from other books, such as Pinker's *The Sense of Style*.

Course Notes:

Open to G3+ graduate students and postdocs in Psychology.

2021 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** 15

The Writing Workshop is the ultimate professional development course. It was developed by Barbara

Sarnecka at UC Irvine, and involves working through her witty, moving, and extremely effective book. Basically, if one cannot write effectively, and publish, one cannot succeed in academia. As Sarnecka puts in in the opening paragraph of the book, "Research is writing. No one gets a fellowship, a PhD, a postdoc, a job, a grant, or a promotion except by writing, which means that professional researchers are by definition professional writers." Sarnecka has run writing workshops as graduate classes with great success for several years now and the book distills what she has found to work. She documents increased productivity and happiness among the workshop participants. Classes will each involve some time doing actual writing, in parallel, but all at once, a feedback forum where at least once a semester a participant gets feedback on a page or two of writing, and in class exercises and discussion about the mechanics of writing, managing time, dealing with anxiety and rejections, among many other topics.

What's required: Participation in one 2 hour 50 minute seminar meeting a week which will be a workshop on academic writing. One semester commitment, but option to continue in the workshop for a second semester, and perhaps beyond. There will be a small amount of reading in advance of each class, mainly from Barbara Sarnecka's book, *The Writing Workshop: Write More, Write Better, Be Happier in Academia*, sometimes supplemented by readings from other books, such as Pinker's *The Sense of Style*.

Course Notes:

Open to G3+ graduate students and postdocs in Psychology.

Religion, The Study of

Subject: Religion

Religion 22

Interpreting Humanity, Interpreting Religion (208140)

Nicholas Boylston

2021 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

24

This course is a gateway to the Study of Religion, presented against the backdrop of a larger question: What is the purpose of the humanities in the 21st century?

Based on the premise that solely Eurocentric approaches to what it means to be human are shortsighted at best, we seek to think through new ways of engaging with global sources that shed light on our common humanity. The course develops around a critical engagement with the concept 'transcendence', which will help us to approach alternative worldviews without eliminating difference.

After thinking about the stakes involved in cultivating the life of the mind in a crisis point for human existence, we begin with an extended reflection on the intellectual and cultural moment in which we find ourselves, investigating how this conditions the way we frame questions of what it means to be human. Next, we take an honest look at the ways in which the dominant modes of knowledge and culture in the North Atlantic have been responsible for cultural, material and epistemic violence. Our exploration of diverse approaches to the human condition begins here, as we think through a range of responses to human-caused suffering. We then approach a range of questions of universal concern: What is ultimately real and how do we know what we know? What is the good, and how is it to be attained? How are we to relate to our fellow human beings, particularly when they seem deeply antagonistic?

This course is designed for freshmen and sophomores who are interested in exploring a vocation in the humanities. Throughout we will draw out the implications of the readings for our own intellectual and practical lives. Readings will include primary texts in translation drawn from traditions across the globe, as well as selected secondary literature.

Christian Ethics and Modern Society (156433)

Charles Lockwood

2020 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course provides an introduction to Christian conceptions of conduct, character, and

community, as well as contemporary disputes over their interpretation and application. What do Christian ideals imply for issues related to race, gender, religious pluralism, and secularism? How are Christian principles related to the ethos of liberal democracy and modern ideals of rights, equality, and autonomy? Readings and discussions will highlight a variety of contemporary perspectives and approaches to Christian ethics, and special emphasis will be given to moral and political concerns including race and racism; love, sexuality, and marriage; the environment; capitalism and consumption; abortion and euthanasia; and war and peace.

Roman Catholic Christianity and Contemporary Crises (109983)

Francis Fiorenza

Courtney Lamberth

2021 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In the face of political change and sustained demands for social justice, religious traditions across the globe struggle to respond to these challenges while maintaining their identities. For example, the Second Vatican Council of the early 1960s brought the Roman Catholic Church to a deeper engagement with modern academic scholarship such as historical-critical methods of interpreting texts, environmental and evolutionary sciences' relation to the Church, and the fundamental importance of modern philosophical and political thought to the institution's self-understanding. Reforms that emerged from the Council--which convened during a period of global cultural upheaval and radical change--continue to ignite discord and intense division among Roman Catholic teaching authorities, and church communities. This course takes up selected debates in the context of their historical, political, and cultural development, with attention to their current relevance: diverse Catholic responses to modernity in the Vatican Councils, religious freedom and toleration, the nature of human rights, the role of women in church leadership, evolution and the environment, and sexual ethics. Readings will include council documents, theological texts, treatises, and encyclicals, as well as texts relevant to the academic study of religion.

Narratives of Religious Conversion in American Literatures (216414)

Courtney Lamberth

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 12

Narratives of grace, lament, and conversion appear in multiple forms of American literature rooted in Christianity including fiction, sermons, first-person accounts, poetry, autobiography, and essays. Violence and suffering are often central to depicting, describing, and imagining experiences of divine grace and conversion. Through close reading of text in several genres, this course addresses these issues and considers, among other questions, the ambivalent and often paradoxical relationship between "freedom" and "slavery" in relation to divine agency and community in accounts of religious transformation. Authors will include Jonathan Edwards, Emily Dickinson, Herman Melville, William James, W. E. B. DuBois, Howard Thurman, Flannery O'Connor, Toni Morrison, and Annie Dillard, as well as selected secondary sources from the study of religion.

Religion 64 Section: 01

Krishna and Christ: Does it Matter? (208033)

Francis Clooney

2021 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

Krishna, a supreme deity of Hindu tradition, and Jesus Christ, the central figure of Christian faith, have been compared and contrasted for well over two centuries. They been understood as similar divine persons, who descend into this world and are embodied here, gather followers, offer wise instructions, save their devotees, and are best approached by love and devotion. But differences have often been emphasized. For centuries, missionaries, scholars, and many ordinary believers have seen Krishna and Christ as competitors, pushing similarities and differences in contexts (most often in India but not only) where true religion, salvation, and conversion were at stake. Questions arose such as these: Are Krishna and Christ mythical or historical figures? The former mythical and the latter historical? Is either divine? Both? Did they truly come into this world, by incarnation or avatara? If they save, how does that happen – and save from what? Are they moral role models? Can a Hindu love Christ, and a Christian love Krishna?

Such were "hot" questions for a very long time, and even today for some. But for many, such questions have lost their urgency in the 21st century. It is good that competition is largely a thing of the past, but it may not be good that the urgency of the comparison — Krishna and Christ, Christ or Krishna? – no longer matters

to most people. Do we have something to gain by taking both Krishna and Christ seriously? Facing this question sheds light on many larger questions regarding spirituality, religion, and cross-cultural learning.

The course proceeds by key readings, discussed vigorously in class, but experience, practices, and images are important as well. Course requirements include brief weekly written responses to readings, and two 12-page course papers, but no final examination. Jointly offered with the Divinity School as HDS 3070.

Religion 97

Tutorial - Sophomore Year (117043)

Charles Lockwood

2021 Spring (4 Credits)

Schedule: R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

The course introduces students to theories and methods in the academic study of religion, including significant themes and arguments that have defined the field over time. Students will examine some key

works that helped to shape the discipline as it emerged in the nineteenth and twentieth centuries, and also consider recent work drawing on various disciplines that scholars have used in the study of religion, including philosophy, psychology, sociology, anthropology, and history. The course will take up questions such as these: What does it mean to call something "religious"? Is the category of "religion" a universal feature in human life, or more historically specific? What is at stake in defining this category in one way or another? How do claims about religion relate to claims about politics, economics, culture, and society? The course will also enable students to evaluate the choices that scholars make about what to privilege in their investigations. The course emphasizes critical reading and thinking skills, as well as thoughtful participation in discussion and the refinement of students' academic writing.

Course Notes:

Required of all concentrators, and recommended for Secondary Field students. Enrollment open to other students with instructors' permission.

Animals and the Unseen (217840)

Teren Sevea

2021 Spring (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course considers how we can write histories of religious animals and the Unseen. Students will be introduced to academic literature that has criticized scholarly and popular conceptions of humans having a special status, and assumptions that the religious sentience of non-human animals and the materiality of spirits cannot be studied academically. Students will then be introduced to a variety of sources containing rich information on religious animals and the supernatural from Islamic societies of the globe. In doing so, the course pays particular attention to how human and non-human animals were understood to be religious beings whose bodies and activities were always tethered to the Unseen. Students will be encouraged to explore how the divide between human and non-human animals might not have been evident in societies of the past and the present. Students will moreover be encouraged to engage how these sources may prompt us to remember, or rather realize, that all aspects of material life, including animals' bodies, physical resources and technologies, were inextricably linked to the imagined non-material realms of the Unseen. On the whole, this seminar class takes steps towards recounting histories of religious animals and the Unseen.

Jointly offered with Harvard Divinity School as HDS3117 .

The Shock of the New (108501)

Michael Jackson

2021 Spring (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

This course will explore the impact of new worldviews, traumatic experiences, and radical technological innovations on both human lives and lifeworlds. It will cover some of the epistemological, ethical, social and existential quandaries that constitute what Robert Hughes calls 'the shock of the new', as well as the religious and ritual strategies whereby people struggle to avert, accommodate, cope with and comprehend massive changes to their lives. Interpretive perspectives will be drawn from psychology, philosophy, ethnography, ethology and biomedicine, while specific empirical cases will cover new media of communications and information processing, new genetic technologies, medical crises (disabilities, organ transplantation, trauma and epidemic disease), as well as culture contact and culture shock. Jointly offered with the Divinity School as HDS 3256.

Religion, Values, and the Future of Democracy (216807)

E. J. Dionne

2020 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

G. K. Chesterton described the United States as "a nation with the soul of a church," but America's religious institutions have increasingly taken on the souls of political parties. At the same time, liberal democracy finds itself under stress and the core values of liberalism are being challenged by nationalism, authoritarian forms of populism, and a backlash against rising economic inequality. And embedded racism has come under vigorous challenge – in the US especially, but throughout the democracies. This course will explore the religious and secular values that under-gird democracy. It will examine both political and religious institutions, and explore the thinking of theologians and philosophers on the challenge of self-rule.

Course Notes:

Although the 2020 election will not be the subject of any particular session, it will no doubt be a discussion topic throughout the fall.

Jointly offered with HKS DPI 227 as and with the Divinity School as HDS 2042.

Recommended Prep:

Follow news about the relationship of religion to politics, and discussions of the values underlying political debates, even more closely than you normally might.

Who Needs God? Rethinking God in Light of Hindu and Christian Theologies (124879)

Francis Clooney

2020 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course reflects on God — the idea, the reality, the significance — in light of Hindu and Christian scriptures, from philosophical and theological perspectives, and with reference to spiritual paths to union with God — all re-read in light of modern theological questions and doubts about the very idea of "God." Issues include: the meaning of "God" and knowledge of God; reasons to believe (or not) in God's existence; God's relationship to the world, humans, all living beings; divine embodiment and salvation by God; theism and polytheism before and after secularism and atheism. Knowing both Hindu and Christian traditions on God clarifies each tradition, as we learn from their great similarities and great differences. And: how might studying God comparatively change our God-talk, God-practice, God-love here and now? Quiet course for noisy times. Weekly written responses, plus two 10-12 page papers.

Course Notes:

Offered jointly with the Divinity School as 3751.

Religion and Family (208128)

Todne Thomas

2020 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

Religion and family are contested concepts that become politicized as they are mobilized and debated in the public sphere. Religion and family are also often depicted as separate forms of social organization. This course explores the ways in which religious and familial concepts, institutions, and relationships intersect to shape the lived experiences of religious participants who create and imbue their relationships

with social and sacred significance. In particular, we will examine how rituals, practices, and meanings surrounding sexuality, marriage, parenthood, siblinghood, and genealogy become important signifiers of religious identity and membership. Our discussion of these case studies will also open up broader conversations about the politics ethnicity/race, gender, sexuality, fundamentalism, and trans/nationalism and their imprint on modes of religious and spiritual belonging. Jointly offered with the Divinity School as HDS 2126.

Child Sacrifice, Pros and Cons: The Binding of Isaac in Jewish, Christian, and Islamic Tradition (217581)

David Stern

2021 Spring (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Child Sacrifice-- specifically, the story of the parent's sacrifice of the first-born child-- lies at the heart of Western religion and culture. The Biblical narrative in Genesis 22, known as the Binding of Isaac, is one of the most famous and problematic tales in the Bible. The same narrative is foundational to Christianity. Later Jewish tradition has interpreted the Biblical text in countless ways from the ancient period down to the present day. The narrative figures prominently in Islam from the Qur'an on. And the Biblical story has been criticized and critiqued since the Middle Ages as a barbaric narrative. Recent works have

blamed it for the ubiquity of child abuse in Western society, and it has become a ubiquitous motif of anti-war and protest poetry all over the world. This course will use the interpretive career and literary history of Genesis 22 as a lens through which to study the place of this foundational narrative in Western culture.

Readings will include Biblical texts, Euripides' Iphigeneia in Aulis, Philo of Alexandria, ancient Jewish sources, the New Testament, St. Augustine and other Christian exegetes, the Qur'an and later Islamic traditions, Kierkegaard's Fear and Trembling, Martin Buber, Kafka, Bob Dylan, Yehuda Amichai, and Leonard Cohen, among many other modern writers and poets.

15

A general and wide-ranging exploration of the Jewish religious tradition, from its inception in biblical Israel through its rabbinic, medieval, and modern iterations. The central focus lies on the literary meanings and existential questions of the classical tradition, as well as on the relationships between texts, religious claims, and practices. We shall also consider some of the restatements, reformulations, and challenges to tradition that have arisen in modern times. Open to undergraduates, including first year students, by permission.

Gender and Judaism in Modern America (214625)

Ann Braude

2021 Spring (4 Credits)

Schedule:

W 0400 PM - 0600 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

Contemporary Jews are as likely to view their tradition as inherently oppressive to women as they are to see it as an inspiration to activism for feminism and civil rights. This course follows the construction of Jewish gender identities beyond the stereotypes, sometimes in collision with modern gender norms, sometimes in accommodation, and sometimes in open rebellion. It considers challenges to both demographic and cultural reproduction that place pressure on personal decisions, group dynamics, identity, and intergroup relations for members of minority religions. The instructor, an historian, and the guest interlocutor, Yakir Englander, will bring together historical accounts of the anxieties and opportunities that accompanied the construction of modern Jewish gender identities with halachic textual traditions opening alternative possibilities. Gender as a key marker of group identity forms a central axis of inquiry through three case studies: Jewish masculinities from Talmud study to military service and comic book superheroes; Ultra-orthodox communities, in which the rejection of modern gender roles is a defining marker; and, Jews as critics of gender and sexuality, including feminist and trans engagement with Jewish tradition. Guest interlocutor Yakir Englander will visit the class 3 times to introduce the project of reading classical Jewish texts in modern perspectives and the practice of havruta (text study in pairs or groups). A product of both a traditional yeshivah education and a doctorate in feminist theory, Englander combines these approaches to open the topic of gender and Judaism beyond Western academic approaches. Jointly offered with Harvard Divinity School as HDS 2050.

The Book of Daniel (216806)

Andrew Teeter

2020 Fall (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

A critical and exegetical study of Book of Daniel, based on a close reading of the text in Hebrew and Aramaic. Special attention will be given to large-scale compositional strategies and principles of literary organization, to textual logic, to analogical patterns, to inner-scriptural relationships, and to the nature and function of allusion within this book, with a view toward understanding the overall expectations made of readers, both ancient and modern. The text of Daniel and its underlying principles of design will be considered in the context of major critical debates within the current state of the field. The course presumes basic proficiency with Biblical Hebrew. Minimum of one year of Hebrew required. No previous knowledge of Aramaic required.

Jointly offered in the Divinity School as HDS 1630.

Emerging Topics in Ancient Greek Religion: Seminar (116532)

Kimberley Patton

2021 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Recent research has highlighted dimensions in the religious history of Greece long overlooked or understudied: e.g., magic and necromancy; curse tablets and binding spells; rituals of childbirth; healing sanctuaries and dream incubation; talismans and apotropaic practices; miasma and catharsis; weaving, dance, lamentation, and other women's cultural production; "heroic" female self-sacrifice in male wars; autonomous cult images and "talking objects"; and animal metamorphosis. The seminar will offer an intensive survey of important work on these "new" topics in ancient Greece.

Students will have an opportunity to develop their own research projects. No language prerequisite; some background in ancient Greek religion preferred.

Course Notes:

Offered jointly with the Divinity School as 3815. Application for enrollment must be completed at first class meeting.

Early Christian Thought 3: The Syriac Tradition (109686)

Charles Stang

2020 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

20

The aim of this course is to introduce students to the Syriac Christian tradition in the late antique and medieval periods. Syriac-speaking Christians constitute an ancient community that stretched from the

Eastern Mediterranean to China, a community diverse in its beliefs and practices, prolific and accomplished in its literary output, and bound by a common language (Syriac, a dialect of Aramaic). This course will cover the early, diverse period of Syriac literature (2nd and 3rd centuries); the subsequent "golden" age of Syriac literature, associated with such authors as Ephrem and Jacob of Serug; some forms of asceticism and spirituality peculiar to Syriac Christianity; and finally, the stretch of Syriac Christianity eastward, to India and China

Course Notes:

The Sacramental Imagination (122197)

Matthew Potts

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

24

How do communities set apart the sacred from the everyday? In what ways might the holy and quotidian overlap? How can we recognize holiness? Using the Christian ritual of eucharist or communion as a primary lens, this interdisciplinary course will investigate the sacramental imagination through a study of both historical theology and contemporary literary fiction. In studying the various tropes and images that have been used to characterize Christian eucharist, we will seek to generate a broadly construed

sacramental theology that might prove useful for both theological study and practical ministry.

Cities on a Hill: Images of America as a Redeemer Nation, 1630-present (156249)

Catherine Brekus

2021 Spring (4 Credits)

Schedule:

T 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Beginning with John Winthrop's 1630 speech, "A Model of Christian Charity," and ending with the 2012 presidential election, we will examine images of America as a city on a hill. We will ask several questions: How and why have Americans conceived of the nation in sacred terms? How have religious images of the nation developed and changed over time? What are the implications of America's "civil religion"? We will discuss the Puritan idea of a national covenant, the millennial rhetoric of the American Revolution, defenses of manifest destiny, the sacrificial theology of the Civil War, religious and political rationales for global missions, the rise of the Christian Right, and presidential invocations of America as a city on a hill. We will also examine how women's rights leaders, abolitionists, and civil rights activists both critiqued and appropriated the image of America as a city on a hill. Jointly offered with the Divinity School as HDS 2180.

This seminar will approach the Nazi persecution of European Jewry from several disciplinary perspectives. Initially the seminar will explore the topic historically. In these weeks, the seminar will use a variety of historical materials dealing with the history of European anti-semitism, German history from Bismarck to the accession of Hitler, the evolution of anti-Jewish persecution in the Third Reich, and the history of the Holocaust itself. Sources to be used will include primary sources produced by the German government 1933-1945, by Jewish victims-to-be or survivors, documentary films, and secondary interpretations. The aims of this part of the seminar will be to understand the basic background to and narrative of the Holocaust, to introduce students to the critical use of primary historical sources, and to familiarize them with some of the major historiographical debates. Then the members of the seminar will ponder religious and theological reactions to the Holocaust. The seminar will also consider the historical question of the role played by the Protestant and Catholic churches and theologies in the Holocaust. The seminar will conclude with an assessment of the role played by the Holocaust in today's world, specifically in the United States. Throughout the seminar, participants will use various literary and cinematographic sources and test their limits in helping to understand and to represent the Holocaust.

The Yoga Sutras: Text, Meaning, Purpose (126783)

Francis Clooney

2020 Fall (4 Credits)

Schedule:

T 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

The brief Yoga Sutras (only 195 sutras) of Patanjali (c 100 BCE-100 CE) is a vastly influential and fundamental text of yoga. It is the focus of the course, along with its primary commentary (Vyasa's Bhasya), notes on other commentaries, and with some attention to BKS Iyengar's famous Light on the Yoga Sutras. What was Patanjali up to? What are the Sutras for? What do the Sutras tell us about the meaning and purpose of yoga then and now? Though not a course about the practice of yoga or yoga in the modern world, it is always attentive to the implications for practice. Thus potentially of great use for practitioners and teachers today. Apt comparisons will be made with ancient Hindu and Buddhist parallels, Al-Biruni's 11th c. Arabic translation, and modern Christian interpretations of the Sutras. Given our stressful situation, possibly some optional yoga practice together at start or end of class. Weekly written responses, plus two twelve-page course papers.

Offered jointly with the Divinity School as HDS 3931

2020 Fall (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

We will do two things in this course: take in the history, literature, visual imagery, and theoretical pronouncements around the nature of women and gender in Buddhist materials; and cultivate the critical and hermeneutical skills for processing these materials and contributing to a just and woke future. We will read together a variety of Theravada, Mahayana, and Tantric Buddhist texts, displaying repressive, subversive, and liberative visions alike. We will study autobiographical writing of historical women, images of female divinity, and notions of non-binary genders as well as as the third sex. Significant attention will be paid to the contemporary female ordination movement, and to other modern Buddhist efforts for social justice and environmental protection. Lectures may be taped and viewed before class, and small breakout discussion groups will be an important part of the in-class pedagogy. Prior knowledge of Buddhism helpful

but not required.

Modern Buddhism and Fiction (125675)

Charles Hallisey

2020 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An examination of how fiction is a vehicle for religious imagination and reflection in the modern Buddhist world. The genres of fiction will include both the novel and the short story, with examples drawn widely from across the Buddhist world and beyond. In accommodation to the necessity of remote learning in the fall term, 2020, class format will be of three types: 1 hour in lecture (Wednesdays 3-4); one hour in small group discussion (Wednesdays, 4-5); and one hour in tutorial format (one hour to be arranged for two students to meet weekly via Zoom with instructor). Enrollment is limited.

Course Notes:

Course has additional section hour to be arranged.

Offered jointly with the Divinity School as 3777.

Introduction to Islamic Mystical Traditions (113442)

Ali Asani

2020 Fall (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course offers an introductory survey of mystical traditions of Islam, popularly labelled as "Sufism." It explores the fundamental concepts, practices, and institutions associated with these traditions, their historical development and their influence on the devotional, cultural and social lives of Muslim communities through the centuries. Through case studies drawn from the Middle East, South Asia, West Africa and North America, the course examines ways in which these traditions have developed and promoted alternative perspectives on what it means to be Muslim, challenging in recent times sectarian, legalistic and politicized understandings of Islam such as Wahhabi, Islamism and jihadism. The course assumes no prior knowledge of Islam.

Course Notes:

Offered jointly with the Divinity School as 3620.

Persian Sufi Literature (208141)

Nicholas Boylston

2021 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this course we will explore the major genres of classical Persian Sufi poetry and prose. In addition to examining the formation of these genres and their contexts of composition, we will pursue a range of broader questions, including: What is Sufism, and how do we discern 'Sufi' from 'non-Sufi' literature? What have the purposes and functions of literature been in Persianate Islamic contexts? What is the relationship between language, realization and experience in Persian Sufi literature, and how do authors in the Sufi tradition deal with the problem of ineffability? What is the place of love in Persian Sufi literature and how is it conceptualized? And, how do Persian Sufi authors deal with the diversity inherent in human experience?

Readings will include Baba Tahir, Umar Khayyam, Sana'i, Attar, Rumi, Ahmad and Abu Hamid al-Ghazali, Sa'di, Hafez, Fakhr al-Din Iraqi, Shabistari, and Jami. All readings will be in English translation, but there will be an extra section for students with advanced Persian to read texts in the original. Jointly offered with the Divinity School as HDS_____.

Islam and Religious Diversity (207014)

Nicholas Boylston

2020 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The problem of religious diversity recurs in all of the major branches of Islamic thought and appears in complex permutations in diverse cultural contexts. Focusing primarily on pre-modern Islam, this course invites students to investigate perspectives on the religious other in the Quran, Islamic law, theology,

philosophy and Sufism. In the final portion of the course we will look at Muslim Spain, Mughal India, and the Muslim-Confucians of late imperial China as examples of how these complex dynamics played out on the ground. The larger aim of this course is for students to develop interpretive skill in dealing with the internal complexity of a number of Islamic discourses and contexts by pursuing a single problematic across them. To this end the course will be taught in seminar format and participants will be encouraged to engage creatively with primary and secondary sources to develop their own scholarly points of view.

Recommended Prep:

One course dealing with Islam or Instructor's Permission.

Being Muslim in South Asia: Religion, Culture and Identity (111918)

Ali Asani

2020 Fall (4 Credits)

Schedule:

W 1245 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

South Asia is home to the largest population of Muslims in the world. And yet, within South Asia, Muslims are a minority. What is Islam and what does it mean to be Muslim in South Asia? After briefly examining the historical development of Islamic institutions in the subcontinent, this course will focus on how ideas about Islam are shaped by evolving literary, linguistic, social and political landscapes. Special attention will be given to the effects of colonial and nationalist ideologies on Muslim experiences in India, Pakistan, and Bangladesh, as well as the disputed territory of Kashmir. We will also explore the impact of reform and revivalist movements and state-enforced policies of "Islamization" and "Hinduization" on women and minorities. The course is appropriate for those who want a bird's eye view of the Islamic tradition in South Asia, as well as those interested in exploring issues facing contemporary Muslim societies beyond the Middle East. Jointly offered as Religion 1820 and HDS 3625.

Course Notes:

Offered jointly with Divinity School as 3625.

Islamic Missions: Reforming Muslim South and Southeast Asia (217841)

Teren Sevea

2021 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

How did Islamic missions and missionaries reform Muslim South and Southeast Asia? What Islamic missionary idioms, orientations and movements emerged in the nineteenth and twentieth centuries? Were South and Southeast Asia global centers of Islamic missionary activity? What kinds of Islamic educational institutions developed in modernity? How did Muslim reformists appropriate technologies? What materials were printed by Muslim missionaries and scholars in South and Southeast Asia? What jihad did Islamic missionaries and reformists call for in modernity? How did Muslim 'modernists' and 'traditionalists' respond to the challenges of colonialism and modernity? What was the nature of Sufism in modern South and Southeast Asia? What was the nature of Islamism in these regions? How has the history of Islamic missions been remembered in India, Indonesia, Malaysia and Pakistan? This discussion-based, lecture class answers these questions, and more. It is an introductory course and requires no background knowledge of the subjects.

Jointly offered with Harvard Divinity School as HDS 3174 .

Religion and Neoliberalism (208110)

Todne Thomas

2020 Fall (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

25

As it is popularly conceptualized, neoliberalism is a political and economic system that calls for the deregulation of capitalist enterprises, the increasing privatization of government services, and the application of market rationalities in the operation of social institutions. Yet, how does neoliberalism interface with religion? What religious sensibilities are encoded in and spread amidst neoliberal formations? Through our review of theoretical texts and anthropological monographs, this course investigates religion and neoliberalism around some of the following loci: Christian temporal reckonings that shape renditions of millennial capitalism and late liberalism, moral orders, co-constitutive discourses and institutions of prosperity and accumulation, and conflicting paradigms of selfhood and belonging. Offered jointly with the Divinity School as HDS 2125.

The Book of Revelation: Text, History, and Interpretation (216371)

Giovanni Bazzana

2020 Fall (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The course will be focused primarily on the Greek text of the Apocalypse of John, devoting time to the observation and discussion of issues relating to textual transmission, translation, interpretation, and theological hermeneutics. Through the additional reading of other ancient, modern, and contemporary texts the course will also approach the colorful and contested history of interpretation of this puzzling biblical book. Revelation will be posed within the ancient historical context of Jewish and Christian apocalypticism, but discussion in the course will range through the many facets of Revelation's history of interpretation, from antiquity to today, addressing contested issues such as its stance towards violence, its ambiguous treatment of empire and gender, or its controversial canonicity. Two semesters of Greek are required. If HDS courses will be offered online, the seminar will be split in two parts, one synchronous and one asynchronous. Jointly offered in the Divinity School as HDS 1560.

Course Notes:

Jointly offered in the Divinity School as HDS 1560.

Recommended Prep:

Two semesters of Greek are required.

Coloniality, Race and Catastrophe (213294)

Mayra Rivera

2020 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course explores the relationship between coloniality, race and ecology through the lens of "catastrophe." We will examine a variety of theoretical sources that deploy or refute tropes of the "end of the world". We will study different uses of "catastrophe"—to denounce the destruction of a particular world, re-imagine the past, or proclaim the impossibilities of the present. Through the readings and discussions, we will analyze the aims, effectiveness and limitations of talk of catastrophe in the contemporary context.

Catherine Brekus

Ann Braude

2020 Fall (4 Credits)

Schedule:

T 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course examines recent scholarship on women in American religious history, focusing particularly on questions of narration, agency and power. We will ask several interrelated questions: How have historians integrated women into narratives of American religious history? Whose stories have they highlighted, and why? How have they conceptualized women as historical agents? We will read major interpretive works as well as theoretical accounts of gender, social structure, and power. Readings will explore the diversity of religious traditions in America, including Puritanism, Judaism, Mormonism, Catholicism, African-American Christianity, evangelicalism, and Islam. Jointly offered in the Divinity School as HDS 2186

Course Notes:

Offered jointly with the Divinity School as HDS 2186.

Seminar for Advanced New Testament and Religions of the Ancient Mediterranean (213513)

Giovanni Bazzana

Rachel Love

2021 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This graduate seminar will focus on oracles and divination in the ancient world in their capacity as a widespread phenomenon. The course will deal with texts and material artifacts pulled from a broad range of epochs and regions across the ancient Mediterranean. We will explore the historical, literary, and artistic significance of this evidence in order to understand more adequately, for example, ancient concepts of divine-human communication, integration of divinatory practices into literatures, and authorization in religious and political discourses. This is an interdisciplinary course that focuses on developing research and communication skills across classics, religious studies, and ancient history.

Participation in the seminar is encouraged for those thinking about academic work and for those interested in deepening their familiarity with the fields of New Testament studies and/or Religions of the Ancient Mediterranean. A basic acquaintance with the fields is required. Jointly offered as Ancient Studies 201 and with Harvard Divinity School as HDS 1981.

Course Notes:

None

Romance Languages and Literatures

Subject: French

French 10

Beginning French I: Cross-Cultural Encounters in French (126933)

Nicole Mills

2021 Spring (4 Credits)

Schedule:

MTWR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This beginning French course addresses the theme of cross-cultural encounters in French through engagement in the discussion and interpretation of texts, art, images, and film. You will gain an introduction to the French language with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the French language and francophone culture(s). Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms.

Course Notes:

French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students may take the course SAT/UNSAT with permission of course head. French 10 is taught by members of the Department.

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

French 10 Section: 003

Beginning French I: Cross-Cultural Encounters in French (126933)

Nicole Mills

2020 Fall (4 Credits)

Schedule:

MTWR 0130 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

17

This beginning French course addresses the theme of cross-cultural encounters in French through engagement in the discussion and interpretation of texts, art, images, and film. You will gain an introduction to the French language with emphasis on interpersonal communication and the interpretation and production of language in written and oral forms. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the French language and francophone culture(s). Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms.

Course Notes:

French 10 is an elementary French course for students with little or no knowledge of French. French 10 may count toward the language requirement. Open to students who have not previously studied French or who have scored below 300 on the Harvard placement exam. Students who have studied French for two years or more in secondary school must begin at French 11 or higher. May not be taken Pass/Fail. Not open to auditors. Graduate students may take the course SAT/UNSAT with permission of course head. French 10 is taught by members of the Department.

Beginning French II: Paris in Virtual Reality (126935)

Nicole Mills

2021 Spring (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

In the second course in the Beginning French sequence, you will engage in a virtual simulation of life in Paris. The course will immerse you in the French language and Parisian life through virtual reality experiences, social networking platforms, and interactive discussions with native French speakers. Topics explored in the class include surrealism at the Centre Pompidou museum, Harlem musicians in Paris, the quarters of Paris, and current events (i.e., yellow vest movement, Covid19, etc.) As a result of this exploration, you will begin to be able to speak and write in the past, present, and future tenses, make suggestions, express emotions, express opinions, extend, accept, and refuse invitations, give advice, and express hypothetical situations. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. Asynchronous online assignments will develop your interpretive and presentational skills in French.

Course Notes:

French 11 may count towards the language requirement. May not be taken Pass/Fail. Not open to auditors. Graduate students may take the course Sat/Unsat with the permission of course head. This course is taught by members of the Department. Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep:

Completion of French Aa/10, or a score no lower than 301 and no higher than 450 on the SAT II test or the Harvard Placement test.

Reading, Understanding and Translating Written French for Research (111933)

Nicole Mills

2020 Fall (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

French 16 offers an introduction to reading and translating academic French texts for students who require a basic knowledge of French for research purposes. The course presents vocabulary and the principal structures of French grammar in a systematic and coherent order. The course begins with simple texts and advertisements, then moves to academic texts with more complex structures, and ends with the translation and analysis of literary works and philosophical texts. The assignments are discipline-specific to accommodate students' research needs. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and discussion.

Course Notes:

Conducted in English. Not open to students with a score of 500 or above on the Harvard Placement Test or the SAT II French test, to those with more than one year of undergraduate French, or to auditors. May not be used to fulfill the language requirement and may not be taken Pass/Fail, but may be taken Sat/Unsat by graduate students with permission from the course head. This course is taught by members of the Department. **PLEASE NOTE:** Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep:

Some previous study of a Romance language helpful but not necessary. Fluency in English required.

Intermediate French: Francophone Culture in Local Communities (126938)

Karen Turman

2021 Spring (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

In this intermediate-level language course we will explore cultural topics such as music, dance, and cuisine in France and other French-speaking countries. We will in turn expand our discovery of Francophone cultures through conversations with online language partners, interactive discussions with French-speaking guests during synchronous Zoom sessions, and virtual exploration of local French-speaking communities through remote learning. Themes such as family life in West Africa, sustainability in the French-speaking Pacific, and First Nation dancers in Quebec will be broached through communicative activities in order to build on oral, written, and intercultural competences. Using various texts, films, and multimedia resources as a basis for discussion, we will also build vocabulary and review and refine various grammatical structures. This course will be taught synchronously via Zoom during your scheduled section time on Monday/Wednesday/Friday. Asynchronous components to be completed outside of the Zoom sessions will include Voice Thread activities, Canvas Assignments, and *Talk Abroad* online partner conversations.

Course Notes:

Conducted in French. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

In order to accommodate the shift to the online course format, the four contact hours per week that were previously required will now be a combination of online synchronous Zoom sessions with the full class and/ or small groups in addition to asynchronous Voice Thread activities and online partner conversations through the Talk Abroad platform. To this end, students will be required to purchase an access code for Talk Abroad (\$40-50) as part of the course materials. PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Class Notes:

This course requires an average of four contact hours per week. To supplement the scheduled 3.75 hours, a 30-minute online component will be arranged every other week. To this end, students will be required to purchase an access code for the online conversation program, Talk Abroad (\$40-50).

Recommended Prep:

A score no lower than 451 and no higher than 600 on the SAT II test or the Harvard Placement Test; 3 years of French in high school; French 11 or 15; or permission of course head.

In this intermediate-level language course, you will review your knowledge of various grammatical structures by exploring cultural topics such as music, dance, and cuisine in French-speaking communities. Themes such as family life in West Africa, immigrant communities from Haiti, and cuisine in Morocco will be broached through communicative activities to further develop proficiency in reading, listening, speaking, and writing. You will discover francophone cultures through conversations with online language partners abroad, guest visitors via Zoom, and course materials including film, music, and texts. The course will be conducted through synchronous Zoom sessions as well as asynchronous activities using Voice Thread, Slack, and Canvas. Course assignments include contextualized grammar activities, creative writing compositions, oral presentations, video projects, and online discussions.

Course Notes:

Conducted in French. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

French 30

Upper level French : Current Events and Media in the Francophone World (126942)

Ericka Knudson

2021 Spring (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap: n/a

In this advanced intermediate course, you will explore current events in French-speaking countries through a variety of media. Engaging in interactive communicative activities, both synchronously and asynchronously, you will cover topics associated with politics, art, sports, literature, and scandal. From the written press to social media, you will interpret and analyze authentic texts, including newspaper articles, music, images, film, and advertisements. You will also refine your speaking skills through class discussion as well as in conversations with native speakers abroad. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class, in small groups and with online guest speakers. Asynchronous online activities will develop your interpretive and presentational skills in French on various platforms. Course assignments include a collectively developed online newspaper and a news broadcast or cultural program. This course will be conducted entirely in French.

Course Notes:

Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details on the French 30 Canvas site. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week. To this end, students will be required to purchase an access code for the online conversation program, Boomalang (\$30).

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep:

A score no lower than 601 and no higher than 680 on the SAT II test or the Harvard Placement test; French 20; or permission of course head.

Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class, in small groups and with online guest speakers. Asynchronous online activities will develop your interpretive and presentational skills in French on various platforms. Course assignments include a collectively developed online newspaper and a news broadcast or cultural program. This course will be conducted entirely in French.

Course Notes:

Conducted in French. May not be audited or taken Pass/Fail, but may

be taken Sat/Unsat by GSAS students. See details on the French 30 Canvas site. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week. To this end, students will be required to purchase an access code for the online conversation program, Boomalang (\$30).

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep:

A score no lower than 601 and no higher than 680 on the SAT II test or the Harvard Placement test; French 20; or permission of course head.

French 30 Section: 002

Upper level French : Current Events and Media in the Francophone World (126942)

Ericka Knudson

2020 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this advanced intermediate course, you will explore current events in French-speaking countries through a variety of media. Engaging in interactive communicative activities, both synchronously and asynchronously, you will cover topics associated with politics, art, sports, literature, and scandal. From the written press to social media, you will interpret and analyze authentic texts, including newspaper articles, music, images, film, and advertisements. You will also refine your speaking skills through class discussion as well as in conversations with native speakers abroad. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class, in small groups and with online guest speakers. Asynchronous online activities will develop your interpretive and presentational skills in French on various platforms. Course assignments include a collectively developed online newspaper and a news broadcast or cultural program. This course will be conducted entirely in French.

Course Notes:

Conducted in French. May not be audited or taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. See details on the French 30 Canvas site. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week. To this end, students will be

required to purchase an access code for the online conversation program, Boomalang (\$30).

Class Notes:

This course requires an average of four contact hours per week. To supplement the scheduled 2.5 hours, a 15-minute online component will be arranged periodically throughout the semester. To this end, students will be required to purchase an access code for the online conversation program, Boomalang (\$30).

Recommended Prep:

A score no lower than 601 and no higher than 680 on the SAT II test or the Harvard Placement test; French 20; or permission of course head.

In this advanced French language and culture course, you will explore francophone culture(s) through contemporary films. The course is designed to strengthen language proficiency, explore different registers of language, and further refine your grammatical understanding while offering an introduction to film analysis. You will engage in interactive communicative activities, both synchronously and asynchronously, exploring themes such as regional differences, Paris and the banlieue, immigration, post-colonialism, cinematic self-portraits, and gender through readings such as film reviews, interviews with directors, and script excerpts. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class and in small groups. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms. Course work also includes creative interactive writing assignments, short compositions, scripts, and a short film. No previous familiarity with film study is necessary. This course is conducted entirely in French.

Course Notes:

Conducted in French. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department.

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, a 30-minute online activity or workshop will be arranged each week.

Through the lens of social justice issues in France and the Francophone world, this class will focus on writing as a means of civic engagement. You will interrogate topics such as colonialism, islamophobia, immigration, and sexism by studying a range of creative, analytical, and polemical texts, images, and film. This course builds on the communicative competence acquired in French 40, with a particular emphasis on developing your writing proficiency through creative and analytical writing projects such as description, portrait, film review, and polemical essays. This course will be conducted through synchronous Zoom sessions and scheduled Talk Abroad conversation meetings as well as asynchronous activities using Voice Thread, Slack, and Canvas.

Course Notes:

Conducted in French. Students must complete online information survey on Canvas before registering for the course. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. In order to accommodate the shift to the online course format, the four contact hours per week that were previously required will now be a combination of online synchronous Zoom sessions with the full class and/ or small groups in addition to asynchronous Voice Thread activities and online partner conversations through the Talk Abroad platform. To this end, students will be required to purchase an access code for Talk Abroad (\$40-50) as part of the course materials. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict. ALSO: Students must complete online information survey on Canvas before registering for the course.

Recommended Prep:

French 40; a score of 721-750 on the SAT II test or the Harvard Placement test; or permission of course head.

The New Wave: Reinventing French Cinema (109320)

Ericka Knudson

2021 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This advanced language and culture course explores a unique perspective on French society and culture through New Wave films from the late 1950s and 1960s. Through synchronous and asynchronous communicative activities, and weekly film screenings, you will engage in interactive discussions and debates on topics associated with gender, aesthetics, and literary influences. You will interpret and analyze different registers of language in film scripts and literary texts and further develop your writing proficiency for academic contexts through written film analysis (begun in French 40) and theoretical papers designed to prepare you for 70-100 level courses. Synchronous Zoom sessions will

be organized like a traditional language classroom, providing opportunities for interaction and communication as a full class and in small groups. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms. For the final project, you will write a script and develop it into a short film.

Course Notes:

Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Students may take no more than one course at the 60-level.

PLEASE NOTE: Students must complete online information survey on Canvas before registering for the course.

Modern Stories about Paris (116673)

Ericka Knudson

2020 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This advanced language and culture course examines modern narratives, in a mosaic of perspectives, set in and around Paris. Through synchronous and asynchronous communicative activities centered on the interpretation and analysis of texts, films, songs, and interviews, as well as interactive online discussions with guest speakers from Paris, you will discover diverse stories about the Parisian experience. By reading, watching and listening to these stories, you will gain insight into various forms of narration and refine your knowledge of written and spoken French grammar and vocabulary. The course will focus on typical gaps found in advanced learners' linguistic repertoires, such as contemporary slang, and refine your ability to distinguish different registers of language. Synchronous Zoom sessions will be organized like a traditional language classroom, providing opportunities for interaction and communication together as a class and in small groups. Asynchronous online assignments will develop your interpretive and presentational skills in French on various platforms. Course work also includes creative writing assignments and a final project that will solidify your ability to imagine, summarize, interpret, critique, and substantiate arguments about the Parisian experience.

Course Notes:

Conducted in French. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by graduate students. Students may take no more than one course at the 60 level.

Exploring French Language and Culture Through Industry: Fashion, Cuisine, and Cabarets (217619)

Karen Turman

2021 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In this advanced French language and culture course we will interrogate themes such as class, space, and cultural appropriation through the lens of marketing, sustainability, and business ethics in France. By contextualizing examples ranging from the department stores on Boulevard Haussmann to the commercialization of art and entertainment in Paris during the 19th century, we will explore the evolution of major French industries and their cultural legacy today. To this end, we will analyze videos, articles, literary texts, and images as well as engage with guest speakers from France as well as the Harvard community. Course work will include daily readings and exercises, in-class and online written and oral assessments, compositions, a video presentation, and a final written project.

Course Notes:

Conducted in French. Students must complete online information survey on Canvas before registering for the course. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. In order to accommodate the shift to the online course format, the four contact hours per week that were previously required will now be a combination of online synchronous Zoom sessions with the full class and/ or small groups in addition to asynchronous Voice Thread activities and online partner conversations with university students in France. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict. Text and Image: Novels & their Film Adaptations (216059)

Annabel Kim

2020 Fall (4 Credits)

Schedule:

M 1030 AM - 1145 AM

TBD

Instructor Permissions: Instructor

Enrollment Cap:

10

This course is an introduction to French literature spanning from the seventeenth century (Madame de Lafayette) to the contemporary moment (Virginie Despentes) that reads French classics against and alongside their cinematic adaptations. What can a text do that an image cannot? What can the image do

that language cannot? By reading these novels in relation to the adaptations they inspired, we will explore the limits and possibilities of narrative and see how reading and interpreting become a way to make new narratives.

Course Notes:

Conducted in French.

Class Notes:

Conducted as a tutorial (modeled after the intense, two-on-one tutorials taught at Williams College, themselves modeled after the Oxford tutorial), this course places great emphasis on student participation and engagement, and will offer students the opportunity to get to know and engage with each other and the professor in ways that even a small seminar cannot offer. Please see course Canvas site for more detailed information.

Class Notes:

This course will meet 2x/week, 75 minutes each session. The first session will meet on Mondays, 10:30-11:45, but this can be modified in order to accommodate time zones. The second meeting session will be determined based on students' schedules.

French Theater Across Time and Media: An Introduction to Performance, or Why Theater Matters (109826)

Sylvaine Guyot

2020 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

Aims to help students, including those who are genuine novices in acting, to understand and experience theater as a form of physical expression that evolve as aesthetic and ideological contexts change across time. Readings include the most famous French playwrights of both the early modern age (Molière, Corneille, Racine) and the later 20th / early 21st centuries. We explore how theater is used to interrogate questions such as sexual taboos, social injustices, or political engagement. Special emphasis paid to the power of performance through practical workshops and videos of recent productions. The final project consists of an excerpt to be performed in French.

Course Notes:

Conducted in French. May not be taken for credit by students who have previously taken French 71a or FRSEMR 30r.

Class Notes:

Additional discussion section to be determined based on student enrollment.

Recommended Prep:

A 60- or 70-level course in French; a score above 780 on the SAT II test or the Harvard Placement test, equivalent preparation, or permission of course head.

Vision and Violence: Face-to-Face Encounters, Affects, and Politics in Early Modern France (127874)

Sylvaine Guyot

2021 Spring (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Explores early modern ways of depicting and showing violence (physical, political, domestic, supernatural). The spectacle of violence represents a site of cultural conflict during the 17th century, since it implies both the pleasure taken by the viewer and the risk of imitation. Readings include plays, tragic histories, utopian and travel literature, historical and theoretical texts (Foucault, Rancière, Marin, Elias, Lyotard), and the analysis of images (paintings, frontispieces).

Course Notes:

Conducted entirely in French.

Inventions of Liberty : Day, Night, and Geography of the Enlightenment (216090)

Tom Conley

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Building on Starobinski's The Invention of Liberty, this course aims to follow an itinerary that goes from the reign of the Sun King (1714) to the tribulations of the Terror (1793) and Napoleon's rise to power, from "subject" to "citizen". The starting question will be : how did the great Enlightenment writers «invent » the concept of 'liberty' ? For what reasons and to what ends ? An unavoidable question : if the century celebrates the « day », where does that leave the « night » ? Following Starobinski, the course will cover spaces urban and rural, public and private, in Europe and in the colonies, as well as human geography. We will examine the socio-political changes that lead to the Revolution of 1789, as well as what follows: modernity.

Course Notes:

This course will be taught in French.

Class Notes:

First class meeting will be Thursday, September 3rd at 3:00.
Remaining course schedule will be determined based on student enrollment.

Queer Fictions (205160)

Annabel Kim

2021 Spring (4 Credits)

Schedule: F 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap: 20

A survey of modern and contemporary twentieth- and twenty-first-century queer French literature. We will begin first with an introduction to some canonical texts in queer theory (e.g. Sedgwick, Butler, Bersani,

Warner) and proceed to the fictions (Genet, Guibert, Louis, Leduc, Wittig, Best, Garréta) to see the ways in which literature itself theorizes and does the work of deconstructing identity and desire.

Course Notes:

Conducted in French, except for the first two weeks, which will be conducted in English.

Additional Course Attributes:

Turmoil and Bliss: Poetry in France (1490-1530) (216091)

Tom Conley

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

The aim of this course is to study the growth, dissemination, and impact of poetry in France from the age of the incunabulum (the printed book before 1500) to the waning years of the Wars of Religion (1580-98). It will take up five generations and, as it were, as many or more *styles* of expression: (1) the force of form that drives *La Grande Rhétorique* and the first editions of the *Testament* of François Villon (1489-98); (2) the "transitional" but indelibly influential verse of Jean Lemaire de Belges (1505-1525); (3) the Reform and Evangelical calling of Clément Marot (1525-1545); (4) the impact of the École de Lyon in the 1550s, in Maurice Scève's *Delie* (1544) and Louise Labé's *élégies* and *sonnets* (1555); (4) led by Joachim Du Bellay and Pierre de Ronsard, the panache and splash of the Pléiade from its beginnings up to the Religious Wars (1549-1562); (5) the "baroque" character of epic and religious turmoil in Ronsard, Guillaume Du Bartas, and Agrippa d'Aubigné (1570-1600). From the sum of we can contend that poetry in this troubled age internalizes, intensifies and, like a prism, refracts difficult issues about the nature of belief; political upheaval in the Reform and Counter-Reformation; apprehension of the unknown with the advent of oceanic travel and new discoveries; finally, in the waning years of the century, millenarian fears that world is drawing to its end.

The method of the course will be its madness: we will engage close readings from a selected canon that includes: (1) samples of verbal gymnastics in Jean Molinet's *Faictz et dictz* (circa 1470-75) ; (2) "gothic" tessellations in the play of ballads, woodcuts, and *octains* in the *Testament* (1489); Lemaire's « Epistres de l'amant vert » and *Concorde des deux langaiges* (in the ongoing *Œuvres complètes* of 1512-1515, and Antoine Du Moulin's re-edition in Lyon, 1549); (3) in collaboration with typographer Geofroy Tory, Clément Marot's edition of Villon (1532) and the *Adolescence clémentine* (1545), a collection of early and later verse both joyous and fraught with doubt ; (4) hermetic form and abjection in Scève's *Delie* (1544) and *Saulsaye* (1549) ; (5) the « Petrarchan » sonnets Du Bellay pens in *L'Olive* (1549) and their contrary in *Les Antiquitez de Rome* (1558), *Les Regrets* (1558) and *Les Jeux rustiques* (also 1558, including « Contre les pétrarquistes ») ; (6) poetry and « désir » in Ronsard's *Amours* (1552) and its « Continuations » (1553-1556) ; (7) the birth of the polemical « Discours » (1562-65) that inspire d'Aubigné's epic *Tragiques* (1575-80, published in Geneva, 1615) ; the 'late' Ronsard of the *Sonets à Hélène* (1578) ; the worldview and cosmography of Guillaume Du Bartas, *La Sepmaine* (1578). Participants in the course will determine what we wish to « do » and, from a creative angle, what will be our *art de faire*.

Most of the readings will be supplied online, through Gallica ; by way of pages scanned from Floyd Gray, ed., *Anthologie de la poésie du seizième siècle*

Class Notes: First class meeting will be Wednesday, January 27, 3:00-5:00.
Remaining course schedule will be determined based on student enrollment.

"The Words to Say It": 20th-century Women Writing in French, From Colette to Satrapi (126038)

Alice Jardine

2020 Fall (4 Credits)

Schedule: M 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap: n/a

Motherhood, romantic love, independence, sexuality, citizenship, fantasy, death: these are just some of the themes explored in women's novels, written in French, during the twentieth century. Students will read four exemplary novels, exploring how they have finally become classics, even given what they say about life and what it means for women to write about it. At the same time, the advent and development of feminist and/or queer literary criticism over the course of the 20th century will be explored. Finally, we will consider what this 20th-century trajectory means for women writers today, culminating our study in a discussion of a 2016 novel that took the Francophone world by storm. The seminar has been modified to reflect distance learning requirements leading to a lively and successful seminar experience while ensuring everyone's safety.

France-North Africa, Encounters in Literature and Film: Cultures of Protest and Violence (211119)

Verena Conley

2021 Spring (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

Focusing on fiction, film and other media, this course deals primarily with encounters between North Africa, Algeria, Morocco, Tunisia and France; but also, with Italy and Spain, from independence to today. Through the lens of protest cultures and violence, we will study and compare political, social and media entanglements among countries joined and separated by the Mediterranean, from colonial uprisings to the

"Black decade" of terror, the Arab Spring, disenchantment with nationalisms, and today's forced migrations. Special attention will be paid to the ties between violence, protest and artistic forms.

Against Difference: Monique Wittig's Trojan Horse Writing and Theory (216060)

Annabel Kim

2021 Spring (4 Credits)

Schedule:

F 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

French feminism, as it is studied and taught in the Anglo-American academy, is most often associated with the three names that constitute the "Holy Trinity" of Hélène Cixous, Luce Irigaray, and Julia Kristeva—thinkers whose various theorizations of sexual difference permitted the convergence of an emergent feminist literary criticism with high theory and all its cachet. The dominance of this differentialist vein of what is described as French feminism has effaced or obscured the rich but understudied tradition of anti-difference French feminism, which unequivocally rejects the notion of any kind of essential sexual difference.

This graduate seminar, which is open to advanced undergraduates, will explore the anti-differentialist strand of French feminism, taking Monique Wittig as our primary author and an exemplary figure of both feminist thought and literature—a figure for whom the literary is political and the political, literary. We will explore Wittig's entire corpus, reading it alongside the major anti-differentialist French feminist thinkers with whom Wittig was in conversation—Nicole-Claude Mathieu, Christine Delphy, Colette Guillaumin, Paola Tabet—to chart out a different account of French feminism than we get with the more familiar history and poetics of differentialist French feminism. In doing so, we will explore how the story we tell of feminist theory is as essential to feminist projects as the theory itself.

Course Notes:

Readings in French, discussions and written work conducted in English. Wittig's fiction is available in inferior/questionable English translations. Students are welcome to read the English translations if they wish, and we can discuss how Wittig gets (mis)translated and what a difference translation makes.

Sophomore Tutorial: Poetics, Practice, and Politics in Romance Societies (114941)

Kathy Richman

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

This course introduces students to a range of analytical and theoretical approaches to "reading" fiction, poetry, film, and essays. We will pair critical writings and creative texts of importance to the Romance world to help students develop their own voice and analytical stance. Prepares students for advanced work in literary and cultural studies in Romance Languages and Literatures and related fields.

Course Notes:

Language of instruction to be decided upon by student in consultation with the Undergraduate Adviser in Romance Studies. Successful completion of one term of Romance Studies 97 (or equivalent) is required of all concentrators in their sophomore year.

Weekly individual instruction for students writing a senior thesis in Romance Studies. Part two of a two part series.

Course Notes:

For honors seniors writing a thesis. Successful completion of two terms of Romance Studies 99 is required of all thesis-track honors concentrators. Students who do not complete a thesis are required to submit a substantial paper in order to receive either half course or full course credit.

Recommended Prep:

Satisfactory completion of a junior tutorial and prior faculty approval of proposed thesis topic.

Requirements:

Prerequisite: French 98 OR Italian 98 OR Portuguese 98 OR Spanish 98 OR Romance Studies 98 OR Latin American Studies 98

Romance Studies 110

Haiti, Cuba, Martinique: Plotting Resistance in Fiction and Film (161274)

Kathy Richman

2020 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

What makes a novel moving, a film disturbing? How does humor work, even in the grimmest context? "Haiti, Cuba, Martinique" explores these aesthetic questions in works that engage slavery and its legacies, resistance and revolution, and paths to "development." We will consider historical context and discuss categories like "genre" fiction, didactic writing, realism, romanticism, and la littérature engagée, or "committed" literature. Includes works by Alejo Carpentier, Chamoiseau, Condé, Guillén, Gutiérrez Alea, Lahens, and Roumain.

Course Notes:

Taught in English. For concentration and secondary credit in Romance Languages and Literatures, readings and written work must be done in French or Spanish.

Class Notes:

In the unlikely event that students need accommodation for time zone differences, course meeting times may change.

Romance Studies 138

Literature and Urban History: Views from Brazil and the United States (217625)

Bruno Carvalho

Sidney Chalhoub

2021 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

In this seminar we will focus on novels about urban experience, paying particular attention to how they represent what subordinate peoples do with what is done to them (the enslaved and their descendants, migrants, dependents, women, workers). We will study major authors and works of late 19th- and early 20th-century fiction in Brazil and the United States, attentive to points of contact between cities in both countries during a period of intensive urbanization. Questions of class, gender and identity-formation in the general context of defining and setting new limits of citizenship rights will be emphasized.

Course Notes:

This course is also offered through the History Department as HIST 1933. Credit may be earned for either ROM-STD 138 or HIST 1933, but not both.

Romance Studies 168

Futurisms (a comparative history) (205157)

Jeffrey Schnapp

2020 Fall (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: None

Enrollment Cap:

n/a

From its foundation in 1909 through WWII, futurism developed into the first international cultural-political avant-garde. Its aim was the revolutionary transformation of all spheres of life and its influence extended from Europe to the Americas to Asia. The seminar adopts a cross-disciplinary and comparative focus; and includes such topics as humans and machines; experimental poetics; futurism's ties to anarchism, bolshevism and fascism. Media surveyed include poetry, performance, music, painting, photography, radio, and film.

Romance Studies 201

Questions of Theory (205260)

Doris Sommer

Nicole Suetterlin

2020 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

To explore key literary, cultural and critical theories, we pose questions through readings of classic and contemporary theorists, from Aristotle to Kant, Schiller, Arendt, Barthes, Foucault, Glissant, Ortiz, Kittler, and Butler, among others. Their approaches include aesthetics, (post)structuralism, (post)colonialism, media theory, gender theory, ecocriticism. Each seminar addresses a core reading and a cluster of variations. Weekly writing assignments will formulate a question that addresses the core texts to prepare for in-class discussions and interpretive activities.

Course Notes:

Conducted in English. This course is also offered as Romance Studies 201 and German 291. Credit may be earned for Romance Studies 201 or German 291, but not both.

Romance Studies 290

Migration and the Humanities (205269)

Homi Bhabha

Mariano Siskind

2021 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

By focusing on literary narratives, cultural representations, and critical theories, this course explores ways in which issues related to migration create rich and complex interdisciplinary conversations. How do humanistic disciplines address these issues—human rights, cultural translation, global justice, security, citizenship, social discrimination, biopolitics—and what contributions do they make to the "home" disciplines of migration studies such as law, political science, and sociology? How do migration narratives compel us to revise our concepts of culture, polity, neighborliness, and community? We will explore diverse aspects of migration from existential, ethical, and philosophical perspectives while engaging with specific regional and political histories.

Subject: Italian

Italian 10

Beginning Italian I - Parliamo Italiano! Pathways to Italy (113814)

Chiara Trebaiocchi

2021 Spring (4 Credits)

Schedule:

MTWR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This is a first semester beginning course designed for students with little or no knowledge of Italian. The course aims at achieving basic communication skills and vocabulary. Emphasis is on oral expression and listening comprehension. Listening/Speaking/Writing/Reading about what is, what has been, what will be (Indicative). The cultural component examines everyday life through a comparative perspective with emphasis on topics such as *school, families, shopping, sports, and food culture*. This course will give you the language you need to communicate effectively in Italian and to get ready for future adventures *all'italiana*. Course materials include workbook, audio-lab, video and other materials provided by instructor on Canvas. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes:

Conducted in Italian. Students whose placement score does not entitle them to enter a more advanced course are assigned to Italian 10. Students who have studied Italian for two years or more in secondary school must begin at Italian 11 or higher. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Reading, Understanding and Translating Written Italian for Research (113582)

Chiara Trebaiocchi

2020 Fall (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This is a single-skill course for students (both undergraduate and graduate) with little or no knowledge of Italian. It aims at the rapid development of rapid comprehension skills as a tool for research and independent reading of both academic and literary texts. Materials will be selected in accordance with the needs and interests of enrolled students. Students will develop individual, semester-long reading/research "goals" in a field or on a topic of their choosing, which will become the primary focus of their work during the second half of the course. Past students have set (and met!) a wide variety of reading goals, such as: a Divinity School student investigating the life of an early 20th-century Tuscan saint and stigmatic; a Design School student tackling a 16th-century treatise on architecture; an undergraduate reading a novel of Elena Ferrante in the original Italian.

The course will have synchronous group zoom sessions to consider specific reading strategies and facilitate discussion among students. There will also be one on one zoom meetings with the instructor to best respond to each student individual needs.

Course Notes:

Taught in English. Not open to auditors. May not be used to fulfill the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep:

Some previous study of a Romance language helpful but not necessary. Fluency in English required.

Intermediate Italian: The Colors of Italian Pop Lit (128265)

Chiara Trebaiocchi

2021 Spring (4 Credits)

Schedule:

MWF 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Inspired by the "colors" of Italian pop lit and culture (from romance to crime stories to graphic novels and

even the Spaghetti Westerns), this course aims to build reading skills and includes a structured review of grammar. By the end of this course you will read with more fluency, write with more accuracy, and talk about Italian pop lit through a colorful spectrum of oral and written expressiveness. Course materials include multi-media projects that increase language proficiency and cultural awareness (no textbook is required). Class time is supplemented with "TalkAbroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes:

Conducted in Italian. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Italian 20

Intermediate Italian: Romance! Mystery? Noir...L'Italiano in Rosa, Giallo e Nero (128265)

Chiara Trebaiocchi

2020 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

F 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

Using popular literary genres (from romance to crime stories to graphic novels: the *rosa*, the *giallo*, and the *nero* of Italian pop lit), this course aims to build reading skills and includes a structured review of grammar. By the end of this course you will read with more fluency, write with more accuracy, and talk about Italian pop lit through a colorful spectrum of oral and written expressiveness. Course materials include multi-media projects that increase language proficiency and cultural awareness (no textbook is required). Class time is supplemented with "TalkAbroad" conversations. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via

screenshare), and the development of a community of learners. Asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes:

Conducted in Italian. May count toward the language requirement. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep:

A score of 451-600 on the SAT II test or the Harvard Placement test, or a score of 3 on the Italian AP Exam; Italian 11 or 15; or permission of course head.

Upper-Level Italian: Italian Through Media. What is Happening... in the News. Novità? (128266)

Chiara Trebaiocchi

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course revisits structures and refines speaking and writing skills through media and arts interface. This course is structured around what is happening in Italy, as reported in the news (print and multimedia), and as represented through pop culture (talk shows, song, social media). Assignments are built to strengthen receptive and productive communicative skills. Course materials may include news, films, popular music, podcasts, and literary texts, among others. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Short asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it).

Course Notes:

Conducted in Italian. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Italian 40

Advanced Italian I: Oral Expression and Performance (116233)

Chiara Trebaiocchi

2020 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course aims to build interpretive, interpersonal, and presentational modes of communication, while engaging analytical and creative thinking. Students develop oral expression and communication skills through the close reading of texts that are meant for performance, such as plays, film scripts, poetry, music, and games. At the end of the course you will find yourself more confident about speaking in Italian in front of an audience and about expressing your opinions on a variety of topics (formal and colloquial expressions). Variation in diction and presentation techniques culminates in the adaptation and production of one or more of these texts for a public performance at the end of the term. You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with ample opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Short asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it). Consult course website for current semester topics.

Course Notes:

Conducted in Italian. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Appropriate for concentrators electing the Italian Studies or Romance Studies track. Not open to auditors. This course is taught by members of the Department. **NOTE:** Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes:

Meeting time may be subject to change, depending on enrollment.

Recommended Prep:

A score of 681-720 on the SAT II or the Harvard Placement Test, or a score of 5 on the Italian AP exam; Italian 30; equivalent preparation; or permission of course head.

Italian 50

Advanced Italian II: Written Expression. Italy in Other Words (127889)

Chiara Trebaiocchi

2021 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

A theme-based course designed to develop advanced competence in written expression through guided examination of stylistics and pragmatics. The course includes readings from a variety of literary genres, films, workshops, and it might include a series of guest lectures by our faculty on design, women and society, cinema, fiction, and other subjects.

You will engage in interactive communicative activities, both synchronously and asynchronously, that provide rich exposure to the Italian language and Italian culture. Synchronous Zoom sessions will be organized like a traditional language classroom filled with many opportunities for interaction and communication. These face-to-face sessions will allow for spontaneous exchange, real-time collaboration, facilitated presentations (via screenshare), and the development of a community of learners. Short asynchronous online assignments will develop your interpretive and presentational skills in Italian on various platforms (both internal to the course and outside of it). Consult course website for current semester topics (Spring 2021: Scrivere per descrivere, raccontare, argomentare e riflettere).

Course Notes:

Conducted in Italian. Appropriate for concentrators electing the Italian Studies or Romance Studies track. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

Class Notes:

NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep:

A score between 721-750 on the SAT II or on the Harvard Placement Test; Italian 40; or permission of course head.

Material Culture in the Middle Ages: Dante's Commedia (216057)

Jeffrey Schnapp

2021 Spring (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

An advanced research seminar devoted to Dante's poem on the occasion of 700th anniversary of his death. The course will combine close attention to Dante's text with nuanced attention to strategies of literary allusion, cross-reference, and reworking, and a series of in-depth explorations of the material culture of Dante's era. Among the latter themes will be: pathways and travel, the materiality of the page, the voice, the life of plants, the geology of the landscape.

Subject: Portuguese

Portuguese 10

Beginning Portuguese I: From Cambridge to Copacabana (120398)

Benedict Cruz

2020 Fall (4 Credits)

Schedule:

MWF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Intended for those with no prior experience in the target language, this course emphasizes interpersonal communication as well as the interpretation and production of written and spoken language. Students take their first steps on the journey from speaking English to carrying conversations with Portuguese speakers over the course of one semester, thanks to immersion activities and dynamic, interactive learning. Students will experience contextualized Luso-Afro-Brazilian culture through music, film, and social media.

Course Notes:

Conducted in Portuguese. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have previously studied Portuguese must take a placement exam. Students with a solid knowledge of Spanish should enroll in PORTUG 10s instead of PORTUG 10. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Additional Course Attributes:

Beginning Portuguese for Spanish Speakers I: It's SAMBA, not salsa! (113806)

Benedict Cruz

2021 Spring (4 Credits)

Schedule:

MWF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Designed specifically for students with a sound knowledge of Spanish. This course presents linguistic and cultural structures necessary for basic communication, emphasizing the features of Portuguese most challenging for Spanish Speakers: pronunciation, idioms, and grammatical structures peculiar to Brazilian Portuguese. Over the course of the semester, students learn to express themselves effectively using their Brazilian voice, distinct from their Spanish voice. Students experience contextualized Lusophone culture through music, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes:

Conducted entirely in Portuguese. Requires a solid knowledge of but

not necessarily native proficiency in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. PLEASE NOTE: Class time, Teletandem and Recitation Sessions may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes: This course requires 3.15 hours of synchronous instruction weekly, with Recitation session (45-minute discussion session) TBD.

Recommended Prep: Prerequisite: 720 on the Spanish SAT II or the Harvard Placement test; 5 on the Spanish AP test; a 30s level Spanish course; or permission of Course Head.

Portuguese 11S is a continuation of Portuguese 10S. This course guides students to continue the work of confronting features of the Portuguese phonological system that are most challenging for Spanish speakers. It helps solidify the student's foundation in Brazilian Portuguese, and pushes them to go deeper by engaging with literary readings, examining unique cultural aspects in addition to practical points of the language. Students will continue to experience contextualized Lusophone culture through music, film, literature, social media, and Teletandem, a weekly online interaction with college students in Brazil, unique to the Portuguese Program.

Course Notes:

Viviane Gontijo

2020 Fall (4 Credits)

Schedule:

MWF 0130 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

An intermediate course for students interested in expanding and strengthening their Portuguese language skills. Reading, writing, and conversational competencies are emphasized through a panoramic study of Luso-Afro-Brazilian Theater. The course will continue to promote cross-cultural understanding by introducing learners to different textual genres such as screenplays, critical review as well as a selection of literary work that represents the Lusophone arts. The weekly online Teletandem interaction with college students in Brazil, unique to the Portuguese Program, allows learners to discuss readings, and engage in peer-review of writing completed for this course.

Course Notes:

Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department. PLEASE NOTE: Class time, Teletandem and Recitation Sessions may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes:

This course requires 3.15 hours of synchronous instruction weekly, which includes Recitation session (45-minute discussion session) and one-hour Teletandem session (Lab) TBD.

Recommended Prep:

Prerequisite: PORTUG 11 (AB) or 11s (AD) OR permission of Course Head.

Requirements:

Viviane Gontijo

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap: n/a

This course engages in a systematic review of grammar, along with writing practice and vocabulary enrichment, while examining contemporary society as presented in the Portuguese-language press, television and film. PORTUGUESE 30 analyzes the ways in which Luso-Afro-Brazilians construct different and conflicting images of Angola, Brazil, Cape Verde, Portugal, and Mozambique. Class discussions are based on a variety of content, including advertisements, documentaries, and current periodicals.

Course Notes:

Conducted in Portuguese. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department.

Class Notes:

This course requires an average of three contact hours per week. To supplement the scheduled 2.5 hours, asynchronous tasks or workshop will be arranged each week.

Recommended Prep:

PORT 20 OR permission of Undergraduate Advisor in Portuguese and Brazilian Studies.

Requirements:

Prerequisite: Portuguese CREQ; PORTUG 30

Portuguese and the Community (118080)

Viviane Gontijo

2021 Spring (4 Credits) **Schedule:** TR 0130 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This is an advanced language course examining the Luso-African-Brazilian experience in the United States. This course promotes community engagement as a vehicle for greater linguistic fluency and cultural understanding. Students are placed with community organizations within the Boston area and volunteer for four hours a week. Class work will focus on expanding students' oral and written proficiency through discussing and analyzing readings, arts, and films by and about Luso-African-Brazilians in the US.

Course Notes: Conducted in Portuguese. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors.

Women's Voices in the Brazilian Literary Tradition (216399)

Viviane Gontijo

2020 Fall (4 Credits)

Schedule:

M 0300 PM - 0415 PM

W 0515 PM - 0600 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Historically, among the most noteworthy yet underrepresented contributions to literature have been those made by women. In this course we will explore a range of Brazilian Literature created by women. Students will approach works by Clarice Lispector, Lygia Fagundes Telles, Cecilia Meireles, Luisa Geisler among other Brazilian women, with particular consideration given to both social context and literary craft. Major topics for discussion and analysis will include power relations and poverty, family structures and dynamics, identity and gender construction, and the intersection of gender with race and ethnicity. Readings will encompass short stories, poetry, and novels by and about these notable Brazilian writers spanning the last century. By closely examining the voices of such significant authors, participants will develop and strengthen their skills in critical and analytical reading and writing, as well as improve their overall academic discourse in Portuguese.

Course Notes:

Course will be taught in Portuguese. Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes:

This course will meet synchronously 2 hours per week.

Recommended Prep:

Writing and Urban Life (207683)

Bruno Carvalho

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: 12

In this seminar we will explore literary representations of urban experience, and how the evolution of cities has been shaped by writing. Topics include the impact of technology on cities as lived and imagined spaces; interfaces between literacy, orality, and visual cultures; intersections between fiction, poetry, and social history; porous boundaries between built and natural environments; relationships between modernity, writing, and urban planning. Focus will be placed on major cities of the Portuguese-speaking world and authors like Machado de Assis, Fernando Pessoa, Patrícia Galvão, and Clarice Lispector.

Course Notes:

The seminar will be conducted in Portuguese.

Class Notes:

Course schedule will be determined in consultation with students, based on enrollment.

Subject: Romance Languages

Romance Languages 210

Language Pedagogy: Theories, Approaches, and Practices (136717)

Nicole Mills

2020 Fall (4 Credits)

Schedule: W 0300 PM - 0500 PM**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

This course is designed for TFs and TAs in the department of Romance Languages and Literatures who are teaching a Romance language at Harvard for the first time, or those who are interested in foreign language learning and teaching. It introduces TAs and TFs to theories of second language acquisition (SLA) and explores their implications for the teaching of foreign language, culture, and literature. The course provides opportunities for students to learn to enact the specific pedagogical practices deemed essential to foreign language teaching. The intensive week before the start of classes includes reports on and discussion of general SLA theories and demonstrations and analysis of varied instructional approaches.

Course Notes:

Students are required to attend the pre-service seminar before classes begin. Students who do not attend the pre-service seminar will not be permitted to enroll in the course. For details and further information, please contact the Course Heads. May be taken SAT/UNS. Permission of Course Head required.

Teaching Languages, Cultures and Literatures (216381)

Virginie Greene

2021 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is addressed to experienced TFs and TAs who are currently teaching foreign languages, literatures and cultures at Harvard. It will present and use theories coming from the disciplines of language pedagogy, relevant applied linguistic research, socio-linguistics, anthropology, and literary criticism, applied to classroom experience whether online or in situ.

The course is conceived as a space of open and structured discussion among humanists and social scientists specializing in different fields, teachers at different stages of their careers, and individuals coming from diverse linguistic, cultural and social backgrounds. We will learn from each other through comparing theories, practices, and stories.

Course Notes:

This course fulfills one of the requirements of the Bok Certificate in Teaching Language and Culture (in collaboration with the Bok Center for Teaching and Learning).

Class Notes:

This class will be taught by Prof. Virginie Greene with the collaboration of guests Dr. Nicole Mills and Dr. Maria Luisa Parra.

Article Publication Workshop (212926)

Annabel Kim

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

A reading and writing intensive workshop aimed at doctoral students done with coursework, and postdocs affiliated with the department. Through workshoping (both as a class and in smaller groups), participants will go through two intensive rounds of revision to produce an article ready to submit to peer-reviewed journals at the end of the semester. We will begin with preliminary discussions of the nuts and bolts of writing and publication: reading essays and articles on how to write well; identifying journals that are a good fit for publication; reading sample abstracts and writing and revising one's own; analyzing sample readers' reports (from the generous and intelligent to the brutish and mean) to think through how to respond to feedback; etc.

Class Notes: The first class will meet on Monday, September 7, 3-5 pm, with the schedule to be determined thereafter.

Maria Parra-Velasco

2020 Fall (4 Credits)

Schedule:

MTWR 1200 PM - 0115 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

A basic beginning semester course for students with no previous study of Spanish. Emphasis on speaking, writing, reading, and listening, as the basis for the development of all three Communication Modes (Interpersonal, Interpretive, and Presentational). Hispanic cultures will be introduced through a variety of texts, including readings, music, art, and film.

Course Notes:

Conducted in Spanish. Open to students who have not previously studied Spanish or who have scored below 300 on the Harvard placement test. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

This course is taught by members of the Department.

Additional Course Attributes:

2021 Spring (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: None

Enrollment Cap:

n/a

For students with the equivalent of one semester previous study of Spanish. Emphasis on strengthening students' interpersonal, interpretive, and presentational skills in both oral and written Spanish. Hispanic cultures are presented through a variety of authentic texts, including short pieces of literature, essays, and newspaper articles. Music, art, and film are also included. After Spanish 10 and 11, students should be able to engage in everyday conversations with native speakers, and read straightforward texts, both fiction and non-fiction, with relative ease.

Course Notes:

Conducted in Spanish. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. Students who have studied Spanish for two years or more in secondary school must begin at Spanish 11 or higher. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. This course is taught by members of the Department. **PLEASE NOTE:** Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep:

A score between 301-450 on the SAT II test or on the Harvard Placement Test, Spanish Aa/10, or permission of course head.

Spanish 30 Section: 005

Upper-level Spanish: Four Countries and their Cultures (114200)

Johanna Damgaard Liander

2021 Spring (4 Credits)

Schedule:

MWF 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An advanced language class that reinforces the practice of oral and written communication in Spanish through topics in contemporary cultural materials from Spain and Latin America. Students will focus on improving proficiency, refining pronunciation and acquiring vocabulary. In addition to in-class discussions, course work involves grammar review and practice in writing. Consult course website for current semester topics.

Course Notes:

Conducted in Spanish. May not be taken Pass/Fail but may be taken Sat/Unsat by GSAS students. Not open to auditors. Upon the recommendation of the course head, students who have performed at a superior level in this course may enroll in any course for which they are linguistically prepared. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

This course is taught by members of the Department.

Recommended Prep:

A score between 601-680 on the SAT II test or on the Harvard Placement Test, Spanish C, or permission of course head.

Additional Course Attributes:

Spanish 49H

Languaging and the Latinx identities (109820)

Maria Parra-Velasco

2020 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap: 15

This course builds on students' knowledge of Spanish to explore the relationship between their languaging practices and their Latinx identities. Understanding languages as a way of knowing and meaning making, we use a variety of texts, genres, music, videos, films and visual arts to engage in discussions about family heritage, migration, and Latinx cultural and linguistic traditions and innovations. Students will strengthen their oral and written abilities, expand their interpersonal, interpretive and performative resources for languaging in informal and academic contexts.

Course Notes:

Spanish 49h was formerly Spanish 35; therefore, students cannot take 49h if they've already taken 35. Spanish 49h should be a prerequisite for 59h (or permission of the instructor). PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Advanced Spanish II: Creative Writing and Performance (115920)

Adriana Gutierrez

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

An advanced language course designed to strengthen and develop competence in written expression. Close reading of texts in literary and non-literary genres will help students refine personal style. The performance of short excerpts of plays, combined with advanced work on oral expression and phonetics, will help students increase their fluency and ease of expression.

Course Notes:

Conducted in Spanish. Recommended for concentrators. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. Not open to auditors. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Recommended Prep:

Spanish for Latino Students II: Connecting with Communities (159938)

Maria Parra-Velasco

2021 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

An advanced language course for Spanish heritage learners that aims to: strengthen students' oral and written linguistic range, with emphasis on Spanish use for academic contexts; and to further develop students' critical language and social awareness around important issues for Latinos in our globalized era: Spanish as global language, identity, language rights, global migration and labor, U.S.-Latino America relations, food and environment, the 'war on drugs'. Students explore these topics through various genres (newspapers and academic articles, debates, literary essays, short novels, poetry, visual art, film and music) and through 4 hours a week of community service.

The Ethics of Business in Latin America (127573)

Adriana Gutierrez

2021 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

An advanced language and culture class that examines literature and films portraying the political, sociological, financial and environmental impact of multinational companies doing business in Latin America. Students' linguistic competency is developed through discussion of the ethics of business, grammar reviews, and weekly writing assignments. Students will also choose a specific project for a business in Latin America and research its possible outcome and social, political, and environmental consequences.

Course Notes:

Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students.

Recommended Prep:

A score between 751 and 780 on the SAT II test or Harvard Placement test, a Spanish 50-level course, or permission of course head. Students are allowed to take a maximum of two courses at the 60-level in Spanish, not including Spanish 60.

Introduction to Latin American Studies: Modernity, Culture and Politics (116263)

Mariano Siskind

2020 Fall (4 Credits)

Schedule:

M 0600 PM - 0800 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Introduces students to central debates and problems that have shaped Latin American culture. We address questions of cultural identity, gender, race, politics, economics and aesthetics by looking at historical and literary texts, films, visual arts and urban development from an interdisciplinary perspective. We analyze colonial encounters; revolutions; US-Latin American relations; popular cultures from tango and samba to football and *carnaval*; Latin American cities and slums; and memory, trauma and traces of the region's dictatorships.

Course Notes:

Conducted in Spanish. Readings in Spanish and English.

Introduction to Contemporary Spanish Literature and Culture (207836)

Raquel Vega-Duran

2021 Spring (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

12

This course introduces students to the literature, history, and visual culture of contemporary Spain (from the 18th century through the first twenty years of the 21st century). We will study representative short stories, poems, plays, novellas, essays, paintings, photographs, and films from the Spanish War of Independence, the "disaster" of 1898, the Surrealist movement, the Spanish Civil War and the Republican Exile, Franco's Dictatorship and the Transition to Democracy, the "Movida Madrileña," and the literature of immigrants and "new" Spaniards. Through visual and written works by Goya, Galdós, Campoamor, Bécquer, Pardo Bazán, Azorín, Unamuno, Lorca, Machado, Buñuel, Laforet, Matute, Almodóvar, Martín Gaité, Puértolas, and others, students will gain a general knowledge and

appreciation for main works, periods, and authors of contemporary Spain, and will appreciate the uniqueness and diversity of Spanish culture by establishing transnational relations between Spain and Latin America, North Africa, Asia, and Europe. All readings will be in Spanish, although we will look at texts originally written in Spanish, Catalan, Galician, and Basque.

Course Notes:

Taught in Spanish.

Table Talk and Food Writing (205164)

Johanna Damgaard Liander

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

15

From classroom to kitchen, picnic or café, this advanced language and food culture course will examine the Spanish table, its history and origins, expansions and innovations, from medieval times to present-day molecular gastronomy. Frequent reading, viewing and writing assignments and classroom discussion are all designed to reinforce language skills and academic literacy in the target language. The course, along with all materials and assignments, is entirely in Spanish, primarily focusing on literary, historical, linguistic and sociological texts and topics from Spain –selections ranging from Harvard's vast culinary collection to the most current media- with reference to Latin America and the Latino community in the United States, as well.

Course Notes:

This course is taught in Spanish.

Recommended Prep:

A score of 750 or beyond on SAT II or Harvard Placement; previous enrollment in Spanish 50 or higher; or permission of the instructor.

Inspiring Women: The History of Women in Spain in Dialogue with Hispanic America (211120)

Raquel Vega-Duran

2020 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this course we will examine the significant role of women in society, politics, history, and culture from the Middle Ages to the 21st century on both sides of the Hispanic Atlantic. Through films, political speeches, manuscripts, short stories, novels, newspaper articles, memoirs, and visual art, we'll study women's history, voices, and experiences in Spain, and we will often put them in dialogue with women who lived at the same time on the American side of the Atlantic. We will examine medieval beguines, witches, healers, and the Inquisition; heroines, queens, adventurers, and explorers in the Spanish empire; depictions of women at war; the relevance of age, maternity, body, and education for women; suffragettes, women politicians, and feminist movements; the "visible invisibility" of women during the early dictatorship; women in the works of male authors such as Federico García Lorca and Pedro Almodóvar; women painters, imagined, and imaged in Spain and Latin America; the concept of "third gender"; and the feminization of immigration in the twenty-first century; among other topics.

Course Notes:

Conducted in Spanish.

Culture and Development in Reciprocity: Paraguay (217638)

Doris Sommer

2021 Spring (4 Credits)

Schedule: F 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 20

This seminar is an interdisciplinary approach to research about Paraguay that takes Reciprocity, a core practice in Latin American cultures, as the pedagogical structure for studying the region. Harvard students will work in reciprocal collaboration with students in Paraguay.

The first half of the semester will introduce a range of topics that include arts, social mobilization, ways of learning, environment, and public policy. By mid-semester students form pairs based on shared interests and choose a question to develop together. Harvard offers important resources for the team and Paraguay offers other important resources. Student-to-student interchanges will allow for ongoing and reciprocal social and scholarly development.

The seminar has two fundamental objectives: 1) to foster intercultural research through collaborations that combine perspectives on readings and inquiries; and 2) enhance capacity in English and in Spanish, reciprocally, as students read closely together and write persuasively. Pre-Texts will be the pedagogy for achieving language proficiency. Our institutional partner is Paraguay's *Instituto Desarrollo*, directed by José Molinas. It will serve as co-mentor for the student teams and will provide guidance for accessing resources and convening relevant scholars in Paraguay.

The co-written final paper for the course will be a "Case for Culture." This is a hybrid essay that combines humanities with social and/or natural sciences to develop the kinds of interdisciplinary collaborations made possible by reciprocity.

Course Notes:

This course in Spanish with readings and advising in both languages.

Class Notes:

This course is co-taught with with José Molinas, Instituto Desarrollo, Paraguay

Instructor Permissions: None

Enrollment Cap:

n/a

Afrodescendent writers in Latin America explore formal literary decisions as opportunities to exercise authority, no matter how unbidden the content may be. Choices of form and technique are freedoms that ignite memory, reflection, and imaginaries that outstrip existing conditions. Art presages agency in a range of social constructions.

Raquel Vega-Duran

2021 Spring (4 Credits)

Schedule:

M 1200 PM - 0200 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

This course explores how film, painting, photography, literature, and multimedia projects relate to and narrate contemporary borders such as those between Mexico and the USA; Spain and Morocco; Haiti and Dominican Republic; the five borders of Manipur; other "border spaces" such as the enclosed migrant detention centers in Ceuta (Spain), Lampedusa (Italy), and California; the emergence of "new" identities such as "New Europeans," "Latiños," the Mei Ming generation, and the perception of Roma in Europe; and the patrolled waters that separate Cuba from the US, West Africa from the Canary Islands, and North Africa from Southern Europe; among others. We will pay particular attention to the history of these walls, fences, and controlled spaces, and the stories they tell us, and consider border-crossing experiences of migrants from a variety of perspectives. We will look in depth at the role of art in relation to these walls, both on the actual walls (artists who use the fences as canvases, such as the project "Borrando la frontera" in the San Diego/Tijuana border, and *Ulises*, a graphic novel written on the wall of the North African city of Melilla), as well as the ways in which these walls are chronicled in literature, film, photography, and painting (including Danticat's novel *The Farming of Bones*; Spottorno's graphic novel on refugees *La grieta*; the online project *Poets on Borders*; Sebastiao Salgado's photographic cycle *Migrations*; and movies such as *Sin nombre* and *Balseros*; among other works).

Course Notes:

Conducted in Spanish.

Narratives of Identity about 19th- and 20th-Century Spain (207918)

Daniel Aguirre-Oteiza

2020 Fall (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

What are the connections between narrative and identity? To what extent are our personal and collective identities shaped by received ideas of "others"? How does questioning "others" help us understand our ideas of culture, nation, and polity? In what ways are fear, hate, pain, and identity narratively related? What's the value of asking these questions when we read modern fiction about Spain? Texts by Cercas, Clarín, Laforet, Ndong, Saer, Sempún, among others.

Barcelona and the Catalan Culture (109775)

Aina Obis Monne

2021 Spring (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course offers an interdisciplinary approach to Barcelona, a multilayered space furnished by Roman, French, Muslim, and Spanish legacies that shaped a singular culture and language. Developing from periods of egalitarian social and political institutions in the Middle Ages to strong socioeconomic industrial development in the 19th century and later tourism, Spain's most European city is inscribed by a deep sense of civic and industrious society permanently seeking innovation and modernity, yet facing the consequences of its complex past. Through readings of historians, art critics, urban designers, and writers, and supported by visual materials, the course offers an integrated perspective which opens questions in every field of the Humanities and the Social Sciences on Catalan and Hispanic Cultures.

Course Notes:

The course will be conducted in Spanish. The readings will be in English & Spanish.

The Borges Machine (108752)

Mariano Siskind

2021 Spring (4 Credits)

Schedule:

F 1245 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Between 1923 and 1970, Jorge Luis Borges wrote some of the most original poems, short stories, essays and film scripts in Latin America and anywhere in the world, and he redefined the meaning and scope of literature. In this course, we will examine the signifying power of Borges' short stories, essays and poems, and we will consider his work as a literary machine whose output radically transforms aesthetic formations and imaginaries beyond Argentina and Latin America. Rather than thinking about what his literature means, we will concentrate on what it produces as a fictional-poetic machine: cities and worlds, love and treason, popular and high culture, politics and death, institutions of knowledge and traditions, and new ways of reading and thinking about aesthetic and social relations.

Subject: Catalan

Catalan 10

Introduction to Catalan (114279)

Aina Obis Monne

2020 Fall (4 Credits)

Schedule: TR 0300 PM - 0430 PM**Instructor Permissions:** None**Enrollment Cap:** n/a

This course offers a set of units that, while introducing critical topics of contemporary social, political, territorial, and artistic debates, teach the basics of Catalan language and culture. Students will engage in interactive communicative activities and strengthen their interpretive and presentational skills through the practice of written and oral discourse, both synchronously and asynchronously. By the end of the course students will be able to interact in daily situations with native speakers, read and write messages about themselves and other topics, and interpret cultural expressions and products.

Course Notes:

Conducted in Catalan. Knowledge of another Romance language is useful but not essential. Not open to auditors. May not be taken Pass/Fail, but may be taken Sat/Unsat by GSAS students. This course is taught by members of the Department. PLEASE NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the course head if you have a time zone conflict.

Class Notes: NOTE: Class time may be subject to change based on students' time zone constraints. Please be in touch with the instructor if you have a time zone or other scheduling conflict.

Junior Tutorial (159853)

Philip Redko

2021 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

In this course, we will read Pushkin's beloved novel in verse, Evgenii Onegin in its entirety—in the original!—paying special attention to its cultural and historical contexts, its play with poetic form and genre, and its innovative approach to plot and characterization. Together we will revel in its wit, virtuosity, and sheer linguistic brilliance, and find out for ourselves why this work has never lost its popular appeal. In addition to Onegin, we will read some of Pushkin's most celebrated lyric poems, watch Tchaikovsky's opera based on the novel, and take a virtual trip to Houghton to look at first editions. We will supplement our close reading of the text with articles by renowned Pushkin scholars, and will refer to the two most important commentaries on the novel, by Yuri Lotman and Vladimir Nabokov. This course is open to anyone currently in third-year Russian or above. Onegin and other poetry will be read in Russian; supplemental readings and class discussions will be in English. The course meeting time will be determined on the basis of student availability.

Course Notes:

Required of junior concentrators in Slavic Literatures and Cultures. Course open to non-concentrators by permission of the instructor.

Readings will be in Russian.

Recommended Prep:

Students must be able to read in Russian.

Squaring the Circle: Russia, Art, Revolution (208135)

Daria Khitrova

2020 Fall (4 Credits)

Schedule: TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap: n/a

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes:

No prerequisites. All readings in English.

This course is cross-listed as SLAVIC 114 and TDM 114K.

Russian Novel (216024)

Julie A. Buckler

2020 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Explores the distinctive tradition of the modern Russian novel beginning in the late eighteenth century and emphasizing works from the nineteenth century, with a sampling of twentieth-century works that continue the tradition. Compares and contrasts this Russian tradition with its Western counterparts (England, France, America). What is "Russian" about the Russian novel? Works by Karamzin, Pushkin, Lermontov, Gogol, Goncharov, Turgenev, Dostoevsky, Tolstoy, Saltykov-Shchedrin, Chekhov, and others.

Course Notes:

No knowledge of Russian required.

Modern Russian: The Back Story (160167)

Michael Flier

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Russian has a fascinating history that reveals explanations for the irregularities and mysteries presented in

textbooks but often unexplained. Why does *g* sound like [g] in *mnogo* 'many', but like [v] in *segodnia* 'today'? How is *moloko* 'milk' related to *mlechnyi put* 'the Milky Way'? Why *pet* / *poiu* 'sing' and not *pet* / **peiu*? Why do the numbers 2, 3, and 4 govern the genitive singular rather than nominative plural? How can *nachalo* 'beginning' and *konets* 'end' come from the same root? A historical knowledge of Russian is not only enlightening; it will help improve your skills in the modern language.

Course Notes:

No knowledge of linguistics is required. Lectures will be supplemented with problem sets available from the course website. Intermediate college-level Russian (= RUSS BAB or its equivalent) required.

Recommended Prep:

Russian A, "Elementary Russian" (parts I and II), or Russian AAB, "Intensive Elementary Russian"

Hacking Russia: Technological Dreams and Nightmares of Russian Culture (216025)

Nariman Skakov

2020 Fall (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course explores the role of technology in constructing the social and ideological fabric, as well as the material reality, of Soviet and Russian society. From the early Soviet period, when technological progress was linked to humanistic utopia, through dystopian critiques of a totalitarian machine of conformity and constraint, we proceed along the assembly line of communist production, avant-garde and constructivist artistic utopia, socialist realism, the space race, and information technology, using examples from Russian literature, film, art, visual arts, performance, and current events. With the media's concern for fake news and Russian hacking today, it is our course's goal to "hack Russia": to understand the politics and technology shaping Russia, and the creative responses that have made its society a site of both dreamlike promise and nightmarish threat, through its history and today.

Course Notes:

All readings in English.

Modernist Journeys (216030)

Nariman Skakov

2021 Spring (4 Credits)

Schedule:

MW 0430 PM - 0545 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In the years following the Russian Revolution, the Soviet Union emerged as a major political power and underwent sweeping social changes. This course will explore the radical displacements that took place in this, the first socialist society—immigration, war, forced relocation, labor camps, and, in very rare cases, travel for leisure. In parallel with these sweeping movements of dislocation, this was the time when a modernist aesthetic tradition was flourishing and key precepts of the emerging Soviet identity were formed. *Modernist Journeys* explores accounts of travel, displacement, and migration as a window into the diversity of perspectives that contributed to the formation (or disintegration) of the new "Soviet man." We will consider memoirs, travelogues, films, and theoretical texts by major Soviet authors and film-makers as they traveled to Mongolia, Central Asia, Armenia and China as well as Paris and "the West": Sergei Tretyakov, Osip Mandelstam, Isaak Babel', Andrei Platonov, Aleksandr Rodchenko, Dziga Vertov, Ilya Ilf and Evgeny Petrov among others.

Note: All readings in English. No previous knowledge of Russian literature or history is necessary.

Russian Fiction in the Soviet Era (216339)

Justin Weir

2021 Spring (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

In this course we will read several of the most acclaimed works of Russian fiction in the Soviet era, including Mikhail Bulgakov's *The Master and Margarita*, Boris Pasternak's *Doctor Zhivago*, Vladimir Nabokov's *Invitation to a Beheading*, as well as other stories and novels by Osip Mandelstam, Yuri Olesha, Alexander Solzhenitsyn, and Evgeny Zamyatin. The main themes of the course will be the role of the author in a totalitarian society, politics, and the form of the novel in the twentieth century. No prerequisites. Conference course.

Tolstoy (111184)

Julie A. Buckler

2021 Spring (4 Credits)

Schedule:

T 1245 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Tolstoy's development as a writer and thinker, beginning with his early diaries and progressing through the novels to the late stories and plays, also sampling Tolstoy's non-fictional writing and correspondence. Examines Tolstoy's work in light of recent critical approaches to authorship, artistic biography, literary canon, ethics, gender, sexuality, and affect. How has Tolstoy been variously interpreted in Russian, Soviet, post-Soviet, and Western-humanistic contexts? How did Tolstoy view his own work at various points in his life?

Course Notes:

Reading knowledge of Russian (equivalent to three or more years of study) is required.

Document, Testimony, and Political Fictions (216428)

*Jonathan Bolton**Justin Weir*

2020 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

15

We will consider classic narratives that incorporate real written documents or personal testimonies into works of fiction, film, and journalism. How do such works blur the line between fiction and reality, between individual testimony and collective experience, in order to construct larger narratives about political repression and political history? We will explore why some testimonies, images, or documentary details feel more "authentic" or "truthful," inspiring a strong response in readers and viewers, while others recede into the background. What is gained or lost when facts are folded into a narrative that does not just inform but also entertains? Why do works of fiction and film create such persuasive versions of the past, and how do these stories shape our sense of political life and state power? We will examine diverse historical documents, individual and collective testimonies, stories, novels, photos, and films from Russia, Eastern Europe, and other regions in order to investigate these questions. Course readings will range from Defoe, Melville, Tolstoy, Dostoevsky, and Babel to Nobel Prize winners Alexander Solzhenitsyn and Svetlana Alexievich, as well as non-fiction from Elena Poniatowska, Ryszard Kapuściński, Javier Cercas, Liao Yiwu, Carlo Ginzburg, and others; we will also discuss films from Errol Morris and Andrei Tarkovsky.

Slavic 182

The Political Novel (205018)

Jonathan Bolton

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor**Enrollment Cap:**

15

No novel can be reduced to a set of political beliefs, and yet we often feel that novels speak to our political theories and practices. What makes a novel "political"? Can the novel make a contribution to political theory? How does our understanding of political power change when we imagine detailed and dramatic confrontations between individuals and the state, individuals and empire, or individuals and global

ideologies? How does narrative form reinforce or undermine ideology? What archetypal dramas—protest against authority, the loss of political innocence, the battle between tolerance and conviction—have shaped the political novel in its various traditions from the nineteenth century to the present?

For spring 2021, our readings will include works by Pushkin, Dostoevsky, Ivan Olbracht, Koestler, Kundera, Le Guin, Gordimer, and Colson Whitehead.

Course Notes:

All readings in English.

Moscow Conceptualism/Russian Postmodernism (216053)

Nariman Skakov

2020 Fall (4 Credits)

Schedule: F 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

What makes Russian postmodernist cultural output special? Or is there anything special about Russian postmodernism? The course aims to answer these questions by engaging with theories of postmodernism and through close readings of literary and visual works by Venedikt Erofeev, Sasha Sokolov, Vladimir Sorokin, Dmitrii Prigov, Ilya Kabakov, Andrei Monastyrsky, Erik Bulatov, Timur Novikov and Petersburg Neo-Academism.

Course Notes:

Texts read in Russian. Primarily for graduate students. Advanced undergraduates permitted with instructor's permission.

Readings in Poetry and Theory (216051)

Aleksandra Kremer

2021 Spring (4 Credits)

Schedule: R 0300 PM - 0500 PM

Instructor Permissions: None

Enrollment Cap: n/a

An introduction to different ways of reading modern and contemporary poetry, with a special emphasis on Europe's less-known traditions, minor languages, and small nations (including Austrian, Czech, Polish, and Yiddish texts). From this perspective we will revisit big, age-old questions – what is lyric poetry? how is it

made? how can we read it? – and explore the relations between poetry and nation, tradition, and translation, as well as the boundaries of language, speech, and writing. In each class, we will focus on a few poems (texts, books, recordings), which we will examine in the light of classic theories of literature and recent literary criticism. Each time, the commentaries will illustrate at least two different approaches to the same question, familiarizing us with a wide range of literary methodologies and allowing us to problematize their usefulness.

Course Notes:

Readings in English.

Subject: Russian

Russian AA

Elementary Russian I (122907)

*Steven Clancy**Natalia Chirkov*

2020 Fall (4 Credits)

Schedule:

MWF 0900 AM - 1000 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Part one of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are

stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Course Notes:

Part one of a two-part series. Students are strongly encouraged to enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Russian AA together with Russian AB or Russian ATB (Elementary Russian through Authentic Texts II) satisfy the foreign language requirement. Any of the elementary (A-level) level Russian courses (A, AAB, and AT) prepare students for continued study of Russian in intermediate (B-level) courses (B, BAB, or BTA) and for study or travel abroad in Russian-speaking countries.

Recommended Prep:

No prior knowledge of Russian is required.

Part one of a two part introductory course in modern Russian language and culture, designed for students without previous knowledge of Russian who would like to speak Russian or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are introduced to Russian culture and the etiquette of social exchanges, and expand their knowledge of grammar and vocabulary through readings (including stories, biography, and poetry), videos, and class discussions.

Course Notes:

Part one of a two-part series. Students are strongly encouraged to

enroll in Russian AA in the fall and Russian AB in the spring within the same academic year.

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Schedule:

MWF 1030 AM - 1130 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Part one of a two part intermediate course in modern Russian language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Russian grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Vocabulary is thematically organized to include such topics as self and family, education, work, human relationships, politics, and national attitudes and is reinforced through film and the reading of classical and contemporary fiction and history. Practice in the etiquette of common social

situations (sociolinguistic competence). Computer exercises on selected topics.

Course Notes:

Interested students should contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions regarding scheduling conflicts. With sufficient enrollments it is possible that this course will be offered in an additional section on MWF in a different time slot. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Russian BA in the fall and Russian BB in the spring within the same academic year. - - -

This course will also meet for two additional hours of speaking practice on Tuesdays and Thursdays. Meeting times for the T-Th practice sections are subject to adjustment based on students' availability. See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>. - - -

Any full course in Russian at the B-level (Russian Ba-Bb, Russian BTA-BTB, or Intensive Russian BAB) will prepare students for continued study of Russian at the advanced level (Russian 101) and for study or travel abroad in Russian-speaking countries.

Recommended Prep:

Russian AA-AB, AAB, ATA-ATB, AH, or placement at the B-level. Familiarity with fundamentals of Russian grammar, particularly case endings, verb conjugation, and elementary competence in spoken Russian.

Subject: Polish

Polish AA

Elementary Polish I (123076)

Anna Baranczak

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Part one of a two part introductory course in modern Polish language and culture, designed for students without previous knowledge who would like to speak Polish or use the language for reading and research. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed. Students are exposed to Polish culture through reading of prose and poetry as they learn to use the language both as a means of communication and as a tool for reading and research.

Polish AA: Elementary Polish I together with Polish AB: Elementary Polish II satisfy the foreign language requirement and prepare students for continued study of Polish in intermediate-level courses and for study or travel abroad in Poland.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy

<sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see <https://slavic.fas.harvard.edu/language-courses>. - - -

Intermediate Polish I (124971)

Anna Baranczak

2020 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Part one of a two part intermediate course in modern Polish language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Polish grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Introduction to Polish literature through fiction and poetry, history and contemporary events, including readings from literary masterpieces from Polish literature from the era of the Renaissance to contemporary times including Jan Kochanowski, Wisława Szymborska, Zbigniew Herbert, Czesław Miłosz and others. Film clips and newspaper articles will introduce students to a variety of styles of contemporary Polish. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading.

Intermediate Polish I and Intermediate Polish II together prepare students for continued study of Polish in advanced-level courses and for study or travel abroad in Poland.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Please contact the course instructor or the Director of the Slavic Language Program (Steven Clancy <sclancy@fas.harvard.edu>) with any questions. For information on meetings during the first week of classes, please see <https://slavic.fas.harvard.edu/language-courses>. - - -

Part one of a two-part series. Students are strongly encouraged to enroll in Czech BA in the fall and Czech BB in the spring within the same academic year. - - -

See language course notes on the Slavic Department website for information about sectioning, pass/fail, satisfactory/unsatisfactory, and auditing: <https://slavic.fas.harvard.edu/language-course-notes>

Recommended Prep:

Completed Czech AB, or placement at the B-level. Familiarity with fundamentals of Czech grammar, particularly case endings and elementary competence in spoken Czech.

Czech BB

Intermediate Czech II (159716)

Veronika Tuckerova

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Part two of a two part intermediate course in modern Czech language and culture for students with previous study of the language. Further development of vocabulary and oral expression within a comprehensive review of Czech grammar. All four major communicative skills (speaking, listening comprehension, reading, writing) are stressed as students learn to use the language both as a means of communication and as a tool for reading and research. Systematic study of word formation and other strategies are taught to help free students from excessive dependence on the dictionary and develop confidence in reading. Increased exposure to the differing registers of Czech in its literary and spoken forms.

The two part course prepares students for continued study of Czech in advanced-level courses and for study or travel abroad in the Czech Republic.

Course Notes:

This course will be offered MWF with 75 min class meetings. The department will make an effort to schedule the course based on the availability of interested students. Introduction to Social Studies (115470)

David Armitage

2020 Fall (4 Credits)

Schedule:

T 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This course offers an introduction to the foundations of modern social theory from the seventeenth to the nineteenth century. Our focus will be on the rise of democratic, capitalist societies and the concomitant development of modern moral, political, and economic ideas, with special emphasis on empire, race, and inequality. Authors we will examine include among others, Thomas Hobbes, Jean-Jacques Rousseau, Adam Smith, Mary Wollstonecraft, Alexis de Tocqueville, Frederick Douglass, Charles Darwin, and Karl Marx.

Course Notes:

This course is limited to sophomores and Social Studies concentrators. This course is a prerequisite for sophomores applying to Social Studies. Students planning to take this class must attend the first lecture to be admitted.

Class Notes:

Students who are in time zones in Asia and Australia will be able to watch a recording of the weekly lecture online but will also need (as with all students in this course) to attend a two-hour synchronous discussion section later in the week. Weekly evening (drop-in) office hours will be provided for all students, but those unable to attend lectures synchronously will be especially encouraged to attend.

Foundations of Social Science Research (213384)

Adaner Usmani

2021 Spring (4 Credits) **Schedule:** MW 1030 AM - 1145 AM

Instructor Permissions: Instructor **Enrollment Cap:** 50

This course has two goals. First, to introduce students to the diversity of methods that social scientists use to answer questions about the social world. Second, to prepare thesis writers to conduct original research. We will survey both qualitative and quantitative approaches, reading a combination of methodological texts and exemplary empirical work. For their final project, students will write a research proposal that will anchor their future thesis work.

Methods Training for Social and Political Theorists (213383)

Don Tontiplaphol

2020 Fall (4 Credits) **Schedule:** TR 0300 PM - 0415 PM

Instructor Permissions: Instructor **Enrollment Cap:** 12

Is social-scientific knowledge possible? How does empirical research depend on conceptual analysis? What is the relationship between normative theory and empirical reality? This course investigates different modes of theorizing and integrates them into the philosophical foundations of the social sciences. Units include "Epistemology and Social Explanation"; "Conceptual Analysis and the Human Sciences"; "Political Theory and Historiography"; "Normativity, Critique, and Political Realism." Recommended preparation for

senior-thesis research in social and political theory, including the epistemology of social science. Continuation of the methodological themes of Social Studies 10b; intended for first-term juniors and first-term seniors.

Course Notes:

This course will be lotteried.

Engaged Philosophy: The Theory and Practice of Altruism (213258)

Bonnie Talbert

2021 Spring (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In the wake of a global pandemic and the George Floyd protests, many are searching for ways to take action, to improve our communities and the world, and to help others. This altruistic mission is a noble goal, but like all missions, it requires thoughtful planning and reflection. The main question this course will address is "What is altruism?" We will approach this question from a variety of interdisciplinary perspectives: biology, psychology, political theory, and moral philosophy. Are we naturally altruistic, or are all actions in some sense selfish? How do we know when we are helping others? What is charity, or philanthropy, and what role does it play in a functioning democracy? We will spend a good portion of the course on the "effective altruism" movement, which aims to maximize the amount of good that each of us can do. How are calculations about "effectiveness" made? How do we identify the causes that are most important to prioritize? How does the EA movement relate to activism? More importantly, who are effective altruists, and how do they live their lives? We will read stories of people who have risked their lives to provide healthcare in the midst of war, people who have donated kidneys to strangers, people who adopted over 20 children, and many other examples that illustrate (or not!) different ways of being altruistic. The ultimate goal of this course is to think about what it means to help not just theoretically, but also in practice.

Politics: Theory and Practice (216186)

P. MacKenzie Bok

2021 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

As the United States begins a new presidency, both the continuing global pandemic and the recent assault on the U.S. Capitol cast long shadows over the immediate political future. This course seeks to connect political theory to practice by asking how conceptual arguments about politics are reflected, transformed, or rejected in the experience of political practitioners. The class is structured as a series of two-week modules: one week focused on understanding the arguments of political theorists about a topic, then a second week focused on a relevant case at the state or local level, with political actors participating as guest speakers. Final papers will connect theory to practical politics in which students are engaged.

Elections in a Time of Democratic Stress: America's 2020 Choice in Comparative Perspective (216265)

E. J. Dionne

2020 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

It's rare to be certain that a given election will be seen as historic. The 2020 contest in the United States is that rare election. This seminar will focus on the choice in 2020, the meaning of the Trump presidency, the nature of polarization in the United States, the proper understanding of populism, and the coronavirus pandemic as a transformative event. It will also place the American election in a comparative context, examining the democratic distemper in other nations. We'll be discussing politics in Britain, France, Germany, the Iberian Peninsula, and Eastern Europe. This class is open to all students, but a preference will be given to Social Studies concentrators.

What assumptions about human beings underlie the conviction that development and modernization constitute progress, that the developed West points the way for the rest of the world? Does economic growth involve a package that necessarily changes the society, the polity, and the culture along with the economy? This tutorial provides a framework for thinking about these questions, both in the context of the West, and in the context of the Third World. This is a junior tutorial.

Law and American Society (121345)

Terry Aladjem

2021 Spring (4 Credits)

Schedule:

R 0300 PM - 0500 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

The course examines law as a vehicle of political conflict and a defining force in American society in four dimensions: 1.) as it establishes individual rights, liberties, and limits of toleration; 2.) as it attempts to resolve differences among competing constituencies; 3.) as it sets out terms of punishment and social control having effects on race and class, and 4.) as a source of informing images and ideological meaning. We will examine these themes from their historical roots and their constitutional and theoretical origins, to their manifestations in our current political debates. We will take up issues at the level of jurisprudence or political theory, but also as they arise or are settled in legal cases by the courts—cases in which racial or gender equality are at stake, religious or sexual freedom, cases in which the nature and content of political speech are questioned, cases in which the claims of religious communities seem irreconcilable, cases in which the nature and extent of punishment have been debated and the question of who deserves to be punished decided, and notorious public trials in which the national self-understanding has been shaped. Our aim is to bring theory to bear, and down to earth, in each consideration, (we will read Foucault and also examine prisons and mass incarceration) and since this is an inaugural presidential year in which the constitutional framework for our democracy has been tested, the issues being raised accordingly will be much on our minds. This is a junior tutorial.

Art, Political Culture, and Civic Life (116288)

Kiku Adatto

2020 Fall (4 Credits)

Schedule:

T 0345 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

10

The seminar explores the interplay of the arts, political culture, and civic life. It will draw on studies in art, history, political philosophy, literature, sociology, and photography. Among the questions we will address

are: How is historical memory constructed, and what are the competing forces that shape it? What is the significance of public apologies, and does solidarity create moral responsibilities for historical injustices? How is cultural domination exerted, and how is it resisted? In what ways does rhetoric shape politics, and what role does it play in national narratives? Why does the contest to control images loom so large in politics, the media, and in our everyday lives? This is a junior tutorial.

Globalization and the Nation State (125982)

Nicolas Prevelakis

2020 Fall (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

Despite globalization, the nation is still a major actor in today's world. This course tries to understand why this is so by examining the role that nationalism plays in peoples' identities and the effects of globalization on nations and nation-states. It includes theoretical texts, but also case studies from the recent rise of populism and authoritarianism, the role of supranational entities such as the European Union, and the urgency of global issues such as climate change, inequality, and migration. Examples from the United States, Europe, Latin America, China, and the Middle East. This is a junior tutorial.

Justice and Reconciliation after Mass Violence (128057)

Jonathan Hansen

2021 Spring (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This seminar examines the problem of justice and reconciliation after mass violence: How does a nation sundered by genocide, civil war, or gross human rights violations reestablish the social trust and civic consciousness required of individual and collective flourishing? What is the proper balance between individual and collective responsibility? What is the role of trials, truth commissions, and apology in civil reconciliation? How do specific types of mass violence influence outcomes? What makes some reconciliations successful, others less so? The course engages these and other questions from historical and contemporary perspectives, exploring the legacy of mass violence going back centuries, while examining reconciliation projects across cultures, countries, and continents.

This course comprises three units: 1) a typology of mass violence (civil war, genocide, state repression, for instance) and historical responses; 2) case studies of the U.S. Civil War (and its continuing legacy), the Spanish Civil War, and the Rwandan genocide; and 3) a research and writing workshop emphasizing students own work. The goal of the course is to introduce students to the literature of mass violence from an interdisciplinary perspective (including but not limited to historical, sociological, and anthropological approaches), ultimately launching students on their own research projects. This is a junior tutorial.

The Critical Theory of the Frankfurt School (156263)

Charles Clavey

2021 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course examines the distinctive critical theory created by members of the Institute for Social Research—better known as the Frankfurt School—from its origins in the interwar era to the present day. Over these decades, critical theory has used tools from philosophy, psychology, and sociology to grasp the pathologies of the present and to chart a path towards emancipation in the future. We will reconstruct the Frankfurt School's evolving theory through its connections to the most important themes of twentieth-century thought: capitalism, authoritarianism, individuality, bureaucracy, and alienation. Our goal is not only to gain a deep understanding of critical theory but also to assess its continued relevance to modern social and political thought. This is a junior tutorial.

Media, Power, and Resistance (205458)

Ieva Jusionyte

2020 Fall (4 Credits)

Schedule:

W 0900 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

Media and power are inextricably linked. On the one hand, mass forms of communication, such as national television and mainstream dailies, have long been circulating hegemonic discourses and given legitimacy to state projects and official ideologies. On the other hand, nicknamed the "Fourth Estate," news organizations have also acted as watchdogs, monitoring the performance of the government and holding it accountable to the people. Today's diversified and loosely regulated media landscape has destabilized and complicated this dual role of news organizations in reproducing existing power relations and providing a forum in which citizens can critically discuss public matters. The course draws on social theory and ethnographic research with various forms of media (from print newspapers to online memes, from public radio to "deep fakes") to raise questions about political agency and trace its limits as well as possibilities through multiple public spheres that are both more participatory and more fractured than ever before. This is a junior tutorial.

Reimagining Populism (205480)

Angela Maione

2020 Fall (4 Credits)

Schedule:

M 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Who represents the people and on what basis? What role do the people play in creating, sustaining, or destroying democracy? Who is the most appropriate agent for democratic change: the masses, the working class, the peasantry, or the citizens of a representative democratic state? These questions are currently vibrantly debated by contemporary scholars who issue warnings that come out of fear of mob rule (ochlocracy), expert rule, or fear of the people themselves. Is some form of populism necessary to democracy or is it always a sign of its demise?

This class will first explore different contemporary views, including anti-democratic, democratic, and left populisms. We will give attention to the increasing place of socio-economics in these discussions. In order to deepen our understanding of the questions these current positions raise, we will then return to key texts in the history of social and political thought. Readings include selections from Hannah Arendt, Niccolò Machiavelli, Jean-Jacques Rousseau, Karl Marx, Rosa Luxemburg, and Franz Fanon. This is a junior tutorial.

Language, Culture, Power and the Making of Europe (207902)

Andrew Brandel

2021 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

How do the languages we use shape our thinking? And how do our ideas about how language works intersect with issues of race, gender, and class? This course is an introduction to key debates in the social scientific study of language as a social, cultural, and political phenomenon.

Our readings focus on a range of contexts and issues unfolding across Europe – from colonial practices of language documentation and translation to discourses of bilingualism and code-switching, from "migrant" literature to public debates about the roots of national identity. At the same time, we will explore how the study of language itself has historically contributed to the creation and maintenance of the idea of "Europe" in the first place, both in the way it narrates the history of and relationships between languages, and in describing their differing capacities. Tracing this story will in turn require that we ask how European ideas about language have been naturalized in the social sciences, and what kinds of alternatives have emerged to challenge this hegemony. Instead of treating language as a separate domain of research, therefore, we will see how language helps constitute the social and political worlds in which we live, as well as how our ideas about language reflect and produce a variety of normative assumptions. This is a junior tutorial.

10

Drawing on the resources of social and intellectual history, political theory, and social science, this tutorial will explore the intimacies and differences between two forms of social differentiation: caste in India and race in the United States. We will focus, in particular, on the relationships between caste, race, and imperial power; the diagnoses of and forms of democratic resistance to caste and race subjugation that were articulated in the 19th and 20th centuries; and the place of contemporary social science in documenting both the persistence of oppression along caste and racial lines and the success of efforts to combat such oppression. This is a junior tutorial.

Race and Ethnicity in the United States (213256)

Christina Ciocca Eller

2021 Spring (4 Credits)

Schedule:

T 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

The United States is more racially and ethnically diverse than at any point in its history. Yet racial and ethnic social categories remain persistent sources of inequality in American society. This tutorial will interrogate the relationships between race, ethnicity, and inequality, examining theoretical and empirical approaches across multiple social domains. It particularly will emphasize how race and ethnicity structure experiences, opportunities, and outcomes in important social contexts such as neighborhoods, educational institutions, and the labor market, among others. This is a junior tutorial.

Human Rights in History (213298)

Justin Reynolds

2021 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

Human rights have become the dominant moral language of our day. When, and how, did they first emerge as an operative system of moral and political belief, and how can their history inform an understanding of contemporary politics and society? Focusing on European, American, and global contexts, this course explores the history of ideas and practices of human rights from the 18th century to the present. This is a junior tutorial.

The Many Faces of Tyranny (213280)

Rosemarie Wagner

2020 Fall (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course explores the way tyranny has been presented in different times and places and the many ways tyranny can create unfreedom. From a wild man out of control, to a carefully orchestrated system of control, tyranny wears many faces. This course begins with Plato's tyrant who rises from the rubble of a failed democracy, through early modern defenses of Regicide, to modern accounts of the tyranny of the majority, empire, and structural oppression. Through this course we will examine what a tyrannical nature is, what makes it rise to power, and what can be done to stop it. This is a junior tutorial.

Capitalism, Time, and Value (213266)

Tracey Rosen

2021 Spring (4 Credits)

Schedule:

R 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

College students are often counseled to "make the most valuable use of their time." The "budgeting" of hours, days, and weeks of a semester often rests on an evaluation of how much time an activity is worth. In this tutorial we will explore how capitalism might shape the way we perceive, understand, and value time. We start from the premise that economic systems do more than organize the production and distribution of goods; they also help organize how we experience the world as well as the meanings and values that shape our actions within it. In order to ground the dynamics of time and value within capitalism, we begin by drawing from anthropological and historical examples to consider the relationship of time and value in a variety of pre-capitalist contexts. The course then considers the way in which capitalist transformations coordinate new forms of value and perceptions of time. We end with an examination of our everyday, contemporary experience of time against the backdrop of "neoliberal" capitalism and the rise of "futures" markets. This is a junior tutorial.

What's the Matter with Inequality? Normative and Empirical Perspectives (216070)

Glory Liu

2020 Fall (4 Credits)

Schedule:

T 0345 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course investigates the diverse ways in which we theorize, study, and talk about economic inequality today. Is inequality wrong because some people have too much, or because others have too little? Or is it wrong simply because some people have more than others? To answer these questions, this course explores prominent social science explanations of the nature, causes, and consequences of economic inequality in the United States alongside normative theories of equality and inequality. We will also investigate the theory and practice of different "solutions" to inequality such as redistribution and "predistribution", philanthropy, and universal basic income. This is a junior tutorial.

The Theory and Practice of Democracy in Developing Countries (216073)

Julie Weaver

2020 Fall (4 Credits)

Schedule:

R 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

What does the practice of democracy look like in developing countries today? How does that practice map on to democratic ideals like representation, participation and accountability? The course will explore these questions through both theoretical and empirical social science research, with cases drawn primarily from Latin America and Sub-Saharan Africa. Topics will include political accountability, state and institutional strength, corruption and clientelism, participatory democracy, managing diversity, and activism and civil society engagement. This is a junior tutorial.

Democracy and Education in America (216172)

Rob Willison

2020 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course is organized around three crucial questions: (1) What does a truly democratic society require of its educational institutions? (2) How well do our current educational institutions—especially our K-12 schools—live up to the standard set by question 1? (3) What approaches, at the level of both pedagogy and policy, should we take to make our school system more democratic? We'll address these questions in conversation with philosophers (like John Dewey, Paolo Freire, and Danielle Allen), cognitive psychologists (like Susan Carey), jurists (like Earl Warren and Thurgood Marshall), and social scientists (like Raj Chetty and Daniel Koretz). This is a junior tutorial.

Innovating Democracy: Designing Public Engagement for the 21st Century (216173)

Sean Gray

2021 Spring (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

This course explores the exciting field of participatory innovations in democratic governance and public policy. Our goal will be to identify proposals that generate effective citizen participation and engagement while addressing pressing public problems. A number of challenges for democracy reform will be considered, including the role of expertise, inattention and misinformation, the tyranny of powerful minorities, political polarization, and rising public distrust and disaffection. Throughout, our discussions will be grounded in an analysis of real-world cases, from elections and criminal justice, to international development and urban planning. This is a junior tutorial.

Sociology

Subject: Sociology

Sociology 90EQ

Research Lab: Equity through Inquiry: Pedagogy, Research, and Capacity Building Strategy Lab (216133)

Flavia Perea

2020 Fall (4 Credits)

Schedule:

T 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

This course will examine the principles and methods of community based, participatory, action, and decolonizing approaches to inquiry. In addition to developing this knowledge and skill-set among students in the course, the purpose of this lab is to design a curriculum to teach this content to undergraduates in tandem with creating a strategy to increase public knowledge and usage of equitable approaches for knowledge generation, meaning making, and social transformation through inquiry.

Together we will engage with various frameworks and systems of knowing and meaning making; how they are centered on, or the extent they intersect with the pursuit of equity and justice; and pragmatic approaches for moving from theory to practice. We will discuss power and privilege, identity and location in the context of research; the promise and limitations of engaged inquiry to help advance social change; and the ethics of inquiry with historically and systemically oppressed people and communities. We will discuss epistemology, research paradigms, and explore a variety of approaches, including Participatory Action Research/PAR, Community Based Participatory Research/CBPR, citizen science, and indigenous approaches to research. We will examine how different approaches for asking questions, methods for gathering and analyzing information, and sharing knowledge, as well as the principles, truths, and worldviews that undergird different approaches, can be applied in diverse contexts. Learning from and critical engagement with voices and perspectives from beyond the academy, in particular those excluded from academic scholarship, will be central to our work. Ultimately, we will critically examine how inquiry that emphasizes equity, collaboration, and reciprocity in the uncovering, integration, application and dissemination of knowledge can be a tool of liberation and certain methods a strategy for responding to oppression, colonization, and systems of domination.

Research Lab: Immigration (207118)

Leah Muse-Orlinoff

2021 Spring (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

8

What does it mean to be a "good" immigrant? Is current media attention on immigration perpetuating an image of "deserving" and "undeserving" immigrants? How is coverage of immigrants' race, gender and sexuality, and human capital evolving in the current political context? And what implications for immigrant

integration – the two-way process by which immigrants and their communities of settlement interact and adjust to one another – might be emerging from the media's depiction of immigrants and immigration policy?

In this research lab students will learn data collection and analysis skills that will help them answer these and related questions. Course content will include a robust research design and methodology component through its focus on media coverage of immigration and integration in mainstream and ethnic media. Course participants will develop qualitative research projects that analyze key sociological themes including race and ethnicity, gender and sexuality, and human capital. Students will learn how to formulate sociological research questions and hypotheses, collect and analyze data, and articulate findings in a formal academic proposal. This course is limited to sociology concentrators; bilingual students are encouraged to enroll.

Course Notes:

Limited to Sociology concentrators. Preference given to those who have taken Sociology 128.

Research Lab: Inequality (214610)

Xiang Zhou

2021 Spring (4 Credits)

Schedule:

R 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

8

This course introduces students to quantitative research on social and economic inequalities. By analyzing data from National Longitudinal Surveys of Youth, 1997 cohort (NLSY97), we investigate educational inequality, labor market inequality, and intergenerational mobility in contemporary America. In the context of these topics, students will build skills in data analysis and data visualization in R and learn a variety of quantitative methods including regression modeling, path analysis, and causal inference.

Tutorial in Sociological Theory (115130)

Shai Dromi

2020 Fall (4 Credits)

Schedule:

T 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course introduces students to the complicated, conflictual, and often contradictory theoretical origins of sociology as a discipline. We begin by reading the standard sociological "canon"—Marx, Weber, and Durkheim—and interrogating why their ideas were canonized over others. We then read scholars who have been historically "written out" of the social sciences to evaluate their important, yet historically underappreciated, contributions. By the end of the course, students should (1) master key concepts in classical sociological thought, (2) understand what it means to theorize, and what makes for good theory, and (3) learn to critically interrogate the relationship between power, standpoint, and the production of knowledge.

Course Notes:

Required of concentrators, ordinarily sophomores, and secondary concentrators.

Class Notes:

This course will be taught with one lecture and one section per week.

Sociology 98AC

Junior Tutorial: The Future of Work (215924)

Hilary Holbrow

2020 Fall (4 Credits)

Schedule: T -**Instructor Permissions:** Instructor**Enrollment Cap:** 10

The 21st century has brought dramatic changes to the world of work. The traditional, full-time employment relationship is in decline. New ways of organizing work are on the rise, with more people working as independent contractors or using gigs to get by. Technology is changing the nature of jobs, as workers can collaborate remotely and delegate complex tasks to computers. And employers face growing demand for diversity, inclusion, and accountability when it comes to discrimination and harassment. In the midst of the major transitions already taking place, Covid-19 has forced organizations—from corporations to schools to healthcare providers—to radically rethink when, where, and how work is performed.

These changes bring new challenges, both for individual workers and for social policy. How does a single mother manage childcare when an algorithm assigns her to shifts that change weekly? How do gig workers juggle multiple jobs across digital platforms to make ends meet? How can we provide benefits to people who work 40 hours a week but do not have a regular employer? How can employers control their workers from a distance—and should they?

The tutorial will guide students in the development of an empirical research paper on a topic of their choosing that addresses the changing world of work. Topics may include gender and race in the workplace, automation and the machine-human interface, experiences of empowerment or precarity in gig work, new labor movements, and policy responses such as universal basic income. Through in-class workshops, we will develop research questions and formulate practical research designs. We will explore qualitative research methods, including interviews and observation, and learn to conduct online survey experiments. Throughout, we will refine our understanding of the world of work and how workers, employers, social movements, and policymakers are responding to new challenges.

Course Notes:

Required of and limited to Sociology concentrators.

Junior Tutorial: Ethnography of Social Movements in a Digital World (212755)

Vivian Shaw

2021 Spring (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

How do activists organize during a pandemic when social distancing is paramount? How have social movements changed alongside the evolution of social media? This tutorial explores the craft of digital ethnography through the theme of social movements. The COVID-19 pandemic has fundamentally altered the terrain of immersive research, forcing researchers to rapidly adjust to digital methods for collecting and analyzing data. In this course, we will read "traditional" ethnographies on social movements and related topics alongside more recent and experimental digital ethnographies, using these as models for understanding ethnographic fieldwork and analysis. As a junior tutorial, your research interests will serve as a foundation for the class. You will each complete an independent research project on some aspect of social movements, employing in-depth interviews and/or ethnographic methods. Through in-class workshops, we will formulate research questions and practical research design. The goal of this course is to provide you with the opportunity to conduct original research and to better understand the insights and challenges of ethnographic fieldwork.

The course will begin with a review of some of the key debates on social movements within sociology. You will then design and complete your own ethnographic research projects, engaging with the key methodological questions raised throughout the course. The course will cover the various steps of the research process, from formulating a research question through collecting and analyzing data and reviewing existing literature, to constructing the final paper. As we compare "traditional" and digital ethnographies, we will explore the opportunities and limits of conducting fieldwork online. We will also discuss the logistics of conducting ethnographic fieldwork, including contacting groups, gaining access, and recording data.

Sociology 98SF

Junior Tutorial: Visual Culture and the Sociological Imagination (216107)

Hilary Holbrow

2020 Fall (4 Credits)

Schedule:

R -

Instructor Permissions: Instructor

Enrollment Cap:

10

As we buy groceries, peruse social media platforms, participate in protests, relax at home, travel, and otherwise go about our lives, we are bombarded with images. Billboards, family photographs, TikTok videos, feature-length films, graffiti, murals, monuments, architecture, street signs, protest posters, masks, MAGA hats, and graphic T-shirts, among many other visual stimuli, communicate diverse and potentially conflicting messages to us about what our society values, what it abhors, who constitute its heroes and enemies, what binds its members together, what they have been through, and to what they aspire. "Visual culture" refers to these various types of images that express shared meanings in a society. In this tutorial, we will examine visual culture from a sociological perspective. Who produces visual culture, how, and why? How do images become icons, taking on symbolic meaning for large groups of people? To what extent and how do those meanings change over time? How do relations of power and inequality shape the production and dissemination of visual culture? Why do people perceive bodies and spaces in the ways that they do, and with what consequences? How do relations of seeing and being seen (re)produce power asymmetries?

In class, we will cover a range of topics pertaining to visual culture, including the making of cultural icons, their dismantling through acts of iconoclasm, the surveillance of people and spaces through visual technologies, racialized and gendered politics of representation, modes of producing and distributing visual culture, and more. Students will also learn the fundamentals of sociological research, and over the course of the tutorial, they will develop an independent research project about a topic of their choice that pertains to visual culture. Through a series of assignments and workshops, they will choose a research question, situate it in scholarly literature, develop a research design, and use either ethnographic, interview-based, or archival methods to gather original data. Those who choose ethnographic projects will have the option of supplementing traditional hand-written textual fieldnotes with alternative visual note-taking strategies, such as photography and sketching. Ethnographic projects involving participation in the production of visual culture are also welcomed. Students will present their research findings in oral and written form.

Junior Tutorial: Poverty (213641)

Danilo Mandic

2021 Spring (4 Credits)

Schedule:

W 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

Nearly one in three residents of the United States lives close to the poverty line, and a growing number of us live in deep poverty, subsisting on less than \$2 per day. This course examines the social world of poverty in the United States today. It pays particular attention to the lived experiences of low-income people. It also examines the parallel set of institutions low-income people must navigate—institutions that often perpetuate poverty: low-wage jobs, systems of policing and surveillance, substandard schools and colleges, exploitative housing, and predatory financial services. During the semester, students will conduct an extended research project about some aspect of poverty in the United States. The project will be a chance to hone important research skills, including conducting interviews and taking ethnographic fieldnotes, analyzing and presenting qualitative data, figuring out the "so what?" behind empirical findings, and thoughtfully giving and receiving peer feedback.

Models of Social Science Research (117560)

David Pedulla

2021 Spring (4 Credits)

Schedule: TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap: n/a

This course introduces students to core methodological concepts and strategies used in social science research including: research design, sampling and measurement, experiments, survey analysis, content analysis, network analysis, ethnography, and interviewing. Throughout the course we will develop the analytical skills necessary to interrogate epistemological assumptions in published social science research specifically and truth-claims generally. In addition to critically evaluating previous research, students will collect and analyze data using the different methods discussed in class. By the end of the course, students should have acquired valuable research skills widely applicable in academic and professional settings.

Course Notes:

Required of concentrators, ordinarily sophomores, and secondary concentrators.

Sociology 1024

Social Inequality (117584)

Jonathan Mijs

2021 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is an introduction into the sociological study of Social Inequality. Students will learn about sociological theories and read empirical research describing how social inequality is produced and reproduced in various institutions (e.g. the family, neighborhood and labor market) and through different mechanisms (e.g. socialization, segregation, discrimination). We will explore what it would take to address these different sources of social inequality in America, and learn from comparisons with other countries and historical moments.

Course Notes:

May be counted for introductory concentration requirement, if letter-graded.

Class Notes:

The first course will be held Wednesday, January 27th. There will be no course on Monday, January 25th.

The Sociology of Organizations (113256)

Frank Dobbin

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course examines the evolution of the modern organization, focusing on changing approaches to corporate strategy and to managing employees. We read both social scientific analyses and Harvard Business School cases to trace the history of management, from the harsh principles of the "drive system" to the latest theories of how "work teams" improve productivity and how focusing on a firm's "core competence" improves the bottom line. The course covers research examining the efficiency and the equity of current corporate practice

Global Social Change (109657)

Rachel Meyer

2020 Fall (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

36

This course explores the development of global capitalism with a focus on changing relationships between markets, states, and civil societies. Questions of power and inequality will be central to our approach. We will begin from a macro political economy perspective, exploring global social change through the lens of world-system theory, neoliberalism, deindustrialization, and "flexible accumulation." We will then examine resistance to global capitalism in local contexts around the globe. We will explore a variety of mobilizations in civil society, including transnational activism, student movements, and precarious workers' mobilizations. The course will culminate with a unit on contemporary social movements and social change where we will pay particular attention to recent events: the Black Lives Matter movement, COVID-19 and essential workers, and teacher strikes. Finally, we will take up the question of the relevance of social media to protests and social change. Throughout the course we will ask: How are social relations shaped by capitalist development in different contexts? Under what circumstances does civil society resist markets and states? And how can we conceptualize the different forms of resistance and their significance? We will explore the possibilities for and limitations on social change around the globe through a variety of cases of transnational and community-based activism.

Sociology of Law (212660)

Yael Berda

Talia Shiff

2020 Fall (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Law has a social life. Actually, it has multiple social lives. First, law is itself the product of social forces. It is shaped by what people fight about, what is taken for granted, and what can and cannot be said. But law is also an institution that makes other social institutions possible. From contracts to borders, citizenship to marriage, law consists of concepts and categories, institutions and processes that create social forms and enforce the rules of multiple games. As we will see this semester, law is both the outcome and the starting point of many social processes, it tells us both the history and the perceived future of a social phenomenon. Even before its inception within the legal structure of mandate Palestine in 1948, Israeli law, broadly defined, has been a site for social controversy and contestation. Issues of citizenship and land ownership, geographical borders and international law, the role of the religion in private and public life, questions of historical legacies from the Ottoman and British empires as well as Hebrew and Muslim law all provide powerful case studies for sociologists of law. We will use these issues in Israel as a comparative vantage point to learn to use our sociological imagination to identify, analyze and explain these social phenomena using law and society scholarship.

Environment and Inequality (212756)

Vivian Shaw

2021 Spring (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

How does your zip code affect your health? What are the social and political consequences to building a dam? What are the economic and political foundations underlying racial disparities in sickness and mortality during the COVID-19 pandemic? This seminar explores environmental issues through the lens of inequality, focusing particularly on race, indigeneity, gender, and (dis)ability. We will look at case studies across the globe such as toxic disasters in Bhopal, India, to the Grenfell Tower fire in London, UK, Standing Rock, in the United States, and the present global pandemic. While learning about the transnational and

comparative-historical scope of environmental issues, students will apply key theoretical tools to situate course topics within broader themes, including cultural memory, popular culture, violence, and governmentality. Students will also develop an expertise in a course-related topic of their choice.

Sociology of Higher Education (203333)

Manja Klemencic

2020 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This undergraduate seminar explores modern higher education systems, institutions and student experiences of higher education through sociological lenses. We read the seminal works and concepts from the seven domains of inquiry in sociology of higher education: college impact, study of inequalities, universities and colleges as organizations, academic profession, higher education politics, higher education culture and student agency and impact in higher education. We analyze some of the major questions and controversies in contemporary higher education – What are the implications of COVID-19 pandemic for higher education? Is college worth the cost? Why does higher education cost so much? How is higher education industry changing globally? Is higher education the Great Equalizer? We also look backstage to student experiences at Harvard. This is a research-intensive seminar. With personalized advising from the instructor each student conducts independent (conceptual or empirical) research leading to a capstone paper. This course offers opportunities to gain perspectives into established and emerging areas of research into higher education and insights into today's changing higher education landscape at Harvard, in the United States and across the world.

Humanitarian Activism and Civil Society (203440)

Shai Dromi

Cristina Lacomba

2020 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

When global crises strike, humanitarian nongovernmental organizations – NGOs – spring to action, offering

emergency medical services, basic necessities, expertise, and innovation to affected communities around the world. Yet COVID-19 brings unprecedented challenges—and unprecedented opportunities—to humanitarian endeavors. Humanitarian workers are now working globally to distribute personal protection equipment in disadvantaged communities, trace the spread of coronavirus in countries with sparse public health resources, support countries with weakened hospital systems, and advocate for an equitable distribution of a future vaccine.

This course provides a comprehensive view of humanitarian organizations and activism from a sociological perspective. We will examine the origins of organized humanitarian activism and the dilemmas and challenges that NGOs face. We will investigate the consequences, justifications, and limitations of humanitarian work. COVID-19 will be a central study case for us, and we will also look at case studies from the Kosovo War, the Nigerian Civil War, and the 2004 Indian Ocean Tsunami. Students will be assigned specific regions to research over the course, and will create visual representations of the conditions and humanitarian activities in their assigned region. The course will include a virtual "hackathon" with the Bok Center's Learning Lab Studio where students will learn visual media skills for this purpose.

Sociology 1113

Latinx Identity and Mobilization (211161)

Cristina Lacomba

2021 Spring (4 Credits)

Schedule:

W 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course examines Latinx identity and mobilization from a sociological perspective. It begins by investigating the complexity of the Latinx identity in the United States. Does Latinx refer to a culture that encompasses many cultures, a common geographical origin, a shared linguistic identification, some or all the former? How does the use of pan-ethnic identities, of which Latinx is a representation, shape power, representation, and inequalities within and between social groups? The course will first focus on sociological theory of ethnic identity construction. Students are then asked to apply their newfound understanding of the Latinx identity to an analysis of Latinxs' mobilization and social movement activism. What socio-political issues undergird Latinxs' mobilization in modern times? How well does social movement theory explain Latinx mobilization? The course discusses the formation of Latinx identities and mobilizations of Caribbean, Northern, Central, and South American people/s in the United States.

Sociology 1121

Understanding Meritocracy (212827)

Jonathan Mijs

2020 Fall (4 Credits)

Schedule:

R 0945 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

10

Some hold inequalities to be the result of a fair "meritocratic" race that is decided by hard work and effort alone. Others believe the race is fixed: some of us, because of their gender, color of skin, or their parents' resources have a much better shot at winning than do others. This course challenges students to critically evaluate the concept of meritocracy, its origins and contemporary adoption as an ideal worth striving for. Taking a sociological perspective, we ask what a true meritocracy would look like, what its societal implications would be, and what social processes may stand in its way. We then review the empirical record describing people's various perceptions and explanations of social inequality, and we explore the factors underlying their beliefs. Specifically, what are the psychological underpinnings of people's beliefs about inequality and what role does culture play? Are people's beliefs most impacted by news reporting, by facts or by experience? We conclude by exploring how beliefs about inequality are mobilized in class and racial conflict, and explore in what ways people's beliefs are or aren't likely to change.

Sociology 1124

Immigration and Gender (213351)

Talia Shiff

2020 Fall (4 Credits)

Schedule:

M 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The study of immigration and the study of gender often do not intersect. This is despite the fact that scholars in both fields of study focus on questions concerning cultural membership and equal citizenship and the processes that produce social inequality. The goal of this course is to reinvigorate the linkages between gender and immigration. We will interrogate how gender, as it intersects with race, shapes practices and policies of im/migration and migrants' lived experiences: what is the gendered character of migration patterns, and policies? How does migration occur on a voluntary and involuntary basis in ways that disproportionately disadvantage marginalized groups along lines of gender and race? And conversely, in what ways do the practices and consequences of immigration and transnationalism shape and constitute gender relations? The course will combine discussions of current issues on public media and news articles with academic analyses to encourage students to think about the complex interrelations between immigration, sexuality, gender and race, and the ways these shape our social world.

2021 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

What are the virtuous capacities of mass-delivery information technologies? How do they help the world become a better place? Do they present potential threats to individuals and the societies in which they live? Through select theoretical work in sociology, we will reflect upon those questions and apply that knowledge to the world we know. To illustrate these theories, we will resort to past and current examples of the use of the media and new technologies. The course will explore how the media helps uncover injustices, such as police brutality, and generates social mobilization. It will also cover how the media produces political propaganda and provides space for virtual (online) communities. For instance, the course will explore both top-down and ground-up approaches, examples of which are how the United Nations uses new technologies to promote its political agenda or how individuals join online blogs in search of identity and community. The semester will begin with the study of older media outlets, such as newspapers, televisions, and the internet, and move onto newer social media technologies such as Facebook, Twitter, and Instagram. The class will include the topics of gender, race and ethnicity, inequality, and collective identity in the socio-political and cultural terrains.

This course is apt for undergraduates interested in communication, culture, and politics.

Student Leadership and Service in Higher Education (205039)

Manja Klemencic

2021 Spring (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

This Undergraduate Engaged Scholarship Course specifically targets students in service and leadership roles at Harvard (e.g. student leaders in student organizations, students serving on University committees or as interns in University offices or programs, PAFs, HOCOs, UC members, Crimson, etc.). To these students it offers an opportunity to engage with scholarship from sociology of higher education to better understand and explore student agency in college contexts. Through hands-on student leadership development workshops built into the course, students will also develop skills that will help them in their roles. Students' grasp of concepts, such as university citizenship, mattering, belonging, community-building, and self-formation, is reinforced through their experiential learning in existing service and leadership roles on campus. Based on their campus role, students work on participatory action research and develop blueprint to change practice or policy. This course challenges the traditional line of inquiry in sociology of higher education which focuses primarily on the effects of college on students. Instead, student action research projects demonstrate student agency and the impact students have on higher education communities.

Philanthropy and the Nonprofit Sector (203368)

Shai Dromi

2021 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

50

When crises strike, nonprofit organizations spring to action, offering their resources, expertise, and innovation to affected communities. Yet COVID-19 brings unprecedented challenges—and unprecedented opportunities—to philanthropic endeavors. Indeed, aside from supporting medical research on COVID-19, nonprofit organizations have been providing medical care, distributing personal protective equipment (PPE), helping address loss of employment and food insecurity, and advocating for global equity in vaccine distribution, among other tasks.

This course partners with the Lemann Program on Creativity and Entrepreneurship (LPCE) in order to provide students with a unique opportunity to experience first-hand how philanthropists and nonprofit organizations are helping address the global effects of this global pandemic. On the theoretical side, the course will examine the workings of philanthropy and of nonprofit organizations, using different sociological perspectives and a series of case studies. Alongside the theoretical content, students will form groups and will develop their own nonprofit ventures to address the social impact of COVID-19. Student ventures will receive startup seed funding and, at the end of the course, will compete over additional seed money. The course will include a series of guest lectures and workshops on entrepreneurship to support student venture development.

Global and Transnational Sociology (213352)

Talia Shiff

2021 Spring (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

15

This course explores the production of social inequality from a global and transnational lens. The course is based on the premise that we have to think about core issues concerning unequal access to rights, resources and cultural membership globally while at the same time not denying the importance and centrality of the unit of the nation state. In this course, students will not only compare differences across countries but will also develop tools by which to critically think about what it means to see the world as a unit that is populated by markets, movements and networks that transcend national boundaries. We will ask how the national and transnational are interrelated and mutually constitutive of each other. Students will have the opportunity to explore questions concerning borders and boundaries, forced migration, and changes in the relations between civil societies, states and markets. Through considering these topics of global social change, students will critically investigate the limits and potential of establishing a global sociology for understanding social relations at local, national, and international scales.

War, Revolution, and Organized Crime: In Film, and in Reality (159926)

Danilo Mandic

2020 Fall (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course explores war, revolution and organized crime as interrelated social phenomena. Students will read sociologists, historians, political scientists and philosophers addressing the nature, causes and consequences of these phenomena in different national and historical contexts. The course will combine influential theoretical frameworks (by Karl Marx, Max Weber, Sigmund Freud, Hannah Arendt), middle-range social scientific approaches (by Anthony Giddens, Charles Tilly, Michael Mann, Theda Skocpol), and empirical and historical analyses (by Eric Hobsbawm, Benedict Anderson, James C. Scott, Eugen Weber). The three phenomena will further be scrutinized through their (mis)representation in movies by Mike Nichols, Milos Forman, Bernardo Bertolucci and others.

Political Sociology (215965)

Rachel Meyer

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is about political power: who has it, how it is used, and how it can change over time. The course begins by outlining key concepts and theories along with an examination of political power in the neoliberal state. What does democracy, public policy, and political participation look like in this neoliberal context? We will then move on to explore how power operates through state institutions with an analysis of both the welfare state and the carceral state. Should the welfare state be understood as a method of redistribution or of social control? How can we think about the relationship between the carceral state and power in civil society? What can we learn from a comparison of the welfare state and the carceral state? We will compare policies and practices in different contexts while focusing on surveillance of civil society via state institutions. Our final unit is about contesting state policies, institutions, and structures. We will take up the cases of welfare rights organizing and the Black Lives Matter movement, along with the contemporary emergence of both 'right' and 'left' populist movements. We will end with attention to the particularities and possibilities of local-level politics in terms contestation, civil society, and grassroots political power. The focus of the course is on the United States while at the same time using a comparative sociological perspective to examine political power in a variety of national, historical, and cultural contexts. Underlying our analyses will be comparisons with "real utopias" (Wright 2010)—alternative, prefigurative models of state institutions and political power.

The Israeli/Palestinian Conflict: Contemporary Socio-Legal Aspects (212817)

Tally Amir

2021 Spring (4 Credits)

Schedule:

R 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The decades-long Israeli-Palestinian conflict has attracted significant international attention and is perceived as an international threat. This seminar offers a nuanced and safe discussion of the conflict's socio-legal context and its implications for Palestinian and Israeli society, through exploring the works of scholars from diverse backgrounds and views. We will take a closer look at some of the main controversies, and how these impact the lived experiences of people in both societies, including Israel's control over and settlements in the West Bank; the separation wall and policy; concepts of citizenship, migration and refugeehood; Palestinian and Israeli statehood; and more. Readings for the course include court decisions, international law instruments, and domestic legislation, as well as sociological analyses.

Contemporary Chinese Society (116219)

Ya-Wen Lei

2020 Fall (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

48

Situating China in the context of the transition from socialism, this seminar provides an overview of contemporary Chinese society. We will explore recent structural changes in China's economy, political system, legal institutions, media, family forms, education, stratification and inequality, and contests over space—as well as how all these various changes interact with one another. We will begin with the Chinese Communist Revolution and then the Cultural Revolution as crucial historical context, and then move on to examine the profound social transformations of the post-1978 reform period. The course will examine how these changes have impacted social relations, how they have been experienced and understood by individuals, and how, in turn, the responses of individuals have also shaped the trajectory of reforms.

Sociology of Asian America (212728)

Vivian Shaw

2020 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Today, over 22 million people living in the United States identify as Asian. Asian Americans and Pacific Islanders (AAPI) are one of the fastest growing populations in the US. What are the social, cultural, and political structures that shape the lives of AAPI? How have the experiences of AAPI changed from the nineteenth century to the present? This course takes a sociological view to examine "Asian America." Rather than analyzing AAPI as a monolithic group, this course explores the diversity of experiences and histories within Asian America. Through readings on a range of case studies, we will examine Asian America through important historical and social phenomena such as colonialism, environmental racism, war, migration, and social movements. We will look at the ways that AAPI have been socially and politically constructed as a racial group and the ways that such categorizations continue to shift. Finally, we will consider contemporary debates about AAPI that are particularly alive here at Harvard, such as affirmative action, socioeconomic mobility, and social justice.

Conflict, Justice, and Healing (212659)

Matthew Lee

2020 Fall (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Serious crime and other forms of conflict are experienced as a traumatic violation. This is to be avoided at all costs. And yet... some survivors experience surprising levels of resilience, a renewed sense of meaning and purpose, empowerment, and post-traumatic growth. Some offenders turn towards a deeper sense of truth and existential responsibility. Some communities transcend institutionalized patterns of dehumanization and violence to embrace the challenging path of forgiveness, reconciliation, healing, and inclusive flourishing. When and how do individuals and communities heal after conflict? We engage with these issues through a series of diverse case studies, including contemporary examples drawn from the international Black Lives Matter movement, prisoner reintegration efforts in the U.S., victim/offender dialog in the Middle East, and embodied emancipation in post-apartheid South Africa, as well as classic cases such as the Cuban Missile Crisis. A critical engagement with the emerging fields of conflict transformation and positive criminology reveals potential restorative pathways to individual and communal well-being, and ultimately harm prevention. A growing body of empirical research on the social conditions and processes that give rise to these outcomes will also help us explore such timeless questions as: What is justice? How can "enemies" reconcile? What is the good life?

Sociology 1153

Subcultures (213536)

Cristina Lacomba

2020 Fall (4 Credits)

Schedule:

W 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

10

What does subculture mean? Who participates in subcultures and why? What is society's reaction to subcultural mobilization? How do new technologies and the media shape subcultures? This course will mainly draw from sociological theory of culture to examine a variety of national and international subcultural movements around the world. The course also draws from literature on media and cultural studies to provide a further understanding of how subcultural movements arise and evolve. We will analyze different types of subcultures under the lens of class, gender, and race in music, arts, and style movements. Examples include but are not limited to hippies and hipsters, mods, pin-ups, lolitas, or French zazous, rastafarians, pachucos, and hip-hop. The course will explore these forms of identity through theories of resistance, stigma, deviance, fandom and participatory culture among others. The course is of interest to students who want to further their understanding of the relationship between culture, identity, and power.

Gender, Race, and Social Institutions (217831)

Talia Shiff

2021 Spring (4 Credits)

Schedule:

MW 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap:

25

This class offers an introduction to the relationship between race, gender and social institutions. We will interrogate how gendered and racial classifications contribute to the making of law and other core social institutions at the same time that these very institutions reflect and create distinctions on the basis of gender and race. The first part of the course will provide students with a set of sociological tools and approaches by which to critically analyze and breakdown the interrelations between race, gender and law in American society and globally. In the second part of the course, we will examine how core concepts and approaches concerning the interrelations between race, gender and social institutions come to play in the context of immigration and asylum policy, both historically and currently. We will discuss contemporary immigration and human rights issues—such as asylum, "illegal" immigration, reproductive labor, and sex trafficking—with the goal of interrogating how our cultural framings of these issues are shaped by gender, race, and the social and political aspects of law.

Sociology 1171

Crime and Order in the American City (212927)

Robert Sampson

2020 Fall (4 Credits)

Schedule:

M 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

Ideas about crime and social order have generated debates about cities for over a century. After briefly discussing classic theories, we will evaluate contemporary arguments on topics such as racial segregation and neighborhood inequality, immigration, interactions in public space, policing, the great crime decline, and mass incarceration. We will also reflect on how the pandemic of 2020 and protests over criminal justice have changed cities. Students will conduct neighborhood observations both virtually and in person.

Sociology 1180

Law, Science, and Society in America (108974)

Sheila Jasanoff

2021 Spring (4 Credits)

Schedule:

T 0430 PM - 0715 PM

Instructor Permissions: Instructor**Enrollment Cap:**

25

This course explores the tensions, contradictions, and mutual appropriations that characterize the relationship between law, science, and technology in America. It examines how ideas of evidence, expertise, and public reason have changed over the past half-century in response to such phenomena as the rise of the risk society, environmentalism, patient advocacy, and the information revolution. Law is broadly construed to include the activities of legislatures, regulatory agencies, and courts. The course seeks to contextualize the interactions of law, science, and technology in relation to wider transformations in US culture and society.

Course Notes:

Offered jointly with the Kennedy School as IGA-516.

Class Notes:

Also offered through HKS as IGA516

Refugees in Global Perspective (203272)

Danilo Mandic

2021 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

The recent arrival of refugees at the U.S.'s southern border and into Europe has caught citizens and policy-makers off guard. Yet such forced migration will continue to rock our globalized world in coming decades. Why are there so many refugees? How are they displaced? Where do they travel, and why? This course will inquire into the nature, causes and consequences of contemporary refugee waves. Students will survey regional dynamics in the Middle East, Africa, Southeast Asia, Eastern Europe and North America. We will examine the particularities of refugees (compared to other migrants) and the changing nature of forced migration since the Second World War. Students will explore historical precedents to contemporary waves,

learn about different host society approaches to asylum, compare government and criminal mechanisms of forced migration, and examine the reasons refugees are the object of increasing suspicion and hostility around the world. Particular attention will be paid to Central American migration into the U.S., the recent EU crisis, the role of refugee camps in the 21st century, and alternative strategies for global asylum management by bridge and destination countries.

What's Wrong with Mass Incarceration (217829)

Adaner Usmani

2021 Spring (4 Credits)

Schedule:

R 0500 PM - 0700 PM

Instructor Permissions: Instructor

Enrollment Cap:

11

Most academics who think and write about Mass Incarceration do so because we believe it to be wrong. But what exactly is wrong with it? This course canvases the range of answers that social scientists, lawyers, philosophers, and activists have given to that question. It is motivated by our view (to be developed in a forthcoming book) that the most common answers make both logical and empirical errors, and that better answers will require more clarity about facts and more explicit normative reasoning. Our view is still developing, and students will be strongly encouraged to argue against us. The ambition of this course is to help us and to help students—whether aspiring social scientists or budding lawyers—to think more carefully about the relationship between facts and values in discussions of race, class, crime, and punishment.

Course Notes:

This course is capped at 22, with 11 slots reserved for FAS advanced undergrads, preferably those with some background in both philosophy and social science.

This course will be co-taught with Christopher Lews, Assistant Professor of Law at HLS, and will include 11 students from HLS.

Sociology 2202

Intermediate Quantitative Research Methods (119985)

Peter Marsden

2020 Fall (4 Credits)

Schedule:

TR 0900 AM - 1100 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Descriptive and inferential techniques used in quantitative sociological research. Emphasis is on the fundamentals of the linear regression model for continuous response variables, focusing on assumptions and interpretation. Motivation, application, and presentation are stressed; topics include categorical covariates, interactions, and diagnostics. Because the linear regression model is the foundation for more specialized models that are often applied in sociological research, the aim of this course is to develop the skills necessary to (a) understand quantitative sociological research, (b) produce convincing analysis, (c) evaluate quantitative analysis, and (d) learn more specialized techniques as needed.

Course Notes:

Required of, and limited to, first-year graduate students in Sociology

Recommended Prep:

Familiarity with basic statistics.

Ethnographic Fieldwork (213557)

Roberto Gonzales

2021 Spring (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This seminar explores the practice, politics, and poetics of ethnographic fieldwork--the method of immersing oneself into people's daily routines and systematically recording social processes as they unfold in real time. Along with engaging several classic and contemporary texts, seminar members will collect, analyze, and wrestle with ethnographic data. In service to the seminar's broad goals, members will engage in various stages of the ethnographic process: gaining access to a research site or population, taking field notes, conducting and transcribing interviews, and engaging in preliminary analyses of their data. We will also discuss the challenges of entering, being in, and leaving the field. The seminar is therefore designed for students who are willing to engage in focused, hands-on training on ethnographic theory and practice. To best take advantage of what this seminar has to offer, members are urged to come in with a preliminary sketch of a research plan that they would be ready to either directly study in the field or explore through field exercises. This will be a working seminar with members sharing field notes and experiences from the field as well as offering advice and constructive criticism at various stages of the process. This course structure requires a high level of responsibility, respect, and risk-taking among all members.

Causal Inference for the Social Sciences (216192)

Xiang Zhou

2021 Spring (4 Credits)

Schedule:

MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

It is an adage that association does not imply causation, yet causality is at the center of most social science inquiries. This course introduces a set of concepts, assumptions, and methods that allow students to rigorously assess causal relationships from experimental and observational data. Drawing on applications from sociology, economics, and political science, we discuss a variety of research designs and statistical methods, including randomized experiments, regression adjustment, matching and weighting, instrumental variables, regression discontinuity designs, panel data models (including difference in differences), causal mediation analysis, and nonparametric/machine learning methods. The class will be a mixture of lectures, discussions, and computer work

Recommended Prep:

Two graduate-level courses in quantitative methods, such as Sociology 2202 and 2203 or their equivalents. Prior experience with R is encouraged but not required.

Nationalism and Citizenship in Comparative Perspective (212764)

Elke Winter

2021 Spring (4 Credits)

Schedule:

T 0300 PM - 0500 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course focusses on the structural and discursive conditions of membership in the nation. It examines how immigration and citizenship policies emphasize specific dimensions of national identity, and how they operate as means of nation-building under the conditions of neoliberalism and globalization. The course introduces students to key sociological issues, concepts, and theories on both nationalism and citizenship, two bodies of literature that cross-fertilize but do not fully overlap. Drawing primarily on recent debates and empirical cases from Europe and North America, the course also highlights how (im)migration and different forms of citizenship acquisition (e.g. birthright versus naturalization) interact with some of the "new nationalisms" (e.g. Brexit, the rise of Trump, new nationalist/identity movements in Europe).

Overall, this course has two principal goals: First, it offers an overview of the interdisciplinary debates that have shaped the field(s) in recent years. Second, it invites students to ask new questions and provides them with the sociological tools to address them.

Course Notes:

Designed as a graduate seminar, relying heavily on student presentations, case studies and class discussions; ideally, enrollment restricted to graduate students from sociology and related disciplines

(social sciences and arts), however advanced undergraduate students and/or interested graduate students from other disciplines may be accepted upon request.

Additional Course Attributes:

Sociology 2276

Seminar on Networks and Decision-Making (216780)

Mario Small

2021 Spring (4 Credits)

Schedule:

T 1000 AM - 1200 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Recent years have seen a growth in research on decision-making under uncertainty. Much of this research, originally in psychology and now also in economics, has been devoted to understand how actors make decisions in practice, which is often inconsistent with the standard assumptions that rational actor theory has relied on. Yet one of the most important ways people manage uncertainty in practice is by turning to their social networks, and little of the new research on decision-making under uncertainty has taken this fact into account. At the same time, the large body of work in sociology and other fields examining how networks affect people's actions has not generally adopted a behavioral or decision-making perspective. Prioritizing the social network over the individual as the unit of analysis, it has had far more to say about network structure than about how people make choices given their network contexts.

This course is devoted to examining and understanding the limits of what we know about how networks shape decision-making. We will examine research in sociology, organizations, economics, psychology, and anthropology concerned with the relationship between networks and decision-making. We will study experimental, survey-based, and qualitative work. We will cover theoretical, methodological, and substantive issues, with the topics likely involving financial decisions, poverty, inequality, health, and management. The workshop will be experimental in nature, and will involve scholarly papers, possible visitors, and sharing of one another's work and ideas. Students will be encouraged to think creatively, to experiment with ideas and methods, and to push their work beyond the comfort zones of traditional disciplinary thinking. Sociology 3305

Teaching Practicum (111781)

Mary Waters

2020 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** Instructor**Enrollment Cap:** n/a

This course is intended to enhance the teaching skills of graduate students in the Sociology Department. Through a combination of classroom discussions and teaching simulations, the seminar challenges students to discover and hone their teaching styles, to develop a personal philosophy about teaching and learning, to develop self-confidence leading and facilitating small and large group discussions, to learn about the teaching resources that are available to them throughout the university, to experiment with designing engaging courses of study, and to discover that teaching can be a rewarding and stimulating element of an academic career.

Course Notes:

Required of and limited to graduate students in Sociology. Attendance at first meeting is required. Not repeatable for credit.

Class Notes:

Time TBD

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Sociology 3307

Proseminar on Inequality and Social Policy III (112355)

Christopher Winship

2021 Spring (4 Credits)

Schedule: M 0130 PM - 0330 PM**Instructor Permissions:** Instructor**Enrollment Cap:** 18

Students develop previously completed papers from Proseminar I and II into professional presentations and publishable articles, critique peer papers across disciplines, and discuss presentations of national experts.

Course Notes:

Offered jointly with the Kennedy School as SUP-923.

Recommended Prep:

Open to doctoral students in the Multidisciplinary Program in Inequality and Social Policy or the joint PhD Program in Social Policy. Prerequisites: Sociology 296a/Gov 2340a and Government 2340b/Soc 296b (or SUP-921 and SUP-922 at the Kennedy School).

Additional Course Attributes:

Contemporary Ethnography and Inequality Workshop (216443)

Roberto Gonzales

2021 Spring (4 Credits)

Schedule:

R 1200 PM - 0200 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The Contemporary Ethnography and Inequality Workshop advances cutting-edge, socially significant, and novel ethnographic work addressing social, economic, and political inequality. The workshop circulates, appraises, and critically evaluates research presented by leading scholars as well as works-in-progress by graduate students rigorously pursuing ethnographic inquiry and methods. The workshop is open to students and faculty from across the University as well as faculty and students from nearby Boston and Cambridge universities. While regular attendance is the norm, visitors are welcome. In the Fall Semester, we will meet approximately once a month on Thursdays from noon to 1:30 pm.

Course Notes:

Workshop typically meets once per month.

The Vernacular in South Asia: Language, Culture and Politics (213521)

Sravanthi Kollu

2020 Fall (4 Credits)

Schedule:

R 0945 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

Language has long been a gateway to South Asia, a region famed for its linguistic diversity and multilingual populations. Language has also been of perennial interest for historians, literary scholars and philosophers. This introductory course will enable you to connect the region with these broader concerns by examining how and why language became significant for comprehending the modern world and how this changed the relationship of individuals, cultures and societies to language. The course makes South Asia the center of its enquiry and will focus on the region's significance for contemporary analyses of language, such as language's links to colonialism, the public sphere, political representation, modern theology and subalternity. It is also designed to deepen your understanding of language and its uses in your life and writing. To that end, we will explore how texts in a variety of genres (literature, history, political tracts and non-academic writing) by diverse writers (academics, public intellectuals and political figures) have made claims about language and its relationship to the self and the world. You will use these readings to produce a mix of academic and non-academic writing through the semester, including a semester long translation project that will relate to your interests outside this course.

All texts will be made available in English or English translation. No prior knowledge of South Asia or South Asian languages required but you will be encouraged to draw on any existing proficiency in languages other than English.

Class Notes:

Writing Modern South Asia (214528)

Sravanthi Kollu

2021 Spring (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

What does South Asian literature mean? What does a literary text have to be about, whom does it have to be written by to count as South Asian literature? These questions determine how publishers and readers relate to South Asian writing; they also reveal the concerns with location, identity, tradition and literary canon that determine how we read modern world literature. Building on these two questions, this course offers a semester-long exploration of modern South Asian writing, both mainland and diasporic. The texts we will read span a period of roughly two centuries (1790-2016), four nations (India, Pakistan, Sri Lanka and Bangladesh), and global diasporic communities; yet they offer at best a limited sampling of the breadth and diversity of literary writing in/about South Asia. This course treats this breadth of material as a powerful challenge to us as readers. Hence, we will focus as much on our responses to, and expectations of, South Asian texts as we will on the texts themselves. A key aim of the course is to help you cultivate reading and writing skills that equip you to work with diversity and contradiction in literary texts, skills that can be applied more broadly to other texts and contexts. In keeping with this broader aim, the writing assignments through the semester will culminate at the end of the course in a longform essay you will write about an author or text from the course that spoke to you.

Subaltern South Asia: Gender, Caste and Literature (217875)

Sravanthi Kollu

2021 Spring (4 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

This course will explore colonial and post-colonial South Asia via literary texts that foreground questions of gender, caste and social equality. We will read anti-caste and feminist autobiography, fiction, poetry and literary criticism alongside canonical literary texts to examine how South Asian writers have negotiated questions of literary writing, genre and tradition and produced work that represents, critiques and/or addresses the

social condition of women, Dalits, adivasis and other subalterns. What ideas of the literary do these writers produce? What can we extrapolate from these texts for larger conversations about politics and aesthetics? How do subaltern perspectives challenge and transform the global understanding of South Asia? These are the questions this course will focus on.

In addition to engaging with literary translation, representation, identity and experience, this course will help you investigate the global circulation of literary and political ideas by focusing on a concept – subalternity – that emerged from South Asian studies of history and literature but has become a part of global literary and social theory. These intersecting but varied foci are designed to help you develop the skills to work with and write about culturally specific texts for a global audience.

Hindi-Urdu 101A

Introductory Hindi-Urdu (113639)

Richard Delacy

2020 Fall (4 Credits)

Schedule:

MTWR 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

An Introduction to the modern standard form of the most widely spoken language in South Asia, Hindi-Urdu. Students are introduced to both writing systems: the Devanagari script of Hindi and the Nastaliq script of Urdu. The basic grammatical structures are presented and reinforced, and students are also exposed to the cultural and historical context in which Hindi-Urdu has existed over several centuries. The course also draws from the modern medium of film, in particular recent Bollywood songs, to reinforce structures and vocabulary. Students must complete both terms of this course (parts A and B) within the same academic year in order to receive credit.

Course Notes:

Not open to auditors.

Bollywood and Beyond: Commercial Cinema, Language and Culture in South Asia (123790)

Richard Delacy

2021 Spring (4 Credits)

Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor **Enrollment Cap:** n/a

This course examines concepts of personhood, community and culture in South Asia as expressed in contemporary film and literature. Works in Hindi-Urdu and in translation will be examined with emphasis on language as an index of cultural difference and of broad social shifts, notably the transformation of audiences from citizens to culture-consumers. Knowledge of Hindi-Urdu is not required. However, there will be a section for students with intermediate proficiency utilizing language materials.

Course Notes: Students who enroll in the language section of this course may count it towards a citation in Hindi-Urdu.

Students learn fundamental skills in Classical Sanskrit, the language that was, for many hundreds of years, the most prestigious and broadly-deployed medium of intellectual and literary expression across South Asia. In the first year of study, students develop capabilities in analytical reading (and, secondarily, in writing, speaking, and listening) that will enable them to interpret Sanskrit texts on a foundational level. Participation in this course lays the groundwork for students to engage with Sanskrit texts in a wide array of styles and genres-- poetry, narrative, philosophy, and beyond-. Most lessons and assignments involve students collaborating with their peers. Please note that the "Related Section" for this course will be a weekly review session led by the course's Teaching Fellow.

Enrollment information: Enrollment will be by permission of the instructor. After reading through the syllabus, which is available on Canvas, students who intend to enroll in this course should email the instructor (Nell Hawley, nshawley@fas.harvard.edu) introducing themselves and requesting permission to

enroll. Those students should simultaneously petition for enrollment in this course through my.harvard. No auditors will be permitted. Enrolled students must take the course for a letter grade.

Enrollment Cap: n/a

Continuation of Sanskrit 101A.

Students learn fundamental skills in Classical Sanskrit, the language that was, for many hundreds of years, the most prestigious and broadly-deployed medium of intellectual and literary expression across South Asia. In the first year of study, students develop capabilities in analytical reading (and, secondarily, in writing, speaking, and listening) that will enable them to interpret Sanskrit texts on a foundational level. Participation in this course lays a solid groundwork for students to engage with Sanskrit texts in a wide array of styles and genres—poetry, narrative, philosophy, scripture—as their studies progress. Please note that the "Related Section" for this course will be a weekly (optional) review session.

Sanskrit 102AR

Intermediate Sanskrit I (114270)

Nell Hawley

2020 Fall (4 Credits)

Schedule: MWF 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

The intermediate-level Sanskrit course enables students to interpret Sanskrit texts in several major categories: epic, poetry, and commentary. Students expand and strengthen the skills in reading comprehension, grammatical analysis, and vocabulary retention that they developed during the first year of study. Students will be able to dissect and describe nominal compounds, verbal forms, poetic meters, and morphological and syntactical features of Sanskrit words, sentences, and verses in greater detail. As a whole, the course prepares students to participate in Sanskrit language and reading courses at the advanced level.

Students achieve these objectives through focused study of three different texts. In the fall, students read a story from one of the two great Sanskrit epics, the *Mahābhārata* or the *Rāmāyaṇa*. In the first half of the spring term, students study a work of poetry (*kāvya*) that portrays the same story. In the second half of the spring term, students read select portions of a Sanskrit commentary on that *kāvya* composition.

In Fall 2020, students will read a story from the *Mahābhārata* that describes an extraordinary encounter between Arjuna (one of the epic's protagonists) and the god Śiva, who is disguised as a hunter. This leads students to the first sarga (chapter, canto) of Bhāravi's celebrated sixth-century poem *Kirātārjunīya* ("Arjuna and the Hunter") in the Spring, and eventually to a commentary on the poem by the fifteenth-century scholar Mallinātha.

Please note that the "Related Section" for this course will be a weekly review session led by the Teaching Fellow.

Enrollment information: Enrollment will be by permission of the instructor. After reading through the syllabus, which is available on Canvas, students who intend to enroll in this course should email the instructor (Nell Hawley, nshawley@fas.harvard.edu) requesting permission to enroll. Those students should simultaneously petition for enrollment in this course through my.harvard. Students are required to have successfully completed an elementary-level Sanskrit course at the college level. No auditors will be permitted. Enrolled students must take the course for a letter grade.

Subject: Indo-Persian

Indo-Persian 101

Readings in Indo-Persian Literature I (207944)

Hajnalka Kovacs

2020 Fall (4 Credits)

Schedule:

TR 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

The course introduces students to Persian literature composed in the Indian Subcontinent from the 11th through the 20th century. We will combine close reading of texts in the original Persian with a discussion of grammar and prosody as well as secondary readings in English. Texts include excerpts from chronicles, discourses and letters of Sufis, hagiographies, biographical dictionaries, travelogues, collections of tales, as well as epic, lyric, and panegyric poetry.

Recommended Prep:

Two years of Persian or equivalent; one year experience with Classical Persian preferred.

Supervised Reading and Research (111972)

Lisa Laskin

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Open to Special Concentrations concentrators who wish to pursue supervised study for graded credit in an area not covered by courses currently offered by regular Departments and Committees. Students must secure the written approval of the faculty member with whom they wish to study as well as the signature of the Faculty Adviser and the Director of Studies of Special Concentrations.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Primarily for Undergraduate Students
All: Cross Reg Availability	Not Available for Cross Registration
FAS Divisional Distribution	None

Special Concentrations 96R

Senior Projects (123332)

Lisa Laskin

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Designed for seniors in their final term completing their senior project to meet the Basic (rather than Honors) requirements for concentration. May be repeated with the permission of the Director of Studies and the Faculty Adviser. Students must secure the written approval of the faculty member with whom they wish to study as well as the approval of the Faculty Adviser and the Director of Studies of Special Concentrations.

Additional Course Attributes:

Statistics

Subject: Statistics

Statistics 10

Elements of Data Science (213330)

Liberty Vittert

Hanspeter Pfister

2021 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

60

Data science combines data, statistical analysis, and computation to gain insights and make useful inferences and predictions. This course will take a holistic approach to helping students understand the key factors involved, from data collection and exploratory data analysis to modeling, evaluation, and communication of results. Working on case studies and a final project in teams will provide students with hands-on experience with the data science process using state-of-the-art tools. Emphasis will be given to the strengths, trade-offs, and limitations of each method to highlight the importance of merging analytical skills with critical quantitative thinking.

Class Notes:

Also offered as COMPSCI 10. Students may not take both for credit.

Please note that the enrollment cap is a combined total for both STAT 10 and COMPSCI 10.

Requirements:

Anti-requisite: Cannot be taken for credit if AC 209A or CS 109A or CS 10 or STAT 121A is already complete.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
Local offset from Cambridge MA	+7
Local offset from Cambridge MA	-6

Introduction to Quantitative Methods for Economics (114027)

Katy McKeough

2020 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A rigorous introduction to statistics for students intending to study economics. Examples drawn from finance, decision analysis and economic decision-making. In addition to descriptive statistics, probability, inference and regression modeling, also covers portfolio optimization, decision analysis, and time series analysis. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques.

Course Notes:

Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.

Requirements:

Anti-Req: may not be taken for credit if STAT 109 or STAT 139 already complete.

Additional Course Attributes:

Attribute	Value(s)

Katy McKeough

2021 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

In a world where data is growing larger and more complex, it can be a challenge to turn an abundance of information into the knowledge from which sound decisions can be made. As a discipline, statistics aims to bridge the gap between knowledge and information. This course will motivate statistical methods through data analysis and visualization, in addition to discussing the underlying theory. We will discuss topics such as study design, descriptive statistics, probability, sampling distributions, hypothesis testing, linear regression, and Bayesian inference. A wide variety of applications from the economic and social sciences will be highlighted along with examples from biology, sports, politics, and more. Students with prior exposure to introductory statistics will find some overlap of material but be exposed to new applications and learn more advanced modeling techniques. This course makes use of the statistical programming language R, but no prior knowledge of computer science is required.

Course Notes:

Only one of the following courses may be taken for credit: Statistics 100, 101, 102, 104.

Requirements:

Anti-Req: may not be taken for credit if STAT 109 or STAT 139 already complete.

Statistics 110

Introduction to Probability (110766)

Joseph Blitzstein

2020 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

A comprehensive introduction to probability. Basics: sample spaces and events, conditional probability, and Bayes' Theorem. Univariate distributions: density functions, expectation and variance, Normal, t, Binomial, Negative Binomial, Poisson, Beta, and Gamma distributions. Multivariate distributions: joint and conditional distributions, independence, transformations, and Multivariate Normal. Limit laws: law of large numbers, central limit theorem. Markov chains: transition probabilities, stationary distributions, convergence.

Recommended Prep:

Math 1b or equivalent or above

Additional Course Attributes:

Statistics 115

Introduction to Computational Biology and Bioinformatics (122304)

Xiaole (Shirley) Liu

2021 Spring (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The course will cover basic technology platforms, data analysis problems and algorithms in computational biology. Topics include sequence alignment and search, high throughput experiments for gene expression, transcription factor binding and epigenetic profiling, motif finding, RNA/protein structure prediction, proteomics and genome-wide association studies. Computational algorithms covered include hidden Markov model, Gibbs sampler, clustering and classification methods.

Recommended Prep:

Good quantitative skills, strong interest in biology, willingness and diligence to learn programming.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	For Undergraduate and Graduate Students
Local offset from Cambridge MA	+8 +9

Statistics 117

Data Analysis in Modern Biostatistics (203104)

Giovanni Parmigiani

2021 Spring (4 Credits)

Schedule:

TR 0900 AM - 1015 AM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

An Introduction to applied biostatistics via case studies. The course is based on four practical problems, and methodology relevant for each. Students will apply the concepts from the methodology to the data analysis or modeling task, and carry out four mini projects, with ample opportunities for peer-to-peer discussion.

Course Notes:

There is a cap of 30 students for this course. Preference is given to Statistics concentrators; all other students wishing to take the course must send a request along with a list of statistics/computer science courses already completed to the professor at gp@jimmy.harvard.edu. Please put Stat 117 in the subject line of the email.

Recommended Prep:

**Prerequisites: Stat 110 and (AP Stat or 102 or 104) and 111 and 139.
Recommended: 115**

Additional Course Attributes:

Statistics 120

Introduction to Bayesian Inference and Applications (156425)

S. C. Samuel Kou

2020 Fall (4 Credits)

Schedule:

MW 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Provides students a comprehensive understanding to the questions as of what is, how and why Bayesian. Introduction to classic Bayesian models, basic computational algorithms/methods for Bayesian inference, as well as their applications in various domain fields, and comparisons with classic Frequentist methods. As Bayesian inference finds its roots and merits particularly in application, this course puts great emphasis on enhancing students' hands-on skills in statistical computation (mostly with R) and data analysis.

Recommended Prep:

STAT110, STAT111 and basics of R programming are required.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
All: Cross Reg Availability	Available for Harvard Cross Registration

Data Science 1: Introduction to Data Science (203101)

*Kevin A. Rader**Pavlos Protopapas**Christopher Tanner*

2020 Fall (4 Credits)

Schedule:

MWF 0900 AM - 1015 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Data Science 1 is the first half of a one-year introduction to data science. The course will focus on the analysis of messy, real life data to perform predictions using statistical and machine learning methods. Material covered will integrate the five key facets of an investigation using data: (1) data collection - data wrangling, cleaning, and sampling to get a suitable data set; (2) data management - accessing data quickly and reliably; (3) exploratory data analysis – generating hypotheses and building intuition; (4) prediction or statistical learning; and (5) communication – summarizing results through visualization, stories, and interpretable summaries. Part one of a two part series. The curriculum for this course builds throughout the academic year. Students are strongly encouraged to enroll in both the fall and spring course within the same academic year.

Course Notes:

Only one of CS 109a, AC 209a, or Stat 121a can be taken for credit. Students who have previously taken CS 109, AC 209, or Stat 121 cannot take CS 109a, AC 209a, or Stat 121a for credit.

Recommended Prep:

Programming knowledge at the level of CS 50 or above, and statistics knowledge at the level of Stat 100 or above (Stat 110 recommended).

Requirements:

Not to be taken in addition to Computer Science 109 or Computer Science 109A, or Applied Computation 209, or Applied Computation 209A.

Additional Course Attributes:

Attribute	Value(s)
Quantitative Reasoning with Data	Yes
FAS Divisional Distribution	Science & Engineering & Applied Science
Full Year Course	Divisible Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	For Undergraduate and Graduate Students

Quantitative Finance (126048)

Stephen Blyth

2020 Fall (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Introduction to financial derivatives and the probabilistic techniques used to analyze them. Topics include: forwards, swaps and options; replication, no-arbitrage and risk-neutrality; martingales, numeraires and the fundamental theorem of asset pricing; and an introduction to interest-rate derivatives and their valuation. Provides a rigorous but accessible treatment of the elegant theory underpinning quantitative finance, motivated by real problems from the financial industry.

Course Notes:

Designed for those seeking an understanding of the quantitative challenges on Wall Street and the probabilistic tool-kit developed to address them.

Recommended Prep:

Statistics 110 or equivalent.

Statistics 141

Spatial Statistics (217516)

Alex Young

2021 Spring (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

Spatial data – which is prevalent in climatology, meteorology, geology, oceanography, ecology and many other fields – requires specialized statistical tools for analysis due to the inherent dependence which exists between samples taken at nearby locations (or times). In this introductory course in spatial statistics, we'll cover central topics including spatial point processes, lattice models, and geostatistics. Theory (mathematical models and background) will be presented in concert with inference and prediction (statistics and estimation) with an emphasis on numerical examples to provide intuition and identify commonly used tools for EDA including visualization and important summary statistics. Students should take this course if they are interested in learning more about tools to handle the complex datasets where each datum depends in some part upon all others.

Recommended Prep:

Required courses: Stat 110; Math 21A/B; Stat 111 (may be taken concurrently)

Recommended courses: Stat 139

Statistics 143

Sports Analytics (217523)

Laurie Shaw

2021 Spring (4 Credits)

Schedule:

WF 0300 PM - 0415 PM

Instructor Permissions: None

Enrollment Cap:

n/a

The amount of data collected during games and tournaments has increased enormously over the last few decades, as has demand for new techniques for analysing this data. This course will cover a wide variety of quantitative topics in sports analytics, including: player evaluation; measuring team strength and predicting outcomes; situational analysis; working with tracking data; and special topics. It will be hands-on, including live data analysis in class and an emphasis on project work (group and individual).

Recommended Prep:

Prerequisites include STAT110, STAT111 and STAT139. Experience using python or R is strongly recommended.

Additional Course Attributes:

Generalized Linear Models (118974)

Mark Glickman

2021 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Sequel to Statistics 139, emphasizing common methods for analyzing continuous non-normal and categorical data. Topics include logistic regression, log-linear models, multinomial logit models, proportional odds models for ordinal data, Gamma and inverse-Gaussian models, over-dispersion, analysis of deviance, model selection and criticism, model diagnostics, and an introduction to non-parametric regression methods.

Course Notes:

Examples will be drawn from several fields, particularly from biology and social sciences.

Recommended Prep:

Statistics 139 or with permission of instructor.

Multilevel and Longitudinal Models (160736)

Luke Miratrix

2020 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

Data often have structure that needs to be modeled explicitly. For example, when investigating students' outcomes we need to account for the fact that students are nested inside classes that are in turn nested inside schools. If we are watching students develop over time, we need to account for the dependence of measurements across time. If we do not, our inferences will tend to be overly optimistic and wrong. The course provides an overall framework, the multilevel and generalized multilevel (hierarchical) model, for

thinking about and analyzing these forms of data. We will focus on specific versions of these tools for the most common forms of longitudinal and clustered data. This course will focus on applied work, using real data sets and the statistical software R. R will be specifically taught and supported. While the primary focus will be on the linear model with continuous outcomes (i.e., the classic regression framework) we will also discuss binary, categorical, and ordinal outcomes. We will emphasize how to think about the applicability of these methods, how they might fail, and what one might do to protect oneself in such circumstances. Applications of hierarchical (multi-level) models will include the canonical specific cases of random-slope, random-intercept, mixed effect, crossed effect, marginal, and growth-curve models.

Recommended Prep:

Permission of instructor required. Prerequisite: S-052, Stat 139, or an equivalent. Jointly-offered in the Graduate School of Education.

Statistics 186

Introduction to Causal Inference (110022)

Susan Murphy

2021 Spring (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

30

Causal inference concerns the very difficult, challenging problem of addressing questions such as, "Would vaccinating children 16 and younger against COVID 19 lead to fewer deaths among public school teachers?" and "Would providing Harvard students access to a mobile health application designed to help them manage school stress, lead to improved school performance?" This class will include 4 modules. The first module introduces the nuanced world of causal inference along with a fundamental tool: the language of potential outcomes. The second module covers randomized experiments and how data from randomized experiments can be used to make causal statements. The third module introduces the rather tricky problem of using observational (non-randomized) data to attempt to make causal statements. The final module introduces a new and challenging area in which the goal is to make causal inference about the effect of sequences of treatments.

Class Notes:

SHOPPING HOURS:

Statistical Machine Learning (207703)

Lucas Janson

2020 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

This course is designed to follow CS 181 and will dive deeper into the statistical properties of various machine learning methods. The goal of the course is to introduce and prepare students for theoretical and methodological research in statistical machine learning. Methods include linear methods for regression and classification, splines, kernel smoothing, additive models, trees, boosting, bagging, and random forests. Statistical principles covered include no-free-lunch theorems, generalization error, degrees of freedom, shrinkage, smoothing, and model selection. The latter part of the course will be devoted to introducing some emerging statistical topics at the cutting edge of statistical machine learning such as using machine learning for statistical inference, conformal inference, using machine learning for causal inference, implicit regularization, algorithmic fairness, differentially-private machine learning, and transfer learning. ****different this year**** In addition to problem sets but instead of exams or a course project, students will work in groups to synthesize and give short presentations on recent applied and theoretical machine learning papers.

Course Notes:

Textbook Information: Elements of Statistical Learning by Hastie, Tibshirani, and Friedman is a required text and is available for free at https://web.stanford.edu/~hastie/ElemStatLearn/printings/ESLII_print12.pdf

Statistics 234

Sequential Decision Making (205213)

Susan Murphy

2021 Spring (4 Credits)

Schedule: W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 25

This graduate course will focus on reinforcement learning algorithms and sequential decision making

methods with special attention to how these methods can be used in mobile health. Reinforcement learning is the area of machine learning which is concerned with sequential decision making. We will focus on the areas of sequential decision making that concern both how to select optimal actions as well as how to evaluate the impact of these actions. The choice of action is operationalized via a policy. A policy is a (stochastic) deterministic mapping from the available data at each time t into (a probability space over) the set of actions. We will consider both off-line and on-line methods for learning good policies.

Mobile health is an area that lies within multiple scientific disciplines including: statistical science, computer science, behavioral science and cognitive neuroscience. This makes for very exciting interdisciplinary science! Smartphones and wearable devices have remarkable sensing capabilities allowing us to understand the context in which a person is at a given moment. These devices also have the ability to deliver treatment actions tailored to the specific needs of users in a given location at a given time. Figuring out when and in which context, which treatment actions to deliver can assist people in achieving their longer term health goals. In the last 15-20 minutes of many of the classes we will brainstorm about how the methods we discussed during that class might be useful in mobile health.

This course will cover the following topics: Markov Decision Processes, on-policy and off-policy RL, least squares methods in RL and Bayesian RL, namely posterior sampling. Most of the course will focus on Bayesian RL via posterior sampling. This is particularly useful in mobile health as posterior sampling facilitates off-policy and continual learning. Also the Bayesian paradigm facilitates use of prior data in initializing an RL algorithm. Other topics from statistics, machine learning and RL that I think are potentially important in mobile health but that we won't cover are (you could consider in your class project) include: 1) transfer learning (using data on other similar users to enable faster learning); 2) non-stationarity (dealing with slowly changing or abrupt changes in user behavior); 3) interpretability of policies (enabling communication with behavioral scientists by making connections to behavioral theories); 4) using approximate system dynamic models to speed up learning, 5) hierarchical RL, 6) experience replay and 7) multi-task learning.

Modern Statistical Learning (211175)

Zheng Ke

2020 Fall (4 Credits)

Schedule:

WF 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

High dimensional data analysis is a recent interdisciplinary research area of Statistics, Genetics and Genomics, Engineering, and several other scientific areas. It addresses an array of challenging problems that of contemporary interest, and research in this area has been very active in the past decade.

This course aims to provide a systematic introduction to various topics in high dimensional data analysis, focusing on large-scale sparse learning, and network and text data analysis. Large-scale sparse learning: Sparsity is a universal phenomenon in modern high dimensional data. Sparse structures are observed in many application settings and have many different forms, such as parameter sparsity, graph sparsity, eigenvalue sparsity, and so on. Exploring sparsity has become a common strategy in data analysis and has largely reshaped classical multivariate statistics problems. This course will investigate classical problems such as multiple testing, linear regression, classification and clustering, under the modern sparse settings. For each problem, the course discusses recent statistical methods for taking advantage of sparsity, and introduces the theoretical framework for analyzing these methods.

Network and text data analysis: Social networks and text documents are unconventional data types. This course introduces statistical models and methods for analyzing such type of data. Topics for network data analysis include community detection, mixed membership estimation, link prediction, and dynamic network modeling. Topics for text data analysis include topic modeling, word embedding, information retrieval, and sentiment analysis.

Recommended Prep:

This course is mainly designed for graduate students in Statistics. The prerequisites are Statistical Inference 1&2 (students can take the prerequisites simultaneously with this course). Graduate students from other departments (CS, Biostatistics, Economics, etc.) can also take this course, if they have taken statistics-related courses which have a significant amount of content in mathematical statistics. Undergraduate students please consult the instructor before enrolling.

Couplings and Monte Carlo (217522)

Pierre Jacob

2021 Spring (4 Credits)

Schedule:

MW 0900 AM - 1015 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

The course is about the method of coupling in probability and its use in Monte Carlo methods. These methods are algorithms that generate samples distributed according to probability distributions of interest, and have found countless applications in physics, chemistry, statistics, machine learning to name a few fields. The course includes an introduction to Monte Carlo methods, followed by an in-depth coverage of the coupling method for both theoretical and practical purposes. On the theoretical side, the course covers the celebrated "coupling inequality" and its ramifications, and coupling interpretations of different notions of distances between probability distributions, with connections to optimal transport. On the methodological side, the course covers Markov chain methods and couplings to monitor their convergence, to enable parallel computation and for variance reduction. Examples of methods covered in the course include Coupling From The Past and recent debiasing techniques. The course is intended for students interested in learning about applied probability, numerical methods, and algorithms that are routinely used to compute probabilities, volumes and integrals across many scientific fields.

Recommended Prep:

Basic notions of mathematics, probability and algorithms. For example Stat 210 or at least 110, and in any case a good motivation to learn more. Prospective students can reach out to instructor to discuss. Stat 221 is not required. Lecture notes can be found at this address: sites.google.com/site/pierrejacob/cmcllectures. Prospective students are invited to have a look at the first two chapters available there, before registering for this course.

Causal Inference with Applications (156925)

Kosuke Imai

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None**Enrollment Cap:**

n/a

Substantive questions in empirical scientific and policy research are often causal. Does voter outreach increase turnout? Are job training programs effective? Can a universal health insurance program improve people's health? This class will introduce students to both statistical theory and applications of causal inference. As theoretical frameworks, we will discuss potential outcomes, causal graphs, randomization and model-based inference, sensitivity analysis, and partial identification. We will also cover various methodological tools including randomized experiments, regression discontinuity designs, matching, regression, instrumental variables, difference-in-differences, and dynamic causal models. The course will draw upon examples from political science, economics, education, public health, and other disciplines.

Recommended Prep:

Stat 110, 111, and 139 or equivalent (probability, statistical theory, and linear models). Students who took Stat 186 in 2018 Fall and 2019 Fall should not enroll in this course.

Individual Risk (216523)

Joseph Blitzstein

Cynthia Dwork

2020 Fall (4 Credits)

Schedule:

F 1245 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Risk assessment tools are increasingly deployed in high-stakes settings: What is the probability that the tumor will metastasize? What is the chance that this individual will commit a violent crime in the next two years? What is the probability that the student will graduate within 4 years? But what is the probability of a non-repeatable event? What is the mathematical meaning of "individual risk" and what should we require of a risk assessment algorithm? This reading course will explore different notions of risk, based on different notions of probability, and will connect this literature to notions of regret and indistinguishability

from computer science.

Course Notes:

Also offered as COMPSCI 333. Only one of COMPSCI 333 or STAT 333 can be taken for credit.

Recommended Prep:

Familiarity with probability (e.g., Stat 110 and/or exposure through theoretical computer science). Exposure to theoretical computer science will be helpful but is not mandatory.

Scalable Statistical Inference for Big Data with Applications (214539)

Xihong Lin

2021 Spring (4 Credits)

Schedule:

M 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

Unprecedented advances in digital technology have produced a revolution that is transforming science and society. Big data have been rapidly generated in many disciplines, such as genomics, health, physical and social sciences. The value of big data lies in effective analysis using statistical inference and machine learning methods that are computationally scalable and efficient. In this course, we will discuss several ongoing research areas on scalable statistical inference for big data, including several current research activities, challenges and open problems. Examples include dense and sparse signal detection, feature selection, boosting, high-dimensional prediction and testing, sparse and low-rank matrix estimation, general tensor methods, fast PCA, post PC inference and eigenvector theory, efficient concave and non-concave penalized likelihood maximization and inference, nonparametric function estimation, network analysis, convolutional neural networks, random projection, sketching, distributed computing, cloud computing, variational Bayesian methods, and estimating (possibly) low dimensional functionals in high dimensional models (e.g. average treatment effects in the presence of high dimensional covariates, signal to noise ratio, genetic relatedness). Applications of these methods in various areas will be discussed.

Introduction to Research (125804)

Amie Holmes

Amy Wagers

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

Laboratory research in topics related to the Human Developmental and Regenerative Biology Concentration under the direction of, or approved by, members of the Department of Stem Cell and Regenerative Biology, Principal Faculty of the Harvard Stem Cell Institute, or others with permission. A paper must be submitted to the laboratory sponsor and to the HDRB Concentration Office for review by the Course Director and Head Tutors.

Course Notes:

Students must have joined a laboratory by the course registration deadline (i.e., "study card day") to be able to enroll in SCRB 91.

Limited to Human Developmental and Regenerative Biology Concentrators; written permission of the laboratory sponsor must be submitted to the HDRB Concentration Office prior to enrolling in the course. This introductory research course is intended to prepare students for SCRB 99 and may ordinarily be repeated no more than once. Ordinarily may not be taken as a fifth course. Laboratory safety session required.

Stem Cell & Regenerative Biol 111

Regeneration: Phenomena to Mechanisms (212688)

Jessica Whited

2020 Fall (4 Credits)

Schedule: MW 0430 PM - 0545 PM**Instructor Permissions:** None**Enrollment Cap:** n/a**How can some animals regenerate large pieces of their bodies following injury? This course will use both classical and current primary literature to explore the fascinating process of regeneration across phyla, covering both invertebrates and vertebrates. Through a combination of minimalist lectures, robust discussion, and student-led presentations, students will learn to distill questions into specific, key experiments; to design experiments with meaningful controls; and to use data to refine, reformulate, and develop new hypotheses.**

Course Notes:

Students will be engaged in group work throughout the semester. They will develop new Wikipedia pages about specific topics related to regeneration. As a final project, they will write and produce short videos centered on student-selected topics, and the course will culminate with a class-wide viewing event.

Stem Cell & Regenerative Biol 140

Developmental and Molecular Basis of Growth and Regeneration (126744)

Fernando Camargo

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

This course will focus on the biology of organ growth and regeneration from a developmental perspective. How is the size and symmetry of our organs set? How does a regenerating animal sense that something is missing and eventually stop the regenerative process when tissues reform? We will learn about conserved developmental pathways that are necessary for adult regeneration and discuss how the aberrant activation of these pathways can lead to overgrowth disorders such as cancer.

Recommended Prep:

Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; SCRB 10 or permission of the instructor.

From Cells to Tissues, in Sickness and in Health (161207)

Ya-chieh Hsu

2021 Spring (4 Credits)

Schedule: MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 18

Every cell is a part of a larger "community", working together to enable tissue function. This course will explore the principles of building complex tissues from cells. How do cells know what tissues to make and when to make them? How do cells communicate with one another? What diseases can arise when these principles go awry? How can we build tissues in the lab? In addition to lectures, students will engage deeply in primary literature.

Epigenetics and Gene Regulation of Human Development and Disease (215900)

Jason Buenrostro

2021 Spring (4 Credits)

Schedule:

MWF 0300 PM - 0415 PM

Instructor Permissions: None**Enrollment Cap:**

n/a

Are we destined to be our parents? In this course we will study topics in epigenetics and gene regulation to challenge some of Mendel's ideas on genetic inheritance. To do this, we will learn about the biochemical processes that control the expression of genes as cells change across human development, aging and disease. Together with genetics, we'll use science to discuss whether "nature or nurture" defines who we are. Finally, the human genome is huge, employing diverse mechanisms of epigenetic regulation, we'll learn about data rich experimental tools and work together to use computational methods to study epigenetic processes within cells.

We will explore the biochemistry, cell biology, and physiology that make glucose our main source of energy. How did humans depend on and crave this molecule? What consequences does it hold for normal metabolism and disease? Students will integrate evolution, endocrinology, biostatistics, bioengineering, and regenerative biology approaches in considering sugar and all its consequences. Finally, we will evaluate legal and business issues necessary to move scientific and technical innovations from the laboratory to the patient.

Recommended Prep:

**Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b;
SCRB 10 or permission of the instructor.**

Inflammation & Immunity (217489)

Ruth Franklin

2021 Spring (4 Credits)

Schedule:

TR 1030 AM - 1145 AM

Instructor Permissions: None

Enrollment Cap:

n/a

What happens during an infection? This course will follow the progression of an immune response while exploring the following questions: What is inflammation? How can it both protect us and contribute to disease? Which physiologic processes are regulated by immune cells? In addition to participation in lectures, discussions, and analysis of primary literature, each student will create an original piece of science communication to engage with the general public.

Course Notes:

Weekly section meeting time to be determined, will likely be on Thursday or Friday.

Recommended Prep:

Prerequisite: Molecular biology

Stem Cell & Regenerative Biol 180 Section: 01

Development, Plasticity, and Regeneration in the Mammalian Brain (125803)

Jeffrey Macklis

2020 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Why do nerves in limbs regenerate after traumatic or combat injuries, but nerves in the spinal cord and brain do not? Why do diseases often have mutations in every cell in the body, and every neuron type in the brain, but only 1 or 2 neuron types out of thousands degenerate or fail? How does often remarkable recovery from brain surgery or injury occur in young children, but not so much in later life? How is the brain set up to sense the world, integrate incoming sensory information, and lead to movement and behavior, and how is that organized during development? Might we overcome lack of spinal cord regeneration? Might we reverse or repair neuron degeneration in ALS, e.g.? How might advanced brain-computer interface prosthetic devices add value? What's up with stem cell biology– including hope, hype, and reality?

We will highly interactively study regenerative biology of the mammalian central nervous system (CNS), motivated by a focused and related set of human CNS disorders: This course will discuss molecular and cellular mechanisms of regeneration and repair in the mammalian central nervous system (CNS), motivated by prototypical examples in the motor control systems and circuitry of the cerebral cortex and spinal cord centrally relevant to spinal cord injury, ALS / Lou Gehrig's disease ("amyotrophic lateral sclerosis", and related disorders), and spinal muscular atrophy (SMA). We will take an approach integrating developmental and regenerative biology: we will compare and contrast aspects of embryonic neural development (molecular and cellular) with adult neural plasticity; discuss limitations to neuronal and axonal regeneration in the mature mammalian CNS following degeneration or injury; examine CNS regeneration approaches directed at overcoming intrinsic limitations; explore developmental controls, gene manipulation, and cellular reprogramming to promote neurogenesis (birth of new neurons), axonal regeneration, and directed differentiation of progenitors and stem cells in diseased adult mammalian brain; and consider technology

such as "brain-computer interfaces". This course has always functioned as an interactive seminar rather than a lecture course, and includes the trajectory of knowledge and thinking over the past century, plus the state-of-the-art in these fields, emphasising the need for a healthy measure of skepticism in some fields. Sections cover advanced experimental approaches, critical reading of the literature, and conceptual thinking.

Course Notes:

Expected to be offered in alternating fall terms in even years.

Recommended Prep:

Waived for Fall Term 2020. (standardly, Life and Physical Sciences A or Life Sciences 1a; Life Sciences 1b; MCB 80 or equivalent "Introduction to Neuroscience" course, or permission of the instructor)

Stem Cell & Regenerative Biol 195

The Translational Science of Stem Cells (204006)

Lee Rubin

2020 Fall (4 Credits)

Schedule:

TR 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

16

Through a series of lectures, given by Professor Rubin and Dr. Nayara, as well as some outstanding international speakers, students will be introduced to a broad view of the ways in which stem cell biology can be used in translational research. Topics to be discussed include precision medicine-oriented human disease modeling, discovering drugs that target endogenous stem cells or otherwise promote tissue repair, reprogramming endogenous cells to adopt new identities as treatments for degenerative disorders, and regenerative medicine (cell-based therapies). The goal of the course is to provide a very up-to-date view of where stem cell-associated therapies stand now and, most of all, are heading in the future. The course relies on active participation and will include reading primary research articles. Students will also have the opportunity to act as hosts for outside lecturers. A key objective of the course is to help the students acquire the knowledge to design new ways of treating disease in the form of a term-long paper project.

Course Notes:

Permission of the instructor required to enroll. Ability to work in a less structured environment will be essential.

Recommended Prep:

Life Sciences 1a or Life and Physical Sciences A, Life Sciences 1b, and preferably SCRB 10.

Systems Biology

Subject: Systems Biology

Systems Biology 220

Analysis foundations for quantitative biologists (204480)

Allon Klein

Andrew Murray

Eleanor Rand

2020 Fall (4 Credits)

Schedule:

TR 0215 PM - 0330 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

The bedrock foundation of quantitative biology is controlling assumptions and errors in empirical measurement. This course focuses on developing "street-fighting" capabilities in quantitative analysis: statistical concepts that every biologist needs to ensure that they can interpret their data correctly. The course introduces estimators, the origin and consequences of key distributions in biology, error propagation, hypothesis testing, multiple hypothesis correction and the perils of p-hacking. Concepts are reinforced through problem sets, and team-based analysis of new experimental methods.

Recommended Prep:

This course is required for all Systems, Synthetic, and Quantitative Biology students. Knowledge of programming, statistics, physics and chemistry.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Science & Engineering & Applied Science
FAS: Course Level	Primarily for Graduate Students

Instructor Permissions: Instructor

Enrollment Cap:

40

(Part 2 of the SB220qc / SB221qcseries) New experimental techniques are changing the nature of data sets in biology. For example, high throughput methods routinely measure expression levels of thousands of genes in individual cells across tens of thousands of cells. Imaging methods record 3-dimensional movies of developmental processes, generating terabytes of data in a single run. How do we make sense of these data sets? This course will begin with "street-fighting" statistics: tools that

every biologist needs to ensure that they can interpret their data correctly. We will then study the fascinating world of high-dimensional spaces and build the intuition required for interpreting data that live in these spaces. We will cover linear and non-linear dimensionality reduction, statistical learning and inference in high-dimensional spaces, and relevant machine learning tools such as autoencoders. Finally, we ask how biological systems themselves solve high-dimensional inference problems, subject to severe measurement constraints in the form of thermal noise and limited energy resources. We will cover relevant ideas from statistical physics such as kinetic proof reading. To join the first five weeks of this course (on "street-fighting" statistics) enroll in SB220qc.

Systems Biology Research (121507)

Vladimir Denic

2021 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation exempt
FAS Divisional Distribution	None

Systems Biology 350 Section: 011

Systems Biology Research (121507)

Angela Depace

2020 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation exempt
FAS Divisional Distribution	None

All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 011

Systems Biology Research (121507)

Angela Depace

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation exempt
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 012

Systems Biology Research (121507)

Michael Desai

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation exempt
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 012

Systems Biology Research (121507)

Michael Desai

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation exempt
FAS Divisional Distribution	None

Systems Biology 350 Section: 013

Systems Biology Research (121507)

Francis Doyle

2020 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation exempt
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 013

Systems Biology Research (121507)

Francis Doyle

2021 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation exempt
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 014

Systems Biology Research (121507)

Catherine Dulac

2020 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation exempt
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 014

Systems Biology Research (121507)

Catherine Dulac

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
Course Evaluation	Course Evaluation exempt

Systems Biology 350 Section: 015

Systems Biology Research (121507)

Sean Eddy

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
Course Evaluation	Course Evaluation exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 015

Systems Biology Research (121507)

Sean Eddy

2021 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation exempt
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 016

Systems Biology Research (121507)

Walter Fontana

2020 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation exempt
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 016

Systems Biology Research (121507)

Walter Fontana

2021 Spring (4 Credits)

Schedule:

TBD

Instructor Permissions: None

Enrollment Cap:

n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation exempt
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 017

Systems Biology Research (121507)

Ethan Garner

2020 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
Course Evaluation	Course Evaluation exempt
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 017

Systems Biology Research (121507)

Ethan Garner

2021 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation exempt

Systems Biology 350 Section: 018

Systems Biology Research (121507)

Yonatan Grad

2020 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation exempt

FAS: Course Level	Graduate Course

Systems Biology 350 Section: 018

Systems Biology Research (121507)

Yonatan Grad

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation exempt
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 019

Systems Biology Research (121507)

Jesse Gray

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation exempt
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 019

Systems Biology Research (121507)

Jesse Gray

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
Course Evaluation	Course Evaluation exempt
All: Cross Reg Availability	Available for Harvard Cross Registration

Systems Biology 350 Section: 020

Systems Biology Research (121507)

Jeremy Gunawardena

2020 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	None
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation exempt

Systems Biology 350 Section: 020

Systems Biology Research (121507)

Jeremy Gunawardena

2021 Spring (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation exempt
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 021

Systems Biology Research (121507)

John Higgins

2020 Fall (4 Credits)

Schedule: TBD**Instructor Permissions:** None**Enrollment Cap:** n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation exempt
FAS: Course Level	Graduate Course
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None

Systems Biology 350 Section: 021

Systems Biology Research (121507)

John Higgins

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
Course Evaluation	Course Evaluation exempt
FAS: Course Level	Graduate Course
FAS Divisional Distribution	None

Systems Biology 350 Section: 022

Systems Biology Research (121507)

Curtis Huttenhower

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
Course Evaluation	Course Evaluation exempt
FAS Divisional Distribution	None
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS: Course Level	Graduate Course

Systems Biology 350 Section: 022

Systems Biology Research (121507)

Curtis Huttenhower

2021 Spring (4 Credits)

Schedule: TBD

Instructor Permissions: None

Enrollment Cap: n/a

Upper level Systems Biology students register for this course when they permanently join a lab. Students should register under the supervising PI.

Additional Course Attributes:

Attribute	Value(s)
All: Cross Reg Availability	Available for Harvard Cross Registration
FAS Divisional Distribution	None
Course Evaluation	Course Evaluation exempt

The Lemann Program on Creativity and Entrepreneurs

Subject: Lemann Program on Creativity

Lemann Program on Creativity 100

StudioLab on Creativity and Entrepreneurship (216804)

Alain Viel

2021 Spring (2 Credits)

Schedule:

R 0300 PM - 0415 PM

Instructor Permissions: Instructor

Enrollment Cap:

36

Driven by challenges such as the COVID-19 pandemic, racial injustice, and climate change, many have come to fear the "new normal" that we are all facing. But must this new normal necessarily be a diminished or broken version of reality that simply happens to us? The StudioLab pursues the creation of a "better normal" using an interdisciplinary exploration of how transformative ideas from the liberal arts developed by Harvard students can be applied to today's societal challenges.

You will work to develop actionable solutions to pressing issues, using the starting framework of the UN Sustainable Development Goals. You will learn to identify and properly analyze a problem; work collaboratively to ideate and create an actionable approach; build an organizational strategy and business plan; network with expertise to pressure-test your ideas; and persuasively communicate your ideas to build the requisite human capital and funding relationships to launch a venture. The term will culminate in a Festival of Ideas, where individuals and teams will have opportunities to seek support to move their projects along. Through your efforts, you will reimagine a better normal for society and take meaningful action to make it a reality.

Theater, Dance, and Media

Subject: Theater, Dance & Media

Theater, Dance & Media CAMR

Advanced Playwriting: Workshop (203500)

Sam Marks

2021 Spring (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This workshop is a continued exploration of writing for the stage. Students will be encouraged to excavate their own voice in playwriting. They will examine and attempt multiple narrative strategies and dialogue techniques. They will bolster their craft of playwriting through generating short scripts and a completed one act. Readings will include significant contributors to the theatrical form such as Ibsen and Beckett as well as contemporary dramatists such as Annie Baker, Caryl Churchill and Sam Shepard.

Course Notes:

TDM CAMR is the same course as ENGLISH CAMR. Admission based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing web page.

Theater, Dance & Media CKR

Introduction to Playwriting: Workshop (205632)

Sam Marks

2020 Fall (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

n/a

This workshop is an introduction to writing for the stage through intensive reading and in-depth written exercises. Each student will explore the fundamentals and possibilities of playwriting by generating short scripts and completing a one act play with an eye towards both experimental and traditional narrative styles. Readings will examine various ways of creating dramatic art and include work from contemporary playwrights such as Clare Barron, Aleshea Harris, Jeremy O. Harris, Taylor Mac, Suzan Lori-Parks, as well as work from Edward Albee, Caryl Churchill, and Harold Pinter.

Course Notes:

TDM CKR is the same course as ENGLISH CKR. Admission is based on submitted samples of writing. For information on specific application requirements, please see the English Department's Creative Writing

web page.

Theater, Dance & Media 90AR

Production Studio - Making Horizontal Theater (205023)

Jay Stull

EllaRose Chary

2020 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This workshop teaches the practices and politics surrounding what has been defined variously as "non-fiction," "documentary," "interview-based," or "investigative" theater. We call this theater "horizontal" because its text, source material, and process are multivariate, self-consciously non-hierarchical, and aspirationally democratic: generated by and with communities through interviews.

In this workshop students will build and perform a full-length piece of horizontal theater. They will collectively choose the topic and scope of the production, study existing models, and interrogate the design of live theater on digital platforms in order to develop an original aesthetic sensibility for an online presentation. Students will determine whom to interview and about what subject of interest; they will conduct those interviews, record them, and transcribe them; and they will use verbatim language from those interviews to build lyrics, write songs, monologues, and dialogue, ultimately constructing a full-length play with music and/or a musical.

In addition, students will examine existing models of horizontal theater and discuss the politics of representation and risks of appropriation that surface in this kind of work. Models of meaningful horizontal theater include: Lynn Nottage's *Sweat*, the Tectonic theater Company's *The Laramie Project*, Anna Deavere Smith's *Fires in the Mirror*, The Civilians' *In the Footprint*, and Pearl/D'Amour's *5 Miltons*.

Horizontal theater is a document of the present moment - its content informed by the context in which it is made - and this semester our production will inevitably be shaped by the challenges and opportunities of pandemic time. We will explore the paradoxes streaming video platforms offer for live performance - intimacy and alienation, a virtual-near and a tangible-far - and how these platforms recommend performative approaches that unify process and execution.

This workshop has the spirit of a lab, wherein the aesthetics of horizontal theater are modeled, deconstructed, questioned, and ideally re-invented, where students think seriously about the identities of their subjects as well as their own, and where conversations about art-making, performance, and politics are courageous, generous, and daring.

Course Notes:

TDM production studios (TDM 90AR/BR/CR/DR) frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions and studio work at designated times (TBD) to examine the

entire performance process through a creative lens. Additional rehearsal dates and times are TBD.

Class Notes: The fall 2020 production will focus on Horizontal Theater. The production will be led by [Jay Stull](#) and [EllaRose Chary](#).

Class Notes: Instructors will conduct interviews with students to gauge course interest.

TDM 90AR Info Sessions for Course Presentation Period will take place on Tuesday, August 18 at 10-11am ET and Thursday, August 20 from 6-7pm ET. Please visit the Canvas course website for more info and Zoom links.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Theater, Dance & Media 90BR

New Species: A Hybrid Studio (205031)

Phillip Howze

Tara Ahmadinejad

2021 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Department

Enrollment Cap:

15

Co-taught by multidisciplinary artists Phillip Howze and Tara Ahmadinejad, New Species: A Hybrid Studio, is a research and production-centered studio course designed especially for students who are interested in rewilding their curiosities and engaging new skills. Working individually and collectively, students will generate interdisciplinary performance works that defy definition, and take advantage of remote engagement and collaboration. Riffing off of themes in Howze's latest interdisciplinary play--which examines our relationship to community and the contemporary moment through the lens of land, artifact, burial rites, and the poetry of personhood--students will create their own original works that will culminate in an end-of-semester production, directed by Ahmadinejad.

TDM production studios frame and involve participation in Theater, Dance & Media's twice yearly professionally directed and designed productions. The preponderance of time for this course will be dedicated to the rehearsal process and performances, where the integration of theory and practice, and theater, dance, and media take place. Students will meet with the course head for seminar discussions at designated times (TBD) to examine the entire performance process through a dramaturgical lens.

No previous theater experience is required. Students from other concentrations are strongly encouraged to participate.

Course Notes:

TDM 90BR is required of concentrators and open to other students involved in the TDM spring production (as actors or apprentices on the

production team). Participation is limited to students involved with the production, either as performers or as members of the production team. Students who wish to be part of the production team should contact Artistic Producer James Stanley, jamesstanley@fas.harvard.edu

Class Notes:

Two synchronous shopping gatherings will be held:

Tuesday, Jan. 19th from 12:00 - 1:00pm EST

Thursday, Jan. 21st from 3:00 - 4:00pm EST

All students who are interested in the course should try their very best to attend one of these two meetings as Tara and Phillip will be sharing important course information that the students won't be able to glean from the offline materials.

This course is cross-listed in Art, Film & Visual Studies, and Folklore & Mythology: Concentrators in these departments may take this course for concentration credit this term.

Harvard Dance Project (160653)

Laura Rodriguez

2021 Spring (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The Harvard Dance Project cultivates invention, captures imagination, and fosters the courage of artistry.

The Harvard Dance Project will be a remote studio-based course focusing on project based collaborative performance research, choreographic composition, curation and camera dances, video editing for movement, and links choreographic thinking to other fields. The course will explore interdisciplinary approaches to facilitate independent and interdependent virtual performance possibilities in Spring 2021. Over the course of the semester, students will have opportunities to curate, showcase, and deepen their performance practices. Professor LROD (Laura Rodriguez) will lead HDP with Teaching Assistant Danny Rivera.

Course Notes:

Some dance, interdisciplinary, and collaborative experience is required. Students concentrating in Theater, Dance & Media or interested in developing a performance practice encouraged to enroll. Enrollment determined by audition during shopping week. Fulfills a TDM Production Studio requirement.

Come speak with Professor LROD about your experience and interest in the course.

Class Notes:

SEEKING dancers, poets, actors, writers, visual artists, performance artists, musicians, and art curators with interest in virtual performances, deepening artistic courage & vision, and developing interdisciplinary skills with media design.

During course presentation times, LROD will provide a brief presentation of what HDP looks like as a virtual course, and answer any questions you may have. Please come to one presentation to sign up for individual audition times.

For individual auditions please consider a brief introduction of who you are, your experience with performance, dance, technology, design, and why you are interested in taking this course. This individual meeting time is conversational and casual and if you wish to share links, portfolios, or websites of your previous experience please email to LROD.

AUDITIONS DURING SHOPPING WEEK:

Join one 30 minute course presentation via zoom and sign up for individual audition times.

Presentation times

FRIDAY, 1/15 4 - 4:30 PM & 5:30-6 PM ET

TUESDAY, 1/19 11-11:30 AM & 1:30-2 PM ET

Recommended Prep:

Previous dance experience required.

Theater, Dance & Media: See it. Do it. Make Theory. (160648)

Julia Smeliansky

2021 Spring (4 Credits)

Schedule: M 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 30

What are theater and dance? What is at stake when a performance is live or recorded? How do performers use space, time, and bodies to make meaning? What is the relationship between a performance and a script? Why do performers and audiences gravitate to live arts? How do economic and political circumstances shape live performances? This sophomore tutorial in Theater, Dance & Media provides students with an intellectual and practical foundation to the concentration by exploring these questions and more. Readings will include theoretical texts from Schechner, Phelan, and Chaudhuri, alongside scripts and other performance materials by Kennedy, Bausch, Kaprow, and Smith. Assessments emphasize how to write about performance and how performance serves as a form of criticism.

Theater, Dance & Media 109

Beginning Acting Through Scene Study and Monologue Work (207571)

Marcus Stern

2020 Fall (4 Credits)

Schedule: T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: n/a

This is a beginning acting class designed both for students who have had no previous acting, performance or arts class experience at all, as well as for students who have had a fair amount of acting experience. The focus is on scene and monologue work using contemporary texts from theater, television and film. Core components of the class include the idea of simply working from yourself, "action-based acting" (how one person is trying to change/affect another person in a scene), and how to read a scene or monologue to figure out what your character might want from that situation. Students learn how to rehearse outside of class with a long-distance scene partner, and how to present that work both live and in a pre-recorded format. This class can also be helpful for directors, writers, designers, dramaturgs, stage managers, choreographers and dancers interested in learning more about acting techniques in performance. It is important to note that while the class is intentionally designed to be as unintimidating and accessible as possible, created with the absolute beginner in mind, the class does require a great deal of outside work. Students should expect to spend 4-6 hours per week on class work, including time for analyzing texts and rehearsal time for the scenes and monologues.

Course Notes:

Enrollment will be determined by submitted audition videos: Please prepare a 1-2 minute contemporary monologue. Choose any piece of text (1990's to the present) from any theater, television or film script. Choose a text you can relate to in some way, that feels comfortable and real to you when you say the words out loud. Please memorize the text and practice saying those lines until they feel natural to say. Then, please record your monologue (using your phone, or whatever device you want) and email the recording or a link to the video to both

marcus_stern@harvard.edu and ashleigh.d.reade@gmail.com no later than 1pm ET, Friday August 21st. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access.

Please feel free to email us if you have any questions about the class, or about preparing and sending in an audition monologue.

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes: TDM 109 Info Sessions for Course Presentation Period will take place on Monday, August 17 at 9-10am and 5-6pm ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media 110

Foundations in Acting: Pathways (112880)

John Kuntz

2021 Spring (4 Credits)

Schedule: TR 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

A beginning acting class that explores the basic techniques of acting, including the various entry points to building a character as well as various techniques to rehearsing a scene or speech. Beginning with exercises that flex the imagination and heighten observation; the course will then move towards work on an actor's instincts, rhythm, focus, trust, concentration, text analysis, language and other techniques, with an ongoing emphasis on improvisation and the actor's imagination. Students will select, edit (if necessary), memorize and perform two contrasting monologues of their choice during the course. Speeches will receive in-class feedback and coaching. Especially suitable for first-year and sophomore students as well as for directors, writers, designers, dramaturgs, stage managers, choreographers and dancers interested in learning more about acting techniques in performance.

Course Notes:

Enrollment determined by audition. Students will audition for the course with a short improvisation described by the professor during the course shopping/pre-registration period.

Class Notes: TDM 110 will be holding sessions for interested students during shopping week on:

Friday, 1/15 from 1-3pm

Tuesday, 1/19 from 10:30am-12:30pm

If you are interested in taking the class, please arrive at the beginning of one of these two sessions. There will be a brief introduction and then present individuals will be assigned an individual time slot for the audition.

For your audition, please prepare one of the following:

A short speech (1 min or so) from the play (or other source) of your choice.

A personal story or anecdote you feel comfortable sharing

A really good joke

(Note: Please don't be stressed at all by this audition! This is just a chance for the instructor and faculty to get to know you and what kind of a performer you are!)

In addition, there is a short form for you to fill out before your audition: [click here to do so!](#)

Advanced Acting: Contemporary Texts (122906)

Marcus Stern

2021 Spring (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Using contemporary text from TV, film, and theater, this course introduces advanced acting techniques through scene and monologue work. Core components of the class include the idea of "simply working from yourself" and action-based acting, which explores how one person is trying to change/affect another person in a scene. In addition, students will learn how to read a scene or monologue to figure out what your character might want from that situation, audition techniques, how to choose material that best suits the individual actor for auditions and scene work, text analysis, and personalization of a character. All of the concepts are aimed at the creation and refinement of an acting process that can be specifically tailored to the individual actor. This course has been adapted for the online classroom, and we're excited about the concrete results we're seeing from the student actors who have been working with us virtually!

Course Notes:

Enrollment determined by audition.

Class Notes:

Enrollment will be determined by live audition in the information/audition sessions on Friday, January 15th from 11:00am-1:00pm ET or Tuesday, January 19th from 11:00am-1:00pm ET. Please prepare a 1-2 minute contemporary monologue. Choose any piece of text (1990's to the present) from any theater, television or film script. Choose a text you can relate to in some way, that feels comfortable and real to you when you say the words out loud. Please memorize the text and practice saying those lines until they feel natural to say. If you are unable to attend one of the audition sessions, please record your monologue (using your phone, or whatever device you want) and email the recording or a link to the video to both marcus_stern@harvard.edu and ashleigh.d.reade@gmail.com no later than

Tuesday, January 19th at 1:00pm ET. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access. Please feel free to email us if you have any questions about the class, or about preparing an audition monologue.

Squaring the Circle: Russia, Art, Revolution (208135)

Daria Khitrova

2020 Fall (4 Credits)

Schedule:

TR 0130 PM - 0245 PM

Instructor Permissions: None

Enrollment Cap:

n/a

Wherever an avant-garde movement sprang up, its artists would announce they were there to change the world. Nowhere did this promise come closer to fruition than in Russia of the 1920s. This course explores Russian and Soviet avant-garde art and its most radical manifestations in literature and dance, on stage and screen, in visual arts and in the ways of life. We will examine the way art and political revolution impact each other and focus on the many "isms," avant-garde and otherwise, that shaped society and the arts during a period of rapid modernization and experimentation: Futurism, Suprematism, Constructivism, Productivism and others. We will look at works by Malevich and Meyerhold, Tatlin and Mayakovsky, Rodchenko and Stepanova, Nijinsky and Meyerhold, Vertov and Eisenstein.

Course Notes:

No prerequisites. All readings in English.

This course is cross-listed as SLAVIC 114 and TDM 114K.

Class Notes:

Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes:

Acting Shakespeare (119020)

Remo Airaldi

2021 Spring (4 Credits)

Schedule:

T 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course is an intensive study of Shakespeare's dramatic works from the point of view of the actor. It is important to remember that Shakespeare's verse dramas were written to be performed and that only when they are approached this way - as playable, theatrical texts - that they have their maximum impact. Through text analysis, scene study, vocal work, and acting exercises we attempt to find not only the meaning, but the music and theatrical power of Shakespeare's words.

Course Notes:

Enrollment will be determined by an audition during the first class meeting.

Class Notes:

This class will meet and hold auditions during Shopping Period on Friday, 1/15 from Noon to 2PM (Eastern Time) and on Tuesday, 1/19 from 3 to 5PM (Eastern Time). (If neither of these times work for you, please contact the instructor.)

Acting Alone: Voice, Speech, and the Monologue (108799)

Remo Airaldi

Erika Bailey

2020 Fall (4 Credits)

Schedule:

MW 1200 PM - 0115 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course will explore the rehearsal and performance of theatrical monologues with a particular focus on voice and speech training. The ability to work on a monologue--whether in the context of a play or as an audition piece--is a foundational skill for all actors. We will explore various warm-up techniques to allow greater vocal and physical expressiveness in both classical and contemporary material. We'll study specific approaches to help students "act alone" creatively, honestly, and spontaneously. Students will also work on the presentation of a monologue in the context of an audition and will learn to create an effective self-tape.

Course Notes:

Enrollment determined by short interview/audition.

Class Notes:

Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if

the meeting day/time is challenging due to your residing time zone.

Class Notes:

During the Presentation Period the instructors will meet individually with everyone who is interested in enrolling to discuss the class and answer questions. Students should also be prepared to read a short monologue during these sessions, which will take place on Mon 8/17 at 12-2pm ET, Wed 8/19 at 12-2pm ET, and Thurs 8/20 at 3-5pm ET. If students cannot attend one of these sessions please email the course instructors to arrange for an alternate time. More details are on the Canvas course website.

Vocal Production for the Stage (118497)

Erika Bailey

2021 Spring (4 Credits)

Schedule: MW 1030 AM - 1145 AM

Instructor Permissions: Instructor

Enrollment Cap: 12

Whether one is performing in a play, pitching an idea, presenting research or leading a group, the ability to use one's voice effectively is a primary element in the success of the performance. The importance of a rich and varied voice has only increased as we communicate and perform through zoom and other online platforms. Using several major techniques of voice training from the field of acting, students will learn the possibilities, nuances and power of the human voice. We will explore both ideas of vocal authenticity and vocal transformation. Preference is given to Theater, Dance, and Media concentrators, but students with no previous voice or theater experience are welcome in this class.

Class Notes:

There will be two shopping periods for TDM 119:

Friday 1/15 at 9:30-11am EST

Tuesday 1/19 at 5-6:30pm EST

There will be a 20 minute information session about the class and then those present and interested will scheduled a 1 on 1 sessions (5-10 minutes) following the info session.

Performing Criticism (216430)

David Levine

2020 Fall (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

What makes "Great Criticism?" Analytic clarity? A surfeit of objectivity? Dedication to art and artists? Or is great criticism more like great art, relying on a strong point of view and deep personal investment? This course tests the latter view, by treating works of criticism as dramatic monologues to be analyzed, invested with desire, and performed. We will use techniques of script analysis to pay closer attention to how arguments are constructed, and acting techniques to listen closely for the ways that criticism is always, to quote Nietzsche, "the confession of its originator, and a species of involuntary and unconscious autobiography"

This course will range through the history of English criticism from Philip Sidney to Zadie Smith. Students will also learn basic techniques of script analysis, acting, and public speech, and apply these techniques to works of criticism, culminating in a final recorded performance of an essay-as-monologue.

Class Notes:

Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Class Notes:

TDM 125X Info Sessions for Course Presentation Period will take place on Monday, August 17 at 4-5pm ET and Thursday, August 20 from 10-11am ET. Please visit the Canvas course website for more info and Zoom links.

Theater, Dance & Media 130R

Directing (123080)

Marcus Stern

2020 Fall (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

9

Redesigned in response to the pandemic, this is a directing class for storytelling and some of the various forms it can take online. It's a class for directors, actors, writers, choreographers, dancers and any others interested in exploring online vocabularies, refining their voice as storytellers and artists. The course accommodates all levels of directing, from beginners with no experience, to advanced directors who are interested in a career of directing in theater and/or film. The emphasis is on telling stories that are of personal interest to you, defining your story points and desired visceral impact, and learning techniques to help you accomplish your vision. Each student directs 5 very short pieces in the first 8 classes and then 3 longer pieces over the rest of the term. Directors learn how to work with long-distance actors in terms of staging and acting values and how to assess actors' spaces for directorial possibilities. Students usually pre-record their work for presentation but have the chance to present stories live online during class time.

Students may direct their own writing (however, feedback and focus will primarily be on the directorial choices), and direct themselves as actors if that's of interest to them. Students will use free basic video editing software to create their video work, but no previous video experience is necessary. While we'll look at how the camera and editing are used in some of the storytelling, this is not a technical filmmaking class. The central focus is on how a director's personal experiences and/or passions can creatively and concretely shape their story telling.

Course Notes:

Enrollment determined by the instructor after viewing student Introduction Videos. For those interested in taking the course, please submit a short 2-5 minute Introduction Video. Please include the following:

- 1) Your name, year, and concentration if you have one.
- 2) Why you're interested in taking the course. What do you hope to get out of this course?
- 3) If you've had any directing, theater, film or other kind of storytelling experience. No previous experience in any of these areas is needed to take this course.
- 4) Please tell us two things that feel personally important to you in life. We want to encourage students to make work that they feel personally connected to.

Please email these introduction videos or a link to the video to BOTH marcus_stern@harvard.edu and annabeth_lucas@g.harvard.edu no later than 12pm ET, Friday, August 21st. If videos are sent by Google Drive link, make sure your permissions are set such that we can immediately watch the video without requesting access.

Class Notes:

Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Directing Lab (126812)

Shira Milikowsky

2021 Spring (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This class is designed for students interested in expanding and exploding their understanding of theater and performance studies. Directing lab is actually a laboratory: a place for hypothesis, experimentation, and

practice. Over the course of American theater history thus far, who have been the great experimenters? Which directors have broken the rules and re-defined the game? Does innovation come from a single auteur, a tightly woven ensemble, a well-funded institution or a band of rogue outsiders? This class will tackle these and other questions, weaving together theory and practice to provide students with a holistic understanding of the American avant-garde and a set of practical tools with which they can tackle their own, burning artistic questions.

At the root of experimentation are questions of power and oppression. As we examine the innovators of American theater in the 20th and 21st century, course materials inherently probe questions of access and inclusion. Who is invited in? Who is left out? Which creators truly held the tools to challenge the status quo? Was their work allowed to be seen, heard, and felt? In this course students will engage in these questions not only by reading the history, but by creating and directing their own work, inspired by the artists and productions studied.

Convention tells us that 'you have to know the rules to break them,' but Directing Lab isn't a course about convention. This class is open to students with all ranges of directing experience - including none. The only prerequisite is curiosity.

Course Notes:

Enrollment determined by short interview during course shopping/pre-registration period.

Class Notes:

This class will meet Mondays, from 12:00-2:00PM ET.

There will be *three* information sessions. Sessions are about 30 minutes, with time for questions at the end.

- **Friday, 1/15 @ 12pm ET**
- **Friday, 1/15 @ 5pm ET**
- **Tuesday 1/19 @ 12pm ET**

If you would like to be considered for enrollment, please send an email requesting admission to Shira (shira.milikowsky[at]gmail.com) and to James (phillipjamesmontano[at]gmail.com) (please cc: us both) by 11:59pm ET on Tuesday, 1/19. The email should contain a short paragraph telling us your name, graduation year, why you're interested in the course, and anything else about you that you'd like to include. Don't overthink it! A *short* paragraph will suffice - we are interested in getting to know something about you and your goals for the class. Selected students will be notified by email by 12pm ET on Wednesday, 1/20.

CoLLab: Disruptive Performance in Liquid Times (212801)

The poet Askia Muhammad Tore asked whether Black music could become "a potent weapon in the Black freedom struggle." Can we ask the same of theater and performance that we might identify as what playwright Naomi Wallace calls, "engaged" ? Wallace offers the term up through example rather than definition: "Engaged, for example, with questions of power and its myriad forms; questions of who has it and who doesn't, and the reasons why. Questions of what happens to those who struggle with their disempowerment; who we are allowed to touch, what colour of skin articulates which desire; what orifices are worthy of worship; which of us is beaten to death for not following the rule book on acceptable sexual conduct - all these are questions intimately connected to our social contracts."

If this is a moment when what we formerly believed were necessary qualities of theater and performance— including: presence, simultaneity, buildings, proximity, liveness, actors, and audiences – are not fully operative, how can we use this *aesthetic* disruption to rethink the *ethical* possibilities and priorities of the practice and the field? What *now* can be done as theater? What *now* can be performance?

This research-based class will develop a partial snapshot of this historical moment in contemporary theater and performance. Together we will sift through the overwhelming numbers of performance works, talks, TikTok manifestos, chats, debates, panels and archival materials accessed on the internet after CoVID restrictions shut down face-to-face assembly in theatrical venues and we will identify what we think is both aesthetically compelling *and* "engaged." Class participants will be responsible for deconstructing the aesthetics and ethics of those works and performance-based initiatives, teaching what they learn to one another throughout the semester using the format of "teach-ins" (practical, participatory learning sessions that are action oriented). The final results of our research will be recorded in a collectively authored digital book, a platform that allows for different formats of critical analysis to be staged alongside the rich media that served as our research archive. The book will document our collective reflection on the significance of each of the projects we have identified and the hope is that the act of bringing each individual project together might reveal some commonalities, some new possibilities of aesthetic and political solidarity.

Students will collaborate to research and identify which artists and institutions, (both insiders and outliers) across the globe who are using this moment to radically reconceive theater and performance that we might call "engaged." We will debate our own understanding of how that term that can be pertinent for this political moment or whether there need to be better aesthetic and theoretical descriptors. Then our task is to discover who is using the instability of theater and performance in this moment to challenge the terms of the how the practice can be thought, done and the ways in which it is in concert with social justice initiatives and movements. We will become researchers of the present and future of the art form, seekers of those who are experimenting with liberating artistic practice, as Robin D.G. Kelly writes, in order to "build community, establish fellowship, play and laugh, and plant seed for

Anti-Theater (217584)

David Levine

2021 Spring (4 Credits)

Schedule: W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

What if the classics offer us nothing? What if catharsis is BS? What if the "power of stories" is just marketing, and theater is inherently reactionary, elitist, out-of-date, and steeped in white supremacy? What then?

This studio class takes these positions as givens, and tries to create something faster, slyer, less prone to institutional capture. Students will create new works, rip apart old ones, and process the structural conditions of "American Theater".

Actors, directors, designers, and aspiring dramaturgs welcome.

Course Notes:

This course is best suited to students who have taken two theater classes at Harvard, participated in two productions (extra-curricular or in TDM), or have equivalent experience.

Class Notes: Info session: Wednesday, January 20, 3pm Boston time.

Koteba Performance: Traditions of the Bamana (217582)

Jeffrey Page

2021 Spring (4 Credits)

Schedule:

W 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

The origin of blues music—and therefore gospel, jazz, and hip-hop—has been traced directly to Mali, West Africa. Within Malian ideology, dance is a culture and there is no separation between dance and theatrical practice. Koteba is a masquerade performance tradition that utilizes the theatrical elements of satire to comment on and confront civic injustices within the Bamana ethnic society. Koteba is a word that means "big snail" in the Bamana language, and like the snail, it carries the ideologies and cosmologies of the Bamana people on its back. There are nearly 20 rhythm and movement stylings situated within Koteba. In a multiday festival, these dances are traditionally performed in succession, and often executed with the dancers forming concentric circles, which gives this theater tradition its snail-like name. Traces of this masquerade tradition can be found throughout the Caribbean and the United States in the form of Carnival and Mardi Gras.

This class will focus on unpacking four of the dance and rhythm stylings over the course of 12 weeks: (1) Forokotoba, (2) Tansole, and (3) Bara/Baradong. The traditions of Noh drama, Sanskrit theater, and Greek tragedy have informed the development of American dance and theatrical forms, and similarly, a deep investigation of Koteba masquerade performance traditions will offer students of theater and dance informative tools as theorists, practitioners and historians.

Latinx Movement Practice (217446)

2020 Fall (4 Credits)

Schedule:

T 0600 PM - 0845 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

A warm invitation to get up, connect with our bodies, and move together after a long day of zooming. Latinx Movement Practice rigorously explores the social and communal Latin Diaspora of movement, migration, and music from Mexico, the Caribbean, South America, and the United States. The course is taught with a blend of English, Spanish, and Spanglish.

Together we will investigate and deepen our use of horizontal and vertical weight, isolations, polycentric movements, and hip whining techniques. We will weave a survey of the history, art, and literature from the Latinx experience through an embodied experience while fostering our virtual community. LROD (el rod) will facilitate Latinx Movement Practice with radical tenderness to embrace deeper states of power, awareness, and energetic alignment during movement rituals for heightened connectivity, and restorative power. ¡Vamos a Bailar!

Key Questions:

How do we foster a sense of community in movement during the era of zoom and isolation?

Can we deepen our movement intentions and embrace our artistic voices, while simultaneously creating space for joy and empowerment?

What are the ways we share and celebrate each other's movement investigations each week.

Course Notes:

No previous Latin movement experience is needed to enroll.

Class Notes:

Enrollment Cap:

20

What are the similarities between Las Vegas pop diva concert design and performances at the Theater of Dionysus in 5th Century BCE Athens? How do theater architecture and design reflect changes in society? What is the process of designing an opera or a musical? This course will introduce students to some of the most influential 20th and 21st-century directors, designers, and performance artists. We will explore a range of artistic movements that cross-pollinated the visual arts and theater over the past century, and trace the artistic heritage of current theatrical experiments to their avant-garde roots. Examining how meaning in the theater is derived not only from text but also from spatial composition, light, and overall design concept, we will study a variety of approaches to storytelling in theater, dance, and opera. Working with primary sources in the Harvard Theatre Collection, students will develop and present short creative projects based on a wide range of theatrical texts. Students will also meet with guest artists to engage in a dialogue about contemporary design practices.

Class Notes:

Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Great design for live performance requires synergy between all the key elements to unlock the visual power of a play. This course explores the fundamentals of set, costume, lighting and sound through critical texts and applied projects.

Students will be taught the fundamentals of design with an emphasis on script analysis, research and the articulation of a design concept through rendering, collage, model building with an introduction to basic drafting principles. The goal is for students to develop key skills for conceiving and designing visual elements for live performance. Students should not expect a technical survey, but rather an exploration of how visual elements shape a given performance.

Class Notes:

Presentation Period

Tues 01/19 at 12-1pm ET

There will be a short introduction at the top of the hour, followed by Q&A's. Students can show up at any time during the hour.

Interested students should send an email with name, background experience in theatre or the arts and a short note on why they would like to take the class to Dede Ayite at dedeayite[at]fas.harvard.edu. No previous experience in Theatre is required to take this course.

Students should add the course to their Crimson Cart by Thur. 1/21 at noon for instructor approval.

Transformative Design: Introduction to Costume Design (214575)

Dede Ayite

2020 Fall (4 Credits)

Schedule:

T 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

If all that is truly needed to tell a great story is an actor and an audience then what is design for the stage and what can it do?

This class explores the design of visual and material elements for the stage. How it can amplify, interpret and extend the message of the production to the viewer through delight, astonishment and provocation. Together we will explore how costume design can even assist in changing a cultural narrative.

Transformative Design is rooted in the principles of theatrical design practice as a process to explore the

breadth of these questions. The professor will first demonstrate the design process that a costume designer undertakes, from start to finish. Students will learn how to read and research an existing dramatic text as a designer and how to manifest the vision of the designer's other collaborative artists – director, choreographer, dramaturg and actors – in visual terms.

Design (whether a designer creates a costume, a prosthetic, a material prop or piece of scenery) can also transform the performer and shift the very terms of representational embodiment. For the actor, design can change one's understanding of the physicality, the intellectual and emotional life of the character they are engaged to portray. Students will learn how to sketch and design costumes that assist in transforming the performer's body, and how to collaborate with everyone involved in a theatrical production.

After carefully following the steps of a professional costume designer preparing for theatrical work, students in the class undertake an individual design project, from start to finish, under the supervision of the professor.

Class Notes: This course is taught by TDM Lecturer on Design and Obie and Lortel Award-winning costume and scenic designer [Dede Ayite](#).

Class Notes: Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone. Once enrollment is set, alternative course meeting times may be determined. James Stanley

2021 Spring (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Course Description: How can vinyl records, legal transcripts, classic movies, home recordings, 19th century burlesque routines, or old photographs become the raw materials for some of today's most compelling theater? And how do these works ask audiences to reconsider our inheritance of the past, creating a dialogue between the past and the present? This course focuses on theater-makers and processes of production that turn objects, archives and cultural data from the past into vibrant forms of contemporary performance. In the first half of the course, we will explore works by Tina Satter, Alison S. M. Kobayashi, Phil Soltanoff, Kaneza Schaal and Object Collection (among others), meet with these artists to discuss their processes, and take a deep dive into our own archives at the Harvard Libraries. Moving from theory to practice, we will then devise our own solo and collaborative works based on objects and artifacts of our choosing. This course is for writers, directors, designers and performers willing to work across disciplines.

Class Notes:**Shopping Week**

Tuesday, January 19th from 2-3pm EST

Thursday, January 21st from 12-1 EST

Playwriting: Ritual Practice and Curious Worlds (207819)

Phillip Howze

2020 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor**Enrollment Cap:**

12

A play is a new world in and of itself. What sorts of strange, curious worlds are theater makers crafting today? What approaches are they taking to create these worlds?

In this new playwriting course we will explore both text and non-texts, the wild (as well as the conventional) to discover what drives contemporary plays, devised works, and performance today.

We will discuss the practices employed by various playwrights and directors—particularly women and artists of color—and try our own hand at some of these approaches. In addition, we will see live performances in realtime; engage special guest/visiting artists; collaborate with fellow classmates; and expand our curiosities.

Most importantly, we will write. This is an exploratory writing workshop with a focus on generating new material. By the end of the semester, you will have created a portfolio of new works, ideas, processes and rituals.

Class Notes:

Theater 000 (216730)

Lex Brown

2020 Fall (4 Credits)

Schedule:

M 0600 PM - 0845 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

Where do you see yourself in 5 years? On Broadway or in a bunker? As we find ourselves gearing more toward the latter, this course will help students unthink what they know about theatrical performance and strip it down to its most mobile and visceral parts. Theater 000 considers dramatic performance an essential human activity: an interpretive skill that can serve as entertainment, information sharing, or escape strategy. Under our unusual circumstances in an ambient disaster, we will delve into the creative process with a search for raw, poetic, and comedic experiences, to "touch reality" at a time when we need it the most.

Using a variety of techniques and prompts, we will devise theater from its most elemental parts – vocalization, light, and movement. Beginning with a piece made completely in darkness, students will progressively build toward a piece with light, sound, movement, music, set, etc. Our texts will be technical, philosophical, and art historical, with subjects ranging from light, sound, physics and color, to surveillance and identity politics. Our goal is to find the impact of the subtle gesture; develop specificity in word choice, movement, and timing; develop the storytelling voice; and build basic skills in performance documentation. Naturally we will be partnering with the camera as the conduit for live action.

Students of all concentrations are welcome, with no requirement for prior experience in acting, performance, or movement. For students with theater experience, this will be an opportunity to reconfigure your toolbag. All students must be ready to be open-minded, non-judgemental of their peers, and desire to find the goodies that are just beyond their comfort zone.

Course Notes:

An additional individual/group working time will be determined after enrollment is determined.

This course is taught by Harvard College Media Fellow Lex Brown.

Class Notes:

Once enrollment is set, alternative course meeting times may be determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Singer + Song = Story (215988)

Stew Stewart

2020 Fall (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap: 12

This course is an immersive, songwriting-based introduction to Stew's musical theater-making practice, a process which views the nexus of writer and song as the seed out of which a more personal, visceral musical theater can emerge. Singer + Song = Story believes in a theater that seeks, via a respect for the inherent dramatic potential of song itself, to capture the intensity of personal testimony that characterizes the best rock, pop, rap, blues and folk songs of our country and the world, with the goal of bringing that testimonial fire to the American theater stage, screen, and street.

Course Notes:

Those with no songwriting experience are welcome.

Class Notes:

This course is taught by singer-songwriter and Tony and Obie-Award winning playwright [Stew](#).

Class Notes:

This is a show tune, but the show hasn't been written for it yet. (217583)

E. Jane

chukwumaa --

2021 Spring (4 Credits)

Schedule:

M 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

This course is a sound studio/workshop exploring the way sound communicates narrative, examining the way sound aids narrative in drama and beyond as well instances where artists and musicians have created music for imagined dramas or conceptualized a song or album as a drama, which is what Nina Simone is describing in the line from the song "Mississippi Goddam" from which the course title is derived. Students will listen to Orson Welles' 1938 radio drama "The War of the Worlds", watch films, listen to songs, albums and soundtracks, and create stand-alone compositions that function or are conceptualized as radio dramas and soundtracks. Students should be prepared to think critically and experimentally about sound and the work they produce and be able to articulate their process and goals for their work. This class will include projects, readings, screenings, listening sessions, discussions, and workshops.

Class Notes:

This course is taught by the performance art duo [SCRAATCH](#).

COURSE APPLICATION:

Submit a 1:30 to a 4-minute long sample of a song or composition* (.mp3) you have previously made. Do not feel any pressure to make anything new. *Please do not submit a straight field recording. Email your submission to ejackson1@fas.harvard.edu and chukwumaa@fas.harvard.edu by January 19th at 11:59 pm EST. Students will be notified of their status on January 20th.

SHOPPING WEEK INFO SESSION:

On Friday, January 15th we'll hold a 2-hour session at 2pm ET to discuss the course and answer any questions you have. Come to the session ready to answer this question: When's the last time a sound, song, or composition told a story for you? * We'll also be available from 11 am - 12 pm EST for office hours.

Nonprofit Producing: Resourcing Creativity and Innovation (216360)

Diane Borger

2020 Fall (4 Credits)

Schedule:

R 0300 PM - 0545 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course will explore theater-producing models in the nonprofit sector and imagine ways to break boundaries and produce work in new ways. Nonprofit theater in the United States has historically been a predominately white institution that has been built on and benefited from racist policies. Working to dismantle those structures and build anti-racist practices into producing theater will be at the core of this course. The course will be undertaken with guest collaborators Dayron J. Miles (A.R.T.) and Maria Manuela Goyanes (Woolly Mammoth Theater, Washington D.C.), in addition to five professional theater-makers who will work directly with students in small groups with particular attention to new models of producing that embed anti-racist practices.

Students will learn about the history of theatrical producing and the evolution of the job of the producer. The course will examine the role of the producer in facilitating creative development and providing dramaturgical support, as well as resource allocation, budgeting, and contract negotiation and writing. Additional units will focus on labor negotiations and collective bargaining agreements, financial analysis, artistic mission and vision, commercial vs. nonprofit producing, and the role of the audience in performance - and how all of these must change going forward.

As a culminating project, students will apply what they've learned over the course of the semester and work with the professional artists to develop producing plans and strategies for a range of theatrical performances and experiences, centering anti-racist practices.

Class Notes: This course is taught by American Repertory Theater Executive Producer Diane Borger.

Class Notes: Once enrollment is set, alternative course meeting times may be

determined. Please contact the instructor or tdm@fas.harvard.edu if the meeting day/time is challenging due to your residing time zone.

Theater, Dance & Media 181B

Street Dance Activism: Embodying Liberation Through Somatic Practices and Rituals of Breath (217409)

Shamell Bell

2020 Fall (4 Credits)

Schedule:

F 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

In this participatory hybrid course, we explore the creation and implementation of [Street Dance Activism](#) as a Co-choreographic somatic^[1] healing modality, and form of spiritual transcendence, through participating in the *Global Dance Meditation for Black Liberation* and deeply engaging with [The Ritual of Breath is the Rite to Resist](#)^[2]. Street Dance Activism's [28 Day Global Dance Meditation](#) features embodied meditation & movement sessions led by Black, Indigenous, People of Color + Queer guides from multiple wisdom traditions and healing practices. It takes 28 days to change a habit, so imagine if we took 28 days to focus on our liberation. Liberation not only as a single entity, but as a global, collective consciousness. Black liberation is your liberation, and your liberation is Black liberation.

This interdisciplinary course uses somatic practices to engage with the historical context and legacy of public rituals of extreme violence against Black people as both sites of anti-Black state, and non-state sanctioned disciplinary projects, as well as time-spaces of radical resistance. At the center of these forms of violence are the control of *breath* as life force, and as a sign of freedom. We discuss the past, present, and future all occurring in the now as we examine the murder of George Floyd in May 2020 as an officer pressed his knee against Floyd's neck for nearly eight minutes as Floyd repeatedly lamented that he could not *breathe*.

We explore theories of ritual and performance to understand how artists and communities come together as collectives to contextualize and re-present impossible terrors. Artists and grassroots organizers use aesthetics and collective action to transform the horror of being subject to violence at any moment into rituals of *breath* and potential social transformation. This course then teaches students theories of ritual and performance as ways that communities have historically engaged and confronted histories of anti-Black violence in order to conceive of new future possibilities to embody liberation in the face of disciplinary actions meant to contain and choke Black people. It is my intent for us to become guides to bring social activists into the classroom and the pedagogy out into the streets.

Black Arts Movement to #blacklivesmatter (217585)

This course situates the "Black Arts Movement"(1965-1975) in its historical context, but also places our explorations in this present moment where artists continue to light the torch of art reflecting the times, as our ancestor Nina Simone so eloquently asserts as "our duty". Scholar Larry Neal writes in his seminal piece:

" The Black Arts Movement is radically opposed to any concept of the artist that alienates him from his community. This movement is the aesthetic and spiritual sister of the Black Power concept. As such, it envisions an art that speaks directly to the needs and aspirations of Black America."

As this course begins during the celebration of Dr. Martin Luther King Jr.'s birthday, let's place MLK in the context of the material conditions in Black communities during the Black Arts Movement, which Larry Neal [coined](#) as the "aesthetic and spiritual sister of Black Power." This act is often seen as the starting point of the Black Arts Movement. In a Time article, ["A Riot Started in Newark 50 Years Ago. It Shouldn't Have Been a Surprise."](#) Arica L. Coleman writes, "Martin Luther King Jr. aptly predicted just such a riot in a speech titled ["The Other America,"](#) which he delivered at Stanford University on April 14, 1967, three months prior to the unrest. "All of our cities are potentially powder kegs," he said. While King maintained his commitment to nonviolent civil disobedience, he also [recognized](#) the psychology of oppression.

In this course, we will explore the legacy of the Black Arts Movement and its manifestations in today's Black liberation movement. In addition to required and suggested readings, we will supplement course lectures with selected films and musical selections. This course takes an ethnographic and interdisciplinary approach to mapping the historical, geographical, and socio-political trajectory of the Black Arts Movement to #blacklivesmatter by highlighting the motivations, strategies, and experiences of community organizers on the ground. The narratives of grassroots organizers from groups such as Justice 4 Trayvon Martin and those organizing for #blacklivesmatter across the United States, will provide nuance to our understanding of an international movement that we now know as Black Lives Matter. Students will be encouraged to explore their own foundations and personal stories connecting them to the Black liberation struggle past, present, and future. The course culminates with a "Community Gathering" that will feature short student documentaries of their group projects. The gathering will include a collaboration with Dartmouth Students, activists on the ground, and community members to continue to move the work of the people on the ground forward, and the work of the students outside of the classroom, and into the community.

Class Notes:

This class will meet on Tuesdays, 3:00-5:00PM ET.

The Power and Relevance of the American Musical: 1776 and Other Musicals (205365)

Ryan McKittrick

Diane Paulus

Jeffrey Page

2021 Spring (4 Credits)

Schedule:

W 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

12

With a focus on the American Repertory Theater's upcoming revival production of the musical *1776* co-directed by Jeffrey L. Page and Diane Paulus, this course examines how the musical theater can uniquely and powerfully inspire audiences to reflect on history, politics, race, and identity.

Analyzing scenes and songs from *1776* and other musicals including *West Side Story*, *Cabaret*, *Hair*, *The Wiz*, and *Hamilton*, students will explore the multiple layers of meaning created by the combination of music, lyrics, choreography, staging, book scenes and design.

Students will read works by theorists, historians and practitioners, examining the cultural significance of these shows in the years they opened on Broadway, how they have evolved in revivals and adaptations over time, and how they resonate today. In addition, students will engage directly with guest artists who will share their practical experience creating work in the musical theater.

Course Notes:

This course will take place from 12-2pm ET.

Topics in Advanced Performance Theory: Gender and Sexuality (126954)

Robin Bernstein

Debra Levine

2021 Spring (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

24

In this seminar, we will listen to and participate in current conversations in Performance Theory about gender and sexuality, especially as both these categories intersect with race. Topics include racialized and gendered structures of feeling; queer transnational social histories; technosexuality and mutation; and minor keys of Black unruliness and fugitivity. Reading includes works by José Esteban Muñoz, Paul Preciado, Saidiya Hartman, and Kareem Khubchandani. This is an advanced course intended for graduate students and upper-level undergraduates.

Course Notes:

Note: This course may count for the WGS Theory foundation requirement or the 1400 level requirement, but not both.

Synchronous attendance required. Class meetings will not be recorded.

This course is co-taught with Debra Levine.

Tutorial - Junior Year: Research and Methods (109933)

Sarah Richardson

2020 Fall (4 Credits)

Schedule:

TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

The course is organized to support student success in writing a junior research paper. We will read a variety of texts and interrogate closely how topics are approached in literary and cultural studies, in social and historical studies, and in life-sciences, in order to become prepared to discuss critically different methodological approaches and theoretical frames. Students will also work in small groups with a tutor, who will guide them through their research and writing on the particular topic of their interest.

Course Notes:

WGS Juniors are expected to take 98s in the spring term. This course is only open to students planning to be on leave in the spring term of the junior year. Permission from the DUS in WGS and updated plan of study required.

Power, Knowledge, Identity: Critical Approaches to Race and Ethnicity (208114)

Eleanor Craig

2021 Spring (4 Credits)

Schedule:

MW 0130 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

20

How might critical attention to race and ethnicity as they intersect with gender and sexuality—and also frameworks of indigeneity and class—shape how we study? How do these lenses shift the questions we ask, the information that counts as data, and the genres of work that we recognize as 'academic'?

For those newer to studies of race and ethnicity, this course provides intersectional frameworks for recognizing what assumptions undergird academic projects and fields of study. For those familiar with ethnic studies, it aims to serve as a 'Theories and Methods' course, providing tools and strategies for refining one's own interdisciplinary inquiries.

Course Notes:

Feminist Theory as Critique (142819)

Afsaneh Najmabadi

2020 Fall (4 Credits)

Schedule:

W 1245 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This course begins with feminist critical engagements with other theories and practices, including Marxism, psychoanalysis, and Foucault. It will then move on to debates and discussions within feminism, as well as intersections of feminist theory with other theories including sexualities studies, post-colonial/trans-national studies, transgender studies. One of the major concerns of the course is the relationship between feminism, theory, and politics. Throughout the course, we will discuss the contemporaneous movements that intersected with emergence of these theoretical concerns.

Course Notes:

Synchronous attendance is required; class meetings will not be recorded.

This course fulfills the theory requirement for the undergraduate concentration in Studies of Women, Gender, and Sexuality.

Psychology of the Gendered Body (205489)

Nicole Noll

2020 Fall (4 Credits)

Schedule:

R 1200 PM - 0245 PM

Instructor Permissions: Instructor

Enrollment Cap:

14

Our perceptions of gender—our own and others'—powerfully shape our embodied experiences and behaviors. This course examines the embodiment of gender via the lens of psychological science. We will begin by exploring recent research related to gender and the body, and then study the underlying psychological mechanisms that influence our self-perceptions about gender. Our disciplinary foundation in psychological science will allow us to complicate current understandings of gender and embodiment by considering factors such as sex, race, sexuality, experience, intention, and awareness.

Instructor Permissions: Instructor

Enrollment Cap:

24

In the spring of 2020 many Americans were sent home by the state, to shelter in place and learn new ways of working "safely". Others were deemed "essential workers" and forced to labor under conditions of risk. Some faced homelessness while others fled to second homes. This collision of work and home, public and private, exposed multiple fault lines across the axes of race, gender, class, and sexuality. Our current moment is rooted in a long history in which the home becomes a charged site for racialized, classed, and gendered performances of cleaning, cooking, childcare, and schooling. Topics to include: the division of labor, domestic workers, queer and feminist revisions of home, clutter, homelessness, food and nutrition, home makeovers, and efficiency.

What does it mean to "do" feminism, or to "be" a feminist in the 21st-century United States? What can we make of the dominant social expectations for a woman's life? This course explores contemporary ideals of feminine success, including their physical, familial, professional, and political manifestations. We will engage with highly-contested topics—including sexual violence and Title 9; work-life balance; the imperatives of self-care and presentation; and new models for sexuality, reproduction, family, motherhood, and domestic life—using the tools of theory and cultural studies to interrogate their framing within popular discourse. Throughout, we will critique ideological formations of gender, particularly as bounded by race, class, and sexuality.

How does one balance the demands of "politics" with the subtleties of "artistry?" In this course, we'll write and analyze short stories, paying close attention to key writing concepts such as characterization, voice, point of view, dialogue, and setting, while also investigating thematic issues related to women, gender, and sexuality studies. In addition, we'll read secondary readings by authors such as Audre Lorde, Dorothy Allison, and Adrienne Rich that illuminate the ways in which issues of power, agency, and voice have emerged as key themes in feminist writing. Frequent writing assignments, including written evaluations of peers' stories.

Gender, Race, and Poverty in the United States (207786)

Marya Mtshali

2021 Spring (4 Credits)

Schedule:

T 0300 PM - 0530 PM

Instructor Permissions: Instructor**Enrollment Cap:**

n/a

This course investigates the realities of poverty through an intersectional lens, meaning that we will consider the simultaneous impact of race, gender, sexuality (and other identities) on economic insecurity. In what ways are conversations about poverty and its causes infused with assumptions

and stereotypes related to gender, race, and sexuality? We hear so much in the media about what causes poverty – what is reality and what is myth? How do these myths operate to reinforce and sustain economic inequality? Who and what gets left out of the conversation about poverty? Topics in the course include historical understandings of poverty; intergenerational class mobility; depictions of poverty in pop culture; and bringing attention to populations that often get left out of mainstream conversations about poverty.

Interracial Intimacy: Sex, Race, and Romance in the U.S. (215756)

Marya Mtshali

2020 Fall (4 Credits)

Schedule:

T 0300 PM - 0530 PM

Instructor Permissions: Instructor

Enrollment Cap:

24

What assumptions about race and sex are embedded in the term "interracial," and why are different types of interracial relationships viewed differently? How did White fears of relationships between Black men and White women influence the creation of the Ku Klux Klan? How did the story of Pocahontas influence the development of a settler colonial state? This course investigates the significance of interracial intimate relations throughout United States history and through the lens of race, class, gender, and sexual orientation. Although interracial intimate relations (consensual and non-consensual) predate the nation's founding, they have been considered taboo throughout most of American history. From Sally Hemings and Thomas Jefferson to Meghan Markle and Prince Harry, we will analyze how social perceptions of these relationships shift over time, as well as the economic and legal implications of interracial intimacy in the construction of the U.S. as a nation-state.

Transgender Rights and the Law: Assumptions and Critiques (216115)

Kendra Albert

2020 Fall (4 Credits)

Schedule:

M 0600 PM - 0830 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

How does American law treat transgender, genderfluid, nonbinary, agender, and gender-nonconforming people? What assumptions about gender operate in legal doctrines, and how do these assumptions interact with the lives of transgender people, especially those at the intersection of multiple axes of oppression?

This seminar will discuss contemporary cases involving transgender rights, as well as historical cases where the rights of transgender people were directly or indirectly contested. Readings will incorporate case law, sociological perspectives, critical race studies, feminist theory, and direct first-person narratives. By looking at law through the lens of transgender experiences, the class will critique legal assumptions about gender and reflect upon how law as a whole could be made less cis-normative. No prior legal experience or education is required.

Luxury and Commodity Pleasures: Histories of Gender, Sex, and Racial Capitalism (216397)

Bradley Craig

2020 Fall (4 Credits)

Schedule:

T 0600 PM - 0800 PM

Instructor Permissions: Instructor

Enrollment Cap:

15

This upper-level seminar explores the relationship between the gendered history of luxury—as commodity, aesthetic, and affect—and the history of racial capitalism from slavery to the hip-hop era. Many scholars have increasingly drawn attention to the phenomenon of racial capitalism, or the ways that slavery and anti-black racism were central to the emergence of the modern global economy, while others have interrogated the feminized, sensual, and exotic pleasures of luxury consumption. This course asks what we might learn from thinking about the history of gendered consumer cultures alongside the history and afterlives of slavery, in which black people seem to figure most persistently through the categories of labor and (re)

production. This course instead contemplates the relationship between race, gender, and consumption, identifying the particularly fraught and contested entanglements of blackness and luxury as a constituent element of modern racial capitalism. We will consider how notions of taste, refinement, leisure, style, pleasure, and beauty have shaped and been shaped by blackness globally through representation, performance, fashion, and material and visual culture. Focusing on contested forms of conspicuous consumption during and after the period of slavery, we will interrogate the politics and moral economy of consumer culture through readings that consider black people as both discerning consumers of luxuries and other goods, and also as consumed by processes of commodification and objectification that produce racial and gendered hierarchies.

Enrollment Cap:

15

This WGS Graduate Proseminar will emphasize in-depth, lively conversations with WGS faculty about the interdisciplinary innovations of WGS Studies today, with singular attention to current debates in feminist and queer theories and practices. Each week, one member of the WGS faculty will guide the seminar in wide-ranging conversation about their own intellectual formation, about their own field of expertise, and about where and how their own writing fits into the larger intellectual itinerary of WGS Studies. Discussions focused on the intellectual history of WGS Studies as well as on matters of writing, teaching, and professional development will frame the course. Visiting faculty members may include Robin Bernstein, Michael Bronski, Caroline Light, Afsaneh Najmabadi, Sarah Richardson, and Linda Schlossberg.

Course Notes:

Open to advanced undergraduates and to graduate students from all schools and disciplines.

Is required for the WGS graduate secondary field.

Synchronous attendance is required. This course will not be recorded.

Additional Course Attributes:

Attribute	Value(s)
FAS Divisional Distribution	Social Sciences
FAS: Course Level	Primarily for Graduate Students
Local offset from Cambridge MA	+8 +9
All: Cross Reg Availability	Available for Harvard Cross Registration

Women, Gender & Sexuality 3010A

Supervised Reading and Research-GenderSci Lab. Part one of a two-part series. (213359)

Sarah Richardson

2020 Fall (4 Credits)

Schedule: TBD

Instructor Permissions: Instructor

Enrollment Cap: n/a

The GenderSci Lab supports graduate students working at the intersection of the sciences and gender studies. The lab offers interdisciplinary training in theories and methods for the critical intersectional study of sex/gender in biology, medicine, public health, and the social sciences. Students participate in collaborative research, contribute to peer-reviewed publications, and engage in public outreach.

Course Notes:

Contact the WGS Director of Graduate Studies for application information. Approval is required prior to registration.

The GenderSci Lab is a year-long commitment. Students are expected to enroll in 3010a and 3010b in the same academic year.

Additional Course Attributes:

Attribute	Value(s)
FAS: Course Level	Graduate Course
FAS Divisional Distribution	Social Sciences
All: Cross Reg Availability	Available for Harvard Cross Registration
Full Year Course	Divisible Course

Women, Gender & Sexuality 3010B

Supervised Reading and Research-GenderSci Lab. Part two of a two-part series. (213360)

Sarah Richardson
